

## Chapter 381

Fame or fame is more accurate. This mysterious thing is really too important to doctors. Zhang Fan is now a little exposed in a small range of lines. It's Xiaohe who shows his sharp corners.

In the mouth of ordinary people, Zhang Fan is just an ordinary doctor in a municipal hospital, and the really high-tech is the director of each department and the old doctor of each department.

Lao Gao doesn't go to the clinic. At ordinary times, there are many in his own office. He comes to see a doctor with various relationships. And the relationship is not small. This is also a place similar to doctors or teachers. After becoming famous, they have a wide range of contacts. Although they can't do big things, it's very convenient, especially in small cities and places.

"Is your group ready for surgery the day after tomorrow?" After delivering a wave of patients' families, Lao Gao entered the large office of the Department and directly asked Xue Fei.

"Director, we have an operation tomorrow. We haven't scheduled an operation the day after tomorrow." Xue Fei was afraid of Lao Gao in the hospital. He was cultivated step by step by Lao Gao from a hospital doctor and a hook. He can start a family and start a business early. Lao Gao has a deep friendship with him.

"Oh, you! No surgery, no surgery, no row yet! I don't blush. OK, there's a patient here. I'll be hospitalized later. You can improve the preoperative examination and prepare for the operation the day after tomorrow. "

Lao Gao, although he talks about Xue Fei and even sometimes takes care of him, it's good. Let alone others, even Zhang fan can't get ahead of Xue Fei. This is the relationship between people.

"Hey, good director. I'll prepare it now. " He knew that the operation that Lao Gao could specially explain must be a very beneficial operation.

Although others heard it, they had nothing to say. The director was nominally the leader of Xue Fei's group. Even if they gave the patient for no reason, they couldn't object. They had to pretend to smile. At most, they wanted to resist? Think too much.

"You have to work hard. Zhang Fan probably can't attend to you recently. " Lao Gao said. As soon as they said this, everyone else stood up.

"Is Zhang Fan going to the emergency center?" A young principal in the Department looked at another principal with a smile on his face.

"It's hard to say!" The other director shook his head gently. This is the tacit understanding, the tacit understanding cultivated between surgeons, without talking.

"Well! Zhang Fan won't go ~ ~ "Xue Fei didn't finish, but the meaning is very clear. The emergency center is a matter of great concern in the hospital recently, but it can't be said.

"Hehe, what do you think? The scientific research center established by the hospital and Dihua university now has to go to the laboratory of tea element university every day. You are old enough to take snacks for all your work. You can't play anymore! " Lao Gao really hates iron and steel.

"Good! Don't worry, I won't play! " Xue Fei's swearing is like drinking water. He doesn't take it personally.

"This thing that doesn't work properly, don't do good orthopedics, run to get the liver!" After Lao Gao left, Xue Fei clenched his teeth. He knew his weight. Their group can be without him, but it must not be without Zhang Fan.

"Hey!" Wang Yanan also sighed as if he were suddenly discouraged,

"In the future, there will be only our difficult brothers and sisters. In the future, we can't fight among ourselves." Xue Fei, pretending to be the boss, said to Wang Yanan.

"Well, why don't you write down the medical record of the clavicle!" Wang Yanan was trained and asked for his backhand.

"Well, you're bad!"

Now Zhang fan can't tell how much spirit to go to the hospital to grab a patient. In the morning, I went to the hospital for surgery, and in the afternoon, I had to go to tea vegetable City University to operate on mice.

Although Professor Zhao Jingjin said well at the beginning, just one operation a day. But how can there be such a good thing? After an operation, several people have to sit down to discuss and analyze.

Almost as with hospital deaths, the relevant causes must be found and then solved. From pharmacology to the next operation plan.

Discussion, discussion and debate are really like brainstorming. Although surgery on mice is not recognized in the system, when discussing with Dr. Liang and Professor Zhao Jingjin, Zhang Fan also improved greatly.

Especially with some basic but profound knowledge, Zhang Fan also began to move slowly from technology to technology. The so-called basic knowledge here is not like mathematics or other sciences.

There are more than a dozen basic courses in medicine. Just one of them is a very difficult subject. For example, the most basic physiology, this discipline is about the physiological knowledge of the normal human body.

At first glance, it's very simple. It's too difficult to be proficient. Those who are proficient in physiology are Nobel Laureates in medicine or biology. You can imagine the difficulty of this foundation.

This means that Zhang Fan invited several doctors and masters to give him a new class to complete the courses he once lacked.

Although Ouyang has agreed that Zhang fan can appropriately not participate in the work of the Department, this directly means that he can not come to work. However, the system disagrees, so Zhang Fan still has to work hard.

Outpatient service is also a normal job for doctors. Zhang Fan is still a resident and not an expert, so there are no registration restrictions.

There are too many Chinese people. In an urban hospital, there are about 140 routine outpatient clinics a day. There are less than 50 experts. After all, experts are old and need to be protected!

"Doctor Zhang, I transferred a patient to you. Have a look." When Zhang Fan went to the clinic, the pediatrician called.

"OK." Outpatient service can really exercise the self-restraint of doctors. There are too many people, and I can't maintain any queue with Ben. It was good to say in the early stage that when some people came back with the inspection report, the team collapsed directly.

"Doctor Zhang, I'm from pediatrics. Please show me." Speaking, a woman came with a child who said big and small.

"What's the matter?" After Zhang Fan took a look at the child, he felt wrong. Specifically, it's not right to go to that place, but there is a very inappropriate sense of disobedience, which is also the so-called vision accumulated by doctors for a long time.

"My child is often ill. If you don't pay attention, you'll get sick. I can't help but bring it to the hospital. The pediatrician said he asked me to come to you. " The child's mother said with a little anxiety.

"Oh, come on, I'll check the child first." Then he said to the patient in a house, "come on, everybody, please step back. I'll check the child." Then slowly forced the crowd out.

"Come on, lie in this bed. What's wrong with you? Tell me. " Zhang Fan pointed to the examination table and said to the child. Zhang Fan has seen the child's medical records. He is 13 years old. Say big or small.

"No, it's easy to get sick and don't like activities. Not lively at all. " Mother said for the little girl.

"OK, let me check." Zhang Fan began to check.

Although the little girl is young, her secondary sexual characteristics have long developed. Zhang Fan frowned. It's no surprise that she has secondary sexual characteristics at this age, but the little girl's development is too obvious.

The chest and breast (a) room are already very considerable, just like lactating women. But the chest did not reach the scale that should be at this age.

Looking at her thighs and hips on both sides, the little girl is not fat and feels a little thin, but there is a strange feeling of fullness when looking at her chest, hips and thighs.

The little girl's hips are very round and wide. This means that the pelvis has been long and open. What does the long and open pelvis mean? It means that you are ready to give birth to children. These are the characteristics of women of pregnancy age.

The little girl is not tall, but because of the development of secondary sexual characteristics, she feels a little like a child's grandmother in Tianshan.

"Come on, let me see the cases and checklists." After a simple physical examination, Zhang Fan said to his mother. Zhang Fanfan looked at the little girl's medical record.

The first thing Zhang Fan saw was the return of the examination: osteoporosis, lack of vitamin A and vitamin D.

"Usually picky about food?" Zhang Fan asked?

"Yes, children have a bad appetite since childhood. They like to eat snacks when they are with their grandparents."

Zhang Fan is speechless directly. The child has eaten chicken breasts now.

"Ah! Let's go to the hospital first! "

"Hospitalized, is the doctor serious?"

"I'd rather have her broken arm and leg now!"

## Chapter 382

Life can't come back, and the person can hardly come back. Try to walk well at every important node, not to mention others, have a healthy and strong physique, and have a certain anti Strike ability even if there are any accidents in the future.

"Why does this child look so strange?" After receiving the patient, before work, Zhang Fan checked the room with Xue Fei and Wang Yanan. Outside the ward, Wang Yanan involuntarily looked at his chest and said.

"Ha ha!" Xue Fei deliberately squinted at Wang Yanan's chest and gave a strange smile.

"I'm dying, you!" Although Wang Yanan's figure is not thin, in some places, compared with his development, he is really powerful.

"This is a typical nutritional disorder." Zhang Fan said as he walked.

"Why didn't you go to endocrinology or pediatrics." Wang Yanan said reluctantly that the girl is very similar to Zhang Fan. She likes surgery and has no love in internal medicine. Then she is most afraid of this hormone and endocrine disease.

"The child's first diagnosis was rickets, followed by nutritional disorders. Moreover, our three doctors, in charge of a patient, are you right? "

"There will be a patient to check in soon." Xue Fei said without shame.

"Which is the director? Let's see if we are poor. You can't rely on others ~! "

"OK, I won't write the medical record of this patient." Wang Yanan said directly that she was not lazy, but worried that she couldn't write the medical record well. If the medical department called back the medical record at that time, it would be a shame. She simply didn't write it.

"Me! I'm not as good as Wang Yanan. " Zhang Fan looks at Xue Fei, who puts down the challenge directly.

"Ha ha, you are so lazy." Zhang Fan shook his head helplessly.

"Zhang Fan, when you write the medical record, tell me about it." Wang Yanan said that she was not a person to escape. Seeing Zhang Fan's own writing, she immediately leaned down to learn.

"OK. That's all right. Girl, I look after you! " Zhang Fan pretends to be old-fashioned and says to Wang Yanan.

"Hehe! Take what you can! "

Although the child came to see a doctor because he was sick, after the examination results were returned, the child had many problems. According to the primary and secondary, the child's first diagnosis was rickets, so there was no problem in receiving orthopedics.

"How to do, just treat rickets?" Wang Yanan sat in front of the computer, opened the doctor's order and prepared to give the doctor's order.

"It can only be treated according to rickets. You say such a big doll is ~ ~ ~ Hey! Nutritional disorders can be corrected, but there is no good way to develop. Look at the little girl's bone dirt line tomorrow! "

"OK. Routine treatment? " Wang Yanan asked again.

"No! Shock therapy, and then consult pediatrics. Let's spend some time on snacks. It's okay to be tired, but the child can't wait. She doesn't have much time. This is the last chance for her development. We must find a way to make her grow taller, otherwise, you say that. Hey! How can you be your parents? "

"Pediatric consultation? Why don't we just transfer her to pediatrics after a period of treatment. "

"No, the treatment time is too long. The child can't afford to wait. Don't you see that she develops better than you! Well, I'm sorry, I didn't mean that. " Zhang Fan regretted it after he said it.

"Nothing!" Although his mouth said nothing, Wang Yanan's face turned red. Zhang Fan left the computer without saying a word. It was too embarrassing“ Where has Xue Fei gone? " If three people are better, two people are a little too much.

The child's precocious puberty is peripheral precocious puberty, that is, it is not the child's own development, but because of various external factors.

This sexual development usually starts at the age of 10 to 12 for girls and about two years later for boys. Moreover, there is a time process and it is gradual. General development takes five to six years to complete.

The child, like a ripened tomato, let the junk food and junk eating habits ripen in a very short time. Looking at the appearance of red, in fact, it is still green. Fell to the ground and snapped. It was all green.

Really, it is a morbid sign directly. If it is not corrected in time. The future, let alone the future, is a big problem if you want to live a healthy life.

In fact, the child's rickets and her sexual development are linked.

Rickets is called rickets for children and chondrosis for adults. Before liberation, the incidence rate of China was extremely high. After the founding of the people's Republic of China, it gradually began to improve and became less and less.

With the gradual improvement of living standards, the disease has a little upward trend. Away from physical labor, less outdoor exercise, and then after the change of dietary structure, the disease began to increase slowly.

Carbonated drinks, various snacks, and even cosmetics, the so-called children's cosmetics, are all incentives.

Drinking a lot of carbonated drinks for a long time, and then heavy learning tasks and reduced outdoor activities directly lead to children's vitamin D deficiency. Vitamin D is a hormone that affects osteocalcin. Generally speaking, without vitamin D, bones can't develop normally.

Lacking osteocalcin, the body can't help it. The materials are not enough. We can only build one alive. It's a passive Jerry building.

For example, the chest cavity with rib arch structure should have been very beautiful, like two doors, but the material is not enough. We can only make do with it, and directly build a narrow and ugly triangular cavity, which will directly affect breathing.

This shape causes the child's lung muscle weakness, and then the lung clearance ability decreases. Pneumonia comes, which is a direct chain reaction. Therefore, there are reasons why children love illness and do not love activities.

"What are you going to do?" The director of Pediatrics was invited. Frown at the medical record.

"Let's solve her rickets first. I want to do shock treatment with a large amount of vitamin D quickly, and then deal with her precocious puberty. If she is treated at the same time, the dosage is too large. I'm worried that her kidney and liver can't stand it." Zhang Fan explained.

"Well, that's all I can do. You treat first, and then we'll back you up. Really, there are more and more such children now. " The director of Pediatrics sighed and said.

"A lot?" Wang Yanan asked.

"Many, especially in recent years, especially girls. I never saw it when I was young. Today's children are baby bumps. They are deeply afraid that they can't eat well and can't keep up with nutrition. They are all kinds of high-energy foods, such as meat puree, vegetable puree, and then all kinds of chicken fillet, fried chicken thigh, and so-called super tender steak.

You say, what kind of meat and vegetables that can last for many years can be good? Also, is it normal for a chicken leg to be thicker than a pig leg!

Look at that child, sitting on the bed, don't talk, ignore her height, and directly be a mature woman in her thirties? Terrible! ~ "

The director of Pediatrics shook his head and walked away. "These days, we've been staring at the little girl, the impact of high-dose drugs. We must worry. If we don't worry about this treatment, it may be fatal. "

"Good!" Wang Yanan and Xue Fei said in unison.

### **Chapter 383**

The little girl's laboratory report suggests that the bone scale line has not been completely calcified. This means that girls are still almost mature. In return, the child's other signs can support the treatment

With the development of medicine, science and technology make the treatment more refined, especially in western medicine, weight is also a very important examination. Fine expression is quantification, especially the improvement of modern drug purity. Once it is overdosed, it is very dangerous.

Western medicine pays attention to the purity of drugs. If intravenous injection is required, the ratio of drugs can be single, preferably single. If single drug cannot be used, we must also pay attention to pharmacological changes.

This is also the reason why it is difficult for traditional Chinese medicine to take intravenous treatment. Chinese intravenous therapy is very unique. Anyway, when it is available or not, it is usually used for intravenous therapy. Therefore, the market is very large, and pharmaceutical companies have followed suit and developed some intravenous medication of traditional Chinese medicine. Then, all kinds of discomfort have created a large number of patients' allergic history.

Looking at the little girl's inspection report, Zhang Fan sighed and said, "trace elements and some vitamins are lacking. Now we can only cure the most important disease in front of us. "

"Start shock therapy today?" Wang Yanan asked.

"Yes, you talk to your family about your condition, and then sign the authorization. I'll give you a doctor's order now."

"OK."

Trace elements and vitamins in the human body are not important at ordinary times, because their content in the body is very, very small, and most of them are recycled, just like chemical catalysts, and the quantity seems to remain unchanged forever.

In fact, for a healthy body, there is really no need for special attention. A normal diet can be supplemented. But once it's lacking, it's not easy to repair. Because the body needs less, it is relatively inert to the way of absorption.

Moreover, once a long-term lack, the diseases caused by the lack of these trace elements are also very strange.

"It's really hard to mend. Why are there so many strange children now?" Xue Fei looked at the laboratory report and said in wonder.

"What's the matter? Why such a big feeling. " Zhang Fan glanced at Xue Fei strangely.

"Hi! I'm not afraid of your jokes. Isn't my eldest brother's family in their hometown? Because the couple want to go out to work, the children are in their hometown. They are deeply afraid of treating their children badly.

What children want, as long as they are within their ability, they will definitely be satisfied. He asked for a computer to study. My big brother bought a computer, but you can play games on the computer.

But this bastard doesn't learn well, \* \* \*. Then there is which, and several times a day. Half a year didn't come. I was ill. He was admitted to three Western Sichuan Medical University. "

"What disease?" Zhang Fan is a little curious.

"What disease? Hi, a lot. The mucous membrane of the whole body keeps festering, which can't be seen directly in the mouth. The tongue is like dry land, with a fragmented opening.

And the hospital even gave a psychiatric diagnosis, worried to death my brother's family. Ah! "

"Well! The masts are gone! The loss of trace elements in this way is really fast and much! "

"Who said no, eh! When I was rolling, it's almost painful now. It's only a long time. My nephew is as thin as a piece of paper. "

After a while, the little girl's mother followed Wang Yanan to the office.

"Dr. Zhang and Dr. Xue, this treatment is so dangerous that there is a possibility of death?" The uneasy mother looked pitifully at Zhang Fan and Xue Fei.

Wang Yanan explained his illness and really scared the child's mother.

"There is a certain danger, but we will also be very careful and careful." No one can guarantee that there will be no problem with such a thing.

Impact therapy is to dance on the edge of the cliff. If you dance well, it's wonderful and beautiful. If you don't dance well, it's rotten, but there's no way. If there are other ways, Zhang Fan and they won't choose this method for treatment. Who will risk his job if he's okay.

Because the human internal environment, that is, the cellular environment, is almost a balance formed by the exchange of various ions. Once the concentration of some special ions is too high or too low, this balance will be broken, the internal environment will be destroyed, and there will be problems with any heartbeat and cell activity. The light is nausea and vomiting, and the heavy is the failure of various organs.

"Let me tell my child's father to come to the hospital. I can't be the master alone. Ah! " The child's mother called with a sad face. At this time, she regretted and her intestines were blue.

The child and his family are here. There's no way. The danger has to be treated.

After Zhang Fan was ready, the head nurse specially sent three nurses to join Zhang Fan's treatment.

"First level nursing, ECG monitoring, continuous oxygen inhalation and dynamic blood glucose monitoring." Zhang Fan said as the nurses prepared.

Calcium is lack of routine treatment. The dose of vitamin D2 is oral for 2 ~ 5ug days, while the impact treatment is to give more than ten times the drug dose, not oral, direct intravenous administration, and this thing can also be stored in the fat layer. A little carelessness can reach the fatal dose, so it is very dangerous.

Because it was special treatment, the deputy director of the Department also came. Pediatrics also came to two doctors, "let's start." Zhang Fan looked at other doctors and said to the nurse.

ECG monitoring is on. The little girl has an oxygen plug in her nose and a urine bag under her body. The nurse began intravenous infusion. The medicine began to quickly enter the child's body with the ticking of the plastic tube.

With the increase of time, Zhang fanxin hung up. This kind of thing varies from person to person. The probability of accidents is too high. It's really hard to control.

"Disgusting? Do you have a headache? Dozing?" Zhang Fan looked at the ECG and asked the little girl in a low voice.

Looking at so many doctors and nurses, the little girl was a little afraid and hesitated for a long time before she said, "don't sleep! No nausea, no headache." Just when the little girl hesitated, Zhang Fan couldn't help but stop taking medicine. Really, not nervous is false.

Zhang Fan was frightened by the little girl. He wanted to slap the little boy twice.

"Has the dialysis department contacted?" The deputy director whispered in Zhang Fan's ear.

"I'm in touch. We have a dialysis machine specially reserved for us to go for dialysis at any time." Zhang Fan also said in a very low voice. Although the child may not understand, he tried to avoid it if he could.

The ticking liquid continuously entered the child's body. The families outside the ward are also very worried about such a big battle in the ward.

"You said baby would be OK! You said, "why haven't they finished the treatment?" The child's mother kept asking. She kept looking at her husband for a while and quietly lying at the door of the ward, looking in through the crack in the door.

"Can you settle down for a while and stop walking around. Now it's all like this. What else can I do. Can I decide whether something happens or not?" The child's father was also anxious. His own hair was pulled up into a chicken nest.

"I'm in a hurry. I want to sit still for a while, but I can't panic. Oh, wrong! Before treatment, we should send some red envelopes to the doctor."

"What are you doing, Jijiwaiwai, jijiwai. Stop talking! Do you think it's easy for me to say this at this time? " The man couldn't help it. His red eyes were about to burst into flames.

This is the difference between men and women. In fact, the child's mother doesn't have to look for problems. This is also caused by being too nervous. Speaking is a way for her to vent.

Men, when under pressure, are often silent, silent, until they carry the pressure or are overwhelmed by the pressure. So many times, men may not be better than women in the face of pressure.

"Squeak." The deputy director of orthopedics came out and the pediatrician who followed him came out.

"Doctor, doctor. Is the child okay? " The child's mother jumped up.

"Today's treatment is over. There's no problem at present." The deputy director of orthopedics said a word and left. In the ward, only Zhang Fan and his team are left.

Wang Yanan felt that he had collapsed at this time. This kind of doing nothing is just watching the patient.

As if expecting an accident, I repeatedly practiced the rescue measures after the accident in my mind.

Really, it's too uncomfortable. It's like swallowing dates. The dates are stuck in my throat. They can't go up or down, hold back! Really hold it.

"Baby!" The child's mother can't be happier when she sees her child lying in bed and nothing at all. Before treatment, she was really frightened by doctors.

"Mom!"

"Doctor, how's it going? How's the child treated?" Then the father of the child came in with a chicken nest hairstyle.

"It's hard to say now. We have to treat it at least two or three times." Zhang Fan said.

"Two or three more times." The child's father is crying. It's too stressful.

In fact, the family members are under great pressure. Zhang Fan and they are not.

## **Chapter 384**

The growth of doctors is actually like this. Treat a special medical record with rich knowledge. Rescue a critically ill patient and improve medical technology to a higher level. A big man in the medical field of Cardiology once said that he was an immature doctor who did not personally send away more than 200 doctors.

Although this is debatable, it also reflects the difficulty of doctors' growth. Learning and using are really different things in medicine.

Don't say you can use it. Some skills can't be used unskilled. There's no time for you to think at a critical juncture. Almost all of them are subconscious actions, which are tempered through thousands of years.

There are also doctors who fish. For critically ill patients, they can hide, prevaricate and avoid. Anyway, they are just a profession and a job. In fact, it's a pity to be a doctor with this mentality. It should be good to be a host. Wearing a white coat is a little

"Did you take a little girl?" When he came home from work, as soon as he entered the door, Shaohua gossip came.

Zhang Fan is strange. Generally, Shaohua seldom gossip about Zhang Fan's unit.

"Yes, what's the matter? How do you know?" Zhang Fan asked in wonder.

"What's more, Wang Yanan just called me and said that she was hit. So are you and Xue Fei. It's too annoying and makes fun of others." Speaking, Shaohua involuntarily supported his chest.

In fact, women pay attention to this aspect. Just like men pay attention to their ability in one aspect.

"Is this a complaint? I didn't make fun of her! Don't listen to her nonsense. " Zhang Fan felt wrong as soon as he heard it, so he quickly picked himself out. Home is not a reasonable place. Although some things are unclear, they must be maintained and maintained by both sides.

"Really? Anyway, you men ~ ~ "Shaohua hangs Zhang Fan" Do you dislike mine? " Speaking, Shaohua quietly climbed on Zhang Fan's back, and his small hand had slowly groped near Zhang Fan's rib fork.

The meat here is small and thin. If you drag it, it's very exciting.

"No, how can I dislike it? I can't even like it." Zhang Fan felt the murderous spirit behind him. He changed his shoes and said with Shaohua on his back.

"If you despise me for being small, I'll drag your hair up!" Shaohua lies on Zhang Fan and whispers in Zhang Fan's ear. Shaohua deliberately sticks to Zhang Fan's earlobe.

Zhang Fan's hair stood up. He was not afraid, but said that itching was not itching, and that comfort was not comfortable. Anyway, it was a bit like shivering. Xiaonizi now knows Zhang Fan better and better.

What Zhang Fan likes, she responds to him in a different way, and Zhang Fan is actually the same, "well, come down quickly. Uncle and aunt are coming. " Zhang Fan was a little embarrassed and walked into the bathroom with Shaohua on her back.

After Zhang Fan washed his hands, they were bored for a while. In fact, their sound was heard by the old couple in the kitchen“ Hey, ask Hua Zi privately and get engaged quickly. Don't wait ~ ~ "

"Why? There's no woman urging engagement. The more you live, the more confused you become. Don't worry, I think Zhang Fan and Shaohua should be sensible. "

"Know a fart ~!" The old man threw down the green onion in his hand and stopped working. Then he went to the living room with a severe cough, pouted and turned on the TV. According to Zhang Fan, he was very satisfied, but when he thought that his daughter was cheap, he didn't get it well.

"Come on! Come on! Come on! The old man is mad. " Zhang Fan and Shao Hua hurried out of the bathroom.

In Lan City, Zhang Fan's parents also began to prepare. A poor family is worth thousands of yuan. If you want to go out for a long time, you should pack up many things in advance. Although they will start in winter, there are too many things to prepare in the early stage.

For example, their old house will be sold. But the houses in this place are really hard to sell. They are old and the location is not good. Coupled with the closure of the unit, younger people with thicker family background moved out of this place early. So the old house is more and more difficult to deal with.

"Sell it! Eight thousand is eight thousand. If I don't sell it again, I don't think I can sell it. " Zhang Fan's mother said to Zhang Fan's father.

"Hey, you said that when we bought this house, our family spent thousands of dollars and borrowed money everywhere to buy it. But you see, the prices of houses all over the world are rising. Let's drop them here. " Zhang Fan's father looked at the declining factory and community a little disappointed.

"What can I do? The factory can't work. It's inconvenient to eat vegetables in this place. Hey! Why don't you discuss it with Zhang Fan? "

"Discuss a fart. I bought it myself, not from his grandfather. Why should I discuss it with him!" Zhang Fan has now become the pillar of the family and replaced his father, so the old man is a little unwilling.

His son is old and sensible. In fact, he is very pleased. What he doesn't want is the aging years.

"You stubborn old man, alas! In the future, my son will not be alone. It doesn't matter if we don't discuss with him, but it still doesn't matter if we don't discuss with him. But in the future, we'll talk to Shaohua about the major events in the family, otherwise it's hard for small stone to be a man. "

"Let's talk about it, eh!" Finally, more than 80 square meters of houses were sold. The old man and the old lady also completely moved away from the factory and mining community where they had stayed for most of their lives.

None of the old guys who are still in the factory are envious. Who wants to stay here? The dilapidated factory area is like an era about to pass, with decay everywhere.

Director Gao gave Xue Fei a patient with hallux valgus. Let Xue Fei look constipated. When Lao Gao said there was a patient, Xue Fei's eyes were full of money. As a result, the hallux valgus almost choked back in one breath.

"Why is it a hallux valgus. Shouldn't it be a hip change, shouldn't it be a knee change? " After checking the room, Xue Fei talked endlessly.

"Well, it's like a complaining woman. Keep talking. Hallux valgus is hallux valgus. " Zhang Fan said that this thing can bring rhythm. If you are immature, you can definitely bring this thing into the ditch.

"Hehe. I deserve it. I haven't had such an operation yet. " Wang Yanan said happily.

"Doctor Zhang, wait for me." When Zhang Fan and the three of them were walking and talking, the patient with hallux valgus came out.

The patient is a beautiful young woman. She is a very beautiful young woman. Fair skin, melon seed face, big eyes and facial features are also very exquisite, and there is a very elegant big wave.

Tall, the mellow place is mellow, the thin place is thin, plus a unique sense of pride. Really, it's beautiful and temperament.

It's not comparable to a stunted firewood girl like Wang Yanan. If Wang Yanan didn't have a beautiful face, really, I don't know people thought he was a thin boy.

Slender long legs, thin and straight legs, plus body shaping jeans. Really, it's the beauty that mature men

dream of. But the young woman can only see above her feet. Once you look at your feet, you destroy all your temperament.

At the foot of a pair of very fashionable flat board shoes, where the shoes are close to the thumb, there is a very obvious big bag! Destroyed a beauty alive.

"What's the matter?" Zhang Fan looked back and saw that it was a patient.

"Well, there are many people and patients in the ward just now. It's inconvenient. Is there a convenient place? I'd like to have a word with you. " Young women also pay attention to their words. They are not in a hurry.

As soon as he said this, Xue Fei's eyes lit up. The guy took the man into the doctor's duty room very politely. Wang Yanan involuntarily tilted his lips. The green and astringent girl envies this familiar woman most, but she also hates this familiar woman most. It is estimated that the same sex repels each other!

The woman is said to be a small leader of what bureau. After passing Lao Gao, she was directly admitted to the hospital. She also took great pains for this finger.

All kinds of small folk prescriptions, all kinds of orthotics, orthotic shoes, suffered a great crime and didn't take off the orthotic shoes when sleeping. But recently, this toe hurts more and more. She often wakes up in the middle of the night.

I have no choice but to come to the hospital. In small cities, it's convenient to inquire about anything. Lao Gao in orthopedics is well-known, so people directly come to Lao Gao.

"Dr. Zhang, Dr. Xue and Dr. Wang, this is my little pleasure. My operation is troublesome to you. I've really tortured recently. I can't sleep all night."

"Well, no, really No." Zhang Fan looked at three cards and quickly refused. Xue Fei almost died of anger.

"Hehe, it's all right. It's just a few supermarket shopping cards. It's nothing, just a little thought. I'll ask you. " Then he put the card into Xue Fei's hand and went out of the doctor's duty room.

This woman is also a human spirit. She understands society and people's hearts. It seems that Zhang Fan is not faking. She will probably understand it when she looks at Xue Fei. The king of hell likes to see that children are difficult to deal with. She doesn't care about a few cards. She can buy peace of mind.

"Here, this is yours." Xue Fei happily distributed the card to Zhang Fan and Wang Yanan.

"I don't want it." Wang Yanan refused directly and left the office. I don't know why, she just doesn't want this woman's things.

"I don't want it either." Zhang Fan thought about it and said.

"You're stupid. Do you think women lack these cards. If the other party's family conditions are worse, I will resolutely not, but they are leaders, do you understand! Leadership!" Xue Fei glanced at Zhang Fan.

"Take it, I really don't want it!" Zhang Fan said again.

"Really not?"

"No!"

"Don't count, no, I want it. This is what you don't want, not what my brother doesn't give me!" Xue Fei asked again.

"Really not." Zhang Fan also made sure. During the transfer period, Ouyang pointed to his inner whip and really valued Zhang Fan's problem of accepting other people's small things.

And with the current increase in their income, it's not worth taking other people's things.

"Where shall we arrange the operation?" Xue Fei asked after putting it away.

"Perfect the inspection. Line it up tomorrow." Zhang Fan said.

Hallux valgus is that the angle between the metatarsal and the toe is greater than ten degrees, which is hallux valgus. In fact, generally speaking, the tip of the thumb is getting closer and closer to other fingers, and then the connection between the thumb and the instep protrudes.

The incidence rate of this disease is nine times that of men. The main inducement is inappropriate shoes. Wearing pointed shoes and high heels is the most likely to induce the disease.

The effect of conservative treatment of this disease is general, and it is generally surgical treatment. However, although it is a minor disease, this disease is annoying because it is easy to relapse.

"You do it or I do it?" Zhang Fan and Xue Fei left the duty room and went to the office.

"What do you say!" Zhang Fan doesn't even look at Xue Fei. How can he have surgery.

"Hi! I love you. Honest and upright, bent over for the people! Well, you did the operation." Xue Fei shamelessly flatters Zhang Fan.

**Chapter 385**

It rained heavily. After getting up in the morning, Zhang Fan found that it was raining outside. Looking out of the window, the rain on the street began to bubble“ It began to rain so heavily before summer came! ” Zhang Fan said to himself wondering.

"Zhang Fan, come and wash your face. Send me after dinner. It's raining heavily. I'm going to work early today. One of my clients has an appointment with me and will give him a loan today. "

When Zhang Fan looked out of the window in a daze, Shaohua shouted in the bathroom“ Good! ” After Zhang Fan entered the bathroom, he saw Shaohua blow his hair again.

"Go early and wash your hair. Let me blow it for you. It's raining outside. It's easy to catch a cold if it doesn't dry." After Zhang Fan found the hair dryer in Shaohua's hand, he began to help Shaohua blow his hair.

"I forgot. When I heard the rain, I remembered that one of my customers was engaged in civil engineering. Once it rained, he had to rest, so I remembered.

One of my customers has a bitter look and seems to have a good relationship with our president. If he is neglected, he will complain. Last time, he sued Xiao Liu of our department because he didn't take the initiative to pour water for him. " Shaohua was enjoying Zhang Fan's service while talking.

Black hair, like satin, Zhang Fan gently shakes the hair dryer, looking for hair that hasn't dried yet.

"Are you ready? Come on. Come and eat. " Shaohua's mother shouted at the dinner table.

"Coming, coming, coming soon." Shaohua promised.

Milk tea, Nang, side dishes and some sausages are complete with protein, fat and vitamins“ The heavy rain began last night. Such a heavy rain is rare. There must be trouble. " The old man looked out of the window with milk tea. After Zhang Fan sat down, he said to Zhang Fan.

Before Zhang Fan could answer, she was rejected by Shaohua's mother: "eat quickly, less God's day. After dinner, accompany me to the vegetable market to buy some vegetables. There is no food at home. "

"Hum, what do you know!" The old man was wronged and drank milk tea in one gulp.

"Come on, let's go. I'm too late. " Shaohua casually took some Nang cakes and shouted. After Zhang Fan finished eating three bites and two bites, he also ate, put on his shoes and went out.

"I know I have something to do today, so I don't get up early. Not eating well day by day affects Zhang Fan. Then I won't cook. " The old lady was angry when she saw that more than half of the food was left.

"Hey, hey, I see. My dear mother, let's go. Be careful. It's raining and slippery. If you can't, just wait until we get off work to buy vegetables. " Shao Hua comforted his mother with a smile.

"I can't count on it! Let's go. Wear hot clothes, "the old lady calmed down. The old man listened to his old woman's constant nagging, frowned, and muttered in his heart, "it's not a child!"

Zhang Fan drove Shaohua to the unit. It's raining, the speed is very slow, and there's a bit of pressure on the road. "There's an accident ahead." Zhang Fan poked his head and saw the road ahead.

"Is it serious?"

"It shouldn't be serious, and the speed is not serious. It's probably a scratch."

After a while, Zhang Fan sent Shaohua to the unit, "I'm leaving. Be careful on your way. I put an umbrella in your car, right in the back. "

"OK, pay attention, too."

In the frontier, rain is better than snow. You don't have to arrive at the unit in advance. If it snows, it won't work. Snow is blowing the charge, and you must arrive at the unit half an hour in advance.

When Zhang Fan arrived at the unit, there was a little ponding at the gate of the hospital“ It's been raining all night and hasn't stopped yet. " In the surgery building, Zhang Fan saw the director outside the chest.

"Yes, there are probably a lot of traffic accidents today." They chatted casually and went to their respective floors.

The work of the hospital went on as usual when it rained. The patient with hallux valgus was pulled to the operating room early. Routine disinfection, Zhang Fan began the operation with Wang Yanan.

Hallux valgus, a small hallux valgus, has almost more than 200 surgical methods. Many surgical methods are not a good thing, because this means that everyone is not sure which surgical method is the best and is constantly exploring.

Of course, Zhang Fan has an advantage later. Because of the system, he knows what kind of operation is the trend in the future, but he can only do it by himself and tell others, but others don't believe it.

This kind of thing requires data. Only data can convince others, but now the forensic medicine in China still doesn't care about this kind of minor surgery. Do it yourself. It is estimated that there may be some convincing data when you retire.

"Zhang Fan, let's use that kind of operation. I read the operation data all night last night. There are too many operation methods. I have advantages in what I think." Wang Yanan works very hard. She hasn't done this kind of surgery. When she meets it, she does her homework in private.

Zhang Fan looked at the girl with a little pouch and said, "yes, if there is no advantage, it is estimated that they will be eliminated. Let's use a combination of lysis and cartilage correction. "

"Well, I haven't seen such an operation." Wang Yanan slightly lowered his head and thought, then raised his head and said definitely.

"Have you read more than 200 ways?" Zhang Fan was a little surprised. He didn't expect the girl to be so liver.

"Well, I'm finished." Wang Yanan said with a little pride.

"Don't be so liver, you will grow old quickly." Zhang Fan also said casually. It's nonsense. Being a doctor doesn't mean being a doctor.

"Hey, there are more and more graduate students. I'm a girl again. Xue Fei is unreliable. You may leave one day. After I don't know the liver, I may suddenly have no place one day. " The girl said with emotion.

"Well! Your uncle ~ ~ "Zhang Fan felt inappropriate, immediately changed and said," if you don't understand, ask me directly. Don't worry. The operation is gradual. " Zhang Fan ignored himself.

"My uncle will retire sooner or later, and I can't help but worry. I have to learn from you. Although I can't reach the level of your efforts, I should at least do half of it, or I'll become a Xue salted fish."

"OK, just have confidence. Let's start." As soon as Zhang Fan heard this, he felt that the girl thought very clearly, so he didn't say much. They were all adults. They chose their own way and went their own way. It's hard to persuade.

In fact, this operation is not difficult. The difficulty is the angle control, the angle formed by the toe joint. If the control is not good, it is very easy to relapse.

From this perspective, it is not required to die, but to consider all aspects, such as the patient's weight and whether to engage in heavy physical labor. Incomplete consideration is a curse. So sometimes when

you go to see a doctor, don't hide your career.

"Start!" Zhang Fan said and started the operation.

First, make a 5cm longitudinal incision on the dorsal side of the great toe between the first and second toes, extending near to the metatarsal head, "here we should pay attention to that this is the dorsal peroneal cutaneous nerve and vein of the great toe. Don't damage it."

With this, Zhang Fan pulled the dorsal fibular cutaneous nerve and vein of the great toe to the tibial side.

Then continue to separate deeply along the fibular side of the joint capsule of the thumb, metatarsal and toe, cut off the transverse metatarsal ligament, and cut off the transverse head and oblique head of the adductor pollicis from the base of the proximal phalanx and the lateral sesamoid bone.

Then blunt separation to the proximal side, suture the end with thick silk thread, and leave a long thread for standby. Cut the hypertrophic lateral joint capsule along the joint line from the dorsal midline to the metatarsal side, so that the thumb can move inward, and then tie a knot for fixation.

Zhang Fan explained to Wang Yanan while doing it. It's too difficult to explore the operation by yourself. A teacher must take care of it. A good teacher can avoid many detours.

The operation was quick and ended in more than half an hour“ Can I have such an operation next time?  
" Wang Yanan said to Zhang Fan in plaster.

"Do you understand?" Zhang Fan asked.

"I see. You taught me in detail. I think I should be able to. "

"That's OK." Zhang Fan nodded his head. In fact, the operation was simple. It was to open the skin and muscle, open the tendon, untie the thumb joint, then adjust the position to be restored, then sew and cast it.

Just then, Lao Gao came in, "I guess your operation is finished. Hurry up and prepare for the Kwai two car accident. All are open fractures. They must be operated as soon as possible.

"That place is broken?" Zhang Fan asked.

"One ulna and radius, one femur." Lao Gao spoke and went out of the operating room to the operating room of another group.

"You send the patient back to the ward, give the doctor's order, and then come up. I'll grab the femur. Remember to make it clear to the patient's family that the toe must be fixed in the correction position with a plaster bandage, and the plaster can be removed after 3 weeks to practice activities and walk in

shoes. " Zhang Fan made a special explanation after he put the plaster on.

"OK, don't worry. I'll go down and sneak Xue Fei up. I know you can definitely get the sick back. I have confidence in you. Come on! " The girl made a gesture of squeezing her fist and cheering.

"OK ! Rest assured. " Zhang Fan smiled.

There are many accidents when it rains and the road is slippery. The wounded were a three jump driver and a three jump passenger. San Tiao Zi is actually a motorcycle with an iron box. It was raining hard and I couldn't see the road clearly. I bumped into a car.

The car driver and passengers didn't break their skin. As a result, it was too tragic here.

Zhang Fan went out and went to the meeting room in the operating room. Inside, Lao Gao, deputy director and Xu Xian are watching the film.

"Director, where's the patient?" It'll be delivered right away. This is a film. Look at it first. As he spoke, Lao Gao gave way to the computer because it was a local area network. After the radiology department took the film, it was displayed on the computer here.

"The radius and ulna are not very broken. The femur is quite heavy. "

"Yes, which one do you do?" Lao Gao asked.

"Let's do the femur. Dr. Xu's team is tired recently. We'll share some labor with them."

"It's okay, we can do it!"

"It's better if it's all right. We've been resting for a long time. We're a new force. Let's do femurs. Director, deputy director, what do you say? "

"Hehe, OK. You make femurs. "

"Look, hehe, this is Doctor Zhang. It's overbearing enough." The deputy director smiled and said a pun to Xu Xian.

"Well!" Xu Xian has no choice. When Zhang Fan opens his mouth in orthopedics, Lao Gao will agree. Even if Lao Gao is absent and Zhang Fan opens his mouth, the deputy director has to weigh it. The technology is here. He had to think about it.

## **Chapter 386**

Rain, slippery roads, limited vision, more accidents. The hospital is busy with many accidents. In fact, due to the rain, there will be fewer people in internal medicine than those who see doctors.

But compared with surgery, especially traumatic diseases, there are more. There are also many people who don't pay attention to falling in the ditch, slipping and falling, and operating errors caused by rain in all walks of life.

Most of them are car accidents. Rainy and snowy weather is the busiest time for traffic police and surgeons. After Zhang Fan, Wang Yanan and Xue Fei finished the hallux valgus operation, they began to perform a femur operation robbed by Zhang Fan.

Unexpectedly, on this day, surgery continued, from morning to evening. Six operations a day, although the amount is not large, it is not small.

At noon, Wang Yanan bit his teeth and ate the boxed lunch sent by the canteen to the operating room. "You said that now people in our canteen take great pains to buy such awful rice. It feels like it pierces their throat. I don't know where the people in our canteen bought it. "

"Hey, the canteen raised us as pigs. Look at this meat, the hair hasn't been scraped clean. Hey! I'm so worried. " Xue Fei said reluctantly.

"There's no way. There's surgery below, otherwise I don't want to eat in the canteen." Zhang Fan doesn't feel well either.

"No leader or expert is as powerful as the boss of our hospital canteen." Xue Fei spoke a little louder.

"Don't complain and eat quickly. We all eat, you can't eat. " The old man came over with his lunch box.

"Director, why didn't you go to the clinic today?" Xue Fei immediately stood up, gave Lao Gao a place, put down his lunch box, went to the water dispenser and poured Lao Gao a cup of hot water. As a disciple, he still had some enlightenment.

"There are many operations today, but I can't do it. The three orthopaedics departments are busy. Zhang Fan, what about your experiment in liver surgery today? The Dean specially told me to pay more attention to what side of the matter. " Lao Gao asked after taking a sip of the hot water brought by Xue Fei.

"I can't do it today. I have to have an operation. When I have plenty of time, I'll just go and make up for the work I owe today." With surgery, Zhang Fan is absolutely reluctant to leave.

"Hehe, it seems that everything is false. Interest is the best driving force." Lao Gao looked at Zhang Fan and Wang Yanan with a smile. Xue Fei was a little embarrassed. But fortunately, he has a thick face and doesn't care.

At more than ten o'clock in the evening, Zhang Fan and them came out of the hospital. After the operation, you have to give a doctor's order and an examination list the next day, because there are many examinations, such as fasting blood drawing. The night nurse of the previous day started the work before going to work in the morning, so the doctor must write the doctor's order the day before.

Major medical records and surgical records must be completed on the same day. If they can't be completed, the computer system will automatically lock the next day, so there's no way to write them directly. Also talk to family members and urge them to pay. There are many trivial things anyway. So, when we're done, it's dark.

"Come on, I'll take you two home. It's been raining all day and night!" Zhang Fan and the three of them dragged their tired bodies out of the hospital.

"It seems that I have to buy a car, or it's really inconvenient." Xue Fei sat on the co pilot, looked at the people taking a taxi on the road outside and said thoughtfully. This is the case in small places. Usually no one takes taxis, and the streets are full of empty cars. On rainy and snowy days, if you want to take a taxi, you can only rely on luck.

Too tired, no one has the desire to chat. After sending them off, Zhang Fan also went home quickly. He was hungry and almost starved to death. Zhang Fan has had enough food outside. If he can't eat it, he will not eat it.

"Just got off work. Are you busy today?" When Zhang Fan got out of the elevator, Shaohua opened the door for Zhang Fan without taking a few steps.

"Yes, there are many operations today. You weren't late this morning." Zhang Fan said with a smile. Zhang Fan changed his shoes and washed his hands. Sit down and start eating.

"Oh, it's almost too late. As soon as I entered the door, the bitter customer arrived. I really don't understand. The bank didn't work. What did he do so early?" Shao Hua complained.

"Try it. This is fresh Chinese toon. I bought it in the morning." Shaohua's mother is busy greeting Zhang Fan for dinner. Zhang Fan often gets off work late. The old lady specially prepares a big pot for Zhang Fan to warm rice and vegetables at any time.

"You see, the clouds are thick and dark. It's really strange this year. It's raining so heavily before summer. The weather is really getting more and more strange now." Shaohua's father also sat at the dinner table and watched Zhang Fan eat.

At home, I can talk to Zhang Fan, but my wife can't talk!

"It seems to be some El Nino phenomenon." Zhang Fan responded while eating.

"Ah! It seems that apple production will be reduced again this year. It's estimated that the flowering period will be delayed in such a heavy rain." The old man is still thinking about the orchard on the farm.

Zhang fan can't answer this because he doesn't understand. After dinner, Zhang Fan and Shaohua casually read a book together and went to wash. Today, they are really a little tired. Zhang Fan feels that his eyelids are a little heavy.

In the dripping rain outside the window, Zhang Fan went to sleep. That's all he wanted. He fell asleep quickly. He didn't hesitate at all.

There are many mountains in the west of China, especially in the tea vegetable city. Many villages and towns are built on the hillside. A little flat land is reserved for cultivated land.

Tiaoshan town is a small pure agricultural town. It is rich in water resources. The snow water from Tianshan converges into many large and small rivers. The river forms many small alluvial plains. The land is fertile, and it is also the main rice producing area in the frontier.

Because there are too few areas that can produce rice in the frontier, the output is not high, and even the rice in the frontier province can not be fully supplied, so the frontier rice is not very famous.

In fact, the rice here is of good quality, because it can only produce one crop a year, so the rice smells delicious. Zhang Fan thinks this rice is much better than the so-called Thai fragrant rice in the supermarket.

Late at night, when everything is silent. Zhang Fan's phone rang, very harsh, accompanied by the rain outside the window, as if the phone rang through the whole community.

Doctors, as long as they are doctors at the county level and in hospitals above grade II and grade A, their mobile phones must be turned on and on standby 24 hours at any time. This is nothing to discuss at all.

If I can't contact you at the critical moment, the superior will be held accountable whether your phone is dead or broken. As soon as the phone rang, Zhang Fan was like a robot pressed the switch. It took less than ten seconds.

The phone was connected by Zhang Fan, "Dr. Zhang, this is Xiao Liu from the medical department. Now

please go to the hospital immediately."

"OK. I see. " They hung up before they could ask. As soon as the phone hung up, Zhang Fan looked at the time, 4 a.m. He quickly and quietly washed his face. Just when Zhang Fan was going out, Shaohua also came out of the room.

The girl narrowed her sleepy eyes and said, "what's the matter? Is there another emergency call? Let me get you a thicker coat. It seems cold outside. "

"It's all right. Go to bed. It's still early. Leave me alone. " Zhang Fan put on his shoes, opened the door directly and left. With the voice controlled lights in the corridor, Zhang Fan went downstairs. Shaohua watched Zhang fan drive away through the window and returned to bed melancholy.

It was the officer of the medical department, not the Department, who informed Zhang Fan. Therefore, it is estimated that the matter is not small, and Zhang Fan is also worried. This is the medical system in China, doctors who are formally trained.

Once informed, they will arrive as soon as possible. It is not a feeling or spirit, but the inheritance and training of the national medical system for decades.

Zhang Fan drove his car to the urban highway. The water splashed by the wide wheels was like boating in the water. When Zhang Fan arrived at the hospital, the door of the hospital was open and the searchlights inside had been turned on.

And not only the ambulance, but also the police car, with the flashing lights. As soon as Zhang Fan saw it, his heart clicked. Something big happened.

### **Chapter 387**

The Olympic year, for China, is an ill fated year. But before and after the Olympic year, it seems that China is also open. All kinds of drastic changes, dazzling, people are overwhelmed. At this time, the country seems to have entered the expressway from the automobile gravel road, and the speed soars.

Let's just talk about the car. When Zhang Fan went to school, although he was in the northwest, Lan City was also a provincial capital, but ordinary people really didn't dare to think of private cars. If anyone drives a car, he can be admired by others.

But it's less than two years, and the car has become a burden. The hospital was always open. Later, with more and more cars, the security department dared not open the door. As long as you open the door for half an hour, you can definitely fill the hospital.

Zhang Fan went to the hospital and couldn't care about holding an umbrella. Jumped out of the car,

closed the door and ran into the outpatient hall in the rain. Because many doctors live in their own community of the hospital, they came earlier.

"What's the matter? What happened? " Zhang Fan sees Xue Fei. Xue Fei is crying and yawning with his mouth open.

"I don't know. I didn't come to the hospital long. I didn't sleep long before I was called."

"Why don't you go to bed early in the evening?"

"Hey, hey, I touched a few." Xue Fei was embarrassed to say that he was stubborn. After a day of surgery, he was almost tired into a dog. He even went to play mahjong. After a while, many doctors arrived.

It's hard to take a taxi in the middle of the night. Many old doctors come by bike. Although they have raincoats, their faces are still as if they had just washed their faces and didn't wipe them with towels.

After a short time, Ouyang appeared. Ouyang was surrounded by an armed police, and there was a people's Liberation Army on the other side. When the soldiers appeared, everyone was nervous.

Although doctors are not always in the front line of danger, compared with other industries. Doctors are also an industry that can be exposed to a little dangerous events.

So when the soldiers appeared, the noisy hall suddenly quieted down. In the border areas, because of the agreement with neighboring countries, few Chinese soldiers appeared. Generally, the armed police were stationed.

"Comrades, help is coming! In Tiaoshan Town, a large area of landslide occurred, and a large area of residential houses were submerged. The disaster was very serious and thousands of people were affected. The specific disaster situation is unknown, but it is clear that many residents have been injured and even their lives are at stake.

I won't say anything more. The natural disaster is ruthless, but people have feelings! In the face of ruthless natural disasters, the people in the disaster area need us most now. As a doctor, as a Chinese doctor in a white coat, he must enter the disaster area without hesitation. There is nothing to discuss.

Now, I order: the rescue team of Chasu People's Hospital shall be established immediately. As long as the director of each department is no more than 50 years old, he will automatically become the deputy team leader of the team, and the male doctor no more than 50 years old will automatically become the team member.

The head nurse arranges the departure nurses. The principle is one to four! Try to select male nurses and female nurses with qualified physical quality.

No matter what circumstances you have, you are not allowed to take leave. I repeat, unless you are willing to leave the industry now, unless you are willing to take off your white coat now. It's urgent, comrades! There is no time to delay, comrades! "

Ouyang, holding a loudspeaker, stood on the inspection table in the hall and said angrily. Because he shouted very hard, his voice became a bit hoarse. The wind blew through Ouyang's thin body from the door, and his gray hair slowly floated up.

Just as everyone recovered, Ouyang said, "now let's invite head Huang Wenxu to speak."

"Dear doctors and comrades, the disaster is in crisis. The vanguard of the army has been pulled out. The feedback is that landslides and road collapses are serious. There is a long way to walk.

So, please be prepared. Comrades with 4WD off-road vehicles can drive their own vehicles. My words are over! "

"Good! Now let's give you a few minutes to inform your family. Prepare the necessary work tools and get ready to go. " Head Huang Wenxu handed the loudspeaker to Ouyang again. Ouyang's tone was much better this time.

Just when everyone called and took stethoscopes and sphygmomanometers, teams of soldiers and armed police entered the hospital and began to move drugs. In this disaster, the dosage of trauma hemostatic drugs, antibiotics, a large number of fever-reducing drugs and painkillers will certainly not be small. Boxes of medicine were moved out of the hospital.

Thousands of affected people are not a small number. Even the troops rarely seen in peacetime have been dispatched. We can imagine how serious the disaster is.

"Shaohua, there is a landslide in Tiaoshan town. We're going to rescue now. Say it to your uncle and aunt. "

"Well! You must be careful. I'll bring you the down jacket right now. I'll be there in twenty minutes. "

"No, don't worry. It's okay. Almost all the doctors in our hospital are going to start. I won't say more."

"You must be careful!" Before she finished, Shaohua heard the blind sound on the phone. She was a little stunned. Then, jump directly. Quickly dressed, then ran to Zhang Fan's room, opened the wardrobe and looked for Zhang Fan's winter down jacket.

In more than ten minutes, everyone is ready. Many hospital doctors have cars, but most of them are urban SUVs. It is estimated that this kind of car can not be used. It was directly rejected by the leaders of the army. Only the 4WD off-road of Zhang Fan and several directors were recognized.

"What are you doing! Come down. " Wang Yanan also wanted to get on the bus in a hurry. As a result, Ouyang, who was standing in the yard and directing, saw it.

"I'm a surgeon, too!" Wang Yanan said loudly.

"No! Seats are limited. " Ouyang's face was livid.

"Dean, don't look down on me. I can have surgery and I can save people! Dean, please! " Wang Yanan cried directly and was excluded from the group. She was too uncomfortable.

"Dean, let her come up. The disaster area must need a large number of orthopedic doctors." Lao Gao said.

"Well, don't embarrass me then!" If it weren't for Lao Gao, Ouyang wouldn't agree whether Wang Yanan cried or not today. Disaster relief, she has experienced too much, she is very clear that disaster relief is not compassionate, but also must have a strong body.

Not to mention doctors, even most of the nurses are male nurses in the operating room and ICU, and most of the female nurses are very strong.

The soldiers got into the truck and most of the doctors got into the ambulance. Zhang fan pulls Lao Gao, Xue Fei, Xu Xian and Wang Yanan of orthopedics. Ouyang sat in the army's command car and opened the way in front.

Zhang Fan's car was mixed in the convoy and set off with the convoy. At the gate of the hospital, Zhang Fan saw Shaohua, the old man and the old lady, and the three anxiously looked at the departing team.

Shaohua holds Zhang Fan's down jacket and looks up. When Shaohua saw Zhang Fan's car, he quickly jumped to send clothes, but the team had started and could not affect the speed of the team. Zhang Fan didn't seem to see it. The car didn't stop and continued to move forward.

"Ah! Hey! Zhang Fan! " Outside the car, Shaohua thought Zhang Fan didn't see her and shouted anxiously.

"Shao Hua, go back. It's too late. Let's go. " Zhang Fan pretended not to see it. Wang Yanan opened the

window and shouted to Shaohua who ran after the car.

Lao Gao looked at Zhang Fan and said nothing. There's nothing to say. At this time, you can't tolerate any affection. If you go a minute earlier, it may be a few lives.

From the rearview mirror, Zhang Fan looks at Shaohua who is far away. Slowly, he can't see

The team is like a long dragon. Although the team is long, it is fast. The traffic police have controlled the traffic in the city. The first one is a personnel carrier. The large searchlight in front of the vehicle illuminates the road ahead from a distance.

### **Chapter 388**

No one spoke in the car, only from time to time, there was an annoying click from the walkie talkie. In the car, except Zhang Fan, everyone else was sleeping. No one knows how long it will take to get to the disaster area, so it's a while to have a rest.

All the way, the team was very fast. But even so, there are vehicles passing from time to time. Zhang Fan pays attention to the license plate. The license plate is very small.

More than 100 kilometers, more than 50 kilometers of high-speed, and some national and provincial roads. After entering the provincial roads, the speed can't get up.

The road is narrow, and there is a fast flowing river next to it. Walking, when the sky was bright, a voice came out from the interphone placed in the car: "attention, drivers, pull over now."

"What's the matter?" When the car stopped, Xue Fei slept all the way. At this time, he was awakened by the walkie talkie.

"I don't know. I'll go down and have a look." The motorcade was too long to see the road ahead. Zhang Fan said after stopping the car.

"It is estimated that the road ahead has collapsed. The vehicle cannot pass. " After all, Lao Gao is much older and has experienced too many things.

Sure enough, after Zhang Fan got off and walked forward for a while, he found that the road ahead had been completely submerged by the collapsed mountain.

"How many kilometers to the disaster area?" Head Huang Wenxu and several people who looked like officers and government officials looked at the map and discussed.

Zhang Fan took the time to take a look and couldn't understand it directly. The map they took seemed different from the one we usually use.

"There are still more than ten kilometers." One of the officers said after measuring gently on the map.

"What should we do? We can march through the landslide area, but the local personnel don't think so. If they march by force, they will be paralyzed when they get there." Another officer said.

Head Huang Wenxu frowned and looked ahead, then rolled up his trouser legs and went down the river. It was a small tributary. There were not many rivers, which flooded head Huang Wenxu's legs.

"No, commander, it rained heavily all day and night. You see, the river is not big. If it's not well in front, there will be a barrier lake. It's too dangerous to walk from here." Said the officer who drew the map.

"I also know the danger, but what do you say now? So many drugs. There are also surgical vehicles. Can the shoulder withstand it?" Head Huang Wenxu spoke sharply to the officer.

"Once the barrier lake in front collapses, the consequences will be..."

"Then contact the air force! Let them go ahead and see if there is a barrier lake. Will it be washed away in a short time?" Head Huang Wenxu's tone was very bad.

"Yes!"

Government officials have no good way at this time. Can only wait quietly.

"Da! Da! Da!" After a while, a helicopter flew overhead, the sky began to light up, and the heavy rain turned into intermittent light rain.

"Attention, drivers, attention, drivers. Because the road ahead is flooded, you can't move forward. Now please follow the guide car into the river." As he spoke, he saw several troop carriers connecting several surgical vehicles in the hospital.

"Look at the posture, the situation is really in crisis, otherwise the army would not take such risks." Lao Gao looked at this situation and said thoughtfully.

The army has built a simple passage from the road to the river. Zhang Fan followed the car in front and got off the river directly. It doesn't make any difference whether the car is good or not. It's just that the car shell is different.

In this special case, the performance of a good car is reflected. Hospital ambulances and government cars are lying on the roadside.

Only military vehicles, trucks, surgical vehicles forcibly pulled into the river, and Zhang Fan's off-road vehicles dare to enter the river.

Although the river is not deep, there are many stones and it is very bumpy. Driving forcibly in the river and looking at the river outside the window is not very different from taking a boat.

Wang Yanan didn't dare to look outside because she felt a little dizzy. Two personnel carriers forcibly pulled a surgical vehicle against the river.

These operating vehicles are usually baby bumps in the hospital. After all, the price is too expensive, but at this time, they run in the river like broken iron sheets.

Retrograde, fortunately, the collapsed road is not long. If you are pulled like this for a long time, it is estimated that these surgical vehicles will fall apart.

The soldiers who opened the way repaired the simple road surface on the river early. The road was muddy and there were many soldiers standing on both sides of the simple road.

"What are they doing?" Wang Yanan looked at the soldiers outside the window and asked curiously.

"I don't think the surgical cart behind can get on. They're going to push it." Lao Gao explained. After a few twists, Zhang Fan climbed onto the road.

Then, I heard the soldiers shouting "one, two, one, two!" The soldiers in the mud pushed the heavy surgical vehicle hard. The muddy water splashed by the wheels directly turned the soldiers in the cart into clay figurines.

One, two, one, two, surgical vehicles were pushed up. Looking at these clay soldiers, the young face was directly covered by mud. Wang Yanan seemed to feel that his nose was sore.

"Why don't we go down and help the cart now." Xue Fei couldn't bear to look at it.

"No, our task now is to rest. Everyone has his own work." Lao Gao began to fake sleep. He can't bear to see it.

"Yes, now we'd better have a good rest, or we'll lose our hands." Zhang Fan also said that although he couldn't bear it, there are people who need them more in front of him waiting and looking forward to it.

It was a little brighter, the rain didn't seem to fall much, and the vehicle speed was much faster. "It's almost here. I came to this place once. I came once when I went to the countryside for free clinic. It's been many years. Turn the corner ahead and you will be a mountain town." Lao Gao said.

In a few minutes, after the car turned the corner, the scene in front was so shocking that the people in the car were shocked and speechless.

In the area stretching hundreds of meters in front of us, a mountain is like being split by the God with a giant axe. The mountain is divided into two halves directly from the top of the mountain to the middle of the mountain, and the large stones and earthwork on the mountain rush directly into the river. No wonder there is not much water below.

The soldiers who arrived earlier were already digging. Excavators and cranes began to work. Children's cries could even be faintly heard in the roar of the machines.

"Get off! It's impassable ahead. All members of a certain regiment pay attention. Now all of them get off the bus and move forward with medicine on their backs."

"Yes! Received by the first battalion and the second battalion..."

"What shall we do?" Xue Fei asked.

"Wait for command." Lao Gao was also shocked. The place that has been in front is directly submerged, and the bungalow can't be seen directly, that is, the second and third floors that are a little higher can be seen. In front of you is a mess. You can't see that this was once a prosperous town.

"Yang Shuyuan, Xue Fei,..., immediately got off and followed the troops into the disaster area. Other doctors were on standby. The wounded rescued in the early stage arrived immediately." Immediately after that, Ouyang directly named and issued orders, selecting more than 20 slightly younger attending doctors and more than a dozen male nurses.

Xue Fei didn't say much either. He got out of the car and ran with the army. When he ran to the first car, the waiting military doctor handed him a set of first-aid kit. "What are they going to do when they enter the landslide area. The operating car can't get in!" Although he always quarreled with Xue Fei at ordinary times, Wang Yanan couldn't help asking when he saw that Xue Fei was going to enter a dangerous area.

Lao Gao opened his mouth and didn't speak. Zhang Fan also seemed to think of something and didn't speak.

"They go in for first aid. After they deal with the early stage, some wounded who can be transferred will be transferred here, and we are here waiting for surgery." Xu Xian explained in a low voice. In fact, Xu Xian refrained from saying the cruelty inside.

Natural disasters, even if science and technology are so developed in modern times, human beings are still too small in the face of natural disasters. After a regiment's troops entered the disaster area, they were as insignificant as green peas scattered into the sand.

Half of the mountain collapsed, and large machinery could not enter at all. They could only dig at the edge bit by bit and enter forward bit by bit. Many soldiers slowly entered the disaster area with drugs and tools in their hands.

In China, it's really not easy to be a soldier. We should not only have excellent military skills, but also be able to do earthwork at critical moments. Large machinery can't enter, so we can only rely on people.

"Other medical staff, please note that there are two or three doctors in a group. The directors of thoracic surgery, general surgery and orthopedics are the mobile force. The other doctors try to cross the departments and enter the operating vehicle for standby. Zang bin, Yu Le, Wang Zhanshan and other doctors and nurses are now entering the disaster area.

Please follow the command of military personnel and form an emergency transfer station at each node. " After Ouyang arranged the operation doctors, he named more than 20 doctors and entered the disaster area.

These doctors also hurried to run after getting off the bus. Then a doctor with two nurses and two soldiers carrying stretchers entered the vast disaster area.

"Operation vehicle one, report the list of doctors! No. 2 operating car reports the list of doctors... "Ouyang's voice is hoarse. It's really hard to do this arrangement. It's estimated that Ouyang didn't rest all the way and has been thinking about it.

Otherwise, we would never have arranged everyone's work in such a short time. Rescue was originally a very chaotic occasion. Once a leader who didn't know what to do came, it was estimated that he couldn't arrange these people well in less than an hour. Ouyang only took less than a few minutes to arrange it properly.

Ouyang's car was in the front, and she stood in the front with some soldiers. Waiting for the arrival of the wounded. Five surgical vehicles parked side by side.

Crying, more and more clear crying. In the distance, Zang bin and his team have carried a patient out of the disaster area. The original pure white coat could not be seen to be white. He held the stretcher and sent the patient down. The road that has rained is really difficult to walk.

"Hold on, hold on, the surgical vehicle is right ahead. Hold on. " Even so, he still kept encouraging the

sick.

"Pick it up!" Ouyang was surrounded by several troops who left her mobile power. Seeing the wounded in the distance, Ouyang said directly to several soldiers.

Then, she was left alone. The old lady climbed to the roof with difficulty, held the loudspeaker and shouted, "where are the wounded, where are they injured?"

"Chest, head! The wounded are a little unconscious, and the bleeding is very serious. " Zang bin shouted out of breath.

"Take it to operating vehicle 4. Vehicle No. 4, the wounded has arrived. The combined head and chest injury has entered a state of shock. " Which department is the main doctor in the number car? She knows it very clearly in her mind.

With the appearance of the wounded, the old lady stood on the roof like a statue. In the wind and rain, her hoarse cry was floating all the time!

### **Chapter 389**

The work of disaster treatment is very special. It does not follow the general medical method. Because it is very special, the environment is special, and the wounded are special.

The number of wounded is large, and the injury is serious and complex. The traffic environment in the disaster area is poor. The operation cannot be carried out in time.

Therefore, in the disaster area, the principle of rescue is to rescue after rescue, heavy before light, scientific classification, graded treatment, continuous monitoring, early debridement, delayed suture and overall treatment.

These words seem very simple. In fact, these words are full of the helplessness and cruelty of medical people! Yes, it's cruel. Many times, when you need to choose, you face other people's lives or abandoned limbs and organs!

Landslides, and landslides in the middle of the night, are very vicious. On a rainy day, there was no sign, just like the devils of the ball country, they quietly entered the village, and TM was very cruel.

The winter weather in Northwest China is very cold. In order to resist the cold climate, the walls of houses have to be thickened. But such a thick wall is as fragile as a newspaper under the natural disaster mixed with earth and boulders. It can't resist at all. On the contrary, it has caused great difficulties for disaster relief.

After this kind of wall falls, it is not scattered bricks, but what kind of debris. Bad luck, he was killed directly.

Xue Fei, who entered the disaster area in the early stage, tried his best to follow the soldiers in front. His body, which is corroded by staying up late and tobacco, can only keep up with the great young man who trains every day in front of him if he tries his best to eat (a) milk.

The paths that crisscrossed the town had long disappeared. Survivors are residents whose houses are in the outermost area, or residents who live on higher floors.

But after all, it is a small town with few tall buildings, so most people are swallowed up in their dreams after the collapsed debris flow rushes in.

"Brothers, come on! This way! Come on, this way!" The muddy water on a little soldier's face can't hide his green age. At this time, he was very happy and almost shouted because he found a wounded man.

"Come on, I found the one who was pressed." The medical staff of Xue Fei's group rushed to the disaster area, where there were doctors and soldiers. When they didn't find the wounded, they kept digging without tools. Because the enthusiasm of these soldiers directly drives others.

Collapsing debris flows are sometimes more terrible than earthquakes in some ways. Because it is mixed with a large amount of soil, instantaneous coverage will cause personnel hypoxia and suffocation, so the medical group is not in a hurry.

When Xue Fei and his team arrived, Xue Fei's scalp was numb for a while. Judging from her underwear, she is a woman. She is lying prone between two huge stones, and her upper body is fairly good.

But it is also obvious that there are bruises and mud covered with blood red everywhere. If you don't look carefully from head to hip, you can hardly see that it is a person.

What is really terrible is the legs. The legs are solidly pressed by two huge stones, and the surrounding soil has long become vermilion.

It can be imagined that there may be other people around these two huge stones, but large models can't get in. They can't dig much by people. Such a huge stone weighs not only three or four tons, but also one or two tons.

This is the effort at a glance. Xue Fei jumped to the wounded without hesitation and put his hand into the patient's neck " And fluctuations. Come on! First aid kit, first aid! " Xue Fei said loudly.

The rescue judgment should be rapid. This judgment should be completed within three seconds, that is, the faster the better. This judgment is also very simple, that is, to see whether the fluctuation of the wounded's carotid artery can be touched.

Because of the fluctuating carotid artery, the systolic blood pressure of the wounded can reach 50mmhg, which is the critical blood pressure for shock. The two doctors worked together and acted quickly. One doctor cleaned the patient's respiratory tract quickly.

"No, there are too many impurities in her mouth, and her body can't move or clean up." The patient's weak breathing was changed due to the examination of the rescuers.

The patient's face is getting bluer and bluer, and suffocation has occurred. Too late, the special posture made it impossible to carry out other rescue operations.

"Thick needle! Come on, thick needle. Three! " Dr. Yang Shusen and Xue Fei were in a group. At this time, he shouted to the nurse.

The thick needle is in hand. It's too late for disinfection and other actions. Yang Shusen didn't draw with a thick needle. He didn't have time. Directly puffed into the wounded's cricothyroid membrane!

"Not enough! Come again! " Yang Shusen continued. After continuous thick needles pierced the wounded's cricothyroid membrane, the patient slowly faded the blue and purple of his face.

With the improvement of the wounded's face and lips, Yang Shusen's cold sweat came down. If this method fails, he can only quickly cut the cricothyroid membrane with a knife. If you are infected or not, you can't care.

First aid, often, the time given by God to the wounded is only enough for the doctor to do one treatment. If this treatment is ineffective, the next treatment is to never have a chance. If you want it, it is to be very fast.

If the puncture needle fails, Yang Shusen's incision will be very rough. How rough, just like the throat cutting in the movie, cut the patient's cricothyroid membrane quickly and accurately.

Yang Shusen is dealing with the respiratory tract, while Xue Fei is dealing with the patient's legs.

"Scissors! Hemostatic pad and bandage. " Xue Fei knelt beside the wounded and said without raising his

head. The wounded's legs really can't be seen. The big stone directly pressed the lower leg into minced meat. The residual tissue is like silk thread and is connected with the lower part of the knee joint.

The surrounding soil is mixed with the patient's blood, bones and muscles, and the land has become a brown paste!

The calf is hopeless and can only be abandoned. Xue Feifei quickly cut off the limb of the remnant, quickly put a hemostatic pad on the patient's popliteal fossa, and then quickly bandage it with a bandage.

The speed is very fast. At this time, the wounded are walking on the edge of life and death. If they have strong vitality, they may survive. If they have weak vitality, they may die when they leave the ground.

"Open the venous channel. Norepinephrine push! Come on, stretcher, get ready for transfer. " While Xue Fei was treating his lower limbs, Yang Shusen had begun to establish effective venous channels and gave cardiostimulant treatment.

Stretcher, two or three soldiers have come around. The wounded was placed on a stretcher and tied, "come on! Transfer, already in shock. "

The soldiers lifted the patient and began to sprint towards the front and towards the operating vehicle. This kind of rescue cannot be delayed at the scene because the effective time of drugs is too short.

In fact, it's a race with death to see who runs fast. If you can run quickly, the wounded will be saved, the transport will not pass, and the wounded will die. It's very simple.

"Come on! Come on! Hurry up! Run! "

"Get out of the way!"

"Come on! Change people. "

There is quite a tacit understanding between the well-trained soldiers. A team goes all out and rushes like crazy. There have been other soldiers waiting for 500 or 600 meters. On the muddy ground, after carrying the wounded for 500 or 600 meters, these soldiers directly get out of their strength. It's too hard.

The soldiers who took over don't have to say much. Then he continued to run and ran forward like a desperate man. The sundries on the road tore the soldiers' clothes, scratched their skin, and the blood flowed like small pearls in the wind.

"Where's hurt!" Ouyang stood on the roof and constantly assigned the wounded in need of treatment.

Treatment needs technology, but this organization assignment is also very careful about experience and

relevant knowledge. In this case, ordinary people can't organize at all. Ouyang can command the team of nearly 100 people like an arm.

Which point needs support, which point needs blood, and which point has a vacancy, too much consideration is given to a person's organizational ability. It is estimated that this is a skill mastered after many times of experience.

"Debridement, debridement as soon as possible, give me bone biting forceps, Wang Yanan, stop bleeding in the lower limbs. Channel fast input crystal, 1000 ml in 15 minutes. Come on! " In the operating car, Zhang Fan went crazy directly, and the wounded were sent down one by one.

There are only a few surgical vehicles, so we must deal with these wounded in the shortest time. The treatment here also follows the principle of heavy first, light first and rescue later. In fact, this is the principle of battlefield treatment.

Save your life first, and then talk about other things. Zhang Fan, who was very quiet in the operating room, shouted loudly like a runaway poodle.

There's no way. There are too many wounded. He keeps sending them. He's the leader of the operating vehicle. He must watch all directions and listen to all directions. How to treat them quickly and how to deal with them quickly.

We must quickly produce a plan in our mind. We can't be slow. If we are slow, it is a crime, and if we are slow, it may be human life!

"Electric defibrillation, focusing!" In the operating vehicle, ABC is implemented round by round. A (airway!) B (breathing!) C (cycle!), Everything else is behind, regardless of what trauma suture and fracture fixation are behind, it's too late.

These are the things to be done in phase II. Now it's to rob. Grab as much as you can from the God of death. There is no room for ambiguity.

One hour, doctors at Midway treatment points and doctors in disaster areas take turns. I can't change it. I can't do it anymore. It takes too much energy on the muddy road. Even rotation is only relatively easy.

Can't do it? It's impossible. The wounded are waiting for rescue. How can they not move? There's nothing to discuss if they have to.

Colorful soldiers and white doctors have all become clay figurines, which are almost indistinguishable. God may feel that he didn't cry enough. The originally reduced rain began to grow slowly again, and a large area of landslides appeared on the road that was about to be opened up.

"Captain, what should I do? The collapse is getting worse! The follow-up troops can't get in, and there is a shortage of drugs. "

"Forget the machinery. Let the troops force the troops and run in. Now we don't have enough personnel. Come on, let me know. Contact the superior and ask the air force to deliver drugs! "

Like a battlefield, a battlefield without gunpowder smoke. If you stand high in the air, you can see that ant like troops are entering rapidly from all directions, and all automobile machinery are abandoned.

"Come on! Speed up and work hard. The people in front don't have much time. Come on! " The officers outside the team kept cheering. No drag on the army, fast. In the heavy rain, they bypassed the collapsed place, washed across the river and successively entered the disaster area.

In the air, helicopters put drugs one by one, and time passed bit by bit.

Disaster area! Like the Shura field, the cry of children, the cry of looking for mother and father, and the call of mother and father crazy looking for their children!

Rescue! Rescue! Time is everything. Time at this time is more expensive than gold!

### **Chapter 390**

In the early years of China, just like the Chinese people in the early years, they were introverted, with a little inferiority or shyness. Although the achievements of liberation and opening up have been good, they still seem to lack a temperament.

It seems that before and after the Olympic year, suddenly, China has the temperament that has been lacking for a long time. In the early years of disasters, the Chinese government bit its teeth and did it by itself. It rarely said that it was mobilizing the masses, let alone asking for help from the outside world.

But now it's different. With the rise of national strength, the government has more confidence. The reporter entered the disaster area with the helicopter and broadcast it live. Although many cruel aspects have been avoided, they still try to show the masses a real rescue scene.

"The mountain is crying! The people in the disaster area are bleeding! Please follow our reporters to the scene of the disaster area. At present, there are about 1000 affected people. The officers and soldiers of a regiment stationed in our garrison entered the disaster area within only one hour of the disaster. "

"One side is affected and all sides support!" The blood collection vehicle of the blood center drove into colleges and universities, into the streets and into major organs and units.

Usually, there is a long line in front of the few blood collection vehicles“ Sir, you are too old. You are over 55 years old. You are not suitable for blood collection. "

"Why? I'm very healthy. What's wrong with my physical condition? The wounded in the disaster area are waiting for blood. Take it quickly. "

"I really can't!"

Shao Hua and Jia SuYue also lined up to donate blood, "your family Zhang Fan has gone to the disaster area?"

"Yes, Wang Yanan left in the middle of the night. Hey, I was a little slow one night. I don't know if Zhang Fan and his family are cold in the disaster area! " Shaohua's words confused Jia SuYue.

"What?"

"Nothing!"

The neighborhood committee of a street said, "aunt, the disaster area doesn't need clothes for the time being. If necessary, I will inform you at the first time!" The street clerk explained patiently to his aunt with a big bag of thick clothes.

The occurrence of disasters suddenly makes people living in safety seem to be more easygoing. The irritability and impatience in the past are all gone, and everything seems to become so lovely.

On weekdays, there are few people who are not warm-hearted at this time. It can be said that it is hard to say whether Chinese people can be rich and noble together, but it is absolutely second to none in the world to tide over difficulties together.

The roads leading to the disaster area have been controlled because many people drive to the disaster area“ Why don't you let us go? "

"The road ahead collapsed, and there may be a secondary disaster. The front has been designated as a control area and is no longer allowed to pass."

"We are going to help, to provide disaster relief?"

"Private groups really can't pass!"

Countless such situations keep happening. Disaster relief is not just blind. We must have a plan and listen to the command, otherwise there may be things that will help.

Road and Bridge troops and large local state-owned engineering companies have also received orders from their superiors. The order at this time is not so warm.

"Within five hours, you must get through the traffic to the disaster area. No matter what method you use, you must get through to me! There is no room for discussion. If you can't do it, I'll change people! "

The army is gathering, and the iron lion has become an engineering team with shovel and various digging tools. Apart from their own kettle and compressed biscuits, these soldiers didn't bring anything, guns? Weapons? I'm kidding. No need!

To mobilize the masses, it is estimated that one of the major cities in the country can not compare with the frontier. Because there are many farms here, they are ordinary people at ordinary times and disciplined troops at critical moments.

These people are not much worse than the army. There are all these people in the army. Trucks, military green trucks and unified camouflage clothes have their own companies. They are estimated to be older than the army!

The whole city has been mobilized. The whole city is concerned about this place. Everyone's heart is concerned about this place. The place that has not been paid much attention in the past: Tiaoshan town! A place not marked on the map.

Zang bin doesn't know how many people have been rescued. They are numb. Hands and feet began to tremble slightly. They were too tired, and the mud wrapped shoes became heavier and heavier.

Drink, go on. The area is too large. When you are in the hospital, you can be lazy and touch a fish. Because there is support, it can't be here. Here he is the supporter of the wounded. Not here. It seems that everyone here doesn't know fatigue and has become an iron man.

"Come on, here! There is someone under this broken wall! " A soldier shouted to the rescuers around him. Zang bin, who had just picked up the mineral water, had no time to take a drink. When he heard the cry, he hurriedly picked up the first aid kit and ran. His running posture was too TM ugly and his waist and legs were super uncoordinated!

"Wow! WOW! WOW! " From under the broken wall came the cry of the baby.

"Come on! It's a child. Come on! Bring the crowbar. "

"One, two, one, two, be careful." The crowd shouted! The crowbar pressed the shoulders purple. It didn't hurt. It didn't hurt at all. The baby's cry was a horn. They fought.

"Get up! No, stop! Stop lifting. There's a crack below. To collapse! " The washed down brick wall had no continuity for a long time. When it was lifted a little, cracks appeared below. If you lift it again, it is estimated that it will break.

"Hold on, I'll climb in!" While talking, an officer who seemed to be a company commander, without saying a word, went directly under the cracked wall regardless of life and death.

"Hold on! Do hold on! " The company commander went in, and the officer who automatically came out to take over the command shouted.

It may be easy to lift up and rely on one breath, but this kind of crowbar like a heavy burden continues to press on everyone's shoulders, and their faces are purple. They can't help but hold their breath! Just for the crisp cry, no one can give up.

The company commander worked hard like a mouse into the gap. Climb! Climb! Isn't he afraid of death? Fear, who is not afraid of death. But the baby under the gap, the crying baby, how can you bear not to save it.

Finally, I see. A naked baby lay quietly on the blanket under him. When he saw the light and the company commander, the baby surprisingly stopped crying.

The company commander gently held up the child with one hand. When he was about to leave, he burst into tears. Because he saw a pair of hands! A pair of female hands, flesh and blood blurred, but these hands have been holding the baby!

The company commander held the child in one hand and worked hard to dig, but there were too many bricks, too many stones, and his hand was broken. It didn't seem to hurt at all!

"Company commander! Get out. Come on. It's going to collapse! " The officer who succeeded the company commander outside was worried. He was crazy.

The company commander woke up. The cries outside and the crying of the baby woke him up. Gritting his teeth, he took off his coat with his other hand, wrapped the child and walked backwards. He had to go backwards.

"Don't worry, your child will be there when I am!" The company commander said softly before leaving, perhaps for the calm of his heart, or for regret!

Like, like this pair of female hands, hold up the child's hands, like slowly falling down!

The iron man held the baby and slowly regressed. It's easy to get in, but difficult to get out. With the slight change of the wall, the company commander is difficult and very difficult to go backwards.

The brick stubble scratched his face and his jacket off. Like a knife, it gently cut his skin!

Retreat, retreat at this time, is moving forward. Although it is difficult, the company commander clenches his teeth and puts one hand under the baby. He retreats slowly. It is too narrow and his breathing is not smooth!

"Come out, look at the company commander's legs."

"See, slow down! Hold on! "

At the moment when the company commander withdrew, the wall couldn't hold on, broke into pieces, and the original gap was blocked by the collapsed wall.

"Come on, doctor, the company commander is hurt!"

"Where are you hurt! I see! "

"No, don't worry, I'm fine. I'm fine. Look at the children first. " The company commander covered in blood quickly blocked the doctor's examination of him.

Trembling hands, the back of his right hand is flesh and blood! Dripping with blood, he gently handed the child wrapped in a coat to the doctor.

When he opened his coat, the tightly wrapped baby seemed to laugh, as if he was looking at him with blood all over him! Such a lovely smile, in this disaster area like Shura field, is so warm and warm!

"Come on, get the blanket. The child is a little cold. Send it down to find milk powder!"

"You go down too, come on!"

"I'm fine." The company commander shook his right hand indifferently.

"Go down, is there anything I know better than you! Hurry up! " One by one the wounded were rescued.
