

## Chapter 3792

Amelia Su suddenly got up in a hurry, just about to get out of the energy circle, but suddenly remembered, if she was in such a hurry to find George Han.

Where to look?

How should the outsiders explain this?

What's more terrible is that through the barrier, at this time, she found that the fire was rapidly approaching her.

The incarnation is gone, which means that George Han and her plan will be completely ruined!

In a hurry, Amelia Su hurriedly blocked George Han's position behind him.

"There's no need to hide." The queen fell to the ground and looked at Amelia Su in the barrier circle and said indifferently: "I have agreed with George Han and allowed him to do so."

Amelia Su is so smart, she is still vigilant at this time: "I don't know what you are talking about, George Han is resting here." The

queen smiled bitterly: "Then do you dare to let me go?"

Amelia Su was silent, bowed her head and said nothing. After a while, she raised her head and opened the door. Mouth: "Where is the three thousand now?"

"He is in the swamp, and he has already begun to act. I believe that the earthquake in the city of earth and fire should be related to this. I came here because of his entrustment. To take care of you."

"Originally, he meant to let me wait for the barrier to disappear automatically before doing other actions, but now, it seems that the situation is not good."

Amelia Su frowned, looking at the queen ant in confusion, I don't know what she meant.

"Don't you feel that the surroundings are getting hot? Moreover, the heat is still rising." The queen said.

Because of the protection of the energy cover, Amelia Sucha didn't think much about this, but judging from the ground she touched in the energy circle, she had to agree with the queen ant

's point of view.

Yes, it's getting hot here.

"The city of fire has no water at all, and the high temperature will only bring endless danger. I need you to evacuate to my palace immediately with me." The queen ant looked at Amelia Su, and then, with a move of her hand, a burst of energy directly hit her. Xiang Barrier tried to help Amelia Su escape.

Unfortunately, as soon as the energy came into contact with the barrier circle, it was directly bounced off, and the direction was crooked and attacked elsewhere.

“You don’t have to bother the queen ant.” Amelia Su said, “Three thousand taught me how to control it, I will do it myself.” After the

words were finished, Amelia Su glanced at the queen ant again, as if she wanted to read from her expression whether she was cheating.

In the end, Amelia Su chose to trust the queen ant, and with a slight movement, she gently removed the energy cover under George Han’s cloth.

With this withdrawal, the oncoming hot air immediately invaded the whole body, and Amelia Su felt extremely hot in an instant.

“Follow me.” The queen ant finished her words, and a force of energy in her hand grabbed Amelia Su and led her towards her palace quickly.

In such a short period of time, the temperature was much higher than when they came out of the ancestral hall before, and the two people flying in the air could almost see the panic in the city at this time.

Amelia Su had heard many adjectives like ants on a hot pot, but this was the first time she had seen such a scene.

Surprised, the two had already arrived at the palace, and at the urging of the queen, Amelia Su stepped inside quickly.

As soon as the gate of the palace was closed, the extremely hot air that prevented Buddha instantly disappeared without a trace, replaced by a faint cold air.

However, Amelia Su’s attention was not here, but the nests that existed everywhere at this time.

“These are the future of the ant family.

Come. She seemed to see Amelia Su’s confusion, and she explained softly as she walked in.

Amelia Su was stunned, but then she thought, ants are the queen ants that lay eggs and corrupt the ant colony. It seems that these things are just a thought. It makes sense.

“So the queen ant is the only one in the group, and therefore, my palace is the strongest and safest, you can wait here with confidence. “

As long as the queen ant is still alive, the ant colony will not be interrupted.

Therefore, Amelia Su absolutely believes in this.

“Are you hungry?” Want something to eat? asked the queen ant.

Amelia Su shook her head, then turned her gaze to the golden-colored nests in the palace, and couldn’t help frowning, and asked strangely, “Then what are these? The

queen ant followed her gaze and suddenly smiled: “These? “

**Chapter 3793**

Amelia Su nodded: "Is it inconvenient to say?"

"These are also descendants of my family. However, one of them will become The new queen," she explained.

"The ant tribe is passed down from generation to generation."

Amelia Su nodded clearly.

"Let's rest, I'll go get you something to eat, even if you're not hungry, you have to drink something." The queen ant smiled, then turned and entered the inner room.

Amelia Su sat obediently on the side of the hall and waited quietly.

"It's all water plants, which can wrap your stomach and quench your thirst." Soon, the ant came out with a large glass of green stuff, and then handed it to Amelia Su.

After Amelia Su thanked her, she hesitated when she picked it up, and finally opened her mouth slightly and drank it.

The taste has an obvious earthy smell, but it has a little sweetness, which is strange but also somewhat indescribably unique.

"Sugar." She

smiled : "The ant family loves sweets, so sugar is an indispensable thing in our lives."

Amelia Su nodded: "But it should be difficult to find sugar in a place like yours, right?"

He smiled: "That's true, so we rarely use sugar."

"But the sugar content is very high." Amelia Su said.

She nodded: "I added a lot, but, I think, although it is precious, it does not mean everything. As George Han said, it is time to let go of everything in the past and enter a new beginning."

"I'm just worried about whether George Han can accomplish what he wants to accomplish in such a high temperature environment."

Amelia Su didn't know exactly what George Han was going to do, or what he was about to face, but she One thing is very clear, that is, George Han can definitely do it.

"If you want to ask me the answer, I can give you a heartfelt answer with just this cup of sugar water ."

Amelia Su looked back at her, then smiled softly: "I believe George Han can definitely do it."

"Because He knows, I'm still waiting for her here."

Hearing Amelia Su's answer, the ant queen was slightly startled, and then smiled relievedly: "You husband and wife seem to be very clear. That's fine, at least you have proved something like me. , my sugar was not wasted."

Amelia Su smiled lightly and didn't speak any more.

At this time, in the underground swamp at the other end.

Quiet and silent.

The entire enclosed space is still in extreme heat. Although it can still melt any iron in an instant, it is much cooler than before.

The raging and violent fire has all been extinguished at this time.

On the ground in the distance, a dark thing lay there motionless.

Its whole body has been completely carbonized, and it can only be roughly judged that it is a humanoid.

And who can be the only one here?

Han three thousand!

Under the devour of the huge fire, George Han was completely burned to such a state.

Suddenly, he moved!

But looking closely, it wasn't that he was moving, but that the soil beside him moved slightly.

Then, the piece of soil began to loosen, and a small earthworm-like thing drilled out from it.

It is the size of an earthworm, but compared with ordinary earthworms, it is blood red all over. At the same time, there is a small blood red light spot stuck there in the center of its body, mapping its already blood red body even more blood red.

After it drilled out of the soil, it looked left and right, and finally set its sights on the black charcoal "George Han" lying motionless on the ground.

It seemed that it was quite curious about this species, shrunk to the left and smelled the right, and finally, it swayed its body frantically, as if it was disgusting by this thing.

Then, it wriggled again and turned around George Han.

And if someone looked up at this time, they would definitely see that strange cracks like tortoise shells appeared in the land around George Han's chest.

From its chest, it slowly spread around.

The little earthworm finally stopped here.

It looked at the cracks for a long time, and finally it slowly got into the gap. After only a moment, George Han's stomach began to move slightly.

Looking at it from the ground, it must be found that the small earthworm had drilled out from the gap under George Han's chest and started to drill into George Han's body.

The black carbon was squeezed out of a gap, and he successfully entered it.

And almost at the same time, the silver light suddenly began to illuminate in the black carbon, and it continued to punch out countless cracks around the black carbon.

In the next second, the silver light flashed and exploded frantically from the carbon..
