

Campus Master Chapter 3171

“Are you disappointed in me?!”

Seeing Ji Feng’s calm expression, Zhao Kai couldn’t help but ask.

Ji Feng shook his head, “It’s better to tell your reason first.”

Zhao Kai then couldn’t help but let out a light sigh, it seemed that his approach had still caused Ji Feng’s displeasure, one could even say that he was disgusted.

In fact, this was something Zhao Kai had expected from very early on, however, this was just one of the reactions he had thought of from Ji Feng, but it was also the reaction he least wanted to see.

In Zhao Kai’s anticipation, Ji Feng would have had several reactions after he found out.

One, to storm out and come to him in a rage, to reprimand him head-on and make him apologise to Han Zhong and the others.

Two, without giving any chance to explain, he would simply kick him out of the intelligence team, or simply cut off the funding of the intelligence team. According to Zhao Kai’s understanding of Ji Feng, with Ji Feng’s character, he might even scrap the intelligence team outright.

Third, he would be asked for an explanation.

And of these possible reactions, the one Zhao Kai didn’t want to see the most, was the last one.

If it was the first one, it meant that although Ji Feng was angry, he was still willing to give him a chance, at the very least, so that he would have enough room for manoeuvre and space.

If it was the second possibility, it would still show that Ji Feng trusted him, and that kicking him out of the intelligence team, or even cutting off the team’s funding, was an act done in a fit of rage.

The only thing that Zhao Kai did not want to see was this third possibility.

Once Ji Feng asked him for an explanation, it would mean that Ji Feng was really going to move him, just to give him a chance to defend himself before moving him, or even to say, just a passing.

What’s more, at this moment, Ji Feng not only asked him for an explanation, but also, he looked calm, without a trace of fire.

Zhao Kai’s heart kept sinking.

Even though he had already expected it, when he was really faced with it, Zhao Kai was still a bit frightened and even overwhelmed.

Zhao Kai had rarely seen Ji Feng angry, only two or three times in all these years, but he knew better than that, when Ji Feng was calm, it was worse than when he was angry.

This meant that I was afraid that Ji Feng no longer considered him a friend in his heart, or at the very least, no longer someone he could trust.

When a person is no longer valued, there is little reason for people to be angry with you anymore. It's not that you can't be angry, but there's simply no need to be angry anymore.

Zhao Kai realised that what he had done was surprisingly inexcusable in Ji Feng's case!

He took a deep breath and said, "In fact, I've known for a long time that I couldn't hide this from you, in fact I didn't want to hide it from you, it's just that I intended to do it first."

Ji Feng nodded and handed him a cigarette, "There's no rush, take your time and talk about it, anything can be made clear."

Zhao Kai smiled bitterly, took the cigarette and lit it. The more Ji Feng said this, the more angry he was in his heart, and it also showed that he had already made a decision, and the result was very obvious.

"Not bad. Whether it's Han Zhong or the other executives in the company, I sent people to spy on them." Zhao Kai said, frankly admitting his actions.

Ji Feng listened quietly and didn't say anything.

Zhao Kai said, "I know, I can't even talk about whether it's appropriate for me to do this anymore, it's crossing the line! However, I'm not spying on them because I'm afraid they'll leak out the company's secrets, if that were the case, I definitely wouldn't just send someone to spy on them, but I would monitor their phone calls, emails and a whole range of personal information on all fronts."

Ji Feng asked, "Then why is that?"

This was what he couldn't figure out, Zhao Kai was a smart man, but looking at what he was doing, it wasn't clever at all. Sending people to spy on him was the dumbest way.

Zhao Kai said, "I did this for two purposes, one is to do it to people like Wang Jun."

Ji Feng nodded his head, this reason did make sense. He was sure that there was definitely more than one person like David Wang on Island No. 1, and this was something that could not be avoided no matter what.

Because the size of No. 1 Island had been expanding and the reclamation project had never stopped, the current No. 1 Island was nearly twice as big as the original size, and the people on the island had reached tens of thousands, of which it was impossible to check the upper and lower three generations of every single person.

Even if there were no problems with the upper and lower generations, no one could guarantee that there were no problems with them personally.

And by taking this approach of surveillance, it will make these people realise that the Tengfei Group is not so united and there are great internal conflicts.

In this way, some people will naturally jump out.

From this point of view, although Zhao Kai's approach was not too clever, the effect was definitely there, it was just unknown how much Zhao Kai had in his hands now.

"What about the other purpose?" Ji Feng asked again.

“The other purpose”

Zhao Kai hesitated for a moment before saying, “It’s to show the military.”

Ji Feng frowned: “What does that mean?”

He didn’t quite understand this explanation from Zhao Kai. It was very understandable to show it to people with bad intentions like Wang Jun, to lure snakes out of their holes. But what was the purpose of showing it to the military?

“I think that since the Tengfei Group has come to Island One and this has become the headquarters of the Tengfei Group, then the company should not be dependent on anyone” Zhao Kai spoke slowly, as if he was deliberating his words.

However, his words caused Ji Feng’s eyebrows to furrow tightly: “You say it more clearly.”

Zhao Kai took a deep breath and said, “I want the Tengfei Group, to be known as the true owner of No. 1 Island!”

Swish!

Ji Feng’s eyes narrowed abruptly, and a cold light flashed in his eyes.

He finally understood what Zhao Kai meant!

By doing this, Zhao Kai was trying to confuse the military, while his purpose was to make the Tengfei Group and the military a cooperative relationship, in other words, Zhao Kai wanted to make the Tengfei Group a separate system

“That’s your purpose?” Ji Feng asked.

“Yes.”

Zhao Kai nodded and said, “Island number one, the location is perfect and it’s a large area. It’s definitely the best choice for the Tengfei Group to be situated here, which you must know better than I do, otherwise, you wouldn’t have relocated the Tengfei Group here. However, at the moment, Tengfei Group’s dependence on the top is too serious, and even the security of the island has to rely on the military to take care of it. I hope that Tengfei Group can be the real owner of No. 1 Island, and I hope that the battle group led by Zhang Lei and Yi Xingchen can truly become a force strong enough to protect the security of No. 1 Island, so that No. 1 Island will have a high enough status in the whole world... ..”

Ji Feng looked at Zhao Kai, who at this moment, had a very different expression from his usual calmness, wearing a pair of glasses looking a bit thin, but his face had a different kind of glow.

The words of Zhao Kai even made Ji Feng’s heart shake.

He really didn’t expect that Zhao Kai’s real idea was like this, and, this idea was still so crazy!

But, and so, heartwarming!

“These ideas, how come I haven’t heard you talk about them before?” Ji Feng asked.

“Because even if I had said it, you wouldn’t have said yes.” Zhao Kai said, “Because I can tell that you want to bring up the country’s technology first and develop the Tengfei Group at the same time, but this is definitely not something that can be made overnight!”

Zhao Kai could vaguely see Ji Feng’s long-term plan, although he didn’t see it that clearly, he knew that Ji Feng definitely wanted to raise the country’s technology level more than making money and developing the Tengfei Group.

But how difficult it is to improve a country’s technological power, one only has to look at the decades of opening up to understand.

The country is too big, the spread is too big, moreover, there are too many constraints in the middle, countless people have selfish motives, for selfish interests in dragging their feet, under such circumstances, pouring out the country’s strength, it took decades to reach the present point!

You can imagine how difficult it is for Ji Feng’s idea to be realised.

I’m afraid that with a few more decades, even with Ji Feng’s help, the country will only be able to catch up with those developed countries, and it’s not even certain that it will be able to do so.

The amount of energy, resources and opportunities that would be required would be absolutely staggering!

Zhao Kai did not want to see this, but he knew that persuading Ji Feng would not be effective, so he took the liberty to make this decision.

First things first!

Do it first and then explain it to Ji Feng.

In this way, even if Ji Feng did not agree with what he was doing, he would definitely consider this idea of his. Being able to do this, Zhao Kai thought it would be enough.

In fact, he knew very well that he had definitely committed a taboo by doing this.

Because the current Tengfei Group was no longer just a business, but rather more like a group, or a force. Doing something like this behind Ji Feng’s back, or even sending people to spy on executives and general managers, was definitely a big taboo.

Therefore, Zhao Kai was even ready to leave, because he knew that what he had done would definitely not be tolerated by any other person in a higher position. That’s why he would grab all the time he could to build up the intelligence team as well as possible, and that’s why he hardly had a day off, flying almost all over the world and sleeping only a few hours a day. If he didn’t have aerobics to improve his physique, he would definitely be exhausted by now.

After explaining, Zhao Kai’s heart was instead open, he knew he was leaving, so at the moment he just looked at Ji Feng with a calm expression, waiting for the result to be processed.

Ji Feng was silent and seemed to be thinking, and Zhao Kai did not dare to disturb him.

“Remember what you promised me back then?” Ji Feng suddenly opened his mouth and asked indifferently.

“Remember!”

Of course Zhao Kai remembered that at that time, when Ji Feng saved him and his father, he volunteered to come and help Ji Feng and follow him in the future.

Zhao Kai then reacted and understood what Ji Feng meant, what he was doing now, was not helping Ji Feng, but helping Ji Feng make a decision

Campus Master Chapter 3172

Of course Ji Feng didn't believe Yi Xingchen's explanation.

Didn't find the opportunity?

He didn't believe that Yi Xingchen wouldn't have the chance to tell him, he had been staying on island number one all this time, except for those few days when he had been in the lab, but he was on the island all the other times, if Yi Xingchen wanted to find him for something, he could find him at any time.

In fact, Ji Feng knew very well why Yi Xingchen did not say anything, because in Yi Xingchen's opinion, Zhao Kai was closer to him, and Yi Xingchen knew that there was something wrong with Zhao Kai's approach, but it was not convenient to say.

I am afraid that this is what Yi Xingchen thinks.

However, Ji Feng did not want to see such a situation arise, so he said sincerely: “Old Yi, although we have not known each other for too long, but we have known each other since I arrived in Jiangzhou not long ago, since then, we have fought together side by side, and then fought together side by side how many times, I am about to lose track of it.”

“Actually it's nothing, I can't remember because I trust you guys and can safely give my back to you, so I don't need to remember that.”

Ji Feng said, “But there is one thing that I remember very clearly, when I was attacked in Nan Yue and was seriously injured, after you got the news, you immediately led the war team to Nan Yue with the fastest speed, how many times you were born into death, and how many times you were fighting for me at the risk of losing your life at any time, I know it very well in my heart.”

“I'm a person you know very well, never say anything incendiary, but since you have this concern, I can tell you frankly, you are my Ji Feng's brother in life and death!” Ji Feng said forcefully, “Not only you, Guo Tao, Liu Zejun, Yao Zhijian, Lu Gang, including everyone in the battle team, are all my brothers in life and death!”

“In my heart, you guys are more important than any of the group's executives, not to mention lower than my other friends, there's no such thing as that.”

Ji Feng said in a deep voice, “If you, Old Yi, consider me a friend and a brother, you should not have such worries in the future.”

Yi Xingchen listened and was silent for a while before he suddenly smiled, "Actually, I returned to China because I was tired and wanted to live a different life, but I didn't want to sit on my laurels, so that's why I agreed to you and joined the Tengfei Group as the manager of this security department, but actually, in my heart, I don't want to live the kind of days of fighting and killing in the past because, not seeing a future, apart from making money and couldn't find the meaning of existence."

Ji Feng nodded and listened quietly, he knew all this, Yi Xingchen had said it a long time ago.

"But actually after actually joining the Tengfei Group, it's different from what I imagined." Yi Xingchen said, "Here, I feel the kind of atmosphere that I never had when I was in the mercenary corps, it's not accurate to say atmosphere, well I should say, it's a kind of grandeur, or a fighting spirit and goal that can make people rise to the occasion."

Ji Feng smiled and asked, "How do you say this?"

Yi Xingchen said: "When I used to work as a mercenary abroad, the days were indeed fast and furious, taking orders to do so, fighting and killing, doing it with the enemy, doing it with other mercenary groups, and even, being able to do it with the employer, almost every mission, someone would die, really used to seeing that kind of life and death, but also had enough of that kind of life with the head on the waistband of the trousers.

It wasn't because I was afraid of dying, but I couldn't see the point of doing it. If you say it's for the money, you've made enough money in those few years, it's just that many mercenaries can't save much money in their hands, and the pressure of doing this business is too much, so every time they finish a mission, they go looking for excitement, either for women or for white flour, in all sorts of ways.

To say it's for glory is actually a lie. Anyway, in my mercenary group, everyone gets together just to survive and make money. After a long time of this kind of life, naturally, we got too tired of it, so that's why a few of us chose to go back home and wanted to live a bit of a normal life."

"Now in the Tengfei Group, it's not a normal person's life?"

Ji Feng asked with a smile.

Yi Xingchen shook his head and laughed, "If we're being strict, it doesn't count. Which group company have you ever seen that actually has a war team? It would be nice to have a security team."

Ji Feng laughed, "You can't say that, there is a steel group in Yanjing, decades ago, they had a full division of troops, even now, there are still quite a few of them."

Yi Xingchen nodded and laughed, "I have heard of this, but that is only a special case."

Ji Feng laughed: "I'm just kidding. You go on."

Yi Xingchen said, "When we returned to China and joined the Tengfei Group, gradually, a few of us seemed to have found well, sort of found our life goals, and when one is no longer worried about money, one wants to make something out of it, especially when the surroundings are good and not so tiring situation."

Ji Feng asked, "So what kind of career are you planning to make?"

“The battle team, that’s my career.”

Yi Xingchen said, “Especially when the Battle Team’s overall combat power has risen dramatically after everyone practiced the body-building exercises you taught them, I’m eager to see just how strong this Battle Team can be at the end of the day! This is also the reason why I am willing to stay in the battle team.”

When Ji Feng heard this, he immediately understood.

It turned out that Yi Xingchen didn’t want to leave in his heart, in fact, he wasn’t that tired, and what he said about being tired should be that he was tired of staying abroad.

Yi Xingchen had always treated the battle team as his career!

It was only because the relationship within the group was a bit chaotic, or rather, because the internal executives were all very close to him, that gave Yi Xingchen a feeling of being on the edge.

To put it bluntly, in fact, Yi Xingchen was worried that because his relationship with him was not deep enough, he would either be subject to his suspicion, or, he would be ostracised by the other executives, which was why he kept claiming that he was tired and wanted to leave.

This was a kind of retreat as an advance.

However, Ji Feng’s heart is more or less unpleasant, in fact, in a strict sense, Yi Xingchen and Han Zhong are the first people to start a business with him, but because of the internal relationship, let Yi Xingchen, this man, also had to save himself in this way, to retreat as an advance, good to say, but in reality, if not because of some scruples, because of the heart helpless, why to retreat?

In fact, Yi Xingchen had never wanted to leave.

In fact, when he thought about it, Yi Xingchen did give him great support, whether it was training the battle team or commanding the battle, he did his best.

He could practically say that he had fought where he was told and never had any complaints.

If such a person were to let him go, then Ji Feng felt that there was no need for the Tengfei Group to continue, so he could simply close down and go home to be a second generation mooching around!

When Ji Feng thought about this, he stood up and said, “Old Yi, I didn’t know much about your real thoughts before, mainly because there was too little communication between us, and I didn’t care too much about this aspect, but I can assure you now, from today onwards, you don’t need to have any worries anymore, just do what you want to do without worrying!”

Yi Xingchen smiled at once, he knew that Ji Feng had heard and understood what he meant.

“Then, I can stay.” Yi Xingchen said.

“I beg you!”

Ji Feng extended his hand, “We brothers have fought side by side more than once before, and we will likewise continue to fight hand in hand in the future, I want to make the Tengfei Group the largest and most glorious group of companies in the world, and I also hope that you can take the Group’s Strategic

Intelligence Department and become the most successful department that can extend its tentacles to every corner!”

Yi Xingchen smiled and stood up, reaching out to shake hands with Ji Feng, “I’m all for it!”

The two looked at each other and laughed at the same time.

.....

“Lei Zi, when will you be back?”

Leaving the security department, Ji Feng called Zhang Lei, “Be careful out there.”

Zhang Lei laughed harshly, “Don’t worry, it’s others who should be careful. I’ll be back in two days at most, let’s do that first.”

With that, he hung up the phone.

Ji Feng couldn’t help but be speechless, this guy had taken Shen Jingyi out for a trip and was afraid that he had forgotten about it, if he didn’t remind him, this guy wouldn’t even know to come back.

He originally wanted to talk to Zhang Lei about the company’s integration, but Zhang Lei didn’t give him the chance to say so, and Ji Feng didn’t intend to call again, after all, Zhang Lei would be back in a couple of days, so it was just in time.

Afterwards, Ji Feng went to talk to Xiao Yuxuan and Han Zhong respectively about this aspect for a careful discussion.

Two days later.

Ji Feng was at the airport and saw Zhang Lei, who was dressed in a suit, followed by Shen Jingyi, who was dressed gorgeously, and he couldn’t help but ask strangely, “Lei Zi, are you going on a trip? Why do I get the feeling that you’re going to a meeting?”

Zhang Lei grinned, “If you don’t dress like this, you can’t show that you have an identity, and sometimes you can get into trouble.”

Ji Feng was stunned, “What do you mean? You have status by dressing like this?”

Zhang Lei laughed heatedly twice, then pulled Ji Feng two steps away and said in a low voice, “Crazy, this time I didn’t go to the Middle East, but to Europe, I found out some things, let’s find a place to talk alone.”

“You went to Europe?”

Ji Feng was a bit stunned, “What’s going on? What did you go to find out?”

Zhang Lei said in a low voice, “It’s about the intelligence group, this can’t be said clearly in two sentences, let’s do it this way, I’ll let Jing Yi go back first, we’ll find a place to talk.”

Ji Feng thought about it and said, “Alright then, you go and settle down Jing Yi first, I’ll wait for you at the lab.”

If there was any place on Island No. 1 that was the safest, the lab that belonged to Ji Feng was definitely the first choice, the tight guards and security measures, the access that only he alone could enter, all ensured that it was safe and secluded.

Of course, there was now an additional 'person' there, the wise brain.

Because Zhang Lei had brought quite a lot of things with him, Ji Feng let Yang Bin drive them back first, while he arrived at the lab first.

"Master."

The wise brain walked over quickly, making Ji Feng a little surprised, looking at the posture of the wise brain walking, but it was becoming more and more like a normal person.

Campus Master Chapter 3173

"Wise Brain, you can completely manipulate your body now?"

Ji Feng couldn't help but ask when he saw that Wisdom Brain was very skilled in every move he made.

Wise Brain looked happy and nodded, "Yes, Master, the energy source you made is very powerful and can constantly provide enough energy for me to do repeated practice, and now I can control all the veins."

Ji Feng nodded and smiled, "Good, then you'll be a real person from now on."

Despite the expressionless face of the Wisdom Brain, and despite the fact that its movements were actually still a bit stiff, it was indeed much better compared to before, which made Ji Feng very happy as well.

This meant that in the future, Wise Brain would become more and more like a normal person, and it was even possible that it would stand in a crowd without being recognized.

However, Ji Feng also knew that it would not be possible to rely on this current body alone, because this body could only be considered a first generation product, for example, the nerve veins did not cover the whole face, which was why it made the Wise Brain look expressionless, in fact, it was not that it did not want to have expressions, but it simply could not control the 'muscles' on its face.

Secondly, because this was the first time he made a body, Ji Feng only strengthened the main parts, other parts such as the stomach and so on, although he also used bionic materials, there were still obvious differences compared to real people.

At first, Ji Feng only thought that it would be enough to make the body joints of the intelligent brain move normally, to be able to walk and the sound system to be able to make sounds.

"When you become more skilled, I will create another body for you." Ji Feng said, "By then, try to make you as normal as a normal person."

"Good! Thank you, master." The wise brain said excitedly.

After a pause, the wise brain suddenly asked, "Master, the materials in the lab, can I use them?"

Ji Feng asked, "What do you want to do?"

The intelligent brain said, "I found that my body still has some deficiencies, perhaps I need materials to repair it, I can repair it myself, I just need to use the materials."

Ji Feng immediately said, "You can use all the materials in the lab as you like, but be careful, some of the materials here are electrically charged, don't knock your body out."

"Yes, master."

Ji Feng and the intelligent brain didn't talk for long before Zhang Lei came over, at this time he had changed his clothes again and his whole body was quite refreshed.

"Lei Zi, why did you suddenly remember to go abroad to play?" Ji Feng asked.

"You think I want to ah, if it is not necessary, I do not want to go abroad, whether it is white or black, there is a smell on the body, even if you sprinkle perfume can not cover." Zhang Lei bristled, if it was an ordinary person, he would have smelled only perfume, but the problem was that with his cultivation level, his nose was not generally sensitive, so naturally he could smell those body odors that the perfume could not cover.

Ji Feng frowned and said, "You said before that you were going to Europe?"

Zhang Lei nodded and said, "That's right, I went to check on Zhao Kai."

Ji Feng froze for a moment, "What do you mean?"

Zhang Lei said, "Remember what I told you, I found that around several executives of the company, there seemed to be people following and watching, I paid attention and found out that they were people from the intelligence team, I asked you the results and you still didn't know, so I suspected that there was something wrong with this person Zhao Kai. So I went to the finance department privately and checked the intelligence team's money accounts and found something wrong."

"Then I happened to hear that Zhao Kai was going to Europe again, so I followed him there subsequently, I wanted to see what he was up to over there!" Zhang Lei said.

"Heard?" Ji Feng raised his eyebrows.

"Well."

Zhang Lei stretched his hands, "I felt that there was something wrong with him, so I sent someone to spy on him as well. However, he definitely didn't know that the level of who my battle team's people wanted to spy on was definitely not comparable to those stinky fish in their intelligence team."

"You guy, " Ji Feng couldn't help but shake his head, "And then what?"

"And then I didn't find out anything!"

Zhang Lei said, "This trip was too short, just found out that Zhao Kai seems to be dealing with a lawsuit case, but specific to more detailed things, such as how the intelligence team is running in Europe and so on these issues, I have not found out. I came back this time just to discuss with you, I'm going out for a long time and will definitely dig out Zhao Kai's roots."

Zhang Lei intuitively believed that there must be something wrong with Zhao Kai, and based on what he had seen, it also supported this judgement of his. Although he didn't know what exactly was wrong with Zhao Kai yet, Zhang Lei believed that if he was given time to investigate, he would definitely be able to find out.

"Actually, before you came back, Zhao Kai had already come to see me." Ji Feng said, "He also admitted to spying on the group's executives"

He generally told about the meeting with Zhao Kai.

When Zhang Lei heard this, he shook his head and said, "I don't believe it. This rhetoric of his sounds reasonable, but I think that this is not his character, Zhao Kai is a rather feminine person with a deep heart, how could such a person use such a brainless way to make suggestions to you? And also preemptively this is too bullshit."

Ji Feng asked, "Then what is your opinion?"

Zhang Lei put up a finger: "There must be something wrong! If you want to investigate, then I will go and investigate to the end!"

Ji Feng pondered for a moment and said, "We'll talk about this matter later, the reason I'm urging you to come back is that there's another matter, and of course these two matters are related, I want to integrate the group!"

When Zhang Lei listened to his idea, but he couldn't help but frown, "Crazy, if you do that, then I'm afraid you'll be alarming the snake, by then even if Zhao Kai really wants to do something, after losing his field officers, he might close down, so it'll be troublesome to get the evidence again."

Ji Feng slowly shook his head and said, "I don't want to get the evidence that badly."

Zhang Lei froze for a moment, and then reacted, "You're being a bit indecisive, you might suffer from it!"

"That's why you were put in charge of all the operations!" Ji Feng laughed.

"..... understand!"

Zhang Lei nodded and smiled, "Okay, then I don't have any problems."

Ji Feng smiled, "Then, good, let's go and get ready, you also go back and tell the people in the battle group that tomorrow morning, a meeting of the group's top brass will be held!"

.....

The next day, 8:30 am.

The largest conference room on the second top floor of the office building at the headquarters of the Tengfei Group.

There were fully forty to fifty people sitting in the large conference room, all whispering about something. As the top management of the Group, they had all been informed of the topic of today's

meeting, but they were all still a bit unsure in their hearts, not knowing how the Group would develop after the integration.

Just then, a group of people walked into the conference room. At the front of the group was Group Chief Xiao Yuxuan, followed by Han Zhong, Yi Xingchen and others, but at this time, everyone's eyes were focused on the last person.

Ji Feng!

All the executives in the group knew him, but he had never shown his face on such occasions, while today he had appeared, did it mean that Ji Feng would be stepping from behind the curtain to the front stage?

"Meeting now!"

After taking her seat, Xiao Yuxuan opened the door and said, "All of you have the plan in hand, do you have any comments?"

One person raised his hand and said, "Mr. Xiao, I would like to ask, according to the integration plan in the plan, the group will integrate several new departments in the future, will there be any conflict with the previous business?"

Xiao Yuxuan said, "There will definitely be conflicts, but these problems can be solved subsequently, what I am asking now is, do you all have any opinions on the integration plan on this plan."

All of them had no opinion, the consolidation of the group would mean an increase in efficiency, and once the power was centralised, they would naturally have more power in their hands, so of course they would not have an opinion.

"Alright then, since there are no opinions, I will now ask General Manager Han to announce the integration plan!" Xiao Yuxuan said.

"Everyone!"

Han Zhong cleared his throat and said, "Although the current development of the group has been rapid, it is because of the group's rapid development that many of the previous systems and plans have been somewhat unable to keep up, which is why this integration is taking place. Now I am announcing that from today onwards, the group will establish the following departments."

"All senior management, including Mr. Xiao and my assistant and all other matters, will be unified into a comprehensive department that will be responsible for all daily work."

"The Finance Department, and the Logistics Department will remain the same."

"The Public Relations Department and the Business Department, merged into one department, collectively known as the Group Business Division."

"The information group will be divided from the comprehensive department and a separate strategy department will be formed, with Yi Xingchen in charge"

After introducing several departments, Han Zhong added, "The positions of the merged departments will be streamlined, and at the same time, each department will be subordinated to several smaller departments, which will require the department bosses to come up with a plan to be reported to the group headquarters for review. To put it simply, this time the integration will streamline the staff and improve efficiency, at the same time, it will also organize the various data of the company, like the finance department which is not integrated, etc., all have to be reviewed again."

"Everyone!"

Han Zhong put his hand on the table and leaned forward slightly, "After this integration, there will definitely be changes in the positions of some of you, if you have any ideas, you can communicate with me and I will discuss them with General Manager Xiao. I hope you can all cooperate!"

The General Department, the Finance Department, the Logistics Department, the Business Division, the Production Department and the Strategy Department.

Six major departments, encompassing more than a dozen departments in the past.

A meeting had consolidated the entire group from the top, and this consolidation would surely follow from the top down, all the way to the most basic employees of the group.

And this integration is destined to make some people leave their former positions, which may not be good news for them, as they will certainly have to learn again in their new positions, but for the Group, it is a pruning process, removing those superfluous branches and leaves and making the whole Group more refined.

Campus Master Chapter 3174

"Xu Xiaoqing, Ma Anqin, Bao Lidong"

Ji Feng looked at the list in his hand and turned his head to look at Han Zhong, "These are all researchers?"

Han Zhong said, "I should say, these are all very strong technicians, from material science to biological science and so on, there are a total of forty-seven people on here, all of them were collected by people sent by the Ministry of Strategy during this period of time."

He pointed to the list and said, "Take for example the one above, Xu Xiaoqing, this person is an associate professor at Jinling University, but is only thirty-eight years old, has published several papers in second-rate foreign journals, and has himself made some achievements in applications, but has never been rated as a professor, I have read his published journal papers, although I can't understand the terminology in them, but I can tell that some foreign experts are also interested in his research direction, yet he has been the second and in some cases third author of the papers."

"Ostracised?"

Ji Feng couldn't help but ask.

He asked this for a reason, since this Xu Xiaoqing was an associate professor at the university, he should have the right to use the public labs, yet he was only listed as the second or third author, there were

only two possibilities, either, he was using the lab of some classroom leader, and this professor had to be listed as the first author, so Xu Xiaoqing would only be listed as the second author.

Either that, or the person was clearly being sidelined in the school.

Han Zhong said, "According to the information gathered by the strategy department, this Xu Xiaoqing should have some social problems, not good at socializing, and not valued by the leaders in the school, so he can get very few resources, and the public labs he can use are not much, so he can only borrow the labs of other professors, so he can only hang the second or third author. "

Ji Feng laughed: "This is normal, if it's a long-sleeved researcher, he won't be able to do much achievement."

Nowadays, the research culture is completely different from the past, with the development of the country's economy, countless scholars and technicians have received several times or even a dozen times better treatment than a decade or two ago, there used to be a saying that those who worked on the atomic bomb were not as good as those who sold tea-leaf eggs.

But now, those academicians and other scholars, not to mention those who are slightly inferior, are still able to receive a frightening amount of research funding every year.

However, with the increase in remuneration, the research culture has now become bad. A portion of the funding is deducted first, 10% or 20% for the better ones, 30% or 40% for the common ones, and even 60% or 70% for those involved in academic corruption bai.

If you think about it, for example, hundreds of millions of dollars of financial allocations, before any research has been done, up first let the laboratory leaders to deduct half, or even more, the following people if they are good at fawning over the boss, or can also follow the soup, then how much can really be used to do research funding, how much can there be?

And research is one of the most expensive industries, sometimes hundreds of millions of dollars are invested in, but it is not even a splash that is very normal.

But if a research result comes out, the first name to hang is the boss of the lab Nowadays, no matter if it is a professor or what, all are habitually called boss by the people below.

The technology of this line, but the flooding of the waterlogging death, drought, some people do not do anything but get funds to get soft, some technical personnel have real material all day tired as a dog, but only get a little poor wages, even if the research results, the first author is not him, the patent does not even belong to him.

Often, a researcher can produce a few results in his lifetime, which is already very impressive, so you can imagine how bad the academic culture is now.

In particular, some professors do too much, so that the associate professors below them, PhD students, postgraduates and the like, can't even have soup, and those who really have the strength to produce results are also envied and hated in all kinds of ways, and are naturally ostracised.

In China, there are definitely not a few such people.

One of the most famous examples is the female scholar who successfully extracted cyanotoxin a few years ago. When she won an international scientific research award second only to the Nobel Prize, people abroad did not say anything, but many people at home began to gossip.

In particular, some people in the unit system where the female scholar worked said in a strange way that it was not her work alone to produce such a scientific research result, but the joint effort of all of us, so why should she be the only one to win?

Others said that she had used the unit's laboratory instruments to produce such results and that the results should belong to the unit

And so on and so forth.

The list goes on and on.

You can imagine how many people in China who are really capable but can't make a name for themselves are buried.

This is why Ji Feng ordered the Strategy Department to collect information on such technical talents who have emerged but are being suppressed and ostracized, and who have potential and are needed by the Tengfei Group.

It didn't take long for the Strategy Department to gather such a list and hand it over to Han Zhong.

"These people should be taken seriously, Han Zhong, if possible, it's best to have the senior management go directly to them and invite them!" Ji Feng said, "If it's necessary, it's absolutely fine for me to invite them!"

"Mm."

Han Zhong nodded and said, "I understand, the arrival of these people will definitely be able to greatly alleviate the shortage of lab talents in the group, I've decided to classify them according to their specialties, and those ranked in the first echelon, I'll personally go and invite them."

As the Group's general manager, Han Zhong was of course very clear about the importance of these scientific researchers to the Tengfei Group.

Perhaps technically, the Tengfei Group did not need them to provide any new technology right now, but their arrival would not only inject fresh blood into the Tengfei Group, but more importantly, it would keep the Tengfei Group's talent from breaking down, and, with their deep foundation, these people could quickly absorb and digest those technologies provided by Ji Feng.

This is the most important thing.

The technology provided by Ji Feng, together with the brains and scientific research strength of these people, would definitely bring the overall technical strength of the Tengfei Group to a higher level.

It could be said that technology was the foundation of everything, and no amount of importance could be attached to it!

“Sort it out and extend an invitation to them!” Ji Feng said, “To give them the best treatment, as long as their demands are not excessive, we can meet them all, talent, more important than anything else.”

“It’s still not too easy.”

Han Zhong shook his head and said, “After all, No. 1 Island is a bit too remote, although the transportation is now convenient, but after all, the current situation, no one knows when the war will break out, those people are afraid that they don’t want to come to No. 1 Island too much.”

Ji Feng said, “Then let them go to Jiangzhou. Housing, cars, nannies, anything can be negotiated, in a word, as long as they are willing to come, we are not short of money!”

Han Zhong was instantly happy, “With your words, then I’ll let it go, with such conditions, I’m sure there will be many people who will be moved!”

“It’s not enough to be moved, we have to create conditions that will make them hate to rush to join the Tengfei Group!” Ji Feng’s face wore a confident smile, “For example, if there are researchers with their families, we can also find ways to arrange for their families to work, and for those who have children, the schools under the Tengfei Group will give priority to enrolling their children.”

“Not only them, but also the senior management of the Tengfei Group, the middle management, all have to be included, and this coverage has to be continuously expanded, and hopefully after a short period of time, including the most junior staff, they will all be able to enjoy the benefits of having their children enrolled in school.”

Han Zhong said, “These are already being done now, just not refined, when you say so, I think it is necessary to make a clear regulation out and be sustainable.”

Ji Feng said, “Don’t be afraid to spend money, these people are the foundation of the Tengfei Group, with them, the Tengfei Group can really take off. Han Zhong, just wait and see, you don’t even have to wait for the next generation, just our generation, we can build the Tengfei Group into the most powerful group of companies in the world.”

“Good!”

Han Zhong couldn’t help but feel his blood boiling as he listened, “I look forward to it!”

.....

With Ji Feng and Han Zhong’s agreement, some of the listed policies were sent down to the comprehensive department and forwarded to every manager’s hands, although it was still just a questionnaire, it gave people a glimpse of a bright future and hope, and for a while, the whole group was abuzz.

Because, many of the policies on the questionnaire are closely related to them.

For example, there were questions such as.

“If a school owned by the Group chooses to give priority to the children of its employees, would you be willing to let your children go to school here?”

“Where would you like to settle if housing (from single flats to villa residences) is distributed according to rank and contribution?”

.....

“Do you think that the current promotion system of the Group is reasonable?”

“Do you think the staff training currently provided by the Group needs to be enhanced?”

The survey questions on a page full of printed paper made all the employees couldn't help but feel stirred up and longing.

And at this time, while Han Zhong was waiting for the survey questionnaires to be returned to tally the results, he was not idle. According to Ji Feng's orders, he had already started to strike out in all directions to dig up those technicians who were suppressed but had real talent.

.....

It is a good idea to have a good look at the website.

But most importantly, he was not good at socialising, let alone making friends with leaders and running for funds, so he could only use the school's public labs during the week, and there was a time limit and a funding limit.

But even so, Xu Xiaocheng did not give up his research work and stayed at the school without fear.

This morning, after his usual morning run, Xu Xiaoqing went home to make breakfast for his wife, but she complained a lot.

“Sister Xu from the unit has arranged for his son to study abroad, and after the New Year his son is going to study in Rice.” The wife said, “Tingting will be taking high school exams next year, I'm thinking, should I let her go abroad too?”

“It's not a good idea to go abroad, the education in China isn't too bad now.” Xu Xiaoqing said.

“Yes, it's true that there's nothing good about people like you. When people come back from abroad, whether they're in universities or enterprises, many of them are already leading research projects, but you're still teaching honestly with your textbooks, and you have to look at the leaders even to do an experiment!”

My wife complained, “You've come back from one of the world's most prestigious universities, but you've never made a name for yourself, and every time I go back to my family's dinner in the Spring Festival, the other siblings ask about you, and I don't know what to say.”

Xu Xiaoqing sighed lightly, “I'm sorry for your loss. But scientific research is not something that can be rushed, it takes time.”

He knew that he was unattractive and that his wife had followed him and had not lived a very prosperous life, but could only be considered well-off, so he was indeed aggrieved.

“Research does take time, I understand that, but do you have the opportunity to do it?” The wife grunted, “There are better opportunities, but you don’t go, so you have to earn some hard money here and look at people’s faces. Even if you are allowed to lead graduate students, yet you are not given projects to do, you don’t run yourself, and the graduate students under you don’t respect you, what’s the point of this job!”

She knew that her husband was talented and there were many companies that had made offers to him, yet, he did not say yes to any of them.

“The corporate labs are not bad either, but there is too much academic fakery and false propaganda, and they have no bottom line in order to sell products, this is not where I want to go.” Xu Xiaoqing said.

“Then what place do you want to go to? The Academy of Science? People only want you!” The wife grunted.

“Ding ring

Suddenly, the mobile phone on the table rang and his wife frowned, “It’s early in the morning, it’s not your leader calling again to ask you to help with the work, is it?”

Xu Xiaoqing looked at the phone and shook his head, “No, it’s an unfamiliar number, from Jiangzhou.”

Saying that, he picked up the phone, “Hello, hello, who is it?”

“Is this Professor Xu, please?” On the phone was a man’s voice that seemed polite.

“I’m Xu Xiaoqing, who is this?” Xu Xiaoqing asked politely as well.

“Oh, let me introduce myself, I am the general manager of Jiangzhou Tengfei Group, Han Zhong, there are some work matters I would like to talk to you about, I wonder if it is convenient for Professor Xu?”

“Tengfei Group?”

Xu Xiaoqing froze for a moment and then responded, “The Tengfei Group in Jiangzhou? The one that made the new chrome alloy?”

Han Zhong smiled, “Yes, it’s our company, Professor Xu, can we talk face to face?”

“Of course!”

Xu Xiaoqing immediately nodded, “I’m very interested in your company’s new chrome alloy and have done research on it

His wife couldn’t help but stare at him as she listened next to him, she also heard about Jiangzhou Tengfei Group, a look of surprise flashed across her face, it was obvious that this was someone’s interest in her husband, but Xu Xiaoqing, this dumbass, was only interested in other people’s products.

Xu Xiaoqing also saw his wife’s gaze and was a little embarrassed, he quickly said, “That

Han Zhong said, “I’m in Jinling right now, if it’s convenient for you, I’ll go visit you directly.”

“Convenient convenient!”

Xu Xiaoqing said hurriedly.

Campus Master Chapter 3175

Xu Xiaoqing walked into the Zhongtian Cafe and took out his mobile phone, ready to make a call.

Earlier on the phone, Han Zhong, the head of the Tengfei Group, had only given him the address, but did not say exactly which box it was in. Luckily, the Zhongtian Café was not far from Xu Xiaoqing's home, so he quickly arrived.

"Mr Xu Xiaoqing?"

Just as Xu Xiaoqing was looking through the numbers, a voice suddenly rang out, and he immediately turned his head to see a young man in a suit smiling as he walked over to the lounge area not far away.

He nodded, "It's me, you are Mr. Han from Tengfei Group?"

"Hello Professor Xu!"

Han Zhong smiled and nodded while extending his hand, "I am the general manager of the Tengfei Group, Han Zhong, and I am here to pay you a special visit today."

Xu Xiaoqing hurriedly said, "You're welcome, you're welcome, I'm only an associate professor."

In his heart, however, he could not help but be astonished, he did not expect the general manager of the Tengfei Group to be so young, looking at Han Zhong's appearance, he was probably not even thirty years old?

If he knew that Han Zhong looked a bit old because of his wealthy appearance itself, he was afraid that he would be even more surprised.

"Professor Xu, I've arranged a card table, it's very quiet, if it's convenient for us to go over and talk?" Han Zhong said with a smile.

"Good!"

Xu Xiaoqing nodded.

Han Zhong smiled and said, "Professor Xu, this way please."

Xu Xiaoqing waved his hand repeatedly, "You're too polite, Mr. Han, too polite."

For the first time in his life, Xu Xiaoqing was treated so politely, even when people from other companies came to him before, although they were polite, they were not so polite. Because he could tell that Han Zhong was sitting in the rest area, actually waiting for him.

This kind of treatment made Xu Xiaoqing, who was not very eloquent, feel a little flattered.

Only when he walked into the card table did Xu Xiaoqing realise that Han Zhong had not come alone, but that he was accompanied by a man and a woman, both dressed in professional suits, and he immediately realised the importance Han Zhong attached to him.

“Professor Xu, I am a straightforward person, so I speak in a straightforward manner.” After taking his seat, Han Zhong said straightforwardly, “This time I’ve come to visit you with one purpose, I hope you can join the Tengfei Group.”

“Oh?”

Although he had already guessed it in his heart, but Han Zhong said it himself, Xu Xiaoqing was still a little surprised, “As far as I know, the Tengfei Group can be said to be full of talents and has made achievements that have amazed the world, I am only an associate professor

Han Zhong laughed, “Education and title, that can only represent a part of a person’s ability, but definitely not the whole. It’s not for nothing that the education system in China has been criticized.”

Xu Xiaoqing laughed, he was in the education system, so naturally he was not in a position to comment much on this.

Han Zhong said, “Professor Xu, we have learned about your experience, and at the same time, we have made a full understanding of the research you have done on the subject, as well as the results you have achieved in the past, we think that you are fully capable of taking charge of a subject research, moreover, a talent like you is exactly what our Tengfei Group desperately needs, so I am here to sincerely invite you to join Tengfei Group.”

“This

“You don’t have to say yes so quickly.”

Han Zhong smiled, “I have only two purposes for coming here this time, firstly, to show our sincerity, and secondly, to get to know each other. Professor Xu, I believe that with your ability, there must be quite a few companies that have come to poach you, some of them may have promised you good terms, but I don’t think there is any company that will have such a high regard for talent as the Tengfei Group. In order to show our sincerity, the conditions can be as good as you want, we definitely won’t discount anything!”

“Besides, we already know enough about you, but I think you don’t know much about our group yet.”

Han Zhong said, “Professor Xu, you are an expert in materials, and Tengfei Group’s development in materials, although the scale is not yet very large, some of the technologies are already at the forefront of the world, such as the new chrome alloy materials and so on, and now, our group needs to develop various advanced materials on a large scale, for this reason, the group has especially built an experimental building, which has a total of There are more than forty laboratories

“Of course, to say this maybe you don’t care much, simply put, as long as you are willing to join the Tengfei Group, we will provide you with a separate laboratory, and whatever instruments you need inside, you can make a list, no matter how expensive it is, we will not hesitate to buy it.”

Han Zhong said sincerely, “If you need an experimental assistant, you can pick anyone you want, those within our group are absolutely fine, if it’s from an outside unit, we will try our best to coordinate and try to meet your requirements as much as possible.”

“If you feel that it is too far away from home or for other reasons you do not want to work on the island, that is not a problem either. Clothing, food, accommodation and transportation are likewise provided by us.”

.....

The company’s main business is to provide the best possible service to its customers.

This is great!

The benefits, conditions and so on, were just too good!

But what really impressed him was Han Zhong’s promise to let him lead a lab on his own, with his assistants and team chosen at his discretion.

For an expert who is truly passionate about scientific research, there is nothing better than this offer!

As for the salary, since Xu Xiaoqing had not yet agreed to it, it was still too early to talk about it. As Han Zhong had said, he had come here today for two things, which boiled down to one purpose – to invite Xu Xiaoqing to join the Tengfei Group.

Xu Xiaoqing couldn’t help but feel excited.

He had been ostracised at school and had to look at other professors to use the lab, and even the graduate students under the other professors dared to ignore him.

How could he not feel aggrieved?

Many times he thought that he should just go to a company instead of suffering in the university.

But considering that companies are too profit-seeking, and that doing research would definitely tie his hands, and that the companies that invited him were in fact very purposeful and gave him too many constraints, he finally did not say yes after thinking about it.

However, when comparing his past encounters with the treatment Han Zhong could give him now, Xu Xiaoqing’s emotions were so stirred that he could not contain himself.

Especially when he heard that he could have an independent laboratory, he almost opened his mouth and said yes.

“By the way, let me add.”

Just as Xu Xiaoqing’s jaw dropped, Han Zhong suddenly spoke again, “In terms of housing, in accordance with your qualifications, Professor Xu, we are allocating a four-room, two-room house, plus a matching car, and as long as you work at the Tengfei Group for more than ten years, the title of the house can be divided into your name.”

Xu Xiaoqing was stunned.

A house in Jiangzhou?

Four rooms and two halls?

That would cost at least a million or more!

“In addition, if Professor Xu is interested in continuing to teach, we also have a school under the Tengfei Group, and the salary is of course calculated separately.” Han Zhong said, “In short, in a word, everything is based on your satisfaction!”

The last trace of hesitation in Xu Xiaoqing’s heart was dispelled by these last words from Han Zhong, which was like the last straw that broke the camel’s back, making Xu Xiaoqing make a choice at once.

“I need to go home and discuss this with my lover.” Xu Xiaoqing almost immediately agreed to do so, but eventually held back.

“No problem!”

Han Zhong nodded and smiled, “I sincerely hope that Professor Xu can join the Tengfei Group, it would be both an honor for us and a motivation for us to truly take off.”

“Good!”

Hearing this, even the mute Xu Xiaoqing couldn’t help but feel stirred up and couldn’t help but give birth to a sense of pride, “I will definitely get back to you as soon as possible.”

.....

“Well, how was it?”

When she saw the odd look on Xu Xiaoqing’s face, her heart sank, “What, no deal? Didn’t the Tengfei Group come to poach you?”

Xu Xiaoqing pursed her lips and said, “No.”

“Then what does this look on your face mean?” The wife couldn’t help but ask, “The terms they offered were not good?”

“Not bad, but too good!” Xu Xiaoqing laughed bitterly, “I didn’t even know I was so valuable”

“Come on, tell me what’s going on!” The wife’s eyes lit up at once.

Xu Xiaoqing then told Han Zhong’s original story and shook his head with a bitter smile, “I don’t know what they see in me, I did do a few subjects, but, with the conditions, nothing has come out of it yet”

“Pop!”

The wife slapped Xu Xiaoqing on the shoulder, “Are you stupid, people from big group companies would be stupid enough to give you money for nothing? You yourself don’t know that you have value, that’s because your vision can’t see it, but people are wise to heroes, you don’t even agree to this condition?”

“I didn’t say no, I just said I’d think about it”

“Consider my ass!”

The wife was a rare foul-mouthed, “Old Xu, I tell you, if you don’t agree to such a condition, then you are the number one fool in the world, it doesn’t matter if you are stupid yourself, but you still want me and my daughter to follow you? You have to compare what kind of life you used to lead at school, and what kind of life you lead now when people come to invite you with a palanquin.

Xu Xiaoqing was suddenly silent, after a moment, he raised his head, “Wife, you’re right, since the Tengfei Group values me, then I’ll prove my worth, I promise!”

Campus Master Chapter 3176

Jinling University.

Xu Xiaoqing was sitting in her office, crackling her keyboard in front of her computer, and from time to time she opened the webpage to look up information.

This scene fell in the eyes of the other teachers in the office, and they couldn’t help but laugh a little.

“Teacher Xu, even if you prepare this lesson well, it’s still a waste of effort, it’s all from the textbook, not many students nowadays take their textbooks seriously anymore.”

A teacher who was about forty years old said with a smile, “Instead of preparing your lessons so seriously, you should seize the time to write a few more papers, preferably to be published in top foreign journals, so that you can say something better when you are evaluated.”

Several other teachers laughed.

They all knew that although Xu Xiaoqing was already an associate professor, the number of papers he had actually published was relatively more than some professors in the school, moreover, many professors only published to domestic journals, and the top foreign journals that could be published whenever they wanted to?

The number of papers of Xu Xiaoqing, he should have been evaluated on the professor, but he is a person who really can not behave, often because of the use of the laboratory and the leadership of the dispute, and even contradict the leadership, those who are engaged in administrative leadership, scientific research may not be able to, but to say that the whole people, to give people small shoes, that is absolutely the first-class master.

This is why Xu Xiaoqing still does not have a lab that belongs to him, not even one that is nominally under his responsibility, and even when he uses a public lab, he is sidelined.

In any place, the top ones are always in the minority, and there are not many special scum, the vast majority are in the middle of this mediocrity, and Jinling University is a common phenomenon in this matter.

The top experts, scholars and professors, those who are renowned in China, all have their own laboratories, their own subjects, and a large number of assistants, so they don’t need to do it themselves at all, and the results made in the laboratory will be his.

But such people are still a minority among the many teachers in the university, and most of the rest are those who are paid to teach on behalf of others.

But who doesn't want to make a difference?

So the limited resources of the public laboratory became a place for many teachers and associate professors who were not particularly strong but had some strength.

Xu Xiaoqing often encountered this phenomenon: he had agreed with other associate professors on the order and time slots for using the public labs, but often, when it was his turn, he brought his students into the lab, only to find that the last teacher who was using the lab had not yet left.

If he rushed him, he would be greeted with a smile, "Mr Xu, wait a moment, sorry, I have another experiment to finish.

As a result, this wait took two hours, almost taking up half of his lab time.

The other teachers wouldn't leave, and Xu Xiaoqing couldn't just go and kick them out, but even if he did, they wouldn't give him face. So he had to go to the leaders, but as you can imagine, with his relationship with them, it was almost a fool's errand to ask them to do justice.

So often in a month, the number of times Xu Xiaoqing could use the public lab was simply pitiful, and the time was also very little.

In the middle of this, there were some teachers who deliberately sidelined Xu Xiaoqing in order to curry favour with the leaders, and some of them secretly instructed other teachers to deliberately give Xu Xiaoqing small shoes to wear.

Therefore, Xu Xiaoqing had no choice but to use words to express what he needed and then teach it to his students.

These teachers in the office all knew that Xu Xiaoqing was absolutely awesome at preparing lessons, there was no way out, the labs couldn't be used, so what could they do if they didn't prepare lessons carefully?

"Mr. Wang, don't say that, it's not like Mr. Xu hasn't published in top foreign journals, only that was when he was abroad, and after he came to China, it's only because our conditions are so poor that he didn't make any achievements."

A young woman with long hair said.

The others laughed one after another, only that the laughter was all tinged with some sarcasm.

Xu Xiaoqing's face sank, then shook her head again and didn't say anything.

Whether it was Mr. Wang who spoke sarcastically before, or the woman who was speaking now, they were in fact mocking him, and although Xu Xiaoqing was mute, he was not stupid.

He knew very well that the teachers in the office were actually jealous of his title as an associate professor, because apart from him, all the other teachers in this office were just ordinary teachers, and he, as an associate professor, had the highest title here.

Moreover, because he had come back from studying, he was also a bit out of step with these teachers in some details, which was one of the reasons why the others were sarcastic about him.

“I say to you all, you all talk too much.”

At this time, a middle-aged woman in her fifties couldn't stand it anymore and said, “Professor Xu prepares his classes seriously, that's because he is responsible for his students, unlike you all, who only know how to complete your tasks and get paid, and then everything is fine. Professor Xu was at least in the upper middle. And you, didn't you also get reported by the students for running out to have a phone conversation with your boyfriend during class?”

When Teacher Wang and the young female teacher heard this, their faces turned red.

Because what the middle-aged female teacher said was true, but in front of these teachers in the office, their faces were a bit embarrassed.

Teacher Wang said, “You can't say that, right? We were just joking with Teacher Xu.”

“Exactly.”

The young female teacher said, “Teacher Xu didn't even say anything!”

The middle-aged female teacher shook her head and turned to Xu Xiaoqing and said, “Professor Xu, you should prepare for your classes without fear.”

Xu Xiaoqing nodded and smiled, “You're flattering.”

The middle-aged female teacher said, “I'm not overpraised at all, your ability is there, everyone can see it, only some people are jealous, some people don't want to admit it, look now, everyone is talking, only you are working ee? You these are the summary?”

Xu Xiaoqing nodded and smiled, the work in her hand did not stop.

The middle-aged female teacher asked curiously, “Professor Xu, it's still early before the holidays, what are you doing writing summaries now?”

“When handing over, it's always important to let the new teacher who takes over know what I've taught the students and where I've taught them.” Xu Xiaoqing said with a smile.

“Handover?”

The middle-aged female teacher was stunned.

Xu Xiaoqing nodded, “Yes, I won't be taking on any more students from now on, I submitted my resignation report yesterday and the leader has already approved it.”

“Ah?”

The other teachers in the office were all surprised, Xu Xiaoqing had actually resigned?

The middle-aged female teacher said urgently, “Professor Xu, this is not right, you can't be angry, you can't be angry, you can bear it, good days will come.”

Xu Xiaoqing shook her head and said, “The leaders have approved it, it's too late to talk about this now.”

“So then where are you going after you resign?” The young female teacher was the one who asked, “To go to the enterprise?”

“Hmm.”

Xu Xiaoqing nodded her head, admitting it frankly.

“Which enterprise?” The young female teacher hurriedly asked again. She just knew that Xu Xiaoqing didn’t want to go to a business, so she dared to mock him, because at school, anyone could step on him, but if Xu Xiaoqing went to a business, then naturally, he would be making a lot of money, and she felt a bit bad about it.

Xu Xiaoqing didn’t hide it and said, “It’s the Tengfei Group.”

“Ah? The Tengfei Group!”

Everyone was taken aback, and the middle-aged female teacher exclaimed, “That’s a big nationally famous group of companies, Professor Xu, no wonder you resigned.”

The younger female teacher was concerned about something else: “What kind of treatment did they give you?”

Xu Xiaoqing said, “The treatment is quite good, actually it’s all secondary, the key is that they promised to give me a separate laboratory, the subject and project can be freely chosen, I just need to take out very little time to help them do some research.”

“What kind of deal is that exactly?”

Mr. Wang’s heart was like a cat scratching as he pursued, “How much is the funding for the lab?”

“Clothes, food, housing and transportation are all included, four-room, two-room housing with a special car and driver, family members are arranged to work in the Tengfei Group, the children’s education expenses are fully covered by the Tengfei Group, and after a certain number of years of work, the house belongs to Professor Xu.”

Just then, a voice suddenly sounded at the office door, everyone couldn’t help but look at the sound, they immediately saw several people standing at the door, at the head, was a slightly chubby young man in a suit, looked very imposing.

“As for the funding of the laboratory, the designated subject of the Tengfei Group, the base funding for one year is two hundred million, and depending on the progress and the benefits of application development, there will be appropriate increases.”

“Huh?”

Everyone could not help but feel a little dizzy as they listened, two hundred million, this figure was almost beyond their ability to accept. Although it is not uncommon for famous experts to receive several hundred million or even a billion dollars a year, the problem is that Xu Xiaoqing is only an associate professor, not to mention an academician, and he is not even a famous expert, but Tengfei Group is willing to pay 200 million.

And this is still the base fee?

“Mr. Han, why are you here personally?” When Xu Xiaoqing saw the visitor, but he hurriedly stood up, surprised.

“No amount of attention can be too much for a talent like Professor Xu, I don’t know anything about technology, but my task is to serve you, the experts, well.” The person who came was no other than Han Zhong, who smiled and said, “Professor Xu, are you ready? Can we go now?”

Xu Xiaoqing nodded, “It’s ready.”

“Then let’s go!” Han Zhong smiled.

Once Han Zhong and Xu Xiaoqing and the others had gone downstairs, all the teachers in the office used to use the window and set to see two cars parked in front of the office building, a black Mercedes and a Bentley.

As they watched Xu Xiaoqing get into the Bentley, the office was silent and everyone seemed to have lost their interest in talking.

Campus Master Chapter 3177

Just like Associate Professor Xu Xiaoqing from Jinling University, professors and scholars from other well-known universities in China, and even some second-rate institutions, were constantly joining the Tengfei Group.

Two months later, this influx of talent reached its peak, with new experts joining almost every day, the vast majority of whom chose to work in Jiangzhou, while some chose to stay after visiting the experimental building on Island One.

No matter how expensive the equipment is, you can find it here, especially in the area of materials and energy, and everyone can’t help but be dazzled.

For example, there is a separator that costs US\$10 million internationally, and it is not even available for sale. Even now, the blockade imposed by the Western developed countries on China has not been completely lifted, especially for some cutting-edge technological equipment, which cannot be shipped to China.

After seeing these devices, even those experts who had already decided to stay and work in Jiangzhou could not help but be moved.

There were even two experts who, after repeated consideration, changed their minds and decided to stay on Island No. 1.

Ji Feng was quite satisfied with the addition of these talents. These experts all had real talent, and the investigation and intelligence support from the Ministry of Strategy played a crucial role in this regard.

In China, many experts do not live up to their names, some of them are very famous, but often have no real material. The Ministry of Strategy has carefully screened and continuously given lists, which has led to the inclusion of these experts who have real material but not so many false names.

Of course, although these people are experts, after they come to the Tengfei Group, they have to go through a period of integration before they can start working.

And even after they start working, they are not just able to take charge of an experimental topic or project on their own, but have to learn the technology of the Tengfei Group, which is completely self-contained and much more advanced than the technology of the outside world.

It takes time for these professors and experts to digest and absorb the technology of the Tengfei Group. But compared to students who have no foundation, these experts naturally learn very quickly, in fact, many technologies are only separated by a layer of paper, as long as they pierce it, everything will then be clear.

“So far, the Tengfei Group has brought in a total of eight hundred and thirty-two talents from various universities and research institutes as well as other scientific research units, covering seventeen fields, each of which, in turn, is subdivided into several or even a dozen specialized sub-disciplines”

Han Zhong and Ji Feng sat in the office, listening to the report from the R&D department.

“Each of the experts brought in are actively rubbing shoulders with the group’s original talent, the vast majority of them have integrated as quickly as possible, and some are still in the process of rubbing shoulders.”

Listening to the report, both of them had a satisfied look on their faces, because they knew that every one of these experts, had real talent, the Tengfei Group was indeed rich, but it was not that people were stupid and rich, but the experts that were brought in, after joining the Tengfei Group, would go through a certain interview, to put it bluntly, the original experts would assess them, which could also be interpreted as a cut-throat process.

In the end, after the technical staff of the group have assessed them, it is confirmed that these experts are not just a waste of time.

With this, the technical strength of the Tengfei Group had been rapidly expanded.

Leaving Han Zhong’s office, Ji Feng came back to the Strategy Department.

After more than half a year of integration, the Strategy Department was now fully matured and the operation mechanism was also very reasonable.

The only thing is, Ji Feng’s heart has always been wondering what the reason for Zhao Kai’s approach was.

The first time I saw the company, I was able to find out what the reason was.

So Ji Feng never asked.

Now, the development of the Strategy Department was also very satisfactory to him, not to mention that the intelligence work was being done in a reputable manner, and the development of the battle team was likewise quite outstanding.

The number of the battle team had increased a bit, and the vast majority of them were ex-soldiers, at this point, Ji Feng knew by heart what was going on, so with this, the battle team was divided into core members and ordinary members.

What really made Ji Feng feel happy was that these core members led by Zhang Lei, after practicing body building exercises, now had someone who had actually reached the innate realm!

And, there were still six or seven at once.

Liu Zejun, Yao Zhijian, Guo Tao, and Lu Gang had seven people who had reached the Ascended Realm, and the rest, even though they hadn't reached the Ascended Realm, had touched the edge of it.

With this alone, the strength of the battle team is soaring!

It was also because of this bottom line that Zhang Lei was in charge of the field work and dared to let go of it in a big way, because for these core team members, although it could not be said that they were sweeping, there were very few tasks that they could not complete.

After going around the Tengfei Group, Ji Feng was extremely satisfied. During this period of time, he had been cultivating his Phaseless Kung Fu, and although he was sort of involved in the work of the Group, he had not fully devoted himself to it, but seeing that the Group was developing so well now, he was naturally very satisfied.

It is worth mentioning that news came from Ji Shaojun's side last month.

After several months of trouble, several shops in that hutong had been closed down by the punks, and the rest were in a lot of headaches.

The police could not do anything about it, they arrested one group, but another group would come soon, and they had no serious charges, at most they were disturbing public order.

After a while, the people behind those shops finally couldn't take it anymore, and a director of the ministry stepped in and called Yu Hui out for an interview, so Ji Shaojun immediately stopped.

But by this time, the information that should have been available was almost complete.

But all the people who were involved in this incident, their backgrounds, connections, including their relatives, etc., have all been mapped out.

Only, in the end, all the connections pointed to one person, Wang Wengao.

This result made Ji Feng somewhat surprised.

He didn't expect that someone would help him out even though Wang Wengao was already dead?

The more this happens, the more it shows that Ji Feng's previous focus was correct, and that there were indeed some extraordinary hook-ups in that alleyway.

Of course, all those hookups have definitely been cleaned up now, but that doesn't mean that nothing has happened.

Because, Ji Feng had once seen with his own eyes here, Wang Wengao and a certain person appeared here one after another, and back and forth, if it was a coincidence, the ghosts wouldn't believe it.

So Ji Feng was instead more certain that there was someone sitting behind this matter.

Ji Feng sneered in his heart, sitting still means that some people are feeling nervous, moreover it means that he is pursuing the right direction.

Ji Feng did not rush to tell this news to Xiang Yongzhan, but first communicated with his younger uncle Ji Zhenping.

"Don't make any rash moves yet, what you're saying now is just speculation, moreover, the other party's identity is very unusual, be cautious." Ji Zhenping exhorted in a deep voice.

Wu Zhengxiang's identity was simply too sensitive and too unusual.

The head of the Wu family, the leading figure of the second generation, and even more so, the flag bearer of that lineage.

One could be suspicious, but one could not take action directly. If there was action against such a person, and in the name of collusion with the dynasty, then this would set off too much of a storm.

Of course, Ji Feng also understood this, and he said, "I'll just act in private, investigate all the people around him first, without alerting him, and by the time he reacts, we'll already have conclusive evidence."

Ji Zhenping said, "Don't be anxious yet, boiling a frog in warm water also depends on who it is for, the other party is very uncomplicated, ordinary means will not work on him at all. This way, I know about this matter, I will discuss it with your father later."

Ji Feng then didn't say anything else, he knew that he couldn't interfere with the matters above, in fact he didn't want to interfere either, if it wasn't likely that Wu Zhengxiang had an ulterior motive with Dynasty, he wouldn't have had to go and investigate privately.

Now that Little Uncle already knew about it, Ji Feng naturally didn't have to worry about the rest of the matter.

All he had to do now was to develop the Tengfei Group at ease, while continuing to build up his strength to increase the production capacity of the Tengfei Group as much as possible, and bring out more high technology so that the experts at the Tengfei Group could digest and absorb it.

The only thing that made Ji Feng feel more at ease was that the situation in the southern waters had eased and was no longer as tense as before, but everyone knew that this was probably just a rare period of calm before the storm, and that everyone was actually building up their strength, just waiting for the final general outbreak.

In this situation, the domestic multinational enterprises are shrinking their business, the financial aspect is even tighter, while various factories are expanding their production capacity. Although on the surface, they all look as prosperous and paper-drenched as ever, only those who are in them can feel the secret tension.

In fact, Ji Feng knows very well that all the arsenals in the country are producing at full power, especially the conversion factories, which have expanded their production capacity to the limit, in order to replace all the equipment with the most advanced laser series weapons.

The Tengfei Group, likewise, was not taking it easy, either. Both the pharmaceutical factory and the factory already ripe for the production of new chrome alloys were also at full throttle, supplying as much medicine as possible, as well as advanced alloys.

And it was at this time that on Island One, a few strangers arrived!

Campus Master Chapter 3178

“Warmth?”

Ji Feng was a bit surprised, he didn't expect to receive a call from warmth all of a sudden, “Where did you get my number from?”

From the beginning to the end, Ji Feng had never given warmth his number, whether it was because he hadn't seen the kind of snobbery that warmth had in the past, or because warmth had later shown a painfully reformed look, Ji Feng had kept enough distance from her, not to mention leaving contact information with each other.

In particular, although there were quite a few people who knew Ji Feng's private number, it was limited to his friends and relatives, other than that, there were really very few people who knew his number, but warmth actually called him directly on his mobile phone!

“Ji Shao, you still say you treat me as a friend, have you forgotten, when you were in Jiangzhou the year before last, you gave me your number at the entrance of the headquarters of the Tengfei Group!”

Wen Xin slightly snapped on the phone, “At a glance you didn't store my number, you must have been perfunctory at that time, right?”

Ji Feng frowned slightly, was there such a thing?

He certainly remembered that two years ago in Jiangzhou, warmth once suddenly came to the headquarters of the Tengfei Group, at that time warmth had disappeared from the entertainment industry for more than a year and a small two years, at that time he was still a little strange, only later through conversation did he know that warmth had gone to study abroad for further studies.

However, Ji Feng clearly remembered that at that time, he definitely did not leave a phone number for warmth.

Now that warmth is saying this, is she thinking that two years have passed and he can't remember what happened at that time?

Ji Feng smiled in his heart, I'm afraid that warmth definitely couldn't guess that his memory was definitely not comparable to that of ordinary people, not only did he remember the scene at that time, but also, he could tell at a glance that warmth was playing a sloppy game with him, thinking that too much time had passed and his memory might have deviated, making him believe that the number was really the one he gave.

“So it’s like that, I have too much going on over here, I might have given it a miss.” Ji Feng smiled, not directly exposing her, and asked, “Do you have something to do?”

“I’ve resigned.”

Wen Xin said, “Young Ji, I am now homeless and have no one to take me in, so I can only come to ask for your help.”

Ji Feng immediately laughed, “You’re joking, would you still be homeless, Miss Wen? As long as you nod your head, I’m afraid that people willing to take you in could line up from Island No. 1 to Yanjing City!”

Wen Xin snapped, “Young Ji! Stop flirting with me, you’re rubbing salt into my wounds! It’s not like you don’t know what those people are, they’re after my body!”

Without waiting for Ji Feng to speak, she added, “Young Ji, I want to work for the Tengfei Group, would you be willing to take me in?”

Ji Feng laughed: “I would definitely welcome you warmly if you can come, but after all, Tengfei Group is not in the same industry as the one you belong to, I am afraid that you will be buried after you come!”

“I knew you would say that!” Wen Xin angrily said, “Then I’ll go to No. 1 Island for a few days, is that okay? Last time I went to Island No. 1, I realized that the scenery there turned out to be so beautiful, if it wasn’t for my work, I wouldn’t have been able to come back, and now since I’m free, I want to go and stay there for a few days.”

Ji Feng frowned and after a little thought, he nodded and said, “No problem, Island No. 1 is not some dragon’s den, of course you can come.”

Wen Xin immediately smiled, “That’s great, young Ji, I’ll book a flight here, I should be able to arrive in the afternoon.”

Ji Feng smiled and said, “Then I’ll arrange for someone to pick you up, but I’m a bit busy over here, I may not be able to accompany you personally

“I understand, even if you’re not busy, don’t you have to accompany a few ladies, I understand all that.” Wen Xin smiled delicately, “Then we have a deal, I’m going to book my flight, bye!”

“Beep beep beep

Listening to the busy tone coming from the phone, Ji Feng’s brows furrowed.

.....

In the afternoon, at the only civilian airport on Island No. 1, Cozy, who had long hair and wore a pair of sunglasses, got off the plane, and with her, there were two women and a man, all young people.

A young woman stepped forward and said, “Miss Warmth, my name is Zhao Hong, Mr Ji sent me to pick you up.”

Wen Xin asked, “Why didn’t he come in person?”

Zhao Hong said, “Mr. Ji is busy and couldn’t find the time.”

Wen Xin looked around for a moment, nodded and said, "Alright then, I'll trouble you."

"This is what I should do, Miss Wenxin, this way please." Zhao Hong took Wenxin and the others into a business car and drove away from the airport.

"See anything?"

In an office in the terminal building, Ji Feng, Zhang Lei and Zhao Kai were standing in front of the window, with everything below them in full view, when Ji Feng asked.

Zhang Lei said, "As far as I can see, it doesn't seem to be asking any questions."

Zhao Kai mused, "If the purpose of her visit was really not pure, she would definitely not show it here, instead she would carefully cover it up."

Zhang Lei said, "Should we watch her?"

Ji Feng pondered for a moment and nodded, "You two look after the arrangements for this, there are only two requirements, one, she must not be allowed to find out, and two, no matter what she wants, she must not be allowed to get away with it."

Zhang Lei nodded, and Zhao Kai couldn't help but ask, "Since you know that she's here for an ulterior motive, why don't you stop her?"

Ji Feng said, "I just want to see what kind of trouble she can get into!"

Zhang Lei immediately said, "Then, I'll have the most elite members of the battle team take care of her safety to ensure that nothing goes wrong! But I'm a bit worried now, if she's late in leaving, I'll have to divert a lot of energy on my side."

"She shouldn't be able to stay for a few days."

Ji Feng said, "I've clearly rejected her request to come and work at the group, and I won't be meeting with her in the next few days, so I believe she definitely won't be able to stay here for long."

Zhang Lei said, "That would be best."

A person who knew there was something wrong with her was on Island No. 1, and in order to keep her from getting something, it would be necessary to make a special effort to 'take care' of her, and there were four people on the other side, so there had to be at least eight people to take care of her, which involved a lot of energy.

But since Cozy wasn't going to be here long, that wasn't a problem.

However, none of them expected that Cozy would stay here for a week in a row without any intention of leaving.

This time Zhang Lei couldn't sit still, he found Ji Feng and said, "Crazy, it's not a good thing to go on like this! Those brothers in the battle group have a lot of things to do, how can they have the time to follow her around, can't you get rid of that woman?"

Ji Feng pondered for a moment and shook his head, "Don't rush, the more anxious you are, maybe the more she wants, maybe, she's just waiting for us to slack off."

Zhang Lei frowned and asked, "What exactly is her origin?"

"It's hard to say!"

Ji Feng shook his head and said, "I'm just guessing, there's no conclusive evidence, but I believe my feeling that cozy is definitely not simple!"

Zhang Lei gritted his teeth, "Then wait a little longer!"

.....

Night.

A few figures quietly went ashore.

"Hurry up and change, southeast direction, be quick." A low voice rang out.

With that, several figures quickly disappeared into the jungle, losing sight of each other.

Tengfei Group staff dormitory building, under one of the buildings, Jia Ming took his work card and swiped it towards the electric door, the door opened at the sound and he walked into the building with ease.

He came to the dormitory door out of habit, and as soon as he opened it, he was suddenly startled.

A hard object was pressed against his waist, and at the same time a figure appeared behind the door.

Jia Ming slowly put his hand up and asked in a deep voice, "Who is it?"

"Young Master Wu, come with us, someone wants to see you." The other party said coldly.

"You have mistaken me for someone else, I am not any Young Master Wu." Jia Ming said in a deep voice.

"It's useless for you to hide anymore, Liu Ping has explained everything." The other party said, at the same time, a few more people appeared in the corridor, Jia Ming just wanted to speak, but he saw that those few people had also surrounded him, and surrounded him in the middle.

"You are the ones he sent?!" Jia Ming asked in a cold voice.

"You'll know when you go."

"Bang!"

Jia Ming received a heavy blow to the back of his head and immediately blacked out and passed out.

A few men skillfully caught Jia Ming and one whispered, "Go, change his clothes immediately, be quick, the ship is still waiting."

Outside the dormitory building.

The old man in charge of guarding the dormitory was shaking his head and listening to the play when he suddenly saw a few people walking somewhat wobbly out of it, and before he could get close enough, he was greeted with a cloud of alcoholic breath and talk of going on out to get high or something like that.

The old man couldn't help but shake his head, the young people nowadays, the conditions given by the Tengfei Group are so good, the overtime pay is many times higher than other companies, but they still don't know how to cherish it, they just go out and spend a little money.

The old man shook his head somewhat uncomfortably and was ready to go back and continue listening to the play, however he was just about to turn around when he was suddenly struck, "Ee? Is that Jamin?"

He looked carefully, there was one among several people who was already drunk and unconscious, but wasn't it Jia Ming?

"Strange, it's been so long, never seen Jia Ming drink yet, why is he so drunk today?" The old man muttered somewhat strangely to himself, he still admired Jia Ming as a young man, so he took two steps forward and asked with concern, "Is Jia Ming alright?"

"No, it's fine"

Several people replied drunkenly, waving their hands, "Let's go out and continue drinking!"

The old man said, "Look how drunk you all are, Jia Ming is unconscious, still drink let Jia Ming rest here with me for a while."

Saying that, the old man was about to go over to help Jia Ming, but as soon as he stepped forward, a man's body swayed twice so violently that it almost didn't knock the old man on his head.

"Ouch! I say you youngsters, really" The old man was just about to complain as he covered the place where he was hit, when suddenly his face changed, the man had just bumped him and his shirt came up, and the old man saw a pistol at his waist!

"Who are you guys?" The old man realized that something was wrong and bellowed, while turning around and running towards the guard post.

"Get him!" A low shout came from behind.

The old man ran even more frantically, but he was old after all, and before he could run two steps, he suddenly felt a strong wind hit his back, and the next moment, he only felt a chill in his neck, and suddenly had a feeling of suffocation as he fell headlong to the ground.

Campus Master Chapter 3179

Wen Xin sat in the corner of a bar with a cocktail in front of her, a light smile on her face as her gaze swept over the bar's customers of all shapes and sizes, a strange colour flashing in her eyes.

"I have to say, this Tengfei Group's salary is really scary high, even ordinary frontline workers can afford to come to the bar and spend money, you see many of them are wearing Tengfei Group's work clothes,

but spending money is not the least bit painful, in the whole of China, apart from state-owned enterprises, I'm afraid only Tengfei Group's workers have this kind of bottom line."

One of the men sitting with Cozy lamented.

Another woman shook her head and said, "How high do you think the salaries of state-owned enterprises can be? The really rich people in state-owned enterprises are the leaders, the workers below them at most have better benefits than other enterprises, and the rest, well, that's all. But if you look at the Tengfei Group, not many of the real top brass come out to spend their days drinking and drinking, the frontline workers make up the vast majority instead, so it seems that the rumours circulating outside that the Tengfei Group has high salaries are not false."

"Such a group of companies, with frighteningly high profits, leading the world in technology, and a scale that is not too huge but exceptionally strong and stable as a rock, now seeing the spending power of these workers, one can imagine how strong the Tengfei Group is."

"I've heard that the Tengfei Group now has many more technologies patented internationally, and it's said that those technologies are world-leading, and some time ago, the Tengfei Group even caught several commercial spies, do you think that, if we continue to develop like this, the Tengfei Group will become the most massive group in the world?"

"It depends on how you put it, as of now, at least in a few areas, the Tengfei Group is already a world leader, but a company is not a country, it can't be everything, so it's not the biggest."

"That's true."

"Dingling"

A few people were talking about it when suddenly the phone rang, warmly gestured to them, took out the phone, looked at it and picked it up.

A moment later, Cozy's eyebrows furrowed abruptly before she hung up the phone without a word.

With that, she stood up and said, "Go!"

The other three froze for a moment before they all followed and walked out of the bar.

.....

Zhang Lei looked at the corpse in front of him, his face was so gloomy that it almost dripped water, and the cold aura in his eyes was even bigger, as if he wanted to choose someone to devour.

The corpse in front of him, he knew.

Just a short while ago, when he was inspecting the company's staff accommodation area, he had seen this old man and knew that the old man was the administrator of this dormitory building, responsible for these buildings of the male dormitory.

Although the Tengfei Group had many employees and even more than one dormitory area, this old man gave Zhang Lei a deep impression because Island One was not the mainland after all, and there were really not many people as old as the old man on Island One.

At that time, Zhang Lei even had a chat with this old man and knew that the old man's grandson also worked in the Tengfei Group, so he was very impressed.

But now, the old man had turned into a corpse.

"It was the staff who came back from overtime and saw a lot of flies piled up in this area, so they were ready to talk to the hostels about the situation, but they couldn't find any, so they had to look for the cleaning, but when the cleaning came and cleaned it, they found that it was actually blood, and it looked like it had been wiped before, so they immediately reported it."

A man in a security guard uniform was briefing Zhang Lei on the situation, "After we knew the situation, we retrieved the surveillance, and that's how we saw that it was a few employees who attacked this hostel manager, and after that they all ran away."

Zhang Lei turned his head to look at the security guard and asked, "You haven't been trained in the security department?"

The security guard was stunned, "Yes, when I first joined, I was trained in the Security Department."

"Then you still told me that a few staff members attacked the hostels?"

Zhang Lei said in a cold voice, "You tell me, what kind of staff would be so good at fighting? Hmm? Take a look at the wound on the old man's neck yourself, it's smooth and neat, completely done in one go, such a technique, you can do that?"

The guard immediately blushed, "I, I wasn't paying attention"

Zhang Lei, however, ignored him and said in a deep voice, "Inform the garrison to blockade the sea around Island No. 1, and at the same time, convey my orders to the battle group to closely investigate the suspicious people on the island.

With a cold face, he said in a deep voice, "In short, we must find these people in the shortest time possible!"

"Yes!"

"Go!"

Zhang Lei finished his orders and left with a sullen face, today's Battle Team was long ago not the same as when it was first established, now the Battle Team had extraordinary strength, especially under the training of Yi Xingchen and the others, intelligence, assassination and tracking and so on, everything was refined, let them investigate this murder case, I'm afraid they were no better than experienced police officers.

However, Zhang Lei did not let go of the case, but called the people in charge of logistics and instructed, "Check the list of all the staff, see who is not in the dormitory, and make sure everyone is contacted!"

At this moment, Ji Feng also got the news and rushed to the scene with the fastest speed.

This was the first time that a murder case had occurred on the island.

Although accidents had happened before due to construction work, or people had been injured during the arrest of spies and other operations, this was the first time that such a sudden murder had occurred.

Therefore, Ji Feng paid extra attention to it.

“This case is very unusual!”

Zhang Lei said in a deep voice: “The person who did it is definitely a master, killing with one blow, with a clean and sharp technique, and the weapon used is also quite sharp, definitely not an ordinary murder weapon.”

Ji Feng frowned and asked, “Why would he kill an old man?”

Zhang Lei said, “From the surveillance, it should be that this old man was at the right time, the other party must have other purposes.”

“We need to investigate as soon as possible!”

Ji Feng said, “No matter what the purpose is, with something like this happening, they are likely to flee Island No. 1, the military’s blockade won’t last long, if our side is slow, it will probably become a headless case.”

Zhang Lei nodded and said, “Don’t worry, as long as the other side is on the island, even if they’re hiding in a rat hole, I’ll find them out!”

Half an hour later, Zhang Lei got the information back, “Not counting those who went on business trips and those who took leave to go home, only one person could not be contacted, a frontline employee in this building, named Jia Ming.”

Ji Feng frowned, “Jia Ming?”

Zhang Lei nodded and said, “The workshop supervisor has already gone to the personnel department to look for his photo, it will be sent over soon.”

Ding!

As he was talking, Zhang Lei’s mobile phone rang, he picked it up and immediately said, “The photo came through, ee? This person seems a bit familiar?!”

Ji Feng took the phone and looked at it, slowly nodding his head, “It’s really a bit familiar!”

On the photo, it was a young man, looking like he was probably in his twenties, it was an ID photo, taken very clearly, and Ji Feng felt that this person was somewhat familiar.

“Perhaps, it was when we had met during the inspection?” Zhang Lei frowned and said.

“No!”

Ji Feng shook his head and thought back carefully for a moment, then suddenly his face changed, “It’s him!”

Zhang Lei immediately asked, “Who is it?”

“Wu Zhiyong!”

“Who?!”

Zhang Lei was stunned, “Wu Zhiyong? That can’t be right? How could he be here, hasn’t he been missing for a long time Are you saying that he’s hiding on the island after disappearing?”

Ji Feng said, “It must be him, although the appearance is different, but, these eyes he can’t change, that kind of eyes I definitely won’t be mistaken!”

Passing the phone towards Zhang Lei’s hand, Ji Feng said in a deep voice, “Now everything makes sense, Wu Zhiyong, it turns out he’s actually hiding here! It seems that he’s either planning to move on, or, his whereabouts have been discovered and he’s been taken away!”

Zhang Lei turned around and left, dropping the words, “I’ll definitely find him out! You inform the garrison, I’ll transfer the war party!”

Wu Zhiyong had appeared on island number one and the murder was related to him, so nothing needed to be said, everyone knew what that meant.

In the shortest possible time, the island’s garrison, the war team, and even the ordinary security guards were all mobilized, all with one goal in mind, to find Wu Zhiyong and catch the murderers!

However, just at this time, Ji Feng suddenly received the news that just over an hour ago, Warmth and the others had suddenly left Island One by boat.

“Chase them!” Ji Feng said only one word, his face gloomy.

“Bitch!”

Zhang Lei cursed angrily.

On the sea, headlights from the speedboats and warships lit up the surface, in the sky, helicopters were circling, and all the alert equipment on Island No. 1 was switched on.

There were faint sounds of gunfire and explosions.

Word was soon received that the man had been captured!

However, the final result could not make Ji Feng happy, because, the only ones who were caught were the three people who came along with Wenxin, however, there was no trace of Wenxin and Wu Zhiyong.

Ji Feng knew that this time it was a mistake on No.1 Island, a small matter of losing someone, but an extremely important opportunity had been missed.

He stood on the pier looking at the still busy sea and was silent.

.....

This matter, in the No. 1 island has stirred up a lot of waves, although others do not know the inside story, but, from Ji Feng, including all the middle and senior levels of the Tengfei Group, as well as the

military generals and garrison, all began to rectify, the planning of the No. 1 island and various facilities, but also all swept through.

Ji Feng knew that these could only be considered measures to mend the sheep, but for Wu Zhiyong, I'm afraid that it would be difficult to meet in the future.

However, Ji Feng did not have too much time to think about this, because only two months later, a small-scale friction, at sea, occurred.

However, no one would have expected that, with the situation gradually easing, this minor friction, which started between a Chinese merchant ship escort and a Vietnamese warship, would evolve into a war at a mind-boggling speed.

In an instant, the entire southern sea was swept up with all the forces.

War, it broke out!

Out of the blue!

Campus Master Chapter 3180

No one expected that war would break out at this time.

It was too sudden!

The situation in the southern seas, which had been tense for nearly a year, has gradually eased. The economies of the Western countries, led by Rice, have regressed substantially in the last two years, and Europe can almost be said to be leaking all over the place and in constant trouble.

Under such circumstances, it is certainly not a problem for countries like Kepong and Vietnam to blockade China, but if they want to start a war, it can only be a local war at most, or even a dispute is more appropriate.

Countless experts, scholars and analysts have commented on the current situation on various occasions, saying that the most tense period in the southern waters has passed and that the next period will be a hot and cold political and economic situation, with mutual fighting and constant economic and trade exchanges.

However, the war broke out so suddenly and unexpectedly!

Since the situation was tight, the navies of certain countries, and even some local armed forces, disguised as pirates, were constantly harassing China's maritime trade fleets, and the navy immediately formed maritime escorts to ensure the safety of merchant ships.

However, it was with the escorts that the war began.

When Vietnamese warships intercepted Chinese merchant convoys in the name of clearing pirates, friction arose with Chinese naval escorts, and with the Vietcong firing the first gun that hit a merchant ship, war, broke out.

After more than two years of tension, all sides had built up a huge amount of strength, and a small scuffle became the trigger for a powder keg that exploded instantly.

Vietnam, the Philippines, Kepong, including various pirates in disguise, all entered the war in an instant.

Their only goal was to destroy the fleet in the southern waters of China and take Island No. 1!

With the constant reclamation of the sea and land in the past few years, Island No. 1 has expanded more than twice as much as it was before.

Even if the land is not yet connected, the Chinese Navy and Army, including the Tengfei Group, have already made the communication and transportation between the islands incomparable.

Therefore, it was imperative to attack Island No. 1.

On Island One, a state of emergency war was immediately put in place. In the sky, countless warplanes flew over, and on the sea, huge, mountain-like giant ships began to receive orders to sail out of the harbour.

Simultaneously with the official war of words, there was a massive mobilisation of the navy and the land forces were on the verge of war.

.....

Somewhere.

Wu Zhiyong's blindfold was removed and he blinked hard a few times before he could adjust to the blinding light.

Immediately afterwards, he saw clearly the environment he was in.

A steel fence as thick as a baby's arm, leading directly from the floor to the top of his head, concrete floors and walls, slender passageways This was simply a small prison.

Outside the steel fence stood two men holding steel guns and wearing combat uniforms. And beside him was a large, brawny man, who had obviously just taken off his blindfold.

"What is this place?" Wu Zhiyong asked coldly.

"Hell!"

The big man's voice was even colder.

Wu Zhiyong smiled and said, "That's an appropriate name! If I'm not wrong, we are underground, or in the basement of some building, or, some underground base?"

"It could be considered an underground base!"

Suddenly, a woman's voice rang out, and with a sound of high heels stomping on the ground, only to see a tall, long-haired woman, walking up to the fence, "Young Master Wu guessed correctly, we are in an air-raid shelter, however, this air-raid shelter has been continued to be processed and constructed by us, and has now become an underground base."

When Wu Zhiyong saw the woman's face, he smiled, "It really is you! Wen Xin!"

The woman outside the fence was none other than Wenxin who had left from Island One in a panic. She laughed lightly twice and asked, "Oh? Young Master Wu, you know it was me who arrested you?"

Wu Zhiyong said, "Because the only stranger who has come to Island No. 1 recently, and is suspicious, is you."

Wen Xin raised her eyebrows and laughed lightly, "It seems that you are quite careful, in that case, how did you fall into my hands?"

Wu Zhiyong said, "Not as skilled as others."

Wen Xin said, "Young master is young master, great! Even now, your mouth is still so tough! Alright, Big Young Master Wu, let's not beat around the bush, I think you know very well what kind of situation you are in, no need to say more nonsense, if you want to cooperate, you can live, if not"

"How do you want me to cooperate?" Wu Zhiyong interrupted her words and asked directly.

"It's simple, answer me a few questions."

Wen Xin said, "First, the missing amount of money from the Brilliant Group, where did you get it? Secondly, that roster of the Wu family, where is it again? Thirdly, which army is it?"

Wu Zhiyong smiled at his words and suddenly laughed, "So it was him!"

Wen Xin frowned, "What did you say?"

Wu Zhiyong looked at her and suddenly asked, "When did you hook up with my second uncle?"

Wen Xin's face changed abruptly and she stared at Wu Zhiyong for a while before slowly asking, "How did you know that?"

"Don't you even understand this? The three questions you asked, apart from the first one, what are the next two about, don't you understand?" Wu Zhiyong smiled and said.

"You're really smart!" Wen Xin understood, she stared at Wu Zhiyong and said, "Since you guessed it, then you should know that if you don't answer, you definitely won't be able to walk out of here. Say it!"

"Whether I say it or not, I won't be able to walk out of here." Wu Zhiyong said, "How about this, how about you answer a few questions for me?"

"What questions?" Wen Xin asked in a cold voice.

Wu Zhiyong smiled, "Don't be nervous, it's just a casual conversation, I'm under your control now, life and death are in your hands, so why should you be nervous?"

Wen Xin said, "Go ahead!"

Wu Zhiyong asked, "I don't think you've been following my second uncle all along, right?"

"That's right!"

"In that case, you don't know his true identity, well, to be precise, you don't know his identity in the dynasty, do you?"

“What do you mean?” Wen Xin frowned slightly.

Wu Zhiyong laughed, “Let’s put it this way, my second uncle sent you here today, but you actually only serve as a sounding board, but you may not understand it yourself because you are stupid, but why would my second uncle use a stupid person? Because, right now, he has no one to use in his hands.”

The smile on Wu Zhiyong’s face grew even wider when he saw the already gloomy look on Cozy’s face, “My second uncle was supposed to be the main person in charge of the dynasty in China, the legendary number one, alongside Wang Wengao, the king, and probably even surpassing him in status, but the dynasty has had a bad year these past few years, and has been hit hard time and time again in China, with Wang Wengao falling into the net and the dynasty’s My second uncle panicked because he knew that once he was traced, he would only die!”

“Then, he could only cover up as much as he could, using various methods, but the more he did, the more mistakes he made, and the more he revealed. At this time, he must find a way to save his life, and that way is the questions he asked you to ask!”

“Unfortunately, you don’t know what’s going on from the beginning to the end, people like you, I reckon, you definitely can’t be for dreams or beliefs, nor can you be for money, so to speak, you are probably for power and status, or some kind of lust `desire’, am I right?”

Wen Xin’s face was sullen and she didn’t say a word, staring at him coldly.

Wu Zhiyong smiled, “If I were you, I would run away now, as far away as possible, at least, I wouldn’t do such a stupid thing.”

“If you’re not stupid, how did you end up in this situation?” Wen Xin sneered.

“It’s still the same thing, skill is not as good as others!” Wu Zhiyong said, a flash of hatred in his eyes.

“You’re talking about the Ji family, right?” Wen Xin mocked.

Wu Zhiyong nodded, “That’s right, it’s the Ji family.”

Wen Xin sneered, “Then why are you still hiding on Island No. 1? If you hate the Ji family so much, why didn’t you take the opportunity to kill Ji Feng?”

Wu Zhiyong said frankly, “I’m not his opponent, the dynasty is so powerful and has tried to kill Ji Feng countless times, but isn’t he still alive and well now? I said you were stupid, and you’re still not happy, a discerning eye can see at a glance that Dynasty’s power in China is no match for Ji Feng, moreover, in China, the power of this organization has weakened to the extreme, you have to join Dynasty, you’re really seeking your own death!”

“Humph! You talk as if you know everything and can see through everything and don’t know, as if you are Zhuge Liang, not that you still ended up in this situation!” Wen Xin sneered.

“I’m just a Zhuge Liang after the fact!”

Wu Zhiyong shook his head and laughed, “There are some things that I found out after the fact, some that I analyzed only after it happened, and some that I heard about, but all in all, it’s a clear view of the

situation. Especially during this time on island number one, it was a good way to see some things clearly.”

“Since you’ve seen everything clearly, all the more reason to know what will happen to you if you don’t answer my questions, right?”

“That’s right!”

Wu Zhiyong nodded and said, “But the problem is, I don’t want to tell you, let those who want to know come and ask me directly.”

Wen Xin frowned and said in a cold voice, “Don’t you eat your wine with respect! Young Master Wu, you’re no longer a young master, stop putting up a front!”

Wu Zhiyong laughed, “You can pass on my words and see what he says.”

Wen Xin stared at him coldly and suddenly waved her hand, “Give him an injection!”

As a syringe of liquid was injected into Wu Zhiyong’s veins, his eyes gradually began to blur, however, he revealed a smile

.....

The war in the southern seas was in full swing!

All sorts of battle conditions, constantly reaching the country, countless people took to the streets to march in support of the country and the military, and some even called this war, the last chance for the rise of China!

The people’s hearts were lifted, and the sermons were completely drowned out by the huge enthusiasm of the people.

Countless people signed up to join the army, and despite being rejected by the state, this enthusiasm, however, continued to infect those around them.

In particular, when a general in the military said something in an interview, it instantly ignited everyone’s patriotic enthusiasm.

“It is the duty of a soldier to protect his country, when the army is exhausted, you will go up again!”

Countless people’s hearts were stirred.

On Island No. 1, all the troops entered a state of proximity to war.

Ji Feng had likewise called the battle group together, but, now that it was the Navy’s war, it was not used for them to go on the Tengfei Group, so although the atmosphere on Island One was tense, the battle group within did not think they were going to go to war now.

In this regard, Zhang Lei is still quite regretful, what this guy wants to do most is to lead thousands of troops in the battlefield, but he knows that this wish is destined to be unfulfilled.

I’m afraid that this battle group he leads will only be able to practise in the area of law and order.

“Lei Zi!”

Ji Feng said in a deep voice, “I have developed another set of training methods, from today onwards, everyone in the battle team will follow this method.”

“No problem!”

Zhang Lei nodded readily, and then asked, “What method?”

Ji Feng said, “You take the battle team and gather in the basement of the Experiment Building.”

“The Experiment Building?”

Zhang Lei froze for a moment, “Don’t you go to the training ground?”

Ji Feng smiled, “You’ll know when you go, you go and gather the battle team, I’ll go and arrange it on my side first.”

Twenty minutes later.

The second basement level of the experimental building, the car park that was originally planned, was a completely different look at the moment.

“Crazy, this is

Zhang Lei was stunned as he looked at everything in front of him.

All kinds of instruments and equipment, a huge iron frame like odd facilities, and a small kayak like odd things, Zhang Lei looked at all of this, completely do not recognize.

“From today onwards, all members of the battle team, are to train here, including you and me.” Ji Feng said.

“What’s this training for?” Zhang Lei asked.

Ji Feng smiled and said, “Space warfare!”

Zhang Lei was stunned, “What?”

The entire battle team, one hundred and three people, except for a few mercenaries like Yi Xingchen, all the others were from military backgrounds, some were ex-military and some were asked by Ji Feng from the military before they had reached the age of retirement.

After these few years of bonding, the members of the battle team had long since blended into one with each other and worked extremely well together.

And this, too, was what Ji Feng wanted.

Zhang Lei soon found out what those kayak-like things were actually for.

When the first thirty battle team members entered them individually, Zhang Lei also followed them into a ‘kayak’ and once he sat down on the middle seat, his eyes suddenly brightened up.

In front of his eyes, it was as if they had entered another world, as if they were in the sky, and their whole being had an unreal feeling.

“From today onwards, you will learn how to operate this weapon!”

Ji Feng’s voice, rang out in everyone’s ears, “This is by far, the strongest single combat weapon we can create, although it is now a simulation training, but, all the operations are general with the weapon, now, I will start to explain the operation method!”
