

Campus Master Chapter 3061

Ji Feng, who had returned to Jiangzhou, was idle for a while.

The gunshot wound on his body had long since recovered, so this injury was not too serious for him, but his arm was the only thing that had not recovered.

Because Tong Lei and Xiao Yuxuan forbade him to go out, even Zhang Lei came over to look for him for a drink and was glared away by Tong Lei, so Ji Feng had nothing better to do than to study weapons, and the rest of the time, he was thinking about how he could recover his arm.

In the blink of an eye, it had been more than a month since Ji Feng returned to Jiangzhou. The cast on his arm had been removed and, accompanied by Tong Lei, he went to the hospital for a re-examination, and the bone had basically healed, but it was impossible for the missing piece of bone to grow back.

This means that his basic life will not be affected, but if he wants to use that arm to fight people as before, it will be impossible.

Now that a piece of his arm bone was missing, if it wasn't for his super strong physique, his arm would basically be ruined and he wouldn't even be able to do some normal movements.

But the most distressing thing for Ji Feng was that after his arm was injured, he couldn't do many of the movements when he was practising aerobics.

Especially in the later stages, those difficult moves were even less suitable for him. Moreover, the bio-current seemed stagnant when flowing through that arm, and he even felt that his overall strength had dropped quite a lot.

It wasn't just a problem with one arm!

Ji Feng's desire to restore this arm became even stronger, but he had thought of many ways and communicated with his intelligent brain many times, but he had never found a suitable solution.

"Master, judging by your physical condition, the most suitable method is to perform an amputation and then replace it with a prosthetic arm that has a self-repair function, while implanting a chip in your brain to control the prosthetic arm"

"It's better to change the method!"

Ji Feng just shook his head and gave up this option as soon as he heard it, amputation and then replacing it with a prosthetic limb, this result was something he could not accept.

Even if he knew that the prosthetic limb that the intelligent brain was talking about was definitely not the current kind of stiff prosthetic limb, but replacing it with an arm that didn't belong to him, this made him uncomfortable no matter how he heard it.

"Master, this kind of prosthetic arm does not have any effect on your body, and there will be no rejection reaction, because the addition of special memory metal will make the prosthetic arm more resilient." The intelligent brain explained.

"No!"

Ji Feng shook his head and said, "Don't mention about the prosthetic limb, right now I'm only losing strength, this arm isn't completely ruined, there's no need to replace the prosthetic limb."

"Yes, master!" The intelligent brain said.

"In your database, are there any other methods?" Ji Feng asked again. He said that it had no effect on his life, but in fact, he knew in his own heart that the drop in overall strength was not a good thing for him, because the dynasty's transformers kept improving and becoming more and more powerful, and at this trend, Ji Feng was not even confident that if he encountered a transformer like Luo Qiu the next time, he would still be able to win.

"Master, there's no more." The intelligent brain said.

"So... .."

Ji Feng was more or less disappointed, and after a pause, he suddenly asked, "By the way, if I cultivate the body-building exercises to the fourth stage, will it help to recover my arm?"

The intelligent brain said, "Master, there is not enough information to make an accurate judgment!"

Ji Feng nodded silently and couldn't help but recall the images of the two super experts who had entered the fourth stage of the battle that Wisdom Brain had shown him.

The strength of those two people had clearly exceeded the existing human category, and it would not be too much to say that they were superhuman, so it was conceivable how strong their physiques would be.

If they were able to enter the fourth stage, perhaps it would help his arm as well?

The more Ji Feng thought about it, the more he thought it was possible. Just because the intelligent brain didn't know, didn't mean there wasn't such a possibility, because by extrapolating from a common sense perspective, one could also imagine just how high the physical requirements were for a super expert who entered the fourth stage.

The characteristics of bio-current to improve his body were more than familiar to Ji Feng, even now he was stuck at the late stage of the third stage, bio-current was still improving his body, only that the speed of improvement was much slower than at the beginning.

Then if he enters the fourth stage, I believe there will definitely be an even greater degree of improvement to his body

If he could really enter the fourth stage, not only would his strength skyrocket, I believe his arm would not be so wasted anymore!

"I must find the cultivation method for the fourth stage!" Ji Feng secretly said in his heart.

"Go for it master!" The intelligent brain suddenly said.

Ji Feng was stunned, "Refuel what?"

Wisdom Brain said, "Doesn't Master always use this to encourage others?"

Ji Feng looked at Wisdom Brain and didn't speak for a while.

Only after a long time did he ask, "Wisdom Brain, did you think of saying that yourself? Why did you remember to say this to me?"

"Master wants to succeed, so of course Wisdom Brain has to cheer his master on!" Wisdom Brain said.

"Hehe"

Ji Feng grinned, but his brows were furrowed.

The wise brain, obviously, already had the consciousness to think independently and very clear logic, which gave him an indescribable feeling in his heart.

However, Ji Feng did not say anything, but directly retreated from the training space of the intelligent brain.

Consciousness returned to reality, and Ji Feng sat on a chair with his eyes closed, it seemed that it was time to do something.

Ji Feng was thinking about how to break into the fourth stage of cultivation, in fact, he had been pondering for a long time, ever since the effect of the third stage of cultivating body building exercises weakened, he had been thinking about how to break into the fourth stage, but he never had any clue.

"The fourth stage, how exactly should I cultivate it?"

Just as Ji Feng was thinking hard, the storm in the outside world gradually subsided, the attack and killing in Southern Guangdong involved a large number of people, and around these vacated positions, a series of games and compromises between the major factions eventually stabilised and a balance was formed.

During this fiasco, the Ji family showed its extreme strength and made people look sideways.

For the first time, Ji Zhenhua also showed an extremely strong side, and it was at his proposal that the head of Southern Guangdong was removed from office, which caused quite a shock among all the major factions.

It was also at this time that Ji Shaodong left Jinling and was transferred to Yuezhou to take up the post of deputy mayor. With Qian Hongda going further and Ji Shaodong entering Southern Guangdong, it marked the official entry of the power of the Ji family into Southern Guangdong and a powerful force was formed within a very short period of time.

This, in turn, has been interpreted by the outside world as a sign that the Ji family has already chosen its successor in twenty years' time.

There is no doubt that Ji Shaodong will become the future flag-bearer of the Ji family, a rising star that no one can ignore. And everyone knows that as long as Ji Shaodong does not make any major mistakes himself, then his future will be a path to heaven.

At the same time, Ji Shao Hong, who is working in northern China, has entered Jinling in a low-profile manner, and the younger generation of the Ji family has formally formed a ladder.

Ji Shaodong is the flag-bearer, and Ji Shaohong will become his right-hand man. Even at the top of the faction, Ji Shaodong has been able to make his voice heard, and his steady and solid style, as well as his rather general style of governance, are increasingly recognised by many bigwigs.

At this time, however, many people are turning their attention to Ji Feng, who is still recovering from his injuries in Jiangzhou.

Ji Feng has already graduated from university more than a year ago, but on the surface he does not seem to have an official career yet, which in turn gives him more room for manoeuvre.

But what people are more concerned about is whether this first grandson of the Ji family's eldest house is going to pursue a career in the future, or whether he is going to pursue another profession.

Nowadays, the Tengfei Group has developed into a huge thing, and although there are not many industries, each one of them is resounding. Economically, the Ji family line has gotten rid of the embarrassing situation of not having a hard economic pillar in the past, and Ji Feng's excellence is likewise something that many people secretly admire.

If Ji Feng decides to take the career path at this time, then the future Ji family lineage will definitely be a twin-horse, and with the huge resources of the Ji family, it can completely support both brothers, Ji Shaodong and Ji Feng, to take up extremely high positions.

This is definitely not a good thing for the other factions.

And if Ji Feng were to engage in other industries, then with the Tengfei Group's heritage and Ji Feng's ability, I am afraid that no matter what industry he enters, it will create a huge impact.

Therefore, at this moment, people are not only concerned about Ji Shaodong, but even more so about Ji Feng who has not moved much.

Even Ji Zhenping also specifically called to ask what Ji Feng meant, but Ji Feng made a clear statement that he had no idea of entering politics, his character was not suitable for the kind of atmosphere in the officialdom, and perhaps, the only one who was the most suitable candidate was the outrageously calm Ji Shaodong.

"Then enter the military world?" Ji Zhenping asked, with Ji Feng's ability if he entered the military world, he would definitely go to a height that people would look up to in the future.

"I don't plan to join the military either!" Ji Feng shook his head and said, "Actually, I think this is fine now, what I want most now is to continue to expand the Tengfei Group."

"It's not good for you to keep doing nothing, it's better to pick a profession!" Ji Zhenping said, "Your identity in business is definitely not suitable, it's better to think about it again!"

If Ji Feng was in a state-owned enterprise, then there would be no problem, but Tengfei Group was a private enterprise, and Ji Feng's identity was very sensitive, and the state had explicit regulations on this.

Ji Feng smiled and said, "It won't take too long to wait!"

In fact it did not take long for the military to receive the exciting news that the laser cannon, had been developed by Ji Feng.

The news was directly relayed by Ji Feng to Chief Minister Xiang Jiefang through his younger uncle, Ji Zhenping, and the military's response was incomparably quick. On the afternoon of the day he received the news, Xiang Jiefang took a plane to Jiangzhou and came to see Ji Feng in person.

Campus Master Chapter 3062

If the emergence of the laser gun only made Xiang Jiefang feel that the Chinese army was already ahead of the world in terms of small-scale equipment, and no longer had to let the Chinese soldiers suffer in some small-scale military operations because of the backwardness of their weapons, then the successful development of the laser gun could almost be said to have made Xiang Jiefang feel ecstatic!

Although he did not have a deep understanding of the laser gun, and only had a vague concept in his head, which was still a hypothesis put forward by the scientific experts, once the word laser was involved, Xiang Jiefang was tickled.

He had seen with his own eyes how terrifying a laser gun really was.

Moreover, back then, when Ji Feng was rescuing the special operations brigade, he had used something like an anti-aircraft gun on the ship, and with just one blow, he had shot down a warplane, and there was no way to avoid it!

This was even more powerful than a missile!

So as soon as Xiang Jiefang stepped off the plane, he immediately took a car and arrived at Ji Feng's villa.

He didn't even bring more than the most basic guards with him.

"Ji Feng, did it work?" As soon as he saw Ji Feng, Xiang Jiefang hurriedly asked.

"It worked!"

Ji Feng smiled and nodded his head.

Immediately, Xiang Jiefang said impatiently, "Show me quickly!"

Ji Feng made a gesture of invitation, "It's upstairs, it's a bit messy up there, don't mind Chief Xiang!"

Xiang Jiefang waved his hand, "I've experienced even the most bitter environment, what's the fear of a bit of chaos!"

Under Ji Feng's leadership, Xiang Jiefang saw the laser cannon Ji Feng was talking about in the study on the third floor, as soon as he saw it, Xiang Jiefang couldn't help but be a little surprised: "So small?"

The laser cannon in front of him was not even as big as a heavy machine gun, although it was also supported by three legs, it was only about half a metre in height, and the muzzle was also pitifully small, about the size of a baby's fist.

This is only a small laser gun, and, at the moment, it is still only in its most rudimentary form,” said Ji Feng. Rather, the principle is similar to a laser gun, the energy source, trigger, and converter are all there, but in terms of aiming and firing, the operation method is different.”

Xiang Jiefang immediately asked, “How about the power?”

Ji Feng thought about it and said, “There is no way to describe it, I don’t know how our military weapons describe the power of the weapon, it would be best if I could try it out in the field.”

Xiang Jiefang immediately asked, “How to try?”

Ji Feng said, “It would be best to try it at sea. Although this is a small laser cannon, the range is still very long!”

Xiang Jiefang immediately clapped his hands, “Then prepare to test it immediately! Level, top secret!”

Seeing that Ji Feng was a little surprised, Xiang Jiefang couldn’t help but sigh, “Ji Feng, you haven’t been in the military, so you don’t know what being behind in weapons means to our country.”

Ji Feng nodded silently, what did it mean for weapons to be backward? It meant that China did not dare to use force easily at all, even if it was bullied at its doorstep, it could only protest, and at most, it only relied on special forces to engage in small-scale battles with others in the dark, but there was no telling how many good soldiers were killed or injured every year just because of such small-scale military operations.

What’s more, it means that when the Chinese Navy sends a few warships out for training, they are followed by other people’s fighter jets the whole time, and they are also very arrogant in skimming past the range of the warships.

Even the aircraft carrier that China has just launched, some people in Vietnam are screaming that it is just a large Chinese playground, not to be feared at all and can be easily sunk.

As a hot-blooded young man, anyone who saw such a scenario would be angry.

So Ji Feng understood Xiang Jiefang’s desire for weapons.

Just when Xiang Jiefang had given the top secret order to prepare for the test of the laser cannon, Ji Feng suddenly made a request.

“Chief Director Xiang, there is something I would like to ask you for advice.” Ji Feng said, “If say, the Tengfei Group wanted to set up a base overseas, let’s say just on one of the islands in the southern waters, would the military support it?”

“Set up a base?”

Xiang Jiefang was a little surprised: “Is it the proposal you mentioned before?”

He remembered that his son, Xiang Yongzhan, had mentioned to him that Ji Feng seemed to have the intention of setting up a base outside, but he had already given a reply at that time after considering it, and now when he heard Ji Feng ask about it again, did he mean that Ji Feng wanted to use the success of the development of the laser cannon to negotiate with the military?

Who knew that Ji Feng was shaking his head and said, “No, I have my eye on an island

He took out his mobile phone and tapped a map, then pointed to an island symbol on it and said, “This is the place, this island is not too big and not too small, just right for the base of the Tengfei Group.”

As soon as Xiang Jiefang laid eyes on it, he immediately frowned: “Island number one?”

Ji Feng smiled and nodded, “That’s right, it’s Island No. 1.”

Xiang Jiefang frowned and said; “Ji Feng, since you know this island, you should be clear that this island is now in the hands of the Vietcong, you

Ji Feng nodded and smiled, “Chief Xiang, I know, but I think whether this island is in the hands of the Vietcong or not, but it is an island belonging to China, and as a Chinese enterprise, there should be no problem for the Tengfei Group to go up there and establish its headquarters, right?”

Xiang Jiefang gave him a deep look, no problem? There’s a lot of problems!

The so-called No.1 Island was actually named unilaterally by China, it is located between the waters of China and Vietnam, and technically belongs to China, it is the largest island in the disputed waters of the two countries.

However, because China’s coastline is too long, its navy is too weak and there are too many external constraints, it has been occupied by the Vietcong since decades ago, and Vietcong soldiers have built a large number of fortifications on it, including even basic living facilities, such as fresh water supply facilities.

Although in terms of righteousness and name, China has never given up this island, in reality, it is an indisputable fact that the current owner of this island is a Vietcong.

Ji Feng now proposed to go to this island No. 1 to establish the base of the Tengfei Group, was this not to start a war with the Vietnamese?

“Ji Feng, what exactly do you have in mind?” Xiang Jiefang asked in a deep voice, he did not think that Ji Feng was a nonsense kid, but now that he had suddenly proposed such an absurd suggestion, he had to understand clearly what he had in mind.

“Chief Xiang, what I mean is that the state has sovereignty over Island No. 1, so it should be logical for the Tengfei Group to lease the island from the state, right?” Ji Feng laughed.

“You should know that right now, Island No. 1 only nominally belongs to China, but in reality it is much closer to Vietnam, and it is still actually controlled by Vietnam right now, so how are you going to go up there and establish a base?” Xiang Jiefang asked.

“The Vietcong is occupying it, so we’ll just take it back!” Ji Feng said.

“Nonsense!”

Xiang Jiefang grunted, “Are you making fun of me? Or are you just being whimsical?”

Ji Feng laughed, “I wouldn’t dare. Chief Xiang, I understand what you mean, the state is not convenient to step in, so how about the Tengfei Group stepping in?”

“Hm?” Xiang Jiefang frowned slightly, “What about the specific operation?”

There is a door!

Once Ji Feng took a look at Xiang Jiefang’s reaction his heart could not help but be pleased and immediately said, “The operation is very simple, the Tengfei Group will step in and buy the right to use Island No. 1

The first thing you should understand is that it is not impossible for the country to take back the No. 1 island, it is not difficult to do, but you cannot be impulsive in everything, the South China Sea is a whole body, do you understand?”

Ji Feng nodded: “I understand, that’s why I said that the Tengfei Group should step in.”

“Tengfei Group?”

Xiang Jiefang shook his head and said, “Vietnam has always regarded Island No. 1 and the surrounding island groups as a bridgehead for attacking China, not to mention the fact that you can’t go up there with your tiny battle group, even if you do, do you think Vietnam will give up? Can you hold it?”

Ji Feng said, “As long as I can fight up there, I may not be able to defend it.”

Xiang Jiefang shook his head and said, “It will be too late when you can’t hold on! This kind of action has to work all at once, otherwise, the next thing you do may have to trigger a big war, do you understand?”

Ji Feng nodded thoughtfully, he knew that every word of Xiang Jiefang had a deep meaning, there might be some words that were not convenient to say to him explicitly, but the meaning was already expressed clearly.

“Chief Xiang, I have a way to keep it!” Ji Feng said in a deep voice.

“What solution?” Xiang Jiefang asked.

“You’ll know after you try the laser cannon!” Ji Feng smiled faintly.

“Still telling me off?”

Xiang Jiefang didn’t care, he was such a person, naturally he wouldn’t be put off by Ji Feng’s appetite, “Well then, I’ll see what you can come up with after the test!”

Ji Feng smiled, when the test is over, I hope you can still be so calm!

He really wanted to see how this general, who had commanded thousands of troops and fought the Vietcong devils in a bloody battle and made a great name for himself, would look like then!

A small laser gun is still a laser gun!

A special event, and for reasons of secrecy, Xiang Jiefang soon received feedback that arrangements had been made below.

“Kid, let’s go, let’s just consider this trip as a sea trip.” Xiang Jiefang laughed.

“Wait a minute, I need to report to the leader!” Ji Feng said with a smile.

Xiang Jiefang froze for a moment, then he saw Ji Feng go to the side to make a phone call, his mouth called the other party's name, as if it was called Lei Lei Xiang Jiefang shook his head at once, this kid.

He certainly knows that Ji Feng this kid is also a flirtatious species, around the woman but a lot, and with Ji Feng the closest, to belong to Tong Lei and Xiao Yuxuan, so once he heard Ji Feng's name, he knew Ji Feng this is on the phone with who.

However, Chief Xiang was not in the habit of eavesdropping on other people's conversations, so he went downstairs first with his hands behind his back.

The first time I saw him, I was able to get back to work.

Campus Master Chapter 3063

"Chief Xiang, where are we going to test?" Ji Feng asked.

At this moment, both he and Xiang Jiefang were sitting on a military plane, which was a transport plane, and they couldn't see outside from the cabin.

Xiang Jiefang glanced at him and smiled, "Aren't you interested in the South China Sea?"

Ji Feng asked, "We're going to the South China Sea?"

Xiang Jiefang didn't answer, but just laughed, "You'll know when you arrive."

Since this was the case, Ji Feng simply stopped asking and just closed his eyes and rested his mind. At this moment, the laser cannon was put into a box and placed right under his feet. Seeing Ji Feng casually put his feet on that box, Xiang Jiefang's face couldn't help but twitch twice.

This kind of weapon would be offered up as a treasure no matter where it was placed, but Ji Feng was good enough to just put his foot on it like that, this kind of discrepancy really made Xiang Jiefang a little helpless.

"Chief Xiang, why do you keep looking at me like that?" Ji Feng suddenly opened his eyes and asked in a strange manner.

"It's really unimaginable, how can you, an economics student, be so knowledgeable about weapons!" Xiang Jiefang shook his head and said. No one would have thought that such a powerful weapon would come from the hands of a young man like Ji Feng. If Ji Feng had specialized in weapons, it would have been fine to say that he was a genius, and that could be explained, but it was Ji Feng who studied economics, and this could not fail to amaze people.

I was not very interested in professional courses in college anyway, but I was very interested in scientific research, and then I slowly researched, and then I had such a little achievement!"

Xiang Jiefang nodded and said, "Maybe, seeing you, I finally believe that there is really such a thing as genius in this world."

In fact, in his heart, Jiefang was extremely puzzled, to say that Ji Feng had a talent in this area, but this talent was really too amazing, to be able to develop such a powerful weapon on his own.

This really makes people doubt whether it was developed by Ji Feng or not!

But if it wasn't developed by Ji Feng, then who could it be? There was no such weapon in the whole world. Although the dynasty had laser guns, they were not in the same class as the laser guns developed by Ji Feng.

In the end, Xiang Jiefang could only admit that there were really geniuses in this world, and that they were self-taught geniuses, not bragging ones.

When he heard what Jiefang said, Ji Feng didn't say anything but smiled, but his heart couldn't help but sink.

A student of economics has such an in-depth study of weapons, which can't make people suspicious.

Although in the past when launching the new chrome alloy as well as the laser gun, Ji Feng had put most of the credit on those experts in the group, but in reality, with Xiang Jiefang's status, it was certainly not difficult for him to find out who had actually developed this, which was why Ji Feng would directly invite Xiang Jiefang to his home to see the weapons.

Because he knew that these were certainly not secrets to Xiang Jiefang.

"Out of the ordinary is out of the ordinary!"

Ji Feng secretly shook his head, now he didn't care much about this anymore. The speed at which Dynasty's scientific research level was progressing really surprised Ji Feng and made him feel great pressure, if he was still developing so steadily, I was afraid that he would really be left behind by Dynasty.

Moreover, now that the Tengfei Group has also taken hold, even in the international arena, it has gained a certain influence, although it has not yet become the kind of real multinational giant, but this is not something that can be rushed, it needs time to slowly expand its influence, it needs time to settle down and accumulate.

That's why Ji Feng had the confidence to move forward quickly.

Even if there was some suspicion from above, with Dynasty as a threat, and with Dynasty's high technology coming out in endless layers challenging the nerves of the top brass, his performance was much subdued.

And that's a good thing too!

After the plane had flown for some time, Ji Feng suddenly opened his eyes and he felt the plane slowing down.

"Report, we will soon reach the target sea ahead, please give instructions!" A guard came over and reported towards Liberation.

"Are the test ships ready?" Xiang Jiefang asked.

The guard nodded and said, "The ships are already on standby."

Xiang Jiefang waved his hand, "Alright then, proceed according to the scheduled plan!"

"Yes!"

The guard said loudly, saluted, then turned around and went to convey Xiang Jiefang's orders.

Ji Feng asked, "Chief Xiang, have we reached the southern waters?"

Xiang Jiefang nodded his head and said, "That's right!"

Ji Feng was about to ask something else when he felt the plane start to descend, then he faintly heard the sound of waves, and suddenly as the plane jolted, it swayed a few times and slowly came to a stop.

The cabin door opened, and when Ji Feng looked out, he saw that outside was an endless sea, and a ship was parked not far away.

"Ji Feng, go down!"

Xiang Jiefang said from behind.

At this time, a dinghy was lowered into the water under the cabin door, and Ji Feng nodded and followed him onto the dinghy.

Only when he got on the warship did Ji Feng realize that the transport plane he was on was actually still able to stop on the water, but looking at the periphery it didn't have the construction of a seaplane.

"This is the latest type of domestic transport plane, it can stay on the water for a short time, has a long range and a large transport capacity, it is independently developed in China." Seeming to see the curiosity in Ji Feng's eyes, he explained to Jiefang.

Ji Feng nodded, it seemed that the country had also been trying hard to catch up with those developed countries, and from Xiang Jiefang's words, he was able to hear a strong sense of pride.

When he got on the ship, a strong man in a navy uniform was already waiting, and when he saw Xiang Jiefang, he immediately saluted, "Chief, you're here!"

Xiang Jiefang waved his hand, "Let's talk later, let's get down to business first."

The navy immediately responded, "Yes! Chief, the target ships are already on standby, ready to start the test!"

Xiang Jiefang nodded and said, "Have all unrelated personnel enter the ship's cabin, no one can come up without my order!"

"Yes!"

As Xiang Jiefang's order was arranged, those naval forces began to enter the cabin quickly, and as Xiang Jiefang and the others stood on the deck, the burly navy handed Xiang Jiefang a telescope and said, "Chief, take a look, this side is the direction of the target ship."

Ji Feng looked in the direction he was pointing, but he could only see a vast sea, but at the side, Xiang Jiefang nodded and said, "This distance should be about right?"

The burly navy man said, "This is the longest range of the guns on the ship."

Xiang Jiefang nodded and said, "Good! You go down too, and you can't come up without my order!"

“Yes!”

The naval officer saluted and quickly turned around to leave.

There was no explanation, nor did he ask why, this kind of clean style made Ji Feng appreciate it.

“Ji Feng, it’s time for you to see how you perform next!” Xiang Jiefang said, handing the binoculars to Ji Feng, “How to fight, how to test, you watch yourself!”

“Chief Xiang, I’d like to borrow the aiming equipment on the warship.” Ji Feng said, “Right now this weapon is just a rudimentary primitive model without any aiming equipment installed, if you can’t hit it properly, it won’t show its power!”

“That’s no problem!” Xiang Jiefang immediately told that naval officer to use the targeting system on the warship to start measuring and report the position of the target ship at any time.

“Are there any other requests?” Xiang Jiefang asked.

“No more!”

Ji Feng shook his head, took the measurement results and started assembling the laser cannon. In fact, the construction of the laser cannon was very simple at this point, and it was enough to assemble the brackets underneath.

Afterwards, Ji Feng adjusted the direction and began to aim.

Xiang Jiefang did not say a word next to him, but there was a look of anticipation in his eyes. The previous laser gun had already given him a big surprise, and now this laser gun, he hoped to see more surprises.

“It’s ready!”

Ji Feng said, then directly pulled the trigger In order to use it smoothly, he still designed the firing mechanism of this laser cannon to be similar to the trigger of the laser cannon, which was flexible and light, and it was very smooth to use.

He pulled the trigger!

The next moment, Xiang Jiefang just felt a sudden flash of light before his eyes, the light so intense that it was blinding that he could not help but squint his eyes for a moment, only to vaguely see a fist-sized ball of light ejected from the muzzle of the laser cannon, and then disappeared in the blink of an eye.

Xiang Jiefang hurriedly picked up his binoculars and looked in the direction of the target ship, however, all he could see was a wave, but no sign of the target ship at all.

“A hit?” Xiang Jiefang asked.

“It should have hit.” Ji Feng nodded his head and said.

“This

Xiang Jiefang frowned, from beginning to end he had seen nothing other than a bright light and a light ball ejected out, he hadn’t even seen the target ship, so how did it hit?

Ji Feng took the binoculars from Xiang Jiefang's hand and looked at them, and said, "Chief Xiang, the laser cannon is very powerful and the burst is very short, maybe the target ship has been sunk, I think it's better to prepare another target ship"

"Prepare another target ship!"

Xiang Jiefang immediately ordered loudly.

Luckily, that naval officer had arranged three target ships in advance, although he didn't know exactly what weapons Chief Xiang was going to test, but Xiang Jiefang had personally arranged it, he definitely didn't dare to be negligent, so he had prepared it in advance long ago.

So, this second time, it only took ten minutes for the target boats to be ready once again.

This time, instead of looking at the laser cannon, he took his binoculars and stared straight at the target ship. He wanted to see how the target ship would disappear for no reason.

After measuring the distance and bearing, and then adjusting the laser cannon, immediately afterwards, Ji Feng fired again.

Swish!

There was still a bright light, then a ball of light shot out, and the next moment, Xiang Jiefang saw a ball of light hit the target ship at a speed that was barely visible to the naked eye.

Then, a scene that left him dumbfounded appeared.

The moment the bright light hit the target ship, the entire target ship suddenly burst out with an intense light, that light directly wrapped the entire target ship, and the next moment, the target ship was as if it was made of paper mache, instantly twisted and melted, and quickly disappeared into the sea

Campus Master Chapter 3064

This scene left Xiang Jiefang dumbfounded!

He had expected that the laser cannon would be very powerful, but he had never expected that it would be so powerful!

Originally, in Xiang Jiefang's concept, after the laser cannon hit the target ship, it would perhaps be like Ji Feng shooting down the Philippine warplane before, causing that warplane to explode with a bang.

But the scene that he saw through the binoculars was really something that Xiang Jiefang had never expected!

That scene had completely exceeded his imagination!

Even the target ships were built according to strict technical standards, they were not made of paper! How could it be that after being hit by that fist-sized ball of light, it melted and dissolved in a very short time, just like paper mache?

This is simply drier than a stone hitting tofu!

“This is the power of the laser cannon?!” Asked Liberation. Forgive him, there was an undisguised excitement in his voice at this moment, and there was even a vague tremble.

“Yes!”

Ji Feng nodded and said, “What the laser cannon fires is not like a cannonball, but super strong energy, except that this energy is gathered into an energy ball and the moment it hits the target ship the full energy is released”

Xiang Jiefang could not understand some of the terminology used in this, but it did not affect his knowledge of the weapon.

He had seen with his own eyes just how powerful the laser cannon was, and it could be said that it was, well, unbelievable!

This meant that if this weapon was used during a battle between two armies, it would definitely be countless times more powerful than artillery, and if it was applied to naval ships, it would definitely be a nightmare for the enemy!

“This kind of weapon, how large a range can it cover? What is the range?” Xiang Jiefang immediately asked the most crucial question.

“It depends on the energy source!”

Ji Feng said, “Whether it’s the coverage range or the range, it all depends on the energy source carried by the laser cannon itself, if there is enough energy, theoretically, the range is limitless, but this small piece of energy source certainly can’t store such a huge amount of energy in it.”

Xiang Jiefang asked, “What about the coverage range?”

“It’s the same.”

Ji Feng explained, “Actually, no matter the coverage range or the range, both of them consume energy, and these two actually affect each other, under the same power, if one wants to cover a wide range, then there is definitely not enough energy to provide for the range, and if one wants to hit far, then the coverage range is small.”

After saying so, Xiang Jiefang understood: “In that case, the most suitable situation is to adjust both the coverage and range to a proper degree, so that both the range and coverage can reach the most perfect point, right?”

Ji Feng nodded his head and said, “That’s right.”

“Then can be adjusted at any time?” Xiang Jiefang asked again.

“Theoretically it’s also possible, and it’s not difficult to operate, as long as it’s a matter of doing something with the transmitter.” Ji Feng said.

“Well! It’s just like a car, with the engine providing a fixed amount of power, in the lower gears the horsepower is high but the speed is slow, in the higher gears the horsepower is low but the speed is fast,

whether you want speed or horsepower, it all depends on the gear lever in the driver's hand, right?"
Asked Liberty.

"Exactly right!" Ji Feng smiled and nodded his head.

"Good!"

Xiang Jiefang shook his fist in excitement and said, "Ji Feng, this weapon you have designed has really completely exceeded my expectations, it has given me a big surprise!"

The power of the laser cannon really surprised Xiang Jiefang, how useful such a weapon could be in combat, even a fool could think of that!

The thought of that target ship being melted away like it was made of paper mache gave Xiang Jiefang goose bumps!

"However, there are still some problems with this!" Ji Feng suddenly said.

"What problems?" Xiang Jiefang immediately asked.

"As you can see, Chief Xiang, the current laser cannon is still rather rudimentary, only equipped with the most basic construction, not even aiming equipment, it still needs to be improved." Ji Feng said.

Xiang Jiefang immediately asked, "How long will it take to improve it?"

Ji Feng mused, "It's hard to say this. But I have an idea, if we can cooperate with the military, it should be much faster."

Xiang Jiefang asked, "Just like just now, using the targeting system on the military ship?"

Ji Feng nodded and said, "That's right. The military has ready-made equipment, such as targeting systems for artillery and so on, and probably more advanced systems, which can all be utilised immediately."

Xiang Jiefang said, "Well! This is a good idea! If both sides cooperate, the development will naturally be fast"

Just as the words came out here, Xiang Jiefang suddenly gave a beat, then glanced at Ji Feng and asked with quite a deep meaning; "You kid actually took the initiative to seek cooperation from the military?"

Such an advanced weapon, if it was anyone else, I'm afraid no one would want to hand it over easily, and it goes without saying that the value of this weapon, with Ji Feng's status, if he was not willing to hand it over, although he would be under a lot of pressure, but it was not impossible to carry it. But now he had even taken the initiative to offer to cooperate with the military, so it was a bit strange.

However, Xiang Jiefang probably understood Ji Feng's intentions.

Ji Feng heatedly laughed, "It's good to have a big tree at your back! Chief Xiang, I'm just a hobo, with the military as my backer, I won't be afraid that someone will find me in trouble no!"

"You brat"

The company's main goal is to provide the best possible service to its customers.

However, Xiang Jiefang also had to admit that by doing so, Ji Feng had largely avoided pressure and trouble from within, and most importantly, the military was bound to owe him a favour!

“Not too old, but a monkey on his back!” Xiang Jiefang nodded at him.

“Can’t help it, I’m scared of being bullied!” Ji Feng laughed.

“You’re still afraid of being bullied?!” Xiang Jiefang smiled, others bullied Ji Feng? It was good that he didn’t bully others, look at those who had ‘bullied’ him, the Qiao family hadn’t even gone through a few face-to-face in his hands before they were beaten to pieces, and now there was only one Wang Wengao left struggling to hold on, but it was also a one-man army.

As for the Wu family

The company’s strength has now diminished considerably, if not for the fact that the Wu family’s old man is still around, I’m afraid it’s a question whether the Wu family can still exist!

Just like that, Ji Feng still said he was afraid of being bullied?

“If you’re really willing to hand it over, then I can slap you down right now!” Xiang Jiefang said.

“It’s not hand it over, it’s cooperation!” Ji Feng laughed.

Xiang Jiefang nodded at him, “Monkey smart!”

Ji Feng heatedly smiled and changed the subject, “Chief Xiang, do you think if I have someone carry a laser cannon to Island No. 1, can I shoot it down? Can we hold it?”

“Shoot it down, easily!” Xiang Jiefang said, “However, it’s hard to say whether we can hold it or not. The Vietcong will not easily give up Island No. 1!”

“Our Chinese army can’t watch our own citizens being bullied on their own land, right?” Ji Feng asked with a smile.

Xiang Jiefang then looked at him somewhat speechlessly and asked, “You want the country to help you guard Island No. 1?”

This kid, no wonder he was willing to hand over the technology of the laser cannon, it turned out that he saw not only the benefits, but also had this idea in mind!

Ji Feng just laughed and didn’t say anything.

Xiang Jiefang pondered for a moment and slapped his thigh: “This is not something that can’t be operated!”

Ji Feng was instantly pleased: “Chief Xiang, so you’ve agreed?”

“Is it useful for me to agree to such a big matter all by myself?” Xiang Jiefang hummed, “This will be discussed after we go back!”

You’re joking, once we take No.1 Island, we may face crazy reprisals from the Vietcong, which may lead to a small-scale war, no, Xiang Jiefang is 100% sure that there will be reprisals from the Vietcong, and the Vietcong may even deploy its navy and air force on a large scale by then!

If the Chinese side wants to hold No. 1 Island, they must be prepared for war!

If the Chinese side wanted to defend Island No. 1, it had to be prepared for war! Such a big matter could not be decided just by internal discussions within the military, but had to be decided at the highest level!

Of course Ji Feng understood this, he was only saying this to see what Xiang Jiefang's attitude would be, and now it seemed that there was a lot of hope!

"Chief Xiang, it's not like the Vietcong has provoked us once or twice, how many of our fishermen have died at the hands of the Vietcong soldiers in these few years alone? Now we, the people, are looking forward to the military to take a bite out of us!" Ji Feng said.

"Don't give this shit, you kid!" Xiang Jiefang hummed.

"I'm just telling the truth." Ji Feng laughed.

Xiang Jiefang didn't say anything, but looking at his expression, it seemed that he had acquiesced to Ji Feng's statement. In fact, how could it be that Xiang Jiefang did not want to give the order for the army to move out and eat up all those Vietcong brats who had repeatedly provoked him, but there were some things that could not be done with just one breath.

"One day, the people of China will no longer be bullied!" Xiang Jiefang looked into the distance and said in a deep voice.

"Stomp, stomp, stomp!"

Just then, the sound of hurried footsteps suddenly came, but he saw one of the guards of Xiang Jiefang who was responsible for accompanying the warriors on the warship in the cabin running over quickly, lowering his voice and saying a few words urgently in Xiang Jiefang's ear.

Ji Feng only vaguely heard the words 'fishermen' and 'death', then he saw that Xiang Jiefang's face sank at once.

"How dare you!"

Xiang Jiefang suddenly roared low in anger, "Bullying people too much! You simply don't know how high the sky is!"

Immediately afterwards, the naval officer in the cabin also came out and quickly ran over, saying, "Chief, we have received a distress signal from"

"I already know it!" Xiang Jiefang said in a deep voice.

Campus Master Chapter 3065

"Chief, you take the plane back to base first, we'll take care of this side!" The naval officer said.

"What words!"

Xiang Jiefang's face sank as he said, "Our fishermen are being bullied, and I, the chief, am instead going to retreat back? If the people find out about this, they will poke us in the back!"

The naval officer hurriedly said, "Chief"

"There's no need to say anything!"

Xiang Jiefang interrupted him and said aloud, "Now I order that the warships move forward at full speed to rescue our fishermen!"

"This"

"This what this, are you going to disobey orders?!" Xiang Jiefang bellowed.

"Yes! Full speed ahead!" The naval officer, once he saw that Xiang Jiefang was angry, immediately saluted and shouted in response.

"Go ahead, don't mind me, I'm a soldier too!"

Seeing that naval officer trotting all the way away while his mouth shouted full speed ahead, guns loaded, and entering the first level of combat readiness, Ji Feng couldn't help but ask, "Chief Xiang, can I know what's going on?"

Xiang Jiefang said in a deep voice: "Just now our warship received a distress signal from our fishermen, saying that they were being surrounded by Vietnamese warships, the other side used water cannons, and some fishermen were already injured!"

Ji Feng's face immediately sank: "Vietcong brats? In these waters?"

The fishermen's distress signal would not have been sent here. According to the usual practice, if this kind of offshore fishing vessel is in danger, it will directly ask for help from the fishing administration or send it to the coast guard, but this is a naval ship under our feet, it looks like the fishermen should be in a great hurry. distress signal Vietcong brats, bullying people too much!"

Only then did Ji Feng understand, he asked, "Chief Commander Xiang, what do you plan to do?"

"As Chief, I can't stand by and watch our fishermen in danger and not do anything." Xiang Jiefang said in a deep voice.

"That's great."

Ji Feng couldn't help but grin when he heard this, "I can still fire a few shots from my laser cannon, it's no fun just shooting at target boats, it's more fun to play with real guns!"

But Xiang Jiefang glared at him, "You're really belligerent! However, this time you can't rush into action, we'll see what happens and try to drive away if we can."

Although Xiang Jiefang was equally angry about this situation, he was not a big-headed soldier with a passion for war, but the chief, so he had to look at the situation from the overall perspective. It was easy to fire a few shots, but how to take care of the aftermath was a troublesome matter, so one had to be cautious.

Ji Feng couldn't help but be a little disappointed, it seems that the tone towards liberation is also the same as that of the Central Committee, neither wants to make a big move!

But the problem is, people are already doing it, and they have to hold back?

“Chief Xiang, or else you can lend me a boat and I’ll go and meet them!” Ji Feng said, “In that case, anything that happens has nothing to do with the country, I’ll bear the burden alone!”

“Are you squeezing me?” Xiang Jiefang gave a glare.

Ji Feng said, “Anyway, I can’t stand watching people bullying our own people.”

Xiang Jiefang grunted, but did not say anything more, not saying that he agreed or disagreed.

The warship began to move forward at full speed, chopping the waves and cutting a white line across the sea, while the naval officer invited Xiang Jiefang to the cabin to take command.

Arriving at the cabin, Xiang Jiefang said, “I am only here today to be a spectator, an amateur does not command an insider, if we really want to fight, we still need to rely on you all.”

The naval officer immediately said loudly, “Please don’t worry, Chief Xiang, it is our duty to protect our country, we will definitely defend our fishermen to the death!”

Xiang Jiefang said, “It’s useless to just shout slogans, let’s wait until we get to the place.”

The sailing speed of the warship was really a bit maddening, perhaps it also had something to do with the sea being too big, anyway, when Ji Feng looked out from the cabin, he could only see a vast sea, and no fishing boats could be seen at all.

Ji Feng asked, “Chief Xiang, how much longer will it take to arrive?”

Xiang Jiefang said, “It’s already full speed ahead now.”

The naval officer said, “Based on the current sailing speed, we should be able to arrive within forty minutes.”

“Forty minutes

Ji Feng frowned slightly, “It takes that long? Then won’t it be all over when we arrive? Chief Xiang, can we just send planes over, don’t we have an air force on the Southern Fleet side?”

Xiang Jiefang said, “Do you still need to say that?”

Ji Feng was stunned, Xiang Jiefang had already sent planes over? How come he didn’t know? Just now, Xiang Jiefang had been with him, he hadn’t done anything.

At this time, the naval officer explained, “Our fleet is all interconnected, this side received a distress signal and immediately sent it to the fleet, and now the air force fighter planes should already be on their way.”

Ji Feng asked, “Then how long will it take for the air force to get there?”

The naval officer said, “It will also take a certain amount of time.”

“How long exactly?” Ji Feng asked.

“Sorry, this is confidential and cannot be disclosed!” The naval officer said.

“This is also confidential?”

Ji Feng was stunned, but then he reacted, the location of the warships’ moorings was indeed a military secret, and if he knew the flight time, he would almost be able to estimate the approximate location of the fleet, and in case he encountered a sneak attack, he would lose a lot of money.

Ji Feng was not wearing a military uniform, so that naval officer assumed that he was not a soldier, so naturally he could not tell him this.

“Then can you transfer the satellite surveillance?” Ji Feng asked again, “If we rush there so blindly, we don’t even know what the scene is like, in case the Vietcong brats set up an ambush, won’t it be troublesome then?”

The naval officer didn’t say anything, but Xiang Jiefang said, “The satellite is already monitoring, just wait patiently, the military has a complete set of operational mechanism, you’d better not make suggestions with a hammer head from the east.”

Ji Feng was speechless. So he was still talking too much?

After sailing for more than half an hour, a soldier suddenly said, “Report, target found!”

The one who spoke was a soldier in charge of the radar, and he spotted the target on the radar. Ji Feng and Xiang Jiefang immediately looked, and saw that several red dots appeared on the radar screen and were flickering.

“Binoculars!” Xiang Jiefang said.

“Yes!”

The naval officer immediately handed over the binoculars, and after looking into the distance for a while, Xiang Jiefang handed them to Ji Feng, “Take a look at them too, all of you, get ready for battle, signal to the other side, tell them that this is our Chinese territorial waters, tell them to immediately stop their provocative act of besieging our Chinese fishing boats, otherwise, it will be considered as an invasion and we will launch an attack! ”

The signal was immediately sent out.

At this time, Ji Feng also saw the ships vaguely appearing in front of him, he took his binoculars and looked carefully, gradually getting used to seeing things on the sea, and as a result, he found that there were two warships in front of him, with a fishing boat in the middle, and the chimney on it was emitting black smoke outwards.

“Chief, the other side is a fishing boat and a small warship that are attacking our fishing boat.” One of the soldiers in charge of the observation said, using the binoculars on the ship, he could see much more clearly than with his hand held binoculars.

“Come closer!”

Xiang Jiefang ordered as he could not see too clearly.

The naval officer said in a hurry; “Chief, if we get any closer we’ll be in range of the other side!”

Xiang Jiefang said, "If we don't even dare to enter the other side's range, how can we rescue our fishermen?"

"But you"

"You don't need to care about me, do what you need to do!" With a wave of his hand, Xiang Jiefang interrupted him.

"Yes!"

With that, the warships approached again, and this time, Ji Feng saw the situation in front of him and his face steeped in gloom.

The two warships, surprisingly, were attacking the fishing boat, and in the binoculars he could clearly see that a white column of water was launched from one of the ships, which shook the fishing boat repeatedly, and the people on the fishing boat were standing at the cabin door waving the flag repeatedly, as if they were signalling something to the other side, but it was to no avail.

"Boom!"

The man who was waving the flag was abruptly thrown up and then fell heavily on the deck, and the flag in his hand was also thrown into the sea.

Bastard!

Ji Feng snorted coldly in his heart, and a murderous look appeared in his eyes.

And this scene also made Xiang Jiefang's face look ugly as he asked in a deep voice, "Did you send a signal to the other side?"

"Chief, the other side has not replied!" A soldier said.

"Prepare for battle!" Xiang Jiefang said in a cold voice.

"Yes!"

Starting from the naval officer, everyone on the ship went into battle readiness, ready to fight.

In a deep voice, Xiang Jiefang said, "Send another signal to the other side, telling them to stop attacking our fishermen immediately!"

However, there was still no reply.

Nonetheless, one of the warships even took up a fighting stance, with its guns pointed this way, while the other ship was continuing to attack the fishing boats.

"The vertical son is rampant!"

Xiang Jiefang bellowed angrily, "Full speed ahead, rescue the fishermen, if the other side dares to fire, return fire with all your might!"

"Yes!"

This time, that naval officer did not advise again, in fact, Xiang Jiefang did so, which made all the warriors energetic, even the chief commander was like them in the first place, what else was there to be afraid of?

Ji Feng turned around and went to the deck, and Xiang Jiefang didn't even have time to stop him.

Xiang Jiefang might have thought about the big picture and all sorts of issues, but these issues were not on Ji Feng's mind, there was only one thing on his mind now, rescuing the fishermen who were being humiliated!

Quickly assembling the laser cannon, Ji Feng didn't even ask the soldier for coordinates and directions, he just observed with his naked eyes, judging the approximate position and firing angle, the laser cannon was made by him, he had it in his mind, even if there was an error, it wouldn't be too big.

Taking careful aim, Ji Feng looked at the Vietnamese vessel that was attacking the fishing boat with high-pressure water guns and water cannons, and decisively pulled the trigger.

"Poof!"

A rather soft looking ball of light, carrying an energy so terrifying that it was unimaginable, was instantly ejected...

Campus Master Chapter 3066

"Boom!"

The sea waves splashed up.

The light ball fired by the laser cannon landed near the Vietnamese warship, and the majestic energy exploded in the water, instantly raising a huge wave, that huge wave almost lifted that warship up, and the sea around it was even more agitated!

The sound of the light hitting the water was silent, and the noise that came from it was the sound of the sea water erupting. But even so, it startled the Vietcong on the two ships.

"The Chinese are firing!"

"Is it a torpedo?"

There was confusion on the other Vietcong ship, they hadn't even seen what was going on, and then there was such a huge wave on the sea that almost tipped their ship over, it was too shocking!

The captain of this Vietnamese warship was a strong man in his thirties, but because of his height, he looked a bit thin and weak.

At this moment he grimaced and bellowed, "Hold it all steady!"

"Captain, the Chinese are firing, should we return fire?" The subordinate asked loudly.

"Signal the other side that we are on a mission in our waters, they have entered our waters, tell them to leave immediately or we will return fire!" The captain said.

"Aye!" His men shouted in response.

“But Captain, the Chinese have opened fire, do we need to evade them?” The subordinate asked.

“No, get ready for battle!” The captain barked.

The situation on the sea instantly became extraordinarily tense as Ji Feng fired his laser cannon. Especially when the Chinese warship saw that the Vietnamese warship had already assumed an attack stance, it also immediately made adjustments accordingly, making tactical evasive manoeuvres on the sea on the one hand, while the guns were quickly adjusted and aimed at the Vietnamese warship.

Without an aiming system, relying on his eyes to aim, there were still errors.

Even with his eyesight, at such a distance on the sea, it would be difficult to hit with one shot.

After glancing at the energy block, Ji Feng estimated that he should almost be able to hit a few more shots, and he adjusted his firing direction again.

“Ji Feng, you fired the gun?”

Xiang Jiefang trotted over quickly and said with a sullen face, “Hurry up and get down, it’s nonsense!”

Ji Feng said loudly, “Chief Xiang, you see that the other side has taken a combat stance straight away and is still attacking our fishing boats, how can I not fire my guns?”

“Then there’s no need for you to come personally, you go to the cabin, our warships are able to deal with it!” Xiang Jiefang said, to be honest he admired this kind of fervour in Ji Feng, but the problem was that Ji Feng was not an ordinary warrior, and it was too dangerous on the deck, so naturally Xiang Jiefang could not let him take the risk.

However, Ji Feng shook his head and said, “No! Chief Xiang, it’s better to use the laser cannon.”

Xiang Jiefang said in a deep voice: “Now you go back to me, even if you want to fight, there are still fighters on board, there is no need for you!”

“But apart from me, no one can adjust the firing angle of the laser cannon now!” Ji Feng said.

Xiang Jiefang frowned and was just about to speak when the ship suddenly swayed and a warrior quickly ran over and said loudly, “Chief, the enemy is already conducting tactical evasion, please return to the ship immediately, Chief!”

This was going to be a fight!

“Chief Xiang, look!” Ji Feng suddenly pointed ahead and drank.

As soon as Xiang Jiefang turned around he heard a vague thud, and then he saw that the fishing boat in the distance had been thrown up so high that its hull had been twisted, apparently there was huge damage to the hull.

The people on board, moreover, were thrown straight into the sea.

“It’s a water cannon!”

A naval soldier said loudly.

Xiang Jiefang said nothing more, just sullenly, and bellowed, "Immediately gauge the enemy's position and report back at all times!"

"Yes!"

When Xiang Jiefang gave the order, the naval warrior naturally obeyed unconditionally.

Thus, just a few moments later the coordinate positions of those two ships of Vietnam came through the ship's communication system, and Ji Feng immediately took aim and then looked at Xiang Jiefang.

"Ji Feng, didn't you want to show me the power of the laser cannon? Now is your chance to show it, sink that ship for me!" Xiang Jiefang said in a deep voice.

"No problem!"

Ji Feng grinned and let the sea breeze fill his mouth as he quickly aimed according to the coordinates and pulled the trigger.

"Poof!"

The light pellet fired by the laser cannon instantly hit the fishing boat of Vietnam, resulting in the ship twisting violently as if it was swallowed by a black hole, before quickly melting away and disappearing into the sea.

The people on board the fishing boat were even buried in the sea without any half-hearted reaction!

This scene stunned everyone on the warship. Even though Xiang Jiefang had already seen the power of the laser cannon, at this moment, seeing this scene, he couldn't help but fiercely grip the alloy guardrail on the deck, and the high bruises on his hands showed how unsettled he was inside.

But Ji Feng didn't stay idle, after extinguishing the Vietnamese fishing boat with one shot, he immediately adjusted the direction of the gun and said at the same time, "Chief Xiang, now you can send people to save the fishermen, I'll take care of the remaining Vietnamese warship!"

Without saying a word, Xiang Jiefang waved his hand, "Save the people immediately!"

They had come to rescue the fishermen, so naturally they would not just stand by and watch them get killed. It was just that Xiang Jiefang did not expect the Vietcong to be so rampant, after sending three consecutive signals to the other side, they were still firing water cannons at the Chinese fishing boats, even knocking people overboard.

Under the anger of Xiang Jiefang, he finally slapped down the order.

At this time, Ji Feng had already adjusted the direction of the guns for the second time and aimed at the remaining warship of the Vietcong.

"Chief, that warship's guns have moved the enemy is about to attack, you should hurry to the cabin!" That naval soldier saw the movement of the opposite Vietnamese warship through the binoculars and hurriedly said.

"Don't worry, they don't have a chance to open fire!"

Ji Feng snorted coldly and pulled the trigger again.

The laser cannon fired a ball of light so fast that the Vietnamese warship, which was already making evasive manoeuvres at full speed in preparation for firing, was enveloped by the light without even half a chance to dodge.

The next moment, the fast sinking warship brought out a huge whirlpool on the sea, and a moment later, the warship disappeared into the sea.

Ji Feng stood up and clapped his hands, "The job is done!"

Xiang Jiefang looked at Ji Feng with a very serious expression on his face.

Ji Feng laughed, "Chief Xiang, it was you who ordered the firing of the cannon, now you want to settle scores after the autumn?"

"Are you really willing to cooperate with the military?" Xiang Jiefang asked in a deep voice. To Ji Feng's surprise, Xiang Jiefang wasn't trying to blame him for firing the cannon, but talked about cooperation.

"Of course!"

Ji Feng nodded and said, "As you can see, with the military's targeting system, this laser cannon will be able to exert great power, this is a win-win situation, I am certainly willing!"

Xiang Jiefang nodded slowly, "Good!"

If the power of the laser cannon demonstrated by bombarding the target ship had shocked Xiang Jiefang, then now, after taking out a warship with one shot, even though it was only a small warship, Xiang Jiefang didn't know what to say anymore.

An epoch-making weapon!

This is an epoch-making weapon!

As soon as a small warship and a fishing boat disappeared into the sea, it became clear to Jiefang that he had underestimated the power of the laser cannon.

This was an epoch-making weapon that could not be overestimated no matter how highly it was evaluated!

And Ji Feng's quick nod also made Xiang Jiefang greatly appreciated, and at the same time, he was secretly relieved.

This kind of weapon was really too dominant!

For any army, this kind of weapon would be a nightmare if it ever appeared on the battlefield!

So no matter what, the Chinese military had to have this weapon in their hands, and it couldn't be released in any way until a way of protection was found.

But this weapon was designed by Ji Feng, and if Ji Feng did not agree, then it would really be a bit of a problem for the Chinese military, because Ji Feng's identity was there, and it was definitely not something that could be taken over just by exerting pressure.

In that instant, Xiang Jiefang even had the thought that if Ji Feng found that he had underestimated the value of the laser cannon and wanted to back out, Xiang Jiefang even wanted to go back to Yanjing and go directly to Ji Zhenhua's plan, even though it was against the rules, but this kind of weapon, Xiang Jiefang would not give up in any case.

It was a good thing that Ji Feng nodded his head in agreement very quickly, which made Xiang Jiefang breathe a sigh of relief and think a little bit more highly of Ji Feng.

To be able to hand over such an overbearing weapon so easily, this was really not something that an ordinary person could do.

"Ji Feng, if the Chinese Navy is able to ride the vast ocean and be invincible in the future, you will be the biggest contributor!" Xiang Jiefang said incomparably serious, "Now, on behalf of the Chinese soldiers, I would like to express my gratitude to you!"

"Swish!"

Xiang Jiefang gave a solemn salute to Ji Feng.

Ji Feng said modestly, "You are too polite, Chief Xiang, I wouldn't dare to accept this."

"This is something you deserve!" Xiang Jiefang said, "Now is not the time, I will definitely ask for credit for you later!"

"Hehe!"

Ji Feng smiled, now was indeed not the time, saving people first was important.

In the distance, the small boats that went down from the warship were already rescuing the fishermen, while the warship also started to approach towards the fishing boat, Ji Feng removed the laser cannon and put it away in the box, not knowing what he was thinking about.

Soon, all the fishermen were rescued, no less than one. A few of them were wounded and were placed in the cabin living area, and the warship started to return.

By this time, warplanes from the naval base had also arrived and, after receiving the signal, escorted the warship back to the ship.

Xiang Jiefang went to the control room, taking out two Vietnamese ships at once, even though they were only a small warship and a fishing boat, but the nature of this was no different from taking out a large Vietnamese warship, after all, fire had been opened, so it was necessary to communicate with the highest level as soon as possible to discuss the aftermath.

It was war, it was talk, there had to be a charter.

Campus Master Chapter 3067

Fortunately, the fishermen's boats were damaged and their hulls were twisted, but they did not sink.

After releasing the dinghies and rescuing all the fishermen, the naval soldiers on the warship secured the boats with steel ropes and towed them behind the warship to help the fishermen bring them back.

Now that the rescue work was complete, Xiang Jiefang gave the order to return to the ship.

Ji Feng returned to Jiangzhou alone, and Xiang Jiefang didn't even stay in Jiangzhou, he went straight back to Yanjing.

Although it was a great relief to have destroyed two ships of the Yue Kingdom in one go, the situation that followed was bound to be very complicated.

The Vietcong would not be willing to give up, so China naturally had to be prepared to deal with it.

However, when it was time to part ways, Ji Feng raised the issue of No. 1 Island with Jiefang: "Chief Xiang, this time the fight has already started anyway, if possible, can we start making plans for No. 1 Island?"

Xiang Jiefang said, "This is a big matter, let's talk about it later."

Ji Feng wanted the military to help him hold Island No. 1, which was not unworkable, but the question was how exactly the Vietcong would react to this incident, and that was the priority.

Moreover, even if the Tengfei Group was on the island, how long would the military have to help hold it? This is also a question.

The country will have room for de-escalation even if there is really a violent conflict. "

Xiang Jiefang shook his head and said, "I can't answer you now, but it's close, just wait for the news."

Seeing this, Ji Feng had no choice but to nod his head in agreement.

He knew that it was true that such a big matter could not give him an answer immediately, but in his heart he was hoping that the top would agree.

Because, he was now a bit impatient.

The idea of seeking a development base had actually occurred to Ji Feng a long time ago, only that at that time he had not thought of looking for an overseas island to be his base, but rather whether there was somewhere in the country that could have a large enough area of land for him to make a base.

At that time, he also listened to Zhang Lei's proposal as a whimsical joke.

However, as the Dynasty's technology was laid out in front of Ji Feng time and again, he couldn't help but be a little shaken.

The speed of Dynasty's technological progress was too fast, and it was also becoming more and more powerful in terms of force. More importantly, Dynasty's penetration in China was very deep, and Ji Feng didn't know how many people were related to Dynasty, or even if there was anyone within the Tengfei Group who was related to Dynasty, it was hard to say.

There was another important reason – he was going to speed up his development next, and the technology he was going to bring out would be more and more, which would be too noticeable if it was in the country.

He didn't expect Zhang Lei's prediction to be so accurate, and he didn't know if this guy had thought of this day, or if it was just a prophecy that came true.

But there was no doubt that now Zhang Lei's proposal was the most suitable choice for the Tengfei Group.

By placing the production base in the country, factories could be set up in various places, as such a large workforce could never be assembled no matter which island it was on, and it would be unrealistic to have the workers all move there with them, so placing the factories in the country could instead also promote employment.

But the R&D centre and headquarters must be moved out!

The next two days saw a sudden change in the storm.

Vietnam accused China of taking the lead in firing and sinking their warships and fishing boats, and showed a set of evidence, one of which was a signal sent back by the Vietnamese warships indicating that they were expelling the Chinese fishing boats, but then the Chinese navy ships arrived and the two sides were facing off.

The Vietcong warship then disappeared.

So Vietnam claimed that all kinds of evidence pointed to the Chinese Navy, so the two missing Vietnamese ships must have been sunk by the Chinese Navy.

For its part, China responded with a tit-for-tat – show me the evidence!

Just because the ships disappeared after a confrontation with the Chinese Navy does not mean that the Chinese Navy must have done it!

Instead, the Chinese side also produced some evidence, which were some photos of the Vietnamese warship being pounded with high-pressure water cannons on the Chinese fishing boat.

In that photo, a fisherman on the fishing boat was thrown up and his hands were holding onto the side of the boat for dear life, which prevented him from falling into the sea.

When the photo was released, it immediately aroused a wave of public anger and the public was outraged.

Everyone knew that for a long time, when Chinese fishermen went out to sea to catch fish, once they entered the outer sea, they could be attacked and expelled by foreign fishing vessels or warships at any time, and even suffer inhuman abuse when they were caught.

However, in the past, countries have tried not to publicise this, and have only protested against it, either urging other countries to punish the perpetrators severely or urging them to release them.

So people could only keep their anger down and complain, but it didn't do much good.

But this time it was different, as China had released the photos, and this immediately set the public on fire, expressing their anger in various ways, with some leaving messages on the internet and others

taking to the streets to march, especially university students, who were almost always a group of hot-blooded youths and were most active in marching.

Under such circumstances, while China and Vietnam were fighting a war of words, the situation was getting more and more tense, as each side began to assemble its fleet in the southern waters, and both sides were mobilising their troops.

Large quantities of supplies were being shipped to the southern waters!

At the same time, all of China's proud submarines were launched and their whereabouts were unknown.

Then came the news that the Vietcong had started to intercept the Chinese ocean-going vessels in the southern waters, even firing at one point, but because the Chinese fleet arrived in time, there was no fight and the Chinese cargo ships were brought back safely.

The situation in the southern waters has suddenly escalated and the whole ocean is filled with a pungent smell of gunpowder, the slightest spark bursting into it will instantly ignite the powder keg.

The tense situation here has attracted a lot of attention, especially countries such as KAI Peng, the Philippines and Rice have started jumping up and down, even fanning the flames from the side.

In particular, the media of Kepong and the Philippines are frantically promoting the rhetoric of the Chinese threat and are comparing the power of both China and Vietnam in the southern waters. In the commentary, China's naval power figures were deliberately suppressed, which was clearly a covert attempt to give Vietnam more confidence.

It was like saying to the Vietcong, "Look, China's power in the southern waters is just this small, it's no match for you, if we fight, China will definitely be no match for you!"

While Rice is announcing that it is paying close attention to the situation in the southern waters, secretly, a Rice fleet based in the Philippines in Asia is beginning to move quietly, while China's intelligence agencies have learned that large quantities of weapons and equipment are being loaded onto ships from Rice's military base in the Philippines and shipped to Vietnam.

The situation was getting more and more tense, and the war was about to start.

At this time, Ji Feng received a call from his father, Ji Zhenhua, asking him to go to Yanjing.

Ji Feng was not surprised to receive this call, he knew that his father must have understood that this time the conflict with Vietnam might be partly due to him.

Ji Feng immediately went to Yanjing and, in accordance with his father's explanation, came directly to the place where he worked.

Strictly speaking, this was the first time that Ji Feng came to Ji Zhenhua's office.

Although he had come to the place where Ji Zhenhua worked before, at that time Ji Zhenhua was still in another office because at that time he was only a minister, while now, he was also the headmaster of the pivot, so he had also changed his office.

“This time, you’ve stirred things up again?” As expected, Ji Zhenhua’s first words were to ask about the situation in the southern sea.

“It’s not really my fault alone, the culprit should be the Vietnamese, if they hadn’t attacked our fishermen in China, there wouldn’t have been these things!” Ji Feng said.

“You!”

Ji Zhenhua nodded at him and said, “I’ve heard about the process, although it was a bit impulsive, however, it was not a bad performance.”

Hmm?

Ji Feng was stunned, seeing the smile on his father’s face, he realized that his father had not come to settle accounts with him, but had actually praised him!

But after a second thought, Ji Feng understood.

In fact, to say that China is weak is not to say that the leaders of China are really afraid of foreigners, but from the perspective of the overall situation, sometimes they can only tolerate, but this is a game between countries, really in the face of foreign warships bullying Chinese fishermen, I believe that no leader will definitely not back down!

“Dad, then the war that might be started with the Vietcong

“China is capable of protecting the people of its own country!” Ji Zhenhua waved his hand and said, “This has nothing to do with the others.”

Ji Feng then hemmed and hawed, those words sounded uplifting!

Ji Zhenhua glanced at him and suddenly asked, “You plan to move the headquarters of the Tengfei Group? And fancy No. 1 Island?”

“Did Chief Minister Xiang tell you?” Ji Feng asked.

“For such a big matter, Chief Xiang would naturally seek my opinion.” Ji Zhenhua said, “Rather, you, what exactly do you think? Isn’t the Tengfei Group developing very well in Jiangzhou?”

Ji Feng shook his head and said, “At home, some things are too restrictive, so I can’t let go.”

Ji Zhenhua frowned: “What other things are you unable to let go of?”

What else?

That’s too much!

Ji Feng said, “Dad, although the Tengfei Group seems to have become a multinational conglomerate now, this is actually just the beginning. According to my vision, when the Tengfei Group can become a real international giant, then it will be considered to have truly risen.”

Ji Zhenhua asked, “What does this have to do with where the Tengfei Group is?”

Campus Master Chapter 3068

“Of course it’s relevant. For the Tengfei Group to rise, it’s too slow to rely on traditional methods, and it can only dangle around the country. There must be extraordinary means.” Ji Feng said, “And this extraordinary means, the best way is high technology.”

“Just like the current few products?” Ji Zhenhua asked.

“Yes!”

Ji Feng nodded and said.

Ji Zhenhua asked in a deep voice; “Are you afraid that someone will covet the achievements of the Tengfei Group? Or are you worried that someone might suspect the source of the Tengfei Group’s technology?”

Ji Feng froze.

“A little surprised?”

Seeing his son’s surprised look, Ji Zhenhua asked, “Didn’t expect me to ask that?”

Ji Feng nodded and said, “It’s a bit surprising.”

It was true that he had not expected his father to suddenly ask such a question, and to mention the source of the technology of the Tengfei Group all of a sudden. Originally, Ji Feng had pushed all the sources of technology onto the experts of the Tengfei Group as much as possible, trying to downplay his role in it as much as possible, and no one had asked about it in the past few years, so he thought that everyone had reluctantly accepted this reality.

But now it seemed that even his father was wondering about the source of the Tengfei Group’s technology, not to mention everyone else!

It was only because the Ji family’s brand was here that no one dared to openly question it. But it would be unrealistic to say that there were no doubts in one’s heart.

Ji Feng said in his heart that this was only normal.

“You want to relocate the Tengfei Group to No.1 Island, I have no objection to that, but have you thought about it, this relocation is not a trivial matter, although No.1 Island is not too far from mainland China, but not everyone has the courage to leave their homeland, there is an old saying in China that it is difficult to leave the homeland, do you understand?” Ji Zhenhua asked.

“I have already taken these into consideration.”

Ji Feng said, while in his heart he was surprised at his father’s attitude, how could he not object?

“Since you have considered these then it’s good, about the weapons, Chief Xiang has also communicated with me, the weapons research and development department will stay in China.” Ji Zhenhua said.

“Okay, no problem.” Ji Feng nodded readily, in fact, there was no weapons R&D department, even if there was, it was just the study on the third floor of his villa, the laser guns and laser cannons were all

developed in the study, including the 3d TV sets and so on were almost all developed here, strictly speaking, where he was present, it was the R&D centre!

“Also, your mother still doesn’t know about your injury until now, so don’t let it slip when you go home.” Ji Zhenhua admonished again.

“Mm, I understand.” Ji Feng nodded, knowing that it must have been his father who had someone hide it from his mother.

“Little Feng

Ji Zhenhua suddenly wanted to say something but stopped.

Ji Feng asked, “Dad, what’s wrong?”

“Going to No. 1 Island is not a small risk, if you really relocate the Tengfei Group to No. 1 Island, then from now on, you will be standing on the tip of the storm.” Ji Zhenhua said.

Ji Feng instantly felt his father’s worry, and he couldn’t help but feel warm in his heart and said, “Dad, I understand, I will pay attention to safety.”

“Good.” Ji Zhenhua nodded his head.

It was obvious that Ji Zhenhua seemed to have a lot to say to his son, but because of the man’s subtlety, it made Ji Zhenhua’s words not much, and after he had said all the key points that needed to be said, his gaze fell on his son’s arm again.

“Little Feng, your arm

“My arm is already fine.” Ji Feng smiled and shook his arm, saying, “Basic life is completely unaffected, it’s perfectly fine.”

“That’s good. Next time, don’t be so risky.” Ji Zhenhua said.

“Mm.” Ji Feng nodded his head.

Ji Feng stayed in Yanjing for five days, except for the first day when he got together with Ji Shaojun and the others, he spent the rest of the time at home with his mother, Xiao Su Mei, because the injury on his arm was no longer a big deal, so Xiao Su Mei didn’t see from beginning to end that her son had ever been injured.

By the time they returned to Jiangzhou, the situation in the southern waters was already extremely tense, with both sides lining up their forces, a huge amount of logistical supplies being transported to the naval base, and the entire military region and fleet at the highest level of readiness, with artillery shells not being fired, engines not being turned off, warplanes not being put into storage, and bombers hanging bombs on standby

The world’s attention has been drawn to the waters, and on the official level, both sides are still fighting their own war of words, with countries like Kepong and the Philippines following suit, all targeting China.

It was at this time that Xiang Yongzhan found Ji Feng.

“Older brother, I have received orders to lead a battalion and all the members of the special operations brigade to be at your disposal!” Xiang Yongzhan said.

“What?!” Ji Feng was stunned.

“Haha!” Xiang Yongzhan laughed harshly, “Just kidding! But I did receive orders and will cooperate with your operation.”

Ji Feng was relieved, he said, no matter how generous Xiang Jiefang was, he wouldn’t take a battalion and an entire special operations brigade to give him command, even if the value of the laser cannon was great, I’m afraid that in the eyes of the military he was only an amateur who couldn’t command operations, naturally it was impossible for an amateur to command an insider.

However, Xiang Jiefang is already very meaningful, one battalion plus the entire special operations brigade is already enough to take down Island No. 1, and, moreover, to hold it.

And Xiang Yongzhan’s next words were even more indicative of Xiang Jiefang’s masterstroke.

“Don’t you underestimate this one battalion, it’s the garrison’s reinforced battalion, and, it’s also the vanguard battalion!” Xiang Yongzhan said.

“I don’t know much about this, I do understand the reinforced battalion, what does the vanguard battalion mean?” Ji Feng asked.

“They are the first batch of troops equipped with the latest weapons!” Xiang Yongzhan said.

Ji Feng immediately understood, so, they were the laser gun troops! The so-called latest style weapons that Xiang Yongzhan spoke of actually referred to the laser guns that were currently being secretly changed.

“Brother, I heard that you still have good stuff here?” Xiang Yongzhan’s eyes were glowing as he quietly asked.

“Yes there is, what do you mean by that?” Ji Feng asked.

“If you have it, bring it out, I’ve heard that it’s so powerful that it can scare the piss out of people, should I equip my special operations brigade with it first?” Xiang Yongzhan said with some impatience.

Ji Feng was immediately amused: “Without an order from above, you dare to dress up the special combat brigade privately?”

Xiang Yongzhan said with a heated smile, “It’s good to be able to save the country supplies, besides, when fighting outside, of course, we should choose good equipment, how about it, think about it?”

After hearing about the power of the laser cannon from his father, he was a bit impatient.

The Special Operations Brigade was only a small special forces unit, and although they were elite, the weapons they were equipped with were only light weapons, so many times they had to resort to dangerous tactics, otherwise if they encountered someone’s artillery bombardment, or if they encountered warplanes bombing, they would have to rely on superior concealment to hide.

Now that there is a laser gun, Xiang Yongzhan naturally cannot wait to equip it. With a laser gun, the combat power of the special operations brigade will rise sharply.

The first thing you need to do is to get a good idea of what you're getting into.

The actual fact is that you can't get a lot of money from the company.

"That's easy, I'll get you whatever you need!" Xiang Yongzhan said, "Is it the targeting system? Don't worry, experts have been arranged from above and will be in Jiangzhou this afternoon to help you debug the targeting system for the laser cannon."

"It's not just the aiming system!"

Ji Feng shook his head and said, "For the laser cannon to be used in actual combat, there is actually quite a bit of work to be done, the aiming system is just one of them, in addition to that, the instrumentation for the energy source also needs to be equipped, as well as the protection system, all these need to be studied again."

Xiang Yongzhan asked, "What is the instrumentation system for?"

Ji Feng gave him a look, "Without the instrumentation system, how do you know how much energy is left in the energy source? In case there's enough for one shot, and you end up foolishly carrying it to fight with someone else, isn't there no return?"

"..... too!"

Xiang Yongzhan rubbed his hands and asked; "How long will it take to get all these things equipped?"

Ji Feng shook his head, "I don't know, just the targeting system alone has to go through repeated calculations, it depends on how good the experts seem to be!"

Xiang Yongzhan was more or less disappointed: "How long does it take, really!"

Ji Feng thought for a moment and suddenly asked, "No, it's not right, still sending experts? You really haven't received any news at all? In that case, Chief Xiang hasn't started working on it yet?"

"What do you mean?" Xiang Yongzhan was stunned.

"It seems like you really don't know." Ji Feng shook his head and said, "When he returned from the sea a few days ago, Chief Xiang had already taken away that one half-finished laser cannon, saying that he was going to hand it over to the experts to study the targeting system's equipment"

"When was that?" Ji Feng hadn't finished speaking when Xiang Yongzhan hurriedly asked.

"It was the day I came back!" Ji Feng said.

When Xiang Yongzhan smiled, he jumped to his feet, "This old man, he's still keeping secrets from me"

Only then did he realize that the old man had already taken away the laser cannon and had already started working on it.

He hurriedly called his father to Liberation, but as soon as he mentioned the matter of the weapon after the call was answered, he was reprimanded.

“Is this the kind of thing you can talk about over the phone? How can you lead soldiers when you’re fussy?” Xiang Jiefang reprimanded, “What rank are you and are you qualified to know the information?”

“.....”

Xiang Yongzhan wilted at once.

Ji Feng was listening at the side, but in his heart, he admired Xiang Jiefang quite a lot, for his own son should be kept secret, in this point, Xiang Jiefang was really a very principled person.

Thinking about it, if it wasn’t necessary for Xiang Yongzhan to go out and lead the troops into battle, and at the same time receive experts from the military, I’m afraid he wouldn’t even be told about the laser cannon!

“Things should be at the door, just wait, it should be soon.” Seeing that Xiang Yongzhan was a bit listless, Ji Feng said with a smile.

Campus Master Chapter 3069

Xiang Yongzhan was anxious, but in fact the bigwigs in the military were even more anxious than he was.

In particular, the hawks in the military were even more anxious.

While the laser cannon was still in the debugging stage, the bigwigs who had access to this information had their eyes on it, all wanting to change the units under their command first.

The power of the laser cannon was so great that whichever unit changed first would increase its overall combat power by a huge margin. Even the air force was jealous, and two of its bigwigs kept running to Jiefang’s office for three days, hoping that a research project could be set up as soon as possible to install the laser cannon on warplanes.

Especially when the situation in the southern waters is so serious that fire could be opened at any time, even if it is delayed, there is not much time to delay it, as the army may be deployed at any time, so who does not want their troops to be equipped with more powerful weapons first?

Who wouldn’t want their troops to be equipped with more powerful weapons first, not to mention a laser cannon that is so powerful that it is almost perverted?

After Xiang Jiefang brought back the laser cannon, several experiments were organised within the military, and the results were evident just by looking at the performance of these bigwigs.

In this regard, Xiang Jiefang had an unbearable headache.

Although Ji Feng had already said that mass production of the laser cannon was no problem, the problem was that it took time to set up the production base and then to produce the finished product.

The problem in the southern sea was already very serious, and whether or not it could be fought in the end, it was necessary to be prepared first.

So, that afternoon Ji Feng waited for not only the military's weapons experts, what came was actually a whole project team.

The person in charge was a general, carrying the rank of major general on his shoulder.

It was a military man of about fifty years old.

"Ji Feng, this is General Zhao Xinqiang, who is in charge of this project General Zhao, this is Ji Feng, the inventor of the laser cannon!" Xiang Yongzhan made introductions for both of them.

The two shook hands and after a brief exchange of pleasantries, Zhao Xinqiang said, "Mr. Ji, this time we are under a tight schedule, that's why we are in such a hurry to invite you here, I hope you can understand."

The project team was in a bit of a hurry to invite Ji Feng to the military compound as soon as they arrived in Jiangzhou.

However, Ji Feng could understand their feelings and was even happy to see this kind of attitude from the military, so he waved his hand with a smile and said, "It's alright, we all want the country to be stronger, it's understandable."

Mr. Ji, we hope to get all the data of this weapon and all the design plans, so that we can better optimise and proportion it, otherwise, the targeting system and protection system that will be added on later may not match too well... .."

Zhao Xinqiang's words were interrupted by Ji Feng before he could finish, "General Zhao, there is no need to talk about these issues anymore, I have already made it very clear to Chief Xiang before, the detailed data of the weapon can be given to you, but the design plan will have to be discussed separately, moreover, as long as the data is correct, there will not be any errors when the targeting system is added later, I still understand this point. "

Naturally, Ji Feng would not be fooled, later retrofitting the targeting system, reference to the original design plan might be better, but, as long as the data is accurate and detailed, even if there is no design plan, there is no problem.

The military wants the original design plan's purpose, Ji Feng also clear, but now he is impossible to hand over all the technology at once, the so-called cooperation, not so playful.

Zhao Xinqiang was a little embarrassed by the blockage and was just about to speak when Ji Feng smiled and said, "General Zhao, let's see, let's just focus on improving the laser cannon, as for the rest, let's not talk about it, okay?"

Not expecting Ji Feng to be so forceful, Zhao Xinqiang was more or less displeased, frowned and said, "Mr. Ji, you should know that this weapon is very important to the military, moreover, this technology is in private hands"

"Let's not talk about that."

Ji Feng waved his hand, not continuing to talk at all, "General Zhao, I've brought all the detailed data of the weapon, in addition, I've also brought the plan for adding the instrumentation, you guys take a look at it first, if there's anything wrong, we'll discuss it! Okay?"

Zhao Xinqiang was suffocated for a while without saying anything, and in the end, he could only accept the USB stick handed over by Ji Feng with a black face.

Ji Feng stood up and smiled, "That's all for now then, I'll be staying at the barracks today, so if you have any questions you can always come and ask me."

After saying that, he turned around and left the office.

Zhao Xinqiang's face was dark and frightening as he turned his head to look at Xiang Yongzhan and asked, "Captain Xiang, what kind of attitude is he taking?"

Xiang Yongzhan said, "This is already a good temper, if it were me, I'm afraid I wouldn't even shrug you off! General Zhao, don't you think it's already generous of him to take the initiative to hand over such a powerful weapon and offer to cooperate with the military?"

Zhao Xinqiang instantly blushed, "But he's clutching the original proposal, which makes it difficult for us to make further improvements to the weapon"

"Doesn't the weapon belong to someone else?" Xiang Yongzhan asked.

Zhao Xinqiang was held back a little, and it was a while before he said, "But what's the use of him, a private person, clutching such a powerful weapon? Isn't that getting himself into trouble?"

"Joke!"

Xiang Yongzhan sneered, "You think that with his status, this weapon would be useless in his hands?"

Zhao Xinqiang was speechless!

Xiang Yongzhan also stood up and said, "Everyone, there are still some things to do in the army, so I will excuse myself for now, if there is anything you can find me again!"

After that, he also left the office, leaving behind a group of military experts who were staring at each other, and Zhao Xinqiang whose face was red and blue for a while.

Xiang Yongzhan found Ji Feng in his car downstairs, he pulled open the car door and came up, smiling, "That guy doesn't know what's good for him, don't take it to heart!"

Ji Feng was smoking and handed him one, sneering, "I think it's not that he doesn't know what's good for him, but that someone is greedy!"

Xiang Yongzhan said, "Inside the military, it's actually very complicated. I will report this matter, but you can't delay the development of the laser cannon just because of that."

Ji Feng shook his head and said, "Just such a clown, it's not worth me getting worked up over him."

Only then did Xiang Yongzhan feel relieved and nodded, "That's good, I was worried that you would have something in mind because of this matter. But then again, I actually don't think there is anything wrong with his idea, you may not know too well, the bigwigs up there are actually extraordinarily fond of this weapon of yours, some want to move it to warplanes and some want to put it on warships, but there are complicated technical issues involved in between"

Ji Feng gave him a look and said, "So you just want to take the technology away from me?"

"Of course not!"

Xiang Yongzhan shook his head and said, "This technical team came first, after all, time is now pressing, and for the follow-up, there will be professionals to talk to you about cooperation."

Ji Feng sneered, "If the people who come are of the same quality and level as that General Zhao just now, I think it's better not to talk about it."

"You should not hold on to this matter, this person is no good, I will report to the top later!" Xiang Yongzhan laughed bitterly, he was also holding back a secret curse in his heart, that guy was simply an idiot, or did he treat others as idiots?

Did he really think that a few righteous words would make Ji Feng hand over his technology? Or did he think it would be better to use his status to pressure Ji Feng?

What a failure to achieve anything!

Without saying much, Xiang Yongzhan knew that this person either came up through nepotism or had an ulterior motive.

"I said how our country's military power is developing so slowly, if experts are all this kind of people, then it's really" Ji Feng shook his head and smiled.

"In fact, nowadays, whether it's local or military research institutions, there are too many connected people." Xiang Yongzhan shook his head and said, "I don't know this person, and I have never seen him before, I'm afraid that he is again a connected household somewhere."

"Outsiders lead insiders, those who are not capable do not work, those who are capable do not have the opportunity, scientific research units are led by such goods, what can be achieved?"

Ji Feng waved his hand and said, "Change the person, otherwise there is no need to talk!"

This time, the cooperation with the military was to be discussed by both sides to formulate a plan, and Ji Feng was to be personally involved, otherwise he wouldn't have stayed at the barracks, but if it was with such a scum to discuss the research plan, he would rather smash the laser cannon!

Xiang Yongzhan immediately nodded and said, "Okay, I'll go report back!"

As he watched Xiang Yongzhan leave quickly, Ji Feng couldn't help but shake his head, what was originally a very happy event turned out to be so bad, what a thing!

Xiang Yongzhan moved quickly and returned just ten minutes later.

"It's been decided, this team will be taken over directly by one of the experts, Zhao Xinqiang get out immediately!" Xiang Yongzhan said.

"The one in charge of taking over, is it sure it's an expert?" Ji Feng asked.

"Sure!"

Xiang Yongzhan nodded and said, "I reported the matter directly to my old man, but all those who occupy the thatched pit and want to come over to gild the lily to get seniority, all get out, my old man said, this is arranged by the Institute side, he is also very annoyed, this was strictly confidential, but did not expect"

He was a little embarrassed to say no further, this kind of confidential matters can appear such a moth, also indeed enough shame, not to mention the old man, he was extremely annoyed.

Ji Feng shook his head, did not say anything, the heart is more determined to go to the overseas islands to establish the headquarters base decision.

Not long after, several people came out of the building, led by none other than Zhao Xinqiang, followed by three other people.

It was obvious that these people were the so-called 'those who occupy the thatched pit but don't shit' as Xiang Yongzhan said. At this time, Zhao Xinqiang also saw Ji Feng and Xiang Yongzhan, his face turned ugly and he left with his head bowed in disgrace.

Campus Master Chapter 3070

After driving away Zhao Xinqiang, who wanted to reap seniority, the whole project team was taken over by an old expert.

This old expert did not let Ji Feng down again, he was indeed an officer, although there were some official words, but he was still very serious after getting to the point.

The current system, the scientific research institutions are all floating around, there are not many people who are really working, most of them are trying to get money to get seniority, even the real officers of the scientific research staff have also fallen into this habit, which can not let people down.

But the good thing is that these experts are still relatively skilled, especially when the targeting system already has a certain base, the research progresses even faster, mainly the calculation of data and experiments, and the data calculation has powerful computers, the rest is just experiments.

The experiments were carried out in extreme secrecy, and although the project team consisted of quite a few people, apart from a few key personnel, no one else knew what they were researching until the end of the experiments, and were only responsible for carrying out calculations and optimising solutions.

In fact, for the project team's research efficiency Ji Feng is still not quite satisfied, not because their technology is not good, but in terms of research seems to be some dragging, originally an hour can be done, but must be two or three hours or even a morning to do, the whole experiment in Ji Feng calculation almost two days can be done, but in the hands of the project team took a full five days!

This makes Ji Feng really can't help but shake his head, fortunately now the southern sea is also just in the standoff, China and Vietnam have concerns, so no fight, if it really is a fight, just waiting for weapons I'm afraid can wait for a white head.

This also makes Ji Feng alert that the experimental team of the Tengfei Group must not be like this, not just the experimental team, but all the teams, this kind of procrastination is simply a headache.

But Ji Feng also knew that this was a problem that was bred in the state units, at least now the Tengfei Group did not have such a style, after all, the high benefits and high salary of the Tengfei Group was not that easy to earn!

In five days' time, the laser cannon was perfectly retrofitted with a targeting system, and in those five days Ji Feng himself had already designed an instrument to retrofit the laser cannon with.

This time, the general work of the laser cannon was basically complete.

With a meter to monitor the energy source and a targeting system, the laser cannon was ready to enter the operational sequence.

Xiang Yongzhan couldn't wait to find out when it would be ready for mass production. He had escorted him throughout the entire experiment, so he had seen with his own eyes how powerful the laser cannon really was, which made his heart even more enthusiastic.

During this period, the negotiators sent by the military also arrived. Ji Feng's terms were simple: the materials were provided by the Tengfei Group, the technology was his, and the military could designate military enterprises to manufacture it, with 60% for himself and 40% for the military.

Originally this was not in line with the rules, according to the military negotiators, it was a bit inappropriate for Ji Feng to take the lion's share, but Ji Feng did not have time to talk nonsense with them, and directly called the phone to Xiang Jiefang's office, explaining his intention.

So, the split ratio was set.

A special deal was made, and when the laser cannon was completely perfected, the cooperation agreement between the two sides was signed.

Subsequently, the manufacture of the laser cannon officially entered the factory production stage, but this was a big pressure for the Tengfei Group. Even though the subsidiary led by Rong Peng was already building a production base at full power, the output could not go up before it was fully put into production.

After all, the situation in the southern sea is too tense and no one knows when the fight will start. If the negotiation is successful, perhaps there will not be a fight, but if the negotiation is not successful, a fight between the two sides will be inevitable.

In this situation the military has a strong need for laser cannons. According to Xiang Yongzhan, under the existing battle mode, in a small-scale war, this terrifying weapon can definitely play a decisive role and can almost sway the victory or defeat of a war.

Coming out of the military camp, Ji Feng continued to pay attention to the situation in the southern waters.

To many people's surprise, although China was also increasing its troops, the originally fierce war of words was gradually stopped on the Chinese side, and it did not sternly reject the intention of certain countries to mediate from it, but only responded in silence.

In the eyes of the outside world, this is a sign that China has backed down and gone soft.

Even within China, certain people were even very angry and cursed, thinking that the central government was too weak.

But in his heart, Ji Feng knew very well that this was not a sign of weakness, but that the military attached too much importance to the laser cannon and would only take action after the first batch of laser cannons had been installed.

Through this, Ji Feng also understood what the top brass was planning to do – a large-scale war would not be possible, but a small-scale battle would definitely be avoided.

The reason for this is that although the laser cannon is powerful, it is only a small weapon, and nowadays missiles are the mainstream long-range strike weapon.

And the military has been waiting for the laser cannon, that means the military is trying to fight a small-scale war.

When Ji Feng asked Xiang Yongzhan, this guy was looking at Ji Feng oddly and asked, “Who did you hear that from?”

“Is there any need to hear from anyone? You can see it yourself!” Ji Feng laughed, “What’s wrong with that?”

“Did you really see it?” Xiang Yongzhan couldn’t help but ask again.

Ji Feng stretched his hands, “Who else would tell me? You should have heard what kind of person my little uncle is, and he never says anything about the army to the public, including me. Where would I hear about it?”

Xiang Yongzhan couldn’t help but say, “You kid are really sick, you can guess all this I think your guess is right, that’s what the top should be planning!”

Ji Feng asked, “You think?”

Xiang Yongzhan laughed: “You don’t think I know, do you? This kind of strategic layout is the most confidential of secrets, and I am not qualified to know about it. However, there is indeed this kind of talk within the military now, that the country wants to fight a small-scale war, so that on the one hand, it can test the combat strength of its troops, especially the navy and air force, and on the other hand, it also wants to use this small-scale war to form a deterrent to the other countries in the vicinity.”

“It seems like it should be true!” Ji Feng was relieved, since this was being circulated in the military, it should be pretty much the same, and it was also a more reliable argument, testing the troops and showing off muscles at the same time, killing two birds with one stone.

“In that case, this time your special combat brigade is going to be useful again?” Ji Feng suddenly asked.

“Bullshit!”

Xiang Yongzhan said resentfully, “If it wasn’t for you kid, we might have come in handy, but aren’t we going to assist you now?”

Ji Feng hummed, "Don't be unhappy yet, if it wasn't for me, this small-scale war might not even be fought, and there's no telling how many years would have passed if the military wanted to make up its mind to take action!"

Xiang Yongzhan was choked for a moment, but when he thought about it, it was true, if it wasn't for Ji Feng, where would there be such perverted weapons as laser cannons and laser guns?

"Hey, it's cheap for those boys in the Marine Corps!" Xiang Yongzhan said with some reluctance.

Since it was a small-scale war, the large warships would definitely not be used easily, I'm afraid it would still be a battle between the small-scale forces of both sides, of course, a tug-of-war between the navies that was definitely inevitable, but both sides should try their best to avoid a big war.

Although Vietnam is rampant, they should also be aware that China is not that good a challenge.

Ji Feng saw an opportunity in this!

"Old Xiang, don't be reluctant yet, I think that if it's really a skirmish, the core of this war will still be you and your special operations brigade!" Ji Feng said.

"How so?" Xiang Yongzhan immediately asked.

Ji Feng said, "Since we're fighting a small-scale war, how can we keep the scale of the war within a certain range? And not to the extent that both sides kill each other and directly use large armies against each other? The crux of the matter lies in who makes the first move and from where!"

Xiang Yongzhan pondered for a while and suddenly his eyes lit up and he understood what Ji Feng meant.

"You mean to say, start from Island No. 1?" Xiang Yongzhan asked.

"I think it's the most appropriate!" Ji Feng said, "Around Island No. 1, it's perfectly possible to have a small-scale contest without having to use large warships, so that the scale of the war can be controlled and we can still show off our muscles."

Xiang Yongzhan couldn't help but nod, "That's right. You don't say it, this battle plan of yours is really feasible! But what if the Vietnamese side is not willing to use missile bombardment after we capture island number one?"

This is not a small problem, if the Vietnamese side uses missiles, then it will be a problem.

Ji Feng said, "It depends on how it plays out from above!"

Xiang Yongzhan nodded and said, "Well then, let's discuss it again and work out a detailed battle plan, then I'll report this plan and see what the top means."

Ji Feng said, "Good!"

However, neither Ji Feng nor Xiang Yongzhan had anticipated that before they could discuss it, they received a call from Xiang Jiefang, who had flown to Jiangzhou.

The plane had just arrived, and Xiang Jiefang didn't even get off the plane, he directly called Ji Feng and Xiang Yongzhan over.

"The situation in the southern sea is getting more and more tense, and it looks like it's about to reach a critical point, so something has to be done!" Xiang Jiefang said, "After the research and decision from above, we are going to fight on a small scale in the southern waters, your special combat brigade and that pioneer battalion, are the first batch of combat troops!"

Ji Feng and Xiang Yongzhan smiled and couldn't help but glance at each other.
