

Chapter 5120

Speaking of this, Abren suddenly froze on the spot and murmured:

"That's how it was, from an arrogant communication expert to a sailor who was willing to go to Mexico to work as a coolie..."

Charlie slightly With a smile, asked,

"Brother, which company did you have the job with the highest salary?"

Abren hurriedly said, "It's an old American communication company."

Charlie asked again: "how much is the current market value of that company?"

Abren thought for a while, and said: "A few years ago, the company was very prosperous."

"When the market value was the highest, it exceeded tens of billions of dollars."

"However, as the bubble continued to burst and the performance continued to decline."

"When I was fired, the market value should only be more than one billion."

Charlie nodded and asked him: "How is the foundation of this company?"

Abren said: "The foundation of software and hardware technology is very good,"

"But the reason why it has gone downhill these years is mainly that the market direction has not been found."

"Yes, the person in charge misjudged the development direction of the communication market,"

"And then gradually killed his own to-C end business,"

"And then turned to rely on his old capital to provide hardware equipment and technical support for other communication companies."

Charlie said pleasantly: "That's just right for us. If its business is doing well and its market value is high,"

"It will be difficult for us to take it down, and after we take it down,"

"The to-C business will also involve us a lot. experience,"

"But now that it specializes in hardware equipment and technical support,"

"Isn't it just suitable to serve us? After all, we are not pursuing a new communication company in the world,"

"We just hope to establish our own communication network as soon as possible."

Abren nodded and said: "If it is combined with our situation, it is indeed very suitable."

"We can use many technologies of this company directly,"

"And almost all the rest of this company are scientific researchers."

"Although the market is a mess, But research and development capabilities should not be underestimated."

Charlie said without hesitation: "That's it! Brother, pack up and come back to the United States with me immediately!"

Abren said in surprise: "Back to the United States? Mr. Wade,"

"It's been a few days, and nothing has been sorted out..."

Charlie said: "It is more important to buy your old company as soon as possible."

"After you arrive in the United States, you can go directly to the company's boss and talk about acquisitions."

"Didn't you say that its market value is probably in the early billion dollars?"

"As long as he is willing to sell, I can pay up to two billion dollars."

"As for how much can be negotiated, it depends on your ability, brother."

Abren was dumbfounded, and blurted out: "Mr. Wade...do you really want to buy that company?"

"Yes." Charlie nodded firmly, and said: "Buy it, and let it design the satellite for us."

"Since it has ready-made technology, it should be able to design the satellite in a few months, right?"

"And then It will take a few months to produce, and it will be launched in the first half of next year."

Abren said excitedly: "It doesn't take so long!"

"That company itself is developing communication satellites for many large companies,"

"And both technology and supply chain is important. It is complete."

"If we can successfully acquire them,"

"We only need to make some customized adjustments on the original basis before they can be put into use."

"Within three months at the earliest, we can develop our own according to our needs. Communication satellite."

As he spoke, Abren said again: "If we reserve a launch quota with a commercial launch company now,"

"Our own satellite will be in orbit as soon as this autumn or winter!

Charlie heard this without hesitation and said: "Good! Great!"

"Brother, you are going back to the United States with me this time,"

"You must overcome all difficulties and take this company down!"
