

Chapter 3568

Like the galloping river, like the roar of the sea.

When George Han was standing beside Suntan, such a voice was heard in his ears.

Looking at the front, the vast waters of Taiji madly revolved, like silver falling from the nine heavens, and then leaked from the center.

The majesty of this scene, this is actually vast.

Even if you don't know the strangeness in the water, just the posture on the water surface is enough to be terrifying.

"Huh!"

Even if he was as strong as George Han, he couldn't help taking a long breath at this time. After calming his inner emotions, he stepped on his feet and flew directly towards the center of Suntan.

In the center of Suntan, there is a huge water hole in the center, about five meters in diameter, and all the water swirls down from all around it.

It is located on top of it, overlooking it, the bottom of the cave is dark, and it is difficult to see the bottom, only the rumbling sound in the cave is even more deafening.

With one hand movement, a fire ignited in George Han's hand, and with a single tap, the fire went straight to the bottom of the water hole.

One second, two seconds...

For nearly ten seconds, the fire was annihilated in the darkness.

George Han shook his head slightly and smiled softly: "It's quite deep." When the words fell, he rose again in his hand, and at the same time, Burning silence drove the sky fire. This time, a huge fireball nearly two meters in size came directly.

"I see how deep you are."

"Go."

Whoa!

The Skyfire, which had been trained by Fen Ji, was like a cruise missile, and plunged straight into the deep pit under his feet.

This time, the firelight passed by, and everything in the cave was clearly seen. Nearly ten seconds later, the sky fire was still unabated, and it continued to move deeper!

George Han's eyes were locked tightly, and he didn't say a word, but he was already a little horrified. Calculated by the speed of the sky and the time, how deep is this hole?

What's so special about

meeting the deep sea, or getting into the center of the earth?

Suddenly, just as George Han thought about it, the originally radiant sky fire was almost the same as the previous fire, and completely disappeared into the darkness.

This is impossible.

Tianhuo has self-consciousness in the first place, and it is by no means an ordinary fire. Now it still has its own power of burning silence. Even if it encounters some difficult opponents, it will not suddenly suddenly...

suddenly disappear . what!

George Han was extremely confused, but at this moment, he suddenly realized that the water surface under his feet seemed to be wrong.

Even, the whole surrounding seems to be kind of weird.

boom!

Boom boom boom!

In the huge rumbling sound, a strange sound was hidden.

The next second, George Han suddenly stared, and almost at the same time, the entire ground and water were trembling wildly.

The earth is shaking and the water is turning wildly.

“Roar!” In

the incomparably dark pit

, there was a sudden raging fire, rushing all the way from the bottom of the pit, rushing towards George Han.

George Han’s body was very lucky, and he hurriedly avoided between flips, and then he saw a huge fire swept past where he was just now, and after at least tens of meters up, did he completely calm down the roar. Falling into the deep pit again, and gradually submerged in the deep pit.

“This fire...” George Han frowned slightly. With his eyes, he couldn’t tell that these fires were exactly the same as his own fire.

What does this fire mean?

Strangely, George Han didn’t wait in vain. He moved and flew straight towards the pothole.

Along the way, there were countless water falling around the cave, and everything in the cave was normal. However, suddenly, between the bottom of the cave, the fire reappeared!

George Han’s pupils slammed open, and he moved his hand directly, facing the rushing firelight and shot out the Emperor You.

“Huh!” The

fire swept through, but George Han forcibly pushed the shield of the Emperor Youhuang all the way down.

It seems that the other party also felt the tenacity of the shield in George Han's hands. After the fire was withdrawn, the bottom was silent again in the darkness.

Get the momentum, the fire at the bottom is back!

call!

This time, it no longer completely turned into a sky-filled cave fire, but like a long sword, point-to-point, bombarded directly towards George Han with precision.

It's extremely fast, and in general, the pothole is not huge, so the space for hiding is actually very limited.

However, what kind of difficulty is it to face George Han, no matter how difficult it is?

Between a few phantoms, the ground fire erupted more than a dozen times, but it failed to hurt George Han in the slightest.

When it was sent again, before it was retracted, George Han had already accelerated and landed at the bottom of this weird pit.

Underfoot, the water is gurgling, the golden land...

Chapter 3569

The bottom of the cave is completely closed space, like a cylindrical bottle bottom. I don't know how many meters of distance I have passed, and when I arrive here, it is like a drizzle of rain, slowly flowing in.

The water accumulation is not deep, about five centimeters or so, and there is a piece of golden-yellow land underneath... In

theory, it is not.

Judging from the touch of George Han, this place seems to be some kind of metal, but it has certain characteristics of mud.

After taking a closer look, I found that this circular place was actually a gossip, with a curved line in the center and two holes about the size of an egg on both sides.

Water enters through the hole.

Who would have thought that the monstrous water would flow into these two inconspicuous holes like a stream in the end?

Or, how about calling it the two yin and yang eyes on the gossip? ! The fire that

went out However, this is not the point. The most important thing now is what to do next. George Han set his eyes on the gossip under his feet. Is this a breach? Bending slightly, George Han reached out and

wanted to touch the gossip. However, what surprised George Han was that the gurgling water under his feet was not as cold as he imagined, but like boiling water boiled in a fire. "hiss!"

However, what made George Han even more annoyed was that as soon as his hand touched the surface of the gossip, even George Han, who had the infuriating body protection, could not help but shrink his hands.

With just the slightest touch, George Han can be 100%

sure that this metal surface that seems to be very calm in the water actually has a temperature of at least several thousand degrees.

This is strange.

Thousands of meters deep underground should be the same as what you perceive now, the temperature is extremely low. After all, this is common sense. Isn't the existence of cellars because of this principle?

But the water here not only did not drop to near freezing point, but it was surprisingly hot.

It's okay to be surprisingly hot, the water temperature is high, so there should be smoke, but the water here doesn't have the slightest smoke. Instead of saying something, then these evaporated cold air can be considered smoke.

It's weird enough that the hot water is cold.

"Could it be that yin turns yang, and yang turns yin? Everything has to do with yin and yang?" George Han frowned.

"The water is hot and the air is cold, so the water is yang, and the qi is yin, but the ground in the water is hotter,

so the water is yin, and the ground is yang."

"A good yin generates yang, and yang generates yin."

"I see."

George Han smiled, and when the Five Elements Divine Stone came out from his left hand, one could be shot directly, and the water power between the Five Elements Divine Stone suddenly exploded wildly.

The right hand burned silently again, and at the same time called out the fire of the sky.

"The world is upside down, the gossip breaks the sky, and it is combined." He

drank softly, the water power in the left hand, and the fire power in the right hand, the two became one.

"Yin and Yang rotate, break!"

He drank again, water and fire blended together, and the two strands merged into one, and then rushed towards the Yin-Yang pair of fish eyes.

“Get up!”

Drink again!

boom!

As George Han slightly lifted the power of water and fire between the two rooms, suddenly, the entire golden ground began to tremble uncontrollably, and at the same time, he slowly turned over with the straight line between his eyes as the central axis.

hum!

The entire round bottom is turned 90 degrees.

George Han

didn't hesitate at all, and when he closed his hand, he accelerated and went straight into the underground space exposed by the metal bottom.

boom!

And as George Hanyi entered the bottom, the entire metal bottom of Bagua also returned to its original position, and the flowing water covered it again. Nothing happened to prevent Buddha.

“Huh!”

At this time, George Han, after passing through the metal plate, has entered an unknown dark space.

Here, there are no boundaries and no objects.

Just like flying out of the sky on the earth and entering the universe, it is vast and boundless.

But the only difference is that there is no sunlight, no moonlight, no light source of all kinds, but it is simply a dark and incomparable world.

“***, not even a direction?” George Han frowned.

And as he whispered, terrible things happened...
