

## Chapter 371

Zhang Fan rested against the wall. His assistant changed for the second time, and Baoyin was also replaced. The girl said she could fight again, but that is to say, her red face turned pale.

The operating room was quiet, and everyone was deeply afraid that it would affect Zhang Fan's rest. Since having the system, Zhang Fan has less and less words. With the improvement of surgical level, he has spent more and more time in the system. Now the promotion time is many times longer than the time needed to get the system.

Perhaps because of the long-term liver system, as soon as he entered the operating room, Zhang Fan began to look expressionless and cold. People who don't know really think Zhang Fan has a bad temper.

The assistants are ready to brush their hands. Professor Li Housen is observing the patient's vital signs. If the operation fails, it is estimated that rejection will begin to appear.

Heart rate, blood pressure and breathing. Every five minutes, Professor Li Housen looked up. He didn't say that he was worried about disturbing Zhang Fan.

Zhang Fan is tired, but Professor Li Housen is tired and worried. Time is getting closer and closer to the exclusion time window, "can it be done? Should be able to, hey, maybe not." Professor Li Housen was almost crushed by his support and opposition.

After more than ten years of struggle, this is the closest to success. As long as he can succeed once, his research is feasible. As long as there is a way to follow, no matter how difficult it is, it is better than his own exploration.

"Dr. Zhang. The materials are ready, and the doctors have put on their surgical clothes." The itinerant nurse whispered around Zhang Fan. After ten minutes of rest, Zhang Fan recovered a little.

"OK." He got up and twisted his waist with small movements. He had been standing for too long. His twisted waist was like a door bolt lacking oil. Zhang Fan seemed to hear a squeaking sound.

"Dr. Zhang, I'm ~" the assistant introduced himself. The tired Zhang Fan really seems to go in the left ear and out the right ear. Fortunately, the leg surgery needs to be done sitting. Otherwise, Zhang Fan probably can't stick to it.

Legs, bilateral thighs of the wounded were the most severely injured. The opened fat highlights the broken muscle. After several rounds of debridement, it can no longer be seen. The defect of large area adipose tissue is like children laughing.

Under the yellow and white fat, there are purplish red muscles. A small pit is really like a child's mouth. Or a child's mouth full of legs. A larger pit goes directly to the opposite side.

Shake your thigh. With the thigh tissue lacking the binding of skin and fascia, it is directly like many open and closed mouths, which can really make people look creepy.

The thigh of debridement is so damaged that it is impossible to fill it from other parts of the body. The east wall is not completed, and the west wall will be dug down, so we can only implant silica gel.

There are many kinds of foreign body implantation, such as nylon, acrylate and polyethylene, which can also repair many organs. For example, the cavernous body that most worries men can also be repaired. The disadvantage is that it seems to be a little worse in terms of getting bigger and smaller.

Among these many fillers, the most used is polymer silicone rubber. Dr. Bonzi played this thing to the extreme. Everyone has a love of beauty, and there's nothing to say.

However, the premise is the purity of the material. Medical silicone rubber has very high requirements, because it is a foreign body implanted in the body. If the purity is not enough, electrolysis can occur, followed by inflammation. Perennial inflammation is followed by cancer. Therefore, there is no need to do breast enhancement.

If you have to do it, please go to a regular hospital and choose regular materials. Don't listen to any advertisements, otherwise, it's cancer. It's really too late to regret.

"Is the filling material qualified for such a large area?" Zhang Fan looked at the silicone brought by the nurse and asked.

"Don't worry, this is laboratory grade silica gel. It is vulcanized with high viscosity polydimethylsiloxane, which can be regarded as the silica gel with the highest purity at present. "

"OK, that's all right." Zhang Fan is also worried about whether rejection will occur after such a large area of filling. There is no problem with the skin. In the end, the operation will fail because of the filling.

Serious high-purity silica gel is not toxic, but a lot of inferior silica gel can't be said. It's just a pair of bombs buried in the chest.

Repair damaged blood vessels before filling. The human body is really awesome. As long as it is not a

large blood vessel and the capillary network is damaged, as long as a small part can be retained, it can slowly derive new pathways over time.

As time passed, the injured mother kneeling outside the operating room could not hold on. The direct people were stiff and were carried to the lounge by other family members and nursing staff of the armed police force.

The mother covered her face with both hands, perhaps because she didn't insist until her child came out of the operating room. She was uncomfortable, really uncomfortable, as if the child was injured because of her, crying in a low voice.

Facial surgery Zhang Fan did quite fast, chest surgery was ok, and when it came to leg surgery, Zhang Fan really faltered. It was very hard.

This is the end of the operation. No one can help him, and no one dares to stand up and say I can do it, no! Zhang fan can't say, let the operation stop, I'll have a rest, no!

Only insist, bite your teeth and insist. Zhang Fan kept cheering himself up in his heart, "half a hundred miles, I have to insist. He has persisted until now, and so will I. " Although there are flowers in front of us, the brain has begun to protest. However, the patient can't afford to wait. If Shao Hua is here at this time, it is estimated that Xiaonizi's Distressed will cry into tears.

"What kind of silica gel?" The operation was going to be filled with silica gel, Zhang Fan asked.

In this regard, Professor Li Housen is more authoritative. This is the difference between skill and skill. One said he couldn't do it and the other said he couldn't do it. Although it's not accurate, it probably means so.

"Use molded ones." Without thinking about it, Professor Li Housen directly said that in fact, most medical silica gels are not injectable liquid silica gel, although the injectable silica gel is softer and more similar to human fat.

The molded silica gel is much more ductile, which is the so-called relatively rigid. However, this rigid thing does not cause cancer and will not produce granulation tissue, while the softer and more human fat like injectable silica gel will cause cancer. In some countries with super developed social security, the law directly stipulates that this injectable silica gel is not allowed to be used for medical purposes.

The circular notch is filled with circular silica gel, and the strip notch is filled with strip silica gel. Slowly, the incomplete thighs became plump and less terrible.

The most terrible thing about skin transplantation is rejection. After more than 20 hours of operation, the patient's temperature has not risen and has been constant. In this case, facial skin transplantation is successful.

Professor Li Housen was pleased that his research results were correct, happy, really happy. He slowly wiped the tears that he unknowingly shed. For more than ten years, how many decades can people have? The shrinking hairline has shown that he is no longer young.

Although there are not many doctors who can still watch in the conference room, there are also many. They are relatively young, and the older doctors can't resist it.

Slowly finish on one side and start on the other“ Come on, sugar and salt water, I'll drink more. " Zhang Fan is also on the verge of collapse, and his eyes are dazzled.

"You, slow down." Zhang Fan is greedy and sucks warm sugar and salt water. Tears are rotating in the eyes of itinerant nurses. How can he not feel distressed.

For such a long time, not to mention eating, even drinking water is a luxury. Five hundred ml of sugar and salt water made Zhang Fan dry in one mouthful.

"Ah! To continue. " After more than 20 hours, Zhang Fan finally had a good time. The operation is almost over. Zhang fan can absolutely guarantee to end the operation before holding his urine, so he drank a bottle. It's so sweet.

That is, there is a system that can quickly convert energy. Otherwise, who can resist it. This kind of operation is usually divided into three operation groups at the same time, but in reality, where can I find so many doctors?

Zhang Fan's performance was so happy that Professor Li Housen, who had no appetite, unconsciously found that he seemed to want to drink too. He drank a bottle of him.

Finally, before Zhang Fan exhausted his last little physical strength, the operation was over.

"We must pay attention to monitoring, increase antibiotics, and directly flush a large amount of hormones when necessary. I think he can break through. " Zhang Fan stretched out his sour hands and watched his assistant dressing the wounded. He turned to Professor Li Housen.

"OK, I see. You, you have a rest."

"Well, OK. Give me a hand. I can't seem to stand up. " Zhang Fan tried hard. As a result, his legs were weak and he couldn't stand up.

After the operation, the strongly held breath was finally completely released, but people can't resist it. Dizziness, weakness, nausea, and the most important thing is urine holding.

Zhang Fan wouldn't be so tired if he didn't use a microscope for routine surgery, but this is really the most dangerous time since he started his career. If he was careless, all his previous efforts would be wasted.

Bother, bother too much“ Come on, Dr. Zhang, I'll hold you and put your hand on my shoulder. Don't be embarrassed. I'm about the same age as your mother. " The new itinerant nurse looked at Zhang Fan for a long time and said.

"No, that big sister, aunt, my arm is sore."

"Oh, come on, aunt, help you." In a word, a shy word made the nurse burst into tears. It's still a child. It's too hard.

Three nurses helped Zhang Fan walk slowly in the operating room for a few steps“ Well, I'm much better now. I can go by myself. thank you! Thank you! "

"It's all right. I'll take you to the lounge next door. "

"No! Really not. "

"It's all right. You're welcome."

"Aunt, I pee!"

"Ha ha, OK, we'll take you there. Do you need me to help you? Ha ha, it's all in this business. What's the shame? I haven't seen it before!"

"Well! I can. I'll do it myself, I'll do it myself. " The more he said so, the more embarrassed Zhang Fan was. After all, it's better to do it yourself.

Millet porridge, chicken soup. In the nurse's lounge in the operating room, Zhang Fan didn't dare to eat more. His stomach was empty for too long. Although he was hungry, he didn't dare to eat more, otherwise he would hurt the mucosa of the digestive system.

After eating, lying on the bed in the nurse's lounge, with a light fragrance of women, Zhang Fan entered his dream.

The scorching sun in the morning rises slowly. With the light, many doctors are surrounded in front of the glass in the ICU ward.

"It seems to have succeeded."

"Yes. Although the body temperature has risen a little, it should be caused by surgical stress. "

"Awesome, really awesome."

"It seems that there will be a big change in allogeneic transplantation."

"Yes."

## Chapter 372

People's energy and physical strength have a limit. This time it's really a bother. Not to mention Zhang Fan, even LV Shuyan and Guli have slept for a long time.

Just when Zhang Fan and others were sleeping, the stone city hospital was very busy. The most excited is the wounded mother, although she can't go into the ICU to touch her children herself.

However, as long as he lies there and can recover, no matter ugly or beautiful, his requirements are not high, as long as the child can live. Looking at the children sleeping peacefully in the ward, my mother kept happy tears. Really, the tears at this time are sweet.

"Child, you should recover well and quickly. Mom's heart is broken. As long as you are healthy, mom and dad can work for decades." The wounded mother lying on the glass wall of ICU whispered softly. A gust of breeze blew through the long corridor, as if she had a little white silk.

If there is a new invention or new technology in other industries, it is estimated that many practitioners will continue to improve and master it. After all, new technologies and new inventions may represent fame and wealth or ideals.

But the medical industry is a little different. The invention and promotion of a new surgical method are very different. Engaged in the evaluation of Medical University in relevant departments, and then organize a small circle to learn and copy.

When the operation is mature, it will become an association immediately. At this time, when interests intersect, major equipment manufacturers and major pharmaceutical companies begin to invest and formulate corresponding rules. Then, with the size of the surgical effect, it will be spread out accordingly.

Cardiac access is a very obvious example. First, the upgrading of materials and equipment, and then the major medical enterprises organize human and material resources to tackle the difficulty of operation.

Then came the cardiology intervention Association, which spread all over the world. The advantage of

the intervention of pharmaceutical enterprises is that the surgical method can be popularized quickly, and the disadvantage is also obvious. Apart from others, even the hemostatic bandages used for interventional hemostasis can be sold. Not to mention all kinds of super devices derived from this technology.

The wounded mother was excited, and Professor Li Housen was also excited. After the operation, Professor Li Housen made a preliminary estimate and quickly contacted his experimental team to turn bird city into stone city.

If you want to spread in clinic, you can't do without Zhang Fan. Professor Li Housen's team did not know how many burn department Dana had contacted. After the area exceeded 20%, none of them could succeed.

This time, hope is at hand.

"Professor Li, when will the seminar be held?" Several senior nurses from the northwest burn department stood in front of the window and talked with Professor Li Housen.

"Don't worry first. After the firefighter recovers completely, he will start to prepare. I hope to give more advice at that time." Professor Li Housen said politely.

"Ha ha, I should. Well, let's go first and call if we need anything. "

"OK."

One after another, northwest Dana left stone city. Almost all of these people are the backbone of the burn department of major hospitals. It's unreasonable to leave the hospital for a long time.

They are big winners in their own hospitals, but they can't talk about it in the whole country. The more they go up, the more difficult the road is. The discipline leader in related fields is a very valuable name. If you want to go to a super hospital or become an expert with special allowance, the first condition is to be a leader in a certain field.

After sleeping in the dark for more than ten hours, Zhang Fan, who was sour all over, woke up hungry. Look, it's evening. Turn on your mobile phone and send a message to Shaohua to report peace.

After getting up, washing his face and cleaning up, Zhang Fan went out to the ICU and had a meal. He had to see the patient first, otherwise he was not at ease.

"Doctor Zhang, you're up. It's hard. It's really hard. I'll arrange meals for you. The canteen is on standby

24 hours these days. " The fat vice president has also suffered a lot these days, and the leadership is not easy.

"Thank you. I'll see the patient first." Zhang Fan said politely.

In ICU, the monitoring of the wounded has been taken over by Professor Li Housen's team. Professor Li Housen has gone to rest, and he can't stand it.

"Doctor Zhang, hard work!" Professor Li Housen's assistant greeted Zhang Fan with a smile. After the operation was successful, his most critical thesis passed, and the doctor was able to graduate.

"Hehe, it's all right. How's it going?" Zhang Fan smiled, nodded and asked.

"At present, the vital signs are stable and no rejection is found. Here is the medical record. Look at it. " Speaking, the assistant handed a very thick medical record to Zhang Fan, which was as thick as a dictionary.

The general medical records will not be so thick, because the northwest Dana has come. The ward round records of these bosses need to be written, and the laboratory returns once every few hours need to be analyzed. The doctor who really takes care of the bed and writes the medical record is estimated to be crying in the office.

Zhang Fan changed his clothes with the medical record, put on his mask and hat, and entered the ICU, "how about it? How do you feel? " The wounded man was awake, flashing his eyes and looking at Zhang Fan,

Because of tracheotomy, he could not speak for the time being. When he heard Zhang Fan's question, the little nurse next to him quickly said to the wounded, "this is your chief surgeon."

The wounded man nodded to Zhang Fan, slowly raised his arm and raised his big finger.

"That's good. Rest assured and recover." Out of the ICU, Zhang Fan walks to the hotel. When I wake up, I can't let others deliver the meal to the bedside. I'm too sorry.

The fat vice president is in charge of ICU and the president is in charge of the hotel. Smelling the fragrance, Zhang Fan walks into the hotel canteen.

"Hey! Have you two rested? " It turned out to be LV Shuyan and Guli. They sat together waiting for dinner. It is estimated that they have just got up.

"Ha ha, balangzi, come on, come on." The director of Dermatology saw Zhang Fan with a smile. Fat aunt liked Zhang Fan very much. When Zhang Fan transferred to the dermatology department, she wanted to leave Zhang Fan in the dermatology department. However, Zhang Fan didn't want to.

"How about the ordered lamb chops and pilaf? Do you like it? I don't like other food. " Gulee was busy greeting Zhang Fan. He really regarded Zhang Fan as his own child.

"Yes, sir. How was your rest? "

"Ah! I'm old. I still feel dizzy and dizzy. I can't slow down without three or four days. "

"No, I'm also dizzy. The director is so young and beautiful. How can he say that he is old. " Zhang Fan sat down with a smile.

"Ha ha, you will make me happy."

"Dr. Lu, where are we going next? I've been here for a long time. "

"I don't know. In fact, it's not bad here. Although it's a little smaller, it's also a city at least. "

"Hi! You are the leader. Why don't you know? " Zhang Fan deliberately made a funny remark.

"Find a fight!"

Mutton and rice. The cook also specially cooked several cold dishes. The three of them began to eat. LV Shuyan, who had already quit meat, grabbed the sheep ribs and chewed his mouth full of oil.

I'm very hungry. What manners and etiquette have long been thrown into the country of wow. Many surgeons have a bad stomach. In fact, they are hungry and full.

"Zhang Fan, you've shown your face this time. You haven't seen our dean. Your big teeth are leaking." After eating for a while, she stopped hungry, gulinaza said.

"Hehe, she's just like that. She's happy. She's a kind old lady. When she's angry, she's a beast directly." Zhang Fan didn't eat enough. After swallowing a large piece of meat, he said.

"Isn't our dean very kind! Be careful, I'll make a small report. " LV Shuyan was a little surprised and threatened Zhang Fan.

"Believe it or not, I'll kill you!"

"Hehe. Young is good! " Director gulee looked at two young people who were almost two rounds younger than her with great emotion.

Eat and drink, go back to the hotel room, and Zhang Fan goes to sleep. Zhang Fan's point is very good. It was the same before there was no system. Sleep is particularly good. Insomnia? Never before, fall asleep anytime and anywhere, a natural surgical germ.

Morning rounds“ Yes, look, the skin at the junction began to blend with each other slowly. It's really good and successful! " Professor Li Housen's hands began to tremble slightly.

It really did. There was no rejection.

"Thank you, thank you, doctor, thank you." The wounded mother looked at the doctors and smiled. She knew that her child was recovering well.

"Thank you. I salute you on behalf of all our armed police fire fighters." The leader of the Armed Police Corps gave a very formal salute, bluffing Zhang Fan. They straightened up quickly. It's too solemn for you to ignore.

"Doctor Zhang, can we have a few words alone?" After finishing the ceremony, the leader of the Armed Police Corps said a word directly to Zhang Fan.

"OK." Under the leadership of the president of stone city, Zhang Fan and them came to a small conference room.

"Please, I'll prepare some tea for you." With that, the Dean left.

"Doctor Zhang, thanks to you this time, otherwise our soldiers will become martyrs." The leader of the Corps said with great emotion.

"Yes, we should."

"I heard that Dr. Zhang is from LAN city? If you are interested in joining the army, don't worry about being an armed police soldier. As soon as you enter the army, you are a cadre. Now the treatment of the army is getting better and better. Houses and cars are equipped directly. Moreover, why don't the man take Wu Gou? It's a pity that he hasn't been a soldier. " The leader of the Corps is like a wolf grandmother.

"Well! I ~ ~ "

"Don't be in a hurry to refuse. Go back and think about it slowly. This is a good opportunity. Although the hospital of niaoshi Armed Police Corps is small, it is a little bigger than tea vegetable hospital.

Also, I came with orders from my superiors. You have credit. Come on, we can put forward conditions within our ability. "

"Well!" It's too general. Zhang fan can't speak directly.

"Hehe, for example, the children at home want to be soldiers, look for jobs and so on." The leader of the Corps turned his eyes cunningly.

"Thank you. Thank you, leaders. This is what we should do. There's no need to do this."

"Yes, you're not married yet, ha ha. Brothers and sisters are OK. Don't you have a sister? The current employment situation is too severe. Graduating from college may not be able to find a good job. I can let your sister join the army. How about it? "

"Well! No, thank you. " Zhang Fan's cold sweat came down.

"Ha ha, it's not like this. I heard you have a car. I'll just give you an armed police license plate. It'll be more convenient in the future."

"This!" Zhang Fan is tongue tied and really speechless. In front of him is a piece of paper, a transparent paper.

"OK, that's it."

When Zhang Fan left the meeting room, the leader of the Corps began to call: "I don't see it. Our hospital is not attractive and people don't want to come. I'd rather have a license plate than join the army. "

"I see, ~ ~ ~."

"Dr. Zhang, what's the matter? Haven't you slowed down yet? " Professor Li Housen is directly waiting for Zhang Fan at the door of the conference room. If Zhang Fan doesn't come out, he'll go in. He's old and refined.

"Oh, Professor Li, I'm a little tired. What's the matter?"

"Nothing. Let's talk."

"Good!"

Lao Li directly took Zhang Fan to the coffee shop next to the restaurant“ Dr. Zhang, the operation is exquisite. I have never heard of such a technique. You are a leader in the operation of the burn department! "

"Ha ha, it's ridiculous."

"No, absolutely not. That's what I really think. Has Dr. Zhang thought about continuing research in this area? There is a biggest disadvantage of anti rejection allogeneic transplantation. Do you see it, Dr. Zhang? "

"Cycle too long?" Zhang Fan frowned and thought a little, and said not sure.

"Yes, the time period is too long. The material culture of allogeneic transplantation takes at least three days, which is still three days required by the laboratory. Not all the wounded can be so fearless.

It will take a long time to popularize, but the future is bright. Come on, let's study it together. As my assistant, let's break through this barrier together. "

"What can I do? Do genetic research? "

"Genetic research is left to us. You just cooperate with me to simplify the operation or train relevant personnel."

"Oh! That's right. "

"How's it going?" Professor Li Housen looked eagerly at Zhang Fan.

"I'll think about it and think about how to call you back." Zhang Fan doesn't want to refuse face to face. Professor Li's expression is too pitiful. He can't say it.

"Ah! Is that all right. To the capital, to the big hospital, although the establishment can not be solved, but ~ ~ "said, Professor Li couldn't say it.

"Why don't you come and study for my doctor. Everything is easy to say. "

With the system of Zhang Fan, absolutely do not want to be bound in the burn.

"Zhang Fan! Where are you? " At this time, Zhang Fan's phone rang.

"Dean, Professor Li and I are in the cafe next to the hotel. Shall I come? "

"Oh! No, wait a minute. I'm coming. " Then he hung up the phone, "let's go to the coffee shop next to the hotel." Ouyang said to the driver, and then thought deeply.

"Dean!" Ouyang came. Professor Li got up with Zhang Fan and was polite, that is, polite.

"We're leaving. Directors can't leave the hospital for a long time. Tomorrow and the day after tomorrow, when the wounded have passed the dangerous period, you will come back as soon as possible. You don't have to go to the countryside. Director Zhao of bird market can't wait. " Ouyang didn't mind Professor Li's attitude at all, because the old lady had prepared a big knife.

"Good president, in fact, the wounded have almost passed the dangerous period. The second stage operation is still early. I can go back to the hospital now."

"How stupid~ Alas, "Professor Li can hardly sit still.

Ouyang's proud smile came out, "well, it's OK. You can clean it up."

"OK." Zhang Fan got up, nodded to Professor Li, turned and left.

"Ah! You ~ "

"Come on, Professor Li, let's talk." Ouyang interrupted Professor Li.

### **Chapter 373**

"Zhang Fan has a great talent and attainments in surgery. I have been to many hospitals from south to North for most of my life. However, there is no talented doctor like Zhang Fan." The old lady took Professor Li to sit down and directly started the Wang Po mode.

"Yes, it's really great." Professor Li Housen was absent-minded and perfunctory to Ouyang.

"Your experiment is estimated to have made a big breakthrough now? It's still the professors in the capital. This experiment costs a lot. " The old lady squinted and smiled. If Zhang Fan was here, he would know that Ouyang began to set a trap.

"What?" Professor Li raised his head warily and looked at Ouyang.

"If you delay one day, you'll spend another day. Maybe other professors and experts are about to break through, aren't they?"

"What do you mean?" Professor Li Housen didn't pay attention to the dean of a marginal area, but when he heard this, he fell in love. Not to mention abroad, many of his division brothers independently pulled teams to study this project.

"What a long dream." Ouyang said something meaningful.

"Yes! What do you want to do? " Professor Li's hair exploded. The old lady was mysterious. What did she want to do.

"In fact, your current experiment is just some final stage, leaving only the clinic, right? Maybe you can impress Zhang Fan and let him go to the capital with you. However, I can assure you that you will never

take Zhang Fan away in a short time. " Ouyang Liang the sword, and there was a sound of steel in his voice.

The old lady's grasp of human nature is too strong. She points to the key. Let alone a little longer in a short time, it's all troublesome.

This induction technology is a new technology, but there is no way to patent this kind of thing. Gene induction can be copied in a short time as long as others know the results. It's no big deal to change a similar inducer or another name. Now it depends on who enters the clinic first and who makes the rules first. Once the rules are formed, the latecomers have to follow them.

"What do you mean?" Professor Li Housen's face turned blue.

"Put the follow-up experiment in our hospital." Ouyang Liang Dao!

"Impossible!" Professor Li Housen refused directly.

"Don't worry, our hospital will not be involved in your achievement. We don't have high requirements, that is, to establish a key department and then form a master's research point. Although we are a third class hospital, we don't even have a master's research point at present. "

"Yes!" Professor Li Housen weighed the pros and cons in his mind.

"Moreover, do you think Zhang Fan is only outstanding in burn surgery?" Ouyang's tone is getting harder and harder. She knows that some things can't be asked for and can only rely on strength.

"Ha ha!" He sneered and put away his smile. "His general surgery, orthopedics and even extrathoracic surgery are quite powerful. Professor Zhao of niaoshi hepatobiliary surgery has prepared to set up an experimental group in our hospital. Moreover, Zhang Fan is a disciple of Professor Lu Qingniao. It's estimated that it won't be long, ha ha ~ ~ Ouyang stopped talking and got up to leave.

"1, 2. " The old lady was a thief. Before she could count to three, she was stopped by Professor Li Housen and had the wrong initiative.

"Can I implement what you said?" Li Housen doesn't care about Professor Zhao, but he has to pay attention to old Lu. Compared with old Lu, he is not a level.

"Yes, I don't have much time. The team is ready to start." Ouyang said solemnly.

Professor Li Housen didn't speak. He just looked at Ouyang. He was sweating. It was too difficult. He knew that if he went out today and wanted to contact Zhang Fan again, the cost would not be so simple.

Maybe the old lady will contact her brothers when she goes out“ Hey! How can such a person jump out!  
" Professor Li's heart is breaking. Ouyang is so playful.

Soon, it was confirmed. Professor Li frowned, really tangled. The influence of capital hospitals and universities is more than a hundred times that of hospitals in small border areas.

"Don't worry. We have just built two large buildings here. I can leave you one floor at your disposal. Besides, where do you find such a good surgeon.

We have places and talents. You just study in another place. When the results come out, maybe the border government will thank you, and then you pat your ass and leave. We will never entangle. " The old lady began to analyze Professor Li in warm words.

hard! It's really difficult. It's really difficult for a small place to develop a key discipline. Ouyang will never let go of this opportunity, otherwise she thinks she is a sinner, which may be the so-called feelings of their generation.

"Can you guarantee that Zhang Fan will not leave or go to Qingniao?"

"Your research has not been completed. According to his character, you will never leave. I absolutely promise you. " Ouyang doesn't promise. She's not sure, but she doesn't change her face and speaks with certainty.

"Good! You can ask Zhang Fan to tell me in person or call me. I'll wait for you all day. If one day passes, I'll think of other ways. " Professor Li Housen also said categorically.

"A gentleman's word is a whip!"

"A gentleman's word is irretrievable!" They got up and shook hands.

Return, not all the medical team returned. Ouyang just took Zhang Fan away, and others have to continue. Looking at the distant motorcade, especially LV Shuyan and Baoyin envy Zhang Fan. However, they still have to complete the tasks assigned by their superiors.

On the way back, Ouyang sat on Zhang Fan's co pilot. The license plate has been changed. The scarlet letter license plate suddenly makes Zhang Fan's cool Luze much taller. It is estimated that it is a psychological factor.

Ouyang is sitting in the co pilot. Zhang Fan is a little unnatural. The old lady's deterrent is too strong.

"How about Zhang Fan? Have you thought about it in the future?" The old lady didn't talk nonsense and looked at Zhang Fan.

"Well! Work hard, work hard. " Zhang Fan said nervously. The old lady has the handle. It's up to Zhang Fan not to be nervous.

"Hehe, don't fool me. I know that the water of tea vegetable is too shallow to support you sooner or later. There's no one else today, just the two of us. Let's have a good chat. " Ouyang said very gently.

"Dean, I'll listen to you. Follow your instructions. " Zhang Fan's hair stood up. He knew the old lady too well. Can this be a good man!

"To tell you the truth, you can't be a thief. You can't keep your hands. You can sneak into the cave and private hospitals. You can also seek benefits for your relatives and relatives.

Tell me you're dishonest. You're really good at it. In addition to a private hospital, it's really not too much to walk around the county and township at ordinary times. Work hard, bear hardships, and people also have emotional intelligence. There is no one in the hospital who doesn't say hello. " Ouyang said with a smile.

"Dean, you agree to go to the acupoint. Private hospital, you know, I am ~ ~"

"Yes, I agree. However, you have to ask which one I agreed with before. Yes, you said? "

"No!" This is a fact. Other doctors came to the cave secretly. Only Zhang Fan's loud voice was authorized by Ouyang.

"I've solved the problem of your private hospital. Professor Zhao of niaoshi has gone to run a relationship. In the future, your small hospital will become a teaching point of the medical department of Dihua University! My intentions are well intentioned, do you understand? "

"Really? Dean, really? " Zhang Fan couldn't help jumping up if he didn't drive and Ouyang was too dignified.

"Well! What about? How do I treat you? " Ouyang asked with his mouth tilted.

"Good! The dean is very kind to me. "

"Is it a very good one?"

"Well! It's really good, not even good! "

"Ha ha. I beg you if you can do something. Don't worry. It's a small thing. You can do it at will. "

"Dean, look at what you said. You can give orders directly." Zhang Fan is a little forgetful. The boy is still too young.

"Just give orders. In fact, I am also an outsider. My ancestral home is Jiangnan. In fact, I am also a weak woman in Jiangnan Water Town! When I graduated from college and came here, what conditions were there at that time? Let alone the current building, there was not even a house without air leakage.

There is no house. We build it ourselves. Although there are five or six old Directors now, they were all born as small workers in those years, ha ha. "

Zhang Fan listened silently and listened to the old lady's memories. Believe you, a ghost, weak woman! You think so much of this word.

"Step by step, these decades are really not easy. It's not easy to make some achievements, but now the country has begun to vigorously develop national medicine and national medicine. All kinds of resources that originally favored us have begun to favor traditional Chinese medicine hospitals. You see, their new buildings are not much smaller than our new buildings. " Eurasia is a little angry. According to her opinion, the traditional Chinese medicine hospital should be merged by the municipal hospital.

Zhang Fan sweated as he listened. "This old lady is cruel!"

"If the policy does not support it, do we have to stop?"

"No!" Zhang Fan hurriedly said something.

"Yes, we can't. We have to show it to our superiors. We are still the leader in tea vegetable medicine." The voice like steel, this is the so-called water town weak woman! A man with a little flesh can't say such a strong word.

"Yes, we are the leader." Zhang Fan nodded very approvingly.

"Now the opportunity comes. As long as we catch it, we can have a qualitative leap. "

"What opportunity?" Zhang Fan wondered.

"One year, help me one year, seize Professor Li in the capital and Professor Zhao in the bird market, and set up our own key departments. At that time, there will be a troika of orthopedics, hepatobiliary and burn in surgery, and cardiology, respiration and endocrinology in internal medicine. The hospital is a qualitative flight directly. How about fighting?

Besides, there are few opportunities for wild geese to leave a voice, people to leave a name, and people to live in the world. You will definitely contribute to the success of the tea vegetable hospital in the future, and it's worth your visit to the frontier. "

"Well!" Zhang Fan couldn't react.

"Why, you don't want to." Ouyang's tiger teeth are leaking out. The real dog face is in law.

"OK. I promise you, Dean. How should they talk with Professor Zhao and Professor Li?" Zhang Fan doesn't hesitate at all. He has a plan, which is just in line with Ouyang's timeline.

"You don't have to worry about this. Oh, they can't run away." Ouyang was proud, lowered his seat, half lying on the co pilot, slightly closed his eyes, gently patted his thigh with his right hand, beat the time, and slowly hummed in his mouth:

"Drink the celebration wine today

Vow without pay.

In the future

Write the spring and autumn with warm blood. "

An old lady should have hummed such a man's song at a very kind age. It's really strange and extraordinary.

But if you want something, you can't find any benefits in Ouyang's hands. Professor Zhao Jingjin of niaoshi is an example. He has stubbornly signed many unequal agreements. There's no way. Ouyang has nuclear weapons and has to compromise.

The emergency center and pediatric center of the municipal hospital have been repaired. The country is rich, really rich, two buildings with more than ten floors. If you rely on these two departments alone, Ouyang is dissatisfied with them.

Just in time, sleepy meets a pillow and comes to what you think. As long as the two key departments are established, the promotion of a large number of young doctors will be driven. At that time, the tea vegetable city hospital will be a key hospital radiating a region or even a province. Ouyang is proud, really proud. The peak of life is coming. Life is really lonely like snow!

And Zhang Fan is also happy. Now my English is not up to standard, and many things are not mature. Now Ouyang has solved his worries.

House prices have risen. The price of Zhang Fan's house in the frontier and the house his parents bought in Lanshi county has risen a lot. If you really want to go out in the future, it will cost a lot of money to take your lover and parents.

Now, you can have a lot of income without going astray. Of course Zhang Fan is happy. A teaching unit recognized by the provincial capital medical college is really valuable when measured by money. This

brand is still a little useful, both officially and among the people.

This can be regarded as a gentleman's doing something and not doing something, or a gentleman loves money and takes it in a right way. The motorcade is galloping on the deserted Gobi. The stone city is getting farther and farther, and the tea vegetable city is getting closer and closer.

### **Chapter 374**

When I came, I had a long way to go. I felt as if I could never reach my destination. But when I returned, I didn't feel so far away.

Through the grass, through the forest and around the snow mountain. The weather is getting hotter and hotter, and the snow line is getting higher and higher, just like the hairline of a middle-aged man. The snow and hair on the mountain are not much different. No matter how much this thing is, it still works as long as it exists.

The northwest, especially near the Gobi and desert, has a bad climate. It's terrible to have less precipitation in four seasons, less rain and snow, and strong wind. The so-called red two groups on the faces of men and women are caused by the knife like wind.

It's only tea. It's a good weather. Super Snow Mountain brand air conditioner regulates the surrounding climate at any time. The south of the Great Wall is not white. There is not much industry, the sky is blue, the hillside is green, and the water and grass are lush.

Ouyang bi was old. After several hours of long-distance running, the old lady began to doze off. Her head was drooping and her hair was slightly white. From time to time, her head went up and down with her breath. At this time Ouyang was really an old lady.

Originally, Zhang Fan thought it would take three months to come back. As a result, he ended his trip to the countryside in less than a month. Zhang Fan didn't tell Shaohua that he wanted to give the girl a little surprise.

When Zhang Fan left, the president of stone city said that he had given Zhang Fan a piece of jade, the size of an egg, carved from white jade.

At that time, the dean of stone city said politely: "Dr. Zhang is my life-saving benefactor. If it weren't for you, I would be the dean. Don't say anything. It's just a stone. You can play with it. Don't dislike it. You

must contact me when you come to stone city in the future. Although my medical technology is not very good, I am proficient in everything. "

If there had been no medical team in tea vegetable city and no Zhang Fan, it would have been enough for him to drink a pot of these two medical events. People's lives are at stake in this business. If it's really not guaranteed, people will have to use it in the future.

When Zhang Fan heard that they went to dig stones in the Gobi desert, he paid attention. When Zhang Fan was leaving, he found an opportunity to give the jade to Zhang Fan. It was also a friendship. There are many people, pushing and shoving is not good-looking. They directly handed it over to Zhang Fan and left.

After more than ten hours, he finally rushed back to tea vegetable city. The motorcade assembled to the hospital, and the elderly doctors became sticks. He hobbled out of the car.

"Dean, I'll take you home directly." At the hospital, Zhang Fan said to Ouyang.

"No, alas, I've been sitting for too long. I want to walk. Go home and have a rest. I want to walk back."

Other directors don't need Zhang Fan to send them. After looking at the time, it was only more than 10 o'clock. Zhang Fan went home after leaving the hospital. Shaohua didn't want to read at home. He lay down in front of his desk and watched her take a photo with Zhang Fan. He giggled from time to time. He didn't know what he remembered. This picture was taken in Burqin last year.

In the living room, although the TV is on, the old man and the old lady sit at both ends of the sofa and keep dozing off, just like a domestic cat in winter.

People are old and sleepy, and they can't sleep early“ Old man, I seem to hear footsteps in the corridor. Go and have a look. It seems to be Zhang Fan. "

"Well! You sleep upside down. Before you finish talking about ~ ~ "this big night, you hear the sound of the key opening the door. Except Zhang Fan, everyone in the family is at home. Zhang Fan must have come back.

"Huazi, Zhang Fan is back." After the old lady shouted, she hurriedly stood up and walked to the hall.

"Aunt, I haven't rested yet." Zhang Fan came in with a smile.

"Oh, I'm back at last. I didn't eat. I'll get you something to eat. I'll catch up all the way. "

"Hehe! Give me something. You quickly change your shoes, drive all day, wear slippers and put your feet on. " The old man came over happily.

"Oh, my God, little stone. Are you on vacation? Ha ha, don't say hello to me. " Speaking, he couldn't care about his parents. Shaohua jumped directly into Zhang Fan's arms.

"Well, cough! ~"

"Cough what, hurry to peel some garlic." The old lady directly took the old man away.

"Why don't young people know how to be shy? Tell me about this! " The old man muttered to the old lady.

"You sit and rest and peel some garlic." The old lady didn't say anything more and pulled the kitchen door directly. For daughters, mothers and fathers, the way of love is different.

"Hehe, I want to surprise you." Zhang Fan holds Shaohua in his arms.

"Hey, hey, little stone will surprise me when he becomes enlightened. Miss me. "

"Think about it!"

"What do you think?"

"Think everywhere!" They were a little bored and dispersed after a while. After all, their parents were at home. Shaohua felt shy at this time and followed Zhang Fan around like a red faced dog.

"I'll pour you hot water. I almost smell sour. Wash your face and hands casually first, and then take a bath after dinner. The beard has grown and the hair needs to be cut. I've lost weight. It's only been a few days. Look, your cheekbones are coming out. "

Zhang Fan quietly listens to Shaohua's rambling words around him. The fatigue on the way seemed to disappear slowly with Shaohua's warm words.

"Come on, come on, you didn't say it in advance, or your aunt will make you a fish. There will be some vegetables and meat at home. They will eat a little, and they won't turn on the stove at home." After a while, Shaohua's mother fried several dishes.

On the way here, Zhang Fan didn't eat much. Ouyang had a big temper, many problems and a little cleanliness. Looking at the greasy table in the roadside restaurant, she couldn't eat. She didn't eat and others were embarrassed to eat. She bought some Nang cakes and milk and went on her way.

"Eat quickly. Let's take a few days off this time." The old man stood at the table, too.

"No, it's over. There's something for me to do here in the hospital. My mission to the countryside is over."

"Yes! Great. " Shaohua is happy. Zhang Fan is not here during this period. She is like a fish with cramps. It's salty!

"That's good, that's good. Look, it's less than a month. I'm thin. Eat quickly. If it's not enough, I'll get you some bacon. "

"That's enough, aunt, that's enough." Zhang Fan said as he took the package from the car. "Last time I came in a hurry, I didn't take the things sent by people in the countryside. This time I brought it back."

"This is the original liquor. The old manager of Red Star Farm gave it to me." Zhang Fan took out two bottles of wine without trademark, which were still dark green with thick bottom.

"This is a good thing, real food and wine. I haven't seen it for many years. Look, look, there's a little mud on the edge of this bottle. It's a real cellar. " The old man couldn't help sucking away.

"Don't be ashamed. Your saliva is coming down!" The old lady said an old man angrily.

"Ha ha!" The old man smiled awkwardly.

"Auntie, this is the handmade cashmere sweater that someone gave me when I was in the pasture. It said it was very warm. Your shoulder is not good. It's just right. Try it. Whether it's warm or not."

"Ouch, the color is so pure white that I can't wear it out!" The old lady whirled the cashmere clothes in her hand and said with a little embarrassment.

"Where, your skin is white. It's just right." Zhang Fan praised it.

"Yes, Zhang Fan is right. Mom, go and have a try!" It sounds handmade. In fact, it's not very tall. It's just good material, real pure cashmere.

"This is for you. See if you like it." Then, Zhang Fan took out the dog. Zhang Fan doesn't understand, neither does Shao Hua. Jade can't play without some cultural self-restraint. Although they are both undergraduate students, they are still much worse for traditional culture.

"It's cute. Is this a pig? Dragon? " Shao Hua couldn't recognize it.

"Well, the lion!" Zhang Fan said casually.

"Hi! What? This is a dog. Or college students, I don't know. Come and show me. " The old man can't

listen anymore.

I took the jade and played with it. "It's good, very moist, and the carving is also good. Our family used to be a big family. I remember when I was young, my grandmother gave me a bigger one. Which material is it ~ ~" the old man entered the chat mode.

The old lady is busy cleaning up the kitchen. Shaohua stares at Zhang Fan. Only Zhang Fan should talk to her from time to time. Hey! The old man is really lonely and tight.

"Are you full?"

"After eating, aunt, I finally had a delicious meal!" Zhang Fan deliberately exaggerated patted his belly. In fact, the old man is like this. Boasting is better than any gold, silver and jewelry.

"I love cooking for you. Tomorrow, my aunt will go to the morning market to buy you some fish and chicken. You can make it up and see if you're hungry."

"Come on, have some tea first. Just after dinner, don't take a bath. It's bad for your health. I heard that many doctors in your hospital went to stone city. What's going on? " The old man is well-informed. There are many nurse families and doctor families in the yard.

Sleeping on the small bed in the study, Zhang Fan had a sweet dream. I'm also tired. After taking a bath, I lie in a clean and soft bed, smell the smell of the sun, and enter my dream. It's really comfortable.

The next day, Zhang Fan got out of bed. Because it was a weekend and there was no bed patient, Zhang Fan slept directly for a day and the sun rose. The two old people at home went to the morning market early.

Listening to the noise in Zhang Fan's room, Shaohua quietly opened the door and looked in through the crack of the door. When he saw that Zhang Fan had opened his eyes, he came in happily, "the sun is drying his ass. Hungry, I'll get you hot milk. Get up and wash. " Speaking, Shaohua wants to go out.

As a result, Zhang Fan was pulled to bed at once " I hate it. It stinks. I haven't brushed my teeth. Don't kiss me. Ha ha, ha ha, don't scratch. "

Zhang Fan arched like an unborn pig, "don't hate it. My relatives are coming."

"Ah, oh!" Zhang Fan was stunned and understood. Look at the tent.

"Do you really want it?"

"Yes!"

"Special?"

"I spanked you!"

"Hehe! What should I do? "

"You do!"

"No!"

"Please!"

"Why is it so hot! How ugly! Hey, hey, I'll pull. "

"Ah! Ancestors, slow down! " Zhang Fan's face was blue with pain. Shaohua was so curious that he pinched the eggs in the bag!

### **Chapter 375**

After dinner, Shaohua dragged Zhang Fan to have his hair cut. Without Shao Hua and Zhang Fan, absolutely, just find a service station opened by an old man and push it directly. It's simple and convenient. But with Shaohua, we have to accept the arrangement. The reckless youth is far away.

On the bright spring day, two people strolled around the city hand in hand. People, whether they have a system or not, should combine work and rest. During this time, I went to the countryside, away from the city and away from the crowd.

Suddenly into the city, into the bustling crowd, Zhang Fan seems a little uncomfortable“ How lively! " Zhang Fan stood on the street looking at the crowd and whispered to Shaohua.

"Hehe, you shouldn't work too hard even if you come out for a stroll. Today, KFC opened its business in tea vegetarians! " Shaohua flashed his big eyes and looked at Zhang Fan.

The meaning is very obvious. Zhang Fan immediately said, "go, go now, and go quickly, otherwise there will be no place."

"Hey, my little stone is as loud as a bell!" Shaohua couldn't help grinning proudly.

"No, you don't look. Whose boyfriend am I!" Speaking, Zhang Fan vaguely seemed to feel a pain somewhere.

Originally, there was a dexter in the tea vegetable city. Shao Hua and Zhang Fan seldom ate it. Girls don't like this high-energy food, but KFC is too famous.

In the past, Shaohua wanted to eat when he was in college. Now he has money at work, but it seems that the sense of expectation is getting weaker and weaker. Today, Shaohua would never come out to join the excitement if Zhang Fan didn't come back.

Zhang Fan lined up, Shao Hua found a seat, and a large foreign fast food was crowded in full swing. Most of them are parents with children, but there are also many young couples. Small places are like this. They can't compare with big cities, and there are too few choices.

Zhang Fan once ate this thing. When he was in college, his dormitory friends took a first-class scholarship and invited them to KFC for a meal. At that time, Zhang Fan had the impression that the word "expensive"!

People crowded people and pushed people. Tea vegetables haven't met such a hot scene for a long time. Finally, Zhang Fan managed to get out of the army and came out with a plate.

"It's not very delicious."

"Well, yes." Zhang Fan was picked up by Shaohua's mother and is now picky. After dinner, Zhang Fan took Shaohua to the hand and foot hospital.

Batu, Chen Qifa and Li Liang learned that Zhang Fan had returned. Those who had rested were waiting for Zhang Fan in the hospital. The development of hand and foot hospitals is getting worse and worse. Almost all hand and foot injuries in surrounding counties and towns have been monopolized by hand and foot hospitals.

"Hey! It's dark again. Sister-in-law, you see, my brother is black again. " After seeing Zhang Fan, Li Liang happily hugged Zhang Fan and said funny.

"He is not white!"

Sitting in the dean's office, several people began to report. Batu will start with the recent development of the hospital and report the problems one by one. Zhang Fan has a headache.

The Social Security Bureau, the Health Bureau, the food and drug Bureau and the environmental health bureau are all things. Batu has clearly reported the new regulations and requirements of various units to Zhang Fan, and the relevant responses made by the hospital have also begun to be reported.

"Master, there are too many patients recently. Our doctors are too busy. Most of them are emergency patients. And because the construction site starts, once injured, the situation is still very serious. The operation is done overnight. Sometimes, three or four operations a night, and doctors who have a normal rest are pulled to the operation. "

"OK, I'll find a way." Zhang Fan nodded.

"Oh, and last time we gave it to a black man." Lao Chen seemed to think it was inappropriate and quickly changed his words. "After surgery for African athletes, he can now play normally. The effect is very good. The bird market basketball team wants us to send someone over, you see?"

"This is not good. There is no one. Besides, their athletes are all fatigue injuries. There is no need to send someone for elective surgery. Hey! It's still too small. "

"Brother!"

"Call the dean or director. This is a working meeting." Lao Chen cleaned up his little apprentice. Li Liang stretched out his tongue and then said, "director, let's buy an ambulance. When we are too busy, we only have one car. Sometimes when we go to the township, we can't help it. Many injured people don't pull taxis directly."

"OK, you can discuss the details and just tell me." The meeting lasted more than an hour and was finally over.

"Brother, I'll invite you to dinner today and give you a welcome."

"Hehe, why, have you paid a bonus recently!" Zhang Fan smiled.

"Look what you said, even if I borrow money, I have to wash your dust. We pay attention to people, don't we? "

"Ha ha!" Batu and Lao Chen smiled " This boy! "

The hospital is developing rapidly. Although it is tired, the doctor's income is rising slowly. It's much better than what they did in the county hospital, such as withholding, searching, bonus and drug rebate.

"OK, it's your treat and I'll pay. In the evening, everyone goes. Director Ba, take your sister-in-law, director Chen, take your sister-in-law, and let's have a happy meal. "

"OK." Batu smiled and said that in a few months, Batu looked better and better. He changed his decadent and sick condition that day.

"Well! I am a poor man! " Li Liang has been hit. He is single. His relationship with Wang Yanan has never broken through.

I don't know what's going on, but Li Liang was very depressed for some time, but this thing was very resilient. After a few days, he continued to ask Wang Yanan about nothing.

"Let Shaohua introduce you to so many young girls in the bank." Chen Qifa said, hating that iron is not steel.

"Well, shall I take you around that day? You set a goal first? " Shaohua deliberately smiled and said that she knew more about Li Liang and Wang Yanan than Zhang Fan, but Zhang Fan didn't like gossip, so she didn't say much.

"Forget it, forget it! I'd better be alone first. Brother, can I apply to bring someone? "

"It's not our hospital. Is it convenient for you to call?" Lao Chen immediately objected. He knew who Li Liang wanted to call. No matter how good the relationship was, he was just a peer at most. Batu smiled and said nothing.

"Well!" Li Liang is a little embarrassed, and he doesn't think it's appropriate. After all, it's not a circle, and this meal is also a meal for his own unit. It's really a little inappropriate to call his colleagues who don't matter.

"Let's go tomorrow. Today, director Ba and director Chen are leaders. They are too old-fashioned and have too many eating rules. Tomorrow, we young people will open a table without them. After dinner, go to KTV to sing. " Zhang Fan was stunned, and Shaohua followed Lao Chen's words.

"Yes! I haven't sung for a long time. Hey, it's better to be in the county. " Li Liang said through the steps.

"Hi! This KTV can't be said again. Last time, ~ ~ "several people chatted.

"Oh! Zhu Bing, do you know him? " Batu asked after listening to Zhang Fan about Zhu Bing and Xiaolu.

"Yes, it's an acquaintance. What's the matter? "

"He is now the head of the police. This line has many connections. It may be useful in the future. " Batu said a word to Zhang Fan.

"What's the use, our doctor, he's a policeman." Lao Chen doesn't understand. Batu smiled and didn't talk any more. This guy got a deep truth and left three points.

In the hotel, in the big box, Zhang Fan paid for a banquet for the doctors and their families who didn't go to work today. These are the partners who insisted from the difficulties and hardships at the beginning. Many people walked away in the difficult times at the beginning.

No one gives Zhang Fan wine. Zhang Fan has too much prestige in the hand and foot hospital, and Batu and old Chen Youming deliberately hold Zhang Fan secretly.

Unit dinner, although there are family members, in fact, the routine is the same. Eat well and drink well. We promise to strive to build the hand and foot hospital into another style of tea vegetarian medicine.

Because Xiaolu was pregnant, he went back under the protection of Zhu Bing after eating for a while, "remember to come to my wedding!"

"OK, don't worry. You can't forget it." Zhang Fan and Shao Hua specially sent them to the door.

"They are so happy. You didn't see the smile of the path. It's so warm. Didn't you say we would get married when you came back from the countryside? " Speaking, Shaohua changed his face.

"Well, I'll call my parents tomorrow to have tea."

"Silly stone, tease you. When the house is ventilated again, my uncles and aunts come and let them live in the old house or hotel, I will be sorry."

"Well, good." Zhang Fan nodded.

Young people, there are not many recreational activities for young people in small cities, and they will go to work tomorrow. Even after dinner, no one will go to KTV.

"Do you think Wang Yanan and Li Liang will be successful?" Walking on the riverside road in the evening, they snuggled together.

"I don't know. I don't know." Zhang Fan is not good at this. He is not used to gossip.

"Do you still hurt?"

"Well! I forgot if you didn't say it! You can't work hard in the future. " When Zhang Fan thought about it, the green tendons on his neck were about to burst out. Man, where is too fragile and rich in too many nerves? If he was slightly injured, it would be like electricity. It hurts all over his body!

## **Chapter 376**

To say who misses Zhang Fan most in tea vegetable City, the first is definitely Shao Hua, and the second is Xue Fei. When Zhang Fan was there, he was lying down to get the money. He didn't have to worry about surgery. He just waited for the money at the end of the month.

But after Zhang Fan left, he was the boss of the group. Lao Gao never wanted the group's money. Of course, he didn't care about the group's work.

Wang Yanan just got his license and was still a girl, that is, he was left, but the two graduate students in the Department were probably stimulated by Zhang Fan, one by one.

In addition to the regular outpatient service, other emergency patients have been confiscated. At the end of the month, he paid a bonus, but his wife tore it up.

"This month's bonus is less than half that of last month. You told my mother that you didn't play mahjong. You're burning newspapers at the grave!"

"I didn't go. There's one missing person in the group. Where do I have time to go?"

"What, one less person, one less person, why is the bonus so small?" His wife is clear about their bonus.

"Don't you think about it. Ah! Does the baby go to cram school? Your parents' house can't be built, ah! Oh, My God! I've been with you for such a long time. I'm reluctant to eat or drink. You're generous, ah! I can't help it. " When I go out, I don't forget to take away the bonus on the table!

Sanchuan woman, with a knife mouth and a bean curd heart, originally wanted to waste money with the bonus, but she still couldn't bear to look at this and that, "turtle son, I'm so angry. Have a big meal today. Boss, have a spicy pot! What's expensive? Give me what! "

"You melon woman, have you quarreled with your doctor Xue again! You have to pay more for a string. " The landlady and Xue Fei's wife are fellow villagers and have a good relationship.

Xue Fei had a good life and married a good woman, but it was this mahjong that couldn't give up. He's a good man in other ways. When Zhang Fan entered the Department.

"Ha ha, ha ha. You're here at last. My darling, you don't know how much I miss you! " Xue Fei is going

crazy. His wife doesn't complain, and Wang Yanan talks about it day by day. He felt that if Zhang Fan didn't come again, it was estimated that he would go to the third Department of orthopedics.

"Hehe, just think of me. Help me clear the table and clear away your things. Don't eat and occupy too much. I'll report to the director first." Zhang Fan looked at his desk full of Xue Fei's things.

"Go, go quickly. Don't worry. It's clean and shiny for you."

"Director, I'm back."

"Just come back. Are you tired? If you're tired, take a few more days off. I'll grant you leave. Don't work too hard. You'll know when you're old. I heard that you had an operation in stone city for more than 20 hours?"

"It's all right, director. I couldn't help it at that time."

"Well, I can handle it myself. Go ahead and say hello to the deputy director. "

"OK."

At the end of the morning meeting, everyone came to say hello to Zhang Fan, who responded with a polite smile. Ward round, "what's the matter with you? There are only three patients, one of whom came to get the steel plate!"

"You ask him!" Wang Yanan is also a little embarrassed.

"There's no way to ask me. I'm in the emergency department, so I have to wait at the gate of the hospital." Xue Fei said dejectedly.

"All right!" Zhang Fan has no way to say, and he also knows that the focus of his recent work may not be on the Department. With Ouyang's determined posture, Zhang Fan estimates that Professor Li Housen will be set up by her in a few days.

"Have you heard that there is a shortage of doctors in the emergency center and pediatric center. In particular, pediatrics should set up a pediatric surgery department, and pediatric surgery should be divided into a pediatric orthopaedics department. How's it going? Are you interested? " Three patients were useless for ten minutes. Several people finished the ward round, and then there was no operation. There was nothing to write in the medical record. Several people were staring at each other.

"Go, you go. The director of pediatric orthopedics is waiting for you." Wang Yanan offended Xue Fei.

"Hi! You think I dare not go. If I were a vice high school, I would definitely go and pull you to write me medical records every day. If you don't obey me, stop your operation, huh! How beautiful! "

"Go on and have your dream. The patient can't be robbed! "

"Well, I'll have a look." Zhang Fan really can't stand these two people. Chatting is not Zhang Fan's style. Zhang Fan is going to go to the clinic first, and then go to the emergency department on the way. Like the lion king, announce that I'm back!

As a result, the director of the medical department slipped away before he got to the clinic“ I still want to call you and come to work without a few days off. " The director of the medical department looked at Zhang Fan with a smile.

"It's all right. I'm not very tired. I'm also idle at home." Zhang Fan said with a smile.

"Go and go to the office. Professor Zhao Jingjin called in the morning. They took the morning flight. The hospital has sent a car to pick it up. It is estimated that they should arrive later."

"So fast?" Zhang Fan was a little surprised. I've only been separated from Professor Zhao for a few days.

"You don't know. Lao Zhao urged me every day a few days ago. Otherwise, the dean will deliberately press it. It is estimated that he will come early. "

"Oh! I see. Hey, hey. " Zhang Fan understood that he was in Ouyang's hands and was so worried. It is estimated that Lao Zhao bled a lot this time.

"Why are you giggling? You don't know. Professor Zhao is very supportive of our hospital this time. He not only brought down his scientific research projects in our hospital, but also recently ran projects in provincial departments with the president. I envy the directors of your department of orthopedics and general surgery. "

"Yes! Lao Zhao is such a cow. " Zhang Fan was really surprised.

"What do you think? He is a leader in liver and gall in the province, and he has become a Changjiang Scholar this year. He is the first to become a Changjiang Scholar in the medical industry in our Frontier Province. Can he not be a cow?"

In the medical office, after Zhang Fan went in, several young officers greeted him warmly. If graduates of the public health system do not enter the ranks of civil servants.

And into the hospital, really sad. Upward, the president of the hospital has no chance and can't do clinical work downward. It's better to say that it's not a big problem to do chores when you are younger, but it's embarrassing when you are older. Therefore, these officers also try their best to curry favor with doctors, because the position of the director of the medical department is generally reserved for clinical doctors.

Not long after sitting down, Ouyang called "Has Zhang Fan arrived? "

"Dean, Zhang Fan has arrived."

"Good!" Then he hung up and Ouyang came soon.

"Come on, let's meet Professor Zhao and them. They'll be here soon. Have you prepared the banners and everything? "

"Ready, as you say, ready."

"Good! Let's go. "

Zhang Fan saw the fog at one end after he went down. A long banner read: "welcome Zhao Jingjin, a distinguished professor of (a) Chang (a) Jiang Xue (a) of our province, and his party to inspect our work!"

Logistics, security office, offices and some nurses stood in two rows, "good, good organization." Ouyang looked at it and praised the director of the medical department.

"Hehe, I'm under your command. We're just doing rough work. "

Zhang fan can't help laughing. It's really funny that the bald medical director looks like a child!

"Coming!" Ivecu of the hospital came in through the door.

"Ha ha, Professor Zhao has worked hard."

"Not hard, not hard. Such a big formation. Yes! Yes. " Lao Zhao would rather that others did not know that he, a Changjiang Scholar, could not lift his head when he was suppressed by the president of a regional hospital. Lao Zhao thought he was a fake scholar.

"Please, the tea is ready. Take a break. "

"Good!"

After a rest and a sip of water, Ouyang held a general meeting of the whole hospital. Professor Zhao sat awkwardly on the table, fidgeting, really fidgeting!

### **Chapter 377**

"Professor Zhao Jingjin, the only medical Changjiang (a) scholar in our province, has established a scientific research point in our college despite hardships and long distances, which is a Bethune spirit of

a new era! It is a spirit that our contemporary people lack.

Professor Zhao came, the scientific research point was established and the platform was established. Then, the next thing depends on all the medical staff of our tea vegetable city hospital, how to make a breakthrough, how to contribute and how to improve themselves.

Now, I announce that the liver and gallbladder research center jointly undertaken by the medical department of Dihua University and our tea vegetable city hospital has been established! " The medical staff sitting below applauded warmly. It was impossible if it didn't. Ouyang looked down at the bottom of the stage.

Ouyang can't boast about Lao Zhao any more. It was directly in mid air, which made it difficult for Lao Zhao to get out of the room quickly in the future! When people reach a certain level, the so-called word-of-mouth slowly begins to become important.

Then there is Professor Zhao Jingjin's speech, and then there is the talk of the leaders of the health system of chasu city. How much attention and attention the superiors pay, how powerful Professor Zhao is, and how attentive the hospitals of chasu city are. Anyway, he said the most for the longest time, but he didn't say anything.

The building that was originally the emergency center was directly renamed by Ouyang. A bigger sign was hung up: liver and gallbladder research center. There was a line in the bottom right corner of the sign, tea vegetable city hospital!

The leader of the health system left after the meeting. Ouyang was hard to deal with. If he didn't leave early, he might be entangled by Ouyang for funds. He couldn't decide, so he left very simply.

Hepatobiliary surgery, although the international hepatobiliary pancreatic association was established very early, it has no ruling power, especially the rising star of Chinese hepatobiliary surgery.

The large population base has created China's special advantages in liver and gallbladder. Casually pull out a top three director of hepatobiliary surgery and put him in some small countries, such as Li Jiapo, so that he can go directly to their hepatobiliary surgery.

In the frontier, because of liver hydatid, he has made great achievements in the anatomy of the liver and gallbladder. This time, Professor Zhao is very interested. He wants to rebuild. The destruction is simple and the establishment is difficult. Therefore, Lao Zhao is a little good now.

Doing scientific research is a luxury. Funds are directly lost like water. In this way, there may not be any result. This is the first shot that Zhao Jingjin classroom has been rated as a Changjiang (a) scholar, and he has to pay attention to it.

The animal laboratory of Chasu City University has also been contacted. The most troublesome thing about animal experiments is here. Such animal experiments must be carried out in places with relevant qualifications, not anywhere. If there is any drug research and development involved, it will be more troublesome. Fortunately, this is just an invention of surgical method, which is relatively simple.

"Zhang Fan! Are you back from stone city? Look at you. This is not good for grass-roots hospitals. The social task is too heavy. " Lao Zhao never forgets his original heart and is always ready to dig people.

"Ha ha, congratulations. The professor is now a scholar." Zhang Fan didn't answer his words, but smiled and congratulated.

"Haha, Rao Xing, Rao Xing, this time we set up this research center, it really costs a lot of money. Let's not mention anything else. Look at your newly established liver and gallbladder research center. I contacted almost all the relevant equipment. You Dean Ouyang are really good. " The more Lao Zhao said, the more sad he became.

"Thank you, tea vegetable people will not forget you!" Zhang Fan said with Ouyang's tone.

"Come on, you have to make sure you're careful. To be honest, I'm running for you. Tens of millions of scientific research projects. This is the largest investment in medical research in the frontier in history. If I don't succeed, I will become benevolent. Please, brother! " Speaking, Lao Zhao held Zhang Fan's hands.

"OK, I'll do my best." Because of his interest, Zhang Fan agreed very happily. Besides, he can't use what he said anyway. Ouyang will definitely strive for benefits for him.

"That's good, that's good. Let me introduce you. This is my assistant Liang Zhibo, Dr. hepatobiliary. He has a set of skills in hepatobiliary vessels. " Speaking, Lao Zhao introduced a very shy looking man with thick glasses to Zhang Fan.

"Hello, Dr. Liang. In the future, we will be comrades in arms in the trenches. Please forgive me if there is anything you can't see. " It's normal for Zhang Fan not to enter the operating room. Although EQ can't compare with Batu and Chen Qi, it is still above the average.

"Thank you for your huge liver tumor operation. I've watched the video many times. It's really great. It's a super robot directly. Why did you intercept the accessory pancreatic vein at that time? Will the patient's pancreas swell because of this? "

Dr. Liang Zhibo, who graduated from undergraduate clinic, has completely taken the scientific research type, and has completely entered the pit of scientific research.

As soon as he said this, Zhang Fan was happy. He likes to deal with people who have no twists and turns in his heart. It's so easy to deal with.

"Well, huge liver tumor ~ ~"

"Don't worry. There will be a lot of time in the future. In the future, Dr. Liang will be stationed in tea plant. You will have a lot of opportunities to communicate. Today, I'll get to know the group members first, and then arrange food, clothing, housing and transportation." Lao Zhao hurriedly interrupted their conversation, which could not be explained in one or two sentences.

"OK, let's talk about it later." Zhang Fan smiled. In the past two years, Zhang Fan has almost been fighting alone and rarely communicated with high-level medical talents. Now he has a chance.

"Well, all right. But I still think this is open to discussion." Dr. Liang is a little unwilling.

"Do you all know each other. Let me introduce you to your future team members." After Ouyang sent off the leadership of the health system, he came here in a tiger's stride. Really, Ouyang is in high spirits recently.

"Dean!" Zhang Fan said hello.

"President Ouyang." Professor Zhao Jingjin said politely. Dr. Liang didn't speak, but nodded to Ouyang.

"Well, this is Xia Qingyang, master of hepatobiliary surgery of Sanchuan Medical University. When he graduated, he forced me to bring him. Liu Hanqing, master of hepatobiliary surgery of Dida, you should be familiar with each other."

"Hello, Professor Zhao. Hello, senior brother Liang." Liu Hanqing said hello to Zhao Jingjin and Liang Zhibo. He hasn't graduated for less than a year and hasn't jumped out of his student identity.

"Oh, I remember you. I also took your oral defense exam. It's very good." Lao Zhao smiled and said with a very official smile. He absolutely doesn't remember the other party. Can we lack him!

However, Liu Hanqing was a little excited when he said this. He rubbed his hands and didn't know where to put them.

"Have you finished your master's degree and turned your head? No, so we have to make persistent efforts and continue to struggle."

"Yes, Professor! I will work hard! Must work hard!"

"Hey!" Zhang Fan despised Lao Zhao. Compared with other fresh graduates, Zhang Fan has contacted too many so-called successful people in society in two years. Listen to their words, but you must not take it to heart, otherwise, ha ha!

"The master of Sanchuan Medical University is amazing. President Ouyang's ability is really impressive." Lao Zhao made a pun.

"Hehe, I can't afford your praise. My family is from the tea vegetable market. Originally wanted to go to the bird market, but my parents didn't want to go, and the Dean looked up to me very much. I came to the tea vegetable city hospital. I really didn't expect that our hospital was too powerful. " Master Xia Qingyang also graduated less than a year ago. But relatively, his EQ is a little higher and accident is also a little higher.

"That's good. Of course, the boss of tea vegetable city hospital and frontier prefecture level hospital is not bad." Lao Zhao gave Ouyang a hand. He also wanted to be with him. After all, he still wanted to curry favor with Ouyang.

"Ha ha, they are all young talents. The hospital will depend on you in the future. Come on, let's go to the conference room and have a small meeting. " Ouyang is too strong. Originally, this was what Lao Zhao said.

However, after arriving at the conference room, Ouyang didn't go in, but arranged for the logistics director: "now your logistics department has set up a six person team to fully assist Professor Zhao. In addition, find a place to get a small canteen. In the future, you should be responsible for their food. Remember, you must be responsible."

"OK, Dean, I see. You must be attentive and responsible. "

"OK, I can rest assured that this conference room will not be open to others in the future, even if it belongs to your liver and gall group. If you need anything, I'll ask the equipment department to buy it for you immediately. Well, you have a meeting! " With that, Ouyang left without dragging his feet.

Zhang Fan stood beside Lao Zhao and seemed to hear Lao Zhao's long breath!

"Our scientific research team has been established. There are sub venues here. The main venue is at tea vegetable University. The animal laboratory has been contacted. Let's meet once every three days to summarize the problems of the experimental process." After sitting down, Lao Zhao began the meeting.

"Good!"

"OK!"

"I can't stay here for a long time, but I will definitely come once a week. The team leader here, Dr.

Zhang, you are a little tired. Take charge. " Lao Zhao looked at Zhang Fan and said.

"Me? No, I've never participated in this kind of research. I don't understand anything. Let others come. " Zhang Fan is really scared. After all, he has never been in contact with scientific research.

"It's okay. Everyone has their first time. If you don't understand anything, you can discuss it directly with Dr. Liang or call me. Here, Dr. Liang is responsible for relevant pharmacology. You mainly take them to do research on reconstruction structure. In this way, it is not an administrative position, so there is no need to refuse. " Lao Zhao directly designated.

"Well!"

"It's all right. You should operate on people. This is a little more delicate than a huge tumor." Dr. Liang was deeply impressed by Zhang Fan's huge liver tumor operation.

In this way, the research group of hepatic portal vascular system was established. Relevant departments of the hospital, Ouyang also said hello and gave full assistance. Almost all departments related to cardiology, respiration and immunity have established contact doctors.

As long as they need it, Zhang Fan will definitely come to help at the first time. The scientific research project of chasu hospital slowly stumbled. Although it was slow, it was still moving forward. Although it stumbled, it was finally started.

### **Chapter 378**

The research group was established, and Professor Zhao Jingjin took great pains for this group. After all, chasu city is more than 700 kilometers away from the capital of the frontier provincial capital, and he can't stay here for a long time.

He's showing his old face about the equipment related to the experiment. He scraped all the places that could be scraped by universities, governments and medical enterprises before collecting them.

The team members have also considered for a long time. They should not only have certain attainments in knowledge, but also cooperate with Zhang Fan very well. Finally, after several screening, Dr. Liang was selected by him.

If he can stay in the tea vegetable city for a long time, it's good to say that it is because of the limited time that he takes great care of the candidates.

Chasu City University is a very unknown University. Fortunately, because it is located in the pastoral area, the animal husbandry department can take it out and talk about it in the province. Although Lao Zhao came from a doctor, he is also deeply rooted in the education system, especially in the university education system.

This time, I found this laboratory through friends in the education system in a roundabout way. Sometimes, it's like this. It's estimated that the time it takes to think about public to public will increase exponentially, and use some personal relations, that is, what the headmaster said.

Mice, artificially bred mice, white, black, large and small, are kept in rows directly in iron cages in animal breeding rooms.

A lot of mice, sand! Sand! Sand! The sound of eating directly made Zhang Fan's hair stand on end. Smell, a special smell of mice, is too strong. Really, you can turn a person into reflux esophagitis without a mask. It smells terrible.

"Dr. Zhang, when you were in medical school, didn't you come into contact with animal experiments?" Dr. Liang looked at Zhang Fan's expression in surprise. According to his idea, such a skilled doctor should also be a Xueba. He should be familiar with animal experiment, the only course in the university that can do surgery.

"Well! No, not much. " Zhang Fan really didn't go to college. During his junior year of college, he was busy selling convenience. He couldn't take care of it.

"Oh! ok Because the price of specific experimental mice is too expensive, we use ordinary mice in our early training, which are all domestic experimental mice. "

"Oh!" Zhang Fan doesn't ask much. Anyway, he really doesn't know about these things.

"This is the postoperative recovery platform, this is the exercise platform, this is the detection instrument, this is the heart rate and respiratory detector." Zhao Jingjin and Dr. Liang introduced mice and experimental instruments.

"Because we should consider the postoperative recovery. For example, this sports platform can set the speed to let the postoperative mice exercise to see whether it can meet our expectations." Zhao Jingjin understands why Zhang Fan doesn't want to go to further study, because Zhang Fan is very strange to these experimental instruments. But it's better. He's more relieved. Don't really do half the experiment. Zhang mortal ran away.

In this kind of experiment, other things are done by special personnel. Zhang Fan performs surgery according to the setting, and then obtains data through animal experiments.

"In the future, we will do experiments here every morning and summarize the data in the afternoon." Professor Zhao Jingjin said while introducing.

"I have to go to work? Can I change it to the afternoon? I don't think I can help with this data." Zhang Fan is not happy to hear it.

Help belongs to help, but it can't affect the system upgrade. This thing is the future human medicine system, and animal surgery will certainly not be included.

"Well! Well, others will follow this schedule. When you have time and when to come, but make sure that there is no limit on animal surgery every day." Lao Zhao knew that there would be all kinds of situations, so he had long been psychologically prepared.

After introducing these things, Zhao Jingjin took Zhang Fan to meet the president of Chasu University. After all, it's a little famous university. If it's a little bigger, it wouldn't be so casual.

In the headmaster's office, Zhang Fan was polite and flattering. Listening to the two people's sarcastic conversation, Zhang Fan was not psychologically upset. Zhang Fan still doesn't adapt to the so-called high-end language communication. It's too complicated, more complicated than surgery.

"Doctor Zhang, you'd better not wear gloves first." Now that you're here, do an operation first. When Zhang Fan was wearing gloves to give anesthetics to the mice, Dr. Liang spoke.

"What?" Zhang Fan asked not very clearly.

"This is because gloves are insulated from body temperature. Wearing gloves to catch mice will make mice nervous. Although they are cultured mice, this large mouse will still bite people. It's better not to wear gloves for anesthesia. The temperature of the hand will play a soothing role!"

"Oh! All right." Zhang Fan nodded very reluctantly. It's not Lao Liang's words that made Zhang Fan unwilling. If he doesn't understand this kind of thing, he doesn't understand it. There's nothing he doesn't like.

Zhang Fan doesn't like it because he has been dealing with mice since he was a child. When Zhang Fan was a child, his family lived in a bungalow. The mouse turned the sky. There was no way. Finally, he raised a big cat at home.

Very human big cat. Because it is a small animal, Zhang Fan often feeds it steamed bread or something. Their relationship is very good. Once Zhang Fan's parents were on night shift and he slept at home alone.

As a result, the big cat caught a big mouse. After biting half dead, it took the mouse and sent it to Zhang Fan's quilt. Zhang Fan, who was originally confused, was awakened by the big cat, and then looked at the blood Hula wipe half dead. After the twisted mouse lying on the bed, he directly frightened the baby.

At that time, Zhang Fan was not in primary school. The frightened and trembling baby nestled in the corner naked all night. The old cat kept pulling the mouse with its claws to send it to Zhang Fan. Since then, Zhang Fan has been afraid of mice.

Although I grow up with age, I am still afraid at the bottom of my heart. Looking at Zhang Fan's delay, Lao Liang said enthusiastically, "you see, it's actually simple. It's artificially bred, very docile and obedient.

Your left hand is like this. Gently clamp its head, and then lift it up. You see, that's it. " Speaking, Dr. Liang grabbed a big black mouse and came up to Zhang Fan.

"Good! OK! OK! I see. You put it down, put it down. I see. " The black mouse in front of Zhang Fan, with flesh colored claws and flesh colored belly, is still a male mouse. Really, Zhang Fan's hair stands up.

"Good! You come. " Dr. Liang put down the mouse and let Zhang Fan come. The mouse began to fret because it was caught around. I was eating quietly. At this time, I began to run around the plastic box.

"Grab, grab, you see, just like me." Dr. Liang is definitely a cat. When he said to catch it, he caught the big black mouse. The more you catch and release, the more nervous the mouse is.

I guess it knows nothing good. Biting his teeth, Zhang Fan said angrily, "grasp, what's this? Isn't it a mouse!"

"Ah!" Zhang Fan shouted in his heart and caught him“ Hey! Hey! Don't scratch like that. Move forward and it will bite you. " Dr. Liang looked at Zhang Fan's action and said hurriedly.

Zhang Fan went down because his strength was not well controlled and his position was not good. The big black mouse turned his head and showed his sharp teeth. The front teeth glowing under the fluorescent lamp shook his head and ran to Zhang Fan's fingers.

Because Zhang Fan was too hard, he directly squeezed the urine out of the mouse, and the urine trickled down Zhang Fan's fingers.

After training in the system for so long, Zhang Fan's nerve reflex was quite powerful. When the mouse turned his head, he immediately threw the mouse into the plastic box like lightning. Anyway, it was high enough. The mouse was half killed by Zhang Fan. What was alive has become half dead.

"Well! Fortunately, it is made in China! " Lao Liang said it directly.

"Hey! No, forget it today, really! Professor Zhao, Dr. Liang, let's continue tomorrow. I'll be a little flustered! No, really! " Zhang Fan is a little incoherent.

Professor Zhao Jingjin looked at Zhang Fan's somewhat flustered expression and smiled, "ha ha, it's okay, just get used to it. Today, be a contact, intimate contact. Ha ha, don't worry. You don't have to catch mice tomorrow. Just come and have the operation. "

"OK, this can be." Zhang Fan was relieved to hear that he didn't have to catch mice by himself.

"Practice your hands first. Come on, just this mouse, remove the liver completely, measure the diameter of the portal vascular system of the rat, and start." Of course, Professor Zhao Jingjin was not polite to others and directly began to instruct them to work.

In the afternoon, Zhang Fan went home dejected. Zhang Fan hasn't been so lost since graduation. Really, I'm very disappointed this time“ What if there is no system? What can I do without a system? " He's a bit of a prick.

The disadvantages of going with the wind and water come out, lack of toughness, or lack of process towards success. This is the state of mind, which can't see anything at ordinary times.

It seems useless, but at a critical moment, in fact, this thing may play a decisive role. The most typical is that some people rise and fall three times and can still succeed after failure. It is estimated that this mentality and resilience account for a large part of the reason when they start from scratch in the face of failure.

"What's the matter? Are you sick? You look so ugly. " Shaohua looked curiously at Zhang Fan who came in. From the time she met Zhang Fan, except for one time when he vomited badly and his face was bad, she had hardly seen him so listless.

"Nothing, just a little tired." Zhang Fan is embarrassed to say it clearly.

"Then lie down for a while. The soup boiled today will be cold later." Shaohua's mother said.

"OK, aunt." With that, Zhang Fan went into the small study and lay on the bed“ I'll have a look. " Shaohua whispered to his mother.

"Well, go and see if he's homesick."

"OK."

Shaohua entered the study and didn't speak. He just pressed Zhang Fan slowly and pinched Zhang Fan's head. She knows Zhang Fan and understands Zhang Fan. If Zhang Fan wants to say, she will definitely say it. If she doesn't want to say, she won't force it. Men are a little strong regardless of size. Maybe this is

what men call being strong.

"You said, apart from surgery, am I bad?" Zhang Fan closed his eyes and said in a low voice.

"Who said, my little stone is very excellent, let alone my career. You watch the house, who doesn't praise you? Even my father, you go to see the community. The stubborn old man who quarrels with others when playing chess praises you very much. I'm almost jealous.

What do you say? You are filial to the elderly, well educated and educated. People are honest and take care of their families. If it weren't for your black spot, I wouldn't trust you to go to work. Hey, hey! " Shaohua slowly lay in his arms and spoke to Zhang Fan quietly.

"Uncle loves his house and his dog!"

"Hey, little stone has gained knowledge and can use idioms! Hehe, what? You are my first love. I don't know if my father loves me.

However, look at Jia SuYue. Originally, your nose is not your nose and your eyes are not your eyes. But look at how good you are now.

You know, I don't approve of you rushing out first about Zhu Bing and them last time. But your vigorous body at that time was really, so handsome that I can't forget it all my life. I'm safe with you. Zhang Fan, I love you! "

With that, Shaohua gently kissed Zhang Fan's black face.

"Really!" Zhang Fan felt much better. He had drilled the tip of an ox horn and asked Shaohua to pull it out in a few words. Then, of course, his big hand grabbed Shaohua's face and was about to kiss it.

"Oh, my God! what does it taste like? What did you catch? It smells so bad! " Shao Hua, who was supposed to kiss, jumped up.

"Ah, I smell it." Speaking, Zhang Fan put his hand on the tip of his nose.

"Well! Uh! It smells terrible. " Mouse, the urine of male mice with mature gonads, really, that smell, how to say, say Sao, it also has a special smell, which can't be described. It's very unpleasant, very anti-human, and very strong.

This is the smell of androgens.

"Wash your hands! What happened? " Shao Hua is about to make Zhang Fan vomit.

Zhang Fan kept washing and smelling in front of the faucet. This taste is really difficult to wash. Ordinary soap and soap can't be handled.

"Hey, I'm in a hole. Today, I went to chasu university ~ ~ "Zhang Fan is normal.

This is the lover, this is the lover who supports each other. What is love, this is love. Lovers who can tolerate, understand and understand each other.

### **Chapter 379**

The smell of male gonads of this animal is very strong. It is said that female mice can smell it many kilometers away. Fortunately, it was his left hand, otherwise Zhang Fan had to grasp chopsticks with his right hand. Although it is not difficult, it is still inconvenient after all.

"Eat well and why wrinkle your nose." Shaohua's father didn't like it when he saw Shaohua wrinkle his nose at dinner. The old man has many rules. He can't eat lying down and there can't be any rice left in the bowl. Anyway, one set at a time.

"No, which ~ ~" Shaohua couldn't say any more. She was a little disgusted!

"Hehe, uncle, I went to do an animal experiment today and let the mouse pee. It smells a little bad." Zhang Fan hurriedly explained that he couldn't do without explanation, otherwise he would definitely be executed by Shaohua.

"What's wrong? We used to work in the field. How many mice did we kill, but we didn't eat as usual!" After saying that, the old man took a sip of wine and ate 22 baijiu.

"It really smells bad. You haven't been peed by a mouse! " Shaohua is not happy. Daughter and father are like this. Although the old man looks serious, in fact, if Shaohua is really angry, it is her father who will surrender first.

"I smell it. It smells bad and strange." The old man didn't believe it.

"Forget it!" Zhang Fan put his hand back deliberately.

"Eat, just you. The two of them have worked all day. Aren't they tired? " Shaohua's mother glanced at her old man, "it's so annoying. There's him everywhere!"

"Don't listen to them. Come and smell it. I won't believe it." The old man is stubborn.

"All right." Zhang Fan was helpless and stretched his left hand in front of the old man, but he didn't stretch forward any more.

"Er!" The old man stretched his head and put the tip of his nose forward, Hiccup " My God, what's this? It smells so bad. The steamed bread was rancid and then covered for half a year! It's too strong. " The old man quickly gave the Baijiu in front of him a drink.

"You are old and immortal. Can you eat! I'm so angry. " The old lady is not happy.

"Hehe! Look, it smells bad. And me! Ha ha! " Shaohua was happy and her eyes narrowed when she saw her father making a fool of himself.

"And you, eat or not." Shaohua's mother turned and looked at Shaohua.

"Eat, aren't you eating! Hey, hey! " Shao Hua is really happy.

"Still laughing!" Shaohua's mother couldn't help laughing. The old man looked so strange that he took a sip of wine and held his breath for a long time.

"Oh, my God, I almost choked it." The old man knew that Shao Hua had been wronged and said an apology.

"Eat some rape. It's light. Hey, it's hard to be a doctor. It's said that nurse Chen upstairs is tired and dizzy in the Department, isn't it? " The old lady asked Zhang Fan gossip.

"Well, it's probably hypoglycemia." Zhang Fan is not very clear. There are too many such things in the hospital. Women, in particular, lose weight, go on a diet and have a holiday, and then the workload is too strong to pass out.

"Why is it hypoglycemia?" The old lady asked curiously.

"Go on a diet, lose weight or something."

"Did you hear that? I don't like meat all day. Here, chew this sparerib. Look at you. You'll be blown away in the strong wind." Shaohua's mother nagged at Shaohua and Zhang Fan.

Guests are coming. Shaohua's father is the head of the family. There are no outsiders. Shaohua's mother is the head of the family. Very warm, very warm, the day is so day by day, live safely.

When Zhang Fan went to work early in the morning, he handed over his shift and made rounds. There was no patient in their group. The first three patients were discharged from the hospital. Fortunately, Xue Fei went to the clinic, otherwise he would have to shave his head this week.

Only one patient was admitted one morning. Now, because the emergency center is about to be established, no one knows who will be sent to the emergency department. Therefore, surgeons, especially orthopedics doctors, are more and more dedicated. If you were sent to the emergency room, it would be too late to cry.

In the emergency department, laymen look as if they have boundless scenery and are very handsome. Doctors shuttle around the scene of various accidents like agents. In fact, professionals prefer pediatrics to emergency.

First of all, almost all the diseases that the emergency department can deal with are basic diseases. In fact, the number of years of work is not much improved for doctors themselves. Second, the diseases in the emergency department are too complicated. There are all kinds of accidents from head to toe. You have to learn how to get started in various liver departments, which has become the so-called panacea.

The third and most important point. Emergency departments often go to all kinds of accident sites, and vice versa for doctors. If someone gets drunk and fights, the beaten party can't beat the other party, maybe he will vent his anger on the doctor. The most irritating thing is that you have to put up with some unreasonable people in the emergency department.

"Does the ambulance still charge? For what? I won't hand it in. Do you have the ability to do it? "

In fact, the doctor is helpless. The price and charges are not under the doctor's control, but if you really don't pull, then people die and there is a problem. It's so troublesome. Therefore, few doctors are willing to be emergency doctors.

Large hospitals, especially super hospitals, have more methods. Almost all ordinary doctors in the emergency department are hired externally, which is the so-called no staffing.

They are all people who make money from their youth. When they are a little older, they don't have to rush to the hospital, because they can't do it anymore.

Grass roots hospitals can't do it. Who hasn't prepared it? Who has prepared it will go to the emergency department! So, this department is troublesome enough. Xue Fei finally accepted a patient with clavicle fracture, and Zhang Fan's group was also opened.

The patient is a young girl who is a dancer of the tea vegetable City troupe. Beautiful, fair skin, long neck, it seems that when rehearsing the dance, I didn't cooperate well with my partner, resulting in

clavicle fracture after falling.

When it was delivered, the girl cried loudly. It hurts. It hurts too much. With dance makeup, it looks black. Should have sympathized with things, but when you see her face, you will unconsciously want to laugh.

"Stop it. Use some dehydrating medicine today and have an operation tomorrow. The swelling is too severe. " After checking, Zhang Fan said to Wang Yanan.

"Good!"

"Doctor, it hurts me. Do something. " The girl cried.

"OK, I'll deal with it for you now." Zhang Fan comforted the patient. Then he prepared a triangular towel and hung the girl's arm " Give me some more painkillers. Complete the preoperative preparation as soon as possible. "

One morning, Xue Fei admitted a patient. Let the expected Wang Yanan disappointed again. The girl's level is getting better and better now. The stitching and steel plate have been set.

Zhang Fan now runs at both ends. He works in the hospital in the morning and has to go to the animal laboratory of tea vegetable City University in the afternoon. Now that you have promised Professor Zhao, you must finish it seriously.

"Here comes Doctor Zhang!" Dr. Liang and two graduate students are already in the laboratory.

"Hehe, do you want to catch mice. I went back and thought about it all night. I think now I can catch the mouse safely! " Zhang Fan really thought in bed for a long time. He practiced Dr. Liang's actions repeatedly in his mind. I don't know how many times.

"Not today. Start the operation directly. " Lao Liang is also worried that if he is in bad shape again today, he will be in trouble.

You don't have to catch mice yourself. It's better. Zhang Fan's hand washing and disinfection is actually similar to surgery. The mice have been anesthetized.

The anesthetized mouse stuck out its tongue, tilted its head, was firmly fixed, and its limbs were fixed on a small operating table. One more thing than people was that its tail was tied.

"Skin preparation! Disinfection! " When Zhang Fan wore gloves, Xia Qingyang and Liu Hanqing began to prepare skin for disinfection. This kind of mouse is very big. It looks as big as a little rabbit. Its body hair is also very heavy. The hair on its stomach is very thick. The two masters did too many such things when they were in school. They were very skilled.

"Dr. Zhang, your attainments in hepatobiliary surgery are so high, and your school is a very orthodox general foreign hepatobiliary surgery. How did you go to orthopedics?" Xia Qingyang asked casually while disinfecting.

Zhang Fan follows the example of old Lu Qingniao, and now more and more people know it. People in other departments listened and didn't think it was very powerful.

But for the master of hepatobiliary surgery, it can be said that he is jealous to death. Really, I'm so jealous. To sum up, Master Zhang Fan's master is the ancestor of Chinese surgery. His main merit lies in his liver and gall. Even Germany recognizes others' merit.

And master Zhang Fan's senior brother, Academician Wu Mengchao. It's even more ferocious. The first liver and gallbladder center in China was set up by others, and many of the world's first in liver and gallbladder surgery were created by others.

Although Zhang Fan's master doesn't seem to be very famous, it's all because their school is too dazzling. Zhang Fan is so old and lucky that he can become the third generation of this department. Can't they envy him!

Look at the other third generation, almost all of them can participate in the publication of medical textbooks.

"Well! Orthopedics, orthopedics makes money. " Zhang Fan said embarrassed. Zhang Fan felt that he couldn't stop pulling the tiger's skin. He knows that old Lu is very good. As a result, I didn't expect that old Lu's master and elder martial brother were even more ancient gods.

"Well, make money?" When Xia Qingyang heard him, he would like to strangle Zhang Fan. He was quick to scold Zhang Fan. He said, "woodlouse, it's a big woodlouse. I'll give you one million. I'll be an apprentice to Lu Lao."

"Oh, well, start the operation." Zhang Fan directly put out the topic and couldn't talk. It's so annoying.

The liver has super powerful regeneration ability. The liver of rats or dogs is cut off by 80%. After one year, the liver can regenerate and repair to the weight of the original liver, and the human liver is the same.

Moreover, because the liver function is super, from coagulation to hematopoiesis, from detoxification to immunity, from metabolism to synthesis, the liver is directly or indirectly involved in almost all biochemical reactions of the human body.

Strong repair means that it has more plasticity and more functions, which means its importance. Therefore, many medical teams all over the world have entered this liver pit one after another.

Although it can regenerate, the liver structure is very complex. Not to mention others, first of all, there

are two sets of blood system and liver. 50% of the normal blood supply to the liver comes from the hepatic artery and the remaining half from the portal vein.

The portal vein is formed from the lower abdomen, from the veins of the intestine and spleen. When the liver produces tumors, problems or even failure, it will produce poor venous blood reflux.

Zhang Fan's goal now is to shunt the portal vein from the large vein to the normal tissue of the liver. Because the blood of the intestine contains a large amount of ammonia, if it is not detoxified by the liver, it will poison the brain directly after entering the blood.

Ammonia is actually the product of protein decomposition. For example, eating beans will fart more. In fact, this is the truth. Beans contain a lot of protein.

Reconstruction, but also to ensure the normal operation of the body. Difficult, very difficult. Zhang Fan, they just chose a collateral circulation, which is very difficult.

"The portal system of rats is still too small." Zhang Fan is also difficult to do. Under the microscope, the pipes near the hepatic hilum are scattered like disordered wires.

"Our funds are limited. If we choose dogs, it is estimated that this experiment will not be carried out. And the liver of this mouse recovers the fastest in unit time." Lao Liang monitored the vital signs of the mice.

"No!" Dr. Liang said.

"No!" In an instant, the blood vessels of the mouse collapsed. Zhang Fan felt it. It was a manifestation of heart failure. There was no power.

Whoa. The mouse died. "Well, the operation is still too big and irritating. The stress response is too strong. We have to find a way to improve the operation." Dr. Liang looked at the ECG monitor and said.

"Yes, I have to think about it." Although the operation was unsuccessful, Zhang Fan's progress was much faster than that of Dr. Liang in the bird market. This is the first operation and has been greatly improved.

Although the operation failed, Lao Liang was not depressed "Yes, Dr. Zhang, I've had a huge liver tumor. It's really good. It's too powerful! ~ "

The other two research laboratories have not had a profound experience. But they saw Zhang Fan's operation, especially the fine degree of Zhang Fan's operation, which made them feel.

"Miss Zhang, how do you usually exercise. It's too stable!" Xia Qingyang, who graduated from Sanchuan, asked admiringly.

"Do more surgery. Well, there's more practice. Buy some pig liver and practice more." Zhang Fan

thought for a moment and said, this is really hard to explain.

"Well, it seems that I haven't practiced enough." Six months later, our doctor Xia Qingyang stopped eating the liver and hurt himself. One pig liver a day. There is really no shortage of vitamin A.

After the operation, when Zhang Fan washed his hands, he took time to enter the system and took a look. Sure enough, the operation progress did not change. "Hey! I still have to go to the hospital. I'm not in here." Zhang Fanming knew the result, but he was also a little disappointed. If only animal experiments could improve the progress of surgery! This is how people get long and look forward to Shu.

The next day, just finished checking the room. The family members of the patient with clavicle fracture came to the Department. Zhang Fan went out for convenience. When he returned to the Department, he found that Wang Yanan and the patient's family members quarreled again. The girl's face turned red and tears were turning in the circles of her eyes. She was about to fall down.

### **Chapter 380**

It is estimated that where there are people, there will be competition, and there will be various means. Now, the emergency center of the hospital is going to be established. It will definitely pull out a group of mature doctors to fill it.

The newly recruited doctor can't take the job. Therefore, doctors with less seniority in orthopedics and less than a master's degree may be sent to the emergency center.

It's easy to go in, and it's quite unlikely to come out again. Therefore, everyone is nervous. If there is a disturbance, it can make a group of doctors nervous.

This point is not exaggerated. Look at the investigation of some authoritative institutions. In hospital departments, the emergency department has the most disputes. Not to mention outside the hospital, even in the emergency department, there are not a few beaten medical staff. Stay up late, nervous, tired, and maybe life-threatening. They are ordinary people. Whoever wants to go is a fool.

"What's the matter? Have something to say." Zhang Fan came quickly. The good man Xue Fei was also very angry. His lips trembled and couldn't speak.

"Say what! Ah, is that what you do as doctors? Ah, indiscriminately, I took my girl to surgery. You are still human." The patient's family member is a middle-aged aunt. She is already fat. She is also a fierce and fierce woman according to her posture.

Her anger was not light. She stood opposite Wang Yanan, and her hands trembled with anger.

"No, aunt, have something to say and quarrel ~ ~" Zhang Fan came over with a smile.

"Who is your aunt? I'm not your aunt. Don't get close to me. I'll go to your Dean. Don't think we are easy to bully. Your Dean doesn't care. I'll go to the Health Bureau. The Health Bureau doesn't care. I'll go to the government to sue you. I don't believe it. " Although he said he wanted to go, his feet didn't move.

Zhang Fan looked at it, still smiling, and pulled Wang Yanan with his hand, "go and write the medical record first. Stop standing. "

Wang Yanan is a little princess at home. It's good that the people in the Department are not bullied by her after work. Where can people point to the nose and scold like this? She stands unwilling to go, but she can't say that she can't stand aunt. She's wronged.

"Be obedient! All right, don't look at it. Take Asian man to write medical records. " Zhang Fan pulled Xue Fei again. Anyway, even if my aunt is unreasonable today, I have to appease others.

Otherwise, when things get big, what spiritual civilization award and a large list of things that can't be seen in the advanced department, they start to deduct money, not only the doctor's money, but also the Department's money. Therefore, we still have to calm down as much as possible. There is really no way to push it to the superior or call the police.

"Are you their leader?" Aunt's tone was very bad. She almost poked her finger into Zhang Fan's face.

"Comrade! You see, if you quarrel a little more, your daughter will suffer a lot and talk about things. Come and sit and talk. " Zhang Fan doesn't quarrel with her, but directly talks about her daughter and the key point.

"Well, I'll say it again. Why do you operate on my girl. You black heart, ah! My girl is so young that she needs an operation. Why don't you do it yourself ~ ~ "aunt is really angry. She entered the swearing procedure again without saying a word.

As soon as Zhang Fan listens, he probably knows something. Although he has only worked for two years, he has experienced too many things. Learning was almost switched, all kinds of people in the county

hospital laughed before and after the knife, and there were too many things for money and profit in the patient.

"Why did you come to the hospital without surgery! You ~" Wang Yanan was angry and came to talk again. The girl is too young to quarrel, but she can't grasp the key point. Can only make things bigger and bigger.

"All right, stop talking." Zhang Fan said to Wang Yanan with a straight face.

"You have another reason. Is this your hospital? Ah! We're here to see a doctor when we're sick, not to be slaughtered by your butchers. " Aunt immediately jumped up, patted her thigh and scolded! The Kung Fu on the mouth is super powerful. Little girl, where is her opponent.

"All right, sit down. Listen to me. Listen to me. Your girls are crying. "

"You ~ ~" aunt asked Zhang Fan to say that she was angry. Although she was unwilling, she sat down and put one hand on the table and the other hand kept rubbing her knee.

"Is there another doctor who told you that your girl should not be operated on and should be treated conservatively?" Zhang Fan said with great certainty.

"You know, my girl graduated from college and worked everywhere to perform. How much money did we spend? We finally got into the municipal troupe and had an establishment. Once you have an operation and leave a scar, how can you let her dance in the future. You say, ah! Are we easy, frugal! Don't you want our lives! "

The aunt began to cry, and the more she cried, the more sad she became. The crying surprised the originally angry Wang Yanan. Is this still a bitch who was just going to eat people!

Xue Feiyan watched aunt crying louder and louder, hurriedly got up, closed the door of the Department, and then scanned the colleagues in the Department with very, very contemptuous eyes.

He understood. Someone must have said something here.

Clavicle, also known as beauty bone in girls. Especially for young and tall girls, wearing clothes that leak their shoulders, the S-shaped clavicle can add a lot of color to them.

The girl is a dancer again, so she pays more attention to this. Originally, her mother was worried when she saw that the girl was injured. She had to have an operation and was more worried.

As a result, I don't know who gave me some advice. "There's no need for surgery. There's a scar for surgery. Your girl's work is a problem."

"Why do they operate on my girl?"

"You need steel plates for surgery! You see! "

Just these words directly made the girl's mother angry. It's just an ordinary family. There's no power in the family. Otherwise, it's estimated that this matter will never be small. It will destroy the future of their children and will not stop on anyone.

Not to mention the purpose of this right and wrong person, this kind of thing can not be avoided anywhere. If he doesn't make things clear, he is fanning the flames and then watching the fire from the shore. If the fire could bring hospital leaders, it would be better. Maybe they would kick these doctors to the emergency center by the way.

Do they have a grudge against group Zhang Fan? No, maybe they are still laughing together, that is, Zhang Fan and they met this patient. Therefore, the workplace is really difficult, because this place sometimes can't distinguish right from wrong.

There are many clavicular fractures, accounting for 6% of all fractures. It is conceivable how many such patients there are in a year. For the treatment of clavicular fracture, the medical community is also divided into two camps, and the controversy is still very big.

One is surgical treatment, which has obvious benefits and rapid recovery, and fracture nonunion rarely occurs. The other is conservative treatment.

Represented by the traditional eight character bandage fixation. The advantage of this figure eight bandage is less damage. The eight character bandage is actually to pull the shoulder back through the bandage, reset the broken end of the clavicle, and then fix it. The fixed bandage looks like an 8.

It's not that Zhang Fan is crazy about surgery, but that he knows that in the future, the controversy about clavicle fracture in the medical community will soon disappear.

With the development of science and technology, the development of forensic medicine is more and more powerful. After the eight character bandage was fixed, a large number of patients developed sternoclavicular arthritis.

Sternoclavicular joint, chin drooping, clinging to the chest, and then touching to both sides along the chin, there are raised bones. This is the sternoclavicular joint. Where the chest and clavicle are linked. The joints of chest expansion, stretching and even breathing are involved.

Of course, this method is not suitable for fat people or people with big faces!

Once the joint is inflamed, it's troublesome. It's not the inflammation of a cold. It can't be completely cured. Produce inflammation, and then endless long-term chronic pain.

It hurts when the sky is overcast and a little tired. It also hurts for no reason. Sometimes it hurts even

when breathing. Therefore, compared with a scar on the clavicle, Zhang Fan chose surgery.

As soon as aunt cried, more and more patients and family members surrounded the Department. Zhang Fan smoked a paper towel and handed it to his aunt. However, he said it was very gentle. Really, it is estimated that he didn't say it to Shaohua so gently.

"Aunt, really, I'm also sad. I don't want to operate on your girl. But look what this is. " With that, Zhang Fan took a human skeleton model.

"What's the matter?" The tearful eyed and out of breath aunt looked up.

"Where is this?" Zhang Fan's voice is not big. He deliberately keeps gentle. He doesn't dare to stimulate again. It's not easy.

"Knee. Why do you show me this? " Aunt's eyes widened again.

"When it's cloudy, does your left knee ache and stand for a long time?" Zhang Fan looked at his aunt's knee still protected and said.

"What's the matter? Does it have anything to do with your operation?" Aunt converged a little. Because after Zhang Fan saw her discomfort at a glance, she felt that the doctor seemed reliable.

"You see, in fact, your joint is caused by arthritis, which leads to long-term chronic pain. If you bandage your girl, there may be pain in your chest in the future. It's similar to the pain in your knee. It may be frequent. "

"True or false, don't lie to me." Aunt was surprised.

"Have you seen a lot of hospitals and taken a lot of medicine for your knee? When it hurts, do you want to cut off this leg?" Zhang Fan continued.

"Well! namely. Uncomfortable, especially a little tired. Sometimes I really don't want this leg. I don't know how much medicine I took for this leg. " Aunt completely calmed down.

"That's it. Now I'll make a bandage for your girl right away. Really, surgery is still troublesome. I have to take risks. It's convenient to wear bandages, don't you think? "

"Yes."

"In fact, the bandage man really doesn't understand. He's not skilled, or he wouldn't tell you quietly. I won't ask who it is. It's not necessary. But I have to make it clear to you.

You see, surgery or fixation will do. In fact, it's very simple. There's no need to make such a fuss. This is a hospital, not a prison. Don't worry, we won't force you. "

Zhang Fan said something neither soft nor hard.

"What, what, what should I do!"

"In fact, aunt, this operation is not as big as you think. I'll hit a nail. The scar won't be too big. If I don't pay attention to it in the future, I can't see it clearly."

"Really? Doctor, really, it's not easy for children. After graduating from college, they ran around performing and suffered a lot. They rushed to four or five venues a night and sometimes were harassed by hooligans. It's not easy to have a staffing. It's really not easy, doctor, please! " Aunt completely believes Zhang Fan.

"OK, don't worry. I'll definitely do the operation well for your girl." Zhang Fan promised.

"Do what you do. The nurses who came to pick up the patient in the operating room were scolded by her! " Wang Yanan said angrily.

"Girl, I'm sorry. It's my bastard. I apologize and I bow. " Say words, want to bow to Wang Yanan.

"Oh, no, I'm not angry with you. I'm an angry gossip. It's really hateful. What should I do now? The operation was stopped by the people in the operating room. When I left, I said something about me. " Wang Yanan is also a little grumpy. Really, she was embarrassed when people lowered their bodies.

"All right, I'll deal with it. Prepare the surgical handle. "

"Ah! I can't do it today! " Xue Fei said.

"What's the matter?"

"The patient has eaten, alas!"

"Well! Then tomorrow. "

"Ah, I'll find him." As she spoke, the patient's family wanted to find someone to talk to her.

"Forget it, tomorrow is tomorrow. Aunt, I dare not make any more noise. Really, I won't operate on your girl again. " Zhang Fan grabbed the aunt.

"Thank you, thank you. You're a good doctor."

Aunt went to the ward. Today's operation was a failure“ Why don't you let her find it. I came to see who it was. " Wang Yanan said with hatred.

"It's a shame to know what can be done. At that time, the hospital will investigate it. Do you think we can run away? Just these people, won't you think about it yourself!" Zhang Fanbai glanced at Wang Yanan.

"Hey, listen to Zhang Fan. A department is really out of control. It's not good for us. In the future, keep an eye on yourself, explain clearly to the patient, and try to do your own things first. " Xue Fei also said.

"Who is it? Why are you so brazen?" Wang Yanan banged and left the medical record on the table. Stomping angrily out of the Department office.

When aunt said she was going to find it, Zhang Fan knew who it was. There are only a few doctors who have surgery today, so just know it in your heart. And everyone else in the Department is not a fool, so it's clear. It really made things big, but it was a little downwind.

"Although it can't make a big deal, let's find a chance to tell the director." Xue Fei whispered to Zhang Fan.

"Yes!" Zhang Fan could not deny it. Xue Fei's EQ and IQ are enough. Mahjong kills people.
