

## Chapter 611

People are afraid of being famous. The old Chinese idea is to hide, whether it's the gold at home or the broom behind the door.

With the development of the times, now everyone wants others to know themselves and hang all their possessions on them.

When Zhang Fan just graduated, he was eager for money and work. When I was in the county hospital, I was more eager for surgery when I was eager for money. At the city hospital, my desire for money has begun to decrease a lot.

This time to the capital, although Zhang Fan went angrily and returned a little gloomy, he still didn't want to be famous.

For him, money is real, technology is also real.

However, some things can't be controlled by himself. Some people want something, while others have it at their fingertips.

The tea government, in some unimportant departments and departments gathered by some aunts and aunts, has become the center of another government.

The latest gossip about tea element, all kinds of gossip and the exchange of various resources are released here.

Don't underestimate the fact that there are middle-aged women here who are old and weak, and their families are short. Not everyone can underestimate the energy of these people.

"Sister Wang, can three children go in? I have a friend's child who wants to enter three primary schools."  
"

"I dare not accept the old rules if they can't be fulfilled."

"I heard that the vegetable market is going to be demolished. Are you sure?"

Every day, true and false news spread among them.

"Ah! Who knows Zhang Yuan of the city hospital. My aunt's children have headaches from time to time. I

wanted to find Zhang Yuan, but I was stunned that I didn't hang up my number for three or four days! "

This is the advantage of becoming famous. When you are a little famous, find Zhang Fan's doctor and register? You are being paranoid.

But when Zhang Fan was said to shine in the capital and was honored as a guest of honor in the provincial capital, some people who had rushed in to see Zhang Fan also began to abide by the rules.

"Oh, find Zhang hospital to see a doctor. His number is really hard to hang up now. You can say that this person can be so young.

Go and find Li, who is in charge of health, to do something! "

"He! No, just one Ouyang can scare him to death. Nominally, he is in charge of health. He can't enter the hospital gate twice a year. "

In the capital, the general office, the leader took the report typed up by the tea vegetable hospital and didn't speak for half an hour.

"This, this, this tea vegetable hospital really dares to type the report? Tens of millions of things. Look, is this report decent? It seems that if we don't sponsor a bedside CT for them, their hospital can't afford to open. Patients can't be treated. We are all sinners! "

The leader of the general office looked at the report and his teeth were sore. What should I do? Send a letter of criticism?

If a regional hospital really wants to receive a notice of criticism from the general office, does the tea vegetable hospital know that the general office will be looked down upon.

"Let me ask the leader!"

This matter is really difficult for the people in the office. There are too many poor grades between them. There is really no way to treat the tea vegetable hospital

Moreover, although Zhang Fan was rejected in the capital medical circle this time, he has been concerned by the leaders.

He is so young, his level is so powerful, and he has a very powerful teacher. Maybe Zhang Fan in a few years may be another old Qiu. No one is sure about this kind of thing, so the report was rarely taken another step up.

Tea vegetable, Monday is Zhang Fan's door-to-door time. There's a sign at the door, orthopedics!

However, there are three layers of people who see doctors, and very few really see orthopedics. Most of them see liver diseases and outside the brain.

This is the characteristic of Chinese medical treatment. "Do you want to talk about privacy? Can you go out? I'll finish with the doctor. Can you come in again?"

A middle-aged woman who looks a little urbanized and dressed appropriately. When it's her turn to see a doctor, she wants everyone to go out. Although when others see a doctor, she also surrounds one side.

As a result, before she finished, another patient who came back from the examination had inserted his head into the gap and began to pass the examination results to Zhang Fan.

As soon as she was worried, she couldn't care about anything. Oh, she opened her clothes. Of course, single Wang usually dreams.

The patient showed his belly, "Dr. Zhang, please show me. I often have intermittent pain in my lower abdomen."

Patients see a doctor, especially Zhang Fan's miraculous doctor, who is afraid that they can't see him.

Zhang Fan, surrounded by the crowd, was sweating. It was hot and there were many people. In addition to seeing a doctor, he had to maintain order from time to time.

The two newly admitted doctors with them kept maintaining order, but the patients ignored them.

Just Zhang Fan said a few words, we will converge a little, but the timeliness is not good. We will still be surrounded in less than three minutes. Like catching a thief, we are deeply afraid that Zhang Fan will jump out of the window and run away.

As soon as he went to work in the morning, Zhang Fan sat on the outpatient table and began to see a doctor. Until noon, the number of patients did not decrease.

Not to mention eating and drinking water, Zhang Fan didn't even go to the bathroom once. One morning, more than 100 numbers ended early, but there were too many patients. The hospital had to ask Zhang Fan and added more than 100 numbers.

At two o'clock in the afternoon, Zhang Fan hurriedly took time to eat a boxed lunch. After taking a break in the bathroom, he continued to start the outpatient service in the afternoon.

This is the day of outpatient doctors in Chinese public hospitals.

This day's outpatient service is more tired than Zhang Fan's operation the previous day. At least, there is no need to say so much. On this day, Zhang Fan doesn't want to say anything.

The volume of speech on this day was so great that in the end, he had to contain a throat moistening tablet. The system strengthened his physique, but did not strengthen the wear resistance of his body.

After a day's outpatient service, my throat was burning and painful.

"Zhang Yuan, hi yo, sorry to bother you. I'm tea element XXX.

My niece often has headaches. Could you please show me. Your number really can't hang up. "

"Come to my office on Monday morning." Zhang Fan said a very brief sentence. He didn't have any mind to greet. He just wanted to go home and sleep immediately.

People who don't know this industry think doctors are arrogant and cold. In fact, they really don't want to talk and say they're hurt.

But fortunately, Zhang Fan is young. After a sleep, the power is full again. Life is like this, living day by day.

Shao Hua, after the resignation report was typed, the leaders kept it again and again, and even asked if they were dissatisfied with the position.

If this is an ordinary employee, you like to do it or not. If you don't do it, you don't need one. Everyone wants you to make room. But Shaohua's appointment is directly a document issued by the government.

The leader couldn't keep it. The unit specially held a farewell party for Shaohua. The evaluation of Shaohua was quite high. Shaohua doubted whether she was talking about herself.

Shao Hua resigned. Zhang Fan saw that the girl really didn't want to do it, so she quickly contacted the car dealer.

With the improvement of Zhang Fan's medical skills, don't know too few people. Zhang Fan knows a lot about the boss who sells cars in the provincial capital.

"Zhang Yuan, ha ha, have you come to the bird market? I'm in a panic today. Where are you? I'll come to you now. " A boss of a four s shop was busy to death, but after receiving a call from Zhang Fan, he immediately had time.

"Ha ha, thank you, boss Wang. I'm in tea." After two greetings.

Zhang Fan went to the point, "boss Wang, I want to buy a pickup truck. The tea vegetarians are old

models. I don't know if you have a new model."

"Oh! What model? " Although boss Wang wondered why Zhang Fan bought a pickup truck, he didn't ask.

After Zhang Fan told the other party about the model, "Zhang Yuan, this car can't work. I'm in this business. I know very well. Let me introduce you to one. Every aspect of the performance is very good, very good. "

"OK, please boss Wang."

In the evening, Zhang Fan explained to Shaohua the car introduced by boss Wang.

"The car you like is said to be no good by the owner of the automobile industry, but the quality is not good. There are a lot of small problems. I don't trust you to drive. If I put you on the road one day... "

"This car is so big. How much is it?"

Shaohua looked at the car picture in Zhang Fan's QQ and asked Zhang Fan.

"A pickup is not a pickup when it is small. Don't worry about the price. It's just this car. I'll decide for you.  
" Zhang Fan said overbearing.

"Fuel economy?"

"Silly girl, you are a future tycoon. Why do you always think about saving fuel or not?"

They said, just

At the weekend, Zhang Fan and Shao Hua took a plane to the bird market to pick up the car. Originally, boss Wang said he would send it in person, but Zhang Fan was sorry. The bird market is not dozens of kilometers away from tea, so it's too troublesome for others to say.

Raptor, the car Zhang Fan bought for Shaohua is Ford's Raptor. Shao Hua looked silly when he really saw the car.

"It's too big. Is it easy to drive?" Although Shao Hua graduated from the driving test, the car is really big enough for the little girl.

"Ha ha, have you ever driven the cool Luze of Zhang Yuan? In fact, this car is similar to that of Zhang Yuan. It's easy to drive. " Boss Wang said to Shaohua with a smile.

After receiving Zhang Fan's call, Lao Wang, who sold the pill car, directly asked his friends to order a pure imported Raptor for Zhang Fan.

After all, there are few rich people in the frontier. This kind of car can't be sold in the frontier a year. Ordinary people have to wait to buy it.

"Is this car expensive?" Shaohua asked Zhang Fan quietly.

"It's all right. It's not very expensive. Don't worry. " Zhang Fan comforted Shaohua. If he has the ability, why not give his lover good things?

Zhang Fan decided to buy the whole money. Boss Wang didn't make a penny and had to help Zhang Fan go through the formalities.

Although Shao Hua was a little distressed about the price of the car, he still liked it after he really got on the car.

But when the car filled up the fuel tank and paid, the girl began to tangle again.

"Little stone, let's return the car. I haven't made money yet!"

.....

After work, Zhang Fan received a very special patient in the morning.

## **Chapter 612**

In the morning, Zhang Fan went to Shaohua's house for dinner again. Jing Shu left. After the old couple had prepared the things for Zhang Fan and Shaohua, they went to the farm when they felt young.

Shaohua's family, Shaohua's parents also went to the farm, but because there were still some things to do in the city, Shaohua's mother came to cook for Zhang Fan Shaohua temporarily and help Shaohua deal with some things.

After dinner, Shaohua went out with her mother and Zhang Fan at the same time. Zhang Fan went to the hospital and Shaohua went to the farm.

The farm is about seventy kilometers away from the city. After a few days of adapting to the big pickup truck, Shaohua can now control it skillfully.

"I'm leaving. I'll catch you a local chicken in the evening. Let's eat a large plate of chicken. Take care of lunch by yourself. "

Shao Hua sat in the high cab, waved to Zhang Fan, drove a large pickup truck like a tank and smoked away.

In the past, when Shao Hua went to work, he wore work clothes and flat slope small leather shoes. Most of the morning, he hurried to the unit. Now the girl is completely dressed up as a cowboy. Backpack jeans, tooling shoes, extra spirit!

Shao Hua, who was a little tangled about oil prices, stopped tangled immediately when he saw Zhang Fan's salary this month.

"Zhang Fan, Zhang Fan, why is your salary so much this month?" Shao Hua couldn't believe it when he saw the message.

"What's the matter? It should be about the same if it's not a festival."

Zhang Fan doesn't know that the distinguished experts of several hospitals in bird city are paid, and the Council also has an allowance. Coupled with the salary and bonus of tea vegetable hospital, Zhang Fan's monthly income is almost 50000.

This doesn't include the cost of throwing knives.

"A lot more! Hey, hey, it's not your hospital accountant who sent you more! "

"Well! Think of good things. I'll ask at work. " Before Zhang Fan went to work, the financial offices of several hospitals in niaoshi called one after another. Zhang Fan understood the reason as soon as he heard it.

Although there is a blue sky truck, the fuel tank of the pickup truck is called a big one. The price of a fuel tank also makes Shaohua, who doesn't often drive, feel a little meat pain. Now he's relieved.

Sleepy in spring, sleepy in autumn, sleepy in summer, this is a popular saying, but there is another saying: nourishing the liver in spring, nourishing the heart in summer, nourishing the lung in autumn, nourishing the kidney in winter, and nourishing the spleen and stomach in four seasons.

The ancient Chinese medicine is not only like a treatment today, it may also rise to a philosophy.

When I was young, listening to these words was all bullshit. But once you get old, it makes sense to aftertaste it carefully.

In spring, everything recovers, many plants sprout, and people's food begins to be green. Many green plants contain a lot of growth hormone, and the consumption of liver detoxification function begins to increase after eating, so they should protect the liver.

In summer, when the temperature rises, the consumption of the human body also increases. This consumption requires the heart to improve its function.

In autumn, all kinds of bacteria enter the high incidence stage, and will soon enter the cold season, so we should keep the lung function well to fight against the future frost.

In the early years of China, it was generally about winter marriage. First, it was slack farming. Second, in the season after the harvest, men and women also had a certain energy reserve. It was time to release it.

But it can't release too much, so we should maintain the kidney.

With the development of science and technology, these proverbs slowly seem to lose their significance, but they are not.

Knowing some natural maintenance, you can't see the long-term benefits, but the short-term benefits are obvious, that is, you rarely catch a cold and have diarrhea, and then the medical expenses are reduced a lot.

In the morning, as soon as Zhang Fan entered the office of the administration building, he was blocked by the logistics director.

Lao Chen, logistics director, although he is not a management level in the hospital, this is also a position with a lot of oil and water. It really looks insignificant, but it is actually a very fat position.

Such a big hospital, let alone others, makes him look red every year when he repairs and builds buildings everywhere.

Lao Chen is a little Maitreya to everyone. For Zhang Fan and the real management of these hospitals, he is even more polite. He is on the front line when there is a red and white wedding.

Moreover, it is said that he and a big man are comrades in arms, so he can occupy this position all year round. However, he is very good at being a man. He always contributes silently in the hospital like an invisible man.

"Zhang Yuan, ha ha, I heard that you have a piece of land on the farm. One of my comrades in arms is

from the Agricultural Machinery Bureau. They have an activity to send machinery to the countryside. There are many well maintained Kang Maiying to deal with.

I think the price is very good. If you want, I can let my comrades in arms give you the internal price. "

Logistics Director Chen said to Zhang Fan while making tea with a smile.

"Hi! You are well informed. " Zhang Fan smiled and opened his work log. He wanted to see if there was any meeting he had to attend today.

"One of my friends is from the farm, so I know, ha ha!"

Director Chen put the soaked tea on Zhang Fan's table with both hands.

"Sit down, Lao Chen, if you have anything to say, you know my object has a piece of land, and you certainly know that she can't grow wheat. What kangmaiying is used. Say something. "

Zhang Fan smiled, director Chen is this hobby, love pull relationship, but this is also people's way of life, there is no need to condemn.

"It's better for Zhang Yuan to talk. I have a little hair, from the bird City Tobacco Bureau. His girl has had a headache for three or four years. She has seen a lot of places, but she is not optimistic. She has eaten several tons of Western medicine and Chinese medicine.

The effect is good and bad. Now I see the girl getting married, but this problem can't even maintain a normal life.

It's not. Your reputation is powerful in the frontier. They begged me in a roundabout way.

Hey, hey, so I have the cheek to beg you. If I hadn't grown up together, I really wouldn't want to open this mouth.

How busy you are! How many big and small things and operations in the hospital need you... "

"All right, all right. My teeth are going sour. At least I'm also a colleague. Look what you said. What about the patient? "

Zhang Fan reluctantly looked at Lao Chen. This guy is not much smaller than Zhang Fan's father. Because he is a cadre, he will retire later.

But, this speech, this cheek, really let Zhang Fan catch.

"It's downstairs. It's downstairs. I'm afraid I'll delay your work..."

Looking at Zhang Fan waving, old Chen ran out like a rabbit. In a few minutes, Lao Chen took three people into the office.

"This is our hospital. I don't want to tell you. As you know, our Zhang Yuan just came back from the capital a few days ago. Surgery every day, people are also very good. Tell Zhang Yuan about your girl. "

Lao Chen introduced and glanced at Zhang Fan.

Zhang Fan saw someone coming in and stood up and nodded. Three people, a man and two women.

The man is about the same age as Lao Chen. He is a little rich. He is well dressed, and the most obvious purpose is a red nose with a big garlic.

As soon as Zhang Fan saw it, he knew that this man had been tested by alcohol, and the woman behind him, although old, had specially cleaned up her hair and wrinkled eyebrows, indicating that her living standard was not bad.

Although the last girl lowered her head and couldn't see her face clearly, Zhang Fan knew that the other party was a little rebellious.

The shirt with the navel exposed tied a knot three inches above the navel. Cowboy SHORTS are shorter than Zhang Fan's underwear.

A poppy in full bloom is pricked at the ankle. In the weather of more than 30 degrees, both feet are wearing a pair of short waist Martin boots.

The slender fingers were smeared with dark nail polish, but strangely the right middle finger was pure.

"Sit down!" Zhang Fan smiled at the man and was polite.

"Hello, Zhang Yuan. I'm from niaoshi tobacco company. I've heard your name for a long time, but I'm humble. I didn't dare to disturb you before.

This time I really can't help it. I entrusted the relationship with Director Chen. It's really troublesome for you! "

He has a bad nose, speaks politely, and the anxiety in his eyes is not pretended. It seems that his girl's condition is still very serious.

The middle-aged woman smiled humbly. The young girl kept her head down and kept silent.

In the hospital, there are children who refuse to see their parents, and there are children who roar at their parents.

Few parents abandon their sick children. Even if they do, they can be on the news.

"Sit down, you're welcome."

"Sit down, our Zhangyuan has a high technical level, and the realm of being a man is superior."

Like Zhang Fan's secretary, Lao Chen took out a disposable paper cup and poured water.

"What's the matter. Let's talk about it first. " Zhang Fan said to them after director Chen poured the water.

"Ah! Girl, quickly raise your head and let Zhang Yuan show you. This disease makes our family sleepless all night. "

Speaking, the man pulled the girl around him. The girl was a little unwilling, but she raised her head and looked at Zhang Fan.

Her eyes were full of rebellion, like Zhang Fan. If she showed surprise or contempt, she would definitely stand up and go.

Although Zhang Fan was surprised, there was no change in his face.

This is the ability to boil out in the system in the past two years. Although he couldn't reach anything, Mount Tai collapsed in front and didn't change his face. However, in the face of patients, Zhang fan can still remain calm.

Zhang Fan was not surprised at the girl's appearance.

On her face, I can really see what the Chu River Han boundary is. The face on the right side is bright and beautiful, as smooth as a goose egg.

She is a little younger than Zhang Fan. She is the most beautiful age for women. She has curved willow eyebrows, big black eyes and white skin.

Even without makeup, according to her own conditions, she is no less than an ordinary star beauty.

But looking at her left face again, it was like eating a delicious meal and suddenly finding that there were many green headed flies lying on the edge of the plate.

And these green headed flies have just laid on the big meal to match (a).

The girl's face is divided into two, which is derived from the bridge of the nose. There is no trace of young women's skin luster on the left forehead, just like the heels of an old man in his 70s and 80s.

Not to mention the roughness, there are layers of dandruff hanging like a large piece of dandruff, as if it would fall off when the wind blows.

His left eyelid was drooping. When he looked at Zhang Fan, there was only one meat seam, a bare meat seam.

Eyebrows and eyelashes almost fall off. Even if they do, they are like weak seedlings that have not seen the sun for hundreds of years, hanging alone between the eyebrows.

It is also like a chicken scalded with boiling water. The feathers are gone. Only the yellow soft hair around the anus can directly make people feel the diaphragmatic response at a glance.

Then look at the lips. The lips that should have been thick and sexy shrink into two shriveled pieces of dehydrated meat stacked together.

The shrinkage of the left lip and face led to a strange deflection of the girl's whole face, just as her face was pinched by the door.

On the whole, it's weird, very weird. If the girl goes out in the middle of the night, she will not be scared to death. Zhang Fan doesn't observe carefully.

Zhang Fan watched for ten seconds. The girl saw that Zhang Fan had no expression of contempt or disgust. Instead, she lowered her head in shame.

"How long has this been the case?" Zhang Fan asked softly.

At the age when the flowers are in full bloom, Zhang Fan has this disease. Really, as a man, Zhang Fan is very sorry.

People still yearn for beauty.

"Three years. I had a headache at first, and then I started slowly... "

After entering the door, the girl spoke for the first time. Her voice was very nice, but her words were a little vague because of the deviation of the corners of her mouth.

"Can I have a physical examination?" Zhang Fan didn't ask about his illness first, but asked the girl.

"Yes!" Perhaps because of the small difference in age, the girl is always a little shy.

"Lao Chen, go and see if there is anyone in the physical examination room." Zhang Fan said to Lao Chen.

"OK, OK, I'll go now." Lao Chen immediately got up and went out. When he left, he nodded to his rosacea.

As soon as Lao Chen went out, his rosacea and tears were coming down. How many times have I seen a doctor? Many doctors were frightened when they first saw the girl.

Then, the girl became more and more reluctant to see people and treatment. Several times in the middle of the night, he could hear the girl's low cry from the bedroom.

His heart was as painful as a knife and an axe.

"Zhang hospital, far apart, we don't know how many hospitals we have run. Really, my heart is broken.

This time, the child is almost hopeless. They say there are all kinds of diseases.

This time, you must pay attention! Please. "

As he spoke, the tears rolled in the man's eyes and were about to fall. If your legs are weak, you have to kneel. Then rosacea took out a thick piece of newspaper wrapped together.

Zhang Fan knows what it is at a glance.

"Hehe! See a doctor first and let's talk after watching! " Zhang Fan smiled and said in an explicit way. Sometimes, what makes people strong is not encouragement, but

The girl who was originally excited with a bad nose and bowed her head, and the girl's mother who sat silent, looked at Zhang Fan almost at the same time.

The mood of rosacea brewing for a long time was directly annihilated by Zhang Fan's shameless statement.

"Good! OK! Good! " The drunken nose took back the things, but the heart was cold, cold!

Money! He doesn't care, but can such a shameless doctor look after the girl's illness?

## **Chapter 613**

The medical examination room in the administrative building is special and the decoration is of high grade. Although all the stools are not sofas, they are still equipped with a thin layer of leather cushions.

This thin layer of leather cushion, if you want to enjoy it, the price is quite high. The most common physical examination in the hospital can be completed with a few hundred yuan. A little more comprehensive, two or three thousand yuan will be completed.

This price is still a relatively comprehensive hospital. However, if you want to enjoy this leather cushion, the amount of money is hard to say.

For example, the leader of an enterprise, although he didn't pay much for physical examination, he asked thousands of enterprise subordinates to come to the hospital for physical examination.

I have to say that the physical examination room of the administrative center is different, that is, there are more layers of leather cushions!

Ouyang didn't know where he learned this set. He spent hundreds of dollars more on the decoration and directly turned the physical examination room into a symbol of the tea vegetable area. Those who haven't been here for physical examination can't be regarded as having social ability!

Although the utilization rate is not high at ordinary times, this physical examination room has not opened for three years, which is a model of eating for three years.

Most people who work in the administrative building are out of clinical practice, so Zhang Fan occasionally uses the equipment here.

Entering the physical examination room, the girl's original shy expression disappeared, like Zhang Fan's shamelessness, which made her feel that she didn't need to feel shy about Zhang Fan, so she let go a little slowly.

What Zhang Fan wants is this result, which can let the girl put down her shyness. For doctors, they can more comprehensively grasp the patient's condition during physical examination and consultation.

"Come on, sit on this stool first." While turning on the light in the room, Zhang Fan let the girl sit on the examination bed.

"Close both eyes first." Zhang Fan checks while doing it.

Nerve physical examination, a bit like molestation, very serious. General physical examination, will you ask, does it hurt? How painful? How does it hurt?

Orthopedic physical examination is much more direct. Pinch in the fracture, do not ask, the patient shouted directly.

In the neurological examination, Zhang Fan first separated with two finger zen. Of course, the girl's face is not big. After Zhang Fan separated with two finger zen, she can still use it.

If you meet someone with a big face, you can only use your hands.

Separate two finger zen, starting from the corners of the mouth on both sides of the patient, slide upward, slide slowly, and use a little force.

At this time, the muscles of the patient's face will produce a resistance to the examiner's fingers. If the resistance is different, it is morbid.

After checking the muscle strength of the face, Zhang Fan's two finger zen merged, and then slowly rubbed the patient's face with the pulp of his fingers.

The most sensitive part of the human body is the hand, while the pulp of the middle finger and index finger is the most sensitive part of the hand. Therefore, doctors, especially some extrabrain big hands, never wash their hands with hot water.

This sense of facial friction can also provide doctors with the patient's disease situation.

For example, frosting can be divided into rough frosting and subtle frosting. Therefore, a good doctor, when you hold his hand, it will not be sweaty or meat, but dry. The bone feeling is quite obvious and dry.

"Whistle! Put your lips up and whistle. " After checking the facial muscle strength and skin roughness, Zhang Fan said to the girl.

The girl estimated that she had checked many times. There is no doubt that the direct rise of the mouth began to whistle.

When you don't talk and shut up, it's a weird thing at most. But when the girl began to whistle, it was absurd.

When a normal person whistles, he first gathers his mouth together, and then forms various stripes around like a chrysanthemum. Really, the function of his mouth is similar to that of his anus. When his lips pout and whistle, he is really like a chrysanthemum!

The girl pursed her lips and whistled irregularly. The right lip forms a half pulled wrinkled protrusion, while the two pieces of atrophic meat on the left can not pout. It's as loose as the waistband with a belt.

Then, keep drooling, from the atrophied lip on the left, keep drooling. Clear brushed saliva, stained on the young chest.

Then, just as the girl was about to wipe her hand, Zhang Fanfei quickly put his thumb directly on the girl's temporomandibular joint.

"Hiss!" The girl's expression immediately showed a sense of pain. The sound of sucking the air conditioner was very painful, really painful. The saliva of the wire drawing didn't need to be wiped, but was directly sucked back.

A disease has turned a beautiful young and sexy girl into a monster. It's impossible for the girl to be shy.

After the examination, Zhang Fan began to check the patient's medical record. The medical record over the past three years was as thick as a book.

"Tell me how it happened." The diagnosis of medical records is almost the same, but Zhang Fan feels that this diagnosis is a little lacking.

The medical system of modern society has created a large number of doctors, and the number of patients has also increased.

It takes time to improve the level of doctors. When a doctor can really be a doctor after decades of dedicated study, he needs to face too many patients, so many that he can't bother all his thoughts on a patient.

This also leads to individualized and undifferentiated treatment.

Yes, this can reduce the treatment time. For ordinary diseases, this method is good and useful, but in case of special diseases, this method of diagnosis and treatment is lacking.

Prescribe drugs and treat diseases. As for the curative effect of patients, doctors are really tracking very few. The patient does not understand. After taking the medicine, he feels that it has no effect, so he changes the doctor directly, and then starts from the beginning and starts a similar treatment again.

Not all diseases can take effect with the same drugs. What else do you want a doctor for? Can't you write the instructions of the medicine in detail?

When Zhang Fan asked the patient how the disease happened, the girl gently turned her head and said nothing.

Then, Zhang Fan felt that his white coat was gently pulled. When Zhang Fan looked back, it turned out that it was the girl's mother who winked at Zhang Fan again.

"When you go to bed, first use the infrared light to do physiotherapy on your face. After half an hour, see what you feel." Zhang Fan calmly changed the subject, then turned on the light and went out of the door.

The patient's mother also came out slowly.

"What's going on?" Zhang Fan looked at the patient's mother and asked.

"Ah! It's a long story. The conditions of my family are not very rich, but my life is also passable.

She studied very well since childhood, but in high school, puppy love didn't enter the University, and then went to a higher vocational college, a higher vocational college subordinate to the tobacco company.

We want to find some relationship and let her enter the tobacco company after she graduates. " The woman is nagging. Zhang fan starts to guide consciously, otherwise she doesn't know when she can say.

"Is it right? After catching a cold at school, it began to get sick?" Zhang Fan directly interrupted and asked.

"No, no!" The woman quickly waved her hand and said, "listen to me.

She didn't know why she was always bullied in her first year in higher vocational education. It's no use looking for a teacher.

Hey, which school! The next year, suddenly, my girl's character changed greatly. She began to have no home at night. She also found that there were cigarette butts in her room.

As a result, one day, she didn't come home for two nights, so I went to find her with her father for a long time.

She was told by her classmates that she was in a hotel. When we found the hotel.

I couldn't believe my eyes. Wine bottles, cigarette butts and many girls were lying on the ground almost naked.

The smell of wine from the pavement makes people unable to enter the room. "

"Well, then?" Zhang Fan, listen.

"It turns out that they have sworn to the so-called sisters and often fight and drink. My girl is good.

Just drinking, nothing else. At that time, I thought I couldn't do this and took the child home.

Her heart is wild, she often runs out secretly, and then she drinks too much. When she is drunk, she sleeps on the ground regardless of cold or hot.

One day three years ago, she drank again, lay on the ground and slept all night. When she woke up the next day, she began to have a headache.

I didn't think she was drinking fake wine. But over time, the pain became more and more severe.

Then I went to the hospital. My condition was good and bad. Finally, it became like this. "

As soon as Zhang Fan heard it, he probably understood that she was a Jianghu female Xia who had muddled through the society.

Youth, reckless youth, in exchange for endless pain. When she washes away the lead, some things can't be washed away.

Jealousy is the strongest organ in the nerve of the human body. Bones and muscles are ignorant. If you treat me well, I'll grow up well. If you don't treat me well, I'll retire early.

The nerves are different. If you don't treat me well, even if you are a little negligent, the nerves can make trouble for you.

For example, hair dryer. In the face of the strong wind, you blow for a year. At most, you look rough, but you stay by the door and open a crack in the door so that the small wind can blow you a little.

It won't take long, just a few hours, to stay here. Why should I catch cold? Then he began to get sick.

That's what the old man said. Half closed windows can't blow.

In addition, sleeping on the ground when drunk may not be a problem once or twice. If the nerves will rebel after many times, why should I sleep cold, why are the nerves next to me hot, and then get sick.

Nerve, this thing, once infected, once the disease, the treatment is very troublesome. There are few effective drugs, and only hormones are effective. After hormones are often used, there will be no problems in the body. Let alone, it will produce drug resistance a little longer.

The neural structure of the human body is very complex. When it comes out of the body, it becomes nodal.

Because the greatest function of nerve is to transmit information, its structure is like the ancient post station, there will be a node at a certain distance.

It looks like red intestines when enlarged. The long red intestines hanging in the supermarket, section by section, are actually like this after the nerve is enlarged.

When bacteria and viruses infect, they can spread from one node to another, which is very easy.

However, it is very difficult for drugs to pass through this node. Therefore, the treatment of neurological diseases is not only difficult, but also very easy to relapse.

After the patient's mother finished talking about the patient's morbidity, Zhang Fan's psychological diagnosis was more implemented.

"Facial nerve nonspecific lesion pain, go to hospital, this needs surgery!"

The patient has lost the opportunity of conservative treatment and can only operate now.

#### **Chapter 614**

When Zhang Fan said he would have an operation, both the patient and the father of the patient with rosacea had a very tangled expression.

"Dean Zhang, is there any other way?" Rosacea is embarrassed and deeply afraid that Zhang Fan is unhappy. The questions are very tangled.

Parents' hearts are on their children and children's hearts are on stones. What they say is very image, that is, their own children, so that this man can be cautious.

Surgery is a simple word, but for patients, it is really a double-edged sword. Without experience, I can't understand the power of this word.

"The medical effect of your girl's disease is very small now, right? Look at her.

Not to mention the change in her face. Does she have electric shock pain without warning when she eats, drinks water and uses her masticatory muscles frequently?

There are also sudden pain when you are excited, laughing or angry.

During pain, even on the face, there are muscle variations? "

Zhang Fan began to recall his girl's illness to rosacea.

"Ah! Zhang Yuan, there is no laughing, but what you said is similar. I took a lot of medicine, and now I have more and more attacks. "

Rosacea sighed.

"Surgery! Conservative treatment with drugs is hopeless. " Zhang Fan said that and left.

The brain and spinal cord, as well as nerves, seem to be very complex things. Say it briefly.

The brain is the commander-in-chief, the spinal cord is the messenger, and the nerve is the pioneer or thug.

The brain and spinal cord also have nerves. In terms of volume, the brain and spinal cord are as big as the flood drainage canal of a city, and the nerves are as thin as the wires hanging in the sky.

If you enlarge the wire, it will look like a segmented insect, and it will be covered with cilia.

These cilia are all over the body. When the human body is stimulated by the outside world, these cilia will return the information to the brain. After brain analysis, it will give instructions.

These cilia then agitate the muscles to pull the bones in response. Of course, some places, such as the cavernous body, sometimes listen to the brain and sometimes don't listen. It depends on the age of this thing.

In their early years, older people often heard this saying that success is 99% sweat and 1% inspiration.

As for the truth of this sentence, I won't discuss it first. With the development of Neurosurgery, this sentence slowly lost the market.

First of all, without mentioning anything else, let's talk about the speed of neural response.

Not everyone's neural reaction speed is the same. In short, a man stole some tofu from a beautiful woman.

Well, then, the nerves feed back pleasure to the brain.

People who react quickly, before the other party is angry or anything, have begun to make the next decision.

And the slow response, the other party slapped him in the face, and he was still immersed in pleasure.

Why is this different? It's not the brain that doesn't work, but the speed of neural feedback.

For example, from the first finger to the wrist, the feedback speed of the nerve is 55 (+) 4.6ms.

What do you mean? The reaction speed from the first finger to the wrist of ordinary people is generally 55 meters and seconds.

Plus or minus 4.6 meters per second, that's the difference. Some people are fast, others are slow.

This time seems like it's no big deal. It seems that it can be ignored directly.

But how about lengthening the distance? What's the distance from hand to brain? What if it's competitive?

People give you a second, this second, if in the same exercise, this second is the gap between heaven and earth, which can not be crossed in a lifetime.

Therefore, reading, sports and athletics are really industries that rely on talent.

Zhang Fan explained the situation to the patient and left. This special relationship is very troublesome.

Not too close, not too far. Too close, I feel you have an attempt, too far, and embarrass the introducer. Therefore, Zhang Fan left after saying the treatment plan.

"Zhang Yuan, I don't like what I prepared. Is it less. He said he was going to have an operation and left, but he had a clear grasp of his condition. "

After seeing Zhang Fan go, Rosacea pulled logistics director Chen over and whispered.

"What did he say?" Director Chen said a little incomprehensible. Although he is not familiar with Zhang Fan, he knows Zhang Fan. He should not be a greedy person. What's more, Zhang Fan has scruples about saying no.

"When I took out the red envelope. He looked at it and said he would talk about it later! Is it less? Thirty thousand! "

Rosacea has a good relationship with Director Chen and is not taboo.

"Hehe, it's not too little. Let's put it this way. The people people people come into contact with are really not what you and I can imagine.

You know, I came to the frontier alone. In two years, I opened two or three houses, and there were almost 100 mu of land on the farm.

You said, if he relied on your two or three money, he could get to the present level? "

Old Chen was confident and said to the distiller's grains nose with a slight contempt that with such a powerful leader, old Chen had a sense of pride.

"Well! What do you mean... "Rosacea bit his teeth. He can do anything for the girl. Don't say money. Even if he sells blood, he has to find a way.

"I mean, forget the money. With my introduction, I guess Zhang Yuan is embarrassed to accept it even if he wants to. In addition, the hospital has a good risk evaluation of Zhang Yuan. I haven't heard that he receives a red envelope.

No, don't give the money. You get something rare. Aren't you in the tobacco bureau? You can get some cigarettes that can't be seen in the market. "

"OK, no problem! This is simple. What's more, is the operation of Zhang hospital reliable? "

"Is it reliable to be invited to the capital for surgery? I'll tell you, I won't help you if you do. Do you think anyone can get in touch with Zhang Yuan in this hospital? "

Lao Chen blew up immediately. Sometimes, when a person reaches a certain position, most people who know him begin to protect him, not for others, just for one day, maybe he can help himself.

The performance of human admiration.

"Xiao Wang, do you have any better cigarettes reserved by our unit?" As soon as I heard about rosacea, I quickly pacified Lao Chen and called the people in the unit in front of Lao Chen.

"Director, there are three characters of China and Cordyceps smoke in wooden boxes. There are also top snow lotus. "

The men with rosacea began to report.

"OK, OK, these are not needed. It's just whether there are any kinds of test cigarettes sent by the cigarette factory. A little higher. "

Rosacea impatiently interrupted each other.

"Oh, yes, the magic tobacco factory sent several cans of cigarettes in iron boxes this time. There was no logo. There was only a five pointed star printed on it. The director ordered two cans, four cans, and... "

"OK, just keep these. I'll tell the director that I'm of great use."

.....

People, that's it. When things happen to yourself, they mess up.

Rosacea finally let the girl in hospital, because Zhang Fan is so famous now, and then asked his subordinates to go to tea.

After Zhang Fan went to the capital, he had a little easy-going mentality, which completely cleaned the teacher's white hair and Ouyang's gnashing teeth.

After returning to tea, I started to build my own team while refueling my study.

## **Chapter 615**

Zhang Fan's family, three generations up, is said to be a landlord in his Taiye generation, or a so-called landlord with more than ten acres of land.

This is what his father has always been proud of, because Zhang Fan's mother's family has always been a poor and lower middle farmer.

Therefore, Shao Hua has the greatest backing to buy land this time. Zhang Fan's parents not only do not object, but also support it.

Everyone said that the son should be poor and the daughter should be rich. In Zhang Fan's family, there is no poverty and wealth between children. Only that it was originally an ordinary family and didn't pay so much attention to it.

But for Zhang Fan, it's really stocking. The old man and the old lady wanted to die when they didn't see Zhang Fan. As a result, as soon as they arrived at the frontier, Shaohua bought land and went directly to the farm.

Zhang Fan is now a person. As soon as the land is taken over, we have to re plan what canals and trees on the side of the gutter. Although it was hired, Shaohua still had to keep an eye on it.

No one cooked for him, and Zhang Fan went out to eat lazily. Just make do with it at home. After dinner and calling Shaohua, I heard that Shaohua and his parents were eating a large plate of chicken and Zhang Fan's saliva!

Envy belongs to envy, but Zhang Fan still has a very important thing, that is to deal with the teacher's inspection.

The old man didn't know whether he was getting old or deliberately. Every time Zhang Fan asked questions about his homework, the old man didn't ask them according to the routine. For example, the homework was the liver. As a result, the question was the pancreas.

Moreover, he will go to Qingniao to hand in his homework next week. Zhang Fan still has to work harder.

Shizu's handwritten notebook really makes Zhang Fan love and hate!

"If you don't write in regular script, you have to get a cursive script! What is this?" In the incessant muttering, Zhang Fan slowly entered the state of learning.

The daughter of rosacea was also hospitalized and began to improve the preoperative examination. Rosacea will also be a man. He didn't give a gift to fan first, but gave him a few cigarettes first.

Although Lao Chen said he would not live or die, he became more enthusiastic after taking the cigarette.

When they were drinking wine at night to discuss how to give gifts to Zhang Fan, a very serious and funny thing happened to tea vegetable.

In the large-scale development of the frontier, many mainland bosses came to invest in the frontier at one time.

For example, farmers' orchards have built the largest tomato base in Asia on the frontier, but when advertising this thing, they have to say that his tomatoes come from Europe.

Such enterprises are particularly numerous in the border areas. For a time, the foreign population almost feels more than the local people.

There is a clean coal plant in Quark County of tea, because the local coal mine resources are very rich, and the boss also paid a lot of money.

A factory was built and a dormitory building was built. Frontier people do not like to give people long-

term work, because frontier work is easy to find.

Picking cotton in summer and sweeping snow in winter can make a comfortable year.

Therefore, the workers in these factories are outsiders, even the chefs are outsiders.

This side of the soil and water, raise one side of the people. There are four kinds of green beans in tea, which local people don't eat. Because of the long sunshine time in the frontier, this green bean is very toxic.

Let alone deal with it casually. Even housewives who cook all their lives dare not deal with this string bean.

The foreign chefs don't understand. They are greedy for cheap. They don't know where they came in. A lot of green beans came in.

It's hard to avoid those who are not raw or cooked, and this bean is afraid of being half cooked.

Stewed pork with green beans tastes very good. Soft cotton doesn't say. There is also a special soybean protein. With the fat of fat meat, it tastes very good.

In the factory with 300 or 400 people, the workers are in full swing and praise the Cook: "fat cook, I cook with my heart today."

"Well, yes."

The fat cook was very proud to see that everyone ate well and the raw materials were cheap, because today's food money was a little black again.

As a result, something happened at night. Because it happened to be the 15th day of the lunar calendar, the moon hung brightly in the sky like a fat cook's oil face plate.

The dormitory floor is in the wasteland. It is surrounded by weeds. There is no water, so the toilet can only be a dry toilet. This dry toilet tastes a little heavy, so it is a little far away.

As a result, in this evening, there were people up and down in the corridor in a hurry.

At ordinary times, everyone's work is very heavy. Most of them rest in the dormitory at night. As a result, I don't know why they are in a hurry in the corridor today.

The boss is a southerner. Usually, he has to go back to the tea vegetable city in the evening. As a result, he drank some wine tonight and went to bed after eating the canteen.

In the evening, the boss had a pain in his stomach. It was really tumbling. Originally, he took off his

clothes to sleep. He didn't even have time to wear his clothes. He hurriedly pulled his shoes and ran towards the wasteland behind the dormitory. The bathroom was too far away and it was too late.

Just after he ran to the dormitory building, he saw a scene he couldn't forget in his life.

Hundreds of meters long dormitory downstairs, squatting rows of naked buttocks, white in the moonlight, can really shake people's eyes. And hundreds of people were moaning and defecating at the same time.

The bright moon, shining on rows of buttocks, suddenly had an army like spirit.

The boss didn't care. He quickly found an open space and took off his underwear. He heard the sound like a stone hitting the lake, "boom!" Fecal residue splashed everywhere.

Even a trip is enough, but with the extension of time, some people just lie down in the dormitory for a few minutes and start to have stomachache again.

In the end, people have to queue up to go to the bathroom in the open wilderness. Men and women can't care about the difference between men and women.

At this time, no one has any bad thoughts. They who have diarrhea and anal prolapse can't care about other people's naked ass.

Overnight, I pulled less four or five times, and I couldn't tell if I pulled more. Especially the Fat Chef, because he ate the most in the back kitchen, so he didn't go upstairs that night.

It's even more terrible in the middle of the night. The contents of the intestines are cleaned, and then start to pull water.

Once you take off your pants, it's like the water pressure of the tap is insufficient. It's bubbling yellow water.

As soon as the boss saw it, he couldn't stand it. If he couldn't stand it first, it would be troublesome if one of the workers was pulled to death.

A direct phone call to the county hospital.

Quark county hospital has completely entered the era of Shi Lei. Lao Shi has no other skills, but he has contacts.

As long as there are some famous doctors in the city, he maintains quite well. In particular, he treats Zhang Fan with extra care, just like his boss.

Although the development of the hospital has not improved. However, in the hands of Lao Shi, there has

been no major medical accident. It is really his ability.

"Come on, send 120 to the new mining area. It is said that someone over there has diarrhea. "

The boss pulled off the force and didn't make it clear. A 120 car in Quark County went to the mining area.

As a result, when I went to the place, the doctors in the emergency department were scared to death. Under the moonlight, there were a lot of workers lying on the wilderness.

Although there are factories and mines in a deserted place, it is still a desolate place after all,

I'm looking at a group of workers lying naked, all moaning. It's really as weird as ghost movies.

If the doctor in the emergency department hadn't been brave, he would definitely be able to get on the bus and run. It's too penetrating at night.

He looked up and asked, "it's broken! Collective food poisoning. "

Grab a man who looks well dressed, "how many of you, how many here."

The workers have long collapsed, and their eyes are double shadows.

Doctors can't care. Such things must be reported in time.

The CDC heard, "thousands of people, food poisoning!"

Director of the CDC, almost had a heart attack.

Other industries do not know much, but the CDC, even the CDC at the county level, has the power to directly contact the provincial authorities under special circumstances.

This time, although the director of the CDC did not contact the provincial level, he picked up a special phone and called the urban government directly.

"What, thousands of people's food poisoning? Has anyone died? "

"The situation is unknown!"

"Come on, send out all the medical forces that can be sent out in the urban area. Even a farce is better than a tragedy. Come on!"

In the middle of the night, when every family was sleeping, the doctor in every corner of tea thought of the phone.

"Assemble, assemble the hospital!"

## **Chapter 616**

Chinese people have a strange personality. On weekdays, a little trivial shit, not to mention strangers, even neighbors can gnash their teeth at each other.

But in case of any major disaster, people can unite as one, bite their teeth to fight the natural disaster, and even sacrifice their lives for strangers.

In short, the Chinese people are the most united in this matter.

Perhaps this is the magic weapon of this nation for thousands of years.

As soon as Zhang Fangang entered deep sleep, the phone at the head of the bed began to beat. After two years of working as a doctor, I have already had subconscious actions.

As soon as the phone rang, Zhang Fan immediately rolled over and got up. My eyes are too sour to open, but the phone has been connected.

"Hello!"

"Zhang Yuan, emergency assembly, mass food poisoning in Quark county."

"Good!" Zhang Fan doesn't talk nonsense. Now it's not a time for nonsense. The phone hasn't hung up yet. He has started dressing with one hand.

Lao Wang's head downstairs is old enough to sleep. His daughter works in the government and his son-in-law is a small leader.

In the past, he was very proud in the community. Whenever Zhang fan set out in the middle of the night, the old man knew that he came to talk to Zhang Fan several times. Finally, with the advice of his daughter, it was over, but he was a little indifferent to Zhang Fan's greeting every time.

As Zhang Fan became more and more famous, the old man became more and more polite. Sometimes he would send some welfare tea from his daughter's unit to Shaohua's family.

When Zhang Fan started to close the door, Lao Wang said to his wife, "it seems that someone can't do it again, alas! In the future, it seems that we still have to walk more with those upstairs! "

"Sleep! Dead old man, I just fell asleep! "

"Hey!" Lao Wang had big eyes and didn't know what to think. Maybe he was recalling his neighbors.

Diarrhea, in modern society, this disease seems not so terrible. In particular, some people are greedy, often have diarrhea, and then know some conventional drugs.

Those who know something but don't know it generally know norfloxacin, and those who know a little know montmorillonite powder.

In fact, diarrhea is a terrible disease. According to epidemiological statistics all over the world, diarrhea is the second leading cause of death in the world.

This second largest, not just disease, but the second largest of all causes, is it terrible? Very terrible. In developing countries, countless children under the age of five die of diarrhea.

Even the most powerful Americans on the blue planet, there are more than 1600 people a year who die of diarrhea and those over 74 years old. For a diarrhea, the United States spends \$1.2 billion a year on treatment.

Therefore, when the tea element CDC learned that so many people had food poisoning and diarrhea, it was shocked directly, and the hair of the director of the CDC stood up.

The Chinese government is sometimes unreasonable. For example, if the CDC has a typical large-scale epidemic outbreak in the region, the director of the CDC will be replaced afterwards. There is no reason to talk about it. This is the iron law.

How many people can survive until the director of the deputy provincial CDC in their life? Therefore, after hearing the report from quark hospital, the director of CDC directly called the largest leader of tea.

Because the situation is unknown, I don't know whether it is man-made poisoning or other factors. And the number of poisoning is so huge that it is a very big accident directly.

Armed police and police opened the way with live guns and bullets, followed by tea su. All medical

forces that can be sent out were dispatched.

The emergency response team was also established in a short time. The group leader is the deputy leader of chasu, the Deputy Group Leaders Ouyang and Zhang Fan, the president of the hospital of traditional Chinese medicine, and the leaders of the armed police, while the director of the CDC has been excluded from the leadership team.

Zhang fan used to do whatever he asked in the car. Now he has been entrusted with an important task by his superiors.

"President Ouyang, president Zhang Fan, it's up to you now. I promise here. As long as you are involved in the personnel deployment, you have all the command.

In case of disobedience, it shall be treated as criminal responsibility afterwards. I would like to emphasize once again that people's lives are more important than everything. I hope our medical staff can overcome difficulties, unite as one and strive to be the white angel of the new century. "

After the tea vegetable leader explained to the leaders of the hospital, he stressed to the police, "we must find out the situation of the incident before dawn. I need to get the report before going to work. The superior province is already waiting for me to report."

"Yes!" The leader of the police station saluted with a livid face. It's only a few hours before dawn.

The motorcade set off and set off in a mighty manner. In fact, personnel can't use many cars. A large truck can pull many people. In special times, personnel usually take military vehicles.

First, save space. Second, military vehicles must be able to ensure that they will not break down on the way.

There are few cars to pull people. The most is medicine. Thousands of people have diarrhea, and all of them are adults. Think about how much liquid it needs!

Flashing lights and no whistle, special vehicles set off. Zhang Fan's cool Luze led. After Zhang Fan had finished the operation for the armed police soldiers, now he is also famous in the armed police team.

In the car, Ouyang kept in touch with the tea vegetable hospital while opening the personnel list and planning in his heart.

In such emergencies, being a leader is not easy. Although the president of the hospital of traditional Chinese medicine and the president of the CDC were no longer convinced of Ouyang, none of them dared to challenge Ouyang at this time.

This kind of medical rescue, in the tea element, Ouyang's experience is directly incomparable.

"First, we should divide the personnel into three categories, which is like fighting a war. We must have a pioneer. If we encounter trauma such as a car accident, we should send doctors from general surgery and orthopedics as the pioneer.

This is diarrhea due to food poisoning. Generally, doctors in the Department of Gastroenterology should be sent, but there are more female doctors in the Department of Gastroenterology.

Therefore, at this time, male doctors in the emergency department and general surgery should be photographed as pioneers. Their task is to distinguish the weight of patients in the fastest time.

With a pioneer, there must be a general. At this time, the general is the female doctors in the Department of Gastroenterology. For heavy, extremely heavy and dying, there must be a corresponding disposal team. Never grasp the eyebrows and beard at once.

Special attention should be paid to the fact that when grouping, the members of a unit must be divided into groups because they have a tacit understanding.

Moreover, a group must have a backbone and never be headless.

If there is a general, there must be a reserve army

....."

Ouyang was holding his notebook, writing and drawing, as if talking to himself.

In fact, Zhang fan understands that this is Ouyang's words and deeds. This experience seems simple and clear, but it is bought with human life, and the price is not too much than gold.

The quark county government is also worried. The medical team was dispatched at the first time. With the increase of personnel, the news is becoming clearer and clearer.

"385 people, unified diarrhea." Ouyang received the message at the first time.

Diarrhea, in the end is how things, most people have had, but to tell the truth, few can tell clearly.

Simply put, normal defecation is three times a week to three times a day. In other words, three times a week or three times a day is normal.

And diarrhea is not simply more times, it is diarrhea, maybe more food!

Diarrhea is defined as feces with reduced viscosity, accompanied by urgent defecation and abdominal discomfort.

This is a professional saying. Generally speaking, it means that you have diarrhea and can't hold it. You

also have stomachache. This is diarrhea.

As a Chinese saying goes, Holding your urine can do thousands of miles, but laxity can't do anything. That's what it means. Diarrhea here is diarrhea.

The terrible thing about diarrhea is not how much you pull, but the electrolyte disorder in the human body.

Generally speaking, the human body is actually an electrolytic plant and a chemical plant. Both plants operate in a dynamic equilibrium and stable pH.

Diarrhea will lead to the loss of a large amount of liquid in the intestine. This liquid is not fecal residue, but rich in potassium ions, sodium ions and other key ions.

When these ions are lost, the acid-base balance of the human body begins to disorder, which directly leads to the strike of power plants and chemical plants.

For example, if you drink a drink, it is super sweet, and then the ions in your tongue will be forced out. As food enters the intestines.

The intestines suck these useful ions clamped in the feces back, and then the intestines look, yo, the man's mouth and tongue lack ions, so it directly sends the ions through the blood to your tongue and mouth after disinfection by the liver.

This is a reincarnation.

The simplest, such as muscle, begins to have problems when electrolyte disorders occur.

Do you want the muscles to twitch? Do you want the muscles to become stiff? For example, after someone is poisoned, he twitches his whole body and spits white foam at his mouth. This is the manifestation of abnormal muscles.

The heart is a big lump of muscle. When the electrolyte is disordered, does the heart want to start jumping? The original jumping, jumping and jumping may become jumping and not dada.

When the heart beats disorderly, the blood cannot be pumped out, and the blood cannot come out, the cells of the human body begin to lack oxygen, which aggravates the danger of the body.

And once diarrhea reaches a critical value, it can be said that its risk is no simpler than massive bleeding.

In his early years, one child was afraid of fever and the other was afraid of diarrhea. Because there was no large amount of intravenous fluid for rapid rehydration, almost all parents had one or two brothers and sisters who died of diarrhea and fever.

There are too many foods that can cause diarrhea. Sodium glutamate and seafood can cause diarrhea.

Moreover, the food poisoning of seafood is more terrible. Some special fish are directly poisons with neurotoxicity. Therefore, it makes sense to stew and eat.

After entering the expressway, the military and police vehicles directly turned on the searchlight, and the moonlight was covered up.

Gallop! In the middle of the night on the highway, the speed is almost 140. Zhang Fan's car leader is walking fast on this road. Zhang Fan doesn't know how many times he has walked.

## **Chapter 617**

Zhang Fan's car took the lead, followed by a row of red license plates, trucks and cheetahs, and the searchlight opened the way. How shocking it is.

The temperament of the army, to tell the truth, sometimes is definitely not comparable to that of any private team. Even a team of sports cars is definitely not as shocking as this team, but this shock is a thrilling shock.

When the motorcade arrived at the boundary of quark County, the traffic police team specially sent by the county Party committee also joined in. When they saw the motorcade from the city driving quietly, they turned off the siren.

The mounted police led the way and ran directly to the accident site. When Zhang Fan arrived at the accident point, to tell the truth, people in ordinary industries, let alone encountered it, might not have thought of it.

Wind, the wind of China, there is a typhoon in the south. It is estimated that the typhoon season is the happiest day for primary school students, because they can skip classes.

The northwest wind is a black wind. When it blows, it can be said that it can't see five fingers without saying. It can also fill your nostrils and respiratory tract with sand. It's no exaggeration. When the wind is strong, the train still blows over you.

This is the northwest of China, but there is little wind here. Moreover, with the hot summer weather, there is no wind on the back legs of the snow line on the top of the mountain.

The accident happened in a mountain depression, built close to the mountain. When Zhang Fan got off the bus, people didn't see it, and the smell came to their faces.

At this time, Zhang Fan and they really hope to have a refreshing and hearty wind, but they don't.

Sour and smelly, plus the hot gas in the mountain depression, the moment you open the door, the smell is like a throat sealing poison, which can directly make people breathe and automatically close in an instant.

It's stinky, like the stinky tofu in the sauna, sour and smelly, and mixed with damp air, like a mask on the face of a drunk's vomit, directly cling to the face.

Doctors, especially those in the Department of Gastroenterology, deal with shit too often on weekdays. They are all trained. As a result, in this depression, several female doctors were vomited by this sour Shuang.

Ouyang's face is iron and blue. Ouyang is even more unreasonable at this moment. When Zhang Fan saw that Ouyang was going to be angry, he hurriedly said, "Dean, give orders quickly. The taste is so strong that it is estimated that people are choking."

"Yes!" Ouyang nodded, then opened Zhang Fan's driver's seat and began to honk. For a time, the sound of the horn was like a horn, which made people who wiped the corners of their mouths and endured nausea begin to gather.

With the arrival of the urban team, the Quaker county emergency department doctor who came to the scene first hurriedly came to report the situation "The patients are behind the second floor of which building! We have too few hands to transfer. "

"Lead the way!" Ouyang doesn't talk much.

Armed police soldiers helped nurses and doctors carry medicine and stretchers and began to run to the back of the building.

When the crowd ran to the back of the building, it was really unspeakable. The armed police's searchlight shone on it.

The first thing to see is the dense stool array like a maze!

The wasteland was originally overgrown with weeds. After building, there is a cement edge about one meter wide along the edge of the building.

People with stomachache, just above the cement edge, like yellow chicken cake, are full of golden feces on the cement edge.

At the beginning, the arrangement of stool seems to be regular. The distance is very wide. The farther back, the narrower the distance. The farther back, the less formed the stool is.

Originally shaped like an egg tart, it also began to become thin and mushy, getting thinner and thinner later, and finally almost like chicken feces.

It is estimated that the situation is too urgent. Some people don't pay attention at their feet, and some even have footprints on their stools.

Someone is definitely in a hurry without shoes. Five toes are printed on the concrete floor. It's too obvious.

At this time, the workers were divided into several groups. Those with strong resistance eat less, and can sit at the entrance of the stairs with their stomach covered. Although he looked depressed, he was able to stand up at last.

There is also that although I can't reach the stairway, I still sit, although I have shit around me.

The heaviest Gang lay directly near the stool array. These people are the most indescribable.

It was originally midsummer, so I wore less. A white T-shirt and large underpants are standard. But at this time, where can you see the original color.

The chewed green fiber of beans and the Yellow soup hung on him, just like Shrek looking for maggots in some pits.

With a click, Ouyang turned on the loudspeaker.

Some people, to tell you the truth, were born in peacetime. It's a pity. For example, Ouyang is. In such a disgusting scene, Ouyang looks like an iron man without any discomfort.

The more nervous, the more dangerous, and the more serious the situation is, the more calm Ouyang is. I guess she secretes more adrenaline than others.

Zhang Fan couldn't, because Shaohua and them were away at night. Zhang Fan was lazy and ate a few mouthfuls of steamed bread with yellow tomatoes.

At this time, the searchlight of the armed police was particularly clear, with bouts of nausea. Tomatoes always wanted to see the world in their throat.

"Move the patient away from the scene first! Come on, the stretcher is not enough to carry directly. This is not a trauma. It's OK to lift and move. First move the patient away from here and move to the basketball court in front of the dormitory building! Come on! "

Ouyang said something and was about to go in!

Where can Zhang Fan let the old lady in. He endured nausea and grabbed Ouyang's arm and didn't let her in. "Don't go. It's a food poisoning. It's also carrying people in. I'll go!"

"Well! Then go. " Ouyang was right.

Zhang Fan took several emergency department doctors and armed police soldiers directly into the innermost part.

When Zhang Fan saw a fat man, he couldn't help it. Not only did he not help it, but perhaps everyone could not help it for a long time. Several people who saw the fat man threw up at the same time.

The fat man is the cook. When he was cooking, he tasted it while cooking. When it was raw, it was the most toxic.

Moreover, after cooking, the fat man was happy to see everyone eat. He was also happy. He joined in again and ate more. Therefore, he eats more and is more toxic.

Of course, Zhang Fan, they don't know. This man is the cook.

What Zhang Fan saw was a mermaid, a yellow green Mermaid.

Between the fat legs, the yellow and green soup has long been stuck together. Along the thighs, the liquid mucus flowing from the hips can be seen where it is contaminated. Only on the edges of both sides of the thigh can you see the flesh color, just like white fish scales!

In addition, when he had a stomachache, he struggled. He really didn't need makeup on his body, face and hair! Pull out is a mermaid!

Because of dehydration, he had a little coma, thirsty mouth, involuntarily beside the fecal water, like a fish jumping ashore, opening and closing the mouth of the elderly.

"Move! Move! " Zhang Fan, who vomited twice, was a little better, then pressed his stomach discomfort and took the lead in carrying the fat man out.

To tell the truth, in general, when a disaster occurs, when the doctor goes to the hospital, he is either crying, groaning and groaning, or he is very serious.

Today's scene is really like a gathering place for drunks. Doctors lift patients with weak legs and pay attention to the Yellow mines under their feet.

Therefore, when walking, it seems to shake, just like two drunkards holding a more drunk drunkard.

In addition, the two people who help people sometimes keep hiccups, vomit, vomit!

It's really like rolling in the yellow mud pit when hundreds of people get drunk together!

Er, more than 300 people were finally removed from the scene. On the concrete basketball court, on the white court, it is like rubbing countless yellow seals, or fried semi cooked fried dough sticks, which are placed together neatly.

## **Chapter 618**

When the rescue and medical team set out, they thought of all kinds of problems, including the amount of rehydration and the number of people.

Unexpectedly, so many people had diarrhea in such a narrow place.

I didn't expect such a situation. What is lacking now is not drugs, not doctors, but disinfectant!

Now you can't start intravenous injection directly on the mermaid! In modern times, they must first be thoroughly disinfected.

Debridement, what is debridement, the first is to be clean and sterile.

The primary focus of modern medicine is sterility. Various treatment methods have been controversial in various schools, but everyone has the same requirements for sterility. After all, western medicine is laboratory medicine.

The resident bacteria in the intestine, E. coli, let alone blood, are terrible even if they are transferred from the lower digestive tract to the upper digestive tract.

In this case, direct intravenous rehydration is meaningless. Ouyang looked at the crowd in three rows on the basketball court, and his eyebrows were almost peach.

It takes two hours to make a call and urgently transfer disinfectant from the county. What should I do? Ouyang kept calling.

Zhang Fan wiped the vomit residue from the corner of his mouth and was pulled aside by the doctor of the county hospital.

"Zhang Yuan, you rest, rest, and leave the rest to us. Look at your sweat!" The doctor in the emergency department of the county hospital took Zhang Fan aside.

Zhang fan can't care about these. Seeing the medical staff standing on the edge of the basketball court at a loss, he hurried to Ouyang.

"Dean, is something wrong?" Zhang Fan knew at a glance that there was a problem with the medical staff.

"The disinfectant is not enough, can not reach the sterile conditions, and can not be used for intravenous infusion!" Ouyang said anxiously.

The groaning voices on the field became less and less. At this time, Ouyang hoped they could shout out loudly.

But no, it's broken. It's a luxury to open your mouth. Lao Cao said that women are made of water. In fact, both men and women are made of water. Of course, fat people are a mixture of water and oil.

"When will the disinfectant in the county arrive?" Zhang Fan is also anxious. Do you want to stay out of it at a specific time and in a specific industry? Want to be free and easy?

It's impossible. After nearly ten years of professional training, no selfish person will think of selfish ideas in such a scene. Really, this is the charm of the critical moment and special industry.

"It's about two hours. What should I do? What should I do now!" Ouyang held the hot PHS tightly and wished to pull the leaders of the County Health Bureau out of the phone.

"Map!" Zhang Fan thought, thought, suddenly said loudly.

As soon as the armed police leaders around Ouyang listened and waved their hands, it was estimated that they were staff officers, so they came to Zhang Fan with a map.

"Ka!" The armed police opened the map very neatly " Ah! " Zhang Fan's sweat came down. He was not in a hurry or hiccup, but this map. He couldn't understand it!

The messy lines on this map don't even have a place name. They are all code names.

"Chief, which position do you need to know?" The staff estimate also saw Zhang Fan's embarrassment and immediately said it to Zhang Fan.

"Which administrative township is the nearest to this place?" Zhang Fan is not polite either. Now is not the time to be polite. He orders directly.

"Report, straight-line distance, 15 kilometers away is subutai Township!"

As soon as Zhang Fan listened, he had a bottom in his heart. To tell the truth, Zhang Fan didn't go to the countryside for nothing in the past two years, not to mention the counties around tea. Even in various towns, Zhang Fan didn't say a hundred echoes, but he also had a name.

What's more, in subutai Township, where Zhang Fan and Lao Chen were put down in small shoes, this place can be regarded as a place where Zhang Fan has been deeply cultivated.

Pick up the phone, Zhang Fan began to call, "Dean mengke, to make a long story short, how much disinfectant do you have in your hospital?"

"Ha ha, my brother, Zhang..." the dean of the township health center who was not in Taiwan looked at Zhang Fan's phone, and everyone could still hear his happy tone.

"Brother, there are a lot of disinfectants. Recently, the superior allocated a large number of summer drugs."

"I'm in the clean coal plant. Now I need a lot of disinfectant. It's extremely urgent. Now I use my personal friendship and ask you to send me a lot of disinfectant immediately. Can you do it?" Zhang Fan was neither polite nor polite, and his tone was very stiff.

"Ha ha, others can't, but my brother, you can definitely do it!"

Mengke's chest shot of the mountains, the heroic of the men on the northwest grassland is reflected every minute.

To tell the truth, sometimes, especially in remote villages and towns, or nomadic villages and towns, at this time, even if the county magistrate's order, Zhang Fan's friendship may not be effective.

Now, the effect of Zhang Fan's deep cultivation in this township has come out. Munk hung up and sounded their brass horn.

Adults and children, men and women, all rode horses from far away, and even the temple Lama Zhang Fan who had intestinal obstruction came.

Because this trumpet, this copper trumpet, is not allowed to blow unless there is a major event.

"Our brother, Dr. Zhang, who was stationed in our tribe at that time, and now Zhang Fan, who is the president of tea vegetable hospital, is in trouble! He needs us to send the disinfectant to the mixing ditch 15 kilometers away as soon as possible.

Now, what? Zhang Fan asked us. What should we do? "

On the grassland in the early morning, the sun has not climbed up, and the star is hanging on the grassland sky in summer, so quiet and comfortable.

But the herdsmen under the sky were very excited.

"Was it Doctor Zhang who came to us when we were shearing wool the year before last?" An old lady asked her son.

"Yes, it's Doctor Zhang."

"He is a good doctor. We must help him!"

"Yes!" The son nodded.

"Let's go. Let's go now. My eight year old balangzi can ride a horse now!" A man said loudly that his child, Zhang Fan, had been treated the year before last!

"My new daughter-in-law is OK!" His old man, Zhang Fan, has been treated!

"I'll go too!" The Lama stationed in the village also spoke. He had intestinal obstruction and almost died of pain, which was also treated by Zhang Fan.

For a time, the horse team of hundreds of people was pulled up.

In the mainland, let alone township administrative units, even if there are hundreds of people in a village?

However, in the northwest, in the pastoral areas in the northwest, perhaps hundreds of people are almost the number of people pouring out of a township.

This is merit, this is the trust that merit can get!

Men, women and even some children who have just started primary school set out on a high horse with disinfectant, just like soldiers.

Roaring, galloping on the grassland, destination, where Zhang Fan is, gallop, horse team gallop!

Ouyang did not dare to place his hopes on a place where people's lives were at stake. In the county and city, the CDC, hospitals and the government also set out.

"Come on!" The horse team with hundreds of people has great momentum. To tell you the truth, one horse and two horses are really strange in the city. They seem very docile.

But this thing, once in groups, once spread and ran on the grassland, really, the momentum is absolutely boiling.

Call sign! From far to near, there was a drum like vibration on the ground, and the armed police soldiers began to guard first.

"There are no fewer than a hundred horses!" The staff officer affirmed.

"I'll meet you. I'm definitely a fellow who can't speed up!" Zhang Fan hurried out.

In modern society, many science and education channels have been opened, including tumor cells, genes and even tissue engineering. However, there are few things that the public really needs, that is, do you only need to care about the height?

No, ordinary people who care about genes and tissues, such as cough, fever, diarrhea and allergy, talk too little.

What is allergy? It is estimated that this word can make many people stunned. If you use professional terms, you probably don't understand much. In fact, simply put, allergy is a hoe activity in the human body.

There are many defense cells in the human body, such as white blood cells. The function of these cells is to fight. When various external bacteria and viruses enter the human internal environment, these cells begin to go to the battlefield and kill these foreign cells.

Allergy is because these foreign cells are very special. This thing can dress up as all kinds of human own cells.

Then, the fighting cells of the body are nervous. When you see similar cells, whether they are or not, they are destroyed.

Therefore, allergy is different from poisoning. Poisoning considers the amount of poisoning to estimate the severity.

Allergy is different. This is a result of a little outbreak and overall flowering. Its severity is not directly proportional to the number of allergic substances.

Therefore, as long as there are allergic symptoms, no matter how much, it is a very serious thing.

Many people are allergic to alcohol. Then, they think it's okay to drink a little. In fact, it's not necessary. If they're unlucky, a drop of it may kill them.

Know allergy, don't die, stay away from allergic substances, this is the best way.

Cough, cough is a symptom, not a disease. In fact, cough is not a disease, but a defensive response of the body.

Is a beneficial action. Many people, especially some parents, take out cough syrup as soon as their children cough.

It's really something that can't be said. Don't always look at advertisements. That thing is to sell goods. As long as it's not an irritating severe cough, cough is a beneficial symptom.

In fact, fever is also the body fighting. When the fever is not above 38 °, don't drink cooling drugs immediately.

Diarrhea, especially food diarrhea, is closely related to food consumption.

Especially when you have diarrhea, don't say your body collapses, and then big fish and meat begin to supplement.

At this time, the intestines and stomach have already died. Don't die. At this time, it must be light.

When the gastrointestinal tract is usually healthy, fat digestion is very difficult. Once you eat high-fat food at this time, it will aggravate gastrointestinal symptoms.

"Ha ha! Anda! " Far away, hundreds of meters away, the herdsmen began to shout when they saw Zhang Fan.

Looking at the horse team of men and women, young and old, Zhang Fan burst into tears. In the current economic and social situation, it's true that Zhang Fan's heart melted like marshmallow in the hot sun!

## **Chapter 619**

With money, you can live only by heart, natural and unrestrained, but you can't buy friendship with money. When all the money is gone, it's also a time when people leave the building empty.

You have power. You can conquer all directions, call forward and back, and export into the constitution. However, when you are far away from power, you may only fall into a lonely shadow, just like a retired leader. In the community, even a chess player can't find the reason.

Only friendship for friendship can make you have a bosom friend in the sea. Of course, fair weather friends don't count. This is just a tonic of life

When he went to the countryside to stay in the village, and later went to the countryside for surgery, Zhang Fan quickly formed a vague network in the local area.

Man, after all, is a social animal, not a robot, nor a lone wolf. It needs social recognition and integration into society.

Even three-year-old children know that if you give me a sugar, I can give you a toy.

The horse team led by Meng Ke, a Mongolian man, roared to us. At this time, we can't see that he is a proper hero cavalry company commander who goes to work fishing, goes home to cut hair and doesn't do business.

When Zhang Fan was still more than ten meters away, the Mongolian man had jumped off his horse before the horse's speed had completely decreased.

Vigorous can only be used to describe the skill of these men and herdsmen.

"Ha ha, my dear anda!" Zhang Fan doesn't have any discomfort with the butter flavor. On the contrary, it seems that Zhang fan can smell a kind of enthusiasm.

"Hard work!" Zhang Fan said softly with red eyes and a bear like man in his arms.

"Ha ha, if it weren't for you, I guess three or four people in the health center would come.

Come and see if there's enough. If there's not enough, let's run again. "

Meng Kela and Zhang fan are about to check.

Not far away, Ouyang, with the armed police and government officials who came in advance, was really stunned at these people.

The dew in the morning on the grassland had already wet their clothes, but everyone had a warm expression and didn't complain at all.

"Zhang Yuan is awesome! Unexpectedly, his mass base here is so..." The government officer looked at Zhang Fan and the men of the horse team with envy and hugged one after another.

"Hehe, Zhang Fan came from here in those years. According to his character, it really can't convince me that he didn't take something away, and what he took away is still the most precious thing. He didn't come here in vain.

Well, now that the disinfectant is here, let's start treatment." Ouyang smiled. He was very comfortable and comfortable.

Treatment, this treatment is a template treatment, nothing more than rehydration to correct electrolyte disorder.

This treatment can't be done by Zhang Fan himself. The medical team of hundreds of people began to treat nervously without disorder.

Zhang fan can verbally thank the adults who sent the medicine, but Zhang Fan really can't bear these children.

On their small faces, because of the long-distance Mercedes Benz, sweat mixed with dew, innocent and innocent eyes blink and blink, looking curiously at the team and the crowd.

Children in the city have a strong desire for sweetness, not to mention those children who are far away from the city and can rarely eat sweets.

Zhang Fan's rare bureaucrat gave him a hand. Because it was a gastrointestinal disease, the vehicles accompanying the government almost brought all the gastrointestinal drugs.

Zhang Fan directly opened the medicine cart and gave boxes of Hawthorn pills and big Hawthorn pills to the children in these pastoral areas.

When Hawthorn balls are eaten into their small mouths, their eyes are brighter one by one. The accompanying men laughed more warmly.

On the basketball court, the treatment has begun. With three layers of blue masks, the little nurses began to wash these yellow fish people. Even now, some patients still wash like a spring! Sudden! Sudden! Take it out!

To be honest, of all human secretions, fecal cleaning is the most difficult.

Blood, blood stains, and no alcohol, no need to brush, because blood is the main component of water and protein, alcohol coagulating protein, the water rushing clean.

Feces are different. Most of the secretions in the intestines are substances that the human body can't absorb. Moreover, because it's summer and it's been a while.

Vomit mixed with Turquoise feces directly adhered to the skin. Really, it was like putting these patients on a layer of yellow and green spotted artificial leather with carrot pieces.

Brushes, pig hair brushes and fiber brushes are not good. They are stained with soap. The little nurses are laboriously brushing. Wearing three-layer masks is already very laborious. In addition, they have to brush hard.

One by one, bean sweat appeared on their foreheads like lotus seed milk, plus a sound from time to time, ER! Uh! Uh! It's hard to hear.

Soap liquid is the first routine disinfectant in hospital. Fracture. There is a lot of dirt on the patient's wound. What to do first is soap and water.

When the operation is over, the operator should first wash his hands with liquid soap.

Why not use facial cleanser or other cleaning products? Is it because the price is cheap? Hospitals will also worry about prices?

No, in fact, among the general cleaning products currently used, soap has the best descaling effect and does not harm the skin.

But why is it cheap? It is because it is an illegitimate child. It is a derivative of glycerol obtained by industry.

Glycerol has a wide range of uses, even in medical treatment, so if you want to produce glycerol, you have to produce soap.

Don't watch all kinds of facial cleansers on TV. In fact, soap is more useful and doesn't hurt the skin.

Brush! Keep brushing! On the playground, it's just like wiping crispy radish with an eraser! Wipe! Wipe!

In particular, some semi comatose patients directly asked the little nurse to brush it like a red roasted

suckling pig. The whole body is red, and there is a faint smell of meat.

With the end of cleaning and disinfection, the venous channel began to open. The playground has changed again, just like a transmitter with wires inserted, standing on the playground.

The fat cook and the factory and mine owner were put in an open place like a pair of roast suckling pigs of different sizes.

Fat chefs eat while cooking, and eat the most, and the poisoning symptoms are also the most serious. The boss, because fat chefs flatter the boss, they give the boss a lot.

Therefore, their symptoms are similar.

"Dean, the effect of which two seriously ill patients is not good!" The director of the digestive department sent a little nurse to report to Ouyang.

Ouyang's heart pounded as soon as he heard it. Food poisoning, once the director of the digestive department is really caught off guard, it means that the patient is in danger.

"Come on, gather the experts present. Come on!" Ouyang ordered and ran to the critical patient area.

"Zhang Yuan, come on, there's something wrong with the two serious illness numbers on which side. The dean asked the experts to go collectively."

As soon as Zhang Fan heard this, he quickly stuffed the box of Hawthorn pills into Meng Ke, "send them yourself. I won't greet you. Take a break and go back. Don't get infected. "

Zhang Fan explained to Meng Ke as he walked.

"You go, you go!" Mengke waved his hands with a smile and watched Zhang Fan go away.

"Go and find the government officer! You can't work in vain. " As he spoke, the man's original simple face was obscene.

They run around the clock for Zhang Fan's friendship, but can they let go if they have a chance to make a profit? This is also the life wisdom of ordinary people.

With a bunch of little children with hawthorn pills, mengkra began to quarrel with government officials.

"The horse is pregnant! I'm in a hurry. It's estimated that the pony will die! "

Anyway, it's a lie. It's just one meaning. We have to give subsidies.

Zhang Fan quickly ran to the severe area for rescue and disaster relief. In almost all rescue and disaster

relief, the first element is to move the patients away from the disaster area, deal with the symptoms of life-threatening, and finally seek medical treatment nearby.

As for sending to the hospital, to be honest, if you can't control it at the first scene and send it to the hospital, the later recovery is also a big problem.

When Zhang Fan ran to the severe area, he first saw the fat man, just like a big and a small thing, always big and more attractive.

This time, what attracts Zhang Fan is not the size of the fat man, but the state of the fat man.

The stretcher spread on the ground can barely hold the fat man's huge body. Because the fat man was unconscious early and struggled in the fecal area for a long time, he has long been stripped naked.

Although the fat man lying on the stretcher was in a coma, the nurse deliberately kept his head tilted.

And the corners of the mouth, kept retching, strong stimulation of the digestive tract, the fat man's mouth kept spilling out.

Just like it was intentional, the little nurse just wiped the corners of his mouth. As a result, as soon as the nurse got up, the corners of his mouth came out again, because of long-term diarrhea, vomiting and the current overflow, which is very special.

Just like the bubbles vomited by fish, the viscosity is quite high. When flowing out of the lips, it is like bungee jumping, and the mucus goes up and down.

The vomit around the mouth is acceptable, but the fat man can't look directly at his anus.

The adhesion at the anus was originally the most, and the little nurses estimated that it took a lot of effort to deal with it.

At this time, the fat man's buttocks and anus are directly like a more red stamen in the middle of a red plate.

Moreover, the stamen is still secreting honey. It can be seen with the naked eye that the stamen gently retracts and shrinks, and the clear and slightly yellow liquid is secreted.

It's really like Sophora honey. It's secreted outward by pulling the silk thread. The time is very regular. If you pinch your watch, it's definitely about six times a minute.

These liquids occasionally carry one or two thin milky white flakes.

It's really like the egg flower in Hu spicy soup.

When Zhang Fan walked in and looked, he directly said, "it's broken! The mucous membranes of the digestive tract have been pulled out! "

The digestive tract, the human digestive tract, especially the digestive tract below the stomach, is very long and the setting is very scientific.

The small intestine mainly absorbs protein and fat, while the large intestine absorbs water.

Absorbing protein and fat requires energy consumption, so the mucosa of the small intestine is relatively thick, because there should be a power take-off device, just like the front of an automobile, which is relatively thick.

The absorption of water does not require energy, so the mucosa of the large intestine is very thin.

This is why it takes more effort to eat the small intestine of animals, or it takes more effort to chew with oil, just like chewing gum.

It's easier to eat animals' large intestine because of the difference of this mucosa.

The mucous membrane of the small intestine is thick, so the quality is good, while the mucous membrane of the large intestine is thin, which is easy to fall off.

When the mucous membrane of the digestive tract begins to fall off, this is a more dangerous time.

Once it falls off and ulcers appear, it is directly life-threatening.

Looking at the fat man's anus, more and more experts gathered around the fat man.

The director of the digestive department, wearing mucous membrane gloves, twisted one piece with his own hands, gently twisted and rubbed his thumb and index finger, and then slowly approached the nasal cavity. With a gentle swing of the other hand, his nose wrinkled in the breeze. "This is the mucous membrane of the patient's large intestine, not egg flower soup."

Intestinal mucosa, a strange organ. Once you don't touch food for more than three days, it will shrink and fall off. Some unscientific weight loss patients input a little energy through the vein, and then don't eat a meal.

I don't know if I can't get down, but the intestinal mucosa must be pulled down. Then there is permanent enteritis. Everything you eat and pull is to give face. Pulling your pants from time to time is a routine operation.

"Electrolyte disorder, the correction effect is very bad! His digestive system has begun to resist. The medicine that should be used has been used! " The director of the digestive department said to a group of experts.

Diarrhea, which most people really haven't encountered. Severe diarrhea can really make people want to go everywhere with a bucket connected to their ass.

"Bismuth hydrochloride secondary water?"

"On!"

"Ringer lactic acid solution!"

"On!"

"....."

The treatment of diarrhea can't be controlled when all the drugs are over. It's just a look at God. There's no superfluous way. This is the horror of diarrhea.

Just like the dam burst, once it can't be blocked, after the full burst, the doctor has nothing to do, which is also the biggest factor in the death of diarrhea.

A small-scale expert meeting began. "The main problem of the patient now is that the drug can not achieve the effect, and his digestive tract mucosa has been damaged. Now..."

"Do you just look at him like that? Waiting to die?" The leaders of the armed police also participated.

No one spoke, but the expression had clearly told him, this is the truth.

"Serve rice soup! Come on, serve rice soup right away. Maybe it can be saved!" At this time, Ouyang, who had been meditating for a long time, spoke.

Everyone, including Zhang Fan, looked at Ouyang, rice soup?

"Come on, there's a kitchen here. There must be rice. Get rice soup quickly." Ouyang said loudly with a cold face.

## **Chapter 620**

Diarrhea, super terrible diarrhea. Zhang Fan and his young doctors have never seen it. The food poisoning and the diarrhea of patients have been unforgettable to them all their lives, but they are not the most severe.

Different from Ouyang, Ouyang has seen more terrible and severe diarrhea than this diarrhea.

Disease can cause the most severe diarrhea, which is cholera, a demon that accompanies human civilization. Even now, science and technology can tremble in its shadow like a gurgling chicken.

China's medical treatment set infectious diseases into several grades, while the highest was only two, plague and cholera.

Once one of these two diseases is found, the province may be closed.

Cholera, to tell you the truth, how terrible is it? It can be said that Sun Yue, the crosstalk comedian, goes in. If he is lucky, Gong Hanlin, who plays the sketch, comes out. If he is unlucky, he throws his large intestine head into the grave.

Cholera diarrhea, exaggerated to what extent? Directly, when you sleep in bed, you have to dig a hole under the bed. Under the hole, you have to put a bucket to receive diarrhea products, and then put a bucket at the head of the bed to receive vomit.

After drinking, you may have diarrhea the next day. After strenuous activities, you may have diarrhea the next day. Bacterial diarrhea is too common. These diarrhea are really brothers in front of cholera diarrhea.

Three steps, one small pull, five steps, one big pull. The excretory organs of the surviving people can make the diarrhea products rush into broken flowers and willows. If you touch the toilet paper to wipe your ass, the chrysanthemum can ache to spasm.

To tell the truth, Chinese medicine has declined in modern society. In which era of the middle ages did Europeans go through deep water? They are collectively referred to as the dark middle ages.

One of the reasons is that plague and cholera make Europeans hard to remember, and if they breed a little more, they will encounter all kinds of infectious diseases.

If the plague and cholera increased again, perhaps there would be no European race in modern times.

Did China have this disease at the beginning? Yes, but the scale has been controlled, and the impact area is not large. Because there are Chinese doctors in front of these two monsters.

When Ouyang first went to work, he encountered cholera. In the original China, where was it so powerful now, and there was a knowledge gap? The old ones were abandoned, and the new ones haven't been able to grow up.

When Ouyang entered the epidemic area, he really had the mentality of execution. As a result, an old man who was a professor in his early years and later became a cowherd stood up.

For the most serious patients, the elderly used rice soup. There were many drugs to protect the gastrointestinal mucosa, but almost all of them were drugs for the upper gastrointestinal tract, and none for the lower gastrointestinal mucosa.

The mucus formed by rice soup hangs on the intestinal wall, just like a film, isolating the intestinal wall from toxic substances.

Generally speaking, it is actually putting a cover or hanging a lining on the large intestine.

Although it is not rubber or plastic, the effect is still very good, which also illustrates a problem from the side. The cover is very key. Sometimes, it can really play a role related to human life.

When the medicine was put into the mouth of the fat man and the factory owner with rice soup, the orbicularis muscle finally stopped shrinking and spitting out pieces of soup.

"Valid!" The director of the digestive department clenched his fist tightly and looked at Ouyang with a smile.

To tell the truth, with the increasing strength of doctors in the hospital, Ouyang has not spoken in clinical treatment for a long time. This time, the old lady was proud of the sudden surprise soldier. The corners of her mouth were slightly tilted and slightly closed her hair disordered by the wind.

This is the industry in which medical treatment, innovation and experience are indispensable.

The patient's condition was controlled, and the motorcade in the city came. As the situation became clearer and clearer, more and more leaders came.

Fortunately, no one died, otherwise it was really a Doudou who could pull down a group of people. Food poisoning, especially collective food poisoning, is directly regarded as dereliction of duty and very severe in the administration of China.

Ouyang shouted in the middle of the night and stood in the middle of the night. He was tired. When the patient passed the dangerous period, he handed over the command to Zhang Fan.

"You divert the patient. I'm a little dizzy. I'll go to the car and lie down for a while."

Ouyang slightly grabbed Zhang Fan's arm and stood.

"I'll take you there. Are you okay?" Zhang Fan looked at the old man with white hair.

"It's all right. Just let the little nurse take me there. You stare here and don't make a basket."

"OK! Go and have a rest. " Zhang Fan watched the little nurse help Ouyang leave.

The iron hearted Ouyang got on Zhang Fan's car and lay in the back row in a white coat. When no one was there, the old lady sang like a big silkworm. Occasionally, she could hear a hidden or present hiccup!

Triage patients are also in accordance with the three-level triage system. Most patients with mild symptoms are diverted to the county hospital, while those with slightly severe symptoms are diverted to the urban traditional Chinese medicine hospital, and the most serious ones will be pulled to the municipal hospital.

The police who had been busy in the middle of the night went to hand in a pile of green beans. As long as there is no deliberate poisoning, this matter will not be known to too many people.

When we came, we were lively. When we went back, we were wilting like eggplant after winter. With the bumps of the vehicle, we nodded and drooled, perhaps a beautiful dream.

After Zhang Fan returned to the hospital, he could immediately feel the special smell of his body. It was sour and like broken cheese. Even the little girl in the medical office laughed quietly when she smelled the smell of Zhang Fan.

The child with rosacea is improving the preparation before the operation. Zhang Fan has to go to Qingniao to see the teacher, so there is really not enough time.

Other people, after coming back to take a bath, can still find a place to squint for a while, but Zhang fan can't. After taking a bath, he went to the Department at the first time. He has to arrange surgery and prepare materials.

Shao Hua also came back from the farm to help Zhang Fan pack his luggage. After a few days of farm life, Shao Hua had white skin, a little wheat color, and his spirit was much better than when he was in the unit.

"Don't be too tired. I have everything!" In the evening, Shaohua made a large plate of chicken for Zhang Fan. Zhang Fan ate goumanhaoping.

"If you're not tired, how can you be tired? Besides, you can't feel tired working for yourself at all.

Also, maybe I can make a lot of money. You'll have to rely on me in the future. Hey, hey! " Shao Hua

looked at Zhang Fan and was satisfied with his food. He was also very happy. This is the sense of satisfaction.

"Well, I'll wait for my boss huazi to raise me!" With these words, Zhang Fan

This is the idea of a single dog, but Zhang Fan is not. He just hugged Shaohua in his arms.

When the two meet, it is Lv. Before Zhang Fan and Shaohua become LV, the door bell rings.

"Hey, hey, let you do something bad. Go and open the door. Someone is coming!" Shao Hua jumped away like a rabbit.

Zhang Fan pulled a leg, fiddled with the tent, and reluctantly opened the door like a crab. When I opened the door, logistics Lao Chen and rosacea stood outside the door with a smile on their face!

Lao Chen came to Zhang Fan with a pinch. He knew that according to Zhang Fan's current status, he wanted to ask Zhang Fan out for dinner. He estimated that his weight was not enough. Therefore, Lao Chen directly killed Zhang Fan's house with rosacea.

"Zhang Yuan! Ha ha, I'm afraid you're not at home! " Lao Chen smiled and stepped into the door without Zhang Fan's invitation.

Zhang Fan smiled helplessly and asked them to enter the door. All the guests came to the door. Zhang Fan couldn't keep people from entering the door.

Rosacea listened to Lao Chen's words and took some cigarettes with him. In his mind, money is better than cigarettes.

And Lao Chen is too clear. Zhang Fan will never accept the money. He might as well send a few cigarettes and buy one.

"Shao Hua, pour two cups of tea. The logistics director brought his friends home." After Zhang Fan invited them to sit down, he said to Shaohua in the kitchen.

Zhang Fan doesn't have to shout. Shaohua has come out with tea. "Director Chen, drink some water and I'll get you some dried fruit!" Shaohua greeted with a smile.

In the frontier, families that can get by a little have dried fruits, Padan wood, thin skinned walnuts and raisins all year round.

To tell you the truth, European and American middle-class families have only begun to eat dried fruits in recent years. Why? It's because the fat in dried fruits is a long chain, which is very beneficial to the body. Needless to say, there are several longevity villages in China, and there are several places with strong wind and sand.

The natural environment is not a fairyland on earth, but people live a very long life, which has a lot to do with people's eating habits.

There are two kinds of fat chains in fat. Most animal or vegetable fat chains are short chains. Now the dietary conditions of society can't digest these fats at all, and they are all stored.

The short chain is a cardiovascular killer. After being stored, it is easy to form various vascular embolism. Eating more nuts and letting the long chain in nuts replace the short chain can effectively slow down the formation time of thrombosis.

Of course, the rice is near your throat, and then eat a lot of dried fruits. It's hard to say whether this effect is good, but it must be that you can gain a few pounds more.

"Ha ha, you're welcome, you're welcome. Chairman Shaohua, don't be busy. Let's talk to Zhang Yuan and go. " When Lao Chen saw Shaohua, he quickly stood up to say hello, and rosacea also stood up.

Lao Chen can really talk. It's a gift.

After Shaohua went to the kitchen, old Chen bowed his head and whispered, "Zhang Yuan, the date is set!" He refers to Zhang Fan's wedding day.

"Hehe, it's booked." Zhang Fan smiled and sat aside with him.

"..." Lao Chen flattered all kinds of people without being explicit.

"These are two cigarettes. They are not worth money, but you can't buy them on the market. You must not be polite, otherwise their family can't sleep." When he was leaving, Lao Chen pointed to a plastic bag at the door.

Zhang Fan didn't notice when they put a plastic bag at the door.

"Anyway, even if you send cigarettes or not, I will do my best to operate on the child. It's not good. Really, I must not."

Zhang Fan refused, but Lao Chen and they disagreed.

"Zhang Yuan, you give me an old face and a face. It's really worthless. Just take it as a good thing and give their family peace of mind. Do you think so!

You don't know. There are three of them. They almost wash their faces with tears every day. Just soften your heart. These cigarettes are welfare for them! "

Old Chen said with both voice and emotion! When Zhang Fan didn't react, they opened the door and ran

away.

Zhang Fan helplessly looked at their backs“ What should I do? If you're sorry, I'll send it to Lao Chen's house sometime tomorrow. ”

Shaohua also came out and stood beside Zhang Fan.

"Forget it, look at it first. It's of great value. I'll send it myself tomorrow. It's of small value. Even if it's OK, Lao Chen has to worry about his face."

With these words, Zhang Fan opened the black plastic bag. Zhang Fan had thought about several great Chinese, but when he opened the bag, Zhang Fan wondered.

There are four cigarettes in total. I can't see any brand. They are all small wooden boxes of the same color.

"What kind of smoke is this?" Shaohua picked up a box and looked over and over.

"I don't know. Ask someone tomorrow. I'll charge the money into the hospitalization fee. Lao Chen still has to worry about his face." Zhang Fan saw that there were not many cigarettes and estimated that he didn't have much money.

"OK! I'll call Jia SuYue tomorrow. Her father probably knows the price. What about the cigarette? "

"Take it back, take it to the farm and let your father and my father taste it!" Zhang Fan knows that they can quit eating. Quit smoking or forget it!

For children with rosacea, all examinations have been completed, and surgery has been scheduled.

Xue Xiaoqiao, director of Shenwai, has begun to slowly keep up with Zhang Fan.

Some people are born outside God. Their talent and family potential are really enviable.

After several operations with Zhang Fan, Xue Xiaoqiao depends on life and death. He wants to know how Zhang Fan practices on weekdays.

Looking at Xue Xiaoqiao with a white face, he pouted his lips slightly and played coquettish. Zhang Fan couldn't help getting goose bumps.

"When you eat with toothpicks as chopsticks, you can stay on the ground for half an hour every day. Maybe you can be more stable in three months!" Zhang Fan told Xue Xiaoqiao Lu's practice method.

Unexpectedly, Xue Xiaoqiao really insisted.

"Is it hot?" Whenever Xue Xiaoqiao eats hot soup with a toothpick, Xue Xiaoqiao's girlfriend asks him painfully.

"Hot, but it really works. I must insist!"

Xue Xiaoqiao's mother choked at this moment. There is really a man's insistence on doing something and not doing something.

"I like you more and more! Bridge! Serious men are the most secure men! "

It's true that Xiao Xue didn't win his girlfriend by relying on his family potential, his education, and his career. Instead, he subdued his goddess by relying on a toothpick. Sometimes, there's really no way to say about men and women!

Toothpick is also the first skill!

Zhang Fan, who is busy, also builds his operation team bit by bit. First of all, there must be a very powerful anesthesiologist.

Most operations require a licensed anesthesiologist, unless it is local anesthesia. It is difficult to find a good anesthesiologist, such as the anesthesiologist Lu found when Zhang Fan went to the capital.

Anesthesiologists, in the surgical department, relatively no surgeons feel a sense of achievement, and their position in the industry is slightly inferior to that of surgeons.

However, a very powerful anesthesiologist is also a kind of cow force.

At this time, the new anesthesiologist Guo Ziyuan appeared in Zhang Fan's eyes.
