

## Chapter 671

People's mentality is very elusive. Lao Wang originally wanted to pretend to force and make money. The big mouth of the blood basin has opened, the teeth have sharpened, and he has aimed at it.

As a result, as soon as I entered the door, I found Ren Li. First, Secretary Ren's three words and one word made him feel astringent and three inches shorter and blunt.

Then, the flower jumped up, and the name of the golden mean made him three inches shorter.

The successive blows completely disturbed his brain waves. If this was not a tea vegetable hospital, but any hospital in bird market, maybe Lao Wang would have swallowed it.

He has to rely on this old face to hang out in the bird market. At least he is also the chief physician of a third-class hospital.

However, he was far away from the bird market and his life circle. The successive blows did not make him converge, but made him suppress for many years, and his disappointments for many years broke out completely.

Regardless of whether it was self-interest or self-interest, he was bent on looking for something. If he hadn't gone to college by voting with workers, peasants and soldiers, he probably wouldn't be able to get his current job title.

His thinking is very rigid. When the teacher said it was water, he determined that it was water. As for whether the water would evaporate and freeze, it is beyond his scope of thinking.

Moreover, academic is not what he is good at. Gossiping is his specialty.

As a result, with blood on his head, he used his hobby to quarrel with other people's livelihood. If he didn't die, God would not allow it.

Xu Lili's chest was lifted up by him, and the impression of electric shock appeared in front of everyone. Xu Lili's father was embarrassed.

Although he also saw that the expert didn't seem to be particularly powerful, when Lao Wang spoke amazing words, he didn't care about anything. After all, his daughter's health is the most important.

If Lao Wang talks about drugs, Zhang Fan will be clumsy. There are only a few drugs in a medical department, but the use of drugs is quite exquisite. That's why some doctors in the same department are good and others are poor.

But if you talk about human structure, you'll die if you don't die.

When Lao Wang found a big mistake and his tone was as severe as eating people, Zhang Fan stood up.

Gently cover Xu Lili's clothes first.

"Although the room temperature is not low, the patient still has the right to privacy." Then he looked at Lao Wang. Lao Wang's face turned red with excitement.

"Say, what's the matter? What's the problem!" Zhang Fan asked calmly.

He knew what Lao Wang was going to say. But looking at Lao Wang's shameless posture, he decided to vent his anger on Ren Li.

"Why is the electric shock placed so low, ah! This is an illegal operation. Haven't you been trained?"

If the patient were not young, there would be something wrong with your operation.

There is such a ridiculous and absurd mistake in the third class hospital in this magnificent area. God, you are careless about human life!

Quickly, transfer to another hospital. I can't stay. Can this place still be called a hospital? This is a slaughterhouse! "

The flower's basic knowledge is quite solid, but she has partial vessels in the green bird. Therefore, although she feels that Zhang Fan will not make such a low-level mistake as Lao Wang said, she is still a little nervous.

People, it's false to help manage or not. Few people can do so.

Xu Lili's father was also nervous. He looked at his daughter and gently came forward to shake her hand. Although he didn't understand medicine, he also wanted to listen. If the hospital couldn't make a reasonable explanation, he wouldn't give up.

In Lao Wang's idea, the precordial area is the lower edge of the left second rib. He felt that Zhang Fan and his colleagues should have lowered their position in order to avoid Xu Lili's mammary gland (a).

Therefore, he was a bone in the egg.

Anyway, he doesn't mix in tea and vegetable. Considering Ren Li's name, he knows that he can't mix money in this place, so he can't care about harming others or benefiting himself.

"Hehe! Are you the doctor in your heart? "

Without waiting for Lao Wang to open his mouth, Zhang Fan continued: "for such a long time, don't you find that the patient is a thin body?

You have a stethoscope. What do you hear? Is it just to make up for the number?

The patient's heart deviates to the lower rib. Did you find it? What are the principles of ACD?

Brother comrade, you have worked in the hospital for many years. You are about to retire. Don't be dogmatic, don't be dogmatic.

We are facing people, living lives, not rubber people.

People are different. Didn't your teacher say three checks and four tests.

Look, touch and listen. Have you passed? Whether the intercardium is between the second rib or not, you can't see what else to say.

God, you're a disgrace to the provincial government. The provincial Chen hospital has a good relationship with me. I'll call to find out if you are a provincial doctor. "

The other party is shameless and Ren Li's enemy. When Zhang Fan came out to rescue the sick, Ren Li helped Zhang Fan with her heart and courage.

And with Zhang Fan's understanding of the idea, this time, his tusks were exposed.

The language of a gun hit Lao Wang in the face. Lao Wang's face was red and green. At least he was also a chief doctor. Let a young doctor clean up like a grandson.

However, he went to trouble to check his body. He didn't check his body carefully“ You, you, you. " Lao Wang pointed his finger at Zhang Fan, just like a patient with Parkinson's disease.

"What's the matter? Am I wrong? Look at your behavior, lift up the patient's clothes and ignore it.

People pay you for consultation, not nonsense. A doctor doesn't check his body carefully at the first time, but talks nonsense. Aren't you ashamed? "

"You, you, you." Lao Wang felt that his mouth was extremely dry, and his tongue began to knot and

stick.

"Who are you?" The tongues stuck together finally jumped out of a complete sentence. He felt that he was a chief physician. No matter how highly educated the other party was, he would not be a chief physician!

"Hehe, this is our dean Zhang. He is often asked to go to the bird market for surgery. "

Old Huang is wilting! This sentence completely stunned Lao Wang.

"Er!" Lao Wang's red and blue face turned white when he brushed it.

Zhang Fan, the tea vegetable, knows how to go. He knows too well, and the hospital surgery has blown Zhang Fan into a God.

Although he is a doctor of internal medicine, he is born to gossip. He has heard of it. Most importantly, Zhang Fanzhen has a good relationship with their Dean.

Wax, really, wax.

Lao Wang was stripped of his clothes and hung naked in the air. He had a dead heart.

Lao Chang has more or less skills, and if he really makes the provincial president think about it, will he still live.

How many toes were high when he came, and how disheartened he was when he left. He wanted to put his head in his crotch.

What a shame.

"Zhang Yuan, this misunderstanding, misunderstanding, my fault, my fault, I'm a little worried. Your adult doesn't remember villains. Really, I'll go right away, later..."

In fact, if he had a serious physical examination and looked at the medical records regularly, even if he couldn't say one, two or three, no one would be difficult for him.

However, he was really dazzled by Secretary Ren and the money in his pocket. There is a saying that if he made a mistake, he should be ready to be beaten. He just wanted to make money, but he didn't expect to be beaten.

So a crackling meal broke Lao Wang's heart.

It's not over yet. Xu Lili's father understood when he looked and listened. The doctor of tea vegetarians is very good. Is this a mallet he invited, or did he spend 2000 oceans to invite a mallet.

Can you do this? No, my daughter was already angry when she went out of this business. Now there is such a goods. He specializes in education, and no one can step on it.

Yes, he asked his friends to hire experts, but he didn't pay. He didn't only spend money, but also help others get professional titles.

There is as much anger as it costs.

People are like this, broken drums, ten thousand people beat. Lao Wang pinched his head and made a phantom to leave the place.

He thought it over. When he got back, he packed up his things and went back to the bird market immediately. He couldn't stop for a moment. He would die. This place will never come again.

As a result, Xu Lili's father spoke before he left the ICU.

"Stop! Are you leaving?" Xu Lili's father's angry hair stood up.

"Where, where!" Lao Wang doesn't know what to say. Those with low heads don't even have the courage to look at people.

A Zhang Fan scared him to death. He dared not say anything again. Now he is deeply afraid that Zhang Fan will not let him go.

"Put the money down before you go. I invite experts, not bricks."

Lao Wang's tears are coming out.

It's too bullying, but look at Zhang Fan and think about the relationship between Zhang Fan and the president of his own hospital.

Lao Wang didn't even dare to resist. He held the money in his hands

"Zhang Yuan, I'm really sorry. I really have no eyes. For the sake of my daughter, you must not take it to heart."

Lao Wang listened to the humble tone of his family to Zhang Fan. He wanted to spit, but he looked at the camera. The spit was almost out of his lips, and he swallowed it forcibly.

Lao Wang went out of the hospital and looked back at the plaque hanging at the door: Tea vegetable City People's hospital. There was a voice in his heart, "tea vegetable TM is no good person!"

**Chapter 672**

"Hehe, Secretary Ren, you don't know. Hospital Zhang is angry in ICU.

The director of the bird market was scared half to death by Zhang Yuan. When he left, I think he was about to cry. "

"President Ouyang, Zhang Yuan..."

There is no shortage of intentional people everywhere, especially in front of the leaders. Ouyang, who originally wanted to go to the Department to have a look, turned her eyes and went home instead of going to the Department!

It seems that after the TV station's yellow handkerchief ended, it was replaced by sorry. I love you. It is said that the old lady regarded it as a tearful person.

It was not only Ouyang who cried, but also Huang Xiaohu's father. The treatment fees and compensation fees in the ICU were like cutting meat. His liver trembled. Wang Xiaohu, who had originally become a pig's head, was swollen again.

.....

Because they were about to get married, Shaohua and Zhang Fan invited Shaohua's Bridesmaid group for a banquet at the weekend. Although it was the bridesmaid group, not all the bridesmaids were entertained, but they were all female friends of Shaohua or Zhang Fan.

Jia SuYue, Wang Yanan, Tang Jingjing, Lu Renjia and Zhu Bing, as well as Zhang Fan's elder martial sister, are still old people, but everyone's mentality is also slowly changing.

During the dinner, the ladies chattered. Zhang Fan and Zhu Bing were not involved. They sat together talking and chatting.

"Huazi is getting married. Hey, I've been a bridesmaid for three times!" Even Wang Yanan, who is usually careless, expressed emotion.

In fact, she is a little better. There are too many kinds of discomfort in her heart. Instead, it is Jia SuYue. The girl's heart is tangled.

Although the girls were chatting, Jia SuYue occasionally glanced at Zhang Fan and looked at Zhang Fan dressed up by Shaohua. She was very strange in her heart.

Since Shaohua, Zhang Fan has long been separated from a sports suit and a pair of sports shoes, giving people a feeling of earthy. Moreover, with the refreshing status, he seems to have a momentum.

"If I had..., ah!"

With the deepening understanding of society, girls understand more and more that men can't just look at their faces, but also look at their heads, whether they have wisdom in them and whether they can support a home on their shoulders.

After looking at Zhang Fan and Shaohua, Jia SuYue finally felt that his eyes were worse than Shaohua.

"The more, don't drink. If you drink again, you'll be drunk!" Unconsciously, Jia SuYue even half drunk himself.

His eyes began to blur "It's all right, huazi, you must be happy!

Zhang Fan, if you fail huazi in the future, I will not spare you! "

According to Zhang Fan's current status, the girls are very restrained. They didn't let Zhang Fan take any oath and promise to turn in the finance after marriage.

But at last, after dinner and the banquet, Jia SuYue lay on the table alone holding a wine glass.

"This is drunk!" Zhang Fan didn't pay attention to her. He would rather quarrel with a sensible person than say a word more to a drunk. Zhang Fan knew that the more he paid attention to her, the more endless it was.

"I'm not drunk. You haven't promised me. Can I do it!" Originally, her eyes began to blur. When she stared at Zhang Fan, she seemed to shine instead.

"Good! OK! OK, I promise you! " Zhang Fan is helpless. He doesn't know why. He thinks the other party's eyes can burn.

"Hehe! Youth, love! " After hearing Zhang Fan's answer, the girl stopped pestering, as if she had any emotion. She opened her arms as if she wanted to embrace the future.

"Drunk, drunk, all began to talk nonsense. Wang Yanan, are you drunk too? Come and help." Zhang Fan's scalp is numb.

"Hehe! You'll bully me. This is not a hospital. " Although he said so, he came forward and held Jia SuYue with Shaohua.

"Hua Zi, I envy you!" In the back of the car, Jia SuYue didn't know when he had fallen asleep. Wang Yanan whispered to Shaohua quietly, and Zhang Fan drove the car.

"Hehe, you will also find your ideal husband."

"Ha ha!" I don't know what happened. Two people appeared in Wang Yanan's mind

The bridesmaid group and the best man group are all booked. Zhang Fan feels that he should prepare almost. He waits until the wedding day, but Shaohua doesn't think so.

What style of clothes, the fireworks of the day, the girl chose and chose, thought and thought.

"Little stone, come and have a look. Do you think this diamond ring is good?"

"Good!"

"What about this one?"

"Yes!"

"You..." Shao Hua stared. When he was about to get angry, Zhang Fan came back.

"Actually, I'll tell you, these things are all fooling people. The steel plates in the orthopedics department of our hospital are all this kind of platinum, big and big, with little money.

And this diamond is nothing unusual. A better drill bit carries much more than this one.

I think it's better to buy gold. "

Zhang Fan accompanied Shaohua to buy jewelry. In ordinary life, there is no mood and happiness in TV. Zhang Fan is estimated to be unable to do any mood.

"Do you think I look good with a big thick chain around my neck, a thick yellow ring and a big gold tooth? How can you look like Uncle Uighur.

Don't you think I look bad with a thin platinum necklace and a diamond ring to show my marriage? "

Shaohua is not interested in Zhang Fan's, so she is a little angry. She pouts. If Zhang Fan still does this, she must give him a little hand to tear the meat.

"Well, that's what I said! It seems that my vision still needs to be improved. "

The person who knows current affairs is Junjie. After Zhang Fan felt that Shaohua's little hand had been hung on the soft meat inside his arm, his chaotic brain immediately woke up.

Zhang Fan is busy with his marriage and his thesis. It's easy to write a thesis, but it's difficult to write a thesis that satisfies master and uncle.

"Elder martial brother, do you think I'll write an article about gastrointestinal tract?"

"The teacher is a famous hepatobiliary expert in China. Do you think it is appropriate for you to write a gastrointestinal?"

I think you'd better think about it. After you determine the subject, you don't have to worry about the experimental data. I'll collect it for you. "

"Elder martial brother, you are so kind!" Zhang Fan with the phone wants to go through and kiss Lu Ning.

"Hehe, I know you're busy and you're going to get married, but you should pay attention to the paper."

"Well, I know the weight."

.....

The tea element weather in late summer is changeable. The cold wind in the morning makes people feel that they should wear long sleeves, but at noon, it's hot and dry and people can't wait to take off.

The cold air on the snow mountains and the heat of the sun in summer fight over tea, especially near the mountains, with much rainfall.

In fact, the tea vegetable mountain area is a bit like the Yalu zangpu River Basin on TV. There is a lot of rain at this season of the year.

People living in cities don't realize the trouble brought by this rainfall. It's a big deal to take an umbrella when they go out.

In the grassland in the mountain area, the experience is different. The herdsmen are competing with God. The lawn mower roars and seizes the time to feed the livestock for the winter.

The more abundant the water source is, the more lush the forage grows. But this year's weather is

different from the past. The birthplace of the upper source of the river has super heavy rainfall, and the down-to-earth herdsmen still seize the time to beat grain and grass in the valley.

Originally, scattered nomadic herdsmen gathered in the river valley. At this time, only the water and grass in the river valley were the most abundant.

Herds ready to transfer, tourists attracted by the name, a large number of herdsmen gathered together, and businessmen who came to collect livestock.

For a time, the valley where no one was seen in the past was covered with colorful tents, and the quiet valley became a noisy bazaar.

Frontier people can play and love to play. Hiking and cross-country, which are not yet popular in the mainland, have formed a small trend in the frontier early.

For example, the cross-country club, in fact, Alashan is not the earliest. There are a group of people who play cross-country very early.

People living in big cities, no matter how much their monthly salary, feel like they are living in a tight life. People can't breathe under the pressure of housing loans, car loans, career, children's education and the medical treatment of the elderly.

The frontier is different, especially some Uighur boys and Kazakh young people. When they earn 2000 a month, they dare to borrow money to buy a car. This car is not for the convenience of work, nor for running black cars to improve their income, but purely for fun.

Especially in the river valley, the lambs in those years were full of autumn fat. Really, they ate enough Cordyceps sinensis and drank enough farmer spring. The meat quality was quite good.

Big cities, or the so-called roast whole sheep in several scenic spots, are actually fooling people.

The most exquisite roasted whole sheep in the tea Valley is the little ram that went to power that year. Remove the head, hoof, heart and liver, which is up to 15 or 6 kilograms.

The meat is tender and really fat but not greasy. The lines between fat and thin are as clear as marble and thousand layer cake.

Before roasting, control the blood and water, then extract the juice from a kind of vanilla unique to the river valley, coat the inside and outside of the mutton, and then brush a layer of native honey on the grassland. It can make people salivate.

Moreover, the fuel for roasting sheep is also very particular. We must use sun dried fruit trees. There is no open fire, so we can slowly mature by smoke-free charcoal and dark fire.

When the roast sheep is ripe, take a handful of wild leeks pickled on the grassland, a mouthful of mutton, a mouthful of vegetables, which flavor is really unforgettable.

When a mouthful of mutton goes down, the skin is crispy first, with a slight smell of fruit and honey. When the crispness is broken, the roasted slightly charred fat suddenly bursts into a unique meat aroma like crispness.

Then eat a little salty wild leek. The protein is mixed with the unique vitamins in wild vegetables. Darling, your tongue can swallow it. It's delicious and aphrodisiac!

Thousands of people gathered in the river valley. Standing high, the tents were like flowers, blooming on the grassland.

Especially at night, bonfires, spirits and dancing are really a happiness far away from the city.

If there is a light rain, the air is filled with the smell of oxygen rich ions and grass. Chasing and playing on the light rain grassland, even adults will like this game. It's really, too happy and happy.

Therefore, at this time of year, the river valley is quite lively.

When people forget themselves and linger, the dark clouds in the upper reaches of the sky gathered together, and the rainstorm came unexpectedly.

### **Chapter 673**

What is the geographical location of tea element? If you think about it carefully, the terrain of tea element is particularly in line with one word: introduction.

The tea plant is hidden between the two shafts. In the direction of China, it is backed by Tianshan Mountain, while facing Stan, it is an endless tea plant plain.

In the early years, it was still a place in China. Earlier, this generation was rich in Tianma, which made Emperor Wu of the Han Dynasty drool. He also specially sent the general of the second division to lead the horse.

In the Qing Dynasty, the three generations of Kang Zong's grandparents and grandsons and the Mongolian Khan geldan dog here had their brains out. Finally, it was not until Qianlong that they completely calmed down here, and then hung a piece of Lao Qian's Dingjiang poem.

Later, the tea plain was divided up by Lao maozi, and the fertile field supported the thousands of miles of Gobi next door. It's really discontent!

This place is really a throat. Of course, it doesn't talk about its strategic position.

Let's talk about this place, which is backed by the Tianshan Mountains and blocks the warm and humid air flow in the Indian Ocean, resulting in the thousands of miles of Gobi on the side of China and abundant water and grass on the side of Stan.

Walking in the direction of tea from China to Tianshan, it is a feeling of fairyland on earth.

The car shuttles and hovers on the mountains, white clouds and forests. It directly feels like walking in the kingdom of fairy tales.

The head is green, white clouds surround the car, and at the foot are turbulent streams and countless trees. As long as you are not afraid of heights, it will definitely make you feel like a fairyland.

Because of this terrain, there are many rivers in the tea plant, and because these rivers pass through many countries, there are many troubles such as building dams, so there are not many large power stations here, but some small power stations.

Countless rivers have also created countless river valleys, and countless small river valleys have merged into a super large tea valley.

Hydropower stations have many functions, including irrigation, power generation and flood control. However, large power stations sometimes can't adjust some floods, not to mention such small power stations.

.....

On the valley grassland at the end of summer, at the bonfire party, almost all of them became drunkards and indulged in the grassland wantonly.

After all, few people can afford to roast sheep. Most people choose roast prairie rabbit and GADA chicken.

To tell you the truth, prairie sheep are delicious and fat is suitable, but this wild prairie rabbit can't drink GADA chicken.

This wild thing is almost full of tendons and bad teeth. It really can't be subdued, but it's better than good quality and low price. One shot of sand gun.

No matter what meat you eat or wine you drink, you should ask for a fumigation, and heaven should be used as a bed.

This is why later, some people who like serious cross-country gradually withdrew from this circle.

Some awl net red faces who live at home and usually take a lot of trouble, but fall in love with the reason here. Because of this environment, they also attract a lot of rich and wayward local tyrants who pursue stimulation.

Herdsmen often choose tents far away from the river valley, such as the hillside near the mountain forest, but outsiders don't understand. Anyway, where there are few people and where to set them.

As a result, according to the news, tea has encountered the worst heavy rain in a century.

The rain in late summer and early autumn, not to mention once in a century, is a little bigger, and it is very fierce.

It's just like someone pouring in a basin in the sky. The pedestrian umbrella can't lift up in the pouring rain.

To tell the truth, doctors change clothes all the year round. They wear shorts in summer, autumn pants in autumn, woolen pants in winter and mixed clothes in spring. Everything can happen, and it is very regular.

In spring, there are often some allergies, respiratory diseases, diarrhea and trauma in summer, diarrhea, allergy and respiratory tract in autumn, frostbite, trauma and respiratory tract in winter.

Moreover, as long as the weather changes a little, accidents will continue. The weather suddenly becomes cold. The internal medicine is directly like dumplings. There are extra beds everywhere.

From autumn to winter, like harvesting wheat, old people who can't bear it die one stubble after another.

And the weather changes, in the eyes of ordinary people, there is a slight discomfort, but the doctors are not the same.

Traffic accidents and natural and man-made disasters caused by climate change are really, very, very many. A stable society has made many people lose some vigilance.

If the country can speak, it will definitely jump out and say that I don't carry this pot.

As the old saying goes, rats were killed in the heat. In the early years, this season was not allowed to travel to visit relatives and friends.

But now who knows that~

"Zhang Fan, take an umbrella. It's raining hard outside." In the morning, the heavy rain stopped Zhang Fan from going out for exercise. Shaohua rubbed his eyes and got up.

"It's raining heavily this year. You see, the ground has become a river."

"Well, why don't you wait for the rain to drop before you go to work? It's so dark that it won't dawn."

"No, the hospital is definitely busy in this weather. I'm leaving. Don't go out today." After Zhang Fan explained, he went downstairs.

On the way to the hospital, there are many car accidents. The old drivers in the South should have an experience that the car wipers can't brush at all when there is a typhoon and a rainstorm.

Today, the rain of tea has also let the old drivers in the northwest experience what is called hanging a water curtain on the windshield.

Along the way, accidents continued. Zhang Fan almost hung up his umbrella to the car and came to the hospital carefully all the way.

The emergency hall has become a pot of porridge, with painful groans one after another. The hospital is like this. The first snow every year and the rain every year are a little heavier, so the hospital emergency center can't take care of it.

When everyone was still happily watching the snow, rain and sending a circle of friends, countless people fell and bruised in the hospital.

Because this is a point that brings together all kinds of accidents and injuries.

Ouyang also sent the driver to the hospital early. "Zhang Fan, the weather today is particularly strange. I think there is something wrong. Let the doctors and nurses on vacation come back. If there are special circumstances, you must explain the reasons in person. "

"OK, Dean, I'll just be in the emergency center. Why don't you go and have a rest." Zhang Fan has not understood Ouyang's meaning. After all, Ouyang has walked more bridges than Zhang Fan.

"It's all right. You're busy. I'll have a look here." Ouyang's phone is always in her hand. It's not the hospital that the old lady is worried about. To tell the truth, it doesn't matter whether she is here or not.

There are Zhang Fan in surgery and Ren Li in internal medicine. How can Ouyang be worried? What really worries the old lady is outside the hospital.

At this time, 120 came "Come on, give way, give way." Three 120 cars arrived at the same time, the door opened, and three pupils in school uniforms came down on a stretcher.

Although the nurse almost threw herself on the pupils, she could not stop the pouring rain.

The rain was too heavy, and the children's faces were washed clean by the rain. Although the tears could not be seen, the painful faces were still very clear.

It turned out that there was water on the ground because of the heavy rain. I don't know which wicked guy lifted the manhole cover.

As a result, the three primary school students did not pay attention and fell into the sewer like billiards.

The sewer is full of iron pipes. There are three little dolls. The first one has a broken head, the second one has a sprained foot, and the third one has a broken arm.

If the passers-by hadn't found it early, the consequences of such a heavy rain would be unimaginable.

### **Chapter 673**

Traffic accidents and natural and man-made disasters caused by climate change are really, very, very many. A stable society has made many people lose some vigilance.

If the country can speak, it will definitely jump out and say that I don't carry this pot.

As the old saying goes, rats were killed in the heat. In the early years, this season was not allowed to travel to visit relatives and friends.

But now who knows that~

"Zhang Fan, take an umbrella. It's raining hard outside." In the morning, the heavy rain stopped Zhang Fan from going out for exercise. Shaohua rubbed his eyes and got up.

"It's raining heavily this year. You see, the ground has become a river."

"Well, why don't you wait for the rain to drop before you go to work? It's so dark that it won't dawn."

"No, the hospital is definitely busy in this weather. I'm leaving. Don't go out today." After Zhang Fan explained, he went downstairs.

On the way to the hospital, there are many car accidents. The old drivers in the South should have an experience that the car wipers can't brush at all when there is a typhoon and a rainstorm.

Today, the rain of tea has also let the old drivers in the northwest experience what is called hanging a water curtain on the windshield.

Along the way, accidents continued. Zhang Fan almost hung up his umbrella to the car and came to the hospital carefully all the way.

The emergency hall has become a pot of porridge, with painful groans one after another. The hospital is like this. The first snow every year and the rain every year are a little heavier, so the hospital emergency center can't take care of it.

When everyone was still happily watching the snow, rain and sending a circle of friends, countless people fell and bruised in the hospital.

Because this is a point that brings together all kinds of accidents and injuries.

Ouyang also sent the driver to the hospital early. "Zhang Fan, the weather today is particularly strange. I think there is something wrong. Let the doctors and nurses on vacation come back. If there are special circumstances, you must explain the reasons in person. "

"OK, Dean, I'll just be in the emergency center. Why don't you go and have a rest." Zhang Fan has not understood Ouyang's meaning. After all, Ouyang has walked more bridges than Zhang Fan.

"It's all right. You're busy. I'll have a look here." Ouyang's phone is always in her hand. It's not the hospital that the old lady is worried about. To tell the truth, it doesn't matter whether she is here or not.

There are Zhang Fan in surgery and Ren Li in internal medicine. How can Ouyang be worried? What really worries the old lady is outside the hospital.

At this time, 120 came "Come on, give way, give way." Three 120 cars arrived at the same time, the door opened, and three pupils in school uniforms came down on a stretcher.

Although the nurse almost threw herself on the pupils, she could not stop the pouring rain.

The rain was too heavy, and the children's faces were washed clean by the rain. Although the tears could not be seen, the painful faces were still very clear.

It turned out that there was water on the ground because of the heavy rain. I don't know which wicked guy lifted the manhole cover.

As a result, the three primary school students did not pay attention and fell into the sewer like billiards.

The sewer is full of iron pipes. There are three little dolls. The first one has a broken head, the second one has a sprained foot, and the third one has a broken arm.

If the passers-by hadn't found it early, the consequences of such a heavy rain would be unimaginable.

#### **Chapter 674**

There are too many accidents in heavy rain. Especially the car accidents, one after another, but fortunately, the speed is not high on rainy days, and the car accidents are not serious.

In the hall of the emergency center, there was a lot of confusion: "my fog lights are almost hitting the sky, don't you see?"

"You just hit my ass, you know, I just bought the car yesterday."

"Keep your voice down!" The little nurse's face is red and loudly maintains order. The relationship between the hospital and patients is very strange. When the condition is not serious, it is often the time when the patients are most disobedient.

In the chaos, Ouyang's phone rang, and the red PHS flashed the green light, just like the wild animals in the wilderness at night.

"President Ouyang?"

"I'm ouyanghong!"

There was no greeting on the phone, only confirmation.

"I am xxx, and now I command:

On the premise of ensuring the normal operation of the hospital, the Municipal People's hospital will send as many personnel as possible to form a medical rescue team to ramachak township.

President Ouyang, in the early morning of ramasut Township, a major flood occurred, and the personnel were seriously injured... "

After hanging up, Ouyang ignored the messy scene in the emergency center and directly asked the director of the medical department to pull Zhang Fan to the conference room.

"La mosut was washed by the flood!" The director of the medical office took Zhang Fan and explained to Zhang Fan as he walked. He is the shadow of Ouyang. As long as Ouyang is in the hospital, he will definitely appear next to Ouyang.

"Rasut? Isn't that place full of grassland pastures? How many people can there be? " Zhang Fan asked in wonder.

"Hey, there are not many people in any place, but there was bazaar yesterday. Where are thousands of people? Most of them are outsiders!" The director of the medical office lowered his head and explained to Zhang Fan in a low voice.

"What bazaar? So many people. "

The director of the medical department hasn't started to explain yet. They have arrived in the conference room. In this case, others don't know what will happen. First of all, Ouyang's adrenaline has begun to soar.

Like a guard, the old lady stood in front of the meeting room without entering the room, sitting or talking. She stood at the door and looked at everyone's footsteps. If anyone was slow and not in a hurry, she would definitely be killed by the old lady with her eyes.

"Comrades, the time to test us has come. Countless affected people in ramasut Township look forward to us again.

Now, I order: the rescue team of the Municipal People's hospital is established. The team leader ouyanghong, the deputy team leader Zhang Fan, the team leader of the first team and the director of the first Department of orthopedics

Now let's give you five minutes to report the list of each team to me.

I would like to emphasize once again that the disaster situation is the horn, and the superior's instructions are now the charge. Those who are innocent and leave their posts and refuse to participate in rescue and disaster relief without special reasons will be severely punished.

Team leaders, select the personnel list as soon as possible. "

When Ouyang organized the meeting, the armed police, the people's Liberation Army and the militia in the tea vegetable area were dispatched. Several military vehicles came to the hospital, which were vehicles to pull drugs.

Rain, continuous pouring rain, kept falling.

Ramasut Township, an area where grassland, forest, desert and river valley intersect.

It is also the place where many rivers and valleys meet. In the past, herdsmen would rush their herds here every autumn and exchange with each other, slowly forming a gathering.

Later, some cross-country hikers also like it here. The terrain is complex and changeable, which is exactly where they need. The natural landform here can meet their challenge to themselves and nature.

In the early days, the people who came here were very professional people, almost all of them were refitted.

But when this activity becomes to show off wealth or mixed with other purposes, professional talk becomes a joke.

Land Rover, horse herders and galloping cars are getting more and more high-end, and they play more and more off-road. Some early professionals are slowly excluded.

Millions of cars, foreign wine, bonfire banquets, forests and grasslands, and girls. If you take a few more, darling, this is heaven.

After the professionals were excluded from the activities, without the guidance of professionals, the original normal movement changed its flavor. The tents on a beach are where it is convenient to be stationed.

Sometimes, I really don't understand. Almost all the herdsmen's tents are on the hillside, and none of them put their tents on the beach. These people, known as cross-country and hiking experts, can't see the difference.

.....

The upstream flood washed down like a beast. Many people feel that they are good at water. They once played with fish in big rivers in Boao.

But floods are different.

First of all, there are quite a lot of silt in the flood. When it is spread to the face, it can only be directly used as a mud mask, so long as it is careless, it can be suffocated by the sediment.

Moreover, the most terrible thing is that the flood is mixed with all kinds of sundries, such as huge stones and wooden piles. With the existence of these things, not to mention people, even fish may not be able to swim in the flood.

When the flood peak appeared, the herdsmen standing on the top of the mountain shouted loudly to make the people in the beach run for their lives.

But these people, where can they hear that their bodies intersect in expensive sleeping bags

The over excited body is already exhausted. Where can I hear the alarm in the distance? Even if they shout in their ears at this time, it may not have any effect.

The flood peak rushed past and destroyed the withered and decadent. The tent was like dead leaves. It was torn apart, screaming, help

Tea Su said, "Dean, don't go. It's hard to go all the way. Moreover, it is estimated that there are many disasters in the city due to such heavy rain. You can take the command in the middle. "

Ouyang hurried to get on the bus, but Zhang Fan stopped him. People are still selfish.

Even if it clears up, Ouyang can't resist the pouring rain, so Zhang Fan doesn't want Ouyang to go.

"I won't go, will you?" Ouyang looks at Zhang Fan.

"OK! If there's anything I can't solve, I'll call you and report. "

Zhang Fan pulled the door and wouldn't let Ouyang get on the bus. Seeing that Ouyang was still hesitating, Zhang Fan said, "Secretary Ren and the head of the high court have all gone. The hospital depends on you. You can take the command. Look at the emergency hall. What's the mess."

Ouyang looked back at the emergency hall, then looked at Zhang Fan, "OK! I won't go. Remember, if there's anything uncertain, we'll call a meeting to decide. Don't make decisions without authorization. Do you understand? "

Ouyang doesn't know Zhang Fan's mind.

"OK, I see. Dean, let's go. "

"Be sure to pay attention to safety!" The old lady gave a rare instruction in very maternal words.

"OK!"

.....

The motorcade started and the traffic police opened the way, but even if the traffic police opened the way, the motorcade couldn't drive fast. It rained too much.

In Zhang Fan's car, Ren Li and Lao Gao sit. Their car is not an SUV. Zhang Fan didn't let them drive by themselves, so they got on Zhang Fan's car.

"Tell me how big the flood is in such a heavy rain." Lao Gao looked at the rain on the window.

"Director, has tea vegetable ever had such a heavy rain before?" Although Lao Gao is now the vice president and Zhang Fan is the assistant to the president, Zhang Fan generally calls Lao Gao the director.

"When I was a child, I met once, which was similar to this rain. At that time, I was in the countryside, and there were pigs, sheep, even cattle and horses in the upper reaches, floating on a beach.

And when you see the animals in the flood, you can really see prayer and despair in their eyes. "

"Ah! It is said that there was a bazaar this time, and I don't know how many people..." Ren Li, sitting in the back row, listened to Lao Gao and said.

"Yes, do your best to see fate!" When Zhang Fan heard Ren Li's words, his heart was also strange. He was not sad, but he was uncomfortable.

Out of the city, into the mountains, about to enter the grassland Valley, the team stopped.

The head of the armed police detachment braved the rain and ran to Zhang Fan's car: "Zhang Yuan, the road ahead was broken, and the car can't pass."

After several times of cooperation, the team leader has been very familiar with Zhang Fan. Moreover, Zhang Fan and his car are too famous in chasu. Kuluze with a red brand is also the only one in chasu.

"What should I do?" In this case, where does Zhang Fan have an idea.

"Change the car and transfer all the personnel on the ambulance to the truck."

"Good!" With this, Zhang Fan got off and Lao Gao got off. Ren Li wanted to get off, but Zhang Fan didn't let him down.

Doctors and nurses, braved the rain, transferred from 120 to the truck.

"Does my car need to be transferred?" After arranging 120 medical staff, Zhang Fan asked the team leader again.

"How's your skill?" The detachment leader wiped the rain on his face and squinted at Zhang Fan. He couldn't do without squinting. The rain was too heavy.

"OK!" Zhang Fan spoke loudly. The rain was too heavy and his voice was lower. He couldn't hear it face to face.

"Then go. You follow my car." At this time, there is no time to waste.

The leader's car was a cheetah. He took the lead, followed by Zhang Fan, and drove directly into the water.

In the carriage, not only Ren Li but also Lao Gao closed their eyes. They were not soldiers. They were almost in the hospital on weekdays. Where had they encountered such a thing.

The flood in front of the car makes people dizzy. To tell you the truth, I can't tell whether the car is good or not on weekdays.

On the highway, you can run 120 and I can run 120. Your one million cars and my one hundred thousand cars are almost the same.

But at this time, the difference came out. When crossing the river, the cheetah of the team leader swayed like drunk. The skidding wheels almost didn't climb up, and the horsepower was still not enough.

Zhang fanku Luze is different. The 8-cylinder engine is reflected incisively and vividly at this time.

Zhang Fan's driving skills are good. In fact, it's good to park on the side of the garage. As for cross-country, where has he ever been? Moreover, he is reluctant to spoil his car.

When he stepped on the accelerator, cooluze jumped onto the road like a calf.

Zhang Fan holds the hand of the steering wheel and sweats in the palm of his hand. He says he is not afraid. It is a lie. The rapid flood makes people dizzy. If a careless flood overturns the car, he can't think of the consequences.

The number of motorcade crossing the river has become less. There are only Zhang Fan and the team leader's cars, and other cars can't cross.

The cheetah who led the way directly sounded the siren and the whole team started double flashing.

It's hard and tired to cry across the grass. When the motorcade was about to reach ramasut, the rain stopped.

But Zhang Fan was shocked by the scene in front of him.

On both sides of the valley stood hundreds of people, all clay figurines.

When the flood peak rushed past, the people whose tents were higher were lucky to hide.

They started the rescue in the herdsmen's organization, but the flood was too big. How much can they rescue.

When military vehicles and police vehicles appeared, these clay figurines, like children seeing their mothers and parents, cried out from the sky.

## **Chapter 675**

Rescue and disaster relief sounds very tall and glorious, and many people are also very enthusiastic. They often spontaneously participate in the rescue of some natural and man-made disasters.

In fact, rescue and disaster relief requires very professional skills, such as earthquake, fire, tea vegetarian doctors and nurses. In a group of three, one doctor is equipped with two nurses. In an instant, it is like a dividing line to separate the crying people.

Most of the survivors suffered from trauma. They twisted their feet and broke their skin in panic. Although it was terrible, there was no big problem.

With the appeasement of the medical team, their mood gradually stabilized. After the excitement period, these people had no words, were dull, and didn't know what to think.

"Zhang Yuan, please go downstream with me. The village officer has gone to the downstream catchment Bay. Estimate... "

The leader of the armed police detachment looked at the order arranged by Zhang Fan, so he ordered a class of personnel to go downstream with Zhang Fan.

The sudden flood caught the people in bazaar by surprise. At this time, the organization was reflected.

Although there are not many people in a township, the party members and cadres called on the young herdsmen to ride their horses in advance and go downstream with a harness pole.

Along the flood, not long after driving, I met several herdsmen, "traffic, how many people are here!" In the language of ethnic minorities, there are no words such as fire alarm and traffic police, so they collectively call them "traffic!"

"How's it going?" Zhang Fan got out of the car for the first time and looked at the people lying by the river covered with blankets. Although he already knew the results, Zhang Fan couldn't help asking.

Zhang Fan really hopes that what he thinks and sees is false, but reality does not change with people's will.

"I'm out of gas!" The leading herdsman shook his head.

Zhang Fan walked up to him and looked at him. To tell the truth, it was really a little miserable.

When the blanket was lifted, the people soaked in the water were like a blown balloon with a bulging stomach. They were as pregnant as June, with a big round face.

With pale facial skin, clenched teeth and ferocious faces, we can think of how scared they were at that time.

Especially for a young girl, her body is not stained, her long hair sticky with rain is close to her face, and the congestion after the stone hits her face hangs on her face, making her originally pale face appear blue and purple.

It is estimated that few people have seen this situation. You can imagine a drowned cat with bared teeth, tongue and red eyes.

Or just like a horror film, this suffocation makes people leave the most painful side on her face in an instant.

The young girl, whose skin was as white as bone china tableware, is now as loose and bubbly as a pig bladder. Her whole body is like *Hericium erinaceus*. She looks like fluff.

Moreover, there are a lot of blue and purple on the face, just like poisoning.

"She, what happened to her face." As soon as the leader of the armed police detachment saw the girl's face, he asked Zhang Fan squatting next to the body.

"She filled her lungs with water, struggled violently, and then when she was about to suffocate, she hit her head with a stone, and her face broke like a blasting point.

Under the high pressure and violent struggle of the lungs, a large amount of blood in her body poured into the broken part of her face. The long-term asphyxia led to the sudden stop of her heart, and then the blood gathered and stopped on her face. Therefore, this situation will occur. "

Zhang Fan gently stroked the girl's eyes that opened wide with reluctance or fear. The muddy water also covered the eyes like a light mist.

"Hey, go all the way!" Zhang Fan said softly in his heart.

"Traffic, doctor, downstream, there are light men, women, several." The herdsman seemed a little embarrassed.

"Are there any survivors?"

"No, I've been out of gas for hours!"

Just as Zhang Fan was about to get on the bus and set off downstream, his phone rang.

"In Zhang hospital, several patients had nausea, vomiting and fiddling." Ren Li's voice is very small, but Zhang fan can hear tension from her voice.

A senior director of Cardiology, not to mention how many people were saved, it is estimated that the number of people sent away in her hand is no less than several hundred.

But now, there was a trace of trembling in the director's voice.

Cluck! Zhang Fan's heart is like being shot. He can let Ren Li deal with it, or he can choose to go downstream.

However, Zhang Fan did not and did not escape. When he chose this profession and chose this major, he

did not understand it. When he understood it, he knew that he had no right to choose now.

"Wait for me, I'll be right there. You, you, pay attention to yourself!"

"Good!"

After hanging up, Zhang Fan said to the leader of the armed police branch:

"Captain Wang, take the soldiers downstream. If you don't have my phone, don't come to bazaar first."

"What?" Being a soldier is very sensitive, especially sensitive. When Zhang Fan finished, the branch leader's eyebrows stood up.

"I don't know the details. I hope it's not. Wait for me to call!"

"Good!" Looking at the distant car, the team leader didn't know what to think.

"Captain, shall we go downstream now?"

"Go to an egg. They're all dead. What are you doing? Stand by!"

.....

## **Chapter 676**

After a major disaster, there must be a major epidemic. The disaster here is the flood disaster.

All living beings are equal in front of floods. Mice, rabbits and people are the same. People may still be salvaged, but animals are impossible. In the face of floods, they just can't drink.

Moreover, once an epidemic occurs, vomit and diarrhea, if not handled properly, will directly become a chain reaction and aggravate the pollution of water sources.

One contagion, two contagions and four contagions are definitely more terrible disasters than floods.

Therefore, after the flood, the first time is to ensure the cleanness of water sources, which is why bottled water is a necessary thing in the first materials transported in case of disasters in TV.

Zhang Fan drove to bazaar. On the way, Zhang Fan called Shaohua: "there is a flood in the village and

many people are affected. It is estimated that they are busy these days. Take care of the old man at home. Don't worry about me."

"Has the water receded? You must be careful yourself. Be careful. Don't... we're getting married soon. You must be careful. I'll wait for you to come back. "

Shao Hua couldn't say it. The girl with the phone had too much to say and ask, but she couldn't say it.

"It's all right. The troops and armed police are here. Don't worry!" With that, Zhang Fan hung up.

When he received a call from Ren Li, Zhang Fan had a bad feeling in his heart.

When Zhang Fan walked into bazaar, he saw that Ren Li and Lao Gao had pulled the medical staff in a deserted place. The crowd, including the herdsmen, has been surrounded by the troops covertly.

All the soldiers and the masses were wearing masks, all with three or four stacked blue masks.

Lao Gao can't see anything on her face, but Ren Li's serious face, which kind of elegant and generous expression on weekdays, is gone, leaving only a serious face.

"Now it may be an epidemic area. I think we all found something. Yes, there are several suspected cases at present.

Now, we are the first line and the first medical staff.

I hope everyone can unite as one, and we should also have confidence, because... "

After listening, Zhang Fan frowned. "When is it? He said so. The people didn't stir up. As a result, everyone was afraid!"

Zhang Fan drove the car directly. After jumping out of the car, he strode in front of the crowd.

When Ren Li and Lao Gao saw Zhang Fan, they moved back a little and gave up the position of leader.

Ren Li also knows that she can see a doctor to save people. Even in the face of the most dangerous heart failure, she won't be a little nervous.

However, in case of such a thing, she is not good at encouraging and inspiring people. Lao Gao, like Ren Li, let him enter the epidemic area, but now let him mobilize everyone. He doesn't have the ability.

When Zhang Fan came to the crowd, Ren Li stopped talking, looked at Zhang Fan and made eye contact.

Zhang Fan saw the seriousness of the situation from Ren Li's eyes. No extra action.

Zhang Fan looked at his familiar colleagues in front of him.

He said, "comrades, the critical moment has come! I don't say that no lover is invited by natural disasters, and I don't say that I will devote myself to death.

I know, now some people want to leave, want to leave immediately, to tell the truth, I also want to, I can't wait to have a wing to fly away immediately, leave here and escape from here far away. I'm getting married at 11, and my fiancée is still waiting for me at home.

But can we go. Can we watch them helplessly, look at their helpless eyes, and leave in their expectant eyes.

No, because we are doctors. The duty of rescuing the dead and healing the wounded lies in! At this time, if you don't, if I don't, who can?

Behind us are hundreds of thousands or even millions of cities, in which there are our relatives.

We are not here. When the epidemic expands, we are sinners.

Today, the country is so strong. As long as we hold on for three hours, the backup team will arrive immediately. As long as we control here, we are heroes.

When you go out, even if you brag, you are qualified to brag.

Who has no home, who has no relatives, but we are doctors. We should not only protect our relatives, but also shame our relatives for us.

Afraid? What's terrible? Isn't decades of study just for today, and decades of hard work just for today?

We are heroes, white heroes in the era of peace. Today is here, our most brilliant moment!

We will win! "

"Can win!" Finally, someone in the crowd agreed, one or two, and finally all the medical staff agreed.

When they finished speaking, when the medical staff looked at each other and no one spoke, Zhang Fan stood in front of them with his heart clenched like a paper towel.

"Good!" Zhang Fan gave a big drink. Really, he was afraid, but now, like the relaxation after tension, there was a sense of comfort in the bones.

"Now I declare that they are leaders and Party members."

The director and deputy director of the Department, the inpatient general came out, and some, although not cadres, but medical staff who are party members, also came out.

His eyes were calm and looked at Zhang Fan quietly.

"Now, bazaar is divided into three areas, asymptomatic areas. The president of the high court leads unmarried medical staff with small children to screen."

"Yes!" Lao Gao stepped forward and replied to Zhang Fan with the attitude of his subordinates.

"Secretary Ren, you led some deputy high school students and head nurses into the suspected area."

"Yes!" Ren Li at this time, there is no tension just opened, because she has a backbone.

"The rest, chief nurse, follow me into the epidemic area for the first round of diagnosis."

"Zhang Yuan..." Lao Gao wanted to say. He went, but Zhang Fan didn't let Lao Gao speak. At this time, there can't be a little problem.

"Come on, take the armed police soldiers. The longer you wait, the greater the chance of infection." After saying that to Lao Gao.

Zhang Fan got on the front of the car and stood on the front of the car, which he usually felt distressed about. "Come on, do a good job in basic protection. The screening area is in the west, the suspected area is in the East, and this is the epidemic area. Ready to enter! "

"Yes!"

Medical workers, one by one, know very well that if they flee immediately, to tell the truth, the state really has no way to take them, that is, to revoke their medical license, can they still be shot?

But once you enter, you are faced with the choice of life and death. If you are lucky, you can go in and out. If you are unlucky, you can stand in and lie out.

Can you retreat? Yes, but no one retreats, because this is their battlefield. Since they chose this industry, they have to face the pain and joy, sadness and joy of this industry.

Zhang Fan stood on the front of the car and quietly looked at familiar faces. Although he was wearing a

mask, he wanted to print their faces one by one in his mind.

"Take care!"

"Be careful yourself." A pair of secretly in love also emerged at this time.

Looking at the medical staff quickly dividing the crowd with the help of the armed police, Zhang Fan took out the phone.

"Team Wang, this is Zhang Fan."

"Zhang Yuan, you said, we are on standby."

"Take the troops and surround the surrounding 5 kilometers. You can't enter or leave."

"Not enough hands!"

"Now contact your superior immediately. We can't take it lightly, whether it's a vicious epidemic or not."

"Yes! What about looking for herdsmen who fall into the water? "

"Stop looking, let them come back immediately and pay attention to observation. If there are people with fever and vomiting, be sure to call me in time. You also do your own protection. Wear a mask. Now you can only wear a mask. "

"Is it serious?"

"I hope not!"

After hanging up, Zhang Fan put on the three masks left by the head nurse and entered the tent of the sick patient.

The affected people also began to make a commotion slowly.

## **Chapter 677**

When doctors and soldiers began to distribute masks, the crowd was actually a little scared. What masks should be distributed innocently!

When the doctor and the soldiers began to divide the crowd, the crowd became agitated.

"Why do you want to separate us? No! There must be a statement for you to lead. "

If someone stands up, then more people stand up“ Someone has a fever. Isolation is for everyone's safety. Please cooperate. " Ren Li didn't dare to tell her suspected disease, and even she didn't dare to imagine her diagnosis.

"Why not take it to the hospital? We're going home."

"Yes, we're going home."

When the crowd resisted, someone began to call, who was qualified to come out and play, and who could drive millions of cars. To tell the truth, it was sometimes difficult to deal with.

When there is no diagnosis, whether the information can be released, whether it will cause panic, and whether there will be an escape on the premise of insufficient manpower, Ren Li doesn't know. She doesn't dare to gamble.

No one is afraid of death. When SARS happened, he had a joke that he was a gold collar in North Canton and found himself have a fever.

Then he quietly fled to his hometown and countryside by plane. As a result, "I'll go to the government now, report to the superior leaders, and the personnel and equipment supporting you will set out immediately." With that, Ouyang took a long breath, red eyes, and gently said to Ren Li, "take care!"

"Yes!" Although Ren Li knew Ouyang couldn't see it, she also nodded gently.

After hanging up, Ouyang stood up, holding the table with one hand and picking up the internal phone with the other.

"Immediately collect as many protective clothing as possible, bring antibiotics, doctors and nurses in the hospital, and get ready to go!"

"How many people to take, protective clothing, ICU and infectious diseases department in our hospital, not many." The director of the medical office doesn't know the situation yet. He speaks slowly.

"I don't care! Even if you go to borrow it, you should also borrow all the protective clothing of tea

vegetable for me. Only the security personnel are left in the hospital. Now stop all emergency and outpatient services. Do you understand? "

"Yes!" The director of the medical department knew at this time that there was a big event, which closed a regional class III hospital.

.....

Zhang Fan entered the tent with a three-layer mask and Juma Buick, director of the respiratory department. "Zhang Yuan, I'll go in. You're the leader. You have to contact your superiors at any time."

The yellow eyes stared at Zhang Fan tightly. Zhang Fan looked at him. This director, who usually likes to speak incomprehensible English and is not convinced of anyone, has a warm heart. At this time, Zhang Fan has become his leader. But he was really warm in his heart.

"Resident director, there are five people inside. You can't care about it alone, and you go in alone. I..."

"Oh, don't call me resident director, my name is : Juma Buick. "

With that, Lao Ju, a man who doesn't agree with everyone on weekdays, patted Zhang Fan on the shoulder. This may be the friendship between men.

The two entered the tent at the same time, "no one can come in without my order." When Zhang Fanlin entered the tent, he turned back and specifically explained.

"Zhang Yuan, resident director, you must be careful." When the head nurse in the operating room spoke, they all brought out a crying cavity.

"Yes!"

The plague, which China lists as the first category of infectious diseases, can be perceived by the state as the treatment of this disease.

First, we talk about the plague's achievements. In the world history, plague broke out three pandemics, the number of deaths was ten million. In 1994, the outbreak of plague in brother San, the outbreak almost made the elder brother break.

Besides, there are three kinds of plague, namely, bubonic plague, pneumonic plague and septicemia plague.

In this way, the first kind of bubonic plague is found to be timely and timely. According to the current level of science and technology and medical treatment, the cure rate can reach 90%.

It doesn't look very bad. It's almost like the flu. Maybe it hasn't broken out. Don't worry. Just look at its second brother and eldest brother.

Next is the plague's second and the oldest. The plague and septicemia plague, once infected with these two plague, are almost no survivors at present.

Such a sentence, such a simple sentence, can directly reflect its terrible side.

The bubonic plague can become the last two plague, and the two plague can also be transformed from bubonic plague or primary.

That is to say, when plague broke out, some people were directly plague and septicemia plague.

Moreover, the septic plague, with a nickname, can frighten the Europeans out of the nickname, the black death.

A black death almost killed the whole white circle. You can imagine the severity of this thing. Now, if there is a black death in the news, it is estimated that it can scare away a large European city.

There are few ways to spread the disease from animals to people, and fleas on diseased animals are one.

The second is that sick animals bite people, or people eat the skin or meat of sick animals.

In this age of chemical cleaning, flea transmission is unlikely.

But even when they had eaten the ditch full of animal husbandry, some people went to eat wild animals and were infected with plague.

It's not easy for animals to infect people, but it's very easy for people to infect people. Droplets in the respiratory tract can infect people. To be simple, they can be infected while talking, and the infection is quite severe.

In other words, if a patient sneezes, or if there are unprotected people within tens of meters nearby, they may be infected. Such urine is really a mobile biological bomb.

.....

Zhang Fan and Lao Ju enter the tent. To tell the truth, Zhang Fan and Lao Ju are afraid. Who will be afraid of death? Perhaps Lao Ju has a deeper understanding of this fear.

When he was in SARS, he was studying in the capital. He was also one of the first doctors to enter the epidemic area.

However, at this time, I'm afraid I can't solve the problem, so I can only face it.

When entering the tent, Zhang Fan saw five symptomatic patients, especially one woman.

The pendulum could not open its mouth, could not even speak, and trembled like an electric shock. The gray and cracked lips and godless eyes sent out praying eyes.

"It's okay. It'll be fine." Zhang Fan said softly, then untied the girl's clothes and reached out to touch her neck and armpit.

When Zhang Fan's hand touched the other party's hot body, Zhang Fan's heart hung in the air and fell down like piaji a watermelon.

"Chief resident, the lymph nodes are enlarged."

Lao Ju's sweat came down, not because he was called Lao Ju, but because he also touched the swollen lymph nodes. And the patients he faced had begun to show symptoms of respiratory failure.

Sudden onset, severe systemic poisoning symptoms (high fever), bleeding tendency (blue and purple skin), lymphadenopathy and lung involvement (dyspnea). These symptoms were directly told to the two of them.

The plague was diagnosed.

Lao Ju's yellow eyes looked at Zhang Fan. Zhang Fan saw fear and tension from his serious.

"Zhang Yuan, call the European Institute. I'm going to take samples." His voice trembled slightly.

Can you be afraid? It's better to face death. Maybe the virus is floating in the air in the tent now.

"Good!"

"What's wrong with me, doctor." One of the patients who looked a little lighter asked them.

"I have a fever. It's not a big problem. Don't worry. I'll deal with it for you now." Before Zhang Fan spoke, Juma Buick spoke.

Zhang Fan looked at Lao Ju, didn't speak, stood up and got out of the tent.

As soon as the phone was called out, Ouyang answered the phone. "Dean, it's a plague." At this time, Zhang Fan became calm.

"I see. Now we must ensure that people are isolated and that the epidemic cannot spread. "

"Good!"

"Also, you, you have to be careful."

"OK, Dean!" Zhang Fan hung up and got through to the team leader.

"Lao Wang, the alert is upgraded. According to your highest alert level, you give me the command within the alert range. I need the cooperation of armed police soldiers."

"OK ~! Zhang Yuan, I'll give them orders now. You can rest assured that you will never let anyone out or come in. "

"OK, please."

"Zhang Yuan... Ah!"

Zhang Fan knows what he wants to say, but what else can he say at this time.

"I want to inform you of one thing."

Zhang Fan looked at the armed police soldiers in front of him and said softly.

## **Chapter 678**

In China, many people scold doctors, teachers and the government, but most people are convinced when they talk about the army and the people's Liberation Army.

Even swindlers know that it is good to cheat under the name of an old military doctor. The PLA's concept to the masses is: if something happens, there is no problem finding the army.

Even if the PLA enters the disaster area without weapons, it can make headlines in Europe and America“ They dare to enter the disaster area without weapons! ”

Many people think that Europeans and Americans have never seen the world. But take a look at the rescue scene after Hurricane Laomei. Soldiers carrying long guns and short guns are as cautious as entering the war zone.

This sounds ridiculous, but this is the strength of the PLA.

This is the golden plaque created by the army with its own efforts and beliefs over the years.

"Comrade leader, Yang Guoguo, XX detachment of the armed police, instructor, reports to you."

.....

When Ouyang got Zhang Fan's diagnosis call, he urged the driver to drive the car into a small plane, burst the lights all the way and went straight to the government.

For the first time, Zhang Fan was authorized by the government and the military region, and Zhang Fancheng became the first leader of the epidemic area.

.....

Comrades, five tourists have been diagnosed with plague, and the situation is very serious. All the people present may be infected.

Moreover, once patients with bacteria enter the city, enter the urban area and enter the crowd gathering area, the consequences will be unimaginable. "

Zhang Fan looked at a group of soldiers whose mouths were not fluffy and whose age was not as old as him, and gently explained the current situation.

"Please order!" The only older instructor replied to Zhang Fan in very concise language.

Looking at the vertical and horizontal lines of the army and the firm and resolute faces, Zhang Fan is too steadfast in his heart, no matter how urgent the situation is and how restless the crowd is.

Looking at this group of people without fear and timidity, this group of the most lovely people, Zhang Fan rises with pride.

"Good!

Now please ensure the stability of all the people present. The masses must not gather and must disperse.

The personnel in each tent can not move without moving. At the same time, please do your own protective work. "

"Yes!"

With these words, the instructor dispersed with the troops.

.....

Plague, which sounds like a distant disease, is not the case. Far from Africa, America, near Asia, Vietnam, Nepal, Burma and Mongolia, there are frequent epidemics or cases.

Moreover, the southern Yunnan West, Tibetan Plateau and Mongolian Inner Mongolia grassland are also common cases of plague.

How did this come about? Most of the plague that can lead to epidemic is mostly caused by various kinds of deaths.

It was not easy to say whether the civet cat was carrying a pot, but today's plague is really caused by human being's death.

.....

"I've asked the medical history. Before they got sick, they all had one thing in common, that is, they ate dry and lazy!"

After getting the first-hand medical history, Dr. Liu of the infectious diseases department rushed to report to Zhang Fan.

After hearing Zhang Fan, a waist of a child's pain is really a pain in the kidneys. The plague of brother San is due to special doctrines, what's in the rat temple, and most of the plague in China is death.

There are mengnei grassland and Tianshan grassland. Every autumn, a group of rich people haunt the hinterland of the grassland in luxury cars that can climb mountains and Wade.

They are for their own appetite. After autumn, the dry lazy is fat and strong. It is estimated that it is about ten kilograms. In order to spend the winter, the dry lazy has a thick layer of fat.

This layer of fat is gathered by plants that eat grass seeds and nuts. According to people who have eaten it, it tastes quite good.

What they do not know is that drought and laziness are carriers of plague.

Almost everyone has medical experience. Every time, the doctor will ask whether there is a history of metallurgy and living in pastoral epidemic areas!

Think about it. The Ministry of health has put together the history of unclean sex and the living history of pastoral areas. They are really not brave enough to find dry and lazy food.

"Good! I see. " Zhang Fan endured the anger in his heart and said helplessly.

.....

When Ouyang reported the epidemic, the government was worried. The five confirmed plague, to be honest, once the control is bad, blocking a city and blocking a region are not what problems.

The mighty troops set off, the troops like a great enemy set off, and in the dry and hot weather after the rain, the cars set off like astronauts pulling a car.

Plague is spread by droplets, not only from the mouth, but also from the eyes. Stick to the skin is the carrier, quite terrible.

Therefore, protection is very important. Few people have seen biochemical protective clothing.

In fact, it is similar to the clothes of astronauts. It is wrapped from head to foot, especially the hat. It is a helmet made of plexiglass.

.....

Stan's presidential office said, "what's the matter with China? We haven't supported XXX for a long time. What are they going to do again? Ah, go and ask. "

Chinese troops and a large number of military vehicles appear on the border. Before the Chinese people feel anything, the president of Stan can't sit still. What are you doing? What's this for? Just like a groundhog, it makes a sharp a sound.

"They found plague, and the foreign ministry has just taken note of it."

"Oh! That's good, that's good! "

.....

Ouyang sat in the leading car of the armed police with an iron face. From time to time, the situation of the epidemic area came from the walkie talkie.

The motorcade galloped, and the muddy water flew everywhere on the muddy road. "Zhang Fan, are there any new epidemic patients?"

"Dean, No."

"Oh, we'll be in bazaar soon."

.....

At sunset, the grassland in the hinterland of Tianshan Mountain is rippling with the last round of warm autumn sun. On the grassland with little water, colorful scenery is reflected. In a place originally like a fairyland on earth, rows of white troops stand abruptly.

"Comrades, we must not take it lightly. After entering the epidemic area, we must not take off our protective clothing. We must replace our posts in a unified way and not privately."

Ouyang explained the precautions again and again, and his hoarse voice echoed in the sky of the grassland.

The soldiers who were originally surrounded by the ring, although they also wore protective clothing at this time.

However, they have become suspected infected in the epidemic area. They should not only be isolated, but also act as stabilizers in the epidemic area.

The new troops immediately formed a new and larger encirclement around their periphery.

Sets of protective clothing were sent to the epidemic area. Ouyang wanted to enter the epidemic area circle. As a result, he was grabbed by the director of the medical department.

"Dean, you can't go in. You have to coordinate the large forces and report the epidemic situation to the superior. If you go in, there will be no command."

"My doctors and nurses have said that they may be exposed. I'm their Dean. They'll be cold if I don't go in. Let go!"

Ouyang raised his triangular eyes, and others could see the murderous spirit in the old lady's eyes.

"I'll go in, I'll go in on your behalf!"

"European Academy, you really can't go in now. It's estimated that the leaders will come soon. As the general person in charge here, you have to report to the leaders." The same Army leaders kept persuading.

"Ah! Go and call Zhang Fan. " Ouyang gave up the idea of entering the epidemic area and did not let the director of the medical department enter.

Across the white circle and the yellow warning line, Ouyang looked at Zhang Fan in the circle.

I'm covered in muddy water, but my mental outlook is still good. I don't see panic.

"Dean!"

"Zhang Fan, put on your protective clothing quickly. Doctors who have close contact with patients must ensure that they are vaccinated first."

"OK, Dean."

"How are the comrades?"

"Everything is stable now. Don't worry, Dean."

Ouyang took the trouble to explain the precautions.

After the distribution of protective clothing, as the main leader in the epidemic area, Zhang Fan also explained the specific situation to the masses.

For a time, the eight immortals crossed the sea. Many people wanted to leave here in advance through relationships. As a result, no matter who or what relationship, it didn't work at this time.

When the medical staff shuttled through the crowd and kept observing the isolated crowd, loud shouts came from the tent of the sick patients.

"Zhang Yuan, come quickly."

.

## **Chapter 679**

No sooner than ten people were swept away by the stormy floods. The local leaders had not had enough headaches before the outbreak of plague broke out.

To tell the truth, at this time, it is estimated that the leaders will kneel down and thank the torrential flood and pouring rain. If it were not for the rain, once several people were diverted, the convenient transportation, aircraft and cars would directly become a super accident.

Infectious diseases, especially such a strong kind of infectious diseases, occur in areas under their jurisdiction. Once they cannot be controlled, it is estimated that it is still a problem whether they can

continue to be leaders in the future.

The heavy rain hindered the crowd and washed away many people. Originally, this kind of salvage was quite troublesome. After passing the management area, there are too many things that need to be communicated and argued. When the communication is good, it is estimated that it will reach another boundary.

This time, without family members, the government directly salvaged all the bodies under the river and rushed them to the crematorium, which is quite efficient.

Because the plague is very exotic. When the sun is not hot, it can not be boiled at high temperature. Once it enters the corpse, it can survive for a long time, and can also become a source of pollution. This is also one of the main reasons for the outbreak of plague in ancient times.

.....

The nurse's hurried cry made Ouyang's heart tight and tight. Say a selfish word. The old lady is not afraid of anything now. She is worried that her doctors and nurses have been infected.

At this time, the first doctor is the most likely to be infected. Suspected patients only need to go to the tent, eat and drink, but doctors can't. They need to shuttle through the crowd.

Therefore, when an epidemic situation occurs, doctors of any status, as long as they are near the epidemic area, must help control the epidemic situation at the first time. This is the iron rule of the Chinese medical community! As long as it is a doctor, it must be observed.

Most of the doctors who died in SARS were the first doctors who entered the epidemic area. They did not take the first time seriously, and did not make comprehensive protection. After being infected, they were really too late to regret.

Zhang Fan didn't even have time to fight, so he hurried to the tent.

As soon as he entered the tent, Zhang Fan saw what he didn't want to see. A rich middle-aged man was restless and twisted like a fat white bug.

"Zhang Yuan, he suddenly has difficulty breathing!"

"Ready to cut pipe!" While Zhang Fan said, he came forward to start the examination. The doctors and nurses in protective clothing began to prepare nervously.

The patients visible to the naked eye began to have nosebleed, bit by bit, and then slowly hung under the nose like a river.

"Septic type!" The old resident began to shake, because he took the sample of the patient, and he was a close contact.

"Resident director, take a break. Leave the rest to us. " The head nurse gently held jumabek.

"I've been in touch. What else do I have to rest? If I rest, I have to come in again. Life and death are vital, wealth and honor are in heaven. If I'm not infected, I'll go on."

Although he said so, his heart was really bad, "it's all right. There are protective clothes. You can rest and let another doctor on standby outside come in."

"No, listen to me!" Juma Buick shook his head gently.

Zhang fan can't care about the old residence at this time. As an old doctor, he should be able to adjust himself and can't be comforted by others.

Take off, quickly take off the clothes he was wearing, and the middle-aged man's body is exposed.

The skin of the original white flesh was no longer visible at this time. The whole body was purple and the ecchymosis was stuck to him like a purple mask.

The skin of the whole body was like pulling out a fire pot. Blood beads condensed on the surface of his skin and rolled directly on his body like purple potato particles of pearl milk tea.

Thighs, lower legs, abdomen, and even perineum (a) appeared in large numbers. Slowly, the white muscle abdomen turned black purple. Where it was a little black, it directly became charcoal black.

"Come on, press his limbs!" Zhang Fan said loudly to the medical staff in the tent.

At this time, the patient has entered the state of asphyxia. Although he has a fever and coma, he has considerable strength.

The young nurse, with a weight of more than 100 kilograms, had to jump all over his arms and legs to press him.

The throat kept sending out "he! Hector! He! " The sound of suffocation, his face, the sudden sense of suffocation, he slipped the blood line scratched by his face and neck. It was too miserable.

Lidocaine local anesthesia, it is estimated that the anesthetic effect has not taken effect. Zhang Fan's scalpel directly pierced between the tracheal ring and nail.

At the moment of cutting into the meat, the incision was like a broken balloon, puffing blood bubbles, which made the struggling patient relaxed directly.

The blue and purple face, the blood striped neck, the body covered with bruises, the originally ferocious face suddenly became calm, and the twisted body began to relax slowly.

He was quiet, but the female patient next to him couldn't. because of the shortage of tents and hands, she was arranged in this tent.

When the patient was suffocating, the girl began to tremble. When the fat man began to scratch himself, the girl was scared to tears.

It's terrible. A few days ago, they played together, but today, looking at his pain and the doctor stabbing him directly with a knife.

The girl's scared ass peed, and kept saying, "I'll never come again. I won't come for any money. Please, please let me go home!"

When the organ was cut open and the ventilator was to be intubated, the middle-aged man slowly stopped breathing in a peaceful and comfortable state.

"Stop jumping!" Zhang Fan gently touched his carotid artery, and then said, "it is estimated that a large area of bleeding led to multiple organ failure."

"Ah!" The girl who had been burned and wilted shouted loudly as if she had seen a ghost.

Zhang Fan turned his head and looked at her. Curled up in the corner, she shook like a chicken. His head wanted to get into his crotch.

It is estimated that she will never forget this scene in her life.

"All patients with the onset of quadruple antibiotics, directly, can no longer hesitate."

"Yes!"

At this time, when there is no humanity or inhumanity and life can't be saved, we can't care about any emotions.

"Ren secretary, I'm Zhang Fan." Zhang Fan calls Ren Li with the walkie talkie sent in.

"Zhang Yuan, you said."

"Work hard and screen again. Who has eaten the dry lazy and hare on the grassland must emphasize that if you don't tell the truth, the consequences are quite terrible. One has died."

"So fast?" Ren Li was surprised. It was only a few hours before she died.

"Sepsis type, I guess there are people who don't tell the truth. We must screen out. Once so many people are not found out in time, the consequences are terrible."

Zhang Fan's hand holding the walkie talkie trembled slightly.

The black death really deserves its reputation. The white and greasy fat man became a corpse every minute. The purple spots all over his body make people scared.

This is the first time Zhang Fan has seen the power of plague.

.....

Outside the epidemic area, government vehicles also came, and provincial leaders appeared on the tea vegetable grassland.

"Every year, every year, is that how you generate income? Ah, what to do now? Tell me what to do now, how to end, how to end the crowd of hundreds of people. "

"Our doctors and PLA Armed Police officers and soldiers entered the epidemic area at the first time, and no suspicious patients left here."

"Still have the face to say this. If it weren't for the flood, would you still be qualified to stand in front of me now?"

Ah!

"I'll remove all of you on the spot before you remove me. "

With that, he walked directly to Ouyang without paying attention to them.

In peacetime, if a leader at this level comes down, no matter what, as a subordinate, he must first report to the leader.

But not at this time. Ouyang can't leave. She's assigning medical staff.

"Director Li, in four hours, you entered the epidemic area as the second group of leaders to replace Zhang Fan and let them have a good rest."

"Yes!"

"Director Chen..."

The leader came to Ouyang. The original Secretary wanted to interrupt Ouyang's speech, but he was stopped by the leader. He took a group of people and stood quietly behind Ouyang, waiting quietly.

When Ouyang finished the assignment, the leader came forward and held Ouyang's hand, "you've worked hard!"

"We don't work hard. What we work hard is the doctors, nurses and soldiers who may have been exposed in the epidemic area."

Ouyang didn't say anything high sounding. The people behind the leader were anxious, but Ouyang still said it.

"What can we do? Is it necessary to mobilize medical personnel from the field?" The leader still holds Ouyang's hand.

"Not yet. The more people there are, the greater the chance of exposure. Doctors and nurses in our hospital intervene very early and intervene early. If we can't, let foreign doctors enter. There is also the need to ensure the number of drugs and equipment. It is not known how many people are pathogen carriers. "

Ouyang said faintly.

"OK, don't worry, the medicine and equipment can keep up. Thank the medical staff and soldiers fighting in the front line of the epidemic area for me. "

With that, the leader said to the crowd behind him with a cold face, "this is your office. When will the epidemic end and when will you go back. Now, everyone present must unconditionally cooperate with the leaders of the hospital. "

Ouyang's official position has been promoted several levels in an instant. If at ordinary times, it is estimated that the old ladies of official fans can find a place to secretly laugh.

But today she can not laugh, and the plague of blood losing is hanging on her mind.

In the tent of the disease, both upper and lower limbs of the patient have opened the venous channels, and a large number of quadruple antibiotics have been input into it. Whether it is successful or not is in one fell swoop.

On the grassland, among the segmented suspected patients, after vaccination, doctors row and insert again and again. They not only have to ask the medical history, but also judge like the police to judge whether the patient is telling the truth or not.

"Are you sure you didn't eat? You must not tell lies. You can eat as soon as you eat. Speak out quickly and we will treat you in advance. "

Take the trouble to ask one by one and reason one by one.

The restless crowd subsided at this time, and no one made trouble " I ate it! "

"Why didn't you say it earlier? Why didn't you say it earlier." On weekdays, Ren Liru, who is very particular about quality and manners, came forward to pull the patient hiding in the crowd like a crazy woman, and almost hit him.

"Come on, here's a patient using drought laziness."

## **Chapter 680**

The adult world cannot escape two words, self-interest. When we saw that the friends who had eaten dry and lazy meat together were isolated in the distance, and there were many armed police standing guard, the interested people hid and observed secretly in the corner.

See if it is like the legendary simultaneous interpreting the doctors and soldiers who are killing flowers with great efforts. As for whether it will infect others, this is not his consideration.

The simple idea led the medical team led by Zhang Fan to face a formidable enemy.

"Who had intimate contact with him?"

"Come on, those who have been in contact come out quickly. Time doesn't wait. If there is no prevention and treatment in advance, once they get sick, the consequences will be..."

Ask again and again!

The terrible thing about infectious disease is here. It is not like trauma, very obvious, nor like a medical disease. It has symptoms before and during the onset of the disease.

This thing can lurk!

"Me!" A little girl who looked soft and weak came out with her head down. She was afraid, too.

Those who came together were either drowned or quarantined. I heard that another one died. At this time, she couldn't hide if the doctors and soldiers bluff.

Ren Li touched her forehead and dizziness rushed to her head. She really didn't expect that so many people were lurking in the crowd.

"Did you eat dry lazy meat?"

"I'm too fat to eat." The girl lowered her head and whispered.

When Ren Li breathed a sigh of relief, the girl said, "which one do I have with him?"

"Isolation!"

On weekdays, the brothers and friends of tiezi blame one after another like fried chickens.

"Shut up!" Ren Li braved the nameless fire.

There are also herdsmen from family to family in the isolation circle, including the elderly and children. These are vulnerable people. Ren Li, with doctors and nurses and wearing large rubber shoes, asks one tent after another.

"Old lady, are you lazy? Did you eat rabbit meat? "

"Isn't mutton delicious?" The toothless old lady looked at Ren Li's dress strangely.

"We never eat dry lazy and hare. Even if our shepherd dog catches it, we will bury it."

"That's good, that's good! Have you ever had close contact with outsiders? "

"Where can I get in touch with them? I don't think they are good people. They run all over the mountains during the day. When they see wild things, they chase in groups like savages.

The pregnant sheep in the family were frightened by them and gave birth prematurely. I don't sleep at night. I'm a fool all night. We got up early and went to bed early without contacting them. "

Ren Li finally breathed a sigh of relief. "Don't go out of the tent these days. If someone outside wants to come, you have to stop it, okay?"

"Well, I know. There was a time the year before last. Girl, I used to send instant noodles. How did it become Nang this time?"

"Coming soon, instant noodles coming soon!"

"There's good news at last." Ren Li said to the medical staff behind her.

"Secretary Ren, look at their mental outlook, and then look at the mental outlook here. It's directly different."

"Yes, people go to bed early, get up early and don't stay up late. Even if they have a short history of contact, they are not likely to be infected easily. They are afraid that their resistance is not high and..."

Ren Li, before they had finished the investigation, found a feverish crowd in the crowd.

Directly like a bomb thrown in a crowd, "boom!" Run clean, what Pro brother love sister, this time can't wait to grow two legs.

"Come on, call Zhang Yuan!" Any suspected cases must be reported to Zhang Fan.

Zhang Fan came with people. To tell you the truth, he was anxious, nervous and ran all over the mountain. Really, in the afternoon, Zhang Fan had two shivering feelings.

"Zhang Yuan, there are patients with fever here."

"Check your body first!"

"I'll come!" Ren Li saw that Zhang Fan was extremely tired. At this time, the more tired she was, the more easily she was infected. Ren Li ran a little less than Zhang Fan, so she said to Zhang Fan.

"It's all right! I'll do it. "

.....

"I have money. My family is in the bird market, my family is in Sanchuan, and my family has several houses in the capital.

I have money. As long as you save me, I can give you money. Give you money you can't make in your life.

" A fat young man said to Zhang Fan in fear.

"Lie down!" Zhang Fan didn't say much. What the other party said didn't enter his ears at all.

"It's really rich. Don't believe it. Here you are. I'll give it to you now." As he spoke, the man took out a pile of cash from his backpack and just stuffed it into Zhang Fan's arms.

"Lie down and take off your clothes!" Zhang Fan's tone became serious and his voice became severe.

The patients in the isolation area may have all kinds of exhaustion every minute. The fat man is still playing dead dogs here.

"Okay, okay, I'll lie down, I'll lie down. Take it easy, doctor. I've been afraid of pain since I was a child. "

Nagging, nagging, this thing is more and more slippery. When he says it, he feels that his fear has been reduced a lot.

Zhang Fan saw it and didn't stop it. After all, it can scare people to death. It can alleviate his fear. It's also a good thing.

After the fat man lay down, he tried to take off his clothes and trousers. The fat man Zhang Fan has seen it, and even the fatter Zhang Fan has seen it, but Zhang Fan really hasn't seen the fat man take off his clothes.

Lie down and can't reach the trouser waist. When you sit up, the fat on your stomach covers the trouser waist again. I'm really worried for him.

Zhang Fan came forward and tore off the fat man's pants. The fat man's eyes almost jumped out. If there were not many doctors and nurses present, it was estimated that this guy would definitely scream.

Take off your clothes and pants. Zhang Fan touched it along his neck, armpit and groin. Hey, I didn't touch the swollen lymph.

Then Zhang Fan opened the fat man's conjunctiva and lips again, even around the anal (a) door and the perineum (a). There was no swelling and bleeding.

"Doctor, i..." the fat man wanted to talk bitterly.

"Shut up, are you lazy?" Zhang Fan's voice is also very impolite. This kind of thing, Zhang Fan is very clear and puts his face on his nose.

"What do fools eat? There's a pet shop in my family. I know that thing is a big mouse. I'm crazy. I eat mice. I'm not a loser!"

"Don't talk nonsense. Eat as you eat. Don't eat as you don't eat. Whether you eat or not."

"No!" The fat young man rolled his eyes secretly, looked at Zhang Fan staring at him, and quickly lowered his huge head again.

"Dry lazy didn't eat, where do you have close contact with them?"

"I want to be close. People don't like me and think I'm fat. If I had known I wouldn't come, NM couldn't find it if he had money... "

This is a living treasure. Zhang fan can see it. It is estimated that this thing usually stays up late and eats too much. It has irregular life and poor resistance.

The rain was caught in the rain, and then the plague broke out in the crowd. The guy frightened himself to frighten the cold.

"Isolate him in another tent." Zhang Fan said to the armed police behind him. Although it is not yet clear whether it is plague, Zhang Fan is afraid of carelessness.

"No, brother, Grandpa, ancestors, don't kill me, I beg you."

As soon as the fat man heard this, his nose was scared out. Can it be a good thing to have another tent? Although the fat man was simple, he was also a chicken thief. His fat body rushed to Zhang Fan's leg at an incredible speed. The light PI (a) shares were like a millstone. He lay on the ground and hugged Zhang Fan and began to shout.

"You probably have a cold. I'll isolate you separately to protect you. You don't want to go. It's busy here. One has just died and there's a place. Whether you go or not."

Zhang Fan was almost rushed by this guy and wanted to shake off with his feet. The tonnage was too large to shake.

"Don't lie to me!" The fat man looked up at Zhang Fan and immediately said, "I'll go to the single room. I'll go to the single room. Brother, I remember your good. As long as I go out, I'll definitely report later."

.....

In the tent, the atmosphere was tense " We must pay attention to it. In case of deterioration, we should remind you in time. "

"OK, Zhang Yuan."

In the evening, on the grassland in autumn, the chirps of herds come and go one after another. With the

golden sunset, they sprinkle on the grassland. The breeze blows, just like the golden waves, wave after wave.

The rotating doctors entered the epidemic area, but Zhang Fan, who were the first doctors, were also suspected infected at this time and could not go out.

After Ouyang's report, no one could stop her. She put on her protective clothing: "I'm the dean of tea vegetable. When my doctors and nurses didn't have protective clothing, they didn't hesitate or be timid. They rushed in at the first time.

Now, there are protective clothing. If I don't go in and see them, I'm incompetent. I want to see them with my own eyes. "

With that, Ouyang took the lead in entering the epidemic area. The director of the medical office put on protective clothing, and then hurriedly chased Ouyang into the epidemic area.

"Everyone worked hard!" Ouyang gently held the hands of each doctor and nurse. Although he was wearing rubber gloves, for some reason, everyone seemed to feel the temperature of Ouyang's hands.

"Dean, why did you come in? We're here."

"Hi! I'm old, and you're beginning to dislike me. I'll see you. I'm not at ease if I don't see you.

All right. " Ouyang looked over one by one, afraid of missing one.

"All good, all good."

"Is the tent enough? The night here is still very cold. Everyone must keep warm and don't catch a cold.

These days, we all get together and eat only milk, mineral water and instant noodles. When we go out, I'll invite you to a big meal at the tea vegetable hotel. "

Ouyang didn't mobilize or inspire, because she didn't need it. She looked at it with slightly sour eyes, one by one, all qualified medical staff.

.....

"Let's have a rest first. After a tired day, instant noodles will be ready soon."

Zhang Fan acted as the chief of the Department, and the replaced doctors gathered in a tent.

"Zhang Yuan, I don't want to eat. I just want to sleep. Neither leg is my own." The head nurse in the operating room said slightly coquettish.

"Eat, eat, no, I have to work tomorrow."

"Doctor, eat instant noodles? Oh, how can this work? Come on, I've made you delicious food. "

At this time, an old Kazakh man in the pastoral area smiled and entered Zhang Fan's tent.

"Old man, why did you come to us? Go back quickly." Zhang Fan, they are suspected patients, so he is very nervous.

"Ha ha, it's okay. I had a plague when I was little, and I almost died, and I've never been infected since then."

"That won't work."

"Ha ha, well, well, if you can't, you can't. come on, help me. I'll bring you something to eat. You are for our grassland, we understand! "

As a last resort, Zhang Fan took people out of the tent. At a glance, darling, there was a pot on a carriage.

How big is this iron pot? In this way, Zhang fan can take a bath lying in it.

"Old man, what's in it?" Although the lid of the pot has not been opened, the smell has made the head nurse in the tent rise.

"Ha ha, delicious, all right, you eat, old man, I'll go." After they helped Zhang Fan to remove the hot pot, the old man drove his cheerleader away humming.

The nurses who were not ready to eat jumped up because the aroma was too boiling.

Open the lid of the pot, the heat accompanied by the fragrance, and the seduced Zhang Fan's saliva will come down.

"What is this?"

"Darling, why is it so fragrant!"
