

## Chapter 591

Zhang Fan invited as many guests as possible. Those who could not come were also very serious. He explained the reason to Zhang Fan as a report. The adult world can't be capricious unless there is ten thousand gold at home.

In Shi Lei's words: even if there is a knife in the sky and Zhang Yuan says hello, I will climb! Although it's funny, the meaning is clear. Everyone attaches great importance to the relationship with Zhang Fan.

This is also considered that Zhang Fan has become a person who is really useful to the society!

At the end of the banquet, Zhang Fan drove Shaohua, who was a little drunk, along the tea vegetable Riverside Road in summer.

With the opening of the railway, more and more tourists come to the mainland. In winter, guest houses on the night of March 41 dare to make a big noise and play a price of 100 a night, while the prices of some slightly new and better decorated hotels are even higher.

Tea has also begun to taste like a tourist city. There are many people, but there is also a lack of tranquility in the past.

Most of the people who travel to the West are southerners. Those who have not seen the sea always yearn for the endless sea. Those who have never been to the grassland dream of galloping horses on the grassland.

Therefore, the tea vegetable street in summer, mixed with the languages of ethnic minorities, is really very lively.

Sometimes, the common language here is not Mandarin, but Nanhe dialect. It's really funny. It's like a small Yue with a high nose all over the street.

With the increase of foreign population, some characteristic diseases in other places will occasionally appear in tea element hospitals.

To tell the truth, sometimes a case of a local disease that has not been seen for thousands of years suddenly appears, which really tests the basic skills of doctors.

Therefore, there is a saying in the medical industry that if you are not afraid of not being able to cure, you are afraid of not being able to see it. When a patient comes to see a doctor, he is afraid that the doctor will be vague.

You can't treat it, but you have to explain to others what the disease is. You have to give them a name.

Many doctors are deeply afraid that others do not know his profound knowledge. Opening their mouth is a series of medical terms, and then the fog at the end of the patient after seeing the doctor. Now the ambiguous terms are also the most disgusting thing for the common people.

Zhang Fan appreciates Xue Fei very much. When Xue Fei meets a disease he can't understand, he will definitely say to the patient: I can't see your disease. I'll find someone to help you.

This is also the case. I'm afraid that the doctor can't see it and doesn't tell the patient, but pulls the medical term to fool the patient. Really, this kind of thing is not absent, but many.

It is estimated that Xue Fei came out of a poor family. He can better understand the patient's mood. Sometimes, to tell the truth, I really hope everyone can be more honest.

Chuck county is a small county on the edge of the grassland. In the early years, the industry here was making Nang and the tertiary industry was making milk pimples. The people here took the shade in summer and the sun in winter, which seemed very comfortable.

In fact, everyone is helpless. Even if there are 10000 mu of grassland here, beef and mutton can't be sold. Ten yuan a catty of beef and mutton is transported out, and the cost increases, which makes it less competitive.

Because of the inconvenient transportation, there are almost herdsmen here. The task of the hospital in chuck county is to count the number of people in the county with the government every year.

It's funny to say that the hospital in chuck county is attended by a group of doctors who can't even speak Chinese to prescribe traditional Chinese medicine for patients' pulse.

The county has a small population and the hospital can't keep people. The county hospital, like the health station, shows people a cold. Even doctors dare not prescribe penicillin, and they really use antibiotics carefully!

In case of slightly serious diseases, they were sent to the city hospital. However, with the opening of the railway, the population of chuck County suddenly increased in summer, and the small county was suddenly filled with foreign population.

Because it is on the edge of the grassland, the government also seizes the opportunity to vigorously develop tourism. Then temperate people see the great opportunity here and invest heavily here.

To tell the truth, sometimes I have to admire the government of temperate people. Wherever they go, they go like a good nanny. Of course, this nanny is their local government.

Chuck is rich in fur resources. After the temperate people saw it, they came with their nanny. Jingjiang county is the largest fur distribution center in the temperate zone.

It's really a bit frustrating to call them counties. Not to mention their counties, even if the scale and population of some towns can be comparable to that of the bird market.

In order to get involved in the local leather market as soon as possible, the nanny of temperate people directly established a friendly county with chuck County! Then there is strong investment and construction.

what? County hospital equipment is not good, no problem, give the money! Not at school? No problem. Here's the money.

With hundreds of millions of investment in Jingjiang County, hospitals and schools in chuck county have sprung up.

The equipment is good, but the technology of hospital doctors still can't be improved all at once.

The dean of chuck county was also helpless. He recruited dozens of student dolls every year, and then the next year, when these people were admitted to a practicing doctor, they flew away.

The Dean didn't dare to speak at every meeting, and the people in chuck county also scolded everywhere: tens of millions of people sat under their hips and couldn't even deliver a sharp doll.

Although there are many curses, the hospital here is still stiff and can't close. Chuck county hospital has two clinical departments, internal medicine and surgery.

Zhang Fan has been here before, but because of the small population, he seldom comes here. He only comes once in several months.

In the middle of summer, an amazing scene appeared at the government reception banquet.

In the guest of honor seat, a leather goods boss just stood up to propose a toast. As a result, he didn't know what the reason was, and there was jet vomiting directly.

Because at the beginning of the party, we ate cold dishes, such as spicy red skin, cold cucumber, beef head and so on.

It is estimated that the boss has bad teeth and doesn't chew much. Then, the red chyle with skin is tomato, the block is red pepper, the green pimple is cucumber and coriander. The yellow is the refined meat on the cow's head.

Clattered like Shrek who ate too much, red and green vomited a mat of noodles. After spitting, I started to spit yellow water and dregs at the trouser legs. The sour smell mixed with the stench of the trouser legs was really disgusting to death.

Most of the participants were businessmen and government employees. Businessmen can walk away with their noses, but government employees can't. A group of people rather frowned, suppressed the hiccup in their throat and eyes, and helped the businessman up.

"What's the matter? What's the matter?" The leader of China Merchants Group pinched his nose and asked his men in a stuffy voice.

These men holding the merchant were also helpless. As soon as they ate two mouthfuls, they met people who even spit and pull. It is estimated that they will never forget in their life.

"I don't know, drunk? I just drank a glass of wine!" A clerk holding the merchant wanted to leave the merchant far away, because he moved a little slower and his upper limbs were robbed.

He can only hold his teeth on his Shihuang Shihuang lower leg. It's really Shihuang Shihuang. The businessman is fat, eats a lot on weekdays, spits out a lot, and pulls out a lot. If he uses a large instrument, it's enough for a large plate, because his two trouser legs are full.

"Ask and shout!" The leader of China Merchants Group was also a tragedy, and he was angry, "if you don't invest, you don't invest. There's no need to spit and pull!"

Continuous shooting and shouting, as a result, he vomited the dishes and began to twitch. Now, even people with high myopia can see that there is something wrong with this person.

"Hurry and send to the hospital!" 120 whimpered and sped into the hospital. The doctors of internal medicine and surgery in the hospital collectively took masks for physical examination.

The leaders of the county have also come. There are problems with large investors. Can you not care. If the higher authorities pay attention, the hospital will pay attention. If you want to continue to take the government's bonus comfortably, you must make a certain appearance now.

"Probably allergic! Perhaps acclimatized. "

"A bad cold?", None of them can get to the point.

"What now?" The superior leaders were angry and put their fingers on the dean's nose.

In summer, the Dean was in a cold sweat“ What? What? First infusion, first infusion, first observation. Use all the ECG monitoring! "

Finally, the president, who was a little quick witted, commanded the doctors and nurses and began to deal with the patients. He wiped them and put them on the monitor at the same time.

"Vital signs are stable! It's just that the blood pressure is a little high, but it's not too high. It's estimated that it may not be a problem? " The Dean incoherently asked the two directors of the Department of surgery.

The two directors are also wondering. They have seen this disease there. After years of neglect, their business has long been in a mess.

As small as the appendix, they have to gather the strength of the whole hospital to do it. In case of this disease, they dare not speak at all.

They turned a deaf ear to the dean's questions, and no one dared to speak.

"What should I do?"

"Cold!"

Really, at this time, doctors want to become dwarfs and let everyone's eyes ignore themselves.

Finally, the dean said faintly: "vital signs are still stable. Why don't you observe for a day first? Lower blood pressure? Or... "

The Dean didn't dare to say about the transfer. In fact, he wanted to say it for a long time because of face and position!

Experts say so, and the superior leaders of laymen have no good way.

"Arrange doctors in the hospital to take turns on duty. If there is any problem, report it at any time."

They are all laymen and don't understand the dangers here. People will vomit when drunk, when carsick, when heatstroke, when allergic, when fracture is very painful.

In other words, all systems of the body will make the digestive tract uncomfortable as long as they are uncomfortable.

However, these vomiting are gentle. Generally speaking, these vomits are like a gurgling brook. Although the patient's hiccup is as loud as thunder, he can get some vomit from his shoes at most.

Like the exchange of saliva between lovers, this vomiting is gentle and pleasing to the eye.

But once there is jet like vomiting, it is like cheating as a result of lovers.

Then, when one of the cheated people spits out saliva to the other with murderous strength, this time is called spray.

Just like when a machine gun tilts, vomit can become a fountain. Not along the corners of the mouth, but when it can be sprayed into the air.

Well, at this time, don't even think about it. There's something wrong with the brain. Only when there is a brain problem or a big problem will there be such jet vomiting.

Early brain problems, there will be a little high blood pressure at most, or even low blood pressure, and other signs are not special at all.

However, once this golden moment is missed and there is a vital sign crisis, even if the gods come down, there is no way.

When the patient was sent to the hospital, he didn't vomit anymore, because he had vomited all over for a long time, and his business was not good, so the doctors did it for face.

Sometimes, people are unlucky and can't stop them, but sometimes, when they are on the line of life and death, they may meet noble people.

After leaving the post of secretary, Kang Jingjing sat in the office in the urban area for some time. Because of her outstanding ability and the opportunity of large-scale development in Chuck County, her superior sent Kang Jingjing to China Merchants to become the second leader.

The girl is also a very steady person step by step. This kind of large-scale development can make achievements. In Chuck County, where the industry was making Nang and the tertiary industry was making milk pimples, you don't have to think about it. A few years later, the absolute GDP turned upward.

She came to the China Merchants bureau to attract investment. Therefore, when the businessman was sent to the hospital, Kang Jingjing, who left the hospital, always felt something wrong. As for what went wrong, she couldn't say.

But I just don't feel right. About the human body, she also has a way to take out the phone, open the address book and look for Zhang Fan's phone. If ordinary people estimate that they can only spend their mother.

"Zhang Yuan, I'm Kang Jingjing. Are you busy? I have something to ask. " Kang Jingjing asked Zhang Fan directly without greeting.

When the two met, one was a secretary and the other was a newly graduated little doctor. However, Kang Jingjing would be a man. In those years, she didn't dislike Zhang Fan as a little doctor. She was like an elder sister in all aspects and instructed Zhang Fan in all aspects.

So they have a good relationship.

"Ha ha, director Kang, come on, what's the matter?" Zhang Fan smiled and joked, and went straight to business.

"It's such a situation..." Kang Jingjing stated the situation at that time and the situation after entering the hospital to Zhang Fan.

"No, I have to have an operation right away. I can't afford the delay." Zhang Fan immediately said something to Kang Jingjing.

"What? What should we do now? Let the hospital send 120 patients to the city? Zhang Fan, you must help me! "

Kang Jingjing's eyes are blue when she listens to it. She is responsible for it. If something really goes wrong, although she can't be held accountable, after all, there is one less person for investment promotion. People are like sailing against the current in their official career. If they lose an opportunity, they may be a step slower forever.

"No, the doctors in Chuck County don't think they can take any good measures in 120.

Now, you ask the city hospital for support through the government. I'll take someone to Chuck now.

Let the people of the county hospital do head CT for the patients, we must ensure the smooth airway, and let their surgeons sew the patient's tongue on the lips when necessary. Come on! "

"Good! Thank you, Zhang Fan! " Women are emotional. At this moment, suddenly she seemed to be infected by Zhang Fan's eagerness, and said something without a head.

Zhang Fan was so polite that he hung up and called Xue Xiaoqiao.

"Come on, take the surgical instruments and go to the county for surgery. Extracerebral surgery, the patient's life is critical! "

Xue Xiaoqiao hates Zhang Fan. He just received his girlfriend and was about to hold hands. As a result, he was disturbed by a phone call.

"What's the matter?" Xue Xiaoqiao's girlfriend, to tell you the truth, is a very educated girl. She is bookish when she talks and smiles.

"Er, I, I..." Xue Xiaoqiao pinched his hand. "I have surgery. I must go now! Sorry! "

"Go and be safe. I went back to the hotel. " The girl gently tidied up Xue Xiaoqiao's collar.

## **Chapter 592**

People are very complicated. Mental complexity is as complex as physical complexity. There are intuitive concepts, such as the body, where it is, waiting for you to study. There are also non intuitive, such as various desires.

There are many kinds of desires. Of course, I can't talk about other things clearly and dare not talk about them. Let's talk about the desire to eat.

People will try anything with their feet facing the ground and their backs facing the sky, and they can also sum up all kinds of eating methods and practices. This is the characteristic of Chinese people.

The domesticated ones are tired of eating wild ones, and the wild ones are tired of eating fresh and tender ones. They pursue the eating method abandoned by their ancestors in those years.

Win! It seems that after the Song Dynasty, the eating method was eliminated, and then it was secretly learned by the pill country.

Throughout Asia, even ah San does not have as many digestive tract diseases as pill countries. Many people seem to be confused after they go to the meatball country.

WOW! It's so clean. Look at people's plates and people's kitchen. WOW! How clean!

Is it really clean? Which is forced helpless. Not to mention Asia, the medical level of digestive tract in Marubeni countries all over the world is in the top three. An endoscope of digestive tract is directly invented and monopolized by Marubeni countries.

The main reason why the medical level of their digestive tract is so good is that there are many patients.

Turn over infectious diseases and you will find a very strange phenomenon. African infectious diseases are dominated by viruses, all kinds of viruses, while Asia is dominated by parasites, which is very interesting.

As for Europe, they are born with genetic problems. It is estimated that their number was too small that year, resulting in

When Zhang Fan called Tang Jingjing at the first time, the girl with thought and more action reported to the leaders of the county at the first time.

"Zhang Fan? I seem to have heard of it!" The leader of the county said with some memories, and then said as if suddenly realized: "tea vegetable is a knife! Hurry, hurry, hurry, listen to him. Chuck can't count on it."

Then they returned to the county hospital. The president watched a group of people go back, and his scalp was numb.

"Come on, first stretch out the patient's tongue and sew it on the lips, and then improve the patient's head examination at the first time. Come on!"

Tang Jingjing holds a mobile phone in her hand and gives medical advice to the people in the hospital like a superior doctor!

This kind of thing, no one will stand up and say why to check and sew the tongue ~! Absolutely not. Anyway, it is now. As long as a superior gives instructions, the doctors in chuck county will do it!

Tongue fixation is to worry about suffocation caused by falling back of the tongue, while CT is to understand the situation of the head.

Although Zhang Fan doesn't know what disease the patient is at present, he can be sure that there is a big brain problem now.

A group of people pushed the patient with the tongue sewn into the CT, and then the results came out, but no one could see what it was. Anyway, now we all know that there is something wrong with the patient's brain, although we don't know what it is!

Tea vegetable, Zhang Fan went downstairs, drove the car, took Xue Xiaoqiao with equipment and set out. Xue Xiaoqiao, who had been gnashing his teeth, was suddenly ignited by his girlfriend after finishing his collar! Hey, this man, still can't bark for too long!

Since Zhang Fan had a special license plate, he slowly found an advantage. Anyway, he can drive fast now and ignore the speed limit standard on the highway when necessary.

Men like to play with toy cars when they are young. When they grow up, they change to play with real cars. It can also be said that men's hobbies have hardly changed.

I liked my little sister when I was young, but I still like my little sister when I grow up. Hey! Also a boring animal.

"Zhang Yuan, you cow. You can get this kind of license plate. Get me one too!"

Xue Xiaoqiao saw the red license plate before getting on the bus. He knew the power so well that his saliva came down.

"Ha ha!" Zhang Fan doesn't have a problem. Where does he have this ability.

Along the way, Zhang Fan saw the car overtake and sped away. Some small cars, seeing the big cool road and Ze Biao, also gave way. There are too many such things in the frontier.

"Is there another problem on the border?"

When Zhang Fan drove into chuck county hospital, the president of chuck County finally breathed a long sigh of relief, "the great God has finally come. It's really TN's suffering!"

"Zhang Yuan!"

"Zhang Yuan!"

Some people in the crowd came out to say hello, "president Zhang has worked hard. Look at the patient's examination!" The leaders of the county also took the initiative to shake Zhang Fan's hand.

At this time, Tang Jingjing hid in the crowd and quietly looked at Zhang Fan who could be happy for a long time.

Xue Xiaoqiao looked at Zhang Fan with envy. Doctor, who doesn't want to be an expert who will be recognized everywhere.

At this point, Zhang Fan is too good. As long as he is in the tea vegetable area, whether in the urban area, counties and townships, or even the bird market, Zhang Fan has a name. People who know or don't know will take the initiative to say hello.

Moreover, in the counties and townships, Zhang Fan is a cow. Everyone knows Zhang Fan's ability too well, because Zhang fan does almost any surgery and directly monopolizes the operations in the counties and townships. Although the county and township doctors envy Zhang Fan's earning level.

After a brief greeting, Zhang fanlue took up various examinations of the patient.

"What about the MRI results?" After Zhang Fan had a look, he found that there was no MRI.

"Er ~! The doctor of MRI is pregnant. No one in the hospital can use it! " The president of chuck county hospital burned his face! What a shame.

"Oh, it's all right. Has the machine warmed up yet, Dr. Xue? Let's do an MRI for the patient."

"OK, Zhang Yuan!" With these words, Xue Xiaoqiao went to operate the machine himself. Xue Xiaoqiao also worked hard outside his head.

After a while, the patient finished MRI. Zhang Fan and Xue Xiaoqiao combined CT. They studied it carefully. Zhang Fan said, "cysticercosis!"

"Well, the probability of cysticercosis is very high!" Xue Xiaoqiao looked at Zhang Fan in surprise. Zhang Fan's judgment was too fast. When he was still thinking, Zhang Fan had come to a conclusion.

And as soon as Zhang Fan said, his brain suddenly lit up and immediately flashed the characteristics of cysticercosis: it's so similar!

The brain tissue in the head, to tell you the truth, is a lump of phosphate similar to fat.

Although the tissues are similar, but the structure is different. In other parts of the body, phosphate acts as an energy bank or becomes the so-called sexy! And when you get to the brain, you're doing great things. It's definitely not like goods.

So, just like people, don't belittle yourself. If you don't succeed, it's not that you're bad, but that you haven't reached a special position!

Brain, although it looks like a lump of fat meat, in fact, this thing is also very powerful at ordinary times. A healthy brain is the best against viruses and bacteria in human organs.

However, for parasites, the brain is powerless. In the digestive tract, the body can also regulate gastric acid, pancreatic juice and other digestive juice to fight with parasites.

And once it enters the brain, well, the parasite finds something delicious. Soft and delicious, not to mention high energy.

There are many kinds of parasites in the brain. The most characteristic is hydatid, that is, the worm of liver hydatid enters the brain and becomes brain hydatid.

If the patient today is cerebral echinococcosis, it is estimated that doctors in chuck county will see it, because there are too many diseases in Northwest China, Monroe and other places.

Hydatid is usually parasitic in the small intestine of dogs and sheep. It will excrete insect eggs with feces,

so after teasing pets, you must wash your hands carefully, especially children. Don't play with dogs as much as possible. It means that children may lick dogs

And blood sucking insects, which are named after the name of the meatball country. This thing is not a glorious thing. And most of them are young people infected.

Most of the insects live in the lungs of the human body. If they suffer from this disease, they will cough, cough and cough. Maybe they can cough up a ball of pink meat one day. Although it's mainly lungs, it also crawls into the brain.

Most of these parasites live in some stone crabs, crayfish and Wedelia, so they eat less drunken shrimp and live stone crabs and crayfish, which are eliminated by the ancestors of China.

There is also cysticercosis, which has the widest epidemic area, almost all over the world. However, it is rare in areas that do not eat pork. Therefore, doctors in chuck county have never seen the symptoms of this patient.

Chak County in the frontier is a pastoral area and mainly eats beef and mutton. Therefore, some parasitic diseases dominated by pork have not been seen.

What the hell is this thing? It's actually a pork tapeworm.

Many older people should have the impression that they failed to pass the hygiene and epidemic prevention in those years. Most people felt uncomfortable after eating pagoda sugar.

Then I went to solve the big hand. As a result, I looked back. Darling, insects, white and fat long insects, crawling in yellow!

There are naughty boys who can jump up the bug with a wooden stick, and then look, darling, this thing is so long, almost one meter long.

Yes, this is the tapeworm. The person who pulled it out was lucky. It didn't get into his mind.

How did the disease spread in those years? No animal quarantine, which is not what we want to talk about today.

Let's talk about how to spread it. In those years, the conditions were not good. There was only a kitchen knife and a panel in a family. Raw and cooked are together.

After cutting the raw meat, you may also cut the cooked meat, and the insect eggs in the raw meat will enter the mouth with the cooked food from the kitchen knife or panel.

Now that the conditions are good, ordinary families also begin to pay attention to the separate operation of raw and cooked food.

However, the parasite has not been eliminated. Why.

It is because of some people's special appetite. Marubeni paid close attention to the country next door to China. In the early years, it provided great assistance to the country next door, which also caused difficulties for China later.

Then, these countries also learn to eat sashimi from meatball countries. These countries do not rely on the sea. When seafood is transported to their territory, they can't eat it without putting a lot of condiments.

If they can't eat seafood, they also have a way to eat beef, mutton and even raw meat of deer.

This way of eating, let's talk about the practice of this food. The meat should be the hind leg meat of the calf or lamb of that year.

The meat here is less fat, not boring to eat, and the meat is tight. It can really compete with salmon.

Eat and eat, and then they were learned by the Chinese. The veal was not enjoyable, and then the pig thigh was manipulated again.

Moreover, most of this way of eating is the way of rich people. Most people just get braised meat to satisfy their greed.

The rich are different. Eat, eat something special. Domestic pigs can't. They are too fat. Even the hind legs of pigs have too much fat. It's estimated that they have to vomit in one bite.

However, the boar is different. Get a boar hind leg, and then peel it and freeze it. Freezing is also very particular. It is not blindly frozen into popsicles, but when the liquid in muscle tissue has just formed ice flowers, this is the best time to eat.

Sliced with a sharp knife, it is as thin as a feather. When you pick it up with chopsticks and put it in front of you, it is really crystal clear. Cool tissue liquid frozen ice flower fixed the muscle tissue. To tell the truth, it's really beautiful, red and white.

But are there any insect eggs in it? No one knows that tapeworms can grow up to several meters, but their eggs can no longer be seen under the electron microscope.

Then, take a big bite, huh! It's so sweet. Between my lips, I linger with ice crispness mixed with the sweetness of a little raw meat. This is the most exquisite taste of the so-called sashimi.

After protein decomposition, it feeds back a taste of sugar. This taste is really unmatched by cooked protein.

The boss loved it. When he came to Chuck County, grassland sheep and grassland cattle were bored. With a group of people, it is illegal to shoot wild boars and other wild objects all over the grassland, but wild boars don't matter.

There is a special occupation in the frontier that does not exist in the mainland, that is hunter.

It's really not bragging. When Zhang Fan first met a patient of this profession and said that his profession was a hunter, Zhang Fan thought the patient teased him.

At the junction of Frontier forest and grassland, there are a small number of people who have gun certificates and are really hunters.

The terrible thing about tapeworm is not its length, but its incubation period and course of disease.

It can generally lie dormant for three or four months, and the course of disease can last for more than 20 years. Even if it enters the digestive tract, it can also take anti-insect drugs. Once this thing enters the brain, it is an extremely terrible existence.

Into the brain essence, that is, which part of the brain we usually use to rinse hot pot. Once there is a lesion in this place, the patient will directly suffer from mental retardation, dullness and indifference. If it is more serious, it will become dementia, which is no exaggeration. Eating meat leads to dementia. That's where it comes from.

It appears in the ventricles, that is, the channels connecting the brain and spinal cord. Because the adult size of the insect is too large, it directly fills the cavity.

The fluid in the brain cannot communicate with the spinal cord, which is a severe headache and rolling pain! And vomiting.

Then there is a stiff neck like a rabies attack. Just like a wooden man, he directly became a straight stick. Turning his head is extravagant hope!

The patient's lesion appeared in the arachnoid. Vomiting, stiff neck and abnormal urination all appeared.

"In the arachnoid!" Xue Xiaoqiao also determined the l

## **Chapter 593**

Really afraid of death, not delicious goods. Brain parasites are similar to brain tumors and can hardly be cut clean.

Even if your level of cattle is driven to lawlessness, you can't cut it clean. If it grows in the functional area, do you cut it or not?

It just grows in the place where you manage your \* \* do you want to cut it? It just grows where it manages breathing. Do you cut it?

Therefore, the difficulty of craniocerebral disease is also difficult here. It really has a clear division of labor, one for each. If there is no point, there will be a corresponding lack of function.

When the disease is deadly, you can only choose to avoid its weight and abandon its lightness. It depends on the patient's luck. It's like rolling dice.

What to do now? We can only open the skull. The patient has a life-threatening condition. There is no room for hesitation.

"Inform the family! Get the right to operate." Zhang Fan put forward requirements for the leaders of the county.

To tell the truth, when it comes to unity, southerners are really more united than northerners. This is not a black area, but a practical experience. Perhaps it is the truth that we must work together in the same boat from ancient times. They may understand unity more thoroughly.

Some people who have the same hobbies as patients are worried all day. It is estimated that someone is ready to go to the city for examination.

The patient's family members are thousands of miles away, and they can't come for a while. The chamber of Commerce of temperate people is really powerful.

Those who can pay, those who can contribute, and Zhang Fan's information were heard by them in a short time.

"Yes! I've already asked. At present, Dr. Zhang is the best doctor in this place and at this time."

The directors of the chamber of Commerce gathered together to gather the information. Money is good work!

The operation begins with craniotomy. This disease is not cerebral hemorrhage. Just run to the bleeding point. This disease is super troublesome. We must first solve the patient's disease symptoms.

For example, the patient now vomits, urinates abnormally, and has epileptic symptoms. First, the focus should be removed. If it is bleeding, draw the accumulated blood and stop bleeding.

But this brain worm disease can't work. First cut off the focus, then decompress it, catch the adult, and finally drugs. Large doses of drugs kill insects. God knows whether they can be killed or not.

Brain tissue is too complex, and there is a barrier. As long as parasites enter the brain, there is generally no good way. Surgical treatment is also destructive treatment.

The patient is bald early and doesn't need skin preparation. Like the earth, the human skull is not a whole, but pieced together, and the weakest place is the frontotemporal part, that is, the so-called temple.

Into the skull, Zhang Fan and Xue Xiaoqiao entered bit by bit and separated slowly.

In the operating room, Zhang Fan was about to collapse, and the training of the county hospital was still a little poor. When Zhang Fan and Xue Xiaoqiao opened the patient's brain and began to enter, the anesthesiologists and itinerant nurses all drew close like watching some wonderful accident. He pulled his head and looked at the strange.

This is really the first craniocerebral operation in their county hospital, and these people's curiosity is inevitable. However, at this time, anesthesiologists must pay great attention to the patient's vital signs and should not be distracted at all.

"How much breathing, heart rate?" Zhang Fan's voice was very dry and hard. He said to the anesthesiologist and nurse watching the excitement.

Everyone walked away. Zhang Fan rolled his eyes at his assistants for the first time on the operating table.

After entering, Zhang Fan's ophthalmic forceps carefully entered the brain tissue, just like fiddling with immature brain flowers with a small fork.

Gently avoid blood vessels and important functional parts. The brain is an irregular ball. If Zhang Fan enters a little, he gently enters the ophthalmic retractor to set aside an operable space.

Then give the hook to Xue Xiaoqiao "Be sure to hold it!" Zhang Fan gently explained to Xue Xiaoqiao.

"OK!" Xue Xiaoqiao knows how powerful he is. Holding a weightless retractor in both hands is like

supporting a heavy object weighing as much as a kilo.

Little by little, time is slowly lost. Surgery outside the brain is slow, very slow. In fact, time is spent in the separation structure.

The separation of general surgery and orthopedics, as long as we avoid blood vessels and nerves, is actually very rough. The big finger and index finger are as fast as opening the meat seam.

And outside the brain, I dare not. In popular words, how to avoid the nerves of a brain?

Therefore, when doctors perform extracerebral surgery, they should first choose places with gaps. When there is no gap, they can only choose unimportant places to start.

For example, when the two places of managing breathing and \* \* want to give up, the doctor doesn't have to think about it, and just clicks the place of \* \*.

A few days ago, Zhang Fan had an operation for intracerebral hemorrhage. Xue Xiaoqiao had seen Zhang Fan's hands. They were abnormally stable. There was no shaking with the naked eye.

Today, he saw what precision is. Mm level gap, Zhang Fan goes down with a pair of pliers without a trace of melancholy.

When Zhang Fan took the matte metal pliers and went on, Xue Xiaoqiao's heart lifted up when the pliers were inserted into the white brain tissue covered with blood vessels.

"Don't you have to explore it first? Is it not afraid to insert such a narrow gap into the organization? Really... "

However, when the clean pliers enter, they come out without a trace of blood or tissue. They don't damage any brain tissue at all, only a little mucus between brain analysis!

"Too accurate, really too accurate!" Also single, but Xue Xiaoqiao really admired it.

With cerebral hemorrhage, Xue Xiaoqiao still felt that he could catch up, but in case of such insertion, he knelt directly.

Little by little, not only Zhang Fan, but also Xue Xiaoqiao's sweat came out. The separation of brain tissue is really troublesome. There can be no distraction at all.

According to a study, people can only concentrate for about half an hour to 40 minutes. It's all bullshit. Come and see a doctor outside the brain. If you don't concentrate for two hours, you're unqualified.

What if you're distracted? The patient lying on the operating table is unlucky. If he is careless, he has hemiplegia and crooked corners of his mouth. He can't stop his saliva without seeing a beautiful woman,

just like a baby.

If it is serious, it can kill the patient directly at that time. Therefore, doctors outside the brain should be people with great feelings and rich families.

It's really hard for people who want to get rich to do it, so when a doctor has a mortgage, don't let him do craniocerebral surgery for you. Too many distractions will definitely affect the operation.

When Zhang Fan's sweat had soaked three or four gauze, they finally entered the patient's brain lesions.

At this time, only Zhang Fan and Xue Fei could see the lesion, because it was too deep and narrow.

It's like inserting a hole in the brain flower with chopsticks. Without a shadowless lamp, it's really a dark hole!

"Bugs!" Xue Xiaoqiao said it with a slight trembling. This kind of operation was also his first time. Therefore, when he saw the insects, he was really excited, just like playing barbecue next to the bomb. It was too exciting.

Extracerebral surgery is high-end, regardless of the high-end technical requirements, high-end difficulty coefficient, and even the cleanliness is very high-end.

There is a brain suppuration outside the brain, and this suppuration is not a thing in general, just like a mouthful of phlegm.

Let's talk about parasites. In general surgery, it can directly kill people's diaphragm, especially the parasites that cause obstruction. They are disgusting to the extreme.

Open your stomach and cut open your intestines. If it's more serious, you can directly see a mass, a large mass of insects, which is not much smaller than the steamed bread eaten by Zaocheng. It's definitely Dongshan steamed bread, not curved small steamed bread.

The tail and tail, the body and the body are intertwined together, just like an earthworm mass magnified dozens of times. It wriggles and doesn't quite wriggle. Then the insect body keeps secreting liquid, which means that they are mature and ready to mate.

The pink and tender insects secrete sticky liquid and move constantly between feces. For a time, they are really like a ball of pink meat. The pink meat of countless branches of the elderly swims in the sputum, and yellow and pink surge!

If the lovely color is disgusting, it's really super disgusting. It's like page's nose is stained with some yellow object, and he's still talking and drooling wantonly! What's more, sticky saliva.

Directly let the doctor spit out the steamed rice of carrot strips eaten at noon!

Not to mention seeing it, the doctor has to hold these insects out of the stool with both hands.

Just like carrying a bowl of rice soup, he didn't dare to shake and sprinkle these tender powders.

The special sexual maturity smell of insects, coupled with the smell of defecation that has not been defecated for a long time.

My God! People who have smelled this smell, there is no smell in the world that can knock him over.

Outside the brain, it's not so disgusting. At most, it's like biting an apple, and then seeing a slightly yellowish white insect, which is a little fat.

Insects in the digestive tract, because the food is more complex, so the body will appear strange pink.

In the brain, it is mainly phospholipids, so the color will turn white, and there is a slight light yellow under the support of brain tissue.

There are usually not too many insects in the brain. One insect is deadly. If there were more people, they would have hung up.

Therefore, when Xue Xiaoqiao saw the bug, he gently breathed a sigh of relief. He was deeply afraid that Zhang Fan could not find the bug after opening a hole in the patient's brain.

The brain is not a broken copper tile. If you open a hole, it will be very damaged. If you open a hole and find that the bug is not there, it is really a super troublesome thing.

When you meet two knives, the hole in your brain is full. You really don't want this hole.

"Zhang Yuan, that's right! It's really accurate to hit where you mean!" Seeing the insects, Xue Xiaoqiao's whole body suddenly softened and his heart dropped when he lifted it up.

"Yes!" Zhang Fan didn't say anything. This is the problem. This is Zhang Fan's problem. He doesn't like to talk after surgery. Unlike some doctors, yellow jokes fly while operating.

In the hospital, on Huang Duanzi's hand, urology is the first and gynecology is the second! Finally, this ranking can not be refuted. As for the reason, it is very simple because they have seen too many wonderful things.

The bug has found it. Now we have to find a way to take it out. Don't think it's easy to see insects. This is also a very troublesome thing.

It's a big deal to catch parasites in the digestive tract. It's really impossible to cut off a section of the digestive tract. But it's different outside the brain. Without saying anything else, Zhang Fan's level, the

brain hole, not to mention the fingers, is too high. The thicker pliers are not easy to unfold.

Can't you turn it up? No, outside the brain, the smaller the damage, the better. The size of a millimeter can divide doctors into 369 grades.

Moreover, if you are not careful with pliers, you will break the worms. Tapeworms are so hateful. It can be said that if you keep a little, you may become a family.

"Silk thread!" Zhang Fan thought a little and said to the nurse. Then, after taking over the silk thread, Zhang Fan tied the knot in the air, and then pressed the node down slowly with pliers.

"Well! Variation of deep knotting?" Xue Xiaoqiao was stupid. He was really stupid. The simplest operation of a surgeon made Zhang Fan play flowers.

"Yes!" Without Li Zixiong, Zhang Fan has nothing to be proud of. If Lao Li were here, Zhang Fan would still be happy.

Two knots, one end and one tail, Zhang Fan gently hung the head and tail of the big bug. This small-scale operation is really difficult. Zhang Fan's hand is very amazing.

The bug is like the tail of a gecko. When it goes down with a pair of pliers, it will struggle. If it doesn't do well, it will become a bug that bites half of the apple, half into the stomach and half into the depths of the apple.

Its body structure is super terrible, just like a wild sow. The sow has two rows of milk on the abdomen (a) the head is like two rows of buttons, and a bristle on the back.

This thing has two rows of suction cups with denser buttons than sows on its abdomen, and its back is full of barbed cilia like a flag.

It can not only be firmly adsorbed, but also be hung hard. It's really a flying monster.

Hang the line at both ends and gently clamp it with pliers in the middle. What Zhang fan does is really foolproof. The clamping strength of this pliers is really great. It's like licking your tongue on the sugar coating without breaking. This is Kung Fu.

"I grasp the right silk thread with one hand and the pliers with the other. You lift the left silk thread. When I say it, I should lift it slowly and vigorously. I must not use violence. Remember, lift it slowly. Can you do it?"

Zhang Fan said to Xue Xiaoqiao.

Xue Xiaoqiao bit his teeth and said to Zhang Fan, "yes! Be sure to use slow strength!"

"OK, get ready, mention. Come on, slow down, slow down, can you feel resistance?" Zhang Fan asked Xue Xiaoqiao as he mentioned it.

Insect resistance ~! It's really demanding. It's really difficult for single Wang to experience such a small resistance.

Nervous, really nervous, as long as this time, a general idea and a little more strength, all previous efforts will be wasted. As long as a section is broken in it, we can only expand the brain hole and look for it!

Once it expands, there will definitely be problems in the location of the patient's focus. If it is not done well, it is the patient's lifelong dementia.

Hundreds of suction cups are adsorbed on the brain tissue, gently pulled, and continuously pulled, just like a tug of war, the two sides compete again.

It's as heavy as a kilo. At this time, it's not too much to say. For a few minutes, Zhang Fan waited again, waiting for the insects to take off.

The bug will wait for Zhang Fan and Xue Xiaoqiao. If the bug can speak, it will definitely say: lianger goods, I'm tired to death, and the buttons are about to fall off.

Sweat flowed like a river, and the pain from the muscles of my arms had been protesting constantly.

As for the thighs that have stood for hours, they have long been ignored by the brain.

Pull, pull, pull, it's really funny. Two strong men were pulled off by a bug.

## **Chapter 594**

Good doctors are not easy to cultivate, whether it is internal surgery, Chinese medicine or western medicine. Doctors trained by modern medical colleges can understand fur.

Regardless of their particularity, these doctors can also improve the health requirements of the increasing needs of the people. Once it comes to particularity, there is really a fight.

Super Xueba doesn't mention that this kind of character is not something that ordinary people can be or meet. Most ordinary doctors are like students in school.

Most of the subjects in the regular scope can pass. But what about the Olympic title? One, two, all stupid.

In fact, this is similar in every industry, especially in the technology industry.

This is also one of the reasons why SARS was not controlled in the early stage of that year, because the respiratory tract test suddenly became a difficult problem at the Olympic mathematics level every winter, and many doctors were caught off guard.

Because the SARS virus had never appeared before, all of a sudden, a country was almost tossed and stopped.

Then several special talents came out and used different treatment methods to control the pathogen by any means. Then more than ten years later, other medical colleges and universities studied SARS thoroughly. This is still a top medical college.

The epidemic in that year was really a top super doctor who entered the epidemic area with a group of ordinary doctors.

Medical assignment? Western medicine is divided into North and south, and Chinese medicine is also divided into North and south.

Southerners are more used to Chinese medicine, but the top Chinese medicine is almost in a small place in North China.

Northerners believe more in western medicine, but the top experts of Western medicine are almost all in the coastal generation.

There were several schools of treatment in those years. Finally, as long as they were effective, these doctors became everyone. It's really hard to say who was powerful.

Doctors become useful. The doctor's cycle is too long. After graduating from medical college, I just stood at the door of medical treatment. I can't say I have made achievements for more than ten years or even decades.

In fact, the significance of modern medical education lies in the production of a large number of standard basic products. Most of these basic products follow the rules and become a member of ordinary medical treatment, that is, they can only see the routine diseases of their own departments in the hospital.

The doctors in the hospital shout every day to start their own business and open their own hospital.

Why didn't you see a few doctors come out to open a hospital? No money? Even if he had money, he didn't dare to come out. He really wanted to give him a hospital and let him be responsible for it. He could scare him to death.

Is there a very powerful private hospital in China? Yes, in a very young city in the south, there is a new hospital established by a group of doctors with cooperative system.

These people have Dr. turtle and local doctors. Their technology is not inferior at all. Almost one or two of them fell off the position of climbing director.

Then, gather together to keep warm. Why can't this system be popularized? Because they can't afford it, only in super developed and affluent cities can they afford these people. As for private hospitals in backward cities, it is still the world of a certain department of people.

Only a strong country can choose from a large number of ordinary products, so that ordinary products can really become special products.

These ordinary products are their own through decades of continuous self-learning before they finally stand out.

Not to mention the time spent, the cases and money are astronomical, which is why there are no people outside the northwest.

Master Zhang Fan really knows this sentence well when he leads him into the door to practice personally. Lu Lao will check Zhang Fan's homework every week, and then continue to give Zhang Fan a new topic. At most, he will give some advice in the general direction. The rest depends on himself.

Often with the guidance of Lu's old sentence, Zhang Fan has to turn to more than n books to understand and study.

Thanks to the system, Zhang Fan pulled Zhang Fan out of the mortgage and living expenses early. Otherwise, he would have to devote a lot of energy to consider these things.

Moreover, the girlfriend he is looking for is not a material woman. Shaohua really has nothing to say about Zhang Fan's career. This is also the family member that most doctors dream of.

If Zhang Fan's success is divided into regions, it can be divided into three categories: first, he can have a

liver, second, he has a good system, and third, he has a good living and working environment. It's really a good time, place and people. Zhang Fan has it, so he can't help but fail.

The two rows of suction cups of tapeworms are also supported by energy. Little by little, when Zhang Fan and Xue Xiaoqiao spent a lot of effort, the man was still a man, and the worms in double row button coats were pulled out.

Zhang Fan had no white liver after opening his mind. He not only pulled out the insects, but also calmed Xue Xiaoqiao's heart.

Doctors, especially those who have some ideals and some pursuits, will spend their good years in vain. Xue Xiaoqiao had thought it out for a long time. Staying for half a year can be regarded as fulfilling the wishes of the elderly at home.

Without being a soldier, he always feels a little indebted to his father and grandfather. He is also a man!

But when Zhang Fan entered the brain with a very powerful technique and saw Kung Fu between knives and pliers, Xue Xiaoqiao was convinced by Zhang Fan's skill.

He is an academic graduate student. He has never seen such a powerful technique. Therefore, he was originally staying for half a year. He made up his mind and must learn Zhang Fan's skill.

The insect has no strength on the suction cup, but physically, this thing is still very grumpy. When facing Zhang Fan and Xue Xiaoqiao, the insect doesn't say anything and spits in his mouth.

Just like an unreasonable naughty, if I can't hit you, I'll spit on you and disgust you!

This thing looks like a pink moving meat strip with the naked eye. If you look at it with a magnifying glass, darling, it's very fierce. What is a tank? If this thing is enlarged to the volume of the tank, it is estimated that it can treat the tank as beans.

If parasites are found in the digestive tract, insecticidal drugs can be injected directly into the lesions, and the adults can be killed directly to the eggs.

But not when it comes to the brain. If insecticidal drugs are injected directly into the brain, patients will have epilepsy. Therefore, parasites in the brain are very troublesome.

There are not many good methods. We can only take large doses of anti insect drugs at the cost of consuming the liver and kidney. Just like taking ten grams of insect repellent, the brain will proudly absorb so 0.1 gram.

Zhang Fan and Xue Xiaoqiao started the operation in the afternoon until chuck's sun set in summer. Chuck's sun set in midsummer is close to 11 p.m.

After the operation, the patient was very quiet, no hiccups, no convulsions, and lay firmly in the ward, just like sleeping.

In the future, he may occasionally foam at the mouth and twitch his limbs, but it will not be fatal. It can be regarded as a slight deficiency in the United States.

The patient was saved. Tang Jingjing was appointed by the leader as the host to receive Zhang Fan.

The people of the temperate chamber of commerce were even more enthusiastic. Seven dishes and eight bowls were served on the table. Zhang Fan was better. Two years of training was not given in vain, and Xue Xiaoqiao was a little uncomfortable.

Really off force, holding chopsticks in his right hand, can't stop shaking, and the shaking of sandwiching vegetables is like Parkinson's.

But this bitterness brings pride. This feeling of being recognized is definitely beyond the laboratory.

"Come to Dr. Xue and have a drink of yellow rice wine. This wine warms the stomach and soothes the liver. It's a good thing!"

"Come to Doctor Zhang and have a bite of seafood. It's by air. We people who grew up by the sea can't give up a bite of fish anywhere."

Speaking Mandarin by temperate people is really a torture to northerners. They can't straighten their tongue, but they are ignored in front of such fresh and large seafood.

Zhang Fan doesn't drink wine, nor does Xue Xiaoqiao, but Zhang Fan and Xue Xiaoqiao really like seafood. They ate seafood like a game.

That is, these local tyrants can eat such fresh seafood. The seafood in the northwest supermarket dare not thaw. The thawed seafood is directly a biochemical weapon.

"Zhang Fan, thank you!" Tang Jingjing whispered to Zhang Fan.

"Tang Ju, why are you becoming more and more polite? Isn't this our doctor's job!"

How about coming to chuck? "

Zhang Fan and Tang Jingjing chatted without a word, while their eyes were staring at Xue Xiaoqiao.

After the guy stopped shaking his hands, he ate the prawns too fast. He pinched his head and grabbed his tail, pulled it, then hissed and slipped his mouth, and sucked the prawns into his mouth. He was so good at eating!

Zhang Fan and Xue Xiaoqiao had planned to return to tea all night. As a result, not only Tang Jingjing, but also the people of the temperate chamber of Commerce wouldn't let Zhang Fan and them go, holding on.

The meal was deliberately delayed by them for a long time. Tang Jingjing was really worried about Zhang fan running at night, while others were worried about Zhang Fan. What should the patient do if they left? And the patient's family members were coming the next day.

Just after breakfast the next day, Zhang Fangang was ready to say to leave. As a result, the patient's family came.

This time, Zhang Fan was really surprised!

### **Chapter 595**

In the morning, Zhang Fan and Xue Xiaoqiao have to leave. The hospital must make ward rounds in the morning, which is a very important work of the doctor's day.

In general, the following subordinates have to report to their superiors. In the morning, they must go to see the patient number they manage. It's better for surgery to say a little. When they arrive at some departments with more geriatric diseases.

Doctor, if you don't go to the ward round in the morning, those old men and women will definitely run to the doctor's office every three minutes, just like children who have lost their guardians.

Therefore, after breakfast, Zhang Fan and Xue Xiaoqiao go downstairs. Tang Jingjing can't stay, but people from the temperate chamber of Commerce will come.

"Doctor Zhang, this is our specialty. You must take it!" With that, the taller dried fish had to be installed in Zhang Fan's car. It's too big, so they try to fix it. They can't even do it.

"Dr. Xue, this is our plum wine. It doesn't go up at all. You must bring it!" Jar, pumpkin jar.

They are deliberately delaying time, because the patient's family will arrive soon.

Just when Zhang Fan and his family couldn't laugh bitterly, a car came and went to the street. It is estimated that it can attract the eyes of most people.

Hummer, a Hummer. However, its color is pink, and then there are two big bulbs as big as watermelon or searchlight in front of the car, which properly turn an iron chariot into a pink toad! Particularly eye-catching.

After the pink Hummer stopped next to Zhang Fan's kuluze, the people of the temperate chamber of commerce also breathed a sigh of relief. To tell the truth, they really couldn't drag Zhang Fan and Xue Xiaoqiao.

The door opened and what really surprised Zhang Fan was the people who came down from the car. The most attractive is the co pilot.

Short hair, board inch, similar to Zhang Fan's hair style, Danfeng eyes, short suits, trousers, boat shoes, if there is an Adam's apple, he is definitely a very beautiful young man, but if there is no Adam's apple, he is a very handsome girl! It's really a heroic feeling.

Driver, it's a very beautiful girl, but I've seen too many beautiful girls in tea. Zhang Fan has long been immune.

The people in the back row are really incompatible with these two people and the car. The faces washed by wind, frost, rain and snow are obviously the faces of the working people.

But dressing up is not the dress of the working people. What catches the eye is jadeite. The jadeite necklace around her neck is particularly attractive. Zhang fan can't accurately judge her age.

"Zhang Yuan, the patient's family has arrived. Let me introduce one to you. This is Lao Wang's lover! " The director of the chamber of Commerce first introduced the middle-aged woman from the back of Hummer to Zhang Fan.

Then he introduced the handsome girl: "this is Lao Wang's girl, Wang Zhaodi!"

The middle-aged woman spoke the local language of the south. Zhang fanleng didn't understand a word, not a word. She really didn't understand a word.

The neutral girl, although Mandarin is not very standard, finally let Zhang Fan understand.

When the family members come, Zhang fan can't go even if he wants to. He must accompany the family members to the patient's ward to explain.

If the patient has no sequelae, Zhang Fan will leave. However, if the patient has sequelae, Zhang Fan cannot leave, although the sequelae is not caused by Zhang Fan's operation.

However, it's better for people to speak a little kindness. Although it seems that they are not iron and blood, what they do originally requires very ruthless work. If their character is more iron and blood, to tell the truth, they will definitely become monsters over time.

"Dr. Zhang, Dr. Xue, thank you!" The handsome girl thanked Zhang Fan and Dr. Xue for her mother.

To say that men are more important than women in China, there are really two extremes. In the north, the most serious preference for boys over girls is in the poorest places. Generally, the poorer and more remote places, the more serious this situation is.

In the early years, there were not too many girls who were drowned and abandoned.

The richer the south is, the more patriarchal it is. Especially in the temperate zone and the provinces near the bend, it is really very serious.

At the time when family planning was the most strict, many villages in the South directly became fortresses in order to have boys.

It's no exaggeration to blockade the village and confront the government. It's said that all the guns used to fight bandits were pulled out.

Wang Zhaodi, the seventh girl of Lao Wang, almost died of postpartum hemorrhage on the operating table of the hospital when his wife gave birth to Wang Zhaodi, which relieved them of their desire for boys.

Wang Zhaodi was raised by Lao Wang like a boy. Wang Zhaodi didn't disappoint his parents. He was smart when he was a child and became a leader inside and outside when he grew up. Now he has propped up the business at home.

Originally, Chuck's project was in the charge of Wang Zhaodi, but because there was a problem in the southern business, she had to go to the south. Unexpectedly, Lao Wang had an accident just a few days after she left.

There are some special circles. People outside the circle may never understand them.

For example, Lao Wang's girl came into contact with the girl driving a Hummer a few days after she came to chuck.

To be exact, they are lovers. The girl's family is rich. It is said that she is engaged in non-ferrous metals!

"The focus of the parasite in the patient's brain has been removed, but because of the special location,

he may be induced to epilepsy in the future."

Zhang Fan and Xue Xiaoqiao accompanied them to see Lao Wang lying in the ward once.

Lao Wang is awake, but the damage of brain surgery is too great. He still has a ventilator, so he can't speak and can only blink.

"My father, when can he remove these machines?" The girl is also a person who has seen the world. She glanced at Lao Wang and then grabbed the main points and asked Zhang Fan.

Lao Wang's wife couldn't. when she saw Lao Wang covered with pipes, Lao Wang's wife cried directly.

All the tears came down from his nose, "woo! Woo! Woo! XXXXX ! ”

Zhang Fan didn't understand anything except that she knew she was crying. "XXXX" Wang Zhaodi said a few words in their dialect. As a result, the woman ignored Wang Zhaodi and still cried, holding Lao Wang's arm.

Although I can't understand her language, I can feel her sincere feelings.

Crying, crying, Lao Wang's wife said a word to Wang Zhaodi, and then continued to cry! It's no use persuading anyone.

One of her words is that you must find a way to look after your father!

Wang Zhaodi frowned and whispered to the director of the chamber of Commerce. The director of the chamber of Commerce nodded, and then he went out.

After a while, Zhang Fan's phone rang. It was Ouyang's, "Zhang Fan, how's Chuck's operation?"

"When it's done, the patient's life has been relieved and is waiting for recovery." Because chuck county hospital had taken the rescue channel, Zhang Fan thought Ouyang was concerned about this.

"Why don't you stay a few more days? Someone said hello."

"Er!" After hanging up, Zhang Fan is a little angry. It's really a bit bullying.

Zhang Fan, who originally looked at his family with a gentle and gentle expression, looked positive at this time and didn't say Wang Zhaodi. He didn't want to say family members in front of the patient.

After introducing the condition, Zhang Fan took Xue Xiaoqiao out of the ward. Zhang Fan didn't say a word, and Xue Xiaoqiao also saw the change of Zhang Fan's mood.

"Zhang Yuan, what's the matter?"

Before Zhang Fan spoke, Wang Zhaodi spoke first, "Doctor Zhang, don't be angry. I'm also anxious about my father's condition. Don't be angry. I'll bow to you and Dr. Xue."

Wang Zhaodi has already developed a pair of Danfeng eyes to observe words and colors after several years of trial and error in his business. As soon as she saw that Zhang Fan answered the phone, her face changed and she had to leave without saying a word.

She was worried. She didn't expect that the method of trying bailing failed. This kind of thing, this way, to tell the truth, she really didn't expect it to have a reaction.

The girl gave up her face, and Zhang Fan's original anger calmed down. Think about it, as a child, he also understood that he must be able to feel this mood when doing this business.

That's why doctors who have been ill are the kindest doctors. Only experienced, only experienced, will not be so high.

"The patient's condition is now stable. Just wait for the ventilator to recover slowly. It's no use for Dr. Xue and I to stay here."

Zhang Fan looked at Wang Zhaodi who bowed 90 degrees and said softly.

"I'm wrong. I'm sorry, Dr. Zhang, Dr. Xue. Please don't be angry." With that, Wang Zhaodi nodded to the beautiful girl around him.

"It's okay. We won't be angry. Don't do that. We can understand your mood. This is my phone. You can call me if there is any change in your father's condition. "

After seeing Wang Zhaodi, Zhang Fan gave her the phone. Then he took Xue Xiaoqiao away.

With the improvement of technology, Zhang Fan is more and more disgusted with being ordered by outsiders. If the patient needs his care, he will take care of him for 24 hours without saying a word, but now there is no need for care. Why care.

Zhang Fan called and took Xue Xiaoqiao away. He really didn't believe that the people of the government dared to give him small shoes for this matter.

Now he is not Xiao Zhang who was forced to go to the countryside on the grassland.

Now he, in tea, who dares to show his face when he is a leader. Of course, Ouyang is not included.

When Zhang Fangang left, Wang Zhaodi and her couple also drove to tea vegetable.

"What did your father say?" In the pink Hummer, Wang Zhaodi closed his eyes and pinched the corners

of his eyes.

"My father asked and said which proud doctor has great medical skills and is said to have been elected as an outstanding young man."

The driving girl looked at her lover! Eyes are watery and full of love!

As far as the girl's conditions are concerned, there is no group of men who want to chase her in tea vegetable. At least there can be a battalion of men.

As a result, ah, it's not that Wang Wang doesn't work hard, but that the other party is too cunning! It turned out to be a girl.

Why does Wang Zhaodi have to ask Zhang Fan to take care of his father? In fact, it's very simple.

To be polite, Wang Zhaodi was worried about the doctors in chuck hospital. If she was not polite, she couldn't see the doctors in chuck county hospital.

Had it not been for the ventilator, she would have taken her father back to temperate zone. Officials can't let their recognized doctors take care of their father.

If ordinary people, it is estimated that they will accept their fate, but people like her really won't talk about giving up. If one road doesn't work, it's just another way.

Tea is not big. It's hard to find someone, but money is not a problem. Since Dr. Zhang can't take it down, it's a detour!

Just after Zhang Fan returned to the hospital, Wang Zhaodi's girlfriend found Jia SuYue through her friends.

The world of the rich is really convenient. Many people think it's a troublesome thing. For them, it's just spending more and less.

The person who is looking for Jia SuYue is the daughter led by Jia SuYue's father. Once he hears it, he wants to ask Zhang Fan for dinner. Jia SuYue felt an unspeakable emotion in his heart.

Really should be a word, there is no regret medicine in the world.

At noon, Shaohua called Zhang Fan and said that Jia SuYue would invite him to dinner. Zhang Fan agreed if he had nothing to do. Shao Hua and Zhang Fan didn't think much.

As a result, as soon as he arrived at the door of the hotel, Zhang Fan was surprised, because the handsome girl with Jia SuYue and her lovers stood at the door with a smile to meet Zhang Fan.

**Chapter 596**

Wang Zhaodi didn't recruit his brother, but he lifted up the sky of the family. I'm really an old hand in interpersonal relationships.

Shaohua immediately understood when she saw outsiders. Although she didn't know the specific reason, she knew that these people must have come to beg Zhang Fan.

She almost hated Jia SuYue in her heart, but when she saw Jia SuYue's pitiful face and a little softhearted, she really wanted to say, "if it's not very difficult, help Jia SuYue!"

However, she didn't say, but waited quietly for Zhang Fan's decision. People can't stand temptation. Anyway, Jia SuYue is a little selfish.

If she could discuss with Shaohua in advance, she would not have such an embarrassing situation today, nor would it make her so difficult to do.

Since he came, Zhang Fan also took his seat. When Zhang Fan took his seat, the girls around him breathed a sigh of relief at the same time.

Jia SuYue's heart is really mixed with five flavors. Shaohua looked at Zhang Fan with guilt and gratitude. Wang Zhaodi's heart was full of excitement.

She now feels that Zhang Fan is his father's life-saving straw. She must take Zhang Fan.

At dinner, Wang Zhaodi will never let the scene continue to be so embarrassing.

She's too good to talk about her father's operation or his follow-up treatment.

First, thank Zhang Fan for saving her father.

Personally serve tea and pour water. When Zhang Fan's face began to be normal, the girl began to complain again.

"Dr. Zhang, sister Shaohua, in fact, my family used to be very poor. In those days, my father rowed a small sampan to the high seas to get some electrical appliances so that our family could eat.

I really suffered a lot when I had to choose the day of strong wind and heavy rain. Many men in the village were gone forever. Women at home are always worried.

Later, because of making electric boards and sockets, life slowly improved. My father regrets that he didn't read.

Since the conditions at home were better, as long as it was about education, he must donate a little. Every year, our family was rated as a moral model family.

This time, I was abrupt. My father had accumulated merit for half his life before he met Dr. Zhang, a good doctor like you.

I apologize for what happened this morning. "

While talking, the girl poured the old cellar into the glass. There was no problem pouring a 300ml coke into the lemonade glass in the hotel.

Before she finished, she raised her glass and gulped down half of the old cellar.

"Come on, don't let me drink. What a big thing. Take off the cup." Zhang Fan couldn't stop him, so he asked Shaohua to stop him.

Finally, the girl drank most of the glass. She used to drink the southern daughter red, she estimated that a stuffy 42 baijiu.

For a moment, from the neck to the face, he immediately became red, and his white face suddenly became second master Guan.

Shaking, shaking, the trembling Danfeng eyes of Wang Zhaodi turned, and the original neutral voice suddenly seemed to become feminine.

"Did you forgive me?" Wang Zhaodi, trembling, pointed down at Zhang Fan with one hand, pointed his fingertip to Zhang Fan's heart, and grabbed the back of the chair with the other hand.

Wine has been on the head. She is trying to hold on and let Zhang Fan make a statement.

Slightly red Danfeng eyes, slowly rising fog, fingers and heart, but eyes stared at Zhang Fan motionless.

"Forgive, forgive. There's nothing wrong with it. Why are you doing this? "

Zhang Fan was really afraid. He drank wine when he didn't agree with him, as if he was a landlord and rich man who bullied men and women.

Women, meeting the right person is an advantage, meeting the wrong person is a disadvantage.

And Zhang Fan is the right person. Zhang fan can't be the president of iron blood. He kills ruthlessly. He originally planned to finish eating and drinking, wipe his mouth and leave. He can't go.

Wang Zhaodi began to play wine crazy. Holding Zhang Fan's arm, he kept crying. Cry, why isn't she a boy. It's not easy for her to cry these years. Finally, Zhang Fan bullied others.

The head is big. Really, Zhang fantou is as big as a bucket.

Then vomit. The girl didn't eat much because she was worried about her father's disease, so she began to retch after she spat out the drink, eh! Uh! The sound was constant, and the snot came down together with Hara.

The heroic spirit in the short hair board suddenly disappeared. The rest is all vicissitudes of life.

Her couple can't drive. She wants to take care of Wang Zhaodi. Zhang fan can only drive her to the hotel. When Zhang Fan turned to leave, Shaohua left a heart.

"You go to work first. Remember to take a shower and smell like wine. I'll take care of her here." If Zhang Fan were a little doctor, Shaohua wouldn't matter, but now Zhang Fan's status is different.

Jia SuYue looked at the straight road, the crowded streets and the bustling pedestrians. Under the scorching summer sun, she felt cold all over.

Some people are born with an affinity. When Wang Zhaodi put down his face and pride, he was pitied like a cat.

After waking up in the afternoon, Wang Zhaodi talked with Shaohua in the hotel. The more they talked, the more speculative they became. They even felt a little hate to see each other late.

In the evening, Zhang Fan goes home. Shaohua told Zhang Fan what happened this afternoon.

Zhang Fan's hair stood up and stared at Shaohua carefully. From front to back, he saw Shaohua's hair.

"What's the matter, what's the matter! What are you doing?" Shao Warner asked.

"She, she, who is she. You won't, subconsciously, also..."

Zhang Fan is almost speechless. He's not married. If something happens on the way, he won't really cry

at the bird.

"Silly! I hate it. People are very poor. I was raised as a boy since I was a child. Where am I like?" Shaohua smiled at Zhang Fan, smiling like a little cat.

"Then you should stay away from her. I'll tell you..." Zhang Fan was anxious.

"Oh, I'm jealous. Come on, let me see you. Hey, let me see what a jealous little stone is like. "

Shaohua then picked up Zhang Fan's face and kissed it gently. She liked the feeling of being valued by him. She liked it very much.

The next day, Wang Zhaodi's big move also came, and the package of RMB was brought to Zhang Fan's office. Handbags, full of handbag money, piles of red old heads.

Give a card of hundreds of thousands. It's really not tempting to have a pile of cash. Zhang Fan was shocked.

There are few cruel words, "Zhang Yuan, don't refuse a little. I don't ask you to invite tenders or go through the back door. I just want you to have time to look after my father."

Then the girl began to cry again. When a woman took off her mask once in front of a man, she would face him with the most desired state in her heart.

Just like chasing a girl, before you catch up, she treats you cold and hot. After you catch up, you want to be in front of her all the time.

Of course, this truth, single wangwangwang does not understand, otherwise, it will not be wangwangwang.

"Speak well, speak well!" Zhang Fan quickly pacifies the girl in front of him.

If you have great skills, you can be convinced

Zhang Fan comforted him and closed the lid of his handbag without any trace. If someone came in, it would really be yellow mud in his crotch!

Zhang Fan's explanation was painstaking. He was afraid that the girl would cry again. He really hoped that the recruitment of younger brothers and comrades would be the same as at the beginning. He really couldn't stand it like this.

It's horrible.

"Well, can you go and see my father when you have time this week. I really have no choice but to ask

you. Please. When I saw him lying in the ward breathing hard and looking at me helplessly, my heart was broken. Please! "

Zhang Fan explained, kept explaining! Painstaking explanation, I'm afraid the tears in the girl's eyes will fall.

Listening to Zhang Fan's explanation, Wang Zhaodi also took a step back, asking exorbitant prices and making counter-offers, which is what she is good at.

"If I have time, I will go. Don't worry. Really, you must rest assured that the operation on your father was very successful. You don't have to be so upset. "

Zhang Fan is determined to send the bomb out early. It's really hard for her!

"Take this."

"I can't."

"Take it!"

"No, I'm not going!"

"Annoying!" The girl glanced at Zhang Fan with her eyes, and then walked away gracefully with her bag. The originally straight waist had a taste of willows

Zhang Fan has goose bumps all over. He knows too well. When he thinks of the broken toy, think again

Women, women in shopping malls, don't be too complicated. For her, as long as she achieves the goal, she won't stick to some means and deal with people. She is already a master.

Hospitals, doctors deal with too many people. There are people of all colors. They teach all kinds of things and almost come into contact with them.

It's rare that Zhang fan can get goose bumps.

Outside the brain, Zhang Fan went to the hospital when he had an operation. Without an operation, he soaked in the system for liver surgery. When he worked hard, Wang Zhaodi also began to work hard.

She didn't understand when she learned that the Shaohua family had contracted land and wanted to plant crops.

"Do you want to get rid of poverty, or do you need to farm to prevent famine. Even if you grow crops, what can you do with this land? "

In the cafe, Wang Zhaodi hugged her girlfriend. In the absence of Zhang Fan, she was like a man. It is estimated that her heart is also strong.

Shao Hua sat opposite. Although she didn't think what would happen to her, Jia SuYue was invited this time for the sake of safety and to ease Jia SuYue's guilt.

"Huazi, I thought you would never talk to me again! When my father begged me, you don't know, the whole world collapsed and it was dark.

Huazi, I'm wrong! " When Jia SuYue saw Shaohua, the girl lay down in Shaohua's arms and cried.

It really hurts. She's crying for herself. She's crying for the year. Maybe she's still crying

"It's all right, I know. As long as you tell me in advance, won't I help you!

More and more, we've all grown up. We can't be capricious! " Shaohua comforted Jia SuYue and put a tight hoop curse on him.

She doesn't want to lose this little friend who played from childhood to childhood. In order to continue the friendship, she can't be Zheng Zhuang Gong.

"What do you mean?" Shaohua also wants to listen to the advice of the woman who has seen the world. She likes Zhang Fan's words: listen to people's advice and have a full meal.

Although you may not necessarily adopt the other party's suggestions, you can't be wrong to listen more.

"What is the most famous tea element?"

"Horse meat?" Jia SuYue said uncertainly. The girl still has no heart. Shao Hua is not sure and doesn't say it, while Jia SuYue directly says his ideas without thinking.

Sometimes, chatting is actually a confrontation.

"Hehe! No, it's pollen and honey. When we returned to our hometown, we didn't bring anything. We wouldn't bring horse meat, beef or camel meat at all.

In your eyes, maybe these meats are delicious food, but for us, the taste is just like that.

What we brought home is the honey of lavender pollen here. Your business here is too simple and extensive.

For example, a lavender flower field is to extract essential oil, but ignores the blue flower sea.

This is also a huge waste. If I were allowed to operate, I would plant a large piece of lavender, and then publicize it wantonly, and invite people to do soft advertising, such as sending photos of all kinds of lavender in QQ circle of friends.

Then invite experts to come out and say that the scale and variety of lavender in tea element are definitely better and larger than those in foreign countries.

Then some farmhouses can be built around, which is a preliminary circle.

In a flowering period, these people who take photos, eat and park will earn all the planting expenses. Then, after the flowering period, the petals will be handed over to the essential oil factory, which is a proper net profit.

This is the simplest. If I raise another level, I will find a way to find a superior essential oil supplier and sign a contract directly, which will make more profits.

.....”

The girl is really a figure rolling out in the business circle. She also really wants to give Shaohua advice. Therefore, Shaohua was enlightened for a time.

Yeah, that's good! I grow lavender, just like a girl in the flowers. When the scale goes up in the future, it can also make the stones in my house not so hard.

In the future, I can be as beautiful as flowers and support my family. How nice!

The more you think, the more beautiful you are!

With Zhang Fan's marriage, it was slowly spread. More and more people care about Zhang Fan's marriage, and Shaohua's pressure is also increasing.

It really feels like a crown.

In the unit, sister Wang cares. Among the neighbors, Zhang Fan's colleagues and family members also care. There is a feeling in his words that Shao Hua won the jackpot,

An old man and a foreign old man lie in the intensive care unit of 30x hospital in the capital.

At the door stood the armed police, 30x hospital. There were not many armed police with guns, but there were also some. The foreign old man was an old leader of a small brotherly country in China.

At that time, he was guided by the leaders of the older generation of China. Later, although the country's development was not very satisfactory, he always followed the footsteps of China. At the international conference, China beat drums, shouted, China raised flags, and he charged.

As he got older, his health care doctors were all invited from China.

As a result, one day, the old man suddenly fell asleep. Except for some strong stimuli, he didn't respond at all.

As a last resort, the small country begged the Chinese government and was sent to 30x hospital.

Experts in the hospital were invited for consultation, and all kinds of treatment schemes were discussed in a centralized meeting.

## **Chapter 597**

Wang Zhaodi was fooled by Zhang Fan. To tell the truth, it's unnecessary to investigate again. For Zhang Fan, it's a waste of time.

But Wang Zhaodi is too difficult for Zhang Fan. Tears flow like a faucet. Zhang Fan is really afraid.

But Wang Zhaodi also thinks Zhang Fan is difficult, neither soft nor hard. He can say anything, but he will always give you a but.

The girl is also powerful. She can't play with Zhang Fan, but she thinks she can make friends with Shaohua. She has been caught off guard since something happened to her father this time.

Therefore, she also felt that she should make friends with some doctors.

People are strange animals. In terms of the power of her family, it's easy to find a doctor. But she just thinks that Zhang Fan, a doctor who doesn't enter the oil and salt market, is capable or has great ability, so she thinks that she should make friends with Zhang Fan because she has money!

Diseases outside the brain, to be honest, whether examination or treatment, are very troublesome.

Although the abdominal organs are very complex and difficult to check, it's a big deal. Open your stomach and make an exploratory laparotomy.

However, the brain is not good, CT is not good, MRI is not good. You can't have the whole craniotomy.

Even if the craniotomy is done, if the focus is not in the superficial layer of the brain and deep in the brain, the doctor can't help the disease.

Therefore, the diagnosis of extracerebral diseases is very, very important. An accurate diagnosis is like a pilot light for the later surgical positioning.

Surgeons, such as general surgery and orthopedics, have really no advantages after the golden window period.

But doctors outside the brain are different. Even if they can't do surgery, they can still guide young doctors with the experience accumulated in a lifetime.

It can also be said that doctors outside the brain are the surgeons with the highest re employment rate and the doctors who are the most reluctant to let go in the hospital.

Other departments, such as orthopedics, even a director, once retired, want to have a say again, which 30x, the existence of top hospitals in China. In this way, almost all of the top doctors in Nanpai hospital have overseas experience.

For example, the seventh magic capital hospital is a leader in plastic surgery in China. After the reform and opening up of China, a large part of the first batch of experts and scholars went to the United States to study.

After these people returned home, they really played a great role. The seventh hospital, from the General Hospital of magic capital to the leader of plastic surgery in the country, also played a very great role because the doctors who came back from the United States that year.

That later developed into a trend. Without the background of studying abroad, it is impossible to become the director of a department.

Therefore, Nanpai hospitals, especially the top Nanpai hospitals, have high requirements for doctors' thesis standards.

Fifty six ethnic groups and fifty-five ethnic groups can sing and dance after drinking, but only one ethnic group is bragging after drinking.

Before drinking, I belonged to my motherland. After drinking, my motherland belonged to me. This also shows that the Chinese people have a lot to say.

It is because Nanpai hospital stipulates that doctors must publish papers in foreign journals.

Then, the Chinese people who talk a lot directly turn the periodical area into an irrigation website, which directly turns some periodicals that ranked very high in those years into three running periodicals.

There is no one in the world!

Compared with the southern school, the doctors of the northern school are mostly self-trained. For example, many old experts in the golden mean hospital speak maozi fluently, and English is self-taught later.

The 30x hospital is even more obvious. In the past decade, there were almost no experts with overseas study background, all of whom were trained by their own country and the army.

Although these digital hospitals can not rank in the top three. However, these hospitals are the liver and gallbladder of the Chinese health system.

Epidemic situation, when a major epidemic occurs, disaster, when a major disaster occurs, digital hospitals are the last barrier of the national health system, because they are all soldiers.

In the Shantang earthquake, they were the first to enter with the army. During the 1998 flood, they also entered the flood area. They were also the first medical team to enter during the earthquake in Sanchuan.

After the disaster, after the epidemic, sacrifice, perhaps only in 18, they will be mentioned.

Moreover, there is also an expert group, expert database, which is responsible for some special talents. For example, the expert physical examination of two bombs and one satellite was set here.

It was said that when some provincial and ministerial leaders did not know the two bombs and one satellite project, these digital hospitals were already their medical teams.

Therefore, when the leaders of small countries had an accident, the state did not use the magic capital hospital or the golden mean hospital, but directly sent the patients to 30x hospital.

This is also a rule of China

During consultation, experts from various departments began to consult and discuss. Where there are people, there are Jianghu. Surgeons advocate surgery and physicians advocate conservatism.

The leader of the Ministry of health who presided over the meeting had his eyebrows on the brow of the birthday star.

Because even though the experts in internal surgery are still arguing, he also hears that up to now, no

one has a clear diagnosis in both internal and external medicine.

At this moment, even leaders are in a dilemma. This is a matter between countries and a diplomatic event. Moreover, this kind of patient does not account for one or two family members, but the other party's whole country.

Even if the other side is a small country, it is also an international event. So the leaders are also very cautious, because diplomacy is no small matter.

After hesitation and discussion, the experts in the hospital quarreled together. There was a big quarrel in the general assembly and a small quarrel in the small meeting. The leader was also helpless. "Why not expand the consultation scope and invite experts of the golden mean to come and have a look?"

This was like cold water poured into molten steel, which was immediately resisted by all the doctors and experts. The internal and external experts who had quarreled were unified with the outside world.

Originally, they were very disgusted with the ranking of domestic hospitals. Now if they invite the moderation, it would be disarming and surrendering!

When people come to a certain field, collective honor and personal honor are sometimes more important than anything.

"Three days, I'll give you three days. You must come up with a unified and effective discussion result.

Otherwise, I have to invite experts from the golden mean and even magic capital. I have to be responsible for other people's country.

My comrades, this is not a moment of consensus with the outside world, but a moment related to the country and state to state relations.

We should give up small honors, give up some unnecessary ones for the sake of big honors and national honors... "

It's easy to say, but difficult to do.

Three days, three days of discussion. When the expert group had not discussed the results, the patient had bedsores and a large area of bedsores on the hip.

This time, even if the experts are unwilling and the resistance is severe, they have to let the experts of other hospitals participate in the discussion.

Bedsores, not to mention in top hospitals, even in county-level hospitals, patients with bedsores are medical accidents.

The skin also needs to breathe. Its breathing is not that wiping some high-grade cosmetics can make the skin breathe two more mouthfuls of oxygen. It's a lie.

Skin breathing relies on oxygen supplied by tiny blood vessels covered by skin.

Human skin is very tough. Although it is not as tough as cowhide pig skin, leather shoes are definitely stronger than fake shoes made of horse dung straw paper. From this point, it can be explained that human skin is tough.

However, once it is oppressed and ischemic, necrosis, the so-called bedsore, will appear in no time, only more than an hour. This kind of ulceration is particularly troublesome to recover.

In orthopedics, many irresponsible family members do not want nurses to do special care, because special care is expensive, but they are not willing to turn over and pat their backs regularly, and then patients will have bedsores on their back and hips.

Bedsore formation, if the first stage can not form healing, then its treatment will make very terrible, very cruel, very disgusting things.

When the bedsore is formed and does not heal at the first time, the competent doctor starts a heart experience, and the patient is like going through the eighteen layers of hell.

First, the doctor will start debridement on the bedsore and wipe the bedsore with Iodophor and saline.

After disinfection, start debridement, and start cutting the bedsore on the patient's buttocks with scalpels, scissors and even curettes.

Layers of rotten meat were eaten by doctors like ice cream with children.

And as like as two peas, the doctor should clear up the tissue that is decomposed and softened. A scoop, a scoop.

The blood supply of adipose tissue is very poor relative to muscle. Therefore, some elderly people, the recovery of the body simply can not catch up with the decay of bedsore.

Many patients had a bedsore as big as copper money, and the final development result was that a bloody pit with a large washbasin was dug out on their buttocks.

This debridement is carried out every day, and for several months, we can't give patients general anesthesia every day.

Therefore, in the daily bedsore debridement room, patients cry, shout and swear like prisoners in the criminal law.

This kind of pain, as you can imagine, is like a knife digging meat on your ass. it hurts. It hurts like electricity. It hurts to the extreme.

"Come on! Take a breath and take a breath ~! " When the curette is dug in the doctor's hand, the doctor will stop and let the crying patient slow down, because this pain, continuous pain, if it lasts too long, the patient will definitely have shock and body protective shock.

This kind of relief is very cruel. The pain is relieved a little, and then it is sent to the top. It can be said that I'm afraid you don't know the pain.

Some people will say, can't you dig? Without digging or debridement, the bacteria and viruses raised from fat can kill people.

When the patient had bed sore, the nursing department of 30x hospital was directly depressed. Because the patient's skin management belongs to the nursing group.

The head nurse of the Department cried into a peach in her eyes. She spent a lot of money to become a head nurse in the top hospitals in the capital. As a result, she was very careful. There was still an accident.

"I stare every day, every day, or something happens. Our regular back slapping and skin care are absolutely qualified!" The head nurse is crying to the leader.

"Since you pass, why do you have bed sore?" The head nurse gave the order of dismissal without expression, and the head nurse ate melons because of this!

.....

Made a mistake, made a big mistake, and the experts who were originally confident had no face and did not dare to resist.

Then, experts from other hospitals in the capital were notified, especially Professor Li, who is now the most popular in the dermatology department.

Because the patient's bed sore just belongs to what Professor Li is best at.

Since Professor Li Housen's allogeneic transplantation was successfully tested, Professor Li has directly pressed his foreign division brothers under him, and he has changed from a non-famous to a top doctor in the field of skin.

## **Chapter 598**

Tea element, Zhang Fan's life is as moist as a little fairy. Although his girlfriend Shaohua sometimes plays a small temper because of the trivial marriage, most of them are reasonable.

Between lovers, can let each other reason in most cases, which is very illustrative, that is, Zhang Fan has the ability!

No matter what kind of girlfriend you make, as long as the man's income and social status are not very good, no matter how gentle and considerate you are, these are not your advantages over time.

Cheap tenderness is perhaps the most pitiful tenderness in the world. Therefore, men must be strong and have their own career.

Because when a woman is in her twenties, she is the most precious age in her life.

She can bet the most precious years of her life on a future. As a man, shouldn't she fight!

Shao Hua, good luck. Her bet is really a win-win. What the girl thinks is very difficult is really nothing in front of Zhang Fan.

This is life, one step determines the universe!

The food of Shaohua's family is sometimes better than Zhang Fan's mother in serving Zhang Fan.

Zhang Fan's mother sometimes sends Zhang Fan out to solve the five zang organs Temple by herself because of some small things. This never happened when Zhang Fan entered Shaohua's house.

However, the mother's meal is always the most delicious for her children, which can not be replaced by any big meal. Maybe only when her parents die, she may let her lover replace her.

However, as long as parents are there, the taste buds cultivated by parents will always be unmatched by others.

Noodles, Zhang Fan's mother's best pasta, is also Zhang Fan's favorite pasta.

Su province's noodles are different from those in other places. This noodles is also called a pot of noodles locally.

First of all, this flour is very particular. It must be the flour ground from the "heshangtou" wheat grown in the dry land that year.

Then, mix the flour and use as little water as possible to make the flour into a ball. The protein in special flour forms a dough under the adhesion of a small amount of water, which is very hard.

When many provincial women fight with their husbands, using this dough can definitely swell their husbands' faces. It can also be said that this dough is slightly softer than stone.

Therefore, in the past, most of this pasta was made by women and men, because ordinary women couldn't roll.

After rolling the dough into two or three coins thick, start cutting. The noodles are as like as two peas, and the size is almost the same.

This is the most basic Kung Fu of a Northwest woman.

After the noodles are put into the pot, they must always be kept boiling. The five inch long noodles roll in the boiling water, just like the small white whitebait.

When the noodles are soaked in boiling water, put meat saozhi, diced potatoes and diced carrots in the pot. If you like to eat sour, you can put some tomatoes.

Then, when these non-staple foods are in a soft state, they begin to put coriander, green vegetables, and then vinegar.

A mouthful of noodles, a mouthful of garlic, slightly sour soup stained on the noodles, and the smell of wheat erupted in the mouth is really unmatched by big fish and big meat.

With a big sea bowl, Zhang Fan drank soup in both hands. Shaohua was helpless with the pattering swallowing sound.

Whenever eating this pot of noodles, Zhang Fan looks like a gentle doctor. He is just like a small worker who has been hungry for three days and moved bricks for three days.

Shao Hua can't say whether he likes eating or not. Anyway, he doesn't conflict.

Zhang Fan and Jing Shu, two brothers and sisters, compete to eat like pigs. Shao Hua couldn't help feeling as if the taste had become delicious.

This may be the taste of home.

Whenever Zhang Fan and Shaohua eat here, the old couple of Shaohua's family have no appetite for the dishes on their plates.

Therefore, Zhang Fan and Shaohua usually eat at Zhang Fan's parents' side at noon, and go to Shaohua's house at night.

If you have the conditions and ability, why don't you make your old people more comfortable?

As the summer vacation came to an end, Zhang Fan's parents also took the time to use their own little driver. Zhang Fan didn't have time to accompany them to the mall. Jing Shu's driving also looked like such a thing. Therefore, the old couple went out every day and bought trivial things like ants moving.

.....

People have a thriving side. Self encouragement, hard work, this is the good side, but also self giving up, confused side. Whatever the reason, it is always a negative emotion.

There are two similar situations in the body. This is the secret of life, cell withering gene.

When the body is still young, regulatory genes play a positive role.

A very simple thing, the recovery speed of infant scar is always unmatched by adults. Regulatory genes allow all metabolism to proceed at a high speed.

But when the regulatory system thinks your body must decline, it starts to make trouble.

Just as some people's original disease-free and painless body suddenly gets much older within a year or two, time seems to be losing on him or her very quickly.

It is because this gene begins to accelerate the aging of mature cells and slow down the maturation of immature cells.

This is why humans are aging. The aging age is uncertain. Some people may think that they can live for decades when they are 90 years old.

At the age of 50, some people have given up their support for gene regulation.

Therefore, when you are young, you must bribe this gene. How to bribe is to store a large number of beneficial elements needed by the body and reduce a large number of harmful elements.

Of course, if you suddenly die in a car accident one day, it will not be controlled by the regulatory gene, but by the traffic police department.

The new supersedes the old. The small country's leadership is now because the brain has problems, and then the gene is slowed down, which leads to a bedsore.

It's really no wonder that the medical staff have this kind of thing, but there are some things that you can't defend even if you have a mouth.

In China's medical system, we attach great importance to the problem of bedsore. As long as the patient has no bedsore when he is admitted to the hospital, if bedsore occurs when he is discharged from the hospital, this is a medical accident! There are no conditions to talk about.

Professor Li Cunhou and other medical experts were called. I don't know from which era, China has a very uncomfortable thing.

Give the seal command first. A group of experts and professors first signed the confidentiality regulations under the cadres and professors who specially manage the confidentiality regulations.

Then he entered 30x hospital.

The experts who come here are the top-level experts in major hospitals in the capital, while Professor Li Cunhou comes to deal with the problem of bedsore.

The old man is too old for routine treatment, and bedsore develops very rapidly, which makes him feel a little uncontrollable.

"Surgery is necessary, and allogeneic skin transplantation must be done as soon as possible." After checking the patient's skin conditions, Professor Li Cunhou directly expressed his opinions.

In terms of skin, now he is like the largest elder of this school. His words are authority and his words are standard.

"How sure are you to ensure the success rate of the operation?" Now, that is, government personnel can ask Professor Li like this!

"Eighty percent!" Although Professor Li is uncomfortable, he still gives his own estimation. Not all patients can survive after skin transplantation, and now the old man is

"Can you think of a way to improve it a little more!" How can 80% of the government staff be unhappy? Are you still the top expert of Chinese skin!

"This!" After recalling the patient's situation, Professor Li bit his teeth and said a word.

"Zhang Fan, a tea vegetable, may improve the success rate."

Really, doesn't my Lao Li have a card? If it weren't for the big deal, Lao Li might have to shake his face

and leave.

"Tea? "Tea in the frontier?" Government officials thought for a while before they remembered the city. It was too remote and small. It was so remote that people had no concept and could be ignored.

"Yes, chasu, Dr. Zhang Fan of chasu Municipal People's Hospital, he can improve the success rate of surgery."

Professor Li Cunhou once again confirmed.

"Doctor of tea?" Surprised, really surprised, even if Lao Li said magic and Jinmen, he wouldn't be so surprised, but tea Su really forced him to reconfirm.

"My paper on skin transplantation was published jointly with Dr. Zhang. Don't you read it!"

Lao Li is angry. He is really angry. Even if the government personnel are in his position, to tell the truth, if they throw a face, the other party will have to pocket it.

Being angry for no reason really makes government personnel a little overwhelmed. Fortunately, there are superior leaders.

When reconfirmed, the matter was reported. Even if the patient's disease can't be solved, he can't have no bed sore when others come in.

When I was discharged from the hospital, I didn't cure my illness. Instead, I dug a big washbasin hole in someone's ass. It's too shameful.

"Go and ask Dr. Zhang to go to Beijing. Hurry up!" The boss spoke.

The Ministry of health can't handle such things. China's health management is a bit exotic.

The largest medical department may not be able to manage local hospitals, which is such a wonderful work.

The general office directly contacted the bird market, and the bird market leaders were surprised "What kind of person is this, who surprised the office? Even... "

While checking, Wu Zhi was sent through the garrison, because the order of the general office was to speed up. A fire broke out over the head of the leader of the health department in bird city.

There was such a figure below. As a result, the bird market asked three questions. Is this still the territory of China? Is the tea vegetable hospital still under your leadership?

For a moment, who is Zhang Fan, who is Zhang Fan, rises in the bird market courtyard.

The deans of affiliated hospitals and provincial hospitals were called for questioning. Only then did I realize that Zhang Fan is sacred.

The tea government and Ouyang received the instruction at the first time " Dr. Qing Zhangfan is on standby in the hospital. A helicopter will arrive at the tea vegetable hospital within 30 minutes. "

The superior has no obligation to explain to you, let you abide by it, let you stand by, ask? This is not a family matter. Many words are illegal!

The tea vegetable government is nervous and Wu Zhi comes to pick up people. What's the matter? Although Ouyang was flustered, he was not afraid. Because she knows Zhang Fan.

Zhang Fan had just finished his mother's bowl of noodles when he was pulled out of his home by the director of the medical office.

"Director, what's up?" Zhang Fan burps and asks in wonder.

The highest configuration after eating noodles is to lie down for a while and let the stomach continue to gently feel the fullness of the noodles.

So Zhang Fan wants to make it clear that he doesn't want to go if it's not urgent, and he doesn't dare to see Ouyang recently.

"Zhang Yuan, I really don't know. I just received an order to let you go to the hospital for standby."

"Why don't you call and work? You come to the door in person." Zhang Fan is always the same.

Because he has been a little slack recently, he has herded sheep for many assistant jobs that need him to do.

When he first took office, Zhang Fan didn't understand. He worked hard in this regard. Ouyang was happy to watch TV dramas and chase Korean dramas.

After Zhang Fan got familiar with it, Zhang Fan was stunned. He didn't want to do this kind of thing, so he began to play a liar.

If you can procrastinate, you can rely on it. Anyway, there is Ouyang. He is also happy to brush more operations.

One wants to brush surgery and the other wants to brush Korean dramas. Therefore, Zhang Fan began to hide from old lady Ouyang.

Meeting? What? I'm in surgery. I can't.

sign? Sorry, I'm in surgery. Let the Dean sign it!

Therefore, when the director of the medical department came to the door in person, Zhang Fan's brain had begun to look for excuses.

It's always unreasonable not to work.

As a result, as Zhang Fan thought, he was taken directly to the dean's office.

As soon as he entered the door, Zhang Fan was about to say that there was an operation. He found that the situation was wrong.

Dean Ouyang, instead of sitting in her boss's chair, sat on the reception sofa like an escort.

Two men sat on the main seat of the reception sofa. Two middle-aged and elderly men.

When Zhang Fan entered, the two men stood up at the same time. Ouyang didn't react, and then he stood up in a hurry.

"Zhang Fan, let me introduce..."

"No, Zhang Fan and Dr. Zhang are famous. Our work is not in place."

As he spoke, a man who looked like a more dominant man stretched out his hands.

Zhang Fan's fog water at one end. What's the situation? Fishing has made him famous. This

He looked at Ouyang. Really, the two-year training was not in vain. Ouyang's eyes moved, and Zhang Fan understood, "this is..."

"No, no, with the strong support of the leaders, our tea vegetable hospital has become a leader under the top three in the province.

Without the leadership's preference in terms of funds and policies, we can't afford to build buildings and buy equipment. "

No matter what happened, Ouyang's efforts were not in vain. Zhang Fan said with a smile. The person holding Zhang Fan's hand was also relieved.

He was worried that if he met someone with a technical mind, he would open his mouth and come. It's no good. It's impossible. If so, it really hurts him.

After all, this is the man who will be a plane soon!

"No, we haven't done enough, Lao Li. I think next, the team members should pay more attention to the improvement of the treatment and care for special talents.

We are located in the frontier. Although we are poor and our finance is tight, we can't be cold. Talented talents and talented experts can't be cold.

I propose to take president Zhang Fan and Doctor Zhang Fan as benchmarks to form a set of rules-based expert talent subsidies.

What do you say? "

Holding Zhang Fan's hand and saying warm words, Zhang Fan is also happy in his heart.

Ouyang still taught too little, baby, still think too shallow!

### **Chapter 599**

Zhang Fan, burping, listened to each other's flattery. Old lady Ouyang is also a wonderful flower. Flattering Zhang Fan is like flattering her. The corners of her mouth are crooked. There is no consciousness of subordinates and no modesty at all.

Ouyang knows this well. It's certainly not a small thing to make the other party pay so much attention to it.

As long as it's about technology, Ouyang has 100 confidence in Zhang Fan.

Since Zhang Fan went to work, he has only fished in management business, but he is more serious than anyone in terms of clinical practice.

On this attitude, on this serious attitude, Ouyang is very relieved of Zhang Fan, not to mention Zhang Fan's technology.

So who is Zhang Fan? Zhang Fan was trained by Ouyang. Well, Zhang Fan has ten cows. Can't I have one cow?

Several people haven't exchanged greetings. They want to explain something more, but the sound of helicopter propeller has been heard outside the window.

"Zhang Yuan, no matter what, please don't worry about your family. We are your biggest backing!

Have a nice trip! "

"Bon Voyage!"

"Er!" Zhang Fan doesn't know anything yet.

"Zhang Fan, the superior needs you now. The plane has come. Be careful with everything. " Speaking, Ouyang walked over gently.

She raised her head and looked at the black boy of that year and the boy who received red envelopes and cigarettes step by step.

"Be careful and don't try to be brave. If you're not sure, don't..." Ouyang said two words secretly by finishing Zhang Fan's clothes.

Only she and Zhang Fan could hear this.

Zhang fanleng!

"Go! On the apron of 120, the plane is estimated to have arrived. " Ouyang didn't talk any more. No one was selfish.

After all, people are emotional animals. No matter where the other party is sacred, Zhang Fan already has a feeling of his own children for Ouyang.

"Where are you going?"

Zhang Fan finally asked the question in his heart. Looking for him is nothing more than one thing. If you have an operation, you won't borrow money!

Therefore, he has nothing to tangle with, but where to go, there must be an explanation.

"You'll know when you go!" Ouyang gently pushed Zhang Fan, and then pinched Zhang Fan's arm.

When you really see Zhiwu. The initial pride became worry.

The plane is too big. It's much bigger than the plane usually seen by land airlines. There are several propellers. This plane is smaller than the plane of land airlines.

Moreover, all the people who came down were armed. All the people who came down from the plane were armed. The equipment felt very high-end.

"Excuse me, who is Dr. Zhang Fan." A leading soldier, without greeting or handover, directly began to ask.

"I am!" Zhang Fan took a step forward.

Salute!

"Hello! I'm XX of a certain department. Now please follow me into the plane. The plane will take off in five minutes. "

Don't say your name, just say your rank.

Zhang Fan looked back at Ouyang. Ouyang, whose hair was disordered in the wind, gently waved his hands and told Zhang Fan in his eyes.

Go! Go at ease. I'm at home.

After Zhang Fan boarded the plane, the soldiers with guns ignored Ouyang and them. Just close the hatch, Da! Da! Da!

Take off. Zhang Fan originally wanted to exchange greetings, but then look at the soldiers on the plane. They are like wooden people, holding guns in both hands and looking straight ahead.

Zhang Fan also gave up the idea of asking questions, stretched out his head and shrunk his head. Simply, he was calm.

To tell you the truth, taking this kind of plane is really not a pleasure. Sound insulation, it's called a rotten, and the sound of the plane's motor didn't pull at all. It spread to Zhang Fan's ear and didn't say.

Can't you put some sound insulation cotton? It's too economical!

It is estimated that flying a plane is also a drag racing party. Maybe it was originally a fighter, but it was kicked to drive a helicopter.

The habit did not change. Speaking of it, he directly took the helicopter out of the posture of a fighter and rushed to the sky. Zhang Fan almost sprayed noodles from his nose.

The iron chair with hard hips is a little narrow. Zhang Fan was not in the mood to think about anything else. He had to hold the handrail tightly with both hands.

Where is the province with the largest number of airports in China? Maybe some people will say it's the capital, maybe some people will say it's the magic capital, if you count

In fact, it is the frontier airport. A flower base in the frontier, yes, it is a flower base. The name seems to be a lovely base. Darling, the cow of China.

After more than 40 minutes of flight, the plane landed in the base "Chief, please turn off all communication equipment. Please don't take pictures. "

As soon as the plane fell, Zhang Fan was called the head for the first time, but he really didn't want this title

Where is this! It's full of soldiers and some iron shelves built of steel. Where is this!

When I got off the plane, I looked at the endless stall next door. There was a base without a trace of green.

"Chief, please follow me!" With that, the soldier took Zhang Fan on a warrior.

There is no comfort in the army. The seats of the warrior car are just like those of the tractor. Perhaps they are not as comfortable as those of the higher priced tractor.

On the bus, the warrior roared into a small airport, just two runways. What kind of runway is it. It's so short that Zhang Fan thinks whether the plane can fly or not.

The plane, with the five-star logo, is not big. It is a little bigger than the helicopter Zhang Fan came by.

Get on the plane, good! Good, there are few seats and no one else.

"Comrade passenger, our XX plane will take off in ten minutes. Please get your seat belt ready."

airline stewardess? Think too much. After the plane took off, there was no one. There was only a broadcast notice. It was still a male voice! In this way, Zhang Fan was taken by the plane to fly into the sky.

Heart is big, not everyone can have the conditions. Today, if a... Headless person is pulled to fly like this, he will definitely panic to incontinence.

However, for this technical dog, it's not only heart at all, it can go anywhere. No, I won't. I can't do it! You can't shoot me.

Zhang fan understands that sometimes the larger the propeller is, the more comfortable it may not be.

The plane finally has no such bumps.

Kitty, wait a minute! Zhang Fan, who has a big heart, passed away like this.

When Zhang Fan left, Ouyang went to explain to Zhang Fan's family. First, she found Shaohua. Ouyang had been Zhang Fan's suitor, so she also knew about Shaohua.

"Uncle, aunt, Zhang Fan went to other places for surgery." Back home, Shaohua told Zhang Fan's parents about Zhang Fan.

"Oh, I'm in such a hurry. I don't say hello." Zhang Fan's mother asked a little worried.

"What do I say to you? Zhang Fan is going to help, not to play. This is work!" Zhang Fan's father installed a new window screen and said to his wife.

"Hehe, aunt, Zhang Fan is in a hurry when he goes to other places for surgery. It is estimated that he didn't bother to say hello to his family. I was also told by their hospital leaders that it was the last time..."

Zhang Fan left, followed by the care of his superiors. Sometimes, I have to say, people are still different.

Silent care came, and Shaohua inexplicably became the third leader of the bank, in charge of women, logistics and administration.

This appointment directly surprised the colleagues of the bank.

Then, Zhang Fan was directly included in the provincial expert database by the bird city health department. A resident doctor entered the provincial expert database, and there was no one.

The corresponding treatment will come up. As for the salary of provincial experts, according to the seniority salary, Zhang Fan is the first in the tea vegetable hospital.

This expert pool is very powerful and awesome. In short, some medical administrators in bird city should first pass through these people when filing a case. There are too many words in it.

Even after Zhao Jingjin was selected as a River scholar, it can be imagined that this requirement is not low at all.

Professor Li Cunhou personally picked up a military airport in the north of Beijing. Although he proposed skin allogeneic transplantation, in terms of surgery, he was completely convinced of Zhang Fan.

Zhang Fan got off the plane and smiled when he saw Li Cunhou“ After a long time, it turned out to be

this old boy! "

"Just make a phone call. It'll arouse the masses!"

"Hey, don't be ungrateful. I haven't enjoyed this treatment. Military aircraft pick-up and drop off can blow for half a lifetime."

Because there was an outsider, they didn't say much, but joked.

As a result, before the witty words were finished, the soldiers on one side spoke, "chief, this is a confidential organization, you can't say!"

"Er!"

Sweat is coming down!

After getting on the bus, Zhang fancai asked.

"What the hell is it?"

"It's such a thing for a while,..." Professor Li said the whole story.

"The primary focus has not been solved. Even if the skin is transplanted, the survival rate is not high."

"We don't care about the original. Let's finish the operation first.

I gave you a guaranteed ticket. " Professor Li doesn't know that we must deal with the primary lesions first, but sometimes we should say that people are in the Jianghu

The bird market is not necessarily valued here. Gongs and drums make the sky roar, colorful flags flutter and dream.

Professor Li Cunhou came to pick up Zhang Fan. As for others, they didn't know there was Zhang Fan.

The expert group is still discussing. Preliminary discussions have taken shape, but they still need to be demonstrated.

Zhang Fan doesn't need to take care of these things. Zhang fan can't take care of them. He's here to deal with bedsores.

Professor Li Cunhou and Zhang Fan got the authorization and entered the ward.

"Look, look, it was only three or four centimeters deep yesterday. Now it's almost ten centimeters. There's no way to transplant it again."

Professor Li Cunhou frowned. He was also surprised at the change of his condition.

"I have to check the patient in detail and check the patient's examination results."

"OK, no problem!"

Zhang Fan began to check, bit by bit.

## **Chapter 600**

When Zhang Fan just had the system, he was worried about whether the system would go quietly one day, or whether it would be left by aliens, as others said.

So, liver, seize the time of liver, when he won the orthopedic department, he was not proud, so he took the opportunity of the exam and went to the tea vegetable city hospital.

In the city hospital, he saw another world. Like a sponge, refueling absorbs the lack of knowledge.

The old lady Ouyang's transfer system, the doctors of various internal medicine, gave Zhang Fan a thorough insight into what is the foundation.

When Zhang Fan climbed out of general education and got some results, the master came out with the master's notes. This book, like a black hole, is too difficult to understand.

Therefore, Zhang Fan didn't let the system make him pretentious on his medical road. There is pride, but there is no thought of his second son.

In the world, there are talented people in the world. Even if a truly successful genius has no system, when he succeeds, people turn to see his past.

There is a feeling that the sun is barking. He didn't hang up? It's a fool who didn't hang up.

However, no one sees those talents who have not achieved success. Finally, it's not even as good as an ordinary person.

Therefore, even if Zhang Fan has a system, he will face the world according to the thinking of a normal person.

He will not underestimate the heroes in the world, let alone the master's notes hanging on his head like a plaque.

It was really like a board of integrity and light hanging on his head, but there were four words, but it was: be cautious!

Moreover, Zhang Fan has not even cleared the system on the first floor, but when Zhang Fan opens the second floor, he may be able to compete with the heroes in the world.

After Zhang Fan's examination, he was very confused. According to his examination results, there seemed to be something wrong with the brain in two places, but he was not sure which was the primary secondary.

Primary and secondary, in fact, that is tipping point, that is back pot. The human body is like this. Sometimes, the symptoms of the place where the explosion is detonated are not obvious. As a result, the bottom of the pot is fried.

During the treatment, the level is a little lower, and the bottom of the back pot is often filled with seven or eight layers. As a result, it still can't be cured, because the tipping point is not found.

Brain, usually say complex, how complex? Ordinary people really have no concept.

However, from the examination and positioning of the brain, we can find its complexity. The simplest, such as a woman, has menstrual disorder, infertility and obesity. I've seen Western gynecology and sent my son to the old Chinese doctor, but it didn't work.

Well, you'd better look inside and outside God. Maybe it's because there's a brain yearning to be a man that leads to these symptoms, and here's just a small problem in the brain.

When the adult male showed a decline in sex, the fairy like girl shook naked in front of him, and he was indifferent.

In addition, hair loss, obesity and enlargement of mammary (a) chamber also occurred. Don't think about it. It's not because your living standard rises and you eat too much braised meat.

But because the hypothalamus and pituitary gland want to grow tumors, they are abnormal.

When these symptoms appear, people often don't pay attention to them. When the symptoms are serious, it's too late to go to the hospital.

Therefore, the body will not be innocent and uncomfortable. It will notify you in advance.

But the brain's notice is too vague. Just like the underground party handover, let alone ordinary people, even doctors with poor skills can't understand.

"Zhang Yuan, I mean, I still want to do the operation on my ass. you....." as soon as Zhang Fan is in a daze, Professor Li Cunhou knows that Zhang Fan is thinking about the patient's disease.

Almost all the experts inside and outside the gods in the capital didn't discuss one, two or three, so he didn't want Zhang Fan to be troubled. He's not an ordinary person! Not an ordinary patient.

"The primary disease can't be solved. Are you going to replace his whole body with pig skin!" Zhang Fan was very dissatisfied with Lao Li's interruption of his thinking.

To tell you the truth, Lao Li's current position will be angry if he gets angry with the boss of the Ministry of health. What can you do for me?

But to be honest with Zhang Fan, Lao Li really stopped talking when Zhang Fan was dissatisfied.

It's not that he owes Zhang Fan, but that Zhang Fan's surgical skills are better than him. Technicians must have the responsibility of technicians.

"Look ~! Look! Take what you can!" Lao Li muttered, and Zhang Fan was still in a daze.

When they were tangled, the expert group finally discussed a result. They came to the ward in line to check the experiment again to determine whether it was in line with their conclusion.

A group of almost ten people came into the ward. The average doctor in this ward is not allowed to enter.

Doctors outside the brain are so powerful that they don't want to be in super hospitals.

Although they don't know Zhang Fan, when they get to their position, no one will jump out and ask why Zhang fan can come in, because they disdain it, and it's not their job.

Zhang Fan is young and has no reputation. Even Li Cunhou and Chinese fried chicken are just nodding.

They also understand that as long as the diseases outside the brain can not be solved, Lao Li is also a paper paster.

Zhang Fan was pushed to the edge by the crowd involuntarily. Then Lao Li looked at Zhang Fan jokingly.

The meaning is very clear, "yes, it's good to finish the exploration early and make a plan!"

Zhang Fan ignored him. People are so strange. Lao Li doesn't know what psychology. He was a little schadenfreude when he saw Zhang Fan ignored.

With his idea, I still have a card face. People nodded to me!

And you, ha ha, were ignored. You ignored Zhang Fan naked. Lao Li was a little proud! I don't know where the pride comes from!

Zhang Fan has no consciousness of leaving. Lao Li pulled the sleeve of his white coat, and he didn't leave.

"I have to see. Such a gathering of top experts is still rare."

Zhang Fan shook off Lao Li's hand and came to the edge of the crowd.

Five academicians gathered around the patient's bed, and the directors of Shenwai and shennei of major hospitals formed a second circle.

The third circle is some senior doctors whose professional status is not up to the director level.

Although these doctors in the third circle seem to be very low, one of these people is counted as one. As long as they are not in the capital and magic capital of China, they are all people who can shake the hospital by stamping their feet.

Zhang Fan's fourth lap, Lao Li reluctantly acted as the fifth lap. He didn't listen to the experts. If Zhang Fan didn't go, he was embarrassed to leave him, so he waited helplessly. He was also a good man.

"The patient's arch angle is reversed, the internal rotation of upper limbs, the flexion of wrist joints, the internal rotation of both lower limbs and the extension and internal reflection of both feet are obviously brain stem problems.

However, is it the primary focus or the secondary focus? This is not the primary stove. Come and see! "

An expert asked and answered, and then began to check.

The patient's body position description, in professional terms, is not understood by people who do not engage in medicine.

In fact, it's very simple. People who have seen xiaomaruzy elementary school movies have generally seen such a scene.

A woman was forced to take off her clothes, and then she lay in bed.

The knees are buckled inside each other, the feet are turned out, and the feet are straight. His upper limbs cover his chest with his arms and his hands... So his head doesn't stand back. If he stands back, it's a direct description of the state.

Of course, patients will not shout and buy dishes, but will only make a huge snore.

Then, the old expert directly used his hand and began to make a positive examination of the contralateral vertebral body.

"Look, this is what puzzles everyone. The patient's primary focus is no longer the brain stem, but the hippocampal uncinata gyrus.

Do you have any doubts? What opinion do the experts in God have? "

A few days of identification finally made the problem clear. As soon as Zhang Fan heard it, it was like a layer of paper, and the confusion in his mind was solved.

Sometimes, this is the case. Why are people tall and why can they be called experts? Because he has made a thorough understanding of the ins and outs of the disease, rather than the brick family, he will bluff people with big words.

"The primary focus can also be operated on, but what about the focus of the brain stem? Can you do it?  
" The inner expert on the other side spoke.

"Hard! it's too hard. A narrow escape. "

Extraterrestrial experts can't help thinking hard, brain stem, forbidden area in the field of surgery. This place is actually where the back of the head meets the neck.

Even boxers know that they can't fight in this place, let alone with equipment. Sometimes, if they go down with a fist, people have to hang up.

Because it manages the breathing, heartbeat and other things that are not managed by people's will. It is estimated that the brain is not at ease to give such an important thing to unreliable human beings.

With everyone's whispering, Professor Li Cunhou's heart is also full of scolding: it's in vain if he can't do the operation for a long time!

He has begun to think about how to start the operation: the ass is not as important as the brain? Pull!  
Lao Li suddenly felt that his responsibility was very important.

With everyone's thinking, Zhang Fan is also thinking. How can I do it? " The secondary focus should be

small, otherwise the patient's heart beat would not jump long ago. Now the breathing is so heavy, it should be that the consequence caused by edema is greater than that caused by the focus, if... "

This is the difference in thinking. Zhang Fan thinks about how to reduce the risk and perform the operation, while experts think about how to avoid the risk to perform the operation. Step by step to become an expert in this field, regardless of technology, first of all, we are not reckless.

Different words bring different thoughts.

Medical treatment, you can not, patients die in the ward, trouble will not find your head. But if the patient dies on your operating table, then

"I had surgery on the primary lesion, and then I treated the primary disease conservatively!" Suddenly a department director said.

"Can you make sure the patient wakes up?" This is the head of brain surgery at another hospital.

"I can't guarantee it, but it can at least keep the patient in his current state."

Fight again! Instead, experts at the academician level were silent.

.....

While listening to the opinions of experts, Zhang Fan feels more and more that his method seems to be OK.

"As long as you can help me ensure that the patient has a lot of dehydration and does not have brain hernia, I think I can do it!"

While looking at the results hanging on the film viewing machine, Zhang Fan slowly experimented with his ideas in the system in his mind. The success rate was very high, and then he said it involuntarily.

After all, in the system, he is the king and God. If he dehydrates the system, the system will dehydrate. As long as technology can reach the point, the system will be perfectly displayed on the operating table of the system.

In reality, Zhang Fan was not sure, but with the practice in the system, Zhang fanyue felt that the possibility was very high and listened to their noisy arguments.

Zhang Fan felt that he should say it. The big husband does something and doesn't do something!

"I can do it!" Although this was not a stone breaking shock, it also made the scene silent.

Everyone turned their attention from the patient to Zhang Fan. Lao Li almost didn't breathe.

In tea vegetable, Zhang Fan's orthopedic cattle, general foreign cattle and skin cattle are directly a knife running across the sky of tea vegetable. Lao Li knows, but outside his mind, don't say tea, the bird market can't.

Worried about Zhang Fan's rashness, he hurriedly said, "we are talking about the patient's bed sore operation. We can do this operation."

Although this place is not a childless play in the army, it is not a place where people talk nonsense.

Once this group of people feel that you are a unreliable young man, Zhang Fan's road is estimated to be really hard to go.

So Lao Li's sweat came out. He didn't expect that Zhang Fan, who had been very mature in surgery, would be so abrupt.

According to the idea of ordinary people, Zhang Fan's achievements in orthopedics, general surgery and skin are rare and amazing. It's not too much to describe genius.

So Lao Li is really a good man.

"No, I mean extracerebral surgery!" Zhang Fan smiled at Lao Li, and Lao Li involuntarily gave Zhang Fan a smile, but the smile was no better than crying.

"Who are you?" Everyone made way for the academician with the highest status outside his mind so that he could see the young man.

"Zhang Fan! Tea vegetable Zhang Fan!" Zhang Fan is still smiling. He smiles when he sees people, but his words are really firm.

In modern popular words, I use a very humble look to express very powerful words. Lao Tzu, Zhang Fan, tea vegetarian!

"No! I mean, "when the old man finished, he really didn't expect the other party to say it so simply.

"I mean, who did you come in with and who was your teacher?"

Nobody! But his teacher should not be able to enter this ward. The old man asked, looking at the doctors around him.

The meaning is also very clear. Whose second pole disciple, hurry out and take it away!

"I came at the command of my superior. My teacher is Lu Lao!" Zhang Fan still has no expression change. Is so quietly looking at the opposite group of people.

"I brought him in!" Lao Li simply stood up. He felt that even if Zhang Fan talked nonsense and had him standing on the stage, it was estimated that these people would not report to the government!

"Hehe, old Lu's disciple, is he a foreigner? Ha ha, children, go! " The old man smiled and did not investigate.

Zhang Fan is too young. Maybe he is not as big as his grandson. He treats each other as a child. Being a man is not easy. He doesn't want him to pay a huge price for one sentence.

What's more, Lu's face is still valuable.

With that, the old man ignored Zhang Fan, and everyone didn't look at Zhang Fan. The academician smiled. The doctors at the director level and non director level seemed to have not seen it.

To put it bluntly, it would be beneath your dignity to compete with such a young generation. We have to deal with people who are similar to them.

"Er!" Zhang Fan is ready to

As a result, the opposite side let him go like a fart!

"Go, go! Let's prepare for the operation. " Lao Li hurried two steps and three steps to pull Zhang Fan away.
