

Campus Master Chapter 3071

Neither Ji Feng nor Xiang Yongzhan had expected that the battle plan that the two of them had privately formulated was just about to be reported to the top in the hope that it would be approved by the top, but before they could report it, Xiang Jiefang's phone call unexpectedly came through.

The battle plan drawn up from above was surprisingly the same as theirs.

The coincidence that even the vanguard troops were the Special Operations Brigade and the vanguard battalion was a bit surprising to both of them.

But the one who was more surprised was Xiang Jiefang.

When Xiang Yongzhan spoke of the plan they had formulated, Xiang Jiefang was silent for a moment before he said, "There are talents coming out of the rivers and mountains from generation to generation!"

The military top brass had formulated this battle plan after combining the country's power and the current international environment, as well as taking into account all the factors. But Ji Feng and Xiang Yongzhan, two young people, had actually determined such a battle plan, which made Xiang Jiefang couldn't help but feel very emotional and gratified.

Although young, they were not adventurous and were steady, which was exactly what he wanted to see.

Young people have impetus, but sometimes they tend not to think about the bigger picture, just as a very loud voice on the internet strongly demanded the country to fight a big battle in the southern sea to beat the country's prestige, and some hot-blooded youths even shouted the slogan of another self-defence counter-attack and fight directly to the capital of Vietnam.

But this is obviously unrealistic and can only be described as whimsical. Never mind the fact that warfare nowadays is not really like the old mode of warfare where land forces were king and it was all about ground advance, even if one could easily hit the capital of Vietnam, one could not do so.

The bigger picture had to be taken into account.

"Orders won't be given for now, prepare your weapons first, and be mindful." Xiang Jiefang admonished and hung up the phone.

"Brother, we can rely on you next." Xiang Yongzhan turned his gaze towards Ji Feng, "The laser cannon must be mass produced urgently!"

"It takes time, besides without the laser cannon you can't fight a war?" Ji Feng said.

"Nonsense, who would carry a hoe to fight with people if they have a submachine gun?" Xiang Yongzhan hummed, "Those soldiers of mine are all precious, I don't want any of them to die."

Ji Feng nodded and said, "I'll try my best."

The production of laser cannons was not as simple as talking about it, especially now that they were still working with the military, how efficient those military factories were, and the time needed to train the fighters after they got the laser cannons, all these had to be taken into consideration.

The good thing is that this is a special period and special things are being done. With Ji Feng providing the technology and Tengfei Group bringing in a large quantity of the new chrome alloy, the production of the laser cannon has entered into an intensive stage.

The entire military was like a complex and precise machine that began to rumble.

At the same time, the situation in the southern waters became more and more tense.

The Vietcong kept increasing its troops and even placed a large number of troops, among them mechanised ones, along the south-western border with China.

Internationally, the League of Nations is mediating, but China and Vietnam are at each other's throats, leaving the League at its wits' end.

In fact, everyone knows that the League of Nations is basically being manipulated by Rice now, and although China has been gradually making its voice heard, in the end it is still Rice that has the final say.

The relationship between countries is actually no different from that between ordinary people, whoever has the biggest fist, whoever has money and power, is the truth.

On the surface, they say they do not want to see the conflict in the southern waters intensify further, but in reality, according to the information that China has, Rice is secretly in contact with Vietnam, especially when the Vietnamese ambassador frequently goes to meet with Rice's dignitaries, so it is obvious that there is something going on between the two.

At the same time, the Kepong side even unscrupulously said that Vietnam was resisting, even using words like 'in the face of the aggression of the big powers, Vietnam is standing by and will resist to the end'.

The media in Kampong even made a lot of noise about China's threat to its neighbours, with some even threatening that the Self-Defence Forces should send warships to help Vietnam.

But what really irritated China was the pressure from countries like Rice.

The Rice ambassador begged to see the old man to convey the Rice president's concern about the situation in the southern waters and to convey his private advice that Rice did not want to see instability in the region and that China's previous sinking of the Vietnamese warship was already an active provocation, one might even say aggression.

This news, somehow, made its way to the media, and once the news was reported, it immediately aroused the anger of the public.

It was clear that Rice was putting pressure on China, and for this reason it went out of its way to turn black and white, saying only that China had sunk the Vietnamese warship, but never mentioning why the Chinese navy had attacked, which was because the Vietnamese warship was attacking a Chinese fishing boat and had ignored the warning signals sent by the Chinese navy.

If the Chinese Navy had not stopped it at that time, the fishermen's lives would have been in danger!

The Chinese high command did not take a stand, but the media was reporting on it, and some of them even interviewed directly the fishermen who were attacked by the Vietnamese warships at that time.

“We were strictly following the charts and conducting fishing operations in our country’s waters, and definitely did not cross the border. But when the Vietnamese warships and fishing boats came, they tried to expel us.”

“We argued that we were fishing in our own waters, but without saying a word the other side fired water cannons and hit us with high-pressure water cannons, causing one of our fishermen to break his calf and several others to break their ribs.”

“By that time we were already waving flags to show that we were unarmed and had no intention of resisting, but the other side continued firing water cannons and smashed our boats.”

The text report was accompanied by photographs of the fishing boats at the time.

In one of the photos, the fishing boat’s hull had been twisted and there were multiple dents in the hull, while the Vietnamese fishing boat was pounding the boat with high-pressure water cannons, the white column of water was clearly visible.

Meanwhile, in another photo, the fishing boat has docked and the fishermen are helping each other out, and there are images of medical personnel carrying the boat on a stretcher, while the fishing boat has been destroyed beyond recognition. The owner’s wife was hit by a high-pressure water gun and suffered broken ribs

These reports have sparked public outrage and anger.

The neighbouring countries have already targeted Chinese fishermen more than once or twice, especially those naval forces, even using guns to shoot unarmed fishermen, challenging China’s bottom line time and again.

How can the people not be outraged when something like this happens again?

In response to this report, the Vietcong denied it, saying only that the photos were computer-generated and that China had forged the evidence.

This is an obvious scoundrel’s statement, which has made the Chinese people extremely angry.

The Chinese officials finally spoke out at this time, sternly demanding that the Vietcong immediately withdraw its troops and seriously deal with those responsible for the attack on the fishermen. As those involved in the attack had been killed, but the officers who gave the order to send troops were to be dealt with seriously, and compensation and apologies were to be made to the Chinese fishermen.

The Vietcong came straight back at them, even demanding tit-for-tat that China hand over the murderers and at the same time demand an apology from the Chinese side.

This rogue act made the Chinese people even more furious.

China did not say anything more, but continued to increase its troops in the southern waters, and everyone knew that China was preparing to make a move.

China’s move made countries like Rice and Vietnam very nervous, blaming China and warning it not to play with fire

“Playing with fire?”

Xiang Yongzhan received the news and could not help but sneer, “I’ll make the whole No.1 Island a sea of fire!”

He glanced at the special combat brigade that was already fully loaded and ready to go, and waved his hand, “Let’s go!”

Late at night.

The entire Special Combat Brigade, fully armed, boarded an armed transport plane and flew to the southern waters. At the same time, the pioneer battalion of the Chinese garrison, which had been preparing for a long time, also boarded the transport plane.

At this time, Ji Feng, however, arrived at the Tengfei Group.

“Boss!”

Yi Xingchen greeted him.

Ji Feng asked, “Old Yi, is everything ready?”

Yi Xingchen nodded and said, “Don’t worry, it’s all ready, all the team members have been gathered.”

“Good!”

Ji Feng nodded and went to the security team’s training ground with Yi Xingchen. At this time, there were no idle people to be seen in the Tengfei Group, and this training ground was not allowed to be entered by anyone other than the battle team members.

Zhang Lei led all the team members and was waiting at the training ground.

When they saw Ji Feng enter, everyone stood up straight.

“Everyone, I won’t say any more nonsense, what we have gathered everyone for today, you all are already clear, now I will only say one thing, this operation, is to go to war, not to pack up the rabble as in the past.”

Ji Feng said in a deep voice: “Since it is a war, there will definitely be death, I know that all of you have climbed out of the pile of the dead before, perhaps you don’t want to go back to that kind of life in the past, so now I will give you all five minutes to consider, those who are not willing to go, I will definitely not force them, and there will definitely be no blame, now, please consider carefully, after five minutes, those who stay Those who stay here will be equipped with weapons and will leave overnight!”

After saying that, Ji Feng turned around and left.

The battle team of the Tengfei Group, their combat quality was nothing to write home about, however, they did not sell themselves to the Tengfei Group, so Ji Feng would not force them to necessarily go to this war.

But this was a rare opportunity, and Ji Feng had to take the battle team there. Through the training of this war, I believe the battle team would make a qualitative leap.

Now, Ji Feng was to give them time to think about it. He wanted players who were all in, not people who had too many worries, that kind of person would hold the battle team back later even if they were strong enough to go into battle.

Because, I'm afraid there will be a lot of wars in the future!

Campus Master Chapter 3072

After five minutes had passed, Ji Feng returned to the battle team's training ground on time.

As his eyes swept over, he couldn't help but smile.

Not a single person had left! The battle team members, all of them were there.

"Good!"

Ji Feng nodded and said, "Thank you all brothers for your trust, I don't dare to guarantee that I will be able to bring each and every one of you here safely, but I am able to guarantee that even for the brothers who died in battle, as long as I am still alive, your families will have a day of happiness!"

All the team members didn't say anything, they just looked at Ji Feng and waited for his order.

Ji Feng waved his hand, "Let's go!"

There weren't many members of the battle group, so the five SUVs had easily sat down, and in the darkness, the cars quietly drove out of the security department of the Tengfei Group and disappeared into the night.

Ji Feng was the last one to leave, and he shook hands with Yi Xingchen before he left.

"Old Yi, I'll leave the security of the group to you."

"Boss, don't worry, as long as I'm here, there will be no mistakes!" The answer given by Yi Xingchen was simple, but full of confidence.

Ji Feng nodded, this time when the battle team went out to combat, he did not bring Yi Xingchen with him. Although combat was important, the battle group was not the main force, the real main force was the special combat brigade and the vanguard battalion, and then there was the navy!

The Tengfei Group was his base camp and someone had to sit here, and Yi Xingchen was undoubtedly the most suitable candidate.

Although Zhang Lei is shrewd enough, he has a big personality and is not suitable to stay and control the whole situation at this time.

Especially, the group's battle group had left in secret, so with Yi Xingchen sitting here, Ji Feng was at ease.

"Boss, take care!" Yi Xingchen said.

"Don't worry, we're not the main characters this time, we're just going out to follow and watch the fun!" Ji Feng smiled and patted Yi Xingchen's shoulder, sort of giving him a piece of mind.

Afterwards, Ji Feng didn't say anything more, but took Bai Zhu to the car and followed the four cars in front of him to leave quietly.

Yi Xingchen did not stay at the gate much, war was not new to him, even if Ji Feng let him follow this time, there was nothing to it, for him, war was actually a game to pass the boring time many times instead.

After working at Tengfei Group for these few years, he had actually been idle for a few years, and Yi Xingchen's heart was a little bit stupid, and his original intention to retire and not do this business anymore was now somewhat shaken.

Especially when he saw the scene of Ji Feng whizzing away with his battle team, the blood in his heart boiled a little.

However, Yi Xingchen did not get too excited, because he knew the priorities, the most important thing now was to ensure the safety of the Tengfei Group and not to let anyone exploit the situation.

Ji Feng sat in the car, his right hand touching his left arm, leaning back in his seat with his eyes closed wondering what he was thinking.

Bai Zhu hesitated for a moment and asked, "Young Ji, is your arm uncomfortable?"

When Ji Feng opened his eyes, he saw her somewhat worried eyes in the rearview mirror and couldn't help but smile, "No, just thinking about something."

Only then was Bai Zhu relieved, since Ji Feng's arm was injured, other people could not feel it, but she had been by Ji Feng's side, but she had noticed that at many times Ji Feng would deliberately avoid using his left hand to do something, so she knew that Ji Feng's arm had not actually recovered completely, and now when she saw Ji Feng touching his arm again, she thought that Ji Feng had relapsed from his old injury.

The torture of an injury is extremely frightening for any person, especially for a martial artist, and this was something Bai Zhu knew very well.

Perhaps for Ji Feng, carrying a ruined arm was actually better than not having that arm, as it was now a liability.

But Bai Zhu would prefer not to have Ji Feng's turn to do it.

"I'm fine, don't worry!" Seeing that Bai Zhu was still a little uneasy, Ji Feng couldn't help but laugh.

"Mm!"

Bai Zhu nodded slightly and concentrated on driving.

Ji Feng, however, secretly sighed, the injury on his arm had actually healed long ago, but it was a discount to his overall strength, if the war was too fierce and he needed to fight in close quarters, ordinary fighters were no threat to him, but if the situation was urgent, it might still be a bit troublesome.

However, seeing the tail lights of the car lit up in front of him, a sense of pride welled up in Ji Feng's heart.

So what if his strength was damaged?

Having the men of the battle group place such trust in him, it was a heavy trust, and Ji Feng had the confidence to defeat all enemies!

The convoy came straight to the Jiangzhou Military Region, and the warriors who had already been given an explanation immediately took Ji Feng and the others onto the transport plane and flew straight to the fleet base in the southern sea.

A few hours later, Ji Feng and the others arrived at the base, where he met Xiang Yongzhan, as well as the battalion commander of the vanguard battalion, a young man of about thirty years old named Tan Yong.

"Has the time for the operation been set?" Ji Feng asked as he opened the door.

"It's already set."

Xiang Yongzhan said, "We will move in two batches, the Special Combat Brigade and the Pioneer Battalion will move first and be brought to the designated location by small troop carriers for an armed swim across and a strong attack respectively. You take your men and move afterwards."

Ji Feng nodded and said, "No problem."

He didn't say anything because the battle group was ranked to the second echelon, because he knew that war was not a child's play, even though the people in the battle group were all ex-soldiers, but this kind of combat, the special combat brigade was obviously a bit more professional, how the fighting strength of the vanguard battalion Ji Feng had not seen, but since it could be sent to fight, he thought it would definitely not be bad.

Moreover, the garrison has always been the guardian of the capital city, both in terms of training and requirements are the most stringent in the entire army, and the Red Arrow Brigade that Little Uncle used to lead was under the garrison.

The only difference between the Red Arrow Brigade and the Special Warfare Brigade is that the Special Warfare Brigade, as a typical special force in the major military regions, is mainly responsible for foreign operations, even cross-country and cross-regional operations, while the Red Arrow Brigade certainly has similar combat missions, but more often at home.

The security of Gyeonggi was quite important!

"Ji Feng, there is one thing you have to remember, your men are not on a troop carrier, but on a submarine, but the submarine can't get too close either, you will also need to make an armed swim across some distance, because around island number one, the Vietcong have laid out a minefield, so you must not rush forward when you move, it would be best if you can wait until I give you a signal before you move."

Ji Feng nodded and said, "No problem, you are in command, you can just give the order directly."

Xiang Yongzhan also did not have nonsense, said: "Then this way, we move first, later on there will be someone to give you a special introduction to the situation around island number one, at the same time there is the situation on the island, as well as satellite maps and so on will be sent to you, you first look at it carefully, your side when to act you say!"

He also knew that Ji Feng had brought people here this time with the intention of practicing, so he simply let Ji Feng go free.

But there was one premise, Ji Feng couldn't run ahead of them, otherwise, it would become Ji Feng's main attack.

"Good!"

Ji Feng said with a nod.

Xiang Yongzhan said, "That's all for now then."

At this time, Xiang Yongzhan had already changed into a special combat suit, and had all the necessary items on his body such as a military knife and a three-pronged military spike, and even his helmet and headset were always on, so after agreeing with Ji Feng, he immediately turned around and left.

Naturally, there was no need for pleasantries when it came to combat. Xiang Yongzhan and Tan Yong left one after another, and then an officer came over to explain the situation on Island No. 1 to Ji Feng.

"First, bring me the satellite map of Island No. 1, I'll take a look at the military layout of the island first." Ji Feng said.

He soon found out that the fortifications that the Vietcong had laid out on Island No. 1 were really quite a lot, many of them were also hidden forts, and if the officer hadn't pointed them out to him, he really wouldn't have been able to tell.

This made Ji Feng realize once again the importance of this time out to practice, even though he had received advanced training in alien technology, there were some things that he had concluded from war in modern times that he really might not know, it was not the difference in technology, but the difference between the two systems.

After carefully committing the satellite map of Island No. 1 to memory, Ji Feng listened carefully to the officer's introduction before he led the team off.

However, the officer stopped him, because according to the agreement between him and Xiang Yongzhan, he had to leave half an hour later.

Ji Feng did not have any opinion, having really come into contact with modern warfare, he realised that he still had shortcomings, so it was best to listen to the professionals.

When the time came, Ji Feng immediately led the team to set off.

They were on a submarine of unknown type. In fact, foreign media had been speculating about how many submarines China actually had, with some saying that there weren't actually many submarines in China, and there were even only so many nuclear submarines, and even fewer capable of firing nuclear warheads.

But there is also intelligence that the submarines exposed by China are all conventional submarines, and no real strategic class submarines have been revealed, so there has been no accurate statement on how many submarines China has.

But there was at least one thing: China must have submarines capable of launching nuclear warheads, and more than one.

The time in the submarine was boring, and in order not to get in the way of the submarine soldiers' work, Ji Feng and the others just sat in their seats and waited patiently for their destination to arrive.

Finally, as a soldier came over to inform them that the destination had arrived.

"Bring the swim-through equipment and set off!" Ji Feng said.

"Finally, we can have a fight!" Zhang Lei said with excitement as he rubbed his fists together.

Ji Feng said, "Learn well, maybe you'll have to lead the team independently in the future!"

The sea was still very windy in the dark, and Ji Feng and the others, who had emerged quietly from the water, were moving quickly in the direction indicated on their equipment.

Campus Master Chapter 3073

In the darkness of the night, Ji Feng led his battle group to swim armed through the sea.

While the waves were passing, Zhang Lei, who had taken a slight breather, said through the intercom device, "Crazy, there should be mines in this water, be careful!"

Ji Feng said, "You all just follow me!"

Although the water mines were terrifying, they were not much of a threat to Ji Feng. Even in the ocean, Ji Feng could easily avoid them with his senses and superb eyesight.

He could avoid it, but others might not, so Ji Feng asked everyone to stay close to him!

It was said to be a minefield, but in reality the minefields laid out on such a large sea were mainly for battleships and submarines, individuals were really too small in the sea and the gaps between the mines were too large, which made Ji Feng breathe a sigh of relief.

There was a big difference between operations at sea and on land, and safety-wise, it was greatly improved.

"Boom!"

Suddenly, a loud sound came faintly.

When Ji Feng raised his eyes, he saw that in the direction of Island No. 1, flames rose to the sky, reflecting half of the sky, which was really conspicuous in this endless sea.

It's on!

Ji Feng secretly said.

It was obvious that this was Xiang Yongzhan and the pioneer battalion making their move. Although it was unknown whether the explosion was an attack launched by a submarine or a warship, or the equipment carried by Xiang Yongzhan and the others, there was no doubt that this explosion meant the start of this small-scale landing battle!

“Accelerate forward!” Ji Feng shouted into the communication device and accelerated the armed swim across in the direction of Island No. 1. He was here even if he was here to play the game, but he was still part of the action, not here to watch the battle.

Everyone in the battle group followed closely behind him. Although these people were not as tough as Ji Feng, they were all veterans and had participated in the war, so they knew how to use all kinds of equipment and were able to keep up with Ji Feng.

“Boom boom boom!”

With the first explosion, the next attack instantly became incomparably fierce, and the battle seemed to reach a high point in an instant

“Tide!

There was a succession of sky-rocketing explosions coming from Island No. 1!

Even though Island No. 1 was close at hand, there was a feeling of running away from the mountain in the sea, and it took Ji Feng more than half an hour before they reached the vicinity of Island No. 1.

It was a good thing that the submarine sent them in a direction that was better for logging in. If they had been sent directly to the cliff side of Island No. 1, they would have had to climb up.

“Sort out your equipment and load up your swimsuits!” Ji Feng said in a low voice.

At this moment, the results of the battle team’s relentless training on a regular basis were on display, and it took the whole team less than a minute to have taken off their swimsuits and sorted out their equipment.

Ji Feng ordered, “Hide the swimsuits in place and prepare for battle!”

In the darkness, the deafening sound of explosions drowned out the sound of their side. In fact, even without the sound of explosions, the sound of the waves hitting the island alone was enough to make everyone nearby need to talk through their communication devices.

However, it was fortunate that the waves kept beating over, so that Ji Feng’s footprints and traces of their landing were quickly washed away.

“Crazy, I don’t feel right, it’s so easy to land here, so it should be a key fortification area for the Vietcong kids, but why is there no one here?” Zhang Lei frowned and asked.

“Be careful, there are combat fortifications all over this island, such fortifications are very concealed, especially in the dark, we are in the light and others are in the dark, it’s easy to be discovered.” Ji Feng reminded.

Military fortifications were different from ordinary guards, they had to be as concealed as possible, and they had to be strong in attack, Ji Feng had seen the satellite map of this No. 1 island, if the officer hadn't pointed it out to him, there were some fortifications he wouldn't have been able to see on his own.

"Later on, you all follow behind me, don't act rashly." Ji Feng said in a deep voice.

"But your injuries"

"My injury has long since healed, it's fine!" Ji Feng said.

Under Ji Feng's leadership, the battle group slowly moved forward, and had just walked not more than a few dozen meters when Ji Feng suddenly stopped.

"See that bush in front? There's a dark fortress right there." Ji Feng said.

Zhang Lei frowned and looked at it, it was very dark in the bushes, so it was hard to see with the naked eye alone.

Ji Feng said, "Wait here, I'll go and pull out that dark fort!"

Zhang Lei stopped him, "It's better for me to go."

"It's alright." Ji Feng smiled and quietly stalked over.

"Boom!" The sound.

An explosion came from the trees ahead, not long after, Ji Feng quickly came back and made a hand gesture, "Forward!"

Zhang Lei had seen a lot of things, he didn't expect a dark fortress to be pulled down so easily, which made him a little stunned, and at the same time he realised that this wasn't quite the same as the operations he was usually involved in.

The others in the battle group were also a bit surprised, they also did not expect Ji Feng to pull out a hidden fort so easily, even Lu Gang and the others, who came from a special forces background, could not help but be astonished.

It was obvious that this was one of the more concealed ones, in case someone logged in from this side of the beach.

The grenades they carried were provided by the military and were so powerful that a normal steel and concrete structure could not be damaged. The grenades were provided by the military and were so powerful that an ordinary reinforced concrete fortress might not be damaged, but it was impossible for the people inside to survive!

In this area alone, Ji Feng found five hidden forts, which were arranged in a cross pattern and could completely monitor all the corners of this beach.

I'm afraid that these Vietcong brats didn't expect anyone to come over, or perhaps the violent explosion on the other side of the island had attracted their attention, so that they didn't guard this side with all their might.

But what was beyond doubt was that with his perspective eyes turned on, it was easy for Ji Feng to avoid these dark forts in advance.

Just like that, along the way, Ji Feng pulled out all the dark forts one after another, and the war party arrived at the middle area of the island very smoothly, where the low buildings were already clearly visible.

Ji Feng did not rush to attack, because he found that the battle over there had also approached the middle area. The characteristic poofing sound of the laser guns and the dazzling beams of light flying in the air indicated that it was the special combat brigade and the pioneer battalion that were already closing in fast.

Ji Feng signalled to the Special Operations Brigade and the Pioneer Battalion in time, and the two sides finally converged.

“How did you guys get here so fast?” Xiang Yongzhan was a little surprised, not expecting Ji Feng to arrive at the middle area even before them.

“Thanks to you guys, you drew all the troops over, there’s not much defence over here.” Ji Feng said.

“Hey!”

Xiang Yongzhan grinned, “It’s been so many years, these Vietcong’s tactics are still so rubbish, now that the whole world knows about Tai Zu’s sound and fury tactics, these Vietcong are actually still so careless!”

Tan Yong, the battalion commander of the vanguard battalion, said, “Captain Xiang, what’s the next move?”

Xiang Yongzhan said, “Take control of the missile launchers first and bring down the core area, the rest of them are not enough to worry about!”

“Good!”

Next, when the three forces were combined into one, the combat power surged.

The Special Operations Brigade and the Pioneer Battalion were really armed to the teeth, with the most advanced night vision devices, the sharpest weapons, and even perfect battle plans as well as superb combat literacy, causing the fierce resistance from the Vietnamese soldiers to not last long at all, before quickly disintegrating.

In particular, the special operations brigade charged forward as if their lives depended on it, and they were scattered, with some soldiers going straight to the interior of the building. The result of this was that two of them accidentally spotted the Vietcong soldiers who were planting bombs, and they immediately launched a surprise attack, relying on the power of their laser guns to quickly finish off the enemy, so that the entire core area of the main building was not damaged.

More importantly, they saved the missile launchers and the entire island’s defence system!

At this point in the battle, Island One had been defeated.

There was no longer any suspense about the next battle.

But Zhang Lei and the battle group still volunteered to continue to take part in the battle, because they had all learnt a lot in this skirmish. Zhang Lei, in particular, had learnt a lot of combat knowledge and skills that he had never even thought of before.

This night was destined to be an uneventful one.

The deafening explosions on Island No. 1 and the sky-rushing flames had caught the attention of many countries that were watching the situation in the South China Sea region.

In particular, Rice, which is monitoring the southern waters 24 hours a day, was the first to discover the unusual situation on Island No. 1 from its satellite and immediately informed Vietnam.

At this time, Vietnam had also received a call for help from the troops trapped on Island No. 1, and hastily ordered several islands with troops in the vicinity of Island No. 1 to immediately dispatch their troops to support Island No. 1.

But by this time, the missiles on Island One had already been launched, targeting the nearby islands.

The missiles were aimed at the docks of those islands!

There weren't many missiles on Island One, so it was obviously unrealistic to launch a full and indiscriminate strike on the nearby islands, so it was only logical that the docks would be the main target!

The most important thing was to defend Island No. 1, and that was the key.

The modern warfare is no longer like the old days of fierce fighting, thousands of miles away, a button can be pressed and the missile can come directly to the No. 1 island.

So, holding No.1 Island has now become a top priority!

Campus Master Chapter 3074

This night in the southern seas was spent in the midst of battle!

The taking of Island No. 1 was to be expected.

Don't look at the fact that the Vietcong had been operating on Island No. 1 and the nearby island group for so many years and had built so many fortifications, but in reality, the Chinese military had already known clearly about the deployment of troops on it, as well as the situation on the island.

It was not that they didn't dare to move him, but they had to consider the timing and the relationship between various aspects.

Now that they have moved, it is only natural that they will be able to capture him by hand.

But taking down Island No. 1 did not mean the end, on the contrary, it was just the beginning.

When the news of the capture of Island No. 1 was sent back, the entire Southern Sea Fleet was like a precision instrument, telling it to run.

The first thing to consider was to prevent the Vietcong from sending out warships or directly bombarding Island No. 1 with missiles.

Therefore, the fleet, which had already prepared for this, immediately deployed several warships that were positioned in the southern waters to confront the Vietcong warships, and strengthened the air defence force around Island No. 1.

At the same time, in the border area with Vietnam, the Chinese army was deployed, with Ji Zhenping as the pre-war commander-in-chief, commanding the army to quickly cut through and round, using the fastest speed to encircle the Vietnamese soldiers confronting China.

According to Ji Zhenping's words, the Vietcong troops must be dumpling, to let the Vietcong know that these troops on the front line are like meat at the mouth of China, they can eat it whenever they want!

The strength of China's land forces had already been proven in various battles, and even when facing the Vietcong army, which was secretly supported by weapons from countries like Rice and Kepong, there was not the slightest fear.

When news of Island No. 1 being taken down spread, the world's attention was drawn to it.

The Philippines was the first to jump out and accuse China of arbitrary use of force, which was aggression.

However, China produced evidence that Island No. 1 belonged to Chinese waters, and at this point, China's insistence on not giving up its sovereignty over the occupied islands came to the fore.

And most importantly, the response from China was maddening.

—According to the response, Island No. 1 was taken down because the Vietcong had angered the Chinese people by repeatedly and unprovokedly attacking Chinese fishermen and refusing to admit their wrongdoing, hence the organisation of the battle to reclaim it.

To put it bluntly, it means that the Vietcong have gone too far, provoking China time and again and bullying its fishermen, and as a result, the people of China are extremely angry, so they have organised this battle.

And the key to this is that China does not recognise that this is an official war, but that it was organised by the people themselves!

The one who started it was the Tengfei Group!

The Chinese army did not take action and remained extremely restrained, even advising the Vietnamese army to retreat immediately!

This response really made the Vietnamese angry and left the Philippines and other countries speechless.

A civilian-initiated war?

Without official support, even if there were people with ten guts, how would they dare to start a war against the regular army? And against another country's regular army?

Besides, hadn't China always banned private ownership of weapons and guns? Since it was organised by the people, where did they get the weapons?

Everyone knows that this claim is simply a front!

This made the outside world, especially some of the major Western countries, start to take it seriously.

Some foreign media analysed that this could well be the ancient nation of the East, which has awakened, beginning to show his power to the world, also because external pressure has been mounting in recent years, and that China is going to show off its muscles on this issue!

However, according to the information gathered from various sources and the intelligence gathered, it is clear that China does not intend to fight a large-scale war, which is why the excuse that it is a war organised by the people was given.

But whoever really thought that China was not going to participate in the war and just let the people go to war would really be a fool.

The Vietcong, however, did not care about this at this time, and it was absolutely intolerable that Island No. 1 was taken down.

It was almost immeasurable how much good there was in capturing an island, and the most important thing was that Island No. 1 was close to China and was so large that capturing it could strike the Chinese mainland at any time, and that was what was most important strategically.

Therefore, after Island No. 1 was knocked down, the Vietcong was greatly annoyed and the fleet placed in the southern waters immediately pressed up as a whole, and while fighting a war of words with China in the diplomatic field, the fleet immediately began to launch an attack on Island No. 1.

It was clear that the Vietcong was determined to take back Island No. 1.

Although they had been prepared for this, as the Vietnamese fleet started to counterattack, using air force and missiles, and even submarines, Ji Feng and the others on Island No. 1 immediately had a hard time.

Despite the interception by the Chinese fleet, any missile interception system is definitely not 100% successful, so as the Vietnamese army launched a frantic attack, Island No. 1 endured a fierce bombardment.

Without having been in battle, one would never be able to appreciate how powerful the missiles really were, the feeling of the ground shaking as if a tsunami had occurred in the sea.

The whole island was in flames!

However, Ji Feng and the others were extraordinarily fortunate that the Vietcong had really taken Island No. 1 as theirs, so during the decades of occupying Island No. 1, they had built a large number of military fortifications, including underground air raid shelters and even deep underground caves to prevent nuclear strikes!

As for the weapons and equipment on the island that was even more complete, these were all the ones that the Vietcong soldiers did not have time to destroy when they took down Island No. 1.

This gave Ji Feng and the others a chance to breathe, at least, the conventional missiles bombarding the island outside did not pose much threat to them.

However, the days of hiding in the underground fortifications and not daring to venture out were not very pleasant, even if they were deep underground, they could still feel the vibration of the missile bombardment outside.

However, what Ji Feng and the others were more concerned about was the situation outside.

“The Vietcong are obviously frantic! It seems that the situation will soon be clear, whether to fight or talk should be seen in just these few days!”

Xiang Yongzhan said with a blade of grass in his mouth, half lying on a seat.

The fight outside was fierce, but here they were instead idle, except for the time when someone outside was at the control centre, monitoring the situation all over the island, they were hiding here, it was not a matter of being brave or not, the advantage of individual bravery in modern warfare was already minimal, unless it was a short fight between land forces.

But now that the Vietcong were bombarding Island No. 1 non-stop, there was naturally no need for them to go out, in case a missile hit them, they would only be getting killed for nothing.

Tan Yong said in a deep voice, “It’s fine for the Vietnamese to bombard Island No. 1. The island is so big anyway, it can’t be sunk. I just don’t know how the two sides’ fleets are fighting with each other!”

Xiang Yongzhan said, “I just received news from the command this morning, the fleets of both sides are not actually in a short state, and the two sides are not officially at war, the Vietcong are firing missiles and our fleet is intercepting them.”

Tan Yong asked, “So the Navy is just watching us being passive and beaten?”

“Of course not!”

Xiang Yongzhan said, “Our fleet is returning the favor and is bombarding the islands to the west, and the Vietcong can only get tired of dealing with it.”

Ji Feng laughed, “So, the southwest side is fighting well! Otherwise the Vietcong wouldn’t be firing missiles so constantly like crazy!”

“That’s right!”

Tan Yong and Xiang Yongzhan both couldn’t help but nod their heads.

After this small-scale battle had started, they, as the vanguard troops, had been in close contact with the command, so they were very clear about the whole battle situation.

The Army went out to the southwest, and at the same time as they did it on their side, they used fully mechanised troops to quickly cut through and round up the entire northern army on the Vietnamese border, while a large amount of supplies that had been prepared long ago were continuously transported to the front, so it could be said that the entire southwest army was strong and ready to eat up the Vietnamese northern army at any time.

And at the same time as the Vietcong began bombarding Island No. 1, the Southwest Army of the Chinese Army began its attack.

At sea, both sides were trying to exercise as much restraint as possible, not to have a large-scale naval battle, otherwise it could really turn into an all-out war between the two countries. So the two navies were evenly matched, with the Vietcong bombarding Island One and the Chinese fleet bombarding the other islands still occupied by the Vietcong, and each side intercepting the other's missiles.

On land, the Chinese Army, with its great mobility and combat power, especially equipped with the new weapon, the laser gun, even if not all of them were equipped, was already in a completely overwhelming advantage over the Viet Minh's Southwestern Army just by the firepower of a single sharp company.

It was a choice between the Northern Army and No.1 Island!

This was a choice that China gave to the Vietcong, but the answer was undoubtedly painful!

Vietnam's land forces are not weak, but, in order to put pressure on China, Vietnam has sent out almost half of its entire Northern Army.

If the Northern Army is now eaten up, then Vietnam's northern defence force is simply as pathetic as a piece of window paper that will break at the flick of a bucket.

Then next, the Chinese Army could definitely recreate the glory of that counter-attack war decades ago – and go straight to the capital of Vietnam!

And, it could definitely sweep all the way across!

So this choice was a tough one.

Ji Feng and the others could tell from the madness of the Vietcong's missile firing that the battle between the two sides' land forces was about to come to a head at this point, I'm afraid.

Obviously, the Vietnamese army was in danger of becoming a piece of meat on the chopping block of the Chinese army, which could be sliced and diced any way it wanted!

So, I am afraid that the Vietcong will have to find a way to recover their position on Island No. 1 and then talk about it.

But I'm afraid the Vietcong can't imagine in any case that their previous decades of operation on Island No. 1 have been cheapened by Ji Feng and others, and although it's not easy to be bombarded by missiles, it's not enough to kill them.

For the Vietcong to take down Island No. 1, they would still have to send in a landing party, but then, it wouldn't be such a game!

Campus Master Chapter 3075

For three full days, Island No. 1 was subjected to missile bombardment!

This allowed Ji Feng and the others to see the madness of the Vietcong, and at the same time, they also gained a lot of information from it. Even without contacting the top, just from this crazy action of the Vietnamese, they could tell that the Vietcong was desperate!

Obviously, the Vietcong's northern army can't hold out any longer and may be eaten by the Southwest Chinese Army at any moment!

You know, this missile is not an artillery piece that can just be fired. Every missile that is fired is money. Back when Rice was fighting some Middle Eastern country, it was said that each missile cost around a million, and not even in Chinese currency, let alone for Vietnam, a country that had to rely almost entirely on imports for its weapons?

The money spent on three consecutive days of bombardment was, I'm afraid, close to being able to arm a mechanised division, which was definitely not a small amount for the Vietcong.

Moreover, even with missiles there was no continuous bombardment after another. This was still using the Chinese fleet to intercept the Vietcong's missiles, and if they weren't intercepted, you can imagine how many missiles would have landed on Island One.

"The Vietcong can't hold out any longer, this is the final madness!" Xiang Yongzhan said with a cold smile, "I'm afraid it's up to us next!"

"If the missile bombardment doesn't work, the Vietcong will definitely send people to secretly land on Island One, so we have to be careful." Tan Yong nodded and said.

Ji Feng asked, "Is all the surveillance on the whole island still functioning normally now?"

Tan Yong looked at Xiang Yongzhan, among the troops on the island, the only ones who could play around with those complicated equipment were those special soldiers from the Special Warfare Brigade, so the island's surveillance and firing systems and so on were being handled by the Special Warfare Brigade.

Xiang Yongzhan nodded and said, "Basically it's all functioning normally, but the missile bombardment has destroyed quite a few places, so there are still gaps."

Tan Yong immediately said; "Then one has to be careful."

Xiang Yongzhan pondered for a moment and said, "From tonight onwards, we can't continue to hide in this hole in the ground, seeing how crazy the Vietcong are, I'm afraid it's about time tonight, unless they want to lose their entire fleet, I guess they'll sneak in for a landing tonight in 8`9 cases out of 10."

"Should we do a division then?" Tanyon asked.

"Of course!"

Xiang Yongzhan nodded and said, "According to the fortifications built by the Vietcong on the island, there are three places where it would be best to land.

Tan Yong immediately nodded and said, "No problem."

The first thing is that the eastern side of the island is a cliff, it's not impossible to land from here, but it's too difficult, it's only a precautionary place, not focused on the deployment of troops, so you still have to work hard to go around this side!"

Ji Feng smiled and nodded: "OK, no problem! I'm just here to learn this time, I have no other ideas!"

Ji Feng was still very measured about the battle team, he knew that although the battle team were all ex-soldiers by birth, he and Zhang Lei were both rookies to this kind of warfare and both needed to learn properly.

"Well then, since none of them have any opinions, let's settle it!" Xiang Yongzhan said, "Now let's take some time to rest for a while, once the missile bombardment stops, I'm afraid that's when the fierce battle will come."

Ji Feng frowned and asked, "But what if the Vietcong is deceptively bombing?"

The Vietnamese are not stupid, this kind of conventional tactics everyone knows, once the missile bombardment stops, definitely will send troops to land. So what if the Vietcong made a time difference?

For example, the missiles are now directly positioned, and the Vietcong know where the missiles will hit Island One, the high precision of which will make the error within a small margin.

If the Vietcong wanted to land from the west side of Island No. 1, then they would deliberately bombard the south side, in which case it would still be very deceptive!

This side was still foolishly waiting for the bombardment to stop, but in fact they had already sent troops to land, and it would be too late if they didn't know until they had hit the island!

Xiang Yongzhan laughed: "Do you think I'm just a special operations brigade that eats rice? I guessed that the Vietnamese would definitely take a sneak attack, so I had already made the arrangements and was waiting for them to come over."

Ji Feng asked with a smile, "Then if the Vietcong are really just stupid and they don't adopt this deceptive tactic, but instead, like you said, wait for them to launch an attack as soon as the bombardment stops, then your arrangement is not a waste of troops?"

"All these scenarios have been taken into account!"

Xiang Yongzhan said, "Older brother, do you know what our biggest advantage is now? It's the terrain of this island! There are only a few places on this island that are suitable for landing, so as long as we hold it, then we can respond to every change with no change! Even if the Vietcong conduct an airborne attack on Island No. 1, I'm not afraid! Besides, even if I still have any oversight, there will still be you when the time comes!"

Ji Feng shook his head at once and smiled, "You shouldn't count on me too much, you're still the one to make the arrangements when it comes to fighting battles!"

Xiang Yongzhan laughed, "I've already made the arrangements!"

"That's good!"

Ji Feng nodded and smiled, he was still at ease with Xiang Yongzhan coming to command, after all, Xiang Yongzhan was not a rookie, he had participated in the war not once or twice, both his experience and ability were first class.

But in fact, Xiang Yongzhan was very surprised by Ji Feng's performance.

A person who had not really been in battle, yet he was able to think of several possibilities and analyse them in a sensible manner, which was simply like the performance of only a veteran who was used to fighting in wars.

Originally, it would be fine if Ji Feng had performed quite well in all other aspects, but Xiang Yongzhan didn't expect him to be so thorough in this regard.

"This guy, he's really something of a blow!" Xiang Yongzhan couldn't help but mutter.

As it turned out, Ji Feng's fears were correct.

The Vietnamese really didn't follow the routine, and while it was not yet nightfall, there were clearly a lot more missiles landing on Island No. 1, with one landing on the island almost every ten to twenty minutes.

At the same time, the fighters who had been monitoring the whole island spotted traces of the enemy.

The Vietcong, from the southwest corner of the island, had secretly landed.

Ji Feng and the others glanced at each other, and Xiang Yongzhan sneered, "The Vietcong really know how to pick places, this happens to be the weak point of the entire island's defence, and also the place that has suffered the most intensive missile bombardment."

Tan Yong said, "This shows that the Vietcong had prepared for this. I'm afraid they had already made this battle plan as soon as Island No. 1 was lost. If the Southwest Army hadn't dumped the Vietcong's northern army, I'm afraid the Vietcong's strategic objective would have been achieved."

Xiang Yongzhan nodded and said, "The Vietnamese are not idiots either!"

Ji Feng smiled, if the Vietnamese were idiots, then they wouldn't have fought against China for so many years and still managed to get strong support from countries like Rice.

On the contrary, in fact, since the last war, the Vietcong had been learning China's tactics and strategic thinking over the past few decades, and the army's combat strength was not all dregs, in fact, the Vietcong army was still very capable of fighting, at least in terms of equipment alone, China's southern sea fleet was no match for the Vietcong's fleet.

"Without further ado, let's get moving! Let's each do our own job, keep in touch at all times and set off!" With a wave of Xiang Yongzhan's hand, everyone fishtailed out of the air-raid shelter and ran to their destinations.

When they had taken down island number one, they had already looked around the whole island, and most of the soldiers were already familiar with the terrain of the island, and had memorised it in their minds.

So when the order was given this time, everyone moved quickly.

After separating from Xiang Yongzhan and Tan Yong, Ji Feng led his team to the east. Although the east side of Island No. 1 was a cliff, it wasn't completely impossible to land here, and if special forces were coming, they could really be caught off guard by landing from here!

Zhang Lei looked grave, through this war, he had realised his own shortcomings, so he had been in a learning mindset and did not dare to be careless in the slightest.

The Vietnamese had similarly built fortifications along the cliffs to the east, and upon arrival, Ji Feng immediately excluded three men from stepping out of the fortifications to the cliffs and taking charge of concealed reconnaissance.

"Boom boom!"

At this time, there were explosions in the distance as well as, apparently the special battle brigade or the pioneer battalion had already engaged the Vietcong.

"Lei Zi, you are responsible for leading the men to guard here, I will take a few men around!" Ji Feng said, they had no movement here for the time being, Ji Feng intended to take a look at other parts of the island.

"You have to be careful." Zhang Lei said.

"Don't worry!" Ji Feng patted his shoulder, turned around and left with Bai Zhu and the two battle team members.

The battle was fought in the southwest, while Ji Feng was angling from the east towards the northwest, not only did he have to patrol, but he also had to see if all the surveillance along the way was still working.

"Young Ji!"

Suddenly, Bai Zhu, who was walking at the front, jerked to a halt and turned back to gesture repeatedly.

Ji Feng looked aghast and instantly understood that there was someone in front of him!

He immediately quietly went forward and came to Bai Zhu's side, and saw Bai Zhu pointing towards the front, where there was a burned wood, but it hadn't finished burning, there were still some charcoal trunks, and the ground was even pitted, the original jungle had been blasted into a hilly terrain by the missile.

At this time, Ji Feng and his team were lying behind a mound of earth. When Ji Feng looked out, he immediately saw that in the distant woods, there were shadows of people shifting, and there seemed to be quite a few of them in the shadows.

These people were also wearing camouflage uniforms and carrying a large number of weapons, but they were definitely not Chinese, which could be seen at a glance.

The Vietnamese!

They had really sneaked up!

Campus Master Chapter 3076

“Young Ji, should we ask for backup?”

Behind the mound of earth, Bai Zhu lowered his voice to an extremely low level.

Ji Feng waved his hand, he intended to see the situation first. As his eyes swept over just now, he roughly estimated that there were about thirty to forty Vietcong in the woods, but this was obviously not all of them, moreover, he was curious about where the Vietcong had come up from.

The Vietcong in the woods did not seem to be in a hurry to move, but were on alert and defended in place. Ji Feng guessed that they should be biding their time, or waiting for the follow up troops to come up.

And sure enough!

A few moments later, another group of people came up behind them, probably 30 to 40 people as well.

Ji Feng was surprised, where did these people come out from?

Many books in the jungle had been burnt, although it affected the vision, but if you look carefully you can see it, especially since Ji Feng had binoculars and could look all the way to the sea, but he didn't see any landing craft or anything like that on the beach, nor were there any signs of people moving around!

Did the Vietnamese just appear out of thin air?

“Bai Zhu, send a signal to Lao Xiang and tell him to send someone over immediately!” Ji Feng said in a low voice.

“Yes!”

Bai Zhu nodded and immediately sent a signal to Xiang Yongzhan.

Ji Feng immediately asked the two battle group members to carry the laser cannon, and then watched the moves of those Vietcong through the binoculars. He found that after the two groups of Vietcong had converged, they still hadn't moved much, and were still waiting while arming themselves.

“It seems that these are not all, this gang has follow-up reinforcements!” Ji Feng was really curious this time, if there were still reinforcements then the count would be more than a hundred people, there might even be more.

If so many people had landed on Island One, how could the island's surveillance not have detected it? Besides, he was right here, and the binoculars swept over the beach from time to time, and there was no sign of anyone landing!

“Airborne soldiers?”

Ji Feng shook his head, it didn't quite look like that, unless anti-gravity floating craft had appeared in this world that could bring troops over without a sound, otherwise there would definitely be movement as long as it was a plane, but he didn't see it at all.

It couldn't have come out of the ground, could it?

Ji Feng froze, and just as this thought flashed through his mind, he suddenly had a thought in his mind that this possibility was really high!

Could there be a secret passage in this jungle?

Right under Ji Feng's nose, two more batches of Vietcong came, there were already more than a hundred of them, but these people hadn't made a move yet, they just started to expand the scope of their deployment.

"There are still people?" Ji Feng frowned, this more than a hundred people is already quite a lot, if we wait any longer, the Vietcong will increase some more, then even if Xiang Yongzhan brings people here that will definitely be a bad battle, there will be a lot of casualties, if more Vietcong come up, then it's really not certain who will lose and who will win!

"Load your weapons, prepare for battle!" Ji Feng said in a low voice, he decided not to wait, if he waited any longer he was afraid that it would be difficult to clean up.

"Young Ji, send a signal to the captain, his side is ready, our side prevails." Bai Zhu suddenly said.

"Good!"

Ji Feng nodded, since Xiang Yongzhan was prepared, there was nothing more to say, let's exterminate a group by surprise first.

He made a hand gesture, "Fire!"

"Swoosh!"

A flash of light flashed and a Vietcong soldier in the jungle was pierced straight through the head and fell headlong to the ground without moving.

"#\$%....."

The death of his comrade alerted the other Vietcong, someone shouted a few bird words in gibberish, and the others immediately got down on the ground and fired towards this side.

Ji Feng and Bai Zhu hid behind the mound of earth and couldn't help but frown, the reaction speed of this group of Vietcong soldiers was so fast? The ones who came could not be special forces, right?

If you think about it, it's really possible. For this kind of attack, it's useless for the general army to come up, because with the Chinese fleet around, it's impossible for the Vietcong to transport too many troops over, and with small numbers, the regular army against the special forces is simply looking for abuse.

"So what if they are special forces, no matter who they are, as long as they dare to come, they will destroy you!" Ji Feng sneered.

"Swoosh, swoosh, swoosh!"

At this time, the sound of laser guns firing was also heard in the distance, apparently it was to Yongzheng's people who also made their move.

At this moment, the pressure on the Vietcong suddenly increased.

When they realised that the weapons used by the Chinese were very powerful, they immediately changed their method of fighting, instead of charging, they spread out and lay down to counterattack.

Moreover, they were in the middle of the jungle, and even if they were surrounded by debris, they could provide cover. The Vietcong's weapons were also obviously very powerful, and they even had small artillery pieces coming at them, so that the special operations brigade was not able to do much for a while, and the two sides were at a standstill for a while.

This further confirmed Ji Feng's judgment that these people were in all probability 90% of the Vietcong's special forces, otherwise, even if the weapons were powerful, it was absolutely impossible for them to carry the laser gun-equipped special battle brigade for such a long time.

"Still coming?"

Ji Feng found that the two sides were in the middle of a fierce battle, but there was actually another batch on the Vietcong's side, how many people had they come?

"Boss!" The two team members who went to carry the laser cannon came back, carrying a box all the way here at a gallop.

"Good! I'll see how many more you can have this time!"

Ji Feng immediately started to assemble the laser cannon, he already had a good idea of where the Vietcong were, and after a simple aim, he directly pulled the trigger.

Poof!

That odd sound unique to the firing of a laser cannon rang out, a dazzling ball of light was shot through, and in the next moment, it landed in the middle of the Vietcong.

"BOOM~!"

The light mass exploded.

In just a flash, an immense and incomparable energy instantly swept through that area, enveloping most of the Yue people, and those Yue people didn't even have the time to let out a scream before they were just swallowed up by the terrifying energy!

All those who saw this scene felt a bright light in front of their eyes, blinding them, and when the light passed and their eyes adjusted, what they saw was a scene that left them dumbfounded.

In the area where the Yue people were spread out, there was a huge deep pit, as if a sinkhole had appeared out of thin air, and the Yue people in that area had disappeared without a trace, not even a single crumb remained.

The only people who were still around the sinkhole were some Vietcong soldiers, but at this moment they were stunned to see this scene.

This was beyond their imagination!

Not to mention them, even the soldiers of the Special Operations Brigade were stunned, and even Xiang Yongzhan, who had long known that the laser cannon was extremely powerful, could not help but swallow hard when he saw this scene.

This cannon fortunately hit the head of the Vietcong, if it was the Vietcong who hit them

Xiang Yongzhan couldn't help but be cold through the body and didn't dare to think about it anymore.

“Swoosh!”

Xiang Yongzhan was the first to react and immediately fired towards some of the remaining Vietcong soldiers while shouting, “Wipe them all out!”

The battle that followed was no longer in doubt, most of those Vietcong who were almost scared silly had already been taken out before they could react, and the only few that had slipped through the net were also taken out in the ensuing siege, with only seven or eight captives eventually captured.

“Pervert!”

As the battle ended, Xiang Yongzhan came to look at the sinkhole that had been beaten out alive by the laser cannon and could not help but curse, this thing was really too perverted, just one shot had created such a horrible scene.

And Xiang Yongzhan knew that this wasn't the full extent of the laser cannon's power, he had watched the video of the previous test, one cannon taking out a target ship, that was the shock!

But after this cannon shot, Ji Feng and his team had a windfall, they really found an underground passage not far from that day pit, after probing they realised that this underground passage could actually lead directly to the sea, this end could lead to the control room, Xiang Yongzhan and his team found the enemy landing craft on the sea, launched an attack by surprise and captured the landing craft.

But this discovery still made Xiang Yongzhan break out in a cold sweat, there was still an underground passage under the island, fortunately, because of the missile bombing, the passage broke off halfway, although it did not collapse, but could not pass people, otherwise, if so many Vietcong entered the control room through the secret passage, and then used the island's defence system to launch a sudden attack, then their side would definitely be heavily damaged!

“The Vietcong had actually prepared for this and had secretly built such a passage!” Xiang Yongzhan couldn't help but feel a bit scared afterwards.

“It's also my fault for not carefully probing the control room, otherwise I might have been able to discover this underground passage.” Ji Feng said.

“It's not your fault!”

Xiang Yongzhan shook his head, Ji Feng's people weren't involved in the key defence up, it was his own carelessness.

Ji Feng smiled, changed the subject and asked, “What's the situation in the southwest?”

“It’s still being fought, it’s now certain that that side is feinting, Tan Yong can handle it!” Xiang Yongzhan said.

The situation was now clear, the Viet Cong to the southwest of the island were in fact feinting, they were trying to cover this group of troops coming through the tunnels.

But even though it was a feint, to make a full appearance, the attack was still very strong, so Xiang Yongzhan didn’t stay over here for too long before immediately throwing himself back into the battle in the southwest.

As for Ji Feng, in order to train the battle group, he simply let Xiang Yongzhan send someone over to take over the battle group’s side of the defence line, while he took the battle group directly to the first line in the southwest and directly participated in the battle.

Since the sneak attack troops were unsuccessful, it was naturally impossible for the Vietcong in the southwest of Island No. 1 to break through the defensive line, and instead they were beaten back by the attacks of the special battle brigade and the pioneer battalion.

However, there was practically no way for them to retreat, as the Pioneer Battalion had blocked their way back with artillery, so they could only go forward with their heads held high.

When two laser cannon shots were fired, the battle was declared over, leaving only a scattering of missed fish, which Zhang Lei led his battle group to round up.

The battle went on for about an hour or so before it was all over.

This stop resulted in the capture of over twenty Vietcong, but most importantly, Vietcong’s attempt to take advantage of the chaos to capture Island No. 1 was broken.

Campus Master Chapter 3077

The battle on Island One was fierce and brief. However, it played a crucial role in this game of wrestling between China and the Vietcong!

The Vietcong’s attempt to retake Island No. 1 through a tunnel attack came to an end when the Vietcong’s special forces were completely wiped out by Ji Feng and the others, and even the landing craft were captured.

I am afraid the Vietcong never dreamed that this perfect sneak attack would end up like this.

But what they didn’t expect was that the failure of the raid would doom the Vietcong to bow down and submit to defeat in this game.

Ji Feng and the others were right in guessing that the Vietcong had indeed wanted to take advantage of the opportunity to retake Island No. 1 and then take the initiative in the negotiations with China, or at the very least, to salvage the vicious incident in which the northern army would be dumping.

But as a result, not only were the troops that attacked Island No. 1 completely wiped out, but the front-line troops of the Viet Cong were also dumped in the battle with the Chinese army on the border with China, and were forced to surrender under the powerful offensive of the Chinese military.

The impact of this result was earth-shattering!

Since the opening of the war between the two sides, the eyes of the world have been focused on it. The Vietnamese side is quite powerful in terms of force, especially the navy, not only does the Kepong navy roam the sea, but even the Rice fleet has been deployed, putting great pressure on the Chinese navy, otherwise, the Chinese navy would definitely not have let so many missiles fall on Island No. 1, even if they did not attack with all their might.

The Vietnamese navy was quite strong in its own right.

Under such circumstances, anyone would have thought that there would definitely be a vicious battle, or even a protracted tug-of-war, between Vietnam and China.

This is what Kepong and the West would like to see the most, because in this way, not only can they drag China into the quagmire of war, but they can also seriously deplete China's strength, so that its focus will have to shift from economic construction to the war with Vietnam.

Therefore, both countries such as Kepong and Rice are helping Vietnam as much as possible.

However –

No one would have expected that the war would end so quickly!

No one would have predicted that the Chinese army would be so strong, even though it had already been fully estimated at the beginning of the war.

The strength of the Chinese army was too great!

When the news of the battle came out, the whole international community was shocked!

Including, Kepong and Rice!

In just three days, the Chinese Army had completed the siege of the North Vietnamese Army and forced the North to surrender!

The strong combat power displayed by the Chinese Army in this battle was truly astonishing to countless people.

Even all countries, including Rice, were intrigued by the details of the battle, and even puzzled over it.

How was this possible!

So many troops, even if they were rabble-rousers, and so many people with so many advanced weapons, they could not be taken down so easily!

Unless, of course, it was Chinese planes and artillery and missiles all together, which was a possibility.

But according to accurate intelligence and feedback from observers, the Chinese army did not use missiles at all, but did have aircraft, and engaged in a short air battle with the Vietcong, only that the Vietcong was far inferior to China in terms of air power, and was no match at all.

But was this the main reason for the defeat of the northern Vietnamese army?

Countless military observers and experts are analysing the reasons why China won so quickly, but for many countries, the result was that China won anyway.

This is not good news!

China is holding a large number of prisoners from the Northern Army, and at the same time, Island No. 1 is still occupied by the Chinese – although China has so far insisted that Island No. 1 was only reclaimed by civilians on their own initiative, but the devil doesn't believe it.

Of course, the Vietcong is unhappy with the word 'recapture', but a war of words will not solve anything, and no matter what is said, it will not hide the fact that the Vietcong has failed!

Whether the Vietcong wants to admit it or not, there is no way to ignore the fact that they have lost!

It was no longer a question of taking back Island One, but how to get the captured northern troops back from China.

The war, it couldn't go on, so there was only one way out – talk!

When Ji Feng boarded the troop carrier and sailed back from Island No. 1, he also heard about the fact that the two sides had ceased fire. Although the Vietcong still refused to back down, it was an indisputable fact that they did not continue to attack.

It wasn't that they didn't want to attack, but they simply didn't have the avenues to do so!

The only way to take Island One by surprise had been blocked, and this was obvious when the special forces attacking Island One only came back with news of an ambush and then no more words.

If you can't attack, you have to sit down and negotiate.

Even if one is reluctant, one can only hold one's nose and admit it. Unless, of course, the Vietcong was ready to fight a war with China. But it was obvious that Vietnam was not ready to do so, so it could only negotiate.

Along with Ji Feng, there were half of the battle team members who had returned.

Zhang Lei did not come back, this guy was stimulated in this war, he fully realised his inadequacy in only fighting, so he insisted on staying to continue his studies.

Ji Feng also did not force him, moreover, he stayed to be able to represent the Tengfei Group, which could also make the state's excuse more reasonable, after all, the state externally claimed that Island No. 1 was recovered by the civilians.

The situation is now clear, but as long as the negotiations are not finalized, the defense of Island No. 1 will be cautious.

The fact that Ji Feng was transferred back was an order from the top brass of the military, and I heard that it was also an order from the chief minister himself, Xiang Jiefang.

So Ji Feng took a troop carrier to a seaplane and was directly picked up and flown to a base in the southern waters, then transferred to a plane to fly straight to Jiangzhou.

Only when he arrived in Jiangzhou did Ji Feng realise that the military wanted him to continue to work with the military experts on matters relating to the transfer of the laser cannon to other equipment. For example, the transfer of laser cannons and laser guns to aircraft, to warships and so on.

This was definitely a complex project, and for Ji Feng, he was not particularly proficient in modern weapons technology, so after much consideration, Ji Feng decided to share the laser gun and laser cannon technology with the military.

His condition was that at least 1,000 soldiers who had been discharged from the regular field army, and who were able to follow his orders and be stationed on island number one for a long time!

At the same time, the state will assist him with two airfields on Island One, one for military use and one for civilian use!

In addition, the state would have to help with the facilities and equipment needed on Island No. 1 and other things!

The military agreed to his request without any hesitation, because the country would definitely make a profit by exchanging these things for the technology of laser guns and laser cannons!

The military agreed crisply, and Ji Feng was even more crisp. On the day the agreement was reached, he handed over the detailed information about the laser guns and laser cannons to the military, the weapons were already ready-made, how to transfer them to other equipment, that was not something he needed to worry about, and he didn't want to worry about it, anyway, the military had plenty of experts.

For these equipment, Ji Feng also does not have much eye for them, as long as the No. 1 island arrives, he can't see these equipment!

For the next period of time, Ji Feng spent the vast majority of his time in his study.

The next step was to take out a lot of technology that could not be taken out, but could now be taken out.

So, he had to plan properly, and at the same time take out some of the technology.

But apart from studying these, the rest of Ji Feng's time was spent discussing with Xiao Yuxuan and Tong Lei about relocating to Island No. 1.

Especially for the Tengfei Group, Ji Feng intended to relocate the headquarters to Island No. 1, with the Jiangzhou side as a direct branch, but the research lab had to be moved!

So during this period of time Xiao Yuxuan was not idle, she was busy integrating the Tengfei Group and doing the handover of all aspects and so on.

Afterwards, Ji Feng took time to visit Rong Peng and explained his plan to him, while telling him not to worry, that everything would be the same on the domestic side and there would not be any problems.

Only after this was done did Ji Feng start to work on the most important task – the operation of Island No. 1.

Ji Feng's gaze was locked on the orphanage. These days, although with the development of technology, the whole earth has become a global village, but Island No. 1 is at the tip of the storm, and I'm afraid that not many people will be willing to drag their families over there, even if the conditions are generous.

However, the orphanage where Wang Xin and Wang Hu come from is different. Those orphans are all fatherless and their greatest wish is to be fed and have books.

This was just as achievable on Island No. 1.

Ji Feng even thought that the future of Island No. 1 lay in the bodies of these children.

Of course, all these were just preparations, and one had to wait for the dust to settle.

A month later, the negotiations between China and Vietnam finally came to an end, with Vietnam compensating China for its losses, both sides signing a friendship agreement, China releasing the captured northern troops, and declaring that the two sides would live in friendship

In short, Vietnam offered a large sum of money and other compensation to redeem the captured Northern Army, but neither side mentioned anything about Island No. 1, as if they had forgotten about the place.

But everyone knows that both sides are actually holding their breath, and if the opportunity arises, or if the time is ripe, the Vietcong will definitely take back Island No. 1, while China will definitely hold it as a bridgehead into the Indian and Pacific Oceans.

There is no point in fighting a war of words now, as Island No. 1 is essentially under China's control, and the Vietcong will not make a fool of itself.

At this point, China had completely achieved its strategic objective, completing its ultimate strategy of 'fighting a small-scale war' to take Island No. 1, and Ji Feng, likewise, had become one of the beneficiaries, and next, he would be the master of Island No. 1!

Campus Master Chapter 3078

The agreement between Ji Feng and the military, naturally, could not be announced to the public.

This was because the state's version to the public was a spontaneous organisation of civilians, in response to the constant bullying of Chinese fishermen by the Vietcong, and therefore fought back in anger and took down Island No. 1.

However, this did not affect Ji Feng's plan.

Moreover, he hadn't planned to occupy Island No. 1 in the name of the state, in the private name of the Tengfei Group, which was the most appropriate.

Because, what he was going to do on Island No. 1 was a bit special.

In any case, now that Island No. 1 was in hand, many things that could not be done originally could now be prepared. For example, some of the technology that could not be taken out originally can now be prepared to be taken out, and weapons that could not be made originally must now be made.

Because Ji Feng couldn't let the country help him guard Island No. 1 forever, and the future guarding would definitely still be done by his stomach.

"Yu Xuan, this time you have to make it clear to the staff, the headquarters is definitely going to be relocated to island number one, and the research labs are definitely going to be moved there as well, but island number one is not a desolate island, there is all the infrastructure on it, and there is definitely no need to worry about security

Ji Feng is discussing with Xiao Yuxuan about relocating to Island No. 1, he knows that this relocation, there will certainly be many people disagree, the homeland is difficult to leave well, but the relocation is imperative, it is impossible to stop because some employees do not agree.

Xiao Yuxuan frowned and said, "But after relocating there, living on a small island, many people will definitely not adapt, will this"

Ji Feng laughed: "It seems you don't know much about island number one, in fact it's not accurate to say it's a small island, island number one should be considered a relatively large island in the southern sea, it's definitely not a problem to accommodate several thousand people on it, and there will be two airports on the island, so it's quite convenient for anyone who wants to come back at that time."

Xiao Yuxuan nodded thoughtfully.

Ji Feng laughed, "Actually, to put it bluntly, going to work on island number one is similar to going to other cities, even more convenient than the transportation to other cities, that's a fixed route, and it's not that crowded. It's just that at the beginning, the island won't be as prosperous as in the city."

Xiao Yuxuan pondered for a while and asked, "Then how will the accommodation and eating problems be solved when there are so many people going down there?"

"We don't need to worry about food, are we still afraid of not having any? Isn't Treasure Island also an island, has eating become a problem?"

Ji Feng laughed, "As for the accommodation problem, the conditions may be poor at first, but it won't last too long, we can find a construction company to build houses on the island immediately, it's no problem at all."

Xiao Yuxuan said, "Are they all going to be relocated?"

"One step at a time first!"

Ji Feng said, "For the time being, the headquarters will be moved there first, the R&D centre will be moved there, and as for the rest, take your time."

Xiao Yuxuan nodded and said, "Alright then, I'll go and explain to the staff."

Ji Feng said, "Now it's already possible to find a construction company, the sooner we start construction the better."

However, Ji Feng did not expect that before the Tengfei Group could contact the construction company, He Hongwei took the initiative to come to the door.

“Older brother, the housing on island number one, leave it to me to build it!” Just as he sat down, He Hongwei said with a smile.

“You?”

Ji Feng was quite surprised, “Your company still manages the construction business?”

He Hongwei laughed, “Business is not good these days, so every line of business must have one, so that we can gather less to make more!”

“Bullshit!”

Ji Feng smiled at his words, obviously He Hongwei was not telling the truth.

He Hongwei laughed, “Older brother, it’s settled, right?”

Ji Feng frowned and asked, “Brother Hongwei, tell me the truth, why do you want to take this job? I’ll say it up front, working for me, it’s definitely not okay if the quality isn’t up to par, and it’s definitely not okay if the price is too high!”

It’s true that a lot of housing is needed on Island One, but how much is there at most? If you want to make a lot of money from it, forget it!

This kind of thing, which was not pleasing to the eye, He Hongwei actually wanted to rush to do, which made Ji Feng more or less puzzled.

He Hongwei glanced at Ji Feng and said, “You’re a bit ungenerous, you don’t even remember your brother for such a good thing, and now you’re trolling me!”

Ji Feng frowned, he didn’t understand what He Hongwei meant.

“There’s a construction company under the group, it’s not bad in scale.” He Hongwei said, “So you can rest assured that there is absolutely no problem when it comes to the quality of the construction. But that’s not the point, the point is, this is the first island recovered from foreigners, it’s of great significance to the whole country, got it?!”

Ji Feng suddenly dawned on him, no wonder He Hongwei himself took the initiative to come looking for work!

It turned out that this could still be related to politics!

The first island recovered by the country was of great significance, so the units and individuals involved in the construction must have a positive meaning.

What He Hongwei is looking at is not whether he can make money, but he must be involved in it!

“So that’s how it is then, since your brother Hongwei has asked for it, there’s definitely no problem!” Ji Feng laughed.

“That’s good!” He Hongwei laughed, “Let’s go, let’s have a drink together!”

The relocation of Island No. 1 was already on the agenda, but before that, the infrastructure construction had quietly started.

Tengfei Group, with Han Zhong as the leader, started planning and constructing Island No. 1 with the planning plan that Ji Feng had already prepared, and a large number of projects began to start.

Civil housing was the first to be built, followed by the island's roads, docks, and the submarine cables laid from Qiongbian, all of which were already underway.

Then there are the two airports, which are starting later because the planning and design of the airports take a long time just to be proven.

All these are being done by various construction companies led by the Tian Yao Group, which is controlled by He Hong Wei. If we do a strict calculation, the cost required just to start these projects is an astronomical amount, and the construction cost of just the two airports is calculated in billions.

However, the Tengfei Group did not need to spend too much money, on the one hand because of the military's support, and on the other hand, because although many projects were started, they were not large in scale, and with the Tengfei Group's strong financial resources, they were completely affordable, and even had no impact on the Tengfei Group's capital chain.

The reason is that the Tengfei Group does not have any bank loans at all, at most it only has a few hundred million dollars in friendly loans.

The so-called friendly loans are actually the major banks' own loan tasks every year or even every quarter. Banks do not just collect money, but are able to lend out as much as they can, which is also a kind of ability and even an indicator of assessment.

This is the nature of banks, the less money you have, the more they want you to lend, and the more money you lack, the less they will lend to you.

If you look at the island from the air, you will see that there are construction sites all over the island, and there is a lot of activity going on.

Infrastructure, solar and wind power generation and other energy facilities, as well as military facilities and so on, are all being built in full swing.

Ji Feng took the time to talk to Xiang Yongzhan on the phone and asked about the situation on Island No. 1.

"Don't worry, everything is going well, the surrounding Vietnamese are all like enemies, no more bullying of fishermen has happened recently." Xiang Yongzhan laughed loudly, clearly in a good mood.

"That's good." Ji Feng laughed.

"But there are some minor troubles in other areas." Xiang Yongzhan said, "According to the intelligence received, the laser guns and laser cannons are no longer a secret now, so the Tengfei Group has to hurry up and produce the alloys, and the troops have to finish changing as soon as possible before they can do so."

"Oh?" Ji Feng asked, "You know all about it so quickly?"

"This is still fast? After a war, I don't know how many pairs of eyes are watching, so I'm sure it can't be hidden, and this was already expected beforehand." Xiang Yongzhan said.

With the use of laser guns and laser cannons in the war, those countries with their eyes on the conflict had all received the news, and according to the intelligence, they had all initiated research on this new type of weapon.

Even, this new type of weapon has already appeared in Rice and Kepong.

“I reckon that this should be the work of the dynasty, otherwise Rice and Kepong would definitely not have developed the laser gun so quickly!” Xiang Yongzhan said.

“Their laser guns, are they the same as ours?” Ji Feng asked.

“That’s unknown, whether the intelligence department has gotten accurate information or not, I don’t know, there’s no way, the rank is too low, so many things are not qualified to know.” Xiang Yongzhan said, “But as long as our troops have completed the changeover and updated their weapons, then there’s nothing to worry about.”

After hanging up the phone, Ji Feng couldn’t help but frown.

The kingdom seemed to be pervasive and extremely responsive, and the laser gun had actually been developed?

Ji Feng believed that since Rice already had a finished product, it shouldn’t be the same kind of defective product as before, perhaps Dynasty had made improvements and had really developed a laser gun.

“Where the hell is Dynasty and who the hell is the chief king?” Ji Feng’s heart was filled with doubts.

As time passed, the dispute in the southern sea, as well as the hustle and bustle of the outside world gradually calmed down, except for the No.1 Island which was being built in full swing, Ji Feng was at leisure for a while, except for researching technology and cultivation, surprisingly there was nothing else to do for a while.

But just at this time, Ji Feng got a piece of news that surprised him greatly.

“What? Shao Jie was assassinated? Did he die?” Ji Feng received a call from Ji Shaojun that Shao Jie, who had returned to Yanjing, had suddenly been assassinated!

Campus Master Chapter 3079

“Dead is not dead, but it’s definitely more pleasing for that son of a bitch not to die than to die!” Ji Shaojun laughed happily.

Ji Feng was a bit confused, Ji Shaojun’s words were like a tongue twister, “What’s better than not dying?”

Ji Shaojun laughed, “Lao-san, I’m afraid you can’t imagine where that son of a bitch is hurt!”

Without waiting for Ji Feng to answer, Ji Shaojun continued, “He hurt that thing, haha, I heard from my friends at the First Hospital that the guy’s thing has been removed, he’s become a living eunuch!”

Ji Shaojun’s words were full of pleasure and he couldn’t help laughing over the phone, obviously Shao Jie’s injury made him very painful.

Ji Feng was stunned to hear this news: "When was Shao Jie assassinated? You say it more carefully."

"I just got the news not long ago, I heard that it was at noon, Shao Jie who was eating at a restaurant was suddenly attacked by a gunman, but unfortunately Shao Jie was surrounded by bodyguards, the gunman could only hit Shao Jie a few times in the confusion, but did not have a chance to aim, but in my opinion it was very well aimed, it was better than hitting his head!

I heard that one of the shots hit Shao Jie's thing and the hospital couldn't resuscitate it, so they had to remove it. The operation had already been done when that friend of mine called me, so I'm sure Shao Jie was already a eunuch without a doubt!"

Ji Feng ignored Ji Shaojun's gloating, what he was more interested in was the matter of assassinating Shao Jie itself.

However, if he dared to use a gun to assassinate Shao Jie in Yanjing, the mastermind must have a certain amount of energy and must be someone who had a knot with Shao Jie.

Thinking of this, Ji Feng couldn't help but frown at those who met these conditions, and he was among them.

"Shao Jun, what's the movement on the Wu family's side now?" Ji Feng immediately asked.

"I heard that the Yanjing police have already intervened, but I'm afraid they'll have to work for nothing, the gunman who assassinated Shao Jie was killed on the spot, I'm afraid it's impossible to investigate." Ji Shaojun said gloatingly.

Ji Feng pondered for a moment and said, "Shaojun, keep an eye on this matter and call me in time if there is anything."

"Okay."

Ji Shaojun didn't think that far ahead and agreed readily.

After hanging up the phone, Ji Feng couldn't help but frown, it looked like there was going to be another hustle and bustle next.

However, what Ji Feng didn't expect was that his prophecy came true, and the buzz came so quickly, just under half an hour later, he received a phone call from his younger uncle, Ji Zhenping.

"Little Feng, do you know about the assassination of Shao Jie and Zhai Yadong?" Ji Zhenping asked.

"Zhai Yadong also suffered an assassination?" Ji Feng was surprised when he heard that, "I only knew that Shao Jie was assassinated, or Shao Jun called to tell me, how come Zhai Yadong was also assassinated?"

"You don't know?" Ji Zhenping asked, with some suspicion in his voice.

Ji Feng immediately understood that his younger uncle suspected that he had done it, but it might not be too good to say over the phone, "Younger uncle, I don't know."

Ji Zhenping then understood what Ji Feng meant and said in a deep voice, "At noon today, Shao Jie and Zhai Yadong were stabbed one after another, the people who did it used weapons, at present Shao Jie is still receiving treatment and Zhai Yadong died on the spot."

Zhai Yadong was dead?

This news made Ji Feng even more surprised, since the Wu family had taken over the Brilliant Group, Zhai Yadong had been the flag bearer and the pillar of the Brilliant Group, it was not expected that Zhai Yadong had actually been killed off.

Moreover, he was assassinated at about the same time as Shao Jie, which was definitely not a coincidence.

Ji Feng realised that this seemed to be a conspiracy, targeting the Wu family was beyond doubt, but whether it was targeting others besides the Wu family, it was uncertain.

Now that Young Uncle had called, it was a good example.

Little Uncle was able to associate himself, what about the others?

"Little Uncle, were Shao Jie and Zhai Yadong assassinated together?" Ji Feng asked.

"No, Shao Jie was assassinated in Yanjing, and Zhai Yadong's accident was in a cafe opposite the South Guangdong Brilliant Group building, the same thing is that both of them were assassinated while having lunch, only, Shao Jie was lucky not to die, but Zhai Yadong was killed." Ji Zhenping said.

Ji Feng couldn't help but let out a laugh at his words, "It seems that the person behind this planning still has some energy, actually being able to do it in parallel."

"Alright, since you don't know this news forget it, you pay attention to safety, there are some people with evil intentions now, one has to be on guard." Ji Zhenping reminded implicitly.

Ji Feng nodded, in fact, from the time Ji Zhenping called he felt it, no matter if the person who was behind the plan was targeting him or not, but at least now he was under suspicion, and moreover, his suspicion seemed to be very high.

Having a grudge against the Wu family, having a grudge against Shao Jie, and having the ability to do so, all of these conditions he met perfectly.

However, Ji Feng was not worried.

Not to mention that the assassination was not done by him, even if it was really done by him he was not afraid, not to mention that he was only suspected now.

The Wu family is now long gone from the original Wu family, if not for the fact that the old man of the Wu family is still alive, the Wu family will definitely fall fast, and the factions and families that have been suppressed by the Wu family, as well as those that covet the resources of the Wu family, will definitely spare no effort to tear the Wu family apart.

Therefore, how long the Martial Family will be able to stand depends on how long the old man of the Martial Family can live.

.....

Ji Feng doesn't care, but that doesn't mean others don't think so.

The original place where Shao Jie was assassinated was in Yanjing, which itself is a place where right and wrong are concentrated, so the news spread quickly, while the news of Zhai Yadong's assassination spread relatively slowly.

However, this could not escape the eyes of those with an eye for detail, and only a day later, the news of both spread completely.

The first thing that came to many people's minds was the Ji family and Ji Feng, although there were others who met the criteria, but Ji Feng was definitely not a small suspect.

These strife Ji Feng but not to care, have this time he might as well think about how to break into the fourth stage of cultivation, No. 1 Island construction progress he is also very concerned about, there is the intelligent brain more and more self-aware, Ji Feng has not yet thought about how to deal with.

So who exactly had assassinated Shao Jie and Zhai Yadong, he didn't have that much time to pay attention to.

However, not paying attention did not mean not caring at all, at least, when Ji Feng felt that this could be a conspiracy against himself, he still had something set up.

.....

The first hospital in Yanjing.

He had received a call from the hospital saying that Shao Jie, after coming to his senses and knowing that his thing had been cut off, had gone crazy and struggled desperately in the hospital despite his injuries, and was eventually sedated by the doctor to keep it under control.

But because of his struggle, the wound on his body collapsed and was re-cleaned with anesthetic, making his body even weaker.

Looking at the pale Shao Jie who was sleeping, Wu Zhengxiang who walked out of the ward had a gloomy face to the extreme, his eyes were full of anger, he could not wait to kill the mastermind of Shao Jie's assassination right now.

"Chief, what you asked me to find out has been found out." At this time, a secretary-like person walked over and said in a low voice.

"Go over there and talk."

Wu Zhengxiang waved his hand and led the secretary to an empty ward, asking in a deep voice, "How is the investigation going?"

The secretary said, "Chief, the police side can't go on, they just found out that the identity of the killer is not Chinese, and that he was smuggled in from outside the country, the killer didn't carry anything on his body, the passports on him were all fake, and a poison tooth was found in the killer's mouth, which should be used by the killer to commit suicide after he failed."

“Dead soldiers!”

Wu Zhengxiang gritted his teeth and said in a deep voice.

The secretary nodded and said, “That’s what the police said, saying that it’s hard to find out where people like this come from.”

“Difficult? Difficult enough to not investigate?” Wu Zhengxiang’s voice was full of anger.

The secretary did not dare to answer, he knew that Wu Zhengxiang must be furious at the moment, his only son, Shao Jie, had been bruised in the lower body and forced to have it removed, which was tantamount to breaking the roots of his lineage.

This is understandable anger for the Chinese, who practice tradition and heirarchy.

“I will urge the police to solve the case as soon as possible!” The secretary hurriedly said.

Wu Zhengxiang also knew that it was actually difficult to investigate such matters, he just had no place to vent his anger, “Have you checked over there?”

The secretary immediately lowered his voice and said, “I’ve checked, there’s no movement on Governor Wu’s side.”

“No movement?”

Wu Zhengxiang gave a cold snort, a flash of killing in his eyes, no movement was the biggest movement, everyone knew that Shao Jie was his son, that would undoubtedly be Wu Zhiyong’s most powerful rival.

Especially after Shao Jie’s identity was made public, the situation was actually already clear, and Wu Zhengxiang believed that Wu Zhiyong must have realized the crisis.

Now that he heard the news of Shao Jie’s assassination, how could Wu Zhiyong have not moved at all?

Wu Zhengxiang narrowed his eyes, could it be that Wu Zhiyong did it?

“Continue to keep an eye on him, better be able to grasp his every move, if” Wu Zhengxiang did not say more, but the secretary already knew what he meant.

“Please rest assured, Chief, I know what to do.” The secretary said in a low voice.

Walking out of the ward, a cold light flashed in Wu Zhengxiang’s eyes, no matter who did it, this matter must not be finished!

However, Wu Zhengxiang’s anger was no longer visible on his face when he arrived at the Wu family’s old man’s courtyard, he slowly walked into the room and saw the old man sitting in a wheelchair.

“Little Chief.”

The intensive care worker beside the old man hurriedly greeted.

Wu Zhengxiang waved his hand and dismissed everyone, staring at the old man in the wheelchair, who was now sitting in the wheelchair, his head tilted to one side, saliva dropping low from the corner of his mouth onto his clothes, his face blank and his spirit even more extremely depressed.

“Your grandson has been assassinated!” Wu Zhengxiang suddenly said, “What do you think?”

Campus Master Chapter 3080

“Your grandson has been assassinated!” Wu Zhengxiang suddenly said, “What do you think?”

The old man sat in his wheelchair without the slightest reaction, as if he hadn’t even heard Wu Zhengxiang speak.

Wu Zhengxiang’s face was extremely ugly, and he said in a deep voice, “My son, your grandson, was stabbed to death and wounded in the lower body, from now on he will not have any offspring, even modern medicine can’t do anything about it!”

At this point Wu Zhengxiang suddenly couldn’t continue.

Although Shao Jie’s injury was not very serious, however, the place where it was injured was really too fatal.

Not only had the root of his life been removed, but also the two small balls had all been cut off, which was not possible because one of the small balls had been completely burst, and the other one was also very seriously injured.

If not cut, the infection could be life-threatening. In this way, even IVF would not be possible in the future!

It could be said that Shao Jie was truly extinct!

Deep breath, Wu Zhengxiang gritted his teeth, said in a deep voice: “You have several grandchildren, you thought for sure there would be someone to help you pass on the family, but in modern times you look again, the old family’s Wu Zhihe has died, the old third family is so weak, and now ”

Wu Zhengxiang gritted his teeth.

See the old man sitting in the wheelchair, still a blank look, as if the soul is outside the sky, everything has nothing to do with him, Wu Zhengxiang suddenly a wave of anger rose from the heart, he bang a kick on the wheelchair, that huge inertia made the old man leaned back violently, almost fell headlong to the ground.

But the old man remained unresponsive, just tilting his body and dropping his head.

Wu Zhengxiang’s face was ironic, and he hurried up to help the old man up again, before he let out a soft sigh: “No matter what I say you always look like this, you don’t respond at all I really doubt if you are pretending or not! The old man, whether you are pretending or not, it is useless now, all this is already in the past tense for you, no matter how I say I am also your son, I hope you can see the reality clearly!”

Here he paused and straightened his clothes, then carefully wiped again on the old man’s wheelchair to clean the footprint he had just kicked.

“That’s it, you can keep quiet, but I’m sure you’ll talk, because I can afford to wait and you can’t!” Wu Zhengxiang said in a deep voice, and then he left straight away without looking back.

Walking out of the gate, Wu Zhengxiang said to the special care worker beside the old man, as well as the guards and others who were in charge of standing guard, "Keep an eye on the old man, and remember, inform me promptly of any abnormalities!"

All of them hurriedly agreed.

Wu Zhengxiang nodded slightly before he slowly left.

When he got into the car, he saw that the secretary was already waiting, and Wu Zhengxiang asked, "How is it?"

The secretary said, "Arrangements have been made, and there will be news soon."

Wu Zhengxiang nodded and said, "Notify me in time if there is any news, and you should keep a close eye on it."

"Yes!"

The secretary immediately answered, and after a pause, he added, "Chief, the assassination of young Jie, could it be related to the Ji family?"

Wu Zhengxiang turned his head to look at him, and the secretary hurriedly lowered his head, dropping his eyes and not daring to look at Wu Zhengxiang.

"Just do as I instructed, don't think much about the rest!" Wu Zhengxiang said.

"Yes!"

.....

The news that Shao Jie had been assassinated and Zhai Yadong had likewise been assassinated in Southern Guangdong and died on the spot aroused the concern of many people. Some people first thought of the Ji family, because those who had the ability and the motive to do so, the Ji family, especially Ji Feng, was the most suspected.

Even some people who are close to the Ji family or have a good relationship with Ji Feng have either directly or indirectly pried into Ji Feng's mouth. However, Ji Feng only smiled at this and did not talk about this issue at all.

This kind of attitude of neither admitting nor denying is even more suspicious, while those who know that Ji Feng didn't do it are a bit puzzled.

He Hongwei even asked Ji Feng why he had to use such an ambiguous attitude if he didn't do it, why not just deny it?

However, Ji Feng did not explain, when this matter was in a frenzy, he had already arrived at Island No. 1.

At this time, the construction on Island No. 1 was already in full swing, and even some of the buildings in the residential area were already up, with a few of them having been roofed over.

Roads were also already being built at a rapid pace, and great progress had been made in the construction of some important infrastructure such as the airport and energy facilities.

“At the current rate of progress, in half a year’s time at most, the main construction will basically come to an end, and the next step will be some minor works.” As the chief person in charge of the construction period on Island No. 1, Zhang Lei knew the situation on Island No. 1 like the back of his hand, “In fact, in another two or three months it will already be habitable, the road is also almost built now, now it’s just the last layer of paving, three months is enough time.”

Ji Feng laughed: “You kid can, now the situation on island number one is rotten to the core, right?”

“You feel free to ask!” Zhang Lei said confidently.

“Haha!”

Ji Feng couldn’t help but laugh, “This will be our base from now on, so you brat should pay more attention!”

Zhang Lei laughed, “Don’t worry, since this is our lair, I definitely won’t be sloppy. But I didn’t expect that at that time I just mentioned it casually, but you actually made an island as a base.”

When he and Ji Feng first mentioned that they were going to get an island overseas as a base for the Tengfei Group, both of them were just joking, thinking that it was just a whimsical joke, but no one expected that after only a short period of time, this joke would actually become a reality.

“This is only temporary too!”

Ji Feng said, “No. 1 Island is still too close to the country after all, this is not good, let’s develop it slowly first, if possible, I would like to find a trivial land boundary, even if it is a small island, when the time comes, just use the method of reclaiming the island to make a piece of land!”

Zhang Lei said, “The current technology can’t reach it, right?”

Ji Feng said, “In terms of technology, only you can’t think of it, there’s nothing you can’t do! Don’t worry, as long as there’s a chance in the future, I’ll definitely get another base!”

“That’s great!”

Zhang Lei was tickled by the future scenario depicted by Ji Feng, reclaiming an island, getting a piece of land out and developing a large base

Time flew by, and in the blink of an eye, the residences on island number one had basically been completed, and all the other infrastructure had been put into use, although it was all still under construction, the first phase of the project was basically over.

At this time, the relocation began.

The first to be relocated to Island One were the orphans from the orphanage that Wang Xin and Wang Hu came from.

The next move was to the headquarters of the Tengfei Group. Although some people were reluctant to move, the majority of them agreed to do so.

The relocation of the headquarters of the Tengfei Group has driven a large number of people, Tengfei Electric, the research centre and so on, all relocated there, but Xiao's pharmaceutical factory was not relocated, because Xiao's pharmaceutical factory is specialized in supplying the military with special effects current, which factory can be relocated, but this factory cannot be moved.

In fact, Ji Feng did not intend to move so many factories over at once, building Island No. 1 into a comprehensive base, not a production base, this is Ji Feng's goal.

Just as Island No. 1 was gradually stepping into stability, several things happened in the country that caught Ji Feng's attention.

Shao Jie, who had been assassinated, re-entered the Brilliant Group as the general manager after being hospitalised.

In the same month, the headquarters of the Brilliant Group was relocated to Fuquan City in Min Fu Province. Obviously, this was because the Wu family knew that Southern Guangdong could no longer be defended, and it was obvious that the Brilliant Group could no longer please anyone by remaining in Southern Guangdong, and it might even be caught in a trap at any time, so relocation became the only option.

However, the fact that the Brilliant Group has moved its headquarters to Min Fu Province is quite surprising to the outside world. This seems to be a signal, could it be that the Wu family has been forced to join hands with the Min Fu family?

The second incident was still related to the Brilliant Group, after moving to Min Fu Province, the Brilliant Group surprisingly reported to the police immediately because the Brilliant Group had lost a huge amount of money, which was said to be more than 10 billion!

This immediately caused an uproar in the outside world!

The vast majority of people even thought that it was a fake news.

Over ten billion dollars, that's not a hundred dollars, how could it be lost just like that?

But the Brilliant Group's report was a real one, which left the outside world puzzled, wondering what medicine the Brilliant Group was selling in its gourd.

The group has tens of billions of assets, but after the turmoil of Rong Peng's father and daughter leaving, plus the series of turmoil in Southern Guangdong, the group is actually not as good as it used to be, originally it had tens of billions of assets, but after removing the bank loans and lost funds, I'm afraid the rest is not But after deducting the bank loans and the lost funds, I am afraid there is not much left.

Now that it has lost another ten billion, the Brilliant Group will only be left with an empty shell.

The situation has changed so quickly that it is really dazzling. The originally glamorous Brilliant Group has fallen to an empty shell in such a short time, which is astonishing.

However, news has spread from the outside world, and it is said that a large number of debtors have gone to the Brilliant Group to collect their debts, which include private financing and loans from banks.

The Brilliant Group was facing big trouble.
