

Campus Master Chapter 2931

After determining that the energy source had been encapsulated, the radiation had been completely isolated, even the last trace of radiation was completely encapsulated by the isolation material, and could no longer do any harm to the human body, which meant that this assembly of the energy source had been completely completed!

Looking at Professor Tong and the others' very happy expressions, the corners of Ji Feng's mouth also spread a slight smile, in fact, compared to Professor Tong and the others' happiness, in fact, Ji Feng was the one who should be most excited.

Moreover, I am afraid that no one present, except him, could understand what it really meant when such an energy source was successfully created!

Because before this no one could even understand how much effort Ji Feng had gone through in order to find the energy source, or to find a suitable energy source. What's more, no one had ever known either, just how much risk was involved in that rudimentary laser gun that Ji Feng had created before!

At the time of the rescue of the special operations brigade, if it was not a last resort Ji Feng would never have fired that small laser cannon, or it could also be called a laser gun, because once the energy source was activated at that time, the extremely unstable and potent radiation was enough to instantly produce a huge hazard to the people around!

It could even necrotize one's entire body, and the mere thought of that horrific consequence makes one's scalp tingle!

Now that he had succeeded in creating an energy source from the Alpha Ore, it meant that neither he nor the future Laser Gun users would be exposed to such a great risk.

The laser guns made from this energy source would be safer than the pistols, rifles and submachine guns in mass use now, as long as the triggers and converters were not adjusted too much.

After all, these traditional weapons still have the risk of blowing up, but not the laser gun. Even if a bullet hits the energy source, it will only render the laser gun inoperable at most.

"I'll report this to the top and tell the chief the good news!" Professor Tong, in his excitement, could not help but say.

"Professor Tong, don't rush yet!"

Ji Feng stopped him and said, "The whole laser gun is basically complete now, just the final assembly and tuning is missing, wait a bit longer, after we have manufactured the whole laser gun and tested it to make sure there are no problems, then it won't be too late for you to report it!"

Professor Tong nodded repeatedly at his words, "Yes, yes, it's because I was too anxious, it's because I was too anxious!"

While speaking, he was still full of excitement and looked extremely excited.

Although he didn't know how powerful the laser gun would be after it was manufactured, he was at least a real expert with a real level of expertise, and when the energy value of the energy source was

measured out, there was also the energy value that could be generated after it was excited through the formula given by Ji Feng

After just one glance, Professor Tong became excited on the spot!

That value was really too amazing!

In Professor Tong's memory, the energy contained in the same volume, mass or even unit of matter, except for nuclear reactors, he had never heard of any other matter that could surpass this energy source created by Ji Feng!

One could only imagine how terrifying the energy contained in this energy source was!

But what was even more exciting to Professor Tong was that such a terrifying energy was so meek that it was unbelievable, compared to the intensity of a nuclear reactor, the two were like the difference between lightning and a small spark!

Those technicians were also vaguely excited in their hearts, and it was only after Ji Feng had made the energy source and they had tested it with their own hands that they realised how precious it really was!

Only then did they understand why the state had given the development of this item a top-secret ranking and the protection of soldiers with loaded weapons.

So, what kind of recognition and rewards would the technicians, who were also involved in the development, receive when they returned to their units?

I'm afraid just thinking about it can make people wake up laughing in their sleep!

So when they saw Ji Feng bringing the parts together and preparing to assemble them, the technicians all gathered around them, but when Ji Feng swept over with a look, they all stumbled at the same time.

"Unrelated personnel, get out!" Ji Feng said.

Boom~!

Ji Feng's faint words were like a thunderstorm, causing the technicians to stiffen and freeze on the spot.

Unrelated personnel? They were actually unrelated personnel?

These technicians' hearts were sinking, these four words were really like a blow to their heads, making them dizzy!

However, none of them were able to say anything because they actually knew very well in their own hearts that strictly speaking, they were really considered unrelated personnel apart from doing a bit of hard labour!

"Mr. Ji, you are" Professor Tong also froze for a moment.

"What, did I not make it clear enough?" Ji Feng asked.

Professor Tong wanted to fight for these young technicians, and he had gotten along quite well with Ji Feng these past few days, so he asked carefully, "They did contribute after all, don't you think so"

Before he could finish his words he was interrupted by Ji Feng, "What did they contribute?"

Professor Tong just choked, to put it mildly, these technicians had only done a bit of hard work after all was said and done!

"Everything that has happened here, including what they have paid for and what work they have done, I will report in detail to the top, you can rest assured that they have contributed, then I will certainly not let them work in vain!"

Ji Feng said indifferently, "But, other than that, don't think much about everything else!"

Professor Tong opened his mouth, but he was hard pressed and didn't know what to say.

To say that Ji Feng was overbearing?

He really couldn't say that because Ji Feng had always been gentle from beginning to end and hadn't really been overbearing!

Saying that Ji Feng had excluded these technicians? This was even more ridiculous.

These technicians were the ones who had to replace Ji Feng before

"What, do you want me to repeat it again?" Looking at those technicians who were still motionless, Ji Feng frowned and asked indifferently.

"....."

Those technicians all turned red, but they didn't dare to stay here any longer, so they all had to stay away from each other, but they didn't dare to have any complaints, because they knew very well in their own hearts what they had actually done before.

However, they originally thought that since Ji Feng had agreed to help them again, it meant that he had forgiven them, but they didn't expect that at this last crucial moment, Ji Feng would be so disgraceful and directly kick them aside!

This really made them regret their guts!

The reason why Ji Feng treated them this way, of course, they understand no better, if they had not gone too far before, at least, now they can also follow a little credit, this can be said to be an epoch-making high-tech weapons, even if only to be able to put a name after the inventor, that is definitely a considerable seniority ah!

But now

They were left with nothing but regret!

Perhaps the only thing they could get from Ji Feng was that they would no longer pursue the previous matter, but other than that, the fact that Ji Feng had acted so disgracefully was enough to say everything.

Regarding the reaction of those technicians, Ji Feng didn't pay any more attention to them at all, he wasn't their father and mother, so of course he wouldn't be so spoiled, and since they made it themselves, how would he bother wasting time with them?

"Ka~"

As Ji Feng quickly assembled it, the energy source was installed in, then the trigger, the converter, and some other parts, and as each part was fixed on the shell made of the new alloy, a laser gun, gradually took shape!

When Ji Feng put the last screw on, Professor Tong's breath caught in his throat.

It was fantastic!

The laser gun in Ji Feng's hand was really too fantastic!

The shape was even more fantastic than the shape of high-tech weapons in science fiction movies, but the size was not too big and the shape was so smooth that no one would have thought that it was a weapon that could easily kill people rather than an exquisite artifact if they didn't say so!

Moreover, the new chrome alloy, even without colouring, was completely different from ordinary metal, and the texture and the not-so-obvious metal pattern were just too attractive to the eye!

"Mr. Ji, can I take a look?" Professor Tong asked excitedly.

"Of course you can!"

Ji Feng smiled, he did not have the slightest ill feeling towards Professor Tong, in fact it was Professor Tong who was coordinating a lot of things these days and had sort of helped him a lot.

With an excited look, Professor Tong took the laser gun from Ji Feng's hand and swallowed hard, his eyes filled with excitement.

"Perfect!"

It was a while before he could not help but exclaim in praise. Those who were in technology were naturally obsessed with the pursuit of technology, but this kind of thing made with technology they had never heard of before was equally fascinating.

He waited until Professor Tong had finished admiring it before handing it over to Ji Feng with fondness, and couldn't help saying, "If this isn't a weapon, I really want to get one and put it at home, just looking at it is a treat!"

Ji Feng laughed, "There is definitely this opportunity!"

Professor Tong shook his head and said, "I don't want to do that, this kind of weapon will definitely be strictly controlled in a few years, I can only look at it at most!"

Ji Feng laughed, "That's not necessarily true! Maybe, in the future, our lifestyles will all change completely!"

Professor Tong naturally didn't believe it, Ji Feng smiled and didn't say anything more, some of the things he knew from the intelligent brain were not good to say out loud!

"Professor Tong, let's proceed with the quiz next!" Ji Feng said.

"Good!" When Professor Tong heard that, he immediately got excited, such an exquisite art-like weapon, what kind of power it had, he really wanted to see it with his own eyes.

The two of them came to the target that had already been prepared, turned on the equipment, sensors and other various things had been prepared, Ji Feng personally took the laser gun and aimed at the target

Campus Master Chapter 2932

The target was designed in a very ordinary way, just a round target, however, the target was filled with various sensors, when the laser gun hit this, it could test the energy of the laser gun when firing and various other parameters.

At this moment, Ji Feng was aiming at this target.

"Mr. Ji, aren't you too far away here?!" Professor Tong suddenly asked. At this moment, the position Ji Feng was standing at was almost a hundred meters away from the target, so far away, the range of the laser was definitely enough, but could Ji Feng hit it?

"It's fine!"

Ji Feng smiled, didn't even turn his head back, and directly pulled the trigger.

Swoosh~!

Maybe there was this sound, maybe there wasn't, anyway, Professor Tong only felt that a bright light suddenly flashed in front of his eyes, just like a spark flashed, if he didn't look carefully he would have thought it was his illusion, but the bright light still reflected on his retina was telling Professor Tong with utmost certainty that what he just saw was not an illusion, but the real thing!

This was what happened when the laser gun was fired?

Professor Tong was a little surprised!

There wasn't much movement, and most likely even no sound, until now Professor Tong was still somewhat doubtful whether he had just heard a sound or not

Other than a bright light flashing momentarily, there didn't seem to be any other signs!

Seeing that Ji Feng had put away his gun and walked towards the equipment, Professor Tong immediately walked quickly towards the target, he had to go and see the situation of the put in that, and only after the two seals could the data be finalized.

However, when Professor Tong arrived at the target, his scalp suddenly went numb.

There was a small hole in the metal target, the thickness of an adult's thumb, which was a little to the right, but it went right through the target!

What a great power!

Professor Tong couldn't help but be stunned, this was set up like the target of a high-powered sniper rifle, but to think that without hearing any sound, the target was directly pierced!

"Professor Tong, what's the situation?!" Ji Feng's voice came over, only to make Professor Tong come back from his shock.

He hurriedly said, "Pierced through, slightly offset, the sensors are all there!"

Then he heard Ji Feng say, "Offset?! Looks like there's still a bit of a problem with the track, it needs some adjustment!"

And then, he was busy at the workbench for a while.

Ten minutes later, Ji Feng fired again.

"Phew~!"

This time Professor Tong heard it clearly, there was indeed a low sound, which could not be heard at all if one did not listen carefully, and the rest was generally the same as the firing just now.

Professor Tong immediately ran to the target to look at it, then he found that almost right in the middle, the target was pierced through!

"Professor Tong, you come back first, I'll try one last time!" Ji Feng shouted. Professor Tong came back in a panic, and then saw Ji Feng's hand clicking and flicking something on top of that laser gun.

Then, a scene that left Professor Tong dumbfounded appeared.

"Swoosh!" The sound.

Only a white light about as thick as a wrist suddenly shot out from the laser gun, flashing instantly just like a thick lightning bolt.

Professor Tong subconsciously looked towards the direction of the target and was instantly dumbfounded!

He saw that the target, which was originally the size of a pot lid, had disappeared without a trace, and even the metal frame supporting the target was missing a large part of it!

Professor Tong hurriedly ran over to see, and then was shocked to find that the place where the metal frame had been cut off was like a candle that had been burned by high temperature, and there were signs of melting, and some parts were still red and red

As for the target, where is there any trace of it at this moment?

Professor Tong couldn't help but open his mouth wide, looking at the scene in front of him in shock, he couldn't believe his eyes, the power of this laser gun, really so powerful?

That's right! There was a video!

Professor Tong suddenly remembered that the whole experiment was recorded on video, so he hurriedly ran away from the computer to view the video.

The video was transferred!

Then, Professor Tong saw a scene he would never forget – a white light suddenly flashed on the computer screen, and the next moment, the target, including half of the frame, was gone!

Slow down! Slow it down again!

Professor Tong broke down the video over and over again, and what happened at that instant came into clear focus.

When the white light hit the target, the target melted rapidly at a speed visible to the naked eye, so you can imagine how terrifying the temperature contained in that white light was!

According to the video, when the white light hit the target, it was like a stream of water hitting the target and forming a small area, but anything within this area melted!

That's why the target was gone, even the metal frame that was supporting it had actually disappeared for a large part!

Professor Tong's back couldn't help but break into a cold sweat!

This was only hitting the target made of metal, but if it hit a person directly then wouldn't the whole person be melted away instantly?

This is really terrifying!

Professor Tong couldn't help but swallow his saliva with difficulty, no wonder the country had to classify this kind of weapon as top secret, just this kind of power alone was enough to explain everything.

"Hmm?!"

Professor Tong looked up and looked around, but suddenly he was struck by a sudden shock, the corner of his eye saw that in front of him there was a place that seemed a bit strange, he subconsciously walked over, when he saw clearly what it was, he couldn't help but blush: "This"

He noticed that it was a wall that was still a long way behind the target, and surprisingly a big hole had been made in it too!

"This is" Professor Tong was stunned.

"It's alright, it's because I turned the energy up too strong and it pierced the wall!" Ji Feng's voice rang out, but it made Professor Tong even more stunned, that hit just now, the target was completely melted away is not enough, it actually pierced the wall too, that was a reinforced concrete factory!

"The power is not bad!"

Ji Feng looked at the hole in the wall and was quite satisfied with it, turning his head to Professor Tong and said, "Professor Tong, please arrange for someone to go outside and go along this direction to see where exactly this shot just hit!"

Professor Tong was startled at that, "Yes, I'll arrange it now!"

That shot just now had even penetrated the wall, if there were people outside, wouldn't it have injured the people outside as well!

Seeing Professor Tong's face, Ji Feng knew what he was thinking, so he smiled, "Don't worry, there's no workshop and no one in that direction!"

Only then did Professor Tong remember that when he was setting up the target earlier, Ji Feng had deliberately asked about the surrounding environment and facilities, he was then relieved and was immediately filled with great surprise and excitement, "Mr. Ji, congratulations, the laser gun has finally succeeded, this power, I'm afraid it's going to shock the whole world!"

Ji Feng shook his head and said, "I do hope that in the future it will be our army that will shock the world!"

Professor Tong's heart fluttered at his words and he nodded his head, "That's right!"

Looking at the laser gun in his hand, Ji Feng couldn't help but smile, a qualified laser gun, finally he had made it!

.....

"What?! It's manufactured!?"

The moment he received Ji Feng's call, the entire voice of Xiang Jiefang, who was far away in Yanjing, changed a bit, afraid that Ji Feng was teasing him, and hurriedly confirmed it again, "It's really manufactured?!"

Ji Feng smiled, "That's right! A simple test has been done so far, although a more detailed test has not been done yet, but it is still in line with my expectations! Chief Xiang, this answer sheet, I've handed it in!"

The first time I saw you, I had to go to the chief's office to give you credit."

With Xiang Jiefang's rank and status, the chief he was talking about, that was without a doubt the real top chief!

Ji Feng immediately laughed, "Chief Xiang, forget about claiming credit, I would be happy if I could take more care of the Tengfei Group in the next cooperation!"

Xiang Jiefang couldn't help but nod his head, this kid, in the face of such temptation `can hold back, and can see what he really wants, really is a person!

"Don't worry, as long as the samples pass the test, everything is fine!" Xiang Jiefang said forcefully.

"Then it's no problem!" Ji Feng laughed.

No one knew better than him how the laser gun really was. If such a weapon still didn't satisfy the military, then I'm afraid that only the atomic bomb would work in this world!

Just after finishing the call with Xiang Jiefang, Ji Feng called his younger uncle Ji Zhenping again.

Knowing the news, Ji Zhenping's voice was likewise a little shaky with excitement as he asked, "Compared to the weapon you shot down that plane last time, how is the weapon now?!"

Ji Feng knew that Little Uncle was talking about the small laser cannon that he carried during the rescue of the special operations brigade last time, in fact, in the strictest sense it was not a laser cannon at all, a real laser cannon, so powerful that it was simply indescribable, not to mention a plane, even if an aircraft carrier was hit by a laser cannon, it would definitely be enough to destroy it with one shot!

"How can I put it, the performance of this design is more stable and a bit milder, but the penetrating power is not reduced!" Ji Feng said, "As long as it can hit, not to mention planes, rockets can be shot down!"

"..... Good!"

Ji Zhenping's side was silent for a long time before he said this word heavily.

Ji Feng then smiled.

In just less than half an hour, the roar of a helicopter came from outside, and when he arrived outside the workshop, he saw a helicopter landing in the open space in front of him, and the heavily armed Xiang Yongzhan was the first to get down from the helicopter, and behind him, followed by loaded soldiers with greased faces!

This was the costume of a special operations brigade when there was a combat mission!

For this laser gun in Ji Feng's hand, the military gave it the highest level of importance and protection!

Campus Master Chapter 2933

"Got it out?!"

Xiang Yongzhan did not rush to send the laser gun to Yanjing, but asked. Only, because he was too excited, it made his voice tremble a little.

Because Xiang Yongzhan had really seen with his own eyes how terrifyingly powerful the weapon developed by Ji Feng really was. At that time on the ship, the scene of Ji Feng just pulling the trigger to shoot down a warplane was so shocking that it even shook the whole world!

Only, the footage that was captured by another plane at that time was only available to a few countries, otherwise, I'm afraid that the whole world would have gone crazy because of that video!

A mere white light could have brought down a warplane, which means something that even the most military illiterate should understand!

Even so, many military powers, including Rice and Kepong, are now extremely nervous, especially Kepong, Vietnam, the Philippines and our next-door neighbour San and several other countries that have always been hostile or competitive with China, and are even more hostile!

That unknown mysterious weapon is not only extremely terrifying, but also has a very strong symbolic meaning, because in the view of many countries, since China even has such a terrifying weapon, who can guarantee that China does not have an even more powerful concealed weapon?

As a result, some countries are now wary of China, and even those who often choked with China on certain issues have now tightened up a bit.

This, is what an advanced and terrifying weapon brings!

What is a weapon? It represents power!

In this world of the weak and the strong, it is always power that speaks, it has always been so cruel, and only when China has mastered strong power and its fists are hard enough can it straighten its back and speak loudly, and only then will what it says be taken seriously!

Therefore, as a soldier, Xiang Yongzhan's desire for powerful weapons was too strong. At this moment, when he learned that Ji Feng had really made the laser gun, he really couldn't be excited.

"Can I try it first?" Xiang Yongzhan asked.

"Of course no problem!"

Ji Feng smiled, "But you can't try it here, you have to go inside!"

With so many pairs of eyes watching outside, it was not conducive to secrecy and it was not convenient to try. Of course, in terms of secrecy is actually only in the process of research and development, because when the next mass production is actually equipped with troops, wanting to conceal it is certainly impossible, it will definitely leak out, which is also predictable!

The reason for the secrecy now is so that nothing will be affected before the troops are equipped!

Xiang Yongzhan certainly didn't have any problems, he immediately followed Ji Feng into the workshop, the moment he got the laser gun, he had an excited look on his face, stroked it back and forth twice and exclaimed, "Beautiful!"

Ji Feng laughed, "Wait until you've tried it out!"

Looking at Ji Feng's confident expression, Xiang Yongzhan became even more excited. He did not have the slightest doubt about this kind of weapon, because he had seen with his own eyes what great power it really had.

Following Ji Feng's instructions, he set the laser gun in his hand and aimed at the target.

"Phew~"

A white light flashed.

The next moment, Xiang Yongzhan couldn't help but open his mouth wide that target was actually blown away straight away!

"This target is made of special metal, and some of its hardness and other indicators are made with reference to the indicators of military special steel!" Ji Feng said with a smile on his face, "This means that if you had just hit a plane, then the nose of this plane might have been blown off with a single shot from you right now!"

Xiang Yongzhan's eyes widened abruptly, "Really?!"

Ji Feng nodded and smiled, "Of course it's true!"

He instantly became excited because he understood the meaning of this all too well.

If a missile or an anti-aircraft gun hit a warplane, of course it was equally capable of easily blasting it away, but among single weapons, even the most advanced single anti-aircraft weapons nowadays definitely did not have such a great power.

What's more, the speed of the laser gun was too fast, just a flash of light, and the target was blown away!

Moreover, it seems that this thing has a frighteningly long range

Ji Feng said, "According to the amount of energy tuned, the range is different, the farthest distance within the effective killing range, hitting high altitude warplanes may not be possible, but low altitude warplanes and bombers and so on, to blast down that is no problem at all!"

"....."

Xiang Yongzhan's mouth was open wide and he could no longer speak.

Now is not the World War II era so clumsy bomber ah, even now some low altitude bombers, that altitude is also quite amazing!

But Ji Feng actually said that it was no problem at all to shoot down

This means that as long as there are soldiers standing on the ground with laser guns, the bombers above them will be able to blow each other down as long as they aim, unless they rise to high altitude?

This is so sick!

Imagine what it would be like if there was a real war!

Xiang Yongzhan couldn't help but think of the ongoing Rice bombing of certain countries in the Middle East. If the troops on the ground at that time had a laser gun in their hands, it would have been an absolute disaster for the Rice air force, and the Rice air raids would have been a big joke!

Imagine again, if a small-scale military conflict broke out between China and other countries, with nuclear weapons only being a deterrent, even if China's naval power was not strong, but in this naval era where aircraft carriers are the main combat force, with one of these laser guns in the hands of China's military personnel, as many bombers as the other side came, would become scrap metal!

It was simply too much fun!

Thinking of the excitement, Xiang Yongzhan was simply too excited to contain himself!

"I'll send the weapons to Yanjing right now!" Xiang Yongzhan said at once, "Ji Feng, thanks!"

"No need to thank you!"

Ji Feng waved his hand and said, "But, you'll take this to deliver the laser gun?!" He pointed at the helicopter outside that was still being started.

Xiang Yongzhan said, "No, I just couldn't make it here by car so I took the helicopter, I'll go back to the military area first later and then take a military plane to fly directly to Yanjing military area!"

Ji Feng said, "Be careful with your safety!"

Xiang Yongzhan said, "Don't worry, I've never been so careful!"

"That's good!"

Ji Feng smiled and nodded, reminding, "I'm afraid some things may not really be that top secret, you understand, be careful on the way and take a few more people with you!"

Xiang Yongzhan said confidently, "See, they're all from the Special Operations Brigade, I don't believe that with such a short distance to travel, who could still rob this thing from me!"

"Anyway, it's better to be careful, you can just use the laser gun if necessary, I've already tuned it up!" Ji Feng admonished.

"Don't worry!"

Xiang Yongzhan laughed, "I understand what you mean, I won't be careless! However, if you can get me a small laser gun as a matching gun, it would be good!"

Ji Feng immediately laughed, "You don't have to think about that, there is a small laser gun, but it's for myself, I'll talk about it later when I have the chance!"

Xiang Yongzhan said helplessly, "You say how come I made such a friend of yours"

Saying that, he wrapped the laser gun and said, "No more bullshit, I have to hurry up and send it over and come back to buy you a drink!"

Ji Feng said, "Then I'm waiting!"

Xiang Yongzhan gave him a thumbs up and then walked away quickly.

"It's finally done!" Watching the helicopter lift off and quickly leave, Ji Feng couldn't help but say, next, it was time to hurry up and introduce the alloy production line, the mass production of the new chrome alloy had to be speeded up!

After lifting his hand to look at his watch, he found that it was almost time to leave work, so Ji Feng did not go back to the Tengfei Group, after saying goodbye to Professor Tong, he took Bai Zhu and went straight home.

.....

Tengfei Group.

It was time to leave work, but Han Zhong did not notice the passage of time, he just continued to keep his head down and deal with the documents.

“Husband general manager, it’s after work, you’re not going to work overtime again, are you?!” Wang Jun’s voice came over, and that sound of husband immediately made Han Zhong’s heart flutter, and he laughed as he wrapped his arms around Wang Jun, who had come to the side, and his big hand groped her firm, plump buttocks twice as hard as he could.

The two of them were already extremely close, and these intimate actions were naturally extremely natural.

But Wang Jun’s face was red and she gave him a flirtatious white glance, saying, “Stop it, this is the company! Pay attention to the image of your general manager!”

Han Zhong laughed: “So you mean, if it’s not in the company, you’ll”

Wang Jun suddenly blushed red and snapped, “Nasty, all day long, just think nonsense, after work, let’s go to dinner together!”

Han Zhong then laughed heatedly twice, the two were now extremely intimate, but Wang Jun had never agreed to the two breaking through the last line of defense, which made Han Zhong look forward to it.

But looking at the papers on the table, he was a little hesitant.

“You’re not going to work overtime, are you? You’re working so hard and you’re not getting recognition from people, so why bother!” Jun Wang said, “Hmm? What you’re looking at here is the manufacturer’s information for the alloy production line? Han Zhong, are you trying to help General Xiao?”

“Well, I’m going to take a look first and recommend it to Mr. Xiao if there’s a suitable one.” Han Zhong nodded his head and said.

“But haven’t you already put off this project?” Wang Jun asked.

“Even if you have pushed it, you can still help out, Mr. Xiao is not too familiar with this area after all”

“You are so enthusiastic, but people may not appreciate it!” Wang Jun hummed.

Han Zhong shook his head and laughed: “Just to help look at it, there is nothing to appreciate or not to appreciate!”

Wang Jun said, “But we’re both working overtime here, but they don’t care about it at all, I just saw Mr. Xiao leaving from work! You’re still here foolishly taking me to work overtime!”

Han Zhong frowned, “Gone? When did you leave?”

Wang Jun said, “Just before I came in just now ah, I saw it with my own eyes, Han Zhong, people don’t take you seriously at all, so why do you need to”

Han Zhong was silent for a moment, then nodded and smiled, saying, “You’re right! Let’s go, let’s go eat!”

Wang Jun’s eyes instantly lit up, “That’s right!”

A complicated look flashed across Han Zhong’s face, and a light sigh escaped from his heart.

Campus Master Chapter 2934

“What do you want to eat tonight?”

Obediently listening to his wife’s advice, Han Zhong decisively put down all the information at hand and left work early. At this moment, he was driving the car while turning his head to ask Wang Jun who was sitting in the passenger seat.

Wang Jun held his chin in his right hand and said thoughtfully, “The day before yesterday, we had western food, yesterday we had barbecue, today

Han Zhong immediately said, “Or let’s go to where I live today, we’ll cook and eat ourselves! It’s not good to eat outside all the time, it’s more hygienic to cook your own food at home!”

Wang Jun gave him a blank look, her pretty face slightly red, but she didn’t say anything.

When Han Zhong saw this, his heart swelled, but on the surface he pretended to be indifferent and said, “Then we’ll go back now!”

Since Wang Jun didn’t say anything, he took her to be acquiescent. In this kind of situation, men must take the initiative, the so-called thick and dark science can actually come in handy at this time, thick-skinned and dark-hearted, it can definitely make things happen!

Han Zhong started to slow down and prepared to turn around.

However, at this time, he suddenly saw a car speeding by in his left rear-view mirror, and before he could steer to avoid it, he suddenly heard an ear-splitting sound of sharp braking: “Zee-!”

Wang Jun immediately shrieked in terror, “Ah—! Han Zhong, watch out!”

The sound of the tyres rubbing violently against the concrete ground was so harsh that Han Zhong could not help but break out in a cold sweat, and he became furious, the other party was driving too aggressively, he had already put on his turn signal in advance when he was turning around, and only started to turn around after confirming that there was no car behind him.

But in the blink of an eye, the other car suddenly rushed up, the other car’s speed is too fast. And it was also too overbearing!

“Buzz~!”

Confirming that there was no collision, Han Zhong immediately clicked the handbrake button, lowered the window glass, and shouted, “How can you drive, don’t want to die by driving so fast!”

However, who knew that the other party’s window was also lowered, revealing a young man with a full head of yellow hair, only to see the man glance at Han Zhong contemptuously and tsk his mouth: “Yo-ho, not a small temper, kid, what did you say just now, say it again so that brother can listen!”

Hearing the other party’s frivolous words Han Zhong’s face instantly sank as he stared at the other party and said, “Be careful what you say, who are you brother?!”

“You strike up a conversation then of course it’s you!” The yellow hair laughed, “Kid, look at your look seems to be very defiant, huh? What, driving a big Ben makes you think you’re so hung up?”

“Haha

The other side of the car there are several people, this yellow hair is just the person sitting in the passenger seat, to now that drive even did not even look at Han Zhong, just harrumphing, obviously did not put Han Zhong in the eyes.

Han Zhong's face was sombre and he did not say anything. But those who were familiar with him knew that with this expression, he was obviously already extremely annoyed.

These people were too rampant, and recently Han Zhong was already not in a good mood, and now that he had encountered such a disturbing matter, it made him a little impatient.

"All of you get lost!"

Han Zhong shouted coldly, "Don't get yourself into trouble!" With that, he was about to raise the window glass and prepare to drive away, these people were not good birds at first glance, he was the general manager of the Tengfei Group, so naturally he was not in a position to fight with such people here.

After scanning the other party's car, Han Zhong saw that the other party was driving a Land Rover, and thought, "No wonder these people are so arrogant, they have some money!"

But Han Zhong did not put the other side in his eyes, he drove a big Ben that is only because of the work needs, as the general manager's seat must have a certain class, but more importantly, stable, this is related to the image of the company, but if Han Zhong wanted to, what car he can not afford to buy?

This kind of people Han Zhong has seen a lot, the second generation of rich people who do things outside just because their families have a few money, this kind of people he was extremely disgusted when he was in school, and now even more so!

However, Han Zhong's words ignited a powder keg, and the people in the other car immediately became angry, and the yellow hair cursed, "What did you say, little punk? I'll kill you!"

The yellow hair was so arrogant that he kicked the door of Han Zhong's Mercedes-Benz, which immediately dented a piece of it. Get out and say what you just said again, you little punk, I think you want to die!"

Han Zhong's face was incomparably gloomy, a cold light flashed in his eyes and he was about to push open the car door to get down, but he was suddenly stopped by Wang Jun: "Han Zhong, don't be ordinary with them, let's call the police!"

Han Zhong shook his head and said, "Don't worry about it, just leave it to me!"

What a joke!

He was the general manager of the Tengfei Group, but he was still afraid of a few hooligans?

Wang Jun said anxiously, "They are hooligans, they won't reason with you, don't go down there!"

"Yoo-hoo! There's a pretty girl in the car?" Someone on the other side had sharp eyes and instantly saw Wang Jun sitting on the passenger seat, and immediately said with a smile, "Little Beavis, let this pretty girl come down and play with her brother, and let's forget about today's matter, what do you think"

Boom!

The man hadn't finished his words when he was suddenly hit by the car door and took a few steps backwards, sitting on his butt on the ground.

The company's main business is to provide a wide range of products and services to the market. Since you're looking for death, I'll make it happen for you!"

The other guys couldn't help but be shocked, they didn't expect Han Zhong's strength to be so strong, just one push of the car door could knock down a grown man, this strength is not small!

"Damn it! Fuck him!" Yellow Hair was instantly enraged and shouted.

"Fuck!"

A guy in a plaid shirt next to him followed suit and shouted, kicking violently towards Han Zhong, causing Wang Jun to shriek in fear.

However, in the next moment, all that could be seen was Han Zhong taking a step forward and steeply dodging it with a stagger of his feet and a dip of his shoulders, then he stepped forward with a fierce lunge and his shoulder slammed right into the small of the man's back.

"Boom!" With a bang, the man was carried off by Han Zhong and fell heavily onto the road, letting out a scream and covering his stomach in pain as he could not stand up.

The two remaining men were astonished, they did not expect that the round and chubby looking Han Zhong had such agile body.

At this point, there were already many cars passing by one after another on both sides, but they all slowed down when passing them, and some of them even almost stopped as if they were watching the action, which made the remaining yellow-haired duo somewhat hard to ride.

When they saw Han Zhong's skill just now, they were worried that they would not be able to beat him, but if they just walked away, it would be a real shame, which made them in a bit of a dilemma.

"You guys are really bold, do you know that you have caused a great deal of trouble?!" Just then, a voice suddenly came from the side, Han Zhong and the others turned their heads to look, and saw a man in a suit coming over at some point, and looking at his gaze, the words just now seemed to have been said to the two of them, Huang Mao.

Huang Mao said, "Who are you? What's it to you?"

The man said, "It's none of my business, I'm just reminding you that the man standing in front of you is the general manager of the Tengfei Group, the son of the chairman of the Han Group!"

"Huh?!"

The yellow-haired duo's faces changed abruptly, Han Zhong was actually the general manager of the Tengfei Group? The young master of the Han Group?!

Perhaps they could not know the Han Group, but the name Tengfei Group was not unfamiliar to them in the slightest. The Kang Yuan slimming powder and the 3D TV were so hot that it was hard for them not to know about them.

They had even heard that the Tengfei Group had a very deep background and came from a very big place! Even if their old man came over, I'm afraid he wouldn't dare to do that to the general manager of the Tengfei Group!

The yellow hair duo's faces were ugly, they realized that they had kicked the iron board today, they couldn't help but feel a little panic in their hearts, they wanted to run away but didn't dare to, they couldn't say anything noisily.

"This, this big brother"

"Get lost!"

Han Zhong shouted coldly, being addressed as big brother by a few small hooligans, which made him feel even more tired.

A few guys were instantly pardoned and hurriedly left in a huff. But they didn't know that before they left, Han Zhong took a deep look at the license plate of that car.

This was not the end of the matter today!

Although Han Zhong's temper was not bad and he was not a playboy, but it also depended on the time of day.

Just because he didn't see eye to eye with these hooligans didn't mean he didn't see eye to eye with their parents either!

"Mr. Han, with your current status, you should take a few bodyguards with you when you go out, so that you can at least deal with some minor troubles and swat away some flies, and not take up so much time as you are now!" At this time, the man in the suit said with a smile.

"..... is not used to bringing bodyguards!"

Han Zhong shook his head, gave the man a look and said, "Thanks for earlier!"

The man couldn't help but shake his head and laugh, "That's too polite of you, Mr. Han, in fact, I'm afraid I'm the one who interrupted Mr. Han's mood, right? I could tell that Han's kung fu just now was really amazing, even if there were four more guys, they might not be Han's opponent! I really didn't expect that Han is a master of both arts and martial arts!"

Han Zhong waved his hand and said, "It's not worth mentioning. That's all, goodbye!" As he spoke, he nodded at the man and prepared to get into his car to leave.

The man suddenly said, "Please stay, Mr. Han!"

Han Zhong looked a little puzzled and asked, "What, is there anything else?" In fact, he was already a bit puzzled in his heart, this man had recognised himself at a glance, it seemed, he was not so famous, right?

But on the surface, he did not move.

The man smiled and said, "I have always admired Mr. Han and hope to have a chance to communicate with him This is not the place to talk, I wonder if I can ask Mr. Han to move for a while?"

Campus Master Chapter 2935

The man smiled and said, "I have always admired Mr. Han and hope to have a chance to communicate with him This is not the place to talk, I wonder if I could ask Mr. Han to move for a while?"

He spoke somewhat literally, which made Han Zhong somewhat uncomfortable, but having seen many people in the business world, there were all kinds of people, so Han Zhong was not too surprised, and just asked, "Me? I wonder what I can do to help you?"

The man smiled and said, "Mr. Han, it's not a favor, I've just said that we are communicating with each other just don't know if Mr. Han is willing to give me this opportunity!"

"Good!"

Han Zhong glanced at the man and nodded his head.

The man immediately smiled and said, "That's great! Thank you for giving me this opportunity, I know a restaurant not far from here that has a good environment and good food, how about we go there and have a chat while we eat?"

I thought Han Zhong would agree, but I didn't expect him to shake his head and say, "Let's eat western food, I happen to know a good western restaurant around here, it's on me!"

The man froze for a moment, then nodded and smiled, "As you wish, Mr. Han!"

"Then I'll lead the way in front!" Han Zhong said, he didn't invite the man to get into the car, as he had already seen the man's car just down the road.

When he got into the car, Han Zhong said to Wang Jun, "Not going home, let's go for western food!"

Wang Jun nodded, she had heard all the conversation between Han Zhong and the man just now, but her beautiful eyes looked at Han Zhong with great surprise.

Han Zhong smiled and asked, "Why are you looking at me like that? Did you get scared just now? Don't worry, I'm here, I won't let anyone do anything to you!"

Wang Jun slowly shook his head and said, "No, I'm just surprised that you"

"Surprised that I just let them go?!"

Han Zhong laughed: "Don't worry, they can't leave, this matter is not over!"

Wang Jun was stunned, "Not finished? But they've all left"

Han Zhong shook his head and said, "It's good that they're gone, but if they're smart enough and their parents are smart enough, I don't think it will take long for them to show up in front of us again!"

How could the general manager of the Tengfei Group be so easily insulted?

Even if Han Zhong did not intend to pursue this matter, the parents of Huang Mao's few people should not be so lightly dismissed, unless, of course, their parents were just as ignorant as those few hooligans, but in that case, Han Zhong would not be so polite!

Wang Jun nodded thoughtfully and said, "That's what you men call bullying, isn't it?"

"What domineering!"

Han Zhong shook his head and laughed, saying, "I just can't swallow this anger!"

Wang Jun shook his head and said, "I find that there are still many aspects of you that I really don't understand, it's really beyond my expectations!"

Han Zhong smiled and asked, "Which aspects do you not know about me?"

Wang Jun said, "For example, when you cleaned up those few punks just now, that skill was really too good, I really didn't think you were actually still so good, usually I really don't see it!"

"You said this ah"

Han Zhong then understood what Wang Jun was talking about, and also realized why Wang Jun looked at him with that strange look as soon as he got into the car, and laughed: "I'm just casually practicing, just thinking of strengthening my body, I didn't think of practicing much!"

Wang Jun pursed his lips and said, "This is not impressive? A few punks can be beaten up casually, how much more powerful do you need to be? Hey, who did you train with? How can you be so good?"

Han Zhong glanced at her and said with a smile, "Doesn't our company have a security department? The first two years I had more time, so when I had nothing else to do, I would go to the security department and learn a few moves from them, and the security department has a special training ground with all kinds of equipment and tutorials, so I just thought of it as a way to strengthen my body! You know, boys, they always have a love for martial arts!"

Wang Jun was surprised, "Is that so?"

Han Zhong smiled and said, "That's right, by the way, you can also go to practice later, just think of it as exercise!"

"Let's talk about it!" Wang Jun was still a little surprised, "I really didn't expect that!"

"There are many things you haven't thought of!" Han Zhong suddenly said.

"What?!" Wang Jun was stunned.

Han Zhong shook his head and laughed, "Nothing! Right, we're almost there, think about what you're going to eat later!"

Wang Jun nodded, but in her heart she felt a little strange, how Han Zhong's words just now sounded somewhat meaningful!

She looked at Han Zhong and found that he was driving calmly, as usual, and his round looking face looked a bit cute, Wang Jun couldn't help but shake his head, it seems he was overthinking it.

The western restaurant that Han Zhong said was not far away, he only drove for about twenty minutes to get there, but on the way his car was a big eye-catcher, not because he was driving a big Ben, but the car door was obviously a footprint and the dented piece, let people know at first glance that it was kicked down.

Although the big Ben is not at all a rare car in Jiangzhou, even in taxis there are Passats, and it is not that the people have not seen good cars, but such a kick on the door of a big Ben is really rare.

Faced with those people's pointing, Han Zhong acted as if he didn't see it, still looking calm, but his brow was gently frowning, as if he had something on his mind that was difficult to unravel.

Only when he stopped the car at the entrance of the restaurant did Han Zhong let out a faint breath, a faint smile returning to his face, and said to Wang Jun, "Junjun, let's go in!"

Wang Jun looked back and found that the car that greeted Han Zhong before had not yet arrived, she could not help but ask, "Hey, don't you wait for others?"

On this journey Han Zhong drove the car very fast, and the other party hadn't kept up for a while.

Han Zhong said, "Don't wait! Let's go, let's go in first!"

Wang Jun hurriedly said, "Let's wait a bit, otherwise it would be rude!"

Han Zhong suddenly grinned, "What's so rude about that? He's the one who's looking for me to talk to, and he's the one who wants to communicate with me, but so far I don't even know what he's looking for me for, or even what his name is, I'm just here to eat, what's so rude about that?"

Wang Jun gave an err, but didn't know how to reply.

"Let's go!"

As soon as Han Zhong took her hand, he entered the Western restaurant, which didn't look very upscale at the front.

After asking the waiter for a seat for four, Han Zhong first pulled out a chair for Wang Jun, and very gentlemanly let her sit down before he himself sat down and said, "Order your food!"

Wang Jun nodded, picked up the menu and began to order, but she still said, "Let's wait for that person first!"

Han Zhong smiled, "That's fine!"

Wang Jun then let out a sigh of relief, thinking that it seemed that Han Zhong was still only in a fit of anger just now, but he was still as obedient to her as ever.

Looking at the faint smile on Han Zhong's face, Wang Jun could not help but purse her lips and suddenly asked, "Hey, before in the car, you said I did not expect more, what do you mean?"

Han Zhong laughed: "You say this ah don't you find that there are many things about me that you didn't expect to be excellent? After you have seen my true manly side, you will have a clearer understanding of this!"

“Yuck!”

Wang Jun spat lightly, her pretty face slightly red as she gave him a flirtatious white glance.

Han Zhong laughed.

Wang Jun said, “Keep your voice down, this is a western restaurant, pay attention to etiquette!”

As the two were joking, they saw the man in the suit from before walk over and smile, “Han Zhong is really a great general, it seems that what just happened didn’t affect Han’s mood at all!”

Han Zhong pointed to a seat next to him and gestured for the man to sit down while saying, “A few flies are just a few flies, wouldn’t it be too worthless if I let them affect my mood for dinner?!”

The man nodded approvingly and said, “That makes sense!”

Han Zhong smiled and greeted the waiter, signalling that he wanted to order his food. He then took it upon himself to order a drink first, and then one for Wang Jun, something she liked to drink, and then stopped talking.

The man couldn’t help but stare, it didn’t look like Han Zhong intended to be polite to him, did he?

But the man wasn’t too surprised and casually ordered his meal before he said with a smile, “I didn’t expect General Manager Han to like Western food, it’s because I didn’t do my job properly before!”

Mr. Han smiled and said, “It’s not that I like western food, it’s just that if I eat Chinese food, I’m not used to having dishes on the same plate and soup in the same pot with strangers, that’s all!”

The man didn’t expect Han Zhong to speak so directly, so he couldn’t help but choke on his face and smiled a little awkwardly, snorting, “So what, let me introduce myself first, my surname is Tang, Tang Qingquan!”

With that, he handed over a business card with both hands.

Han Zhong casually took it over, looked at it and found that the title on the business card read: General Manager of the Greater China Region of the Gaoyuan Group, Tang Qingquan.

He gave the man an unexpected look, “Gao Yuan Group?”

The man called Tang Qingquan nodded slightly and smiled, “That’s right! The Mainland and Treasure Island are one family!”

Han Zhong nodded and smiled, he had heard of this Gao Yuan Group, it was a very famous large enterprise in the Treasure Island, it was also a comprehensive enterprise, involved in many fields, it was also a very powerful large group of companies.

But at this time, Han Zhong was even more curious as to what purpose this Tang Qingquan had in mind when he suddenly approached him!

“General Tang, I wonder what I can do to help you?!” Han Zhong asked with a smile.

“Can’t say I can help!”

Tang Qingquan waved his hand and said with a smile, "I just wanted to find a chance to talk to Mr. Han, to get to know and exchange ideas, I just didn't expect to meet under such circumstances."

Han Zhong smiled and said, "I was the one who didn't expect it, Mr. Tang should have expected it, right?"

Tang Qingquan was stunned, and then nodded with a smile.

Campus Master Chapter 2936

Han Zhong smiled and said, "The one who didn't expect it was me, Mr. Tang should have expected it, right?"

Tang Qingquan was stunned, and then nodded with a smile. Han Zhong's meaning was not understood by others, but it was clear in his heart.

"Indeed! This meeting was actually arranged by me!"

Tang Qingquan frankly admitted as he followed up, "But please don't be overly concerned, Mr. Han, the appearance of those few punks was definitely outside of my expectations, I was only bent on getting to know Mr. Han, so how could I possibly do such a thing that would make Mr. Han feel disgusted?!"

Han Zhong smiled and nodded, thinking that it was just as well, since this Tang Qingquan was the general manager of the Greater China Region of the Gao Yuan Group, if such a doggish bridge was deliberately arranged just to get to know him, it would only make Han Zhong feel even more disgusted, and would not do him any good other than that.

Moreover, judging from the arrogant attitude of Huang Mao's men, those people were also used to rampant bullying, and it was obvious that they had not been doing that for a day or two.

Besides, Tang Qingquan's IQ was certainly not that low!

In fact, Tang Qingquan was also a bit depressed, as he had originally only followed his own information and knew that he would be able to 'meet' Han Zhong there, so he planned to have a chance encounter with him to get to know him in a different way.

But who knew that a few unscrupulous thugs had appeared before him, and as a result, Han Zhong was in a very bad mood, which made the conditions for him to meet Han Zhong much worse.

Of course there was no problem meeting him, but what could he talk about afterwards given his mood?

So at that time, Tang Qingquan almost didn't want to get out of the car when he saw the situation, but then he thought that the worse the mood, the more he could tell what kind of behavior a person was in, and whether he was in a good mood or not.

So Tang Qingquan got out of the car, and this led to the subsequent coincidental encounter.

Tang Qingquan very frankly admitted that he wanted to take advantage of the opportunity to get to know Han Zhong, but of course, the idea that he wanted to weigh Han Zhong's merits through this matter was not something he would naturally say.

“Mr. Han, I may be a bit presumptuous in my approach today, but I come with twelve percent sincerity!” Tang Qingquan said very sincerely, “I’ve always wanted to find an opportunity to get to know Mr. Han, but I’ve never been able to find the right opportunity... I never thought that it would be better to choose the right day than the right day, and we’re actually sitting together under these circumstances!”

Han Zhong smiled and said, “You are too kind, Mr. Tang! It’s just that I’m curious, as the regional president of a multinational conglomerate, why did Mr. Tang condescend to come and meet me?”

The Gao Yuan Group was a large conglomerate, and with the current net assets of the Teng Fei Group, it was naturally far from the Gao Yuan Group, one was a multinational conglomerate and the other was a rising star, so Han Zhong was somewhat curious as to what Tang Qingquan was willing to do to get to know himself after taking so much trouble.

If he wanted to have any cooperation with the Tengfei Group, why not just come to the Tengfei Group and look for him directly? Why did he have to use this ‘coincidental meeting’ method?

It’s not like you’re chasing a girl and you have to be a hero to save the beauty

“I knew that Mr. Han would definitely have this question, in fact, even if you didn’t ask, I would have taken the initiative to say it!” Tang Qingquan, however, looked very frank and said, “Older brother I’ll call you an older brother, is that okay?”

Han Zhong smiled and didn’t say anything, which naturally seemed like a tacit acceptance to Tang Qingquan. The first thing I want to correct you, old brother, is that I’ve come to see you, not to condescend to you, although the Tengfei Group is not yet a multinational group, but that is only a formality, how many multinational groups have unhealthy operations and finances, that is only false prosperity!”

“But, the Tengfei Group is different! Whether it’s the Kang Yuan slimming powder or the 3-D television set, the degree of prosperity in the market can be seen by anyone who isn’t blind. If we’re talking purely in terms of cash, I’m afraid that certain mega multinational groups may not even be able to match the huge cash flow of the Tengfei Group!”

Speaking of this, Tang Qingquan could not help but feel that the cash flow of the Tengfei Group was really too huge.

The company’s business is a very important part of the company’s business.

The actual popularity of Kang Yuan slimming powder in the market, just look at those supermarkets and pharmacies will know, that is simply in short supply, many dealers are almost directly waving a check to pick up the goods!

This virtuous cycle, with its healthy business practices and huge cash flow, really makes many large group companies’ eyes red with envy!

This is not to mention the unbelievable popularity of Kang Yuan slimming powder in foreign markets!

Especially in Europe and the United States and other countries where obesity is widespread, the amazing effect of Kang Yuan Slim Powder has helped it achieve extremely impressive sales results!

Now the Tengfei Group has become the subject of many financial programs or some economic experts, and according to outside estimates of the Tengfei Group, the Tengfei Group's sales of Kang Yuan slimming powder alone, I am afraid that the annual profit to the Tengfei Group is no less than ten billion!

Just thinking about it gives people goosebumps!

Tens of billions!

Although it's not uncommon for group companies to have a hundred billion or even a trillion dollars nowadays, how many companies in the world can make an annual profit of over ten billion dollars from just one product?

And what's more, it's all cash!

Some experts had evaluated the assets and operations of the Tengfei Group and came to the shocking conclusion that the Tengfei Group had no non-performing assets at all, and that every single income it received was a profit!

This conclusion really scared a lot of people!

You know, how many companies are not living on loans nowadays? But what about the Tengfei Group? Apart from going through the bank's accounts every month to pay its employees, it hardly deals with the banks, and I heard that many of them are jealous!

There is even news that the boss of a famous supermarket chain, a giant in China's retail industry, has once lamented that, when it comes to cash flow, I'm afraid that the Tengfei Group, a group that doesn't even need to shop for goods and has people waving cheques to buy them, is the real cash flow juggernaut!

If the group wanted to expand, it would become a multinational company in a very short time, with a market value of over 100 billion dollars.

Facing the boss of such a group of companies, who dares to say he has a noble status?

"That's all the high regard the outside world has for us!"

Faced with Tang Qingquan's generous praise, Han Zhong looked bashful, just shaking his head and smiling, he certainly knew how horrible the cash flow of Tengfei Group was now, but it was one thing for him to know and another for outsiders to praise him.

Modesty is a traditional Chinese virtue!

What's more

The purpose of this Tang Qingquan's visit in front of him was not even clear to Han Zhong yet, so naturally he would not be foolish to pat his chest and say how our group is so rich, that would be foolish!

However, Han Zhong's heart could not help but be a little bit astonished, this Tang Qingquan, the understanding of the Tengfei Group is not a little bit, it seems that the other party has done enough homework before.

At least, this kind of market research alone is a lot of work!

In his heart, Han Zhong couldn't help but wonder if he should discuss with Ji Feng after he goes back and ask the group's intelligence department to collect as much information as possible about other group companies in the market, otherwise it's really too passive when people know so much about you and you don't know anything about them!

The first thing I want to say is that I am too straightforward and I don't like to beat around the bush.

"It seems that old brother is also a straightforward person!"

Tang Qingquan laughed, "Good, since old brother is so forthcoming, then I'll be straightforward, I have two purposes for coming here this time, one is to poach people, and the other is to seek cooperation!"

Han Zhong immediately raised his eyebrows, "Oh?"

Next to him, Wang Jun saw this small action of his and suddenly froze, because she seemed to have seen this expression from whose face before, raising her eyebrows, seemingly with an indescribable wisdom was Ji Feng?!

Wang Jun was a little lost in thought for a while.

"That's right!" Facing Han Zhong's questioning look, Tang Qingquan nodded his head.

"This is quite an interesting statement from Mr. Tang!" Han Zhong couldn't help but laugh, "I just wonder, what is the so-called poaching by Mr. Tang, how is it, seeking cooperation, and what kind of cooperation is it?"

Tang Qingquan said, "Let's talk about cooperation first, simply put, Gaoyuan Group wants to cooperate with Tengfei Group, as for the field of cooperation, it includes two aspects, one is the production and sales of 3d TV sets!"

Speaking here, Tang Qingquan looked at Han Zhong's reaction and found that Han Zhong was very calm, he couldn't help but secretly say that he was worthy of being able to achieve so much, just this calmness alone was not something that ordinary young people could possess.

"On the other hand, I hope that our two families can start cooperation in the new chrome alloy!" Tang Qingquan said.

"Heh!"

Han Zhong laughed at his words and asked, "Then what does Mr. Tang mean by tapping people?"

Tang Qingquan said bluntly, "Poaching, in fact, is our chairman's intention, and our Gao Yuan Group very sincerely invites Mr. Han to come and work for our Gao Yuan Group!"

"Oh?!"

Han Zhong couldn't help but laugh at his words, "Poaching me, huh?"

Tang Qingquan nodded his head and said, "That's right! We know very well that the reason why the Tengfei Group has been able to rise so quickly is actually inextricably linked to you, so to speak, without your efforts, even if the Tengfei Group had such an excellent product, it would be impossible to have exclusive access to it and to enter such a hot situation within just a year or two!"

Speaking here, Tang Qingquan paused and watched Han Zhong's reaction closely before saying, "The role you play as the mainstay in the Tengfei Group, old brother, is really extremely dazzling!"

Campus Master Chapter 2937

In the face of Tang Qingquan's praise, Han Zhong only shook his head and said, "Mr. Tang is over-complimenting me, I'm just a part-time worker!"

"A part-time worker?!"

Tang Qingquan looked extremely surprised: "How can you think that way, old brother? You are too presumptuous, aren't you? Don't you know what the circles are saying about you now?"

Han Zhong asked, "Oh? What kind of comments?"

Tang Qingquan went, "The gold-dotting hand! That's what the outside world is saying about you! To be able to bring the Tengfei Group from nothing to this point, from small to large, you are already recognized as a business wizard by the outside world! I've also heard that in several major headhunting companies, your value is comparable to that of the domestic working kings!"

Han Zhong laughed, "Working kings? Isn't that still a part-time job?"

Tang Qingquan couldn't help but be stunned.

He did not expect Han Zhong to react this way after hearing the praise from the outside world, even if he was a mature person, I'm afraid he would be a bit excited when he heard this.

Is this not what Han Zhong is most proud of?

When Tang Qingquan wanted to say something else, he heard Han Zhong say: "Mr. Tang, I am only a part-time employee, although I have some power, but there is still a boss above me, I can't make decisions on many things alone, if you praise me again, I should be ashamed of myself! So, I can only thank you for your love, but I still have self-awareness, so don't continue this topic!"

"..... huh!"

Tang Qingquan was obviously stunned for a moment, Han Zhong's reaction was completely outside his expectation, but since the words had already come to this point, he naturally couldn't afford to continue this topic, so he had to say, "Well then, since old brother is so insistent, I'll leave it at that, but it's really too bad!"

Han Zhong smiled.

By this time the waiter had also brought up the dinner plates, Han Zhong casually nodded to Tang Qingquan before greeting Wang Jun to eat, "Let's talk while we eat!"

Tang Qingquan also knew that many things could not be rushed, so he was disappointed and just said, "That's fine, I respect old brother's wishes. However, in terms of cooperation, old brother can't really refuse me anymore!"

Han Zhong smiled and said, "How dare you say that Mr. Tang is waiting for me here? I'm really sorry, I can't really give you any guarantees, as I said earlier, I'm just a part-time worker."

Tang Qingquan waved his hand with a smile and said, "Don't misunderstand me, both I and our chairman sincerely hope that you can come and join us, we have twelve points of sincerity!"

Han Zhong shook his head and said, "Just kidding. Let's talk about cooperation!"

Tang Qingquan then laughed: "Well then just now I also said the aspect of cooperation, just two aspects, the cooperation of 3d TV production and sales, according to my understanding, Tengfei Group's current production capacity is insufficient, the existing production line is completely unable to keep up with the market demand, right? "

Han Zhong nodded and said, "Yes, there is some capacity shortage, it seems that Mr. Tang has done his homework seriously enough!"

Tang Qingquan laughed: "If I don't do my homework carefully when working with someone as good as my brother, I can't really show my face! Since your production capacity is not enough, why don't you follow the example of the large electronics groups and let others do the OEM work?"

"OEM?!"

Han Zhong immediately asked, "Mr. Tang, do you mean you want to do OEM work for us?"

Tang Qingquan said, "That's right!"

Han Zhong was a bit surprised and asked, "Mr. Tang, this is a bit hard for me to understand, as a matter of fact, your company is also a large group of companies, so you are also looking for others to do the work for you, right? Why do you want to do it for us?"

The word "OEM", of course, Han Zhong understood what it meant.

Almost all the large group companies in the world are now looking for OEMs, for example, the most famous one is a certain fruit mobile phone brand that is popular all over the world, there are so many OEMs all over the world.

There are also famous computer brands, TV sets, printers and other electronic products that are almost all OEMs.

However, this is usually a labour-intensive industry that OEMs for technology-based industries, but it is rare to find a technology company that is also an operating company OEMing for the same type of company!

For example, has anyone ever seen a fruit phone company OEM for the Four Star Group? Or vice versa?

"It seems that old brother still doesn't know much about our Gao Yuan Group, in fact, we also have an electronics factory under us, and we are also doing OEM work for some famous companies in the

world!” Tang Qingquan laughed, “Although we also have our own electronic products, OEM is also one of our main businesses!”

Han Zhong was then relieved, “So that’s it! That’s something to consider, but as Mr. Tang knows, it’s not something I can do alone, so

“Totally understand!”

Tang Qingquan said, “Actually, this time we are planning to have a different kind of cooperation with the Tengfei Group.”

Han Zhong asked, “How so?”

Tang Qingquan said, “We want to jointly produce 3d TV sets with the Tengfei Group, with you contributing technology and us contributing capital and production lines, joint production, and then joint labeling!”

“Joint labeling?” Han Zhong frowned, “I didn’t understand!”

“That is to say, according to the respective inputs of both parties, they will each enjoy a certain amount of profits and brand benefits from the product!” Tang Qingquan smiled and said.

“What Mr. Tang means is that you want to have a certain brand ownership of the 3d TV set according to this cooperation?!” Han Zhong asked.

Tang Qingquan nodded and said, “That’s what I mean. Or, we can also give the 3d TV set another redesign with a brand name that we both jointly own!”

Han Zhong smiled and nodded, saying, “I understand what you mean.”

Tang Qingquan asked, “Older brother, this is what we think, what do you mean?”

“I don’t have a point!” Han Zhong shook his head.

Tang Qingquan was stunned, “No meaning? Old brother, I don’t understand!”

Han Zhong smiled and said, “Your words are incomprehensible to me too!”

Tang Qingquan said, “How

Han Zhong shook his head and said, “Forget it, let’s not talk about it, let’s eat, if there is a chance in the future, I hope we can both cooperate!”

This was a direct refusal, and an unforgiving one at that.

Tang Qingquan immediately said, “Old brother, you are have any different opinions can be put forward, business, is to talk out!”

Han Zhong shook his head and said, “I can’t talk. The Tengfei Group has never intended to share any of its products, at least so far, with anyone. We can always expand our production line if we are short of capacity, or simply find a mere OEM manufacturer, that’s fine, but selling out part of our brand, sorry, that’s not in our scope of consideration!”

“Don’t be in a hurry, old man, you can listen to our conditions first”

“Not on any terms!” Han Zhong said decisively, “Mr. Tang, even if I nod my head here and agree to it, our old boss will definitely never agree to it, so I can only say sorry!”

“In that case that’s really a pity!” Tang Qingquan shook his head regretfully and said, “It seems that in terms of 3d TV sets, we both still need a suitable time to do so.”

Han Zhong smiled, did not say anything, in fact, also do not want to say, this high yuan group can really this is a dream in broad daylight, right? 3d TV as a long time ago the market has matured and unlimited potential of the product, even a fool will not sell the brand out!

The actual brand will be shared with the foundry people?

The conditions that this Tang Qingquan has put forward are clearly that he does not want to negotiate!

“That new chrome alloy”

“We can’t negotiate on that either!” Han Zhong directly interrupted Tang Qingquan’s words and said with a smile, “I can only say sorry again, Mr. Tang, the new chrome alloy is not under my control now!”

Tang Qingquan choked for a moment, shaking his head and smiling bitterly, “Older brother is really too resolute, he can’t be bothered with oil and salt!”

Han Zhong said, “I’m also sorry for turning you down!”

Tang Qingquan shook his head and smiled, “It’s alright! But even if I don’t succeed in my business dealings, it’s not a waste of time for me to meet such a handsome person like you!”

Han Zhong shook his head and lost his smile.

Next, Tang Qingquan did not mention business matters again, but just chatted about the South China Sea and the North, this person is obviously knowledgeable, what he talked about is always new and fascinating, for some of his topics Han Zhong is very interested, not to mention the next Wang Jun.

The meal ended happily, and when it was time to leave, Tang Qingquan and Han Zhong exchanged contact information, but when Tang Qingquan saw the business card with the general manager of the Tengfei Group that Han Zhong gave him, he accepted it happily, as if he didn’t know that executives like Han Zhong actually had personal contact information.

After parting with Tang Qingquan, Han Zhong smiled at Wang Jun and said, “Let’s go too!”

Wang Jun nodded and said, “That Tang Qingquan just now was really quite strange, he was still so happy when the business deal didn’t go through.”

Han Zhong looked at the direction Tang Qingquan was driving away, smiled and said, “Because he didn’t come to talk business, and I’m afraid he didn’t intend to talk business himself!”

Wang Jun was stunned, “Then what is he doing here?”

Han Zhong glanced at her and smiled, “Then guess what!”

Wang Jun said, "I can't guess what he's doing here! Hey, I've eaten too much just now, let's not rush off, let's take a walk!"

"You've had enough?"

Han Zhong smiled, "Then why don't we do some exercise to help you digest?"

Wang Jun instantly blushed and spat, "Fuck you! All you do is think about those things all day long, you're such a little rascal! Why didn't I see that you were so bad before!"

Han Zhong grinned, "Come on, let's take a walk with you!"

Looking at Wang Jun holding his arm, Han Zhong shook his head and smiled, saying, "I hope we can still do this in the future, okay?"

Campus Master Chapter 2938

Looking at Wang Jun holding his arm, Han Zhong shook his head and smiled, saying, "I hope we can still do this in the future, okay?"

Wang Jun blushed slightly and gave him a white look, saying, "I don't understand what you're talking about!"

Han Zhong laughed, "Whether you understand or not, I'm saying it anyway!"

Whether Wang Jun really didn't understand or was just pretending to be confused, Han Zhong didn't look deeper and just smiled as he walked around the western restaurant with Wang Jun.

Although the restaurant is located in a busy road, but the environment is not bad, the surrounding greenery is also very good, walking here in the evening is also some interest. However, Wang Jun glanced at Han Zhong from time to time, so that Han Zhong did not have the heart to appreciate the surrounding environment.

"Why do you keep looking at me?" Han Zhong touched his face and asked with some confusion, "I didn't wipe my mouth clean when I was eating just now?!"

"Nasty!"

Wang Jun gave him a blank look and snapped, "Is that how hasty you are in proposing marriage? I'm pissed off!"

Propose?

Han Zhong could not help but freeze, for a moment completely did not react to Wang Jun's meaning, how did this proposal come about?

When Wang Jun saw that he was still so dazed, he snapped, "Fine! I can see, just now you are playing a trick on me isn't it?!"

"I tricked you into what"

Han Zhong shook his head and laughed bitterly, he didn't even know what Wang Jun was actually saying, but the words didn't finish, he suddenly had a movement in his heart, it seemed, he somewhat understood what Wang Jun actually meant.

Marriage proposal

Han Zhong couldn't help but open his mouth wide, but his heart was a bit weeping and laughing, could it be that just now he told Wang Jun that he hoped to be able to walk together like this in the future, to Wang Jun it sounded like he was indirectly expressing his feelings, proposing to her?

..... Holy shit!

If you can, Han Zhong really want to burst a foul mouth, this misunderstanding is really coincidental father met coincidental mother, really coincidental!

The first thing you need to do is to get together and spend more time with each other, and if the right time comes, I will definitely ask you to marry me. Just don't reject me at that time!"

Wang Jun heard this before he was somewhat relieved, thinking that it was because he wasn't ready yet, and that he must have just been touched by the scene and just had an impulse in his head, which is why he said those words.

Although Han Zhong had stopped halfway, Wang Jun was still very happy because the fact that Han Zhong could say that meant that he must have liked himself very much and had even thought of getting married!

Very good!

.....

After returning home, Ji Feng discussed with Xiao Yuxuan about the introduction of the alloy production line, time was now very tight, although it was said that the laser gun he gave to the military was only a preliminary product, and there was still time to talk about cooperation, or debugging for ordinary warriors and so on, but, time was really not very generous.

Therefore, Ji Feng intended to introduce two production lines first as soon as possible, at least to ensure that they could be mass produced.

Of course, if he wanted to supply the military on a large scale within a short period of time, this would be somewhat difficult, as there was still a lot of work to be done in between.

For example, how to use the assembly line production method to produce the energy source, how to produce all these parts such as triggers and converters and so on with the assembly line.

After all, although what Ji Feng handed over to the military now was a complete laser gun, it was only made by him, so if it were an ordinary worker, how could he use a machine to make the laser gun out of it?

All these issues still needed to be slowly honed, at the very least, only after the formal cooperation with the military was finalised.

The most pressing issue at the moment is to ensure that the alloy is produced in sufficient quantities first!

“I have already selected a few and have contacted the other party, and as per your intention, have likewise contacted the enterprises in Kepong.”

Xiao Yuxuan said, “According to the timetable they gave, the one with the shortest time frame is Kepong!”

Ji Feng shook his head and said, “Still, the enterprises in Kailong are not considered, and they can be used to put pressure on other enterprises, but ultimately, they cannot be used for anything!”

Xiao Yuxuan knew Ji Feng’s attitude towards Kepong, so she didn’t consider Kepong’s enterprises either, but Kepong’s enterprises had the shortest supply and shipping time, and this had to be made known to Ji Feng.

“Which ones are the most reliable?!” Ji Feng asked.

“It’s a business in Shancheng!” Xiao Yuxuan said, “They promise that they can bring the production line within ten days and are responsible for the installation and commissioning”

“Mountain City?”

Ji Feng was stunned, “A domestic enterprise? Didn’t they say that domestic companies can’t make production lines that meet the requirements?”

Xiao Yuxuan shook her head and said, “That’s because I didn’t do my job properly, thinking that there were no domestic manufacturers that met your requirements, in fact, we still have domestic companies that can make them now, and their manufacturers have a good reputation, if Zhao Kai hadn’t reminded me, I wouldn’t have known about it until now!”

“Zhao Kai reminded you of this?”

Ji Feng was a little curious: “How did he think of reminding you?”

Xiao Yuxuan said, “You don’t know? Didn’t you arrange for him to be in charge of collecting market information? He would submit a market research report in no more than half a month, with all kinds of information. Yesterday when he came over I casually asked about it, but I didn’t think he really found such a company today!”

“So that’s how it is!”

Ji Feng was relieved and secretly said, it seems that Kai Zi is really doing quite well, relying on so few people to have such high efficiency, and most importantly, this intelligence department that he is in charge of is really quite useful!

Maybe we can consider expanding the intelligence department?

“So now it’s decided to order from that company in Shancheng?!” Ji Feng asked.

“I just made initial contact with them this afternoon, and I don’t know much about their specific offer and other information yet, so I’m going to make a trip to Mountain City and talk to them personally!”

Xiao Yuxuan also knew the importance of this production line, and if the other party's goods were really good value for money, then she would definitely consider a domestic company first.

Ji Feng deliberated for a moment, nodded and said, "That's fine, go and see how it is, anyway, Mountain City is not too far away, it will only take two or three days at most for a round trip."

Xiao Yuxuan said, "I think so too, let's finalize this matter first, so I can also go to work on other things!"

Ji Feng smiled and couldn't help but feel a little guilty, he took Xiao Yuxuan's hand and said, "Yuxuan, it's really hard on you, such a big mess pressed on you alone"

Xiao Yuxuan laughed: "You still plan to be polite and courteous with me?"

Ji Feng laughed: "You don't need to be polite, but I'm going to treat you well, say, what reward do you want!"

"You, don't worry about me, just take good care of yourself!" Xiao Yuxuan smiled lightly and straightened the collar for Ji Feng, "I also know that I am not a qualified girlfriend, when I am busy I often can't take care of many things, and I don't have time to take care of you, often I don't know until you have more scars on you"

Saying that, Xiao Yuxuan's eyes got a little red.

Ji Feng smiled and pinched her cheeks, said nothing, Xiao Yuxuan gently leaned on his shoulder

"Buzz~~!"

The mobile phone placed on the coffee table suddenly vibrated, breaking this pulsating warmth, Ji Feng glanced at the caller ID and shook his head helplessly, "This guy is just not a good thing! Don't you know it's immoral to interrupt someone's good deed?!"

Xiao Yuxuan laughed and pushed him a little, "Pick up the phone."

Only then did Ji Feng helplessly pick up the phone, "Captain Xiang, if you don't have a proper reason, I'll hang up now!"

The call was from none other than Xiang Yongzhan, at this moment he couldn't help but be choked by Ji Feng at the other end of the phone, "What's going on that's so angry?"

Ji Feng ignored him and just asked, "Something wrong with the call?"

"Are you on gun pills?"

Xiang Yongzhan was a bit baffled, but he quickly got back to the point and said, "Pack up and come to Yanjing, the chief wants to see you!"

Ji Feng was stunned, "Now?"

"That's right, right now."

Xiang Yongzhan said, "Still the same old rules, you go to the military station, do the military plane over from there, it has all been arranged" This is the chief's order!"

Ji Feng said, "What's so hot and bothered? My wife hasn't returned yet, I haven't even eaten dinner yet"

Xiang Yongzhan cried and laughed: "Don't be poor, hurry over, tell you ah, it's a good thing!"

Good thing?

Ji Feng was just about to ask what the good thing was, when he heard Xiang Yongzhan drop a sentence, "Hurry up and come, the military machine is still waiting." Then he hung up the phone.

"....."

Ji Feng helplessly threw the phone onto the coffee table, what good thing is so urgent?

However, going is definitely necessary, since Xiang Yongzhan said that it was an order from the head, then it must be that Xiang Jiefang personally asked for it, this can't not go.

But

Ji Feng looked at Xiao Yuxuan with some hesitation, the rare time between them as a couple was interrupted, "Yuxuan, I need to go out."

"Mm. Go, pay attention to safety." Xiao Yuxuan nodded her head slightly and admonished.

"I can't come back at night, so when Lei Lei comes back you guys eat, don't make do, be good to yourselves!" Ji Feng felt guilty and said softly.

"Come on, I'm not a child, I still need you, a little rascal, to teach me, huh?!" Xiao Yuxuan gave him a blank look, but her heart was quite flattered, to her Ji Feng's concern was sweeter than anything else.

Ji Feng gave her a kiss on her tempting red lips and hugged her plump and bouncy petite body before he took Bai Zhu and rushed to the military compound.

When he arrived at the military airport, the military plane was already waiting there. Ji Feng pondered in his heart what good thing it was that still required him to go to Yanjing overnight, unaware that the plane had already started to land.

Ji Feng was right, the order was given by Xiang Jiefang, but what he didn't expect was that Xiang Jiefang was in the Yanjing military district compound, after getting off the plane they got into a military SUV and went to the military district's office area, and met Xiang Jiefang.

"Our meritorious minister is here!"

As soon as Ji Feng walked into the room, he saw that several people, including Xiang Jiefang, were there, and, with a smile on his face, Xiang Jiefang said this.

Campus Master Chapter 2939

Even without looking at the shoulder straps, Ji Feng could recognize two of them as military bigwigs who often appeared in the TV news, the real mainstays of the military.

As for the other two, to be able to sit with Xiang Jiefang and the others so casually, there was no doubt that their status must not be low either.

Only now, these generals were not as serious as they used to be, and were all smiling.

“Several people, this is Ji Feng, our great meritorious servant!” Just as Ji Feng was dazed, Xiang Jiefang spoke again, and as he spoke, he stood up.

Several other people followed suit and stood up, looking at Ji Feng with eager eyes!

Ji Feng was just about to say something when he heard Xiang Jiefang say, “Ji Feng, I have to apologise to you first, calling you over at this late hour didn’t delay you, did it?”

Even if there was, he couldn’t say so, Ji Feng waved his hand and said, “No no, you’re too irritating to General Manager Xiang.”

“That’s good if there is none!”

Xiang Jiefang nodded and suddenly said, “Ji Feng, before we start our conversation, please accept my thanks first!”

“Thanks

Before Ji Feng could finish his words, he suddenly saw that Xiang Jiefang had actually raised his hand and then phew! Xiang Jiefang actually gave him a salute!

Ji Feng was stunned in his heart, but before he could react, he saw that the other four people had actually made the exact same action – five military bigwigs, saluting him at the same time!

This scene really startled Ji Feng, jokingly, what kind of people were these five, they were big shots that would shake the entire military community with a stomp of their feet, but at this moment, they were actually saluting him at the same time?

“Chief Xiang! Several several chiefs, what are you doing,” forgiving Ji Feng’s composure, at this moment, he was really surprised, but even more puzzled.

“Swish!”

After the salute, Xiang Jiefang and others put down their hands, and only then said with a smile, “Ji Feng, you must have some doubts in your heart, but it doesn’t matter, sit down first and talk slowly.”

Ji Feng nodded and sat down on the sofa next to him, but in his heart he still had some doubts, was it because of the laser gun that these guys saluted themselves?

“Ji Feng, just now we gave this salute, not for anything else, but because you have made a huge contribution to our country’s dream of a strong army, and probably just because of your contribution, it will make our warriors suffer a lot less casualties when there is a possibility of a war sometime in the future!”

Xiang Jiefang said, “Also for your contribution, it has made it possible and hopeful for us to catch up with the military power of Rice and even the advanced countries in the world, making this no longer a distant goal, but a practical and even visible plan!”

Xiang Jiefang’s tone was heavy, but there was a touch of excitement in his eyes, and a hint of excitement.

As he spoke, the other four generals all nodded slightly as well.

“Chief General Xiang, you mean the laser gun?!” Ji Feng asked.

“That’s right!”

Xiang Jiefang nodded and said, “After getting the laser gun today, we immediately arranged for inspection and testing, and the results were surprisingly good, the weapon you made is outstanding and very impressive!”

He used two ‘very’ in a row, which was enough to show his extreme affirmation, which was a kind of gushing praise.

Ji Feng immediately understood that it was really because of the laser gun, it seemed that these few military bigwigs were also shocked by the power of the laser gun.

The moment they got the laser gun, they immediately arranged for testing and firing experiments, and the military executives who already attached great importance to this project naturally arranged for the most rigorous tests, and the results were almost dumbfounding!

The results were almost dazzling!

It was so light that it was even lighter than a rifle, which would have been unbelievable if I hadn’t seen it with my own eyes!

With the intelligence capability of the Chinese military, they naturally knew about the single combat weapons of other advanced countries in the world, but they were sure that with the laser gun made by Ji Feng, there was absolutely no single combat weapon that could compare with it in the world!

This result was quite a surprise!

“I am personally very happy to be able to contribute to the development of my country, and this has always been my goal!” At this moment, Ji Feng could only say some clichés, but they were actually from his heart, no one would be willing to see his country fall behind and be beaten, and Ji Feng was even less willing.

“A tiger’s father has no dog’s son!”

A general praised, “Minister Zhenhua is really blessed!”

The others also smiled and nodded, just by the contribution Ji Feng had made, it would definitely add a lot of points to the Ji family.

Ji Feng hastily made a few humble remarks.

“You don’t need to be modest either, although a few of us are old, we are not yet at the point of being corpses, we can see how much contribution you have made!” Xiang Jiefang said.

Ji Feng could only smile and scratch his head, these few people had been in high positions for a long time and all had an aura about them, with their status and position, Ji Feng really felt a bit honoured to be able to say these words!

Luckily, Xiang Jiefang and the others were all used to being concise and clear, and after expressing their gratitude, even if they were more elated in their hearts, they didn't say more than that, but turned the topic to the laser gun.

"Ji Feng, after testing, the power of the laser gun you designed is indeed quite amazing, but isn't there still some flaws in it?" A general suddenly asked.

"Flaws?!" Ji Feng was stunned, "I didn't pay much attention to it, I don't know what the flaws are?"

"The range and accuracy are not coordinated!" That general said, "We all saw the tests in the field, the laser gun is powerful enough, however, the accuracy is much worse when striking long range targets, did you find this problem?"

Ji Feng slapped his head, he had forgotten about it!

Accuracy!

This issue was really important, but it was overlooked by him.

The range of the laser gun was really far enough, if the energy was adjusted to the maximum, the strongest existing sniper gun could never compare with the range of the laser gun!

Of course, there are two sides to everything, and the same is true of the laser gun. Depending on the energy control, if you want to be very powerful, the light will be very thick, but the range will be limited because the amount of energy that can be fired per unit time is fixed.

But if you want to pursue the range, the power will naturally be attenuated, and from this you can also calculate the maximum range.

These figures had been verified by him before.

But it was the question of accuracy that he ignored – because, when he tested it, he was only in the workshop, where the space was limited, and he was testing it with his eyesight, and in a place like the workshop, even a large one in a military factory, he could see clearly from one end to the other without difficulty.

So the question of how to aim didn't even occur to him during the test!

But what if the person using the laser gun was an ordinary soldier? But if he was using the laser gun, he would have had a problem with aiming at long distances, because he had designed the laser gun according to the shape and information in the intelligence database, and there was no aiming design on it!

Because in the Gamma system, the warriors wore hi-tech eye-pieces with holographic scanning, so there was no need to rely on the laser gun's aim!

But now, that kind of high-tech eyepiece had not yet appeared, and aiming naturally became a problem.

No wonder when he was testing at that time, Professor Tong asked him if he was too far away, it turned out that Professor Tong was not talking about the range of the laser gun, but the accuracy of his aim at such a long distance.

“This is indeed a flaw, I didn’t take it into consideration when I designed it!” This was all Ji Feng had to say, he couldn’t say that on the far side of the stars, people’s warriors wore equipment all over their bodies that far surpassed the level of Earth’s technology, and there was no need for this kind of single combat weapon to carry aiming equipment on it.

“It’s understandable that a hundred secrets can make a difference!”

Xiang Jiefang nodded and laughed: “It’s already quite remarkable that you were able to design such an amazing weapon!”

Ji Feng could only nod with a bitter smile, it seemed that sometimes he still took the bull by the horns, this was a lesson to be learned, it would be a good idea to be wary in the future.

“I’ll design another device for aiming immediately after I go back.” Ji Feng said, “However, it may take time because I didn’t think about this before

“It’s okay, when this problem was discovered during the testing, our weapon experts temporarily equipped the weapon with a small optical sight, and it worked quite well!” A general said.

“What about the test results?” Ji Feng immediately asked.

“It’s only slightly worse than the data you provided!” The general said, “It’s already very close to the theoretical level!”

He took the test data provided by Ji Feng as theoretical design data, and those weapon experts did the same, but they were unaware that it was actually the test result that Ji Feng had arrived at by relying only on his two eyes to aim.

Ji Feng said, “This is already quite good!”

He had also heard of this optical scope, which was often used for single combat weapons, such as sniper rifles, and was very effective.

Now an ordinary warrior was able to shoot close to his level through this scope, which was already quite good indeed!

In fact, Ji Feng did not know that the person who arranged to test the laser gun was not some ordinary warrior, but an expert within the military who was specifically used to test the performance of the gun.

“Since that’s the case, then this problem is solved and I don’t need to design the aiming equipment anymore, right?” Ji Feng asked.

“That can’t be said.” Xiang Jiefang said, “The aiming equipment used now is commonly used in the world, but you, the original creator, might have a different way of thinking and might be able to surprise us again, so you still need to design another aiming equipment. Of course, there is no time limit for this to be rushed!”

With the existing test results, a laser gun with an optical sight would be enough to make the military hierarchy smile crookedly with joy, and even with a more accurate aiming device, I’m afraid that the existing range of the laser gun should not be reached again.

So, it's actually quite good enough now!

Campus Master Chapter 2940

Ji Feng had wanted to talk to Xiang Jiefang and the others about how to cooperate, but the occasion was not quite right now, so he did not open his mouth.

But regarding the targeting equipment, in fact, Ji Feng knew that it was actually very difficult to manufacture it within a short period of time, because that laser gun was different, the holographic scanning equipment of the Gamma Galaxy was completely different from the existing holographic scanning on Earth, the technological content was self-explanatory, and according to Ji Feng's understanding, the theoretical systems of both were actually different.

Moreover, since the military had now equipped the optical scopes with quite good results already, this was good.

There were some things that had to be rolled out slowly, and in this regard Ji Feng had a plan in mind.

Several generals asked some more questions about weapons, and what particularly interested them was the kind of more powerful laser gun that Ji Feng had used on the ship during the rescue of the special operations brigade.

If there was a laser gun and then a laser cannon, that would naturally be better.

Ji Feng had to explain to them that in fact, that was also a laser gun, just a little bigger than a laser gun, just an immature product. Many things were not the bigger the better, but rather the smaller the better. Moreover, the energy source of that weapon manufactured at that time used nuclear energy, which was very unstable, and once it leaked it would do a lot of harm to the human body.

Hearing this, several generals more or less regretted, but also understood that being able to get a laser gun was already quite a surprising result, and further extravagant demands were more or less too much, after all, Ji Feng was only a young man in his twenties, and many people might not be able to invent much in their lifetime.

The conversation passed very quickly, and in the blink of an eye, it was already late at night. When it was confirmed that there was nothing more to be improved on the laser gun, the conversation came to an end.

Afterwards, Ji Feng proposed to say goodbye, and Jiang Jiefang had someone arrange for Ji Feng to stay at the military district guest house.

But he wasn't in a hurry, it was the military that should be in a hurry now, so there would definitely be an opportunity.

That night, before Ji Feng had a chance to sleep, there was a knock on the door of his room, it was Xiang Yongzhan who had arrived, and Ji Feng saw that this guy was carrying two large bags in his hands.

"What are you" Ji Feng was a little surprised, "What are you doing here at my place in the middle of the night when you're not sleeping?!"

"Came to sleep with you!" Xiang Yongzhan said.

“.....”

Ji Feng was a little speechless, “I don’t have this hobby, you find someone else, please!”

The first time I said I would buy you a drink, I never got the chance, but now I have some time!”

“Drinking now?”

Ji Feng pointed at the wall clock, “Don’t you see what time it is!”

Xiang Yongzhan put the bag on the round table in the room without saying a word, and then started to take things out, this guy had actually brought two bottles of white wine, and the other bag contained some well-made dishes.

“You’ve really come prepared!” Ji Feng laughed, “No assignment tomorrow?”

“The old man licensed it, took a leave of absence!” Xiang Yongzhan said, and took out two more cups from the bag and put them on the table, “Come and sit down, what are you doing frozen!”

This guy

Ji Feng shook his head and lost his smile, walked over and sat down on the opposite side, Xiang Yongzhan had already opened and poured the wine, lifted the cup and said, “Ji Feng, today I came to find you for a drink, in fact, I also have a purpose!”

Ji Feng asked curiously, “What purpose?”

Xiang Yongzhan said, “Let’s talk with wine this first glass of wine, I toast you, nothing else, the whole military owes you a favor, I’ll drink to that first!”

“Wait a minute!”

Ji Feng stopped him and said, “It’s better to speak clearly before drinking, what do you mean the military owes me a favor? I can tell you, that weapon is something I want to cooperate with the military, it’s not a free gift!”

Just kidding, if a few glasses of wine can be exchanged for a laser gun, then this is too outrageous!

Xiang Yongzhan laughed, “Don’t worry, you definitely won’t lose out!”

Ji Feng instantly heard a bit of meaning and asked, “How so? Do you have some news? What did your old man say to you?”

Xiang Yongzhan shook his head and said, “Nothing. However, the so-called know your son as well as your father, but in fact, the opposite can also be said, my family’s old man I certainly know best, rest assured, in this matter you will certainly not lose out!”

Ji Feng then smiled, “That’s more like it! However, since it’s a cooperation, then why do you still say that you owe me a favor?”

“Because the weapons you designed will make all of China’s military power go up a notch, isn’t that a huge favor?!” Xiang Yongzhan asked.

“Since it’s a cooperation, the favor will be counted!” Ji Feng laughed.

“Bullshit!”

Xiang Yongzhan bristled, “Look at Kepong, then look at Rice, and even San, they also want to owe others favours, but do they have this opportunity?”

Ji Feng laughed, “Drink, drink!”

Xiang Yongzhan obviously came with a hangover ready to drink, also because of the success of the development of the laser gun, the huge significance it brought to the Chinese military and even to the whole Chinese nation, made Xiang Yongzhan, who was a soldier, especially as an army man, extraordinarily excited and cheerful.

The world’s military has now entered the era of the navy and air force, the army in most cases can only exist as a deterrent force, the original strong and can even be said to be the world’s leading Chinese army, in fact, facing a very embarrassing situation.

The Chinese Army’s special forces, especially those in the special forces, often carry out some secret missions, feel this more deeply, they can get the opportunity to carry out secret missions, but often due to the gap in technology, so that the Chinese Army’s special forces can not fully play out their combat capabilities.

Sometimes they would even lose out because of the weapons gap!

But now it’s different!

The emergence of the laser gun has given the entire Chinese military a great hope, even if the satellites overhead are not as many as others, not as accurate as others in terms of positioning not as clear as others in terms of reconnaissance, but with a laser gun in hand it is very likely that one force will be able to subdue ten!

Ambushed? Even if you are ambushed, you have to be able to eat us first! But do you have that in front of a laser gun? How much will it cost and how many casualties will you take?

The appearance of the laser gun really means a lot!

The actual fact is that you can find a lot of people who are not only in the market, but also in the marketplace.

The actual fact is that you can find a lot of people who are not only in the market, but also in the marketplace.

.....

“Ding”

A mobile phone ringing caused Ji Feng to abruptly open his eyes from sleep, and as soon as he picked up the phone and scanned the caller ID on the screen, he was shocked to find that it was Xiang Yongzhan calling.

He immediately picked up the phone, “I said you’re not going to let me sleep, are you?”

However, Xiang Yongzhan's reply made Ji Feng jolt, only to hear Xiang Yongzhan say, "Ji Feng, something has happened."

"What do you mean?" Ji Feng immediately asked.

"Professor Tong and the others have been attacked!" Xiang Yongzhan said in a deep voice over the phone, "The news we just received from Jiangzhou, Professor Tong and the others were attacked at the compound and their people were kidnapped!"

"What are you kidding?!"

Ji Feng was stunned beyond measure, "They could still be attacked at the military compound? Did the Rice people attack or the Kepong people?"

This was really a joke! In the premises of a military district – even if it was just a military sub-district, the security was extremely strict, how could they be attacked and have their people kidnapped?

Ji Feng even had a surreal feeling!

"Not at the military division compound, but at Professor Tong's place where they landed!"

Xiang Yongzhan also realised his speech and explained, "After you left, Professor Tong and the others didn't come back immediately, but continued to organise their manpower for research and study, but since the work on your side had ended, the security force was replaced with ordinary warriors, and the warriors of the Special Combat Brigade all withdrew, but it didn't occur to them that they were exploited, just an hour ago, a group of people armed with weapons suddenly attacked and kidnapped Professor Tong and the others!"

So that was it!

Ji Feng was relieved, but then his brow furrowed and he asked, "Do you know who did it? Were there any casualties?"

Xiang Yongzhan said in a low voice: "Two soldiers were killed and three were injured We don't know who did it yet, but the other party seems to have planned it, and the target is very clear, there are so many rooms in the guest house, they went straight to Professor Tong's room! "

Ji Feng frowned and asked, "In that case, that group of people most likely came for the weapons?"

Xiang Yongzhan said, "I reckon that's the case, but we can't be sure yet. Ji Feng, think back carefully, when you were in R&D before, did you notice anything unusual or anything out of place?"

Ji Feng pondered for a moment and said, "Other than those technicians not cooperating and making a scene once, there was nothing out of place!"

"Okay then, think carefully again, if you think of anything call me immediately, I need to rush back to Jiangzhou immediately, for now, keep in touch!" Xiang Yongzhan said.

"Wait a minute, I happen to be going back too, so I'll join you!" Ji Feng said, after such a thing happened, the little sleepiness he originally had disappeared without a trace. Originally, he had planned to go home to have a look, but now, he had to rush back to Jiangzhou to see what was going on.

After hanging up the phone, Ji Feng looked at the time and saw that it was almost five in the morning. He couldn't help but say, "It seems that the people in the raid were really good at timing, as three or four o'clock in the morning is when people are sleeping heavily, and when they are least alert."

After arriving, Ji Feng and Xiang Yongzhan rushed directly to the place where Professor Tong and the others had their accident. It was already dawn by now, but their faces were not very good, the problem revealed by Professor Tong's kidnapping was obvious enough, it was likely that someone had set their eyes on the laser gun.

However, when Xiang Yongzhan received another phone call on the plane, his face instantly became even more gloomy.

"Ji Feng, I'll tell you the not-so-good news, I just received news that Professor Yu's wife called the police and Professor Yu can't be reached!"
