

The Charismatic Charlie Wade Chapter 3947

The grade of the Hongqi sedan is certainly not as good as Rolls-Royce.

But in Charlie's eyes, Hongqi is China's most nationally representative automobile brand, not one of them.

Therefore, this is also the best choice in his mind.

Isaac Cameron obeyed Charlie's words, so he immediately said: "Good master, I will coordinate the resources and make sure that all the vehicles are in place within two days."

Charlie nodded, and said, "Don't forget to mention the price. During the Huichundan auction, the price of the room in Shangri-La must be at least a hundredfold, and don't give a penny discount."

"Okay." Isaac Cameron said with a smile: "Master, don't worry, I have arranged this. This time the list price of hotel rooms has not only increased by more than one hundred times, but also an additional 20% service fee and 20% security fee will be charged. As well as 20% of the event organization fee, anyway, it is a clever name set up specifically to cheat them."

Charlie heard this and said with a smile: "By the way, they will be charged 1 million yuan per person for transportation. After all, we also need to spend money to build a fleet."

Isaac Cameron knows that mass-produced Hongqi cars are actually not expensive, and the best is only five to six hundred thousand, and a fleet of eight cars costs only four to five million.

For a fleet of four or five million, the airport pick-up and drop-off will cost one million in transportation fees. This may be the most profitable business in the world.

However, he was also very clear in his heart that the two hundred people who came to participate in the Rejuvenation Pill auction would not care about such a little extra cost at all.

Even if most of these people know that there is a high probability that they will not be able to take pictures of Rejuvenation Pills, they still hope that they can come to the scene to see and see. For this reason, spending a few million is not a big deal to them. The big deal is right. When it is out to travel.

After explaining this, Charlie stood up and said to Isaac Cameron: "Isaac, the rest is up to you. On the day of the auction, you must conduct strict security checks on everyone who enters the venue. Never anyone is allowed to bring any video and recording equipment into the scene."

Isaac Cameron hurriedly said, "Master, don't worry, I've made arrangements. I will put 4 sets of security inspection equipment on site and open two security inspection channels. Each channel will undergo two security inspections, which is definitely more stringent than security inspections by plane. Many, among those who come to the auction, no matter who it is, don't even want to bring in a watch."

Charlie nodded, there was a flash of light in his mind, and he said: "If you want me to say, it's better to ask them for body data now, and give them a unified custom batch of clothing in advance, and then number these batches of clothing, starting from 1 Start, until 200!"

"These clothes are all designed in accordance with sportswear. They wear a T-shirt on the upper body and sports pants underneath. The clothes do not contain any metal parts. On the day of the auction, they must change into the uniformly provided clothing and pass the metal detection. The principle is that no one is allowed to carry any metal-containing equipment. If there are medical devices, they must be strictly confirmed, and no one will be given the opportunity to drill holes."

Isaac Cameron immediately agreed and said: "Good master, I will arrange it so that they can customize the clothes as soon as possible."

After speaking, he said: "This is an easy one, and it doesn't cost much. Southaven our neighboring province, is basically one of the largest clothing production bases in the country."

Charlie smiled and said: "Okay, you will arrange this matter, and since we have already provided them with uniform clothing, then naturally we have to charge an additional clothing fee, just like school uniforms are charged for school uniforms. ."

Isaac Cameron asked hurriedly: "Master, I estimate that the cost of clothing will not exceed two hundred yuan. How much do you think the cost of clothing should be charged?"
