

Campus Master Chapter 2821

Ji Feng really did not expect to get the whereabouts of the Alpha Ore so quickly!

—Of course, the ore was not yet available and the exact location of where it was located was not yet known, but the location of the ore was now only a stone's throw away.

The fishing boat's engines were running, and if the skipper could just get to the island he was talking about as fast as he could, he would find the Alpha Ore!

Laser guns! Laser guns! There are so many other weapons and equipment that, if the technology of the laser gun were to be applied to civilian use, there would be countless uses!

Even the smallest application of laser gun technology to civilian use could be of enormous value!

For example, the illusory light curtain technology!

This technology, already matured in the Gamma system, was actually used in the military at the beginning, in the military command, the general no longer need to stare at the computer screen, just need a light screen, everything can be seen at a glance, in control!

And Ji Feng applied a little of this technology to the civilian side, and created a popular market of 3d TV sets, and even the military could not help but be shocked by it, specially sent experts over to learn.

It's not that he doesn't want to take it, but the conditions are still not ripe, but this alone has caused a huge stir.

So imagine how amazing this technology would be to be able to excite the energy source and then, through pulses and converters, convert it into any kind of energy suitable for human use , and how vast the scope of application of this would be!

Not to mention the military uses!

The dark clothes he was wearing blended in with the night, and even from the bow of the boat, one could never tell that there was a person hiding on the top of the cabin.

—I'm afraid no one would have paid any attention to the top of the cabin either! Many people are not used to looking up, and the cabin is a little taller than an adult's height, and the beam above the door blocks the view of people coming in and out.

So even if the ship's master stepped out, he would never notice that there was actually an extra person on his own ship!

As the engine started, the boat began to vibrate. The engine used on the fishing boat was a diesel engine, which was very noisy and vibrated a lot, but it did not affect Ji Feng's hearing at all, and he could hear any little sound in the cabin clearly.

But at this moment, Ji Feng took out his mobile phone and sent a text message to Old Zhou as fast as he could: locate my position!

A few moments later, Old Zhou replied, with only a question mark: ?

Ji Feng then knew that Old Zhou didn't understand what it meant, he immediately replied, "Now I'm going to follow someone to a place, but I don't know where the final destination is, you can locate my position at any time!"

He knew that the phone Old Zhou had given him came with a location function, which was not an ordinary map navigation, but a phone that could be located through other devices, but with encryption, the phone was specially set up and modified, and Old Zhou himself had said that the phone was also just the shell of Hongda, everything else inside was not.

The most important thing was that Ji Feng found that he could not locate him at all, but he had told him that he could locate him if necessary!

This phone came in handy today!

Sure enough, a few minutes later Old Zhou replied, "Understood!"

Ji Feng suddenly had a thought in his mind. It seemed that the boat boss had said that it had taken him nearly half a month to go to sea last time, but he had been unable to get close to the island because the sea was too rough.

In fact, the boat captain could not have been in a hurry, because from the conversation he had just had with his wife, it was clear that they must have been wandering around the island for some time.

If you calculate the amount of fuel they can carry in this fishing boat, there is still time left to spare

Ji Feng's mind turned quickly and he found that the island where the boat boss found the Alpha Ore was at most four or five days away from Treasure Island!

Moreover, this is still based on the speed of the boat boss's fishing boat!

Thinking of this, Ji Feng immediately took out his mobile phone, pressed a number on it, and then sent a message, "Search all the islands according to the fastest speed of the fishing boat, within a distance of about seven days!"

After sending the text message, Ji Feng put his own phone away again. Even though his mobile phone was also a product used within the military, he was still planning to use the one given by Old Zhou on Treasure Island, and he would only use his own phone when it was necessary!

At this time the fishing boat had slowly started, and Ji Feng was about to observe the surroundings when he suddenly heard someone shouting something.

Ji Feng immediately lowered his body and turned his head to look, and saw lights swaying in the distance, and someone was running quickly this way, but it was a few patrolling men who found the fishing boat moving.

"Husband, the patrollers are coming." In the cabin, the ship's captain's wife said.

"Don't mind them, keep sailing!" The boat captain said.

"But we don't have enough fuel!" The skipper's wife said.

“It’s okay, we’ll go to another dock and fill up!” The skipper said, “Turn up the horsepower and drive away quickly, so we don’t have to nag them.”

The boat boss’s wife had no choice but to increase the throttle and the fishing boat slowly picked up speed.

Ji Feng couldn’t help but secretly breathe a sigh of relief, fortunately the boat boss was eager to set off, otherwise, if they really stayed to refuel, or if they were approached by the patrol, then he really wouldn’t be able to hide.

Because the jetty was higher than the bow, standing on the jetty and looking towards the boat, he could see right up to the top of the cabin, and then he wouldn’t be able to hide here, unless he was hiding in the water.

By the time the men on patrol came running, the fishing boat had already sailed a long way out, only to hear them shout a few times from the quay, and the boat’s boss stood on the bow and shouted, “We’re going to refuel, then we’re going to sail right out and come back!”

The people on the pier seemed to know the boat boss and heard his voice, then shone their torches over to make sure there was no problem and didn’t give chase.

In fact, Ji Feng saw that there were several speedboats parked not far away when he was coming, if the patrolling men were to give chase, with the slow speed of the fishing boat, they would easily be caught up.

When the fishing boat finally set off, Ji Feng put his heart down slightly, then sent another message to Bai Zhu, telling her and Yang Bin to go back first and wait for news, and after that, he just lay on his back on the top of the cabin and relaxed.

However, Ji Feng still ran into trouble.

Because an hour later, the boat boss drove the boat to another pier, and he found that the situation at that pier was the same as this side, and when he stood on the pier and looked down, he could also see the top of the cabin.

He had no choice but to shake his head and first put the two mobile phones he had on him on the top of the cabin to secure them, then he quietly dived into the water In fact, his mobile phone was waterproof, he just didn’t know if this one provided by Old Zhou was also waterproof, so he simply left them both behind for safety’s sake.

The boat boss spent a full little half an hour to fill up the fuel and store some in the cabin before setting off again, and this time Ji Feng went up to the top of the cabin again, but his body was already all wet.

At this time, the weather on Treasure Island had turned cooler and the sea breeze blew with a bitterly cold sensation.

However, this coolness did not affect him much, and it even dried his clothes, which made him happy in his misery.

It wasn't long before Ji Feng's attention shifted elsewhere, as the fishing boat had sailed out of the pier and into the sea. He squinted his eyes and looked around, judging the direction in which the fishing boat was heading.

Ji Feng did not want to rely completely on the boat's boss, he had to know exactly where he had gone and in what direction he was heading.

However, in this vast sea, it was not easy to judge the direction accurately, and without any reference, Ji Feng could only make a rough judgement based on his own feelings.

In this way, the fishing boat slowly moved forward, swaying in the wind and waves, and the walk was really torturous.

However the next unexpected problem arose – Ji Feng had no food!

Especially when in the evening, the fragrance wafted out from the cabin of the boat, seemingly reminding Ji Feng that it was already time to eat, yet he could only lie down on the boat.

“..... Am I being too gentle?!”

Sometimes Ji Feng was wondering if he was a little bit not ruthless enough.

If he was ruthless enough, he wouldn't have to hide so foolishly on the top of the cabin, use violent means to grab the boat boss and force him to tell the location of the island, or directly inject the bio-current simulated neurotoxin into the boat boss's body, even if he was made of iron, he would have to give an honest account.

But the boat boss is only an ordinary person after all, if the neurotoxin is used, then the boat boss will become an idiot and will be just an invalid for the rest of his life, which is unfair to the boat boss and even more cruel to the boat boss's wife!

It's not that Ji Feng had never thought about this, but in the end, he couldn't be ruthless and could only endure it.

In fact, if you think about it from the boat boss's point of view, it was his luck to discover the Alpha Ore.

If the boat boss was a person who did not do his job or was a criminal, then Ji Feng would never be soft, but for this kind of people who worked with their own hands to eat, he really did not want to do it.

In his childhood, his mother raised him by her own hard work, which had a deep impact on him.

Campus Master Chapter 2822

Hunger was not a problem for Ji Feng. In the training space of the intelligent brain, he had not eaten for a full week, and although that was only in a simulated state, the bio-current was synchronized to stimulate his body, which was actually no different from reality.

It was naturally not a problem now.

Besides, Ji Feng concluded that the journey would not be too far, at most it would be a four or five day journey, and he would completely survive it!

Ji Feng lay motionless on the top of the cabin, his body seemed to be completely integrated with the fishing boat, as the waves hit, the fishing boat swayed and he swayed, the fishing boat crooked and he crooked, he hardly needed much strength, this not only saved his strength, but also allowed him to get some degree of rest.

In fact, it is not easy to be so stable at the top of the boat, it is not just a matter of strength. If you have never sailed on the sea, you will never know how strong the sea is, even when the wind is calm, the fishing boat will still sway a lot, the so-called no wind and three feet of waves is not an exaggeration at all.

Therefore, if you want to lie so smoothly on the top of the cabin at this time, you have to relax your whole body muscles, but not too much yet, otherwise, when the boat shakes, you will be thrown off directly.

However, it turned out that Ji Feng's estimation was almost not wrong at all.

Ji Feng spent four days on the boat, and apart from going down at night to quietly get some fresh water to drink from the cabin, he didn't touch any of the food on board.

During this period, the fishing boat also passed several islands, each time Ji Feng would have something to look forward to, but he knew in his heart that it should not be so close, because from the analysis of the words of the boat's boss, there were reefs, and the wind and waves were strong, so it must be a sea far from the shore.

At last, another island came into view.

The roaring sea wind seemed to have been blocked when it reached the island and turned back, but it ended up in a pirouette, and instead of counteracting it, it became even more violent, and it was obvious that there were huge waves near the island.

Ji Feng's heart was vaguely agitated, because he found that the fishing boat was actually heading in that direction as well.

Was it this island?

As the fishing boat got closer and closer to that island, Ji Feng was finally sure that the place where the boat boss had found the Alpha Ore was this island.

However, he did not rush to make a move, but waited patiently.

The fishing boat was getting closer and closer, but when it was about to reach the island, it switched and stopped.

"This damn weather, the wind and waves are still so strong!" In the cabin, the cursing voice of the boat's boss came out, "Can't it stop for a while?"

"Honey, what can we do about this?"

The wife was also a bit worried and said, "We can't get through with such strong winds and waves!"

If the fishing boat was hit by the wind and waves and crashed on the rocks, they would be trapped here, and there were not many people coming, so they might be starving to death before the rescue people came!

“Don’t worry, I’ll think of something, we have to get a few rocks back this time, otherwise we’ll lose out.” The boat boss grunted, “This trip is a lot of money for fuel alone, if we don’t get the stones back, we won’t be able to explain to Mr. Bao, and if he asks for the money back then, it will be a problem.”

The conversation between the two clearly reached Ji Feng’s ears, and he was finally sure that this was the island!

In fact, even if the boat boss and his wife didn’t say anything, Ji Feng could still be sure that there was definitely alpha ore on this island in front of him, because even from this far away, he could clearly see the exposed stone on that island, which was just black and black, just like the one he had gotten from Bao Weisheng before.

Alpha ore!

Ji Feng was almost certain that it was the Alpha Ore!

He couldn’t help but tremble, because he saw that the black stones could be seen in all the exposed areas around the island.

This amount was really amazing!

Ji Feng no longer had any hesitation, he directly took out his own mobile phone and sent out the location. This was the place, Alpha Ore, found it!

“I’ll go down and try!” The boat boss’s voice came again.

“Huh?! I can’t!” The wife was shocked at the sound of his voice and said, “How can you go down in such a big storm, no, it’s too dangerous.”

“It’s alright, you still don’t know my wateriness, it’s not like I’m taking big rocks, I’m just picking up a few small ones, what Mr. Bao wants is just samples anyway!” The boat captain said, “Waiting like this is not an option, we have to go!”

“But

“Needless to say, it looks like the waves over here are kingly waves, look at that island, it just makes the wind form a gybe, unless some extreme weather comes along, then it won’t change at all!” The boat captain said, “You wait here, I’ll go over!”

“Honey, how about we just drop the net here? Last time we were able to net the rocks, maybe this time we can too!” The wife said, extremely worried.

“What do you know! Last time it was just luck that a wave came in and swept the rocks over, now there is no such thing as luck!” The boat captain said, “All right, I’m going!”

“Wait a minute!”

“Husband wait

Suddenly, two voices rang out at the same time, one was the boat boss's wife's voice with worry, while the other, was a completely unfamiliar voice.

The boat boss and his wife froze at the same time, and then a shocked look appeared on both of their faces, and their bodies even felt chilly at the back.

"Old, husband, did you hear something just now?" The wife asked.

"..... heard it!" The boat captain nodded with some difficulty.

"Pop!"

Suddenly, a loud sound came from outside the cabin door, the two of them were startled and turned their heads to look at the same time, and then they saw a scene that made them incredulous, outside the cabin door, there was a person standing, moreover, this person they had seen before!

The ship's boss's wife was dumbfounded: "You, you"

Compared to the boat boss as a man is slightly more courageous, but is equally stunned: "How are you here?!"

At this moment, Ji Feng's hair was a bit messy, and his clothes were crumpled, looking a bit wretched, but his appearance out of nowhere really brought great alarm to the boat boss and his wife.

"I was on the boat the whole time, I was brought here by you guys!" Ji Feng grinned, only because his lips were a bit dry, but it made his smile a bit bizarre.

"....."

The boat boss and his wife were even more scared and their faces were pale. When the boat boss reacted and turned around, he was ready to manipulate the stool next to him, but he was interrupted by Ji Feng.

"All right, don't bother with this, boat boss, I followed you here by hiding on your boat, no need to say anything, come over with me!" Ji Feng waved his hand.

"Go where?!" The boat boss asked in astonishment.

"Don't you want to go to that island? Let's go together!" Ji Feng said. He could have gone over alone, but when he did the boat boss would definitely take the boat away, and it would be a joke then. So he had to take the boat boss with him and leave the boat boss's wife alone on the boat, with the boat boss as a hostage in his hand, there was no fear of her running away.

The boat boss finally understood, and he immediately said, "So you came for the stone!"

Ji Feng nodded his head and said, "That's right! I am here to find the stone, all right, go over together, I don't want to make a move on you, but you have to cooperate!"

"You" I won't go over there!" How could the boat boss go down to the sea with such a person of unknown origin, even though Ji Feng and the others had gone as police officers that night, the boat boss guessed that they were fake police officers, and with such people, the boat boss was a bit scared.

“Boat Boss, it seems you still don’t know how serious things are!” Ji Feng’s face sank as he said, “What do you think this black stone is? Does that Bao Weisheng have nothing better to do than to eat, or do you think he has money to spend and has to give it to you for nothing?!”

The boat boss was stunned, and when he heard Ji Feng’s words, he thought about it and couldn’t help but ask, “What is that thing?!”

Ji Feng snorted coldly and asked, “Know about nuclear weapons?”

The boat boss froze and nodded, “Yes.”

“The black stone you are looking for is similar to the raw material used to make nuclear weapons, do you think, this thing is something you can touch?” Ji Feng asked with a sullen face.

“What?!”

The boat boss and his wife both exclaimed in shock at the same time, nuclear weapons? This black stone is for making nuclear weapons?

Ji Feng snorted coldly and said, “Otherwise, what do you think is so valuable? What can attract the attention of the Bao family? Let me tell you, this thing is also radioactive, and it’s also lucky that you have been exposed to this thing for a short time, otherwise, by now, your bodies would have developed mutations!”

“Ah?!”

The boat captain and his wife were scared to death, and both of them looked at each other, and both saw the aftermath in each other’s eyes.

They were both silent, not really knowing what to say.

“What you said is true?!” Finally, the boat boss spoke up, asking hesitantly.

“Do I have to lie to you guys?!” Ji Feng said in a cold voice. Although the alpha ore was extremely mild and the radioactivity was hardly harmful to the human body, however, the amount of alpha ore on this island in front of him was too much, and with so much radioactivity gathered together, the amount of radiation would be different.

With his body he might not have a problem, but for an ordinary person like the boat boss, I’m afraid it would be too much to bear.

“Then how come you’re not afraid?!” The boat captain asked, with a hint of resignation in his eyes, this was a great fortune, the price given by Duke Bao was high, enough to cover his income for a year. Besides, if he could get more stones back, maybe Duke Bao would give him even more money.

He thought that Ji Feng was cheating him and wanted to take the benefit for himself!

When faced with that much money, no one would not be moved.

Seeing this, Ji Feng knew what was going through the boat boss’s mind, and he couldn’t help but shake his head, greed can really kill you!

No more nonsense with the boat boss, instead, he went straight forward, grabbed the boat boss before he could react and threw him into the sea with his hand!

Campus Master Chapter 2823

“Ah-!”

“Husband!”

With the boat boss’s shriek and his wife’s alarmed cry, Ji Feng grabbed the boat boss and threw him into the sea with one hand. The boat boss thought that Ji Feng was cheating him and was trying to get this wealth all to himself, but didn’t know that other than that night at the pier when they posed as police officers and swindled the boat boss a few times, which kind of cheated him, Ji Feng had never cheated him again.

..... In fact, Ji Feng was too lazy to lie to him!

In fact the boat boss should also understand in his heart that what Ji Feng said is not at all without merit, a small black stone, Bao Weisheng can give so much money, do you really think Bao Weisheng is fed up with nothing to do? Or did he think he had too much money to spend?

If there was nothing special about this black stone, why would Bao Weisheng give so much money?

And what could be worse than something that made Bao Weisheng notice it and be moved by it?

Although Bao Weisheng noticed the black stone purely by chance, and really paid attention to it because of Ji Feng’s disorder after seeing the Alpha Ore on the yacht, the boat boss did not know these things, so if he had some brains, he should have thought that the black stone was not ordinary.

Perhaps the boat boss had really thought of it, and that was why he was even more impressed, thinking that this was a great fortune waiting for him. But he didn’t know that these things were not for him to touch!

But the boat boss was unwilling, after Ji Feng and Lao Liu and the others went to him in the name of the police, he immediately thought that they were fake police officers, and that their purpose of posing as police officers was to snatch the black stone from his hands, and ultimately, to snatch his riches!

So the boat boss dared not delay in the slightest and set off in the night.

Now that Ji Feng has told him so, he still doesn’t believe in it at all Perhaps he believes in his heart but is unwilling to give up that large amount of wealth, in front of the huge amount of wealth, nothing matters anymore.

Ji Feng saw this and naturally did not want to have the slightest nonsense with him, he could not lay a hand on the boat boss but it did not mean he would tolerate the boat boss all the time!

“If you want your husband to return safely and unharmed, then you fuck the boat and wait here honestly!” Ji Feng turned his head and looked at the panicked boat boss’s wife and said indifferently.

The boat boss’s wife was already terrified, so Ji Feng didn’t wait for her to react and turned around and jumped down as well.

At this moment, the boat boss had already slowed down and swam desperately in the water. I have to say that the boat boss was really good at water, and in just a few moments he had found the direction and swam towards the fishing boat.

Ji Feng, however, swam quickly and rushed towards the boat boss.

“Ah!”

The boat boss shrieked, but it was soon drowned out by the sound of the wind and waves. He couldn't think of anything else and turned around and swam desperately in the opposite direction, trying to escape.

But unfortunately, his speed was not worth mentioning in front of Ji Feng, after just a few minutes, Ji Feng had the boat boss in his hands, the boat boss was still trying to struggle, but Ji Feng only gave a slight effort, the boat boss immediately rolled his eyes in pain, he felt like his head was about to be twisted off by Ji Feng!

“If you don't want to die, you should cooperate honestly!” Ji Feng said coldly.

“.....”

The boat boss finally didn't dare to struggle anymore, Ji Feng's hand was simply like an iron pincer, stuck on his neck, making him feel a heart-breaking pain even if he struggled a little, that was simply going to make him pass out of breath.

What was even more shocking to the boat captain was that this man seemed to be even better than him in water, carrying him with one hand and swimming fast with just one hand, even faster than the boat captain's usual speed, but don't forget, this was the middle of the sea, with high winds and waves!

What a pervert!

The boat captain cursed in his heart, but he was also scared to death, God knows if this guy would kill them both here!

He didn't know about the others, but if it were himself, faced with such a huge sum of money, the boatman knew he would probably do it!

The boat boss was just in a daze, being carried by Ji Feng in one hand and approaching that island.

Wow!

A wave hit him, and Ji Feng fiercely dove headfirst into the water, waiting for the wave to pass before coming out, but the boat boss was desperately sucking in air with his mouth wide open, Ji Feng's speed was too fast, his reaction was too fast, his movements were too fierce, making it impossible for him to react, and he had just taken two big gulps of water!

But before he could take a few breaths, Ji Feng instantly moved forward again.

“Uh”

The boat boss rolled his eyes and almost didn't pass out from his back.

In this way, Ji Feng carried the boat boss with one hand and finally arrived at the island. It was really just like what the boat boss said, there were really a lot of reefs around this island, those slightly deeper reefs aside, there were just a lot of reefs on the side of this island alone.

This in turn made it convenient for Ji Feng to go ashore. He carried the boat boss and quickly went up to the island, and then his eyes fell on the black rocks on the island and he couldn't move!

Alpha ores!

Lots and lots of alpha ores!

As far as the eye could see, almost every place on the island that the eye could see was Alpha Ore, except for the places covered by mud and trees, as long as the stones were black, they were all Alpha Ore!

Even with Ji Feng's composure, he was almost frozen!

This amount

What's more, this island is all Alpha Ore, so doesn't that also mean that underneath this water, it's Alpha Ore as well!

"Hey, you, who the hell are you!?" At this time, the boat boss finally couldn't hold back and couldn't help but ask cautiously.

"A policeman!" Ji Feng said.

"....."

The boat boss froze, and then secretly brushed his mouth, obviously not believing Ji Feng's words, but when he thought about it, it wasn't impossible, if Ji Feng wasn't a policeman, then who was the one with such good water?

However, what depressed the boat boss was that Ji Feng held him by the neck with one hand and then didn't even look at him, just walked around the island, which made him feel a sense of trepidation, no one had come here at all, how could he just walk around?

Even if there were no large beasts, what if there were poisonous snakes? What if there are other unexpected dangers?

What does this guy know? If you walk like this, if you get bitten by something, I'm afraid you won't even know how you'll die!

But don't think that everything is fine now that medicine is so advanced, you have to know that there are no people on this island, there may be a lot of bacteria or some poisonous snakes and beasts attacking on it, many hospitals have no good way, if there is a kind of poisonous snake that you have never seen before, then even if you can escape back, there is no anti-venom in the hospital!

The ship's boss wanted to remind Ji Feng several times, but each time, just as he wanted to speak, he suddenly felt the hand that was stuck around his neck suddenly tighten, and then his whole body couldn't stop shaking, and the pain was so intense that he couldn't speak anymore!

Just like that, Ji Feng held the boat boss's neck with one hand and walked around the island as fast as he could, then he came back to the woods, casually broke a branch and dug hard at the ground, turning it deep.

Finding that the soil was thick, Ji Feng shook his head and threw the branch in his hand away and gave up, then led the boat boss to the beach again.

"This island is not small!" Ji Feng said.

"....." The boat boss was speechless.

"Dumb?!"

Ji Feng frowned and said, "Tell me, with your experience, is it difficult to develop an island like this, if you generally want to?"

The boat boss said, "..... I'm a fisherman, not a mining one!"

"Is there a difference?" Ji Feng asked.

"..... Of course there's a difference!" The boat boss really wanted to yell, but when he saw Ji Feng's calm expression, he was suddenly jolted and realized that he was still in the hands of others, he could only secretly grit his teeth and said, "I only know how to fish and have slightly better water, but I don't know how to mine!"

Ji Feng said, "But you know the waters, don't you?"

The boat boss froze, not responding.

Ji Feng smiled and said, "Don't be afraid, I won't kill you, but this is really not something you can touch, see" He kicked a fist-sized black stone and said, "Just this small piece of stone I don't know how many people I could kill if it was processed and refined, do you think this is something you can touch?"

The boat boss was a bit frightened, but still a bit unconvinced. Before, Ji Feng also said that there was radiation, but didn't he come up himself?

Ji Feng didn't bother to explain too much to the boat boss, he just said, "Boat boss, as long as you cooperate with me honestly, you will definitely be rich!"

When he heard the word "riches", the boat boss's eyes obviously lit up, but when he thought that this should have been all his riches, but now it was snatched away by this guy, he couldn't help but feel resentful.

In fact, he did not know that Ji Feng really wanted to give him a fortune. As soon as possible, the ship's boss was too greedy, but it was undeniable that he had found the alpha ore, and if it wasn't for him, he wouldn't have known when to find it.

However, now is not the time to talk about it, we must first pick this Alpha Ore back, and then we can talk about the rest.

"Let's go, it's time to go back!" Ji Feng said.

“Burst burst burst

Just at this moment, a sound of roaring engines came faintly, Ji Feng steeply frowned, grabbed the boat boss's hand with a fierce force and immediately accelerated his speed.

The boat boss was just about to shout when a gust of wind poured into his mouth, causing his voice to choke back immediately. As soon as he reached the shore, however, the boat captain's face changed.

“Stinking bitch! Bitch! Get back here!”

Campus Master Chapter 2824

“BURST BURST BURST

The loud clatter of that diesel engine came over the wind and waves, making the boat captain green with anger!

From a distance, the boat boss's wife was running away in her own boat!

Although the fishing boat was still slowly turning around, it was some distance away from the island, and this distance was just where the wind and waves were so high that it was not even easy to swim across.

“Bitch, you're so kind!” The boat captain roared, standing on the shore and jumping in anger. If Ji Feng wasn't still holding on to him, he would have been so angry that he would have jumped after his wife!

“Bitch!”

“All right!” Ji Feng frowned and gulped, intending to take the boat boss, who was more or less unable to listen to the insults that came out of his open mouth.

The boat boss just couldn't help but to sarcastically stop talking.

At this time, the sound of the bursting engine on the fishing boat was still coming, and Ji Feng squinted his eyes and stared, silently calculating the distance of the fishing boat in his heart.

In fact, the fishing boat was not too far from the island at this time. Judging from the time they heard the engine sound just now, I think the boat boss's wife did not sail away as soon as they got to the island, she should have also experienced a struggle and struggle in her heart before finally deciding to escape!

However, the speed of the fishing boat was very slow, especially in this kind of high winds and waves, and it took a lot of effort to turn around, not to mention how far she could escape in such a short period of time.

At this distance, Ji Feng is confident that he can catch up with the fishing boat, even if the wind and waves are very strong now.

But

Ji Feng looked at the boat boss, if he took the boat boss with him, it would be a problem, the wind and waves are high now, taking a person with him is definitely a huge difference from being alone.

“Boat boss, you wait here by yourself!” Ji Feng dropped a sentence, then without saying a word, he leapt straight into the sea.

“Ah!”

The boat boss immediately shouted in shock and hurriedly reached out, “Hey-”

But when he reacted, Ji Feng had already jumped into the sea water, he immediately turned pale and hurriedly had to jump down after him, but when his feet reached the shore he suddenly braked sharply and stopped.

Look at this wind and waves, if you jump, in case directly by a wave to slap on the stone that really cry can not find a grave ah!

The boat boss hesitated, and Ji Feng had already swum out a long way, which made the boat boss alone on the shore really anxious and jumpy and scared, if Ji Feng could not catch up with that bitch, then next, he would be trapped on this island, but he had nothing but wet clothes on him, how could he survive?

But if Ji Feng could catch up, would he not come back?

At this moment, the boat captain’s heart was really a hundred times sad!

But at this moment, Ji Feng had already started to swim rapidly in the water and chased after the fishing boat. At this moment, the boat boss was suddenly shocked to find that the speed at which Ji Feng was swimming seemed to be even faster than the fishing boat’s speed!

He couldn’t help but rub his eyes, he couldn’t believe what he was seeing, this, how was this possible?

Even if the fishing boat had just turned around and its speed was not yet fully up, it would still be faster than a person’s swimming speed in this water, but right now this guy was even faster than the fishing boat’s speed!

He was really faster than the fishing boat!

The boat boss was finally sure, because he found that the distance between Ji Feng and the fishing boat was getting closer and closer, even though the fishing boat had already started to speed up at the moment, it was still no match for Ji Feng’s speed!

“Catch up, catch up with her!” The boat boss even began to have some expectations, if he could really catch up with that bitch, he would have to beat her to death

But suddenly, the boat boss couldn’t help but change his face again, because it suddenly occurred to him that if Ji Feng caught up with the fishing boat and went away after getting directly on board, then what should he do?

Ji Feng was not obliged to save him!

The boat boss was immediately anxious again but at this moment, Ji Feng was already looking at catching up with the fishing boat, and the boat boss’s wife who was on the fishing boat didn’t know if she had found Ji Feng, she was desperately accelerating and wanted to leave as soon as possible.

“Pop!”

Ji Feng caught up with the fishing boat and rolled over and climbed up from the side of the boat, however, as soon as he entered the cabin, he suddenly saw a black shadow flash before him, followed by a strong wind attack.

Ji Feng steeply flashed, and then he fiercely stepped forward and clasped the woman’s wrist. The boat boss’s wife cried out in pain, and an iron fork in her hand then fell down.

“You’re really ruthless!”

Seeing the iron fork that fell on the ground, Ji Feng bent down and picked it up and looked around, he couldn’t help but coldly snort, this iron fork was very sharp at first glance, if this was really hit by a straight fork, as long as the force was enough, then the whole person would be directly pierced through!

The wife of the ship’s boss was so frightened that she turned pale and begged for mercy: “Please spare me, don’t kill me

Ji Feng said in a cold voice: “Take the boat back!”

“Ai Ai Ai!” The wife of the ship’s boss promised down, Ji Feng was holding an iron fork in his hand, but she didn’t dare to provoke him, for fear that he would directly give himself a fork in a fit of rage and spear himself to death like a fish!

“Hurry up!” Ji Feng shouted coldly.

The boat boss’s wife naturally agreed in a loud voice, not daring to delay in the slightest, and turned back as fast as she could, and only then did Ji Feng’s face ease up.

Although the boat boss was too greedy and had too big an appetite, Ji Feng didn’t want to kill him either. After walking around the island before, although he didn’t find any fierce beasts or anything like that on the island, he couldn’t rule out the existence of poisonous snakes and other deadly things.

If the boat boss was left alone, he might be in danger.

Seeing that the boat boss’s wife honestly went to steer the boat, Ji Feng didn’t make it any harder for her, but climbed to the top of the cabin, took down his mobile phone and quickly sent out a few text messages.

However with such a comparison, Ji Feng suddenly found a problem, the signal on the mobile phone he gave himself was full, but the signal on the mobile phone given by Old Zhou was very weak, so Ji Feng simply used his own mobile phone to send the text messages directly.

By the time Ji Feng finished texting, the fishing boat was also approaching the island, only that the speed was getting slower and slower at this time, because the wind and waves around the island were too strong, and it was not bad for the small fishing boat to reach here.

“Help! Help me!” The boat boss stood on the shore and saw the fishing boat coming back, so he couldn’t help but shout desperately.

“Swim over yourself!” Ji Feng beckoned to him.

“.....”

The boat boss really didn't have the courage, remembering how Ji Feng had taken him to swim over before, he shouted, “I, I can't swim over!”

Ji Feng stood at the bow of the boat and looked at him, and didn't say anything.

Before when he didn't appear, the boat boss had decided to put up a fight, at that time his wife couldn't even persuade him, but now instead he couldn't swim over?!

He was waiting for Ji Feng to bring him over!

Seeing Ji Feng standing motionless at the bow of the boat, the boat boss couldn't help but hesitate a little.

“Turn around and go back to Treasure Island!” Ji Feng turned his head and drank.

“..... hey!” The boat boss's wife actually still didn't want to go, but didn't dare to refuse Ji Feng, so she could only agree.

The fishing boat slowly turned around, and the boat boss on the island got anxious at first glance, he hurriedly shouted, “Don't go, don't go, wait for me!”

With that, he jumped off with a thud and then started swimming desperately towards this side.

Although Ji Feng didn't say anything, the boat boss's wife quietly slowed down, and it even took a while just to turn around.

Finally, the boat boss caught up with him, and Ji Feng casually threw a rope off the bow of the boat, allowing the boat boss to grab the rope and pull him up.

“Thank you, thank you!” The boat boss thanked him repeatedly, but did not dare to bare his face in the slightest, however, when his gaze went to the other side, his face immediately turned gloomy and his eyes showed a fierce light, “Bitch, you can do such a thing, I won't beat you to death!”

The boat boss's wife hurriedly shrieked, “Husband, you, listen to my explanation”

“Explain you dead head!” The boat boss shouted angrily and punched and kicked at her, beating the woman repeatedly.

“All right!”

Ji Feng shouted lowly, “If you have the strength, drive the boat properly!”

The boat boss hurriedly stopped, nodded sarcastically and honestly went to steer the boat, but on his way out, he gave the woman another fierce glare, obviously his anger was still lingering.

When Ji Feng saw this, he said in passing, “All right, don't be too unreasonable. If you hadn't been so greedy for money, you wouldn't have gone this far! Besides, when you swam over just now, she also secretly slowed down, otherwise, you think you could have caught up?”

The boat boss laughed twice and didn't say anything.

Ji Feng could not help but secretly shake his head, he could see that the boat boss did not actually take it to heart and did not take his words seriously, what the woman did did did cause a rift between them, but in the end, it was actually the boat boss who was too greedy.

Ji Feng also knew that he was partly responsible for the reason why they had such a conflict, which was why he had spoken out to help explain a few things to the woman, but now it seemed that it might not have much effect.

“Buzz~”

Just then, Ji Feng’s mobile phone suddenly vibrated and he immediately took it out, seeing the incoming number on the screen, he immediately picked it up, “Little Uncle, it’s me.”

The phone call was from none other than Little Uncle Ji Zhenping, and as soon as he heard Ji Feng’s voice, he immediately asked, “Little Feng, have you found it?”

Ji Feng nodded and said, “Found it, it’s in this location where I am now, it’s almost all over this island, the number is amazing!”

“Good!”

Ji Zhenping immediately said, extraordinarily surprised, and his whole spirit was shaken: “Little Feng, you’re really good! Amazing! You are a credit to the country!”

Ji Feng smiled and shook his head, this is just where to, when will he be able to afford this title when he has manufactured some weapons and equipment such as orbital warships that can almost only appear in science fiction movies, and applied countless kinds of high technology to every corner of the people’s lives!

Campus Master Chapter 2825

After ending the call with his little uncle, Ji Feng was relieved.

No matter what happened next, at least the island where the Alpha Ore was hidden had been found, and even if something else changed, at least what was on the island would remain the same, the Alpha Ore could not escape!

What’s more, I’m afraid that no one in this world knows what Alpha Ore is yet.

In this way, Ji Feng’s worries were lessened.

Otherwise, if the whole world knew that this Alpha Ore was something good, or even knew what it was for, then it was really conceivable how fierce the fight would be when the time came.

The middle-aged woman was silent, obviously knowing that she was in the wrong, but the curse of the ship’s boss made Ji Feng frown.

Although there is a saying that husband and wife are originally birds of the same forest, but that tends to avoid evil is also a human instinct, mainly because he appeared too suddenly, Phase II did not explain too much to them after appearing, but threw the boat boss into the sea, the middle-aged woman must have taken himself as an extremely cruel person.

Then, taking advantage of her absence, her desire to escape also belonged to instinct.

Besides, she had obviously struggled in her heart for a while before she fled, otherwise, while he and the boat boss were checking the situation around the island, the middle-aged woman could have fled long ago.

And when she later ordered the middle-aged woman to turn the boat back to pick up the boat boss, she seemed to see that she did not mean to kill the boat boss, and later when the boat boss swam desperately back, she quietly slowed down and waited for the boat boss.

In fact, in terms of these things, this middle-aged woman could barely be considered right for the boat boss, but the boat boss kept only remembering his abandonment and cursing at the woman whenever he was free.

Ji Feng turned his head to look and found that the woman's cheek had been swollen and the corner of her mouth was still bloody, hiding in the doorway of the cabin and wiping her tears, but she did not dare to make a sound.

He couldn't help but frown and wanted to explain to the boat boss again, after all, the woman had fled mainly because she was scared by herself, but he thought about it and dismissed the idea, he had already explained it before, I'm afraid it would be ineffective to say it now, the boat boss wouldn't listen, it was useless to say anything.

But if the couple really had feelings for each other, then nothing would have to be said and the storm would pass.

After all, they have been living together for so many years and are clear about what kind of people and personalities they are.

So Ji Feng just shook his head and turned away. He looked at the vast sea, thought of the direction he had gone before, then took out his mobile phone and looked at the time, roughly projecting a bit.

A few moments later, he turned his head and asked, "Boat captain, what is our approximate position now? Are we still in the waters of Treasure Island?"

With the speed of the fishing boat, there was no telling if it would be out of the waters of Treasure Island in the next few days, and Ji Feng really didn't have a concrete idea about it, as he really wasn't too familiar with the sea.

The boat boss immediately ran out as if to curry favor and said, "Big brother, this is almost as if we are out of the waters of the Treasure Island, after that small island just now and further ahead, that is the waters of the Philippines."

Ji Feng was stunned, "The Philippines?! Have we run this way?"

The boat boss nodded and said, "Yes, big brother."

Ji Feng couldn't help but be surprised, originally according to the direction they had set off from the pier on Treasure Island, they should have been heading roughly in the direction of the southern waters of China, but after these few nights, they had deviated to this place?

“Then that means that this place still belongs to the waters of Treasure Island?!” Ji Feng asked.

“Yes!”

The boat boss nodded and said, “If we’re lucky, we might even encounter the naval patrol boats of the Treasure Island!”

Ji Feng nodded slightly at his words, then he gave the boat boss a look, “Good luck?”

The boat boss instantly gave an err, smiled sarcastically and didn’t say anything.

Ji Feng knew what this guy was thinking, he said, “Boat boss, I advise you to cooperate honestly, you should be able to see that I have no intention of killing you, as long as you two couples cooperate, I won’t hurt you, you just want money, but I want rocks, there is no conflict between us, right? ”

The boat boss had obviously just let slip that meeting a naval patrol boat from Treasure Island was just good luck?

What does that mean?

Obviously thinking that if they met a naval patrol boat, they would be saved!

The boat boss waved his hands repeatedly, “Brother you, you misunderstood, I didn’t mean that.”

Ji Feng said, “It doesn’t matter whether you meant that or not, what matters is that that thing is very important to me, and if you really don’t cooperate, I don’t mind throwing you into the sea, understand?”

The boat boss had cold sweat on his back: “Understood, understood!”

Ji Feng snorted coldly, this boat boss was too slippery, he had to be warned properly, “Boat boss, don’t think of playing any tricks either, whether it’s the radio, or the semaphore, you’d better not touch any of these distress signals, or else you’ll be responsible for the consequences!”

After saying that, he casually picked up the steel fork on the ground, grabbed one of the spikes, and with a violent force, only to hear a boom, the steel spike was actually broken instantly!

The boat boss and his wife both exclaimed in shock at the same time, “Ah!”

The way they looked at Ji Feng, they couldn’t help but change, this was too scary too!

Even if Ji Feng had hidden on the boat for a few days before, and led the boat boss to swim to that island easily, and even caught up with the fishing boat, it was not as shocking as this scene in front of them!

This steel fork had once forked a shark to death, but in Ji Feng’s hands, it was so fragile that it was no different from one made of firewood sticks!

Seeing this scene, the little bit of the boat boss’s heart was instantly hour without a trace.

Swish!

Ji Feng casually threw the broken steel spike out, only to hear a "do! squeak, the steel spike actually stuck hard into the side of the boat!

"....."

The ship's captain looked dizzy again, that ship's side was also steel!

The steel spike went in with just a flip of the hand?

"Don't let the next steel spike aim at you!" Ji Feng pointed at the ship's boss and said indifferently.

"....."

The boat boss, however, was cold through and through, and his face was pale.

He realized then that Ji Feng was really too lenient with him, with this ability of Ji Feng, if he wanted to do away with them, it would be no different from killing a chicken!

"Go and get busy!" Ji Feng waved his hand.

"Huh? Oh, then big brother, you rest first" The boat boss smiled at that and was like a great amnesty, scared to death, but pricked and slipped into the cabin, not daring to have any small thoughts anymore.

The first time I saw a woman, I was so scared that my legs went weak.

He knew that in fact, the Philippine waters and the Treasure Island waters, and even the border issues with the Chinese waters have always been entangled, and there are frequent conflicts here, unexpectedly that island is located in such a sensitive place!

It seems that we really need to get the Alpha Ore as soon as possible, otherwise, I'm afraid that there will really be a side issue!

"Buzz~~"

At this moment, Ji Feng's mobile phone suddenly vibrated again, he took it out and saw that it was his younger uncle Ji Zhenping calling, he immediately picked up the phone, "Younger uncle"

Before he could finish his words he heard Ji Zhenping say, "Little Feng, are you still on the island?"

Ji Feng shook his head, "No, I've already left the island and am on my way to Treasure Island."

"That's good!" Ji Zhenping said, "I was going to inform you that if you are still on the island, you need to leave as soon as possible."

"Why?" Ji Feng was stunned.

"It's the border of the sea where Bao Island and the Philippines have been arguing, and from time to time there are vicious incidents of armed expulsions by patrol boats or even machine-gunning of Bao Island fishermen, so it will definitely be dangerous if you encounter patrol boats there, but now that you've left, it's nothing." Ji Zhenping said.

Ji Feng smiled, but his heart was extremely uncomfortable, the Filipinos were that rampant?

He asked, "Little Uncle, what about the rocks? In these waters, can our boat come in?"

"Hardly!" Ji Zhenping said.

If it was just the border between China and the Philippines, then China would definitely take the island at all costs, even if there was a war over it, but there was also a treasure island in the middle, so it would have to be handled with care.

When Ji Feng wanted to say something else, Ji Zhenping said, "Little Feng, right now your first priority is to get out of there first, since the location has been determined, then the rest can be done step by step!"

Ji Feng smiled and nodded silently, he did not expect things to still go wrong, but not from man-made, but from the border strife that had been going on.

The boat boss had just said that there would often be armed patrol boats from the navy over here, and if someone was found mining here, then I was afraid that neither the Philippine nor the Treasure Island side would agree, or even a military conflict would break out!

Especially since this is not a part of China's waters, either the Philippines or Treasure Island could justify mining here, but if China were to come in, I'm afraid it would cause both the Philippines and Treasure Island to be wary and strongly opposed!

However, the Alpha Ore is too important to China!

"Little Uncle, I'll think of something first and see if I can do something on the Treasure Island side!" Ji Feng said, he decided to give it a try from the Treasure Island side first, as for the Philippine side who cares to hell with him! If the time comes when its a conflict, the big deal is to do it!

Alpha ore, he is bound to get!

Campus Master Chapter 2826

"Big, big brother, we're almost at the pier!"

With the careful voice of the boat boss, Ji Feng changed and turned his head, and found the boat boss standing not far behind himself with a sarcastic smile.

Ji Feng nodded and said, "Good to arrive, it's been a hard journey for you!"

The boat boss said repeatedly, "No hard work, no hard work."

In his heart, he was actually screaming, he really didn't know if this guy would let him go next, or would he keep holding him hostage?

In fact, the boat boss had such worries all along the way, although he didn't have much knowledge, he knew that the black stone must be something very important, originally he was thinking that this was a great fortune and he could get a fortune from Mr. Bao, but since this guy suddenly appeared in front of him from the sky, his dream of making a fortune was in vain.

He had originally hoped that he would be able to run into the naval patrol boat of Bao Island on the way, hoping that he could secretly signal for help, but this move of Ji Feng's made him instantly dismiss this idea.

If he asked the patrol for help, perhaps the Treasure Island Navy would arrest Ji Feng, but if, before doing so, Ji Feng directly speared himself to death with a fork in a fit of rage, then he would really have died in vain.

So, despite encountering four patrol boats passing by one after another along the way, the boat boss didn't dare to send a single signal, let alone call for help.

He honestly drove the boat and took Ji Feng back to Treasure Island.

But now that he was looking at reaching Treasure Island, but he didn't know if Ji Feng would just leave next, but thinking about it, he thought it was impossible, since the black stone was such an important thing, and he knew about it, and he knew the location would Ji Feng let himself go so easily?

He wouldn't kill himself to silence him, would he?

The boat boss suddenly had a shock in his heart, couldn't help but be a little scared, his eyes just couldn't help but sneak a peek at Ji Feng's face, but he couldn't see the slightest hint from Ji Feng's face, which made him even more apprehensive.

"There's something else?!" Seeing that the boat boss was hesitant to leave, Ji Feng asked.

"Huh? No, there's nothing." The boat boss hurriedly shook his head, "Then, then I'll go and steer the boat."

"Go on!" Ji Feng nodded his head.

The boat boss entered the cabin apprehensively, and the middle-aged woman's lowered voice came from inside, "Old, husband, will that person leave after we go ashore?"

"How should I know, why don't you ask him yourself if you want to know!" The boat captain said without good humour.

"....."

The middle-aged woman then didn't say anything, but a low choking sound came from her.

The boat boss said impatiently, "All right, all right, don't cry here, how dare you cry when you left me on the island and ran off by yourself? See how I'll clean you up when we get back!"

Ji Feng shook his head as he listened, this boat boss was too unreasonable, but it was good to hear from his words that it seemed the boat boss did not intend to separate from the woman.

Finally, the pier had come into view and fishing boats were starting to be seen coming in and out.

Alpha ore, how should it be mined?

He hadn't thought that the Alpha ore would be in such sensitive waters, especially at the border between the waters of Treasure Island and the Philippines, so even if China wanted to intervene, there wasn't a good excuse.

In recent years, the Philippines has repeatedly provoked them, and their armed patrol boats have even shot and killed fishermen from the island on several occasions, not to mention the frequent use of water cannons to attack the island's fishing boats after encounters between the two sides, which has almost become a daily occurrence.

Although the island has fought back repeatedly, it has not been very effective and the counter-attacks have not been very violent, so strictly speaking, the Philippines still has the upper hand in those waters.

Trying to mine the alpha ore on that island under those circumstances can be a bit of a problem.

If it was just to pick up a few rocks, that would certainly not be a problem, but if it was a large-scale mining, the Filipino side would definitely receive the news, and then if it's a conflict and the Filipino state takes it seriously, it could be a problem.

An armed confrontation, or even the outbreak of war, is not something that China is afraid of, but it cannot allow someone to ruin the grand plan of mining alpha ore.

So, a suitable solution had to be thought of!

"Boat Boss!"

Ji Feng turned around and shouted, and the boat boss immediately came in response, "Big brother, you, what are your orders?!"

This whole journey, the boat boss had always called Ji Feng big brother, even though he was probably more than twice as old as Ji Feng, but he called him without the slightest stagnation, instead he was very smooth.

Ji Feng didn't tell him his name, nor did he ask the boat boss his name, so he didn't correct the boat boss on this name, but asked, "Go and pack your luggage, when the boat docks at the pier, you and your wife will come with me, I'll take you to a place!"

"Huh?!"

The boat captain's face went white with a swish at the words, he was going to be held hostage? Is this to silence him?

Ji Feng frowned and said, "You don't agree?!"

The boat boss said with a bitter face, carefully, "Big brother, it's like this, you see, we are both ordinary fishermen, just rely on fishing for a living, this time is also because I was blinded by lard, when we go ashore I will definitely not think about these things, just please let us go, spare our little lives... .."

Ji Feng smiled and immediately understood what the boat boss meant, daring to say that this boat boss thought he was going to do something to them?

He grunted, "Boat Boss, I'm asking you to come with me for your safety, if the news gets out, I'm afraid your little life will be lost then, understand?"

The boat captain opened his mouth, not quite believing it, thinking to himself that apart from you, who else would want me dead?

Besides, if I don't tell anyone, how will the news get out?

"You still don't want to come with me?" When Ji Feng saw that the boat boss didn't say anything, he said, "How about this, I can promise you that you will come with me, and when the time is right, I will help you arrange a new identity, go to a new place, and give you a sum of money that is enough to feed and clothe you, is that okay?"

The boat captain then froze, this was still such a good thing? He felt more and more that this kind of pie in the sky could not fall on his head, this guy is now trying to cheat him away with such fancy words, this must be to silence him!

However, the boat boss did not think that if Ji Feng wanted to silence him, even if he did not agree to follow him, Ji Feng could easily take them hostage, so why would he need to discuss this with them?

But at this moment the boat boss is full of fear, and at the same time, there is so much unwillingness!

This fortune is really too big, if it is really like what Ji Feng said, that thing is similar to the material used to make nuclear weapons, then you can imagine how much the whole island is worth!

Even just discovering the island, this value was absolutely amazing!

On the one hand, there was the possibility of being taken away by Ji Feng and not detained, but on the other hand, there was the possibility of getting a huge amount of money, so the boat boss was naturally unwilling to go with Ji Feng.

But very often, silence is also a kind of refusal!

Ji Feng saw the situation and understood what the boat boss meant, he deliberated for a moment and said, "Boat boss, how important that black stone is, you also understand, so you should also know that this matter can not allow you to refuse, at least, in a short period of time you definitely have to come with me!"

"But" the boat boss was just about to speak when he was interrupted by Ji Feng.

"That's it, go pack your bags, you can rest assured, if I wanted to kill you, I could have done it anytime back at sea, why wait until now? Ji Feng said indifferently, his voice was not high, but his tone was decisive and extremely resolute.

The ship's boss suddenly turned white, but did not dare to object, and could only honestly go into the cabin to pack his luggage.

Ji Feng suddenly realised that he was really too gentle with the boat boss. If he spoke to him nicely, he would get an inch, but if he was directly cold-faced, he would obediently listen.

However, although the boat boss was honest, but Ji Feng was a little uneasy, seeing that this is to the dock, can not be near the end instead of a problem.

So Ji Feng directly into the cabin, but found the boat boss is sitting on the stool with a bitter face, see Ji Feng came in he was immediately startled, Ji Feng stood up: "big, big brother"

"Pack your things, hurry up!" Ji Feng said in a deep voice.

"..... hey!" The boat boss was so scared that his heart trembled, but he could only honestly pack up his things, he even vaguely regretted in his heart, why did he go and covet that fortune, now he's done!

The fishing boat finally drew up to the pier, and at this moment, Old Liu and Bai Zhu were already waiting on the pier. Before Ji Feng went out to sea, he told them to hide for the time being and then let them return first, and when he was about to approach the pier, he contacted Bai Zhu.

When Bai Zhu and the three of them got on the boat, the boat boss was completely desperate. Originally, Ji Feng alone had left him defenceless, and now there were three more, so if he didn't mind dying too slowly, he would have to be obedient.

So, when the fishing boat drew up to the pier, the boat boss and his wife honestly followed Ji Feng and the others and left in the car.

"Go, drive fast!" As soon as Old Liu started the car, Ji Feng immediately said.

Old Liu froze, then nodded, put it in gear, slammed on the accelerator, and the car leapt out.

At the same time, there were several people on the pier who ran towards the fishing boat at the same time, and after taking a closer look, one of them took out his mobile phone.

Bao Weisheng took the mobile phone and heard the busy tone coming from inside, and his brow couldn't help but frown.

"What's going on? Where did he go to have another fling?!" He muttered.

Campus Master Chapter 2827

Bao Weisheng was a bit annoyed.

The reason was that the scene of Ji Feng's corpse on the street that he had been expecting had not only been delayed, but even that kid Gao Jianyun had gone off somewhere, and he could not be contacted for several days in a row!

Just a few nights ago, after they had discussed how to deal with Ji Feng, the next morning Bao Weisheng transferred a sum of money directly to Gao Jianyun's account, but when he notified Gao Jianyun, he found that he could not contact him!

He called Gao Jianyun's phone from time to time over the next few days, but again, no one got through. Even when he asked the Gao family directly, no one knew where Gao Jianyun had gone.

This was a strange thing!

Bao Weisheng couldn't help but mutter in his heart, could it be that Gao Jianyun's words about hating Ji Feng and hiring someone to do something to him were all lies, and that it was only true that he had cheated himself out of a sum of money?

If that's the case, then Gao Jianyun has really made a mistake! The money he had was not that easy to cheat!

"Dangling"

Suddenly, Bao Weisheng's mobile phone rang, he immediately picked up the phone, "This is Bao Weisheng."

A voice came over the phone, "Young master, we found someone, that guy is back."

Bao Weisheng was instantly shaken and asked, "Where is he then?"

The voice on the phone said, "Young master, he left with someone, after the fishing boat docked the boat owner and his wife got into a car with some people and then left quickly, our men have followed them!"

Bao Weisheng's face changed at once and he hurriedly asked, "Who did he leave with? Did he take anything with him when he left?"

"I don't know those few people, but I've noted down their license plate numbers." The man said, "There were several of them, didn't notice if they had anything with them!"

"Tell me the license plate number immediately!"

Bao Weisheng said in a deep voice, "No matter what method you use, you must find the owner of the boat, do it immediately!"

When he hung up the phone, Bao Weisheng's face was cloudy and uncertain.

The fisherman had actually left with someone? And he had been picked up just as soon as he docked This was too much of a coincidence!

Moreover, a fisherman, who would send a car to wait for him at the pier?

Bao Weisheng realized that something was not right, he had sent people to investigate that fisherman before, there was no background or special place, but now there was a car to pick him up, this was obviously not normal.

"Could it be that"

Bao Weisheng thought of a possibility that it was because of the black stone?

To say that the only thing that could be outstanding about that fisherman is that he got the black stone, and now it seems that maybe it is really because of that black stone, but who is the one who picked him up?

..... Ji Feng!

The black stone was originally only strange to him and he bought it from the fisherman, but Ji Feng took a look at it and took it away. This means that the stone should not be ordinary.

Now that Ji Feng had come to Baodao, that fisherman was picked up by a car If it was just a coincidence, then it was a bit too much of a coincidence.

Bao Weisheng immediately concluded that it must be Ji Feng who had picked up that fisherman.

“Ji Feng!”

Bao Weisheng gnashed his teeth in hatred, Ji Feng came to Treasure Island, most likely for that black stone!

But

What exactly was that stone?

If that fisherman was really picked up by Ji Feng, then I’m afraid that Ji Feng already knows where the black stone was actually found, which means that I’m afraid that this chance has nothing to do with him, Bao Weisheng.

“No, we can’t just sit around and wait for death!” Bao Weisheng couldn’t help but say, his eyes gloomy.

.....

Ji Feng took the boat boss and his couple and did not immediately go back to the place where they had landed, which was provided by Old Zhou and must be kept strictly confidential for the time being, so he first took the men on a big detour before going back.

In the process, the boat boss and his wife had both been blindfolded, while Lao Liu had gotten out of the car long after they had left the pier.

Although Old Liu had been sent by Old Zhou, what one should guard against was still guarded against!

“Crazy.”

As soon as Ji Feng returned and had Yang Bin bring the boat boss couple to one of the separate hidden rooms, Zhang Lei walked over and said, “What about that guy, should we let him go?”

“Not released yet?”

Ji Feng was stunned at his words, he originally thought that Zhang Lei had already released the man a long time ago, but he didn’t expect that Gao Jianyun was still in Zhang Lei’s hands.

Zhang Lei said in a deep voice: “I suspect that guy will talk nonsense after he goes out and cause others to suspect”

Although they had kidnapped Gao Jianyun for an extremely absurd reason and the guy was scared to death, yet the fisherman was also mentioned in the middle of it, and the black stone was also mentioned, so if Gao Jianyun went out and talked nonsense, or if he pondered on his own, he might figure out what to do.

Ji Feng said, “Let the man go, it doesn’t matter if it leaks out now.”

The fact that Bao Weisheng had already approached the fisherman privately showed that he had already moved on, in fact, from the day Ji Feng slightly lost his temper on the yacht, things could not be hidden anymore.

Only, the reason why they had to control Gao Jianyun a few days ago was to find that fisherman through him, now not only was the fisherman in their hands, the location of the Alpha Ore was also known, so there was no point in Gao Jianyun staying here.

“Crazy, don’t be careless, sometimes a straw man can easily spoil things instead!” Zhang Lei reminded. Although Gao Jianyun was a straw man, if he went out and talked nonsense, it might bring unexpected trouble.

“I have it in my heart!”

Ji Feng nodded and said, “Let the people go, we’re here to find the ore, not to kill and set fire to it!”

If you don’t let people go, you can’t kill them, right?

Zhang Lei smiled heatedly, “That’s right, then I’ll send the three of them out here!”

Speaking of which, there was really no one among them who was unblinkingly murderous, if they were to treat their enemies then they would definitely not be soft, but to casually kill people, I’m afraid that only those who were extremely ferocious could do such a thing.

Ji Feng added a warning, “Remember not to expose the place!”

Zhang Lei said with confidence, “Don’t worry, it’s a piece of cake. Rather, it’s those two guys, you plan to let them live here?”

He was talking about the boat boss and his wife.

Ji Feng nodded and said, “The boat boss knows the location of that island, which is very damning. So they have to be left here, and when it’s over, I plan to send them to the mainland and set them up”

Zhang Lei said, “Do we have to wait until after it’s over? Can’t we send them there now?”

Those two people staying here for one more day would be a burden for one more day, especially if there was any conflict or action, these two people would probably drag everyone down.

Ji Feng shook his head and said, “It’s too early to say, let’s wait until I’ve made contact.”

Zhang Lei nodded and said nothing more.

When Zhang Lei sent Gao Jianyun out and came back again, it was to see Ji Feng sitting alone on the roof smoking, he walked over and asked, “Crazy, things are very troubling! Didn’t we find that island?”

“It was found, but it’s not that easy to mine it.” Ji Feng slowly shook his head and said, “The location of that island is awkward,” he lowered his voice and said the location of that island.

“At the junction?” Zhang Lei was stunned, “There’s nothing to do with the mainland?”

“If it was at the border between the mainland and Treasure Island that would be fine, negotiate any way you want, but now” Ji Feng said in a deep voice, “I’m afraid that trying to mine it in the name of the country won’t work, the Philippines will never agree!”

Zhang Lei nodded his head, whether or not the Philippines knows what the Alpha ore is for, will never agree to China to mine, let another country run to their own territory to mine the ore, which country will not agree – the so-called disputed sea, is the Philippines said to be their own country’s territory, treasure island said to be theirs, but in the eyes of the Philippines, the undoubtedly that is their own!

Besides, there is also the Treasure Island in between, no wonder Ji Feng is showing a sad face.

“Then we should mine it in the name of private individuals!” Zhang Lei said, “Is it possible to buy that island? Or just buy the mining rights off? In the name of a company, or mining in the name of an individual, without involving the land and sovereignty, so there should be less resistance, right?”

Ji Feng nodded and said, “That’s what I was thinking, and it’s not a bad idea!”

It was normal for a company to underwrite the mining of ore, and it was also one of the least noticeable ways, only, with that island’s sensitive location, should we buy the mining rights from Treasure Island, or from the Philippines?

“Actually, there is another way!”

Zhang Lei suddenly said, “Or else simply use the navy, send a few large warships to pass by here, then find some random excuse to stay here and not leave, finish mining the ore before leaving”

Before he could finish his sentence he was interrupted by Ji Feng with a smile, “Bullshit, our navy is parked there, you think the Filipinos won’t be there to watch? Besides, do you know how much ore there really is on that island? The amount is staggering! It can’t be mined out in a short time!”

Zhang Lei said, “Then what if the Philippines doesn’t agree to other companies mining it?”

Ji Feng said in a deep voice: “No matter what, we have to get the mining rights!”

Afterwards, Ji Feng contacted Old Zhou and the two of them agreed on a time to meet, at the same teahouse where they had met last time. After ordering a pot of tea and some refreshments, the two of them sat down.

“Old Zhou, there’s something I need your help with.” Ji Feng opened the door and said.

“What is it?” Old Zhou asked.

“Help me send two people back.” Ji Feng said, he didn’t say why he wanted to send them, nor did he say what those two people were for.

However, Old Zhou frowned slightly before shaking his head.

Campus Master Chapter 2828

“Help me send two people back.” Ji Feng said, he didn’t say why he wanted to send them, nor did he say what those two people were for.

However, Old Zhou frowned slightly before shaking his head.

Ji Feng asked in a low voice, "What, are there difficulties?"

Old Zhou said, "It's not that there are difficulties, but the difficulties are quite great."

"How so?" Ji Feng asked, "Didn't that shipment of weapons come easily? Only now the weapons have been replaced with people"

"It's precisely because the weapons have been replaced with people that it's troublesome." Old Zhou said in a low voice: "A pile of iron lumps, can be hidden in any place, can be brought over, but, people do not want to go, it is easy to have problems, and once there is a problem, that may be a line is ruined, do not know how many people will be implicated"

Ji Feng did not move and asked, "How do you know the person I want to send is not willing to go?"

Old Zhou said, "If they are willing to go, the transportation is so developed now, they can go from anywhere, by plane, by ship, there are too many options!"

Ji Feng then understood that he had fallen into a misunderstanding. It was no longer the time when the two sides were old and dead, the traffic between the two sides was still very open, so if one wanted to go to the mainland, it wasn't that difficult.

But since it was someone who needed to be sent, it was obvious that he was not willing to go himself.

Ji Feng couldn't help but look at Old Zhou two more times, I have to say that Old Zhou was really an extremely shrewd person, his vision was even more poisonous, he immediately thought of all this as soon as he said it himself just now.

"But these two people must go or die!" Ji Feng said in a low voice, "Think of a way, is there a safe and secure way?"

"No."

Old Zhou said with certainty.

Ji Feng asked, "What about if we smuggle them across?"

Old Zhou shook his head and said, "You don't understand what I mean, the point of the matter is whether the person to be sent is willing to do it himself!"

If willing, where is the need to smuggle, directly and openly go is it.

Ji Feng slowly shook his head and said, "It is because he is not willing that I have come to find you!"

Old Zhou pondered for a moment and said, "No, I can't take that risk! What's more, I can't let the others risk their lives along with me. You can think of another way!"

Ji Feng then couldn't help but frown, he didn't expect Old Zhou to refuse so simply.

But thinking about it, Ji Feng could understand, after all, there was indeed a certain amount of risk involved in this matter, and it was not surprising that Old Zhou was not willing to take the risk.

If it is really like what Old Zhou said, if there is an accident, then it may involve the whole line of people, then the risk is not small, frankly speaking, even in Ji Feng's opinion, using a line of people to exchange for the boss of the ship is really not worth it!

So Ji Feng just nodded his head and didn't mention this again.

Since Old Zhou didn't agree, he wouldn't force anyone to do anything. This path wouldn't work, so Ji Feng pressed on with the idea for now, and it seemed that he could only put the Boat Boss couple in their landing spot first.

This time, the two of them did not have a long meeting, and Ji Feng was ready to leave.

But just before he left, Old Zhou suddenly said, "There's a piece of news that you should pay attention to, the people from the Cheetah Mercenary Group seem to be searching for movements lately, in addition to that there are people who are inquiring about you, you should be careful."

"Cheetah mercenary group?"

Ji Feng smiled and was slightly stunned, then he reacted, Old Zhou was talking about the mercenary group that was knocked out in one fell swoop by Xiang Yongzhan with his special warfare brigade, they were the ones who did the jewellery robbery at the Jiangzhou International Convention and Exhibition Center back then.

Only, at that time, Xiang Yongzhan had not achieved all his success in one battle, allowing the leader of the Cheetah mercenary group to run away with a small group of people, and they later ran away to the Treasure Island, and were said to have been taken in by certain Treasure Island executives who were hostile to China.

"They're asking about me?" Ji Feng asked.

"Someone is inquiring, and it seems to be related to them!" Old Zhou explained that the people from the Cheetah Mercenary Corps were unfamiliar with Treasure Island and naturally had no way to pry for information, but there were people who were prying for them.

However, that was not the point, what Ji Feng was concerned about was what they wanted to do by asking for information about themselves.

Ji Feng asked, "In that case, they want to get at me?"

Old Zhou lowered his voice and said, "After the Cheetah Mercenaries ran to Treasure Island, they once put out word that they threatened to take crazy revenge on the Mainland, and it seems that there is information that you have an unusual identity on the Mainland, plus the fact that so many people from the Vicious Wolf Gang were taken out the other day, you have caught their attention."

Ji Feng smiled indifferently and asked, "It's not just them who are paying attention to me, is it? I'm afraid it's certain people on Treasure Island who have noticed me, right?"

The Cheetah Mercenaries, in fact, had been crippled, or even scrapped, with only so many people left that they couldn't make any waves.

I'm afraid that when they came to Treasure Island, they had already become knives in the hands of certain people, so I'm afraid that the ones who had really noticed themselves were certain people jumping up and down on Treasure Island, followed by the Cheetah Mercenaries.

"You take care of yourself." Old Zhou said, "The support I can provide to you is very limited."

"Many thanks."

Ji Feng nodded and smiled.

Old Zhou then didn't say anything else, and a moment later, Ji Feng stood up and took the lead to leave. From the beginning to the end, he didn't have much communication with Old Zhou. Although he wanted to talk to Old Zhou, he knew that Old Zhou would definitely not say much, and those in their line of work definitely didn't talk a lot.

Originally, Ji Feng wanted to ask Lao Zhou about mining the ore, but he thought better of it, the less people knew about the Alpha ore, the better.

When he returned to his landing place, Ji Feng began to think about how to do it without attracting attention and mining the ore at the same time. After thinking about it, he still felt that Zhang Lei's suggestion was the most suitable – to use the name of a private person or a company, so that the official colour could be avoided to the greatest extent and the impact would be minimized.

In fact, when things came to this point, Ji Feng's task was already considered to be a large part of completed, he was responsible for finding the Alpha Ore, as for how to get it back and how to mine it, it would be better to use the power of the state. But now it seemed that he could not go back yet.

Besides, Ji Feng had one more thing to do when he came to Treasure Island – since the Cheetah Mercenaries had threatened to retaliate wildly against China, if he didn't give people this opportunity, wouldn't that be a big disappointment to them!

"Buzz~~~"

Ji Feng was pondering when his mobile phone suddenly vibrated, it was his younger uncle Ji Zhenping calling, and looking at the line displayed on it, it was using an encrypted satellite line.

He immediately picked up the call, "Little Uncle."

Ji Zhenping's voice came over the phone, "Little Feng, prepare yourself, next the mining of the ore will enter the procedure."

Ji Feng smiled and immediately asked, "Little Uncle, are things done?"

This made him wonder, with the location where that island was located, it was so easy to go mining? Did the Philippines and Treasure Island not react to anything?

Ji Zhenping said, "Just wait and see, for the time being you can't come back, when things are finalised, you will need to go to the site again to guide, I will let you know then."

For how to mine, who to mine, Ji Zhenping did not say much, Ji Feng heart curious, but also know the rules so did not ask more.

At the same time, the Philippines and Treasure Island were simultaneously alarmed.

Today, two companies submitted applications to the foreign ministries of the Philippines and Treasure Island respectively, hoping to develop and exploit an island located at the border between the waters of the Philippines and Treasure Island.

Neither the Philippines nor Treasure Island replied immediately, apparently considering and surveying the situation. What also drew attention was the identity of the two companies, a mining company from Rice and a mining company from England, both of which are powerful multinational conglomerates.

Interestingly, both companies then submitted applications to both Treasure Island and the Philippines respectively, specifying a radioactive ore on that island.

News then circulated that the radioactive ore, it was said, could be used in medical treatment, and that the substances and faint radioactivity in it might have a curative effect on cancer.

When Ji Feng learned of this news, he stood up with a swish, this is not a joke!

Seeing this, Zhang Lei couldn't help but ask: "Crazy, what's wrong?"

Ji Feng frowned and said, "In that case, wouldn't it be a direct way to tell others about the location of that island?"

Since the application had been submitted, the location of the island would naturally no longer be a secret.

Zhang Lei nodded his head and said, "That's right. And the reason used is really quite outrageous, radioactive ore that can cure cancer? That's used to kill people, okay!"

Ji Feng smiled, but he couldn't help but slightly froze, and then, a thoughtful look appeared in his eyes.

Curing cancer?

Gradually, his tightly frowning brow gradually stretched out, it looked as if he had walked into a misunderstanding!

"So that's how it is!" Ji Feng couldn't help but say.

"What's going on?" Zhang Lei hadn't understood and couldn't help but ask immediately.

Ji Feng laughed: "This must be the military's tactics This is simply bullying!"

Zhang Lei still did not understand and hurriedly asked what was going on.

Ji Feng said, "In fact, I also took the bull by the horns at first, but now it seems that the location of this island is nothing even if it is leaked out, and it is fine to apply for the mining rights openly and honestly. Because, no one knows what the Alpha Ore is used for!"

Apart from a limited number of people, such as the military's top brass to Jiefang, no one outside knows what the use of Alpha Ore really is, and I'm afraid no one even knows what Alpha Ore is!

Because the radioactivity of Alpha Ore is very weak, compared to other radioactive substances, it is not too much to say that it is inert, even if it is put in the laboratory to study, it will not be able to study anything, unless, unless it can master the technology to stimulate the energy of Alpha Ore.

But such technology is not something that can be achieved at the present level of technology!

Campus Master Chapter 2829

So instead of sneaking around and trying to get the alpha ore by any means possible, it would be better to just apply for it, only under a different name.

However, even if the name is changed, who would know?

When he thought of this, Ji Feng couldn't help but be enlightened.

The only thing is, if you use this way to mine the ore, the time needed to obtain the mining rights will definitely be longer, but since the top is doing this, then there must be a foolproof preparation.

"In fact, ah, I even thought about whether we could secretly get a batch of ore to send back first, refine it, and make the laser guns and small laser cannons first!"

Ji Feng laughed, "But then I thought about it, that way, I'm afraid that it will instead alert other countries even more, by that time, I'm afraid that everyone knows what the ore is for, it's easy to get the first batch, but it will be difficult to mine it again next."

There is no impermeable wall in the world, if China really makes a batch of Alpha Ore, by that time news will definitely leak out!

And

just by stealing the ore alone, it wouldn't be able to get much ore, and how many laser guns could be made? Not to mention laser guns and electromagnetic rail guns and other weapons.

The first thing I thought of was to get a batch of ore back and build the weapons first, and then even if the other countries were alerted, it would be fine, even if the Philippines had troops stationed on the island, they could just pull over a group of naval forces and destroy them.

Ji Feng shook his head and lost his smile: "Secretly mining, and how much ore can we get? And how many weapons can be made? If we really pull in a group of naval forces to hijack that island, it won't be a matter of hijacking, it will probably break out into war, which is no joke!"

Zhang Lei said, "So yeah, I'm just thinking about it, although the Philippines is small, with Rice behind it, it can't be underestimated!"

When he mentioned this, the smile on Ji Feng's face gradually disappeared, and he couldn't help but coldly snort, "The Philippines is just a clown, let him bounce around, let's see how long he can bounce around!"

War is no joke, and a large number of soldiers will die at every turn.

The most important thing is that the environment around China is not that safe now, if China and the Philippines break out into a war, then the next situation can almost be imagined, the rice country will

not be indifferent, the Vietnam country will definitely jump up and down, and I am afraid that the border ponies will also take advantage of the fire.

Although China has become increasingly assertive in recent years, why doesn't it really take action in the face of provocations from other countries in its neighbourhood? It's not that they don't dare, but they can't, because there are too many things involved in the periphery.

Without clearing out the surrounding environment, one cannot let go.

Therefore, Ji Feng extremely agreed with the approach from above, and he smiled, "This is the same as when the Kepong people pitted us, I believe that those two companies will be able to get the mining rights!"

The two companies were both from abroad, and Ji Feng thought that this was the most brilliant way to do it.

For example, some companies would secretly transfer China's precious resources.

Now with foreign companies getting the mining rights, only to end up transshipping the ore to China, even if it is sold to China, as long as the ore ends up in their hands, all those side issues can be ignored.

"I just don't know if the Philippines and Treasure Island can agree!" Zhang Lei said.

"Don't worry, since the top has arranged this, then there must be their reasoning, maybe there are things we don't know about this, we'll just wait and see." Ji Feng said.

He believed that in this kind of matter, the top would definitely not make a faint move, the military top brass was not like some incompetent and ratty local leaders, they did this, that must be a decision after mature consideration.

"So we'll have nothing to do next?" Zhang Lei asked, "Is it time to go back?"

"There's no rush."

Ji Feng shook his head, "Let's wait and see, if we're sure there's no more changes, we'll go back!"

Zhang Lei immediately said, "Don't forget that there are still a bunch of bastards waiting for us to clean up before we leave, since we're here, don't be in such a hurry to go back!"

Ji Feng smiled and nodded, he knew that Zhang Lei was talking about those remaining sons of the Cheetah Mercenaries.

"These guys are still inquiring about me now!" Ji Feng said.

"What for?"

Zhang Lei looked cold, "Do they still want to make the first move? What a joke, the fact that we didn't go after them is enough for them to go and have some fun, instead they still come looking for death?!"

Ji Feng smiled, "So, we're not in a hurry to leave!"

“That’s no rush to go!” Zhang Lei grinned, “I’d like to meet these bastards for a while, at that time, Xiang Yongzhan was lucky to let them escape, now since they’re looking for death, it’s really embarrassing not to fulfill them!”

Ji Feng smiled.

The development of things was faster than Ji Feng’s expectation, just three days later, he got the news that the Philippines had agreed to the application of the mining company from Rice, only that the price was very high.

He thought that it would take some time or a bidding process, but he didn’t expect a reply in just a few days.

The reason for the quick response is that the application from the mining company in the Philippines has made the country feel that it is being taken seriously and more importantly, it means that the people of the country have acknowledged that the sea belongs to the Philippines!

..... Although, that mining company also submitted an application to Treasure Island, it was obvious to the Philippines that that was only done to avoid some trouble, and in order to declare its sovereignty, the Philippines naturally passed this application as quickly as possible.

Of course, before the application was approved, the Philippines did some research. They brought back the ore to study the location provided by the mining company, and found that it was indeed as described by the mining company, a slightly radioactive ore, containing several rare elements, but not particularly valuable.

After consulting the two companies’ offers, the Philippines itself offered a price and, after a short negotiation, the mining company from the Philippines and the one from Rice each took a step back and an agreement was reached between the two parties to mine the ore.

As for a mining company from England, it was rejected by the Philippines It was clear that between Rice and England, the Philippines was unhesitatingly inclined towards Rice.

The country has taken this quick practical action to show that the sea belongs to the Philippines.

However, just two days later, Treasure Island suddenly announced that it had reached an agreement with that mining company from England, agreeing to let that mining company do the mining for a certain price and declaring that the actions of the Philippines were illegal

This statement came out, at once, the dispute between the treasure island and the Philippine country again, the conflict between the two sides once again intensified, at this time, the two companies mining in the end what ore is no longer important, the important thing is, this island is actually approved by who to mine, who approved, it means that the sovereignty is who!

As for what kind of ore is being mined, apart from being faintly radioactive and containing some extremely rare elements, there are few people who pay attention to it, and even if they do, they will not be able to find out in a short time. Together, they produce an extremely muddy energy!

But neither side has the time to study it – because the other side won’t give you that time!

By the time you've finished your research, they've already approved mining, and by the time you've finished your research, they've probably finished mining!

That's why the application from the mining company from England was approved so quickly afterwards, but with an additional agreement that the mined ore would remain on the island.

The company's application was approved so soon afterwards by the mining company from England.

This series of changes, watching Ji Feng could not help but be a little dazzled, and only at this time did he suddenly realize, secretly saying, so it is so!

The two sides of the conflict, it is easy to get the approval, more successful in diverting the attention of the public, so that the public only see the two sides for the territorial waters of the fight, itself mining what, but instead of being ignored.

Of course, with the existing technology, even if one is more vigilant, one will never be able to find out what exactly they are mining!

A look at the whole picture!

This word couldn't help but come to Ji Feng's mind, this time what the above did was to completely stand on the height of the whole situation and easily get the mining rights.

This kind of tactic was definitely far more brilliant than fighting and killing.

If China really relied on force to seize the island, who would be able to sit still when everyone knew that there were good things on the island?

After all, China is not yet a strong country, let alone one against several, including such powerful countries as Rice and Kepong.

So this move by the top brass can simply be said to be played beautifully to the extreme!

This allowed Ji Feng to learn a lot more from it and have a deep and impressive experience.

Only now, Ji Feng was a bit puzzled, since both Treasure Island and the Philippines had approved it, and it was also two different companies, then if the next step was to actually go into mining, who was going to mine it?

If it is not approved by himself, then both sides will definitely stop it, so what should we do next?

Campus Master Chapter 2830

"That black stone is actually just an ore raw material used in medical treatment?!"

Bao Weisheng's face wore an incredulous look as he heard the news and couldn't help but feel stunned, the first thought that flooded his mind – how?!

It was in, how could it be?

Ji Feng's kind of performance, and the fact that he had come to Treasure Island specifically for that black stone, how could it be just for a few pieces of ore used for medical treatment?

Then even if it had some curative effect on cancer, what could it be? How many new anti-cancer drugs are being introduced around the world every year now, and how many of them are useful?

Moreover, this is obviously not right, the mining companies from Rice and England are going to develop it, does this have anything to do with Ji Feng?

Bao Weisheng was really puzzled, he had been fully prepared to make Ji Feng look good, but when he had gathered all his strength and was ready to throw a punch, he found that his punch had hit cotton, that suffocating feeling almost made him vomit blood!

“What the hell is going on?!” Bao Weisheng keenly felt that there was something wrong, but what exactly was fishy, he could not say.

“..... Where is Ji Feng?!” The company’s main business is to provide a wide range of products and services to the public. What he is most concerned about now, instead, is Ji Feng.

“Haven’t found out yet.”

The butler shook his head and said, “I have also checked the license plate of that car, it is a stolen car, the owner reported it to the police, but then the car was found on a street, through the surveillance video you can see that the person driving the car is a person wearing a duck-tongue cap, it is not possible to see his face, there are no traces inside the car, fingerprints and so on were wiped clean.”

Bao Weisheng grunted: “Keep looking, ask the police to help, and ask them to help look for him too.

The butler immediately nodded and responded, “Yes, young master.”

“And

Bao Weisheng said, “See if we can find a way to get close to Ji Yuhui, or to someone close to her, perhaps, she knows where Ji Feng is!”

Since it was Ji Yuhui who received Ji Feng when he first came to Treasure Island, then perhaps Ji Yuhui would know Ji Feng’s whereabouts now.

Bao Weisheng hated Ji Feng so much, how could he forget what had happened on the yacht? He was always thinking of revenge, and now that Ji Feng had come to his door, where could he find such a good thing?

But now that the ore matter had obviously been settled, and if Ji Feng had really come for the ore, then he was afraid that he would have to go back to the mainland now, Bao Weisheng naturally could not sit still.

How could he stand by and watch his great enemy leave like this?

“Treasure Island is only such a big place, where can he hide? Look for him! Use all your strength to find him, we must find him!” Bao Weisheng’s face twisted a little at the thought that Ji Feng was probably about to leave Treasure Island!

“Yes!”

The butler immediately nodded his head and hurried off to do it.

Last time, he had found people from the Evil Wolf Gang to kill Ji Feng, but instead of killing Ji Feng, all the people from the Evil Wolf Gang were done away with. Although outsiders didn't know that they had found the people from the Evil Wolf Gang, but they knew it themselves. Every time he heard this news, Bao Weisheng's face would darken a few times, it was almost as if he had been slapped in the face a few times.

This time, Bao Weisheng gave him another task, and the butler naturally did not dare to be negligent.

However, the result of the search was once again disappointing to Bao Weisheng. The housekeeper had used almost all the power he could, but still no trace of Ji Feng could be found, as if the man had really evaporated from the earth.

Bao Weisheng was annoyed, but there was nothing he could do.

He wanted to take revenge, but he couldn't do so even if he couldn't find him. He couldn't just make a villain and curse Ji Feng with a needle and call it revenge, could he?

He had no choice but to grit his teeth and pop out one word: "Find!"

But in the meantime, there was a new development in the ore development that he had been watching closely. Because of the dispute over sovereignty, the two mining companies were very efficient, and after reaching an agreement, they immediately mobilised their equipment and started to mine the island.

However, the two families are directly on top of each other.

Not only that, but the naval forces of the Philippines and Treasure Island also confronted each other, with neither side giving way to the other.

While the two navies confronted each other, the two companies didn't wait any longer and, with the certificates of formalities issued by the Philippines and Treasure Island respectively, boarded the island and started mining the ore.

And so, this strange scene emerged – on the surface, the naval forces of Pao and the Philippines were facing each other and waiting for each other, while the men of the two mining companies were also not budging from each other and boarding the islands at the same time to mine the ore!

The amazing thing is that a balance has been struck!

Neither side's navy dared to develop the first gun, while the two companies competed to see who was faster.

But no one noticed that, in the midst of this tense atmosphere, one of the workers on the island, also wearing overalls and a helmet, but also wearing sunglasses, was looking back and forth.

On top of that, there were two other men mixed in with the workers.

"Good progress!"

Ji Feng looked at the scene in front of him and couldn't help but nod in satisfaction. Previously, he had still somewhat underestimated the super high efficiency brought about by the modern mining

equipment. From an outsider's point of view, because of the need to grab the ore and compete for time, the two mining companies had not even set up mining platforms on the surface of the sea, and had started mining directly with the perimeter of the island as their foundation.

And, before any of that large mining equipment had been unloaded, just some of the smaller equipment was already bringing up super efficiency.

The mining was opened, loaded onto the ship, and then transported to the cargo ship parked near the island, and boxes of ore were continuously transported to the cargo ship, this speed of mining made Ji Feng extremely satisfied.

"Crazy, that black stone, is that Alpha Ore?!" Zhang Lei couldn't help but ask.

In fact, he could not reasonably come here, but was really curious, so he and Bai Zhu also followed Ji Feng, of course, they also mixed in after disguising themselves, otherwise, even with the nod of approval and personal leadership from the head of the mining company, they would have been too conspicuous to come in.

Ji Feng nodded and said, "That's right, that's the Alpha Ore."

Zhang Lei said in a low voice, "How many weapons can this build? This ore still needs to be refined, right? How much can be left after it's been concentrated?"

Now this was just a piece of ore, and if they wanted to make weapons, they would definitely need to be refined and concentrated, but then, how many laser guns could be made?

There were so many troops in China, even the elite field army alone couldn't match them all, right?

Ji Feng nodded and said, "Let's mine it out first."

In fact, from the current detection results, the amount of alpha ore on this island is not too small. Of course, to have a constant supply of iron ore like making ordinary weapons, this island is definitely far from enough, but with the current amount, it is certainly not a problem to equip an elite army.

At least in this way, China would have a killer army for land warfare.

What Ji Feng was most concerned about was that if Alpha Ore was found here, did that also mean that there should be Alpha Ore in other places as well?

The reason for this is that it is very likely that as long as the external environment is the same as the one near this island, and the composition is similar, there should be the possibility of the existence of alpha ore!

..... Thinking of this Ji Feng suddenly had a thought in his mind, a similar environment? The sea water?

He suddenly lit up, could it be that the conditions for the formation of alpha ore on Earth are in seawater? And also in seawater with similar acidity and alkalinity and the elements contained in it as here?

Ji Feng secretly suppressed this thought, now no matter how to say, to first transport the alpha ore back to say, as to say whether his deduction is true, there is certainly time to verify.

The two mining companies were really efficient, as the small boats were transported one by one to the freighter, the ore was soon piled up in the freighter, two companies, four freighters ready to go, watching Ji Feng's heart could not help but be on fire.

Laser guns, soon to be equipped in bulk!

Since it has been determined that there is no problem with the mining at the site, the next Ji Feng did not stay on the island for a long time, they are a few here too solid, if it attracts the attention of others, then the above play this tactic is very easy to be recognized.

In fact, to put it bluntly, this is the above overview of the overall situation, keenly grasp the minds of the senior management of the Treasure Island and the Philippines, so as to take advantage of it. Otherwise, if one wanted to enter a place to mine ore, the formalities and negotiations alone would not be done overnight, but like now, everything was finalised in just a few days, just like a joke.

This would not have been possible in normal times!

After returning to the landing place on Treasure Island, Ji Feng called the three Liu Zejun over and said, "Brothers, our first mission to Treasure Island has been completed, next, I plan to let you warm up, interested?"

Yao Zhijian's eyes lit up, "Another job?"

Yang Bin immediately said, "Sir, if there's anything you want, please give me an order!"

Liu Zejun did not say anything, but the flash of light in his eyes was enough to show that he was also moved at the moment.

Seeing the reaction of the three of them Ji Feng nodded in satisfaction and said, "Very well, then you guys can wait for a few days in peace, when I have made enquiries, we will act!"

The remnants of the Cheetah Mercenaries had gotten away with enough! It's time to settle the score with them!
