

Campus Master Chapter 3161

Han Zhong shook his head and said, "I'm not angry."

Wang Jun was stunned, "Really?"

"Of course it's true." Han Zhong suddenly smiled, "You are right, I was just a part-time worker, since this is the case, then I should have been clear about my position a long time ago, and should also understand that with such a large group, it is normal for people to be uneasy, it is common for people, if it were me, I would have done the same."

Wang Jun was amazed and hesitantly said, "You have really figured it out?"

"Yes!"

Han Zhong nodded and said with emotion, "If you had told me this before, I would indeed not have been able to figure it out, but now, I can figure it out. These few years, even if I'm just an ordinary employee, I've done enough to contribute to the Tengfei Group, but in exchange for such treatment, huh if I can't figure it out again, isn't that too stupid?"

Wang Jun said, "It's best if you can think like this, I originally didn't dare to tell you these things because I was afraid that you would be too angry after hearing it, but I didn't expect you to have figured it out."

"Hehe!"

Han Zhong shook his head and laughed, and then suddenly asked, "By the way, Junjun, those two people didn't find you, did they?"

Wang Jun shook his head and said, "I understand what you mean, just don't worry, I was just walking past normally, just brushing past them, they were sneaking around, they definitely wouldn't care too much about me. So they shouldn't know that I spotted them, or that you already know about their covert actions."

"That's not what I meant."

Han Zhong shook his head and said, "It doesn't matter to me, after all, I'm the general manager, they can't do anything to me, at most they'll just spy on me in secret. I'm mainly worried that since I'm being watched, could someone be watching you as well?"

Wang Jun was stunned, "Spying on me?"

"Yes!"

Han Zhong nodded and said, "Think about it, many people in the company know about our relationship, and they also know how important you are to me, since they are spying on me, then you may be spied on, whether from life or from work, have you found anything unusual?"

Wang Jun shook his head and said, "That's not true, at least not yet."

"That's good."

Han Zhong breathed a sigh of relief.

Wang Jun, however, couldn't help but pale a little: "They wouldn't be trying to do something, would they?"

Han Zhong shook his head, "Don't you worry, this shouldn't be. I think, I'm afraid it's because I hold too many secrets, so some people are not quite at ease, so this is why they sent people to spy on us, but if they really want to do something, first of all, I will certainly not be able to sit down in this general manager's seat. But now since I'm still sitting well in this seat, it means there's not much of a problem! It's just that"

He shook his head and sighed.

Wang Jun understood how he felt, Han Zhong had been involved since the founding of the Tengfei Group, and down through the years, he had poured all his heart and soul into it.

Han Zhong's efforts and contribution to the development of the Tengfei Group into a mega group of companies that spans the world today cannot be ignored or erased in any way, but now Han Zhong is being treated like this.

How can this not make people sigh?

Thinking about this, Wang Jun even had some secret happiness in his mind, saying that the Tengfei Group had really destroyed itself! Ji Feng is indeed a handsome young man who has created such a foundation at such a young age that even the most distinguished people in this world would have to look at him sideways.

However, perhaps all Chinese people have the common problem of being able to share the hardships but not the riches.

I don't know whether it was Ji Feng or Xiao Yuxuan who did this, but they even sent someone to spy on Han Zhong, which clearly means that they were not at ease with Han Zhong and were secretly on guard, leaving a hand behind.

Perhaps they did not think about how much damage and blow this would really do to Han Zhong.

Or perhaps, they were well aware of the consequences of doing so, or even that they were originally trying to force Han Zhong out!

Such is the inferior nature of the Chinese people!

From the ancient emperors who killed meritorious officials, to modern people who start fighting for power and profit after achieving fame and fortune, this is simply the same, it's all about profit!

Originally, Wang Jun scoffed at the friendship between Han Zhong and Ji Feng, was there a pure friend in this world? If he really thought of Han Zhong as a friend, how could he use his shares to tether him?

However, the fact that Ji Feng and Xiao Yuxuan were doing this was, on the contrary, exactly what Wang Jun wanted.

It had been so long, she was at a loss as to how to finally divide Han Zhong, but to think that Ji Feng and Xiao Yuxuan would destroy themselves and do such a stupid thing themselves.

This time, the Tengfei Group was going to lose one of its top generals, and it was a mainstay!

At this juncture, to make such a stupid move is really stupid!

The actual fact is that you will be able to get a lot more than just a few of these.

“I know you’re not feeling well inside, but that’s how people are!” Wang Jun comforted, “Although you treat Ji Feng as a friend, but friendship and love is not the same, love can withstand the storm, can not withstand the dull, but friendship is able to withstand the dull, but can not withstand the storm, let alone, or this kind of tasteless friendship this is no longer friendship, but use! ”

“Ji Feng superficially treat you as a friend, give you shares, let you be the general manager, but in fact, he only saw your ability and talent in business, but secretly guarded against you, I bet, once you have second thoughts, when the time comes, Ji Feng will certainly be the first to pre-empt, he must have already prepared a backhand against you! ”

Han Zhong listened and was silent.

Only after a long time did he let out a soft sigh, “This topic, let’s stop here, let’s not talk about this.”

Wang Jun couldn’t help but say, “How can you not talk about it, you wouldn’t want to contribute to them knowing that they are on guard against you, would you?”

Han Zhong said, “No matter what, I still have this general manager’s seat, moreover, I also have shares in the company”

“That’s their way of enlisting you!”

Wang Jun interrupted Han Zhong, “Think about it, they want to use you on the one hand, and at the same time put you under a tight spell, monitoring your every move at all times, such a life, it’s not as interesting as setting up a stall and opening a big stall by yourself on the street?”

“But I don’t know how to open a big stall!” Han Zhong shook his head and laughed.

“You can still laugh!” Wang Jun said in a good-natured way, “Aren’t you angry that they are bullying you like this? Even if you weren’t angry, I’d be furious for you! No, you have to think about it, you can’t let people play around like fools like this anymore, and it’s time to think about where you should go from here.”

“If I were to retire now and go back to Jiangzhou to do some small business of my own, or open a small shop, would you be willing to come with me?” Han Zhong suddenly asked.

“Hmm?”

Wang Jun was stunned by this sudden question and didn’t react for a moment.

Han Zhong said, “In fact, what I want most is to contract a mountain, plant fruit trees, build a few cottages at the foot of the mountain, raise some chickens and ducks, and two big dogs, and live that kind of farming life. ”

Wang Jun froze, could not help but shake his head: “Knowing is easier than doing, you say not to ask, can really not ask ah? When your father is old, your family business, you really do not care?”

“I’ll donate it to charity!” Han Zhong said, “If I say I won’t ask, I won’t ask! I just want to ask you, are you willing to join me and live like this for the rest of your life?”

“Of course I’m willing!”

Wang Jun said, without the slightest pause in his tone, “Although a lifetime is too long and too far away, who knows what will happen tomorrow, but if that’s really what you’re planning, I’m willing!”

Han Zhong smiled, “Good then, with your words that’s good enough, I’ll go and resign from Mr. Xiao right now. Then we’ll pack up right away and go back to Jiangzhou first, I’ll take you home to meet my parents, then we’ll go to the mountains In fact, I’ve had this plan for a long time and have already roughly looked at a few places, this time it’s just right for you to accompany me there and see where it’s more comfortable to live.”

“Now, now?”

Wang Jun was surprised, almost caught off guard by Han Zhong’s reaction, “Wouldn’t this be too impulsive?”

Han Zhong laughed, “It’s not impulsive at all, I’ve been conceiving it since very early on.”

“But”

Wang Jun said, “They definitely won’t let you go! Han Zhong, don’t be impulsive, I know you’re angry in your heart, I’m equally angry and feel bad for you, that’s why I asked you to consider the back way, but considering the back way doesn’t mean making a random decision in your head, all aspects must be considered”

She was in a hurry when she spoke and spoke quickly, but as she said it, she kind of lost it because she noticed that Han Zhong was just looking straight at her in a weird way.

“What are you looking at me like that for?” Wang Jun asked in surprise.

“Because I’ve discovered that you really are a virtuous helper!” A smile appeared on Han Zhong’s face once again, “You’re more thoughtful than me when it comes to thinking things through.”

“That’s not even for you!” Wang Jun gave him a blank look.

Han Zhong laughed twice, “Well, since you think I’m too impulsive in making this decision, then you’ll have to help me think about the back road. Let’s see how we can leave the Tengfei Group and still live a small life.”

Wang Jun hurriedly said, “Keep your voice down, don’t let anyone hear you!”

Han Zhong nodded and smiled, “I’m used to talking, I’ll pay attention later.”

Wang Jun said, “Now is not like the old days, Ji Feng and Xiao Yuxuan no longer trust you, they are on guard everywhere, so we have to be careful everywhere. Besides, since they’re so guarded against you, you don’t need to be so loyal to them anymore.”

“You’re right!”

Han Zhong nodded, and the corners of his mouth tugged a few times, a sort of smile.

Campus Master Chapter 3162

Having received Han Zhong's approval, after just two days, Wang Jun claimed that she had to go home for a visit and left Island No. 1.

Before she left, she lowered her voice and said to Han Zhong, "I might be away for a while this time."

Han Zhong smiled and nodded, "I'll wait for you."

In the past two days, Wang Jun had told him that he wanted to travel to a few more places and examine them to see if there were any suitable projects, to be more specific, to choose the most suitable back road.

Han Zhong was full of promise, so Wang Jun became even more active.

"Woo~~"

With a whistle blaring, the passenger ship slowly sailed away from Pier 2. Han Zhong stood at the edge of the pier, his body leaning against the pillar where the chains were attached, looking at Wang Jun who was still waving to him from the side of the ship, and he smiled and waved back.

Only when the passenger ship was far away, turning into a small black dot and finally disappearing from Han Zhong's sight, did he shake his head and smile, let out a soft sigh, and turned around to leave the pier.

Only in the moment of turning around, although the smile on his face remained unchanged, there was an unconcealed despondency and loneliness in his eyes.

"Tick tock!"

Suddenly two horns sounded, causing Han Zhong to be startled. He immediately turned his head to follow the sound, only to find a black car parked not far away at some point, with the window glass down and Zhang Lei sitting in the driver's seat waving at him.

Han Zhong smiled and walked over, "Zhang Lei, why are you here?"

Zhang Lei smiled, "Get in!"

Han Zhong pulled open the door and sat in the passenger seat, looked around and a look of amazement appeared on his face, "This car"

"How about it, not bad, right?"

Zhang Lei laughed harshly, "This is just got it, a test car, don't you see the shell is ordinary, the engine of this car is equipped with the purest anti-gravity propulsion system, the seat is also fine-tuned."

Han Zhong was stunned, "A test vehicle? And how did you get it?"

There were several laboratories under the Group's umbrella regarding cars, as well as complete car laboratories, but since it was a test car, how come he, the general manager, didn't know about it and instead Zhang Lei got it first?

Zhang Lei laughed, "I've been keeping an eye on the lab, knowing that they were working on this car that was fully equipped with an anti-gravity system, so I've always wanted to get one to try out first, no, it's just been assembled and I got it."

Han Zhong smiled, "You brought the car here, so how are they going to test it?"

"There are hundreds of test sensors in the car, I'm just a driver, and I'll have to return the car to them later." Zhang Lei laughed, "However, this car is indeed cool to drive, really moncler this is called super power, the engine is not much different from flying if it is running at full speed, you sit back, let you feel what is called a pushback!"

As soon as the words left his mouth, Zhang Lei pressed a button on the console, while his foot stepped on it.

"Swoosh!"

The car made an odd sound, and the four wheels spun violently and rapidly, Han Zhong only felt his body sink, and the next moment, a strong pushback feeling like when an aeroplane climbs hit him, and the car sped away.

"Haha! Cool, right?!"

Zhang Lei laughed out loud as he steered the steering wheel, the car going at breakneck speed along a road on the edge of Island One, the trees on both sides of the road flying backwards, almost practiced into a line because of the speed.

This was the first time Han Zhong had ever been in such a car, and this kind of wild ride that could be described as extremely fast made him feel greatly excited as well.

"Whew!"

As Zhang Lei's foot slammed down, Han Zhong's body leaned forward, he hurriedly straightened his two feet, and then he found that the car stopped in the blink of an eye as if it had encountered a transparent barrier in front of him.

The huge difference between this movement and stillness even gave Han Zhong a feeling of vertigo.

"Shit!"

Zhang Lei, however, was a little less than satisfied, "The sound of this brake is too loud and too hard to hear!"

"Phew!" Han Zhong then came back to his senses and let out a long breath before asking, "How come I didn't hear the sound of the brakes?"

"Wasn't that whirring sound just now?" Zhang Lei said, "This is different from ordinary cars, it doesn't rely on the brake caliper to brake, the air inlet in front of the front of the car, that's actually the air jet, that's for braking!"

Han Zhong was stunned and said, "The lab reported that the idea of using the jet as power was successful?"

Zhang Lei said, "I think so, who knows, anyway, I just drive and don't care about the rest!"

Han Zhong immediately pushed open the door and got out of the car, and went to the front of the car to take a look. He found that the air inlet at the front of the car had been modified, so it was obviously no longer an air inlet. He remembered a project that the laboratory had reported, in which several experts envisaged that, based on the application of anti-gravity engines, because the speed was too fast and the kinetic energy was too strong, a completely new way of braking had to be used, and one of the projects was to try to take the equipment from the jet aircraft and move it to the car to be used for braking.

Han Zhong had seen this project, but the projects on cars were all handled by Xiao Yuxuan, so Han Zhong wasn't too sure about the progress.

And now it seemed that it had worked.

"If this car is brought to market" Han Zhong couldn't help but smile, he had even seen the horrified looks of other car manufacturers in the market.

In the past, when the Tengfei Group first launched the anti-gravity system, not only those car manufacturers, but also certain people in the energy industry, I don't know how many people jumped out in a hurry to accuse or even rebuke the Tengfei Group as if their tails had been stepped on, and there were even more who sang the praises of the Tengfei Group.

If it wasn't for the fact that Tengfei Group had been prepared and had come to the bottom of the barrel, I'm afraid it would have been besieged by those people!

The launch of the anti-gravity system did not simply destroy one or two industries, it was a direct attempt to smash people's rice bowls, and even their pots and pans together.

Even now, the cars launched by the Tengfei Group still encounter a lot of small actions in the market, but the Tengfei Group is not that easy to besiege nowadays, so some people can only hold their noses and endure it.

Now this car that Zhang Lei drove out is really too stunning for Han Zhong, if this car is brought to the market, it will definitely be like destroying a handful of cars and easily dominate most of the entire car market!

"Alright, it's break time, so don't think about business matters!" Zhang Lei smiled and threw Han Zhong a cigarette, "Just now I saw you giving someone away?"

"Yes!"

Han Zhong also knew that he was too eager, the car was still only in the testing stage and it would take some time until it went on sale, so he quickly withdrew his gaze as well, "Wang Jun is going back home for a visit, I'll see her off."

Zhang Lei immediately said, "Still pestering, huh? I said are you tired? Are you really trying to catch a big fish with a long line, or do you really have a crush on her?"

Han Zhong laughed bitterly, "I was thinking that if I could, it would be best if she could turn back."

"I think so, it's hard!"

Zhang Lei said, "Although I haven't said a few words to Wang Jun, I can tell that this woman definitely has quite a deep heart, and such a woman is not suitable for you."

Han Zhong only smiled bitterly. He knew Zhang Lei's character and knew that this guy was the kind of guy who had a big grin, but was definitely enough of a friend, so his relationship with Zhang Lei was getting closer and closer instead, and making friends with Zhang Lei didn't require any effort at all.

"Alright, it's your business anyway, you're on your own, just don't end up getting yourself into it." Zhang Lei also did not continue this topic, but said, "I'm looking for you today, actually I have something for you to help."

"Oh? What is it?" Han Zhong asked.

"I want you to authorise me, I have something that I need to go through the finance department to go through the materials." Zhang Lei smiled.

"What? Going through materials in the finance department?"

Han Zhong froze for a moment, "The finance department is not a library, it is the financial centre of the entire group, what materials are you going to go through there?"

Zhang Lei's request really made him feel strange, Zhang Lei was a member of the battle team, even nominally he was not even in charge of the security department, regarding the allocation of the battle team, every time there was no less than a penny, apart from normal expenses and salaries, as long as the battle team had an application, he and Xiao Yuxuan were immediately approved, how come Zhang Lei wanted to go to the finance department to check the materials instead?

"You authorize to me is all, right, this matter don't let Yu Xuan and Ji Feng and the others know, just you know and I know, the third person can't know." Zhang Lei said.

"You this"

Han Zhong said, "I authorize to you certainly no problem, even I directly take you to the finance department to check the materials, but the problem is, you always have to tell me, you go to the finance department in the end to do what, otherwise I have no bottom in my heart ah!"

Zhang Lei was silent for a moment before he said, "I need to check some financial statements and materials."

"I know that, the key is which area are you going to check?" Han Zhong asked, "Is it the group's revenue, or"

"I want to check the financial details of the intelligence group!" Zhang Lei interrupted him and suddenly said.

Han Zhong's face changed abruptly and subconsciously asked, "You want to check Zhao Kai?"

Zhang Lei shook his head and said, "It's not checking Zhao Kai either, it's just checking the intelligence team's finances, I see how the intelligence team's people's equipment and funding are more adequate than ours, I don't think it's fair, dammit, I have to see how much funding the intelligence team actually has in a year!"

Han Zhong looked at him and couldn't help but say, "Do you think, with this rhetoric of yours, I would believe it? If you want to know the funding of the intelligence team, I can just make a phone call and tell you, do you still need to go to the finance department to check? Just tell me honestly, do you want to check Zhao Kai!"

Zhang Lei said, "Just don't ask so many questions, just authorise me directly and pretend you don't know the rest, if anyone asks, you let him come to me."

Han Zhong looked at Zhang Lei and his brows couldn't help but wrinkle.

"Okay, I'll authorise you, but you have to promise me that you won't mess around!"

Campus Master Chapter 3163

Han Zhong promised to authorise Zhang Lei, in fact, he was not even quite sure what Zhang Lei was going to check.

When he heard Zhang Lei say that he was going to the Finance Department to check the Intelligence Unit's materials, Han Zhong's first reaction was that Zhang Lei was going to check Zhao Kai!

This was because, whether it was Zhang Lei or Zhao Kai, neither of them had the authority to check the financial information.

Zhang Lei was responsible for the security on Island No. 1, and according to what Han Zhong had heard from Ji Feng, Zhang Lei would definitely be in charge of the entire battle group in the future, and to put it bluntly, the battle force on Island No. 1 was now in Zhang Lei's hands.

But other than that, Zhang Lei has no other position in the Tengfei Group, that is, he has a position in the security department.

The company's financial resources are not only for the security and combat team, but also for the finance department.

As for Zhao Kai, he also has no authority to go to the finance department to check the materials, the intelligence team is a department of the Tengfei Group, although Zhao Kai is in charge of this department, but the salary is not paid by him, but directly by the finance department, at most, if the intelligence team people want to purchase any equipment, or reimbursement for business trips, etc., these are counted separately, but that is all.

Therefore, neither Zhang Lei nor Zhao Kai had the need to go to the finance department to check the materials.

The only thing that makes the two related is the issue of funding.

This funding is not the salary, but the extra expenses in addition to the salary. For example, Zhao Kai once reported a bill for a batch of high-tech equipment, and there were also travel expenses for the intelligence team's people to go on business trips, etc. These belonged to the expenses.

Although the Tengfei Group was very wealthy, the funds given to each department had to go through strict auditing and budgeting, and it was not possible to spend as much as anyone wanted.

Under such circumstances, there is competition between some field departments for funding.

Therefore, when Han Zhong heard Zhang Lei say that he was going to check the intelligence team's materials in the finance department, his first reaction was that Zhang Lei's action was most likely directed at Zhao Kai.

But on second thought, Han Zhong knew that although his guess was possible, it wasn't the only one. With Zhang Lei's relationship with Ji Feng, it would be too easy for him to ask for funding.

Therefore, Zhang Lei should not be too keen on the funding of Zhao Kai's intelligence team.

Unless Zhang Lei was so greedy that he still felt that the monthly funding was not enough and that the intelligence team's funding was more than their team's, that's why he wanted to investigate.

After a little thought, Han Zhong nodded his head in agreement.

Perhaps it wasn't a bad thing to let Zhang Lei check the intelligence team's funding, as the intelligence team's work was also explained by Ji Feng, so it was also relatively well funded, but Han Zhong had never seen much success, and he also wanted to know where the intelligence team had actually spent the money.

"I'll say hello to the finance department later, when the time comes, you can just go there directly." Han Zhong said.

"OK!"

Zhang Lei nodded and smiled, "With your word on it."

Han Zhong was still a bit uneasy and admonished, "But you can't do anything rash, otherwise I won't be able to explain it to Mr. Xiao."

Zhang Lei laughed, "I'm just going through the information, what else can I do?"

Han Zhong couldn't help but shake his head and said, "I'm really impressed with you guys, you don't even know how much funding you get every year, and you still think you get less, I'm afraid these two departments are the only ones in the whole group that get the most funding, together they are almost as much as the salaries of the group's executives."

Zhang Lei laughed: "Let's switch, I promise you won't say that again, you'll only complain about the lack of funding, just like me."

"It's better to avoid it!"

Han Zhong shook his head, "I'd rather be my general manager, I really can't do that fighting and killing thing of yours."

"Being a general manager, isn't it also fighting and killing in the mall?!" Zhang Lei laughed, "That sword and sorcery is more intense than ours, I'm afraid."

"....."

Han Zhong couldn't help but freeze for a moment when he heard this, after thinking about it he couldn't really refute Zhang Lei, what Zhang Lei said, wasn't without reason.

Zhang Lei laughed: "Well, no more talking to you, where are you going, is it the company or where? I'll take you there, then I'll go straight to the finance department."

Han Zhong said, "Then you can drop me off at the company on the way, I'll simply go there with you and talk to Lao Tian in the finance department face to face then, and save any further misunderstandings in between."

"That's fine, get in the car." Zhang Lei smiled and nodded his head.

When he got into the car, the strong pushing sensation came again, but Han Zhong was not in the mood to feel this latest technology equipped car, his mind was racing, wondering why Zhang Lei suddenly wanted to check the intelligence team's financial information.

Was it really just because of the injustice of funding and his eyes were red?

Han Zhong felt that this speculation seemed a bit far-fetched, did Zhang Lei still need to worry about funding?

Then

Han Zhong's heart suddenly moved, and he thought of something – just three days ago, Wang Jun told him about someone watching him, and after he returned home that night, he did see someone out and about on the opposite floor, the one on the same floor as him.

According to Wang Jun, Han Zhong also found two surveillance cameras installed on the upper floor of the building where he lived, and even found a third camera above the fire escape at his door.

There was no doubt that those people were spying on him.

And according to his and Jun Wang's analysis, the people responsible for spying on him were most likely from the intelligence team!

This matter was related to Zhao Kai. It was because in the entire No. 1 Island, only people from the Tengfei Group were able to enter their executive dormitory building.

I'm afraid that the Battle Group's people didn't have the time to spy on him, only Zhao Kai's intelligence team!

This was clearly crossing the line!

Could it be that Zhang Lei's need to investigate the intelligence team had something to do with this?

.....

"Phew!"

Ji Feng exhaled a long breath, looking at the body in front of him, which was about one meter seven, he couldn't help but have a smile on his face.

After more than a week of continuous effort, he had finally perfectly created the bones and flesh and blood, and had made the final repairs. What appeared in front of him now was a body that resembled a human with only a few places still showing a metallic hue.

This was the body made for the wise brain.

Carefully examining this body, Ji Feng was very satisfied. When he said it resembled a human, it was actually only close to a human in appearance, but in reality it would be more accurate to call it a robot.

Many parts of this body were made of bionic materials, so it did not look as cold as the ordinary concept of a robot, but the shape of the face was not that beautiful either.

But all these were secondary, what really mattered was whether or not such a body could be entered by a wise brain, and whether or not it could take up permanent residence in it, and thus control the body.

“Wise Brain!”

Ji Feng called out to Wisdom Brain, “Take a look at your new body, how is it?”

In fact, during the process of creating the body in the past few days, Wisdom Brain had been involved, so this body was not the least bit surprising to Wisdom Brain, however, precisely because Wisdom Brain was acting more and more human during the process, sometimes Ji Feng subconsciously treated it as a human being, so he used the same tone of voice he used when talking to other people.

The intelligent brain said, “Master, making a good body is only the first step, there are two very crucial steps next, energy and transfer!”

Ji Feng understood what the wise brain meant, because the wise brain itself did not carry energy and could not produce energy, so if he wanted this body to move like a normal person, it had to be propelled by energy. And this energy, must be able to be transformed into a bio-current that can be used by the wise brain, which, is very difficult.

The next step is how to transfer the wise brain from his body, to this new body, which is even more difficult.

“We’ve already tested the energy side, there’s nothing wrong with it.” Ji Feng said, “The key now, is to transfer you into this body.”

“According to the projections we conducted before, the success rate of this step is only eighty percent.” The intelligent brain said.

Ji Feng instantly laughed, “You’re afraid?”

An artificial intelligence would also be afraid?

The intelligent brain said, “I’m not afraid of this emotion, I just want to transfer on the basis of the highest success rate.”

Ji Feng said, “But my left arm is injured now and has never recovered, so I can only reach a success rate of eighty percent at most, which can’t be helped, and you can’t think of any other better way, so if you want to enter this body, you can only try like this.”

After a pause, Ji Feng added, "Of course, although my left arm is injured, it doesn't affect my right hand's true qi outflow, and I can retract it as well, if anything goes wrong during the transfer, I can always retract you again, there's no need for you to worry."

Although there was a possibility of failure, and a twenty percent chance at that, Ji Feng had to give it a try.

It was also time for a change!

The intelligent brain didn't say anything, it seemed to be thinking, and after a moment, it said, "Yes, master, please start."

Ji Feng said, "Good then, now I'll start to activate the bio-current! The rest, leave it to you."

Ji Feng could feel the presence of the wise brain, but he couldn't move it, even if he used all his strength to activate the bio-current, he couldn't do it, so it had to be transferred to his hand first, using the bio-current by the wise brain itself, and then his true qi was released outwards, while activating the energy source of that body, keeping the same frequency, so that it could be transferred.

Suddenly, Ji Feng felt the wise brain move.

Campus Master Chapter 3164

Ji Feng was able to clearly feel that just as he was pushing the bio-current with all his might, there was an extremely subtle bio-current in his head that began to flow slowly.

Without a doubt, that was the intelligent brain!

It was only at this time that Ji Feng knew for the first time exactly where the wise brain was located in his head. It was in the middle of his head, and a diagram of the structure of the human brain immediately emerged in Ji Feng's mind, and he realised that the intelligent brain was actually staying in the middle of his two halves of the brain.

Ji Feng thought to himself that the brain had really chosen a good place, he had never thought of where the brain was hidden, and he had used bio-current to probe, but to no avail, and now that he had found it, it dawned on him.

The wise brain was hidden in the middle of two half-brains, and it was so well hidden that even if he wanted to drive it out, it was impossible. Of course, Ji Feng knew very well that if there was no Wise Brain, then I'm afraid he would still be just an ordinary citizen now, perhaps taking a college entrance exam or attending a technical school, and then living out his life in an uneventful manner.

It is because he met the intelligent brain that his life has become so exciting.

But

When he thought that the intelligent brain could easily manipulate his body, Ji Feng still did not hesitate to activate the bio-current and be more careful and meticulous.

He could clearly feel the route of the wise brain swimming through his body, from his brain into his right arm and then to the palm of his hand.

“This is the time!”

Ji Feng secretly said, giving his full power to the bio-current and his true qi out.

“Buzz!”

Suddenly, that body vibrated, and Ji Feng only felt his body jerking, as if all his strength had been drained away in an instant, or as if some valve within his body had been opened, and the bio-current was like a flood that had opened the floodgates and poured out towards that body in a frenzy.

Ji Feng was shocked and hurriedly had to withdraw the bio-current. If this trend continued, even if the bio-current in his body was strong, it might be drained.

However, to his dismay, no matter how hard he tried, he could not retract it, and a huge suction force came from the body in front of him.

Ji Feng shouted and was about to stop pushing the bio-current, he knew that it was hard to control his true qi after it was released, so it didn't matter, I can't retract it, so I can always stop releasing it, right?

“Master, don't stop, I still need energy!” Suddenly, the body's mouth moved and a voice emerged from the position of the chin.

It was the intelligent brain!

Ji Feng immediately understood that the wise brain had successfully entered this body, and the true qi, or bio-current, that he had released earlier had all been absorbed by the wise brain.

Since he knew that it was the wise brain that needed energy, Ji Feng naturally did not stop and continued to release his true qi.

For a full few minutes, Ji Feng kept up the high-intensity outward discharge of true qi until the voice of the wise brain came again, saying that it was enough, and Ji Feng hurried that a large portion of the bio-current in his body had been consumed.

But he couldn't care about that, instead he stared intently at the body in front of him and asked, “Wise Brain, is that you?”

“Master, it's me.” The intelligent brain said, but the voice that came out of the speaker at his chin position was something like an electronic synthesis.

When Ji Feng listened to it, he was quite relieved, it was really Wise Brain, it seemed that the transfer was successful this time.

“Wise Brain, how do you feel? Can you control the body?” Ji Feng asked again.

“Master, I need time.” Wisdom Brain said.

“How long does it take?” Ji Feng asked.

“There is enough energy now, it won't take too long.” The intelligent brain said.

Ji Feng nodded and said, "Alright then, in that case you stay here first, I'll wait for you outside in the lounge, besides I'll leave a phone here, when you've adapted well, dial my number and we'll discuss it then."

The intelligent brain said, "Okay, master."

Ji Feng nodded, turned around and left the lab, first called Zhang Lei and asked him to send a phone over.

Who knew that this guy Zhang Lei would say that he was busy and could only send someone to deliver it.

Twenty minutes or so later, a member of the battle team sent a mobile phone and brought a new mobile phone card, which Ji Feng assembled and then left for the intelligent brain.

He knew that the wise brain had just entered a new body, and with sufficient energy, all the wise brain needed to do was to adapt to the body and thus control it.

But this took time and was an extremely complicated process. Ji Feng was worried about any accidents and did not want to disturb the Wisdom Brain here, so he went to the lounge outside, and in fact, at this moment, he needed to rest too.

After being busy for more than a week continuously, and having lost a large part of his bio-current when transferring the wise brain just now, Ji Feng was really a bit tired at the moment, but he was lying on the bed in the lounge, but he couldn't fall asleep. Having successfully transferred the wise brain into the new body, Ji Feng felt an indescribable relief in his heart!

And a bit excited!

This means that the wise brain will appear by his side in another form, and most importantly, all his thoughts, all his secrets, and even his body, are now unrelated to the wise brain, and none of them need to worry about being noticed or even manipulated anymore!

Of course, transferring the Wise Brain to a new body was not without its drawbacks.

For example, in the future, he and the Wise Brain would no longer be able to communicate with each other like a shadow, without any obstacles.

After all, the Wise Brain would be considered an individual from now on. Just because of this, Ji Feng had communicated with Wise Brain, hoping that he could design the new body as a device that could be carried around, so that he could carry Wise Brain around with him and communicate just as easily as before.

But what he did not expect was that the Wisdom Brain refused.

According to the Wise Brain, he wanted to be able to feel what it was like to have a human body.

Ji Feng decided to respect the Wise Brain's idea and that was why he created a body.

With the growth rate of the Wise Brain's current self-awareness, perhaps, the day when the Wise Brain was treated as a human being might not be too far away in the future.

A few hours passed.

“Ding

When Ji Feng’s mobile phone rang and he saw the number on the screen, he immediately had a mental shock and hurriedly got up from the bed and quickly came to the laboratory, where he saw that the body was looking left and right, seemingly observing his own body.

“Master!”

Seeing Ji Feng come in, the wise brain opened its mouth, and the moment it opened its mouth, Ji Feng was startled, because at this moment, the voice of the wise brain was very different from the electronic synthesized voice before, just like the voice of the wise brain he usually heard in his mind.

Ji Feng immediately asked, “How did your voice do that?”

The intelligent brain said, “I changed the frequency of the synthesized sound.”

Ji Feng couldn’t help but ask with joy at his words, “So, you have complete control over this body?”

“Yes, master, but it’s not too proficient yet.” The intelligent brain said, “It’s mainly because there are too few sensors in this body, and the number of bionic neuron pieces is also far from enough to achieve more precise control, and only the most basic activities can be performed.”

“That can’t be helped!”

Ji Feng spread his hands and said, “It’s also my first time creating a body for you, I don’t have enough experience, and the materials and equipment available are also unable to meet the requirements you mentioned, so you can make do with this for now, and when we create more advanced materials in the future, I’ll create a new body for you.”

“Yes, Master.” The intelligent brain nodded its head, and even though its movements were a bit stiff, it looked so human already, which gave Ji Feng another illusion, as if the one standing in front of him was a human being.

“Since you have taken control of this body, you will stay here for the time being, use this phone to contact me, and I will make some communication devices later.” Ji Feng said, then added: “You should not run around here, it’s best to stay here and not go out, otherwise, if someone sees you it will definitely cause ripples.”

If an artificial intelligence that thinks like a human being appears in this world, what kind of stir it will cause, even if one can think with one’s toes, Ji Feng can be sure that there will definitely be people who will not look at the intelligent brain with kind eyes, so it is safer to stay in this laboratory for the time being.

After arranging for the intelligent brain, Ji Feng did not rush back, but returned to the rest room and sat cross-legged on the floor, he had to start cultivating and hurry up to return to the greatly depleted bio-current, no matter at any time, to maintain enough battle power in order to ensure as much as possible that nothing could go wrong.

However, when Ji Feng was about to practice body-building exercises, he suddenly stopped.

“Phaseless Kung Fu

In Ji Feng’s mind, the cultivation method of the Phaseless Gong and that feeling of being immersed between heaven and earth involuntarily came to mind.

“Now that the wise brain is no longer in my head, then, I can already cultivate the Phaseless Kung Fu, or else start now?” Ji Feng secretly pondered.

“Let’s do it!”

Since the decision was made, Ji Feng didn’t delay for a moment and started cultivating.

Carefully recalling the cultivation method of the Phaseless Gong in his mind, he began to relax himself At this time, Ji Feng again unexpectedly found that he seemed to empty himself more easily than before, and he realized that this might be the reason why the bio-current was consumed too much, making him a little tired.

.....

Steeplly.

Ji Feng opened his eyes.

He raised his hand to look and couldn’t help but be surprised: “Three hours?!” It had actually been more than three hours since he sat down!

“Phaseless Kung Fu, it feels quite amazing!” Ji Feng said to himself, in these three hours or so, he didn’t feel any growth in strength, but that feeling of completely emptying himself was really good, it was a feeling he had never had before.

“By the way, that strange energy

Ji Feng thought of what the intelligent brain had said before, that every time he cultivated his Phaseless Power, strange energy would be generated and was devouring biological currents, and he immediately started checking.

Campus Master Chapter 3165

“By the way, that strange energy

Ji Feng thought of what the intelligent brain had said before, that every time he cultivated his Phaseless Gong, strange energy would be generated and was devouring the bio-current, and he immediately started to check.

He slowly urged the bio-current and experienced it carefully.

However, he did not notice any strange energy, he just felt that his physical strength had recovered quite a lot, his entire body felt refreshed, and the bio-current within his meridians seemed to have increased, although it was not particularly obvious, he could feel that it was indeed increasing.

“That’s strange!”

Ji Feng couldn’t help but mutter.

If it was placed in the past, the bio-current in his body had depleted, as long as he was practicing body building exercises, he would definitely recover quickly. And now that he was practicing WuXiangGong, his bio-current had not increased much, but he knew that this was normal, after all, WuXiangGong was a traditional martial art, not a body-building exercise, and the effects must be very different with different cultivation methods.

But what struck him as strange was that he found that after these few hours of practice, his energy had recovered particularly well, as if his whole body had been refreshed, that feeling was like someone who was about to suffocate, suddenly holding an oxygen bottle and taking a big gulp, his whole body was full of strength.

“This Phaseless Gong, could it be that it is extremely effective for energy recovery?” Ji Feng secretly pondered, if we put it that way, the Phase-less Kung Fu is not as useless as Shen Jingyi said!

Originally, Ji Feng only wanted to draw on traditional martial arts, hoping to be inspired and see if he could find a way to break through to the fourth stage, but now instead of being inspired, he was even more confused.

This Phase-less Kung Fu was really too strange, there was absolutely no feeling at all when cultivating it, as long as he let himself go, relaxed his whole body and followed that simple method of cultivation.

But the effect of this simple cultivation was so uncommon.

And this was just the beginning of the cultivation. Ji Feng knew that martial arts mind techniques, the deeper the cultivation, the better the effect would be. This meant that as long as he persisted in cultivating the Phaseless Technique, the effect would probably be even better than now.

“The bio-current hasn’t increased much, but the energy is so abundant, so if this trend continues, when the bio-current is fully recovered, the energy will definitely reach a peak state!” Ji Feng secretly mused, “Perhaps, this is a path to break through as well.”

Anyway, he didn’t see any harm now, and he didn’t find out that there was something happening with the strange energy devouring the bio-current as the intelligent brain had said, and the effect was so good that he immediately decided to stick to cultivating this Phaseless Technique.

Whenever he found out that something was wrong, it would be too late to stop immediately.

After making up his mind, Ji Feng saw that it was still early and simply continued his cultivation.

He emptied himself as much as possible to feel the heaven and earth.

“Hmm?”

Just at this time, Ji Feng suddenly had a peculiar feeling, he only felt his whole body warm, as if his whole body was bathed in the early spring sunlight, which made him extraordinarily comfortable.

It was as if he was wrapped in sunlight and completely relaxed. That warm feeling, through his skin, slowly settled into his body, merging into his flesh and blood, entering his bones and marrow, and eventually flowing back into his meridians.

And just as that one warm current entered his meridians, Ji Feng clearly felt that the bio-currents that were originally running slowly in his body were like trickling currents that had returned to the sea, and had merged into that one warm current.

This feeling made Ji Feng very strange, because the warm current that had settled into his body was too fine and thin, while the bio-current that originally existed in his body was extremely strong, originally it should have been the warm current that merged into the bio-current, but now it was completely reversed, the bio-current actually went the other way and merged into the warm current.

“Devouring!”

These two words immediately surfaced in Ji Feng’s mind.

He finally understood what the strange energy the wise brain was talking about, it must be referring to the one warm current that had settled into his body, and the process of the bio-current blending into it was indeed very much like devouring.

There was no doubt that this one warm current was what was produced only by the cultivation of the Phaseless Gong, or rather, this was the true qi produced by the cultivation of the Phaseless Gong, or what Ji Feng had previously called the Phaseless Energy. Now, the phaseless energy was devouring the bio-current.

However, Ji Feng did not feel any discomfort, and his whole body was in a state of ancient peace, just like an old monk in meditation.

“The phaseless energy is actually so amazing?” Ji Feng was secretly amazed, generally only high-intensity energy swallowed low-intensity energy, in that case, the strength of the phase-free energy had to be much higher than the bio-current for this kind of snake-swallowing phenomenon to happen.

No wonder the energy recovered so quickly, here is the reason!

Ji Feng couldn’t help but think again, “Then if I wait until the phase-free energy has completely swallowed up the bio-current, will my strength go up another level? And will it break through to the fourth stage?”

“Hmm?”

Ji Feng was so distracted that he instantly lost that ancient state of relaxation, and that wonderful feeling disappeared without a trace at once.

Suddenly opening his eyes, Ji Feng slowly exhaled a breath of turbid air, and a look of surprise could not help but appear on his face.

“It seems that cultivating this Phaseless Energy might be the right thing to do!”

Even though the phaseless energy was devouring the bio-current, for the time being, he could not see any bad effects, instead, there were only benefits, and Ji Feng was even a bit looking forward to the day when the phaseless energy would completely devour the bio-current.

“Phaseless Energy, that’s you!”

Ji Feng laughed, stood up, went to check on the intelligent brain through the monitor again, found that it was still dancing around with its hands, obviously trying to control its body skillfully, he shook his head and smiled, turned around and left the lab.

Locked the lab door carefully before heading home.

.....

When I returned home, both Tong Lei and Xiao Yuxuan were already at home. The two women were both wearing home clothes at this time and were sitting on the sofa in the living room chatting.

“How come you didn’t know to call ahead when you came back!” Seeing that Ji Feng had returned, Xiao Yuxuan couldn’t help but complain, “We’ve all eaten and there’s nothing else to eat at home apart from some fruit.”

“It’s fine, I’ll just have some fruit.” Ji Feng laughed. The tenderness in Xiao Yuxuan’s complaint made the troubles in his heart sweep away, this was home, no matter what troubles he had outside, he would feel extra warm when he came back.

“Let me squeeze you a cup of juice.” Tong Lei turned around and walked towards the kitchen.

Ji Feng, however, pulled her back with a smile, “I wouldn’t dare to bother Principal Tong, I’ll just wash an apple.”

Tong Lei gave him a blank look, “Don’t talk nonsense.”

Ji Feng laughed heatedly, he knew that Tong Lei didn’t care about her status as a headmaster and was more than happy to be a teacher, but usually didn’t like to let people joke around with this status of hers, especially Ji Feng, who was always a bit bad when saying this.

Because they hadn’t seen each other for a week, it was as if there were endless words between the few of them, and Bai Zhu returned from her rounds and joined their chat, except that mostly it was Ji Feng and Xiao Yuxuan talking, with Tong Lei and Bai Zhu occasionally saying a word or two.

“By the way, the day before yesterday Han Zhong came to see you, I saw that he didn’t look very good, and when I asked him he just said he was a bit unwell, did he call you afterwards?” Xiao Yuxuan asked.

“No.”

Ji Feng shook his head, “I’ve only received two calls in the past few days, no Han Zhong’s Is he sick?”

He was in the lab and received a total of two calls, one was from Ji Shaojun about investigating that hutong, and the other was from Wang Xin, saying that the fake database had been completely built.

Xiao Yuxuan said, “It doesn’t seem to be, he’s been at work for the past two days, and he even came to me yesterday to ask about the key test type car, it seems quite normal to me, he’s probably looking for you for something.”

Ji Feng nodded and said, “Then I’ll make a trip to see him tomorrow.”

He felt a bit strange, he didn’t have an office in the Tengfei Group and his whereabouts were usually erratic, if Han Zhong looked for him, he would usually contact him by phone or come directly to his

home. Now Han Zhong had actually gone to look for Yu Xuan, and not just casually mentioned it in passing, so perhaps Han Zhong really had something going on.

But Ji Feng didn't take it too much to heart, he thought that even if Han Zhong had something to do it wouldn't be anything important, otherwise with Han Zhong's nature he wouldn't be dragging his feet.

"Then do you want to contact Han Zhong first?" Xiao Yuxuan asked.

"No, since he didn't call for me, it's probably just not good to talk on the phone, or it's not clear." Ji Feng said, "It's better to talk about it after we meet in person."

Having said that, Ji Feng probably guessed what it was about, I was afraid that Han Zhong was looking for him for Wang Jun's matter, other than that, there was nothing that was not good to talk about over the phone.

The most important thing is that you should think about this matter, Han Zhong may still have some illusions about Wang Jun, but he is afraid that he will be trapped, and then he will be hurt or himself!

In fact, in Ji Feng's opinion, Wang Jun, this woman, I'm afraid it will not be too suitable for Han Zhong, even if she really has no problems at all, but also with Han Zhong is not too suitable.

The woman at home does not need to give him any help in his career, nor does she need to give him too much advice on how to behave, she just needs to be a good domestic helper and he will be able to give full play to his maximum potential and talent.

So Ji Feng still didn't want Wang Jun and Han Zhong to get together from the bottom of his heart, but this was only his idea after all, and if Han Zhong really insisted, he would definitely respect his friend's idea.

Of course, this has a prerequisite – Wang Jun has no problem!

Otherwise, even if Han Zhong flips out, Ji Feng will definitely not let them go together, not only for the sake of the Tengfei Group, but also as a friend can not stand by and watch him jump into the fire.

Campus Master Chapter 3166

"David Wang has left?"

Ji Feng couldn't help but be a little surprised when he heard this news.

He guessed that Han Zhong was looking for him because of the matter of Wang Jun, so he casually mentioned Wang Jun, yet Xiao Yuxuan told him that Wang Jun had left Island No. 1 and had been gone for a few days.

This surprised Ji Feng and his first thought was, could it be that Wang Jun already knew that her identity had been exposed and that's why she had left?

"Perhaps, Han Zhong is looking for me because of this matter." Ji Feng said.

"Who is this Wang Jun anyway?" Xiao Yuxuan asked. She knew that there was something wrong with Wang Jun's identity, but had never asked about it because Ji Feng had explained to her that this matter would be left to Han Zhong to deal with on his own, so she had always pretended not to know.

Originally, Xiao Yuxuan hated this kind of disguise, and could not pretend, good thing is that she is the boss of the company, need to deal with too many things, every day there are endless things to do, naturally, there is no need to be like other women, all day to go shopping with friends and so on.

Otherwise, with Ji Feng and Han Zhong's relationship, Xiao Yuxuan would need to show how to get closer to Wang Jun.

Ji Feng shook his head and said, "What her identity is, I'm actually not very sure."

Zhao Kai once wanted to secretly investigate Wang Jun, but Ji Feng did not agree. Although he knew that Wang Jun must belong to a certain power, he really didn't know much about what exactly she was from.

Xiao Yuxuan said, "You still really plan to let Han Zhong handle it by himself, huh?"

Ji Feng said, "It's hard for others to interfere in such matters. Besides, it's rare for Han Zhong to fall for someone, so as a friend, I definitely have to make him whole."

Xiao Yuxuan shook her head and said, "I am not optimistic, that person Wang Jun looks innocent, but in reality the more such a person actually has more thoughts in her heart. Although Han Zhong is also very shrewd, but if he still has illusions, he may not be able to play over Wang Jun."

Ji Feng said, "The key problem is that I'm afraid Han Zhong wasn't with an attitude of playing from the start."

"Then you're still comfortable letting Han Zhong handle it entirely? Aren't you afraid that he'll really get caught up in it?" Xiao Yuxuan asked.

"At this point, I still believe in Han Zhong, he's still able to keep his wits about him." Ji Feng said, "I've also been busy this time, and I haven't had a good chat with Han Zhong for a long time."

"Then it's time for you to talk to Han Zhong tomorrow, don't let that woman ruin him." Xiao Yuxuan said worriedly.

Ji Feng nodded, "I'll go find him tomorrow."

That night.

Having not seen each other for over a week, it could be said that a small farewell was better than a new marriage. Ji Feng enjoyed all the tenderness and lingered to his heart's content.

However, after the clouds had closed and the rain had stopped, Ji Feng unexpectedly found that he could originally stimulate the biological currents in Tong Lei's body through this kind of excitement, but it was only an aid, but now he found that Tong Lei's two women were extremely responsive, and when Ji Feng asked them afterwards, Tong Lei's two women just blushed and shook their heads, just not saying what they were feeling.

But from their reactions it could be seen that they were enjoying themselves.

"Tell me, what exactly does it feel like?" Ji Feng asked with a bad smile, "Does it feel so exciting to have a small farewell?"

"Bah!"

Xiao Yuxuan pushed him and spat, "Don't say that!"

Tong Lei, however, had already turned sideways and turned her back on them. Apparently she wasn't going to say anything either.

Ji Feng laughed badly twice, but his heart suddenly moved, could it be, because of the phase-free energy?

You know, in the past, he would often fail to see Xiao Yuxuan and Tong Lei for a while, and naturally, he would linger to his heart's content after a small reunion, and although the two of them would also react strongly at that time, it wasn't that strong.

The problem was that not only had he been injured, but the bio-current in his body had also been greatly depleted when he had transferred his wisdom brain into his new body, and it had not even recovered to half of its previous level by now.

After Ji Feng thought about it, the only thing that had changed was that he had cultivated the Phaseless Energy and a new energy had been created in his body, the Phaseless Energy.

And when he was tangling with the two girls, since he had to use bio-current as an aid to help them cultivate, when he was pushing the bio-current, he naturally also pushed the phaseless energy into the two girls' bodies.

"Phaseless energy still has such magical effects?" Ji Feng thought badly, then in the future, even if he couldn't do it one day, he could just as easily use the phase-free energy to make his women stimulated again and again!

..... blah blah blah!

How can a man not be able to!

.....

A night of warmth, by dawn, Ji Feng only felt refreshed, his spirit had never been more exhilarated, and by this time, he became even more aware that I'm afraid this phase-free energy is really magical, and not just a psychological effect on him.

"Phaseless Energy"

Ji Feng couldn't help but recall Shen Jingyi's description of the Phaseless Energy, which was a Daoist heart technique, and although it was said to be a traditional martial art, it was also said that it was a technique created in ancient times by someone who wanted to cultivate to become immortal. At that time, when Shen Jingyi said it, it was obviously only said as an anecdote, and Ji Feng didn't believe that there was really such a thing as becoming immortal.

However, he did not completely deny it either.

After all, even the artificial intelligence of the Gamma Galaxy he could encounter, so what else in this world could not happen?

In any case, this Phaseless Gong did not seem as bad as Shen Jingyi had said, it was not a rubbish gong method, at least it was effective for Ji Feng.

“Could it be that Liu Chaoyang knew the secret of the Phaseless Kung Fu and that’s why he gave this heart technique to himself?” Such a thought flashed through Ji Feng’s mind, but then he dismissed it, if Liu Chaoyang knew about it, he was afraid that he wouldn’t give it to himself, besides, Liu Chaoyang’s strength might not be stronger than his, if the Phase-less Kung Fu was really that amazing, why didn’t Liu Chaoyang cultivate it?

These things, Ji Feng could not figure out for a while. He could only suppress them in his mind for the time being, planning to find Shen Jingyi to discuss them if he had time, or to look for Liu Chaoyang if he went to Yanjing.

For now, he had to go and prepare breakfast first, then go to the company to talk to Han Zhong.

When he arrived at the company in Xiao Yuxuan’s car, Ji Feng didn’t go to find Han Zhong first, but went straight to the security department, first he talked to Yi Xingchen about the company’s security and asked about the situation during this period of time, and then he intended to go to the battle team to take a look, but he was surprised to learn that Zhang Lei was not on the island.

“Zhang Lei left yesterday.” Yi Xingchen said.

“Where did he go?” Ji Feng asked unexpectedly.

Yi Xingchen shook his head, “Not too sure, he said he was going back to his hometown, I didn’t ask much about the details.”

Ji Feng frowned and asked, “Just him?”

Yi Xingchen said, “I think so.”

Ji Feng couldn’t help but say, “Old Yi, you are the captain, Zhang Lei, the vice captain, is going somewhere, you have to ask, otherwise once something happens, if you ask three questions like now, won’t that be a problem?”

Yi Xingchen nodded with a smile and said, “Okay, I’ll pay attention next time.”

Ji Feng was then a little helpless.

He knew that Yi Xingchen was actually trying his best to avoid suspicion, not wanting to cause strife with Zhang Lei. In fact, according to Ji Feng’s intention, he also didn’t want the two of them to have any conflicts, and in the future, Xiang Yongzhan would be in charge of the security on the island, while Zhang Lei would be in charge of the battle team.

But the problem is, right now Zhang Lei may still be a bit inexperienced and still needs to learn from Yi Xingchen in this regard, so for the time being, Zhang Lei cannot be allowed to take on the role of captain.

But Yi Xingchen was now clearly giving way to Zhang Lei in advance.

“Old Yi, we are also brothers who have been born into death together, you know my character very well, and Zhang Lei is also my brother, that’s right. However, he doesn’t have much experience now, he still needs more help from you in this area, you can’t go backwards.”

As he spoke, Ji Feng handed Yi Xingchen a cigarette and said sincerely, “I know you’re tired and don’t want to live this life of fighting and killing anymore, otherwise you wouldn’t have ended the mercenary corps and come back to China, but right now you can’t back out yet, how about covering for a while longer?”

Ji Feng knew very well that Yi Xingchen’s return to China meant that he didn’t want to live that life of licking blood on a knife’s edge again, and he had earned enough money to live comfortably for the rest of his life, even to the point that his grandchildren would have enough to spend.

But he treated Yi Xingchen like a brother, so he said it straight away.

Yi Xingchen nodded and said, “Okay, since you said so, then I definitely have no second thoughts.”

Ji Feng nodded and said, “Don’t have any worries, you know that person Zhang Lei, he is definitely not someone who is keen on power.”

“That I know.”

Yi Xingchen laughed, “If he wants power, with his background, with his career path not twenty years, he can be in a high position and become a big shot, no need to come here to toss actually I can’t see what the future path should be.”

Ji Feng smiled, froze for a moment, the future of the road how to go?

He pondered for a moment, weighed his words and said, “I can’t control exactly what the future will be like, but I can guarantee that as long as we follow this trend, in the future, our path will be wide and broad.”

Yi Xingchen nodded and said, “I hope that’s the case too.”

Ji Feng patted his shoulder and stood up, he knew that right now Yi Xingchen was still unable to understand his words, but he himself had this ambition, the technology of the Gamma Galaxy, sooner or later he would have to take it all out, and by then, the whole world would be different.

Leaving the Security Department, Ji Feng immediately dialed a phone number to Zhang Lei.

“Crazy, what’s up?” Zhang Lei’s voice was still as loud as ever, “Say something quickly, I’m in roaming status and the mobile phone bill is expensive.”

“Roaming?”

Ji Feng asked at once, “Didn’t you go back home?”

Zhang Lei laughed harshly, “I’m in the Middle East, you’ve met Yi Xingchen haven’t you? That was just a figure of speech on my part.”

Ji Feng couldn’t help but be stunned, “What are you doing in the Middle East?”

“Traveling, Jing Yi and I haven’t had a proper outing since we fell in love, now it’s just the right time to come over here and have some fun.” Zhang Lei laughed, “Alright, I won’t talk to you more, I’ll elaborate on it when I get back.”

“Hey

Before Ji Feng could say anything, Zhang Lei hung up the phone, and Ji Feng couldn’t help but be stunned.

Campus Master Chapter 3167

This was a surprise to Ji Feng, who had never heard of Zhang Lei’s intention to go on a trip before, and moreover, to the Middle East.

The fact is that Zhang Lei had been working hard for so long, so if he was really going on a trip, it would be good to take the opportunity to relax.

Since he couldn’t find Zhang Lei, Ji Feng didn’t stay in the security department any longer, it wasn’t too late to wait for Zhang Lei to return. So after Ji Feng put away the phone, he went to the office building.

“Mr. Ji!”

Ji Feng had just arrived outside Han Zhong’s office when he saw that in the small office outside was a young girl sitting there. This girl was dressed in a professional outfit and wore a pair of black-framed glasses, which gave her a very competent look.

Ji Feng asked, “Why are you sitting here?”

The girl said, “I was temporarily transferred over to take on the role of General Manager Han’s assistant, are you looking for General Manager Han?”

Only then did it dawn on Ji Feng, it seemed that after Wang Jun left, Han Zhong should have found another assistant. He couldn’t help but mutter secretly, although this guy Han Zhong was unlucky in terms of relationships, this eye for beautiful women was really good, although this female assistant was dressed in professional clothes, her body was quite good and her face was also very pretty, she was a beautiful woman.

“Is your General Manager Han here?” Ji Feng asked with a smile.

“Yes, please.” The girl said.

Ji Feng nodded, walked around the desk, went to the inner room and pushed the door in, then he saw Han Zhong sitting on the wide boss chair behind the desk, his hands clasped around his arms, half lying on the backrest of the chair, his eyes closed, looking as if he was faking sleep.

“What’s up?!”

Han Zhong asked indifferently, without even opening his eyes.

Ji Feng smiled and said, “Mr. Han, someone is looking for you!”

Han Zhong immediately opened his eyes and when he saw that it was Ji Feng, he couldn't help but smile, "Who's looking for me? How come you came in without knocking."

"You brat!"

Ji Feng laughed, "Confused from sleep, right?"

Han Zhong laughed harshly, "Finished with your work?"

Ji Feng nodded, "Almost done, I heard from Yu Xuan that you were looking for me for something, so I just came over to see you."

Han Zhong didn't ask Ji Feng what exactly he was busy with and nodded, "There was originally something, but it's almost taken care of."

He said, he took out a metal box of cigarettes from the drawer, handed one to Ji Feng, and then lit one himself, "Try this, usually it's not convenient to smoke when Wang Jun is around, today it's just that no one is in charge, so have one."

Ji Feng laughed: "What kind of cigarette is this?"

"An old boss who came to talk about cooperation last time gave it to me, said it was their local specialty, and it tasted pretty good." Han Zhong laughed.

Ji Feng knew that there was a wide variety of cigarettes nowadays, and they were different in every place, especially now that there was local protection in many places in terms of tobacco, except for those famous cigarette brands, basically many cigarettes sold better locally and were almost invisible in foreign places.

But there are some small brands or some cigarettes that you have never heard of that may taste even better than those expensive cigarettes.

Ji Feng took two puffs, the taste was light and not choking at all, the taste was indeed good.

"By the way, you were looking for me before, what is it?" Ji Feng asked after the two of them had chatted for a few minutes.

"It's nothing much, I just found out that someone seems to be spying on me recently." Han Zhong said.

Ji Feng frowned: "What did you say?"

Han Zhong said, "This was also discovered by Wang Jun, she inadvertently came across two people who were installing surveillance cameras in front of my house, so she followed them and found out that they actually lived in the building opposite me and their rooms were facing my house. I investigated those two people and they were not from our company, nor were they family members of company executives."

Ji Feng's face immediately sank, "When did this happen?"

He didn't doubt Han Zhong's words, because he knew that the buildings where Han Zhong lived were the company's senior management buildings, and only the company's senior management were qualified to live there, while the other buildings were also where the company's middle management

lived, and since those two people weren't from the company, they naturally weren't qualified to live there.

There was no doubt that those two people appeared in the district, even if they were not spying on Han Zhong, they definitely had ulterior motives.

Han Zhong said, "It was just two days before I looked for you, and then I watched carefully, and I did find them."

"I know!"

Ji Feng nodded and said in a deep voice, "Take care of your own safety first, just have this matter in your mind, don't make a sound first, I'll handle it."

"I understand."

Han Zhong laughed bitterly, "It seems I really have to take your advice and have a bodyguard before I can do anything. Just this matter is still being used by Wang Jun to instigate me."

He originally had a bodyguard, but after coming to Island No. 1, he felt that the island was safe enough and he was not used to having a bodyguard with him, so he let the bodyguard go back to the security department. Ji Feng had once told him to have a bodyguard, but Han Zhong had never taken it seriously either.

But now, Han Zhong really had a sense of crisis in his heart.

Ji Feng said: "Can you see now? Even if it's tightly guarded, there are definitely areas of oversight. You must pay attention to your own safety precautions in general, otherwise, in case something really happens one day, it will be too late to regret."

Han Zhong nodded and smiled, "Now I do know, I'll go to find Yi Xingchen later and ask him to assign me a bodyguard."

"You don't need to go find him, I'll inform him." Ji Feng said, this situation that Han Zhong said made him greatly alert, this is still just surveillance, if those two people are not spying on Han Zhong, but trying to assassinate him, then the consequences

When you think of the consequences of losing Han Zhong from the Tengfei Group, Ji Feng couldn't help but break out in a cold sweat.

The first thing you can do is to take a step back, even if it's not for the sake of the Tengfei Group, Han Zhong as his friend, he absolutely can't accept the result of Han Zhong's accident.

"That's fine, I'll be relieved if you arrange it." Han Zhong smiled.

"Relying on bodyguards alone won't guarantee your safety 100%, I think ah, you'd better set aside some time every day to follow and practice your skills in the security department, even for self-protection, there's no harm in practicing." Ji Feng said.

When Han Zhong heard this, he immediately said with a bitter smile, "Or don't, you have no problem asking me to work overtime for a month straight, but asking me to practice martial arts"

He looked at his round figure and shook his head bitterly.

In fact, Han Zhong is not fat now, only that his body shape is the kind of almost cylindrical general body shape, and generally people with athletic talent, basically the back is inverted triangle figure, the lower body is also extremely strong and powerful, in this point Han Zhong is really innately lacking.

He had practised before, but no matter how much he practised, he was at most more flexible, but if he had any achievements, it was almost negligible.

So now Han Zhong only practices gymnastics as a basic exercise to strengthen his body, other than that, he really has no interest in sports at all.

Even when he practises gymnastics, he doesn't have the feeling of being transformed by others.

So he knew that when it came to sports, he was a Grade 3 cripple.

"You ah"

Ji Feng couldn't help but shake his head and laugh, saying, "I won't let you practice fighting this time, instead I want you to practice ancient martial arts, or at least improve your physique."

Han Zhong laughed, "Then it's the same for me to practice body building exercises, which can also have the same effect of strengthening the body. Haven't you noticed, in the last year or so, I haven't even had a cold, and the after-effects of being drugged before are completely gone, so I think that's fine, it's better to stop tossing and turning."

"Well, since you insist on not practicing, then let it be." Ji Feng shook his head and laughed, "By the way, you just said that Wang Jun instigated you?"

"Yes!"

Once this was mentioned, Han Zhong's good mood suddenly disappeared without a trace, "Just because she found out that someone was spying on me, so she immediately came on strong and actually started directly persuading me to leave myself behind"

Ji Feng listened and couldn't help but shake his head, he looked at Han Zhong's expression and asked, "Han Zhong, are you still trying to get her to turn back?"

Han Zhong exhaled a puff of smoke and said, "If she can turn back, that would be the best thing. Honestly, I kinda like her, even if I know she has problems, but she is indeed attractive, smart, pretty, especially with some of the things that come out without thinking."

His hand gestured, trying to enhance his illustration, "Some flair, I guess, does appeal to me. If she didn't have problems, I would definitely fall in love with her without reservation!"

Ji Feng cautioned, "Han Zhong, I can understand this feeling of yours, but that's a dangerous thought. If you really think that way, then it won't be far from you falling."

"Don't worry, no matter what exactly her purpose is in approaching me, no matter what, I won't let her get away with it." Han Zhong said, "You give me a little more time."

"You're still not dead set on it?" Ji Feng asked.

"I want to try one more time!" Han Zhong gritted his teeth and said seriously.

"And what if she never repents? Or, she doesn't give a bit of true feelings at all from the beginning to the end, and then you get stuck in instead, think about the result!" Ji Feng couldn't help but say.

Han Zhong was silent for a moment, until the cigarette burned his hands, then he heavily pressed the cigarette into the ashtray and said through clenched teeth, "Then I'll admit it! If you want to find a wife, you always have to pay a price!"

Ji Feng wanted to say, from Wang Jun's past behavior, she has not died after such a long time, and is still instigating Han Zhong, trying to make her turn back, I'm afraid it's more difficult than the sky, it's better not to hold any hope. But seeing the look on Han Zhong's face, he finally did not say anything.

It was clear that Han Zhong himself was aware of this, but he would not turn back until he hit the south wall, and he would not die if he was not allowed to see the result.

Campus Master Chapter 3168

"Right now, everything is going well for the group, but the problem is that right now, the situation ahead is getting more and more tense, especially for our Chinese ships, and originally some ocean-going cargo ships, in order to avoid getting into trouble, had to take a detour." Han Zhong said, "This still has a pretty big impact on the transportation of goods."

Ji Feng said, "It's not something we can decide, let's wait a little longer, it certainly won't go on like this for a long time."

He knew very well that the southern sea was an important corridor in China's marine transportation.

This was especially true for ocean-going international transportation.

Because of the blockade imposed on China by countries like Rice and Kepong, China's international ocean-going fleet, whether going out or coming in, had to go through the blockade island chain. Usually, the fleet coming from the Pacific Ocean would basically make a resupply stop at Kepong, which was normal to say, but was actually the helplessness of being stuck at the throat.

This is why there is also the great land transport artery, which is the response of the top brass to break the blockade of those countries on the ocean.

But although work has already begun on this land transport artery, it will take a short time to complete it, and now that the situation in the southern seas is so tense, transport will inevitably be affected.

This would undoubtedly increase the cost of transportation significantly, slowing down the flow of the Tengfei Group's goods to the world, which is definitely not good for a group of companies.

"Actually, from the company's point of view, it's best not to go to war." Han Zhong said, "Once the war starts, Island No. 1 can almost be said to be next to the position, so we really don't know what the situation will be then."

"No matter what the situation is, I'm afraid that this battle is inevitable." Ji Feng said, "Just because of this situation, moving around and having people stuck in our necks, that's why this battle has to be fought, and it's still being imposed on us by others."

Of course, China did not want to fight a war, which was why it had found another way when it was stuck in the neck. But naturally, countries such as Rice and Kepong do not want to see this happen, and once the lion that is China breaks free of its cage, one can think even with one's heels how terrible the outcome will be.

That is why there is this war.

In fact, from the moment China began to rise, this war was going to be fought sooner or later, it was just a matter of time.

And for Ji Feng, he was looking forward to this war instead, it was crucial for China to break through the blockade!

"The group's business as usual is just that, affected, then compress the business a bit." Ji Feng said.

"I understand."

Han Zhong nodded and said, "At the moment, the Group's business is already actively expanding, especially in the heavy industry and the pharmaceutical industry, there are now quite a few projects in the pipeline, some of which have already started in the lab. Those technologies you gave are enough for the group's technical experts to digest."

Ji Feng nodded and said, "These two directions are right, industry is the cornerstone of the country and will not disappear and become obsolete at any time while medicine, likewise, is a top priority."

For a country, the importance of industry is indisputable, without a complete industrial system, sometimes even a screw has to be imported from abroad, that kind of scenario, it is really sad.

Just like China's neighbours, the three Asian countries that have been targeting China, they have extremely advanced biological and pharmaceutical technology in the world, but just because they do not have a complete industrial system, their army is equipped with a large number of advanced weapons, but their own country cannot even produce bullets, and they still need to import from abroad.

In this regard, after decades of development, China has gradually made up for this shortcoming. Although there is still a huge gap between the industries of advanced countries such as the US and Europe, and some even say that in terms of systems and standards, there is a gap of nearly 100 years, in reality, China has at least the basis to catch up.

Ji Feng wants to use his own efforts to make this catching up process a little shorter and easier.

Similarly, for the Tengfei Group, making industry one of the group's pillar industries is definitely very sensible and something that Ji Feng strongly requested.

At the very least, if it was possible to build a starship in the future, it must be from now on that the foundation was laid!

Medicine is even more important and deserves all the praise it can get.

Many years ago, the mere appearance of penicillin saved the lives of an unknown number of people, and it still plays a huge role to this day.

The pharmaceutical industry, with its immense merits and profits, is even more amazing!

Xiao Yuxuan and Han Zhong, after discussing the matter and conducting a survey and analysis of the market, finally agreed to the general development plan formulated by Ji Feng.

Thus, the industrial and pharmaceutical projects were put on the agenda early on.

And since the business volume of the Tengfei Group has declined somewhat due to the tense situation, Xiao Yuxuan and Han Zhong are even more clearly aware that relying on products such as 3D TV sets and Kang Yuan slimming powder to fight the world is simply not a long-term solution, and definitely cannot make the group a behemoth that can stand.

This is because, no matter whether it is a television set or a weight loss health product, they are not essential things in people's lives, and as long as the situation is slightly unstable, these things are extraneous and will be discarded at the first opportunity.

It is with this in mind that the Tengfei Group has gradually begun to transform!

"However, there are still not enough scientific researchers at the moment." Han Zhong said, "Although the treatment on our side is good, because the spread is so big, there is still a serious shortage of manpower."

"This problem" Ji Feng also had some headache, talents, this is what everyone wants, even the current state-owned enterprises, also began to attach importance to talents long ago, now is not at all the era of the 1980s and 1990s that state-owned enterprises lost technical personnel in large numbers, not to mention those Private enterprises, the talent is even more important.

Of course, this is all about large private enterprises, and few real talents are willing to go to small and medium-sized enterprises.

"Now the counterpart training of students at United University has expanded to more than a dozen majors, and every year more than a hundred people join the Tengfei Group, the reserve strength below the middle level is enough, but now we lack the real cutting-edge expert type talents."

"Then can we cooperate with other research institutions?" Ji Feng asked, "Especially university research institutions."

"That's the problem."

Han Zhong shook his head and said, "It's fine for enterprises and schools to conduct joint research, but this type of cooperation doesn't work for us because we have ready-made technologies, what we need to do is to digest and absorb these technologies, eat them up, and then conduct applied research."

"That's true!"

Ji Feng nodded his head. If we cooperated with the university's research institutions, would it be better to give those expert professors a direction and let them do their own research, or would it be better to just give them the technology and let them learn it? The former research would take a long time, not to mention that it might not be able to yield any results.

In the latter case, whose technology will it be? How will the benefits be distributed? These are all questions.

Nowadays, the cooperation model of the technical talents of the Tengfei Group is basically that the technology patents belong to the Tengfei Group, while the papers published by the experts and professors during the research process and the honours they receive all belong to them personally, in addition to a guaranteed high salary and a generous reward after the products are put on the market.

This model of cooperation is undoubtedly a win-win situation for both sides.

The Tengfei Group makes technological advances, and the technicians gain honour, a place in the scientific community and, of course, a large amount of money.

But if one cooperates with outside researchers and institutions, this is not well distributed.

“Regarding the research institutions, I’ll think of something, and also, you try to cast your net around, such as those who are ostracised by the leaders at the university but have real talent, these can be approached and try to convince them to come and work for the Tengfei Group. Although we are not an iron rice bowl here, the income is definitely not low either.”

Ji Feng mused, “In addition, for those PhDs, or outstanding postgraduates, we can also increase the treatment, as long as they have real talent, we can afford the price!”

Han Zhong said, “We’re already doing these, but it’s still difficult to work in a short time. In fact, the rapid development of any company is accompanied by a shortage of talent, and the key is that our technologies are all too cutting-edge, and what’s missing are people who are really capable, which is harder to find.”

“You’ll have to worry more about these.” Ji Feng said, “This shortage of talent will last for a long time, and I’m afraid it will be like this for the next few years, so you should be mentally prepared.”

“I’ve already thought of that.”

Han Zhong laughed, “In fact, this has been the case for the past few years, although I don’t know where all your technology comes from, anyway, I’ll try to recruit as many researchers as possible.”

Ji Feng laughed, “That’s right, that’s what I mean.”

In fact, he did not say another layer of meaning, now he took out the gamma system technology, is still the most basic, there are many more advanced things have not been taken out, and each new technology, need a large number of cutting-edge talent to focus on research, the need for more talent.

The company has been sitting in Han Zhong’s office for more than an hour before Ji Feng left.

After leaving the office, Ji Feng’s brow furrowed slightly. Through the conversation just now he realized that although Han Zhong said that he was looking for him a few days ago for the matter of Wang Jun, he could hear that in fact the matter of Wang Jun was not the main point because Han Zhong’s heart had already made up its mind.

The real reason Han Zhong had sought him out was because he had discovered that someone was spying on him.

“Intelligence team”

Ji Feng couldn't help but say in his heart, “If it's someone from the intelligence team, then we really need to find Zhao Kai to have a good talk.”

Like Han Zhong's thoughts, Ji Feng analyzed in the first instance that the person spying on Han Zhong was in all probability someone from the intelligence group, and there was no doubt that this was Zhao Kai's intention.

Campus Master Chapter 3169

Coming out of Han Zhong's office, Ji Feng went straight to Zhao Kai.

The department that Zhao Kai was working in now was called the General Office. It seemed to be responsible for everything, but in reality, this department was neither responsible for logistics nor clerical duties. To put it bluntly, it was just a department set up to cover up for people's ears.

Although the entire headquarters of the Tengfei Group was in the same building, Zhao Kai's office was a few floors away from Han Zhong's office.

Without informing Zhao Kai in advance, Ji Feng walked directly towards his office.

“Whew~!”

Just as Ji Feng arrived at the floor where the General Office was located, just as he stepped out of the lift, there was a sudden flash of a figure in front of him, which he immediately dodged, but the figure opposite him was startled and seemed not to have reacted, and stumbled and almost hit the wall when he couldn't dodge.

“What the fuck!”

The man shouted lowly, extremely annoyed.

Ji Feng frowned a little, this was a young man who was probably less than thirty years old, he should be about the same age as him, not much more than a few years, but at this moment, this young man was cold-faced, glaring, looking very impatient.

More importantly, Ji Feng felt that there was something overbearing about this person.

“It seems like you almost bumped into me, right?” Ji Feng asked with a frown.

“.....”

The man glanced at Ji Feng with a somewhat cold look in his eyes.

Ji Feng said indifferently, “Pay attention in the future, this is a public place, not your own home, don't be so domineering.”

After saying that, he turned around and left.

But just at this moment, the young man snorted coldly, “I think you don't want to be nice!”

Ji Feng's newly raised foot immediately fell, turned to look at the young man and asked, "Which department are you from?"

"What, want to find my leader, or want to fire me?" The young man sneered, "I'm from the General Office, fire me if you can!"

Ji Feng couldn't help but be stunned, it wasn't that he was surprised that this person was from the General Office, it was that this person glanced at him as he spoke, and in those eyes, there was actually a threatening smell.

This made him really astonished, so what if you are from the Integrated Office? By reporting the name of the General Office, you can threaten people?

"Are all the people in the General Office as bullish as you are?" Ji Feng was almost exasperated and couldn't help but ask.

"So he's a newcomer, no wonder he's so unaware of the sky!" The man pointed at Ji Feng and shook his head with a snicker, "Just wait, you'll soon know if the people in the General Office are bulls."

With that, he nodded at Ji Feng again and grinned, before turning around and leaving.

Ji Feng stood at the same spot looking at his back and couldn't help but frown. This person from the General Office was really a formidable man!

Shaking his head, Ji Feng also turned around and left.

However, he was a bit uncomfortable in his heart, if it was just that young man being arrogant and domineering, it would be fine, everyone's character was different, when he met a domineering one, Ji Feng really wouldn't have been ordinary with him.

But the young man actually raised the name of the General Office to pressure him, that means as if he is the General Office, is the superior leadership general, this makes Ji Feng very unhappy.

When did the Integrated Office have such great power?

The company's main business is to provide a wide range of services to the public.

This is how Zhao Kai leads the comprehensive office?

The walls of the General Office were double-glazed, with one layer of frosted glass and another layer of specially treated tempered glass, which ensured that the glass walls were sturdy and did not obstruct light, while maintaining a certain amount of hidden space.

Ji Feng arrived at the door, but found that the glass door of the intelligence team was actually closed, and the electronic lock on the door was actually locked.

He took out his staff card and swiped it on the sensor, and the room door suddenly beeped, not only did it not open, but it actually sounded an alarm!

Ji Feng secretly nodded his head, it seemed that Zhao Kai's vigilance was still good, ordinary staff cards could not swipe the door of the intelligence team.

“Excuse me, who are you looking for?” The sound of the alarm alerted the people inside and a woman dressed in a professional outfit came to the door and asked.

“I’m looking for Zhao Kai.” Ji Feng said.

“May I ask if you are?”

“I’m Zhao Kai’s friend.” Ji Feng said.

“Our director is not in and went out.” The woman said.

“Not in?”

Ji Feng asked, “Where did he go? Isn’t it office hours and he’s not in the office?”

The woman said, “I don’t know. Sorry, I have work to do, you can contact him directly by phone, or leave your name and we’ll come back to contact him.”

Ji Feng nodded: “Thanks, I’ll just contact him myself.”

The woman saw this and said nothing more, turned around and went back to her seat. Ji Feng smiled and swept his gaze from inside and found that there were almost 13 or 14 people in this large office, each sitting in front of the computer and busy, it was a busy scene.

Since Zhao Kai was not here, Ji Feng did not stay here much longer, and when he returned to Xiao Yuxuan’s office, he sat on the sofa and called Zhao Kai.

“Ji Feng, are you done?” When the call was answered, Zhao Kai asked with a smile.

“I finished being busy yesterday.”

Ji Feng knew he was talking about the busy work in the lab, “I just had time today so I wanted to talk to you guys, just now I went to the office to look for you, but it turned out that you weren’t in”

Zhao Kai said, “I’m abroad!”

Ji Feng froze for a moment, “You went abroad? When did you go?”

When he was chatting with Han Zhong earlier, Han Zhong still said that Zhao Kai should be at the company, how come in this turn of events, Zhao Kai had actually gone abroad?

“It’s only been here for two days!”

Zhao Kai explained, “There’s a small problem over here in Europe, I came over to deal with it, and I’ll be back in a couple of days, what do you want to see me about?”

Ji Feng frowned at his words and asked, “It’s an information matter?”

“Yes, someone over here has been sued, I came over to check the situation.” Zhao Kai said vaguely, “It’s not convenient to say on the phone, I’ll elaborate on it when I get back.”

“Alright then, let’s talk about it when you get back. I don’t have anything important to find you, I just want to talk to you.” Ji Feng said.

“No problem, I’ll go back after I’m done with this side.” Zhao Kai smiled.

Ji Feng nodded, “Then let’s do that first.”

After hanging up the phone, Ji Feng couldn’t help but turn his head to look at Xiao Yuxuan and asked, “Yuxuan, did Zhao Kai tell you about leaving the country?”

“No.”

Xiao Yuxuan shook her head and said, “I don’t usually ask about this, he just needs to call the president’s office to apply before he goes out.”

Ji Feng frowned, “It’s that simple?”

“Of course there must be a reasonable explanation, and if reimbursement is required, the audit will be much stricter, including tickets, airline tickets and even invoices for accommodation hotels, etc., all need to be available. Moreover, if you go abroad, you also need to have a valid reason, if it’s not during work, then it’s no problem.”

Xiao Yuxuan explained briefly, now that the group’s spread was so big, she, the president, naturally couldn’t do everything herself, otherwise, she would be exhausted just by being tired, not to mention the office and all.

The Tengfei Group has developed to the point where everything is on the right track, and there is a system for everything, as long as it is followed.

“However, the situation in the General Office that Zhao Kai is in charge of is a bit special, because of the nature of the work, there is no way to tell if the people in the General Office are working or not, especially if they are in the field.”

Xiao Yuxuan added, “Although the company has a rule that everyone other than staff involved in technology as well as corporate secrets must turn on the satellite positioning of their mobile phones during work, there are still more or less omissions, which cannot be avoided.”

“Mm, I understand.”

Ji Feng nodded, although the Tengfei Group was on island number one, this was not an independent kingdom, in the end the Tengfei Group was just a group company and could only use the company’s system to manage its staff.

He suddenly realised that the management of the company, was somewhat confusing, or to be precise, he had not considered it properly before.

“Actually, I’ve been considering recently whether it’s possible to carve out the General Office.” Xiao Yuxuan suddenly said.

“Carve it out?” Ji Feng asked, “How so?”

Xiao Yuxuan said, “The situation of the General Office is too special, it is not suitable to lean under the company, because the main business of the company is operation, and the nature like the General Office is similar to those international commercial information investigation companies, so my idea is

that it is best to be able to divest the General Office and set up a separate company, which does not need to have a subordinate relationship with the Tengfei Group, but cooperate with each other. ”

“In that case, wouldn’t the General Office have more autonomy?” Ji Feng asked.

“That’s why someone needs to be in charge!” Xiao Yuxuan said, “But management will always be passive, the truly efficient way is to supervise each other.”

Ji Feng’s heart stirred, “You mean ……”

Xiao Yuxuan said, “I think, put the battle team, or separate some people from the security department, together with the integrated office to form a company together, and let them run it together!”

Ji Feng immediately understood her meaning, let the comprehensive office set up a separate company, it is equivalent to a commercial investigation company, but the name certainly can not be called that, at the very least, it is also an information consulting company, after all, this nature of commercial investigation is not supported by the state.

The real point, of course, is to have the Battle Group and the General Office form a company together, but to have the General Office under the leadership of the Battle Group, so that it can not only play a supervisory role, but also improve the field capabilities of the intelligence team.

As for the Battle Group, it is a division and does not have to be nestled in the Security Department.

As for the business, it will be provided by the Tengfei Group.

“This is indeed a good idea!” Ji Feng said, “When Zhao Kai and Zhang Lei come back, I’ll talk to them.”

“I just don’t know if Zhao Kai is willing to do so.” Xiao Yuxuan said.

Ji Feng understood what she meant, the current General Office, it looked like there were some very bad seeds, Zhao Kai was afraid that he was saying one thing in the General Office, suddenly merging with someone and having to be subservient, I’m afraid not many people would be willing.

“Let’s talk about it!”

Ji Feng was silent for a moment before he slowly said.

Campus Master Chapter 3170

“Phew~”

Slowly opening his eyes, Ji Feng exhaled a breath of turbid air.

In his eyes, a touch of joy could not help but appear. This was already the third day that he had officially started cultivating the Phaseless Technique, and this time, his feeling was even more pronounced.

He was in a better state of mind than before, and if he didn’t know that this was the result of cultivating the Phase-less Kung Fu, he would even think that he wasn’t a bit hyper.

Practising the Phaseless Energy, Ji Feng could actually feel the power of the Phaseless Energy. If the first two days of cultivation, there was only a trace of Phaseless Energy in his body, then by today, the Phaseless Energy had spread all over his body.

Although, the proportion of Phase Free Energy in his body was still pitifully small, like a small drop of some other liquid into a large bucket of water, it was unremarkable. However, Ji Feng could feel that the sliver of phase-free energy was constantly fusing with the bio-current in his body, or in the words of the intelligent brain, devouring it.

The most important thing was that there was no repulsion between this phase-free energy and the bio-current in his body, and it even fused well.

Ji Feng also found that although the phaseless energy was able to devour the bio-current, it was not an unlimited devouring though, but there was a certain limit, after devouring a certain amount of bio-current, it stopped devouring, and then the two energies were at peace with each other and existed together within his meridians.

He even had some expectations of what would happen if he persisted in his cultivation and waited until the day when the phase-free energy completely devoured the bio-current.

From the looks of it now, by that day, his strength would definitely soar, and he would even make a qualitative leap.

In these three days, during the daytime Ji Feng would go to the laboratory to check on the intelligent brain, and at night he would cultivate the Phaseless Gong. However, although he felt that there should not be any harmful effects from the Phaseless Energy, the Phaseless Energy was able to devour biological currents after all, and he did not dare to assert what the final result would be, so he did not dare to let Xiao Yuxuan and Tong Lei practice it rashly.

However, stimulating their bodies with the help of the Phase-less Energy and making them feel waves of pleasure like a tidal wave was a different kind of mood.

In the laboratory, the wisdom brain was also going well.

It only took two days for the Brain to fully control its new body, but due to the limitations of the workmanship and materials, its movements were still a bit stiff and it could not be as flexible as a normal human being, but in Ji Feng's opinion, it was already quite good to achieve the current effect.

Moreover, the intelligent brain is an artificial intelligence, it does not feel bored and miserable when staying in the laboratory, instead it is interested in everything, even if it is holding a pen it is able to play with it. Of course, its playing is not just playing, it is also honing its body.

"I need a device that can access the internet." The wise brain said.

"Not yet."

Ji Feng shook his head and said, "You should first get your body fully controlled and skilled, one step at a time."

Only then did the intelligent brain not insist, it had only just started to become a 'human' after all, there was still a lot to learn, after all, this body of its was not a robot, but had to be controlled completely by bioelectricity, any subtle movement that was not coherent would have an impact on the overall movement, and it would look like the movement was out of shape.

After another two days, Zhao Kai returned and took the initiative to come to Ji Feng.

“There’s one of our business investigation companies over in Europe, probably because it moves too often, it was targeted and one of its employees fell into the trap and was arrested by the local police.” After exchanging a few pleasantries, Zhao Kai first explained why he was going abroad, “Our people carried out public relations, but the effect wasn’t great, I went over there to deal with this matter.”

Ji Feng asked, “What was the result of the handling?”

Zhao Kai shook his head and said, “It wasn’t too good, and he ended up with an eighteen-month jail sentence. However, the family of that employee, was taken care of properly and was given a settlement payment.”

Ji Feng frowned and asked, “Did the employee himself have any complaints?”

Zhao Kai said, “What kind of complaints can he have? Instead of doing a good job, he brought trouble to the company, and according to the law there, we could have used this to terminate his contract, but now instead of firing him, we gave him a settlement payment and helped him hire a lawyer, so that he was only sentenced to eighteen months, he would have woken up laughing in his sleep.”

Ji Feng also didn’t know what happened in this matter, let alone the situation of this investigation company that Zhao Kai said and the local laws, so he couldn’t say much about it, but asked, “How many commercial investigation companies like this do we have in total?”

He knew that Zhao Kai had tossed around a lot in the past two years, and his biggest move was to open commercial investigation companies abroad, and the owner of each company was a local, not even a local Chinese, but a local of their country.

These commercial investigation companies are undoubtedly a powerful means for Zhao Kai to gather intelligence.

However, Ji Feng did not know much about this, and did not even know how many such companies Zhao Kai had opened.

“There are seven companies in total!”

Zhao Kai said, “There are two in Rice, three in Europe, and in addition to that, there are also in Asia.”

Hearing Zhao Kai’s introduction, Ji Feng was really surprised. In that case, the intelligence network of the Tengfei Group was really all over the world!

“On the surface, these commercial investigation companies are all operating normally, and even within the company, only the person in charge knows who the boss behind the company is, and the company’s real profits, too, come from our commissions. All these things, we have recorded, but they are recorded in a secret record, and the reporting of the accounts is also under another name.” Zhao Kai said.

Ji Feng nodded, to put it bluntly, it was that the Tengfei Group spent money to support these commercial investigation companies and let them collect intelligence, but I’m afraid that the employees of these companies still didn’t know who they were working for and who they were collecting intelligence for.

That said, it is indeed quite good that Zhao Kai has been able to make such achievements in just a few years.

But this did not dispel Ji Feng's doubts.

"Can you be sure that this is feasible?" Ji Feng asked.

"Feasible."

Zhao Kai nodded and said, "The only problem now, is that there are too many companies, the next step I plan to consolidate and pool my resources to try to create a large commercial investigation company like Eisenrock, that way, only one company in the whole of Europe would be enough, and three or four companies could be opened all over the world, and there would be more than enough intelligence gathering."

"We will slowly discuss this issue later, there is plenty of time for that later." Ji Feng said, "I was looking for you earlier because I had something to ask you."

"Hmm? What is it?!" Zhao Kai asked.

"Someone is spying on Han Zhong, do you know?" Ji Feng asked directly.

"Know."

Zhao Kai didn't have the slightest surprise, instead, he admitted it very frankly, "I sent the people, a total of two people, both field officers from the General Office."

Swish!

Ji Feng's face immediately sank down, "What are you doing spying on Han Zhong in good time?"

He guessed that it was Zhao Kai, but he didn't expect Zhao Kai to admit it so directly.

Zhao Kai said, "Actually, I didn't do it to spy on him, more accurately, I did it to protect him and to protect the company's interests from being damaged. Han Zhong is the general manager of the company, he has too many business secrets about the company in his head, but it's just that he has no one around to protect him, so"

"Kai Zi!"

Ji Feng interrupted Zhao Kai and said, "I don't want to hear these explanations, I want to know the real reason."

Zhao Kai just stalled.

Ji Feng's meaning was simple, for the sake of his brotherhood, he didn't want to hear these empty words and falsehoods, but wanted an honest explanation. This made Zhao Kai realise that not telling the truth was not an option.

In fact, Zhao Kai never thought that he could conceal the truth from Ji Feng, although he did not know what kind of ability Ji Feng had, but, at least Ji Feng was definitely not a stupid person, if this little trick could be concealed from Ji Feng, then there would not be the Ji Feng of today, much less this huge Tengfei Group now.

The company's main business is to provide a wide range of products and services to the public.

Zhao Kai deliberated and did not answer immediately, and Ji Feng was waiting for his answer and did not speak either. For a while, there was more or less a cold spot between the two of them.

“Kai Zi, why did you do that, tell me.” Ji Feng picked up his cup of tea and took a sip, saying calmly as if he was chatting idly about the day.

In fact, he hadn't planned to come up and angrily confront Zhao Kai or settle accounts or anything. Although Zhao Kai's behaviour made him a bit annoyed, he could, however, see that Zhao Kai's actions were too perverse.

To send so two people to spy on Han Zhong, if Zhao Kai wasn't too confident that the people in his intelligence team were definitely the elite of the elite and no one would definitely find out, either that, or he had an ulterior motive.

Just those two miscellaneous fish, even installing a surveillance was able to be discovered, this level was really pathetically low.

At that time, Ji Feng was a bit puzzled, was Zhao Kai that arrogant? He was worried that Han Zhong wouldn't be able to find out, or what?

But the very fact that Zhao Kai sent people to spy on Han Zhong was, in itself, too much of a step over the line!

At least, in Ji Feng's case, this was absolutely not allowed!

What does it mean when someone from one department of the group spies on someone from another department? Moreover, the person being spied on was even the general manager of the group, which was ridiculous to the extreme!

And it wasn't just Han Zhong!

Earlier on, Zhang Lei had told him that many of the Group's executives were being spied on, which Zhang Lei had inadvertently discovered, and investigated that those people were all from the intelligence team, and were all under Zhao Kai's command.

Spying on the general manager, spying on executives, spying on people from other departments

This behavior of Zhao Kai is simply insane!

But Ji Feng knew that Zhao Kai was not crazy, this was a smart man, otherwise, Ji Feng would not have thought of putting him in charge of the intelligence team.

So, Ji Feng needs to know what Zhao Kai really wants, he needs an explanation!
