

Chapter 651

Life is difficult to say, it is not difficult to say, in fact, it is not difficult. Mediocrity is not unacceptable. As long as you don't bully the market, people and dogs are tired of it, and you can live a safe life.

However, the ideal is too complicated, whether there is one or not. And that one is different.

As a child, she longed for common treatment with her cousins, but she could only listen secretly. If old man Chen found out, she would be scolded.

When she grew up, she had a goal to get what she didn't get in those years.

In life, what is pulled and torn is actually family affection. But for her mother's painstaking efforts, she would never give any color.

But this time, the pressure is too great. The girl is not stupid. Being hard headed will make my mother sad. She has thought for a long time. It's better to worry than to be sad.

Therefore, when Zhang Fan became the master knife of the old single head, the girl's eyes lit up. Hospitals in the frontier beyond the great wall can cultivate such a figure as Zhang Fan.

Lu Ning, Lao Lu is a good man, especially for the opposite sex. Although there is no fantasy, he always has the feeling of a big brother.

Therefore, when the flower found Lu Ning to understand the frontier hospital, Lu Ning was like Grandma Wang. He said what he wanted to know and what he didn't want to know. Even Zhang Fan said clearly what he could say in the hospital.

Originally, the girl who was like a butterfly flying in her heart was still hesitating. On the one hand, she was my mother and on the other hand, she was a big hospital in a big city.

But this time, the man like girl made up her mind, "you forced me!"

"Zhang Fan, I heard there are few doctors in your hospital? Am I qualified? I've sent my resume to your hospital. This time I'll go to tea with you! "

Zhang Fan, who had a round stomach, was still aftertaste the residual fragrance among the taste buds. The flower's words exploded in his ear like a bomb.

Although he didn't know about the two families, he could see clearly that the old single head family was just hot while shaving, but he was just a passer-by. It was over when he looked, but unexpectedly, the flower hit him with his attention.

"I really didn't mean to grab food with you!" Zhang Fan subconsciously looked at it. He couldn't say he was fat, but he couldn't say he was a thin girl.

To tell the truth, if the flower is a man, Zhang fan can make a decision on the spot without saying a word. Even if the lawsuit goes to the Ministry of health, he Zhang Fan is not afraid.

But he's a big girl. If you don't mention anything else, it's estimated that the abduction of a woman can kill Lu Laoqi. Don't underestimate people's words in the world.

"Hehe! It doesn't matter. Anyway, I've sent my resume. I'm going to report my resignation here. Anyway, I'll leave the day you leave! "

With that, the girl left without any smoke. Walking is so comfortable, walking is so elegant.

And Zhang Fan is tongue tied and looks at his back. What really happened is a disaster from the sky.

In fact, it's not that there are no other choices, but the level of the first picture can really impress her.

Second, if you go to a hospital where an acquaintance is the leader, you won't let her mother worry too much. As for technology, she thinks she will pass the interview.

As for Zhang Fan, who let him be the leader, who let him be grandpa Lu's closed disciple!

Zhang Fan looked at it foolishly for several minutes before slowing down. Batu told him at the beginning.

If you want to mix in the system, whether you want to make achievements or want to mix up.

Two points must not be ignored. One is the public's wind evaluation. The other is that we must know what we can't do and what we can do, but we must know what we can't do.

In Batu's words with a little tone at the beginning, it is: "it's reasonable that there is more help for a just cause than for an unjust cause."

At the beginning, Zhang Fan was still sick. The old boy misinterpreted the holy words, but now

What should I do? If you don't care about Lu Lao, Shaohua at home and don't fear people's words, Zhang Fan has nothing to fear.

But, No. Zhang Fan's brain completely flew around, and he was also weighing.

First, he saw the flower's technology with his own eyes at Old Man Shan's house. Other things aside, a thick stack of foreign language inspections were said without stumbling. The operation method during the inspection was quite skilled.

And he is also a master of moderation. If he has been trained for a few years, he will be a cardiologist in the surgical backup group! Even if you can't adjust it, an excellent medical translator can still be competent.

Second, he considered what he would face if he really took the flower. Run small, there are old. So Zhang Fan suddenly felt that establishing a medical team seemed not to be a very simple thing.

Go, go, suddenly, like a young monk, Zhang Fan had a bang in his head. When the little monk wants to recruit, there is usually a little girl shouting, but Zhang Fan thinks of a man.

Small order! Yes, it's a small order. Not all fools can see that Xiaoshan is deliberately making friends with Zhang Fan " Just him! " Zhang Fan shook his fist.

In fact, if Zhang Fan wants to ignore him with a cold face, he will ignore him. It's also good to explain to the master. However, he has some problems with Ouyang now and wants to attract all the talents he sees.

Xiaoshan doesn't care about the inheritance of the old man. Isn't the yellow black alliance? Therefore, Zhang Fanyi said that his heart had long been like drinking honey.

"Hey, it's really difficult. You don't know my old man's temper. You can't move now, but your temper hasn't changed at all. It's estimated that you can kill the old man at once."

"All right, say, how can you solve this matter for me?" Zhang Fan is not careless, but now he disdains it because he is studying surgical technology.

"The old man's body and my health..."

"Why don't you count all the employees of your company and I'll be a health doctor for you? Almost. That flower has legs. Even if you don't go to tea, China is so big. "

After some intrigue, Zhang Fan finally promised him to have a physical examination of the old man once a month, and Zhang Fan must come if necessary.

The small order settled the defection. Zhang Fan didn't seem to suffer a loss, so he nodded and agreed.

It's really hard to say about medical treatment. Just like insurance, China's insurance is rotten by several major companies, but this thing can really help people sometimes.

A doctor, making friends with a budding young doctor, is very necessary for people like President Shan who have only money left.

.....

In old Lu's office, Zhang Fan's homework finally passed the old man's approval.

After checking his homework, Mr. Lu took off his reading glasses, gently walked to the top of the reception, patted the sofa around him and said to Zhang Fan, "come and sit down. Let's have a good chat. "

After Zhang Fan sat down, Lu looked at Zhang Fan carefully. He looked at Zhang Fan for a minute or two. He looked at Zhang Fan directly and tore the small list into pieces in his heart, "this unreliable thing!"

Just when Zhang Fan wanted to explain, Lu Lao spoke.

"In terms of surgical technology, I won't tell you more. To tell you the truth, I can't say anything."

When Zhang Fan wanted to speak, the old man waved his hand.

"I still have this self-knowledge. I can't say anything about the operation. I'll give you a word.

The human mind is only dangerous and the Tao mind is only tiny; Only the essence is unique, and you are allowed to hold the que! To be honest, I didn't expect your progress to be so fast, but it also deepened my concern about you.

Therefore, this sentence is my request to you before you leave. "

Zhang Fan opened his mouth. He didn't mean to ask, what does this mean!

"Also, when I go back, I will snack on the paper. The next time I go to your martial uncle, I must finish it."

"Well, I see. You should also pay attention to your health in the future! "

.....

When Zhang Fan came, he was alone. When he left, he had one more flower around him.

I don't know what Xiaoshan said. The old Shan family didn't investigate again, but Zhang Fan began to worry about gain and loss again. He was afraid that the girl would repent.

Fortunately, when he got on the plane, he didn't repent. This also made Zhang Fan feel that he had made a profit and could bring a moderate master of mind to his future team. To tell the truth, he could steal music.

The old road sent Zhang Fan and the flower to the airport. All the way, Lu Ning's throat was like holding a nut. He looked at Zhang Fan and the flower from time to time.

"Elder martial brother, what's the matter? Are your eyes uncomfortable? Why are you always looking at people?"

Zhang Fan asked.

"Hi! Your sister-in-law applied a mask last night. It's a bit tight in the morning when you get up. "

The old road was a good man. He didn't ask directly. He was deeply afraid of embarrassment.

"Ha ha, if you have anything to say, you too." Zhang Fan smiled and looked at the old road. He gained a lot in this line, so Zhang Fan was in a good mood, and he was even more happy to go home.

The girl sitting in the back row stared out of the window, looking at the familiar scenery outside the window.

"Shao Hua, you, this, are you okay?" Lu Ning looked in the rearview mirror and whispered to Zhang Fan.

"Ha ha, I knew it. She is rebellious, just want to leave home and fly freely. It's not as complicated as you think. "

Zhang Fan explained with a smile.

"Oh, oh, oh, that's good, that's good, that's good! Hey, you boy, what did I think? "

"I'm not a rebellious period. I still have the right to repent. Don't be too proud."

"Er..." Zhang Fan's heart is full of MMP. "Now people, how can they be more refined than monkeys!"

.....

The plane went straight to the bird market. As soon as it landed on the ground and got out of the cabin, Zhang Fan became particularly comfortable smelling the barbecue in the air.

Although there was a light rain in the bird market, it was still too dry for the girl who grew up by the sea.

Before long, the flower even had nosebleed in the rainy weather.

"It's too dry. My throat is smoking. I'm beginning to regret it!"

The flower looked out of the window and spoke in a stuffy tone. Her nose was blocked by paper towels, just like page.

"It's really dry here, and tea is much better. I'll tell you, the snow, grassland, lake and blue sky over there definitely make you linger and forget to return. Go, eat first. "

When they arrived at the bird market, Zhang Fan didn't worry about her turning back. But you have to find a way to reassure others.

There is a saying in the Jianghu that nothing in the world can be solved by a delicious meal. If there is one, have another meal.

Bird market, on Minzu Avenue. Director Li of the second hepatobiliary Department of the Affiliated Hospital accompanied Zhang Fan with the flower.

For Zhang Fan, director Li is really performing disciple rites now. Zhang Fan doesn't let him be polite. He's still angry.

"Come on, try it. The doctor, Nang pit meat, the most authentic Nang pit meat, I have specially explained. It is made of all kinds of fruit and trees baked by dark fire. It not only doesn't have a little fireworks smell, but also has a fruit smell. "

Lao Li politely greeted him. No matter whether Zhang Fan brought the doctor or not, as long as Zhang Fan was there, he would do his best to greet him.

Nang pit meat, roast whole sheep and shelf meat. To tell you the truth, that flower is also a carnivore. It doesn't say that it can't accept the smell of mutton.

The sadness of leaving home, under the delicious and half a cup of deadly beer, the girl suddenly felt that life should be like this. She was free, leaving behind all the tutors and ladies.

.....

Tea, Ouyang office. The old lady looked at her resume and wondered.

"You say, is this condition teasing us?"

The old lady looked at the office director in front of the table and said her doubts.

"I don't think so. I have verified all the information and resumes. They are all true, and the doctor has no

medical negligence. She is also a reserve talent in the Department of Cardiology of Qingniao hospital. "

The office director explained to Ouyang after finishing his homework.

As for whether it was funny or not, he would not say it even if he had ideas. He knew too well that the leader in front of him.

"Bluebird, Bluebird. This definitely has something to do with Zhang Fan. Look at Zhang Fan's itinerary. "

"Dean, I think you're right. It seems that it really has something to do with Zhang Yuan. Because Zhang Yuan is today's plane, and the doctor came to tea on the same day. "

"I said, we don't have to think about it. It's definitely related to Zhang Fan. All right, get ready quickly. With such good conditions, people must not feel that we are waiting. Zhang Fan, are they flying straight to tea

"No, getting off the plane in the bird market seems to drive back."

"OK, make sure. If you really go with Zhang Fan, you can coordinate, listen to Zhang Fan's opinions and make arrangements. Your medical office and personnel department will greet you and arrange a dismantled wine for others."

"Yes, Dean. I see. "

After they got off the plane and had dinner, Zhang Fan waited in the bird market.

"Who are you waiting for? Didn't you say that the bird market is still a long way from tea? It's hundreds of kilometers. Don't take a plane? "

"Wait for my girlfriend. She's coming to the bird market today."

"Tut tut! It's really good for you! "

"Oh, no, she just came to the bird market to do something today. She took you and me along!"

That flower is also a big hearted person. After eating and drinking, he looked curiously at this exotic city and seemed very novel to everything.

"Wow! What a big grape! "

"Wow! Such a sweet cantaloupe! "

"Wow! Good yogurt! "

Zhang Fan began to worry a little

Chapter 652

x

Zhang Fan standing on the roadside, the breeze blowing in the late summer of Northwest China, like a veil across his face, makes the originally muggy after a little rain suddenly dry and dry.

When I first met the doctor, the girl was as cold as a lotus, although she could not refuse thousands of miles.

Put your hands in the pocket of your white coat and stand quietly in Shan's hometown. To tell you the truth, you are directly the representative of a modern intellectual high-end woman.

With a delicate face, when viewed from the side, the tip of the nose and forehead are faint with a layer of wax grease like a new car. It seems that you can see a faint white light.

Now, after a meal of mutton, the faint white light disappeared. Driven by cumin mixed with chili noodles, the energy of mutton radiated.

A little sweat like dew can be seen at the tip of the nose. The original white skin is now steaming with a layer of blush. It is really white and red.

After a meal of Gobi mutton on the grassland in the northwest, to tell the truth, Zhang Fan feels hot all over, and director Li is very enthusiastic. He is not willing to eat less, so now Zhang Fan is really hard to swallow more.

The doctor around him didn't eat less when eating mutton. After drinking another bowl of old yogurt, he looked pitifully at the handmade ice cream sold by Uygur aunt.

"It can't be bad! I haven't heard that anyone who eats mutton has personality problems! "

Zhang Fan was worried. According to the doctor's eating method, he was afraid that he would not be able to explain to Lao Chen in the future " Ah! My granddaughter was as slim as a swallow. Now you send me a penguin? "

It hurts to think about it!

In fact, the flower is also in a tangled mood. Are you happy to leave your hometown and parents? Is it hard? She didn't know, but she had a way to get rid of her entanglement.

Just as a man is depressed, she plans to eat all the delicious food in the bird market, which gives her more reasons to convince herself.

You can't talk to Zhang Fan about the entanglement in your heart, so eat delicious food!

.....

Just when the doctor decided whether to eat ice cream or not and Zhang Fan was worried that this suddenly became a food, Shao Hua drove a beast like pickup truck and stopped next to Zhang Fan's horse teeth.

"Zhang Fan!" Shaohua opened the door and jumped down. Zhang Fan was nervous.

"My immortal, slow down for such a high car!" Zhang Fan spoke and hurried up. Before holding the girl, Shaohua jumped into Zhang Fan's arms like a bird.

"Hey, hey, do you miss me?"

"Think about it!" Zhang Fan couldn't help but want to go to xiangyixiang. As a result, Shaohua pushed him away.

"Stink!"

"The doctor, huh? Hello, I'm Shao Hua. Welcome to the great frontier. You will love it here. "

"Hehe, Hello, hello." The flower looked at Shaohua's dress and was filled with envy.

Shao Hua wore a short version of jeans, thin bottomed pony boots and sunglasses hanging on his head. Then he looked at the wheat skin color exposed by each other's long-term sunbathing. For a moment, he was full of health.

She thought about herself again. She struggled in the Department and ward day after day. She hadn't seen the sun for many days.

She should wear a mask all the time. In front of the patient's family members, she should have a wise

and firm expression. In front of her superiors, she should have an attitude of hard work. In front of her family, she

When she saw Shao Hua, the girl suddenly felt that this was gorgeous youth. There should be other things in life, not only medicine.

.....

After getting on the bus, "are you tired, or I'd better drive!" Shaohua loves Zhang Fan.

"Nothing, nothing tired." Zhang Fan started with a fire. To tell you the truth, he was used to driving a big car. He was really comfortable to use Shaohua's pickup truck.

All the way west, chasing the footsteps of the sun, Zhang Fan and them revolved around Tianshan Mountain.

Bird market, stone city, mayikla, these famous cities in the frontier, to tell the truth, almost one by one, the Gobi, what desert smoke straight, really talk about these cities.

On the vast Gobi, the highway is so straight that you can't see the end at a glance. Tianshan Mountain is hanging in the sky like a flickering color ink landscape.

The vastness of the sea and the vastness of the earth make people feel different. The vastness of the sea will make people feel surging and profound with a trace of uneasiness.

The vast land can make the doctor who came to the frontier for the first time feel relaxed. Although the eyes are full of Gobi desert, the size of the frontier is bigger than that of Qilu hills.

In the 10000 mu tomato base, little red fruits are hidden in green leaves, just like stars.

"Well! After eating tomatoes, I didn't expect that tomatoes can shock people so much! " The flower looked at the scenery by the car and her eyes were full of incredible.

"Hehe, this is the 10000 mu tomato base in stone city and the largest tomato base in China." Shaohua introduced the flower like a guide.

After running through the tomato base, a scene like fire appeared in the girls' eyes.

To tell you the truth, there's nothing strange about one or two red peppers, but when you think about it, there are endless pepper fields on both sides except the highway, which is directly the red world.

Like the sea of fire, the breeze blows and the fire waves fluctuate. It makes people feel hot and hot, and it's like a fire in their heart.

"Wow! How beautiful! " The tomato base is also like a shy chick, and the chili field is like a hot mature woman, directly releasing her passion in front of people.

"Shao Hua, Shao Hua, look over there, my God, it's so beautiful. Take a picture of me quickly!

I envy you so much. You live directly in a fairyland! "

"What's this? There's nothing to see in the Gobi desert here, just a little tomato and a little red pepper. You won't know what beauty is until you pass Tianshan."

Zhang Fan couldn't help crying. When he came to the frontier, he was not in the mood to see the scenery, but slowly, he liked the scenery here more and more.

The relationship between people is actually very simple, focusing on communication. Sometimes, young couples quarrel and fight to the death.

Upon inquiry, it turned out that the girl felt that her boyfriend didn't understand her mind, and the boyfriend felt that the little girl didn't understand his mind.

One person hides hundreds of people, not to mention each other's complex brain ideas. Even *Ascaris lumbricoides* may not understand the host's thoughts.

Therefore, communication is important for people. When Zhang Fan got on the plane, he told Shaohua about the situation. For Zhang Fan, Shaohua is relieved.

Now Shaohua, not worried about others, is worried that Zhang Fan is walking faster and faster, and slowly makes herself lose herself and become a vassal of Zhang Fan's life. Therefore, the girl is also trying to reflect her value.

Tea vegetable is located at the north foot of Tianshan Mountain, while bird market is in the south. Climbing over Tianshan Mountain is not going straight up and down. The small hillside in the South may be OK, but it is extravagant to hope in the northwest.

To climb over Tianshan Mountain, just like the lines on screws, the highway turns on Tianshan Mountain in circles, and then goes down in circles.

When crossing the Tianshan Mountain, the scenery suddenly changes, just like changing the world. The scenery of Southern Xinjiang, beyond the sky, is still dominated by cyan stones and yellow sand, and the scenery dotted in it is also artificially created later.

Northern Xinjiang is different. It is as beautiful as the creator's back garden.

Turning around the mountain, a large area of dark green grassland appeared in front of the flower. The grassland like a carpet covered the whole world, just like entering the fairy tale world.

On the far side of the mountain, there is a verdant virgin forest, and up there is a white snow mountain.

What Norway, what Switzerland, what marubenia, their scenery is beautiful, but how can there be such a vast and beautiful northern border of China. Their scenery is just one point, and here, the hundred mile long scroll is only the most insignificant point.

The flower opened its mouth slightly and looked at it obsessed. The car is like the wind. It's like a boat shuttling through a green fairyland.

When you climb the last big slope. The flower screamed directly.

A tile blue lake suddenly appeared on the grassland under the blue sky, snow mountains and primitive forests. Half of the lake reflected the snow mountains and half the sky.

Good boy! Looking from a distance, it's so beautiful. It's just like a lady sitting quietly on the grassland.

The blue here is quiet blue, different from the sea. The sea is like a naughty child, constantly clattering, and the lake here is like a lady.

"How beautiful!"

Grasslands, herds, white tents dotted among them.

A naughty boy chasing sheep and a shepherd girl singing loudly.

Blue sky, white clouds, snow capped mountains

What worries and troubles have disappeared here. The girl who grew up in the city looked silly and greedy

Chapter 653

Ouyang's idea is very special. Once he enters the city hospital, he should stay in the city hospital all his life like the chaste martyrs in ancient times.

Of course, with the exception of people she doesn't like, she will try to make him leave automatically.

And the old lady has a set of ways to keep people. The doctor from the big city, no matter what the situation is, she knows that the doctor has a great chance of being a migratory bird.

How can migratory birds stay? Relying on money, can the income of the municipal hospital be higher than that of the hospital directly under the Ministry of health? No, then let's rely on friendship.

The mighty welcoming staff stopped talking. Ouyang sent the director of the nursing department to bring a group of little nurses to help clean up the future single dormitory.

In Ouyang's words, how lovely, how warm.

Thirty miles out of the city, the welcoming staff of the municipal hospital dismounted to meet Zhang Fan and them.

"Ha ha, Zhang Yuan, you've worked hard all the way! Welcome to our beautiful tea plant, doctor. " After Zhang Fan stopped the car, the director of the medical office came forward and smiled.

Love me and love me. Ouyang will definitely like the doctor brought by Zhang Fan, and Ouyang likes it. What's the reason why the director of the medical department doesn't like it.

Small silver bowl, fragrant milk tea, a hard, big wine cup, tea wine, a welcome.

Where did Naduo encounter such treatment? In Qingniao, her friends are former high school classmates

In the unit, where there are such enthusiastic colleagues, it's good not to do bad things in private.

Although the girl is not excited, she doesn't know why. It's warm.

Not warm, okay. A person came to a strange city and had not yet joined the job. The unit sent more than 20 or 30 people to welcome him, smiling more and more sincerely.

This is what Ouyang does. I have no money and I have no one? Moreover, for such doctors who come to the frontier from different places for unknown reasons, as long as they have not made medical mistakes, Ouyang can guess the reason, combined with the age of that flower.

Ouyang doesn't have to think about it. It's definitely hurt because of love. If you find a place to lick it, I'll

let you experience the feelings of this colleague.

Although the old lady's guess is not very accurate, she is not far from it.

The frontier has few people and a wide land. In addition, with rich products, people's pressure is much smaller than that in big cities.

In particular, if you enter some industries that guarantee income in drought and flood, such as banking, national and local taxes, hospitals and schools, you will still have a very moist life as long as you don't want to stand out.

With less pressure and less competition, people's smile is sincere. It can be said that old lady Ouyang's first move, smile, makes that flower feel very good about tea.

.....

Zhang Fan, who was supposed to be back in three days, stayed in Qingniao for more than a week. Xiao biesheng was newly married. After settling down with the doctor, Zhang Fan didn't even have the mood to talk to ouyangduo and ran all the way home.

At the end of summer, there is nothing to do with the land in the northwest. Everything that should be treated will be treated and will be planted in the coming year. To tell the truth, farmers in the northwest are better than those in the south.

It's really hard to plant in the South twice a year, even three seasons and four seasons. Unlike in the northwest, it used to harvest in the first season and plant winter vegetables such as Chinese cabbage.

But with the price of vegetables falling year by year, even the fertilizer money can't come out, it will gradually disappear.

Shao Hua decided to plant lavender, so he is not going to do anything more this year.

Back home, Zhang Fan's parents and Shao Hua's parents were all there, making dumplings in full swing at home.

Once entering the house, the familiar smell, the laughter of relatives and the fatigue all the way are blown clean.

In the study, Zhang Fan holds Shaohua.

"Miss me?"

"Yes!"

"What do you think?"

"Think everywhere!"

"I hate it! Don't move. The old people are here. How can I go out later? I hate it! "

What is warmth, this is warmth, what is happiness, this is happiness.

Zhang Fan leaned against Shaohua's arms and greedily smelled Shaohua's fragrance, faint.

.....

In the morning, Zhang Fan put on his sportswear and went out for a morning run. As long as there is nothing special, Zhang Fan will insist on exercising in the morning.

Tea in late summer, how to say. It may be the most comfortable season in the city.

The cold air on the snow mountain can finally be tied with the warm current on the plain. The city in the morning is like a fairyland.

Miaomiao's fog permeates the city. The whirlwind brought by the occasional taxi blows across your face with the fog. It's as cool and comfortable as sticking a layer of moisturizing water.

The name of the town of melons and fruits is not in vain. Tea in late summer and the streets in the morning can smell a trace of ripe and sweet melons and fruits.

The time here is slightly different from that in the capital. People go to work a little late, so there are few people in the morning except some old people who exercise in the morning.

Zhang fan runs slowly. Exercise is addictive. Circle by circle, very comfortable.

Just after Zhang Fan ran and hesitated whether to go home for breakfast or eat tofu in the street, a fiery BMW passed by Zhang Fan.

"Shit!" Even Zhang Fan, who seldom gets angry on weekdays, couldn't help scolding the car butt.

Early in the morning, it was foggy again. I didn't say the speed was fast. I still ran close to the road teeth, "no quality!" Zhang Fan's good mood early in the morning made BMW clean.

Then look down at the mud ideas on his sweatpants and shoes. Zhang Fan is not even in the mood to eat. It is estimated that this is lifting his anger from getting up.

He didn't go home. Zhang Fan didn't know how to get it. He walked slowly to the emergency platform of the surgical building.

This place is also a landmark of tea. Looking at it, all the buildings are low, and only the distant Tianshan mountain seems to be comparable to it.

Zhang Fan stood on the rooftop and looked at the people slowly walking out of the house. The students dressed in school uniforms walked to the school in groups.

More are office workers. Some may get up late and trot in a hurry, biting the steamed bread in their hands while running.

On the bus stop, groups of people waiting for the bus. The owner of the roadside snack stand shook his nose and grabbed the fried dough sticks.

Looking at the hurried crowd, Zhang Fan's original hostility became clean.

"Yes! I'm lucky. Without the system, I might still be busy with my house, car and tickets.

Maybe I'm counting how many drugs I can sell today and how many kickbacks I can get.

May also get up early, not morning exercise, but go to the morning market to buy some cheap vegetables, melons and fruits.

Now that I have the system, I must not live up to it. Now that I have chosen me, people will live a wonderful life. "

Suddenly, Zhang Fan looked at the boundless beings, and his idea was clear. When I first got the system, the shock was greater than the surprise.

With the benefits brought by the system, Zhang Fan is more worried than happy. He is always worried that this sudden system will be discovered and disappear.

With the slow habit, Zhang Fan's body and mind slowly entered a sense of loss of purpose.

Although still trying to do surgery and practice their skills, what is the goal? Zhang Fan doesn't know.

With the car, the house and the lover, Zhang Fan vaguely feels that life is like this. It's good to keep it all the time.

But the anger breathed in in the morning, and then looked at the busy crowd downstairs. Zhang Fan's heart, which was about to lose, slowly found his goal.

When Zhang Fan's mind was clear, the early morning sun finally broke free from the shackles of the mountain and jumped on the top of the mountain.

The golden sun shone out, and Zhang Fan narrowed his eyes slightly.

A piece of golden light sprinkled on Zhang Fan. On the platform, at the top of the city, Zhang Fan met the light like a god of war.

.....

As soon as he swept away the sudden hostility in his heart, Zhang Fan, who had a clear mind, walked to the office with a firmer state of mind than ever before.

In fact, during this period of time, Zhang Fan was confused. He was confused by the small success brought by the system.

.....

Downstairs, Zhang Fan saw that he almost wiped his BMW in the morning. It was a fiery BMW with a row of arrogant words hanging behind his ass: Ten hits and nine wins!

According to the past, Zhang Fan would break even if he didn't find the owner, but Zhang Fan, who had a good idea, just looked at it and didn't have a ripple in his heart.

Put on a white coat. In front of the dressing mirror, Zhang Fan sorted out his instruments, gently closed the door and walked to the clinical department.

In the past, Zhang Fan heard others call him Zhang Yuan. Although it was useful to listen to it, he always felt uneasy in his heart.

But with the accessibility of the idea, Zhang Fan figured it out! People live a lifetime. Since they have such a great opportunity, they should try to look like they can't be worse than those who don't!

"Zhang Yuan!"

"Yes!"

A group of passing little nurses greeted Zhang Fan.

"Ah, do you think Zhang Yuan has changed?"

"Seems to have changed! ~"

"White?"

"Ha ha!"

Zhang Fan has indeed changed, become more firm, and his goal is more clear.

Standing in the orthopaedic conference room, Zhang Fan participated in the shift handover of orthopaedics. Just after the shift handover, Zhang Fan was ready to say something.

The director of the medical office hurried in, "Zhang hospital, there is a patient who needs consultation."

"Why not call?" Zhang Fan walked out of the office and asked.

"It's not clear on the phone! I'll tell you as I walk! "

With a big consultation, the director of the hospital and experts gathered from all directions.

Chapter 654

Every industry has a saying of fooling outsiders. The laymen really don't understand the various common names and agreements sneaking in it.

For example, there was a fight. After the police came out, they saw that only one of the two people was injured and asked, "how did you get it?"

This is absolutely, the beating party or the winning party has something to do with the police.

The hospital also has a bad attitude on weekdays. In case of hard stubble, it's the patient's turn to have a bad attitude.

When meeting such patients, the biggest problem is that no doctor is willing to take over. Who is on duty will definitely push out the patient when he doesn't get it.

"There is no emergency bed in our department!"

"I'm not sure. I'm not sure about this disease. XX Hospital is good."

When saying this, the doctor is absolutely unwilling to take over. The most taboo for doctors is to admit that they can't see the patient's disease.

Walking on the road, the director of the office said that he was in an abnormal posture today. Zhang Fan walked with great strides.

He was on his side, slightly slower, half of Zhang Fan's position and small broken steps, as if he had to run to keep up with Zhang Fan.

Then, with a little breath, he half lowered his head, as if he had secretly said something to Zhang Fan.

The office director is too old-fashioned. When he saw Zhang Fan in the morning, he knew that Zhang Fan was a little different today.

It seems that there is a little more dignity. No matter what happens, he will not touch the mildew with a low attitude.

"A patient was sent by the Chinese medicine hospital. The family members were in a bad mood and were a little excited. They almost had a conflict with the doctor who sent the patient to the Chinese medicine hospital, and now..."

The director of the medical office said while looking at Zhang Fan's face, "what's the matter with this boy today? His face hasn't changed at all."

"Then?" Zhang Fan didn't stop and didn't pay attention to the expression of the director of the medical office.

"Now they want us to promise."

"What disease? Serious? What about the European Academy? "

"The dean is there too! When the traditional Chinese medicine hospital sent it, the medical record had not been turned. They sent the person first.

The patient looks very serious and is unconscious. "

"What's the origin?"

"It is said that he was a member of the X Association. In the early years, the automobile team subordinate to the tea Transportation Management Office resigned and went to the sea. Then he almost monopolized the long-distance delivery business from tea. Later, he changed his profession and started the battlefield business.

At present, 80% or 90% of the sand of tea is from his battlefield. Originally, this man was a little domineering. Now that he has an official identity, it is difficult for his family to deal with him. "

"Oh!" Although Zhang Fan didn't speak much, he looked at the director of the medical department.

The old man was too smart to understand, "I know him. He doesn't know me. He is too famous in tea."

With these words, they quickened their pace and rushed to the emergency center.

Song Qiang, an ordinary staff member of tea element transportation management in his early years, was bold and capable.

He was one of the first people to buy out and leave their posts in the West. In the west, in the frontier, the people who could take the initiative to buy out were more or less ruthless.

Song Qiang is even more powerful. He knows too much about the roads in the transportation industry. After the buyout, he took a group of people to fight the transportation industry of tea vegetable facing the outside.

People who can drive a big car for a long distance are really not simple in the era when there were many car bandits and road bullies. To monopolize this industry, we can imagine how much skill he has to have.

Later, after the accumulation of the first barrel of funds, he immediately changed his profession and operated a super large battlefield.

Although this industry is insignificant, just like garbage recycling, it is not very high-grade, but this industry is really an industry that can dig out big money.

Moreover, the sand field along the river has no ability. Don't even think about it. Apart from the government's environmental protection and urban construction, the sand bullies at the door of some communities are not something that ordinary people can handle.

As he gets older, song Qiang has been recuperating regularly in the hospital of traditional Chinese medicine. But some time ago, after drinking a flower wine, my body began to feel uncomfortable.

When he went to the traditional Chinese medicine hospital, his blood sugar and blood pressure were a little high. The doctor advised him to avoid eating and have regular review.

But he felt fine“ High blood sugar, what are you afraid of? Just don't eat sugar. "

Then, continue to ignore it. Rich and willful, originally the red flag at home did not fall, and the colored flag outside the wall fluttered.

As a result, I just met a host of tea vegetable TV station a few days ago and was fascinated.

The other petty bourgeoisie's sentiment and gentle words can't be compared with the fierce women in the family. Even those women who used to be him didn't have this lovely person.

The host does not drink Baijiu, usually on the day to drink red wine, red wine for Song Qiang, is a drink, the result is not noticed, drink a little more, the younger brother can not afford to start.

Then, I took several drugs to help me. After playing happily for half an evening, the petty bourgeoisie girl couldn't wake up song Qiang when she got up in the morning.

With super loud snoring and unstoppable saliva, I just can't wake up.

Petty bourgeoisie women know too much about this old man. They know at a glance that something big has happened.

A phone call 120 pulled song Qiang into the hospital of traditional Chinese medicine. Then, song Qiang's family came.

Seven aunts and eight aunts, darling, which momentum, enter the hospital, without saying a word, beat up the petty bourgeoisie woman first. If it weren't for the hospital, it's estimated that the petty bourgeoisie woman would have to run naked.

I don't know why, after playing petty bourgeoisie, the family began to look for problems in the traditional Chinese medicine hospital.

"You've been checking for hours. My family is still awake. Do you have the ability?"

We song Qiang came to your hospital for conditioning every month. Is that what you did?"

Your business is good. It's better than robbing people. You want money. Now people have problems. You don't know when you ask. "

The president of the traditional Chinese medicine hospital was pointed by song Qiang's fierce wife, and his fingers were almost chopped on the president's face.

At this moment, the doctors in the hospital dare not take over, and the examination has not been completed. Who dares to see a doctor for the momentum of this family.

The president of the traditional Chinese medicine hospital turned blue and said directly, "our level of this disease is limited and can't be diagnosed. Go to the superior hospital."

Although the traditional Chinese medicine hospital is a class III hospital, isn't there a comprehensive municipal hospital above? There's nothing wrong with the president's words.

The family members directly contacted X Association, first sued the traditional Chinese medicine hospital, and then took Song Qiang to the municipal hospital.

Song Qiang's wife and children, with the momentum of X Association, came to the municipal hospital and still had the momentum.

When Zhang Fan walked to the emergency hall, the crowd was noisy and said everything.

"Take the medicine quickly! It's been a long time. Can you do it or not? "

"You must promise us, or you won't be interested."

"Cured, give the red envelope!"

Ouyang frowned and saw that it was the edge of the outbreak. The crowds were occluded together, especially abrupt.

If according to the previous situation, Zhang Fan definitely goes to see the patient first and then waits for the superior to arrange, he will not take the initiative under normal circumstances.

But now it's different. Zhang Fan walks to Ouyang. Ouyang looks at Zhang Fan. Although he doesn't speak, Zhang Fan still understands the meaning in his eyes.

At this time, Ouyang can't express his position easily. Once Ouyang expresses his position, it's equivalent to fixing the tone with a hammer. There's no detour.

In this medical treatment, if there is a treatment accident in a clinic, let alone whether it is the doctor's fault, the family can break the doctor's head.

If it is a county-level hospital, the slightly influential family members can seal the door of the hospital.

At the provincial and municipal level, although you can't seal them, it's not a big problem for some energy people to change you to a dean and get rid of a director.

So, sometimes, Ouyang is really difficult.

"Seize the time for consultation and determine the patient's disease at the first time." Zhang Fan said loudly after taking a look at Ouyang.

Then he said to the director of the medical department, "contact the traditional Chinese medicine hospital immediately and ask them to send the examination immediately."

"Good!"

As soon as Zhang Fan spoke, the doctors and nurses in the hospital immediately began to take action. With the increasing improvement of Zhang Fan's level, Zhang Fan's order is almost the highest order in the current municipal hospital.

"I'll tell you..." Song Qiang made money, but his relatives and friends obviously haven't improved their self-restraint.

The clothes are very human, but the momentum and posture of speaking make people feel uncomfortable. It's like I owe his family money and carry his bowl.

There was a man who looked big and thick, with a thick gold chain around his neck and clothes with a sign of riding and carrying a gun on his upper body, pointing to Zhang Fan to speak.

At this time, a young woman came out of the crowd. She was estimated to be four or five years older than Zhang Fan.

A face of frost.

It is understandable that women, especially unmarried women, have a little expression of not entering strangers.

But this, where is a stranger, don't enter. In his eyes, there are knives, guns, swords and halberds. His chin is slightly raised. He looks like floating. Zhang Fan is tall. If he is shorter, he is really despised.

Although it is beautiful, this expression, this posture, is directly the woman carrying the handle on Kowloon street.

"Are you in charge of the hospital?"

A voice of tobacco and wine floated out of the red lips.

Chapter 655

"I'm the head of surgery."

Zhang Fan looked at each other and ignored the eldest sister's expression.

To be a doctor, to be honest, in recent years, with the urgency of people's pursuit of health, the doctor's mentality is a little floating.

Generally, people come to the hospital with head fever. Who comes to the hospital without disease or

disaster? Is there a good place in the hospital.

Sometimes the patient's speech and emotion are inappropriate, which is understandable, but some doctors can't. I don't care about you. You must give me a smile and give me low morale.

.....

With the contact with this industry, various patients and many top doctors in the industry, Zhang Fan gradually has his own code of conduct.

I won't give you a smile, but I won't ask you to give me a smile. Everyone is just plain and light. I'll seriously show you the disease, and you'll seriously tell me the medical history.

Therefore, Zhang Fan ignored each other's posture and directly replied.

There was no fireworks in Zhang Fan's eyes, and the other party's tone was a little better. "Then treat it quickly. My father must wake up."

Before Zhang Fan nodded, the security guard on duty of the security office hurried over.

"Whose red BMW, Axxxx, move quickly. It's in the way. 120 can't get out."

Ouyang's anger burst out fiercely, "what do you do? Why don't you stop when you stop?"

Tell your director to run and see me! "

With that, Ouyang said to the director of the medical office, "contact the traffic police and move the car first. You can't keep 120 out."

The guard of the security office sweated down. It was foggy this morning. When BMW stopped, he took the time to go out for breakfast. When he came back, the road was blocked. When he was thinking about what to do, 120 had to leave, and he was inch.

"No, you treat my father first. The car is mine!" When she spoke in a tobacco and wine voice, she looked so relaxed that even Zhang Fan couldn't see it.

"Move the car!"

"Treat first, so many of you..."

"Your father is human, and the others are not human? Your father wants to rescue at the first time, and others are waiting for you to move the car? Where did it come from? "

Ouyang directly pushed Zhang Fan away and stood in front of his eldest sister. The old lady's hair was probably blown up in anger.

"How dare you scold me? I won't move today! My father, you must treat me immediately. Something's wrong, hum! "

Big girl, staring, I really have the momentum of kicking the north and south of the river.

To tell you the truth, I have never seen such an unreasonable person.

Ouyang's blood was on his head. "Go, whose car is in the way and hit me."

"I don't see who dares!"

With a wave of the girl's hand, the five big and three thick men came out one by one, four or five, one by one.

Looking at these strong men who are not very ordinary people, without saying anything, ordinary men will be a little timid.

But Ouyang is not a person. As soon as the old lady raised her hand, she was ready to slap the girl in the face. Zhang Fan is always ready, deeply afraid that these strong men will collide with the old lady.

Unexpectedly, Ouyang was originally a troublemaker. Fortunately, Zhang Fan stared at Ouyang. If this slap went on, it would be unreasonable.

He grabbed Ouyang's arm and said to the director of the medical office, "go and call all the male doctors in the hospital! We must gather here in two minutes. "

Then he said to the director of the emergency department, "what are you stunned at? Give the patient a physical examination. "

The director of the emergency department looked at Zhang Fan and Ouyang puzzled. However, Ouyang's face was black, that is, Zhang Fan. If there were others, no one would dare to stop Ouyang at this time.

Seeing that Ouyang didn't speak, the director of the emergency department hurriedly greeted the nurse and pushed Song Qiang into the emergency room.

"Ouch! Tut tut!" The red-lipped girl was proud. She glanced at Ouyang and Zhang Fan. She was a naked provocation to Ouyang and a kind of sensible to Zhang Fan.

Ouyang began to tremble, but even if she trembled, she still trusted Zhang Fan. Since Zhang Fan spoke, she really put up with it and handed over the command to Zhang Fan.

Step! Step! Step! Messy, rather messy footsteps came from the distance of the hall, and the male doctors of the hospital hurried over.

Zhang Fan patted Ouyang on the back, which means: look at me, don't be angry.

If you are in a big city or a senior official hospital, the first way to deal with it is to call 110 first.

In big cities, although the pressure is greater, it is relatively more fair, while in small cities, although the pressure is small, the interpersonal relationship is too complex.

So if Zhang Fan didn't call 110, he couldn't let the other party's recklessness delay the lives of innocent patients and block 120. If there was a pregnant woman and a patient with myocardial infarction, it was really an accident. It was too late to say anything.

Zhang Fan let go of Ouyang and said to the male doctors in the hospital with a cold face, "all male doctors in the municipal hospital have it. Take off your white coat."

At the first order, Zhang Fan began to take off his prestige. What is prestige, although we don't know the situation and the reason.

But for Zhang Fan's unreasonable order, no one hesitated and directly began to take off his white coat.

In the early morning of late summer, looking through the gate of the emergency center of the tea vegetable city hospital, a group of well-behaved male doctors with eyes took off their white coats and looked at their Zhang hospital.

"The doctors of the first and second Department of orthopedics are standing at the gate. If they dare to collide with the hospital and any staff of the hospital, they will call me directly." This is a precaution. Don't hurt the doctors and nurses.

"Yes!"

The orthopedic doctor led by Xu Xian came directly. Now even the doctor who didn't know it knew it. Zhang Yuan is looking for trouble.

As soon as these words were said, all the male doctors who had stood opposite and sister red lips directly came over, stood behind Zhang Fan, stared at each other and surrounded each other in the middle.

"You are not welcome here. Please go out! Get out! " Zhang Fan stared at them in a very bad tone and pointed out the door.

"Hey, I don't believe it. Who are you..."

"Do it. I'm responsible for the accident."

Zhang Fan doesn't talk nonsense. He takes people directly and gets started. Seven or eight people, when facing one person, which is quite deterrent.

But four or five hundred male doctors, male doctors who took off their white coats, stood in front of seven or eight people, directly in front of the city wall.

Moreover, the medical industry, especially surgery, is not what you see as a very easy job. Many surgeons actually do half physical and half mental work.

I can't see it in my white coat, but I can take off my white coat. The tendons on my arms are not much worse than ordinary site workers.

One by one, you don't have to do much. Sister Lian and his men were pushed out by the doctors.

"Shit, how dare you? Let me tell you..."

In fact, no matter how brave these people are, they dare not do anything. If the team of hundreds of people really starts, they don't see enough.

Several people, like a ball, were led out of the hall by Zhang Fan.

This is not over yet. After the launch, Zhang Fan said to the director of the security office: "take your people and look after the door. I'm in charge of today's affairs and let bygones be bygones. If you don't look well, you're ready to resign."

This is the first time Zhang Fan has said such words to his colleagues.

The director of the security office looked angrily at several people pushed out and said, "don't worry, Zhang Yuan. If they come in today, you don't have to punish me. I'll go by myself."

"Good!"

With that, Zhang Fan said to the male doctor behind him, "go, follow me!"

A group of Hula people followed Zhang Fan out of the hall neatly.

Chapter 656

I don't know whether China's industry is bad or there is a problem with China's family education.

If the previous generation had a slightly better choice in a certain line of work, they would never let their children embark on the old path of parents again.

Therefore, although song Qiang is gray and black, the real way of life will not teach him the girl of one seedling in 10000 mu of land.

Song qiangming has a lot of women secretly, but I don't know why. It's just that his children are not prosperous. For his girl, he wants her to study hard, go to college for a doctor, and become a scientist in the future.

Although the wish is good, song Qiang's various behaviors on weekdays make the girl who worships him learn an image.

Slap workers and intimidate peers. Anyway, his girl is like a model. The bad is here. She didn't learn home.

If it were song Qiang today, there would never be such a conflict. There are many people between gray and black. Finally, there are a few who can survive and wash white.

Song Qiang is one of them. He knows the world too well. If the government is not serious, he can be carefree. Once the government is serious, he dare not go out.

Therefore, for the functional units of the government, regardless of size, song Qiang always kept a low profile, or acted after people, or wanted to reconcile.

His girl, who didn't learn the essence, only learned a fur, and then thought that her father could run amok of tea, how could she gallop.

This is just like the example of overnight outbreak and overnight poverty. Without accumulation, process, power and money, you will hurt yourself, because without the foundation of climbing and rolling, everything is a sand attic.

Today, you are abusing people in the hospital, jumping to scold Ouyang, pointing to your nose and scolding Zhang Fan. To tell the truth, it's not a big deal. It's just that you won't come to the municipal hospital in the future.

However, the 120 was blocked by the immortal. It's really the old birthday man hanging. I don't know whether he will live or die.

Zhang Fan took the lead to walk outside the hall. A group of people are not aggressive, but they can also be called United.

"Come on, let's start together and directly carry the car in the way." Zhang Fan started first.

Ma Yichen was also in the crowd. When Zhang Fan started, the young man quickly pushed Zhang Fan away: "Zhang Yuan, you don't need to start, you command, we do it!"

What is high EQ, that is, Ma Yichen followed his father as a wine merchant. His father's principle of life is to make friends thoroughly.

For Zhang Fan, Ma Yichen also thought that he had nothing. How can he treat Zhang Fan differently?

Hard work and hard work are the most basic. The rest is to be a man. Therefore, when Zhang Fan bent down and stretched out his hand, he was stopped by Ma Yichen.

Ma Yichen is not the only one who has eyes. The little officer of the medical department doesn't know what to take the microphone. He panted and ran to Zhang Fan, "Zhang Yuan, give you the microphone. There are many people. Without this, everyone can't be unified. I'm going to get it!"

Zhang Fan didn't say much, but he nodded to the little officer. The little officer's red face became more and more red.

"Listen to me! Everybody listen to me and carry the car that stands in the way!" Zhang Fan turned on the loudspeaker and the sound was obviously much louder.

"Good!" Young people are good. At this time, I don't know who answered in the crowd.

The people of X Association have also received a lot of small favors from Song Qiang on weekdays, so they originally thought they were coming to help them get along with each other and have a bit of a superior posture.

As a result, Song Qiang's daughter is a fool, while Ouyang is not easy to provoke. The young assistant is not Grandpa Rao's grandson. It seems that things are making a big noise. The human eyes of X Association turn and go quietly without a ripple.

The flaming red lips immediately became angry. She, who has dominated the campus since junior high school, can't stand this grievance, and her temper has improved after four years of private university.

Without saying a word, she didn't care about her father. He took two steps at a time and rushed to Zhang Fan with people, and then grabbed Zhang Fan's collar, "do you want to live or not!"

The smoke in his mouth mixed with the smell of his lips, turned into an especially disgusting smell, and spread directly to Zhang Fan's nose.

Zhang Fan originally wanted to move the car and let 120 pass. Unexpectedly, this woman was really unreasonable and wanted to do it.

Zhang Fan's face hasn't changed yet. The director of the security office directly pulled the flaming red lips aside, "surround Zhang Yuan. I'll see who dares to come up. Whoever comes up again, do it directly!"

Looking at more people than her and the security guards in the security office stronger than her, the flame red lips and eyes were almost blue.

Zhang Fanli ignored her. Since you are so unreasonable, I'll give you an unreasonable one.

"Come on, one, two, three, lift the car to the garden! 120. I can't wait. I can't delay any time in the emergency department." Zhang Fan's face was livid and gave orders directly.

It's not easy to lift a small BMW, but it's too simple to lift it. Zhang Yuan gave orders, and when the woman threatened Zhang Yuan, everyone saw it clearly.

At this time, with Zhang Fan's order, everyone shouted, "one, two, two, three, get up!"

The fiery little BMW overturned in the hospital garden like a turtle.

Zhang Fan then said, "get out of the way, come on, let 120 out first."

Flaming red lips looked at Zhang Fan's boldness, and then looked at her favorite food. Her teeth were almost broken.

"You wait!" Then he took people away.

"Call 110." After clearing the road, Zhang Fanli ignored the flame red lips.

The noise had already spread to all departments of the hospital. When the male doctor came down, the female doctors and nurses of all departments lay on the window and looked.

"God, look, the men in our hospital are up! Look, look, Xu Xian, they're going to carry the car! "

"Hu Da! Look, Zhang Yuan is angry! " The little nurse Bayin was lying on the window, excited and crazy. She shook her arms and drove! Drive! Drive!

"Let her be domineering and unreasonable. There are still men in our hospital..." the little nurse in the emergency center shouted excitedly. As a result, the head nurse glanced dumb.

Lao Gao stood in the office, looked at the scene, smiled bitterly and shook his head. He thought Zhang Fan was like him, but now he is a little like someone!

Although Lao Gao didn't recognize Zhang Fan's means, he still took out the phone, "old leader, ha ha, I'm Xiao Gao. Today someone came to the hospital to make trouble and blocked it..."

Chen Qiyin looked at Zhang Fan who was working hard. At this time, he felt that Zhang Fan was working hard.

Now Chen Qi sits in the convenience clinic all year round and deals with old people and old women every day. At the end of the day, the prescription for chronic diseases is written, and her hand hurts. Listening to the old lady and old man complain, her ear hurts.

He didn't listen. He was a little impatient. The old man and the old lady would definitely complain to the medical office.

No more beautiful instrument manufacturers came to him, and no lower doctors came to flatter him. He blamed all this on Ouyang's black hand and Zhang Fan's lack of help.

Therefore, when watching the young men in the hospital in full swing, Chen Qiyin took out the phone and called the newspaper: "come on, the hospital doctor not only called the patient's family, but also overturned the patient's car. There is no royal law. "

Wang Yanan watched Zhang Fan lift the car. The girl put down the stethoscope, put down the percussion hammer, ran and took off her white coat. How can she be absent from what Zhang Fan called for.

In the gynecology office, LV Shuyan quietly looked at the way she waved downstairs, feeling

uncomfortable.

In the Department of Cardiology, the new flower hasn't been checked. When I heard why there was chaos downstairs, I just saw Zhang Fan directing male doctors to lift a BMW into a turtle. My mouth couldn't close. I just heard a voice in my heart: "my God! Too exaggerated, too bold! "

Ouyang looked at the hot look in the hall. Although he didn't say anything, his face was much better. The old lady used to think that Zhang Fan was too face, but now she finally has a little momentum.

After lifting the car, Zhang Fan returned to the hall and said to the director of the emergency center, "what's the situation?"

Song Qiang's seven aunts and eight aunts were originally looking for people from X Association. They wanted to be supported by people from X Association, but they couldn't find anyone to die and live.

At this time, look at Zhang Fan and the doctors in the hospital. They stopped making trouble.

And the flame red lips can't do it. Young she can't stand this gas and starts shaking people when she goes out!

.....

Entering the hall, the little nurse looked at Zhang Fan and her eyes were dazzled. That's why little girls like naughty boys, while big girls like rich men.

When Zhang Fan walked into the hall, the little nurse in the emergency center earned a white coat for Zhang Fan.

After taking over the white coat, Zhang Fan was uninteresting and proud. Looking at the white coat in his hand, he was filled with emotion.

.....

Chapter 657

As the old saying goes, a dog that bites does not bark. In fact, it is also very suitable for people.

On weekdays, I saw some young people carved with dragons and tigers on the street. They shook their heads and looked at Li, as if they would fight if they didn't agree.

In fact, these are not grown-up adults, real bandits, shy eyebrows and drooping eyes. They can't see any characteristics at all, because those with characteristics die early.

The flaming red lips shook people. A phone call passed, and all Zhang Sanli and Si came. These people are young people who spend their days in discos, bars and Internet cafes. They are 100 yuan per person, and hundreds of Hula people came.

If they are asked to make a lot of money, such as what to rob and how much money to give, these people can't shout. They say that they beat someone, bully someone, give a hundred when they're done, and run faster than rabbits. It's also an old saying, do great things, cherish themselves, and die for small profits.

"Dean, you go to preside over the consultation. I'll wait 110!" Zhang Fan's meaning is very clear. One person works and one person acts.

"It's not your turn!" Although the old lady's words were not pleasant to hear, they were warm to the heart. Before she finished her words, another sentence came: "she is her, the patient is a patient, don't be emotional. If you want an operation, make a good record of the conversation and do it as carefully as possible. "

"OK, don't worry, I still understand that."

.....

Song Qiang, with money, if a woman changes one a week and doesn't bring a duplicate identity for a month, she can be regarded as a past member.

But he has a lot of money, a lot of women and a big family, but it's useless at his age.

Because he felt that he didn't have a son, no matter how hard he tried, he was just leaving it to someone with a different surname. Therefore, after the age of 50, he began to live and dream of death.

The blood sugar was high and the blood pressure was not low. Then he played a game of carrying a gun to Malaysia. He ate sildenafil and played with heart beat stimulation.

The result was a stroke!

What is stroke, in short, is cerebral ischemia caused by various causes. For example, cerebral vascular blockage is also counted, and cerebral vascular rupture is actually counted.

Systematically explain the brain, let alone not in the medical industry, as long as it is not engaged in the inside and outside of God, doctors can be confused.

In fact, think of the brain as a tree, a tree with luxuriant branches. The branches are all kinds of small blood vessels in the brain, and the trunk is the large blood vessels entering the brain. Leaves are the functional areas of the brain.

Many modern child care institutions have developed a concept to develop undeveloped areas of the brain. In fact, it is deceptive.

Although people are divided into left and right hands, the brain is also divided into left and right brains, but an action is planned by the brains on both sides, and one side alone is not enough.

For example, kissing. If your left brain is uncoordinated, there will be an accident when kissing. It doesn't happen that your tongue is stuffed into someone's throat and spits out all the strings of food they eat at night. I don't know. I thought I was very hungry

It's a mistake to put your tongue into people's ears and eyes, just like being drunk. Therefore, almost all the actions of the human body are coordinated by both sides of the brain.

The left brain aims, the right brain launches, and the cooperation is seamless.

.....

And song Qiang, as like as two peas, is old and the blood vessels are aging. This blood vessel is exactly the same as the rubber tube.

The new rubber water pipe has good elasticity, good shrinkage and even less sealing.

But when the wind blows and the sun shines, there will be various problems with the rubber tube, and the blood vessels are actually the same. First, the muscles of the blood vessels begin to age and have no elasticity.

Then various substances like rust spots hang on the blood vessel wall.

Therefore, the elderly can not be frightened and excited. As soon as the blood vessels are excited and dilated, the rusty patches will fall off. When this thing falls off, it will become a bolt.

As the blood vessel diameter becomes smaller, where is the blockage and where is the problem.

Drinking, smoking, high blood pressure and high blood sugar are all killers of blood vessels. The immortal song Qiang also took a lot of tube expansion drugs and was very excited because he took the gun and mounted the horse.

As a result, the embolus fell off and blocked in the brain, resulting in stroke.

"Zhang Yuan, it's ischemic stroke."

After seeing Zhang Fan entering the hall, the director of the emergency center hurriedly took the examination results.

"Did you scan CT and MRI?"

"Yes, because it has been more than 4 hours and MRI can diagnose it."

Zhang Fan looked at the result inspection report and asked, "what treatment is given now?"

"At present, the expert group has given anticoagulant treatment and mannitol to reduce intracranial pressure, but the effect is not obvious. Moreover, his hemagglutination has had problems. After discussion, the expert group recommends surgery. If anticoagulation continues, there will be a risk of bleeding."

"What did the family say?" Zhang Fan has come to the rescue room. The hospital's internal and external experts have gathered. Even the new cardiologist has come.

"They are very cooperative now. Let's do whatever we want!" The director of the emergency center said in a slightly proud tone.

"It's not what we let others do. This is a hospital, not a prison, not a compulsory organ. Go and make it clear to others and give them the choice of treatment."

Zhang Fan is very upset. Originally, this kind of very professional thing should be handed over to the hospital to the doctor to choose, but such a trouble

"Good! I'll go now. " The director of the emergency center walked away.

"Shouldn't it be sent to a superior hospital? Can this kind of carotid embolism be done here? "

The flower asked Zhang Fan in a low voice. She was very curious because only one or two hospitals can do this difficult cerebrovascular surgery in Qingniao.

"All emergency operations, in the border areas, especially in places far away from the capital and regional top three hospitals, are the end. Doctors have no right to choose, and patients have no right to choose."

Zhang Fan looked at Song Qiang's family talking outside the window and said in a low voice.

"Well, can you do it?"

"Not you, but us. You are also a member here now."

"Oh! Oh! " The flower was embarrassed and stuck out her tongue. Before her tongue went in, she said curiously, "why do you take off your white coat when you go out to fight?"

Zhang Fan looked at the doctor who had been in a large hospital and said expressionless, "she was not afraid of song Qiang's death, but that her business would turn yellow. Therefore, when the director of the emergency center came out for the second time, she didn't speak.

They choose surgery, and then sign something, which is very easy, without a little domineering when they first came.

"Hold on to the operation!" Zhang Fan said, but when he turned around, he saw that the extracerebral doctors, including Xue Xiaoqiao, were a little worried.

Zhang Fan knew why. He pointed to song Qiang lying in the hospital bed and said, "we are doctors. This is our duty rather than power. Rescuing patients is our obligation. We have no choice.

Don't let the bigotry in your heart change the color of your coat. Now, when he lies in the hospital bed, he is a patient.

You must go all out to have an operation immediately. If you can't figure it out, you can't bring a trace of emotion to the operating table now. "

.....

Flame red lips, eyes red like cattle, lips were bitten by teeth.

On weekdays, she bullies people. I didn't expect to be bullied today. It's not light. Can you bear it?

No!

Hoo hoo, Hoo hoo, a group of young people with red, blue and even green hair styles gathered in no corner.

Some people's jeans are broken. If they are broken a little more, they may see hip seams. But in this way, there are many bright iron chains hanging on the jeans, and I don't know what it means.

"Go, go, get the money! The elder sister blew her whistle. "

"Which is the hospital? Really? "

"You're stupid. We're just going to cheer. Don't be stupid and give people a punch when you go up. It won't pay, you know!"

"OK, brother, I understand."

People who shake are not stupid. Money can be taken. The most is to stand and shout and coax. It's really hard to beat people. They won't do anything. This is not bullying primary school students or middle school students.

.....

Newspaper, "director, someone called to reveal that the doctor called the patient and overturned the patient's car. You see? "

"Which hospital?" The fat director looked up at the reporter.

"City hospital!"

"Hiss!" The fat director took a breath of air conditioning and turned the ballpoint pen in his hand several times.

"In this way, you go first. Don't shout loudly. Drive an unmarked van and see what happens first."

"OK!" When the reporter left, the fat director immediately picked up the phone and called the leader of the publicity department.

Then, slowly, the situation began to change. With the gathering of magic lottery personnel and the report of reporters, the situation seemed to become more and more serious.

Chapter 657

As the old saying goes, a dog that bites does not bark. In fact, it is also very suitable for people.

On weekdays, I saw some young people carved with dragons and tigers on the street. They shook their heads and looked at Li, as if they would fight if they didn't agree.

In fact, these are not grown-up adults, real bandits, shy eyebrows and drooping eyes. They can't see any characteristics at all, because those with characteristics die early.

The flaming red lips shook people. A phone call passed, and all Zhang Sanli and Si came. These people are young people who spend their days in discos, bars and Internet cafes. They are 100 yuan per person, and hundreds of Hula people came.

If they are asked to make a lot of money, such as what to rob and how much money to give, these people can't shout. They say that they beat someone, bully someone, give a hundred when they're done, and run faster than rabbits. It's also an old saying, do great things, cherish themselves, and die for small profits.

"Dean, you go to preside over the consultation. I'll wait 110!" Zhang Fan's meaning is very clear. One person works and one person acts.

"It's not your turn!" Although the old lady's words were not pleasant to hear, they were warm to the heart. Before she finished her words, another sentence came: "she is her, the patient is a patient, don't be emotional. If you want an operation, make a good record of the conversation and do it as carefully as possible. "

"OK, don't worry, I still understand that."

.....

Song Qiang, with money, if a woman changes one a week and doesn't bring a duplicate identity for a month, she can be regarded as a past member.

But he has a lot of money, a lot of women and a big family, but it's useless at his age.

Because he felt that he didn't have a son, no matter how hard he tried, he was just leaving it to someone with a different surname. Therefore, after the age of 50, he began to live and dream of death.

The blood sugar was high and the blood pressure was not low. Then he played a game of carrying a gun to Malaysia. He ate sildenafil and played with heart beat stimulation.

The result was a stroke!

What is stroke, in short, is cerebral ischemia caused by various causes. For example, cerebral vascular blockage is also counted, and cerebral vascular rupture is actually counted.

Systematically explain the brain, let alone not in the medical industry, as long as it is not engaged in the inside and outside of God, doctors can be confused.

In fact, think of the brain as a tree, a tree with luxuriant branches. The branches are all kinds of small blood vessels in the brain, and the trunk is the large blood vessels entering the brain. Leaves are the functional areas of the brain.

Many modern child care institutions have developed a concept to develop undeveloped areas of the brain. In fact, it is deceptive.

Although people are divided into left and right hands, the brain is also divided into left and right brains, but an action is planned by the brains on both sides, and one side alone is not enough.

For example, kissing. If your left brain is uncoordinated, there will be an accident when kissing. It doesn't happen that your tongue is stuffed into someone's throat and spits out all the strings of food they eat at night. I don't know. I thought I was very hungry

It's a mistake to put your tongue into people's ears and eyes, just like being drunk. Therefore, almost all the actions of the human body are coordinated by both sides of the brain.

The left brain aims, the right brain launches, and the cooperation is seamless.

.....

And song Qiang, as like as two peas, is old and the blood vessels are aging. This blood vessel is exactly the same as the rubber tube.

The new rubber water pipe has good elasticity, good shrinkage and even less sealing.

But when the wind blows and the sun shines, there will be various problems with the rubber tube, and the blood vessels are actually the same. First, the muscles of the blood vessels begin to age and have no elasticity.

Then various substances like rust spots hang on the blood vessel wall.

Therefore, the elderly can not be frightened and excited. As soon as the blood vessels are excited and dilated, the rusty patches will fall off. When this thing falls off, it will become a bolt.

As the blood vessel diameter becomes smaller, where is the blockage and where is the problem.

Drinking, smoking, high blood pressure and high blood sugar are all killers of blood vessels. The immortal

song Qiang also took a lot of tube expansion drugs and was very excited because he took the gun and mounted the horse.

As a result, the embolus fell off and blocked in the brain, resulting in stroke.

"Zhang Yuan, it's ischemic stroke."

After seeing Zhang Fan entering the hall, the director of the emergency center hurriedly took the examination results.

"Did you scan CT and MRI?"

"Yes, because it has been more than 4 hours and MRI can diagnose it."

Zhang Fan looked at the result inspection report and asked, "what treatment is given now?"

"At present, the expert group has given anticoagulant treatment and mannitol to reduce intracranial pressure, but the effect is not obvious. Moreover, his hemagglutination has had problems. After discussion, the expert group recommends surgery. If anticoagulation continues, there will be a risk of bleeding."

"What did the family say?" Zhang Fan has come to the rescue room. The hospital's internal and external experts have gathered. Even the new cardiologist has come.

"They are very cooperative now. Let's do whatever we want!" The director of the emergency center said in a slightly proud tone.

"It's not what we let others do. This is a hospital, not a prison, not a compulsory organ. Go and make it clear to others and give them the choice of treatment."

Zhang Fan is very upset. Originally, this kind of very professional thing should be handed over to the hospital to the doctor to choose, but such a trouble

"Good! I'll go now. " The director of the emergency center walked away.

"Shouldn't it be sent to a superior hospital? Can this kind of carotid embolism be done here? "

The flower asked Zhang Fan in a low voice. She was very curious because only one or two hospitals can do this difficult cerebrovascular surgery in Qingniao.

"All emergency operations, in the border areas, especially in places far away from the capital and regional top three hospitals, are the end. Doctors have no right to choose, and patients have no right to choose."

Zhang Fan looked at Song Qiang's family talking outside the window and said in a low voice.

"Well, can you do it?"

"Not you, but us. You are also a member here now."

"Oh! Oh! " The flower was embarrassed and stuck out her tongue. Before her tongue went in, she said curiously, "why do you take off your white coat when you go out to fight?"

Zhang Fan looked at the doctor who had been in a large hospital and said expressionless, "she was not afraid of song Qiang's death, but that her business would turn yellow. Therefore, when the director of the emergency center came out for the second time, she didn't speak.

They choose surgery, and then sign something, which is very easy, without a little domineering when they first came.

"Hold on to the operation!" Zhang Fan said, but when he turned around, he saw that the extracerebral doctors, including Xue Xiaoqiao, were a little worried.

Zhang Fan knew why. He pointed to song Qiang lying in the hospital bed and said, "we are doctors. This is our duty rather than power. Rescuing patients is our obligation. We have no choice.

Don't let the bigotry in your heart change the color of your coat. Now, when he lies in the hospital bed, he is a patient.

You must go all out to have an operation immediately. If you can't figure it out, you can't bring a trace of emotion to the operating table now. "

.....

Flame red lips, eyes red like cattle, lips were bitten by teeth.

On weekdays, she bullies people. I didn't expect to be bullied today. It's not light. Can you bear it?

No!

Hoo hoo, Hoo hoo, a group of young people with red, blue and even green hair styles gathered in no corner.

Some people's jeans are broken. If they are broken a little more, they may see hip seams. But in this way, there are many bright iron chains hanging on the jeans, and I don't know what it means.

"Go, go, get the money! The elder sister blew her whistle. "

"Which is the hospital? Really? "

"You're stupid. We're just going to cheer. Don't be stupid and give people a punch when you go up. It won't pay, you know!"

"OK, brother, I understand."

People who shake are not stupid. Money can be taken. The most is to stand and shout and coax. It's really hard to beat people. They won't do anything. This is not bullying primary school students or middle school students.

.....

Newspaper, "director, someone called to reveal that the doctor called the patient and overturned the patient's car. You see? "

"Which hospital?" The fat director looked up at the reporter.

"City hospital!"

"Hiss!" The fat director took a breath of air conditioning and turned the ballpoint pen in his hand several times.

"In this way, you go first. Don't shout loudly. Drive an unmarked van and see what happens first."

"OK!" When the reporter left, the fat director immediately picked up the phone and called the leader of the publicity department.

Then, slowly, the situation began to change. With the gathering of magic lottery personnel and the report of reporters, the situation seemed to become more and more serious.

Chapter 658

Chen Qi stayed in the chronic disease clinic, because it was a convenient clinic, so it was on the first floor. Chen Qi ran away from a group of old men and women, stood in the bathroom on the first floor, kneaded his nose and lay on the window to see, "why don't you come!" He is waiting for a newspaper reporter.

He felt that this time, Ouyang and Zhang Fan should be able to drink a pot and turn over the patient's car. He was kidding. Although he didn't expect to let the superior leaders remove Ouyang and Zhang Fan at one time, an administrative warning should not run away.

In the bathroom, green headed flies climbed on his head. He didn't respond. His mind was full of the way Ouyang and Zhang Fan were approved.

"Seize the opportunity." Chen Qi kept talking.

.....

The Propaganda Department directly contacted the leaders in charge of the health system. After all, the municipal hospital is now a health window for tea. Some things still need to be communicated first.

Before the leader in charge of Health called Ouyang, Ouyang called first: "I can't do it! Our doctor stayed up late on duty and didn't say anything.

But now doctors don't even have a sense of security.

Isn't the city hospital unnecessary for tea

Although the old lady is not a villain to complain first, there is a stream of resentment on the phone.

The leader in charge of health couldn't open his mouth. Put aside the investigation and pacify this one first.

"What's the matter? The president of the European Academy didn't let the man in the ordinary time. What's the matter today."

"What's the matter? Song Qiang came to see a doctor with the help of a member of the X Association. His family first blocked 120 cars.

Let them move the car, don't move the car, don't say, and threaten me and our doctors.

Can I delay 120? Is it me or you who is responsible for the death? "

"No! No! No! Let's have something to say. What did you do? "

Responsibility, kidding, who is willing to take this responsibility!

"No way. What can we do with such a big car and such a heavy car? The traffic police can't come for a while and a half. They can't carry it away. They can only lift it into the hospital garden.

A good garden, it doesn't look like it. Also, the other party said they would retaliate against our doctors and nurses. "

As soon as the call came down, the leaders were big. He knows Ouyang too well. If he ignores people who want to grab three points, how can he suffer losses? It's absolutely intentional.

But what if it's intentional? You shouldn't have occupied the first aid channel.

"I report to my superior that he is a member of the committee, how many..."

"The committee members are human, and other patients are not human!"

咚! Ouyang dropped the phone.

To tell the truth, the leaders in charge of health, culture and education are really dissatisfied with Ouyang, but dissatisfaction is useless, and he has to endure it.

In his opinion, Ouyang is too overbearing and doesn't listen to Xuan.

"Are you sure you want to revenge the doctors and nurses in the hospital?"

Inside the tea vegetable office building, the biggest leader frowned and listened to the report.

"President Ouyang said!"

"Check it out and implement it!"

"Let the inspector of the health bureau still..."

"Let director Cheng send some criminal policemen to have a look!" The big guy took a look and said in an unfriendly tone.

.....

Song Qiang was originally a strong man. With the increase of age, he became fatter and fatter. How fat is he.

It can be said that a man of one meter seven lies on the operating table, and the fat on his stomach can

cover the edge of the operating table.

"It is said that he will fly to Chang'an province to play golf every week! How rich! "

Anesthesiologist Lao Wang broke his mouth while anesthetizing.

At this time, Xue Xiaoqiao said: "with this figure, you can't see the ball when you lower your head. You can't reach the ball when you step back. What kind of golf can you play with a belly thicker than a cylinder!"

"All right, accumulate some virtue. Have you disinfected it?"

After washing his hands, Zhang Fan entered the operating room and heard that Xue Xiaoqiao was arranging the patient. Zhang Fan said.

"All right! Ha ha! " Xue Xiaoqiao smiled awkwardly and let Zhang Fan say so. He also felt that he shouldn't say so.

After signing and pressing their fingerprints, Zhang Fan and his team began the operation as soon as possible.

The brain can't be touched, let alone damaged. The intracranial pressure is high. It can spit the whole patient.

It can't lack oxygen. If it lacks a little, it sends a signal. I can't breathe. Then the patient starts to be irritable for no reason.

Once the hypoxia exceeds its tolerance limit, the patient is in a coma directly, and then there is a sky shaking snoring sound.

If the hypoxia time is too long, the light person will have corresponding symptoms, such as hemiplegia, crooked mouth, and even the water can't be cleaned up.

The more serious one is the vegetative person. Maybe he will never wake up. If it is more serious, he will report directly to the king of hell.

Therefore, when the elderly at home have nausea, vomiting and slow response, don't delay and send them to the hospital.

.....

At the beginning of the operation, to tell the truth, no matter how much Zhang Fan hates each other's family members, he can't have a trace of emotion in it at this time. This is not a virgin saint. This is the last bottom line of the industry and an unbreakable bottom line. Lying on the operating bed, he is a

simple patient.

"Start!" After Zhang Fan took a deep breath, the operation began.

Instruments outside the brain are too fine compared with orthopedics or general surgery.

The pull hook of ordinary foreigners is not as big as the deep pull hook of ordinary foreigners. When watching ancient costume TV dramas, the arc plate in the hands of Ministers is not as big as the pull hook of ordinary foreigners.

The simplest electrocoagulation head, the general electrocoagulation head is about 2.0mm, while the fine electrocoagulation head outside the brain, the smallest is 0.3mm.

The surgery outside the brain is quite delicate. If you move your hand gently, you may feel nothing under the naked eye, but under the microscope, it is no less than an earthquake. Therefore, Zhang Fan is stable and stable in his state of mind.

It's a lie to say it has no effect, but to call it a person is to control your emotions.

.....

The plaque in the patient's cervical artery blocked the blood flow into the brain. Now Zhang Fan, what they do is to peel off the plaque.

In the exposed upper chest (a), Zhang Fan looked at the nausea in his heart. The nausea for unknown reasons was not emotional nausea, but a real physiological reaction.

Song Qiang is too fat. His fat chest is like an old woman after menopause for more than ten years. The flesh of his chest is prolapsed. If his lower abdomen is not covered, Zhang Fan thinks his chest can extend to his navel.

Even if it is fat, the body hair that can grow on the chest is pasted near the chest like chrysanthemum petals. It is dark because it has been wiped with yellow iodophor.

The dark body hair is close to the chest, from time to time there are small bubbles emerging in it, and occasionally a black merchant with yellow hair cocked up. The yellow fat breast meat swayed as he breathed, and Zhang Fan felt more and more uncomfortable.

"Give me a small medium order and I'll cover this one!" Zhang Fan couldn't help it. To tell the truth, the beauty of the chest, women are a kind of maternal beauty.

The male, long hair, in fact, nothing, it can more reflect the male grandeur.

But song Qiang is fat and hairy. It's directly the combination of men and women. You can think about it.

When a beautiful woman opens her clothes, she reveals a lot of hair on her chest.

It really makes people look at the diaphragm.

Cover his chest. Although Zhang Fan's eyes can't see it, there is always a ball of hair in his brain, as if it's going to grow out.

"Knife!" After biting his teeth, Zhang Fan asked for a knife. When the knife started, Zhang Fan's brain was finally clear.

Along the sternocleidomastoid muscle, separate the platysma and open the deep cervical sheath. The blood vessels were directly exposed.

This kind of operation is very contradictory. It needs to be in a hurry, but it can't be in a hurry.

Blood vessels, especially arteries and blood vessels, have so many palpable beats on the body surface.

The radial artery, which is the place where people often say "pulse", the old Chinese medicine touched it and said "happy pulse"!

The second place, which most people don't know, is familiar to addicts, that is, the artery of the groin.

The third is the carotid artery. This artery is one of the gold standards for determining whether a patient has a heartbeat.

I usually feel these places. It doesn't seem very deep, but it's actually very deep.

In this way, anyone who has seen suicide by jumping from a building or hanging himself has really seen himself cut his artery and killed himself.

You can touch the artery, but you really want to break it. It's estimated that ordinary people can't do it. It's too deep.

In a hurry, the brain can't stand it. The lack of oxygen makes the patient unconscious, but such a thick blood vessel is still an artery. There are very important nerves and lymph nodes nearby. To tell the truth, this kind of operation is very difficult to do.

Zhang Fan opened song Qiang's neck layer by layer. It was fat and short. It was like a chest down from the head. The neck was too short and thick.

The open skin directly reveals the thick yellow fat, hanging under song Qiang's head like a yellow collar.

.....

Just when Zhang Fan and his wife operated on Song Qiang, Song Qiang's girl shook a group of people and began to slowly gather at the gate of the hospital.

Chapter 659

It's good to have money at home, but you can't eat and drink at home.

At present, 80% of human diseases are either related to eating or drinking, and the rest are related to... As for others, they are inherited.

It's idealistic to say that there is a certain amount of food in a person's life. If you eat one more bite today and one more bite tomorrow, you may have been able to live to be 80 years old, but it disappeared at the age of 60

Although the old saying goes like this, there is a certain truth. Because the total number of human heart beats is so hundreds of millions of times.

Just like a thin man and a fat man climbing a mountain, the mountain is the same high, but the consumption is different. The fat man's heart can really be regarded as carrying a weight. It's too tired. This thing is like a taxi. The mileage in a month is dozens of times that of a private car. It's not easy to break down.

The heart consumes a lot of energy. Song pangzi's blood vessel damage is also very severe.

When Zhang Fan opened the muscle surrounded by yellow fat like a pig's neck, Song Qiang's blood vessels were exposed.

What is the blood vessel of the human body? Zhang Fan has searched all kinds of Chinese, European and American and Marubian teaching materials, but there is no image description.

It's a little general to say that blood vessels are muscle pipes. It's not so accurate to say that they are like rubber pipes. After Zhang Fan has done a lot of anatomy in the system, he can finally describe blood vessels vividly. This thing is like women's silk stockings.

Moreover, this silk stockings is not the kind of conventional silk stockings. It is a large mesh lattice silk stockings that ordinary women can't overcome. When wearing this kind of silk stockings on their legs, the white skin of each lattice is clearly exposed.

In fact, the enlarged blood vessels are similar to the mesh stockings. The blood vessels are hidden in the muscles and hidden in the gullies of the bones. Its periphery is not dry, but soaked in body fluids.

The size of the lattice of blood vessels is fixed. For example, some cells and substances cannot come out. Substances such as red blood cells, platelets and albumin cannot come out of the vascular grid.

If these functional cells and functional protein substances are discharged, there is no difference between body fluid and blood.

This also shows the terrible nature of diarrhea, because in the later stage of diarrhea, what is pulled is actually body fluid, that is, blood without protein and red blood cells. As the saying goes, a strong man can't stand the principle of three bubbles.

Blood vessels do not produce these functional cells and proteins. These things can't get out. How can they get in.

Small molecules such as water molecules are free to enter the blood vessels. They go in and out. Where they are comfortable, when there is more water in the blood vessels, they flow out and run into the tissues of the body. When there is more water in the tissues of the body, they run into the blood vessels.

Many people have high blood pressure, swollen face and swollen feet. In fact, it is because the pressure of blood vessels is too high, which presses the water of blood into the tissue.

Cells and proteins are sent into blood vessels from the body through energy switches.

Generally speaking, it means that you have a big hand to open the mesh of silk stockings, and then take these things and send them in.

This is the general principle that proteins and cells go in and out. Why do we say that poisonous snakes are very dangerous? If we don't say nervous snakes, we'll say coagulative snakes.

If this thing bites you, it will expand the vascular grid of the human body. All the red blood cells, albumin and platelets that could not come out ran out of the expanded grid.

After these substances run out, they are equivalent to escaping from work. They don't work, and no oxygen or energy can be sent to all organs of the human body.

This is why people killed by poisonous snakes are blue and blue all over, because there is iron in blood cells. This element will appear after this thing is inactivated and precipitated.

Song pangzi is not old, but his body has let the tiger wolf medicine and high-fat and high-protein diet disarm and surrender.

When Zhang Fan turned out the carotid artery, he had to stop the operation. "Give me some dry gauze. There's too much fat. The gloves are slippery and can't hold the pliers."

Vascular surgery, summed up in one sentence, is both dangerous and dangerous. Don't talk about big arteries. Even if you have a nosebleed, sometimes it can make people faint, not to mention the blood vessels that just come out of the heart and enter the brain.

How much pressure does this blood vessel have? It can be said that this blood vessel can easily spray a roof three meters high.

Maybe you don't have any concept. When you think about killing chickens during the Spring Festival at home when you were a child, you can feel that sometimes one accidentally cuts the chicken's neck. As a result, the chicken didn't grasp firmly, and then there came a wall full of red spray everywhere.

In fact, people are the same. There are four major blood vessels entering the brain, two on the left and two on the right.

Fat song ate so well that one of the blood vessels into his brain was blocked. This situation is very dangerous, because the brain is a big oxygen consumer. Sometimes the four blood vessels are not enough, and blocking one is not enough.

How dangerous is this danger? There is a more fun action. Touch the place where your neck beats, and then put your hands on it. It won't take long, four or five seconds, you can feel what is black in front of you.

"With microscope!" After exposing the field, Zhang Fan said something to Xue Xiaoqiao.

Vascular intima stripping surgery is different from other operations. Once the operation starts, it must be done from beginning to end with a light description. Once there is an accident, it is full of blood.

In martial arts TV, the master slapped the enemy's neck, and then the enemy fainted. Although this is slightly exaggerated, it is very obvious in neck vascular surgery.

If the action is a little bigger, there may be heart failure, because this place is a sensory organ, which is slightly stimulated. This thing is like an alarm, which will make the heart and brain abnormal.

With the microscope, Zhang Fan and Xue Xiaoqiao prepared to ligate the upper and lower circuits of blood vessels. "Did you have this operation when you were in the capital?" Zhang Fan asked while

preparing.

"No! The level is not enough. I don't have a chance to pull the hook in the capital. "

Xue Xiaoqiao looked at Zhang Fan in surprise. Because Zhang Fan seldom spoke during the operation, let alone gossip about other people's affairs, our Xiao Xue was very puzzled.

"Oh! In the capital, if you follow the normal order, when can you go to the surgery? " Zhang Fan asked again.

"Well, at least after thirty. And it's easy to be employed by the hospital as the chief physician. "

"Oh! I think your skills are good. What do you think if you go step by step and waste your talent? "

"Er!" Xue Xiaoqiao tangled, "what does Zhang Fan mean by this?"

In fact, after several acupuncture throwing knives, Zhang Fan really feels that he can't wait to establish his own team.

Master has retired from clinical practice when he is old. You can't rely on master to find someone to fill the hole every time there is a special operation.

Outside his mind, Zhang Fan's target character is Xue Xiaoqiao, so Zhang Fan is ready to start brainwashing this guy.

He also saw that this guy looks like he doesn't lack money. Although he rarely smokes, he occasionally takes out soft China when smoking. His daily clothes are also low-key but not cheap.

Because once, Xue Xiaoqiao wore a sportswear. The little nurse was very puzzled and asked, "Dr. Xue, do you still have the brand of Huili?" At that time, Zhang Fan took a look. It was definitely not Huili.

If you can come to the frontier without lack of money, it is estimated that your feelings are gone. What else can you rely on to impress others? It is technology.

"Most people don't do this kind of surgery as well as I do. I guess you've given tea element. It's hard to see my technique again!"

Zhang Fan ignored Xue Xiaoqiao's entanglement and seduced each other like Grandma wolf. What caught up was not business, so Zhang Fan slightly dug a hole for Xiao Xue.

"Er, Zhang Yuan, this is a little unique!" Although Xue Xiaoqiao also recognizes Zhang Fan's technology, Xue Xiaoqiao still can't be soft.

"Hehe, we both don't draw a conclusion first. We'll have an operation first. You can see it!"

After that, Zhang Fan stopped talking and started the operation directly.

For surgery, the precision of extracerebral surgery is quite high, but the time requirement of extracerebral surgery is relatively lower than that of carotid surgery.

The carotid artery is different, not only fine, but also fast. Because of long-term ischemia, the sequelae of patients will become more and more serious. Therefore, this kind of operation requires not only accuracy, but also speed, that is, the so-called fast but not chaos.

This is exactly what Zhang Fan is best at, so he is going to bury Xiao Xue in this pit.

Xue Xiaoqiao looked at Zhang Fan. Although he didn't admit it, he was still looking forward to it. He wasn't stupid. According to his professional title, he looked back on it.

But now, outside his mind, only he can follow Zhang Fan's footsteps. Therefore, the more powerful Zhang Fan is, the more things he can learn. Therefore, our Xiao Xue is also looking forward to it.

One shot and two harmonies, Zhang Fan's pit and Xiao Xue jumped. That's how people are. It's not as good as what they like to win over.

At first, once they entered the key steps of the operation, Zhang Fan and Xue Xiaoqiao became serious. The carotid artery was no joke. The big artery with thick fingers could give her two hot-blooded baths.

"Scalpel 11!" Zhang Fan took the surgical band and opened a hole in the artery very gently and stably.

"Small stripper!" Step by step, Zhang Fan couldn't turn his head to look at the nurse with a microscope. The instrument nurse passed the instrument quite gently.

Open the blood vessel and Zhang Fan's stripper started.

How is this operation done? In fact, it is also simple, that is, close both ends of the blood vessel, then open a blood vessel opening, peel off the plaque attached to the blood vessel with a stripper, and then repair the blood vessel wall with needle and thread suture.

In fact, the difficulty of the operation is to close the blood vessels, clean up the plaque and repair the blood vessel wall.

The vascular wall is very troublesome. Although it is a leaky screen like silk stockings, once its continuity is destroyed, the plaque is removed this time. After a short time, it will continue to appear and form new emboli.

Just like a wall, the wall painted with white paint looks very white and smooth. In fact, it is full of potholes when opened with a magnifying glass.

Blood vessels are like this, that is, the potholes must not be seen with the naked eye, otherwise platelets will adhere to this place and form emboli.

Why is it easy for people with hypertension and hyperglycemia to form thrombosis. In fact, it is also very simple. When the blood in the blood vessel flows, it will still impact the blood vessel wall.

As soon as the blood pressure is high, or the blood sugar in the blood is high, it is like the pressure of water flow, or as there is more sand in it, the pressure of sand is still high, so long-term scouring will damage the blood vessel wall in advance.

When the blood vessel wall is damaged, platelets and coagulation proteins, like repairmen, lie prone at the damage and attach and repair. Over and over, the blood vessel wall is like repairing patches on pants, layer by layer, until the blood vessel is finally blocked by this patch.

When the pipe wall is cut, the stripper is directly inserted into the bottom of the plaque like a shovel.

Xue Xiaoqiao's mouth opened, "Zhang Yuan, one-time stripping? The blood vessel wall will break! "

The young man's voice dared not tremble even in his throat. To tell the truth, Zhang Fan's technique is too overbearing. He goes straight like a snow shovel and an ice breaker.

Xue Xiaoqiao was deeply afraid that his voice would be louder. Then Zhang Fan scratched the blood vessel wall. Like him, his voice could hear trembling.

"The longer the blood vessel wall is exposed to the air, the greater the damage, so it must be fast!"

"Gollum!" Xue Xiaoqiao drooled. The baby was sweating. Even sweat beads like dew hung on her hair, "it's too rough!"

How thin the blood vessel wall is, it looks as thin as a cicada wing with a microscope, and the stripper under Zhang Fan started directly.

Other doctors do this kind of operation, which is separated bit by bit. They will never do this.

The stripper, with a chisel, a flat metal chisel and a chisel braving metal air conditioning, shoveled down without hesitation.

Xue Xiaoqiao almost cried out. He didn't dare to look. He was worried that Zhang Fan would go down with a chisel, and then there would be a big hole in his blood vessel.

If there is a hole in the carotid artery, you don't have to think about it. It's like putting song pangzi on the operating table.

"There is a certain gap between the plaque and the blood vessel wall. This operation must be operated between the gaps to find their sense of breakthrough. Like gently breaking the bubble of bubble gum, there must be a slight sense of bursting, rather than the sense of tearing a certain film!"

Zhang Fan explained to Xue Xiaoqiao while doing it.

Song pangzi is too dead. Other people's plaque embolus is like what kind of small pearl in passion fruit or milk tea.

Fat man song ate and drank a lot. It was directly shredded meat, or meat like substances hanging in the blood vessel wall. There was oil in the blood and fat meat floating in the oil. It was no exaggeration. His blood vessel wall was directly like a plate of Mao xuewang.

"Gauze!" Like sticky phlegm, when Zhang Fan went down with a chisel, the plaque was separated, and then the sticky shredded meat was gently wiped out by Zhang Fan with gauze.

Xue Xiaoqiao looked at the complete blood vessel wall and then at the gauze in Zhang Fan's hand. Baby's heart was coming out of her throat.

But looking at the complete blood vessel wall, his frustrated heart was directly frenzied. What is technology, this is technology, what is level, this is level.

"How can I feel this sense of breakthrough? How did you feel it.

When I was in the capital, no one directly stripped the whole, all bit by bit, so that the operation time can be reduced by half!

How do you feel this sense of breakthrough? "

"Hehe, do you want to know?"

"Yes!" With a microscope, Xue Xiaoqiao looked up at Zhang Fan, just like antenna baby.

"Hehe, come and see how I repair blood vessels!"

Chapter 660

To be honest, it was the first time Zhang Fan saw him. The blood vessels opened and the doctors were surprised.

The blood quality of normal people is not as cool as water, but the fluidity is good. The blood quality is like ink, slightly viscous, but it will never be like jelly.

Song pangzi's blood is not viscous. It's directly the West Lake Beef Soup. Picking up the blood with pliers is like picking up the West Lake Beef Soup with a spoon. It pulls the silk. After provoking it, it's up and down, full of elasticity, and you can vaguely see the shredded meat in the soup.

Moreover, the blood holding the silk is not intermittent, because the fat content in the blood is too high, just as the liquid evolves into semi liquid, silky.

"He is also an expert who can eat meat into blood!" The little nurse whispered as she wiped the instrument.

The instruments on the operating table shall be returned to the nurse after the doctor uses them once. The nurse must wipe them clean in a short time to prepare for the doctor's second use.

The little nurse on the operating table happened to be Bayin, a big breast sister. While wiping, the girl looked at the shredded meat on the gauze and said something worried or surprised.

"So, in the future, eat less thin skinned meat steamed stuffed buns and less fat mutton!" The anesthesiologist glanced at Song pangzi's blood vessels, and then looked at the very high Bayin peaks, jokingly said.

"Lao Chen! You, okay, okay! I'll go to your wife later and say you praise me and say I'm... Big! "

"I didn't!" The anesthesiologist knows Bayin too well. This girl is famous for her forthright. He also regrets it. Why tease her.

"You didn't?"

"I don't have it!"

"When did I eat thin skinned steamed stuffed bun and sheep tail?"

Ba Yin then quietly looked at Zhang Fan. To tell the truth, the girl didn't have a little love for Zhang Fan.

She likes the man who harnesses the horse. Her body should be as majestic as Tianshan Mountain, while

Zhang Fan and Bayin feel a little thin.

But since the last time I went out with Zhang Fan, Zhang Fan's speech is the imperial edict for Ba Yin.

No kidding at all. After Xiaobayin returned home, he immediately bought a car and a suite. He no longer had to chase the bus and squeeze into the single dormitory. The nurses in the operating room were almost envious.

Therefore, in the operating room, from the head nurse to the junior nurses, Zhang Fan is more awed than Ouyang.

"I'm kidding!" Old Chen Shanshan said. When he was ready to say something more, Zhang Fan was not happy.

"Dr. Chen, wake up the patient. This is carotid artery stripping. Watch the monitor more!"

In this sentence, the temperature in the operating room fell suddenly, no one chatted, and Bayin quietly stuck out his tongue.

Medical treatment, especially in the top three medical units, to tell the truth, doctors have a very calm attitude towards leaders.

In addition to those who want to take an official career and need to follow the organization closely, regular doctors also have a little respect for their masters and the directors of their own departments. They have no sense of awe for the leaders or administrative leaders of other departments.

Because the doctor's career can be seen to the end at a glance. He doesn't want to take an official career and will be in the department all his life, so

But everyone is different from Zhang Fan. Since going to the chief tribe, people from all over the hospital have absolute respect for Zhang Fan no matter how behind his back.

Joking, who doesn't love money, so it's true that wealth moves people and people.

"Xiao Xue, look at it. The repair of blood vessels is the last and most important step in arterial stripping. Whether the patient relapses in situ in the future depends on the doctor's method in this step."

"Yes!" Xue Xiaoqiao's eyes are round. The frame of the microscope can't hold his big eyes.

"Ha ha!" Zhang Fan smiled in his heart. If he could see it, this surgical technique would be too worthless.

Start with the absorbable thread, hang the thread into the tube and repair the blood vessels. This is quite exquisite.

The embolus in the blood vessel is very terrible. This thing is easy to fall off and adhere. It is very contradictory.

In fact, this thing is stained for three seconds, but it is not reliable. If it can be stained firmly, in fact, thrombotic diseases are not terrible.

It's because this thing doesn't stick firmly, so it's very terrible. This uncertain factor is like a flammable and explosive bomb. It is not timed. It does not know when it will explode.

Moreover, the location is also uncertain. After falling off, it is impossible to determine where this thing will be blocked, blocking the lower body, but not lifting.

This is also a thorny problem in modern medicine.

It is found that once the thrombolytic time window has passed, the plaque will never dissolve. The conventional treatment is to make a stent. The cardiovascular stent sounds very tall.

In fact, it is an emergency way to cure the symptoms rather than the root cause. It is to use something like an umbrella skeleton, first enter from the blood vessel, and then plug it all the way to the place of the thrombus. Bang, open the skeleton, support the blood vessel wall a little larger, and let the blood flow pass. As for the thrombus, there is no way.

The platelets in the blood vessels are like a stubborn army. Once they find that the blood vessels are a little different, they will rush to repair them, and then one or two platelets will gather.

Therefore, anticoagulant drugs are the drugs that stent patients need to take all their life. Once the drugs are stopped, minute by minute platelets can block up this place for you.

Vascular repair can completely improve the circulation. However, due to the different methods of doctors, some patients have not been discharged after operation and relapse.

This is not a surgical problem, but a doctor's problem, but this repair technique is very difficult. It can be said that it is to ride on a galloping horse and embroider flowers.

That's why you have to go to a specialist to see a doctor, a big hospital to see a doctor, and a flying knife to see a doctor. For some special diseases, it's not that the doctor doesn't work hard, but that the disease is too cunning.

After absorbing enough blood, the blue absorbable thread instantly became a black thread, and the silk thread danced rapidly in Zhang Fan's hands.

This repair is actually like stitching silk stockings and autumn pants together. Since there can be no gap between them, the mesh of silk stockings can not be blocked. Therefore, the requirements for doctors

are quite high.

Just as your grandmother can let you sew and sew your worn-out autumn pants when you wear them, but your mother can't. It's the same reason that you must take them off and sew them.

The intima of blood vessels is very weak. It can be said that when doctors sew, they breathe very carefully. With a magnification of 100 times, the intima can be torn with a little action.

Xue Xiaoqiao looked carefully at the forceps and needle holder under Zhang Fan's hands. The brain quickly copied Zhang Fan's manipulation.

"It's too difficult!" Show your skills one by one. Steady hands, like the steering wheel held by the old driver, will never deviate.

With the needle by needle repair, the blood vessels were repaired by Zhang Fan as new, and there was no abnormality at all.

Closure, the last closure, Zhang Fan sutured the incision of the blood vessel.

"Open color Doppler ultrasound!" Zhang Fan put down the surgical instruments, asked the itinerant nurse to take off the microscope and said something to the anesthesiologist.

"OK!" In an instant, the doctors and nurses in the operating room were much lighter, because the hours of operation was finally coming to an end.

After opening the color Doppler ultrasound, Xue Xiaoqiao was silent when he saw the happy flow of blood from his blood vessels.

"Do you understand?" Zhang fanque won't let him go.

"I understand!" Xue Xiaoqiao stared at the color Doppler ultrasound, but didn't look at Zhang Fan.

"Hehe, can you do it?" Zhang Fan asked with a smile.

"No!" Xue Xiaoqiao finally turned his head and looked at Zhang Fan like he was on fire.

"There's no reason for TM in this world. Undergraduates in rotten schools, who came from orthopedics, live in hospitals. They are younger than me, but TN's vascular surgery is more powerful than my mentor!"

Xue Xiaoqiao's heart is full of sour water. Is it false to follow his teacher these years?

"If you go to the capital, I guess you won't learn this technique in ten years."

"You..."

Where Xue Xiaoqiao hurt, Zhang Fan said, and Zhang Fan's liver trembled.

"Hehe, but you follow me for three years. I absolutely guarantee that you can graduate! I just think you have a good talent, otherwise..."

Our Xiao Xue, his world is in a bad moment. Is his talent good? MMP, graduation?

He wants to shout, he wants to swear. However, Zhang Fan stitched his hands like butterflies through his blood vessels, and he never forgot.

Zhang Fan accurately entered the brain and cut without any damage. His mind flowed like a slide.

"Three years! Three years!" Xue Xiaoqiao whispered. At this time, Zhang Fan didn't force him. He knew that Xue Xiaoqiao couldn't run away without an accident.

.....

After the operation, song pangzi still had some sequelae. His eyes were askew. He had to put a handkerchief under his neck because he couldn't clean up his own saliva.

However, people are sober and their thinking is normal. After hearing what his girl did, song pangzi almost didn't recite it in one breath.

.....

It's almost 11:00 p.m. in the late summer. The sun is hanging at the end of the tea river. It seems that life and death don't want to go down the mountain.

After dinner, Zhang Fan and Shao Hua were walking along the river. Shao Hua stepped on the national music point from the distant square and jumped while walking.

"When will you go to your martial uncle?"

"Soon. I'll go when I finish my paper."

"Well, come on! My man is the best." Then Shaohua touched Zhang Fan's face like a dragonfly.

"One more thing." Shao Huaqi AI can't tell.

"What's the matter?" Zhang Fan asked without knowing.

"You!" Shaohua glanced at Zhang Fan angrily and gently pulled Zhang Fan's ear.

"Eleven, we're going to have a wedding. Do you want me to send the invitations of your colleagues?"

"Ha ha! ha-ha! I send, I send! "

Zhang Fan's heart is sweet. The name of a single dog is finally going to be removed, ha ha! ha-ha!

.....

In the evening, after returning home, my parents also talked about that Zhang Fan didn't care about anything.

"Look at the lights in the new house. Shaohua asked someone to install them.

Tell me, you don't worry about anything. I'll tell you, I did it all by myself. "

Lao Tzu Zhang fan can't see it. Zhang Fan doesn't care about big things and small things.

Zhang Fan's parents supported Shaohua. Shaohua's smiling eyes were almost in line.

"Ha ha!" Zhang Fan smiled and watched the two old people quarrel.

The old couple are also quite satisfied with Shaohua, and the old man believes in a word. Parents who can teach say their own children, parents who can't teach say other people's children.

.....

"How much money do you have?" In the small study, Shaohua originally wanted to discuss buying some clothes with Zhang Fan. Zhang Fan had too few suits.

"Huh? What are you doing? " When Shaohua heard Zhang Fan ask about money, he didn't tell Zhang Fan how much money he had first. Instead, he asked what he wanted to do.

"I want to report a driving school for your father and my father and buy them a car when they get their driver's license.

In fact, they are not very old. It's more convenient to have a car. "

"Want to buy two cars? I don't have much income now. I'll buy a car for your father. If I buy it for my father, I guess he will be embarrassed. "

After thinking about it, Shaohua said.

"Silly girl, don't think so much about what life doesn't bring or death doesn't bring! I'll tell my uncle. "

"But I can't bear to say that you paid back the money with your life! I want to wait for me... "

"What are you waiting for! Silly girl, this is a man's responsibility. "

"You talk well. Come on, don't. the door hasn't been closed yet. You hate it. I'm gone..."

For Shao Hua's understanding of reason and emotion, Zhang Fan was really eaten to death. He thought he was too lucky.

.....

"Buy a car?"

"Hehe, I think Jetta is good. In those days, our factory director was Jetta. What style, darling, I didn't expect that Lao Zhang could drive Jetta one day."

"What do you charge for? You and Shaohua have cars, so we won't buy them. Save your money and send my grandson to college later. "

"That's right. Forget it. Forget it. How old am I?"

When Zhang Fan's father heard that he wanted to buy him a car, the old man was very happy. As a result, when Zhang Fan's mother said, the old man began to refuse again.

Of course, this kind of thing, Zhang Fan is to inform rather than discuss.

"You want Jetta. Think about it. I can't buy you an SUV."

"I don't want it. An official's car with a square box must be a sedan chair."

.....

Shaohua family, "uncle, I haven't played chess with you for a long time. I think my chess skill has improved a little recently."

"Hehe, come on, come on, I'll investigate." With the increase of time together, Shaohua's parents really like Zhang Fan and treat Zhang Fan as their own children.

Three sets of chess. In the first two sets, Lao Shao killed Zhang Fan. In the community, Lao Shao and his old men often quarrel for playing chess. Therefore, Lao Shao's chess skill is still no problem. Otherwise, the quarrel will not be in vain.

In the third set, Lao Shao began to discharge water. Now it's no better than before. It was to investigate

Mao's son-in-law, but now it's just fun.

"It's time for dinner. Stop playing. You play chess again and let others have a good rest. How tired it is to go to work all day. You think it's the same as you. It's the same as everyone else. "

"Auntie, I play chess with my uncle. Playing chess with my uncle increases my knowledge."

"Did you hear that? Did you hear that? I don't understand anything."

Since their parents came to tea, Zhang Fan and Shaohua have changed their food. They go to Shaohua's house today and Zhang Fan's parents' house tomorrow.

"Try it. Today I learned a dish, Xibo snack. Try it and see if my aunt has learned it well."
