

Chapter 331

The adult world is too strange. Whether husband and wife or parents. Outfit, it is estimated that it has become a very popular thing. Pretend to be pathetic and ask for sympathy. Play the big man and ask for attention. It's also between husband and wife. It's not easy to hide private money and find ways to be lazy and naughty. Anyway, it's just like this.

But children's world is not, their world, everything is true, everything is beautiful. The sky is blue, everyone is amiable, want what you want. Refuse what you don't want. It's simply enviable.

Children don't pretend to be ill. In a few minutes, the baby in his mother's arms couldn't stay. Look at the decals on the wall for a while, look at the body mold in the office for a while, with small eyes. But the left hand still didn't dare to move, and the baby was pitiful, which cast a shadow on her heart.

Although the elderly at home do not understand science and may not have a high educational level, the life experience handed down by their grandparents can definitely be realized by people now. The simple and practical truth has been handed down from generation to generation. For example, you can't go in front of a fighter or watch when chopping firewood. It's so simple.

"You put the child down and let him play for a while." Zhang Fan looked back and said, adding: "watch a little, don't bump." Zhang Fan said in a word that the child's mother was embarrassed.

The child stopped crying and making trouble. She also felt embarrassed. Qi Ai walked up to Dr. Zhao and said, "I'm sorry, I've gone too far."

Dr. Zhao let the woman scold him, but he was also wrong. When people gave face, they came down with the steps, "it's all right, you can understand."

The little doll didn't understand adult things. After her mother put it on the ground, she first wandered around, and then ran to see Dr. Li who was lying on the table pasting the test sheet. Standing in front of Dr. Li, he put his right index finger into his mouth. After waiting for a while, he found that Dr. Li ignored him.

"Sugar!" Hi! Little boy, I'm still thinking about it. Xiao Li can't laugh or cry. Where does she have sugar.

"Why don't I buy you one?" Children, as long as they are normal people will like it. And it's another cute baby who just cried, with tears on his face and fingers in his mouth.

"No! No, I'm really sorry. " The child's mother hurried over and said.

"Here you are, baby. Here you are." While the adults were talking, Zhang Fan handed over his listener " Hold it in two hands. This is too big for you to hold it in one hand. "

As soon as the little doll looked, she had never seen a toy she had not played with, and came over happily " Two hands, not one. " He stretched out his right hand to take it, but Zhang Fan didn't give it.

"The baby uses two hands to hold the things in his uncle's hand." The child's mother followed.

Hesitating, the little doll looked at her mother, then looked at the stethoscope in Zhang Fan's hand, and put the finger of her right hand in her mouth, as if she were thinking. Generally speaking, this thing is not as attractive as lollipops.

"Well!" There's no way. Zhang Fan puts his percussion hammer in his hand again. He can't do without extra weight. Now the little doll is too smart. The percussion hammer is a miniature hammer, metal, with a layer of stainless steel on the surface. It looks shiny and more attractive than the earthy listener.

The little boy looked at the bright percussion hammer. He took out his drooling finger and ran over with a smile. Then he grabbed the percussion hammer with one of his two hands.

"All right! Reset succeeded. Bring your child a triangular towel to hang for two weeks. Although his hand can move, his joint capsule is still a little damaged. "

"Doctor, it's not serious." Seeing that the child's hand moved, the child's mother breathed a sigh. She heard that it was damaged, and her heart hung up in half.

"It's all right. In the future, you adults should pay attention to it. Don't pull it violently. Children are still young, and they are not rubber dolls. Go and buy a triangular towel. "

"Yes, yes, listen. You see, it hurts today." The old man said to his daughter with an unhappy face.

Sometimes it's like this. If Zhang Fan doesn't look good to others today, don't talk about others. Just his angry mother, it's estimated that he can eat Dr. Zhao.

But now, Zhang Fan said that she didn't have anything, and kept saying yes with a smile! As soon as Zhang Fan said to buy a triangular towel, Xiao Li wrote a prescription. After Zhang Fan signed his name, the child's mother went to the pharmacy with the prescription.

The child's arm can play, but the little doll doesn't give up with Zhang Fan's percussion hammer“ Hey! Hey! This is not food. You can't put it in your mouth. Come and give it to your uncle. ”

"No! Baby! " Then he took the percussion hammer and hid it behind his back.

"Hi! You're still a little liar. Give it to me. " Zhang Fan is helpless. This person really doesn't care about size or length. As long as he can speak, he will play a liar.

"Baby, give it to your uncle. Grandma goes out to buy you a lollipop."

"No!" Villains just don't do it.

"Give it to me! Or I'll give you an injection. " Zhang Fan has a black face. The result was useless. The villain grinned and looked very obvious: if you scare me again, scare me again, and I'll cry for you.

The doll's mouth is grinning. Zhang Fan is embarrassed to ask for it again. Although it's not very expensive, it's hard to buy. There are no large medical stores in small cities, and they can't buy them.

Want the hospital to send, which is a dream. When Zhang fanding was still in the Department, it was sent by an instrument manufacturer. The quality and weight were good. It was very good in his hand, so Zhang Fan was a little reluctant.

After a while, the child's mother came“ The doctor bought it. ”

"Well, give it to me." Zhang Fan took the triangular towel, cleaned it up a little, and brought it to the child. The triangular scarf is actually a cloth strip made of white linen, like a red scarf.

Zhang Fan, while making a triangular towel for the child, pays attention to the child's hand and wants to bring the percussion hammer while the child doesn't pay attention, but the villain is wary of Zhang Fan. Holding the percussion hammer tightly in his right hand, he also clearly told Zhang fan that if you don't want face, you can grab it. I'm still a patient!

The child's grandmother said things to the child's mother in a few words. The child's mother said to the child, "give the baby to your uncle. This is the tool for your uncle to work. Without this uncle, you can't work."

Say die or live, the little boy just won't give it. The child has just been injured and tears are still hanging on his face. The child's mother is reluctant to rob it. There is no way! Then he turned and looked at Zhang Fan with an embarrassed look.

"Well! Well, doctor, when the child falls asleep at night, I'll put it away and bring it to you tomorrow, okay? "

"OK! that 's ok! Then go back first and remember to check it tomorrow. " Recheck fart, Zhang Fan is

worried that the child's mother can't get the percussion hammer, so he asked the child's mother to recheck the next day. It's no good not to play with your heart. Children with big palms play with your heart!

Work overtime and read the medical records of these days. I can't help it. Although Dr. Li and Dr. Jiang who transferred to another department are good, they can complete the medical records on time. However, after all, people are transferred. Zhang Fan has to check some places that are incomplete or wrong.

Otherwise, after the medical records are handed in, they will be beaten down by others, but they will be fined. If a medical record is made into a class C medical record, it will be fined. After the hospital is fined, the Department will be fined!

It's not easy to earn two dollars. There's no need for snacks. The hospital fined them all. Otherwise, Dr. Zhao won't be as sad as his father and mother died today. Looking at his stack of medical records, it is estimated that there are at least a dozen, and more than 1000 are gone!

"Hehe, black face is not good." Xue Feipeng played with his percussion hammer. He was deliberately angry because Zhang Fan took him to work overtime.

"Why didn't you go home!" At this time, Jiang Nini came.

"Where have you been? Look, I'm so tired this day. I wrote all your medical records. " Xue Fei looked at Jiang Nini who had just entered the door and said.

"Order a face. It's all written by Xiao Li. Besides, Dr. Jiang doesn't like someone to play. He's on business. "

"Zhang Fan is better. Mr. Xue, I've been busy with the hospital leaders all day today. " Jiang Nini was talking and drinking water with her own water cup.

"What are you doing. Tell me about it. " Xue Feitian approached with a face.

"I won't tell you. Do you want to know?" Then he glanced at Zhang Fan.

"I don't care whether I say it or not. I've written two medical records. I'm going home. " After that, he was afraid that Zhang Fan would catch him and hurried out of the Department to change his clothes in the duty room.

Jiang Nini is still waiting for Zhang Fan to ask, but Zhang Fan doesn't ask. First, Zhang Fan has no curiosity. Second, he can't hide now. How can he get close to it.

"Well, Dr. Li, rest and talk about the rest tomorrow. It's time to eat. "

"You invited us to dinner. If you invite us to dinner, I'll tell you good news." Jiang Nini looked forward to it with a smile.

"Ah! No problem with the treat, but it's really not today. My girlfriend has cooked dinner at home. You go home quickly. I'll go first." Zhang Fan also hurried out of the Department.

"Coward!" Jiang Nini scolded quietly in her heart.

"Nini, let's go. My waist is almost broken. I've really been fooled by Zhang Fan. A medical record is thirty. It says I'm dead!" Xiao Li stretched out. The girl has been sitting all day. She is also a down-to-earth girl.

When he got home, Shaohua left work long ago. The bank was not so busy at the end of the year, at the beginning and end of the month, and Shaohua was not in the business hall, so he seldom worked overtime.

"Come back, wash your hands quickly, lie down for a while, and eat noodles today." Shaohua was cooking with her mother in the kitchen in an apron. When she heard Zhang Fan changing shoes at the door, she shouted to Zhang Fan.

"OK, do you want my help?" Zhang Fan pretended to be polite. Because Shaohua's father is here, even if Shaohua wants Zhang Fan to help, he can't.

"Dead!" Shaohua also knew that Zhang Fan asked deliberately, so he scolded in a low voice.

"Ha ha!" Zhang Fan didn't know if he heard it, but Shaohua's mother heard it. The old lady smiled, and then whispered with her mother and daughter: "this man is just like the pet at home. You can't put it too loose. Maybe he will run away."

Then the old lady looked at the old man and Zhang Fan in the living room and said, "but it can't destroy his pride. Once a man's pride is wiped out, he won't be promising. It will become old in the nest. "

"Look what you said! But what is this pride? How can I feel that Zhang Fan has no pride!" Shaohua asked quietly while helping her mother make noodles.

"Silly girl, why are you not proud. You see, he didn't come up with any important things in our family, and he didn't come up with any ideas. This is pride. Man, when there are many people, you have to give him face. When you two are together, you have to close him up a little. "

"Hehe, you still have one set." Shaohua said to her mother with a smile.

"Of course! You see, your father and I have never talked about him since we got married, and he has never touched my finger. Woman, it's a good life to meet a good husband. It's a lifetime to support each other in the wind and rain. Look at your Aunt Chen. When she was young, she was beaten black and blue by her men. Ah! "

While the two women were chatting, Zhang Fan washed his hands and went to the living room. Shaohua's father was watching TV. As soon as he saw Zhang Fan coming, he said, "lie down for a while. Your aunt made noodles today. "

"Not tired. If you don't like pasta, just eat rice. Don't give in to me." Although Zhang Fan is not tired, he still lies on the single sofa, which is his special position.

"What's the matter? You're too tired to go to work all day. You can't eat a good meal when you go home. In the past, when I went to work, I loved to eat fish. Your aunt ~ ~ "

Zhang Fan listens and enters the space. The old man doesn't care if Zhang Fan answers or not. When he is old, someone is very satisfied if he is willing to listen to him and doesn't hate him.

There are many delicious foods in the frontier, but the most famous ones are Nang Keng meat and noodles. This method of mixing noodles is also special. Knead noodles with flour, then dish, dish, and finally dish into a round dough like mosquito repellent incense.

Zhang Fan likes this. When cooking with rice, he eats two small bowls, but if he has a good appetite for noodles, he is estimated to be able to eat two large bowls, the size of beef noodles. Then, the unique feeling of satiety of pasta is really very comfortable. It's not for a fairy.

"Eat!" With Shaohua's voice, Zhang Fan came out of the system. The old man rubbed the white foam at the corner of his mouth, "Hey! Zhang Fan is good at everything, but he can't drink. Otherwise, it's a good thing for such a good young man to drink two more cups with me! " The old man looked at Zhang Fan and sighed in his heart!

Chapter 332

Meaningless, simply, some people live naturally and elegantly, but after all, such people are a few, or very few. Most people have countless responsibilities waiting for him or her when they grow up.

Parents who grow old day by day, children who grow up day by day, do not struggle, what to eat. Especially in middle age, there are too many helplessness. Crow's feet slowly climb up to a nagging wife who is no longer young, or a husband whose prostate is swollen. If you don't worry one day, you'll know the stubborn bastard. Although there are many troubles, this is life, which is the responsibility you can't give up.

China's construction industry is becoming more and more cattle, which is built on the shoulders of countless migrant workers. Countless migrant workers with their families, the sun in the sky, thousands of miles away, sweating, building cities that do not belong to them.

It's Zhang Fan's turn to go to the clinic. There is a difference between surgical outpatient and medical outpatient. In internal medicine, most of them are old patients, and they are chronic diseases for many years. Some patients have their own fixed doctors. Maybe they think a doctor is good and high-level. These old men and women are waiting for this doctor.

In surgery, there are fewer such fixed patients, and the age of the patient population is more miscellaneous, not a single elderly. There are also some who try to pretend to be ill and write a sick note. Anyway, after working for a long time, any kind of people can see it.

"Doctor, I can't take this steel plate." A man who looked about fifty years old came in with an X-ray.

"The operation that year." Zhang Fan looked at the film in his hand and asked.

"For years."

"Where did you do it?"

"Out of town!"

"Take it off. It's a foreign body, after all."

"All right. Can I get it out of the hospital today? "

"It's been released for several years. Are you anxious for one or two days?" Zhang Fan asked, unable to laugh or cry.

"Don't you have to pay for one more day's hospitalization!"

Many people come and go in and out in one morning. The general outpatient patient of orthopedics is about the 50th in the morning. As soon as I saw one off, two sweaty men came in, holding a little girl between them.

"Doctor, give me a look and let the car run over." Said one of the men. Zhang Fan turned to see what kind of stevedore's clothes the two men were wearing.

The clamped little girl is young and beautiful, with a white pullover, a check hook on her chest, slender jeans and white check shoes. Under the grip of the two men, he limped in bit by bit.

"What's the matter?" Zhang Fan glanced around and didn't find any blood. To be a doctor, really, let alone others, is too important.

First of all, we should look or observe to see if it is an emergency and whether it is life-threatening. It can be said that it is a doctor's specialty.

But sometimes we have to see the general identity of this person, consider his past living habits, and judge his condition in combination with his words. Really, sometimes, this empirical thing is more difficult than the knowledge in books.

"I was on the side of the road and they ran over my feet! It will hurt." The little girl said wrongfully.

"You sit on this examination table first and I'll have a look." As soon as Zhang Fan listened, he put down his signature pen, then came over, squatted down and said to the girl, "can this shoe be taken off?"

"I can't take it off. It hurts so much that I can't move!"

"I'll take it!" Said a big man who sent people.

"No! I won't let you take it off." The girl is not old. She is estimated to be seventeen or eighteen. She will be a little dissatisfied with them and will resolutely not let them take off their shoes.

Zhang Fan's cold sweat came down. The little girl was a little wayward, but her painful face turned white, so she began to speak, "sit down and let me have a look."

"Oh! Pain, you slow down, slow down!" The little girl sat up straight and tightened her legs!

"You started barking before I moved?" Zhang Fan squatted and looked up helplessly at the little girl.

"Oh! Well, you start. Be sure to slow down!" Then he covered his eyes with his little hand.

The small white board shoes with cross hooks and laces are quite chic. The girl's exaggerated appearance, Zhang Fan was also very careful, gently grabbed the upper of the shoe, slowly began to solve it, and looked up from time to time to observe the girl's expression.

Take off your shoes, light pink socks, socks embroidered with a little yellow monkey, grinning. Put down his shoes, Zhang Fan felt wrong. His feet were not swollen.

"What car?"

"Wuling Hongguang! We deliver drinks to the store. All the goods were delivered. The road was a little narrow and the car didn't drive fast. A motorcycle came from the opposite side. We avoided it and ran over the little girl's foot. " Although the big man is like a strong calf, he is ashamed of these words.

"Oh!" Zhang Fan heard that it was Wuling Hongguang and looked at the girl's feet " I'm going to take off your socks! " Zhang Fan said to the girl.

"Yes!"

Zhang Fan gently grabbed the girl's ankle and slowly took it off. Although Zhang Fan estimated that the girl should have no big problem, he was still careful.

"Ah!" As soon as she took off her socks, the little girl screamed, which startled Zhang Fan.

"What's the matter?" Zhang Fan stopped and asked.

"I'm afraid!"

Zhang Fan took off his socks and saw that there was a red mark on the instep. It was obvious on the scallion white instep, but it was not as serious as the girl.

Zhang Fan put the white coat on his thigh, grabbed the girl's foot and put it on the white coat. Then little by little, he began to press gently with his fingers from the far side, that is, the toe side.

"Does it hurt?" Zhang Fan first pressed close to his toes. On the white foot, cyan blood vessels are very obvious.

"Well, a little!" The little girl nodded and said.

"Does it hurt?"

"Yes!"

"Does it hurt?"

"Yes!"

All the way down, the girl hurts. But Zhang Fan observed the girl's expression and estimated that he was bluffing himself. At this time, the time was a little longer, and then he was in the hospital. It should not hurt. She may be a little embarrassed, so she keeps saying it hurts.

After pressing and pinching, Zhang Fan grabbed the little girl's feet and moved around again. This time I

didn't ask her if it hurt. "It's okay!" Zhang Fan finished the inspection and determined it in his heart.

He got up and said to the two big men, let's take a film first. It shouldn't be a problem. As soon as they said this, the two men also relaxed, and their originally nervous expressions relaxed.

"Doctor, I don't seem to have any pain. I won't take the film. It's not easy for them both. If it hurts again, I'll take a film. Anyway, I remember their phone and license plate." The little girl is not only a kind-hearted person, but also very smart, just a little delicate.

"No, no, let's shoot. Everyone can rest assured." It may be the driver's big man, said hurriedly.

"No, you're going to be busy. I don't think it hurts. You don't have to send me. My friend came to pick me up. "

"Is it really all right? Let's shoot." The big man is really worried. How can we say that people are alert to each other anyway.

"If you don't shoot, don't shoot, or I'll be hospitalized!" The little girl has a temper.

"Good, good! Take this money. It's our compensation. " Then the man took out two hundred yuan.

"OK, I'm fine. What do you want your money for?" No, girl. The two men left with thousands of thanks. If the girl doesn't let go and calls the traffic police again, it's estimated that they won't be able to work for several days.

The big man left and the girl sat on the stool. While washing his hands, Zhang Fan asked in wonder, "Hi! You'll be fine. Everyone else has gone. You should put it on. Why are you waiting for me to put it on for you? "

"You are so rare! I want my friends to see how miserable I am today! " The little girl has a little pepper character.

"Hehe, well, whatever you want!"

Here comes the little girl's friend, some young people. Under the little girl's exaggerated speech, Lilly put on her shoes and socks and left. When she went out, she said hello to Zhang Fan: "doctor black face, I'm leaving! Thank you! "

The clinic is like this. When you are busy, you can't wait to find someone to chat. When you are busy, you can't wait to have more hands.

As soon as the little girl went out, a lot of people came. It was also a car accident. But this time it's a little serious. The police enter the door first and the traffic police enter the door later. Then two men came in. One looked about forty years old, slightly fat, suit and trousers, but he couldn't see it at this

time. He was covered with dirt and footprints.

The other one is much younger. It is estimated that he is about the same age as Zhang Fan. A set of jeans is also earthy. Although he looks honest on his face, he can turn around with Goofy eyes, which shows that he is not a fuel-saving lamp.

"Doctor, show them both!" After the police entered the door, they said to Zhang Fan.

"What's the matter?" Zhang Fan asked.

In fact, this thing is really wonderful. It is estimated that few people have met it. It turned out that the middle-aged man had bought a new car, and the accord still hung a temporary license plate. At an intersection, he has come to the middle of the intersection.

As a result, the young man, riding an electric car, rushed over quickly in order to grab the red light. One west to East, one south to north. In this way, the young man was too fast to brake directly and crashed into the accord.

The door of the meatball car was hit by a big pit. Needless to say, the reversing mirror was also knocked off by the young man. Middle aged man, I'm distressed. I just bought a car for three days. My liver is really trembling.

The young man simply got up and moved for a while. When he found nothing, he said it was his fault. He was responsible for repairing the car. Then he asked the middle-aged man to drive to the four s store.

Four S stores, offer 3000. As a result, the young man changed his face and said he had stomachache and leg pain. The middle-aged man, however angry, may have slapped each other in the face, and then they fought.

The police and traffic police came to report the case, because there was no monitoring on the road and the accident scene had been damaged, so there was no way to do it directly. And they both said it was the other party's fault, and they also said it was the other party's first hand. No one has no evidence. Anyway, they have their own reasons. And they said they were hurt. No way, neither do the police. Let's see the doctor first. So he took them to the hospital.

The small outpatient office was crowded with people. This kind of thing is not ordinary. As a neutral party, Zhang Fan is not easy to deal with. When I asked two people and did a preliminary examination, they were all in pain. There's no way. Check it. For this kind of thing, if you know that others are pretending, you have to improve the relevant inspection, otherwise there will be too many troublesome things.

The middle-aged man's face is green with anger. Zhang Fan smiled helplessly while opening the list.

At this time, there was a hurried sound of footsteps in the corridor, and the voice of the head nurse of

the outpatient department also came, "Zhang Fan, come on, there is an injured patient."

As soon as Zhang Fan listened, he put down his pen and got up to open the people in the office. These people had nothing to do, and Zhang Fan was not in the mood to see a doctor for them.

Before Zhang Fan went out, he saw a middle-aged woman. It's dusty, dressed like a migrant worker, with a gray face and sweat washing one by one. One hand holds the other hand. The sweat on the face and the painful face are green, but it's silent. The people holding beside them are also dressed as migrant workers.

The injured and the patient were silent, but the outpatient nurses grew up and screamed.

"What's the matter?"

"Injured on the construction site." A Sanchuan accent.

"Please wait outside for a while. There's an emergency. Sorry! "

After Zhang Fan invited the others out, he began to examine the middle-aged woman.

Women are not tall, short and strong. Her face was beaded with sweat and painful expression, and her clenched teeth could be seen on her face. His work clothes were wet, and he could smell the sour smell of sweat before he got close.

"Doctor, it's all right. You can prescribe some painkillers for me. Just a few days. " It hurts like this, and the woman says it's okay.

"Is there anything I can do for you first. You see, the registration fee has been spent. I can't fool you over, can I? " Zhang fan understands her, understands her. Money, really, sometimes, this thing is too fucking bullshit.

Chapter 333

If there is a person whose ancestry has never been rich and has been hungry all his life, he will never remember anything before, because there is nothing to remember and be proud of.

If the ancestors were rich and powerful, when they came to him, there would be nothing. He had only heard of it and had not seen it. His heart was full of tangles.

Country or industry, in fact, this is the same as people or families. For example, for a shoulder dislocation, the reduction of Western medicine requires at least two people. The doctor can't be too old and can't work when he is old. However, Chinese medicine, many old men and many old people, can't

walk steadily, but this kind of reduction is too simple. One person, one chair, can be easily restored.

Then there is the so-called selection. If there are no suitable people or other factors, there will be fewer and fewer people in these methods, and finally it will become a legend. Unlike other industries, the creation of a method and a simple method may be slowly explored by several generations, and the loss will be lost.

Now science and technology are so developed, but many tips and empirical things are really not difficult if they do not have predecessors to lead and want to copy. Moreover, due to the different medical system, many doctors are unwilling to study or dare not innovate. Anyway, they follow the textbooks and the annual medical norms, how to stipulate how to treat them, It's too hard to break through!

Zhang Fan took the middle-aged woman in her thirties and forties and sat on the examination table“ Take off your coat first. I have to see it. Can you take it off? I can't. I have scissors here. " With that, Zhang Fan suddenly felt wrong, as if he had said the wrong thing.

"It's okay, doctor, it's okay. No scissors. " The woman was biting her teeth. She had severe pain originally. Moving her arm led to more pain. The beads of sweat as big as beans fell directly on her head. It fell down directly. It really fell down.

Ragged overalls, beady beads of sweat, enduring severe pain, why? This is the world, this is the world of adults, fight, fight bravely, I hope she can fight for a future and live her dream life as soon as possible.

"How did you get hurt?" Zhang Fan knew at a glance that it was shoulder dislocation. Shoulder dislocation is the most common in total joint dislocation, accounting for about 50%.

Mainly, the shoulder joint is the most extensive joint. Moreover, because the shoulder joint lacks stability in anatomical structure, the glenoid is small and shallow, the humeral head is large and round, and the joint capsule is loose, dislocation is easy to occur.

Generally speaking, the head of the arm is a prominent ball, while the body has a shallow nest, and then the head is buckled in the shallow nest.

"The shelf car on the winch pulled the cement. The iron bar blocking the shelf car on the winch somehow disappeared. As soon as the winch rose, the shelf car ran forward. She looked at the shelf car

falling down and went to catch it. It's too melon. If it hadn't been for letting go early, it's estimated that the shelf car would have taken her down with the ball. It's really lucky. "

A man who came together, although his tone was angry, could see that he held the woman's body hard and his reddish eyes, he knew that he sympathized with the woman.

"Are you her family?" Zhang Fan asked.

"Well! I'm her man. "

I don't know about the large-scale infrastructure. The smaller ones seem to be onions, contracting down layer by layer. Anyway, the profits seem to be the same as onions. For these workers, what kind of insurance and various benefits do not seem to be very sound.

"Come on, get down. Lie down slowly. Yes, hold on. " After seeing the film, Zhang Fan said to the woman and the two men who came together.

"The soil on the body is very big, you white list ~ ~" the woman looked at the white list spread on the examination bed and hesitated.

"Hi! What time is it? You still worry about this. Lie down and hurry. " Zhang Fan was really moved. What can move is not earth shaking things, but these casual details.

"You have no fracture, just a simple dislocation. it will be OK. Lie down and I'll reset you. "

"Yes!" Although Zhang Fan said it, the woman still hesitated and lay down with a little heart.

"It's true. Come on, you go and put your hand on her shoulder. Press your hands. "

Shoulder dislocation is first of all injury, shoulder swelling, pain, and limited active and passive movement. Visible to the naked eye is the collapse of the shoulder deltoid, showing a square shoulder deformity. And you can't let him touch the normal shoulder with the affected side's hand.

"Come on, bear it." Speaking, Zhang Fan took off his shoes, grabbed the woman's dislocated arms and wrists with both hands, and stepped on the patient's armpits with his heels. The rehabilitation treatment given in the system is complete at the primary stage by massaging nurses in the county hospital.

Therefore, this reset is too simple for Zhang Fan. Although it is simple, the technique is not the best, because the system is western medicine, not Chinese medicine. Therefore, reduction is also the method of Western medicine.

Continuous traction, which is to relax the muscles on the arm first, pull the hands with stable and

continuous force, pull the middle heel and push the humeral head outward. Rotate at the same time and retract the upper arm to reset. Audible noise during reset

It's very simple, but this method can't be done when the doctor is a little old. You can't move when a muscle pulls you.

Zhang Fan pulled and pulled. When he felt almost the same, his arm rotated and his heel pushed his humerus. He only heard a "click", accompanied by a woman's stuffy hum.

"Well, it's back. You try and touch your opposite shoulder. " Zhang Fan put on his shoes and said to the woman.

"Well, all right, doctor." The woman moved gently. It's really good.

"Don't worry, I have to tell you. You are violently injured and must be fixed, or you may become habitual dislocation in the future. "

"How to fix it?" Asked the woman.

"Triangular towel or plaster. At least three weeks, or you won't recover. "

"Doctor, can I take some medicine? I can't do anything for three weeks. My father works alone and can't afford it. Doctor, please. " The woman didn't cry when she was in pain and didn't cry when she was reset, but she couldn't work for three weeks. She was worried.

"You listen to the doctor. Do you want your arm or not. I can't do it. " The man helped the woman and was afraid that she would fall.

"Well! It's better to fix it, or it's bad to leave sequelae. "

"But the children and old people at home ~ ~"

"Fixed, doctor, listen to me. I'm the head of the family, fixed. Why is this woman so stubborn! "

"Ouch! Why, why! " The woman began to cry. Pain is not afraid, pain is not afraid, just afraid that it will not survive. Why?

The people who can most make these hard hearted people emotional are children and self-improvement people. Zhang Fan has been transferred to another department for a long time, but he is rarely emotional. As a result, women are stuffy in his chest today.

"Don't cry, don't cry, let me think, let me think." Zhang Fan is thinking with the bridge of his nose.

"There's nothing to worry about. If you can't do heavy work, you can still do light work. There's a

shortage of cleaners in the clinic. Will you do it? It's sweeping the floor and cleaning up the garbage. " The outpatient head nurse also spoke. The fat head nurse looked at such a self-improvement woman and wanted to help her.

"Dry, dry!" The woman looked at the head nurse with tearful eyes and quickly wiped her eyes with earthy overalls.

"The salary may not be high, just 234, but you can take out these paper shells and buy them yourself, and there is medical insurance."

"Thank you, thank you!" Regardless of her arms, the woman took her man and bowed to the head nurse and Zhang Fan. What she did at the construction site was piecework, which was more than 200 a day. Now this thing is really a good thing.

"Oh, thank you, head nurse." Zhang Fan said with a smile.

"Thank you. Fix it quickly. Come to work after a few days off. Come to me directly at that time. " At this time, the fat head nurse became more and more kind.

Outpatient service is like the epitome of a society. Any kind of people use it and any kind of things can happen. In one day, Zhang Fan received seven or eight hospitalized patients for surgery. These surgical patients are patients in their group.

Zhang Fan is busy in the clinic, and the doctors in the Department are not idle. Xue Fei and his colleagues are going through the procedures of admission and discharge and preparing for tomorrow's operation. This is how the work goes day by day.

With the hot weather, the government work has been carried out in full swing. In previous years, the state allocated medical funds to tea vegetable city in addition to buying! Buy! Buy! Almost everything else was returned as is.

First, the leaders do not pay attention. Second, the doctors in big hospitals in the city are also tired. They regard going to the countryside as hard work, and no one is willing to go. But this time it's different. It's the iron blood policy directly. Doctors who want to get a professional title or a position have to go to the countryside.

Moreover, because the western support fund is strong, all departments should draw some backbone to support. In many cities or provinces, there is no problem going to and returning from the same day.

But not in the frontier. A tea vegetable area alone has a larger territory than many provinces. Moreover, the highway here is not very smooth, and the people living here are scattered. Going to the countryside is not a good thing for doctors who are in the city all year round.

It's time to pick people. Those who are hospitalized are promoted to be the main treatment, and those

who are deputy high are promoted to be high, but these doctors are still a drop in the bucket for such a big place. However, Ouyang has many ways to deal with this kind of thing.

Direct internal promotion, promotion of the so-called middle-level, the middle-level of the hospital is too bullshit, this thing, that is, the president's word, at the full mobilization meeting.

"The state has given such favorable conditions and strong support, but many doctors are afraid of going to the countryside. Can you say it in the past? Except for pregnant women and children under the age of two, other doctors and nurses are among the candidates. Don't talk to me about difficulties. If you are any more difficult, is it difficult for a doctor who has been in the pastoral area for 30 years? "

In the age of Lao Huang, we can also find ways to communicate, or we can worship Yin and violate Yang. In the Ouyang era, it was even worse. The old lady directly and strongly became steel. After the mobilization meeting, the administrative orders for the personnel of the Department came down.

Many departments have promoted deputy directors, and in the past, there was no general hospital in the Department. How to say this position? In fact, it was learned from the United States. In recent years, it has gradually become popular in China. In fact, it is a word that allows you to see more doctors, do more operations and improve quickly!

In the first Department of orthopedics, Zhang Fan became the general manager of hospitalization. Zhang Fan had long expected this. Ouyang couldn't see him go to acupoints and get a private hospital for a long time. This time, he pushed Zhang Fan up.

In the past, although the departments in China were three-level diagnosis and treatment, the job competition for this department was a little chaotic. With the development of economy, the medical industry began to be standardized.

If you want to be a dean, you must first be a department director. If you want to be a department director, you must first be a chief inpatient. Although there are disadvantages, this kind of rule-based thing is fair. It is no longer random to point generals or eight immortals across the sea.

I came home in the evening and had dinner. Zhang Fan and Shao Hua went out for a walk. They haven't taken such a walk for a long time. Walking in the street, the breeze blew and Shaohua's hair danced with the wind.

"I'm going to the countryside. I'm sorry. It's up to you to decorate the house and buy furniture. I can't care. " Zhang Fan holds Shaohua's hand.

"It's all right. You can't care if you don't go to the countryside. Where are you going and how long will it take? " Shao Hua slightly tilted his mouth. There's no way. His lover has set up such a job. What can he do.

"I don't know yet. Hua! " Walking under the flower bed on the street, Zhang Fan gently hugged Shaohua.

"What's the matter?" Shaohua nestled in Zhang Fan's arms.

"When I come back from the countryside, let's get married!" Zhang Fan said softly.

"Good!" Shao Hua gently closed his eyes and felt his lover's heartbeat.

With the setting sun, they dragged their long figures to walk in the street“ Marriage doesn't mean getting married. You see, the house hasn't been cleaned up, there's no furniture, and neither have my uncles and aunts. There's a lot more to do. " Shaohua took Zhang Fan and told Zhang Fan one thing at a time.

"Well, let's solve it one by one. My parents, hey! The immortal is harmful. " Zhang Fan sighed helplessly.

"Hehe, it's all right. Communicate with the old man slowly. Uncles and aunts are very reasonable." Shaohua comforts Zhang Fan.

With the various adjustments of the hospital, the list of personnel going to the countryside has also come down, with more than 20 doctors and more than 20 nurses. The hospital gave these personnel two days off to prepare.

This trip to the countryside will last for three months. Accompanied by government personnel, we should turn over all remote areas. Zhang Fan is also on the list, and he and LV Shuyan of gynecology are the youngest.

LV Shuyan has a good academic background, solid work in gynecology and rapid technical improvement. This time, she was promoted to the General Hospital of gynecology.

More than 20 doctors were divided into five groups. Zhang Fan and LV Shuyan were in one group, with two doctors to be promoted to chief doctor, and then four nurses. A medical team was established.

Everything is ready, just waiting to go!

Chapter 334

It seems to be the right thing for county officials to take charge of many things. In fact, when this medical group goes to the countryside, the state requires it every year and still gives subsidies, but it is because they do not pay attention to it at all levels that it finally becomes a form, such as tree planting and immigration. This time, the municipal Party Committee directly sent a working group to follow the hospital doctors to the countryside. The doctors on the list of going to the countryside can't go without going.

Shaohua has prepared many things for Zhang Fan. The climate in the pastoral area is changeable. It was originally sunny and hot when wearing a thin coat. Maybe there was a dark cloud and then a heavy snow.

Male doctors are better, while female doctors and nurses are a little inconvenient. After all, the living conditions below are not very good. Zhang Fan looked at a large bag of things Shaohua had prepared for himself. He thought it was exaggerated, but when he arrived at the hospital, he found that the things he had prepared were nothing. Many female doctors and nurses could almost count as moving.

This time, the municipal Party committee was really generous. When we set out, we made a special approval and gave each person going to the countryside a bonus of 3000 yuan. After the money was paid, everyone's atmosphere was a little better. Really, in times of peace, honor, dedication and dedication seem to have been difficult to use.

In the past, if there were more people in the countryside, the hospital not only sent out 120 people, but also borrowed cars from other units. Cars are really not uncommon now.

First of all, the state allocated one mobile surgical vehicle per group. In the 1990s, not to mention an urban area, even if there were few in a province, most of them were in military hospitals.

But now, the country is really rich. This kind of millions of vehicles is like no money. A regional hospital has several cars. The facilities inside are complete. As long as drugs, blood and surgical personnel are complete, they can almost do most operations.

In the past, there was no car and no one, but now there is a car and no one. In the past, going to the countryside was a direct honor, but not a glorious one. When selecting medical personnel, they should not only have high technology, but also have a good usual style, otherwise they can't turn. Now, without some money, people going to the countryside are like dead parents. It's hard to say whether this change is good or bad.

Of the more than 40 medical staff, more than a dozen drove by themselves. The medicine was directly pulled up by the operating car. Several Iveco cars prepared by the government can't be used.

Zhang Fan and the two senior officers in his group drove by themselves. One is the Deputy High School of respiratory medicine and the other is the Deputy High School of anesthesiology. Zhang Yanfeng, Deputy High School of respiratory department, is a sultry man. Although I don't talk much at ordinary

times, I can often say something that makes people laugh or think at critical moments. Myopia, already bald head, always carrying a mask in his pocket, is an old doctor in the respiratory department.

The Deputy High School of Anesthesiology, Dr. Liu Yaowen, is an old Frontier man. It is said that his ancestors were in the frontier and were proficient in several minority languages. Strangely, his English was worse than Zhang Fan. He could have been on the positive high school several years ago, but his English couldn't pass. I didn't know how to pass this time. I'm also very happy.

Usually he likes jade. He wanders around the river when he has nothing to do. From time to time, he picks up a stone that is said to be jade. In his wife's words, if you are full, you can move stones home and press pickles every day. He is a gentle man.

Both have cars. This frontier is very strange. I don't know whether it's because the government is all bull headed vehicles, or whether the frontier people originally have a cross-country heart.

In any case, as long as families with slightly better conditions buy cars, they are almost all cattle headed cars. I won't say if there are no conditions. As long as they are a little old-fashioned, they are all cars of this series. Although they are not as expensive as Zhang Fan, they are good for ordinary people in family cars.

"Can I take your car?" LV Shuyan has obviously less contact with Zhang Fan since planting trees. Sometimes, even if they meet face-to-face in the hospital, as long as they are alone, Zhang Fan says hello, she ignores them.

"Yes, yes, yes, why not? The car is just for people. Hurry up, where's your stuff. " Zhang Fan said hurriedly. It's his honor that people like him. Although they have a sense of belonging, it still makes Zhang Fan feel a little proud. What's the matter with his black face!

"There are a lot of things. I can't carry them!" LV Shuyan said a little embarrassed.

"I went to find coolies." Zhang Fan smiled bitterly and said, "it's okay. The car is big enough and there is room. Come on, I'll drive. " The car went downstairs to the dormitory. When Zhang Fan saw it, sweat came down.

There are a lot of big and small bags, even the washbasin" Isn't it a little too much? " LV Shuyan pretended to be poor and looked at Zhang Fan and asked.

"Not much. The conditions in the pastoral area are poor. It should be." Zhang Fan said against his heart.

"Oh, wait a minute, I have a bag!" LV Shuyan smiled like a flower. Women, sometimes, they really can't take it seriously. They are born actors.

"Shall I help you?" The cows have gone in. Why leave another tail. Simply, Zhang Fan asked.

"OK. You're a gentleman. Things are in the dormitory. I have a little trouble alone. " LV Shuyan stood on the stairs and looked at Zhang Fan with a condescending smile.

The single dormitory in the hospital is very good, just inside the hospital yard. Because experts often come for consultation and need to stay, the dormitory is well decorated. Those who can live in this single dormitory are the personnel that the hospital leaders pay more attention to. Not everyone can live.

Zhang Fan felt guilty about lending her house to Zhang Fan when she first came to tea vegetable City, so Zhang Fan didn't worry about it.

LV Shuyan's dormitory is on the first floor. The dormitory is a small suite. Two people live in one room. LV Shuyan lives with a doctor in pediatrics. She lives after the night shift or overtime emergency. She usually goes home. It's really a waste of resources.

Her bed is outside, and the dormitory is clean. What comes to her face is a woman's unique fragrance, and the things are placed very neatly.

"Why don't you sit for a while and have some tea?" After inviting Zhang Fan in, LV Shuyan said to Zhang Fan.

"No, hurry up and go. The others may have gathered."

"This is a book. It is estimated that there is no TV in the pastoral area at night. Bring some books. This is a snack. Have you brought any books? " It's said to be a bag of things, but there are actually several bags of things. And it's not light.

"I didn't bring any books." Zhang Fan has a system with Maomao books.

Zhang Fan with big bags and small bags helped dress and get on the bus, and LV Shuyan sat on the co pilot. The four nurses of a medical team probably didn't find Zhang Fan's car and went to the cars of the other two doctors.

Collection, the mobilization before seeing off, which has remained unchanged for thousands of years. Although the urban leaders also participated in the seeing off, the main body is still the medical staff of the municipal hospital, so the speaker is Ouyang of course.

"Comrades!" Ouyang took the microphone and spoke out. The noisy hall immediately became quiet. This is a rarely heard address. In fact, it is the only address on formal official occasions.

"In the next three months, it will be a test for you and the municipal hospital. But in comparison, this is

nothing. Compared with doctors stationed in pastoral areas all year round, this time can be ignored. As a doctor, as a nurse, your goal is not how much surgery you can do, how complex and complicated diseases you can treat. But to have a doctor's heart and a belief in ensuring the health of the masses! " With that, Ouyang looked at the crowd quietly.

He continued: "our current conditions are getting better and better, and the state's support for us is becoming greater and greater. The bonuses of the medical staff going to the countryside this time are the same as those in the Department."

As soon as he said this, the dead atmosphere below suddenly seemed a little energetic. The income of hospital medical staff mainly depends on the bonus. If you don't give the bonus, you will be punished if you really go to the countryside.

Ouyang also thought of this piece. There's no way. Now everything depends on money. It's not easy for everyone to live at home.

"The money is given to you, and then at the end of the year, the selection of advanced and excellent workers will favor you to go to the countryside." Ouyang exploded another bomb. This advanced and excellent quota is too important for people who are bent on politics.

But it is also very important for people who have no intention of official career, because if they are evaluated, the hospital will send a bonus of 10000 yuan, not to mention, but also increase the basic salary of one level. Ouyang released one benefit after another. Zhang Fan doesn't feel happy at all. It's not that he doesn't love money, but that he knows Ouyang.

Sure enough, with these words, the faces below blossomed, but then Ouyang, who was also smiling, changed his face and showed his sharp teeth.

"I'll give you benefits and honors. But if anyone is overstaffed during going to the countryside, is not on vacation, or is absent from work without reason, or directly leaves the garrison, I don't need to say more. If the bonus for half a year is cancelled, I must make a profound review. You are not allowed to participate in further study and promotion within three years! Think it over for yourself. Take four days off a month and take turns! "

After saying that, Ouyang didn't care about the ugly faces of the medical staff below, but looked at the leaders of the municipal Party committee. The leaders of the municipal Party committee also really experienced the style of an iron lady and quickly waved their hands to say they didn't have to speak.

"Let's go! I hope you can bring the good tradition and excellent skills of the municipal hospital to all villages and towns, and bring health to the masses of villages and towns! " With that, the old lady waved and the assembled crowd got on the bus.

Because it was a motorcade and a collective activity of the municipal hospital, the mounted police waited at the gate of the hospital early. After seeing the large-scale surgical vehicle at the gate of the

hospital, the mounted police turned on the police light and opened the road in front.

The long convoy drove slowly out of the hospital. Because the departure time is in the morning, Shaohua can't send Zhang Fan off. The motorcade slowly passed through the city, and then dispersed group by group to the township to be visited.

"I don't think you have any water in your car. When you get out of the city ahead, buy some barrels of mineral water." Zhang Fan's car was the last car in their group. After leaving the hospital, LV Shuyan said to Zhang Fan.

"Ask the uncle in front. If they don't, they should buy more." Zhang Fan said.

Because it was a group, Dr. Liu Yaowen even equipped each car with a walkie talkie. He didn't know whether to break the law. It seemed that he often organized self driving activities.

"Miss Liu, Miss Zhang, I'm LV Shuyan. Do you need mineral water? I'm going to buy some later."

"Haha, that's not right. Lao Zhang's car will be number one in the future. My car is number two and Xiao Zhang's car is number three. Even with water, the operating vehicle has purification equipment, which is not necessary. OVER ! " The lame man likes to walk, stammer and talk. His English is not good. He also likes to speak English!

"Well, over!" LV Shuyan smiled back and said to Zhang Fan, "Miss Liu is still very cute."

"Ha ha!"

"No. 1, the road is far away, lonely and helpless! Come on, your car has a show first. OVER ! " This person likes to play and doesn't like to play is particularly obvious. Those who don't like to play, like Zhang Fan, feel noisy, while those who like to play, such as Lao Liu. But it's good to have an organizer like Lao Liu. At least the journey is not lonely.

After a minute or two, a song came out of the walkie talkie. It's hard to say in other provinces, but it's too simple to sing and dance in the border areas. Many people can get started when they pick up the Dongbula and Matouqin.

Lao Zhang, the nurse in their car, directly sang a song of poplar and floated out, singing well " Wait a minute, what song do you sing? " Zhang Fansheng was afraid to let himself sing and hurriedly asked LV Shuyan.

"What song do you want to hear?" LV Shuyan relaxed against the seat and took out toad sunglasses. The big lenses almost covered his small face.

"Hehe. I can hear anything! " Zhang Fan smiled and felt relieved as long as he didn't sing.

"Boring!" LV Shuyan muttered. Zhang Fan pretended not to hear. Out of the city, heading west, there are fewer and fewer cars on the road. Other vehicles can only be seen on the open road for a long time.

"I'll perform a song for you, Hui girl!" Lao Liu's hoarse voice came out. Looking at the open wilderness in the distance and listening to the songs with special charm, he was really very comfortable. If Shaohua was the co pilot, he would be even more happy.

"Does it sound good?"

"Sounds good!"

"Sounds good!"

"Connect No. 3. You are the youngest couple. Come on! Don't be shy! " Out of the city and out of the hospital, Lao Liu seemed to be alive. He was probably very excited.

"Why don't we have a chorus and don't let them underestimate us!" In Lao Liu's hot field, the people in the car are expected to be more excited, except Zhang Fan. He doesn't seem to adapt to this.

"Well! Or let them look down on me! " Zhang Fan quickly refused. At the age of listening to songs, he is selling instant noodles. When his life is stable and has a system, he has no time to sing and listen to songs. Besides, he doesn't like singing very much.

LV Shuyan rolled her eyes, picked up the walkie talkie, cleared her throat, and then opened her throat. It really scared Zhang Fan. He sang very well. His deliberately lowered voice stunned Zhang Fan directly.

"I love you, but you love him. Is it right that my tears won't rain unless I forget myself. I love you, but you love him! "

The high place can go up and the low place can also go down. It really sings very well. Direct can be regarded as the enjoyment of eardrum.

"Good!"

"Sounds good!"

Zhang Fan didn't dare to pick a quarrel. It is estimated that the girl is also passionate about singing. After calming down for a while, she said, "don't be amorous. I think of my ex boyfriend."

"Oh! No, good! " Zhang fan can't say anything. How can you say such a thing? Go with the wind.

LV Shuyan's mood is unknown to others. The happy time continues, but the old man is an old man after all. What two little goats have climbed up for half a month, black walking horse and peony sweat are old songs anyway, but they sing well!

The distribution of stopping points is also full of humanization. Draw lots and go to whichever one you catch. Lao Zhang was so unlucky that Zhang Fan and his team drew lots. As a result, they caught the farthest place.

In the mainland, it is estimated that smaller provinces can leave the province for three or four hundred kilometers. But Zhang Fan, the place they are going to, is more than 800 kilometers directly. It is the area at the border with Kyrgyzstan. It is a gentle slope of Tianshan Mountain and a natural fine pasture, but the altitude is not low. It has four towns, ten townships and several farms.

It doesn't sound like much. Let alone the countryside, just say the four towns, which are very far away. Except that the farm personnel at the border are a little fixed, almost all other places are nomads.

In the early years, many people argued that they wanted to close up the residents of this area and move as a whole, saying that they wanted to give up this area. No one, no mine, a year's poverty alleviation fee is not old or young. It's not short-sighted. After all, what most people see is the little thing in front of them.

But with the improvement of national strength, these places are becoming more and more important. Let's talk about the black man and the Tian man. Cow, cow, I don't know.

However, after several Stan countries and China signed what organization, it was amazing. The commerce of these countries has directly become a battlefield for people in these two places.

Some black commodities and some Tian people's shoes are everywhere. Then there are the people on the other side of the bluebird. Trucks pull the so-called Red Fuji and Yali in exchange for each other's various gemstones.

As the market becomes more and more Chinese, two barrels of oil brandish drill bits and drill holes all over the ground. The Chinese railway goes directly through these countries. These are the fruits of decades of support from all over the country.

Along the way to the west, there were fewer and fewer crop lands, which gradually turned into forests and grasslands. With the extension of time, the interactive concert ended. It took too much energy. LV Shuyan didn't know when she had fallen asleep.

Originally planned to arrive at the destination in one day, but it snowed heavily on the way. It gets bigger and bigger. Suddenly the sky was white. Originally, the endless grassland was covered by heavy snow in an instant.

"No, it's too snowy. We spent the night in hargay today. " At this time, the government team leader sitting on the operating vehicle got off and informed several people in turn.

"It's snowing! When did it start? " Sleepy eyed LV Shuyan looked at the vast expanse of white outside

the window and asked vaguely.

"It's not long. I'll go down as soon as I say, and it's getting bigger and bigger. I can't get to my destination today. I say I'll spend the night in halgai county. "

"Oh. How beautiful, how beautiful! " LV Shuyan said heartlessly.

In the north of the frontier, the place names are almost all in Mongolian. There is a joke that when the Mongolian army went to a place in the frontier, because the weather was too cold, the army covered their ears neatly and said it was too cold in unison. Then the place names were too cold in Mongolian!

In the afternoon, the motorcade rushed to hargay, a small county, a small city with little population. Because of the heavy snow, there were no pedestrians in the street.

In a county, there are two main roads and more than a dozen buildings. Under the red light at the intersection, the traffic police who have become white are directing the traffic.

The traffic police here are unlucky. They should always prepare two sets of clothes in winter and summer!

Because it was a business, the staff of the municipal Party committee leader directly directed the vehicle into the county government.

Chapter 335

The small county of the frontier fortress, if not for its special region, will never become a county. If this population is placed in the mainland, it can't even be mixed with a town. But if it is placed here, it will become a county.

Don't mention industry here. The bad weather doesn't even have agriculture like this. There are some animal husbandry, mining and forestry. Generally speaking, there is still no one. The government work here is easy. The farm has direct leadership and does not need to be managed by the county government. Mining and forestry have relevant direct superior leaders. The county also manages these residents of the county.

Zhang Fan, who led the team, was a young man. Everyone called him section chief Wang. Zhang Fan didn't worry about his specific name. After the motorcade entered the county government, the director of the county Party committee office was received.

The director of the office with the staff warmly arranged everyone's accommodation first, and then took a group of people to dinner. Chinese hospitality is very distinctive. The more important the position is, the more relevant the personnel are, the more distinctive it is.

On the contrary, it is such a passer-by level person who is very hospitable. Because they are medical personnel, the participants are also relevant personnel of the local health bureau and hospital. This county is too far away. Zhang Fan hasn't been here even if he goes to the cave.

After all, the heavy snow in spring was not enough. It lasted more than half an hour. Section chief Wang wanted to continue to set out, but he was held back by the county personnel. A big wine at noon directly poured section chief Wang over. Zhang Fan and they were not taken special care of.

The next day, section chief Wang shook his hangover head and took everyone away from the county and continued to face the west, but the county government also sent a local staff to accompany him. The first stop is segeleng Township, which is a serious Township in the hinterland of Tianshan Mountain.

It's so beautiful here because there are few people. The of natural environmental protection is quite primitive. The distance is like a snow mountain that can be touched by one hand, and eagles hover in the blue sky from time to time. There are large dark green iron pines on the hillside.

Because it is spring, the grass on the grassland is not high, and the wild flowers that can be dotted in it are extremely beautiful, just like a green carpet. The fresh air is comfortable.

"Leaders and experts, segelen township is here. This is where the township government is located. Our township is a large animal husbandry Township combining stocking and breeding. You see, the local township personnel have been waiting for us at the door. " The motorcade arrived at a lonely town standing on the grassland.

"Welcome! A warm welcome! " A strong man with a plateau red face and a group of people dressed in national costumes met the medical team at the gate of the township government.

"This is bourigude, the head of the township. This is ~ ~ "the personnel accompanying the county Party committee introduced everyone. Then came hada and silver bowl milk wine. All kinds of toast songs you don't understand. Very friendly. There are not many strangers here all year round.

The township government is located in a small street about several hundred meters long. On both sides of the street are some small second floors that don't seem to have been built for a long time. Although

the sparrow is small and has five internal organs, the post office, school and police station are all on the same street. There are also one or two small shops and restaurants.

The arrival of the medical team also attracted the attention of some people around“ When I go back, I'll inform you that the experts from the city hospital have come to the countryside. Those who want to see a doctor should come quickly. " The township head roared at the crowd.

The more developed the city is, the more indifferent the human relationship is. It seems reasonable to say that although life here is inconvenient, the enthusiasm is incomparable in the city.

The road is far away. It was evening when I arrived here. The breeze came slowly, and the herds slowly came home. The melodious bell and the sound of livestock suddenly made the deserted street lively.

"You experts have worked hard. It's not easy to travel all the way. We have prepared a simple banquet to welcome you, please! Please! " After arranging the crowd, the township head politely took everyone out of the seat of the township government.

"Where are you going? It's getting dark. There won't be wolves here." It was dark, and the forest in the distance looked more and more profound. LV Shuyan asked nervously.

"It should be dinner. I don't think there are wolves. " Zhang Fan said uncertainly.

"Isn't there a restaurant on the street?" It is estimated that the girl is a little nervous. She has no words to talk to Zhang Fan.

"You should go to a big hotel. There's no small restaurant to entertain people. Besides, there can't be so many people in a small restaurant."

"Nonsense, except here, it's all grassland and forest. There's no hotel." LV Shuyan rarely turned her eyes.

The township head led the people over the small hillside behind the street without taking a few steps. Standing on the hillside, he looked down at tents, many tents, and then a very huge campfire was burning in the middle of the tent. Mars floats and explodes with the hot air.

"Please! Please! Poor conditions. I'm really sorry. " The head of the village was very polite and forced a sense of literati“ It's crude, my God! " LV Shuyan whispered.

At the bonfire party, although the herdsmen didn't speak Chinese very well, their mood was very high. Roast sheep, roast whole sheep, steak, really large steak, put on an iron shelf, with the roasting, the oil fragrance is confused in the air. Venison, which is stewed with red stones in an iron bucket and decorated with some wild vegetables unique to the grassland, is really unique.

With the sound of singing and music, more and more people came to the bonfire banquet. It was like a festival. People would not come empty handed. They brought up barrels of milk wine and highland barley wine brewed by themselves.

The township head kept shaking the car, "sing, jump and drink! Come on, Bayin jump! Come and make a toast to the experts. " A rough party is more interesting than a polite buffet. With the arrival of drinks, the atmosphere became more enthusiastic.

The big girl and young man kept pulling Zhang Fan to dance with them. With the extension of the party time, the solo dance became a group dance. A group of people held hands and danced and sang around the campfire.

Zhang Fan knows his drinking capacity. Anyway, he doesn't drink at all. After refusing three or four times, no one comes to Zhang Fan to drink. As long as the other people drink once, they can't refuse, wave after wave.

"Why don't you drink? It's boring!" With a little red face and a slight smell of wine, LV Shuyan approached Zhang Fan, grabbed his arm and asked.

"I can't drink. Get drunk as soon as you drink! "

"If you're drunk, come and drink with me!" LV Shuyan's drinking capacity is not average. She just pretends to be drunk and wants Zhang Fan to drink.

"Come on, Dr. Zhang, let's go dancing." Entangled for a long time, Zhang Fan just didn't drink. LV Shuyan was a little angry. Fortunately, a nurse came and took Zhang Fan away. Zhang Fan, who has made up his mind, will never give anyone a chance. It's better to be angry than sad in the future.

Meat, wine, a night of fire, many young people become beds and beds. Really, sometimes, Zhang Fan envies this kind of life. It's too free. The banquet lasted late into the night. The township head didn't know where to go for a long time. Under the leadership of the township staff, several people returned to the station.

After dawn, Zhang Fan began their work. If you stand at the top of segeleng, you can see many people on horseback and in carriages slowly converging towards the seat of the township government from all directions. Like a stream, it slowly converges towards the sea.

"You have inflammation. You have to take medicine."

"Go to the hospital. After an examination, I'll operate on you tomorrow."

"Little boy, I'm a little short of calcium. This medicine should be taken on time when you go back. By the way, have you been vaccinated on time? "

The name of Municipal Hospital experts still has appeal, and many people come to see a doctor. Doctors and nurses in the health center act as interpreters and keep telling people to pass on the news of experts.

The party can't be held every day, otherwise such a small township can't afford to entertain the health team. On weekdays, everyone eats in the canteen of the township government. The food is good. There is meat at once, but there are few vegetables. Even if there are vegetables, they are also wild vegetables on the grassland.

Zhang Fan began to miss spinach. He thought it was good to eat it occasionally, but he didn't eat it every day. The cook's level was also average. No matter what kind of wild vegetables, they were burning with fire and oil. It took a lot of time to eat them!

The night before Zhang Fan and his family left, it rained heavily on the grassland. Several members of the health group sat around and watched the pouring rain outside the window.

"Looking at the posture, I can't go tomorrow." Anesthesiologist Liu Yaowen looked out the window at the grassland that had gathered into a stream and said sadly.

"What's the difference between walking or not? It's not going home. What's the melancholy?" Bao Yin, a nurse in the operating room, said that they are from the same department and often joke, so they are also very casual.

For more than a week, Zhang Fan and his colleagues had several operations on appendix, gallbladder and hernia. Zhang Fan was the main surgeon and LV Shuyan was the assistant. By the way, I also had two caesarean sections. Of course, LV Shuyan was the main knife and Zhang Fan was the assistant.

For half a year, LV Shuyan's level has become more and more exquisite. She has not been a little girl crying secretly in the dressing room for a long time. The caesarean section is very smooth.

"Come on! Come on! Come on! It's boring anyway, double buttons, stickers." Lao Liu greeted the nurses and began to play double buckles. It's better during the day on the grassland. You can see the scenery even if there are no patients. But in the evening, it's too painful. Don't talk about TV. There's a power outage here from time to time.

Several people simply played double buckles and put a note on their face when they lost. Zhang Fan usually doesn't participate, but he can't stand several women. He likes this game. He can't help it. Absent-minded, he is often pasted with only two eyes exposed by a note.

The heavy rain lasted for a long time. After they slept, Zhang Fan could hear the sound of raindrops outside. Others don't know how to sleep. Anyway, Zhang Fan practices himself in the system every day. He can sleep with his eyes closed.

"Bang! Bang! " The iron door outside the yard rang“ doctor、 doctor ! ” In fact, the pronunciation of

many words here is quite similar to English.

After a few years in the frontier, Zhang Fan still understood the simple and commonly used words, "it's broken! Here comes the patient." Zhang Fan gets up, turns on the light, puts on his clothes and opens the dormitory door. The doorman had already opened the door.

"What's the matter?" The rain has stopped, but the road has long been muddy.

"Spit sun Hanjiang was pushed by deer. It rolled in pain. We didn't dare to move, so we came to find experts." A young man at the door, with a lantern in his hand, said loudly to the yard.

"OK, I'll come right away." As soon as Zhang Fan heard that someone was injured, he put on his coat and shoes and went out.

"I'll go with you." LV Shuyan is going too.

"What are you doing. You have to bring people here for surgery. You're here to prepare for the operation. I'll go to the scene." Zhang fantou said without looking back.

It rained heavily all night, which made the road transparent. And because we have to go to the farm, there are no roads. They are trails stepped out by livestock on weekdays. It's very difficult to walk, not slippery, but very sticky.

This semi lateritic and semi black road is very glue when it rains. Zhang Fan struggles to move forward with one foot deep and one foot shallow.

"I carry you!" The young man looked at Zhang Fan who couldn't walk as fast as the old lady with small feet and said anxiously.

"Well!" It's not Zhang Fan's physical strength, but his shoes. Other herdsmen wear Horse Boots. Even if they stick, they won't stick the shoes down, but Zhang fan can't. flat shoes can't be used.

"Fast, slow, no one." As a last resort, Zhang Fan climbed up and his face was burning to death. A big man was embarrassed by the mud!

Fortunately, the farm is not far away, only a few hundred meters away. This is a special deer ranch. Although the deer are gentle and clever, in fact, this thing is very fierce.

Especially when spring comes, the deer also begin to heat. Fighting day and night, male deer and male deer fighting, female deer and female deer fighting, one can be disabled accidentally. Therefore, although the value of deer is high, there are few people to breed. It takes too much trouble. If it is not done well, there will be deer casualties.

Tusun Hanjiang is a large deer breeding family in Seleng township. Every spring is his most worried time,

but today, relatives came in the daytime. He drank some wine with him. As soon as he fell asleep at night, he heard bang in the deer circle! Bang! Bang! The male deer fought again.

With the strength of wine and a stick, he went to the deer pen to beat and drive away the fighting male deer. It is estimated that the deer * * is running out of time, and his eyes have long been red. The strong male deer turned and ran to spit sun Hanjiang.

How big are male deer? Large male deer are not much smaller than horses. And there are horns. This thing has a bad temper and is in heat. It is estimated that he was defeated by other male deer and directly vented his anger on tusun Hanjiang.

In the past, tusun Hanjiang would not rush into the deer circle. It was usually driven away with a long wooden pole. Today, I drank some wine and thought I was Superman. As a result, uncle Lu directly lifted him up and trampled on him.

Spit sun Hanjiang's pain crying father and mother. His mother-in-law was also powerful. He lit a fire and killed him. After saving his man, he found that sun Hanjiang's painful face turned white.

When Zhang Fan arrived, tusun Hanjiang was lying flat on a wooden board. His family was ready to carry him to the health center.

"Let me see, let me see first." Zhang Fan said while checking. Abdominal symptoms are too obvious. There is a plate-shaped abdomen. And sun Hanjiang has begun to have shock symptoms. This is a massive hemorrhage of internal organs, but which organ is it? Zhang Fan couldn't make it clear because he was in a coma due to spitting sun Hanjiang's bruises and footprints and a large area of bruises on his back.

"Come on! Go to our stop, hurry! " Fortunately, there are many brothers who spit sun Hanjiang, and they are all strong men. Several people ran quickly carrying the board. Zhang Fan followed behind and chased the crowd with arches and crawls. There's no way, no equipment!

Zhang Fan, covered in mud, arrived at the stop. At this time, the operating vehicle had started and the lights were bright. While running, Zhang Fan shouted to LV Shuyan in the car, "Lv Shuyan, come on, open the venous channel and correct the shock. Prepare for abdominal surgery. "

At this time, I can't wait. Zhang Fan quickly uses cold water directly. After several pots of cold water go down, the muddy water on his body is clean. He quickly puts on clean clothes, gets on the bus and washes his hands for disinfection.

"Laparotomy! Tell the family that the situation is very critical. If you don't get a good person, it's gone. " Zhang Fan said to the doctor in the township health center while washing his hands.

Because there is a history of trauma, and there are ecchymosis on the plate abdomen, abdomen and back, it can be clear that the abdominal organ bleeding, but there is no way to know which organ

bleeding. Zhang Fan directly chose the midline for laparotomy.

Don't mention this. Even in the fully equipped hospitals in the city, many abdominal diseases can't be identified and go for abdominal exploration. This is the difficulty of general surgery. Many diseases can only be known after opening the abdominal cavity.

Exploration, since it is exploration, the surgical incision is very large, which can be regarded as opening the stomach directly. Direct incision through the midline of the rectus abdominis is equal to opening a big hole in the stomach in the middle of the stomach, avoiding the navel.

"Attractor, gauze." Zhang Fan shivered. Because the cold water was too strong, he suddenly entered the warm car and got goose bumps all over.

Chapter 336

In the early years of 2000, let alone in the border areas, even when making a phone call in the city, I had to shake my head from time to time to look for mobile signals.

It seems that after the Olympic Games, or a year before the Olympic Games, suddenly the national network has become powerful. The mobile phone signal is getting worse.

Even in mountainous areas, there can be strong signals. The network also began to spread to villages and towns in an all-round way. In this small town, China Mobile Unicom and Telecom are still fighting against each other either next door or door-to-door.

The development of network is also of great help to medical treatment. Network consultation is on the rise. For diseases that cannot be diagnosed in villages and towns, directly contact the superior hospital through the platform of the health system, and let experts consult through the network. A consultation is 30 yuan!

General chronic diseases can also be handled through online consultation, but there is still no good way for this emergency, especially life-threatening diseases. If there is no medical team tonight. Tusun Hanjiang has to go to the county hundreds of kilometers away. His life depends on his life.

There are doctors in rural health centers, but after several years of siphon phenomenon in the medical system, in a few years, township health centers have shrunk very badly. The doctors with a little skill went to the county. The doctors in the county, the more powerful or younger doctors, either went to the urban area or to the south. The small town can't support surgeons. The final result of development is that township health centers have become pharmacies.

There is no way to stop the brain drain. In the end, only by going to the countryside regularly can we solve the medical problems in small places. When there are no doctors in the countryside, once there is an emergency, it is a very troublesome thing. Then, the chain reaction is that the crowd converges towards the city more quickly. When it comes to why they want to go to the city, most people will say: for the education of children and the medical treatment of the elderly.

Perhaps this is urbanization!

Once abdominal organ bleeding is considered, it is necessary to quickly find the bleeding organ and stop bleeding. Abdominal organs, which are particularly prone to bleeding after being hit, are some substantive organs, such as liver, kidney and spleen.

These organs, first of all, are relatively fixed, and they are very brittle. The fresher they are, the softer and brittle they are. There is a car accident in the city. The speed is not high. After the collision, there is no trauma, but people have been in shock. This situation often causes the injury of abdominal organs and leads to massive bleeding.

In the early years, this surgical vehicle in China was made of imitation German goods. It seems that it was manufactured by a designated automobile factory. The price was super expensive in that year.

Later, the policy was open, and Yutong automobile was the latecomer. I don't know why. They didn't learn from Germany and took over the technology of Marubeni. After several years of development, they surpassed other automobile factories in China in a few years. Almost all these professional vehicles are contracted by them, except for some designated ones, of course.

Where the meatball country is big, the macro level is not good. But in this kind of small hand, small platform, I really have to admire others. What they do is quite powerful. Everything is very easy and reasonable, almost perfect.

Abdominal midline surgery, not a straight line. You have to avoid the navel. Because this place is a depression, it can be regarded as a place to hide dirty things. It is not easy to recover after operation. It is also easy to be infected. Abdominal surgery, this place is the focus of disinfection.

Open the skin, the skin is like a thin kraft paper. Cut the skin, followed by the superficial fascia. What is this thing? In fact, it is white fat and some loose hoof tissue, which is mainly walking superficial blood vessels and cutaneous nerves.

This is the advanced nature of human evolution. As long as there are large numbers of blood vessels or nerves, almost all soft fat and slightly harder hoof tissue can act as a protective layer. Without this layer of organization, maybe you can slap each other on the face.

"Electric knife, gauze." After entering the superficial fascia, the bleeding began to increase, and Zhang Fan said softly. Baoyinlisuo passed over what Zhang Fan needed. Be extra careful when passing things on the operating vehicle, because this platform is used for emergency after all, and almost all things are single.

After hemostasis, continue to enter“ Move faster. Your blood pressure won't rise. " The anesthesiologist, Dr. Liu Yaowen, looked at the monitor and gave Zhang Fan a return.

"OK." Zhang Fan has already been very fast and improved a step. Although he needs to be fast, he can't ignore the level. The abdominal structure is too complex.

Not to mention the internal organs, first of all, the abdominal muscle layer is very complex. The abdominal organs are too important. The abdominal muscle layer is stacked. Generally speaking, this abdominal muscle layer is like two doors, which are divided into two doors from the navel.

Many people think that by opening the muscles, the abdominal organs can be clearly seen. In fact, it is not. Simply put, the muscle is the door. When you open the door, there are also the door curtain and internal walls. The so-called door curtain is the greater omentum.

Therefore, when entering the muscle layer, you can only see a few organs, such as a small part of the liver and stomach, a small part of the large intestine and a small part of the small intestine. Other organs are invisible.

The anesthesiologist has warned that the blood pressure can't go up, so the hemostasis of the muscle layer is very simple, and the gauze is compressed. Wait until the internal organs are treated, and then go back for treatment.

Open the curtain, it's the wall. This so-called wall is a double-layer plastic film derived from the abdominal wall, that is, the belly.

This thing is like a wall to separate all organs. The peritoneum is double-layer, with a small amount of liquid inside. It has many functions. The most important thing is to prevent friction and cushioning between abdominal organs.

Without this structure, people can't exercise violently, because once the activity is violent, the abdominal organs may be worn out after strong mutual friction, and then either a belly of blood or a belly of stool! It's terrible.

When the peritoneum was opened, a large amount of congestion appeared. Zhang Fan looked and said, "the bleeding is on the upper left side. It's not the liver, it's the spleen. " Then open the bottom of the stomach and start looking for the spleen.

The spleen, because it is a small organ, has not been studied much in the early years. It is simply considered to be an organ for hematopoiesis in childhood and fetus. In adulthood, it is an organ that degenerates like the appendix.

With the deepening of research, it was slowly found that this organ is a very important immune organ. In the original, once it was found that there was a problem with the spleen, it was removed directly. However, with the development of evidence-based medicine, the medical community defined this organ as the largest immune organ of the human body. It has many functions, such as hematopoiesis, blood storage, blood filtration, and the most important immune function.

The spleen is shaped as like as two peas, which are almost the same as the magnified beans, hidden under the tenth and eleventh rib arch of the left side. The upper part is covered with the stomach, next to the pancreas.

This thing also wears a thin coat on the surface. Many spleen injuries. When they were first injured, they had no symptoms at all. It is because of this thin coat. When the bleeding breaks through this layer of clothes, it is the time of shock.

After confirming the bleeding, Zhang Fanyi said to Baoyin, "scalpel!" Because the position of spleen is relatively high and Zhang Fan's incision is relatively low, the knife edge must be extended upward. In general, you must drive under the xiphoid.

"Full cut?" When Zhang Fan extended the knife edge upward, LV Shuyan asked.

"Let's see. If you can keep it, you can keep it. If you can't keep it all, you'd better do a partial resection." Zhang Fan said as he quickly extended the knife edge.

"Gauze!"

"Doctor Zhang, the blood pressure is dropping badly." When Zhang Fan opened his stomach and opened the peritoneum, the pressure around the wound suddenly decreased, the amount of bleeding increased, and the patient's blood pressure decreased significantly.

"The amount of venous fluid increases. Adrenaline and dopamine are combined with intravenous injection to prepare for blood transfusion. " Zhang Fan, who had goose bumps on his body, sweated down. The operation was not difficult, but the patient bled too much because of the delay.

"Doctor Zhang, the effect is not good. The blood pressure continues to drop." The anesthesiologist's tone was also rapid, and he could hardly pronounce clearly.

"Blood transfusion. Use O-type RBC directly. " Zhang Fan is really a dual-purpose man. He is rapidly processing the tissue and refueling into the spleen area while still giving oral medical orders.

In general, even in the hospital, blood transfusion is not easy. Today, this situation is even more troublesome. First of all, I don't know the patient's blood type, and it's too late to detect it. I'm not a technician in the laboratory department, and the speed under the general hands is even slower.

Such a life-saving moment, time is urgent, there is no room for delay, it all depends on the doctor's weighing, bold weighing. If the balance is good, it can save lives. If the balance is not good, it may be fatal directly!

Generally, there are stored blood and checked blood in large hospitals. But in the time of emergency rescue, where can we take care of it? Fortunately, there is type O plasma in the operating car. Otherwise, only doctors or nurses can take it on site. In such places, few people know their blood type. Only doctors and nurses know their blood type. Even if others know their blood type, not soldiers, not police, Zhang Fan dare not use it!

This is why at the critical moment, when the hospital is ischemic, the army or police force directly drives into the hospital! And this is an order, a military order that cannot be negotiated. Really, for these people, the state owes them and the people owe them.

Don't think that blood transfusion is saving lives. In fact, the risk of blood transfusion is not small. Even if there are many blood problems of the same type, generally, if you can't lose, try not to lose blood.

"The left venous channel increases hydroxyethyl starch. Give me fifteen minutes, just fifteen minutes. Come on! " Zhang Fan said loudly.

"Gauze, stuffing!" In the operating car, only Zhang Fan gave orders.

"Three bending pliers. Look! Did the urine come out? " Zhang Fan's words at this time are oral medical orders. Both nurses and anesthesiologists must implement them unconditionally, because the chief surgeon knows the condition best at this time.

"No urine!" Itinerant nurse, said briskly.

"Come on! Scissors! " Whether total or partial splenectomy, the spleen must be completely free, because the tissue here is too complex.

The stomach, pancreas and intestines are all in this area, and the blood vessels here communicate with each other and accompany each other. It is very rich. If you don't carefully dissociate, a mutated blood vessel will come out and go down with a pair of scissors, which will really make things worse.

Moreover, the upper pole of the spleen is the splenogastric ligament. This ligament is too short. The short arteries and short veins of the stomach are out of shape. The separation is not clear. A little

traction will break these two vessels.

"Support the spleen with a gauze cloth. Pay attention to the ligaments here. Move gently. Don't pull." After dissociating the spleen and gently holding it up with gauze, Zhang Fan specially explained to LV Shuyan.

The spleen is shaped like a broad bean. It has a door, which is where the inner side bends. This place is where the broad bean sprouts. The same is true in the spleen. Its inner bend is the splenic hilum, with arteries and veins.

With the clamp of the bending pliers, the bleeding is significantly reduced until the bleeding stops. This time is a little better than the first ten minutes. This can be regarded as a disguised hemostasis.

"Doctor Zhang, the blood pressure has risen. It's been 9 minutes!" The anesthesiologist said it specially.

"Yes!" Zhang Fan responded. He was in no hurry at this time. How much can the spleen be cut to retain its immune function. At present, there is no clear definition in the medical community. However, at least more than two-thirds, otherwise it will be meaningless.

All the parenchymal organs, their blood vessels are like two big trees. At the door, it is a thick trunk, and then after entering the interior of the organ, it begins to branch and disperse leaves, and then a connected capillary network is formed at the end of the arteriovenous, one in and one out.

The arteries of the spleen are generally divided into two to three parts at the splenic hilum, and then into two or three levels to enter the essence of the spleen. The venous arteries of the spleen, like brothers, walk together hand in hand.

The longest spleen of Chinese men is about 14 cm, but the blood vessels and arteries inside the spleen of ordinary people are 15 cm. You can imagine how slender and tortuous this thing is.

After the lower pole of tusun Hanjiang's spleen was violently hit by the male deer, it directly opened a hole the size of popcorn. The spleen is too fragile, and the male deer has great strength. There's no chance of suturing. It can only be partially removed.

This partial resection is not to cut along this piece where the wound is, but to see the blood vessels. Zhang Fan carefully identified which was the artery of the lower pole and which was the vein of the lower pole, and slowly ligated them one by one.

"I tie a knot!" In general surgery, after the operator sends the thread head in with the needle holder, the assistant will hold the back thread and tie the knot. But Zhang Fan doesn't trust LV Shuyan. This is a blood vessel knot. If you have less strength, you will break the blood vessel. If you have less strength, the blood vessel cannot be ligated.

LV Shuyan helped Zhang fan support the needle holder while dipping blood in gauze. No one would

refute or be dissatisfied at this moment. The surgeon can do whatever the master knife asks. This is the minimum professional ethics of the surgeon.

The blood vessels to be ligated were ligated one by one, and Zhang fancai took a little breath“ Wipe my sweat. " It's too tight. Zhang Fan feels that his eyelids are sweating!

This time is waiting, waiting for the boundary between the area with blood supply on the surface of the spleen and the area without blood supply after ligation. As long as the ligation passes, the areas with and without blood in the spleen will be particularly clear in a few minutes.

One side is still red or pink, while the bloodless area on the other side is obviously pale.

"Scalpel." Three or four minutes later, the boundaries are clear. In order to maintain the vitality of the spleen, Zhang Fan cut the coat of the spleen with a scalpel one centimeter from the intersection line, and then cut into the spleen parenchyma with a knife handle.

The spleen is particularly fragile. It is easy to hurt blood vessels with the blade. Although the handle is blunt, it is safe. Slowly form a V-shaped incision at the anterior and posterior edges of the spleen, extending inward bit by bit.

While cutting, Zhang Fan's left thumb and index finger always hold and compress the edge of the spleen, which is to fix the spleen. This can effectively control and reduce the bleeding in the book.

It's simple to say, but it's actually very difficult to operate. Simply put, wear plastic gloves with grease on them. Then hold the round soap stained with water or oil. This force should not be too strong, and make sure that the soap is fixed.

This is the skill of the surgeon. Without more than ten years of exercise, let alone surgery, a simple grip can't be done.

Bit by bit, there is a small amount of bleeding on the surface of the spleen, which is the residual blood in the capillary network“ Dip! " Zhang Fan whispered to LV Shuyan.

Although this kind of bleeding does not need special treatment, it must be removed, otherwise it will affect the operation field. Moreover, this kind of wound can not be wiped. It should be dipped gently with gauze. Once wiped, it will not only damage the organs, but also change the position of the spleen.

"Ligation, this is a small artery. Be careful not to slip. " Zhang Fan held the spleen in one hand and the scalpel in the other. He found a small artery. He couldn't tie the knot, so he asked LV Shuyan to tie the knot. Before tying the knot, Zhang Fan gave a special explanation.

"Yes!" After Lu Shu Yan replied, she began to tie knots. Zhang Fan looked at it motionless. She was deeply afraid of a loose knot or a hole in her spleen. The spleen is crisper than the kidney. If you don't use a little force, it's a hole. This is also the reason why the spleen is easy to rupture.

Finally, the damaged part of the spleen was removed. After putting the excised spleen into the tissue bag, LV Shuyan often breathed a sigh of relief.

The operation was too nervous, and Zhang Fan's tone on the operating table was too severe. She was frightened. At this time, if you look at the spleen from below, it is like a V-shaped duck mouth with large mouth and small inside.

This shape is for later stitching. The spleen is very fragile. It was made into this shape for good suture. Therefore, a good surgeon constructs a perfect surgical process in the brain before surgery.

"I sew, I knot, Dr. Lu, you cut the thread." Zhang Fan said to LV Shuyan.

"OK."

LV Shuyan didn't dare to tie a knot. This very fragile organization is real kung fu. It's like pulling a wire on another piece of paper. If it doesn't pull well, it's a tear.

And this kind of suture can't use small needle and fine thread. Because the small needle and fine thread will lead to the inability of capillaries to climb and lead to ischemic necrosis. Therefore, the general healers dare not guarantee that they can sew well.

"Liver needle! Thick line! " Baoyinlisuo put on the needle and thread and handed it to Zhang Fan. It's true that the technology industry has a specialty. In the past, a simple threading seemed to be a very simple thing.

Not necessarily on the operating table. First, wear gloves, and when stopping bleeding quickly, you must ensure agility under your hands, one needle and thread in three seconds and one needle and thread in three seconds. Therefore, the operation nurse can't work a little older. First of all, she can't look at her eyes.

This kind of Kung Fu is also a skilled action after nurses practice countless times under the operating table. If you don't bear hardships, you can't work at all.

The liver needle thick line horizontal mattress suture combined with intermittent suture finally closed the incision. Originally, a broad bean became a cone. After suturing, Zhang fan used adhesive foam on the wound to stop bleeding.

"Finally finished!" LV Shuyan was relieved when Zhang Fan covered the greater omentum in her spleen. Zhang Fan on the operating table is too cruel. The more the crisis, the more cruel it is. But the more responsible she was, she looked at Zhang Fan and risked flowers in her eyes!

"When the arterioles were knotted, if I had torn my spleen, would you hit me?" LV Shuyan is at the end of the operation. She doesn't speak through her brain.

"Where are you? Do you want aseptic operation?" Zhang Fan turned LV Shuyan's eyes.

"Hit the chest, that place is sterile!" The anesthesiologist's old man Liu Yaowen got into trouble. At this time, the atmosphere was active. Although everyone said something out of tune, his heart seemed to be filled with a sense of achievement. He didn't want to be proud or complacent, but it was really uncomfortable not to release, so ~~, this feeling was really beautiful!

"Hooligans!" Baoyin and LV Shuyan scolded together.

"Hey, hey!" The old man smiled obscene.

The operation is over!

Outside the operating car, after the operation began, the people of tusun Hanjiang tribe and the relatives of tusun Hanjiang's wife also learned the news.

Riding a horse with a lantern, they gathered outside the operating vehicle from everywhere. More and more people comfort sun Hanjiang's wife and care about the operation.

The township head also came, "everyone is quiet. Don't affect the doctors in the car to perform surgery. Pull the horses away. "

Because before the operation, Zhang Fan asked Zhang Yanfeng of the respiratory department to inform sun Hanjiang's family that the situation was very dangerous. So sun Hanjiang's fierce wife was crying and sat soft under the wheels of the operating vehicle.

No matter how tough you are, you are also a woman, and no matter how tough you are, you are also a wife. Her mouth kept talking and praying.

"Isn't it? Let people go home. If it's an accident ~ ~ "Dr. Zhang Yanfeng said to the township head with a little worry looking at more and more people.

"It's okay, don't worry. Adaxi, if it hadn't been for you, sun Hanjiang would have died. We are all reasonable. Don't worry, there's nothing to do. Every spring, animals kick him to death. He's lucky. Hu Da bless you! "

With that, the township head stood in the crowd and said, "the doctors operated overnight. This is a benefactor. No matter what the situation is, if anyone is careless, I am a whip! See? "

Chapter 337

The starry sky is dotted with stars. From time to time, it crosses the meteor with a long tail. In the pollution-free night sky, the stars are just like passing through PS. It's almost a little boy and girl sitting on the grassland and looking up at the stars together. It's so beautiful.

The heads of small towns are no longer than those of large towns. The township head here is like a clan head or the parents of a big family. Without prestige, he can't manage the free people.

They may not know too much cultural knowledge or say big slogans, but the eyes of the masses are bright. Only those who bend down and try to get rich with everyone will get support and have the right to speak.

The head of Seleng township is also a strange man. In his early years, he also broke through the South and North. After returning to his hometown, he was admitted to a civil servant. Although it's not my hometown, it's also a big tribe.

When I first came here, the people in the village were unconvinced. He didn't say much. He drove a tractor and pulled a bucket of deadly beer. In the bazaar on the grassland, a challenge arena was set up. In his words at that time, there was no man in Seleng! Drink him up if you can! If you can't drink, you'll have to listen to him in the future.

He also fought hard. On the grassland, you can scold men, animals and animals, but you just can't say he's not a man. For two days in bazaar, the township head stood on the challenge arena. All kinds of heroes came one after another. Finally, the farce ended with the stop of the respected old man in the village. He stayed in the hospital for a week. But Seleng Township, he has a place.

The number of cadres sent by the superior can't work well in Seleng. He has a little position. He is also capable. Having seen the world, he took the villagers' leather goods to the south for sale. In Shanghai and Ninghai, he finally signed many contracts. The price is much higher than that sold to second-class dealers. I don't know how much.

Then organize the masses to develop characteristic breeding industry. What grassland Fox and grassland deer appear in Seleng one by one. Finally, this guy didn't know through what relationship, he even put Seleng's advertisement on Yangma's agricultural station. Tourism is also beginning to improve.

For a time, life in the village changed dramatically. The small second floor on both sides of the street was built after he took office. The superior wanted to promote him. As a result, the villagers wouldn't let him go, and he didn't want to leave. So, a guy who was originally a foreigner turned out to be a man of Seleng's words.

However, no one is perfect. The township head is good at everything, but he can't control his brother. He also knows his own problems, so the cat doesn't go anywhere in Seleng. From time to time, he takes the opposite sex with him in this blue and green place.

Standing in the crowd, he seemed to be the backbone of the people. "Go, kill the deer and kill the deer that knocked over the sun Hanjiang. It's very bad. Dare to hit the master and I'll pay for it. Remember to leave the deer whip and deer eggs. Whoever dares to steal them, I'll pinch them off. "

After greeting the man, he said to several women, "cry an egg. Can crying work? Pull up the mother-in-law who spits sun Hanjiang. It's almost been climbing on the ground all night after the rain. The strong young man will stay and wash his arms. Maybe he will use blood later. "

"Go to a few more people and move out my milk wine. Tusun Hanjiang was saved. We held a celebration meeting for him. When the dead ball, we should hold a memorial meeting for him. Come on, get moving, wooden stake! " The head of the village scolded and hurried, and the crowd suddenly seemed to have vitality.

The busy crowd reassured Dr. Zhang Yanfeng. The crowd standing quietly at the door of the operating car made his scalp numb. People are like this. It's too difficult to trust each other.

Vomiting sun Hanjiang, the blood loss was too severe. When he first sent it, the situation was too crisis. He couldn't raise his blood pressure with rapid infusion. Zhang Fan had no way to risk using type O RBC blood. He was also very lucky and didn't have blood transfusion reaction.

After dealing with the organs in the abdominal cavity, Zhang Fan turned back and began to slowly deal with the bleeding on the muscles, peritoneum and omentum. While dealing with it, I listened to Baoyin, LV Shuyan and Liu Yaowen bickering.

LV Shuyan and Baoyin are unmarried girls. They are really not rivals to Liu Yaowen. Lao Liu will play a joke one by one. LV Shuyan's face is red. I don't know whether it's angry or ashamed.

People were saved and everyone was happy and excited. This thing is like a stimulant. After tension, there is infinite pleasure“ Saving people, just like between husband and wife, is more exciting than the thing between husband and wife. You see, Dr. Zhang, it will definitely be in orgasm. " The old man Liu Yaowen pointed to Zhang Fan and said.

LV Shuyan secretly took a look. She was afraid that Zhang Fan would see the same. After peeking, she quickly turned her eyes to other places.

"You're so old, you have great strength in your mouth!" Baoyin smiled and scolded.

"You can question my skills, you can question my looks, but you can never question my abilities. I'll tell you I'm ~ ~ "

"Lao Liu, get ready to wake up." Zhang fan can't listen anymore. Lao Liu is deliberately flirting with the two little girls. Baoyin is silly and stubble.

"I sew?" LV Shuyan wants to replace Zhang Fan.

"It's all right, I'll come. If you are tired, go down and have a rest. By the way, tell the doctors in the township health center that the ward and the monitor should be ready. After partial splenectomy, it is particularly susceptible to infection. Postoperative care must keep up. "

"All right." LV Shuyan took off her gloves and surgical clothes and turned to go out. The car was separated. To get off, you had to go through the channel.

"Doctor Zhang, I heard you have a date?" Baoyin took over LV Shuyan's position, pulling the hook and threading at the same time.

"Yes."

"What a pity! Gave up the whole forest for one tree. " Lao Liu's broken mouth is not ordinary.

"Why are you getting married. There are so many forests. " Baoyin and Lao Liu have a quarrel again! Zhang Fan is helpless. Some people are like this. When the operation is nervous, it's good to say that once the danger is over, it starts.

"Ah! Anesthesiologists have no status. If I hadn't been cheated to do anesthesia, I would be absolutely handsome now. Look at our Doctor Zhang. How many little nurses in the operating room watched him drool. It is estimated that Dr. Lu is greedy! "

"Don't talk nonsense." Zhang Fan sewed the peritoneum and said.

"Ah! Still young, thin skinned. You'll regret it! "

"If everyone thinks like you, the world will not work." Baoyin helps Zhang Fan say Lao Liu.

"The operation is over! Let's go and send the patient down. " Zhang Fan endured their endless nonsense and finally the suture was over. After placing the drainage bag, he quickly said.

LV Shuyan got out of the operating car and vomited sun Hanjiang's family members. The incomprehensible language came out of their mouths. Although LV Shuyan couldn't understand it, she also knew what it meant.

"The patient was saved, but there was a lot of bleeding. It will take a long time to recover in the future. This is his cut spleen. Who of you is his family? Please come and have a look."

"Just save it. Life is big. Spread out quickly. What are you looking at? Can you understand it! Come on, bring up the hot camel milk and let our female Bodhisattva have a drink. " The township head began to say hello.

Hada was gently put on LV Shuyan's neck by an old man with both hands. It seems that the old man of 80 or 90 years old, holding LV Shuyan's small hand with both hands, gently touched it with his lips, and then began to sing in words LV Shuyan didn't understand.

They are all frontier people. Although they don't understand, they also know that they are praising. LV Shuyan stood quietly at the door of the operating car and was proud of Zhang Fan. Yes, she was born in the city and grew up in the city. At this moment, she really realized the glory of the doctor.

The silver bowl and precious camel milk were brought up by the old man who could be Dr. Lu's grandfather. After respecting heaven and earth, LV Shuyan drank slowly, and the warm water flowed from her throat into her stomach like a warm current.

The etiquette at this time is much more solemn than the welcome party they just came to. At the beginning, everyone gave face to their hometown. And now I really mean it.

Zhang Fan finally came down and spit sun Hanjiang's calm and long breath, which made the surrounding crowd give out a low cheering sound. Perhaps they were afraid of disturbing sun Hanjiang, or they were afraid of being rude in front of these doctors. They tried to restrain their excitement.

Yes, they all knew about the situation at that time and had no hope. As a result, the doctors in these cities saved him.

With the help of LV Shuyan, the doctor of the township health center took sun Hanjiang to the ward. Female doctors can let go, but male doctors can't.

Hada, silver bowl. Girls offer hada. The old man can't drink without horse milk wine in both hands“ I really can't drink it. I pour it as soon as I drink it! "

"Doctor Zhang, it's our highest etiquette for you to touch your lips, otherwise we can't get through it." The township head stood aside and pointed Zhang Fan.

At night on the grassland, if there were no parties, they would go to bed early. Today it rained again. In fact, it was more than nine o'clock when sun Hanjiang was hit. After more than three hours of surgery, it was only more than twelve o'clock. After such a fuss, everyone was not sleepy.

The largest and most luxurious tent in the village was opened. The thick white cashmere carpet is

surrounded by a circle of small tables. In fact, on the grassland, this kind of tent is like the conference hall of Han families in the mainland. Ordinary people are not allowed in.

The two old people supported Zhang Fan from left to right. They were awkward and embarrassed, but it was difficult to be generous. Zhang Fan and them entered the tent with the help of the old man.

"If you sit down, you are qualified." Zhang Fan was placed in the main position, which was a little higher than other positions. Zhang Fan is really restless.

The township head accompanied Zhang Fan on the right and said something uncomfortable. On the left is an old man who is not 80 but also 70. This reception standard is very high.

"Eat meat again, I'm almost hurt!" LV Shuyan looked at Zhang Fan with envy and whispered to Baoyin.

"Ha ha, and you. Let me tell you, I have never attended a banquet of this specification. You just wait for something delicious. It's definitely something you haven't eaten. "

In fact, the last welcome party was for people to entertain themselves in the name of themselves. A group of doctors and nurses were not used to it. People are wearing leather robes and sitting everywhere. This group of people from the city can't do it. I dare not sit on the wet ground. I'm afraid of hemorrhoids.

And this time, it's more formal. Roast whole sheep, in the grassland, as long as it is a banquet with some specifications, the first dish must be roast whole sheep. And it's not eaten at will. There's no big knife or axe.

The most prestigious old man in the tribe, after worshiping heaven and earth, gently and thinly cut off a piece of the fattest and tender mutton from the roast sheep with a knife and handed it to Zhang Fan with both hands.

Then cut it to several doctors and nurses in turn. Then someone will slice it specially for everyone. Someone will bring it to you after eating. If you chop with your own knife and axe, you will be fooled.

"The time is too short to prepare. Please don't be angry. This is a wild badger, this is a deer, this is wolf meat, this is a wild goose! " The old man apologized with an apologetic tone while introducing, and the township head translated at the same time.

"Well! It's very polite. It's really very polite. There's no need to spend so much money. We're here to do this. " Zhang Fan looks at the animals unique to the grassland and doesn't dare to use chopsticks. Does this thing protect animals and break the law!

"Hi! You think it's common, but it's too precious for us. You saved not only a person, but a family. You saved his children who haven't grown up. You don't drink, or I'll definitely drink more bowls with you! " The township head is a little dissatisfied with Zhang Fan's non drinking.

The specification is high, but I don't think it's interesting. Everyone is well behaved. I feel a little less wave power. People are cheap leather. Don't pay attention to it. I don't think I'm favored. Pay attention to it, and I don't think this kind of banquet is interesting.

The last dish also came up. It was very good-looking. It was round. I didn't know what food it was. It was baked into golden yellow and sprinkled with cumin powder on chili noodles. It was very good-looking. Next to the round food, there are meat like ancient copper coins, which are placed neatly.

This food is not much, only a few doctors, nurses and township heads have it, and others don't“ It's not very interesting. Everyone doesn't have it. It's not very good for us to eat. " Zhang Fan said.

"It's all right. You eat yours. You city people haven't eaten it. You can't buy it with money. It can nourish yin, strengthen Yang, beauty and health care!" The township head's eloquence is really not bad.

Anesthesiologist Liu Yaowen smiled. He has eaten this.

Zhang Fan was politely let by the old man and the township head. There was no way. He picked up his chopsticks and gently opened the ball food with his fist. It was baked into gold outside. Even if he was a surgeon, Zhang Fan couldn't see what it was. But I can't see it after it's open. Because the cook seems to have handled it. The internal structure of food has changed.

Take a sip of cumin with chili, fragrant! Special fragrance, a fragrance I've never seen before. What's it like. Well, Zhang fan can't imagine.

LV Shuyan and Baoyin haven't eaten either. It tastes good. Although they all had dinner, the food is so delicious. The skin is crispy and crispy. The inside is not like fat, but it is more fragrant than the smell of fat.

When he picked up the food like copper coins, Zhang Fan probably looked and seemed to know a little. But I didn't say anything. I ate everything. What else can I do? I didn't see that others didn't. A lot of people are watching and swallowing.

"This is delicious. What's it called? Can we buy some when we leave. It's chewy. It's especially delicious. " LV Shuyan and Baoyin are happy to eat!

"Eat more. You can't buy it with money." Lao Liu advised him to eat while refuelling.

"What's so precious?" Zhang Yanfeng found that Lao Liu seemed to know, so he asked.

Lao Liu lay down in Lao Zhang's ear and whispered a few words. After listening, Lao Zhang picked up a piece of meat like a copper coin, looked carefully, then put it neatly in his mouth, and raised a silver bowl to touch Lao Liu.

"Is it delicious?" Lao Liu asked LV Shuyan and Baoyin again.

"Delicious!"

"Well! have some more. You will know later! "

They didn't rest until more than 3 a.m. and they probably couldn't leave after dawn. The leader of the government had already let the herdsman drown it.

Lying in bed, Zhang Fan is very hot and dry. Even if there is a system, it is also hot and dry. On the grassland in spring, the temperature is not very high in the early morning, but Zhang Fan is too hot to cover the quilt. No, I had to force myself into the system for surgery.

LV Shuyan next door is similar to several nurses. Hot and dry, LV Shuyan stuck her face and body to the cold wall, and felt hot and dry. She wanted to scratch the wall.

"Baoyin, are you hot?"

"Hot! Not only is it hot, I also miss my object! "

"Well!" LV Shuyan couldn't speak.

Early in the morning, several people who had been tortured in the middle of the night went to sleep. They slept very sweet. Zhang Fan got up early. He had nothing to do. He had something in mind.

He's going to see sun Hanjiang vomiting in the ward. This is the doctor, "Hey! The young man got up so early. What's the effect? " The township head doesn't know where he came from, but he knows what he did last night by looking at the marks on his neck.

"Never eat again. It's too hot and dry." Zhang Fan said with a smile.

"You don't know. I'll tell you how many dignitaries can't eat it. I'll take all of you. "

"Is there such an exaggeration?" Zhang Fan doesn't believe it.

"Nonsense, isn't the king of the deer precious? This kind of deer king is to release into the wild and survive. It's so wild that we can't see them at ordinary times. They only show up once a year in spring. You almost dried up the deer king who has grown up in recent years with a meal yesterday. "

"Well! What a pity. "

"Yes, you know it's precious. Why don't you stay a few more days, or you're right about the deer king!" Can you be an official and convince the public? Can you be a simple person? Zhang Fan was caught in a word.

"Well! I can't be the master. You tell the team leader that I have to see tusun Hanjiang. "

Sun Hanjiang woke up long ago. His tough wife sat beside him and gently combed his hair.

"Here comes the doctor! Thank you, Dr. Zhang. You don't have much rest. " As the local nurse came in, she translated the words of sun Hanjiang's wife to Zhang Fan.

"It's okay. How's it going? Are you ventilated? Does it hurt? Is it dizzy. Is there any discomfort? "

After asking a few questions, Zhang Fan explained to the nurses in the township health center: "we must pay attention to postoperative nursing and strictly implement aseptic operation. Change the dressing on time. "

"OK, Dr. Zhang, I see."

LV Shuyan and Baoyin got up at noon. Their faces glowed as if they had done a beauty treatment. Their skin was bright and tender, and they could water out.

Lao Liu looked at several people with his eyes dripping. "What are you looking at? Look again and dig your eyes."

"Hehe! Little girl, film. " Lao Liu proudly said that he just didn't tell them. Then I wondered if I wanted to find the mayor to buy some for my wife.

Because of sun Hanjiang's operation, or perhaps the township head's private collusion, the medical team stayed in Seleng for another five days. Zhang Fan's fame suddenly rose here.

After hearing about it, people from other places around also came here to see a doctor. For a time, Seleng became a small market. Tusun Hanjiang can finally go down to the ground. Although his pale face needs the help of others to walk, it has made the villagers very happy.

The medical team had to go. It's been here too long. In the early morning, the sun had not yet fully risen. Zhang Fan and they were going to leave quietly.

As a result, I don't know who disclosed the news. At the door of the township health center, like the army, there were many people quietly around. Don't force them, just stuff them.

Language barrier, but the expression is the same, deer antler, dried meat, all kinds of medicinal materials and leather goods on the grassland, not all of them.

"Folks, thank you! Thank you! Really, I can't fit it. Thank you! "

Milk wine saw off and horses lined up. The motorcade walked on the path of the grassland, and the

seeing off horses accompanied them like thousands of troops. On the rainy Road, it was filled with loess by herdsman early.

See you off all the way. LV Shuyan sat on the co pilot, waving and crying. They moved them, and they moved them.

"Oh! Oh! " Out of the Seleng area, the horse team stopped, but the long tune was still accompanied by them to leave slowly.

The second stop, red star farm. A red star has a special meaning in China. Its own red star does not count. A red star name that can be recognized by the superior must have a brilliant history or outstanding achievements.

In the early years, the farm was full of soldiers, iron soldiers. In a word, this group of men gathered all over the country were stationed on the border.

In the early years, because the roads here were not smooth, the mountains were often closed by heavy snow for several months. No supplies, no support. They should not only rely on themselves, but also always be on guard against the big brother and the little brother led by the big brother.

Countless people use their blood and youth to resist the wolves who are hostile to China. World peace? No! The system here is still there, and generations of farmers are still watching the country.

Standing on the top of the mountain, you can't see your hometown or the city, but you can see foreign countries and boundary pillars with pentagonal red stars. Quiet, quiet in the middle of the mountain, they have been looking at their own door without complaint or regret.

Chapter 338

What is a country's deterrence? Generally speaking, it is comprehensive national strength and weapons and equipment. At a young age, it is how many people in a country are willing to contribute silently.

Many people are dismissive of these. It is happy to have this dismissive, because you have this condition, because someone has created this condition for you to put down the bowl and scold the cook after you are full. For national peace, the happiest thing is the small people, and the saddest thing in troubled times is the small people.

When two people fight, the retracted fist is something that can make the other party vigilant or defensive. In fact, the country should also have a retracted fist. However, for China in those days, this flexible fist was very difficult.

Hongxing farm is located in a depression of Tianshan Mountain, but when you look at the spread

military map, you can see that it is on a node, facing west and abroad. The left border south, the right border north, back to the motherland Tianshan.

In those days, people just built a road in this place where birds disappeared, which can only allow ordinary people to pass for three or four months in a year. But it also shortened the distance between the north and the south, and enabled the car cannons in the LAN military region to fly day and night. This is an example of flexibility.

With the improvement of national strength, China's railways have also entered several Stan countries, and high-speed roads have been paved all over the country, but this place has not been ignored.

The road to red star farm is not easy. It's not like climbing over mountains, but it's almost always driving along cliffs. Surrounded by lush virgin forest and snow mountains. Sometimes, when you look out of the window, it seems that you are walking in mid air.

"How beautiful! You see, the goshawk seems to be at our feet. " LV Shuyan is really brave. She has such a nature in such a dangerous road.

Zhang Fan stared at the road ahead without turning his eyes. He was deeply afraid that he would fall into the cliff accidentally. Pan Xing, circling around Tianshan Mountain, rising and falling. Near the snow line, the Red Star Farm arrived.

If the tents and horses on the grassland are free, bold and unrestrained, or the life loved or admired by petty bourgeoisie, this is the embodiment of rigidity, antiquity and silence.

Red Star farm is a base built against a mountain, not a military base. The style of houses in horizontal and vertical rows is the same.

Grey tiles and white walls are arranged in rows. Even the planted poplar trees are arranged in rows. The roads in the farm are four horizontal and four columns. Each family is clean in front of the door. Unlike the usual countryside, there are sundries stacked at the door. The village is so quietly built here.

Wang section chief, the leader of the government, went to the grassland and went to the county. Even if he was not arrogant, he was a little reserved. But when he came here, he was like a subordinate meeting a superior, sorting out his clothes in advance.

There was no grand welcome. Just around the corner of the depression, a lame old man smoked a cigarette bag and sat quietly on the roadside stone, waiting for the medical team.

The wrinkles cut by the knife and axe, the dark skin, and the stooping body with eagle eyes.

"Coming!" The old man has an obvious accent of Suzhou and Hangzhou. The scene at this moment is so strange, as if he met a retired old man in a park in Suzhou and Hangzhou, but this is not a park, but a border.

"Hello, old head. I'm Xiao Wang from the municipal Party committee office. This time I was sent to the countryside for medical treatment. I should have arrived a few days in advance. Something happened, so I was a few days late. " Section chief Wang reported and generally explained to the old man.

"You too, what a waste. We went to the hospital when we were ill. It's not that we have no way. Besides, we also have a hospital ourselves. Look at your team. It's not worth it for people like us. " It's not worth saying, but the old man greeted everyone warmly. Shake hands one by one.

"It's not worth it. We've been here too few times. It's because our work is not in place. This is the old head of the Red Star Farm, head Chen, a combat hero. He has been received by the No. 1 head of the state! " Section chief Wang introduced each other with a smile.

"Bullshit, what are you talking about. Besides, can this place come frequently! Let's go to the regiment headquarters. I wanted everyone to welcome you, but the weather became hot, the snow melted, the war preparedness highway in the mountain collapsed, and the young people went to dig and carry stones. I, an old man, welcomed you on behalf of everyone. Don't take it to heart! " The old man worked hard to straighten his waist.

This Chinese farm is a little special. Although it is no longer a military establishment, its establishment and system are still a set of the army, has its own public security law, and leaders above the farm regiment level take military ranks.

A few years ago, the farm shrank dramatically. Later, I felt that it was still useful and began to pay attention to it slowly. The identity of farm people is also very special. They are soldiers, not really, but they have regular military training and weapons warehouse. It's not like farmers, because they are still large collectives. Maybe they are special workers, because they have the theory of retirement.

The people gathered all over the country are too miscellaneous, but there are no special dialect characteristics. Except that the small family still continues the accent of their hometown, the usual communication is Putonghua.

"Let's tidy up our clothes. Let's go to the martyrs' cemetery first." Chief Wang did not know what time he took a Baijiu in his hand.

Zhang Fan hurried to clean up. He was surprised that there was a martyr cemetery here. They had never heard of it! Head Chen didn't say much. Smoking a cigarette bag and smoking like a small train, he took a group of people limping towards the back mountain of the farm.

There is a path made of marble in the back mountain, which can only accommodate two people in parallel. Although everyone was curious, they didn't speak and quietly followed the old leader.

Over the hill, the cemetery suddenly appeared, which made everyone stunned. A sunny hillside is covered with stone tablets. At a glance, there are too many to count.

The ground inside the cemetery was clean, without any wreaths or fences, just simple stone tablets, stone tablets made of white rocks, and countless stone tablets with red five pointed stars.

"There are more than 3000 martyrs who have sacrificed their lives for the frontier since the founding of the people's Republic of China. Some martyrs died in the small-scale conflict that year, and some died to build war ready roads. Please bow for the martyrs. " Chief minister Wang said, after offering the Baijiu, he took three bow with everyone in neat order.

The old regimental commander, like a stone, silently looked at his colleagues or comrades in arms lying in the cemetery, holding a cigarette bag in his hand. People who originally wanted to see the surrounding scenery had no mood, and the atmosphere suddenly became low.

War roads, small-scale conflicts. It's so far away from the modern people in the city that they don't even know Zhang Fan. Have you forgotten? No, it's just that I don't want too many people to bear it. There are still people sticking to the place they created.

The slogan of youth and children. Now I think it's bullshit, very bullshit. However, some people shouted this so-called nonsense slogan and stuck to it. They are not only one generation, but also four generations now. These are the heroes of China, unknown heroes. Our years are quiet, just because someone is carrying a heavy load!

"Let's go! Just think about it. It's hard for you to know these things. let's go! Go to the regiment headquarters and have some water. " The old regimental commander said go, go, but his eyes turned back from time to time to see those comrades who had once been in a trench and comrades in arms who had fought together.

There are thousands of people in the residence of Red Star farm. How can I put it here? Anyway, it is a pioneer of all kinds of agriculture in the frontier. What to plant or do in those years, the farm was an experimental field, which began to be implemented in the frontier after the results were achieved.

"This is the residence of the third company. They mainly engage in some aquaculture, special aquaculture. The situation has been getting better and better in recent years. The railways opened by the state have gone abroad. The old man is so stupid that he likes to wear animal hair. It used to be

worthless. He can earn foreign exchange! " The old man limped along with everyone and introduced them. When it comes to the proud place, he smiled with a smile. His open mouth smiled so cute!

"This is the fourth company, engaged in forestry. We used to cut wood, but now we plant trees. Look at the mountain forests over there. The hillsides on which side are full of economic forests planted later. "

"The regiment headquarters is here. Please come in." The old man stood in front of a courtyard with a group of people and said. Zhang Fan, they looked at the gate. The number of so and so troops could be vaguely seen on the age-old gate.

The yard is very big, all bungalows. There are some people, not many, but also women.

"Sir, did anyone get it? Are you an expert in the city hospital? "

"Yes, I got it." The old man said to one of the houses with a red cross.

"Then hurry to help. There is a pregnant woman waiting to give birth." No one was seen, just a sound was heard.

"I'm a gynecologist. I'll go." LV Shuyan stepped across the crowd and entered the room. The old man looked at LV Shuyan and said, "this is the office. Hospitals, police stations and schools are all here. There were a lot of people. As a result, young people were pulled up because of the collapse of the war preparedness highway. So there are not enough people. "

"Let's go. I'll take you to clean up your place first."

"There's no need for help here. I'm an anesthesiologist and he's a surgeon." Lao Liu looked at the delivery room and hesitated.

"It's all right. She has three children. The family criticized her man many times for giving birth to a boy. They didn't listen. The second child was born in the wild. Now it seems that this family planning is not very strict, so they came to the health center. "

Zhang Fan's accommodation is an old bungalow, which is clean and tidy, and the ground is still old-fashioned red brick.

"You have a rest today. Don't rush to work. After the leaders of the regiment come down the mountain, please eat in the canteen. I went home to see my grandson first. " The old man was about to leave.

"It's all right. We're not tired. We can see a doctor now." Section chief Wang said.

"Nonsense, there's no reason to let others work after a whole day's rush. Hurry up and have a rest. "

With the setting sun and the ringing of the bell in the nearby yard, the students came out of school, and

the children chasing each other flew out of the school gate.

Zhang Fan couldn't sleep either. He looked at the surrounding environment at the door. Suddenly, the kids after school looked at the group of strangers and surrounded them curiously.

"Are you from the school?" A boy with a runny nose asked boldly.

"No, look at the license plate, it's not ours." Another girl with a pigtail stood up and pointed out his mistake.

"Just show off!" As he spoke, the dirt boy pulled the little girl's pigtail, and then ran away. The little girl was unwilling to show weakness, so she ran after her and didn't catch up.

"Wang Suhang's cub, wait. I'll sue when Wang Suhang comes home!" The little girl threatened the soil boy loudly! The tender cry made Zhang Fan laugh uncontrollably.

"Hehe, it's so naughty. I'll make you laugh. I hear you are the doctors who go to the countryside in the city? " A young girl dressed like a teacher came up and asked.

"Yes, we are the medical team of the tea vegetable city hospital. Who are you? " After LV Shuyan helped the pregnant woman give birth, she also stood at the door with Zhang Fan to see the scenery.

"I'm the principal of the primary school in the regiment. Today everyone went to the highway. There are a few people."

The sunshine in the frontier was long. At more than 8 p.m., the crowd slowly went home. The house in tuanchang looks old, but there are a lot of mechanical tools as people come back, and it looks very new.

The wheels of seven or eight large excavators and all kinds of trucks, which are rare professional engineering trucks in the mainland, look higher than people. When the bus arrived at the regiment headquarters, almost all men and women were covered in dirt. Jumped out of the car body, scattered and patted each other on the soil.

"Ha ha, you are the experts of the municipal hospital. Welcome, really, you are finally looking forward to the stars and the moon. You look at me ~ ~ "a strong man said to Zhang Fan after getting out of the car. He took back his outstretched earth hand and rubbed it on his body.

"Sorry, I had an operation at the last point, so it was a little delayed. I am the Secretary of the office of the municipal Party committee of chasu city. "

"Ha ha, it's okay, it's okay. Just come. I'm the head of the Red Star Group, Wang Suhang. This is the League secretary, this is the deputy head, this is the Secretary of the League Headquarters, and this is the president of the health center of the League Headquarters ~ ~ "head Zhou introduced his colleagues to you.

Where can these people see that they are leaders? They dress one by one like small workers on the construction site. They are all earthy, like Earth monkeys. Only the flickering eyes are bright, as bright as the rising stars in the sky.

Section chief Wang also introduced the people on his side. What do you say? Although one is the city and the other is the regiment, they are two independent units with their own systems.

"You took it orally. Today, you finally cleaned up the collapsed road. The canteen of the regiment killed a pig. Let's go, kill pigs and vegetables, and take care of our food. Go ~! Go! " With these words, these leaders politely took Zhang Fan and them to the canteen.

Zhang Fan thought that only leaders would eat the small stove in the canteen. As a result, there was a canteen almost as big as the auditorium. Adults, children, the elderly and young people all had their own lunch boxes and lined up to eat.

Such a big canteen is not so noisy“ Go! Go! You are guests. There's no need to line up. There's a small private room here. Let's sit in it. "

Although it's a private room, it's actually a curtain made of silk. There is nothing special about the food. They are all cabbage and vermicelli meat made in large pots and stoves, which are served directly in large pots. Because Zhang Fan and others were guests, the chef specially served a plate of cold radish, spicy red, fried peanuts, cold pig ears and a scrambled egg.

Although there are not many styles, they are all large plates“ Come on! Don't mention it. Since we are all frontier people in the frontier, the rule of Frontier people is to sit and drink, and drink three cups before eating. Our food can't go on the table, but the wine has been for a long time. The original wine of our winery is not blended. It's pure in one word. It doesn't hurt to drink. "

Baijiu, what he said, took out a bottle of Baijiu which was not a trademark. Although it was a liquor, the color of the wine was a little yellow. It opened the bottle cap and came up with a bouquet of wine. When it poured, it felt a bit sticky and a feeling of wire drawing.

"Come on! Full. I respect all leading experts. You have come all the way to deliver medicine for our farm people. I thank you for the farm people. I did whatever you wanted. 32 big cups, Baijiu, one directly to the head to do it! "

The medical team, except Zhang Fan, can drink more or less, including female nurses“ Hi! Why doesn't the doctor drink? Our place is remote and the reception is a little crude, but the heart is full and red! ha-ha! Come and do it! "

Where is this descendant of southerners, a rough frontier man alive! Zhang Fan put his hands together and said sorry, "commander Wang, I really can't drink, otherwise I will drink. This frontier Maotai is too famous. I have to drink my saliva when I smell the taste, but I really can't drink it. I don't have this good

luck!"

"Ha ha, forget it. Eat more. Domestic pigs, wild vegetables and Baogu serve big ones, which can't be bought in the city. " The crowd greeted several people warmly.

The so-called PI La Hong is actually a cold dish of PI Ya Zi, green pepper and tomato. This dish has no taste when it is away from the frontier.

The leather teeth here are not particularly spicy, but also slightly sweet. The pepper has a special taste because of the long sunshine time. The best is the sweet tomato. It tastes really delicious when mixed.

The dishes on this table are ordinary, but the wine is not ordinary. Sanchuan wine cow has gone to heaven, but it can't be in the frontier. No matter the green bird's beer or the Baijiu liquor, it's not good in the frontier.

Beer, the frontier has a big beer, and Baijiu, the border farm's own cellar, directly monopolizes the frontier. Moreover, it is said that the price of this yellowing original wine can be thousands of a kilogram on the market, which can't be bought with money.

Good wine. Zhang Yanfeng and Liu Yaowen are greedy. They know the wine too well. Good wine. Accompanied by farm cadres, the cup is full, and the cup is full. There are a variety of persuasions in various ways.

"Dad, my mother said, if you get drunk again, you won't be allowed to enter the house!" The slug who just pulled the little girl's braid washed his face at this time. It is estimated that he went home and asked his mother to wash it. He opened the curtain, put his head in and said.

"It's been a long time. I can still let her control it. Go and tell her that these are doctors from the city, but Jin Gui, please say hello! There must be no lack of etiquette! "

"Ha ha, Lao Wang is hard spoken, ha ha!" Other familiar cadres joked.

"Ah! It's not easy for women to catch up with this kind of collapse. The work they do is as heavy as men. Don't pity them when they go home. Is it in the past. I don't believe you don't pity your mother-in-law. "

"Ah! Adults are better, just children, hey! Stop talking and have a drink. "

"Let the experts laugh. Children in small places have no rules. Don't affect your interest. Let me sing a song for you. The song of our farm. " Head Wang wiped the wine on his mouth and got up.

"Only the sound of my piano is left on the grassland. I want to write a letter to a girl far away. Unfortunately, there is no postman to send a message!" Bold and unrestrained, high, singing really good.

"Drunk again, alas!" Outside the curtain, a clean-up woman sighed. However, she did not come in, but took the children to eat.

Drunk. The leaders of the farm and the doctors were all drunk except Zhang Fan, and even LV Shuyan was drunk. People with pure wine were more pure.

In Seleng, no matter what, everyone seems to think they are guests. In this red star, although it is the first time to meet, I feel as comfortable as a friend for many years and as comfortable as going home. Liu Yaowen took head Wang and danced a long unpopular ballroom dance.

Elegant, really elegant, this is also the product of collective life in those years. LV Shuyan wants to take Zhang Fan to drink wine. Baoyin grabs the wooden bench and shouts: drive! Drive! Drive! I don't know whether I'm riding or thinking of playing games with my boyfriend!

The farm is not a collective life every day. That's because we have to do heavy work together these days. That's why we eat together. On weekdays, families usually eat by themselves. Or when it's a new year's holiday, let's get together.

Usually, each company has its own industry. Although people are on the border, they have achieved self-reliance, and some industries are very famous.

For example, wineries, such as large farms, such as special planting, like some of the seeds brought down by God from heaven, are given to the farm. How to say, it's still military management here. Many special plants are planted here.

Moreover, everything they grow does not enter the market, but is uniformly controlled by the state, so they can't be regarded as farmers.

"All right! Drink some sour soup, ouch! " Zhang fantou is big. Drunk people are really sticky and unreasonable. The sweat on Zhang Fan's body entangled by LV Shuyan came out.

"No, come on! We dance. "

"Ah! No more, I've poured myself over! " Zhang Fan's threat floated like the wind over the Red Star farm. Floating in the sky where heroes sleep!

Chapter 339

The country, the country and the world. A simple name: China, in a specific environment, will make people cry. For example, in disasters, for example, in foreign countries, the country is becoming stronger and stronger, and the tone of foreign affairs is becoming more and more steel. The humiliation in the early years seems to be gone forever.

Many people forget or don't know. The Mainlanders don't know much, but the border residents who are a little old have a deep understanding. Not to mention the big brother in those days, even the younger brothers despised China.

Eating and wearing Chinese food and clothes, they still look down on China. Farms are the product of a specific environment. If there is no farm, who knows whether to come here now or not!

Network, North and south. These two names can't appear together at the same time. Once they appear, they will quarrel. Then, from regional blackout to greeting and caring for each other's all related female relatives, it seems that water and fire are incompatible. The north and the South cannot merge? In fact, it's all nonsense, or someone deliberately takes the rhythm and stirs up the flames.

The farm is a model. People from almost all provinces of China can be found here. Southerners teach northerners to make rice cakes and northerners teach southerners to make noodles. During the foreign conflict, they were brothers, brothers in a trench, facing life and death together. Because they all have a name: Chinese farm people.

When you died, I raised your children and died for your parents. I'm dead. You raised my children and died for my parents. In the early years, many people here had dry sons and daughters. Even now, this tradition is still retained by the farmers.

On a world of ice and snow, working together, they worked hard together to create a new world. In the frontier, the farm people are very united, which may be that difficulties and hardships make you succeed.

Do you miss your hometown? How can we not miss it? The names of many second-generation farmers are not the Su, or the river or the sea. To put it mildly, it is estimated that the most sorry thing in their hearts may be their parents far away from home.

The traffic conditions of that year, sometimes a parting is the eternal separation of yin and Yang. There are a lot of things that we can't care about. Who has no home and who has no parents, but the country needs you. You need to stand in this place where birds are extinct and stick to the boundary pillar with five pointed stars.

When you wake up, you start working. LV Shuyan was a little embarrassed. She dodged her eyes and didn't dare to look at Zhang Fan. Unless drunk people are very drunk, most of them are still a little

conscious, but they are just self indulgent. For example, they pull and fool people. If you drink too much, you may not be able to untie your belt and wet your pants! Baoyin is also embarrassed and feels restless.

"Dear experts, this is the health center of our regiment. Countries with complete instruments are equipped, but no one can use many equipment. Hey! Let's go to the clinic first. I have spread the news of your arrival to all companies. It is estimated that many people see a doctor today. " The presidents of the health center are Lao Lu and Lu Wenjing. A rough man, but his name is as elegant as a girl.

Zhang Fan opened surgery clinic, Lv Shu, Yan Kai Gynecology, and Zhang Yanfeng opened internal medicine. He didn't let Lao Liu idle. He drank several bottles of other people's aged wine. He was embarrassed to be idle. He opened the pain department.

This pain department was not valued in small places or in China in the early years. Some people often say: bear it. What painkillers do you take to hurt your body? Don't give me painkillers. What if you're stupid? Hey! I've had general anesthesia. I can't think!

If you're lazy, don't give it to general anesthesia!

The farm in the early morning is like returning to the hot era in those days. With the loud speaker playing the song of "valiant, high spirited, crossing the Yalu River", People go out to work one after another.

Baoyin smiled as she listened. While touching her ass, she told Zhang Fan, "is it appropriate to play this song. Crossing the chasu river is the state of Stan. People won't go to the foreign ministry to protest. "

"Hehe, God has returned! Try them both! Their vegetables, fruits, clothes, medicine, and even meat knives and forks are produced here. If the state liberalizes the border, it is estimated that more than half of the people on which side can come. " Lu Wenjing said with a broken beard.

"That's right!" Zhang Yanfeng said stiffly.

"Yes, no more than before."

At the beginning of the outpatient service, most young people went to work in the morning, and the old men and women came to see the doctor. Farm has one advantage. The gap between the rich and the poor is very small. Almost everyone has the same retirement salary, so there is little sense of impetuosity.

"Dr. Zhang, can I talk to you alone! There are too many people. " The old leader, sitting opposite Zhang Fan, said with a little shyness.

"I'm always looking for children and shy. Who looks at your old ass? Really, it's not hypocritical. " A group of old men and women around him chattered and made fun of the old leader.

"Song Laosan, I ~ ~" the old head's face was red with anger. The old man stood up and thought about theory, but as soon as he saw it, the old guys were waiting to see a joke and sat down again: "don't worry about you illiterates. I'll listen to the doctor." The old leader was a high school student in his early years. He was really a cultural man in his time.

"Hehe, aunts and uncles, let's come one by one. We still have the right to privacy. You should first bask in the sun outside. Anyway, we don't have to go in a hurry. Come one by one. " Zhang Fan said to a group of old men and women with a smile.

"OK, let's go outside, ha ha! Some people are shy! " A group of old men and women in their 70s and 80s helped each other out of the clinic.

"Hi! They are also boring. Don't laugh at Dr. Zhang. " The old man said.

"It's okay, it's okay. It's a lovely old man. Old man, what's the matter with you? What's wrong with you? "

"Me, it's no big deal. Don't I smoke! As soon as you smoke, you cough, as soon as you cough ~ ~ "at this point, the old man stopped talking and turned to look outside the door.

Then he leaned over on the table, put his head together and said quietly, "as soon as I cough, there is one below, which is the egg. It seems that a piece of intestines fell into it. This up and down made me anxious. I was thinking of living day by day at such an old age. As a result, you came ~ ~ "the old hero from the hail of bullets blushed.

The old man's shy appearance is a little, how to say, pitiful in his loveliness. Zhang Fan didn't laugh, but pressed his words and said in a very relaxed tone, "it's no big deal. This disease is very common among the elderly, and there are too many in the urban area. When this man gets old, his muscles relax. This will happen in some thin places. First lie in bed and I'll check it for you. "

Speaking, Zhang Fan got up and buttoned the door to take care of the old man's face. A tough old man all his life is estimated to have a very, very good face.

If an old man has a good face, Zhang Fan should make others feel professional. Only by being professional can people dispel their sense of maladjustment.

Hat, mask and gloves, Zhang Fan covered himself strictly. Then he stood by the bed and said to the old man, "old man, come and take off your pants."

"Yes." Although he had a good face, the old man lying in bed didn't ink. His lameness didn't affect him at

all. He supported himself on one leg and quickly took off his pants.

The old man took off his pants. Zhang Fan was probably sure at a glance that it was a hernia. What is hernia? It would be boring to describe it in professional language. Generally speaking, it is also simple.

People have many channels. Such as ureter, fallopian tube and spermatic cord, these pipes are the same as all the pipes we usually see. It must be fixed. The reasons for fixing are to prevent it from breaking and to prevent the service life of the pipeline from shortening due to active wear.

So do people. I've seen cancerous ureters, but I haven't seen worn ureters. In fact, this is the truth. This fixation means that some muscles fold each other repeatedly to form a channel, and then various tissues bind this pipe.

Then, some intestines or omentum that are not in this pipeline feel that life is better now. It needs to look at the outside world, and then with the help of some factors, such as congenital developmental abnormalities, obesity, old age and weakness, lack of abdominal muscle exercise and so on.

The intestines enter the passage formed by the muscles. Because there is membrane and fat on the surface of the intestines, it boils and swims like a hairtail. The outside world doesn't see it, but it may finally see eggs or Yin {a} lips.

Fat intestines sometimes get stuck in this place. Over time, edema is caused by ischemia, followed by severe pain, how painful it is, the kind of pain that can make you roll. If the operation is not timely, it is intestinal necrosis.

Thin intestines or channels are very loose. The intestines go in and out like traveling. Go to see its relatives from time to time.

The old head was old and weak, and smoking all year round led to habitual cough. Cough is not a single lung or airway movement. It can cause changes in abdominal pressure. During a cough, the abdominal pressure increases instantaneously, and some thin abdominal walls are gradually eroded by this pressure, just like the tide. One day, this weak dam will be broken by it.

Zhang Fan checks the old head. The hernia of the old leader is the hairtail that comes and goes freely. You can't see the vaginal (a) cyst when you lie in bed“ Come and cough, old man. " Because at this time, the vaginal (a) sac is empty and there is no mass.

"Yes!" The old man replied and began to cough“ Cough! Cough! Cough! " With the old man's cough, hairtail appeared. Zhang Fan put his hand at the opening of the hernia and obviously felt the impact of hairtail.

Then, Zhang Fan gently grabbed the old man's vaginal (a) sac with his hand. There are many kinds of hairtail, such as hairtail in huaguozhou islands, which is slender and tender. For example, the hairtail produced in Africa is generous and the meat is very stiff.

Compare this abdominal content that comes out through the channel to see the world to hairtail. The intestine is hairtail produced in the boat islands of China, and the greater omentum is hairtail produced in Africa.

Hairtail tastes different, so the feeling of sliding into the Yin (a) capsule is also different. The feeling of the intestine sliding into the Yin (a) sac is soft and smooth. If it slides in more, it can knock out the drum sound. Like the hairtail in the boat islands, it tastes like melting in the mouth.

The feeling of the greater omentum sliding into the vaginal (a) sac is not so comfortable. It feels hard. It's still very dull when tapping.

Zhang Fan touched the Yin (a) sac of the old man, and then tapped it a few times, bang! Boom! Boom! It's the drum sound, "old man, lie down. I'm pushing. Relax! deep breathing. I pushed. "

Zhang Fan said something and pushed it gently with his hand. He only heard the purr at the Adam's apple after swallowing saliva. The hairtail produced in the boat islands in the Yin (a) capsule went back again. Because there is gas in the intestines, when you get stuck in the channel, the grunt is the sound of gas returning.

Zhang Fan touched, knocked and pushed around. The old man asked with a red face, "how's it going. Can the hole be blocked? "

"Yes! But you have to have surgery. "

"Well! Can't you do it? " The old man was very reluctant.

"Old man, if you don't stop this hole now, it will become bigger and bigger. If you are incarcerated at that time, you will suffer." Zhang Fan turned to take off his gloves and let the old man wear pants.

"How can you not operate on this, this egg? I'm so old. Don't I be ashamed to say it!" Zhang Fan almost let the old man laugh.

Zhang Fan endured and endured, and said with a hard face, "this one who can't move eggs is to find holes in his stomach and sew it with a material."

"Hi! So it is. Let's do it. " The old man breathed a sigh of relief.

"Check first, then let the family sign, and I'll arrange the operation for you." Zhang Fan looked at the packed old man and finally smiled.

"Hehe, what are you laughing at, you smelly boy. OK, you can arrange it. When my son gets off work this afternoon, I'll ask him to come to you. "

"Old man, let's go to the hospital for examination first."

"Ah! I really haven't been in hospital except for my leg injury. Old, old, and expensive, all right. I listen to you." The old man is relieved. It's so tough. The old man can really look down on life and death, but he's afraid to touch him ~ ~.

"Hehe, OK. I'll put you in hospital now, minor surgery." Zhang Fan saw the old man smile, and he opened his mouth with a smile.

"Don't laugh at me yet. In those days, they bullied us. They didn't have enough equipment and buried a lot of infantry mines. It's so vicious that it can't kill you, but it can disgust you. A lot of old friends, full of everything, just didn't keep their children's roots. Then, I can't figure it out when I leave the hospital. It's not without people jumping from a building to wipe their necks. Hey! What are you talking about! You hurry to see a doctor for those old people outside. I don't know how to arrange me."

In a word, Zhang Fan couldn't laugh and couldn't close his open mouth. The past is like the wind, that's the breeze! Some things can't be forgotten. Forgetting is betrayal!

One after another, the old people came in to see a doctor. Because of the old head, these old people came in one after another. However, the laughter outside the yard and the laughter and scolding of the old head clearly came into Zhang Fan's ears.

Really a group of men who are indifferent to life and death!

Because the conditions were not good, and they did heavy physical work. With the increase of age, many of these old people are knee joint variants, resulting in O-shaped legs and enlarged and proliferated finger bone nodes. Are some chronic destructive malformation diseases.

"Old man, you have to have an operation and change your joints."

"How?"

"Is to replace the knee joint with metal."

"Want to saw your legs?"

"Well! It doesn't count, but this ~ ~"

"Get the ball. Isn't that a paralytic?"

Zhang Fan was not unhappy at all and explained slowly and patiently. Only one old lady agreed, and the others disagreed. I was afraid I couldn't move around. It's estimated that lying in bed is worse than killing them.

"Zhang Fan, come here." Zhang Fan was showing an old man the old injury left on his leg at that time, because a shrapnel was not taken out at that time. As a result, the shrapnel slipped with the muscle and finally slid to a nerve edge. Then the body became larger after wrapping the shrapnel, resulting in long-term chronic pain. The old man has resisted for decades.

LV Shuyan stood at the door and shouted.

"Wait a minute. I'll open a hospital for the old man." After finishing speaking to LV Shuyan, Zhang Fan said to the old man, "it's very simple. I'll operate on you and take it out. Let me open a hospital for you. "

"Good!" The toothless old man said happily. With such chronic pain, he can still be like a person who has nothing to do. Really, people before and now have different structures! They may be made of steel.

"What's the matter?" After Zhang Fan got up and went out, he asked LV Shuyan.

"An old man in his 60s still has irregular holidays. After I asked her to do a color Doppler ultrasound and lower abdominal X-ray, I found that it was the contraceptive implanted in the uterus that caused peripheral uterine inflammation and bleeding. This needs to be taken out, but I haven't seen her kind of birth control device. It's metal. You can see it for me. "

"OK, let's go." Zhang Fan came to the gynecological clinic with LV Shuyan. I found a pale middle-aged and elderly woman, restlessly waiting for LV Shuyan's arrival.

"Doctor, is this serious?" She asked anxiously, with a child around the age of three or four, probably her grandson.

"It's not serious. It's because it's been placed for a long time. I'll let our surgeons have a look again. We must make sure to take it safely for you. Don't worry, aunt. It's okay. " LV Shuyan patted the old lady on the shoulder and comforted her.

After watching the film, Zhang Fan said to the old lady, "aunt, it's all right. It's very simple. Dr. Lv is very responsible. I'm also specially invited to have a look. You're hospitalized. Because it's been placed for a long time, you'll take it out tomorrow, and then observe it for a few days to see if there's bleeding. Once there's no bleeding, you can leave the hospital. "

"Oh, all right. I'll discuss with my children whether it's OK not to be hospitalized. When I'm hospitalized, no one will see my grandson. "

"We'd better discuss and let them take a few days off, just a few days. It won't be long. Look at your face. You're a little anemic. " Zhang Fan said again.

"All right." The old lady nodded and thought out of the clinic.

What the hell is this birth control device. Du Niang doesn't know. Generally speaking, it's a T-shaped

device. The T-shaped head is a slightly wider device. The uterus is the place where children are conceived. After sperm enter and combine with eggs, children are conceived here.

For contraception, put this contraceptive device into the uterus. Because the ovaries are two. This thing is wide at both ends. After it is put in, it directly blocks the fallopian orifice. Then it achieved the function of contraception. In the early years, the device was metal, which was difficult to put and take.

Anyway, this operation is more painful. In fact, if birth control is used, it is simpler and less damaging to men. After all, the male vas deferens is on the body surface. However, perhaps the publicity is not enough, perhaps afraid of pain, or some other reason. It is difficult for men to accept this operation, so it can only be borne by women.

At this time, Zhang Fan and others heard the old head and some old men pointing at a middle-aged man in the yard.

"You didn't starve to death in those days, did you? Now you're making such a cheeky remark. What birth control is not good. Can we look at things from the current perspective? You're still a scholar. The dog ate all the books, didn't you? " The more the old man said, the more excited he became.

"Old Mao Zi used to strangle us. If we didn't have birth control, could we support so many people. History should be viewed macroscopically and dialectically. Don't use your current experience to look at the things of that year. If you don't combine the situation of that year, you will be careless. "

"We should have a big view of history. Without a correct view of history, you can't see clearly, or even muddle through and follow others. When we talk about materialism, only by analyzing everything with materialism and objective laws can we get correct knowledge. "

"Now we are powerful. Can the people opposite think of our present, and can we think of our present ourselves. The current achievements or the tortuous road in the past are a process that must be experienced. With the development of the times, the previously applicable policies may not adapt to the current society, but can you say that it is wrong? "

A group of old men have to be angry. They can't lift their middle-aged heads.

"What's the matter?" LV Shuyan asked Zhang Fan in wonder.

"That's the one who understands, eh! I don't know. " Zhang Fan tried to stop talking.

"Hum! Boring wood. " After Lu Shu's Yan Bai glanced at Zhang Fan, she turned and entered the room. After she woke up, she also regretted that she was too unpretentious, and slowly found that she seemed to be lost in Zhang Fan's technical aura.

"He's boring and dull. I can't even coax girls. But he can grasp himself. Good or bad. Hey! Forget it, it's someone else's after all. " LV Shuyan also figured it out. It's not necessary. It's hard to find a five legged

toad and a two legged man.

She was a little confused, but she woke up. People still have to face reality. After all, the adult world is not a fairy tale. One morning, Zhang Fan and his family took in several elderly people who needed surgery.

There are thousands of people on the farm, and the equipment of the health center is still good. It is because of the brain drain that many operations cannot be carried out. Young people rarely have the patience to stay too far from the city. After all, the outside world is so wonderful!

Chapter 340

The train whined, long and long. The dragon like train, like a sharp sword, directly and deeply pierced into several Stan countries outside the border.

In the capital, Shanghai, Jiangsu, Zhejiang and Yangcheng, almost every train is full. From the south to the north, the bustling crowd moves north and South with the high-speed train, and the railway operation should not lose money.

There are not so many people on the frontier train. In addition to the holidays, the number of departures on weekdays is not many. At the end of the year, with high road repair fees, construction fees and various maintenance fees, we will lose a lot of money a year. But that's it. The country still spends a lot of money to refuel and extends the railway.

Roads are the same. There are not many people in many places in the frontier, such as a so-called scenic spot, because it is connected to the scenic spot of the next country, and then the six channel expressway is paved in the past. It never presses cars all year round! The toll collected is estimated to be less than the bank loan interest. And the wonderful thing is that the most people walking on the expressway are not cars, but cattle and sheep herds!

It is said that the frontier has the largest number of airports in China. Seeing big from small, places with few people pay so much attention to traffic. The country may be playing a big game of chess.

Zhang Fan's chess level is not good, go is even worse. So he can't understand. But what he can guarantee is to strive to improve his technical level and live a good life.

The old head is hospitalized. A group of old men and women are hospitalized. People are old. If the hospital is too far away and inconvenient, they won't open their mouth to see a doctor until they lie

down and can't get up. This time, because the medical experts from the municipal hospital went to the countryside, the elderly also have sick medical treatment and no sick health care.

The president of the health center of Hongxing farm is a pediatrician. On weekdays, in addition to seeing children, he prescribes antihypertensive drugs and insulin.

A mature surgeon needs too many patients to practice. There are few people and patients in small places. You can't practice it.

The surgeon in the township health center is an uncle. On weekdays, he will perform a foreskin operation on the children, and then do some basic trauma dressing and other treatment. In the early years, I could do appendicitis. The older the Jianghu is, the smaller the courage is. In recent years, I haven't even done appendix surgery.

Goods compare goods to people, and people compare people to death. It seems to be a little humorous. In fact, this thing is too cruel. In comparison, it seems that young Zhang Fan and LV Shuyan did much better in their surgery.

But first of all, not to mention anything else, Zhang Fan, the surgical patients they saw in a month, it is estimated that there are not so many patients in the township health center for decades. How do you ask others to improve? By studying? Or leave here and go somewhere else?

Therefore, for these medical staff who have been rooted in the grass-roots level for a lifetime, Zhang Fan is very polite to them without the posture of experts from superior hospitals. One is personal cultivation, the other is also the understanding of this industry. The more you know, the more you understand them.

"Mr. Hu, please arrange the hernia operation of the old head." Zhang Fan politely said to Lao Hu, a surgeon in the health center. Zhang Fan hardly called anyone else's teacher in the municipal hospital.

This is the first time he took the initiative to call the same behavior teacher after returning from his study. How to say, Zhang Fan, who has been liver for so long, is impossible without a little pride.

But he can only admire doctors like Lao Hu. When Lao Hu was young, he had a little education and professional medical knowledge. It's not too simple to go to the hospitals in the surrounding cities. Look at a lot of re employed experts now. Go back to the bottom ~~, don't say it!

"Hehe, I'll be your tour guide. I'm old and I can't look at you anymore. I won't give you any trouble. " Lao

Hu smiled and said that his smile was so peaceful and comfortable.

"Well, I'll arrange it. If there's anything you can't see, please bear with Mr. Hu." Zhang Fan nodded and said to Lao Hu.

"You're welcome, Dr. Zhang." Crossing the bridge, putting boards on the wall and supporting ladders is neither nonsense nor fake courtesy. It is a mutual respect between people. Zhang Fan has also experienced this. Slowly, he has grown up and matured!

Although it is a medical team organized by the government, there is no lack of preparation before the operation. Check, sign, talk and explain the condition one by one, do it clearly, and explain it clearly to the patient and the patient.

In the early years, the hospital explained the condition in detail, but the patients could understand it. OK, no, No. I don't know if the doctor's conversation level was high in the past. Anyway, it can give the patient's family a bottom in their heart.

Now, things are becoming more and more standardized and detailed. The harmonious hospital issued a doctor-patient communication signature, and then all hospitals in Manchuria began to implement it without notice from their superiors. They don't know how. Everyone followed their template.

Then, a simple operation is explained in great detail, and almost all the risks that can be considered can be mentioned. Then, the patients and their families were frightened. Where is surgery? It sounds like death! If there is no one in the industry at home, I really dare not sign!

Good or bad. The helplessness of both sides!

The operating room and equipment in the operating room on the farm were fairly good. When the country became rich, it gave everything it should give. As a result, the equipment was available, but the sister's people were gone. Everything is ready and the operation begins.

Start with a hernia, a simple indirect hernia. Zhang Fan is the main knife, LV Shuyan is the assistant, Liu Yaowen is anesthetized, Baoyin who rubs his ass is the operation nurse, and Lao Hu is on tour.

For inguinal hernia, surgery is the most effective treatment so far. Before the operation, Zhang Fan specially used some drugs to reduce phlegm and relieve cough, hoping to let the old man quit smoking.

But the stubborn old man turned his eyes and turned his mouth: "my father smokes and lives to more than 90. How old are you?" Zhang fan can't refute it. He can't tell people about the size and individual. Besides, people are so old and have no choice.

The old man is too stubborn. Zhang Fan has no choice. The hernia repair operation began in 1880. The pace of improvement of the operation method is very small. Many original and ancient methods have been retained, because the operation is relatively simple and there are few places to improve.

The operation is not difficult, but it is easy to relapse. Postoperative recurrence is particularly easy. With the advent of the new century and the development of new materials, many useful prostheses have appeared, and then with the application of new materials, most recurrent hernias have been eliminated.

The development of new materials is very strong, and there are many materials available for prosthesis, such as polypropylene, polyester mesh and many other easy-to-use materials.

But the domestic ones don't know why they don't use these materials. Instead, they use nylon cloth with poor liquid permeability as the transplantation material. This thing is not only not conducive to the recovery of patients in the later stage, but also more troublesome than other materials during the operation. It takes advantage of the price. Few doctors like to use this material.

After lumbar anesthesia, Liu Yaowen said, "OK, let's start."
