

## Chapter 561

With the development of the information age, things thousands of miles away are also caused by the blink of an eye. Zhang Fan's name came out. He is a leader of the Qiu sect, a disciple of academician Lu Lao, or a closed disciple.

This is amazing. There are few people who wield a hoe to dig Zhang Fan. Old Lu's name is too big.

Zhang fan can't dig, but he can reach the friendship hospital through the tea vegetable hospital.

For a time, Ouyang became a pastry. Hospitals in the capital, magic capital, Jiangsu and Zhejiang, almost wandering in the third echelon of China, have expressed their willingness to pair up.

These hospitals do not seem to be very famous in China, but they are also powerful in the local area, and they are all rich hospitals in rich places in China. Ouyang really copied them.

"Nansanyuan? Ha ha, the second hospital has just become a friendly department with our tea vegetable liver and gallbladder. Once we heard that the color Doppler ultrasound in our hospital is all domestic, we directly got a color Doppler Ultrasound Center for us. "

Especially in hospitals at the same level in a city, they are really more enemies than enemies.

"Oh! It can directly become a friendly hospital with our tea vegetable hospital. I need to ask the superior leaders for instructions. "

It is estimated that the dean of the other party has cursed. What does the matter between hospitals have to do with the leaders!

But there's no way. They are Yangcheng hepatobiliary transfer hospital. Although there are many technologies, they must take down the middle liver tumor resection.

Speaking of the province where Chinese medicine is most popular among the people, we must say that Yangcheng is the province.

Almost every family has a pot that can stew soup and boil medicine. Without speculation, they raise the stew pot and start tonic. What meat is mixed with what herbs, and each family has its own secret recipe.

And everyone also attaches great importance to dispelling fire, stomach fire, liver fire and getting angry. Almost any organ can get angry. All kinds of herbal tea are popular in the market, and the carbonated drinks are losing ground.

It's a drug with three poisons, whether herbal medicine or capsule. In the general survey of diseases in China, the number of patients with liver disease in Yangcheng is the highest in all developed provinces.

Therefore, after learning that Zhang Fan appeared in the hepatobiliary Association, the boss of Yangcheng Hepatobiliary Hospital directly contacted Ouyang.

"There are redundant CT in our hospital, 64 rows." The hospital has extra equipment! The president of Yangcheng Hepatobiliary Hospital probably said it with his teeth clenched.

Ouyang is an expert in his heart. He can use knives against people. Except that he is not good at using knives against people, the rest are master level swordsmen.

The knife is accurate, the knife sees blood, and the other party can't stop. While Ouyang cuts, the old lady has conceived it in her mind.

"After going back, the signs of the hospital will be changed. First, hang a row of yellow gilt signs, such as the capital XX Hospital, the friendship hospital, and the scientific research cooperation unit of the affiliated university." It's fun to think of Ouyang.

The hospital became a friendly hospital in pairs. The other party not only supported the equipment, but also sent doctors to study. All of a sudden, ouyangniu was very angry. As for the traditional Chinese Medicine Hospital of tea element, it is no longer in her consideration.

"How do you want to go in the future?" Seeing that Zhang Fan seemed to have his own ideas, Lu asked.

He really couldn't see through this little disciple. He was able to stand out in orthopedics at the beginning, but in the twinkling of an eye he appeared on the liver and gallbladder again.

"I want to go the way of martial uncle."

After thinking about it, Zhang Fan said with a little embarrassment.

"Go my way? Hehe, what was my era back then and what is my era now? If you rely on a resection of the middle lobe tumor of the liver, it is estimated that... "

Old Wu was surprised at Zhang Fan's answer, but he still had to pour cold water on Zhang Fan.

"Yes, although your martial uncle seems to be the master of the family, the situation in those years is really different from that now.

Nowadays, there are more and more schools of thought to treat the liver. I'm embarrassed to publish papers without talking about biological factor genes.

And do you know how many people your martial uncle helped him, old Tang, old Gu and old Zheng? Who is not a famous person.

If you really follow your martial uncle's path, where can you go to find the Da Na who helps you? "

Old Wu was unlucky when he left school and met

Fortunately, after the end of the campaign, after Wu completed the world-famous operation, he established the leading Hospital of liver and gallbladder in China under the care of his superior leaders.

This hospital has gathered a group of like-minded high-end liver disease doctors, and has become a pivotal role in the field of liver disease all over the world. Stamping your feet can make a sound.

"However, you don't need to go my way again. You should have the ability to conquer your martial brothers and then take over the East." Old Wu looked at Zhang Fan and said.

As soon as these words were said, many martial brothers looked at old Wu and Zhang Fan in surprise. If old Wu didn't attach great importance to Zhang Fan, they would never say such words.

"Ha ha!" Zhang fanlue smiled with embarrassment. Wu thought Zhang Fan couldn't speak well, and then said, "anyway, I've spoken. As long as any of you has the ability, you can compete fairly."

As Wu Lao spoke, he involuntarily performed finger exercises with both hands. Surgeons, especially top surgeons, almost have their own set of hand exercises. As long as they have kung fu, they exercise their finger flexibility.

In fact, Mr. Wu and Mr. Lu mistakenly met Zhang Fan. It's not that Zhang Fan is embarrassed to say, but that Zhang Fan's heart is too big. He wants to establish a Mayo of China and an Mayo of the East.

Zhang Fan is also a man with brains and faces. He has many things to do, but he can't say.

For example, this ideal is a joke when it is not realized. For example, when President Wang is not president Wang, he will never say that he will earn 100 million.

The road ahead must be full of thorns and difficulties. But people who have a system don't work hard.

They really act like systematic people!

The next day, the meeting entered a purely academic discussion, and the leaders of all parties took the stage.

Zhang Fan sat in the meeting and received a lot of contact information at one time. While Zhang Fan was listening to the report.

The fourth elder martial brother came up to Zhang Fan and said, "can you go to the hospital for leave? If not, just resign. Master seems to want you to go to Qingniao. "

"Don't worry, elder martial brother. Why do you have an idea?" Zhang Fan asked with a smile.

The fourth elder martial brother, whose full name is Wu Bing, has a slightly feminine name, but he is a big man in the south. He is much older than Zhang Fan.

After graduation, he worked hard in the hepatobiliary Department of the golden mean hospital and entered the health care group. He also hoped to become the vice president. As a result, he was finally defeated.

This is also a man with a good temper. After losing the election, he went south to the special zone directly with a group of people such as turtles and vice high school who were frustrated in Kyoto.

Although the special zone is young and has no details, people have a lot of money. For a time, Zhang Fan's fourth martial brother and his gang set up a hospital in the special zone, which is also very famous.

"I don't think so. I know I can't dig you, but you have to help me."

"OK, you said, as long as I can do it, I will do my best." Zhang Fan looked at Wu Bing and said.

"Why don't you? I don't like to hear this now. We can't be so polite. Just have you. We'll call then. "

At the end of the meeting, Zhang Fan wanted to keep his master. As a result, the old man was invited to leave by the academic group in the capital. He was in such a hurry that Lu didn't have time to talk to Zhang fanduo and left by plane overnight.

With the end of the meeting, Zhang Fan was invited to give lectures and fly knives. He was really overwhelmed. Ouyang waved his big hand and arranged it yourself, regardless of the hospital schedule, but he had to stay in the hospital for ten days a month.

Ouyang also knows that Zhang Fan is no longer the little doctor who was fooled when he took a pack of cigarettes. Now the only thing that can hold him is friendship.

But Zhang fanxin is very big. He is the only one who knows his ideas. Zhang Fan, who became popular in

the Affiliated Hospital, originally wanted to go back to tea with Ouyang.

As a result, he was retained by other hospitals in the bird market. The provincial doctors in the same city also exist at the top of the bird market. What they mean is that Zhang fan can't favor one over the other.

The first advantage of fame came. Zhang Fan's Throwing Knife cost was directly increased.

## **Chapter 562**

When he was in the Affiliated Hospital, Zhang Fan's Throwing Knife cost was mentioned to the top three in the province because of the game between Zhao Jingjin, other hepatobiliary departments and the president.

Although the price has been raised, there is a feeling that it is not right to name.

But after passing the annual meeting of the hepatobiliary Association, Zhang Fan's worth is different.

It's like an open light or a stationery inlaid with Phnom Penh. After being identified by an authoritative organization, its value doubled.

And there is no need for Zhang Fan to look for himself all over the world. Zhang Fan is invited to call continuously.

Suddenly, like the warm earth in spring, Zhang Fan's phone became popular.

In the hepatobiliary Department of the provincial hospital, two senior attending doctors chatted again.

"Did you go to the annual meeting? I heard that a black horse came out this year, or the black horse in our frontier? "

"I didn't go on duty that day, and neither did you? Throwing knife? Be careful when the director gives you small shoes. People have told you that you must attend the meeting. You still... "

"I can't help it. Mortgage, car loan and children's make-up fees. Hey, I'm almost out of breath. It is said that Zhang Fan of the tea vegetable hospital became the dark horse of the annual meeting? "

"It's not just the dark horse of the annual meeting. Today, the director invited people to our hospital to fly a knife. It's estimated that you didn't fly a knife ten times..."

"Hey!"

"Why sigh? Let's make our little money. Don't be jealous."

"What I sigh is not jealousy of other people's income. You know, Zhang Fan's operation is very powerful!"

"Isn't that nonsense! It's obvious. "

"He said that the tea element came out of orthopedics, and now it is registered in orthopedics!"

Another doctor was stunned. He was really stunned. He looked at his colleagues incredulously, "you drank too much yesterday and didn't wake up today? True or false! "

"Really! My cousin is in the tea vegetable hospital. Tell me yourself. "

"I'll go, cross the border!"

"Who says not? I can see that our peers can't kill us. Those who kill us are all from across the border.

After that, the hepatobiliary department in the frontier will depend on Zhang Fan's face. "

The provincial hospital and the general hospital, Zhang Fan first showed his face in the major hospitals in the border bird city like a tour.

With the addition of teachers, major hospitals attach great importance to Zhang Fan. Obviously, Zhang fan can rely on his talent, but it seems that he has to show off his origin, which is helpless.

At the end of Zhang Fan's itinerant operation, the tea vegetable farm finally couldn't survive. Insolvent and unable to operate.

The assets of the farm are mainly land. As for some large machinery, it is too old and has long been eliminated by the advanced small machinery on the market.

The land of the farm is first purchased and auctioned internally, starting from 50 mu. Although the leaders of the farm have little ability in operation, the asset auction is inclined to the farm workers.

"Mother huazi, do you buy it at home? I think I'm tired of eating in the earth. Why not go to the city directly? You'd better have your own opinion and go to the city early... "

Many workers dare not give up their life savings to gamble. Such a big farm can't be operated, not to mention their own small family.

Shaohua's family is also struggling. Shaohua's mother and Shaohua advocate buying some land. Shaohua's father is in a dilemma for fear of losing money.

Shaohua's mother listened to Shaohua's meaning that she wanted to buy a lot of land and quit her job, so she began to hesitate.

"We are too old to give you any advice and attention. You have to grasp your own life. What does Zhang Fan mean? "

Shaohua's mother took her daughter's hand.

"Zhang Fan came back in the evening. When he came back, I told him in detail that he drove a long distance. I don't trust him to distract him.

Are you willing to let me buy land? "

"Farming is hard work. Don't think it's easy. Moreover, you can use the money we earn freely, but don't spend Zhang Fan's money indiscriminately. After all, you're not married. "

Shaohua's father frowned and specially explained to his girl.

The old man's mind is very clear. He has food and drink, a happy life and a smooth work. He is satisfied. Why bother.

Shao Hua's mother thinks that this is the welfare given to employees by the farm. Why not use this quota? Besides, isn't it better to have more income? Buying land is better than putting money in the bank for interest. As for Shaohua's resignation, she is opposed by 10000.

Zhang Fan ended his trip to the bird market and drove kuluze straight to tea vegetable.

The flying knives of the three hospitals made Zhang Fan's direct income of nearly 100000, more than 100000 in three days, and it was still a fair income. It was very beautiful.

Driving the car and looking out the window, the grassland is particularly beautiful. It's really beautiful! People are in good spirits at happy events. What they say is right.

Zhang Fan gained a lot from this annual meeting of liver and gallbladder. The only flaw is the experience

given to Zhang Fan by his master, which makes Zhang fan depressed.

Master's manuscript is too obscure to understand. It is said that there are old Qiu's class notes and the medical experience of old Qiu and the leaders of Qiu sect, which Lu Ning told Zhang Fan.

When Zhang Fanxing opened it, he looked confused. The manuscript was like a heavenly script. Even if there were many cursive Chinese characters, there were large sections of English, even if it was English. But it's better if you write correctly. Many letters have to add punctuation, just like Pinyin.

Many words are specious. After reading them all night, Zhang Fan really saw his head big, "master's English level is also..."

Driving at high speed on the frontier is not blowing. It's really comfortable. There are few cars and the road is wide. It runs all the way towards Tianshan Mountain.

At six o'clock in the evening, Zhang Fan entered the tea plant. The sun is still hanging in mid air. Because it's a weekend, many people go shopping on the street.

Ouyang returned to the hospital ahead of time with other doctors. This trip to the bird market also yielded a great harvest. The doctors who did not attend the meeting also knew the grand occasion at that time, because Ma Yichen was like a little starling.

After Zhang Fan entered the house, there was suddenly vitality in the quiet house. The old lady was busy cooking. The old man smiled and looked at Zhang Fan with the newspaper.

Shaohua is busy changing shoes and pouring water for Zhang Fan. A successful family can first give the family a feeling of affinity.

"Is it delicious?"

"Well, fragrant!" Eggs, leek dumplings, fresh leeks and native eggs, and a little shrimp. It tastes really good.

After dinner, Shaohua took Zhang Fan to discuss her career. Seeing Zhang Fan becoming better and better, the girl really felt a little crisis.

"Buy land? OK, buy some. Then you can let the old people exercise!" Zhang Fan took the special equipment sent by the equipment manufacturer and wiped it with care.

Business! For Zhang Fan, it's so far away that he doesn't want to consider this thing.

"Ah! It's just a piece of wood." Shao Hua was also helpless. There was no way. She called Jingshu.

Aunt and sister-in-law muttered for a long time, and then Shaohua called her future mother-in-law.

The people of Jiangsu Province may have an attachment to land that people in other provinces can't imagine.

In semi-arid areas, there is still very little arable land. On the loess land, they reclaimed land on hillsides, beside streams and even on the edge of the desert.

Unfortunately, it doesn't rain. The income is too little. Although Zhang Fan's family was born as a worker, Zhang Fan's grandfather's family and grandfather's family are actually farmers.

Zhang Fan's parents' deep desire for land is not comparable to Zhang Fan.

When Shaohua told Zhang Fan's parents about his intention to buy land, Zhang Fan's mother immediately supported, "buy, you must buy. If the money is enough, I'll sell the house here. Anyway, we have to follow you around. The house here is still there. "

Shaohua found a strong backup. The girl was as happy as a little fox, and her eyes were almost stitched with laughter.

Sitting on Zhang Fan's bed, Shaohua took out a notebook. She began to check her family.

"Zhang Fan, do you agree or disagree with me to be a farmer?"

"Don't be too tired and don't be too stressed. I can still afford you." Zhang fantou didn't answer the question.

"Then you support it?"

"Hey!" Shao Hua is like a bee in Zhang Fan's ear, and he still has the bee of Shang Fang's sword.

## **Chapter 563**

"When I become the leader of Shao village, I will marry you as the stronghold... Ha ha, don't make trouble!"

Before Shaohua finished, Zhang Fan came to a classic male and female action, hungry wolf pouncing on food.

One meter and eight meters each, and because of perennial exercise, Shaohua, who is slim like a little flower cat, is really pressed under him like a big meat tiger.

The slight aroma teases Zhang Fan's nose. Shaohua's appetite has been much better under the influence

Thinking about it, Shaohua screamed, "I hate it. You hurt me!"

Shaohua, blushing, sat up straight. One hand held the unspeakable place, and the other hand had picked up the soft meat on the inner side of Zhang Fan's thigh.

Staring with big round eyes, it's really like an angry big cat. It's almost a long beard on its mouth!

"I agree with everything you say! I think I should support you more! "

Zhang Fan began to appease Shaohua without blinking. The feeling of pain didn't appear on Zhang Fan's face at all.

When it hurts, you must not show it, but when it doesn't hurt, you must show a very painful feeling. This is Zhang Fan's blood experience summarized from the struggle between the enemy and ourselves.

Otherwise

Legal men can go to war at the age of 18, but they must be 22 to get married. So women are a lifelong problem for men.

When a young man faces a woman, he is still a delicate baby, which the state has to use rules to protect men.

However, Zhang Fan is good at this. He speaks nonsense to Shaohua seriously with his eyes open. He can often talk about the point!

Or because of the long love time, Zhang Fan's ability to be quick witted is becoming more and more perfect.

In fact, things between men and women can not escape the word "fool". Wholeheartedly and wholeheartedly are deceptive. How lucky is a man willing to fool a woman all his life, and a woman willing to let a man fool all his life.

I can't be good for several lifetimes. I don't think I can get this blessing.

Shaohua stared at Zhang Fan and immediately woke up. Then he opened his mouth and said nonsense. He pretended to be serious and made Shaohua laugh and angry.

"Well, that's what you said. I just said I bought all our savings!" Shaohua looks at Zhang Fan. She wants

to see what expression Zhang Fan has.

"Lie down, lie down, what a big thing I think. Life doesn't bring things that death doesn't bring. Is it so angry to find them! You can do whatever you want. "

Zhang Fan complacently comforted the big cat again. He complacently began to slowly look for the just state. Which state seems to make him more focused!

Posture, posture, temperature and strength can't change at all. Squint and continue to look for the just state.

"Not easy, a little clue!" Holding something unspeakable, Zhang Fan enters the system again. It's too comfortable. Really, the system is equipped with beautiful women. Zhang Fan is about to become an immortal.

Money, for Zhang Fan now, is: I'm not interested in money at all!

What he is most concerned about now is that he can make his beloved woman smile and his operation to a higher level.

Shao Hua saw it and got it! You'd better discuss with Jingshu. Although Jingshu is a little younger, she seems to be more able to discuss things and more economical than Zhang Fan. As for Zhang Fan, let's continue.

"It's good to live like this all your life!" Shaohua slightly blocked Zhang Fan's big hand. Looking at Zhang Fan, he blushed and thought of it.

In fact, Zhang Fan has a bit of the male chauvinism of Northwest men. He goes out to sweat to make money and comes back to give the money to his own woman. The rest is planned by women.

As for others, Zhang Fan doesn't want to worry, nor does he want to worry. Because there are more difficult things waiting for him.

In the evening, after Zhang Fan opened the notes given to him by his master, his head began to ache. Although master left in a hurry, he sent a text message after getting off the plane.

When we meet in February, he will check his homework. The homework in these two months is to give Zhang Fan the notes he gave him and let Zhang Fan eat through.

With an English dictionary, a German Dictionary and medical English, Zhang Fan began to translate bit by bit.

"The master's handwriting is too sloppy!" Holding the handwritten notebook of Qiu Lao's early years that can make the surgeon jealous to death.

Zhang Fan's head was about to explode. He finally realized the importance of regular writing.

Lu Lao and Wu Lao, who are far away in the capital, are attending a meeting on medical reform. This meeting is to clarify a problem.

Medical education must be divided into two branches, medical clinical postgraduates and medical academic postgraduates.

Medical education over the past few decades has been improved like a grasp of beard and eyebrows, but now it is time for reform.

Education can't keep up with the development of the times. Some medical doctors can't even do the most basic surgery after graduation.

Once you can't enter the scientific research institute, but after entering the hospital, you must re-cultivate one side like undergraduates. There are many opinions from major hospitals. Therefore, medical education has to be changed.

"Did you give the master's notes to Zhang Fan?" During the meeting, Mr. Wu asked about Mr. Lu.

"Well, first sharpen his pride and let him understand that what he did had been done by his master half a century ago.

Moreover, master's medical research methods are also in his notes. I hope he can calm down and gain something.

For Zhang Fan's education, I mainly give him guidance in the general direction. Seriously, I really have nothing to say about surgery.

Although his fur Sabre technique is not up to standard in your opinion, for me, he has already surpassed me in Sabre technique.

After I grind him out into a rough embryo and form a preliminary system, I'll give you the rest of the fine carving. "

Old Lu said to old Wu.

"Teach students according to their aptitude. You are right. I hope he can go through his basic stage early."

Do not understand, do not understand, how to do? That's liver. Zhang Fan has no other advantages, just one word, liver, one word: can liver.

The handwriting was scribbled. It was all right. Zhang Fan began to describe the seal script word by word in his new notebook.

Can't understand a foreign language? No problem. He wrote it letter by letter in his notebook.

Then, translate with various dictionaries, and connect up and down bit by bit to figure out and think.

This speed is very slow. Sometimes Zhang fan can't get one or two pages of notes in a morning.

After the literal meaning is done, Zhang Fan still has to think about Qiu Lao's idea. Why does he say so, especially where Qiu Lao also makes a question mark, Zhang Fan thinks hard with his hair.

Like Qiu Lao who was brought in decades ago, Zhang Fan under the desk lamp doesn't feel boring at all. Instead, he has a sense of achievement that he doesn't look for the treasure of knowledge, which drives his weak liver.

This is that those who know are better than those who are good, and those who are good are better than those who are happy.

Now Zhang Fan's study time is really not as much as before. In the past, except for surgery, returning to the dormitory was liver.

Now, I have to fly a knife from time to time, and sometimes I have to take time to give lectures to doctors who study in others. Life is really like a filled curriculum.

Since the breakthrough in the liver, Zhang Fan began to slowly look at other general surgery.

From the esophagus, the stomach, liver, spleen, pancreas, intestines and chrysanthemums belong to general surgery.

If you want to break through every, you can't count on it in the system. You can only rely on the constant liver in reality.

## **Chapter 564**

Zhang Fan's parents in Su Province originally planned to go to tea before the end of the year. Although it was not a break, it was always a little delayed.

As a result, under the temptation of Shaohua outlining the future manor, Zhang Fan's mother decided to speed up the speed of leaving Su province.

"The old house is sold, but the new house has not lived for a few days, so we have to sell it at a loss. We

stare at the decoration from beginning to end..."

Zhang Fan's father is a little unhappy. It's not that he has an opinion on selling a house. In fact, his feelings for factories and mining communities are definitely deeper than those for a new house. It's even an excuse not to go to the frontier.

It's not how much he likes this place, nor is it difficult to give up his hometown. The most uncomfortable thing for the old man is that the head of the family has completely lost his position now.

I'm going to find him. Everything used to depend on his own children, so the old man can't pull his face down. He really feels like his son is old and I'm just Lao Tzu.

"Make blind and disorderly conjectures. No one is thinking about Usurping your power, but you has the final say in your family.

Quickly water the flowers and polish the flowerpot. Someone came to see the house today. " The old lady comforted the old man like a child, and then she was busy tidying up the house.

With the growth of age, the old lady is not willing to be angry with the old man. In most cases, she smoothes her hair, and the old man is still obedient.

The old man and the old lady have the same feelings for their children when they grow up, but their expression methods are a little different.

The old lady always talks about whether the child is in front of her or not. The old man is different, not in front of him, but also talking, but in front of him, it's easy to look at different lifestyles and get angry.

Feel that your authority is affected by

Although Jingshu and Zhang Fan had already persuaded them to start, the old lady just lingered.

Either the house hasn't been sold, or the income of sparrow supermarket is good. In fact, they don't intend to sell the house.

After Shao Hua called every day, the old lady began to prepare to leave. The old man's concept is very

simple. I didn't go to you because I didn't have a place to go. You invited me.

The older people are, the more sensitive they are in life. They are deeply afraid of bringing difficulties and inconveniences to their children.

Jingshu wants to understand that her brother is good now, and her sister-in-law is also reasonable. She is also very willing to let her parents go to provide for the elderly early.

In this way, the two old people in Jiangsu Province began to spread the news of selling houses all over the world.

Can sell a house, how can it be so simple? For the elderly, it was too difficult. As a last resort, Shaohua personally set off for Su province.

Zhang Fan is busy and has no time. After discussing with Zhang Fan, Shaohua decides to go to Su Province to help her future mother-in-law.

Zhang Fan is really happy that Shaohua is willing to take the initiative to help. Shaohua can take the initiative to stand up. Not only Zhang Fan is happy, but also Zhang Fan's parents are very satisfied.

"When Shao Hua comes, don't always say picky words. Be atmospheric, okay?"

"Hum! Why am I picky? Why am I not atmospheric. Look at you old woman. I have no right to speak now. "

Zhang fan can't get involved in the things in life and has no energy. His energy is almost consumed in the hospital, and then exhausted by Qiu's notes.

"Zhang Yuan!"

"Zhang yuanzao!"

In the tea vegetable hospital, Zhang Fan nodded all the way. Now Zhang Fan also adapted to this role. It's not like that he had to stop and greet others after being called Zhang hospital at the beginning. It seems that he felt a little separated from the masses.

Now, with Zhang Fan's ability becoming stronger and stronger, and even after the authorities have determined Zhang Fan's level, doctors begin to respect Zhang Fan more and more.

Technical units hate it here. It's really hard to be high without ability.

The Secretary of the hospital was not appointed by himself, but sent by his superiors, but the people in the hospital, especially some technical backbone, used a mocking tone to respect the Secretary more

than anything.

It's a little like they don't take the Secretary as the leader, because they feel that laymen are not qualified to guide them. This is the simplicity and rudeness of technology.

After Zhang Fan was appointed as the assistant to the president by his superiors, although everyone didn't know it, some directors with some qualifications and level privately called Zhang Fan Xiao Zhang Yuan when chatting.

There is absolutely no nickname in the workplace. There is still a little unconvinced.

But after Zhang Fan stood at the annual meeting of liver and gallbladder, no one called Zhang Fan in private with Xiao Zhang Yuan.

Not to mention the whole tea element, including the whole frontier, who can show their hands at the annual medical meeting or take their own team to show their hands. Who else except Zhang Fan?

Therefore, the attitude of the hospital towards Zhang Fan seemed to be respected overnight.

Even the secretary who wanted to win over Zhang Fan began to stop beating. The drum was too big to beat! Heavy tonnage, small horsepower, unable to pull!

The liver disease group and hepatobiliary department now have a large number of people coming to study, the signboard is loud, and more people come to see doctors from other areas.

Zhang Fan goes to the hepatobiliary department to teach an operation every day, and then focuses on other operations.

General foreign education was originally a battlefield. Director Zhao Quanping was a good man with a soft wrist, and the level of the following deputy directors was not second, so there was a miasma in the Department.

With Zhang Fan's frequent patronage of general surgery, several deputy directors also lost their temper and became directors. They could still speak with surgical techniques, but when they met Zhang Fan, they were not rivals.

Therefore, with the focus of Zhang Fan, the Department also began to slowly enter the era of great unification from the Warring States period. Of course, the emperor of great unification is Zhang Fan.

"Director Chen, did your group have a big stomach cut today?" In the morning, after the morning meeting, Zhang Fan asked the deputy director of the gastrointestinal group.

"Yes, Zhang Yuan, there is a big stomach cutting machine today. Do you want to go? "

"Hehe, I have some ideas recently. Shall I give you a hand?" Zhang Fan asked with a smile.

"Hey, I'll give you a hand!" Director Chen was also depressed. At the beginning, he watched the liver and gallbladder group in full swing and became well-known all over the country. He was also envious of all kinds.

After Zhang Fan turned his head to look at his stomach and intestines, he began to feel uncomfortable again, because he couldn't be the master! Man is really a contradiction.

"OK, let's set up a table today. By the way, director Li, after you check the medical records of the nine bed patients, you will send them to Xinjing hospital in Shenzhen. You can go on behalf of us at the next meeting with their liver and gallbladder."

"Hey, OK, Zhang Yuan, I'll watch it now and change it word by word until you are satisfied." Another deputy director was a little reluctant to listen to Zhang Fan's account of broken work to him, but once again, Zhang Fan was willing to let him as a representative to show his face in Shenzhen, and his tone immediately obeyed a lot.

The tone was obedient and much happier.

The doctors of liver group and hepatobiliary department are really obedient to Zhang Fan now. There are too many meetings all over the country and all kinds of public meetings. As long as Zhang Fan nods, the rest is

People are not sages, who can refuse fame and wealth.

In the Department, Zhang Fan sits in the office. Even if the doctors are not busy, they have to find something to start busy. This is the benefit of official certification. People are so strange.

Just as Zhang Fan and others were busy, a special police car drove into the hospital.

This police car is really special. From the outside, it is welded with steel bars, and the windows are full of iron bars with thick arms.

It's like a bank ATM. The police car drove very fast. Although it didn't turn on the lights or sound the siren, it was estimated that there was an accident according to the situation.

The leaders of the medical department and the security section of the hospital, with the officers of the security department, wait at the emergency center with a baton.

When the police car arrived at the emergency center, the nurses and doctors were just about to come forward, but they were stopped by the police who lined up in the past.

"Wait a minute. After our people are settled, you can check it." With these words, the police opened the back door of the police car with the officer of the security office of the hospital.

## Chapter 565

Looking at the posture of the police, the doctors and nurses around couldn't help but step back.

After the back door of the car was opened, there was a layer of metal protective door. It was about five centimeters thick. Two strong men struggled to open the metal door.

The doctor and nurse finally saw what was going on inside. A woman, dressed in a blue and white prison uniform, lay in a police car, huddled like a big maggot.

The hair is very long, covering her face, can't see her face, curls her body, and makes painful groans when the light opens with the door. The woman didn't respond at all. The doctors and nurses in the emergency center couldn't help looking at the police.

Although the emergency center has been established, and the attending doctors from other departments come to work, the doctors and nurses who can receive patients are young people and lack experience.

If Xue Fei were here, it would be different. Orthopedics, especially trauma orthopedics doctors, you have seen too many wonderful things in society, so it is also very methodical to deal with such things.

"Please help the comrades of the security office to send the patient to the clinic." A middle-aged policeman said to the section chief of the security office.

Just as they were talking, another police car came, and all the powerful policemen came down with guns! This is very strange. Most of the policemen seen by Chinese people are actually film policemen. They are very curious about the policemen with guns.

Several strong men got on the bus and carried the woman off the bus. When the woman got on the bus, some little nurses almost screamed in surprise.

The female prisoner is estimated to be something extraordinary. Her face has turned white with pain. She can't see any blood color between her lips for a long time. Otherwise, there will be no red on her face when she is bitten by her teeth, and the passive position is very obvious.

At first glance, it was a great pain, but even under this pain, the police didn't let go of her iron shackles and handcuffs.

And when the woman was carried down, several policemen with guns quickly surrounded the woman, pressing their hands on their waist and looking around.

"Where is your emergency room?" A bearded policeman asked the nurse who was like a chicken in front of him.

Without doctors and nurses, the flat car of the female prisoner was sent to the rescue room by the police and comrades of the security office.

After a while, Ouyang hurried over.

"Dean Ouyang, the prisoner has sudden severe abdominal pain, and the symptoms are becoming more and more serious. We can't handle it. You must find a way to treat her."

A leading policeman with a police badge said to Ouyang.

"OK, we will do our best." Ouyang nodded very seriously.

"Also, we must tell the doctors and nurses in the hospital that this is very dangerous and must not have any compassion.

She is the largest agent of Hulu in our tea area. When we arrested her, we had already sacrificed three policemen. You can only know this. Please keep it confidential. "

Ouyang looked at the policeman in front of him in surprise and nodded again.

Snoring is a new kind of drug. This kind of thing is different from the early sea (a) Luoyin and ice (a) poison.

It is colorless and tasteless. Most people can't identify it at all. When it takes it, it needs to react from pure water to produce effect. Therefore, when it takes this drug, it will make a sound like blowing bubbles. The name snore is applied.

This kind of drug is very harmful. When the addicts take too much, they are easy to inhibit the

respiratory center, resulting in unconscious death.

This kind of poison (a) will increase the time length of pain and pleasure. For example, after being stimulated, there will be weak excitement. Therefore, the most people who take this kind of poison (a) are men and women, and then become demons. This situation is particularly easy to breed all kinds of sexually transmitted diseases.

But this is not its biggest harm. Its biggest harm is that after taking it, there will be a strong sense of stimulation and mental loss of control.

Various thresholds of the human body will be slowly increased with the enhancement of stimulation.

There will be a manic state, such as strangling the sexual (a) love object unconsciously, or gnawing off each other's face like holding each other as an apple.

The most terrible thing is that after taking this drug (a) for a long time, when you can't get the drug (a) during the period of addiction, the addict becomes a mob.

Therefore, this poison (a) is so terrible that it is directly creating manic cannibals. Therefore, the Chinese government's crackdown on this drug (a) is also particularly strong.

When the female prisoner was sent to the disposal room, she was very uncooperative. Really, people who carry their heads to do such things, men and women, are not understandable to ordinary people.

"Where does it hurt? Do you have a stomachache? Is it here?" The young doctor asked the woman with white leopard pattern on a blue background loudly.

But the woman ignored the doctor except for moaning. If the doctor moved her body, she would stare like a wolf, as if she were always ready to bite.

Ordinary people, where have they seen such a strong woman? The doctor had a loud voice and wanted to clarify the disease earlier, but he didn't dare to ask loudly when he saw this woman like a wolf.

Ouyang pushed open the door of the disposal room, "how about it?"

"Dean, she didn't cooperate, and..." the little doctor who had just worked for a year was frightened by the other party.

Really, most of the people in the world are good. Meeting such people who are deeply violent in their bones is a cruel existence for both men and women.

However, for Shang Ouyang, this kind of look doesn't scare people. Who is Ouyang? In her early years, the green soldiers who followed China were the people who had been on the battlefield as emergency rescuers. She hasn't seen anything.

After the old lady went up, she tore off the woman, covered her hands on her stomach and stared at her with more fierce eyes.

If the eyes of these two people are knives, they have cut each other countless times.

Finally, women's eyes begin to drift because of pain or lack of confidence. Ouyang, although his eyes are strict and want to eat people, his actions are still gentle.

After all, Ouyang is a doctor.

"Does it hurt? Does it hurt? Speak." It's no use. Ouyang pressed a little on her abdomen. The woman was like wood. Her eyes were no bigger than Ouyang's. She simply closed her eyes, bit her teeth, and even moaned.

"When did she get sick and when did she go to jail?" Ouyang asked the prison guard and said to the doctor in the emergency center, "call the surgeon and gynecologist."

"Dean Ouyang, she's too important..." the prison guard looked at the prisoner getting weaker and weaker, and said to Ouyang a little nervous.

"OK, let the director of general surgery and the director of gynecology come together, and Zhang hospital will also inform you." Ouyang added one more sentence after listening to the prison guard.

"After eating in the morning, she suddenly began to yell, and with the yelling, she began to sweat profusely, and her voice became smaller and smaller, and gradually turned into a groan.

As soon as the doctor in our clinic saw something wrong, he hurried to send it."

"Oh, don't worry, we'll find a way."

While they were talking, a lot of blood appeared on the woman's lower body. The clothes in summer were very thin. The blood soon penetrated through her pants and flowed a pool of blood on the examination table.

"Dean, the patient's blood pressure began to drop. It has reached shock." The head nurse of the emergency center quickly shouted to Ouyang.

Before Ouyang spoke, the police were worried, "come on, come on, come on, rescue, rescue, catch her. We sacrificed several brothers. So far, she hasn't opened her mouth. Come on!"

"Correct the shock first, come on!" Without Ouyang's order, the doctors have already started.

Blood transfusion and infusion, while correcting shock, Zhang Fan, the director of general surgery and

the director of gynecology ran in one after another.

"Look, about ten minutes after breakfast, the patient had abdominal pain and sweating. After being sent to the hospital, he refused to cooperate. Now there is a lot of blood in his lower body.

Blood pressure is in shock, and now blood transfusion and infusion have been given to correct shock. "

Ouyang quickly explained the patient's condition to the several who entered the door, while explaining the treatment measures.

This is a process in which the first doctor explains his condition to other consulting doctors.

The situation is serious and there is no time to see the medical record. We can only rely on the doctor's oral complaint.

Regardless of the patient's condition, the doctor must first conduct a physical examination. Without physical examination, doctors cannot make an effective judgment.

This is why when the patient enters the hospital, he cries out for his father and mother in pain, and the doctor wants the patient to relax and lie flat and touch it.

Sometimes, the patient's family members want to slap the doctor in the face. You should use the medicine quickly!

It's no wonder that you don't understand medical knowledge.

In the field of surgery, including Gynecology, as long as Zhang Fan is in the current tea vegetable hospital, other surgical directors and doctors naturally give up the leading position to Zhang Fan.

Zhang Fan was not humble either. He stepped forward and opened the woman's coat to reveal the patient's abdomen. The director of general surgery and the director of gynecology bend the patient's lower limbs at the same time.

This is to cooperate with Zhang Fan for abdominal physical examination. They are so tacit that they don't even need to make eye contact, because every step here is tempered through thousands of years.

Start, press. As soon as Zhang Fan presses his hands, he probably knows what's going on.

This is the importance of physical examination. Without this skill, patients suffer. Go to CT, color Doppler ultrasound and

Patients suffer without saying, but also delay their condition. Nowadays, physical examination is less and less valued. There are machines, hundreds of billions of examination instruments, and they still learn to check the body dry hair?

"Plate belly!" While talking, Zhang Fan took off the patient's pants and put his hands on the patient's lower abdomen.

Women of school age must identify whether they have pregnancy.

## **Chapter 566**

When Zhang Fan touched the patient's abdomen, it was determined that the patient had a perforation of the digestive tract. However, such a woman of school age must not rule out her gynecological examination.

"Prepare for surgery, gastrointestinal perforation."

After Zhang Fan quickly finished the gynecological examination of the patient, he said with great certainty.

This is the ability. It is very difficult to distinguish the good and bad of doctors at ordinary times. By level? A doctor who muddles along can survive.

Those who are good at fighting have no outstanding achievements. Zhang fan can judge the patient's disease by relying on his hands. There is no need for examination or consultation.

This is the ability of doctors. If you meet a fool, you may have to

Is it wrong that time is wasted? No,

The woman who can survive in the law of forest conservation and become one of the leaders is extraordinary.

From a female worker who came to the frontier to pick cotton, she broke into such a great name in the frontier in a few years.

Relying on the favorable geographical environment, the long border is where they get rich.

The woman is very smart. Her trading method is simple and effective. She adds a little snore to the tin foil of the outer package of Xuelian cigarette.

The trading channel is simple and efficient. Acquaintances pull acquaintances, entertainment places and her goods are popular.

Of course, being a thief must be prepared to be caught. After the woman was arrested, she found that there was no opportunity after entering the prison. The supervision was too strict.

She knew very well that her head would eat rice sooner or later. If she didn't leave prison, she wouldn't have a chance, so she started with herself by relying on the story of swallowing gold she heard in the countryside.

The rice was soft and swallowed with the iron wire I didn't know where to pack it. Then lie in bed and wait quietly.

In fact, it is not too much to say that a normal human body is a regular machine.

At a constant temperature, almost everything is balanced in motion. And all kinds of body movements are regular and rhythmic.

Heartbeat, Da, Da, Da, one after another, beating in the established way. Every minute is the same. There is occasional palpitation, which will also be quickly adjusted and returned.

All kinds of secretion, like tides, are on time. Therefore, the Chinese ancients' work at sunrise and rest at sunset is very in line with various skills of the human body.

The regulating function of the body is quite powerful, but I'm afraid you'll be attracted to three and four.

The movement of the digestive tract is also very regular, and their properties actually change little.

From the esophagus, to the stomach, to the small intestine, to the large intestine, these tissues are the same from beginning to end, that is, the thickness of the body.

And they also have their own rhythmic movement from the esophagus to the anus. Like the relay race, after the food is imported, the esophagus begins to squeeze from top to bottom, just like maggots crawling forward.

After the food is squeezed into the stomach, there are valves at the inlet and outlet of the stomach. Here, the food is still squeezed, but because the muscles of the stomach are developed, the food is ground to be smaller here.

The grinding of the stomach is not a grinding plate movement, but still moves forward from top to next wave like maggots

Therefore, when the human body stands upside down, things in the intestinal tract will not come out of the mouth, because the digestive tract has valves and moves regularly.

When the iron wire enters the digestive tract, an accident occurs. The iron wire pressed by the digestive tract is like a needle sticking around the digestive tract.

In the esophagus, as long as the artery is not punctured, in fact, the power of the iron wire is not a big problem for the esophagus. It is just a small needle eye, and the muscles of the esophagus close with a squeeze. And the pain is not strong.

The digestive tract is very strange. It is not sensitive to cutting pain, but especially sensitive to temperature and involved pain.

This is the refreshing reason for eating chili peppers, from spicy to chrysanthemum. It was burned by capsaicin, which is also the scientific basis of brother Ping's \* \* Dharma.

But there was a big problem in the stomach. There's a small hole in the esophagus. It won't explode like a balloon.

After reaching the stomach, the stomach is like an explosive bag. If you prick it more often, it may be detonated.

A large amount of hydrochloric acid can be secreted in the stomach, and it is a high concentration of hydrochloric acid. This thing relies on bicarbonate ionic mucus generated by blood vessels in the stomach to isolate hydrochloric acid from the stomach.

Gastric cells produce hydrochloric acid and blood vessels produce carbonic acid mucus. It's really a king without a king.

But when the stomach body breaks, the problem comes out. When the iron wire pierces the stomach body, the pain is not big. This pain can not even be felt sometimes.

However, the stomach is very strange. The thick body can hardly find a stronger organ than it in the human body.

It is not afraid of ischemia or even hypoxia. At the critical moment, it can make muscles do anaerobic exercise, because it is a muscle man, not a fat man like the brain.

However, it is like a muscular man's body, which is afraid of breaking. As long as it breaks a little, it will be corroded by hydrochloric acid to form an ulcer. When there is a break, the mucous membrane of the

stomach is concentrated in the broken place, consuming mucus to neutralize gastric acid.

But the stomach is moving. Up and down, the upper wall of the stomach caters to the lower wall constantly under the stimulation of food. It's really like

Then, the swallowed iron wire is on the stomach, constantly pricking and pricking. Then, the quantity finally turned into qualitative change, and the gastric body was corroded and perforated.

When the stomach is not perforated, blood enters the intestine directly from the stomach without being broken down.

The intestines are very sensitive to blood. When blood enters the intestines, the intestines directly begin to agitate.

The peristalsis of refueling, the peristalsis of refueling, seems to be particularly afraid of blood staying in the intestine.

This intestinal irritation is very refreshing. It can't be held back directly like taking laxatives, so that there is a lot of blood in the patient's lower body.

Therefore, after gastrointestinal bleeding, it will generally provoke the intestines to defecate.

In fact, this is also a kind of early warning, a kind of intestinal early warning: bleeding, hurry to find a way! If you don't find a way, I'll go on strike.

When the stomach is really perforated, the liquid in the stomach comes out of the stomach, just like wolves entering sheep.

Gastric acid corrodes, just like boiling water splashed on the skin. Instantaneous pain outbreak, and abdominal organs are self-controlled, so the positioning of abdominal pain is not very accurate. A little outbreak, comprehensive warning, full of stomach pain, this pain is directly like Da Sheng in sister-in-law Niu's stomach, and the gods can't carry it.

Gastrointestinal perforation, especially in the stomach, is a terrible thing.

When the stomach acid poured on the intestines, the delicate intestines began to tremble, and then there would be a strike.

At this time, the intestines, like dead insects, begin to become stiff and motionless, followed by electrolyte disorder in the body.

The intestine is the place where the most electrolytes are stored in the body. When the electrolytes are disordered, all chemical and electrophysiological reactions in the body begin to be disordered.

Electrolyte disorder, coupled with perforation and bleeding in the stomach, is the fatal cause. Therefore, if gastrointestinal perforation cannot be handled in time, it can directly kill people, and it is very terrible in extreme pain.

"We must find a way to rescue her." The police who sent her were almost pulling up their hair. They didn't expect that this woman was so terrible and cruel.

This kind of open surgery can't be done in the operating room of the emergency center. The operation is too big. You must go to the big operating room of the hospital.

When Zhang Fan said that he would have an immediate operation, the doctors in the hospital began preoperative preparation.

Ma Yichen took the lead, lifted up his white coat and began to run. While running, he shouted: "give way, give way. Come on, get out of the way. "

Patients, family members and staff in the hospital have made way one after another.

Behind him is a flat car pushing the patient. The nurse and doctor pushed the flat car and held up the liquid and ran quickly.

In the face of disease, the doctor can't consider the identity of the other party. No matter whether the other party is guilty or not, the doctor will go all out when he needs to be treated after entering the hospital.

After the flat car, a group of elderly doctors followed. The patients who came to see the doctor looked at the doctors curiously.

The number of elevators in the hospital is not enough when it is busy. Although there is a special surgical elevator, the hospital has surgery at any time.

Ma Yichen ran to occupy the idle elevator at the first time.

## **Chapter 567**

If a normal person really swallows a foreign body and does not bleed again, first determine where the foreign body is.

Do X-ray examination first. If it is a non developing foreign body, such as glass, it will be troublesome. First let you drink the developer like lime paste brushing the wall. Which taste is really bitter.

But once there is massive bleeding, it's not necessary. Open your stomach directly and stop bleeding

first. Moreover, this kind of open stomach is directly like killing a pig by laparotomy, all open from top to bottom. The surgical incision is very large.

When the patient was rushed to the operating room, the operation also began to prepare, but at the same time, there were some preoperative preparations.

It's so weird. The operation has to start before the preoperative examination! The order can be changed, but there must be some processes, not only for patients, but also for doctors.

At the beginning of the operation, Zhang Fan, with his little apprentice Ma Yichen and doctor song of general foreign affairs, directly prepared for laparotomy.

"Laparotomy exploration, the incision is opened wide. It is estimated that there is more than one perforation. If the area is opened a little larger, complete hemostasis must be achieved. "

Zhang Fan said to the disinfected Ma Yichen while brushing his hands.

"OK!" With Zhang Fan's explanation, Ma Yichen began to disinfect a large area of the patient's abdomen.

The patient is lying naked on the table at this time, because the scope of disinfection is too large.

Because of the patient's special identity, the hospital secretary who usually hardly came to the operating room also came to the operating room with some people.

These people, big or small, are leaders, and they are the leaders of responsible people. In general, so many people cannot enter the operating room, but sometimes it is also an exception.

If the patient dies outside the hospital today, it is estimated that many of these people will have scalp numbness.

But it's another matter to die in the hospital or on the operating table. When they hurried to the hospital, they learned that the patient had entered the operation, so they greatly breathed a sigh and came back to life.

Of course, they also changed their surgical clothes.

When he heard that Zhang Fan was going to have a large-scale caesarean section, one of the middle-aged men spoke.

"Is there a high risk of large-scale laparotomy. I think as long as the patient can be rescued, there is no need to take too much risk.

This suspect is very important. Don't do meaningless... "

Ma doesn't know how long his face is. Many times, especially those with a little authority, they are most worried that others don't know that he has authority.

But there are some differences. For example, the Secretary of the hospital is different. Although he doesn't know the specialty, he knows the people. Although he led several people into the operating room, once he entered the operating room, he was like a mute without saying a word. Being humble is his magic weapon in the hospital.

After the speaker said that, regardless of the mood of the chief surgeon, he directly began to look for allies. When he expressed his opinions, he should look for like-minded people to expand his momentum.

"Secretary Wang, are you right?"

As if he hadn't heard his question, the Secretary of the hospital whispered to the itinerant nurses, "the work intensity is not big. Is the food in the canteen good at noon?"

When they were disturbed by the originally urgent things, the tense atmosphere seemed a little strange.

Everyone is not stupid. At first glance, we know that the speaker is a steward, so the doctors and nurses who want to have surgery look at Zhang Fan. The Secretary's stealth method has long been used.

When the patient is on the operating table, the doctor is the master, because he is his patient. The doctor should be responsible for his success, failure, complications and mortality. The fate of the patient is in the hands of the doctor.

After hearing the man's words, Zhang Fan couldn't stop his anger. Not to mention anything else, as long as you get on the operating table, once something happens, you must let the main knife be responsible. Even if the legal proceedings are the doctor's business, and the people who say easy words on one side

After brushing his hands, Zhang Fan went to the stage and stared at the people who had just spoken, although they were all wearing masks and couldn't see each other's expression.

However, he could feel Zhang Fan's coldness.

Just as he was about to open his mouth, Zhang Fan said, "the operation hasn't started yet. Do you want you to go out? Do you want us to go out."

"What?" The man was stunned. He didn't expect that a little doctor's words were so tough. Although he was not from the medical system, the leader of the tea vegetable health bureau still had to give him face more or less.

"I won't say it again!" Zhang Fan stared at him coldly.

Momentum, Zhang Fan has momentum. With the growth of technology, Zhang Fan's authority began to spread.

And this is the operating room, Zhang Fan's main position. Zhang Fan looked at him coldly, "you talk, you talk, this..."

The man was not stupid. Although he was angry, he would not take the initiative to bear the responsibility. He pulled the hospital Secretary around him.

The Secretary of the hospital looked at Zhang Fan and the one around him, and then said calmly, "this is the operating room. Let's go out and talk."

After that, he took the man out. When he was going out, he said to Zhang Fan, "Zhang Yuan, don't worry and do it boldly. I have it!"

.....

In the operating room, everyone looked at Zhang Fan.

"Prepare for the operation. Let me say here that we are doctors. No matter what others say, we are your patients, and you should be responsible to the end. Unless you're not allowed to operate. "

"Yes!" Everyone said the same thing.

Zhang Fan's sentence is not that cheering is better than cheering. In fact, most people still yearn for righteousness.

Outside the operating room, the people who were pulled out by the Secretary felt ashamed, ignored the Secretary and made a phone call without saying a word.

"Leader, the suspect is in the hospital operating room. It's dangerous, and the doctors in the city hospital are very cruel and don't cooperate. I'm worried... "

This is the art of speaking, avoiding the important and gossiping. Anyway, whether things are OK or not, he muddled the water first.

"What? Didn't you emphasize the importance of the suspect? "

"You are so humble! Leaders, they are too cruel. I was driven out of the operating room and said, "the most important thing is to rescue the patient."

"Clang!" Hung up opposite.

The military and police family, these people have a hot temper because they often have to deal with criminals, and the suspect is too important to be a leader.

After hanging up, he called the health bureau again.

The original one sentence thing was pounded into an event by someone with a heart. Sometimes, really, this kind of person is impossible to prevent.

While they were doing a teleconference, the director of the laboratory department of the hospital was sweating.

The preoperative examination came out. He took the examination report and his hands trembled a little. He knew that the patient had started the operation.

"Answer the phone! Answer the phone. " His mouth was talking, and his hand holding the phone trembled slightly.

In the operating room, with the departure of miscellaneous personnel, Zhang Fan and they also started the operation.

To tell you the truth, the hemostatic operation for gastrointestinal bleeding is very difficult to deal with, because the stomach is not a pocket and can not be simply sutured and ligated.

First of all, we must seize the time. So you have to be fast.

However, after the tour picked up the phone, her scream also made the operating room a little solidified in an instant.

## **Chapter 568**

"Weak HIV positive!" The itinerant nurse took the phone, stared at the doctors and nurses on the operating table and said a word.

All the people on the operating table, including Zhang Fan, were stunned for three seconds. The more you know, the more you know, the more you know the terrible meaning of this abbreviation.

But can you give up? The doctor immediately took off his white coat and said I quit. Is it possible? impossible.

Sometimes the medical industry is really a little anti-human. The operating table is actually similar to the battlefield. When you give an order, you know that there is a wanzhang cliff ahead. You may be doomed, but you still have to go on.

Although the medical treatment in China is unsatisfactory, there are accidents and all kinds of accidents. There is a dark side, and all kinds of red envelopes fly all over the sky.

However, none of the regular hospitals said that they were directly scattered as birds in case of infectious diseases.

Three seconds, just three seconds, Zhang Fan didn't think about his family, country and world, and didn't think about his responsibilities and obligations.

But I was scolding my mother in my heart, "my mother, how can I recite so much!"

Not afraid of death? Doctors who have seen HIV patients dying can't be afraid.

Although it is weak HIV, that is, suspected HIV, but normal people, who dares to be afraid?

But who made them doctors. I have to finish the operation even if I'm afraid.

It's really dangerous to operate on HIV patients. There are too many sharp instruments on the operating table. From knife to needle, it is a terrible existence.

Especially in orthopedic surgery, in case of a patient with HIV, it will directly kill the doctors. The sharp bone residue is impossible to prevent, and the blood splashes everywhere

After scolding people in his heart, Zhang Fan said two words.

"Report to the medical sense Office of the hospital and notify the medical department.

Put on your hands and be careful. "

"Good!" The instrument nurse nodded and immediately opened new gloves for the doctor and herself.

Yes, their protection is just two layers of gloves. How thick is it? It is estimated to be the thickness of two ordinary condoms.

Have other doctors and nurses changed? Yes, it was the originally tense operating room, and the atmosphere became more tense.

Not nervous is false. Lao Bai pulled his hand because of the small knife.

Isn't his skill high?

The itinerant nurse immediately reported to the hospital medical department, and the director of the medical department also informed Ouyang at the first time.

When Ouyang heard that HIV was weakly positive, her eyebrows frowned.

As long as HIV is detected in the hospital, it can hardly run away. And think about the patient's career.

As a result, Ouyang just put down the phone and a call came from the Health Bureau. He is a section chief who specializes in managing doctors' medical ethics and discipline.

Ouyang was angry before the other party said three words.

"You shut up and dislike the doctor's bad attitude. Why do you do this operation.

Lying on the operating table is an HIV patient, do you know.

Tell the informant not to make trouble for my mother all day. My doctor can't use him to point out. He's not qualified!

Now I don't have time to talk to you. When the operation is over, I'll tell you, I'll see you in the government! "

Ouyang's language is like a strong wind. It is estimated that her hairstyle when listening to the phone opposite is crooked.

No way, the Health Bureau has really suffered a disaster.

With that, Ouyang gave the phone directly to him, and he was still on the table. Ouyang, sitting in the chair, became more and more angry.

No one wants to meet such a patient, but if she does, she will do according to what she meets, but the evil fire in her heart can't go out!

Under the pressure of her heart, she walked towards the operating room and informed the director of the medical department as she walked.

Are hospital blockers still in stock? Has it expired? Don't let uninformed patients and family members know, otherwise it will cause panic.

Anger is anger. Work still needs to be done.

On the operating table, Zhang Fan started the operation after they wore an extra pair of gloves.

The stomach is not a pocket. The pocket is broken. It's very simple. Just sew it directly. There's only a patch at most. It's great. It's difficult to see the craft.

But gastrointestinal perforation is not so simple. It cannot be simply sutured. This suture will lead to secondary perforation due to ischemia.

The greater omentum with blood vessels must be sewn on the stomach to block the perforation of the stomach and continue to ensure the blood supply of the greater omentum.

This kind of suture is very demanding for doctors, just like carving on sugar silk.

If the ulcer is too large, or the patients who have recurrent attacks after cure, they can only choose the severing surgical treatment. What is the severing surgical treatment, that is, the gastrectomy, which directly removes the gastric body secreting gastric acid!

When Ma Yichen was about to wipe with gauze, Zhang Fanka stopped Ma Yichen's hand with the body of pliers.

Ma Yichen looked up at Zhang Fan in wonder. He really wondered, yes, it's time to wipe the blood in the operation area, yes!

"The patient is not a simple gastrointestinal perforation, but swallowed the bleeding caused by sharp tools. Don't hold gauze directly with your hands and use pliers!"

Zhang Fan calmly looked at Ma Yichen. As soon as Ma Yichen heard it, his brain almost exploded, "yes, how did you forget this stubble!"

To tell the truth, Zhang Fan's nerves are tight when he does this operation. He should not only pay attention to the operation, but also pay attention to the assistants around him.

This kind of operation must not be a little careless, otherwise it will be doomed.

When Ouyang came to the door of the operating room, he met the Secretary of the hospital and the informant.

The man is still talking and swearing. He felt that after the operation, the doctor would definitely come to him to apologize. He was thinking about how to

Ouyang heard it, and the fire that had been pressed down burst out immediately.

The director of the medical department who followed her knew his old lady's boss so well that he hurriedly pulled La Ouyang's cuff.

As a result, Ouyang, like an old cat with fried fur, ruthlessly shook off his hand and stared back.

At this glance, the director of the medical office swallowed the words he wanted to persuade.

He looked with pity at the informant with the surgical hat tilted opposite.

"You're still not the leader of the hospital, huh! People broke their saliva on the hospital doctor and your face. Are you still in the mood to listen here? "

Ouyang directly began to clean up the hospital secretary.

The hospital Secretary fiercely let Ouyang scold. His face was really red and white. He wanted to be a good man. He directly asked Ouyang to lift his tail and show it!

In front of many subordinates, he really

Want to turn over, dare not! If he doesn't turn his face, he will die hard. Really, sometimes when he thinks about it, he also feels a little unlucky.

Tangled and embarrassed, he shivered for several seconds, just like centuries, and finally said, "he was sent by his superior leaders."

"What kind of superior leader sent him? He doesn't spit out people's words, but he also deserves the leadership school?"

You tell me, who let you into the operating room? Is the operating room where you can enter?

There are dozens of operations, dozens of caesarean sections and hundreds of lives a day.

Can you be responsible for the infection caused by your unclean entering?

You said, who sent you for surgery? Can your superior be responsible? Did your superior ask you to enter the operating room? If you can be responsible, call him now and ask him to come to the hospital. "

With a fierce voice and anger, he pedaled his triangular eyes. His fingers hurried to Ouyang on the other party's face and directly scolded the other party.

Ouyang is unreasonable. She doesn't talk about anything else, even HIV, but about your illegal invasion. It's obvious that she bullies you in another way!

"You, you, you, how can you mess around? What am I responsible for? I'm going to see the suspect. I, you, you, how do you lead? "

The man who pretends to be a tiger is always lack of confidence. Ouyang caught him in the operating room and lost his temper without talking about anything else.

A meal seemed unreasonable anger. Several people who scolded were disheartened. They scolded but couldn't beat.

This meal, Ouyang really returned his spitting ideas. There is a legend that when Ouyang in the municipal hospital is angry, he must take an umbrella if he can't stay away!

## **Chapter 569**

In the early years, such as Zhang Fan's father's generation and their generation, it is estimated that under various factors in that year, they believed in the concept of strong people. In Zhang Fan's generation, this concept has gradually become much less.

In which age did Ouyang ganghao grow up? She is a believer in the concept of strong people.

The so-called good dog looks at three families, and a hero protects one village. Whether it is work or life, the character of their generation is very special.

It is described by a special local word in Northwest China, which is "strange battle". Probably a little unreasonable.

Ouyang scolded Wanren, but he didn't give up his anger. The first time he sued the leader of the tea vegetable government.

"Doctors risked their lives and were threatened by others..." Ouyang's complaint was directly

That's right. We're reasonable. We can't find an ideal way. In a word, the person who picked the matter didn't expect to provoke such a difficult person.

It is estimated that the fire on his head is about to burn. After all, there are not many people who can argue with their superiors for their subordinates, let alone in such a place where there are clear superiors and subordinates.

.....

In the operating room, Zhang Fan, they have begun to clear the bleeding in the abdominal cavity, and the broken stomach has appeared in front of them.

At this time, the stomach is like a fish on shore. The opening of the ulcer closes with the muscle, and spits bubbles of blood mixed with gastric juice.

To tell the truth, the stomach is the most beautiful big organ of human health if viewed from the aesthetic point of view of ordinary people.

There is a saying.

The brain tissue in the brain is not very beautiful. It is just like fat meat wrapped in plastic. It is white and greasy. It is like a disgusting middle-aged fat man lying on the sofa.

Look carefully, the fat meat is still crawling slowly, as if there are maggots in the fat meat.

The lungs were beautiful. Especially the lungs of infants and young children are pink and tender, just like pink and peach cakes.

But as long as you're a little older, if you smoke again, you can't see it directly.

Directly, it is a moldy egg filled moon cake that has been separated for years, and it still breaks open the filling to reveal the damp and moldy side.

The dust inhaled by the lungs is pasted and collected in the lung cells, vaguely visible, gray, black and yellow!

The heart, which originally had the potential of small fresh meat, can be used as a perpetual motion machine. There are too many clearly visible large blood vessels on the surface of the body, and the blood vessels are padded with white and yellow fat meat pads in order not to be worn out.

Like Hong Yinbao when he was young, he had muscles, but he also had a lot of fat.

Liver, how to say, the appearance of healthy liver can rank second. The wine red body is still very beautiful, just a little sissy and a little soft and crisp.

The kidney, originally long, was ok, but with the adrenal gland on its head, it directly became the little monk who was beaten all over his head, like the head of the Tathagata Buddha in the journey to the west, or like ah San who wrapped his head.

Pancreas, this thing can't be talked about. White hair is greasy. The surface of the body seems to have a grid.

If there is no grid, it can also be said that it has the image of wealth, but with the grid, the picture will be destroyed.

Direct is a thick, white thigh, trembling and wearing a white mesh stockings, which can directly extinguish men's desire.

Not to mention the size of intestines, its appearance can't be seen directly. It's covered with blood vessels. There are all kinds of red, yellow, blue, purple and blue in the body, depending on what color of food you eat.

It is like a fat child in a rebellious period, hanging a large and thick, like a gold chain without color, and painted with colorful makeup.

The bladder is an irregular round ball, which is just a round ball, but there are ureters extending from the kidney at the left and right ends of the ball, and

Directly, it's a Teletubbies with drool and tongue sticking out. It's not cute at all, but a little more obscene.

As for male and female genitalia, I won't talk about it. It's xxx!

The real beauty is the stomach. Wearing a light White Beige suit outside, under the suit are strong muscles, and the blood vessels are oppressed by the muscles with a light red.

It's really like a strong man with thin clothes and meat when undressed.

But if the stomach is rotten, it will not look good. It will directly become a salted fish, or a half dead salted fish dried in a dry pond.

From time to time, one or two vegetable leaves stained with blood and viscous liquid were spit out from the open opening, just like spinach stained with sticky phlegm.

Moreover, the open stomach wall was filled with blood, like a faucet washing the vegetable leaves stained with sputum, with nausea in the blood.

However, today's nausea did not make the operating personnel feel uncomfortable, because HIV is like a kitchen knife hanging overhead, and fear overwhelms all physical discomfort.

People's feeling is actually a bully. When faced with life and death, the brain directly blocks the feedback of sensory organs and strives for survival wholeheartedly.

After entering the stomach and cleaning up the digestive juice and digestive products in the abdominal cavity, Zhang Fan said to Lao song and Ma Yichen, "I sew, I tie knots, I cut threads, and you pull the hook."

"OK!" Lao song nodded.

"Teacher, you must be careful!" Ma Yichen said a word to Zhang Fan nervously.

To tell you the truth, people, who don't have a good face, Zhang Fan is only half a year older than Ma Yichen, and Ma Yichen is still a master. Sometimes, young people's face is too difficult to take down.

Although he admired Zhang Fan's skills, he was embarrassed to call a teacher at the same age.

This is the crudeness of the technical dog. When the word "teacher" invades all walks of life, people who engage in technology actually don't want to call the teacher.

It's not that they don't understand politeness, but that they attach too much importance to this word. This word is not simply shouted out, but a noble word for preaching and learning to solve doubts.

But now, in the face of danger, Ma Yichen was nervous. He left all his embarrassment and concerns and shouted to teacher Zhang Fan in his heart.

A teacher is not to give in but to respect. Hard hearted people don't open their mouth easily, and they don't open their mouth easily.

Zhang Fan smiled and stared at Ma Yichen. Although he didn't say he wanted to accept Ma Yichen as an apprentice, this sincere concern warmed Zhang Fan's heart.

If people are like this, it would be better to be simple.

"Don't worry, it's all right! I'll be careful. "

Ordinary surgery is the work of cooperation between the main knife and the assistant. The main knife sutures, the assistant knots, the second assistant cuts the thread when needed, and the instrument nurse thread and hand over the needle.

When the needle comes out, it must be knotted and connected quickly.

Of course, in a hurry, when you are careful, you may be stabbed by a suture needle for various reasons.

In order to avoid this danger, Zhang Fan directly took the risk himself.

This is not a noble Zhang fanduo, but an unwritten rule in the medical industry.

When a more dangerous operation requires risk, experienced doctors often go first.

There is no such provision in the laws and regulations of the industry, but Chinese doctors follow it by example.

The suture of ulcer is different from that of other wounds. Its suture is a bit like extrusion suture.

Simply put, for example, there is a hole in a piece of paper. The place where the needle is inserted should be about one or two centimeters away from the hole.

Moreover, it is not necessary to tie the knot at the same time. For example, if five stitches are needed to sew this opening, the thread ends are passed through the openings on both sides and the thread is left at both ends.

The corrosion of hydrochloric acid is actually a simple dehydration, which first removes all the water in the body, and then brings huge heat with this reaction.

Therefore, the surrounding of this perforation is actually a little carbonized and hard. If it is closed by extrusion alone, it is estimated that it will not heal.

Therefore, after the suture is put through, the greater omentum is pulled over and filled in the incision, just like a greasy rag to block the wound first.

The greater omentum is rich in blood supply. It will allow the wound to absorb and heal over time.

This kind of suture is very particular, because after perforation, the body tissue is very fragile, and the strength is slightly ignored, which may bring a gap.

## Chapter 570

x

When Zhang Fan sewed himself, he and the instrument nurse Baoyin were the only ones who came into contact with the sharp tools.

Since Baoyin and Zhang Fan went to a free clinic, the girl's professional level has become as plump as her body.

In the past, she only worked as an instrument nurse in the laparoscopic operating room. Zhang Fan was trained in the free clinic. The head nurse also intended to start training him, so she now began to rotate the operating room.

Zhang Fan said to Baoyin while sewing: "Baoyin, be careful, too."

If at ordinary times, Baoyin's careless nature will definitely joke with Zhang Fan. She is afraid of having surgery with Zhang Fan, and talking has become a problem.

But today, the girl nodded carefully. Although she was not kidding, she still said, "I haven't talked about the object yet. I will be careful."

No one laughed, no one thought it was funny.

Three needles passed through and pulled through the greater omentum. Then, Zhang fan used a very exquisite force, just like wearing sweatpants. Neither loose nor tight, neither let the pants fall down, nor let the belly feel the sense of restraint.

This strength, many doctors have to buy some fresh tofu in order to practice, then insert a dried tofu into the tofu, knot and beat.

When the doctor exercised this feeling, he also successfully made his family quit eating tofu!

The three lines are tightened, and the opening in the stomach is like a fat man bending over, and the fat up and down directly drowns the navel.

However, there are more yellow omentum. When the black silk thread is cut, the perforation of the

stomach is a little wrinkled at this time.

Like a large ham hamburger, add a long yellow meat strip in the middle, and then hang it between the intestines and esophagus.

After Zhang Fanjin's small and careful suture, he couldn't help but breathe a sigh of relief. Aren't you afraid? Who dares to stand up and say he is not afraid.

"Lao Liu, inject ice salt water!" After checking the sutured gastric perforation again, Zhang Fan said to the anesthesiologist.

"OK! Zhang Yuan. " After Lao Liu finished, he immediately put the prepared ice salt water through the stomach tube in the patient's nasal cavity.

There are many uses of ice saline in medical treatment, such as ice saline when internal fixation of fracture and ice saline when hemostasis.

Cold saline is also needed for gastric perforation. In some affiliated hospitals of Medical University, Ouyang needs scientific research projects. If large projects do not come, relevant small projects can still come.

In fact, scientific research is similar to architecture, and there is subcontracting.

After coming to the project, Ouyang took the scientific research project to find the leader of tea element.

Although there are only a few laboratories in the liver and gallbladder center, the equipment inside is really super expensive.

In the end, the leaders in charge of the budget hid when they saw Ouyang. The old lady's mouth is tens of millions. He really can't stand it.

Experimental level equipment is really not something that ordinary countries can play with. We don't talk about PCR, spectrophotometer and freeze-drying purification instrument.

Let's say that an experimental refrigerator can make the leaders in charge of Finance suffer from myocardial infarction. 4 ° refrigerator — 20 ° refrigerator — An 80 ° refrigerator is not something that one can solve.

For this kind of experimental refrigerator, there are four or five million. Even if the equipment is bought, consumables are extremely expensive.

Moreover, it may not be possible to see results, so the way of medical research in Europe and the United States is not the same.

Ouyang really scared the leader.

Ouyang Lai doesn't leave the government. She goes to work when the leaders go to work. The importance of running through the liver center to the leaders all the time.

It seems that if the leaders disagree, the people of the world will soon be swallowed up by liver tumors. Finally, the leader was almost crazy when he was polished by Ouyang.

No way, no money can only be given to the policy. This was Ouyang's original idea. In her heart, she didn't expect the tea vegetable government with no industry to invest.
