

## Chapter 3774

Originally, when a group of ant soldiers saw George Han get up and left and were about to follow, Amelia Su was also here. Shi got up, and walked towards the other side almost in the opposite direction to George Han.

A group of ant people looked at each other, and they could only split into two groups and follow.

George Han is just looking around a few houses, and seems to be interested in the architecture here, while Amelia Su is obviously interested in some special products here. Appears very interested.

But in any case, the place where Amelia Su came out was in a commercial area, and there were many ants, so her appearance still caused a lot of impulse.

The ant residents had to avoid her "behemoth", and because they were really curious about her, they couldn't help but hide and

wanted to look closer. In addition, the little leader was absent, and the whole order fell into a little confusion for a while.

A few ant soldiers glanced at George Han, and saw that he was still squatting in front of the residential building and seemed to be looking at the structure of the building. In addition, the residential area was relatively less crowded and the order was relatively stable. After exchanging eyes with each other.

A large number of people in this unit went to Amelia Su's side to maintain order.

As soon as they left, George Han shifted his eyes slightly, and at the same time, his eyes opened.

Under the eyes of the sky, George Han's brows quickly wrinkled.

A few minutes later, accompanied by a fire from afar, the fiery red ant queen reappeared at the scene.

Whether it was those ant soldiers or residents, almost the moment they saw her, they all knelt together and said respectfully, "See the city lord.

"

She nodded slightly and looked back. At that time, George Han had already returned to the previous seat and sat down. Only one Amelia Su was still in the business district looking at all kinds of things on the stalls.

She frowned slightly, but when she saw that Amelia Su was surrounded by many soldiers, she relaxed her brows again.

Then, as if nothing had happened to the Buddha, she looked at George Han and said with a smile, "As soon as I returned to the mansion, I heard a report from my subordinates, saying that you are planning to leave now? Are we not well entertained!"

George Han got up slightly and smiled bitterly: "The queen ant is really polite. When I was just eating, my husband and I found out that staying here will only cause harm to you.

" Many of you pay

rations . This place itself is dry and definitely lacks food, so how can we bother you?" The queen sighed after hearing this, "Although I don't want to admit it, this is after all. It's an iron-clad fact. Yes, that's right, the environment in which we live is extremely bad, you can see it, you can't see the sun above, and you can't meet the water below. Naturally, there are many things we can't talk about at all. " Fortunately, because of our own characteristics, we can barely survive here because of our clothes and diet. We have wanted to move out of here countless times, but..." She smiled bitterly, Although not explicitly stated, it has been expressed.

As ant-men, they can indeed eat less, but because of their small size, they cannot stand outside.

Especially in a place like the Demon Race where the weak and the strong can be eaten to the fullest.

"Understand, understand." George Han smiled: "Okay, it's not too early, in fact, we have traveled a long way all the way here, exhausted our energy, we still have to leave early and go out to find something to eat, so we will leave. ." When the

words fell, George Han looked towards Amelia Su and shouted softly.

Amelia Su put down the small object she was looking at, nodded, and walked over quickly.

The two husbands and wives stood side by side, and Qi Qi politely bowed to the queen ant and said, "Goodbye by fate." When the

words were finished, George Han pulled Amelia Su, turned slowly, and walked towards the road where they came.

The little ant leader also led the ant soldiers to quietly follow behind them, but just before the two had walked a few steps, suddenly, Amelia Su's body fell suddenly and fainted...

#### Chapter 3775

Seeing Amelia Su fainted, George Han quickly supported her, but the whole person's face was abnormally anxious: "Amelia Su, Amelia Su?"

After shouting several times, Amelia Su's eyebrows were slightly closed and her lips were lightly closed, and there was no reaction at all.

With Amelia Su's fainting, the group of ants couldn't understand the situation for a while, and seemed a little flustered.

The queen ant frowned slightly, and one flew to George Han at a high speed: "What happened to her?"

"I don't know, she suddenly fainted and fainted, I think..." George Han looked a little desperate: " I think it may be that the stubborn disease has relapsed."

"Can I find a place to heal her?" The

queen stunned for a moment, then glanced at the unconscious Amelia Su, and then at George Han:

"Well, you take it with you first. She should go to the altar in the west of the city,

where the terrain is relatively wider.”

“Okay, thank you.” George Han finished his words, picked up Amelia Su, sped up and hurried towards the west of the city.

“You follow along and wait outside the altar,” said the queen ant to the little leader.

The little leader nodded, but he was obviously a little hesitant to say anything, but he nodded after a while, and followed him with the rest of his men, and rushed to the altar.

By the time they arrived, George Han had already supported Amelia Su on the altar.

The altar is not small. For the ants, it is very huge. For George Hanliang and his wife, it is at least 70 to 80 square meters wide.

“Everyone, it’s very inconvenient for me to heal my wife’s injuries.” George Han said, and then, with a manual movement, a really able to directly prop up a huge barrier

A whole package of offerings.

Moreover, this road can obviously carry a very strong layer of silver light, so that it is impossible for people on the outside to see anything inside.

A group of ant-men were dumbfounded. You looked at me, I looked at you, and finally all looked at their little leader.

“What to look at, it’s all distributed around, watch it.” The little leader said angrily, and then he sat down next to the energy mask.

In the energy hood at this time, when George Han put Amelia Su on the ground, he did not rush to heal Amelia Su as he imagined, but instead lay down beside Amelia Su.

“Have you found anything?” Amelia Su said suddenly.

George Han shook his head: “No.”

“Then I’m just pretending to be dizzy?” Amelia Su said a little depressed.

“I came back with some very strange

things.” George Han sat up, and then opened his hands slightly, revealing a few grainy things in the palm of his hand.

“What is this?” Amelia Su asked.

“The household garbage I found in the garbage dumps in the residential area.” George Han said.

Hearing this, Amelia Su frowned: “Life garbage, what are you looking for?”

“One person can lie, two people can talk, but some common things and habits in life cannot lie.” George Han said After that, urging the inside of the body can directly magnify a few small granular things.

After a while, the original appearance of these particles was magnified.

“This is...” Amelia Su frowned slightly, looking at these magnified particles, she felt as if she had seen it somewhere.

“This is a water plant.” George Han smiled.

“Water plants?” Amelia Su was puzzled: “This place is extremely dry. In fact, we have been in this city for almost half a circle because of being arrested and other reasons. To be honest, I have never seen a drop of water. ...appearing here?”

“Although aquatic plants are extremely resistant and have top survivability, the only condition is that they need water.” George Han frowned and said, “This is the problem.”

A place that is extremely dry , How can there be aquatic plants?

“Moreover, these aquatic plants don’t seem to be rare, but exist in a large area.” Amelia Su said.

George Han nodded: “Yes, it can be cited as food by ordinary people, and its amount will definitely not be small.” When the words were finished, George Han couldn’t help frowning: “It seems that there is still a possibility here. There really is a so-called, swampy land!”
