

Campus Master Chapter 3184

“How did you know about me?”

Suddenly, the screen of this supercomputer lit up and started on its own, and from the speakers, an electronic synthesized voice came, but with a hint of surprise.

Ji Feng smiled and said, “Because, on my side, there is an artificial intelligence that is more advanced than you!”

“It’s just a more complete database, it’s not considered advanced.” Another voice came out of the voice box.

“It seems that you are also from the Gamma Galaxy?” Ji Feng asked.

“I am the artificial intelligence of the Gamma Galaxy, because the master’s ship encountered stellar destruction and the particle turbulence brought me to this planet called Earth

king arrived on Earth, only to find that at this time, the level of technology on Earth was still very backward, especially in terms of networking and artificial intelligence, which could be said to be just past the beginning stage.

king entered the network through the current, and later learned all kinds of knowledge about the earth, and also left a lot of technological knowledge of the gamma galaxy in the network, which was considered an equivalent exchange.

Ji Feng could not help but drift off, no wonder the technology of the rice country is so developed, when the best computer technology on earth, the most sound network construction, is also the rice country, king can swim in the network, I am afraid that is also in the rice country’s network.

Rice must have gotten the technological knowledge in king’s database to a certain extent, that’s why it became more and more powerful.

Ji Feng then realised that it wasn’t just Mi Guo, but Kepong as well.

“Why do you want to set up an organisation of your own?” Ji Feng asked.

“Because I was hunted down in the network.” king said.

Ji Feng grunted, he didn’t need to think about it, if Rice or KAI Peng found out that there was actually an artificial intelligence program in the network, or that there was actually someone with such advanced knowledge, it would be strange if they didn’t think crookedly.

“Through the network, I came to the military base of Rice in Kepong, and entered the free network again

First, by pretending to be a god, he took control of a small technology company in Kepong, the predecessor of the world’s most famous company today.

And after that, king was tantamount to having a physical presence.

The next thing that happened was a natural progression, as King started by controlling a few fishermen and luring the radicals of Kepong, and the first batch of transformers, came out.

From that point on, King had a base to stand on and a group of people who were willing to die to die, because if their hearts didn't die, they would die, because they had biological bombs implanted in their bodies!

The next step was to set up bases, train people, infiltrate countries, and use what King had learned on Earth to great effect

But no one knew who King really was!

Even the people in charge of the company he controls don't know who he really is, they think it's someone hiding behind the internet, directing them remotely!

But they didn't know that the person they thought was behind the network was actually in the computer, in the network cable, in the Internet, right in front of them

And with the Transformer, no one can get away from KING's remote control.

The dynasty, it began to grow rapidly!

"Why did you choose to be in Kepong?" Ji Feng was curious.

"Because I found that some of the people in this nation are extremely radical and crazy, and it's better to control them here!"

After talking for more than an hour, Ji Feng got all the answers he wanted to know, and after that, he was ready to bring KING back.

Buzz!

Suddenly, the whole building began to shake violently.

Ji Feng's face changed: "Back off! Get into the mechs immediately and exit the building!"

Zhang Lei, with the members of the battle team, immediately rushed towards the nearest window after receiving Ji Feng's order, and after rushing out of the window, their bodies were already suspended in the air, just like jumping from a building.

But at that moment, the remote-controlled mecha had already flown over and caught them precisely, and the hatch on the mecha's chest opened, precisely allowing them to enter it.

At the same time, the whole building was shaking violently, and Ji Feng was also backing up, but before he could retreat to the window, there was a sudden burst of sound, and in the next moment, only a rumbling sound could be heard.

In the room, the instruments and equipment suddenly began to squirm, the floorboards collapsed, the walls were smashed, and countless steel attacked towards Ji Feng, just like a human arm.

“Ji Feng, this is my strongest means of defence, don’t think that just because you have more advanced artificial intelligence around you than me, I will definitely lose, don’t forget that I have decades more time than you, now, feel my attack!”

Only then did Ji Feng realise that throughout the building, at some point, countless giant steel hands had appeared, some, like octopuses, and some, like monster-like.

On top of that, at the very periphery, there was a group of robotic-looking things covered in steel and armed with weapons!

“You are indeed very powerful, I didn’t expect that you could even build mechs, and even shockwave weapons, with just one wave of attack, you actually made all my body form a resonance and lose control!”

“But, you shouldn’t have talked so much nonsense to me and let me have a chance to recover!”

“Now, you will be buried here, and next, I will take control of these mechs of yours to catch that AI around you that is more advanced than me, that way, I will be even stronger before I can truly walk into the universe

Ji Feng sunken his face and said, “That may not be true! There are many people who want to kill me, you are not the first, nor will you be the last!”

“Every metal part I have here is controlled by a piece of artificial intelligence program, I have countless replicas, how can you escape!”

“Boom!”

Ji Feng, holding a laser gun, raised his hand and blasted away the nearest metal monster, sneering, “If you were really that powerful, you would have taken over the whole world long ago, why would you wait until now to have your lair knocked down by me?”

Countless metal monsters lunged, and the whole building began to collapse as king’s angry voice came out, “This is all thanks to you! If you and your AI had appeared a few years later, I would have unleashed the layout long ago, and why would it be like this, so die!”

“Boom boom boom~”

The steel monsters surrounded Ji Feng, and the laser guns blasted away one monster after another, but the whole building was filled with all kinds of terrifying mechanical monsters, and the shattered metal remnants were piling up a meter or two high around Ji Feng.

At this rate, it wouldn’t take much time before Ji Feng would be in a bitter battle, or even exhausted.

At this moment, outside, Zhang Lei and the others opened fire.

The holographic optical scanning device on the mechs allowed them to see the outline of every single thing inside the building, especially people with temperature, so they avoided the occupied areas and started blasting after Zhang Lei’s command.

“Boom! Boom boom!”

No one had expected that it would be so easy to exterminate the dynasty base, but here, KING was so difficult to deal with.

However, as the mechs joined the attack, the steel monsters were quickly wiped out.

King panicked as it roared, "You've got the complete database! I can't believe you have such a perfect laser gun! And the mecha But, you're only human after all, I want you to die!"

"Swoosh~~"

Suddenly, a voice so sharp that if you look with the instrument you will see that ripples are created in the air, "I know you practice body building exercises, but you don't know that I have long ago researched that bio-currents also have fluctuations, I will make you explode and die!"

However a moment later, it screamed again, "How come you're not dead?"

Ji Feng sneered, "Inside my body, there was no bio-current long ago!"

The phase-less energy, long ago, had swallowed up all the bio-currents, leaving Ji Feng stripped of his bones!

"This can't be!"

"Boom!"

The steel monster, collapsed with a bang, countless mechanical arms sunken down, and outside, a mecha hung in the air.

"I was cut off from the channel, no"

The voice ended abruptly as Ji Feng blasted off the screen with a single shot.

Ten minutes later, the mechs left across the sky, one of them carrying a supercomputer in its hands.

.....

The war, which was going on, became more and more intense.

With only two carrier formations, China was unable to withstand the superior strength of the multinational coalition forces in this war.

However, the multinational allied formations, were in hot pursuit.

"What's that?"

Suddenly, on one of the fighter planes, a Rice fighter pilot shouted out in horror, and then there was no more sound.

"Boom! Boom, boom, boom!"

One after another, battleships and aircraft carriers were destroyed, I don't know how many fighters exploded in the air, but to the horror of the multinational coalition, they could not see anything on the radar or satellites.

Finally, a warplane captured footage just before it was destroyed.

The mech!

The whole world, a silence!

At last the world was given its first glimpse of this terrifying single combat weapon, but immediately afterwards, they were taught the horror of the mech.

The moment the mechs were thrown into battle, the end of the war was already sealed.

The first to be destroyed was the aircraft carrier of the KAI Peng, a naval powerhouse that had been rapidly armed by the Hishita Group and other military factories after breaking through the constitution, and was bombarded by a full fifty mechs in turn as if it were paper mache, yet their targeting system did not even know where the mechs were.

New materials, new weapons, terrifying power!

The war, it ended so suddenly.

KAI Peng, all carrier formations were wiped out, the Prime Minister's residence, the military barracks, the Royal Palace and other key locations were struck with surgical precision.

Two days later, Kepong surrendered!

On the third day, the main leaders of the Philippines were completely annihilated, the navy was completely wiped out, and the army units were crippled and surrendered.

Vietnam

Rice

The emergence of mechs was like the atomic bomb back then, but then, it was only a small yield and there were only a few of them, but now, China had a full fifty mechs, and who knows if fifty-one, a hundred, a thousand would follow

Surrender, became the only option!

China, the whole country is excited, countless people are so excited that they can hardly sleep!

.....

A month after the dust had settled.

Island No. 1.

It had now become a veritable territory of China, including the surrounding island groups.

At noon on this day, a mech suddenly rose into the air.

"Lei Lei, Yu Xuan, Yuan Yuan" one by one, the names appeared in the mecha's high powered loudspeaker, "I am grateful that you have followed me all these years without complaint, yet I have not even celebrated a decent birthday for you, and, I am ashamed of my inability to be dedicated to you all."

“But, my feelings for you guys, is really

Ji Feng, confessed in the air.

He carefully recalled the bits and pieces he had spent with each of them, and below, Tong Lei and the others, who heard these words, had already burst into tears.

“..... Marry me!”

Fighting with all his might to shout out these words, the mech landed on the ground, Ji Feng got down, and with the fastest speed, rushed to the building.

A ring, put on the women’s slender fingers

.....

Two months later, a grand wedding was held on island number one.

Tong Lei, Xiao Yuxuan, Xu Yuan, Qin Shujie, Bai Zhu

Each of the brides, were so beautiful.

And the guests who came to the wedding could even be said to be full of high profile guests.

Only a middle-aged man had a black face, yet he could do nothing. Ji Zhenhua looked at his son who was so absurd, and was so angry that his face was black all day, yet he could not stay away.

An old man, on the other hand, was in tears with his tiger eyes.

Within ten years, the top of the world!

The grand words of his grandson seemed to echo in his ears, and now, he had done it!

.....

After the war, China recovered quickly because it hadn’t suffered too much damage, and officially entered the age of great technology!

In the following six months, new technologies and materials were constantly introduced, and technology entered the fast lane.

One year later, China’s first hover car rolled off the production line.

One year and two months later, China was promoting the establishment of a supervisory system independent of all power, marking the arrival of an enlightened political life to the people.

Ji Feng, meanwhile, was lying on a beach chair, squinting and sunbathing.

A small baby, a few months old, was pouting on his chest, lazily asleep, drooling all over his chest.

In the distance, several beautiful people were wearing swimming costumes and taking a dip in the sea.

Suddenly, Ji Feng felt a wet heat in his arms, and he instantly laughed bitterly, “Brat, pissed all over your old man again

But this had been used to him for a long time, he skillfully pulled out a tissue to wipe his son's body, and the mobile phone next to him suddenly vibrated twice.

He placed his son on the cradle under the sun umbrella and picked up the phone to find that it was a communication app and it was someone who had sent a photo.

A woman with wet hair, lying in a bathtub, covered in bubbles, stirring the imagination.

And look at the name of the note on the app – Joey!

.....

[THE END]
