

Chapter 401

The doctor's duty or responsibility is to rescue the dead and heal the wounded. When there is no sign of life, the municipal hospital also begins to evacuate.

"Thank you, thank you. In the face of difficulties and dangers, you didn't flinch. In the face of fatigue, you gritted your teeth and insisted. I thank you for the people in the disaster area." A leader bowed deeply to the evacuated medical staff.

"This is our duty and our obligation. The hospital still has a large number of transferred patients waiting for us to treat them. We won't delay any more. We'll hand them over to the traditional Chinese medicine hospital here. " Ouyang said proudly.

Because she is qualified to be proud of the same level of hospital. In the late stage of disaster relief, all the operating vehicles of the traditional Chinese medicine hospital were directly requisitioned by the municipal hospital. There was no way. They were all compound injuries. The single orthopedic department of the traditional Chinese medicine hospital could not do it.

The leaders who once had great hopes for the hospital were also extremely disappointed. Now Ouyang is leaving with her team. Although they are tired and may have a lot of regrets, they have worked hard and worked hard. They deserve the title of "doctor".

The bus of the urban transportation company pulled the doctors and nurses of the hospital away. These three days, Zhang Fan hardly slept. He couldn't drive anymore. He had to hand over his car to a professional transportation driver.

In the bus back to the city, no one spoke or chatted. They are all making up for sleep. Usually, people who say they have insomnia and bad sleep count one at this time. They sleep like dead people.

Male doctors, in particular, snore repeatedly, drool, chirp, and all kinds of things. The bus is like a strange Symphony Orchestra.

At this time, they have no previous manners. Even Ouyang is in the front seat with bubbles in his mouth. The doctors evacuated and more construction teams entered. The next step is reconstruction.

The news that the doctor fell into the disaster area completely frightened Shaohua's parents. Worried and frightened all night, they directly waited with their eyes open until dawn. When Shaohua called, the

old couple were at ease.

"Huazi, huazi!" Shaohua's father stood in the living room and called Shaohua. Shaohua has come back.

"What's the matter?" Shao Hua is washing his hair.

"Zhang Fan, are they coming back today?" Asked the old man.

"Yes, Zhang Fan called in the morning and they have already started."

"Go and hurry to the vegetable market to buy some fresh fish. Zhang Fan is tired these days. Huazi has been there all day and comes back like a loach without water. Not to mention Zhang Fan, they have stayed so long."

"Good! Buy something he likes, and the child is tired. " Shaohua's mother said as she picked up the vegetable basket. Many families are the same, preparing all kinds of delicious food for their returning relatives.

The road back to the city was particularly congested, and traffic control was also opened. Many civil society organizations began to enter the disaster area, and then all kinds of information flew all over the sky. More and more people poured into the disaster area. Coupled with the engineering team, the originally narrow national highway became more crowded.

Finally returned to the city and looked at the high-rise buildings. These doctors who had just seen the separation of life and death looked and looked greedily, "peace, it's so beautiful!" Lao Gao whispered to himself.

Each home, Zhang Fan dragged his tired body and didn't even want to say a word. Shaohua prepared hot water for Zhang Fan early at home and waited for Zhang Fan to go home.

"Zhang Fan!" Shaohua heard the sound of opening the door and hurried to the corridor. When she saw Zhang Fan's tired appearance, she was distressed and almost cried. Zhang Fan, who is very energetic on weekdays, has drooping eyelids and clothes in his hand, as if he would fall at any time.

"Hehe, I'm back!" Zhang Fan forced a grin.

"I'm so hungry. First, drink some millet porridge and press your hunger." Shaohua is busy getting food for Zhang Fan.

"I've eaten the instant noodles I ate in the morning. Now I'm not hungry at all. I'm sleepy. I'll go to bed first." Zhang Fan, who came home, couldn't open his eyes.

He fell on the bed and snored. Shaohua slowly and gently took off Zhang Fan's clothes and trousers, and

took off his shoes and socks. He was so tired that Zhang Fan couldn't care about them.

These days, it's too hard. Refueling work, refueling energy conversion, after all, is a flesh and blood body, there is always a limit. Shaohua slowly wiped Zhang Fan's face and body with a warm towel.

Zhang Fan didn't respond at all. He has long been in deep sleep.

Wang Yanan, who came home, looked tired, which made her mother very bitter.

"Change her job! No, just find a way to transfer her to the Health Bureau. You see, this day and night, young and light has been boiled like this. "

"Nonsense. Doctor, it's her dream. Our girl's efforts this year have not been in vain. I'm proud of her. " Wang Yanan's father's eyes twinkled with tears. Whose child hurts.

The government, from top to bottom, is busy preparing for the commendation conference, "it must be implemented to the head." This is the purpose of this commendation meeting.

"Traditional Chinese medicine hospital is not helpful!" In the government conference room, the main leaders were present at the meeting.

"Yes, it's terrible to think about it."

"Whether the train runs fast or not depends on the locomotive. Look at the municipal hospital. It's been only a few years and people have been impressed. They have achieved that they can come when they are called and fight when they come. So I suggest replacing the main leaders of the hospital. "

"Agree!"

"Agree!" The replacement is simple, but the selection is another round of discussion.

Shaohua's parents cooked a table of delicious food. However, to their disappointment, Zhang Fan has been sleeping. Noon has passed, afternoon has passed, and it is dark. Zhang Fan has not woke up yet.

"Why don't you ask him to get up and eat, and sleep when he's full? It's not enough to eat or drink!" Shaohua's mother secretly opened the door, looked at it and said to Shaohua.

"Don't call him yet. He's too tired. When I entered the house, I fell on the bed. When I scrubbed him, he didn't respond at all. "

"Ah! Go to sleep. Just get enough sleep. The doctor's job is not a good job. You say it's frightening these days. "

Day and night, like many front-line doctors, nurses and soldiers, Zhang Fan slept a full day and night.

Three days later, the tea vegetable city held a grand and solemn commendation meeting. The standard is quite high, and the venue of 1000 people is full of personnel participating in disaster relief.

Ouyang, who was not qualified to sit on the podium, was also arranged on the podium by the leaders this time. The old lady sat at the end of the rostrum in high spirits.

"All stood up and observed three minutes of silence for the dead people in Tiaoshan town!"

On the rostrum, the leadership speech of tea vegetable and the leadership speech of various units were followed by the commendation.

Chapter 402

"Do you think you will send us one hundred and eighty thousand this time?" Xue Fei and Zhang Fan sat down. The leaders on the podium were speaking. The following people listened carefully or a few. Zhang Fan was in a permanent daze. Xue Fei began to break his mouth as soon as he entered the venue.

"Yes!" Zhang Fan wants to kill chatting directly. Xue Fei is so annoying that his mouth is broken. He doesn't pay much attention to him. He can talk all the time.

As a result, Zhang Fan's skill was not enough, so he didn't stop Xue Fei from chatting with him " You think too much, you will! Still young, but what would you do if you really made a hundred and eighty thousand? "

"Tub to find it!" Originally, the meeting was very boring and annoyed. Zhang Fan had to go into the space to play for a while. As a result, Xue Fei kept talking.

"Livestock!" Xue Fei rolled his eyes, scolded Zhang Fan, and turned to chat with Wang Yanan. When he heard that Xue Fei was pressed in the disaster area, Zhang Fan was black in front of him and felt bad. Now I want to stick tape to his mouth.

This time, the government also paid a lot of money. The wages of the first batch of personnel entering the disaster area were raised by three levels. Those who have made special contributions will directly become the next municipal model worker, with a bonus of 5000 yuan. Other personnel will give priority to the selection of various advanced, and the bonus will remain unchanged at 5000 yuan. In the future, they will be given priority in the evaluation of professional titles and further education selection.

In the municipal hospital, several major surgeons can count as special contributions. What will never change is the big safflower of red silk on the chest and the red scarf of young pioneers.

Wang Yanan and Xue Fei, who sat down, looked at Zhang Fan with envy. Although they were also the first to enter the disaster area, she was not on the list of special contributions this time. It was not that they didn't work hard, but that the quota was limited.

Xue Fei, who thought he had nothing to do with him, was followed by a super surprise. Among all the local relief personnel, there are two first-class merits, Ouyang and Xue Fei.

Ouyang recorded first-class merit because of his strong organization, and Xue Fei was also recorded first-class merit because he was desperate in rescue and disaster relief. Xue Fei was so excited that he almost fainted.

Within a few days, there were personnel changes in the hospital. Because of his outstanding contribution to the rescue and disaster relief, vice president Li was directly transferred to the hospital of traditional Chinese medicine to become the president. Lao Li never dreamed that he could become the president of a class 3A hospital.

When he had the greatest hope, he was crushed by Ouyang. He also died of this wish, but unexpectedly, when he was not prepared, the colored egg hit his head.

Then came the director of the first Department of orthopedics, and Lao Gao became the vice president. This was nominated by Ouyang. When Lao Li Yuan left the traditional Chinese medicine hospital, Ouyang had begun to prepare to suppress it with all his strength. There were so many health funds allocated by the state every year. She was unwilling to transfer these funds from her hands by anyone or any unit.

The director of the first Department of orthopedics is still held by Lao Gao, but the hospital has set up a position that has never been before, assistant director! This position was given to Zhang Fan. Zhang Fan was hospitalized from the first Department of orthopedics and became the middle level of the hospital!

Zhang Fan became the middle-level of the hospital when he was young. Although some people were unconvinced, they couldn't speak. They couldn't be unconvinced. Where is Zhang Fan's technology.

The emergency center was established. The director was the original director of the emergency department, and the deputy director made everyone fall in their eyes. Xue Fei was promoted to the deputy director of the emergency center and the first deputy director. This made many deputy chief doctors of the original hospital very unwilling.

But although unwilling, there is no way. Because all the leaders of the hospital agree, it is useless for others to oppose, and Xue Fei's first-class work in rescue and disaster relief is also displayed. It is estimated that the superior units will be dissatisfied with it.

Lao Li, who is already the president of the hospital of traditional Chinese medicine, took the opportunity to take away the deputy chief surgeon of several hospitals. During the rescue and disaster relief, everyone worked together, one after another, without complaint or regret. No one jumped out and said that he did more and less.

But when it comes to sharing the reward, the hospital is restless. Xue Fei's first-class merit, no matter how he got it, first of all, people are desperate, and this is also the meaning of the government. Ouyang and they have to listen.

The departure of several mature doctors made Ouyang angry. She was the only one who dug into other people's corner. No one could dig into her corner. For this matter, Ouyang directly brought the lawsuit to the head of the government.

The chaotic hospital gradually subsided over time. Xue Fei took office. The first Department of orthopedics gave him a farewell party and celebrated Zhang Fan's becoming the assistant director. The first Department of orthopedics, including Xue Fei, has three doctors transferred to the emergency center.

Xue Fei, the deputy director, was very nervous. A few days before he took office, he made great efforts. He visited doctors in various departments and called them brothers. When it was time to make a promise, he promised that he was not active in going to work for surgery, but he was very skilled in this set.

"Brother, brother, I'm also on the shelf. It's most appropriate for you to go to the deputy director, not to mention the deputy director. In fact, you should be the director of the emergency center.

However, it's a pity that you're still a resident. If you're a doctor, I don't think it's my turn this time. Hey! My heart is hanging now, you know. " During the banquet, Xue Fei hid in the corner and chatted with Zhang Fan.

"You hang an egg, give me less acting and return to the director. You and I don't understand. Can you spit out what you eat? Come on, let's talk straight. Don't do that. " Zhang Fan despises Xue Fei. He knows Xue Fei too well. Although he usually says Zhang and Li, he is actually an official fan.

"You're welcome. In a word, as long as it's an orthopedic patient in the future, I'll try my best to send it to you. You're a person in the orthopedic department now! I will give my full support. Who let us have a good relationship? "

"Oh, don't talk. There are also deputy directors and superior doctors. Why is it my turn. Say it or not, I'm really gone. " In fact, Zhang Fan also waited for Xue Fei to beg him. What caught up was not business.

Zhang Fan was staring at surgery. As for others, Zhang Fan really didn't care.

"Hi! You are my nemesis. I'll be frank. You have to help me at the critical moment in the future. You don't know. Now many people are waiting to see my jokes. My martial brother, you say I'm ashamed. Don't you have a bad face! "

"Hehe, I'm not going to kill you! But I really don't care. " Zhang Fan smiled. At this time, he didn't crush Xue Fei. He didn't know what else he would get in the future.

"Can you help me? I can see you clearly. Are you jealous. Well, just think I didn't say it. " Xue Fei pretended to be angry.

"I'm really gone!"

"Brother, please. My brother bowed to you! "

"That's like asking for help. OK, I promised. Remember your words, orthopedic patient... "

"Well, well, my Lord, I'm really afraid of you." Xue Fei knows that he can't entangle Zhang Fan because Zhang Fan has core competitiveness.

"Ya Nan! Come and give you a toast, brother. " Xue Fei went to find Wang Yanan again. When they were in a group, although Wang Yanan often hated him, Xue Fei saw Wang Yanan's efforts and her growth.

"Well, director Xue, what are you doing? I have goose bumps all over. Talk well." Wang Yanan shivered as if it was too cold. Usually, she didn't talk to Xue Fei very well. Now Xue Fei is so polite, which really makes the girl uncomfortable.

"You see, there are more and more graduate students in orthopedics, and there is a freak in Zhang Fan. This department has been finalized. Let's go. Let's move the dead and live. Let's go to the emergency center with my brother.

Everything has just begun. The emergency director is a pediatrician and knows nothing about surgery. When we go to the emergency center, we directly dominate the emergency center. Don't you see. The president's intention of setting up this center is actually to monopolize trauma. " Xue Fei told Wang Yanan the truth.

"Well! No! " Wang Yanan rolled his eyes and refused directly.

"Why?" Xue Fei was worried.

"Anyway, I just don't want to go. How can I get so many? Why. Don't say that. Come to director Xue, I'll give you a toast. Why, you are all from the first Department of orthopedics and the eldest brother of our group. You must support my work more in the future! "

"Ah! What a smell of Zhang Fan! " Xue Fei said with a taste.

With Xue Fei's departure, Xu Xian didn't know how to follow Lao Gao's path. When Lao Gao presided over the department meeting for the last time, Xu Xian was transferred to Zhang Fan's group.

And Lao Gao also clearly said that in the future, the work of the Department was handed over to the deputy director and Zhang Fan, who served as a nominal director.

Zhang Fan takes office as assistant director.

Chapter 403

For Xue Fei, Zhang Fan is still willing to help. Although this thing has all kinds of faults, when Zhang Fan first operated on a soldier, only Xue Fei quietly pulled him. For this pull, Zhang Fan had to help others. What's more, you can brush your own surgery.

In this life, when one looks back on the past, one will find that perhaps it was a small decision that made a fork in one's life.

Two new departments have been established for the construction and use of the new building. One is the children's center and the other is the emergency center.

Ouyang directly dissolved the emergency department and established an emergency center. The emergency center is directly divided into internal and external departments. Doctors who have transferred to other departments must take turns in the emergency center on a regular basis as long as they are not admitted to the main treatment.

The establishment of the emergency center directly diverted many common diseases. This also shortens the treatment time of patients. And trained young doctors.

Pediatrics has also been divided into several, and a neonatal ICU has been established, which is directly connected with obstetrics and gynecology. This also increased the number of patients.

Gao Shijun, director of the first Department of orthopedics, was promoted to the vice president. The most uncomfortable thing was Wang Dehua, director of the second Department of orthopedics. The two began to compete since they first entered the hospital. Wang Dehua was slightly more powerful than Lao Gao in the operation, but finally Lao Gao became the vice president for various reasons!

Chen Qi, director of the third Department of orthopedics, doesn't matter. Anyway, he knows that compared with the other two directors of orthopedics, he is still a little short.

The largest surgery in the hospital. The director of general foreign education is also a beard and stare, but he can't help it. General foreign education is full of flames. It is estimated that his superior has questioned his management ability.

Lao Chen, deputy director of the first Department of orthopedics, slowly calmed down his attitude towards Zhang Fan. No way, Lao Gao completely ignored the orthopedic business. It is estimated that he will participate in less and less surgery in the future, so he had to rely on Zhang Fan.

Moreover, Cui Pingjun, Lao Gao's direct younger martial brother and deputy chief physician of the first Department of orthopedics, completely supports Zhang Fan. Lao Chen can't help it. Other young doctors haven't got up yet, and Zhang Fan has already dumped everyone for several blocks, so he has to lower his head.

This low head represents a lot of things. The most practical thing is the arrangement of surgery. Who will arrange it? In the past, Lao Gao was in charge, and Lao Chen could be reckless, but now, and surgery represents income interests. So it's hard for him to do.

"Come on, director Zhang, come on, I asked the head nurse to make an office for you. After that, this will be your office. " After the morning meeting in the morning, Lao Chen took Zhang Fan to see the office.

"Director, it's not appropriate. You call me director. It's really not appropriate. I'm your assistant, and I can't have my own office."

"Hehe, it's appropriate. Why not. After that, let's discuss the work of the Department. " Old Chen smiled and looked at Zhang Fan.

"Director, it's up to you to arrange the operation. What do you say and what do I do. We will resolutely implement it. " Zhang Fan also said with a smile. He knows what Lao Chen means.

"Hi! You can arrange it. " Lao Chen said modestly.

"Director, didn't you hit me in the face!"

"Good, good!" Old Chen Lian said a few good words. He was worried that Zhang Fan was anxious to seize power, and then said, "I'll arrange the operation in the future, but you can't put it down. You'll be directly responsible for the operation discussion in the future. That's what we older doctors mean."

"Is it appropriate?" For this, Zhang Fan is not afraid at all, and he has some expectations.

"Yes, why not. You don't have to be modest. Are you satisfied with this office? If there is anything missing, please inform the head nurse directly. I'll go first. You're busy!" With these words, Lao Chen left.

It doesn't matter whether there is a separate office or not. Anyway, he had surgery in the morning and had to go to tea vegetable university to do experiments in the afternoon, but he gave it.

"Oh! Director Zhang! How's it going? Are you satisfied with the office I got you? Look at the basin of Rhododendron on the windowsill. I've specially moved it for you from home and raised it for several years. It seems that it knows you've been promoted. Look how lush it is these days." Head nurse Miao Juan looked at Lao Chen and came over.

A department is actually a small society. Although it is not hierarchical, it is also inextricably linked. Orthopaedic head nurse is the most comfortable head nurse in addition to the breast department and special needs ward. A lot of people are staring at this position.

Lao Gaosheng has left. Now Miao Juan has to move closer to Zhang Fan. Although I was very polite to Zhang Fan before, I didn't have such intention.

"Why is it so troublesome. Head nurse, thank you!" Zhang Fan knows that once he doesn't accept it, it is estimated that the head nurse will mutter for a long time. If he simply accepts it directly, it will be a pot of flowers. There is no need to distinguish it too clearly.

"OK, just like it. If you need anything, let me know." Miao Juan left and walked in the corridor of the Department. She was filled with emotion, "Hey, this little Jia, why can't you see Zhang Fan, hey!"

With the expansion of the hospital, Ouyang has also started various assessments and training, which is a huge momentum. People with a clear eye can see that this is Jianzhi traditional Chinese medicine hospital, because after Lao Li came to power, he focused on various assessments and business competitions. The results are directly linked to the bonus.

It's not easy to expel a person from a public hospital, and it's the only traditional Chinese medicine hospital in the city. The doctors have been a little slack. Lao Li can't expel a person, but he can't let you see a doctor. The two hospitals began a vigorous competition.

As the weather became hotter and hotter, the street beer stalls were lined up with tea leaves. The Baijiu in the border drank wine in winter.

Two or three friends sitting on the street, smelling the flowers, blowing the breeze, eating large pieces of barbecue and drinking beer are very comfortable.

There's nothing wrong with getting together, but many people like to bet when drinking beer.

People in the frontier bet that the bet is not money. It's very strange. That is, after drinking, who goes to the bathroom first or who vomites first pays the bill. Not only pay the bill, but also be ridiculed by friends!

Drinking and vomiting means that you can't drink. Going to the bathroom first means that your kidney can't.

Northwest people have a good face, especially young people. Who doesn't have a good face among friends! Doubt that I have no money, doubt that my kidney is bad, which can't.

After drinking bundles of beer, the urine between the legs can be changed, but I just can't go to the bathroom. One is more tolerant than the other. Sometimes, I can't hear the sound of water dragon and water when I arrive. I'm afraid to pee in my crotch.

This habit is not good, not at all. The long-term harm of holding urine is to lead to benign prostatic hyperplasia, and the short-term harm is also very troublesome. Especially when the urine volume becomes larger and the clamping time is too long, it leads to the decline of muscle function, and then there is an illusion that it doesn't hold back again.

Then drink it. When you get drunk and your bladder is super full, there will be an accident.

Xue Fei came across such a thing within a few days of taking office. For general orthopedics, he really doesn't take it to heart. He is also an orthopedic doctor.

But this bladder accident, he really can't help it. The circulating surgeons have no choice.

Chapter 404

x

Where the ass is, the interest is on the side. When he was just an ordinary doctor, Xue Fei fished, was lazy and took the initiative to work overtime? He thought too much. No one forced him. He didn't want to do it for one more minute. Now that he has become the deputy director of the emergency center, Xue Fei has begun to get liver.

In general departments, as long as they reach the level of deputy director, they actually don't have to write medical records and go to night shift (except for internal medicine). However, since Xue Fei became this deputy director, he has come to brush the night shift almost whenever he has time. In addition, he usually comes to work the earliest and leaves work the latest.

Some people are always ready, working hard, waiting for the opportunity to come, they may soar into the sky. But Xue Fei is another kind, that is, after the opportunity hit his head, he began to work hard. It's hard to say that kind of good, but Xue Fei's work is still methodical.

Yang Laosan, a taxi driver, is in his thirties. For a long time, in order to attract customers, he had already had experience in holding his urine, and because there were women during the wine competition that night, he simply didn't take over from beginning to end.

Then I was drunk. My staggering lower abdomen hit the corner of the table, and then like a balloon, my bladder broke! In fact, the structure of the human body is very particular.

Slightly more important organs are hidden by the body. The brain and human skull are quite hard, protecting the spine of the spinal cord and the ribs of the heart and lungs. The bladder is directly at the pelvic floor, which is generally not damaged.

Like a balloon, Yang Laosan's bladder exploded, and there was instant pain. The drunk lay on the ground like a big shrimp, sweating with pain.

The friends who drank together were still watching jokes. As a result, when Yang Laosan was so painful that he cried for his father and mother, everyone was afraid and joked. If they really drank to death, none of them could run away.

Rushed to the hospital. The surgeon in the emergency center went to Wang Zipeng in the anorectal department this week " Doctor, doctor, come and see, come and see. " Some are sober, some are drunk, and there is chaos in the emergency center.

After Wang Zipeng finished a preliminary physical examination, he began to mutter, "typical acute abdomen, abdominal muscle tension, tenderness, rebound pain and other signs of peritonitis are obvious! Obstruction? Perforation? " He's not sure.

"Did he throw up?" Wang Zipeng asked about the medical history.

"Throw up! Vomited a lot? " One of the half drunk people narrowed his eyes and answered, and then said, "doctor, give me a pain handle first. You see, people are hurting like this ball!"

Acute abdomen, when it is not diagnosed clearly, is contraindicated analgesia. It is not the cruelty of doctors, but the analgesia will cover up the condition.

"Why don't you do a color Doppler ultrasound first!" Wang Zipeng was still young and hesitated. When several drunkards heard this, the doctor hesitated and quit at that time.

The nurse in the emergency center came from the emergency department. She was quite experienced. She first informed the security office, and then quickly called Xue Fei.

After the security office came, several drunks didn't stop. In fact, these drunkards are also timid and want to blame the hospital for their mistakes. When Xue Fei was not a director, he was most afraid of the phone ringing in the middle of the night. Now he looks forward to it every night.

Ten minutes later, he took a taxi "What are you doing? What's the noise? I can't see it. If you don't look, go away, get out of the way!" After all, he is a doctor who has worked for many years. He knows that being tough at this time is better than saying anything good. After all, these people come to see a doctor, not to look for trouble.

"No! It can't be a broken bladder!" Although the abdomen is obviously plate-shaped, the lower abdomen is Peng long. Look at the crotch again. There is no trauma, and there is no trauma in other parts of the body.

"What did he do before he had a stomachache?"

"What else can I do? Drink!"

"Beer?"

Who drinks Baijiu in hot weather?

"Isn't it? Bet you're holding your urine!" Xue Fei asked as soon as he heard it. He is very clear about these things. He has many friends since he came here.

"Yes, I bet." Several half drunk people have a good temper and don't make trouble at this time. Because the doctor asked the point.

"Shit!" Xue Fei scolded his mother in his heart "Who is on duty in the urology department today." Xue Fei asked the nurses in the Department.

"It's their Majie!" The nurse quickly opened the duty book and said to Xue Fei.

"Sister! How is this grandson?" Xue Fei blew his hair directly.

Ma Jie, a senior urologist, was the most popular candidate as the deputy director of surgery in the emergency center of the hospital. After Xue Fei fell from the sky, they had a good relationship. As a

result, they automatically became enemies. Now they don't greet each other.

"Come on, catheterize him and bring him a big syringe." Xue Fei doesn't count on Ma Jie anymore. Ma Jie must not laugh at this patient today, or he will definitely fill the hospital tomorrow. He is not Xue Fei.

Xue Fei quickly began catheterization. As soon as the urine came out, Xue Fei determined, "it's really a broken bladder." Because the urine in the urine bag has blood.

Then Xue Fei directly inserted a 50 ml syringe into the bladder.

Needles and scalpels are sharp weapons, especially needles. Thick needles with cold light under the fluorescent lamp make people afraid. This thing can naturally make people afraid.

Several drunkards watched Xue Fei take a thick needle and plunge it directly into Yang Laosan's stomach. Yang Laosan shivered with pain. The others took two steps back directly and unconsciously.

Xue Fei pumped it back. There was urine and blood in it " Pay the money! Prepare for surgery. "

"Doctor, doctor, what's wrong. Why do you have to have an operation? " Originally, several drunkards with very strong tone were soft and completely soft at this time.

"The bladder is broken. What disease do you say! Hurry up and pay the money. Come here and sign for the operation. "

Some drunkards were completely stupid. Registration fee and emergency fee are not big money. It doesn't matter how many people. Now we have to have surgery. Who pays for the money? Who signs the word "surgery"? Several people are dawdling, trying to make others stand out.

"Who is the family? Hurry up and sign!" Xue Fei is also a human spirit. He knows at a glance that several evil friends drink. Now there is an accident and they don't want to stand out, so his tone is not good.

After shouting, he called Zhang Fan. Since becoming the director's assistant, Zhang Fan is completely happy. He is not happy for this assistant, but because of the operation.

The surgery of the first Department of orthopedics can be done by him now. First, he is the director's assistant and has the right. Second, he doesn't want orthopedic equipment fees. He doesn't participate in the sharing. Other doctors are also happy. If someone works for nothing, who is not happy.

Therefore, whether it is the operation of their group or not, as long as Zhang Fan has time, he has an operation to do.

So Zhang Fan is also happy recently. And Sheffi awesome, as long as the emergency center can not do the Department of orthopedics surgery, directly to the name of Zhang Fan. The amount of systematic orthopaedic surgery visible to the naked eye is rising slowly.

"Come to the hospital, there is a patient with bladder injury!" Xue Fei called Zhang Fan directly.

"OK, I'll be right there." Zhang Fan hung up and went out.

"Hehe, if you want to see my joke, wait and see!" Xue Fei looked proudly at the surgical building. He is also prepared. As long as Zhang Fan gives him a stand for half a year, after he straightens out the Department, he is ready to study!

Xue Fei never thought of studying before. The income from further education became less, so he would not go to further education in the past.

Chapter 405

"Hurry up, who will sign? Have you paid the money? I can tell you. If he doesn't hurry up for treatment, he will be in shock. What's shock? You know, you'll die. Has anyone signed yet? Ready to call 110. " After Xue Fei called Zhang Fan, he directly began to pick up some drunks.

Xue Fei also worked hard to win over people. This is the difference between being a leader and an ordinary employee. Xue Fei also used his heart.

"Doctor, if the doctor doesn't call the police, we'll call his family right away. Right away, you prepare first! "

"What doctor, this is our director." A winking nurse held Xue Fei. Isn't the director a doctor? But looking at Xue Fei's slightly proud expression, the nurse seemed to find the head nurse's position waving to her.

Yang Laosan's family arrived in a moment. His wife worked in the housekeeping company. She was strong. At a glance, her husband lay on the examination bed and rolled in pain. Several other people are hair intact and stand aside.

She just quit. Roll up your sleeves and grab a husband's friend and start shaking. The originally dizzy drunk directly asked her to vomit with high frequency. The brown barbecue and red pepper vomited all over the ground, and there was yellow foaming beer foam on it.

She has a lot of strength to do manual work all year round. Seeing her husband like this, although she loves her husband, she loves money more. The children have to go to school, the house has to repay the mortgage, the old man is sick from time to time, and the pressure of life makes her a fierce woman early.

"Stop making trouble. Your husband will die if you make trouble again!" Xue Fei can't watch anymore.

"I deserve to die. I just took some of their animals to the court. I call my husband to drink every day. Why don't you lie down here, ah! Why did my husband lie down here alone.

I don't care today. The big deal is one life. If I can't, I'll have another life. I'd like to see. The police don't care about you animals. " With that, she'll call the police.

"Big sister, big sister!" One of the frightened drunkards woke up directly. His hair blew up. They are ordinary people. Who is not afraid of things is still a matter of human life.

"Who is your sister? I'm your grandmother. It's useless to say anything now. I'll call the police now!" Although he called the police, the phone didn't call out.

"Well, well, we'll pay for the medicine and the operation." Several people discussed it and began to raise money. Living at home is sometimes difficult. Who doesn't know the atmosphere, who doesn't know how to protect the friends around, but sometimes it's really a force, it doesn't allow it!

When Zhang Fan arrived, the patient had begun preoperative preparation. Surgery, especially emergency surgery, was rarely examined in the early years. However, with the high incidence of various infectious diseases and the emergence of various disputes, some preoperative examinations must be done. No one dares to start without them.

"Brother, my brother is counting on you. Today, the doctor on duty in the urology department is Majie. It is estimated that he is waiting to see my joke." When Xue Fei saw Zhang Fan, he rushed over and almost shook his tail and stretched out his tongue. After all, there are not many people who don't bow down for five bushels of rice.

"Hehe, a roast duck tomorrow!" Zhang Fan said with a smile while changing clothes. Xue Fei knows him too well. It's too difficult to eat his meal.

"OK, roast duck every day, as long as you don't get bored!" Xue Fei doesn't bargain at all.

Zhang Fan was surprised. Is this still Xue Fei? "I'm just kidding. Why are you starting to be generous? "

"I can't speak. How can I be generous? When am I not generous, brother?"

After Zhang Fan changed his white coat, he ignored him. People will change. Xue Fei has begun to change slowly. Maybe this is hard work.

"Surgery! Are you ready before the operation?" Zhang Fan did a physical examination. After questioning the medical history, he said to Xue Fei.

"Done."

"Then go into the operating room!"

"Doctor, is my husband in danger! I'm afraid of what you said. He can't pee by himself in the future? And take a bag with you?" The woman looked at the doctors and said anxiously.

"It's possible! The more entangled you are, the more likely it may be." Xue Fei said something. Zhang Fan looked at Xue Fei and said nothing more.

The emergency center has its own operating room. Although it is not as big as the general operating room of the hospital, it is really very tall for a department to have its own independent operating room.

"Tell me, this man is fine and has no trauma. How can he break his bladder?" Anesthesiologist Yang Yun said in wonder.

Yang Yun is an anesthesiologist who has not worked for several years. She graduated from the Department of anesthesiology. She is careless and has no plans. She usually speaks straight. In fact, most anesthesiologists in the operating room are clinical anesthesiologists. Therefore, after the establishment of the emergency center, she was crowded into the emergency center.

The operating room is already very tired. Getting to the operating room of the emergency center is even more tired, so no one is willing to do it.

"Wine, wine. It is estimated that I have drunk no less than a dozen bottles of beer in a short time." Zhang Fan explained.

"I said, hours later, the bladder after killing the pig was blown up and couldn't be broken with my feet!" Yang Yun said while preparing for anesthesia.

"Have you ever blown?" Xue Fei asked. Although he was wearing a mask, Zhang Fan already knew that this thing definitely had a bad smile. It seems that the problem of this flirting girl has not changed.

"Of course..." the girl thought it was wrong and immediately said, "director Xue, be careful I'll turn you over!" After being excluded once, the girl began to be sensible. If it was her before, she would definitely hate the past, "I'll blow it. What's the matter!"

"Ha ha, well, I surrender, I surrender. younger sister! Don't worry, this is definitely better than the big operating room of the hospital. " Xue Fei sprinkled the pie carelessly.

"Wash your hands, all right!" After Yang Yun said a word, she buried herself in writing anesthesia records, but she was a little sad. If she had enough technology and education, how could she be kicked out!

Bladder surgery must be performed as soon as possible, otherwise it will cause infection.

"How? Other places? " Xue Fei took the initiative to stand in the position of a helper, prepared the electric knife and attractor early, linked them well, and clamped and fixed them on the hole towel.

"When external force acts on the bladder, it will be equally transmitted to all parts. According to hydrodynamics, it will act on the weakest part of the bladder, so most of the bladder top covered by peritoneum will form rupture. This patient can't run away. Just make a conventional incision. " Zhang Fan explained.

"Hey!" Zhang Fan explained clearly in a word, but Xue Fei began to feel sad. "They are all from orthopedics. Why don't I know? Hey, it seems that we must seize the time to study. Or sooner or later you'll lose face! "

"Start, sharp knife!" Zhang Fan said.

The operating nurse steadily handed over the scalpel, and then handed over two gauze.

Chapter 406

The place where the skin has been prepared is like a naked chicken. It is lonely. After being contaminated with sterilized iodophor, it looks like Zhou Heiya's brine products.

"Little pull hook!" Zhang Fan said. The structure in the pelvic cavity is much less than that in the abdomen, especially in the male pelvic cavity. Zhang Fan made a conventional incision directly at the upper end of the pubis.

The scalpel crossed the skin as if it had drawn a straight line with a light yellow pen on white paper. Zhang Fan, one holding a knife and the other holding a rectangular gauze, gently pulled outward along the incision. Yellow fat slowly blooms bright red flowers.

Xue Fei holds an attractor in one hand and is always ready to suck blood to ensure the clarity of the operation field. In the other hand, he also holds a piece of gauze parallel to the gauze in Zhang Fan's hand and gently pulls it. This is to give the skin a tight state.

"Electric knife!" As the skin opens, there are bleeding spots. General micro capillary bleeding occurs in a

state of exudation, while slightly larger capillaries slowly flow upward like spring water. Generally speaking, they are relatively mild.

The arteries are not good. They are very irritable regardless of their size. Their bleeding methods are the same. They are exposed. The pressure is not small. It often happens that they don't pay attention to the face of the operator.

After opening the skin, Zhang Fan began to enter with an electric knife. With the sound of the electric knife like an electric soldering iron, wisps of smoke began to float slowly.

At this time, the suction device should not only suck blood, but also smoke. A good doctor with an assistant will hardly let the smoke come out. Xue Fei's Kung Fu was average, so there was a lot of smoke.

"Brother, after the operation, I'll invite you to a barbecue. Xiao Yang, Xiao Li and Xiao Wang, let's go together. " He did it on purpose. Xiao Li is an operation nurse and Xiao Wang is a itinerant nurse.

Zhang Fan ignored him. Xiao Yang smiled and said, "director Xue, let's just have a barbecue. Please have a KFC." The two nurses smiled and said nothing.

"OK, I'll let Wang Zipeng buy it after the operation. I'll give you all the overtime pay for today's night shift twice. "

"Director Xue, you are very kind!" The itinerant nurse's smiling face blossomed. After she was called at home, she was a little unhappy. As a result, she was paid overtime twice.

The skin was opened in the middle of the pubic bone, the lower fascia was cut in turn, and the rectus abdominis muscle was separated and pulled to expose the anterior bladder space. The pubic bone is actually at the junction of the pelvis in the front of the human body, specifically above the genitals. People with thin fat layer can press it.

"My God! How did this happen? " When Zhang Fan entered the bladder, Xue Fei immediately exclaimed. No wonder he exclaimed that this kind of pressure-induced bladder injury is too rare.

If you hold your urine too much, your brain will be worried. As soon as it is worried, it will directly send a pain signal. Therefore, a person in a normal state will not hold it to this extent at all, that is, if he is

drunk, otherwise he will not drink and explode his bladder.

The appearance of the bladder is very smooth. There is a thin film outside. You can vaguely see the vascular network crawling on the surface of the bladder, just like some particularly white faces.

When the fascia tissue is opened, you can see a broken paper shell cracked by firecrackers, a hole with a diameter of three or four centimeters. The hole is flowering. The bloody bladder meat is like a flower petal floating in the yellow urine, like a flower in the wind. And the internal structure of the bladder was turned out.

The outside of the bladder is smooth, which is to reduce friction with other tissues. There are many folds on the inner side of the bladder, forming gullies like a hill beam.

This structure is particularly similar to the stomach, which is why the bladder is called a small stomach in many stalls selling sheep offal. Moreover, when the bladder is cooked, it is actually similar to the taste of the stomach and has a chewy toughness.

"Attractor!" Zhang Fan immediately blocked the urine that was about to overflow with gauze.

With Zhang Fan's voice, Xue Fei immediately inserted the plastic head of the attractor into the cracked bladder. Because of the blood, the urine is obviously yellow. The suction device uses a transparent plastic tube to quickly suck urine.

Watching this scene, Xue Fei's mind didn't know how, so he flashed the scene of fashionable beauties on the street sucking orange juice with a straw with sunglasses, which couldn't be spilled. It's OK to think about it, but this shameless thing unconsciously chirped its mouth.

"What? Want to drink!" The main reason was that Xue Fei's voice was so loud that Zhang Fan was surprised.

"Well! How could it be? Don't talk nonsense. What now? Sew?" Xue Fei was a little embarrassed and hurried to change the topic, "what's the matter today!" The baby secretly scolded herself.

"I'll explore it first to see if there's any damage elsewhere." Generally, there is only one breakthrough in this situation, but as a doctor, if you don't see clearly, you will suffer from the operation and will be uneasy for a long time.

With Zhang Fan's examination, Zhang Fan said, "this man's prostate is also a little swollen. Ah!"

"It's strange not to be swollen. I'm a taxi driver and like to hold my urine. It's time to pay back in a few years." Xue Fei said after taking a look.

What is the relationship between prostate and bladder? In fact, a very vivid metaphor is gourd. What kind of gourd is often used to hold wine in ancient costume TV dramas.

The as like as two peas are the bottom of the bottle, and the smaller one is the prostate. The gourd is the urethra. It is very vivid. If the above one is smaller, it will be exactly the same.

With the increase of age or bad habits, the prostate will slowly swell. This thing is not hollow, just like a fresh gourd, which is not hollowed out.

The larger and larger prostate will make the urethra narrower and narrower until it is too narrow to urinate. And because this place is very rich in nerves and muscles.

Therefore, after the current column gland swelling, when forced urination, various nerve reflexes will lead to muscle contraction and relaxation here, and the so-called urine ticking will appear!

Why are there so many nerves and various muscles in this place? It's also very simple, because the ejaculatory (a) seminiferous duct takes shape in this.

In other words, there are two channels in this place. The thicker one is the urethra and the thinner one is the ejaculatory (a) seminal tube, which is derived from the bladder.

"Sew it, there is no break elsewhere! This person must use antibiotics regularly after operation, otherwise the adhesion will not heal after infection and inflammation in this place, which will be troublesome. "

"Don't worry!" Xue Fei nodded.

Compared with other sutures, this suture is a little more layered, and some inactivated bladder tissue should be cut off.

Zhang Fan began to suture layer by layer with a needle, and sutured the bladder fissure in 2 or 3 layers with 3-0 or 4-0 intestinal suture. Catgut is actually the so-called absorbable thread. It's such a simple thing that China couldn't do in the early years.

Finally, the smooth bladder surface is like a chrysanthemum on the bladder, like a patch on the smooth volleyball.

The operation is like this. How to get in and how to get out. The layers must be stitched clearly, otherwise this place will be in a mess in the future.

"Fistula!" Zhang Fan said after stitching. After bladder suture, I'm afraid that urine will lead to bladder rupture or infection again. Fistula is to open a hole at the lower end of the front wall of the bladder with a knife and put it into a plastic tube to direct the urine away. I'm afraid that the infection will not heal as much urine comes out of the ureter and as much urine is led away.

Bladder surgery is very simple. It seems that opening the skin suture is over. In fact, the difficulty of this

thing is exploration. There are several duct openings in the bladder.

The opening of both kidneys and ureters, like the vas deferens and urethral orifice buried in the wall, are very troublesome.

When the symptoms of ureteral injury show up, the corresponding kidneys become hydronephrosis. So don't look at the bladder, just like volleyball, it's actually very complicated.

At the end of the operation, Zhang Fan said to Xue Fei, "be sure to explain to your family and take good care of it, especially the fistula. You should pay more attention."

"OK! I see, brother, thank you! " When there was no one, Xue Fei said positively to Zhang Fan.

"It's all right. If you have an operation in the future, please call me! " Zhang Fan nodded. In fact, Zhang Fan felt a little disappointed. Xue Fei never called his brother before. He shouted Zhang Fan when he was happy and livestock when he was unhappy.

It seems that this brother doesn't sound natural! Self abuse?

Chapter 407

Zhang Fan is getting busier and busier. The experiment of tea vegetable university is not going very smoothly. The experimental operation appears one problem after another. Various organs fail in turn. As a last resort, Zhang fan can only increase the number of operations so that they can have more operation cases to summarize and discuss.

Zhang Fan spent the morning in the operating room and the afternoon in the operating room of the animal laboratory. Sometimes he had to help Xue Fei stand on the stage. If he was on duty, he would be even busier.

When he is not on duty, when he comes home, Zhang Fan has to learn English, but for Zhang Fan, it is more difficult than any operation, and the efficiency is very low.

The words I remember today will be strange in two days, as if I've never seen them before. Zhang Fan reads and studies while Shao Hua is busy reading and studying.

Fortunately, when reading and studying, the old men and women rarely come in to disturb, so Zhang fan can secretly keep warm with Shaohua. This kind of furtive tenderness seems to be interesting and exciting.

Although the days are very busy, but on the whole, they are quite full. The old man is also very busy recently. He is mysterious.

"What's the old man doing recently?" The old man hid his phone in his bedroom. In the past, the phone was so loud that people under the building could hear it, so Zhang Fan asked curiously.

"Hey, hey, guess." Shao Hua playfully took the apple cut into small pieces in his hand and teased Zhang Fan like a dog.

"If I let you guess, I won't guess." Then Zhang Fan will jump on Shaohua when he catches Shaohua. Of course, this general single Wang absolutely doesn't understand. This kind of thing is actually more interesting than real guns.

"All right, all right. I surrender, I surrender, don't do it, hate, my mother is coming! "

"I won't accept surrender!"

After glancing at Zhang Fan, Shao Huabai continued, "what else can we do? Aren't we getting married soon? The old man is preparing us new quilts, new mattresses and so on. He was a little embarrassed, so he avoided you and me. "

"Well! What can I prepare for this? Just go to the supermarket and buy it. " Zhang Fan said in wonder.

"Silly, don't understand." Shaohua nodded Zhang Fan's head.

"Do you say it or not?" Zhang Fan is trying to find something wrong and wants to bully Shaohua.

"Annoying!" After placating Zhang Fan, Shaohua sorted out Zhang Fan's clothes and hair, and then said, "the quilt sold in the supermarket is like cotton. And the cotton produced by tea is not very good.

A colleague of the old man was transferred to the south of the border area. They said that there was a very good kind of long staple cotton on the farm. The old man asked him to buy some and make us some quilts. "

"Trouble is not trouble. If it's trouble, it's OK. Now the heating in the room is good. It's not necessary."

"I also told my mother, but if the old man has to prepare, let him prepare. In my mother's words, he can help us less and less.

Finally, there is something that makes him feel useful, so let's not stop it. "

"Oh, all right." Zhang Fan nodded thoughtfully.

In the twinkling of an eye, Li Hui, who came with Zhang Fan, was about to be the child's father. Although they are in the same hospital, they haven't been in touch for a long time, that is, they make an occasional phone call or something.

At the weekend, Dr. Liang went to the bird market to report his recent achievements. Zhang Fan was not on duty. He went to the hand and foot hospital for a while and came back.

Chen Qifa and Li Liang are completely brought out by Zhang Fan. Now Zhang Fan doesn't need to worry about ordinary hand and foot injuries. They can do well, and there are many patients in the hospital. The hospital is full of vitality up and down.

It was not easy to have his own weekend. Zhang Fan took Shaohua to the mall, pressed the road and lived a normal couple's life.

In fact, as long as it is a transferred Wang and a hospitalized dog in the hospital, they are very sad. In particular, it takes time, no time, no tickets. Chasing an object is stingy. If you don't, you'll have to eat dirt for a month.

In the evening, Li Hui called, "is Zhang Fan busy?"

Zhang Fan is watching TV with the old man. When the old man sees that the Marubeni has launched a rocket, he chatters about accusations, compensation and fishing. Anyway, when talking about the Marubeni, the old man turns into an angry youth.

"What's the matter? What did you say. Whether you are busy or not depends on what you do. " Zhang Fan said with the phone.

"Hehe, don't worry. I'm not borrowing money from you. You look stingy. Come out and sit down. We haven't talked for a long time. " Li Hui laughed and scolded Zhang Fan on the other end of the phone.

They came to the tea plant together, and then they were admitted to the same hospital together. The relationship has always been good.

"Why. Don't you take care of your biology teacher? He has a big stomach! " Zhang Fan joked that he didn't want to go. It's not easy to have a weekend. He still wants to stay with Shaohua for a while.

"Today, several of her sister-in-law came, and I was on holiday. Come out. I haven't seen each other for a long time. I forgot the Lampu dialect. Come out and let's review."

"Yes, I haven't spoken LAMPO for a long time. Well, where is it? I'll come."

"It's xiaosanchuan at the back door of the hospital. It's my treat!" How extravagant Li Hui was before marriage, how stingy Li Hui was after marriage.

"Hehe, why don't you choose a roadside stall?" Zhang Fan has been tricked by Shaohua's mother. As a last resort, he won't eat xiaosanchuan, which is full of red oil and soy sauce.

"It's called recalling the past. You're developed now, but you also have to eat a sweet meal. How delicious you used to eat. You look down on it in just a few days?"

"Well, you talk a lot. I'll start now." After hanging up, Zhang Fan spoke to Shaohua and the old couple and went out.

Shao Hua is very supportive of Zhang Fan's social life. Usually, Zhang Fan seldom goes out and seldom takes the initiative to ask his friends out to chat.

She was really worried that Zhang Fan had only work, so when she heard that Zhang Fan wanted to go out, she hurriedly took Zhang Fan more than 1000 yuan.

Since Zhang Fan confirmed his relationship with Shaohua, Zhang Fan turned in his salary card and bonus card. Anyway, he is my uncle and doesn't worry about anything at home. It was cold and hot, and Shaohua prepared all kinds of clothes for him early.

Moreover, Shao Hua handled his sister's living expenses and money given to his parents properly. Zhang Fan was so happy that he didn't worry about anything.

"Why do you give me so much money? Besides, Li Hui has said that he's treating, and I have money. "

"How much do you have?" Shaohua asked.

"I didn't spend the one thousand you gave me last month. I have it!" Zhang Fan doesn't smoke or drink. He eats and drinks at home, in the hospital or in the laboratory. These places are in charge of food. He really doesn't spend much money. He just refuels and spends more on maintaining the car.

"Don't be too hard on yourself! When a man goes out, he should be generous. Don't let people say you're stingy! " Shaohua said generously. As a result, he took back the 1000 he took out.

She doesn't agree with other things her mother said, but she still agrees with the man's tightness.

"Hehe, OK. Today I'll rush to pay the bill! " With that, Zhang Fan went out and drove off.

Li Hui's wife's family married a modern car. Although it's not as good as Zhang Fan's car, he owned a car earlier than his peers.

When Zhang Fan arrived, Li Hui had sat there drinking tea and waiting for Zhang Fan.

Chapter 408

Women change at 18, but men also change at 18. Girls change their appearance, men change their psychological maturity. But this mature time is hard to say. Maybe it won't get bigger in a lifetime.

Li Hui is bigger and mature. Seeing Zhang Fan smiling, he opened the stool for Zhang Fan and said, "I know you're busy, so I don't bother you at ordinary times. I've been upset recently. I just want to talk to you. "

If Li Hui had been in the past, he would definitely complain about Zhang Fan's ink first, and then make fun of Zhang Fan's male and female life. Despite this small change, Li Hui's psychology is absolutely like a snake, peeling off several layers of skin.

"Hehe, what's the matter. Did you quarrel with your wife? " After sitting down on the stool opened by Li Hui, Zhang Fan smiled and asked.

"No, although my wife is pregnant, she has always had a good temper. She always feels older than me. I am a foreigner and always take care of me in all aspects." Li Hui smiled and said.

Not life, that is work, are ordinary people, but these two.

"Is Juma Buick bothering you?" Li Hui wanted to give Zhang Fan tea. Zhang Fan didn't let him pour it. Zhang Fan came by himself and asked while pouring.

"The resident director is good. Now there are more and more graduate students in the Department. Now the pressure is too great. Since three graduate students came, the equipment in the Department has been updated quite quickly. I'm a little overwhelmed.

Now an intensive care unit in the Department has been established, and the equipment in it is all imported. I can't use it directly. I can't understand the instructions. "

"Oh, who uses your equipment?" Zhang Fan wondered.

"Occupied by new graduate students. Now only the three of them and the resident director are skilled,

and other doctors are not very skilled. " In fact, Li Hui is kind enough to say that he is not proficient. In fact, they just can't use it directly.

"No training?"

"I don't know what happened. After I bought it, the director simply said a few words and didn't give training. I privately copied the instructions of several machines, went to my wife's English teacher in their school and gave it to the translator. The translator translated it. As a result, the translated cow mouth was wrong ~! "

"Is there fierce competition in the Department?" Zhang Fan knows that he has been working for several years. How can he not understand the Tao here.

"Yes, with your precedent, now our department is going to have a director assistant. The original private competition is now completely on the table.

Does Zhu Qianqian know? She's afraid to rob her patient now. Hey! Our education is still low. I asked several times about the use of new equipment. What three graduate students said was vague, but I never asked again. I know it's not their fault, but it's psychological pain! "

I don't know whether the boss of the health system was born in the Department of internal medicine or why. Now the medical route has changed very much. It's getting closer and closer to Europe and America, not to mention the complete Europeanization.

Surgery is not obvious. Even a doctor can't show anything in surgery at a time, but internal medicine is different, so Li Hui is also under great pressure.

The two talked while eating" What did you say we drew. I can see that after internal medicine, I will be a graduate student. I have no hope! " Melancholy Li Hui lit the cheapest Red River cigarette.

"It's not that exaggerated. Are you too nervous?"

"If you want technology, there is no technology, that is, an ordinary doctor. In the past, you could grab patients and get more kickbacks. Now, as soon as intensive care is established, all slightly more serious patients are directly robbed by the three of them.

You know, I've only written medical records this month. They're almost done with treatment, and they've run out of drugs. Then they'll send them to the intensive care unit and give us to wipe their ass! And the director also supported them. Zhu Qianqian secretly cried several times. "

The nagging Li Hui said a lot. It seemed that the happy days before were gone, and more and more pressure around him began to come slowly.

When Zhang Fan came home, he wanted to enter the system and brush a few more operations. After thinking about it, I picked up the English book again. There's no way. The situation is stronger than people. If you want to go farther and look farther, you have to win this mountain.

The weather is getting hotter and hotter, and the girls in the street are wearing less and less. Occasionally the breeze blows, the beautiful girls are like a pool of gulls and egrets, white!

"Don't look!" Shaohua stretched out his hand to cover Zhang Fan's eyes and spent as much time alone as possible at the weekend.

"Didn't look, really didn't look!" Zhang Fan said wrongfully.

"Really?"

"Yes!"

"Want to see it? Tell the truth! "

"I don't know why you blindfolded me! What are you looking at? " Zhang fanhan came out. It's really hard to answer. Do you want to see it? Will definitely be chased and killed. It seems a little hypocritical to say you don't want to see it.

"Hum! Just install it for me. If you want to see it, you can't see it. If you want to see it, I'll show it to you at home. " Shao Hua's face turned red directly.

"Really?" Zhang Fan's mouth is full of water.

"You said you didn't see it, didn't you! Ah! Ah! " As he spoke, Shaohua greeted Zhang Fan at the fourth rib under his armpit. The skin of this place was very thin and it hurt a lot.

Zhang Fan tightened the muscles of his whole body and almost used the levator ani muscles. As a result, he still couldn't. the iron cloth shirt didn't practice in place. A noisy weekend passed.

In the evening, they had planned to eat casually and go to a movie. The cinemas in previous years were deserted and became a place for Jiangsu and Zhejiang businessmen to sell discounted clothes.

However, somehow, after Qianda real estate got up, cinemas everywhere seemed to usher in the second spring and began to prosper again.

They were going to find a place to eat. As a result, they met Jia SuYue and Lu Renjia, who was already a little fat. Because of their similar family conditions, their relationship is getting better and better.

Shaohua usually has to read and study at home or accompany Zhang Fan. Jia SuYue can't shout her out. There's no way but to shout Lu Renjia out to go shopping.

"Oh! Yo! I also said that you have become a housewife. It turns out that you forget your friends when you see color! " Jia SuYue was also very happy when he saw Shaohua and Zhang Fan. He quickly came and hugged Shaohua, as if he was afraid that Shaohua would disappear.

"Director Lu, where's captain Zhu?" Zhang Fan said hello to Lu Renjia.

"I'm not the director. Just laugh at me. Zhu Bing went to buy yogurt. He'll come in a minute. I'm greedy recently!" Speaking, Lu Renjia was a little shy.

"Sour girl, ha ha!" Zhang Fan made fun of Zhu Bing when he saw that he had a lump in his yogurt.

"Hi! Director Zhang Da is rare, but I love to hear you say this. After all, he is a professional and can see it right at a glance! " Zhu Bing said with a simple and honest smile.

"Ha ha, how are you? Are you busy recently?"

"Busy, why not busy!" The two men began to talk.

"I said I would go to you in a few days!" Zhu Bing handed Lu Renjia the yogurt pimple and said to Zhang Fan.

"What's the matter? Do you reserve a bed for your road director? It's a little early! "

"Hey, where are you? Jiajia and I are going to have a wedding next month. I want to ask you to be the best man. I know you're busy, so I'll make an appointment early!"

"Congratulations! Congratulations, even if I'm busy with such a big thing, I'll find a way to make time. Did your Taishan finally nod? "

"Hey, hey, nodded. Without nodding, Jiajia can't even wear a suitable dress. "

"You're still good!" Zhang Fan is telling the truth.

Several girls are also chattering behind. They talk about almost the same things as Zhang Fan, but they seem to be more retreat.

"Jiajia, have you taken wedding photos? A colleague of our unit went to Suzhou and Hangzhou to take wedding photos!"

"Well, it's a bit of a fuss to go to Suzhou and Hangzhou!" Shaohua opened his mouth in surprise.

"You let your family Zhang Fan take you off the side." Jia SuYue felt something was wrong and said, "don't talk about Suzhou and Hangzhou. Many people have gone abroad to take wedding photos."

"Zhu Bing is so busy that he doesn't have time. Besides, it's inconvenient for me!" Lu Renjia gently touched his stomach.

"Yes!" Jiajia, huazi and I will be your bridesmaids then.

"Good!"

For more than two years, Zhang Fan has made too few friends, but although there are few, they are generally good. Several people had a noisy meal.

During the dinner, Jia SuYue also said that she should quickly find her boyfriend and catch up with Lu Renjia and Shaohua. The other two girls hurriedly began to find out the object for her. Maybe it's women's nature. As long as it's such gossip, they will always enjoy it.

Monday is always the busiest time in the hospital. The outpatient department is full, the ward is full, and even the operation is full.

Zhang Fan went to another group for surgery. Xu Xian followed Zhang Fan to help. Now he is second to Wang Yanan. As long as Zhang Fan had surgery, he would try to follow him on the stage.

Today is Wang Yanan's clinic. The girl is so busy that she doesn't touch the ground. She has more than 200 clinics a day and doesn't have time to drink from beginning to end.

The girl was really brought out by Zhang Fan. I won't say anything about the operation. General plaster cast and manual reduction are very good.

"Oh! oh Doctor, take it easy, beauty, please slow down! " A man's ankle was a little dislocated. Wang Yanan was restoring it by manipulation. The man howled like a wolf!

"Bear it. You are a big man. How can you shout like this." Make complaints about Wang Yanan feel shy for a long time.

"This woman, don't look thin and weak. She's so strong that I'm almost pinched and crying by her. It is said that female doctors are gentle, and TM is deceptive! " After the manual reset, the man went out and said to his friend in tears.

"Where's Zhang Fan? Is he in the Department?" Just after dealing with a patient, the director of the medical department came to the orthopedic clinic.

"Director, Zhang Fan went to surgery this day."

"Oh. There's a patient. Let's have a look first. Be careful. Don't talk if you're not sure. " The director of the medical department specially explained.

"Good!" As soon as Wang Yanan heard it, he knew that he was still a hard relationship.

Chapter 409

On Monday, several orthopedic directors had surgery. What's left is the joint doctor, or the deputy high of trauma, or the main treatment of lumbar spine. The people who come here have a lot to do with each other. They directly greeted the director of the medical office through Ouyang.

Several doctors have different opinions. Some say surgery is necessary, some say massage, and some say dehydration and detumescence treatment. The director of the medical office couldn't hang up. He said and was ready to see if Zhang Fan was there.

As a result, Zhang Fan was away. He went back alone and felt that the other party would be unhappy, so he slipped Wang Yanan away.

The patient is a woman in her thirties and early forties, huh! Although I'm not young, I dress up very well, and my face is full of collagen, which is piled up with money.

Although the waist hurts, when a woman frowns, it makes people feel sick and beautiful. It's right to say that beauty comes from the water town in the south of the Yangtze River.

Wang Yanan has improved greatly in general trauma surgery. For the lumbar spine and joints, these two most difficult parts of orthopedics are not enough.

As soon as she looked at the patient's examination film and several family members around the woman, the girl knew that this person was unusual, so she simply shook her head and stood in the crowd.

"How's it going? Is there a conclusion? " One of the women should be a subordinate. Looking at the doctors, she asked coldly.

"After surgery, the symptoms have affected the life treatment! Surgery is necessary. " Said a deputy high of the third Department of orthopedics.

"Let's not talk about surgery. Now how can we solve the current symptoms?" The man didn't like it. The woman also said, "I'm not doing surgery here." There was some southern seaside tone in the voice.

"Well, dehydration and swelling may be better." We are not sure. Medical treatment is not a subject that can accurately predict the consequences. Now we don't dare to guarantee that the patient is so strong.

"Now go and call the surgery director to see if the orthopaedic director has had an operation, and then ask Zhang Fan if he has had an operation. If he has an operation, let them come to the clinic quickly." The director of the medical office said to the head nurse of the clinic.

Then everyone stood awkwardly in the outpatient office. In fact, there was nothing that could not be handled here. A closed injection could actually delay the illness, but now who is willing to make trouble for himself.

Sometimes, patients with such a hard relationship are not necessarily opportunities, but may be a bomb, so everyone is very cautious.

The male subordinate saw the doctor in the office, but he didn't know what to do. The relationship may oppress the leaders, but there's really no good way for the ordinary doctors separated by several floors.

There was no need to avoid. He took out the phone and began to make a call. The doctors in the office didn't understand a sentence when they heard the southern dialect of his hometown.

The government alone cannot develop the frontier, so we can only ask our grandparents to invite many super large enterprises.

Although they are not high-tech, they have money and can make investment.

This one is said to be a family business in Xici or Yao Yu. Although it is not a giant in their local area, it will be great when they arrive at the frontier tea vegetable city. It is directly a giant.

This is one of them. The patient Jiang Yina is the head of the northwest of their family. At the beginning, she was invited by the frontier leaders to invest.

Long term desk work has led to perennial pain in the waist. There were special massage doctors in the south, and the condition is not very serious. After coming to the frontier, because the weather was not suitable, the waist disease broke out, and she couldn't stand up because of the pain.

Her staff are contacting their experts in the south to see if there is any good way to solve the current

pain symptoms“ Lumbar joint noose, massage, find a better traditional Chinese medicine to do massage.
" Southern experts gave advice directly by telephone.

"President Jiang, let's go to the traditional Chinese medicine hospital. Dr. Qiu said let's find a traditional Chinese medicine massage." The subordinates told Jiang Yina the results in their dialect.

"All right! Tell them to be polite. " Although she couldn't straighten her waist, she still asked her men to be polite.

"Let's go to traditional Chinese medicine, thank you!" My men bite their teeth and say thank you.

"Don't go, we can't deal with it, just like the traditional Chinese medicine hospital." Ouyang and Lao Gao came. They greeted them directly through the frontier government. Ouyang and Lao Gao had to come.

"Dr. Qiu is a very famous doctor. He..."

"That's your south. This is the frontier. There is no traditional Chinese medicine of aristocratic family here. Wait, our doctors are operating. They'll have a look when they get down. Maybe there's a way. " Ouyang directly rejected his proposal.

It's not that Ouyang despises traditional Chinese medicine hospitals. It's a matter of regional factors or history. Chinese traditional medicine, how to say, is more strange than western medicine.

Chinese Western medicine is to learn laomaizi first, then pill country, and then Europe and America. Although the masters are very complicated, they can also be counted.

But Chinese medicine is different. It is estimated that this thing has not adapted to modern teaching. The doctors coming out of the assembly line really have no characteristics.

And some doctors who are quite skilled in means are too conservative. They accept an apprentice to investigate and test on the left and right. Anyway, many good things are brought into the coffin.

In the early years, there was a super cow bone setting clinic diagonally opposite a Military Medical University. At the beginning, it became a myth story. In the early 1990s, people massaged 500 people at a time, and the effect was also very obvious.

Whether it is the government or the University, he has invited the old man to be a professor many times, but he just doesn't go, but his own children don't love this thing. There is a lot of money and people can't afford to study medicine. With the old man's death, this set gradually disappeared.

Most of the northern Chinese doctors are official doctors, that is, the so-called imperial doctors, which is a little different from the current medical education.

The really powerful Chinese medicine is still in the south. Many generations of medical skills come from

the South or Southeast Asia. northwest? It's a joke because it's too exquisite.

Lao Gao frowned after looking at CT and MRI. His specialty was in the joints rather than the spine. The other party had to massage, so he had no choice.

The head nurse of the operating room walked up and down the corridor of the operating room. She had received a call from Ouyang. Once Wang Dehua or Zhang Fan, the director of the second Department of orthopedics, had an operation, she asked them to come to the clinic immediately.

"Head nurse, what's up?" Although Zhang Fan didn't look back, he already knew that he was the head nurse of the operating room. The aroma was too strong. An old woman's breath rushed from his back. She went in and out and made Zhang Fan upset.

"Have you finished? There is a patient in the clinic. The dean asked you to go and have a look. " The head nurse Shun then gave Zhang Fan the trousers of his hand washing clothes.

There are too many people undergoing surgery today. Zhang Fan doesn't have suitable pants. He can only wear a pair of fat pants.

"Well!" Zhang Fan had already raised his trousers to his chest, but there was still a section of strength under his feet. The head nurse mentioned it again and directly strangled him to some unspeakable place.

"Tomorrow, let the logistics in a batch of hand washing clothes, you see, can't carry it up." The old lady was definitely on purpose. She couldn't lift it up, but also deliberately tried to lift it up a few times.

After the operation, Zhang Fan hurried to the dressing room and looked below. They were all red. Zhang Fan was gnashing his teeth. The married woman is too fierce.

Zhang Fan changed his clothes and ran to the clinic.

Chapter 410

When Zhang Fan arrived, more people came. The government is coming, too. Although Jiang Yina didn't want to disturb the local government, they became more interested in tea after they contacted the superior government. It's better than interrupting.

After watching the film in the office, Wang Dehua is also very tangled. Let's have an operation. People don't do it. They have to do massage. But there are no such massage experts here. Besides, massage is not foolproof. Many people are paralyzed every year.

"Look." When Lao Wang saw Zhang Fan entering the office, he gave the inspection results to Zhang Fan. Everyone looked at Zhang Fan, Ouyang, Wang Dehua and Lao Gao. They looked with hope.

Government officials and Jiang Yina have puzzled eyes. Old doctors have no choice. Let a young doctor come to see the municipal hospital. It's not funny. It's right to have this idea.

Jiang Yina's men can't count on it. He has called to book air tickets.

After watching the film, Zhang Fan pondered. He felt that this matter was a little difficult. It was not the disease, but he was thinking about how to say it. Hospital directors and superior doctors prefer surgery, which is really troublesome.

Low back pain began to appear since medical records. And low back pain is not caused by a single disease or a certain factor.

It is a dysfunctional disease. In a sense, it is a symptom group. According to the statistics of evidence-based medicine in the United States, 80% of adults in the United States have low back pain once or more in their life.

The amount of lumbar surgery is about 250000 times a year, ranking third among all operations. So there is no good way to cure this disease in the most developed countries.

"You can rest assured that we are not so careful. Don't think about it. Just say it." Wang Dehua and Zhang Fan have had several operations together. He knows Zhang Fan. As far as the spine is concerned, he is not as powerful as Zhang Fan.

"Well, this is a rising star in the orthopedics department of our hospital. He has very old views on orthopedics." Ouyang introduced to government personnel and patients.

In this case, it is difficult for doctors to do it. If you do well, it is troublesome. It is too important to weigh the pros and cons of the adult world.

If the patient doesn't speak, it's obvious that he doesn't trust "Can I have a physical examination?" Zhang Fan pondered for a long time before he said.

"No! President Jiang's body can't bear it anymore. Come and have a physical examination by yourself... "

"Xiao Liu!" Although Ms. Jiang was in pain, she still stopped her men and said to Zhang Fan, "yes."

"Hehe, good! I'll simply do a physical examination. " Then Zhang Fan looks at Ouyang. Ouyang is a fine person. She knows what she means with one look in Zhang Fan's eyes.

"Well, other people should go to the clinic. The operations that should be operated on are scattered. It's inconvenient to do physical examination for patients. " In a word, all the people were dispersed by Ouyang. Even the people of the government invited Ouyang to the door.

The outpatient office is left with Ouyang, two directors of orthopedics, Zhang Fan, patients and their subordinates. Ouyang and Zhang Fan cooperated well. They unknowingly began to have a tacit understanding.

"This is Ms. Jiang, who came to invest in the construction of our tea vegetable." Ouyang said to Zhang Fan.

"Oh, Ms. Jiang, how long have you had this pain?" Zhang Fan nodded and asked.

"For years. This time, after the rain some time ago, I felt something wrong. When I bent down this morning, I suddenly felt a terrible pain and couldn't straighten up. " Women's Mandarin with a slight southern accent is quite good, as if they were singing a small song.

"Oh." Zhang Fan gently agreed and began to press along her waist. Her identity is special and the inspection is also special. This inspection should open her clothes and expose her back.

Although Ms. Jiang verbally supports Zhang Fan for physical examination, Zhang fan can see from her body movements that she still resists in her heart. But perhaps her upbringing or self-restraint made her not refuse Zhang Fan.

Zhang Fan began to check from his neck, "do you feel unwell?"

"No!"

One question, one answer. Zhang Fan slowly asked one by one along the vertebral body. Go through the cervical spine, pass the thoracic spine, jump over a cloth belt or silk belt, and reach the lumbar spine.

"Oh! It hurts. Please slow down. Ah! " Lying down, Ms. Jiang put her head directly on the examination table. It hurts. Her subordinates almost overturned Zhang Fan.

The lumbar spine is too complicated. There are many simple muscles. The muscles near the vertebral body are symmetrical, that is, the vertebral body is the middle grid, and the muscles on both sides are the same.

If this muscle is the most popular metaphor, it is like a clenched fist. Starting from the big finger, it represents a muscle in turn, including psoas major muscle, lumbar muscle. There are six muscles.

Zhang Fan saw her CT and MRI. After physical examination, Zhang Fan has made it clear that her biggest problem is not just the intervertebral disc.

After a physical examination, Zhang Fan counted in his heart. He no longer did leg lifting experiments and abdominal straightening experiments. He came to see a doctor, not to compete. It's boring.

"President Jiang, do you feel uncomfortable at the back when it's cold. Sometimes does the iliac crest feel pain and discomfort? "

"Right, right." Jiang Yina opened her eyes. She never said her condition since she entered the hospital. Even if she said it, it was just low back pain. Unexpectedly, the little doctor saw it.

"Hehe, do you sometimes feel comfortable after taking a hot bath. And especially after one cold and one hot, it will aggravate and feel uncomfortable. " Zhang Fan continued to ask.

"Yes, this..."

"It's Doctor Zhang." Old lady Ouyang said to Ms. Jiang with a beaming smile. She seems to see the equipment again. The new building lacks a lot of equipment. The hospital is short of money and can't buy it. It's too difficult to ask for the government's money. She has worn it for a long time, and the municipal government didn't agree.

"I'm sorry, Dr. Zhang. You're right."

"Nothing." After Zhang Fan said a word, he asked, "if you are too tired, does your leg hurt more? It's like electricity from your hips."

"Yes!" At this time, Ms. Jiang really came with the attitude of seeing a doctor.

"Dean, director, Ms. Jiang's diagnosis is not a disc herniation, but also a fibrositis." Zhang Fan said to the crowd as he walked to the faucet to wash his hands.

"Yes, Dr. Zhang and Dr. Qiu said the same. When Dr. Qiu's father was still alive, he often massaged me. The effect was very good. As long as he massaged for a period of time, he would not relapse for a long time. Later, after the old man left, Dr. Qiu gave me a massage, but the effect was not very good. "

"No wonder!" Lao Gao nodded and said in his heart. Wang Dehua also saw it, but the old man spoke more directly, and he didn't think it necessary to explain, so he didn't let the patient accept him.

When a doctor speaks in this way, he must have skills, otherwise he can definitely make patients resist. Generally, patients can't help it, and they have to see if they resist.

And patients like this are in trouble. So now the country has begun to vigorously promote the artistry of doctors' speech! Also wonderful! What we should have, we have to worry about the country.
