

Chapter 501

After dinner with Shaohua, Zhang Fan gets off the bus and goes to the airport. Shaohua had another day's meeting, and Zhang Fan had to leave.

Originally, Zhang Fan meant to pay his own room fee. After all, it's embarrassing to use someone else's house after the operation. As a result, the boss of the wine industry called directly from the ward, his tone was weak, but his voice was very strong.

"They are all children in the frontier. Do they look down on people! Don't worry about the house! "

After Zhang Fan accepted the kindness of others and settled down with Shaohua, Zhang Fan left the bird market by plane, got off the plane and drove his car home in the parking lot.

The old couple went to the farm again. As soon as the weather was hot, the old couple went to the farm to plant some vegetables in the old yard. On weekends, the old couple went to the farm to busy their small yard.

After calling Shaohua, Zhang Fan took a bath, went to bed, entered the system, had an operation, and fell asleep.

Here, President Wang flew back on the last plane with his nose pinched red. It's not for nothing to become a frontier official in the provincial oil system.

Their other advantages are hard to say, but they all have one thing in common, that is, they are resilient enough. Most people will give up when they are not themselves or their relatives.

MMP, I don't want face! But for them, face is nothing at the critical moment. This is the difference between ordinary people and people like them. Perseverance, really, it's too hard to say.

Mr. Wang on the plane closed his eyes and thought " Who are you looking for! We must find someone who can talk. " jingle! Like brother Yixiu, his brain lit up.

With a way, he will sleep at ease. To tell the truth, it's really not easy to fly around this day. As soon as the plane landed, he took out the phone before even waiting for the cabin door to open.

"Brother, you have to give me a hand. It's a shame today, an adult. Really, now the old face doesn't know where to put it. "

"Hehe, this is not your general manager Wang's character. Brother, I have a narrow shoulder and a small heart. Don't scare me! " Boss Dahua listened to the phone and thought in his mind, "run! No! The relationship has not reached the point of trusting his wife to pay for his children! "

They are all human spirits. The boss of Dahua doesn't ask. He has made up his mind. If things are big, the telephone signal will be bad and won't be vague at all.

"Hey, aren't you Dean Zhang who recommended tea. My attitude is a little wrong today, which makes people angry. I want you to set up a line and be a middleman! "

"Oh, I'm not particularly familiar with it. They just performed an operation on my father."

"What your company said last time, I think we can cooperate!"

"Mr. Wang, I remember. I really want to find a way to connect. I have to hand it over to me. In the bird market, I think no one is more suitable than me."

"Turtle son!" After hanging up, Mr. Wang scolded in a low voice.

"Let you not sign for me!" On the other side, the boss of Dahua proudly hung up the phone. As a boss of their magnitude, no one depends on who to eat, and whether to give face or not depends on interests.

Monday morning, the hospital was super busy. Zhang Fan always makes rounds with a group of people. This kind of ward round is only once a month. The medical department, pharmacy department and nursing department have sent officers or deputy to follow Zhang Fan's ward round.

Thoracic surgery, from Zhang Fan and director to rotation doctors, must keep the phone silent, and even the family members were cleared. Zhang Fan walks in front of a group of people. The director and deputy director step back and follow Zhang Fan on rounds.

"Antibiotics have been used for several days. It's over time. Is the patient still having a fever? Have you reviewed the blood routine? " Zhang Fan looked at the doctor's number and medical records. His face was bad.

"Don't stop!" The director of the Department was directly angry and snapped at the bedside doctor.

"Clinical pharmacists enter surgery this month. Please pay attention to the medication in surgery." Zhang Fan gave instructions to the director of the pharmacy department.

"OK!" The officer quickly took out his notebook and recorded it. Just one sentence, but it must be

recorded. This is attitude.

The boss of oil came to Dahua's company early in the morning. As a result, Zhang Fan's phone was open and no one answered.

"Is it reliable or not? People's patients can't wait. If they can't solve it today, they'll leave. Don't hurt me!" Lao Wang is really worried.

"Let's go and fly tea directly. Monday's hospital is very busy, I know. " Zhang Fan didn't answer the phone. Boss Dahua probably knew some reasons. In order to cooperate, he took president Wang and killed Cha Su directly.

"Does Zhang Yuan have any hobbies?" On the plane, Wang always chatted with the boss of Dahua.

"It's a good person to deal with. As for hobbies, I really don't know."

"Hi!" There's no way to talk.

At the airport, the boss of the tea vegetable oil company has arrived at the airport and is waiting for the big boss.

"Are you familiar with tea vegetable hospital?" On the bus, President Wang asked the tea manager in the front row.

"Very familiar. The director of logistics in their hospital has a good relationship with me."

As soon as he heard that he was just a logistics director, it was estimated that his face was not big enough. He asked, "which hospital does the company put its physical examination in?" In front of his subordinates, President Wang is the evil spirit directly.

"Well! In Xiaojian physical examination hospital. "

"Isn't this nonsense? Is the health of thousands of employees such a trifle? How did you do it, ah! Don't want to do it, don't want to do it. Say it earlier, there are people who want to do it,..." "The evil fire in the past two days finally broke out.

The area manager on the front passenger's seat and the bald head cleaned up began to leak oil. Beans are big beads of sweat, ticking.

"I'll review, I'll review, boss, don't be angry. I'll arrange it now and let the company's physical examination be put in the municipal hospital."

"Later?" President Wang's eyes are as round as an ox's eye. The regional boss is really unlucky today. This is a pure disaster. When did the boss of such a large company worry about such a small thing!

"No! no I'll arrange for the staff to have another physical examination in the municipal hospital. " Although I don't know why, they are all smart people. They are obedient and listen to the sound. It is estimated that they have a demand from the tea element city hospital.

"Call and arrange now, and immediately send someone to the municipal hospital to sign the contract. It must be a comprehensive physical examination and how to come. See? "

"I see, I see. Boss, I'll arrange it right away. " The regional boss's shoes were full of sweat, and his hands holding the phone began to tremble.

"Zhang Yuan, ha ha, I finally got through to you. I'm Dahua

My father is fine, ha ha, thanks to you. Now you can play taijiquan in the yard. I'll go to the tea vegetable city hospital right now. Ha ha, it's a small matter to occupy your time! " The boss of Dahua here keeps calling Zhang Fan.

Finally, because Zhang Fan's phone kept flashing in his white coat pocket, he was reminded by the head nurse.

Chapter 502

The physical examination of the company's employees is a stepping stone. The boss of Dahua is a bridge. President Wang seems to have less confidence. He can't just stretch his neck and let people chop. He is also a little prepared.

"Secretary Chen, are you busy? Hi, the company has something to do. I've come to tea vegetable. Ha ha, just eat. Talk to me about something if it's convenient.

A small matter is a small cadre at the deputy section level. He is a little grumpy. " It is estimated that the other party is the Secretary of which unit. President Wang is very polite to call.

People who can have some future in their official career are not stupid. They will never stand out for others without asking clearly.

"Even a little assistant to the president of the municipal hospital doesn't do anything. I'm more face when you come, ha ha!" President Wang called and waited for about a few minutes. The other party may have inquired about the dean's assistant.

When President Wang was getting impatient, the other party spoke on the phone: "Hey, my brother, don't hurt me! Although he is a deputy. The cards are much bigger than me.

It's not a brother's excuse. Really, you don't know the situation. You should talk well with others. "

President Wang already knows that Zhang Fan's medical level is very high. He has long been ready to talk well, but he still has to pretend on the phone!

"He's a little fart deputy. I'll give him a face!"

"Oh, my brother, people can really catch your face. Let me tell you. I just went to the personnel department and asked. Do you know what they came from?"

"What's the origin?"

"The top ten outstanding youths of tea have made contributions to rescue and disaster relief and have been commended. I won't say these two awards. You know the weight. They went directly to the deputy office after less than two years of work, and it was specially approved by our secretary.

It will be passed by a unanimous vote at the government meeting. Think about it. Don't be impulsive. Say something well. Brother, I'm done here. You can weigh it yourself! "

"Well~ Why are you so fierce! " After hanging up the phone, Mr. Wang directly gave up the idea of looking for someone to put pressure on him. "It's ridiculous. A little doctor is like a hedgehog. Hey!"

The boss of Dahua and President Wang went to the hospital. The director of the medical department personally received them. Regardless of others, the physical examination of thousands of people were big customers.

Hospitals love to do physical examination. They have little technical content and make money.

Chatting around, I was looking for Zhang Yuan! The director of the medical office was definitely the dean's bag. Within a few minutes, the director of the medical office reported it.

"Find the door!" Ouyang suddenly stood up and took off his reading glasses. "How many of them are there, people from the government?"

"No, just the boss of the oil system and the boss of Dahua. People without a government. "

"Oh!" Ouyang sat down again, thought about it, and said to the director of the medical office, "contact Zhang Fan and let him come to my office."

"OK." The director of the medical department took the internal landline and began to call the Department. On Monday, doctors like Zhang Fan couldn't get through on their mobile phone.

After a while, Zhang Fan came to the hospital office. The director of the medical office was busy pouring tea and water for Zhang Fan. "Do you know what the patient is? Why did they all catch up with the door?"

"I'm not very clear. They didn't introduce me at that time. They just said what important customers should be responsible for." Zhang Fan sat on the sofa and explained to Ouyang.

"It's strange that if they were the leaders within the system, the government would come forward. Yesterday was just a matchmaker for the health system. Who is it? "

"Just ask!" Zhang Fan said after drinking a sip of tea. He spoke during the ward round in the morning. Now his mouth is dry.

Ouyang didn't speak, but he rolled his eyes at Zhang Fan. "Zhang Yuan, it's best to understand this situation in advance, otherwise the situation is unknown, and we will be more passive." Ouyang can roll his eyes, but the director of the medical office can't. He explains to Zhang Fan with a smile.

"Ah! What trouble!" Zhang Fan didn't say anything, but his expression was very obvious and his face was impatient.

"Procrastination is not a thing. Arrange them to go to the small conference room. I'll meet them. You go with me." Ouyang said to Zhang Fan after explaining to the director of the medical office.

"I won't go. Just do what you tell me." Zhang Fan said to Ouyang with a smile.

"It's not appropriate not to ask you to have an operation by name. Let's go. Do what you can. If you can't, what can he do to me?" Ouyang got up, cleaned up his white coat and went out with Zhang Fan.

"Oh, President Ouyang and president Zhang, I'm really sorry to bother you today." Boss Dahua stood up and walked quickly to Ouyang and Zhang Fan with a smile. Before the man arrived, his hands extended to Ouyang early.

"How is the old leader recovering?" Ouyang smiled and shook the hand of boss Dahua.

"Thanks to Zhang Yuan, he is recovering well now. He often says he wants to come to tea vegetable and see his former colleagues!" With boss Dahua as the lubricant, the scene was not very embarrassing.

"President Ouyang, Zhang Yuan, I'm really sorry. I apologized to you. I had a bad attitude yesterday. I was also worried and angry. I'm really sorry. Today I came with a pious heart. Please don't mind. "

"It's okay. It's all for business. It's understandable. What kind of patient makes president Wang pay so much attention. " With Ouyang, Zhang Fan doesn't have to say anything. He was listening, watching and imitating.

"Hi, I'm a leader of XX country. It is an important customer of our petroleum and chemical industry... "

"Oh, he doesn't think the bird market is far away, so come to tea vegetable. Tea vegetable is not far from their place. I know. We had sex with them in those years!" Ouyang is clear about things in this area.

"He wanted to come too, but he dared not leave his territory. So I had to ask for our door. Superior leaders also pay more attention to it. "

"Oh, so it is." Ouyang's index finger tapped the table slowly like a percussion" Zhang Yuan, do you think this operation is difficult? " Ouyang turned to look at Zhang Fan and squeezed his triangular eyes three times.

Zhang Fan instantly understood Ouyang's meaning.

"It's difficult, and it's not small. The tumor of this operation is near the hepatic hilum. This place is full of large blood vessels. A little carelessness is a loss of both human and financial resources. I dare say that few people in the frontier dare to take over this operation. "

While talking, he looked at Ouyang. Ouyang's face was expressionless, but the corners of his eyes trembled a little. Zhang Fan knew at a glance that he was right.

"However, I have done this kind of operation. The father of boss Dahua, that is, the old leader of our tea plant, is 80 years old. His operation is very similar to this operation, and his recovery is OK."

With that, Zhang Fan looked at Ouyang again, and the corners of Ouyang's mouth turned up.

Chapter 503

Ouyang's meaning of squeezing his eyes is also very clear. If he refuses the operation, Zhang Fan doesn't have to speak. The old lady will settle them by herself. Now squeeze his eyes and let Zhang speak. The reason is very clear. First say the difficulty and difficulty, and then boast about herself.

As soon as Zhang Fan finished, regardless of the general face of the oil king, Ouyang was satisfied, "in fact, speaking, the risk of this operation is really not small, and it's also a foreign VIP. It's really difficult!"

President Wang of PetroChina looked at the boss of Dahua. As a result, the boss of Dahua was like a mud Bodhisattva, affectionate, serious and solemn, especially with his lips closed tightly.

He won't do anything if the matchmaking is successful. To tell the truth, things in the system are so complicated. Even if he is a rich man, the face given by Ouyang still depends on his father's face. As for him, he is really not as good as his retired father's face.

Besides, that point of the contract has not reached the point where he is low-key.

"President Ouyang, it's not easy for our enterprise to go out. I don't know how much it costs, so we must help. Moreover, people are not short of money. There will be enough visiting fees. "

Mr. Wang had no choice. He also saw that he had to talk to the old lady about it.

"Closing the door is a family. Since President Wang asked for the door of our municipal hospital, we certainly won't stand idly by.

But... "Ouyang knocked on the table and stared at President Wang.

"You said, you said, as long as we can do it, it will be the same."

"I heard that frontier oil has assisted Kazakhstan with a modern hospital?"

"Oh, my God, the lion opened his mouth." Mr. Wang almost fainted.

"There is such a thing, but it was because of Hatu oilfield that we assisted a hospital, but in exchange for where our oil family opened a well!"

"Oh, so it is." Anyway, Ouyang is also asking for prices“ In fact, we have built a modern hospital in the free trade zone. It's far from the city. It's absolutely inconvenient for doctors in our hospital to go to and from work. "

"Well, our company can donate several buses in the name of assisting tea vegetarians. Do you think so?"

"Hehe, President Wang is really a big family, big business and rich. It's said that the hospitals of your oil system still have extra operating vehicles, isn't it?"

The bus is only a few dollars, but the price of surgical vehicles is not cheap. President Wang turned pale. "Although the hospital is an oil system, it is not managed by our main business company. They belong to the third industry."

"Can you talk about it? After all, you are a system. Besides, it is also a system. Although I don't know much about cars, I know that they will be depreciated when they are bought and scrapped after a few years. We are not greedy. There are two buses and three surgical vehicles. "

The big mouth of Ouyang's blood basin opened. If there were not many people, Mr. Wang would have liked to slap himself in the face. If he had said it well at the beginning, he might not have had to pay such a big price.

Although he is the general person in charge of a province, the bus will not say, but can he take down a surgical platform car without 2 million? Although it is public money, he doesn't feel bad, but can he negotiate with the people in the headquarters.

Once a negotiation is made, a lot of people will definitely step in for the credit of one person. It was originally a personal first-class merit, maybe it will become a collective first-class merit.

And it's hard to ride a Tiger now. Wang always clenched his teeth and did not speak, thinking about his gains and losses.

Ouyang was not in a hurry, but also said to Zhang Fan, "Zhang Yuan, your elder martial brother has come to tea for such a long time. Why don't your elder martial brother invite your teacher academician Lu to the frontier to have a look? Although our tea is a small place, it can be better in the good natural environment. Look at the uncontaminated sky, how blue and how white the clouds are."

"Er!" Zhang Fan was still watching president Wang gnash his teeth. As a result, Ouyang began to pull the flag.

"Ah! Just, Dean Ouyang, I agree. Just do what you say. However, I said in a dirty remark, "it's no joke that the operation can't be done well and something goes wrong. It's related to the national strategy."

President Wang had to compromise, but his tone began to be tough.

This can frighten Zhang Fan, but it can't frighten Ouyang "Liver cancer surgery, and liver tumor surgery, if you don't trust us, you can ask for another expert.

I dare not promise you this responsibility. I can only say that our doctors have moral standards and professional ethics, and the technology is excellent in the industry.

I'm not talking big. It's hard for you to find such a good doctor when you go out. Why don't you think about it? We still have an important meeting. Excuse me first. " Saying this, the old man stood up and tried to go. Zhang Fan also quickly stood up.

If you want to take Ouyang, general manager Wang's skill still needs some fire.

Seeing that he was going to die, President Wang spoke quickly. He knew that if Ouyang really went out and wanted to talk again, it would be more troublesome.

"I'm a layman. Don't be angry. Just try your best to cure me. When Zhang Yuan sets out, the bus and surgical vehicle are expected to be on the road. "

"That's right!" Ouyang smiled, slowly sat down and said to Zhang Fan, "Zhang Yuan, I know where they are. When I was young, I treated soldiers who clashed with them.

Now the international environment is better, but their local conditions are still very poor. What you need, now say it all at once, or let president Wang prepare them. "

Even if it was settled, Zhang Fan was a little stunned, "why don't you make a list?" Ouyang was deeply afraid of Zhang Fan's carelessness, so he made a special explanation.

"It's all right, Dean. I know." After that, he said to President Wang: "President Wang, since the patients can't go to the hospital and the local conditions are general, this kind of operation is very difficult.

So I'm going to take a medical team. "

"OK, no problem." President Wang finally breathed a sigh of relief. It's better to deal with Zhang Yuan. He was deeply afraid that Zhang Fan would open his mouth to the lion.

"There are a lot of people in this team, at least four doctors and three nurses."

"No problem. They have a private plane."

"All drugs and instruments must be our own, even blood products. These are necessary for the smooth operation."

"No problem."

"Safety, as well as our safety. According to you, it is estimated that the local area is not very safe. How can you guarantee this?" Zhang Fan made a request one by one.

Ouyang nodded slightly on one side, "this boy is practicing. He's a little methodical!"

"Let alone worry about this. We have invested hundreds of millions of funds locally, and the security must pass. We have our own security team over there, all equipped with guns. You don't have to worry about this. If you don't trust me, I can accompany you all the way. "

"That's good! When do you start? "

"The sooner the better."

Zhang Fan looked at Ouyang. "Dean, I have to pick someone."

"OK, go."

Zhang Fan nodded to Mr. Wang and Mr. Dahua and left the office. Seeing that Zhang Fan is so professional, President Wang has much less worry. Finally, he has an eyebrow.

"President Ouyang, I have to contact the relevant departments. With such a huge team and such tight time, some of their procedures still have to be handled."

With that, Mr. Wang and Mr. Dahua also left.

Chapter 504

"Elder martial brother, did you go to the clinic today? Is Professor Zhao Jingjin in tea

"Professor Zhao went to the bird market yesterday and hasn't come back yet. I went to the clinic today. I was oppressed by your old lady Ouyang. Now there are too many patients. Tell me what happened..."

"Well! I'll let the deputy director of general surgery replace you. It's something. Wait until you come to general surgery. "

Zhang Fan got out of the office and began to call "Head nurse, where are you? Take Su Qian and Wang Feng to the general surgery office and call anesthesiologist Cheng Gang. I have something to tell you. Yes, you too. "

After the call, Zhang Fan walked on the road and bowed his head and thought, "who to take? First of all, Lu Ning and Lu Shige have to go. He originally wanted to take Professor Zhao Jingjin, but he wasn't there, but he was old. Zhang Fan gave up Professor Zhao Jingjin after thinking about it."

Walking all the way, Zhang Fan bowed his head and nodded when he met someone who said hello.

"Director Wang, are the doctors there?" After Zhang Fan arrived at the general surgery department, he saw Lao Wang with a group of doctors and nurses on ward rounds.

"Zhang Yuan, what instructions do you have? The doctors are here. The operation is scheduled for the afternoon. Today's round. " After seeing Zhang Fan, director Wang of general surgery came over with a smile. Other doctors looked curiously, but they were not in a position to wait at the door of the ward.

"If you have something to do, call the doctors above the attending level for a small meeting, just a few minutes." Zhang Fan explained, and director Wang didn't ask much.

"OK!"

In the office, all the doctors present here are some qualified doctors above the chief doctor.

"There is a special patient today who needs us to go abroad for surgery." After that, Zhang Fan paused. Although the following doctors didn't speak, they were making eye contact.

"Don't think about good things. It's not far away. It's only a few hundred kilometers away. I don't say everyone should know. Who wants to sign up for director Wang. " Zhang Fan saw everyone smiling and directly told everyone where he was going.

As soon as this was said, many doctors who were eager to try became stable. To tell the truth, people in the mainland of China don't know the surrounding situation, but the doctors of tea vegetable city hospital know too well.

After a while, I heard that someone's relatives were kidnapped and robbed when they went to the next country to do business. Anyway, in terms of public security, it's really not very safe.

"This is not a task, not forced." After that, Zhang Fan said to Director Wang, "director Wang, lend me your office."

"OK, you can use it." With that, Zhang Fan left the office. The doctors in the Department office began to chatter.

"Are you going? This is going abroad for surgery. It's estimated that the bonus will be a lot! "

"This money is easy to earn but not easy to spend. My brother-in-law's brother-in-law's second aunt's nephew went there to do business. He made a lot of money and was almost hacked to death. It is said which side..."

"Well, don't mutter. If you want to go, sign up. If you don't, go round the room quickly." Director Wang knocked on the table and said to the people.

Although there are not many applicants, there are also many. There are five or six doctors. Lao Wang took the list into the office. "Do you want tea?" He looked at Zhang Fan sitting on the sofa as if he were thinking about something, so he asked.

"No more. Does anyone sign up?" Zhang Fan looked at the paper in Lao Wang's hand.

"According to me, what name do you want people to report? Take me and call the bold old Li. We're looking for people to pull the hook. Don't we just go with you!"

"Thank you, director Wang. In your year, what if you and director Li leave the Department and come to a critical patient. If you go around tea, I'll say hello to you directly. " Zhang Fan originally wanted to say that you are not young, but he didn't say it.

"Also, look at the list. Those who can sign up are good. When I first entered the door, Ma Yichen, who you were optimistic about, secretly asked me if I had an operation. I told him. He begged me and said he wanted to go."

Lao Wang said and handed the registration form to Zhang Fan.

"Hehe, isn't it?" Zhang Fan smiled. He has a good sense of Ma Yichen. The young man has eyes, hard work and good talent. He is a good seedling.

Zhang Fan took over the list of applicants. There were five or six applicants, including attending doctors and deputy high school students. Zhang Fan chose people in his heart, not the old, not the young, not the bad character, not the rough operation.

Zhang Fan is not too picky. Going abroad for surgery sounds like Weiguang Zhengda, but this country is not a developed country, and there is no hospital to support it. Once something happens, it will be very difficult.

If Zhang Fan chooses others, he should be responsible for them. Just like his parents, he should worry about eating, drinking and Lazar. If you take it out, you can't bring it back. Don't mention other people's families. Zhang fan can't pass his own level. Therefore, when selecting people, Zhang Fan is very strict.

Before long, Lu Ning came in, "what's the matter? Director Wang is there! " After saying hello, he sat next to Zhang Fan.

"Elder martial brother, there is a..." Zhang Fan said the matter again.

After a little thought, Lu Ning asked, "I have no other problems, just one. Can safety be guaranteed?" He has been to tea for some time and has heard many legendary stories.

"Don't listen to melon eaters. Chinese oil companies are rushing around in black territory, not to mention the place you want to go is next to the border.

Don't worry, it's no big deal. My nephew is from the oil company. He stayed there for more than half a year last year and said nothing. The security team of the oil company is very strong. " Director Wang, after all, is an aboriginal. I know more.

"There's no problem. I'll pack up when I leave."

"It's estimated that we might start in the afternoon!"

"Well, I'll pack it up quickly. I don't have a passport! "

"You don't have to worry about these. Just take a change of clothes. Don't worry about anything else."

"That's good."

Lu Ning left and was busy packing up. The head nurse in the operating room came in with the nurse and anesthesiologist.

Zhang Fan said the matter again, "no problem, count me in." Anesthesiologist Cheng Gang nodded and agreed. He had a single dog, and there was no one to discuss, so he agreed directly.

"Zhang Yuan, can we discuss it with our family?" After Su Qian and Wang Feng looked at each other, Wang Feng said.

"Yes, it's not compulsory. It's voluntary. I think your skills in the operating room are top-notch, just... "

"Zhang Yuan, is it good to go out for surgery?" The head nurse smiled and rubbed her index finger with her thumb and asked Zhang Fan.

"There must be. Don't worry about this."

"Count me in. They are too young. I don't trust them!"

"Well! Aren't you afraid? " Zhang Fan is curious.

"You're not afraid. What am I afraid of? Besides, Zhang Yuan has a horse to top two."

"Just you thief!" Lao Wang smiled and said, head nurse "How can I let go of such a good thing when I live at home. Besides, I'm a little older after all. I can help Zhang Yuan when I go out. Isn't that right? Zhang Yuan, you have a word! "

Chapter 505

"Zhang Yuan, do you lead the team?" Wang Feng, a little nurse, was a little more aggressive. After calling, she and Su Qian entered the office.

"Well, I'll lead the team." Zhang Fan smiled and nodded.

"The two of us sign up. We believe in Zhang Yuan." The little girl flattered Zhang Fan naked. Zhang Fan is embarrassed. The little girl doesn't think Zhang Fan is handsome to flatter.

Between one and two years, the hospital will release one or two nurses. It's hard to say how big cities are, but there are two classes of nurses in small places, one is nurses with staffing and the other is nurses without staffing. To be honest, the competition is very fierce.

With the establishment of nurses, as long as the skills pass, they will be a person. In the future, they will be the preparatory head nurse. If they are excellent in all aspects, they may have the opportunity to enter the senior level of the hospital: the chief nurse.

With the establishment, even if you have peace of mind, the little girl immediately agreed as soon as she heard that Zhang Fan led the team. Who is Zhang Fan? He is the youngest hospital leader. He has a knife in surgery. The nurses in other departments are not clear. The nurses in the operating room know too much. It's a little friendly to follow Zhang Fan abroad this time. Maybe in the future

Surgeons are not enough to go abroad for surgery. In case of blood pressure collapse, there is no internal medicine expert at the critical moment. Zhang Fan really didn't recruit.

After choosing the surgeon and instrument nurse, Zhang Fan left the general surgery department. He was ready to go to the cardiology department. As soon as he went out, Ma Yichen suddenly ran out of the office like a rabbit.

"Zhang Yuan!"

"What's the matter?" Zhang Fan smiled at the young man and asked clearly.

"Are you going to lead the team to surgery?"

"Yes!"

"I want to go too! Take me, be obedient, be sure... "

"I'll take you to the bird market. This time I'm going abroad. It's dangerous. Even this time, you're too young!" Zhang Fan refused without waiting for the young man's guarantee.

"You are not much older than me." The young man muttered to Zhang Fan.

"What?" Zhang Fan walked and turned to ask.

"Nothing. Just take me with you, Zhang Yuan."

"Hey, I didn't see it. You can still play naughty." Zhang fanle, the young man followed Zhang Fan to take the elevator. "If your father agrees, I agree!" Zhang Fan thought that the young man's parents would not agree, so he came to this sentence.

As a result, Ma Yichen immediately took out his mobile phone, "Zhang Yuan, look, look, this is a text message sent by my father."

Zhang Fan looked at the two messages, one long and one short. The long one was ma Yichen's message to his Lao Tzu, and the short one was his Lao Tzu's reply. He said, "follow you, Zhang Yuan, and study hard! The silver card will be sent to you later. It's better to have more money when you go out! "

"Well! Your father has a big heart. "

"You see, Zhang Yuan, my father agreed. Take me with you! Really, I will be obedient and never give you any trouble. " Ma Yichen followed Zhang Fan out of the elevator.

"OK, take you and pack up."

"Yeah!" Ma Yichen jumped and left. Zhang Fan smiled and went to the cardiology department.

"Secretary Ren,..." Zhang Fan then told Ren Li the whole story.

"Well, what line? I think it's better to be a male doctor. After all, it's more convenient for male doctors

to go out."

More than two hours later, Zhang Fan's medical team was established. Zhang Fan took the list to Ouyang's office.

"Dean, look, is this team suitable?"

"Are we done? It's all voluntary. After all, it's no longer domestic. Don't force it. " After receiving Zhang Fan's list, Ouyang looked at Zhang Fan and said.

"No, it's all voluntary."

"Yes, but Ma Yichen, he's a little younger." Ouyang looked at the list and felt that all aspects of the equipment were good. I just think Ma Yichen is a little young.

In fact, Ma Yichen is not a few years younger than Zhang Fan. Because of Zhang Fan's level, everyone ignores Zhang Fan's age.

"Ma Yichen is a good seedling. I think we should pull him out to experience more, just like you experience me. And his father is also very supportive. " Zhang Fan said with a smile, slightly flattering.

"Hehe, you can't count on him. When you go out, you must be careful. No matter what the operation or anything, you must not force it or easily conflict with others.

Once something happens, don't be afraid. Take them to the place of the oil company for the first time. Prepare more surgical instruments and medicinal materials. Be prepared... In a word, safety is the main thing, and everything else is secondary. " The old lady talked endlessly for a long time.

"Hey!" Zhang Fan's heart is warm.

In the operating room, the head nurse with Wang Feng and Su Qian is preparing instruments. There are about 60 or 70 small instruments in a set of surgical instruments. The instruments are different for different operations. Three people took turns to count three times, and prepared two sets.

The anesthesiologist took the note signed by Zhang Fan and Ouyang Shuang to the pharmacy to get the medicine. Ordinary drugs don't matter. This poison (a) anesthetic, let alone the whole bottle out of the hospital, will be recycled to the pharmacy even after use.

When leaving the Department, record the code of drug safety section. When entering the Department, compare the code of safety section again. In the words of anesthesiology department, the dead must see the corpse.

"Why do you want so many drugs this time and take them away from the hospital?" The director of the

pharmacy department took the signature of the dean and the dean's assistant and asked uneasily.

"Zhang Yuan is going to have an operation outside."

"Oh, well, wait a minute. I'll prepare the medicine. " It's said to prepare medicine. In fact, I called to confirm that I went. In the hospital, the control of narcotic drugs (a) is very strict.

The surgeons went home to pack up. After Zhang Fan finished his work, he didn't delay time and hurried home. He wants to tell Shaohua.

After signing in for a souvenir at the meeting in the morning, Shaohua came back by plane. After returning to tea, she didn't go to work. Today, she can have a rest at home.

"Ah! Why are you back? Didn't you have an operation on Monday and today? " Shao Hua applied the mask at home. The lighting of the bird market was so intense in summer that Shao Hua felt that his white face was a little bit toward the direction of Zhang Fan's skin color.

Shao Hua was the only one in the family. The old man and the old lady went to the vegetable market to buy vegetables.

"I'm going to have an operation outside. It's estimated to take two or three days."

"Oh, where are you going? I'll pack your clothes. It won't be a bird market again. I'll decorate you with sunscreen. You should be obedient... "

"Not a bird market, go to the country next door!"

"What?" Shao Hua was going to pack his clothes. He was stunned!

"Go to the next country."

"God, how can you go? Don't they have doctors in their country. What a mess! No, you can't go! Don't go for any money. " Shao Huayi took off the mask on his face and his eyes were red.

"I didn't go alone, but the security team of the oil company took us, and several people have to go to the hospital. All the female nurses in the operating room are going. "

"There are so many doctors in your hospital. Why only let you go? Isn't this bullying?" Shao Hua wept.

Chapter 506

Shaohua cried, crying pear blossom with rain.

Zhang Fanchang has seen that women are made of water. Pull! The flood did it.

"Buzz! Hum! "

"You know, you were pulled up during the mudslide. My heart was pulled together. When I learned that a doctor was trapped in the disaster area, my eyes were full of darkness. I want to fly to the disaster area to see if you are safe.

When our unit arranged people to be volunteers, girls were not allowed to go. I was determined to go. I begged the leaders for a long time before they let me follow the team to the disaster area.

I want to "cough! Cough! Cough! " The old lady's dissatisfied cough came from the kitchen.

"Go and help Zhang Fan clean up. Sometimes, as a man, he can't return. If he returns today, can he return tomorrow? Go, it's all your choice! "

"Yes!" Shao Hua looked pitifully at his father and his lover to pack up.

"I also told huazi, but don't worry about Uncle nagging. After all, you are going abroad. You must be careful and don't try to be strong!"

"Well, good uncle. I'll accompany Shaohua. "

"Go, ah!"

Zhang Fan got up and went to the bedroom to pack clothes with Shaohua " Take this with you. You can take more clothes. If it's cold, you can have clothes and one... "Shaohua said, and Shaohua began to cry again.

Eating the food made by Shaohua's mother, Zhang Fan's throat was like stuffed with eggs. He couldn't swallow it happily.

"Eat more!"

"Eat a bone!"

"Yes!"

Before the meal was finished, Zhang Fan's phone rang. Shao Hua's flustered chopsticks fell on the table.

The old man sighed a long sigh!

Zhang Fanyi, from the hospital office " I'm leaving! "

"I'll see you off!" At this time, Shaohua stopped crying and hurried to the bathroom to wash.

"I'll be right there!" Zhang Fan hung up the phone, carrying the box and quietly waiting for Shaohua.

In a few minutes, Shaohua came out. Although his eyes were a little swollen, he had cleaned them up.

"Dad, mom, I'll send Zhang Fan."

"Well, OK, go. Zhang Fan, be careful on the road. We are all waiting for you at home. "

"OK, uncle and aunt, I'll go."

"Go! Be careful on the road! "

Zhang fan drives the car and holds Shao Hua's hand. The car is on the way to the hospital.

"I'm waiting for you. You must pay attention to your safety. Don't rush to the front of everything. Think of me when things happen."

"OK, I will pay attention."

When Zhang Fan left, Shaohua didn't cry and touched the lips kissed by Shaohua, "go back, I'm in! Don't worry, I will return safely. "

"Well! I'll wait for you! "

In the evening breeze, Shao Hua's black hair blew, and Zhang Fan turned around step by step.

"Go back!"

Chapter 507

It's time to get off work in the evening, but the figure in the medical office of the administrative building is shaking. After Zhang Fan entered the office, the director of the medical office hurried over, "Zhang hospital, let's go to the conference room. People from the government."

"What's the matter?" Zhang Fan asked puzzled.

"I don't know. Several government staff came. The king is always with them. " The medical director doesn't seem to know.

"Oh, is everyone else here?"

"It's all here."

After entering the conference room, President Wang immediately stood up and greeted Zhang Fan.

"This is director Chen sent by the government to assist us." President Wang didn't introduce the other party in detail. The other party didn't seem to want to introduce himself in detail. He looked serious. When Zhang Fan looked at the past, the leading cadre just nodded.

"Good!"

"Hello! Hello! " A small officer tried the microphone and said, "well, everyone is here. Please speak to Director Chen of the foreign affairs office."

The head nurse in the operating room clapped with the two little girls. As a result, he saw that the others were indifferent. The three people hid their hands a little embarrassed.

It's not that others don't give people face. The director who wants to speak has a cold face and doesn't think that someone needs to applaud him.

"Comrades. You are going to go abroad to practice medicine in other countries. I would like to emphasize some disciplinary issues here. 1、 You must obey the orders of your superiors... "

His face was frosty, but he was good. When he asked, he also said a lot of precautions and disposal methods in case of emergencies, "this is a man from the army!" The director of the medical office didn't leave. He took notes next to Zhang Fan. At this time, he whispered in Zhang Fan's ear.

"I don't know!" Zhang Fan once again noticed several people with straight backs, but he didn't pay attention to them. I didn't want to do any special actions, so I didn't care.

After talking for about ten or twenty minutes and explaining some matters, they got up and left the

meeting.

After President Wang got up and sent out of the office, he took the microphone and said, "I'm the team leader and deputy team leader Zhang Yuan. All actions are under the command. I won't talk much. Now let's pack up and start. The bus has come.

Zhang Yuan, can you say something? "

"I won't say anything. You have said everything you should say. Now call those who call. We'll start when we're ready."

Zhang Fan finished and went to the dean's office " Dean! "

"Are you ready?" Ouyang didn't leave the hospital.

"All right!"

"OK, I'll see you off." The old lady and Zhang Fan went out.

Under the hospital administration building, a Koster has stopped at the door. This is an oil system car.

"Bon Voyage!"

"Bon Voyage!" Ouyang stood at the door of the car, shaking hands with the people who were going to leave one by one. This is the first time the hospital has sent doctors abroad. To tell the truth, Ouyang is also nervous. She was a little confused about what was going on next door.

Because just half an hour ago, the Secretary of the government called Ouyang himself.

"Be careful. If you can't, don't force it. I'm waiting for you to go home." Zhang Fan is the last to get on the bus. Ouyang grabbed Zhang Fan's arm and stared at Zhang Fan's face with great strength, but his tone was very soft.

"OK, Dean." Zhang Fan nodded.

The last one to get on the bus was president Wang. Ouyang looked at President Wang and said, "these are the elites of the hospital. I'll give it to you. Be sure to bring it back to me all the way. "

"Don't worry, the next door is not so dangerous." President Wang shook Ouyang's hand and got on the bus.

Here we go! Ouyang stood at the gate of the administration building and didn't leave for a long time.

When the car left the hospital gate, Zhang Fan saw Shaohua. The girl looked pitifully at Koster who came out of the hospital.

Looking for Zhang Fan nervously. She didn't leave and waited at the door.

"Shao Hua! Go back, I'm gone! " Zhang Fan opens the window.

"Do you want to stop? Zhang Yuan. " President Wang looked out of the window with Zhang Fan's voice.

"Let's go!" Zhang Fan hardened his heart and didn't let the car stop. Looking at the girl farther and farther away and the girl chasing the car, Zhang Fan seemed speechless in his throat. He was uncomfortable.

"Mr. Wang, are there any flights now?" Seeing that Zhang Fan was depressed, the head nurse came over from behind, sat next to Zhang Fan, patted the back of Zhang Fan's hand, looked at the girl outside the window, but said to President Wang.

"No more!" Mr. Wang smiled.

"Well, you don't mean to let us make a helicopter. Ouch, it's a foreign meat dish. I've never been in a helicopter except in a small plane in bird city! "

The head nurse adjusted the atmosphere, and the slightly lower air pressure in the car began to rise.

"Head nurse, I heard that the helicopter is very noisy." Wang Feng also participated. After all, they are young people. Curiosity is always greater than the sadness of parting.

"Why don't you drive? Anyway, it's to win glory for the country. Besides, it's not far from Alma!"

"Ha ha!" President Wang looked at the living doctors and nurses, and he was relieved. He was worried that if he continued to be depressed before getting on the plane, someone might turn back.

Alamu, the early capital next door. Let's put it this way. The distance from tea to the bird market is longer than that from tea to Alma, and it takes more than Tianshan to go to the bird market.

Going to Alma is a straight line without any regional changes, because all here belong to a regional belt. In the early years, the full name of here was: Tea Valley!

The blood of Sanxiang's children flowed here.

Later, although this place is not the capital of the next country, it is still a very important city in their

country. There is the largest airport in their country.

The car entered the tea vegetable airport and didn't stop. Koster directly entered the apron " God, come on, take a picture of me. I'm a big leader today! " The head nurse and two nurses were chattering.

"Well, experts, get off and get on the plane." President Wang smiled and clapped his hands.

When everyone got off the bus and looked at the plane in front of them, they were surprised. This plane doesn't look like the plane of any domestic airline. There are no familiar signs on the plane, and the stewardess standing under the hanging ladder are all foreign girls.

"This is the other party's private plane. Special reception for experts. Please! " Mr. Wang smiled and watched everyone get on the plane.

When everyone got on the plane, President Wang finally put his heart in his stomach. Now it's too late even if someone goes back. This trip is really twists and turns.

The plane looks small, it's really small, which is a little bigger than the 30 person plane in the tea flying bird city. However, the nose of the plane in bird city is round, and the nose of this plane is a little sharp. It looks more advanced than any small plane.

Chapter 509

The northwest, the northwest of the whole country of China, can be said to be a really livable place, that is, the tea vegetable valley. In other places, either the altitude is super high or the wind and sand are all over the sky. Once the Spring Festival is over, you can't go out.

Southerners simply can't imagine how terrible the sandstorm here is and how much sand there must be. The well-known lanbian railway can't be forced by cattle. It crosses the desert and the Gobi. It was built by people pulling horses.

Later, the high-speed railway was even more awesome, but in spring, when the wind blows, the awesome train can overturn the sand in the northwest and overturn directly! Imagine how fierce the train was overturned by the wind!

The scenery of alamu is no different from that of tea. The temperature and climate are the same. If you change all the foreign language signs and billboards on the roadside into Chinese characters, it is directly tea.

However, the road here is not good. When Zhang Fan and his family got into an Iveco truck and headed south, they felt that the infrastructure crazy devil was not given in vain.

On the tea vegetable side, the highway is as dense as a spider's web. Driving on the valley plain, you can't see the end at a glance. If there's no traffic police, you can make a tiger.

On the Alma side, not long after coming out of the downtown of Alma, the highway became narrower and narrower. At most, it looked like a provincial highway in China, and the more it faced south, the more bumpy the highway became.

Heading south is towards the mountains. The temperature also slowly began to drop.

"How long will it take?" Zhang Fan asks president Xiang Wang.

"It will take more than three hours. It's estimated that it's dark everywhere. Why don't you squint for a while? Today we'll go to our own base and see the head man tomorrow." President Wang looked at his watch and explained to Zhang Fan.

"Can I sleep here? Your company has a big business. Do you want to save high-speed fees!"

"Hi! My Zhang Yuan, am I a stingy man? This is the best road for others. It's no better than our country. The road was built in the old maozi's time, and now they repair it at ordinary times. "

It was so bumpy that it was getting dark. The two security guards who came with the car, like escorting the car, also took out automatic rifles from their bags.

"Take it easy. It's for deterrence. Generally, there is nothing to do. If there is something to do, light up the gun, and our car is hung with the national flag. Generally, there is no danger. "

President Wang looked at the doctors and nurses in the car and their faces changed. He quickly grabbed the handrail and stood up to explain.

"It's normal, but it's not normal. Pooh! Pooh! Bah, tongyanwuji, tongyanwuji, "it's dark in the car, but it's the head nurse's voice.

For three hours, like a boat in the waves, the bumpy waist was almost free. The men and women who got out of the car held their waist and looked at the huge construction site in front of them.

It's early morning, but the construction site is still brightly lit. Countless incandescent lamps, even searchlights, like what kind of searchlights in prison.

As soon as the kowtow machine came on and off, the sound of drilling pierced the eardrum. A little farther away, rows of simple blue construction sites. Seeing this familiar scene is like going to a construction site in China.

It's just a team of security guards patrolling with guns.

"The conditions here are poor. We'll make do with it, but there's absolutely no problem with safety. Let's rest at ease. Let's go to the leader's tribe tomorrow."

When the goods arrive on the ground, they die. Now even if they sleep in the open air, they have no choice. Fortunately, there is a simple house, no! To tell you the truth, we were really tired. We took a plane and were bumped for more than three hours. We went into the house, washed casually, and went to bed.

The noise of the construction site is like a lullaby. When Zhang Fan woke up, it was already daybreak, and the anesthesiologist in his room was still sleeping with his head covered.

When Zhang Fan opened the door, he saw that President Wang had been inspecting the base with a safety helmet. Zhang Fan looked at his cell phone and there was no signal. The movement of China has really become immovable here.

Wang always took a group of people to point out one by one. When he saw Zhang Fan get up, President Wang seemed to explain to the people around him, and then walked towards Zhang Fan.

"What's up, Zhang Yuan? The conditions here are not good. I didn't have a rest, okay! Hehe, when everyone gets up, we'll start after breakfast. "

"OK, everything is up to you." Zhang Fan smiled. Zhang Fan also belongs to the donkey. It's easy to talk along the hair.

After a while, everyone got up. To tell you the truth, this place can't stay in bed if you want to. It's too noisy. After cleaning up, we started breakfast in a blue simple engineering room connected by three or four rooms.

Chinese breakfast, especially the breakfast of northerners, can't run away anywhere. The pickle pimples are steamed bread. Because it is close to the border, there is no shortage of old godmothers.

After breakfast, they got on the bus and continued to set off. The car is very quiet. The gap was so great that everyone was tired. From private aircraft to simple houses on the construction site. It's the difference between the top of the mountain and the foot of the mountain.

By this time, the car had entered the mountains. The car walked on the winding road in the mountains, with mountain walls on one side and cliffs on the other. It makes people dizzy.

Cross Mountains, really cross mountains. After crossing a mountain range, the scenery in front of me suddenly opened up.

A large flat grassland is paved on the plain like a green carpet, and streams flow slowly on the green grassland like white hada.

Far away, at the top of the gentle slope of the grassland, there is a large white tent. Light blue smoke floated among the tents. Blue sky, green grassland, sheep, riding and grazing girls.

So is paradise.

With the appearance of Zhang Fan's car, a car also appeared in the tent in the distance and greeted Zhang Fan and them.

Chinese people buy their raw materials. After these people have money, they rarely buy Chinese cars. All kinds of pill cars, especially datu Le, are very popular.

"They have come to meet us!" President Wang looked at each other's vehicles and said a word to Zhang Fan.

"Shall we get off?"

"No, they are familiar with our car. I'll show up later. They'll guide us."

Iveco followed Da Tule and headed for the hinterland of the grassland. Getting closer and closer, everyone was surprised when they could really see the tent carefully.

This place is like a tent world, and it is not a simple small tent.

They are super big tents, tents with bases. Rows of tents, with the entry of vehicles, shepherd dogs bark after cars, and more people watch the excitement.

If the people here don't speak, they are actually no different from the herdsmen of tea.

Chapter 510

A greasy red face, a man as strong as a bear, with long hair curled to his shoulders, wearing a suit, then wearing a strange Brown Leather Hat and long riding boots at his feet.

Mr. Wang is also a big man in the northwest. Standing in front of this man, he looks a little weak“ Adasi!
" When the man saw president Wang, he held president Wang in his arms!

Patted each other on the back, "this is the first-class medical team in our country. I spent a lot of effort to invite you."

With that, President Wang said to Zhang Fan, "this is the youngest son of the tribal leader and the future tribal leader. Good brother! "

"Good brother!" The translator kept translating on one side.

After the man let go of President Wang, he smiled at Zhang Fan and said, "distinguished guests from afar, you are the most distinguished guests of our Hatu tribe. Please forgive us for not welcoming, because my father is ill!"

Chattering, with a long tone, Zhang Fan even heard the taste of a song. Translation keeps translating“
It's okay, it's okay, you're welcome. "

"Please! Invite distinguished guests to drink a bowl of horse milk wine in our humble tent! Let's have a little respect for a mouthful of dried meat. "

The young leader led Zhang Fan and them into the largest tent. The tent is magnificent. The foundation is a wooden pile about one meter above the ground. The pile is covered with long wooden strips to form a circular platform.

Climb the steps and enter the tent. Obediently, the first thing you see is a round low table, which can only sit cross legged. It's no problem for hundreds of people to sit in this tent.

Take off your shoes and clean your hands. The plump girl with high cheekbones and red face holds a silver kettle in her hand. Behind the main seat of the tent was a tapestry with crescent buildings.

When they entered the tent, Zhang Fan saw that several people were already present. At first glance, it is not a nation close to China, but a nation close to Europe.

He has a uniform beard, Eagle like eyes, white skin and slightly yellow eyes. After seeing Zhang Fan and

them, the faces of the group didn't look very friendly.

President Wang noticed these people at the first time and looked at the Shaotou people with a little confusion.

"Let me introduce you. These are medical experts from Istanbul.

This is China's medical team. Today, all of you have come from afar. Qing accepts my most sincere intention. " He was very polite, but he felt uncomfortable anyway.

The young leader did not care about the unfriendly eyes of the two sides. Zhang Fan on the Chinese side was just surprised, but Wang was always naked hostile.

Of course, the medical team in Istanbul is not very friendly. Young people take seats. The medical team of China is on the right and the team of Istanbul is on the left.

With the high fives of the young men, a group of girls with veils began to put up with silver knives and forks.

"On behalf of our tribe, my father thanks all the experts and scholars for coming!"

"What's going on?" Zhang Fan looked into the eyes of a group of wolves opposite, looked at President Wang's angry appearance, and asked in a low voice.

"It is estimated that they are experts invited by Turkish national oil company."

In fact, it is also very simple. The oil and gas in TouRen territory attracts neighboring countries like sweet honey.

Tuguo is a strange country. It seems a little yellow to say they are white. It's a little white to say they are yellow, and they are located in the middle of Eurasia. It's a strange country.

Their own country is defined as Europe, but Europeans think they should be Asians. Although the region is relatively special, the medical treatment of this country can not be underestimated. Although the country is not accepted by Europe, people's medical treatment is serious and comes from Europe and America.

The head was ill. He just wanted to invite the Chinese medical team, but I don't know how the news got out. The Turkish oil company also invited their national medical experts.

The leader certainly hopes that experts from all over the world will come. Therefore, of course, I will not refuse the kindness of the Turkish state. And Mr. Wang is a little waxy.

"Oh!" Zhang Fan nodded indifferently. Surgical resection of liver tumors, this thing, let alone Tuguo,

even if their teachers are not as good as Chinese.

Without him, you are familiar.

If you add another central huge tumor to this tumor, only his martial Uncle Wu has succeeded before Zhang Fan. As Wu gets older and older, it is estimated that no one can take it down except Zhang Fan.

The huge tumor surgery in the liver center is very simple to say. It requires too much of doctors to do. The cooperation of eyes, brain and hands is not genius or no system. Don't even think about it.

This thing is really a right and wrong judgment question. If you can do it, you can do it. If you can't do it, you can't do it! What can be done can be done. What can't be done can't be done.

"Brother, I'm not sure. If you give me a bottom, I'll be flustered. Really." President Wang didn't look very good. He originally wanted to expand his business scope after winning the head.

But now, as soon as I heard that the other party was the medical national team of Istanbul, I felt cool in my heart! Now he just wants to keep his original business.

"Calm down!" Zhang Fan looked at the doctor opposite and said a word without expression.

"I can't calm down! It's too late to ask for help now. Hey! It's over. " President Wang didn't expect Zhang Fan either. His hands were clenched into fists and his fingers were blue.

Seeing that President Wang was about to collapse, Zhang Fan said: "at the current medical level, except that my martial uncle may be able to do this kind of operation, it is estimated that it is only me.

None of the elder martial brothers involved in foreign affairs in mordu can do it. He only did small tumors and big tumors. Only my martial uncle and I have successfully done it. "

"Your martial uncle?"

"Academician Wu Mengchao!"

"Well! But the other party..... "

"Nothing, but eat and drink at ease. Since I promised to have the operation, I won't let you down. Put your heart in your stomach. "

Looking at Zhang Fan's expressionless language, President Wang seems to be listening to the Arabian Nights, but I don't know why. His heart doesn't panic, as if he has a backbone.

Maybe it's a broken jar, maybe it's believing Zhang Fan's words. Anyway, the big bowl of milk wine keeps respecting the young people and the experts opposite.

The young leader did not refuse to come, but the experts opposite didn't drink at all. President Wang insisted on letting others drink. He was too enthusiastic. The young leader had to come out and take president Wang back to his seat.

Delicious food was brought up by masked girls like water. With the appearance of the last big dish, the banquet reached a climax.

Chapter 511

To tell the truth, Chinese people's diet is estimated to be among the top three in the world. Chinese taste buds may have been specially made. Once you leave China, to be honest, the food here is really nothing to eat.

Either sheep or cattle, or better than the delicious meat. Zhang Fan estimates that he really has no appetite.

Plates are not expensive, they are all silver tableware. But that's the food. Zhang Fan took the dried beef in his hand and bit it without a bite. It took too much time, and the green tendons on his neck were bitten out.

As the banquet went on, the chef carried up the last big meal, that is, five or six strong men, like sedan chairs, carrying a food that looked like a camel, a golden roasted camel.

"Ah! Meat again. " Zhang Fan was helpless. From beginning to end, except for a plate of little virgin fruit, all the rest was meat.

"Oh, my God! Roast camels, big meal. " The head nurse, who was a little plump, whispered that the head nurse loved to eat and was greedy. Of course, most people who like to eat are cheerful.

Zhang Fan didn't expect much, "isn't it a little bigger? What's the difference between it and roast whole sheep!" Zhang Fan didn't feel special, so he felt big.

Camel, an adult camel, is much more than ordinary horses and cattle. It can directly give people a feeling of meat mountain.

"Zhang Yuan, you don't know. If it's a serious roast camel, it's not particular. You see, you see, the cook began to cut. When he cut it, he will know whether it is an authentic roast camel. "

With the little head nodding, the chef, with the help of his assistant, began to decompose the roasted camel. With a sharp machete and a long blade, he began to cut the camel's abdomen.

It's right here. If this kind of knife appears in the back kitchen of China, it must be thrown out by the exquisite cook. It's too vulgar!

The camel was cut by the cook under the sharp knife light. When the cut surface appeared, the scene between the camel's stomach was like cutting cakes in the frontier.

The roast camel is layered, layer by layer, and there are red and green things sandwiched between meat and meat.

Zhang Fan originally thought he should be able to eat. As a result, he saw the colorful sense of hierarchy in the camel's stomach, and suddenly felt bad!

"Did they give an enema to the camel when they roasted it! This belly of meat looks so strange! " Zhang Fan didn't say everything. He thought the intestines in the camel's stomach hadn't been cleaned up.

"Oh, Zhang Yuan, you don't understand. This is an authentic roast camel. Only a real local tyrant can afford a big meal." The head nurse stared at the camel and didn't move.

No wonder the head nurse is greedy. He usually kills a sheep and gets a roast sheep to entertain guests on the grassland. This etiquette can be regarded as a table. If you kill a cow, it's really an unusual guest.

If you kill a horse, not only the conditions of the owner's house should be very good, but also the identity of the guests should be very noble, otherwise the etiquette will exceed the standard!

If you want a roast camel, you'll definitely go abroad, and only local tyrants with mines at home can entertain people with this dish.

When the price of a sheep is expensive, it's only a thousand RMB. A cow is usually only ten thousand. A horse is between ten and twenty thousand.

And camels, an adult camel costs forty or fifty thousand. If the variety is better, the price will be more expensive.

Moreover, the real cost of roast camels is not camels. An authentic roasted camel must first be a huge adult camel, not a tool camel walking through the desert and the Gobi.

They must eat and drink well and serve big camels since childhood. The meat fiber of camels walking through the desert is too thick to dry.

This kind of camel raised since childhood has the fiber of meat comparable to that of calf. Not to mention that, kill the camel, put aside the camel's belly, clean it up, and put it into the Yellow sheep unique to the grassland.

Yes, it's the very precious yellow sheep. This kind of yellow sheep, apart from others, is said to be able to pass through normal rings. In the European luxury market, the fur of the Yellow sheep can be priced at the same price as the same weight of gold!

After cleaning the camel's belly, first put a layer of red fresh pepper and the unique spices on the grassland, and then put the cleaned and skinned yellow sheep into the camel's belly.

The Yellow sheep is half cooked when it enters the camel's stomach. When the Yellow sheep emits meat fragrance, the cook should apply a layer of honey on the Yellow sheep.

Then put a layer of spices and wild vegetables in the stomach of the Yellow sheep. Continue to put in the neatly packed roast goose or goose.

Geese or geese should put a layer of jam on the surface, usually black currant jam.

Finally, put eggs in the stomach of wild geese or geese, and cook them into semi cooked eggs in sheep soup. Generally, how many dinner guests will put in a few eggs.

This egg is not an ordinary egg. It should be the egg of GADA chicken that can run and fly on the grassland. This kind of egg is slightly smaller than the domestic egg. When the yolk and egg white inside the egg just solidify, it will start the pot.

Tie many small holes in the surface of the egg, and then put it into the abdominal cavity of the wild goose or goose.

Then, the chef roasts camels in a special barn. This dish can't be cooked without five or six professional chefs.

The fruit and wood fireworks from the outside and inside produce a special smell of wood, which slowly immerses into the camel's body.

With the increase of temperature and time, the solid fat in the camel begins to liquefy, and the high-temperature oil is immersed in the Yellow sheep. After the Yellow sheep is soaked in the camel oil, the

oil mixed with the smell of yellow sheep and camel is then immersed in the goose.

Finally, all the flavors are concentrated in the eggs of GADA chicken.

Compared with cattle or horses, camels have much higher fat content, while yellow sheep, running between grasslands, have less fat content and eat very little firewood alone.

The goose is half fat but not thin. The flame of fruit trees in the baking room makes the camel's surface crisp without dry coke, and a higher temperature is formed in the camel's abdominal cavity.

The vaporization of gravy and the boiling of oil. The Yellow sheep and geese inside the camel are half steamed and half fried, while the eggs in the last layer are completely steamed.

This dish is not artificial, only the cost is at least 100000 RMB. Really, I can't afford it without a mine at home, and I'm not allowed to eat it in China!

The cook first took out the gravy from the thrown meat and soaked it into a light yellow egg. With the consent of the young head, each guest put one on his plate. Then, like cutting cakes, began to cut camel meat.

"Distinguished guests, have a taste of our roast camel." As the voice of the young man fell, they began to pick up knives and forks.

Zhang Fan really has a long experience. He still has such a way to eat. Gently cut the egg, and the meat aroma comes with the unique spice flavor of the grassland.

Gently put the egg in your mouth, huh! I can't describe the taste. I really can't describe it. It's so delicious. There is no taste of eggs, but the smell of special fat.

Like camel meat cut into cakes, it has a different taste. The outermost layer, about 45 cm thick, is camel meat, with a slightly charred skin, and the outer layer is a layer of crispness after burning with oil.

The inner layer is yellow sheep. The fat soaked lean mutton is soft and tender after being stuffy and cooked, and melts in the mouth. The inner layer is wild geese, mixed with the smell of camel meat and yellow mutton. The originally very soft wild goose meat can eat a feeling of q-bomb.

Sweet! Smelling the mixed aroma of fruit and wood and meat, it is sweet with a trace of spicy flavor, and there is a unique aftertaste between oil and tenderness.

There was no voice in the big tent. It was all soft chewing.

Chapter 512

Zhang Fan, who didn't expect much food, really ate beautiful. The meat is not fat or greasy, but it has a fat smell. It's very delicious.

In case of delicious food, of course, let go. President Wang doesn't have a good appetite here. He hasn't finished all the eggs on the plate. He has something in mind. He's under great pressure. Of course, his appetite is poor.

However, the teams of doctors on both sides have enjoyed themselves. No matter Zhang Fan here or the doctor in Istanbul opposite, they all ate a happy meal and a round belly.

Because both sides are very confident in their medical skills, there is no pressure. Zhang Fan has no pressure on liver tumor surgery, while the opposite side feels that their technology has no problem rolling over Zhang Fan.

Therefore, only doctors and nurses were happy. Especially Zhang Fan, a mouthful of meat and a mouthful of leather teeth, outside! It's delicious. Delicious food can make people feel happy.

Originally, I felt a little uncomfortable and disappeared in the head's Gourmet reception. The smooth and tender delicacy exploded between the taste buds, and Zhang Fan's food was particularly sweet.

President Wang, who had something in mind, looked at Zhang Fan's eating appearance and didn't feel saliva in his mouth. Therefore, this person should still be with people with good appetite. At least, his meals are sweet.

In a larger tent not far from the grassland, a fat old man lay on the soft wolf skin against the quilt. The weather on the grassland is like this. It's very hot during the day, and the temperature can make people shiver at night.

That is to say, after surviving the cold winter at minus 20 degrees, he froze to death at more than ten degrees above zero in midsummer. The night here is not covered with thick quilts. I think I'll catch a cold at night.

Although the old man is fat, he doesn't look well. There was a trace of waxy yellow in the ashes. The trigger made of gold can be used as a child's collar. The fat body and the head are like falling directly into the chest. It's too fat to see the neck.

If it weren't for the necklace made of ruby and sapphire hanging on his chest, I really couldn't see that

he was a man with a neck.

Yes, he is the head of the territory. In his early years, he was also a Pianpian young man. He rode a horse, carried a gun, worked as an old maozi, became a roller coaster king, walked through smuggling, sold (a) drugs, and called the armed police of Banhua National University.

With the excavation of natural gas, oil and non-ferrous metals, the horse bandits changed into resource tycoons. There are deposits in Swiss banks and real estate in Europe. If it hadn't been for the jump in his early years, he would have gone to the prosperous metropolis to provide for the elderly.

However, where there is money, there are gentle villages. On the grassland, there are only a few people. As for enjoyment, he lacks nothing. There are white, black, coffee, meatball, old maozi, and even the beauty of rest in Bangzi.

The doctrines and beliefs of this race are strange. Their doctrines and beliefs of this race were not accepted by other people of the same faith in the early years.

They are too casual. They have something to do. When they remember, they pray and worship. They can't remember what to do. They drink, eat meat and smoke hemp. Anyway, there is little difference between having faith and not having faith.

Instead, they marry a wife. They follow the doctrine very much. Ningduo is a lot of money. What's delicious, what to eat, what to stimulate and what to play. Wine is not good wine. What Lafite, what vogat, there is no good wine in the world that he has never drunk.

In addition, his diet is biased towards meat. In recent years, he has completely changed from an owl to a pregnant fat pig by selling oil and gas to China.

The body was blown up like a balloon. Now he estimates that only a heavy nag can carry it, but according to his current value, he doesn't have to ride a horse to carry a gun.

Eat and drink hard. For several years, alcohol and fat eroded the liver. Kneeling opposite him was a doctor from alamu, the private doctor of their family.

"Doctor, do you think I should ask Istanbul doctors to operate on me or Chinese doctors to operate on me. Is there any way to see their medical skills? "

"Dear leader. You are an eagle in the sky. You should have a way in mind. " The doctor is a general practitioner. He can do everything, but he is not very proficient in anything, and what he is best at is Zhuang (a) Yang.

He won't say anything decisive. It's not that he has an operation. Isn't there still a few heads when the old man dies? Anyway, he can make money. As for others, he's the most advice. Don't even think about it if you want him to say decisive words.

"Hehe, doctor, don't worry. I knew you when I was riding and carrying a gun. Anyway, I trust you most. You are my best friend, aren't you! You'd better talk about how to see their level. "

The leader smiled. His peers are enemies. How can he not understand.

"If you want to see their surgical level, it's not impossible. Since they are surgeons, find similar surgeries and let them do it. In this way, it is estimated that their surgical level is high or low. "

"Good idea! Then please look for similar patients! "

A layman and two knives were chosen by two people in an unreliable way.

There are many herdsmen in the territory of the leader. Herdsmen used to take grazing as a means of survival, but now it has become a kind of life. Because of money, the population has grown more and more in decades.

More people, more sick people. Because he is far away from the city, a general practitioner with two knives can only do minor surgery, but his position here is still very good.

While Zhang Fan and his family were eating, the doctor began to collect patients.

"Doctor, I have a stomachache!"

"Let me touch it. You have appendicitis. Have an operation tomorrow!"

"Doctor, I also have a stomachache."

"Well, you have cholecystitis. Have an operation tomorrow."

"Doctor, I also have a stomachache."

"Well, you should have a baby. Take out the baby tomorrow!"

For a time, the doctor gathered many patients. On the grassland far from the city, the doctor's status is really high, and the herdsmen believe his words. According to the Chinese people make complaints about it: it is friendship that is cured.

The sick herdsman has good medical skills compared with praying for God's gift.

Eat beautiful and full. The head nurse secretly lowered her trousers at the waist.

"Experts, please have a good rest tonight and start the operation tomorrow." After a follower whispered in the young man's ear, the young man said a loud word to the guests.

"We won't operate with them. They can't! " Just as the young leader's voice fell, the leader of the medical team opposite stamble pointed contemptuously at Zhang Fan and impolitely pointed at Zhang Fan with his fingers.

"What do you mean, it looks like you're swearing?" Zhang Fan didn't understand, so he looked at his interpreter.

"He said he would not operate with us. He said, "our technology is not good."

"Hey! He is shameless. " Zhang Fan smiled. The decision on the operation is not in the hands of the doctor. But this is a foreign country. It can't be pointed at by the nose without talking.

"Tell him whether it's OK or not depends on who's loud. If it depends on a loud bull roaring outside, it's estimated that the medical skill is the highest."

The translator stood up and said rude words!

"Hehe, have a rest first and have a good rest. Take it easy. You are all the most distinguished guests in our territory! "

The young man smiled indifferently. He has too many brothers. Apart from the old man, he is the one who most wants his father to live a few more years.

Doctors compete with each other, which is what he most wants to see.

Chapter 513

After a night's banquet, President Wang drank too much in a depressed mood. Holding Zhang Fan's hand, I had to get Zhang Fan a VIP card common to the national oil system. Zhang Fan doesn't want to refuse, but what does president Wang mean by holding a credit card of China Construction Bank ~!

In the early morning, when the sky slowly turned from dark to red, then white to blue, the long tone of distance and proximity, accompanied by horses hissing, cattle barking and dogs barking, broke the tranquility on the grassland.

Zhang Fan got up in the morning, just drank some tea and ate a few mouthfuls.

There are no steamed bread and noodles in the pasture. The most are milk tea, butter tea and milk. As

long as Zhang Fan had surgery, he didn't dare to eat and drink dairy products. Zhang Fan's habit began to slowly affect the surgical colleagues of tea vegetable hospital.

"My dear distinguished guest, the patients are already suffering. Please use your magic medicine to save our poor patients from their pain!"

The young people on the grassland always talk as melodious and pleasant as singing. Of course, you're polite, but as for others, it's hard to say. You can do whatever you want. It's not vague at all.

Zhang Fan didn't expect him to do anything. There's no politeness in the adult world. When they went out, Zhang Fan put on their white coats neatly.

Tidy and smooth the folds on the white coat and go out!

The young herders and girls holding grass around are not only them, but also horses, grazing cattle and sheep are curious to look at these people in white coats.

Hold your head high. In the breeze, the hem of the white coat flutters slowly with the wind. The doctor and nurse went out facing the rising sun on the grassland.

Zhang Fan took his team and followed the Shaotou people to the operation platform car on the grassland.

Probably because they live by water, all the facilities on the grassland seem to be movable. And there are several surgical platforms here. But it seems to be the product of several countries.

"The blue and white one in the middle is from our company! The facilities inside are quite advanced. Zhang Yuan, it's up to you next, please! I'll wait outside for your good news. "

President Wang sent Zhang Fan to the front and back of the car and stopped!

"OK! Rest assured. "

They boarded the operating car, "check all equipment, debug and set our own parameters."

"Yes!" With Zhang Fan's order, doctors and nurses began to check relevant instruments.

"The ventilator is all right!"

"ECG monitoring is normal."

"Shadowless lamp is normal!"

... the reports slowly gathered in Zhang Fan's mind. He doesn't know what surgery to do today and what disease to face.

However, Zhang Fan is sure that today will never be a head surgery.

However, after entering the operating room, Zhang Fan left the rest of the chores behind. No matter who is sent to the operating room today, Zhang Fan will treat them equally. This is the bottom line of a doctor and the most basic professional quality.

It didn't take long. When Zhang Fan and his colleagues finished checking the equipment, the young man took an aunt to the operating car.

"My friends from the East, she has appendicitis. When it happens, it hurts over and over. Please help her." After that, the little head made an invitation.

At the door of the operation car, he looked at the young man. He thought he was going to operate on the old man today.

"Let's have an examination first. After the examination, we'll determine whether she needs surgery." Zhang Fan said without expression.

Zhang Fan is not surprised at all, but he will not violate medical rules for any leader.

"OK, I'll give it to you next!" As he spoke, the young man got out of the operating car with surprise. He was not surprised at Zhang Fan's words, but because Zhang Fan and the doctor in Istanbul next door said the same.

He felt that the doctors of the two teams were very reliable, more reliable than their own private doctors.

When getting off the bus, the young man turned back and said to Zhang Fan, "my dear guest, there is also a patient with appendicitis next door."

After listening to the translation, Zhang Fan didn't speak, just nodded. Surgery is not a trifle. No matter where you are, as a doctor, you should be responsible for the patient.

Appendicitis is a very famous disease, because there are too many, many of them are famous all over the world. There are not many people in a small place. It's really hard to find some of the same diseases that need surgery at a time.

But it's easier to find appendicitis. Appendicitis, as the name suggests, is appendicitis. Since the 19th century, appendicitis has been mentioned in every book involving general foreigners.

In medical college, in animal experiment class, most of the students' first surgery is appendectomy. This also shows that there are many such diseases. And the operation is not difficult.

As long as appendicitis can be diagnosed, according to the current medical level, it is estimated that a surgeon can win the operation.

However, the diagnosis of this disease is troublesome. Even the dentist would know the typical appendicitis with milch's point tenderness. But if you encounter atypical, you'll be in trouble.

Because this thing can't be checked. X-ray can not be developed, color Doppler ultrasound may not be able to diagnose, and blood drawing may not see the increase of leukocytes.

We can only rely on the doctor's physical examination and then laparotomy. Only when we see the inflamed appendicitis can we make a diagnosis, so God has mercy on human beings.

When medical students encounter the first operation in their career as doctors, they focus on physical examination rather than treatment.

Appendix, many people have never heard of it, and they don't know what it is. In popular words, the appendix is just where the small intestine is connected with the large intestine. In addition, there is a small intestine. This intestine has only import and no export. It can be regarded as a dog in the intestine.

It can also be understood that when the small intestine derived from the large intestine, it evolved two organs, one is the large intestine and the other is the appendix.

There are vessels and appendixes in the large intestine, such as arteries and veins, lymphatic vessels and mesentery. Large and small intestines, with a layer of wear-resistant and greasy coat outside, as well as the appendix.

This coat is to prevent the intestines from being worn out when they are coiled with each other. Therefore, sometimes wearing raincoats is not only to prevent vomiting, but also to resist wear.

Moreover, there are secretory cells in the appendix and large intestine. These special secretory cells are very important in herbivores, because the substances secreted by this thing are various enzymes that can decompose crude fibers.

Therefore, the appendix of herbivores such as rabbits is very thick, and the appendix of rabbits is long, thick and smooth. At the beginning, when Zhang Fan did the rabbit appendix without system, he couldn't distinguish the small intestine from the appendix, but he didn't. The two parties were similar.

And the rabbit's appendix is not inflamed.

In the early years, people in Marubeni were very cruel. They thought that children should have their appendix and foreskin removed when they were young. In this way, when they grow up, they will not ask for leave from work because of appendicitis and turtle (a) cephalitis.

So at the beginning, many children in meatball countries had their appendix and chicken foreskin cut off when they had no symptoms.

Later, with the development of science and technology, medical experts found that children who cut off their appendix in their youth love to get sick. Then the study found that the appendix has the function of immunity and mediating the internal environment of the body. It is not a good for nothing cecum leader!

The length of an adult's appendix varies. Generally, it is about two or three centimeters long, but there are also special ones. For example, people who love celery and leeks have thick fibers. It is estimated that the appendix will grow a little longer.

The thickness of the appendix is slightly smaller than his little thumb. This thing hangs at the beginning of the large intestine like the tail of a short tailed rabbit in the human body.

Where is the human appendix? According to the visceral projection on the body surface, the navel is connected to the middle and outer third of the iliac spine. Facing up, its neighbor is the liver. Facing down, it has the small intestine and large intestine.

And because this thing is free at the beginning of the large intestine, it is relatively free. If the large intestine is shorter and the starting part faces upward, the appendix can face upward with the large intestine.

If the large intestine is longer and the starting part is moved down a little, this thing may be free to the pelvis to make friends with the bladder and uterus.

The place of this thing is not very fixed, so we can probably talk about its location, because not everyone's intestines are the same length, and there are no fingerprints in the world, so the location of the appendix is not the cause of the appendix, but the cause of the large intestine!

Because the intestine is not sensitive to cutting pain and burning pain. For example, when eating super spicy food, only the mouth and anus can feel the burning pain of pepper. There is no reaction in the middle of the esophagus and intestines.

However, the gut is very sensitive to involvement and pain. Brother Pingtou bit the anus of the big bison, and it won't take long to put the big bison down.

Is brother Flathead strong? No, it's because the severe pain directly made the bison lose its strength. The same is true for humans, because there is an anti-wear raincoat on the surface of the intestine. This layer of clothes is very thin, with blood vessels, nerves and lymph nodes hanging outside.

After a little inflammation and swelling, it can roll people all over the ground and call mom. When the swelling reaches a certain degree, the raincoat is broken.

Hi! No more pain, okay! In fact, at this time, the symptoms are more serious. It hurts and doesn't kill, but when it doesn't hurt, it may kill.

That's why you can't give painkillers for abdominal pain.

Chapter 514

When the young man left, the interpreter sat in the driving position of the operating vehicle. He couldn't go. He had to be an interpreter.

"Come and lie on the examination table. Let me sit you down first." Zhang Fan said to the strong woman.

"What do they mean, don't they want us to have liver tumor surgery?" The doctor of hepatobiliary surgery with Zhang fanlai is a little reluctant.

"It's all right. I guess it's a test. What we do or don't do has little effect on us. Anyway, I had enough for that meal yesterday. " Lu Ning comforted with a smile. This guy has a great mentality.

"Yes!" The doctor, who was a little unhappy, seems to have this truth.

Fat women are beginning to be examined. The doctor in Istanbul next door is also doing a physical examination.

"Take off your pants a little, then lift up your clothes, expose your abdomen and curl up your legs." Zhang Fan guided the woman to lie on the examination bed.

In fact, air pollution also has the benefits of pollution. At least the ultraviolet ray is not strong. On the

grassland, although the sun is not strong, people who are not used to it will definitely peel the next day without protection. Like a snake molting, pull a large piece.

Herdsmen on the grassland also have unique skills. Take fewer baths and apply more grease. Its own oil is mixed with animal oil, which is really like armor.

However, the taste is too boiling. When the fat woman opened her robe, Zhang Fan was suffocated.

With the shaking robe, the sour smell comes to my face, and the sour smell also carries a Sao smell. If you taste it carefully, there is a trace of milk smell in this Sao smell. Really, the smell is very rich, just like the long haired terentsu.

"Er!" Fortunately, Zhang Fan wore a mask "Slow down, slow down, don't worry, don't incite your clothes. That's it. " Hearing the hiccup of the instrument nurse behind him, Zhang Fan quickly began to help.

Zhang Fanyun had a great method of holding his breath. Just breathe with your mouth and stop using your nose! Well, it feels a little better. But it's just discontinuous. But when he saw the wave of fat, he really couldn't help taking a long breath.

The fat forms the folds of the abdomen. After being washed by sweat in hot weather, the belly forms a black and a white stripe, just like a Zebra Stripe.

Especially near the navel, because a woman is too fat, she used to breathe chest and abdomen. With the change of breath, her flower belly also fluctuates up and down.

There are black dirt in the navel, just like a woman with smoked makeup who just got up after going to bed without taking off her makeup last night. The corner of the eye is covered with dyed black eyes, and its eyes are thick and thick.

"Come on, breathe slowly, relax, relax, don't be nervous." Zhang Fanqiang endured the discomfort in his heart and began to do physical examination.

"Does it hurt?"

"It doesn't hurt very much." The translator doesn't turn his head. He's doing the translation in a stuffy voice. It's estimated that he's talking with his nose.

Zhang Fan's hand is slowly placed on the woman's stomach, as if it were on cotton wool. If you ignore the body temperature, it is really like cotton wool. The fat is very thick. When you press it gently, Zhang Fan's hand is surrounded by the soft fat around. It's warm!

However, in hot weather, it's really uncomfortable to be wrapped by such thick fat and stained with sweat and oil on the belly, just like being forced to eat a few mouthfuls of fat on the pig's tail after being full.

The physical examination of the appendix is to determine whether it is an acute attack of appendicitis, and the second is to determine the location of the appendix.

Because the intestinal tract cannot be pulled, when the hand is pressed on the inflamed and swollen appendix, it will increase the pressure of swelling, increase the force involved, and aggravate the pain. Therefore, which place is the most painful and which place is the location of the appendix.

"Oh! Oh! " Although the woman didn't speak, Zhang Fan knew that he had found the woman's pain point.

"Doctor Zhang, do the operation quickly. It seems that the operation is starting next door. Look, their shadowless light is on." At this time, the translator is worried.

Zhang Fan said that he didn't care, but it would be too shameful if the people in Istanbul next door were to compete.

"I see!" With that, Zhang Fan turned back and said to the anesthesiologist and doctors, "prepare for anesthesia. Acute attack of appendicitis, confirmed. "

"How many anesthetics do you have to take! Too fat! " The anesthesiologist looked at it and said sadly.

"Why, is it difficult?"

"It's not difficult, but I've given too much medicine. I'm worried about an accident."

"Local anesthesia!" Zhang Fan immediately said.

"Local anesthesia?"

"Yes!"

"Zhang Yuan, it's a little..."

"It's all right, local anesthesia! I'm sure. "

With that, Zhang Fan said to his elder martial brother Lu Ning, "elder martial brother, help me pull the hook."

"No problem."

"Lidocaine dilution, disinfection." Speaking, Zhang Fan began to wash his hands. The attending doctor gave the order and the nurses and doctors began to get busy.

"Art experts are brave!" The doctor who didn't come on the stage thought, and there was no ink under his hand.

Tie the female patient tightly with a belt“ I can only help you here. The rest is up to you! " The doctor who didn't appear on the stage looked at Zhang Fan.

Wash hands and disinfect. There is too much grease on the skin. Wiping the iodophor cotton ball on the stomach is like pouring water on a candle. The iodophor liquid has become beads of water, like pearls on black cotton cloth.

Anyone who has studied chemistry in junior high school knows that a clean test tube can't form a stream of water and can't condense into drops of water, and this one's belly is directly polished and waxed.

"Gauze! Wipe! " Chemical disinfection is not good, so we have to wipe it with physics first.

Just like rubbing the back, the doctor who didn't go to the stage wiped the patient's belly with gauze stained with salt water. After a while, the mud pills rubbed down are like Hawthorn pills when he was a child, which is no exaggeration at all.

Finally, the white skin was wiped out by Zhang Fan's colleagues. Milk (a) white milk (a) white. Women who drink milk as water all year round have really white skin.

Looking at the white belly, and the mud balls on the ground, the doctor who didn't have an operation has his mouth.

"What? Take a bath and get a sense of achievement? Why don't you keep this oil ball as a souvenir! " The head nurse rolled her eyes and pushed the dazed doctor.

"Well! Head nurse, will you let me eat? "

Zhang Fan received iodophor and continued to disinfect, "lidocaine."

"Lidocaine dilution!"

With that, the instrument nurse took the lidocaine to Zhang Fan's eyes. After Zhang Fan confirmed it, he

began to dilute it.

"Anesthesia! You can bear it and get an injection. " Because the patient was completely awake, Zhang Fan had to explain it.

At the beginning of the operation, the anesthesia ball enters layer by layer, because it is local anesthesia. At this time, Zhang Fan must be anesthetized layer by layer, or if he goes down with a knife, the patient is estimated to be in pain and shock.

10ml diluted lidocaine was injected. Zhang Fan slowly rubbed the patient's anesthesia point like rubbing dumplings or other round things. I can't imagine what it is. It's very special.

This is to make the anesthesia absorbed as soon as possible.

"Does it hurt?"

"It doesn't hurt, but I can feel you pinching my meat!" Translation, male translators translate women's words, how strange it sounds.

"Knife!"

Chapter 515

Appendicitis, this kind of surgery, can be used as the subject of interns' entrance examination in general surgery. If you want to take this level of surgery to consider Zhang Fan's doctors of this level, it will be a bit of a play.

Not only Zhang Fan's side, but also the medical team in Istanbul next door are not very happy. It's really childish that a very famous doctor in the national capital should be considered by others for a small appendix operation.

However, since the patient is on the operating car, the doctors will still try their best to complete the operation. Zhang Fan is a fat aunt and Istanbul is an old man.

I can't say whose operation is more difficult. Anyway, it's just an acute attack of appendicitis.

Acute appendicitis attack, this disease belongs to acute abdomen, and it is also the most common acute abdomen, with many inducements. But there are two main reasons.

One is lymphatic follicular hyperplasia leading to obstruction and infection, while the other is fecal stone obstruction and infection.

What the hell is the lymphatic system? I can't explain it in detail, but you can understand it as a twin sister or brother of blood.

When progenitor cells generate blood cells, they are divided into two categories: one is the so-called red cells, that is, various cells in the blood, and the other is lymphocytes. Red cells can be understood as working cells, such as worker bees in honey powder, while lymphocytes can be regarded as soldier bees.

Why does the appendix proliferate? Why do humans suffer from such cruel appendiceal pain? What causes inflammation of the appendix?

To sum up in one sentence, it is actually war!

Greedy humans never stop trying new foods with strange tastes. For example, all kinds of dirty spicy strips. After eating, there was war from mouth to anus.

"Yo! Blisters on the mouth and swollen gums! My stomach is a little uncomfortable. I want to have diarrhea. Chrysanthemum is uncomfortable and distended! "

In fact, this is a local allergy. Various soldiers in the lymphatic system fight with foreign bodies layer by layer throughout the body. These swollen tissues are the battlefield and corpses of these fighting factors and all kinds of wonderful food.

Once the fighting factors feel that they can't do it, they start to smash the field. Whether it's foreign bodies or the original tissue in the body, they will be attacked by the factors that feel they are going to fail. Once attacked, the body's originally orderly system will collapse.

That's why allergies kill.

Especially the intestines, which are more than ten meters long, fight fiercely and never die! Once the battle begins, the thin intestinal tissue begins to edema.

The intestines in other places are relatively thick and are not afraid of edema, but not the human appendix. Its lumen is too thin. If it is slightly edema, it will be blocked.

When it is blocked, it starts to pull the intestinal mucosa, and then it starts to ache. This is the principle

of appendicitis pain. Swelling is followed by infection. To avoid this disease, as long as you eat less unclean food, you can avoid a 65% chance of triggering.

Surgical instruments and drugs are brought from China. It's very easy, but the operating platform car donated by the oil system is hard to say.

Anyway, it's something of high price and inferior quality, something that deceives people.

"Start!" With the knife in hand, Zhang Fan began the operation. Local anesthesia comes fast and disappears quickly. Moreover, the local anesthesia effect of experts is very good. If you meet a low-level doctor, which patient can't forget this pain in his life.

Dare to use local anesthesia to make the appendix, which one is quite sure of the positioning of the appendix. Zhang Fan must cut the skin and open the covering film to see the appendix.

Otherwise, if you open your stomach and find that you can't find your appendix, the scene will be terrible. Because local anesthesia only anesthetizes the skin to the intestinal wall, the depth and width are not large, that is, the range of more than ten square centimeters.

The intestines are not afraid of cutting, but they are afraid of pulling. Imagine opening the stomach, and the appendix can't be found. The doctor is difficult to ride a tiger at this time.

Anesthesia, too late, the stomach opened, you have to cut off the appendix, the doctor can only roll the intestines, pull it out, see if it's not, insert it, and then pull it out, see if it's not!

With a pull, the patient's abdominal cavity is like a hungry mouse, constantly tearing the patient's intestines. Usually, you can't feel intestines in your abdominal cavity even if you have stomachache.

Pulling at this time can definitely make the patient realize that there are intestines in the stomach. The worst criminal law in the world is estimated to be no more than that.

Therefore, appendectomy, surgery is not difficult, difficult in positioning. Many doctors don't do a detailed physical examination before the operation. During the operation, they are very dogmatic to open the incision at Mai's point.

As a result, the appendix could not be found, and then, just like Popeye pulling the cable, pulled the large intestine out of the stomach and pulled it in. MMP, can't you do a physical examination carefully before the operation! Where is the most painful point of the appendix? I don't count B in my heart. I can only roll.

After the operation, he will exaggerate to others. God, I made a very strange appendix today. It's almost in the pelvic cavity! A good doctor can only say one thing to such people: second goods with educational background and no knowledge!

Zhang Fan determined the position of the appendix early before the operation. Otherwise, he really didn't dare to do an appendix under local anesthesia. Layer by layer anesthesia, Zhang Fan cut the abdominal cavity, of course, also cut it layer by layer.

Open the mouth! The length of the skin, about two or three centimeters, is absolutely no more than four centimeters. Opening the skin, Lu Ning said to Zhang Fan, "is the opening small, or is it extending a little?"

The knife edge is too small. It takes a lot of trouble to put the smallest retractor.

"Wait a minute." Zhang Fan didn't refuse directly, although he was sure that he could find the appendix by opening the abdominal cavity.

Cut the skin and leak fat. The difficulty of this operation is probably the fat. People who have lived in rural areas should know that new year pigs are killed during the new year. When the pig belly is opened, people will use their fingers to measure the thickness of fat on the pig belly.

The fat of two horizontal fingers is estimated to be about 100 kg, and the fat of four horizontal fingers is about 150 kg. The fat layer of Zhang Fan's operation today is too thick, which has long exceeded the thickness of a slap!

The fat under the electric knife was cut. To cut the fat is to open the muscle. At this time, the depth of the knife edge has passed ten centimeters, just like a deep hole.

Zhang fan can't touch the abdominal wall without some strength.

"Head nurse, turn on the shadowless lamp. I can't see it!" It was too deep, and the shadowless lights began to have shadows. Zhang Fan said to the head nurse.

"OK!" The head nurse stood behind Zhang Fan and began to adjust the shadowless lamp across his shoulder. With the swing of his arm, soft things swept the back of Zhang Fan's head.

"Zhang Yuan, will you?"

"OK!"

Peel off the yellow fat, there are light blood filaments in the middle, and the crystal fat particles hang abruptly at the incision like full pomegranates.

The eye hook gently catches the fat. The edge of the knife is too small. It can only reach into Zhang Fan's two fingers. Zhang Fan gently clamps the peritoneum with pliers and pulls out a small pimple.

After entering the two finger zen, he pinched the small pimple in the peritoneum raised by the pliers,

"well, there is no intestinal tube in it! Scalpel. "

The nurse passed the scalpel to Zhang Fan. With a gentle stroke, she didn't have to do anything. The red and swollen appendix is like the little brother of a child of three or four in the morning“ Bang! " With a sound like the sound of opening champagne, the appendix suddenly stood out from the incision!

From the bottom of the cecum, the whole appendix is swollen and congested, really like the cavernous body filled with blood. At the top of the appendix, white pus can be seen because of infection.

"It's all suppurative and liquefied. It's estimated that it may be perforated in a few days. Your positioning is too accurate. There is no extra centimeter! " Lu Ning stared at the appendix, stared at the male appendix, smiled and said to Zhang Fan.

Chapter 516

The red appendix stands in the air!

When the appendix appears, the next thing is too simple. The swollen appendix is like a bloodshot earthworm. Almost all the blood vessels of the intestine walk hidden in the mesentery.

"Pliers!" Zhang Fan took the pliers and began to separate. This kind of operation is too simple. He took the pliers and bit the absorbable thread. Zhang Fan gently inserted the yellow oil coat of the appendix along the outer wall of the appendix.

Just like a master in love walking through a beautiful woman's hair, you must be gentle at this time. Never be reckless. Those who have been in love know that gentle action is a good beginning. If you are rough and rude, you may have to be slapped in the face.

Because there is an artery here. If the artery is compared to a girl, she is a grumpy and muscular sister. If you're a little careless, you'll be knocked over by this girl with pimples.

In the vascular system, the vein is a gentle, graceful and slightly plump sister. She is broad and fat, and likes to be quiet. Even if her actions are rude and break her body, the bleeding is like a stream.

The artery is not good. Once it is not negotiated, it will break people's clothes, which is the flood. The huge pressure can expose the blood without saying, and the girl will flee the scene. It will retract into the abdominal cavity, hide, spit blood through the breach, and the abdominal artery will bleed, which is massive bleeding.

Therefore, a large part of the patients who died after appendectomy fell off due to arterial ligation.

The operation is not big or small. Although the operation is not difficult, Zhang Fan and Lu Ning pay attention to the operation and are not careless because the operation is small. There are too many rollovers in the surgical sewer.

Lu Ning holds Babcock's pliers and holds the appendix. Zhang Fan ties a knot, "scissors!" Taking the scissors from the nurse and cutting off the artery of the appendix is like disarming the appendix.

Cut off the appendix, disinfect, purse suture. Because it was local anesthesia, Zhang Fan moved gently and quickly. After the treatment of the appendix, Zhang Fan explored the root of the appendix again. After there was no bleeding and exudative liquid, he stuffed the cecum into his stomach.

"Stitch!" Suture layer by layer. Finally, only two stitches were sewed on the skin incision.

"Zhang Yuan, the shadowless light next door is off. It is estimated that the operation has been completed! Let's... "The translator is a layman. He thinks whoever does the operation quickly has a high level.

"Our is over."

"How's it going? Does it hurt?" Zhang Fan asked fat aunt.

"It doesn't hurt, but I can feel you pulling my intestines!"

"Don't take a bath these days." As soon as Zhang Fan finished, he felt that this sentence was explained "All right, push it down in a wheelchair. "

The leader watched quietly in a nearby tent. The two operations ended almost at the same time. The patient in Istanbul was carried out under general anesthesia.

Zhang Fan's aunt was pushed out of the wheelchair with a smile.

There are many herdsmen outside. The pace of life on the grassland is very slow. As long as there are no special weather changes, there are still many idle people. Groups of people gathered around the

operating car to gossip.

"Look, look. This is the contrast, this is the difference. After our doctor finished the operation, the patient was not only awake, but also pushed out with a smile. Look at their patients, lying on the operating car, I don't know whether they are alive or dead! "

When the patient was pushed out of the operating car, President Wang started like a literary clown around the young head.

The person in charge of Istanbul estimated that he was also a layman. He also began to slander: "Chinese doctors are estimated to have done half of the surgery. When they see that our doctors are over, they immediately end the surgery, so the patient is sober."

The young man didn't speak and looked at the family doctor of his family with a smile. The doctor nodded and walked to the operating car. He wanted to see the cut appendix.

In the medical industry, there are many jokes about the appendix. In the early years, there were two jokes. One said it was a laparotomy. As a result, the abdominal organs were normal. When you open the abdominal cavity, you can't suture the abdomen again without doing anything. "Then cut off the appendix!"

It sounds like bullying the appendix. There's no way. It doesn't matter who makes it grow up.

The general practitioner with two knives saw two groups of cut appendixes and two patients.

"Their level is very good and they are all excellent doctors. However, although the doctors in China are younger, they seem to be a little better in technology than those in Istanbul."

The so-called Kung Fu is all under the stage. In order to let the family doctor of erbaodao say these words to the young head, President Wang has made great efforts in private.

"I protest that their patients are younger than ours!" People in Istanbul came out directly to protest.

"Our patient is fatter than yours, and she is still a woman. You have nothing to protest against, no, No. " Quarrel king is always afraid.

"Hehe, this operation is the simplest operation, isn't it? In order to reflect fairness, next, we looked for patients of the same age and gender. " The young man smiled.

"The experts I invited are all famous doctors in China. Such behavior is impolite. I protest. If it's endless, then we choose to quit."

The Istanbul team leader was angry. He couldn't be angry because the experts he invited were charged according to the number of operations. He thought he only had one operation, but

"I don't think anyone will refuse \$100000 for an operation. If my father's operation is successful, I will reward the expert team a million dollars! "

President Wang hurried to find Zhang Fan, "100000? million? Dollars? God, a lot of money. Zhang Yuan, a lot of money! Why don't we go back and make enough money here before returning home! "

"Well! Do you think too much? Did you forget the discipline when you came? " Zhang Fan is helpless.

"Why don't you earn the money you can earn at present! This income is not taxable. " Lu Ning smiled and made a round.

"Hehe, we're here with vigour and vitality, so we can't go back disheartened. Since we're here, we'll take the operation!" Zhang Fan saw everyone's fighting spirit, and he no longer threw cold water on it.

"Yes, yes, we must take the head man's operation." President Wang also has a great increase of hope in his heart.

The second operation, gallstone.

It's too simple. There's no accident between the two sides. The operation is over in an hour.

After the operation, the little head organized the doctors to eat. People keep their word and give money very quickly. They had two operations in the morning and took out 200000 yuan in cash.

One hundred thousand surgeries, Zhang Fan, they hope to test several more surgeries. Unfortunately, the young head has said that after the last operation in the afternoon, he will decide which group to operate on his father.

"Ah! If only we could continue to test the appendix and gallbladder! " As soon as the head nurse heard that there was only the last operation in the afternoon, she ended the test and immediately lost her appetite for dinner.

"Hey, hey, hey!" Two little nurses giggled as they ate. This trip is not in vain. Even if you can't get the preparation in the future, a lot of dollars are real in front of you.

They know Zhang Fan very well and won't worry about losing money, so the two little girls probably began to wonder how to spend it back.

"Zhang Yuan, the flag is equal. The level of these people is not low. Not really. Let's just have surgery with them. You can rest assured that as long as the operation is finished, Lao Wang, I will certainly express myself. "

Lao Wang's mood now is to draw water from a pile of buckets. For a while, I felt that Zhang Fan was

powerful, and for a while, I felt that Zhang Fan was not as powerful as the other party. I was very nervous.

Private doctors can buy, but the head and the young can't buy, so Lao Wang has no bottom in his heart.

"Mr. Wang, surgery is not a child's play. It's not negotiable. Let us do it or not. I'm sorry for this ambiguous cooperation. I have to be responsible to me and my colleagues. "

Zhang Fan refused directly. Using a team without a sense of trust to do tumor surgery, isn't it the birthday star hanging? Zhang Fan won't agree at all.

Chapter 517

Zhang Fan refused. President Wang really had no choice. The middle-aged greasy man looked at Zhang Fan bitterly like a little complaining woman " It's not that I don't give you face. Really, surgery is not a child's play. There is no way to discuss this matter. "

Zhang Fan bites to death and doesn't let go.

In the afternoon, after a meal and a short rest, the patient came. The doctors of both teams opened their mouths because the patient was pregnant with two big stomachs.

If we do a good job in general surgery, we may not be able to do a good job in gynecology, and if we do a good job in gynecology, we may not be able to do a good job in obstetrics.

"Maternity!" Ma Yichen directly grew up. He thought he might be on the operating table in the afternoon. As a result, it was pregnant women who were going to have a caesarean section.

"Zhang Fan, we can't force it! Caesarean section is no joke. If it's not done well, it's one corpse and two lives. We can't do evil for money. " Lu Ning was afraid that Zhang Fan would be dazzled by \$1 million and hurried to remind him.

"Hehe, Dr. Lu, you don't know that our Zhang hospital delivered children independently when we were in obstetrics. The director of gynecology liked our Zhang hospital very much. It is said that our Zhang hospital is a flower of gynecology! "

Before Zhang Fan spoke, the head nurse stood up and said to Lu Ning with a smile.

"I think you like dollars too much!" Zhang Fan glanced at the head nurse unhappily.

The nurse quickly put out her tongue and said nothing, but when Zhang Fan turned to look at her mother, she whispered to herself: "who doesn't like dollars!"

"Caesarean section is not a big problem. I'm afraid they have blind pregnancy and birth." Zhang Fan no longer paid attention to the head nurse, but stood in front of the door with Lu Ning and looked at the two pregnant women slowly walking in the middle of the crowd.

Pregnant women and babies are very cared for as long as they are in a normal social group. Especially in the grassland, because of the poor natural environment, herdsmen pay special attention to pregnant women and infants.

"Little younger martial brother, unexpectedly, you can even have a caesarean section! It's still a frontier exerciser! " Lu Ning was filled with emotion. To tell the truth, he had never practiced in obstetrics in the third-class Hospital of Qingniao.

But in the obstetrics of the third class hospital, where can you get the hands of undergraduate interns? The general manager of the hospital, the doctors who have just entered the attending department, the doctors who have just settled in the Department, as well as the doctoral students and graduate students who come to study and are led by the directors and deputy directors, say a bad word. The Internet joke is that you can't get the hands of your undergraduate students.

"Show me the examination during pregnancy." Zhang Fan got out of the car and greeted him. As soon as the doctors in Istanbul saw Zhang Fan coming forward, they hurried out alone and came over.

Zhang Fan looked at the examination results, "don't worry, the examination is appropriate, that is, the fetal position is not correct, and it is more dangerous to have a natural birth." The private doctor of the tribe said to Zhang Fan and the doctor in Istanbul.

"That's good." Although he said yes, Zhang Fan didn't relax at all. He looked at it carefully. After reading it, Zhang Fan didn't find any big problems, and the month came.

"Do you agree to let us have a caesarean section today and take out the child?"

"Yes! You are all big doctors from big countries, and today is a good day. We are all willing to. " The

chattering crowd just chose to translate the words of pregnant women.

"OK, get on the operating car." The pregnant women were taken care of by the tribal doctors yesterday and made prenatal preparations. They are waiting for today's operation.

The doctors in Istanbul didn't take care of Zhang Fan. Of course, Zhang Fan regarded him as air. Colleagues want to die, and the interests involved in these operations are not small. So, there's nothing gentle.

Lu Ning has to get off the stage this time in the operation car on the side of China. Although he is a doctor, he has been in big cities. He really can't get such a large-scale operation. The doctors who came together, except Ma Yichen, who just graduated, would not have obstetric surgery.

Almost all the other doctors can do caesarean section independently. In the past ten years, when the obstetrics department of tea vegetable city hospital had not been divided from the major surgery department, none of them had delivered several children that year.

After obstetrics entered the 20th century, the best era has come. With the vigorous development of medical treatment, the mortality of pregnant women and infants has decreased sharply. Moreover, caesarean section is one of the most common operations in the United States. Americans worship caesarean section more than Chinese. It's hard to say whether it's good or bad.

Inside the operating vehicle, the anesthesiologist began anesthesia. Zhang Fan, they began to prepare for the operation. Although gynecology is divided from surgery, in fact, it is also a discipline of its own.

Not to mention others, on surgical instruments, gynecology has its own special instruments. For example, what cervical dilator, such as what O-line retractor.

Wash your hands, disinfect and start the operation. The operation of caesarean section has more steps than other operations, that is, it is necessary to prepare bioplastics like raincoats to cover the pregnant woman's belly.

Because amniotic fluid will pollute the surgical incision, this raincoat is to protect the incision, so the raincoat has many functions.

However, Zhang fanqian didn't calculate it. He even had to have a caesarean section here. So, he didn't bring this kind of thing!

"Zhang Yuan, what if there is no plastic film?" The deputy chief doctor of hepatobiliary surgery asked Zhang Fan. Today, he is one of Zhang Fan's helpers. He was born in the Department of Pediatrics.

He can do almost routine surgery from head to foot. He can open the skull for intracerebral hemorrhage, open the chrysanthemum to cut hemorrhoids, and he can be a midwife in three critical moments! Routine surgery can't beat him.

"Head nurse, do you have a long incision protector?" After Zhang Fan was called a flower by her, she had no good words for her.

"Yes, yes, Zhang Yuan, I brought it specially!" The head nurse also knew that Zhang Fan had been provoked by his carelessness in front of him, so she didn't dare to tease Zhang Fan again.

"Reluctantly use the protective strip and start the operation." Zhang Fan then started the operation.

There are two kinds of incision for caesarean section. One is the incision from the navel, and the other is the slightly curved transverse incision.

The two kinds of incisions have their own advantages, and the transverse incision is more beautiful and firmer after suture, so the transverse incision is generally used.

Open the skin, cut the muscles, expose the uterus, protect the incision and separate the bladder. The uterus is exposed.

The full month's uterus is like a full blown basketball, and the basketball is full of horizontal blood vessels. With the punches and kicks of children living inside, small pimples will appear on the surface of the uterus from time to time. Just like the alien mother nest in the movie, it keeps wriggling.

Open the uterus with a scalpel. Be careful at this time. If you don't pay attention, maybe the little child in the uterus will come up with his fist or feet to make a few gestures.

Zhang Fan carefully opened a small cut of two centimeters in the uterus, and then used hemostatic forceps to bluntly separate the muscle layer of the uterus bit by bit. At this time, I really dare not use a knife. The little fart child who eats amniotic fluid is unreasonable.

In fact, the postoperative complications of blunt separation and sharp separation are the same. Most of the blunt separation in operation is to prevent sharp tools from hurting other organs.

Gently enter the uterus, "aspirator!" At this time, the amniotic fluid began to flow out. Zhang Fan quickly stuffed his fingers into the uterus to block the baby, and directly began to quickly cut open the uterus with scissors.

When the uterus opened, the little boy's wrinkled face appeared. He was lying in the water pool like an uncle, spitting bubbles. The child soaked in amniotic fluid is super ugly, just like a little old man, and when you look carefully, you can't say that there is fecal green meconium on his head.

Reaching out, Zhang Fan grabbed the child's neck with one hand, stuffed the other hand into his abdominal cavity and dragged his small ass. He completely took out the child with an umbilical cord attached to his belly.

Chapter 518

Pulling out the naked child, Zhang Fan quickly cleaned his mouth and clamped the umbilical cord connecting his mother and baby with pliers. Then stimulate the little boy and let him breathe!

When a child is in the womb, his lungs shrink together like a rag. He does not need to breathe by himself. The oxygen needed by his body is transmitted from his mother through the umbilical cord.

When this passage is clamped, it is necessary to quickly let the little child establish his own breathing cycle. Therefore, if born children don't cry, they generally need to spank the soles or spank, which is to increase external stimulation.

After the child began to cry, Zhang Fan handed over the follow-up to the nurse. Zhang Fan also has to deal with the placenta, close the uterus and close the abdominal cavity. Speaking of this placenta, it's really wonderful.

This thing contains a lot of progesterone. Many thousand year olds like to eat this thing. It is said that it can smooth wrinkles.

"Stitch by stitch, the uterus should be sewn more closely." Zhang Fan explained to the nurse.

At this time, the door of the surgical vehicle was smashed. It was originally an iron gate. With some strength, the sound was particularly loud " Help! Help While translating, the translator looked out and hurriedly said to Zhang Fan, "the nurse in the car next door! What shall we do? "

"Open the door!" Zhang Fan has started to sew the skin, and the operation is over at this time.

"Come on, come on, go and help next door. The pregnant woman next door is bleeding." The white skinned nurse probably fell down too fast, bumped and ran, and her white coat was covered with grass and green juice.

As the nurses ran, the herdsmen who were watching also knew that something was wrong and surrounded them in groups.

"What's the matter? What's the matter?" They asked around the Istanbul nurse.

"Maternal bleeding, get out of the way."

"Get out of the way! Get out of the way." The young man hurried from the crowd. As soon as he heard of the massive bleeding, he quickly dispersed the crowd watching and eating melons.

"Ma Yichen, it's up to you. You can help the nurse do the follow-up work and monitor the baby and maternal." Zhang Fan said to Ma Yichen quickly with a cold face. Maternal bleeding is too dangerous. Zhang Fan is not nervous.

"OK, Zhang Yuan, I see."

"Leave two nurses and the others will follow me." As he spoke, Zhang Fan tore off his disposable surgical suit, reached out and grabbed his white coat. Like brother Ma wearing a windbreaker, he put on his coat and took the people off the bus.

The doctors put on white coats on the operating vehicle in turn as if they were holding guns.

When Zhang Fan got off the bus, President Wang also came to the door of the car: "how's it going, no problem." President Wang looked at Zhang Fan anxiously. His fragile heart really didn't want to hear that Zhang Fan had a problem with them.

"Mother and son are safe!"

"Good!" President Wang clenched his fist and raised it, but looking at the nurses and noisy crowd in Istanbul, the happy look on his face was not exaggerated.

"My friend, please save the pregnant woman next door!" After seeing Zhang Fan, the little head also knew that Zhang Fan had delivered the baby safely, so they rushed over.

"I....." Zhang Fan hasn't spoken yet. President Wang directly interrupted Zhang Fan, "I've heard of massive bleeding. It's very dangerous. Zhang Yuan, are you sure, if you're not sure..." although President Wang didn't explicitly stop it, he kept blinking. How can Zhang Fan not understand.

If today is another competition, Zhang Fan may refuse, but as a doctor, a doctor in a white coat can't stand idly by.

Zhang Fan ignored president Wang's eyes. No wonder he was not in this industry. He didn't understand the doctor's mission.

"Make way, come on! There's no time." Language barrier, surrounded by too many herdsmen.

The young man takes the lead and the trot takes the lead. Zhang Fan and them followed. With a long sigh, President Wang smashed his fist into the palm of his hand and followed Zhang Fan and them.

At a distance of more than 20 meters, Zhang Fan and them ran for only a few seconds.

"My friends, please give it a go. Anyway, you are the most distinguished guests of our tribe. If I can rescue the pregnant woman, I will take out \$20W to thank you. "

Zhang Fan got on the bus, and the young head shouted loudly behind Zhang Fan. Regardless, Zhang Fan took his medical team and got on the bus without looking back.

The herdsmen finally found out what had happened. For a time, more and more people crowded over and bled. They knew too well. Whether animals or people, they have experienced too much.

Maternal relatives cry, anxious. The herdsmen who are a little older in the tribe have knelt on the grassland and began to pray.

From Hu Da to Changsheng Tian, from Changsheng Tian to Amitabha Buddha, it is estimated that they have asked for all the God Buddhas in the sky.

The tense atmosphere raised people's adrenaline a lot, especially the translator who had never experienced life and death. Although his hands trembled, he was very excited.

"What's going on?" Zhang Fan pedaled his car to change his clothes, and his mouth didn't stop.

"Amniotic fluid embolism, uterine bleeding! The blood pressure is no longer visible. " When the other doctor saw Zhang Fan, his eyes lit up as if he had seen the Savior.

"Translator Li, if I say one word now, you can say it to them loudly."

"Yes!" The slightly trembling translator Li looked at the doctor who wiped the blood around the pregnant woman and said loudly.

"Help, we don't have an obstetrician, my God!" The doctors in Istanbul really wanted to cry without tears. The doctor they led begged Zhang Fan pitifully.

Amniotic fluid embolism is one of the biggest complications of obstetric mortality. The mortality can often be as high as 80%. The lower the level of hospital, the higher the mortality.

Amniotic fluid is actually the serum infiltrated from the blood vessels of pregnant women.

However, once these sera enter the uterus, they are mixed with a large amount of estrogen, progesterone, various nutrients, as well as fetal meconium and fetal fat.

Therefore, the properties of these sera have changed as soon as they enter the uterus. In other words, you can only go out but not in. In the process of delivery, once amniotic fluid enters the maternal blood circulation, embolism will occur directly.

Can this be avoided? No, so obstetrics is not easy to do. There are many complications. There is no way to prevent them. Only those who encounter water have bad luck.

And a woman, from pregnancy to giving birth to a child, is really wandering back and forth in the gate of hell. If she is unlucky, it may be the separation of yin and Yang.

"Can you handle it now?" Zhang Fan asked quickly.

"No, the patient has been in shock and bleeding..."

"Shut up! Tell them that all the people on the operating vehicle are under my command. "

No one objected. Chinese doctors and Istanbul doctors all stared at Zhang Fan and began to stand by.

"Head nurse, take their nurses and open the venous channel. Prepare for pipe burying. "

"Yes!"

"Anesthesiologist, take over the monitor and prepare for tracheotomy."

"Yes!"

"Tell them to call the crowd to draw blood, prepare blood transfusion, and prepare more than 2000cc."

"Yes!"

When Zhang Fan took over the command, the operating vehicle, which had been a little chaotic, began to become orderly.

Wash hands, disinfect, and quickly put on a white coat. When every minute counts, you can't waste it at all.

Zhang Fan is not sure whether he can rescue him. He is really not sure. Amniotic fluid embolism is very dangerous. Another big bleeding. To tell you the truth, whether you can live or not depends on whether God can open your eyes.

Chapter 519

Embolism is a disease named after the corresponding organ ischemia due to the blockage of blood vessels by fat and thrombosis. The most common fat embolism is a super dangerous disease. This disease is really a race with death at the same time, one more second and one less second, and the outcome is often different.

A doctor who can rescue patients with embolism often has to work in relevant departments of the hospital for at least ten years to make effective rescue measures.

Amniotic fluid embolism is a boss level disease in embolization. Because this embolism is related to the complex components of amniotic fluid, once various hormones and factors enter the circulatory system.

The first is allergy, large-scale allergy, and then because these foreign bodies stimulate the blood vessel wall, the blood vessels begin to shake like cattle avoiding Gadget. This is the spasm of blood vessels. Once spasm occurs, the orderly pulsation of blood vessels becomes disco.

Blood vessels begin to jump, which directly causes the inability of blood to flow smoothly, and then multiple organ ischemia.

As soon as multiple organs are ischemic, the heart begins to beat with more horsepower until heart failure. A series of problems lead to the complete collapse of body functions.

Just like dominoes, if doctors can timely and effectively stop the deterioration of physical function at an early stage, they may be able to correct it. If organ compensation fails and organs begin to fail, there is no way for immortals to come down.

The disease develops not only rapidly, but also violently, just like a flood breaking through a dam.

Zhang Fan quickly put on his surgical suit. The chief surgeon in Istanbul looked at Zhang Fan with gratitude. Although he didn't speak, the gratitude in his eyes can be seen.

He actively gave way to the position of the main knife. At this time, Chinese doctors have taken over the medical team in Istanbul.

"Positive pressure oxygen, direct incision of organs if necessary. Lao Cheng, it's up to you." Zhang Fan and Xiang doctor have begun to explore the uterus, but Zhang Fan must use two things at once. He not only needs surgery, but also presides over the rescue.

The sweat on my forehead has slowly seeped out.

"Elder martial brother, dexamethasone 40mg Direct static push. The intravenous channel was hung with hydrocortisone for intravenous drip maintenance. " The purpose of hormone input is to suppress allergies. Allergies must be suppressed, otherwise there is no need to rescue allergies all over the body, and allergies can kill people.

"Yes!" In medical rescue, after the superior doctor gives instructions, the subordinate doctor or executive doctor must give feedback. If they can hear clearly and do it, they must give feedback at the first time.

"Head nurse, atropine 1mg, add papaverine (a) and inject it intravenously every ten minutes. Take aminophylline in the upper limb channel, 250mg into 25% glucose! "

"Yes!" Although the head nurse usually seems to be flirting around, which is a small means of survival in the workplace, she can become the head nurse in the major operating room of the third class hospital. She is skilled and very agile.

At the critical moment, the patient whose blood pressure can not be measured, this plump woman, the needle enters the blood vessel, and she doesn't say to prick it once more. This is the ability, this is the technology!

"Dextran, dopamine into the pot, 20 drops, walking in the lower limb channel."

"Yes!"

"Hairy anthocyanin C, 0.4mg, 50% sugar, static push!" This is a traditional Chinese medicine extract, which is used to treat heart failure with fast effect and low toxicity.

"Furosemide 40mg, upper limb static push."

"Yes!" This is a diuretic, not only to prevent pulmonary edema, but also to protect kidney failure. Because once the body is ischemic, the body will supply contracted blood directly to the brain, and the kidney is very easy to fail due to ischemia.

Therefore, often, doctors' choices are very difficult. It's too hard to choose! Which organ doesn't matter, liver? Kidney? Or the brain, nothing is unimportant.

"5% sodium bicarbonate 250ml, walking on lower limbs."

"Yes." This is a weak alkaline solution. When the body is ischemic, carbon dioxide will be stored and the pH value in the body will be acidified, resulting in acidosis, that is, electrolyte disorder.

Once this thing is disordered, the internal environment in the body will collapse. The body fluids and circuits of the human body work in a neutral environment. Once there is an acid-base imbalance, there will be a problem. It is important to correct shock, and it is also important to correct the acid-base balance. Often these two brothers enter the door with their front and rear feet.

We must go hand in hand here. There's nothing you can do before me, that is, whether it's respiratory circulation, shock or electrolyte disorder.

Must be corrected at the first time. Once one is not solved, all things are futile, which is the bucket effect of the human body.

"Antibiotics, ornidazole and cefaclor, double, enter in large doses." Amniotic fluid not only has nutrition, but also bacteria. For the first time, there was no need to suppress antibiotics. When the shock, circulation and electrolyte were solved, looking back, the infection occurred, and then the body collapsed again.

Really, amniotic fluid embolism is ridiculous.

Zhang Fan, while loudly giving oral medical advice, hurried to the doctor to explore the uterus in the abdominal cavity.

At this time, there was only one voice in the operating car, that is Zhang Fan, the main knife.

The doctors and nurses in Istanbul went out for three or four, and they called the herdsmen for blood test. The chief surgeon looked at Zhang Fan blankly and listened to words he didn't understand.

There was regret in his eyes. Doctors, no doctor wants his patients to die unexpectedly. Otherwise, he will never be able to assume the name of doctor.

That is, the incidence of amniotic fluid embolism is very low. Otherwise, the number of humans would never be so high. Many doctors have worked in obstetrics all their lives and may not meet them once.

However, if it happens once, it will be unforgettable forever. The chief surgeon in Istanbul is a professor in the hepatobiliary Department of their national hospital. At this time, he had long regretted death, but there was no regret medicine in the world.

Fortunately, the amniotic fluid embolism occurred when the child had been taken out, otherwise the risk would be doubled.

When the drug was injected into the patient, Zhang Fan also started hysterectomy. The bleeding can no longer be controlled. Although the patient has entered a state of shock, the uterus must be removed at the first time to achieve complete hemostasis.

According to the current medical statistics report, about 1600 pregnant women die every day in the

world, of which about 500 die from massive bleeding.

Amniotic fluid embolism is uncommon, but postpartum hemorrhage is too common. Now the patient's body is in an ischemic state. Zhang Fan must perform hysterectomy quickly and as far as possible without bleeding in order to save the patient's life.

"O vicho line, turn back and shorten the line!" Zhang Fan said to the instrument nurse for the first time.

Although the uterus should be removed, because of caesarean section, the uterus must be closed first to reduce the bleeding before hysterectomy.

Zhang Fan took the nurse's needle holder and began to sew quickly. At this time, there is no need to suture layer by layer. As a requirement, we must suture quickly and firmly to stop bleeding at the first time.

Chapter 520

At this time, the suture, just like sewing a pocket, opened and closed, and worked very hard. With Zhang Fan's flying steel needle, the suture was pulled to the extreme, and the uterine incision was firmly blocked.

"Well, how about the patient's vital signs." Zhang Fan has to worry about the overall situation of the patient while sewing.

"The heart rate is down and breathing is smooth. Blood pressure 7050mmhg. " The anesthesiologist observed the patient's face and informed Zhang Fan of the patient's vital signs.

"About 100 ml of urine can be seen in the urine bag, and the color is yellow. All venous channels are unobstructed. " After the anesthesiologist reported the situation, the head nurse also began to report.

"To the doctor, prepare to cut the uterus."

"OK, Zhang Yuan."

There's nothing to say at this time. If not, the patient will die. Cutting is fighting for life. Maybe the patient will live after the operation, maybe during the operation

Outside the operating vehicle, the doctors in Istanbul were dejected and silently took blood for testing. How could they be happy when the patient had a problem in their hands.

The herdsmen gathered more and more. Once social groups divide the rich from the poor, there will be

classes. Some herdsmen who are dissatisfied with the leader on weekdays hide in the crowd and start agitating.

"The leader took our women and children and let these foreign doctors practice. Otherwise, why not let tuxun (Tribal doctor) have an operation? We can't let our women and children die innocent. We must punish the murderer!"

With the agitation of the crowd, herdsmen who did not know the truth began to join. Guns are too common in this place. They are as common as fire sticks.

The herdsmen with guns slowly surrounded the doctors and nurses in Istanbul. President Wang, who was already upset, was shocked at this time.

He knows the character of these people too well. He wants to dig his heart out to drink for you in good times and dig your heart out to drink for him in bad times.

"Ah! What did I say about this? Don't go, don't go, don't listen! " He quietly got on the Chinese surgical car.

"Why did you come up. Get down, get down. " Wang Feng's character of little pepper turned his face directly after seeing that President Wang boarded the operating car without changing his shoes.

"Aunt, when do you worry about this. Listen to me. Don't get off the bus later, you know. No matter what happens, don't get out of the car.

How's the woman? Can you get off and talk? " As he spoke, he called.

"I'll send a car to fill it up. Don't cross the mountain and hide on the hillside. Once I send a signal, you can break in directly. Remember, shoot if necessary, okay? Our people are all on two surgical vehicles. "

"What's the matter?" Although Xiao Wang Feng was hot, she was also hot in the operating room. When she heard that, she wanted to shoot. The little girl was stupid.

"Hide quickly. Can this woman talk now. Can you push it down? "

"But Zhang Yuan asked her to stay here and observe. There's no problem talking or anything." The little girl's voice is much lower.

"It's Zhang Yuan. It's all your hairy boy, stubborn donkey Zhang. If we die here, it's all your Zhang Yuan's fault. Find a horn and hide it. Don't come down. Do you hear me? "

As he spoke, he stuffed the baby in the stroller into the maternal lying on the flat car, "hold it! This is your doll. " President Wang has been here for decades and has no problem communicating with them.

Then he pushed the pregnant woman directly to the door of the operating car and opened the door of the operating car.

"Our brothers and friends, our Chinese doctors are excellent. Now you see, big fat boy! You see, women are also good.

Now, your women have to take injections and medicine. You must not be disturbed here. " Mr. Wang shouted loudly holding the flat car and pinched the baby quietly in his hand.

With the cry of the baby, the pregnant woman struggled to hold the child and began to nurse the child. The people who had rushed towards the Chinese surgical vehicle also stopped.

The tribe is not big. Their people can see at a glance that women and children are still alive, and the restless crowd begins to calm down.

At this time, the old man finally appeared.

"What? What are you doing? A ewe's cubing is a matter of near death. Have you seen it now? People have the ability.

Another woman, these doctors are still treating. If you disturb me, I can't spare you if the woman dies. I know who took the lead. Don't think I don't know. Scattered! "

Looking at the woman nursing the child and the old patriarch, the crowd slowly dispersed, but did not go far. Sitting on the grass in groups. Waiting

"What's this called?" The soft King couldn't stand firm. The few shouts he just made exhausted all his courage and strength.

"Mr. Wang, give you gauze. Wipe your sweat. Look at the sweat on your head." Xiao Wang Feng squatted quietly beside president Wang and handed him a piece of white gauze.

"Hide, my aunt, what are you doing out?" President Wang's eyes are almost staring out.

"But I'm afraid something will happen to you!"

"I....." the old official was moved " Don't worry, I'm fine. I'll take you home even if I die. "

"Yes!"

"What should you do? Draw blood. Draw blood quickly." The head man said to the paralyzed doctor in Istanbul.

The restlessness outside the grassland did not affect the doctors in the operating car. Zhang Fan and his family are all bent on the sick, and they can't care about things outside.

After suturing the uterus, Zhang fan starts to remove and remove organs. The first step is always to find the artery first. The artery must be ligated first, because it can't afford to exist.

For a semi fixed organ, the artery walks in the gap or fat around the organ. Fixed organs, arteries will walk in the ligaments of fixed organs. In a word, arteries are not easy to mess with, and they don't mess with. It is usually hidden in a relatively hidden place.

Hysterectomy, pay attention not only to the artery, but also to the ureter. After the uterus takes out the child, it is the same as the bladder with catheterization. Shriveled, but the uterus is hard because of congestion.

The knife light flickers. It's really the knife light flickers. In order to avoid bleeding again, Zhang Fan would rather sew more stitches than let the blood flow out. The blood is too TM precious at this time.

I dare not waste a drop. With the closure of the uterus, the patient's blood pressure rises slowly and his face begins to ruddy.

President Wang, holding the phone in his hand.

The sun in the sky also slowly moved to the West. In the operating room, Zhang Fan's sweat drops. The head nurse couldn't even wipe his sweat. Sweat flowed into Zhang Fan's eyes. He tried to blink his eyes, astringent eyes. I really want to wipe it off!
