

## Chapter 421

If this operation is combined with lymph node dissection, it is a combined abdominal perineal resection.

In other words, everything in the patient's lower abdomen should be cut off. Jiang awesome staff, to pull out in a timely manner, if slower, the damage is a little bigger, it will not need to save.

Zhang Fan Used toothless forceps to clamp up the remaining sigmoid colon. The forceps in the operation are divided into toothed and toothless. The tip of the tooth forceps is out because of the toothlike protrusion like a mouse's tooth, which is more stable when clamping, but this thing can't be used to clamp organs, especially the intestines. One clip is three small holes.

Intestinal bleeding is closed by all clamps. This is the first step. There are still many things to do. First, we should explore the ureter and vas deferens. Moreover, because it is not a dissection, we should also explore the pelvic autonomic plexus and sacral nerve. It can be said that this hand is similar to dissection.

If it breaks and cannot be repaired, these things will be removed. For example, one side of the ureter breaks and cannot be repaired. There is no way. The corresponding kidney must also be removed!

It is estimated that the drain is not very big. If it is a little bigger, it will be troublesome. Fortunately, the bleeding has been stopped, and there is no obvious damage to the ureter, vas deferens and other organs. At present, the silly child's life has been saved.

"The abdominal cavity and other pelvic organs are intact!" After probing once, Zhang Fan said something to the director of general surgery, and then asked, "how much is the bleeding now. How much solution is there in the aspirator. "

"3000ml of liquid, it's hard to estimate the bleeding now." The itinerant nurse looked at the liquid bottle on the ground and said to Zhang Fan.

"It's estimated that it's at least about 2000ml. When we came here, we had shock. Coupled with the bleeding during our operation, how can we have it?"

"Well, the amount of liquid increases. Now we're ready to remove the necrotic tissue. " After Zhang Fan finished talking to the anesthesiologist and the nurse, he began to remove the intestinal tract left in his stomach.

The broken intestines are spread out in the abdominal cavity like rotten cloth. Because of the ligation of blood, the color has turned white and has long lost its original ruddy color. The intestinal tract in the pelvic cavity has been destroyed, and the residual rectum and sigmoid colon can only be removed.

Sigmoid colon is easy to say. After closing the mesenteric artery, directly cut the stump with tissue " Give me two sterile tissue bags. " After Zhang Fan cuts off the stump of the sigmoid colon, the cut off should be put into the tissue bag, which will have to be seen by other family members.

The other end was first ligated with a tissue bag, which contained a lot of E. coli. This thing is a normal flora in the intestine. Once it runs out, it is pathogenic bacteria. So wrap the other mouth first.

"The boy will be sad after this cut!" Zhang Fan looked at the sigmoid colon in the tissue bag and said to the director of general surgery with emotion.

"It's better to live than to die. Besides, a rich family doesn't have to worry about food and drink. He doesn't have to move bricks. Eating and drinking is a lifetime."

"People always do something!" Eating and drinking all his life is no waste. In the last sentence, Zhang Fan didn't mean to say it.

"Don't think about the future of others with your poor mind. I want to eat and drink all my life, but I can't meet the conditions. Ah! " The director of general foreign affairs is estimated to be tired of several deputy directors under his hand.

Got the sigmoid, then the rectum and anus. The rectum and anus are not as easy as the sigmoid colon. Zhang Fan is a two finger zen. He uses his middle finger and index finger to enter the anterior basal space, that is, the surrounding tissues of rectum and hip, and slowly separates first to identify the levator ani muscle.

"Vascular forceps!" The nurse handed Zhang Fan two pliers. The blood vessels of the human body are very smart. It knows that its body is thin, so it usually looks for a big brother, either bone or muscle, and then hides in or next to the big brother. Therefore, to cut the muscle, you must first clamp it at both ends, then tie a knot, and then release it.

In the past, when there was no electric knife, after the muscle was broken, the stump must be firmly sutured with suture, because it retracted after the muscle was broken, and then the bleeding could not be found.

Now with an electric knife, you can burn the wound like a pig skin and close the blood vessels directly. Then, after the rectum and surrounding tissues are completely free, we begin to deal with the anus.

"Our hospital doesn't have a plastic surgery department, otherwise people like this must need a plastic surgery department for consultation." After Zhang Fan and the director of general surgery treated the rectum, looking at the lonely anus, the director of general surgery sighed.

"What?" Zhang Fan doesn't understand.

"Look good. You don't have nothing."

"I'm not a child, and I don't wear open crotch pants. Who can see!" Zhang Fan said in surprise.

"Hey, don't tell me, there are really patients who need it. No matter who doesn't see it, it's always an organ."

"Ha ha!" Zhang Fan has no intention of quarreling with the old man.

The rectum is separated clearly, leaving the anus. In fact, the anus is very simple. In addition to the levator ani muscle, the rest is surrounded by fat.

This is why people in their early years liked to eat chicken ass and pig ass, because all the meat here was yellow fat, with a little orbicularis muscle, fat smell and chewiness. If you take one bite, you can satisfy your stomach and satisfy your cravings.

The patient's position is a stone cutting position, that is, his legs are bifurcated and the chrysanthemum is flat to the ground" Sharp knife! " Zhang Fan said to the nurse.

"Be beautiful. Everything is an organ. " The director of general foreign affairs specially reminded me.

Zhang Fan rolled his eyes and didn't speak. How can this thing be beautiful! You can't tattoo artificial eyebrows anymore.

The size of the anus is as big as a dollar coin. Because of the orbicularis muscle, this thing shrinks and looks small. Zhang Fan gently drew an arc downward with the tip of a knife along his anus, and then drew an arc on the opposite side.

It is equal to drawing two connected arcs such as a football line around the anus. Then, follow the line drawn by the tip of the knife and start cutting the skin.

The yellow fat is crystal clear. Because of the long-term sitting posture, the density of the fat on the hips is relatively large. The knife is drawn on the fat, which is really crystal clear. The fat particles are crystal clear like yellow rice grains.

Alice clamped the anus gently in advance, opened the skin with tooth tweezers, and Zhang Fan gently dissociated the fat and levator ani muscle near the anus with his fingers.

"Suture! Salt water, gauze, iodophor, alcohol. " At the end of dissociation, the anus with a little rectum is directly attached to the fat. Because the anus is useless.

Washing, saline, a lot of washing has been free of the anus, like a rubber tube hanging on the wall, the anus is pitifully drooping on the hip.

After washing with a large amount of salt water, wipe with gauze. After wiping with gauze, wipe with iodophor, and then wipe with alcohol.

"Come on, give more normal saline and gauze. You must wash it a few more times. " Zhang Fan said to the nurse that this cleaning is definitely cleaner than the restaurant chef cleaning the gourd head.

After cleaning, Zhang Fan went in and out with a needle along the anus, went in and out, and sewed around the anus. Finally, as soon as the thread head and tail were pulled, he completely closed the anus. This is the so-called purse string suture. This method is generally used for stump suture, such as appendix.

The stump is closed, and then gently pulled in the abdominal cavity, the rectal stump and anus are pulled out.

"Tissue bag!" The instrument nurse handed the tissue bag to the itinerant nurse. The itinerant nurse opened it. Zhang Fan put his rectum and anus into the transparent tissue bag.

This thing doesn't look big in the body, but when it is put into the tissue bag, it is directly filled with a large lump, white anus and bloody rectum.

Rectum and anus are very important organs. They are not cut and thrown away. If cancer is suspected, pathology should be done.

If there is no doubt, they must let their families have a look. Some people who pay attention to this important organ require them to deal with it by themselves.

The place where the anus used to stay is now empty, like a black hole. The rest is suturing, from inside to outside, and finally suturing the skin. After the oval incision is sutured, it is like a person's closed eyes. Chrysanthemum is gone, completely lost, instead of a suture scar.

He can't enjoy the pleasant enjoyment of lighting a cigarette, sitting on the toilet and playing with his mobile phone in the future.

After the stitching, Zhang Fan looked. Well, it's good. It's almost a curved willow eyebrow!

"Change your gloves!"

**Chapter 422**

Zhang Fan and the surgeons began to change gloves. In the general operation, it is rare to change the operation, but this kind of pollution operation must change the gloves.

This kind of operation is not as complicated as tumor resection. It's simple. It's fried into a flower like intestines, which can save life. It's already very powerful by the surgeon. It's a little slower, and it's estimated that there's no life.

Now that the hemostasis is completed, the residual intestines and anus have been removed. The rest is self-evident. We have to find a way out for the digestive system.

As the saying goes, fire and water are ruthless, as are urine and urine. It's hard to die if you hold it for a while. So this reconstructed channel is also very important.

Life saving is done now. The rest is about the patient's quality of life. More than three hours have passed since the operation. Zhang Fan has been exercising. He doesn't stand long for less than six hours.

Anxiety, the anxiety before the operation has gradually subsided, and the rest is suffering, "no news is good news." Ms. Jiang leaned on the plastic bench outside the operating room with a blue face and said to herself.

The assistant and Secretary stood far away and dared to surround. They know that at this time, they must not touch the mold without looking for trouble. But several people make eye contact with each other, which is not a kind of heart disaster, but also a kind of helplessness that is difficult to tell.

The parents of the silly child have set out from their hometown in Jiangsu and Zhejiang. Concerned, or because of politeness and interest related people, the phone came in one after another. Ms. Jiang really wanted to smash the phone. I'm tired enough and have to perfunctory some people.

Several transferred doctors in the emergency department looked at the exemption book as thick as a book and quietly stretched out their tongue, "director Xue is really powerful. Almost all of them have been brought out. How timid! "

"You know what a fart. Is that cowardice? He didn't do the operation and the hospital wasn't his home. What's he afraid of? It's called a sense of responsibility. Do you understand? No learning, no skill! " The transferred female doctor got angry with another male transferred doctor who always harassed him.

Whether timid or responsible, Ouyang is satisfied anyway.

"I don't see. The boy is so clever. I'm afraid he didn't understand it. That's good!" Ouyang looked at the signed disclaimer. Although he didn't say anything, he was satisfied with Xue Fei. It is estimated that he has entered her little book.

I changed my gloves and washed the talc powder off my gloves. Zhang Fan and his colleagues continued the operation. They had received the operation patient when they were about to get off work at noon. By this time, it was already past the meal point, and the anesthesiologist and itinerant nurse had changed their meals.

The surgeon and instrument nurse can only bear it. At this time, the operation is not so urgent. Zhao Pingquan, director of general foreign studies, also has the mind to speak.

"Lao Chen, what's in the canteen today. Why did I ask, "it tastes like tofu." After a long operation, coupled with Zhang Fan's strange surgical habits, Lao Zhao endured too hard. Even if you don't let me eat, you won't let me talk!

"Braised meat and boiled tofu without hair loss, alas! I could bear to eat meat before. Today I have no appetite at all. Your surgeon is better. After the operation, you can eat outside. We're beaten to death. It's terrible. "

"That's all you want!" Lao Zhao mocked that he was hungry, nausea and nausea during the operation, and then stimulated the gastric mucosa to secrete a lot of gastric acid. At this time, his old stomach disease occurred again.

Most surgeons have stomach problems. They don't eat on time all year round. They are hungry and full, resulting in gastric ulcer. They begin to ache when they don't eat after dinner.

"Gauze, director Zhao endure, and the operation is almost over." Zhang Fan knew that Lao Zhao had gastric ulcer and accelerated his speed under his hand.

"It's all right. You can't die if you eat later. This is the child. I don't know if he can accept it after surgery. " Lao Zhao saved his life with a black face before the operation, but after he really saved his life, he felt a little cruel.

"Generally, this kind of reconstruction operation must give psychological counseling to patients before operation, so that patients can accept it in advance, but there is no way for emergency operation. Although the quality of life has declined a lot in the future, people are still alive!" Zhang Fan in turn

began to persuade Lao Zhao.

From this point, we can see the difference between Lao Zhao and Zhang Fan's character. Zhang Fan hesitated before doing it, and Lao Zhao hesitated after doing it. It's kind to say it, and it's kind to say it's not good to say it's women's benevolence. There are flames of war in the Department, which has something to do with his character.

The abdomen should be rinsed and ligated, and the lower abdomen should be cleaned up. The operation has really entered the last step, fistula and abdominal closure.

There is a very troublesome thing about intestinal fistula. Although the intestines seem to be more than ten meters when they are spread out, there are ligaments around them. The vascular plexus around them is like a spider's web. On the contrary, the intestines are fixed. In other words, the intestines are not very mobile.

If you can move a little, Zhang Fan really wants to make an artificial anus for the silly child. Now it can only be reconstructed near the fracture. The remaining upper opening of the sigmoid colon.

This place is projected on the abdomen, which is actually the opening at the midpoint of the line between the navel and the left anterior superior iliac spine.

Fistula is simple, very simple, and experienced doctors can do it, but this permanent fistula is not what ordinary doctors can do.

First of all, we should consider the stability and application of the external anal bag. This is not a small thing. Hanging a bag on the patient for two days a day doesn't matter, but once the design of this permanent thing is unreasonable, it will bring endless trouble to the patient.

Because the cecum and anus have strong contractile ability, the mucous membrane inside is smooth and has a certain self-cleaning ability. Except for those who do not pay attention to hygiene, the general human body will not have peculiar smell.

But this permanent anal bag won't work. First of all, the tightness of this thing can not be compared with that of the anus, and there is less closure of orbicularis muscle. Therefore, the permanent odor will accompany it.

"Foreign patients like this will be intervened by psychologists during their stay in the hospital, and the rehabilitation doctors will give him some training in his future life. We still lack doctors!" The anesthesiologist looked at Zhang Fan and began to prepare for drilling, as if he thought of something, and began to burp.

"That's their clinician. No, we clinicians did all the work." Lao Zhao didn't want to listen to this. The old man and Ouyang are a generation. Their generation is also the strangest generation. He often said that he couldn't do it, but when he heard others say it, he was not happy immediately.

For fistula, Zhang Fan prepares for fistula at the lower side of the outside of the navel“ Sharp knife! ” The nurse handed Zhang Fan a sharp knife. Zhang Fan placed one hand in the abdominal cavity and opened a two finger wide incision on the patient's belly with a sharp knife in the other hand, which directly penetrated into the abdomen.

Then clamp the colon with Babcock pliers and pull it out slowly. The intestinal tract is most afraid of ischemia. Although the toughness and flexibility of the intestinal tract are good, this thing can not be folded, even if it is distorted. If it is not done well, it is intestinal ischemia.

After pulling out the colon, Zhang Fan began to suture. This suture is very exquisite. The colon should be sutured at the opening of the abdominal wall without puncturing the intestinal tract.

This suture is not to mend clothes. Although the needle is very small, as long as it penetrates the intestine, with the extension of time, the proud and expensive thing of the intestine will become larger and larger with the small mouth, and finally necrosis.

You can only use a small needle and fine thread to slowly hang on the opening on the film outside the intestine. Suture is actually an auxiliary function, that is, let the two tissues contact and then fuse.

After a circle, Zhang Fan carefully stitched a circle and took a long breath. It's really a long breath. If you don't pay attention to this thing a little, there will be problems, and it's not a small problem. After all, the intestines are so little. It's not leak. If you cut it, it won't grow any longer.

After suturing the intestinal tract and interface, Zhang Fan began to trim the skin opening. Opening two fingers is for better suture, but if you leave a hole, the opening is a little too large.

The reconstruction is the anus, so it is best to choose all sizes according to the original device size. For example, a finger is inserted into the anus of a normal adult. Note that this is a normal person.

Therefore, when trimming the skin, you can also insert the size of a finger, because there is no orbicularis muscle, the suture should be a little smaller, and when you have to insert a finger, it should be a little tighter.

"Well! Director, is your finger a little thick? " Lao Zhao did manual work in his early years. His fingers can be as thick as Zhang Fan's.

"Rough? No, rough handle! Without the levator and sphincter, it's better to be thicker. "

"Ha ha!" Zhang Fan thought about it and smiled helplessly. It was a bitter smile. Although it was a reconstruction, it was just a look of goods, missing a lot of things.

Finally, Zhang Fan still didn't use the director's finger. He put his own finger in. Then close the suture from both ends of the incision. A little recycling. When it feels a little tight, it is the end of

reconstruction.

This suture is no simpler than that of Zhang Fan. Feces, especially the feces of omnivorous animals, contain a large number of bacteria and viruses. As long as there is a gap for it to remain, it will be a very terrible thing.

Infection and death are possible. Even if there is no infection, as long as there is a gap, this thing will corrode and slowly form a fistula. Therefore, when Zhang Fan sutures, he is very careful. He can't suture too tightly, leading to ischemic necrosis, and there can't be a gap. The operation is not fast at all.

Press the anal bag, Zhang Fan looked, "good! There should be no big problem. Ready to close your stomach! "

Like cattle and sheep returning home, after Zhang Fan closed his abdomen, nurses and anesthesiologists began to be busy. With the cutting of the last needle, the operation was over!

The operation, which took more than four hours, was finally over.

### **Chapter 423**

This silly child, it is estimated that he will never or dare not look for alternative stimulation in the future. This blow is too great. After Zhang Fan's operation, Ms. Jiang must invite Zhang Fan to dinner. You can't even go.

"Thank you. According to the frontier people, standing drinking doesn't count. I'll toast you. I won't say more words of thanks. It's all in the wine. " Speaking, 22 Baijiu, a mouthful, Jiang lady was also frightened, this time is a toast with a shock.

When Ouyang was outside the operating room, he directly sentenced her nephew to death. Then Xue Fei took a disclaimer as thick as a book, which really frightened Ms. Jiang. Although she had experienced many things, she was still frightened.

Now people have been saved. How worried they were at the beginning, how lucky they are now. It can be said that her mood is unspeakable. She puts it on the table, puts down the boss's identity, and very attentively prepares dishes and adds water to all doctors. It was originally done by waiters or subordinates, and she did it herself.

Surgeons are not hungry, nor can they say that they should be able to eat and sleep at any time, and they must be able to resist hunger and fatigue, otherwise they can't do surgery well.

The life of the rich, the world, is really beyond the comprehension of ordinary people. The day after the

operation, when Zhang Fan went to the ICU for ward rounds, he was told that the silly child had been transferred and reportedly went to a bigger hospital in bird city.

The hospital is not a prison. Although the doctors suggested that it is best to treat and recover in the hospital where the operation was performed, they were still worried. Finally, they directly contracted an ambulance through the government, and two nurses and one doctor went all the way east!

However, after this incident, Ms. Jiang was more polite to Zhang Fan.

"Doctor Zhang, this is our bamboo shoots from Jiangsu and Zhejiang. Take them back and have a try!"

"Doctor Zhang, do you have a girlfriend? This is our company's Hotel VIP card!" Ms. Jiang doesn't give anything valuable to Zhang Fan either. She knows it's a little more expensive. Zhang Fan will never accept it. Although these things are not valuable, they are more distinctive. But what does it mean to have a girlfriend and give a VIP card to the hotel?

Zhang fan can't do without it. Ms. Jiang is too good at being a man.

"Doctor Zhang, you should go to Jiangsu and Zhejiang!"

When Zhang Fan treated Ms. Jiang, she buzzed! Buzz! Buzz! He kept saying that Zhang Fan really wanted to go back to the time when he first met. He was so talkative.

You have to pay off the debt. Although Dr. Liang didn't lose face to Zhang Fan, Zhang Fan really couldn't stand the sad look in his eyes.

"Brother, you said I could do both. I seem to feel very strange like you! Why don't I work overtime at night and have some more operations?" In the animal laboratory of tea vegetable University, Zhang Fan said reluctantly.

People are like this. Lao Liang doesn't say anything about Zhang Fan's absence in the afternoon or about the progress of the experiment. Just like an angry little daughter-in-law, he leans against the table and looks at Zhang Fan. And still secretly looking!

"Really! Great. I knew it. Dr. Zhang is easy to talk. Let's have another operation in the evening." Lao

Liang will climb up along the pole.

"Not..."

"Brother, I'm almost in my 30s and 40s. I'm counting on this project to graduate this time. Please, please. You don't know, Bluebird university has also started this project! "

Lao Liang has found out Zhang Fan's temper and speaks well. Zhang Fan is still quite reasonable. This is also the plan formulated by Professor Zhao Jingjin and him. Step by step, cook frogs in warm water. Research dogs don't know tricks? It's all a lie.

The emergency center was established, the pediatric center was established, and the Institute of liver diseases was established. Ouyang was a little like an ant, placing equipment and adding personnel into the newly built building.

Graduate students entered the hospital one by one. As soon as they bought ten emergency vehicles, the municipal hospital has almost monopolized the diseases in the urban area. Doctors are getting busier and busier.

"Come on, come on! Get out of the way! " The emergency center is always filled with family members. Nurses and doctors push platform cars to not only rescue patients, but also keep shouting at the crowd.

Car accident! Ordinary people don't think there are many traffic accidents, large and small. In fact, in the hospital, there are patients who are seriously injured and rescued almost every day.

"Blood pressure can't be measured. Continue cardiopulmonary resuscitation. Get out of the way." While reporting the patient's situation, the nurse shouted rudely to the personnel in front.

Doctors began to press relay from the gate of the emergency center. The human body, an oxygen circulation and a blood circulation, should be guaranteed first in rescue.

Hypoxia, just a few minutes, will directly lead to brain damage, and it is still unrecoverable damage. Ischemia lasts a little longer than hypoxia, but it won't last much longer. There is a lot of bleeding. The amount of bleeding doesn't need to be too much, just 800ml, which can make you enter the state of shock.

In order to ensure the input of circulation, and oxygen, patients with cardiac arrest must have a coherent and effective cardiopulmonary resuscitation.

With the vigorous development of Ouyang, Xue Fei's deputy director of the emergency center has become super busy. play mahjong? He doesn't even have time with his wife's sage now.

In his words, every day, there are either car accidents or drinking pesticides. There are fights and injuries almost every day. From time to time, there are people who jump into the river to commit suicide.

Sometimes little lovers quarrel and draw a knife towards their arms and wrists. He not only has to sew up, but may also be a mediator!

However, his position in the hospital has also begun to improve slowly. Director Xue, drug agents and equipment manufacturers are following behind. In short, he is painful and happy.

Outside the rescue room of the emergency center, there squatted a young man who looked very young. He was estimated to be eighteen, nine or twenty years old.

It's not uncommon for the family members to stay outside the rescue room, but this young man not only has a black and blue face, but also kneels at the door of the rescue room and cries loudly. It's really sad to cry to the heart at such an age.

His trembling hands and head leaned against the wall of the emergency room, and tears couldn't stop flowing. The nurse who hurried by was not in a good mood to comfort him.

"What's the noise? Cry outside. There is still rescue inside. " The nurses with masks didn't stop and walked fast.

After a short time, a middle-aged couple rushed to the emergency center.

"Doctor, how's my daughter?" The rich woman, anxious husband and wife, pitifully asked a small doctor transferred from the emergency center.

"Still rescuing, the specific situation is hard to say!" The most popular sentence in modern hospitals is: it's hard to say.

"Xin'er! My joy! " A woman is like a female wolf. She cries bitterly and never finds her shoes fall off. He rushed to the emergency room of the emergency center.

The nurse wouldn't let her in. In a twinkling of an eye, she went crazy when she saw the young man with a black nose and a swollen face, "beast! Beast! " Rich women don't look like the kind of cruel and cruel people.

However, at this time, she covered her face, shook her bag and hit the young man. No one could hold her. The bruised young man, with his eyes closed, did not dodge. Like a dead man, he let a woman's bag hit his face and make a loud noise.

Only the tears from the corners of his eyes can prove that he is still a living man.

"What are you doing. We have to fight outside, but there is rescue inside. Do you understand? " A little nurse poked out of the door, spoke quickly, and then retracted.

Although the rich woman's man was heartbroken, he still held his wife, "Xin'er is still rescuing. Let's not

interfere with the doctor inside. You sit here first and I'll call someone. Xin'er will be fine. Don't worry. "

With that, the man also began to cry. A young man kneeling in the corner of the wall without looking at his wife.

"Brother! Xin'er had a car accident. Enough money. Are you familiar with the leaders or doctors of the municipal hospital? "

"Leader, my daughter had a car accident and is now in rescue. Do you know the leaders or doctors of the hospital?"

Men use almost all the contacts they can, just to find a familiar doctor or leader.

With the dialing out of the phone one by one, he finally contacted the president of the hospital through the leaders of his own unit.

Although the doctors are going all out to rescue, the men are not at ease. After all, they are their own flesh and blood. At this time, even if he is allowed to do anything, he is willing to ask for his daughter's peace.

The city does not know when to start. Large vehicles are not allowed to enter the urban area during the day. Large vehicles are allowed to enter the urban area only at night.

With the development of the West and the construction of various construction sites, all kinds of vehicles pulling sand and stones gallop along the roads in the urban area at night.

Half an hour ahead of time, just after the early morning, all kinds of large trucks waiting outside the city entered the urban area, which was dusty for a time.

I don't know what happened. The girl in white didn't pay attention when crossing the road. As a result, she was hit by a big truck. Like a doll, it rotates several times in the air.

Fortunately, the car braked in time and the girl was not crushed. The young people who came after them were crazy at this scene. There was a blank in his head, "Xin'er!"

He can't regret it!

## **Chapter 424**

Mountains can be measured and water can be explored. Only the heart of the people is unfathomable. The conditions of the girl who had a car accident were relatively acceptable. There was a small supermarket at home, and her life was quite good.

The young man's home was torn apart, his parents divorced, each had a home, and then no one cared about him. Although the home environment is not good, people are handsome in spirit. Both the girl and the young man go to tea vegetable University.

The young man and the girl began to talk about each other a few days after they entered school. After four years of college, they barely survived with the help of the girl. It's about to graduate. The girl's family has found a unit for the girl to practice, but the young man hasn't landed yet.

As a result, he somehow hooked up with a girl student who was said to be very powerful in his family. It's too complicated.

In the evening, the two were about to negotiate together. I don't know what to do. The boy was about to break up. As a result, the girl got angry and hit each other.

Then one chased and one ran out of the campus! I ran into a muck truck. What the young man regretted was his graduation certificate, his future job and his girlfriend who promised to arrange work for him.

With complex family relations, he has known the hearts of the people since childhood. He understands that the most important thing now is to get the understanding of the girl's parents, so he can't afford to kneel for a long time. Their relationship is not recognized by the girl's parents, but the girl is stubborn and the girl's parents can't help it.

Things in the world are so strange that everyone has it and anything can happen.

Muck truck, for people, exists like a giant iron beast. When the girl was sent to the hospital, the driver had been controlled by the police, and then there was another sleepless and worried family.

Although the weather is not hot, the girl wears thin clothes in order to make her boyfriend change his mind. There was a car accident. She was in white. She was covered with blood and countless abrasions. Her pale face was a little whiter than her skirt.

Hemorrhagic shock is considered as shock in the early years when blood pressure is not enough to ensure sufficient blood flow of organs and tissues. With the development of science and technology and medicine, the definition of shock has become more comprehensive.

But the most common shock is still hypovolemic shock and cardiogenic shock.

There are three emergency rooms and four disposal rooms in the emergency center, that is, the room for wound suture and physical examination.

When the blood hula girl was pushed by the 120 doctor through the flat car, she kept pressing. With the flat car, ticking blood accompanied all the way.

Several fighting drunks saw the girl wipe her face and turn out her muscles. They were so frightened that they didn't even quarrel. They were directly frightened and sober.

"No, it's already in shock, the pelvis and pubis are obviously displaced, and the shoulder joint is dislocated. Rescue quickly, contact the orthopaedic department and let the orthopaedic department come for consultation." After Ouyang called Xue Fei, Xue Fei came to the hospital as soon as possible.

The night shift in surgery is hard. Just wanted to sleep for a while, maybe a patient came. Since Xu Xian was assigned to Zhang Fan's group, the workload has also increased a lot. After all, the effect must be different if there is one less fisherman and one more cadre.

When the phone called the first Department of orthopedics, Xu Xian ran away. Like the white rabbit in the night, the one who runs is called a fast one.

"Consciousness has been blurred, pulse has accelerated, skin filling has decreased, limb weakness, pelvic deformation." Xu Xian spoke softly to himself while doing a quick physical examination. This is his habit. Every doctor has the habit of every doctor.

"Prepare for the operation, cross match the blood, call Zhang Fan and Dr. Zhang, and ask the blood station to prepare blood, 2000ml of whole blood. Lactate ringer classic, maintain adequate perfusion. Come on! Enter the operating room." Xu Xian directed the nurse to open the venous channel and contacted the operating room.

Zhang Fan and Wang Yanan set out from home respectively. The phone is the charge number!

Pelvic fracture is the second most common trunk fracture. The amount of bleeding is super violent, and the death rate is also very high.

When Zhang Fan arrived, the patient had been sent to the operating room "The bleeding is so fierce that I can't even use cardiotonic. The patient had significant pelvic displacement." Xu Xian introduced Zhang Fan's condition and prepared for the operation.

Zhang Fan looked at the X-ray film and his eyebrows were all together "The displacement is too severe. It must be cut to stop bleeding. How much whole blood is prepared."

“2000ml ! ”

"Not enough, at least 3000ml."

"The blood station is out of blood!" Xu Xian said reluctantly that the busier he was, the more chaos he added. There was no blood at the critical moment.

"Quickly inform the family members and mobilize relatives to donate blood." Zhang Fan's hair exploded when he heard it. This kind of operation has no blood. I dare not do it at all.

The girl's family was also worried and mobilized all her relatives to donate blood to the hospital.

"I have the same blood type as Xin'er." For blood donation, there are few relatives of the girl's family with the same blood type. In addition, there are few who are old and often drink alcohol, and the blood is standard enough. At this time, the boy came over with a painful face.

The girl's father really wanted to slap him in the face and let him go, but his daughter was on the operating table at this time, and he couldn't say anything.

"Thank you. It was just my aunt." The child's mother came over with eyes like peaches.

"It's all right. I should do it." The boy didn't mention the cause of the accident.

Zhang Fan, they have started the operation and can't wait.

In the capital, Professor Li Housen found several authoritative directors of Dermatology, "Zhang fan can do it. It shouldn't be that others can't do it." Looking at the failed data sheet, Li Housen looked constipated.

"Ah! Only one trip to the frontier. What a waste of time! " As a last resort, Professor Li Housen set out with his team. Because there are a lot of laboratory equipment, I can only follow the equipment and start by train.

Qingniao University, in the frontier, the tea plant trees have just dyed green. Here, not only the world is full of green, but also the flower beds are full of flowers. However, Lu Ning in the animal laboratory doesn't want to look at the beautiful scenery. He is very upset.

The fat face, which used to smile like Maitreya, can't smile these days. Because he is also doing experiments to improve the liver portal system. One failed and one died. The cost of the dead experimental mouse, if it is replaced by RMB, it is estimated that it can be buried.

"Teacher, is our idea wrong?" Lu Ning called the president of Qingda hospital: Lu Lao, academician of China and the leading expert in hepatobiliary surgery.

"What's the matter? Are you discouraged? I'm so old now that I can't help you in surgery. If I can't, go out and relax. Maybe there's something else. " Old Lu said to his disciples without delay.

Lu Lao, who studied under Professor Qiu Fazu, came to Qingniao hospital after his doctor's graduation with the advice and recommendation of Qiu Lao. He has worked hard in the medical industry for most of his life.

Almost all the hepatobiliary directors of Dongshan Province, provincial and ministerial level-3 hospitals come from his door. Although I'm old now and don't enter the clinic much, I still struggle in the field of scientific research.

Lu Ning, a student bully of this master's and Bo's continuous study, is also the only disciple left in Qingniao Medical University among all the disciples of academician Lu.

"My teacher, where do I have the mind to go out for a stroll? The experiment card is here. My hair is falling out."

"Hehe, there's nothing plain sailing. Go and have a look at your younger martial brother! Maybe he can help you. " Lu said with a smile.

"My junior brother? Am I not your youngest student? " Lu Ning's face was incredible. Old Lu is old. He stopped taking students five or six years ago. When did a little younger martial brother emerge?

"Ha ha, I collected it secretly, but your little martial brother is engaged in orthopedics now!"

"What? Orthopedics? "

"Yes! ha-ha. Come to my office and tell you more when you meet. "

At the airport, Lu Ning packed a few clothes casually and boarded the plane in zhifeiniaoyang city with his boarding pass“ Hehe, this little younger martial brother is really strange. He not only went to the frontier, but also engaged in orthopedics. " Sitting on the plane, Lu Ning looked at the clouds outside the window and tilted his mouth slightly.

On the train, Professor Li Housen sent a message to Zhang Fan: arrive at tea vegetable tomorrow. Please pick up when you have time.

In the bird market, Lu Ning also sent a message to Zhang Fan: younger martial brother, the master sent me to find you. Please pick up when you arrive at chasu tomorrow.

## **Chapter 425**

Zhang Fan, Xu Xian and Wang Yanan, three resident doctors, are engaged in the operation performed by the chief physician. Although no one doubts it, before each operation, Zhang Fan will symbolically call or send messages to Lao Gao. After all, the rules should be observed in the system.

Fortunately, the driver of the muck truck was not distracted and braked very timely. If he slowed down a little for a few seconds, it is estimated that the girl will become meat. Human life has a chance to survive in these seconds.

Noisy hospital, always crowded hospital, hurried footsteps, numb, anxious, painful, all kinds of expressions shuttle in the hospital.

The lobby outside the operating room was almost full of anxious people. After donating 400ml of blood, the boy pretended to be very weak and sat in the corner as if he were very poor.

In the operating room, the girl was rescued. The development of modern science and technology and various advanced hemostatic materials have stopped pelvic bleeding very quickly

Huge screws and three square plates restore the original relationship of the displaced pelvis.

"Hey!" Looking at the long surgical incision and huge steel plate, Zhang Fan sighed.

"What's the matter? Is the angle wrong?" Wang Yanan worried and asked, people are saved, what are you sighing.

"Doctor Zhang should feel sorry for the patient." Xu Xian looked at Zhang Fan and explained.

"Yes, such a big injury and the removal of the second stage steel plate, it is estimated that the girl's pregnancy will be a big trouble in the future." Zhang Fan nodded and said.

"Oh, yes, this scar is very troublesome for pregnancy and childbirth in the future."

The pelvis is just the junction of the spine and lower limbs. The angle of this place is too difficult to grasp. Once the reduction deviates a little, with the extension of time, there will be corresponding iliac pain in the later stage. Claudication and more serious is the body deflection and deformity.

The grasp of this angle depends purely on the doctor's experience, and there is no fine inspection instrument to determine this angle.

And once symptoms appear, it is too difficult to treat them. Therefore, the difficulty of pelvic fracture is not fixation, but the grasp of various angles.

The girl was sent to the ICU, and her family members crowded in front of the glass window“ Xin'er! " Looking at the children with all kinds of pipes on the hospital bed, her mother and father were completely released. Tears flowed down like torn pearls. They were distressed. Looking at the children in ICU, their hearts were broken into slag.

"I didn't mean it. I just wanted to explain it to you. And the blood you saved is mine. I don't owe you anything! At both ends of the earth, don't see each other again! " The boy looked at the girl in ICU and was very happy.

Zhang Fan didn't go home until midnight. He carefully lay in bed and immediately entered mengxiang.

In the morning, after seeing the mobile phone, "master? Elder martial brother? pick someone up at the airport? Professor Li Housen is here! " Zhang Fan mumbles to himself in wonder.

"Your master? Elder martial brother? " After hearing this, Shaohua asked curiously. She had never heard of Zhang Fan's master, so she asked curiously.

After Zhang Fan saw that the mobile phone belongs to Qingniao's number, he said to Shaohua: "it's estimated that it's the senior brother of Qingniao University. Haven't I studied in Qingniao before." Zhang Fan didn't mean to say that he bluffed under the banner of other academicians.

"Oh, two groups of people?"

"Professor Li Housen is an expert in dermatology in the capital. He will arrive at noon. This, this elder martial brother will arrive in the afternoon."

"Oh, what can I do? What do you need me to do?" Shaohua put down his chopsticks and looked at Zhang Fan.

"Professor Li Housen doesn't care. It's estimated that the hospital will entertain him. This elder martial brother, we have to entertain him." After several times, Zhang Fan became proficient. If he didn't, he wouldn't suffer any loss anyway.

"That is, we must entertain others well. In fact, entertaining others is entertaining ourselves. Maybe people will entertain you when you go to Qingniao in the future." The old man read the newspaper with reading glasses, but he was distracted by the conversation between his daughter and Zhang Fan.

The level is low. Although Zhang Fan thinks the tiger skin of academician is very easy to use, he still doesn't feel the real power of this title. Say a bad word, academicians in other industries are not clear. Academicians in the medical industry, even the boss of a province, have to make an appointment in advance.

After Shaohua went to work, he began to be busy fishing, booking hotels and restaurants. The girl was very dedicated before she fell in love. She didn't ask for leave without asking for leave. She was also very interested in business.

But since falling in love, her state has changed greatly. She doesn't say it's wrong and doesn't care about her work. Anyway, Zhang Fan's business is her top priority. Hearing that elder martial brother Zhang Fan is coming, the girl looks for hotels and restaurants actively.

"It can't be too expensive, but it can't make small stones lose face." The girl nagged about looking up the address book and compared the cost performance of various hotels and restaurants.

It's not that girls don't have the atmosphere. Tea vegetarians don't know when to start. More and more people travel. In winter, a better hotel and a house for three hundred and one days are very good.

But once you enter the tourist season, even a small room as big as a sparrow at home dares to go up to 300, so the girl has to make a comparison.

Hospital, ward round is over. Zhang Fan was called to the office by Ouyang.

"Hehe, Professor Li Housen's team is coming. We should pay attention to our hospital. Whose car is better, drive two cars, and then take the hospital ambulance to pick up people.

"I'll call the station master of the railway station. You go directly to the VIP channel and make sure people feel our enthusiasm. Don't have an operation today. Go pick someone up first. "

"OK, Dean, I'll drive my car. Director Chen Qi's car is also good. I'll find him later. Are you going?" Zhang Fan said after thinking about it. Chen Qi's car is a bully. The old boy has been jealous of Zhang Fan's car for a long time. As soon as he got on the director, he directly picked up one.

"Go or not, go! It's not surprising that there are many people in the medical department. Professor Li Housen also brought a lot of scientific research equipment. There are more people and it's convenient. You hurry to find director Chen Qi. I'll arrange to make some banners first. " Ouyang then waved his hand and drove Zhang Fan away.

Zhang Fan has no choice. There was another operation in the morning, but now she can only give up first. The wrinkles of the old lady's smile are deep. If she doesn't obey at this time, it is estimated that Zhang Fan will definitely eat.

The direct trains from other places to the capital are not clear, but although the direct trains from tea

and vegetable to the capital are not high-speed trains or bullet trains, the facilities inside are the best, and even the corridors are paved with red carpets.

After Zhang Fan became the assistant director of the first Department of orthopedics, Chen Qi came to harass Zhang Fan from time to time. There's nothing wrong, that is, they can talk nonsense. They drink a few cups of tea, so the relationship is very close.

As soon as Zhang Fan entered the third Department of orthopedics, he saw Chen Qi and his special equipment manufacturer enter his director's office. His equipment manufacturer is a very flirtatious young woman, wearing a black, black skirt, black silk stockings and black leather shoes, supporting a more white skin and being good at dressing up.

Zhang Fan walked slowly and hurried to the door of the office. As a result, the door was locked. Zhang Fangang stretched out his hand to knock on the door. He thought it was inappropriate, "wait!" Zhang Fan reluctantly tilted his lips.

"Oh! Rare guest, has director Zhang come to inspect the work?" There was no way for Zhang Fan to enter the doctor's office of the third Department of orthopedics. Zhou Chengfu, who jumped from the first Department of orthopedics to the third Department of orthopedics, said with a smile when he saw Zhang Fan.

"Hey! You make fun of me again. How's it going? Have you been busy lately?" Zhang Fan smiled and asked.

After Xue Fei became the deputy director of the emergency center, it is estimated that he has dealt a fierce blow to Zhou Chengfu. The guy who used to pay great attention to appearance now seems very decadent.

"That's it. Why do you have time to come to our department today?" Although Zhou Chengfu still smiles, he seems to be unwilling to see it. Don't force him in his life. He jumped around. Finally, Xue Fei, who he despised, walked in front of him.

"I asked director Chen Qi to borrow a car. It seemed that there was someone in his office. I came to see you." Zhang Fan didn't explain in detail.

"Oh! You have to wait." He seemed to feel that his tone was inappropriate. Zhou Chengfu then said, "it is estimated that the director and the device manufacturer will verify the number of devices. I won't accompany you. I have an operation. We'll come out and sit together when we have time. We haven't talked together for a long time."

"OK, you don't care about me. Hurry up." Zhang Fan looked at Zhou Chengfu who had left, and his heart was full of feelings. Dr. Zhou, who was once in high spirits, now began to shrink back.

Half an hour!

For an hour, Zhang Fan couldn't wait. He got up to go. As a result, he saw the door of Chen Qi's office open.

"Director, you stay, I'll go!"

"OK, OK. I won't give it away. " Standing at the door, looking at her graceful figure and willow like pace, Chen Qi couldn't help but tap her mouth.

"Cough! Cough! Cough! " Zhang Fan has been standing beside Chen Qi for a long time, and Lao Chen is still in a daze. As a last resort, Zhang Fan was infected by Shaohua's father.

"Oh! Hi! You boy, scare me. What's the matter? I didn't have an operation in the morning. Why did I come to see my brother. Come in and say, come in and say. "

After entering the office, Zhang Fan frowned. An unspeakable smell mixed with the aroma of women made Zhang Fan feel a little sick, "sister, it smells worse than intestinal surgery!" Zhang Fan muttered in his heart.

"Sit down. I'll get you some good tea. You've never drunk it!"

"Everything I drink is the same. I can't taste it. I'm not busy. Brother, is your car there? Will you have time? At noon, go to the railway station with me to pick up professor Li from the capital, and the dean will go too. " Zhang Fan didn't sit. The office environment was bad. He didn't talk nonsense and directly showed his intention.

"There must be. If you open your mouth, I'll squeeze even if I don't have time. Call me when you leave. Your boy has a big hair now. How can he entertain them? Has the hotel been booked yet? "

"It's not my turn to worry about it. I'll go first. I have to refuel! " Zhang fan can't stay. The smell is too coquettish.

"What's the hurry!" Chen Qi gets up and sends Zhang Fan off.

Don't worry. Stay a little longer. Zhang Fan may have to spit out“ This old fellow is too brave. " Zhang Fan thought about the two round marks reflected by the light on the table and muttered helplessly.

## **Chapter 426**

The development of the municipal hospital was too fierce. It was still a high-grade traditional Chinese medicine hospital. After Ouyang came to power, he was suddenly beaten by the municipal hospital.

With the establishment of the hospital's emergency center, pediatric center and liver disease research institute, more and more people are gathered in the municipal hospital.

Ouyang, do you have a good face? Very good face. The old lady's always dark clothes and bright hair can often remind Zhang Fan of his primary school head teacher. She is the same serious old lady. She picks up naughty children and has her own set.

Ouyang's car is an Audi, which seems to have been eliminated by the government to the hospital. After Zhang Fan brought up the cross-country trend in the hospital, doctors bought cars, either cross-country or SUV.

The old lady doesn't want to take an Audi“ What's good about this car? It's not convenient to go up and down, "the old lady boarded Zhang Fan's co pilot.

"Ha ha!" Zhang fan can't take over. He can't say, "you're short."

"How are you doing with Professor Zhao Jingjin's liver disease experiment?" Ouyang got on the bus, sat down, pulled his seat belt, and motioned Zhang Fan to start. The motorcade is leaving!

"It seems that there is always a difference. No surgical experiment has been successful." Zhang Fan has kidney pain when he thinks about the portal vascular system. At the beginning, he also thought that this was no big problem. It should be very simple. As a result, he was slapped in the face by reality.

"Oh! That's right. " Ouyang said, his fingers knocking on the window slowly and rhythmically, and he didn't know what she was thinking.

"Do you think it is appropriate for our hospital to set up a skin plastic surgery center or a scald center?" Ouyang looked out of the window at the rapidly retreating scenery and turned to ask Zhang Fan.

"The names are different and the emphasis is different." Zhang Fan drove the car and said after considering it.

"Yes!" Ouyang glanced at Zhang Fan like an idiot.

"Hehe. Dean, it's estimated that you already have a spectrum in your heart. Why do you ask me again? " Despised, if others use this tone and look, Zhang Fan will definitely turn his face, but is it ordinary people sitting on the co pilot? The most terrible existence of the hospital!

Ouyang didn't want Zhang Fan to say anything. This kind of person has a strong desire for control. She just feels a little. She really didn't want Zhang Fan to have any suggestions.

"Well, actually, I want to separate the dermatology department of our hospital and set up a scald department and a plastic surgery department. I'm a little hesitant now. I don't know which department should be the focus of development.

Focusing on the development of scald department is helpful to improve the overall strength of the hospital. The development of plastic surgery is expected to improve the income and reputation of the hospital. "

"Go hand in hand!" Anyway, it's none of his business. It's not his turn to worry about this kind of thing. Zhang Fan holds Ouyang casually in his car. He doesn't believe what he said.

"My breath is not small. Where can I find a doctor?" Ouyang rolled his eyes and continued, "I'm going to send more doctors who have been transferred from the hospital to follow Professor Li Housen. It's estimated that there will be several mature doctors in the hospital after your experiment."

"Well, it should be OK. After all, Professor Li Housen is still very authoritative in scalding." Zhang Fan said after thinking about it.

"Therefore, we should not waste this kind of capital magnate. We must pay attention to it. This is an opportunity. Usually, it's too difficult to be his student. We're still too remote here! " Ouyang took a breath.

The railway station of tea vegetable has not been built for a long time, and everything is brand-new. Compared with the old stations in other cities, the station here is large and empty.

After all, the city has reached the edge of China. There is no exaggerated black pressure in the flow of people. Instead, the station is full of cars from surrounding shops.

"Instead of entering the parking lot, drive directly into the station from the side door." Ouyang pointed to a mobile fence door marked with a special channel and said to Zhang Fan.

"Good!" Zhang Fan nodded and took the train for many years. Zhang Fan really didn't enter the station through this special channel.

Because Ouyang said hello, the guard at the station looked into the car and waved to let the team pass.

This passage directly drove into the train platform, because Professor Li Housen was in the soft sleeper

carriage, and Zhang Fan and they drove directly past. But Ouyang didn't let 120 come.

Get off and look at the surprised eyes of the crowd. Zhang Fan is a little embarrassed. Despised and envied, but most of them looked at Zhang Fan's team with numb and indifferent eyes.

"Damn it! Power is different. Cars can drive to the door of the train carriage!" Someone muttered.

"What's the noise? Don't you see someone's license plate. Silly chatter!" A younger and older man picked up the young man talking in front of him.

Zhang Fan wants to find a ground seam to drill in. From an ordinary background, he stood opposite the public for the first time. Looking at the eyes of passengers and railway station staff, Zhang Fan shrank and shrank. Hiding next to the car, he dared not look at the crowd.

"Oh! It's very polite, Dean Ouyang. It's very polite." Although Professor Li Housen is still an authority in the scald department, he is a little flattered for the first time!

"Yes, as the authority of the scald department in China, you should come to our frontier no matter how enthusiastic you are. When you arrive at the frontier, you must let the experts and professors in your capital feel the enthusiasm of the people in the northwest frontier.

We have all the laboratories and offices you asked for. Now let's go back to the hotel first. It's been a dusty journey for more than 40 hours. It's really not easy. Get on the bus first! Let's go to the hotel first. " Ouyang held Professor Li Housen's hands and said very emotionally.

Professor Li Housen, who originally wanted to die when the goods arrived, almost cried without being moved. Ouyang's strength and irrationality are very personal to him.

"That's very kind! That's very kind!"

He didn't expect such enthusiasm and fighting now.

The staff of the medical office had already opened long and large banners " Warmly welcome Comrade Li Housen, a famous expert Professor of scald Department of Zhongyong University, and his party

"Hard work!"

"Hard work!" Like the two heads of state meeting, Ouyang shook hands with each other's personnel and stood beside Professor Li Housen to introduce them.

"Is this an expert in the capital? What did you see?" An elderly passenger walked up to the banner staff and asked quietly.

"This is an expert of our national scald department, a very famous expert. He hasn't been back in the

United States for a few years."

"Where can I see a doctor for our ordinary people?"

"Look, I'm going to the clinic in a few days." The staff said loudly.

"Really?" The passer-by asked in disbelief.

Ouyang has already explained, and he has already prepared to take Professor Li Housen to the clinic during this period of time. A big reception is a free advertisement.

For a time, the crowd getting off the train slowly gathered around.

"How many days does the expert stay? Whether to see us or not! " Northwest people were forthright. A rash young man stood in the crowd and shouted.

"Don't be impatient. Professor Li Housen will stay in tea for a period of time. If you need it, you can call the municipal hospital. We will launch an expert clinic! " Ouyang put his waist in and shouted at the crowd.

The originally despised and indifferent crowd suddenly did not know how, and burst into applause! Very warm applause!

"Professor Li, good job! Good doctor! "

"Good job!" The crowd cheered one after another.

After staying in the United States for decades, Professor Li Housen, who returned to Capital University and entered a large hospital, has never seen such a battle.

"Thank you! Thank you! " Professor Li Housen kept bowing to the crowd with his hands folded. His eyes were red and tired.

"Professor Li, please!" Ouyang stood in a row with the hospital staff and extended his hand to invite Professor Li to get on the bus.

"Thank you! Thank you! "

After getting on the bus, Professor Li, who wiped the corners of his eyes with a paper towel, calmed his mood for a long time before saying, "this is the motherland!"

Ouyang tilted his mouth slightly and looked out of the window!

**Chapter 427**

Is Professor Li Housen short of money? No one is short of money, but the municipal hospital in the small border town can't afford it. Lack of fame? Also lack, but the tea vegetable city hospital can't afford it.

It would have been too difficult for the third class hospital in the region to hire a doctor of this level if it had not been for the wrong circumstances that Professor Li Housen had to come to tea for Zhang Fan's operation.

Zhang Fan's surgical skills alone are not enough. He has no affection. For doctors at this level, Ouyang can only rely on friendship to let him serve snacks for the tea vegetable city hospital. The old lady is so thief that she sees through the hearts of the people.

Originally very embarrassed Zhang Fan secretly glanced at the old lady, "it's so awesome!" He cheered Ouyang in his heart.

"Doctor Zhang, no wonder you don't want to leave here. It's so human. This is the sense of achievement!" Professor Li Housen, who had calmed down for a long time, looked at the small town of the frontier fortress and said with emotion.

"Well!" Zhang fan can't answer. He's not old enough to have this feeling.

"Oh, he, the butterfly has begun to fly in his heart." Ouyang looked at Zhang Fan and said with a smile. However, she was not an unreasonable leader. After turning her head, she said, "Professor Li, go back to the hotel and have a rest. In the evening, the hospital will hold a welcome banquet for you and your party.

Tomorrow, we'll take you around the frontier to see tea and the great rivers and mountains in the northwest of the motherland. This is an original natural style that can't be seen in the capital and big cities. "

"Settle down the lab first!" Professor Li Housen is a little reluctant to waste time. His foreign brothers are also competing.

"It's all right. Tomorrow is the weekend. You can rest assured that everything is satisfactory. Take a good look at the mountains and rivers, and then start working hard."

"Well, let the guests do whatever they want. Please the dean and Dr. Zhang." Professor Li Housen said politely.

"What's the trouble? You're a distinguished guest we can't invite."

Hotel, Ouyang did not have the only four-star hotel for tea selection, but booked a friendship hotel designated by the tea government for meetings and banquets.

This hotel seemed to be called Sino Soviet Friendship Hotel in the early years, but later China and the Soviet Union were taken away. Generally, it is not open for business. Although from the outside, it is a broken building, a gray old building for decades. But the hotel occupies a large area, with green trees and a quiet environment.

For this matter, Ouyang made a special trip to the government and asked for several rooms. Professor Li Housen has never stayed in any kind of hotel, but this is the first time to stay in this old Soviet style hotel with armed police standing guard.

"Is that right? Any hotel is OK. When we were abroad, we didn't live in the basement. We didn't pay so much attention. " Professor Li Housen saw the difference.

"Hehe, the personnel structure here is simple, and it is better than seclusion. Don't worry."

After settling down Professor Li Housen and his party, Ouyang returned to the hospital with Zhang Fan.

"You will go to the hotel with me to order dishes later. You must have characteristics." After Ouyang got on the bus, he began to settle things for Zhang Fan.

"Dean, i..." Zhang Fan has to pick up elder martial brother this afternoon, so he doesn't want to order dishes, and he's not good at this kind of thing.

"What's the matter? Going to the cave again? " Ouyang's triangular eyes stood up immediately.

"No, no! Dr. Lu of Qingniao, the disciple of old Lu, is coming to tea. I have to pick up the plane this afternoon. "

"Lu Lao's disciple? Hepatobiliary surgery? "

"Yes!" Zhang fanhan came out. He really had a short mouth to eat people and a short hand to take people. Since Ouyang opened the door and let Zhang Fan go to acupoints and perform hand and foot

surgery, he has become more and more spineless in front of Ouyang. The situation is better than others!

"Why not report! Academician's children, it is estimated that they are either Changhe scholars or Jieqing. Is he coming to travel or..." Ouyang looked at Zhang Fan.

Where does Zhang Fan know what his budding senior brother is doing here? "Um! I guess I came to travel."

"There is nothing to travel in the frontier, either mountain or grass. If you have this Kung Fu, you might as well give us a few days of outpatient service.

But it's good. In this way, you pick up people first. If you take your family, it's OK. We won't affect their tourism. You're responsible for making arrangements.

If it's a person, report to me." Ouyang thought for a while and said to Zhang Fan.

"OK, Dean." Zhang Fan glanced at Ouyang. He seems to have some insights, but he can't say clearly. Is Ouyang beneficial? There seems to be no interest here. Is it for the future? The old lady will retire in a few years. Maybe this is also a sense of achievement!

"All right, go and pick someone up quickly. What's the situation? Remember to call me. And you must attend the evening banquet. People come for you. It's nothing if you don't come at night." Speaking, Ouyang got off the bus.

"But..." Zhang Fangang said. Ouyang slammed the door and left without looking back.

If there is a problem, solve it yourself. As long as I give an order, you have to find a way for me. It's unreasonable.

Zhang Fan smiled helplessly. Ouyang is generally very kind to the younger generation of doctors. He cares about life and work. Most of them beat Zhang Fan. In fact, the old lady is very optimistic about Zhang Fan.

"Zhang Fan, have you come out yet? Elder martial brother's plane is about to land. Don't forget." Shao Hua called.

"Don't forget, I just picked up professor Li Housen from the capital. Now I'm going to the airport."

"I'll go whether I need it or not."

"Don't you work?"

"I can sneak out. Hey, hey, our director went to a meeting. Then we can herd sheep." Shaohua whispered.

"Well, I'll pick you up." Zhang Fan drove to pick up Shaohua.

"Shao Hua, where are you going?" Shaohua's colleague, Xiao Chen, is also from their department. They entered the bank with Shaohua. They have a good relationship.

"You scared me to death. I thought it was the director. If you don't speak louder!" Shao Hua looked at Xiao Chen and patted himself on the chest.

"What's the matter? I'm in a hurry." Xiao Chen looked at Shaohua curiously and packed his bag as he walked.

"I'll pick someone up at the airport. I won't tell you. If the director asks, help me cover up. "

"OK, go and. Hey, I have another thing. I heard that your boyfriend came to the hospital with a dermatologist from the capital, didn't he?" Xiao Chen chased Shaohua and asked.

"It seems so. What's the matter?" Shaohua stopped and looked at Xiao Chen.

"Why don't you ask me if he can see plastic surgery." Xiao Chen walked quickly to Shaohua and said quietly.

"What? Breast augmentation or nose pad? " Shao Hua said with a bad smile.

"You're dead. Remember to ask for me first. Otherwise, I'll go to the bird market again. "

"OK, no problem. You must live up to your mission! No, Zhang Fan came to pick me up. " Shaohua said that and hurriedly trotted out of the bank.

Tea vegetable airport, a very small airport. The waiting hall is not big, and there are not many people to pick up the plane. In the early years, this airport was originally an emergency airport for the army.

Later, it was handed over to the local government. There were few people and flights, and the government didn't build much. It is said that once a slightly larger plane was forced to land. As a result, the glass of nearby people and the waiting hall was shattered.

When it was built, it seemed a little away from the city. With the development of the city, the airport was almost on the edge of the city. However, considering the hidden relationship at that time, the airport was built in a secondary forest.

Zhang Fan and Shaohua haven't been out for a long time. They drive along the tree lined airport road“ I haven't noticed before. This place is really beautiful. "

"It's very beautiful." Zhang Fan looked at the surrounding environment.

"The people who work at the airport are lucky. When they go out, they are in the forest. Maybe they can pick mushrooms when it rains."

"Ha ha."

"Oh, yes. Do you have any taboos? I've prepared two restaurants for you to choose. One is famous ethnic characteristics, and the other is fried vegetables. "

"Hey, let's see first. Our dean asked me to attend the reception banquet in the evening."

"Didn't you ask for leave?"

"People disagree!"

"So what?"

"Pick someone up first and wait until you get it. Ah! "

Small plane, a small plane full of more than 30 people slowly began to land from high altitude.

## **Chapter 428**

Although Zhang Fan hasn't been on a plane several times, he has seen several large planes, especially those that don't know whether they are Airbus or Boeing. There is a posture of overlooking the small ones when taking off and landing.

Looking at the old-fashioned schema plane of tea vegetable, it fell quietly from the sky like a finch, which made Zhang Fan under the ground very worried.

The plane doesn't encounter any airflow. It's nothing yet. Once encountering airflow, it bumps like a tractor.

Zhang Fan took this plane when he came back from Qingniao to take an examination of a practicing doctor. Looking at the wings of the plane shaking violently at a high altitude, it's almost falling apart. It's really hard to control his life.

After that, Zhang Fan also began to understand the feelings of the patients on the operating table. He has no right. If he has the right, he wants all surgeons to experience the feeling that life is not controlled by himself.

"Come out, look! Someone came out. Which is your elder martial brother?" Shao Hua stood beside Zhang Fan, trying to keep elegant, not for himself, but to make Zhang Fan have face.

Where did Zhang Fan know it was his elder martial brother? "Let me see. As long as they are pale and bald, they wear thick glasses."

"Well!" Shaohua almost let Zhang Fan break her skills. After enduring it again and again, he said, "I told you to put on your tie, and you didn't listen. This is respect for others. The people you contact now are getting higher and higher. I can't help you!"

"Pull!" Zhang Fan glanced. "I'm a doctor. I don't care about others. Respect or disrespect can't be reflected by wearing a tie."

Zhang Fan knows that he must be firm at this time. I don't know when to start. Shaohua seems to have a sense of crisis and will spy from time to time.

Zhang Fan said so, Shao Huayan smiled like a flower, unchanged, still the original stone. Holding Zhang Fan's arm, what is happiness? This is happiness. Men are willing to find ways to calm women's hearts, men care about women's feelings, and women are willing to rely on their own men. This is happiness.

At this time, Zhang Fan was also worried. Although the plane was small, there were more men on the plane, many bald and more wearing glasses. Which one was it? Just when Zhang Fan was wondering whether to shout, he saw Professor Zhao Jingjin.

Lu Ning has almost always stayed in school. He went to graduate school and took the doctoral examination after graduation. After graduation, he stayed in school. He has no academic problems, but he is a little introverted and is not very good at dealing with people. So Lu Ning wants to come to the frontier to find Zhang Fan. Old Lu must be worried. He greeted Professor Zhao Jingjin in bird market in advance.

They are all engaged in hepatobiliary surgery, and the industry leaders say hello. Professor Zhao Jingjin must accompany them to the end. Moreover, as soon as he heard that he came to find Zhang Fan, he began to wander in his heart, and his corner was unstable!

"Here we are. I think it's my elder martial brother who is with Professor Zhao Jingjin!" Zhang Fan grabbed Shaohua's hand and said that he was a little nervous. He had pulled the tiger skin for a long time. If Lu was not happy, he would be embarrassed!

"That's what you said! And a fat man!" Shaohua whispered. She felt Zhang Fan's tension and wanted to be naughty and make Zhang Fan relaxed.

"Professor Zhao! Elder martial brother!" Zhang Fan felt that his face was about to scald the eggs.

"Ha ha, I've come to pick up the plane. I'm familiar with everything." Although Lao Zhao is happy, he has long been together in his heart. Zhang Fan never picked him up. This time, when he heard that elder martial brother was coming, he not only picked him up himself, but also took his girlfriend who never showed up, "Hey! What's this called?" Lao Zhao was helpless.

"Hehe, younger martial brother, the teacher is very angry with you!" Lu Ning's meat face, with a look of melon eating people watching a good play.

"Well!" Zhang fanhan came down.

"Even if you came to the frontier, you betrayed your school and went to get orthopedics. The teacher is very dissatisfied!" Lu Ning's eyes were laughing into a line. When he left, Lu told Lu Ning about Zhang Fan. This time, Lu Ning came with a mission.

"This is not, this is not..." Zhang Fan couldn't say. If you beat someone else's banner, you have to explain to them now. The name of an academician is not for nothing.

"Hello, Professor Zhao, elder martial brother!" Shaohua solved the siege for Zhang Fan at the critical moment. She knew that Zhang Fan didn't have the ability to liven up the atmosphere.

Looking at Shao Hua, who was standing by Qiao Shengsheng, Professor Zhao Jingjin said with a smile: "ha ha, good, good, Zhang Fan's operation is good and his vision is better, and he has caught up with the most beautiful girl in the frontier. Or we raise people in the frontier! Ha ha. "

Lao Zhao is a person who not only gets up in the academic circle, but also can do well in officialdom. His EQ should not be too high. A few words broke the strange atmosphere.

"Hehe, hello. I'm Zhang Fan's elder martial brother. Please. " Lu Ning also greeted Shaohua with a smile.

On the bus, Lao Zhao directly began to ask about the progress of the experiment. When it comes to specialty, there are more topics for the three men, and the strangeness is gone directly.

"I think the reconstruction of portal system is simple. First of all, the degree of injury of this operation is very large, and the postoperative recovery is very difficult. Many experimental mice can't resist two

hours after operation. "

"Are laboratory animals too small? Maybe a bigger experimental animal... "

"No, the bigger the body, the greater the damage feedback. It is directly doubled and doubled. It can hardly last until the end of the operation. Maybe our operation is not fine enough. We have changed several animals in Qingniao University, and there is no progress."

Shaohua couldn't understand it at all, but she listened quietly at the co pilot's side and occasionally glanced at Zhang Fan secretly. Looking at Zhang Fan's talking, her heart was as sweet as honey "What's the matter with your black face? You're still an expert! "

"Well, well, stop talking and change your mind. It's not clear in a word or two. Manager Shao, how to arrange us next! "

Lao Zhao interrupted the discussion of several people. He understood what Lu Ning said inside and outside. He didn't come to dig his corner. As long as he doesn't dig a corner, he'll rest assured. Then he smiled and said to Shao Hua, who was sitting in the front passenger seat.

"Professor, I'm not a manager, but a clerk. The restaurant has been booked. I wonder if you have anything else. " Then Shaohua glanced at Zhang Fan.

"Professor Zhao, elder martial brother, Professor Li Housen, who is engaged in burns in the capital, and his team also came to the tea vegetable hospital today..."

"Lao Li is here, too? It's not easy. You Dean Ouyang have made great efforts. It seems that you have a big plan this time. Dr. Lu, Lao Li, you know, from the United States. " Lao Zhao knew why Professor Li came. Instead of making Zhang Fan difficult, he might as well help Zhang Fan early.

"Yes, I talked together when I attended the academic conference in the capital last year."

"Why don't we go and join the fun, and there will be more people."

Zhang Fan was really embarrassed to hear what Lao Zhao said. It's really not easy for a long-term scholar to be so considerate.

"OK, I have no problem. I know whether it's convenient or not." Where to eat is not to eat. Lu Ning has no pursuit of this kind of thing and is casual.

"What's inconvenient? Ha ha, we went. President Ouyang was absolutely happy. Is it Doctor Zhang? "

"Yes, thank you, Professor Zhao."

"Hey, you're welcome. I am a lively person. It's a waste of manager Shao's mind. " He is exquisite and

transparent. This kind of person with high IQ and high EQ can't justify not rising in wind and water.

"It's okay, it's okay. The hospital receives the wind and asks Zhang Fan to find a chance to invite you to try the tea vegetarian snacks again. " Shao Hua originally wanted to say goodbye, but he felt it was inappropriate. People said goodbye when they first came. If it was inappropriate, it became a snack.

As soon as Zhang Fan heard that both of them were willing, he found a place to stop and make a phone call.

"Dean, Professor Zhao Jingjin and Dr. Lu, I have received them now." Zhang Fan and Ouyang already have a lot of tacit understanding.

As soon as Zhang Fan said this, Ouyang understood.

"Then hurry to the people's hotel. The room for them has been arranged. I'll wait here to meet the two experts. "

"OK, Dean." Ouyang's voice is not small. Zhao Jingjin and Lu Ning have heard it. Anyway, face is still there. People are so strange.

All the way out of the airport, Shaohua heard that everything had been solved, and there was nothing wrong with her. Because it was not on her way, she said to Zhang Fan, "Zhang Fan, you put me here, and I'll take a taxi to work."

"OK!" Zhang Fan said a word and was ready to pull over.

"Hey, how can I do it? What kind of car can I take in the sun. It's about stepping on the accelerator. Send it, send it. Be sure to send it. Such a sensible girl, Zhang Fan, you should cherish it. " It is also appropriate for Lao Zhao to say this at his age.

"No, it's okay, professor."

"It's not an operation. Don't worry. When a doctor usually says to go, it's difficult to be your family members. Now we are all idle people and can't delay anything."

Shao Hua was a little jealous after a few words.

"Yes, when my wife had children, my teacher and I were having surgery. My daughter-in-law didn't complain." Lu Ning looked out of the window with deep feeling.

Sent Shaohua, Zhang Fan turned around and came to the people's hotel. Ouyang has a good set of things. When she wants a house, she wants two more. According to her words, it's always good to reserve more. Anyway, the house is vacant.

"Welcome, welcome! Originally, I was going to pick up the plane, but I had to discuss it myself. I'm really sorry for the two experts!" Ouyang and his subordinates did not meet downstairs, but stood at the gate of the hotel.

"You're welcome, you're welcome. The dean is very polite." Lao Zhao looked at the post at the door of the hotel and said, holding Ouyang's hand.

"This is Dr. Lu, a real Qingjie expert!" Lao Zhao introduced Lu Ning in passing.

"Welcome, welcome. Zhang Fan said that his elder martial brother would come to tea. I'm so happy. Little place, we really appreciate your coming!

I'm sorry today. If we follow the old rules, we'll go out of town thirty miles to meet experts like you. Dismounting wine is a must. "

"You're welcome, Dean." Lu Ning is a little cramped. The battle is too big. He still doesn't adapt very well.

"Please! Please! Rest first, and be sure to appreciate the enthusiasm of tea vegetarians in the evening. Please!" Speaking, Ouyang invited them into the hotel.

"What did you say?" Taking the time, Ouyang quietly asked Zhang Fan.

"I'm not here to travel. I'm here to see the portal experiment."

"That's good! That's good! That's good!" Ouyang is relieved.

## **Chapter 429**

Hospitality. It is said that people in all provinces of China are very hospitable. If you have to choose the best guest, it may become a water battle. Anyway, the frontier people are also very hospitable.

Ouyang had planned to entertain experts in a farm with frontier characteristics, but it was rejected by the leader in charge of health.

"No, the ethnic restaurant in the people's hotel has its own characteristics. In those years, the leaders were also welcomed here. At that time, the leaders appreciated it very much."

"You have to come forward to contact me. My level is not enough." Ouyang said to the leader with a smile.

"OK, I'll contact. The leaders will also attend in the evening. Refine the list of people attending the

banquet in your hospital."

"Will you both come?" Ouyang zhengse said.

"Well, I'm coming. Show me the list of participants when it comes out. "

"I'll give you the list now!" Speaking, Ouyang began to write the list of participants.

"The expert of the capital burn department, Dr. Qingniao Lu, Professor Zhao of niaoshi, President, hospital secretary, chairman of the labor union, vice president of surgery in charge of the hospital, director of the medical department, chief nurse, director of general surgery, director of hepatobiliary surgery, director of Dermatology and orthopedic doctor Zhang Fan." After a while, Ouyang wrote out the personnel to attend the hospital. The original director of the women's Federation, the logistics director and the head nurse of relevant departments were deleted by Ouyang.

The leader looked at the list and said, "the general doctor will not attend. Can the head nurses of various departments attend? I know that the nurses in your hospital are the best at singing and dancing. At that time, they can activate the atmosphere." Different industries have different ways of thinking.

"Hey, let me tell you the truth. These professors and scholars came to this general doctor. He is the main force in several related experimental projects. It doesn't make sense if he doesn't participate. " Ouyang's face is black.

"Oh! oh It turns out that our city hospital is a talent, ha ha, ha ha! Which line? I'll report it to the leader. " The leader in charge of health resolved the embarrassment with ha ha. He knew that Ouyang would not deceive him in this matter.

One is a famous expert and scholar in burn department, one is a Changhe scholar, and the other is a distinguished young scholar. Tea vegetable leaders also attended the banquet. Two big tables.

If there are leaders, they must speak. 1. In accordance with Article 2 and 3, all leaders shall make speeches. Anyway, they are similar in meaning. It's just different in tone and momentum.

The hospital has a table, and leaders and experts and scholars have a table. Of course, Zhang Fan is on the table in the hospital, and he is happy to stay here.

On the other table, Professor Li Housen and Professor Zhao Jingjin talked happily with the leaders. The leaders deliberately made friends. The two experts and professors rolled in the world of mortals countless times. There was no problem in this aspect.

In fact, to sum up, just two sentences:

"Please support my experimental project in tea."

"It is said that you have treated so and so, and your friendship is good." The banquet started with hot dishes, and the leader left after serving the cup. Only when the leader left did the banquet atmosphere really get up.

"Zhang Fan, don't hide. How can you be your owner? You don't give a toast to the guests when you come to tea. Can you let me, half a tea vegetarian, start first!" Zhao Jingjin, like deliberately looking for trouble, pulled Zhang Fan down on the table of their leaders. As for the others, he hasn't taken it to heart. That's all for Zhang Fan's face.

"The Dean didn't propose a toast. How can you start! We know the rules. " Zhang Fan said with a smile.

"Hehe, you are the thief." Lao Zhao whispered.

"Come on, come on. Remove the tableware of the leader. Let's sit together and be more lively. " Lao Zhao doesn't care. Ouyang can't help but care. These are her confidants.

"Elder martial brother, try it. You can only eat horse intestines in this restaurant this season. It tastes good. Teacher, is the teacher in good health? " Zhang Fan sits beside Lu Ning, helping Lu Ning to cook and chatting. At this time, the two people have the opportunity to speak alone.

"It's OK, but the spirit is much worse than before. The teacher asked me to ask you when to go to Qingniao. If you don't go again, the teacher probably won't have the energy to take you. "

"I'll take the exam this winter, but I'm not sure of my English at all." In Zhang Fan's mind, when he left Qingniao at that time, old Lu sent books. His eyes unconsciously turned red. The old man was still thinking of him!

"Hehe, the teacher knew, so I came. I'll stay here for a while to help you with your English and combine the liver gate experiment of Qingniao University and Dihua University. Professor Zhao has agreed. "

"Yes! No wonder Lao Zhao is proud. " Zhang Fan said in surprise.

"The project is not big. It makes no sense for two universities to repeat it. It's also a waste. That's what the teacher means." Lu Ning explained to Zhang Fan while eating. Although I haven't seen them before,

a word of master, elder martial brother and younger martial brother naturally brings a lot of relationship between them.

If you really want to eat frontier characteristics, you still have to go to some fly restaurants. In fact, this large and official restaurant has no characteristics.

It's just that the dishes are beautiful and the number of dishes is relatively large. As for the taste, it's impartial and nothing remarkable. But for this, Dr. Lu and Professor Li Housen's team were happy.

"Because horses have no gall bladder, they have high cholesterol in their intestines, but the old cellar with a cup of tea is the most enjoyable. Come on, our tea vegetable hospital welcomes the guidance of experts and professors. Let's pick up our wine glasses and propose a glass of water and wine to all experts. " When the leader is gone, Ouyang is the master.

Northwest cuisine is simple, and some strange dishes, such as money meat and small stomach, will not appear on this occasion.

However, braised oxtail, Russian fish head, steamed venison, lamb and various Nang pit meat have also made many experts who have never been to the border see it.

"This fish is a cold water fish. It is said that it can grow one centimeter a year. I don't know if it is true, but the meat is very delicious. Come on, everybody try it. Of course, the rules of the frontier still speak, and the first three and the last four still have to drink fish wine. "

The Secretary of the hospital doesn't understand the specialty, but he knows the rules of this occasion, all kinds of rules and all kinds of jokes. He comes with his mouth open. The atmosphere is good.

"All right, they are all engaged in medicine. Take it as you like!" Ouyang said, and the Secretary didn't even change his smile. "Yes, yes, with the amount, come, eat fish, eat fish."

The next day, because it was the weekend, Ouyang organized a group two-day tour. All the people accompanying him were directors except Zhang Fan, who was not the director. Because the experts didn't bring their families, and the directors of the hospital didn't bring their families.

"A hundred miles long roll, this is our high mountain forest of tea. The forest is close to Tianshan Mountain, and the grassland continues at the foot of the forest. Leaders, let's spend the night on this grassland tonight. " Because the experts came from a huge source, the municipal government directly sent professional tour guides from the Municipal Tourism Bureau to accompany them.

At the government's Koster, the tour guide was very professional with a headset.

"The mutton here is the best. Drinking Tianshan mineral water and eating uncontaminated grass and natural herbs on the grassland, the mutton is very delicious. "

The natural style of tea is very beautiful. If the south of the Yangtze River is a water town, the trees are graceful and a hundred flowers compete for beauty.

Here are the iron pines, the snow capped mountains, the endless grassland, the clouds of sheep and horses dotted on the grassland. The winding river, shining in the sun, is like a giant hada, sprinkled on this grassland. It really has a unique style.

Many people envy the mountains and forests in Switzerland. They seem very beautiful. In fact, the mountain forest of tea is no worse than that of Switzerland, and it is more atmospheric. The north slope of Tianshan mountain can accept the warm and humid air flow of the ocean because of the slow slope. The scenery here is really beautiful.

High altitude has high altitude scenery, and low altitude has low altitude scenery, which makes a group of people who were born and grew up in the city intoxicated.

"This is the scenery of our frontier beyond the Great Wall, and this is the great rivers and mountains of the motherland!" After all, he is a professional tour guide and has a sharp mouth.

The people's hotel has many rules and regulations, but when you come to the grassland, there are not so many restrictions. All kinds of natural food were brought up by the herdsmen like running water. Because it is a scenic spot here, there are herdsmen who specialize in catering.

Put some butter on the freshly baked Nang cake, then stick some pollen, and then wipe some grassland honey. The more you chew, the more fragrant it will be.

"Distinguished guests, please taste Naren of our grassland! Drink a bowl of horse milk wine! Let our boys and girls sing another song for you! "

Naren is a very distinctive ethnic food. The noodles are mixed with lamb cooked by special methods, together with wild vegetables and spices unique to the grassland. The taste is very beautiful.

Fried GADA chicken with grassland mushrooms can directly make people swallow their tongue into their stomach. It's so delicious. The Bucks' money, meat, small belly, and sour and sweet horse milk wine are unconsciously intoxicated on the grassland by experts who are not drunk in the people's hotel.

Enthusiastic grassland men, beautiful grassland girls and unrestrained and elegant dancing are really lively. Lao Gao, who is usually very carrying, sang a Prairie night to the experts.

The city government paid, the county government paid attention, and everyone had a very pleasant trip to the grassland. It also let everyone enjoy the scenery of Northern Xinjiang. At noon the next day, Ouyang organized everyone to return to the city.

When the experts were on the grassland, tea appeared for the first time. The government helped the municipal hospital advertise. Taxis, radio and television constantly broadcast the news of experts going

to the clinic.

"Secretary, book me a dermatology expert number first!"

"President Ouyang, I found gallbladder polyps during my physical examination. I heard that experts came. It is said that they are still outstanding?"

### **Chapter 430**

Foreign monks can chant scriptures. If the monks have a great background, it will make people flock to them.

Small places, small cities and the frontier beyond the Great Wall. Although there are airports, air tickets are too expensive. In the early years, ordinary people were reluctant to take them.

Therefore, the concept of big cities such as the capital is very remote. In the early years, people would say what happened to Lao maozi if they said something more advanced.

With the strength of China, railways and highways are directly inserted into the country. After the mobility of the people is enhanced, they also know places outside the frontier. I also understand that cities such as the capital and Bluebird are already very powerful.

On Monday, many groups that looked like civil servants poured into the tea vegetable city hospital, with a trace of officialdom in their clothes and mental outlook.

"Chief Li! What's wrong? "

"No, no, it's not uncomfortable. It's just that the last physical examination was a little fatty liver. I heard that experts came to big cities. I'll have a look. What's wrong with you?"

"Me too. The physical examination said that I drank too much. Let's have a look. The leaders of this city's hospital have gone to heaven. They used to come here to see a doctor. When experts came, they were cattle. They didn't register and didn't show them directly! "

"Hehe! Bear it. All the people who come here are big winners. Maybe they will be academicians and experts in the future. Be arrogant. "

There will always be a group of personnel who are very informed about all kinds of local news in small places. Before the people react or don't believe it, the well-informed personnel have inquired clearly.

Before going to work, Ouyang held a rare meeting for the finance department. The financial department of the hospital manages the registration window“ Today, I opened an expert clinic. One ID card must correspond to one person and one person must correspond to one number. Whoever dares to open the back door and take the road of convenience, I will smash his job. I will do what I say and never tolerate it. ”

Ouyang knows that he usually takes the back door to open the convenient door, and the one who opens and closes his eyes will pass. But this kind of expert is a very special scarce resource. No matter how, we can't screw it up or do bad things with good intentions, which will cause the dissatisfaction of the people.

Professor Li Housen's experimental equipment was not adjusted properly within a day or two. Ouyang arranged an expert clinic on Monday. He was happy to eat and play. He was embarrassed not to work.

Professor Li Housen took more than ten young doctors to the clinic, including young doctors who had been transferred to another department and attending doctors who had already worked in the dermatology department.

Ouyang is a saying: there are few opportunities to learn from such experts. Even if you buy them with money, you may not be able to buy them. Therefore, you must be pious, seize the time, and strive to learn more and absorb more.

Ouyang has done a very good job in improving technology. She doesn't specify who to study. Young doctors interested in dermatology can study.

Time is limited, the old lady can only choose talents in the way of scouring the sand. So Professor Li Housen's outpatient service is very scary. He sits at his outpatient desk and stands behind him more than a dozen young doctors, both men and women, fully armed, hats, masks and white coats. He stood quietly with a serious expression.

No matter what the professor thinks, as a person who wants to learn, he must first pay attention to himself and have a correct learning attitude.

The patient who entered the door looked at this posture. Some people with a little power were completely blown away by this posture“ This is the expert. Look at this posture, look at this momentum. I don't know. I thought I came to collect money with a thug! ”

Lu Ning's clinic is almost the same, but there are no female doctors and all men. It is not that general surgery discriminates against female doctors, but that female doctors discriminate against general surgery. No way, there are too few female doctors who want to work in this department.

Even Professor Zhao Jingjin was caught by Ouyang and had to go to the clinic. Because of Lu Ning's arrival, Qingniao university is ready to carry out experiments jointly with Dihua University. He is not in a hurry. Moreover, some coordination between schools is not done in a day or two. He is not in a hurry to leave for the time being.

In the morning, tea vegetarians and well-informed people see doctors. After 10:00, more ordinary people come to see doctors.

"Lao Wang, ask for leave quickly."

"What's the matter?"

"Director Song's wife next door said that the city hospital has come to the capital and the experts of Bluebird, and the level is quite high. You quickly ask for leave to come to the municipal hospital. I'm registered now. A person can only hang one number, and I also need an ID card. There are so many registered doctors! "

"OK, OK, I'll come right away." Who said that he didn't know what to say. He felt that his kidney suck.

The government and hospitals have made great efforts to publicize, but the effect has not improved. But by word of mouth, even some people in the bird market know that tea has come to the capital as an expert. Anyway, whether what the relevant departments say is true or not needs to be observed. But what the capable people around me say must be true. It's so strange.

When he went to the clinic, Professor Li Housen began to take it seriously. He didn't think about funny ideas such as how to show his skills. He didn't need to show anything in a regional hospital in such a small place. This seriousness was a professional ethics.

Dermatology is very simple. As long as it can be diagnosed, there is a way to treat it, but the terrible thing is that there is no way to diagnose it. Nothing else, just a simple mole. I don't understand it now.

Some experts believe that the nevus comes from epithelial cells, and some experts believe that it comes from neural tissue. Even the source can not be diagnosed. The current treatment is empirical treatment, and a large number of treatment data established by evidence-based medicine.

Then many beauty salons have the courage to remove moles. This thing can't be cured casually. Generally, moles are removed.

If it is a borderline nevus, the removal of nevus is incomplete, and the base structure is not completely

removed, it will be terrible. It will induce canceration directly. It may not be cancerous originally. After coming here, it will induce canceration.

Moles are divided into two kinds in medicine, one is cellular and the other is non cellular. Non cellular is the so-called freckles, pigmented spots and so on. This is almost benign, and the risk of cancer is very small.

The classification of cellular nevus is more. And the long is also very strange. The moles are hairy and proliferate outward, like milk (a) head.

The most special is the mole growing in the palm, sole, or genitalia. This mole is small or large, dark or light in color. It doesn't seem to affect the appearance, and it doesn't hurt or itch.

In fact, this kind of nevus is the most dangerous, because it is either junction nevus or mixed nevus. In medicine, as long as it is said to be borderline or mixed, it is not a good thing.

Once a mole growing in this special place is found, it should be completely removed.

And it's best to remove it completely before puberty. Because this thing has too much chance of canceration, and because it has no specific shape, round, flat, granular and flake. It is very difficult to diagnose clinically. Only resection and pathological examination can be qualitative.

However, regardless of whether it is clinically qualitative or not, moles in this place must be removed early and must not be tolerated.

What is rich when there are moles in the palm and expensive when there are moles on the back of the hand? It's all deceptive. You don't know whether you are rich or not, but there must be a great possibility of cancer.

"Doctor, show me this mole." In the morning, after a group of people who came to health care left, near noon, the real doctor came. A young woman, a little anxious and shy, said to Professor Li Housen.

"Where is it?" Professor Li Housen kindly asked each other. With the improvement of technical level, most people who engage in technology slowly began to calm down.

Especially in the medical industry, the more powerful the doctor is, the more kind he is to the patient. On the contrary, the half bottle shaking doctor makes the patient angry if he questions a little. It's not his intention, because he is not confident and is deeply afraid of being questioned by others.

"Well, this, this." The young woman looked at more than a dozen male and female doctors in the office, and they were all young doctors. She was a little embarrassed to say.

"It's all right. The doctor's parents are worried. Relax and speak slowly. Don't be shy." Professor Li Housen did not make fun of the patients or let the doctors behind him go out. He also grew up as a

resident. He understood the difficulties of young doctors.

"On the ass, although it doesn't hurt or itch, it feels a little big, and it looks scary." The young woman lowered her head and began to blush, whispering.

"It's all right. Let the doctor see it first. Don't worry. You go to the disposal room inside and expose the mole. " After finishing speaking to the young woman, he said to a female doctor behind him, "please accompany her in and let us know later."

"OK, Professor Li." When the female doctor finished, she took the female patient into the disposal room.

"Professor, have some water. I've seen it all morning, and you haven't even had a drink of water. " A male doctor behind him quickly poured half of the cold water for Professor Li Housen and mixed it with some hot water.

"Thank you!" Professor Li Housen has been talking all morning and his mouth is dry.

After Professor Li Housen took a sip of water, the young doctor asked, "Professor, if the patient has suspicious nevus and wart on his face, excision will lead to scar on his face, but if it is removed by laser or freezing, he can't be examined. What should I do in this case?"

There were few opportunities. The attending doctor asked his own questions.

"This is the difficulty. If you feel suspicious, you must have a definite diagnosis and be sure to eliminate the suspicious before you can use freezing, laser and other treatments.

Even if you are sure, Gu Wanyi's missed diagnosis will happen. Once missed diagnosis is very terrible, so as long as you have doubt, try to find a way to do disease examination and give qualitative analysis. "

"Ready, professor." When the patients in the disposal room were ready, the female doctor hurried out to inform them.
