

## Chapter 731

Chinese people pay attention to a lottery. For example, gamblers can't see books, thieves can't see wells, and even when building a house, they have to put up a flag in the middle of the yard.

It's hard to say whether it's reasonable, but it can still give people some comfort.

The hospital machine needs to be turned on. Ouyang wants a machine with money or not, and doesn't want the dealer to adsorb on the hospital like a leech. They do not want to give the government an excuse to reduce financial subsidies.

So the old lady managed to get the leader to the hospital. To be honest, such a large donation is not available every year, nor is it available in every city.

The boss of tea vegetable was also uncomfortable. He couldn't distribute these machines. Not only Ouyang didn't agree, but also the dealers who donated them were unwilling.

No matter what, it will be difficult for him if something really happens after such a big scene, so when the leader appears, there is no red face, but like a angry child's daughter-in-law.

No one looked good. These big dealers didn't pay much attention to him. They came to Zhang Fan.

The leader sitting on the podium said a few words to the effect that he thanked you for your donation, and then encouraged the doctors of tea vegetable hospital to make more contributions to the local people with advanced machines.

The ownership of these machines is also a wonderful way. It completely belongs to the tea element hospital. Ouyang won't do it.

The old lady is like a fighting thief. She knows too well that the goods will die when they arrive.

If the ownership is assigned to the tea vegetable hospital, it is estimated that the tea vegetable hospital will not receive government subsidies for several years based on the amount of these machines.

So Ouyang quit, and she knew that these machines couldn't get out of the tea vegetable hospital.

The government wants to share the machines among the major hospitals of tea and vegetable, but the dealers don't do it.

In the end, the government, which had no choice, assigned the ownership of these machines to the Health Bureau, but the right to use them was in the tea vegetable hospital.

The government can't say anything. Once it says it, Ouyang has no one and no place.

Ouyang's shameless rhythm made the president of the traditional Chinese medicine hospital blush for her.

The president of the hospital of traditional Chinese medicine was the vice president of chasu. After going out of the hospital, he thought about FA and Ouyang breaking their wrists. He couldn't get the upper hand again and again. He had to be pulled out by the government to fight with Ouyang.

"You said that the old lady's overeating and occupation have ruined the medical industry of tea vegetarians. If everyone wants her like this, Gu Xiaojia ignores everyone and talks about development and progress in the future. You should ask the organization to talk to her more and let her make progress. Don't do that."

The president of the traditional Chinese medicine hospital whispered to the old three of tea. He watched one of the world's cutting-edge instruments enter the tea vegetable hospital, which was sour in his heart.

"Hehe, this one was not bought by the government with money, and the other was not made by others. It was sent by others on the pole. What do you want me to say? If you can argue, can you be what you are now? "

The old three's heart is also full of resentment. Where is this machine? It's obviously all red tickets in a car.

My heart is bleeding. I don't need to buy any big instruments in the next ten years.

This business is so strange. For example, a small hospital in a small place wants to buy a CT, but the final competition is in the province!

After the speech, the leader got off the stage with a black face, and then began to cut the ribbon and clap like any opening ceremony.

Just as the two countries signed a peace agreement, Zhang Fan participated in such a handover ceremony for the first time. Sign, sign your name on the huge signature book, and exchange it with the other party.

Leaders can be black faced to Ouyang, but not to Zhang Fan. They not only can't be black faced, but also said a lot of encouraging words to Zhang Fan in private. It's polite to hold Zhang Fan's hand in a soft hand.

The doctors sitting under the stage, especially Xue Fei, Wang Yanan and Xu Xian, are Zhang Fan's lineages. They really have an unspeakable excitement.

It's so strange.

When the leaders left the scene, the serious medical startup ceremony began.

In the tea vegetable area, one by one, almost every hospital sent representatives or business leaders to participate in the event.

Looking at some of the instruments that they can only see when they go to study and don't let them get started, they finally take root in the frontier. Some doctors walking in pastoral areas really have tears in their eyes.

The development of modern medical treatment is inseparable from these high-precision instruments. Many people say that doctors now rely on instruments.

To tell the truth, the more advanced the instrument is, the more accurate the diagnosis of the disease is.

Sometimes, when the edge and die are ambiguous, a good instrument can often save patients do not know how much time.

The time saved may be the key to the patient's life and death.

"Zhang Yuan, please press the start button. This is the most advanced four-dimensional color Doppler ultrasound of GE company. Its function... "

Balabala, the regional manager of Ge, said that it made doctors in other hospitals in the tea area jealous.

These dealers actually want this effect. Their biggest goal is to hang Zhang Fan. On this premise, if they can sell several sets, it can also be regarded as holding grass and beating rabbits. However, his painstaking efforts are probably in vain. The frontier can't afford so many high-quality talents.

"OK, start!" Zhang Fan looks for Ouyang. Ouyang is not here. The old lady directly gives all the opportunities to show off to Zhang Fan this time.

After gently pressing the instrument, the 4D color Doppler ultrasound began to work in the buzzing current sound.

Then, in full view of the public, a pregnant twin found by the county hospital could really be watched by hundreds of doctors and lay on the examination bed of the new instrument.

In order to find the twins' mother to be, Ouyang scattered the officers of the medical office to the whole tea vegetable area, just in order to have a good omen today.

After the pregnant woman lay on the examination bed, the most beautiful female doctor in the tea color ultrasound department sat in front of the instrument.

Sometimes, it's really selfie and justice. If it's a consultation or other serious illness number, it's definitely not the nazati of the color Doppler ultrasound department.

When Naza graduated from college, a star scout looked for her. The girl didn't go. She didn't know how to get on Ouyang's thief ship and was pulled into tea vegetable hospital.

Every time there is a celebration, the girl is Ouyang's number one. It's nothing to talk about what to host, what to dance and what to sing.

But the professional level is slightly worse than that of ordinary doctors.

However, in Ouyang's words, our hospital is also a double construction unit of spiritual civilization. You can't go to every meeting and just get a health model back!

Tall Naza is wearing a brand-new coat and a touch of makeup. In the white coat, I was wearing a white shirt, a pair of washed white light blue jeans, white boat shoes under my feet, and veins clearly visible under flesh colored silk stockings.

In addition, the girl has a slight literary and arrogant atmosphere. Darling, the regional managers of Ge almost want to record it with a camera as their advertisement.

The chelating agent was applied to the mother to be's big belly, and the probe moved slowly in Naza's white hands.

Move, move, as a result, Naza was trying to stretch her face. Although her business is not top, she is also a qualified doctor.

Looking at the two fetuses in the screen, Naza found a problem, so in full view, and the mother to be was with her.

The girl didn't know whether to say it or not. Her superior doctor knew there was a problem as soon as she saw Naza's face. She went forward and looked at it directly, with a click in her heart.

"This is how to screen, pick around, pick a problem pregnant woman." He doesn't look well either.

In such a big scene, he couldn't get his attention, then got up and smiled and said to the pregnant woman, "lie down for a while and let's take a picture!"

He went out and gently said a word to the attending doctor in the color Doppler ultrasound room. The attending doctor hurried into the clinic from the observation room.

Then, within a few minutes, the attending doctor came out with a bad face and gently said to the deputy director.

After a few minutes, the deputy director also came out and his face was not good. Just about to whisper to the director.

Zhang Fan was unhappy, and the doctors in the observation room began to whisper.

"It can't be that the instrument is too high-end. They can't use it. I said earlier. Isn't it a waste to put it in the tea vegetable hospital! When I was studying in the capital, I used this instrument! "

This is the deputy director of color Doppler ultrasound in the traditional Chinese medicine hospital next door. Looking at such an advanced instrument, he can only look at it. Who is not jealous.

"What's the matter? If it doesn't work, can we let the patient come here for the most advanced color Doppler ultrasound in the future?" This is a question from doctors in county-level hospitals.

Zhang Fan is not happy. How can he fall off the chain at this time.

"Say, what's the matter? Say it. There are so many experts present. If you have any questions, let's solve them together."

Zhang Fan said in a bad tone to the deputy director of the color Doppler ultrasound room.

As soon as I said this, the doctors who came to the observation room looked at me with an expression that I was an expert.

In a word, Zhang Fan temporarily pulled the doctors to his camp. He followed Ouyang in the past two years.

The deputy director looked at Zhang Fan, then looked at his director, and then said with embarrassment: "twin pregnant women, one of the children has no thumb in his right hand!"

As soon as this was said, the people present looked bad. When the new instrument was turned on, they originally wanted a colorful head. Although it was a hospital, everyone also hoped to have a good beginning.

At this time, everyone looked at the doctors sent to the selected hospital. The doctors in the county

hospital looked red and dry, "we clearly checked that it was normal and healthy!"

"This is the advancement of our instruments. Directors and doctors can have a look in person."

The doctors looked bad, and the dealers began to advertise at this time.

The doctor of the county hospital reluctantly entered the color Doppler ultrasound examination room. Before long, he also came out with a bad face.

He said, "why is it gone? There is clearly something. How can it be like this!"

"Turn on the camera and let everyone see!" Zhang Fan directly asked Naza in the color Doppler ultrasound room to turn on the camera.

Then the four-dimensional ultrasound image appeared on the display screen in the observation room.

At this time, pregnant women are no longer sensitive and know that there is a problem. Doctors one after another, doctors older than one grade, go in and out. The expectant mother's heart is clenched into a pimple. Tears begin to fall involuntarily, and then the crying is called a splashing.

"What's the matter, what's the matter, what's the matter with my child. Doctor, you must save my child."  
"

Two fetuses, four small feet, two heads and four small hands can be seen on the display screen. Advanced instruments are advanced and very clear.

At this time, everyone looked at two right hands, and someone said gently, "one, two, three... Hey, there's one less! This instrument is really clear! "

Zhang Fan was also watching. He found something wrong, and his originally tight face relaxed.

Zhang Fan stepped forward, picked up the microphone for the dialogue and said to the people in the examination room, "Naza!"

"Yes, Zhang Yuan, I am!"

"What's going on inside? Who's crying?"

"Pregnant women!"

"Don't make her cry, let her breathe deeply and change her position!"

"OK!"

When Zhang Fanyi spoke, everyone stared at the display screen closely.

"Stop crying, stop crying. Zhang Yuan is trying to find a way! " Naza comforted the pregnant woman. In fact, she had no spectrum in her heart.

"No matter how capable Zhang Yuan is, he can't change a finger for the child."

If the thumb, especially the thumb of the right hand, is defective, she can get the disability certificate directly. Therefore, Naza is also very uncomfortable.

The pregnant woman breathed while crying, with tears and snot all over her face and mouth.

As the pregnant woman moved and inhaled, the child in her stomach felt uncomfortable. "I'm so comfortable lying down. Why should I change places?"

They quit, and then their little feet and hands began to dance, holding their belly and pushing their belly with their hands.

"Hi! Hi! Hi! Look, everyone, the child's fingers come out. The child has fingers. "

Not only in the observation room, but also in the examination room. While doing the examination, she shouted, "ha ha, those with fingers, those with fingers!"

The pregnant woman who cried for a long time looked at Naza with blurred eyes. When it was determined that the child had fingers again, the pregnant woman didn't complain at all. It was a feeling of narrowness of escape.

"What the hell is going on?" The young doctor asked curiously at this time.

The doctors present and senior doctors have figured it out, but at this time, no one is willing to steal the limelight from Zhang Fan. Everyone looks at Zhang Fan with a smile.

GE's dealer looked at Zhang Fan and gave a thumbs up. "Zhang Yuan, Niu, not only did the operation well, but also had a good hand in color Doppler ultrasound examination. Great, great! "

Although the dealers are not doctors, they are no worse than ordinary doctors in terms of color Doppler ultrasound.

They didn't see the problem, but Zhang Fan saw it. They couldn't help but admire it.

Zhang Fan smiled gently, pointed to the display screen and said to everyone.

"The two children are naughty and healthy. In fact, he was talking about his fingers just now, so everyone felt that one finger was missing. "

"Er, Zhang Yuan, how did you see it!"

"Hehe, let's talk to the director of the color Doppler ultrasound room. He is an expert in this field. In the future, if other hospitals have uncertain patients on color Doppler ultrasound, send them to tea vegetable hospital. "

Zhang Fan explained to everyone with a smile, and then began to advertise his hospital.

## **Chapter 732**

I don't know from when, major events in China are usually discussed at dinner. For example, when Lao Xiang wanted to kill Lao Liu, he had to choose a party to eat, drink and have fun.

In modern times, it is often the same. Before the meeting, the important things have been settled at the small dinner table. Two cups of grass and a mouthful of meat are easy to say.

The opening ceremony of tea vegetable hospital is also a thrilling process, and the ending is perfect.

In the envy and jealousy of a group of doctors in other hospitals, the inspection instruments in the tea vegetable hospital were also ignited.

When he left the equipment manufacturer, Ouyang couldn't close his mouth. He not only smiled, but also kept asking others to come back to tea vegetable next time. He didn't receive well, and he didn't go to the scenic spot at the foot of Tianshan Mountain.

Anyway, old lady Ouyang is very warm and polite. However, after all, tens of millions of equipment from others have been sent. No matter what the purpose, Ouyang must also be polite.

After seeing off the agent, Ouyang held a hospital affairs meeting and directly asked Zhang Fan and Ren dean to be responsible for the daily work of the hospital.

Then the old lady went home one day fishing and one day drying the net. However, according to the grapevine, the old lady has recently been fascinated by the TV series of Bangzi country: my uncle.

It's strange. Obviously, she is a female soldier with iron blood and red makeup. She loves watching this kind of TV drama. While watching, she is still holding a paper towel in her hand and ready to cry at any time!

Zhang Fan has left the hospital for almost half a month. Many surgical departments have not made ward rounds. After going to work in the morning, Zhang Fan is ready to start ward rounds.

Zhang Fan's current ward round can be called the administrative ward round of hospital leaders. This ward round must have hospital records.

Zhang Fan took the heads of the medical department, administration department, pharmacy department and equipment department to start the ward round from the orthopedic department.

Under the current medical insurance policy, orthopedics is a backward element of the hospital every year. A little relaxation is that the drugs and equipment exceed the standard, which also gives doctors and hospitals a headache.

During the ward round, Wang Yanan swayed around in front of Zhang Fan.

As before, Wang Yanan was not only Zhang Fan's girlfriend's best friend in front of Zhang Fan, but also had a mentoring relationship with Zhang Fan.

Vaguely, there was a little intention to monitor Zhang Fan for Shaohua, so he spoke quite casually, like a proud little official holding the Shang's sword.

But now Zhang Fan is not the former Zhang Fan, but the girl is still the former girl, and the girl's two years of work has also made her grow a lot, so she wants to appear in front of Zhang Fan and wants to stop talking.

Looking at Wang Yanan with his hands in his coat pocket and not going to change his dressing, Zhang Fan also smiled in his heart, but his face didn't move. It's estimated that there will be some moths for him to smile.

"After checking the room, don't change the dressing. What are you shaking here? Are you the leader of the Department?" Zhang Fan deliberately said to Wang Yanan.

As soon as Wang Yanan saw that Zhang Fan finally spoke, there was an expression of your understanding on his face, but his speech was still very pleasant to the ear.

"Zhang Yuan, can I report something to you alone?" The crowd looked at Zhang Fan, then at Wang Yanan, and then dispersed with a smile.

As we all know, when Zhang Fan first came to the hospital, he was in a group with Wang Yanan. Although they were both hospitalized dogs at that time, in fact, we all know that Wang Yanan was the first apprentice Zhang Fan took in the hospital.

With the improvement of Zhang Fan's level, Wang Yanan, even the director of the Department, was polite to her.

I used to look at the face of her uncle in the Health Bureau, but now I look at Zhang Fan's face. The girl is also a good person.

So now in the hospital, Wang Yanan is the envy of the hospitalized dogs, while Lao Gao is the envy of the director level.

Although Lao Gao seems to have no right now, the Department Directors respect Lao Gao more and more, not to mention others, because Zhang Fan always maintains a kind of teacher's respect for Lao Gao.

"What's up, say it." In the former assistant director's office, Zhang Fan asked Wang Yanan to sit down and began to ask.

With Zhang Fan's promotion, the office was originally to be demolished, but the head orthopaedic nurse was stunned and didn't move. He just left it empty and didn't want to use it for others.

"Zhang Yuan, you have to decide for me!" After Wang Yanan and others went out, they showed their true colors. What convergence and sensible things were gone in front of Zhang Fan.

This is also a little girl with one hand. At the beginning, even if she had to stay in surgery with tears, Zhang Fan actually appreciated it.

To study medicine and engage in clinical practice is to need people who take hobbies as their career. People with this spirit will definitely go farther than most other people who only take this industry as a rut.

Zhang Fan looked at Wang Yanan and smiled, "you're almost a bone, a branch and a bully. Who dares to bully you.

You robbed the patient the most fiercely. You exceeded the standard monthly for medical insurance control. If you didn't do all the operations, I thought you were badly short of money recently. "

"Who gave you a small report? Besides, it's not my fault. No one wants the patient outside my hand. I've done it all. Why don't I say it!" Wang Yanan is not happy.

"Well, there's no dust on your nose. Come on, what's the matter. I'm still busy. "

"You don't know. Xue Fei went to the magic capital and showed up in the Department the next day after he came back.

I went to foreign affairs. What's the big deal? Take a broken mobile phone, show off the photos he took with who, and what surgery he can do now. Also said that we are all rural steamed stuffed buns and have never seen the world!

You don't know. Not only me, but also the good tempered Xu Xian almost fainted. Wang Guofu and he have become enemies now! You have to take it out on us! "

Wang Yanan talks to Zhang Fan. Xue Fei will definitely show off, but he has never seen the world. Xue Fei never said it. He is not stupid.

"Oh, I see. When I go out, I'll inform the medical staff to punish him for his bonus. I'll be on duty during working hours. I can't beat him! " Zhang Fan knows what Wang Yanan's love means. The girl is definitely a drunken man, not wine.

"No, no, no, I don't mean anything."

Wang Yanan sees that Zhang Fan wants to get up and get up quickly.

"Oh, it doesn't mean anything. You spared him for a while."

"No, I want to study ~!" Seeing that Zhang Fan was not on the road, Wang Yanan's face turned red.

"Is it your turn to study orthopedics? I remember Wang Guofu didn't go out either. "

"He is now the backbone of the third Department of bone, not our first Department of bone!"

"And Xu Xian!"

"He agreed to let me go first!"

"Huh?" Zhang Fan immediately looked at Wang Yanan " You won't be forced, will you? I can tell you, don't bully others. You have a good temper and eat more than you can occupy! "

"No, don't wrong good people. Am I such a person!"

"I look like it!"

"What! He broke up with his partner, and then I introduced him to a partner! "

Wang Yanan said with a little red face.

"Oh, and then he was willing to give way?"

"Yes!"

"It's not sugar beans. Anyone who wants to go will go!"

"Please, master! Really, I also want to see it! I want to see how far the technology of big cities is from us.

Ask the doctors in our department. I've hardly been home in the past six months. I'm in the operating room every day. I want to improve. I want to make my technology more skilled.

But now I seem to have reached a bottleneck. I can't improve much with any effort. "

Wang Yanan's rare soft neck and face, and his exposed skin is all red. If he sweats a little, it's definitely sweat.

"Er!" Zhang fanmeng was stunned by Wang Yanan's master!

He was stunned. He was neither surprised nor surprised, but shocked. He knew the girl's temperament too well.

In small places, Wang Yanan is also a rich family. His parents are all leaders of the unit. His family and friends are either section chiefs or directors. Such a family should not be too comfortable in small places.

The temper developed since childhood, don't say bow your head, even if I don't quarrel with you, it will give face.

As a result, the girl softened her mouth and temper and became a matchmaker in order to study and improve her level.

Zhang Fan looked at her, looked at a short hair like a young man, looked at her blushing and stubborn girl with tears.

"Where do you want to study?" Zhang Fan recognized it. Even if others said he opened the back door, he also recognized it. What kind of doctors should be trained if such doctors are not trained.

"Well, I want to go to the water jar. If I can't, I can go to Xihua. I can't. I'll go to Shaanxi Military Medical University. "

Wang Yanan doesn't have the fierce way just now. It's estimated that she rarely lowers her head. She's

not used to it. My eyes are full of expectation.

"OK, just the water jar. I'll contact you! What do you want to do in the future? Spine or joint? "

"Spine!" Wang Yanan raised his head fiercely and looked at Zhang Fan firmly.

"OK, I'll contact director Zhao of their orthopedics department! Let you study in the shortest time! "

"Thank you!" With that, the girl turned and ran away.

"Hey, throw it away when you're finished!" Zhang Fan said to himself with a smile.

After leaving the door, Xu Xian saw Wang Yanan's happy face and began to dodge Zhang Fan's eyes. He seemed to have done something wrong.

Zhang Fan didn't bother him either. He worked for a year after graduation. It is estimated that the urging of marriage at home also made the young man jump off the building.

In the afternoon, just after work, Zhang Fan's phone rang.

It was Lao Gao's phone " Director, what's the matter? " Zhang Fan has been shouting Lao Gao for the director.

"Are you busy? Are you busy today? I was asked to invite you to dinner. Ask him what's the matter. He won't say it.

Do you have time? If you don't have time, forget it. "

Lao Gao seldom has such a relationship. Zhang Fan is also curious.

"Who are you? You've opened your mouth."

"Hi, my brother-in-law! He became a small section chief in the oil field. I don't know why. These days, he stayed at my house every day and encouraged your sister-in-law to let me invite you to dinner. Ask him something, and he won't say it. "

If it's someone else, Lao Gao will never lead this line, but for his wife, Lao Gao can't even talk.

Lao Gao's mother has Alzheimer's disease. His wife has served for more than ten years, pulled her pants and peed on the sheets. His wife never speaks much.

Even if you stay in bed for half a year when you leave later, you can't even find a bedsore on your body.

Lao Gao was not a director at that time. He couldn't afford a nanny. He was busy with his work. His wife

never picked Lao Gao in this regard. He really worked hard.

When the old man was sober, he took his wife's hand and filled his eyes with tears, while Lao Gao, his son, paid little attention to him.

Therefore, when Lao Gao's brother-in-law encouraged his wife, Lao Gao had to find a way no matter how difficult it was.

"You see what you said. What a big thing to have a meal. It's so difficult for you. Where are you? I'll drive with us."

Zhang Fan said to Lao Gao with a smile.

"Hi, thank you! My brother-in-law is not a person who doesn't know the importance. Don't worry about this. If he really has any excessive requirements, don't say you, I won't agree. "

"It's not that serious!"

#### **Chapter 734**

"Brother, Zhang Yuan agreed. After completing the examination, operate on him. Yes, yes, yes, he went to the operating table himself and operated.

You are welcome. Your business is my business. My brother-in-law is the old superior of Zhang Yuan. There is still some face.

OK, I'll come to you in a few years. There's another thing. I found another poor oil well recently. I didn't know you were engaged in this business before. This time you... "

Lao Gao's brother-in-law once again confirmed his relationship with the expert from the capital.

"Brother, thank you very much. Come to the capital later and talk to you. It's said that you want to go to north-west sales. It's not a big problem. Just wait for the news. "

After hanging up, the expert directly called the tyrant: "the strong dragon can't hold down the snake. Brother, I haven't seen a doctor at the academician level, but this Zhang Fan really gave me a long experience.

In the northwest, there is no way to take him directly in the frontier. He is really a master beyond the Great Wall.

Worried about your illness, I shamelessly found the old man's secretary.

This man's love is scattered. Brother, I've bled this time. Think about it, the little secretary in those years is a person who has seen the world now.

Not only did you put your picture in, but I also bought a set of ancient mahogany furniture popular in your South... "

Eat the left and eat the right. It's a typical broker's face, but it's also the local tyrant's money. If he didn't have money, he wouldn't have let the child speak badly and had an operation long ago.

This is not enough. A painting is not enough, but also a set of furniture is built in. The local tyrant meat is almost out of breath. The cancer is dead, and he is half killed by the expert he invited.

At that time, Zhang Fan directly explained at the dinner table that the hospital would not prevaricate the patient, and the doctor would not refuse the operation because of his words.

Lao Gao also said a word in front of his wife and brother-in-law: "only this time!"

.....

On Tuesday, the local tyrant's operation began. Zhang Fan took Lao Li, the senior director of general foreign affairs, and the director of hepatobiliary surgery together.

The difficulty of operation was not improved, and the physical quality of patients was better than that of patients in Fangdong.

However, the assistant was a grade worse. Although Zhang fanniu forced half of the magic capital, the overall medical level of the magic capital was there.

Zhang Fan aside, it seems that frontier medical care is not the same country as others.

In Fang Dong, Zhang fan does it with ease, and there is a giant Buddha lying behind him.

In the frontier, in tea, Zhang Fan himself is the last barrier. He has no reliability and no one to ask for.

Technically, no one can help Zhang Fan share the pressure. However, everything under the operating table is like a new world.

The whole hospital, just like a machine, is waiting for Zhang Fan's instructions at any time. It is absolutely unambiguous where to play. Even Ouyang, who is watching uncle, is waiting outside the operating room.

"Why hasn't the doctor promised by the devil arrived at the bird market yet? What are they doing when the Health Bureau in bird city leaves them? Want to dig people halfway?"

The Health Bureau here is also a waste dough. We have invited people, but we can't send them to us smoothly. "

More than two hours have passed since the operation. Zhang Fan hasn't had the operation yet. When the head nurse in the operating room came out to report to Ouyang, he didn't say much. He said, "Zhang Yuan is tired and sweating!"

Ouyang asked again about the operation time in the magic capital. As soon as she heard it, the old lady was worried and angry.

She knew that her assistant couldn't keep up with Zhang Fan. She was distressed and anxious, and then she began to get angry.

She was not only angry with the director of the medical department, but also angry with everyone. Even the little nurse brought an earring, which she saw and told the head nurse.

For a time, the inside and outside of the operating room were burning with fire. Except where the director of the medical department licked his face and got scolded, others hid Ouyang like ghosts.

"Knife!" After Zhang Fan cut off the tumor in the last step, the head nurse flew out like a little bird to report.

"No, I can't hold on. If I extend it for another hour and a half, I guess I'll have to find someone to replace it. Zhang Yuan, you have to think about training the reserve army. "

Lao Li, director of general foreign affairs, said to Zhang Fan with emotion. Outside the brain, ophthalmology play is called a fine. If the doctors here can make achievements in their thirties, they are directly genius.

For ordinary foreigners, they can only have some qualifications at the age of 40, but it takes only ten years. After ten years, the operation is slightly larger and more difficult. The patient can't stand it. Let's

not say, the doctor himself can't stand it first.

"Don't tease me. Before I get up, I'll find someone to hold you. You have to lie on the table for me.

All tea vegetarians, without you, how many operations have to be closed, don't you know?

Hold on! Who makes you an expert in tea, a sharp knife of tea." Zhang Fan didn't dare to attack the confidence of the two old men again. Even holding and shouting, let the two old men have a happy operation.

As for the operation of pancreas, the two directors are old. Other operations can still have a war.

After the operation, the local tyrant's son saw his father and found Zhang Fan to bow to Zhang Fan. This time, he knew too well. If he didn't have his own Lao Tzu, it was estimated that he couldn't hold this thing.

Zhang Fan not only saved his father, but also his family. If God gave him another chance, he would never say that.

Now he, Zhang Fan is not a crab soldier. He doesn't dare to think about it, but he knows what he is.

.....

The frontier is beautiful, but the end of September in the frontier is the most beautiful moment. Any spring, summer and winter is not the opponent of this season.

Melons and fruits smell fragrant. Hami melons with big pillows are sweeter than honey. Eating them can make your lips ache for three days. When eating, which is sweet? You can stick your mouth without drinking water.

All kinds of grapes with seeds can not only satisfy your appetite, but also make you pee more smoothly.

Seedless grapes, full of stuffed mouth, and then gently closed, darling, the thin skinned grapes burst slightly in the mouth. The burst sweetness stimulated the taste buds and began to tremble.

Juicy tender meat, filling the mouth, is really a satisfaction. If you are greedy for cold, chill it again, a little ice, between freezing and non freezing.

God, if you eat it once, you'll never forget it in your life.

Cattle and sheep on the grassland eat the little cattle and sheep that grew up with flowers. The aroma in the meat does not need any seasoning. A handful of green salt and a pot of snow and landscape are the days of immortals.

Tea is a treasure. Lao Li advocated giving this piece to Lao Maozi. It's really time to scold. If it weren't for the children of Xianghu Lake, it's estimated that later people would have to swallow saliva and look at the people opposite to eat such delicious food.

Tea has not only pastures, but also fertile fields. The basin is moistened by the snow on the snow mountains. A handful of seeds in spring and a cart of grain in autumn are like Su province. If God doesn't give face, there will be no harvest.

After tens of thousands of mu of good farmland, wheat and rice mature, high-tech Kangmai should go down the field and only harvest the ears of wheat.

In the past, after the local people collected the ears of wheat, a fire sent the straw back to the field. Later, it didn't work, but there were places to go, and the paper mill collected it.

Then, the small tractor loaded with wheat straw like a mountain set out. The mountain like wheat straw is not exaggerated at all.

The small tractor is not as big as Santana on weekdays, but after loading wheat straw, it suddenly becomes a road bully. One car fills two-way and two-way lanes.

Some hearty parents let their children lie on the straw like a mountain and follow the tractor into the city.

Really, not for anything else, not for your overload, not overload, just for you, let the child lie on the haystack, you should pull out and slap 500, and it doesn't count whether your face is swollen or not.

Just when Zhang Fan was busy preparing for his marriage, a phone call, Zhang Fan put down all his things and rushed to the hospital.

A serious car accident happened at sunrise in Chage, a big township of tea and grain.

A small tractor pulled several tons of wheat straw onto the road. There were six children lying on the wheat straw, the oldest ten years old and the youngest seven years old.

The little tractor pulled too much. He even played drag racing with TN's.

The paper mill is also a shameless thing. They know that farmers can't buy grass. In order to keep the price down, they set a grass harvest time. After this time point, they don't want it.

During the day, when the traffic police go to work, the small plane dare not enter the city. After the traffic police get off duty, they can pull more times before the sun sets, and then drive the tractor into a small plane.

It is estimated that many cities can see that every autumn, on the highway in the evening, grass

mountains are moving, huge grass mountains are pressed, and even tractors can't be seen.

The small plane was flying fast and racing on the road with black smoke. The frontier is Tianshan Mountains. Most of the mountains in this place are stone mountains, which can pop up a stone tip from time to time.

As a result, it was estimated that the pilot flew too low. Accidentally, the Grass Mountain was hung on the stone mountain.

The speed was too fast and the center of gravity of Caoshan was unstable. At this time, the small plane overturned.

It was really the old driver who turned the tractor into a plane. As a result, TN overturned the car.

Pity the children on the grass mountain. Suddenly, there was a great change. The two young children didn't grasp tightly. They were thrown out like guns and piaji burned on the hot road like pancakes.

The four older children turned over with the small plane.

The roads in the frontier are generally mountains on one side and rivers on the other.

In minutes, the Grass Mountain on the small plane turned down the ditch with great potential energy inertia.

And the pilot, the shameless pilot, jumped out of the car.

Looking at the two children burned on the road and looking at the Grass Mountain in the ditch, he made a rescue call before fainting.

It was reported to the government at the first time, and then the boss of the Public Security Bureau was scolded by the leaders of the government.

Swearing can't solve the problem. Fire fighting, armed police, 120, went out at the first time.

The local hospital, at the scene, even the patient dared not move“ Come on, call Zhang Yuan of tea vegetable city hospital. Come on! ”

Looking at the dying child and the doctor of the county hospital, tears can't stop flowing down!

He hates his parents for their lack of heart, his low technology and his helplessness.

**Chapter 735**

Medical treatment is a very lame thing. In the early stage of this industry, we can judge by logic, such as abdominal pain. Through more than ten years of accumulation, we can judge that this guy is not going to have children, but has appendicitis.

In the middle stage, life and death are often determined at a glance. I can do this operation, I can do it, I can't do this operation, I can't do it, I can do it, I can't do it, I can do it, I can't do it, I can't do it, there's no ambiguity.

What logic and judgment are useless at all.

At the bottleneck of practicing, the so-called logic begins again. Oh, this thing is similar to rabies virus. Well, it has an extra hat, so it is estimated that you can try rabies vaccine.

At this time, in fact, it depends on the knowledge accumulated in a lifetime to guess.

There are thousands of drugs and thousands of diseases. If there is time, it is estimated that most diseases in the world can slowly find original drugs to overcome.

However, the disease will not wait for human beings to explore, nor will it wait for you to try drugs one by one.

At this time, it is a serious reflection of whether a doctor has suffered in his life, whether he can only follow the book, or whether he really has two brushes.

In the season of crisp autumn and high sky, chageri's emergency doctor estimates that he will never forget this day in his life.

Under the blue sky, the Green River and the grass pasture, the shepherd dog stretched out his big tongue and lay quietly on the roadside watching the children falling on the road.

And the moment he opened the door and got off, his throat was like a knife hanging again, and the acid from rumination in his stomach scratched his throat.

With the nurse's aunt, before the car was stable, he jumped down, carried the first-aid kit and ran to the child who was still convulsing on the road.

Blood, like spring water, gurgles towards the outside. The little head was like an open beer, with blood and blood foam flooding.

"Come on, run. Let you eat less and eat less. You can't run fast now. "

The nurse's aunt, who was full of rich meat, shook her whole body, wave by wave, from top to bottom, from bottom to top, panting like a cow, biting her lips, she tried to get rid of her legs.

I didn't take the doctor's complaint to heart at all. Now is not the time to argue. If it's on weekdays, it's estimated that she can put him under her and ask him for mercy.

After arriving at the place, on the hot road, the emergency doctor knelt directly beside the child, covering the bleeding and touching the carotid artery.

"There's help, come on, oxygen bottle, hemostasis, morphine, cardiogenic."

As soon as the voice fell, the fat nurse made the corresponding disposal at the first time.

Let go of the first child. He checked the second child for the first time. His small face was blue and purple. His closed eyes could not hide his painful face. Only his slightly twitching limbs reminded him that he was not a rubber doll.

"After intubation, the child had multiple fractures of ribs, shock and suffocation of breathing."

Speaking as fast as a machine gun, the nurse listened and dealt with it. At this time, she wanted to have four hands and tear off her toes as hands.

Just after the doctor took a breath, he heard the tractor driver lying on the road crying: "doctor, there are four children in the ditch, please, help them! I kowtow to you. It's all my fault, my doll! "

The doctor, who thought he was a doctor of two children, stood up. Looking at the tractor and Grass Mountain in the beach, he picked up the rescue box and began to jump down to the river.

When he saw the child, he didn't have to check it. He knew that he couldn't deal with it. He didn't even have the courage to reach out and pull the child out.

The poor child, with shriveled lips and desperate eyes from a young age, quietly looked forward to the uncle in white.

Looking at the child's chest and the child's body pressed by the Grass Mountain, he was in despair. The child's praying eyes and lips trembled slightly: uncle, help me, pain!

Directly hit the broad-minded northwest man like a sledgehammer. At this time, he hated his skill and his helplessness.

How to do, how to do, like hysteria, he sat at the foot of the grass mountain. For a moment, he thought of a person.

A person who made him admire his skills to throw his arms and legs to the ground, remembered the man who was interspersed with white cross-country and a touch of red in the four directions of tea!

"Zhang Yuan! I'm chazik's emergency doctor. There are four children in critical condition. I dare not move! "

As soon as Zhang Fan answers the phone with a bowl, all the people in the family will not have the autonomy to put down the dishes and chopsticks.

Before Shaohua asked, Zhang Fan put down the phone, picked up his clothes and began to turn and run.

While running, he said to Shaohua, "there is an emergency. Call Xue Fei, Xu Xian and Wang Yanan and ask them to rush to the hospital immediately."

Shao Hua, who opened his mouth, didn't ask for a word. Zhang Fan had already run out of the door. The girl said: be careful!

"Hey, it's okay, it's okay, uncle, aunt, parents, Zhang Fan. It's strange that they don't have an emergency! You eat first and I'll call. "

Shaohua then began to call.

Squeeze, the child squeezed by Caoshan is like a deflated balloon. His chest not only collapses in half, but also his bone stubble is like a white burr or a tusk like jade protrudes out of his body and shines on by the dazzling setting sun.

Bones with flesh and blood, faintly with strange blood red, reflecting light.

Sharp weapon damage is like a rude strong man, going straight to and fro, making decisions in one word and making decisions at a glance.

The crush injury is like a piece of chewing gum that is chewed to no sugar. If it is torn, it can pull out one or several long lines wherever it sticks.

One day it gives you hope, and another day it causes organ failure, so crush injury is like a pile of mud in the injury discipline, which can't be thrown out when you grasp it in your hand. Without three-thirds of the ability, I really dare not get this piece.

In the tea vegetable hospital, Zhang Fan ran to the hospital, and the 120 in the emergency center began to flash.

Zhang Fan jumped onto his cool Luze in two steps and shouted to the driver of 120: "where to go for a visit?"

"Car accident, chazik." The driver of 120 quickly put out his head and shouted to Zhang Fan in the distance.

"This car won't work. Drive out the three operating cars. Quickly, contact the county hospital, bring plasma, one with four, and a more agile nurse. "

"Yes!" The head nurse of the emergency center shouted.

Before long, Xue Fei ran into the hospital with a mouthful of oil. Without even breathing, he jumped on Zhang Fan's cool Luze.

Then Xu Xian, Wang Yanan, Xue Xiaoqiao and the doctor rushed to the hospital.

"Let's go!" Zhang Fan didn't have time to report to Ouyang, so he ordered to start directly.

At home, the class was busy transferring people, and then reported the situation to Ouyang. Ouyang couldn't sit still at home.

As soon as I heard the phone, I let the driver chase Zhang Fan out of the city, and then the government's phone arrived.

When 120 got out of the hospital, the mounted police knew that something had happened as soon as they saw the famous red light specialist kuluze, a red brand, plunge into the turbulent traffic regardless.

In the tea vegetable traffic police brigade, the superior has explained that once the car starts running the red light, don't ask what the situation is, and open the way for others first.

The real is a privileged car that convinces everyone.

Riding the police, the team leader gently approached Zhang Fan's window.

"Zhang Yuan, what's the situation?"

"Zhazyk car accident, vicious car accident, now the other party also has a 120 car heading for tea. I need time! "

Zhang fantou didn't turn, but kept accelerating, accelerating, overtaking, overtaking and overtaking.

"OK, I'll ask for instructions now!"

Zhang Fan ignored him and continued to accelerate.

"Hi! Hi! Hi! Look, the police are leaning against the window. He has to speed up. Brother, support you and turn over the motorcycle. You are the most beautiful boy of tea! "

Some people are not afraid of big things.

There is also a careful observation, "Hu Lili, what, get out of the way, don't you see 120 running on fire!"

"Hi! Give way, this car has to give way, or I will break this road today. "

"Full cooperation, you open the way all the way."

"Copy that!" Then, the police picked up the walkie talkie, "brothers, flash lights and whistle, open the way for Zhang Yuan!"

For a time, 120 sobs and the urging sound of the police car. Cars on the road gave way.

The emergency 120 of charik, 100 kilometers away, also flew.

The emergency doctor kept the child under the Grass Mountain, while the nurse aunt ran with the child treated in the emergency towards tea.

"Come on, come on, balanzi, come on, no, their breathing is getting weaker and weaker. Come on, balangzi! "

The young ambulance driver drove 120 to the extreme. Sweating, he stared at the road ahead. Like a rally driver, concentrate.

"I'm Zhang Fan, I'm Zhang Fan, Dean of tea vegetable. Where are you now?"

Mercedes Benz on the highway, Zhang Fan kept calling each other.

Finally, it is estimated that the other party has a signal from the mountains“ We'll be at the county boundary in a minute! "

"Good!" With that, Zhang Fan said to the walkie talkie: "Xue Xiaoqiao and Xu Xian are in charge of the No. 1 surgical vehicle. The other party is coming soon.

You have the two children in the car. Are there any questions? If there are any questions, please raise them immediately! "

"Report, no, we go all out!"

Purple lanterns approach from the opposite direction. Under the sun, like purple rivers with white horses, they drive towards each other without slowing down.

"Zhang Yuan, the expressway has been closed."

"Good!"

"Zhang Fan, Zhang Fan, this is Ouyang. The second batch of rescue workers have set out, about 50 kilometers away from you."

"Good! European hospital, we will connect with each other immediately, leave an operation vehicle and operate immediately here. We continue to set out towards the scene of the accident. "

"OK, be sure to pay attention to safety."

"Yes!" Zhang Fan replied.

Stop, the first operating car stopped. Chazik's emergency nurse and 120 driver were like blood people. When they stopped, they ran down with two young bodies.

Zhang Fan stared at the child's body, stared at the child's face, took a dead look, then bit his lips, turned his head and continued to speed up.

"Come on, keep up!" Zhang Fan shouted in the walkie talkie.

The speed of kuluze has increased by 200, and the surgical car produced by Volvo has not fallen much.

Like a giant steel beast, galloping on the high speed. Time, like a blunt knife, cuts the child's life little by little.

## **Chapter 736**

Waiting, it is estimated that waiting for rescue is the most difficult thing. If you add a little heavy emotion to this difficulty, it is estimated that adults are fine and children are dying.

Chazik's emergency doctor, kneeling on the edge of the haystack, gently wiped the faces of four children with salt water.

While using a large bottle of sugar and salt water, gently feed them along the children's shriveled lips.

"Be obedient. Come and drink more. Drink more and it won't hurt. Drink more and you can recover quickly.

Listen, good, don't sleep, come on, don't sleep. Open your eyes and my uncle will sing to you the swan goose. "

The man with stubble on his face knelt on the ground, his nose and tears stained his face. The man like a bear tried to make his voice softer and kinder.

Singing loudly in his mouth, he stared at the children and looked at the direction of tea in the distance.

"Hurry up. I can't hold on. " Looking at the children around him, he couldn't help thinking of his children. He was distressed. The pain was like an ant biting an insect.

The groans of the four children, like a chainsaw, went up and down on the tip of his heart. He wanted to stop the sound of the chainsaw, but he was afraid that the chainsaw would not make a sound.

What is a contradiction? This is a contradiction. Give some morphine to relieve the child's pain, but looking at the flattened half chest, morphine will inhibit breathing.

If these children were his own, he would definitely use morphine regardless. Few people can endure this suffering, but doctors are ordinary people.

But today, even if he can't bear it, he has to bear it, not only to bear it, but also to find ways to distract the children.

The voice like a broken Gong and the song like a wolf roar float away in the wilderness and into the blue sky.

.....

On the highway, large trucks pulling raw materials from various countries stopped on the highway one by one.

A handsome traffic policeman with sunglasses and black motorcycle boots stood in the middle of the road, expressionless in front of the cars.

One thing down, that is, the traffic police. If other occupations stand in front of these Yadong shuttle vehicles, it is estimated that the driver will make his mother don't know.

"Traffic, what's the matter? The penalty tickets have been opened. Look, why don't you let us on the road!"

"There is a serious accident ahead and the road is temporarily closed."

Highways, let alone tractors in other provinces, sometimes motorcycles with smaller displacement are not allowed to get on the highway.

But the high-speed in the frontier is different. There are countless herds here, and the high-speed route is often the route for the transition of herds.

Therefore, it is strange to see herds on the highway in the pastoral area in the frontier, especially when the field changes in autumn, groups of cattle, horses and sheep embark on the highway.

In particular, some leading large livestock, horses, sons, old aunts and cattle, have a very bad temper. Walking on the highway is better than the traffic police.

You can't use the big horn to urge, otherwise, turning your ass is a hoof. Now some thin sheet metal cars can definitely change in one hoof.

Herds can get on high-speed roads in special areas, which is also a frontier feature, but some people will drive tractors to pretend to be herds, and then compete with cars to test the speed.

So don't be surprised to see a tractor with black smoke and racing wheels on the highway in the frontier.

.....

Whistle, the doctor of chazik hated the whistle for more than ten years. This time, he felt that the whistle from a distance was so lovely and sweet.

He took off his white coat and stood on the pile of the highway. The man like a bear threw up his white coat and danced like the wind!

While dancing his white coat, he shouted: "Zhang Yuan, hurry up, the children can't hold on, please, hurry up!"

Tears filled my face.

"Zhang Yuan, look, someone is waving a white coat to send a signal!"

Wang Yanan reminded Zhang Fan for the first time.

Looking at the lonely man standing on the green road stake, he shook his white coat with all his strength, so lonely and so detached!

"Come on!" Zhang Fan's accelerator has stepped on the bottom, and the roaring cool Luze is galloping on the road.

Get off the bus and finally arrive at the scene of the accident.

"Xue Fei takes the first group, Wang Yanan takes the second group, Li Xiong takes the third group, and I go to the fourth group. Xue Fei is ready to replace him at any time, exchange information, match various departments and rescue immediately."

"Yes!" There was no time to greet and talk. After Zhang Fan got off the bus, he ran and ordered.

Behind him were a group of doctors and nurses carrying stretchers, rescue boxes and electric pacemakers.

After seeing Zhang Fan and them get off the bus, charik's emergency doctor smiled and cried, and his dry lips said, "Zhang Yuan, you're finally here, you're finally here."

"Come on, Jack! All men must quickly pry open the gap! "

Sweat, like the river around, flows in the valley in autumn.

"Slow down, slow down, oxygen bottle! Adrenaline static push! Boy, hold on, we're coming. We are doctors of tea vegetable. Hold on! "

Zhang Fan looked at the dying child and shouted loudly.

One, two, one, two, it's too late for the jack. Both men and women started, pushed the pedals, cried and shouted, and finally there was a gap in the grass mountain!

Slowly, the children were gently carried out one by one.

The sky was a little cloudy. When the child was carried out, the sun suddenly escaped from the shelter of the clouds, and the light sprinkled on the river valley and among the group of people.

"Wang Yanan, can you take down the operation of double femoral tibiofibular fracture?"

Zhang Fan bared his eyes, as if Wang Yanan could not answer well and was about to devour her. He looked ferocious and his tone was severe.

"Report to Zhang Yuan, I can take it down! Please order the leader to resolutely complete the operation."  
"

A female voice resounded through the valley. Breathe! It's not worth the girl's life and death. She licked her face and forced her to stay in orthopedics. She didn't waste her youth and time.

"Good! Take a group and start the operation! The operation vehicle forms four areas, and the four operations must be carried out simultaneously at the first time.

The head nurse showed me your shrewdness and said, "keep an eye on every operation and contact things outside the operation."

"Yes, Zhang Yuan, I'll do my best."

Looking at the poor child, like a broken wicker, when on the stretcher on the stage, it was as poor as three sticks.

In this regard, when Zhang Fan and his family carried out the children, one of the children endured severe pain and gave Zhang Fan a difficult salute from the young pioneers.

A simple salute makes a group of professionals accustomed to life and death cry directly.

do you have any pain? It hurts, but there is still a trace of Chinese spirit in my little body.

"Come on, boy, uncle will do his best!"

Zhang Fan had to ask others to take the group for surgery, because the most serious child had been in shock and coma, and his vital signs were flickering. It can be said that just like the oil lamp that was about to go out, a little wind could even make him leave the world early.

"Start the operation!"

For a moment, in the turning Valley and on the highway, only the quiet police lights were flashing. Even the river was deeply afraid of disturbing the doctors and flowing quietly.

Occasionally, birds flying through the mountains make people feel that the world is alive.

"Go and have a rest. Look at your hands, wrap them up and drink some sugar and salt water." The nurse left under the operating car looked at the man of chazik and said softly.

In order to save the child, the doctor ran through the river valley. He didn't feel much when rescuing,

but now he looked carefully. The blood on the broken skin was stained with soil and glass debris. The bottle in his hand was broken.

Shaking hands and hoarse voice, "just wrap it up. Now I don't have the mind to rest. I don't expect to be safe in my life until I can't wait for news."

The nurse did not force him, but squatted gently beside him and wrapped him up.

It's all medical. She knows his mood too well. Doctors are not afraid of visits, difficult operations and long hours. What doctors really fear is that they have nothing to do in the face of diseases and patients. This is a shame for doctors.

When the moan sounded, he in a white robe could only watch the patient die step by step. To tell the truth, his heart was like a knife.

At that time, he had the opportunity to go to the mainland and the south, but he couldn't let go of here and the mountains and rivers here. But now he has made up his mind that he must improve his skills for this landscape.

"Scraper! Small, this is a child. Give me large. Isn't it damaged much? Come on! " Two legs, two femurs, two tibias and two fibulas. Looking at the child's swollen body, Wang Yanan was furious.

Just like when she just entered the hospital, if a word is wrong, she will hate others. It is not that she has no EQ, but that she is too focused.

"Aspirator, the chest is full of congestion. Come on, pressurize, blood transfusion, 1000cc, come on, can't stop!"

Dr. Song of cardiothoracic surgery was the second group. The children he took over had broken ribs like Weihua biscuits. His chest collapsed like sandwich bread. All the chocolate in it flowed out, but the bread collapsed.

The children in the three groups had pelvic fractures, swelling below, like roasted red quails, and kept flowing bright red blood.

In the last group, Zhang Fan took Xue Fei, the most serious child. He landed on his head, squeezed his chest, bruised and lacerated his lungs, and had multiple fractures, that is, he was connected by the meat on his body.

"Knife, craniotomy! Xue Fei, open your chest! "

The two were performed at the same time. The blood pressure and heart rate were reported by the anesthesiologist every three minutes.

As time ticked by, the gauze used to wipe the patient's blood changed almost a pile.

During craniocerebral surgery, Zhang Fan tried his best to reduce pressure and stop bleeding. The child is too young to delay a little. His life has not started yet. He can't fall down at the beginning.

Bit by bit, the child's blood pressure finally stabilized, his heart rate slowly began to slow down, and his breathing slowly stabilized.

Just when Zhang Fan breathed a sigh of relief, the door of the surgical car was opened by someone.

Zhang Fan's heart suddenly sank. He knew that these professional and professional people would never be so reckless unless something happened.

"Zhang Yuan, patient No. 3 suddenly had massive abdominal bleeding and lost his blood pressure. Now he can't even find the bleeding point, and we don't have enough plasma."

The little nurse cried through the surgical curtain.

Zhang Fan's hand shook gently. He is now the general manager here. He must come up with ways and give orders for anything.

At this moment, he can't hesitate or even think about it. He must subconsciously give a correct order.

Otherwise, the consequence of delay and ambiguity is the death of the patient.

However, he still has a child with open brain in his hand. He can't separate himself. He wants to end the operation immediately and rush to patient No. 3, but he can't leave or leave.

His lips made him bite and bleed.

"Go on a tour under the operating table. One person will watch two operations. The doctor who can perform the operation will report his blood type, draw blood on site and give blood transfusion on site. Come on, this is a dead order! "

"Yes!"

"I'm type A. I have the same blood type as this child!"

"Smoke 400 CC, I'm in good health!"

The blood just drawn from the doctors was transfused into the child's body.

Li Xiong, the main knife of patient No. 3, was sweating like a child's blood. Even there was a pool of water in his socks. If you can take one step, it is estimated that you can make your toes sound like meat

squeezing water.

"Where is it? Where is it? Where is the bleeding?" He knows too well. Now he has drawn the blood of doctors and nurses. If he can't find the bleeding, there's really no way.

More than ten years of medical experience, standing on the operating table, although I dare not shake my hands, my legs really have a tendency to kneel, and the pressure is too great.

"No, no, Dr. Li, there is not enough plasma. We must continue to lose!"

The teeth are broken, but the bleeding point can't be found.

The little nurse cried and ran again. She stumbled and fainted and came to Zhang Fan's operating car again. This time, she didn't have the strength of the last time, because the little girl had just smoked 200cc.

This is not a holiday. It's blood loss in a short time. The human body is very uncomfortable. The brain is still misty. Why is it suddenly 200 less? If she is in poor health, she may be dizzy. Let alone run away, but she still runs with her teeth clenched.

Zhang Fan's heart is about to be crushed by his own oppression. The operation has been improved countless times. No matter how fast, there will be an accident.

"Take mine. My blood type is the same as that of the child." Zhang Fan bit his teeth and said to the itinerant nurse.

"But you..." the itinerant nurse hesitated.

"Smoke! Pull it from your thigh, come on!" Zhang Fan's anxious eyes are about to jump out.

He really can't help it. Do you want to take one away?

No, no!

There was a blood drawing needle hanging on her thigh. The head nurse was smoking and crying. She didn't know why. She just wanted to cry, just wanted to cry loudly.

A bag of plasma, Zhang Fan was a little dizzy. He bit his tongue and shook his head. The operation in his hand could not tolerate his dizziness.

But a bag of plasma was not enough. The doctor's plasma of the last blood group was also transfused, but

Li Xiong can't wait to slap himself. Why can't he find it.

I watched the hanging plasma coming to the bottom, but the bleeding could not be stopped.

At this time, 120 sounded, 120 sounded in the distance.

Ouyang came with the second echelon of doctors.

Zhang Fan listens to 120 and finally puts down his clenched heart.

He can finally lay down his burden now.

"Dean, there is no plasma..." the little nurse stumbled to Ouyang.

"What are you crying for? Wipe the water off your face for me. You are a professional nurse, not a common people. You have no confidence. What confidence does the patient have in you!"

The triangular eyes stood up and stunned the little nurse. She scolded and calmed down. The scolding world seemed to be in order again.

After scolding, Ouyang straightened his hair, which was disordered by the wind, "help me up! ~"

With the help of the director of the medical office, Ouyang stood in front of Zhang Fan's car.

Then he picked up the loudspeaker: "comrades, it's urgent. There's no time for blood test and waiting for the blood in the blood bank.

But today we came. If we didn't come, we had nothing to say, but today we came.

We came in white coats. We can't watch our children die in our hands.

We are his hope, we are his last hope and the last straw.

We are determined not to let him leave the world with regret and disappointment.

Today, you can't give me less. We must... "The old lady hasn't finished yet.

The director of the medical department shouted, "Dean, my blood type is the same as that of my child. I have a physical examination every year and there are no infectious diseases."

"And me!"

"Me too!"

Listening to Ouyang's sonorous and powerful voice, Zhang Fan's heart stabilized and the corners of his

mouth tilted slightly.

The white line began to draw blood in rows.

"Tell Li Xiong what to worry about. There is a hospital to put him at the bottom and let him show his hand. My old lady is here to promise him that my old lady can get him as much blood as he wants today. As long as he has peace of mind to do the operation, don't have any pressure. Give me the operation and get the child back from death. "

### **Chapter 737**

Iron and strong, not to mention a woman, even if a bearded rough man is too strong, he is incompatible with this peaceful society.

However, special events, special fields, special industries. Such people are really indispensable.

Zhang Fan seldom swears, let alone slapping his thighs and jumping to swear at his mother. Because in the environment where he grew up, such a person is rare except that his father scolded him at home.

So let Zhang Fan raise his finger and point to others' noses to scold his mother. He feels that he can't do it. Even if he scolds, he is not confident enough.

But Ouyang is different. Ouyang's curse has a realm and an ability. It's estimated that it's also the gift of the old lady.

Usually in the hospital, if you don't meet Ouyang, you won't meet her.

Not everyone is willing to make progress, and now the living environment is much better. You have enough to eat and drink. Why do you let others scold you if you have nothing to do.

However, when it comes to the critical moment and the special critical moment, don't watch the old lady skip work and sneak home to watch Bangzi TV series. Zhang Fan and Ren Li are responsible for everything in the hospital.

Once the critical moment came, the thin old man was the Dinghai God needle. In her laughter and scolding, all people began to act regularly and purposefully.

It's so strange. It's estimated that this is the personality charm of a special character.

Ouyang stood on the front of the car. The autumn wind blew, and her black-and-white and gray hair floated on her forehead. Her eyes, like eagles, patrolled the whole site.

She seemed to know exactly who was doing. Not only did he see it clearly, but he also had to shout a voice or two from time to time.

"Chief nurse, don't get close there. You can't lift or move. Organize your little girls into four groups and be ready to replace the nurses in the operating room at any time."

The chief nurse was in a hurry to help move drugs from the backup vehicle in the crowd.

Standing in front of the car, Ouyang was wearing small black shoes and waving his hands. The doctors and nurses in front of him were ordered by the old lady in good order.

In her busy schedule, she didn't forget to press Lao Gao. "Dean Gao, come on, go to the highway intersection to meet the leaders, and carefully report the specific situation to the leaders."

Lao Gao wanted to get into the operating car, but as soon as he heard it, he shook his head and went to the highway.

The Milky cool Luze seems to have become Ouyang's leading platform. In the past, Ouyang climbed 120 when there was an accident. When Zhang Fan had this car, Ouyang also disliked that 120 was too high and not as powerful as kuluze.

In the operating room, Wang Yanan took doctors from the first Department of bone, the second Department of bone and the third Department of bone, steel plates and bones, like building blocks, and the crushed bones slowly formed a shape.

Li Xiong of the three groups finally found the bleeding point in sweat.

The second group has also pulled the children out of danger step by step.

Zhang Fan took Xue Fei in the fourth group to operate on the most serious children.

People are very strange things, especially Chinese people. They can be Jackie Chan alone, cross the river dragon and go down the mountain tiger. They are very powerful.

When it becomes two or three, it is often you who pull my legs and I take off your pants. Anyway, no one wants to run fast.

But once the crowd gathers. Especially in the face of disaster, thousands of people are particularly United when they face suffering together.

As if afraid of death, one after another, just like wolves, protect the cubs in the middle.

This character, this characteristic is different from compound injury. What will never change in compound injury is that one plus one is absolutely greater than 2.

"Skull hemostasis complete, wire mesh!"

"Scapula reduction, steel plate!"

"Lumbar fracture reduction, steel nail!"

"Pelvic fracture reduction, bleeding stop, plate!"

Even the ribs with fractures that don't need steel plates on weekdays are equipped with many steel plates. The injury is too serious.

A child who was not very old directly became an iron baby or a transformer.

After the operation of the first group, Wang Yanan didn't care to have a rest and hurried to the fourth group to help.

The second group ended, the third group ended, and more and more doctors gathered in the fourth group.

Everyone looked at the child with his own blood flowing through his body and watched quietly.

Xue Fei's first operation back from his study. After Zhang Fan finished his skull, he looked at the operation on his chest. "Yes, it seems that you haven't wasted time and opportunity in magic."

The people around looked at Xue Fei, and their eyes were angry. Who wasn't jealous? Who was Xue Fei? Everyone in the hospital didn't know.

Rescue and disaster relief, sleep a first-class merit. On weekdays, it can be said that the head can be broken, the blood can flow, and mahjong can't stop.

Surgery is often picky. Don't mention the responsibility. If it weren't for Lao Gao and Zhang Fan, he wouldn't be easy to mix in this hospital.

But now, if you look at him again, orthopedic surgery will not be said. It's his own specialty. Now he can open his chest, and it's very slippery. Even Zhang Fan and Zhang Yuan began to praise him.

"Oh, not yet, not yet. Foreign hospitals have made some achievements in orthopedics and chest surgery.

I have to work hard. Zhang Yuan, I heard that our doctors in Xinjiang are coming. It seems that the frontier will send some doctors out. Look at me... "

"Shameless!" One after another, the abuse soared, and the operation was done. Everyone was happy and excited. There was no way to vent. As a result, Xue Fei became an explosive point.

Wang Yanan's small face was red. She shouted and scolded the loudest. It was so big that her ears began to hum.

"Why?" Ouyang outside the operating car asked the director of the medical department.

"Hehe, a group of young doctors under Zhang's hand crusaded against Xue Fei."

"Oh, hehe, youth is good. Why are you waiting? Help me down. Is it not windy to stand so high? "

Anyway, Ouyang is always a reasonable mother. Everyone was happy that the operation went well.

Lao Gao took two or three birds on the highway and reported the situation to the leader.

"Well, stop it, close the abdomen and perform the operation! Have you finished all your operations? How's the child? "

Zhang Fan finished his work and began to ask.

"The children in group two have passed the dangerous period."

"The three groups also passed. Alas, the bleeding was too serious at that time. If we hadn't donated blood at the first time, it would have been on the stage. Thank you, Zhang Yuan. Thank you! "

Li Xiong bowed with a murky face.

"It's all right. This time, when you go back, lie in bed and think more. It doesn't make you think about what's wrong, but summarize. As long as you think through, I think you can definitely go to a higher level."

Zhang Fan nodded and taught everyone his experience and Li Xiong.

Li Xiong nodded gratefully.

"What about a group?" Zhang Fan looked at Wang Yanan on one side and asked deliberately.

The girl stood proudly waiting for Zhang Fan's praise. She was like a little dog running out to pick up the Frisbee, wagging her tail and waiting to be touched.

"All fractures are fixed, and the child is awake!"

In the field of men, a girl's crisp voice immediately attracted everyone's attention.

"Good, good, Asian man's progress is the greatest. Make persistent efforts and have the opportunity to send you out to gain more experience."

Zhang Fan smiled and thumbed up, and then took the opportunity to implement Wang Yanan's study. This is growth, Zhang Fan's growth outside surgery.

After the operation, Zhang Fan took a group of doctors out of the operation car. A group of doctors wearing white coats outside and blue surgical clothes inside came to Ouyang.

With the breeze blowing, not only the hair, but also the rustling white coats. I don't know which goods came in, but they are not all cotton.

"Report, all the operations of the rescue team have been completed, and there are no fewer children! All through the dangerous period. "

"Good! Hard work, on behalf of..." Ouyang just wanted to speak. At this time, he heard a sudden sound like a group of tanks coming from far and near.

Then, as soon as everyone looked, there was a torrent of black smoke in the distance, coming to the scene of the accident at high speed.

Tractor group, tractor group appeared on the highway. The number of people is boundless, and the tractor, when hundreds of tractors appear, is no different from the tank group.

The vast tractor appeared on the highway, which really had an appalling momentum.

Xue Fei looked at the tractors and his face turned white. "Zhang Yuan, Zhang Yuan, come on, find a way. If you can't explain clearly, being beaten is a small thing. I'm afraid of something big."

This bastard's brain circuit is always different from others. This situation reminds Xue Fei of the past when he ran to the next village to steal a dog when he was a child, and the people in the village almost beat the shit out.

Zhang Fan thought for a while and ignored him. Instead, he glanced at him. However, although he

ignored Xue Fei, Zhang Fan gently moved his steps and blocked Ouyang in front of him.

In fact, there have been many people from the Central Plains since ancient times.

In the early years, a group of diplomats under Emperor Wu left a little blood here, and then a large number of Central Plains people came here in each dynasty.

Lao Lin, who burned opium, was the first person to draw a complete map of the river valley, and then Lao Zuo made great achievements.

Then a lot of Xianghu children stay here to inherit their families. Later, the bearded King stationed in the frontier with people from all over the country, half army and half people, taking care of the frontier of the motherland.

However, the frontier is too big for you to imagine. Then relatives pull relatives and countless people from the mainland form one village after another in the frontier.

It seems that the village here is not a village with a surname, but the people here are either cousins or cousins. There are too many relatives with dogs pulling sheep intestines.

To tell the truth, the army may be the great wall here, but they are the sea god needle here. Without them, maybe it would have been a Stan long ago.

Almost all the villagers in a village have family ties, so when their children and their children have a car accident, almost all the people in the village are out.

Men and women, as long as they can move, come out. This is the habit of Chinese people. Chinese descent. Even if they can't help today, people must go and support their spirit.

On the way, the people of the township government informed them. All right, go back and save the child.

On hearing this, the respected people in the village came out to speak. The village officials may dare to cheat people on other things, such as homestead subsidies.

However, in this regard, the Chinese people are most concerned about the future generations, and they dare not cheat by giving him ten courage.

"How did you save the children? Are all the children complete?"

In the car accident, they were deeply afraid that their child would be disabled.

"How can I save it? I'll tell you. One doctor in the municipal hospital counts one. He only saves your child by pumping out his blood and injecting it into your child's body.

How many times have I said, don't overload, don't let children play with tractors, and donkey hair is stuffed in each ear. This time, you wouldn't have time to cry if others didn't come in time. "

When the child was saved, the officials in the village also had confidence. They usually dare not say such words. Can it be people who dare to break into the frontier? Usually the words are wrong. There are too many fists and feet facing each other.

"What should I do? People saved our children without death. What should we do? " The prestigious stood in the crowd and shouted.

"Shall we go there empty handed? We're going to lose face. Go home, load up this year's new wheat and grain, and take the rare food of the city people. Let's go to comfort the doctors in the city. "

Then, in this way, the tractor group pulled the new grain, milled white flour, beat rice, killed chickens and sheep, especially the parents of several children, and even killed the pigs for the new year in advance.

Mighty

"Nothing!" Ouyang gently grabbed Zhang Fan's arm, and then whispered to Zhang Fan, "let the nurses and female doctors enter the operating car."

Ouyang is not afraid, but he has to guard against it. In recent years, the relationship has been too tense, and many contradictions often accumulate in people who don't use talking. It's not up to them to decide the cost of medicine and surgery.

As the tractor battle group approached, Ouyang slowly let go of Zhang Fan's arm, because she saw the gratitude on people's faces.

I even saw the bloody pigs, cattle and sheep just slaughtered in the car.

"Benefactor, you are a great benefactor. If the six children are really gone, how many people have to jump into the river and hang themselves. Thank you, thank you! "

Wang Yanan gave Xue Fei a white look. "Be a villain. Do what you can!" Since Xue Fei came back from his studies, Wang Yanan and Xue Fei have become enemies directly.

"I know an egg. I won't tell you."

Xue Fei was not embarrassed at all. He didn't have time to break straight with Wang Yanan. He quickly gathered in front of the people and held the villagers' hands. "Yes, yes, you're too polite."

Wang Yanan looked at Xue Fei and broke his teeth: "it's shameless."

"This is the newly milled flour this year and this is the rice this year. They are all eaten at home without pesticides and fertilizers.

You must take it with you. These cattle, sheep and pork have never eaten feed. They all eat grass on the mountain. The meat is very fragrant. You can't buy it. "

I can't help but say that a group of people desperately push things to 120 and plug them into various vehicles, but they can't stop them.

Ouyang was very excited. She often met this scene decades ago. She missed it so much.

"Villagers, villagers, thank you."

"No, we thank you!"

"There are a lot of six children. We can't give them to you now. When the children recover in the hospital, we'll let you take them home."

"Ha ha, OK, this is a good doctor! Children to you, we rest assured that we are down-to-earth. We trust you. "

.....

Zhang Fan's co pilot sat Ouyang.

"This is the will of the people, this is the will of the people. What is medicine for? Isn't it for this moment? Well, this satisfaction is more substantial and proud than you have completed a major operation. "

"Yes!" Zhang Fan nodded, and his heart was warm.

"Hehe, take your time! You have a long way to go. Don't feel very proud of being surrounded by demons. Everything is fake. This is true. "

"Well! I don't have any. " Zhang Fan's warmth makes the old lady say a word without a trace. Hi!

.....

"President Ouyang, what about the goods sent by the villagers?"

That's why Lao Gao called Ouyang.

"All the benefits are paid, and then the goods are converted into money and returned to the villagers."

"It's hard for the government to explain!" The director of the medical office secretly glanced at Zhang Fan. He was a little nervous.

"Who should I tell? Can I use it? Who doesn't like it? Let him come to me. Just do as I say! "

## **Chapter 738**

The motorcade was ferocious when it came. It was Biao running. When it returned, it was much more relaxed. The 120 with the purple flashing light turned off looked much softer.

Tractor groups, like reviewed tanks, lined up to see off the white motorcade on the highway.

Really, just in the frontier, you may see such a spectacular group of tractors receiving on the highway~

"Go back, all go back. It's inconvenient to occupy the expressway. You all go back!" Ouyang kept waving outside in the car.

At this time, she is the most amiable and lovely time. She not only smiles like flowers, but also is very reasonable.

In Zhang Fan's car, Ouyang's co pilot, Lao Gao and the director of the medical department are in the back row, while others are embarrassed to join in.

Inside, Xue Fei and Wang Yanan fought for a while and fell asleep quietly. It was false that they were not tired after a few hours of surgery.

Farewell to the villagers, although the doctors are tired, they are actually very proud.

This pride can't be measured by money. Social development is faster and faster, but this pride is less and less. When everything is measured by money, some things are more missed.

The motorcade left the scene of the accident, took the doctor and took the child slowly towards the tea vegetable city.

Slowly, the traffic police vehicles and the vehicles of the health bureau also slowly gathered in the hospital fleet.

Except for a few motorcycle mounted policemen and a police car with flashing lights and no siren, none of the other vehicles are willing to surpass Zhang Fan's kuluze.

They all follow the white team very consciously. When the highway was unsealed, large trucks drove across the road.

"There's a car accident. Look, this is the motorcade of the city hospital! After rescuing the wounded, they are going back now. It's said that one of the six children didn't die. It's really lucky! "

Drivers knew what was going on when they closed the road, so every car in the past would whistle once and flash twice at the white team to show their respect.

The doctors and nurses curled up at 120 nodded, dozed and even salivated. With the shaking of the car, there were bursts of snoring in the car.

Especially the little nurses running around. On their childish little face, the slight sunshine shines in. It seems that they can still find the Yellow fluff under their temples.

Bitter or not? Bitter, tired or not, but they don't care. When they choose this special industry, they already represent to bear the pain that ordinary people can't understand.

Their young bodies are not afraid of fatigue and hardship. They are afraid of not being understood and respected. At the age of eighteen or nine, many classmates and friends at their age are still in college.

But they have begun to face life and death. They are really a group of children in white coats.

It's not easy to face life and death.

.....

Hospitals, especially the third class hospitals in a region, have all kinds of emergencies every day or even every minute.

If there were fewer emergency cases one day, doctors and nurses would be very surprised and say, "God, only ten emergency cases came today. It's so happy!"

However, there are few days when there is no emergency or very few emergency.

After Xue Fei's study, Zhang Fan began to rebuild the emergency center. He originally wanted to talk to Ouyang Renli about this matter. As a result, Ouyang waved his hand and I'll see the results. Don't discuss other issues with me.

Then, the emergency center of the municipal hospital began to be rebuilt. From a simple emergency department in the past, it really began to become a comprehensive emergency center.

The myocardial infarction channel and the division of internal and external patients began to change one by one, and many advanced equipment brought by Zhang Fan from magic also began to be applied in the emergency center.

The original emergency director also felt that she was not competent for this increasingly large and scientific department. As a pediatrician, she had to hand over her power to Xue Fei and began a long-term outpatient service.

Zhang Fan stared at the emergency center for two weeks. The emergency center is also a big change of the little black duck. Many emergency operations used to have to enter relevant departments, but now they are done directly in the emergency center.

Xue Fei specially brought several attending doctors to the emergency center. The boy really wasn't interested in business before.

Now he used snacks, and the huge emergency center made him very impressive.

In particular, several attending doctors in general surgery went to other doctors' homes to deceive them in person.

"How many doctors are there? Not to mention the deputy high school in line, there are no less than a dozen leaders. There is no future.

Come to the emergency center. Here you are. You are the head of general surgery in the emergency center.

Do you know why Zhang Yuan can be so dazzling? "

The doctors of ordinary foreigners were suddenly curious. Zhang Fan has become a legend in the eyes of the young surgeons of the tea vegetable hospital.

"I don't know! You know? "

"Of course I know. Let me tell you about the past of Zhang Yuan, and you will understand.

In those days, when Zhang hospital was in quark, one person took all the operations of the whole county

hospital.

You think, when he graduated, what surgery he could do was some appendixes, some gallbladders and some fractures.

But they are talented players. It can be said that a quark county hospital can't stand the support of a large number of operations. Suddenly, Zhang hospital crossed the early stage of surgery.

Quantitative change reaches qualitative change, and then it soars to the sky. We should know ourselves clearly. If we are not talented players, we should rely on technical players. What does technology depend on? It depends on surgery.

But look at you, ordinary foreigners. When can you take the lead? Let's go to the emergency center. As long as we go, I'll pat my chest and promise that those who study can definitely go ahead.

This is the experimental field of Zhang Yuan, my brother. If I didn't take good care of you and your character passed the test, could this good thing turn to your little rule that there is no one on you naked?

As long as you are willing to come to the emergency center, in a few years, with the service of a large number of operations, you think, we dare not compare Zhang hospital.

But which of these brothers in your department can be your opponent. Brother, the opportunity will die! "

Xue Fei didn't work as a lecturer. He really lost his mouth. That's it. He fooled several chief doctors of general foreign studies.

Zhang Fan pretends not to know that he is pressing Lao Li, a general foreigner, not to let Lao Li rebel. It is too difficult to train a general foreigner's doctor.

After setting up the frame of the emergency center, Zhang Fan had to stop the pace of restructuring.

The first hospital is really short of people. It lacks people who can work. A radish is a pit. It can't be pulled out of any hole. Some people don't want to.

Second, it's September, and the wedding day is coming. Zhang fan can't completely let go. He doesn't care about anything.

"The invitation of the hospital is about to be sent. Should the team and the hotel implement it?" Shao Hua took the notebook to implement one by one.

Time passed step by step. Zhang Fan went to work in September morning and went home in the afternoon to get married.

At the end of September, Zhang Fan was going to get married and asked Ouyang for marriage leave. After reporting to the Organization Department, Zhang Fan completely took his first long leave after two years at work.

"Zhang Fan, go and buy some corsage. I just ordered it. It's not enough."

At home, Zhang Fan completely became a waiter and listened to president Shao's assignment.

"There are ten bridesmaids and ten best men. Zhang Fan, do you think so many bridesmaids and best men conform to the rules?"

With the change of Zhang Fan's identity, more and more people associate with Shaohua. Students and colleagues who used to have little contact have become friends.

"Yes!"

Zhang fantou, who has been busy recently, has become bigger. He has to pull Li Hui from his unit to help.

"When we get married, many relatives from afar will come. We can't stay at home, and we have to book hotels!"

"I'll go and leave it to me." As Zhang Fan's only fellow townsman and co-worker in tea, Li Hui is very interested.

As soon as Li Hui left, Zhang Fan wiped his sweat. He just wanted to sit down and have a rest. As a result, the doorbell rang again.

"Ouch, it's more tired than surgery." Zhang Fan didn't want to lift his legs, but he complained quietly. If Shaohua heard it, it would be another chicken flying dog jumping for a while.

Women before marriage are really excited.

"Zhang Yuan, ha ha, congratulations. Our manager came to inspect the tea vegetable this time. It is said that you are about to get married. I've come to congratulate you. "

When he opened the door, Zhang Fan saw the business manager of Siemens standing at the door with their regional manager laughing.

All the guests came to the door. Zhang Fan smiled and let people in.

Shao Huagang wanted to serve tea and pour water. As a result, people didn't even sit down. "Zhang Yuan, we just came to the door to say congratulations, so we didn't sit down. This is a little fun. When

you get married, our company will send you a congratulatory gift. "

Then he put down his things and left. Zhang Fan saw that it was a box of cakes like moon cakes, so he didn't refuse much.

People donated several high-end equipment to tea vegetable, and Zhang Fan couldn't do it too well.

Zhang Fan sent them out of the door and closed the door. He saw Shaohua looking at the moon cake box on the table.

"What's the matter?" Zhang Fan asked curiously.

"Little stone, come on, come on." Shao Hua's voice trembled.

Zhang Fan stepped forward two steps, not to mention Shaohua. Even Zhang Fan was dull.

The sun penetrated the window and shone on the box, sending out golden light. A box of gold ingots were neatly placed on the table.

Gold, this thing, even if it can't be used as money now, it's still quite shocking when a plate is placed in front of it.

Especially Shao Hua, who has worked in a bank, knows the value of this box of Yuanbao too well.

After the first reaction, Shao huaho stood up, "come on, Zhang Fan, chase!"

Zhang Fan turned his head and was about to chase. The door had not been opened yet, but it was opened by the key from the outside.

Then, Jing Shu, Zhang Fan's parents and Shao Hua's parents all came in.

Jing Shu opened Zhang Fan's cool Luze and took four old people to the market to choose some flowers.

"Have you seen two people in suits?"

"Yes, what's the matter?"

"Where is it?"

"Drive away!"

With that, he heard the flower basket in Shaohua's mother's hand crash to the ground, and then everyone saw the gold ingot on the table.

The golden ingot with beefy flesh and dazzling golden hair.

"This, this, this," Shaohua's mother felt that her mouth was a little dry. She was not a little lucky to get rich or happy. It was all fear and naked fear.

She didn't speak, but her nervousness was on her face. She knew that it was definitely given to Zhang Fan, but she couldn't say. Zhang Fan was only his son-in-law after all.

"Little stone, what's going on! We....." Zhang Fan's mother grabbed Zhang Fan's hand, kept talking in her mouth, and stared at Zhang Fan's face. After seeing the Yuanbao, her eyes didn't look at the hospital office any more, but stared at Zhang Fan, motionless, afraid that Zhang Fan would run away.

Shaohua's father sighed and took out his cigarette. The lighter couldn't catch fire in his hand. He trembled slightly like Parkinson's.

"Stone, Lao Zhang's family has been innocent for several generations. You can't let this squint.

Give them to others quickly, or your mother and I will leave tomorrow and leave here. You've been to your own day! "

The old man thought Zhang Fan had taken bribes, and his face suddenly turned green.

In this world, few people don't like money, but few parents value money more than their children.

"Yes, give it back quickly. We don't expect it to get rich. As long as you are safe and healthy, we will be satisfied.

Life is no more than three meals a day, and death is no more than a wooden box. I can't be a villain for this thing. "

Shaohua's father listened to Zhang Fan's father and finally lit a cigarette.

"Sister in law, come on, let me see, let me see, my God, so many yuan treasures!" Jing Shu screamed heartlessly.

She knows her brother and sister-in-law too well. She is not worried at all. She believes that her brother and sister-in-law will handle it well.

"Keep your voice down, keep your voice down, my ancestors, you won't let your mother live!"

Zhang Fan's mother let go of Zhang Fan and wanted to chase and pat Jing Shu, as if someone had been posted on the door to eavesdrop.

Zhang Fan and Shao Hua looked at each other, just like a couple after decades. What he thought, she

understood, what he wanted to do, she supported.

"Ha ha, don't worry. I'll send it back tomorrow."

"Don't send it back now. It's not a good thing. It's just a bomb. You can't tell when it's going to explode here!"

Zhang Fan's mother drags Jing Shu and doesn't let Jing Shu touch her.

"Manager Zhao, come here! If you don't come today, don't come again! "

Although with a smile, but the tone can not be refused. The Siemens manager dared not even say no.

.....

In Ouyang's office, Zhang Fan asked for a long holiday, and Ouyang had to water the flowers in the office again.

"You're rising too fast. Someone will definitely come to blend in this kind of thing.

But I can rest assured. But have you ever thought about what to do at your wedding. I can't help but let everyone come. "

Zhang Fan sits opposite Ouyang, facing a lawsuit at one end.

"You have to find a way. It's not a thing. It scared the family."

"Hehe, good. I have a reasonable fiancée and careless elders. Good!" Ouyang said happily.

"Today is over, but what should I do when I get married? You can't get married without receiving gift money. It's easy to talk about gift money. Now there are not one or two people staring at you. "

Ouyang lay on the boss's chair, half closed his eyes, talking to himself.

Suddenly, the old lady sat up, "go, don't worry. You don't have to worry about this. I'll solve it for you."

"OK, European Academy, where am I going? Are you ready for the speech at the wedding?" Zhang Fan didn't ask how to solve it, and after saying this, Zhang Fan opened the door and ran away.

"Son of a bitch!" Ouyang happily took out a piece of paper from the drawer.

## **Chapter 739**

Some people say that the greatest contribution of Confucianism is to put forward benevolence and sublimate rites. Benevolence or not, let's not say it first. This gift has dazzled the later people in China.

Like those who go against me die and those who go along with me prosper, many rules and regulations are taken out of context or pretended not to understand, and only consider what is beneficial to themselves.

When Zhang Fan was in his hometown, the most impressive thing about marriage was money. When he was young, at the end of each month, my mother talked about who was going to get married and whose old man died.

Then set aside a part of Zhang Fan's father's small salary. In his mother's words, we should never be unconventional. Otherwise, the more relatives go, the less friends get.

Zhang Fan has never been to other provinces, and he doesn't know much. It's a poor province in China. The money is definitely a burden on the common people.

There is a joke in Zhang Fan's hometown that there are more family and friends, and the village also pays more attention to this human relationship.

So, every year there is a lot of money to be paid, but the family has nothing to congratulate others.

The old man left early. His children were still playing with the mud bar, but it was not a thing to go out alone, so the couple lay in bed and plotted for a long time.

Finally, "the intestines and stomach at home are present. We must accompany the expert doctors from these big cities.

You see, there are two academicians, no less than ten River experts, let alone evergreen scholars.

Our tea vegetarians are really hidden dragons and crouching tigers. Here I'd like to name and criticize the leaders in charge of medical treatment. They don't have any subjective initiative... "

With the arrival of old Lu and old Wu, the people who originally wanted to call to congratulate also came.

Shaohua's eyes almost fell off at home, especially on the side of Shaohua's aunt and uncle.

I thought Zhang Fan was a small family. If Zhang Fan hadn't been the president of tea vegetable hospital, they would have jumped out and opposed it.

There is only one girl, and the others are boys. Moreover, Shaohua was originally very good. At the beginning, they thought that Zhang Fan was a little black and didn't deserve Shaohua, but now they look again, there are happy faces on one and two faces.

The bridesmaids, the girls led by Jia SuYue, have directly lived in Shaohua's house these days.

Jia SuYue, Wang Yanan, and several unmarried female colleagues who have a good relationship with Shaohua in the bank also have to participate. Even LV Shuyan of the hospital pulled Wang Yanan as the bridesmaid.

Lu Renjia looked at them admiringly with a big belly, "it's so beautiful!"

"Hey, I've been a bridesmaid for the third time, the last time, and I can't get married again."

Jia SuYue doesn't know what's wrong. His tone is not lonely, but it always means that the wind of the past has blown.

LV Shuyan, who was not familiar with them, smiled quietly and gently pulled Shaohua's arm.

In October 1st, with clear air and thousands of miles of tea, the leaves of Vermillion trees became red and red, and the cool breeze from the snowy mountains kept the hot autumn tiger stable.

The breeze is accompanied by the fragrance of flowers that are still open. The whole city is filled with fragrance of flowers and fruits, sweet, as sweet as Zhang Fan's heart.

This is tea, which is the best season in the frontier. As the sun had not yet risen, Zhang Fan had already got up and began to clean up.

Today is his wedding day. He's finally going to woo woo woo woo.

## **Chapter 740**

Early in the morning, before the sun rose, Zhang Fan went out of the house in suits and shoes.

"Zhang Yuan, I'm handsome today!"

"Ha ha!"

The yard is full of young people. They are all young doctors in the hospital and the director of the

wedding. Zhang Fan invited Lao Gao.

Lao Gao has a red corsage and not much hair. He rarely dyed it black. He not only dyed his hair, but also used mousse or head oil. It glitters.

"Well, well, don't make fun. Others haven't got up yet. Don't affect others. OK, count the number, sign up and take your place. "

"The director of the medical department takes the lead car, presses the car, and instructs the driver not to drive too fast. The photographer should take more shots."

"OK!" The director of the medical department got on the car with a smile and pulled the photographer's head.

"Xu Xian from the first Department of orthopedics, Xue Fei from the emergency center, outside the chest

Everyone noticed. Cheer me up after getting on the bus. It's not only Zhang Yuan's wedding, but also... "

"It's still our wedding, ha ha." Lao Gao is very kind on weekdays, so young people are not afraid of the old man and keep laughing.

On happy days, Lao Gao smiled and didn't mind.

The people in the community also slowly poked their heads out. In the family area of the hospital, almost all the people living here attended Zhang Fan's wedding, so all the family members poked their heads out to see the scenery in the morning.

"Darling, old man, old man, come and have a look. Look at how many Mercedes Benzes there are in the community. All red Mercedes Benz, darling. "

Chen Qi's invitation card was also sent by Zhang Fan, but he was not ready to participate. Listening to his old woman's yelling, Chen Qi's mouth was crooked.

"One, ten, twenty, thirty, my God, this posture, if I get married and have so many cars, I'm estimated to faint happily."

Some envy and some don't.

"Let's go! Get married!" Lao Gao watched the wedding personnel get on the car, waved his hand and shouted, and the car slowly set off.

In the northwest, when getting married, there is a stress, we must have a married woman whose zodiac and newlyweds are in harmony.

Moreover, this woman should not only belong to the right sex, but also be a woman with a complete family, that is, there are old at the top, young at the bottom, and a healthy husband in the middle. This position is called married grandmother.

When Zhang Fan asked about this position, the head nurses of the hospital broke their heads.

Most of the head nurses are older than Zhang Fan, just in line. Finally, the head nurse in the operating room was robbed by the head nurse in the operating room because his family was a dragon and Phoenix fetus.

"Ouch, ouch, Zhang Yuan, it's so handsome today. Come to my sister and spread some powder for you to whiten!"

When the car is driving in the urban area, when it enters the open area, the drivers also have fun and play with their driving skills. For a while, the finished shape will become a Y-line!

In the city, the old men and women who get up to buy vegetables in the morning are silly. Mercedes Benz is more common, but it's rare to see Mercedes Benz all red on the road.

It's hard to block the door or call the door. There are a bunch of strong boys in the hospital.

Singing is simple. A group of coquettish people in white coats who hardly have time to sing stand at the entrance of the building and sing loudly. Anyway, there are many people, so don't be ashamed.

"One from Zhang Yuan, one from Zhang Yuan." Singing and singing, everyone reacted. Today is not my daughter-in-law, but Zhang Yuan.

Then the boys outside the room and the big girls inside the room began to coax.

To tell the truth, Zhang Fan was baffled. Zhang fan can't talk about pentatonic incompleteness, but let him sing a song completely, it is estimated that he is still sure of the national anthem.

"I give red envelopes, I give red envelopes, open the door, I give you red envelopes." Zhang Fan was

directly black and bright under the coax of a group of people.

"Ha ha, no, I have to sing today. If I don't sing, I won't let you in." This is Jia SuYue's voice. She made the most noise in the door.

"Why don't we have a chorus!" Zhang Fan prayed to look at his colleagues and brothers around him. At this time, nothing is useful.

Originally, Zhang Fan had become a high position at a young age, and the operation was becoming more and more severe. Although it was not intentional in the hospital, it made everyone feel that they had to respect him. At this time, it is estimated that it is also the last chance to be presumptuous.

"Ha ha, no, one from Zhang Yuan, one from Zhang Yuan."

Zhang Fan really had no choice, so he just broke out and pulled his tie.

"Listen! I sang. " Then Zhang Fan, who tried his best to think, said, "the moon represents my heart!"

As a result, Zhang Fan sang a lyric song like sawing wood.

"Ha ha!" Both inside and outside the door were paralyzed with laughter. It is estimated that this is the effect that these people want. If Zhang Fan sings well today, it is estimated that Shaohua and Zhang Fan will be satisfied, and others will not be satisfied.

Zhang Fan's singing was so ugly that none of us were unhappy. Even the director of the medical office who wanted to persuade peace laughed.

"I'm dying, I'm dying! Ha ha, I'm dying! " Jia Su in the door laughed and tears flowed out, more and more.

Even the next door neighbors couldn't listen. They came from Sichuan and their wife went to Shaohua's house to help early.

He was waiting at home to attend the banquet. Listening to Zhang Fan's song of sawing wood, he couldn't help shouting: "fetal God! I'm dying! "

Finally, Shaohua's father had to come out. The old man was not willing to make a fool of his son-in-law, so he opened the door directly.

Chinese people's wedding reception is very lively. It's definitely more festive than foreigners who line up to say blessings like farewell. When the best man surrounded Zhang Fan into the gate.

The originally arrogant bridesmaids, like seeing a wolf, shouted and closed the second door.

Find shoes, get out of bed and bow to the woman's parents. Originally, it was very sensational in this place. Many brides can't help crying here.

But Zhang Fan is different from Shaohua's family. At the beginning, Zhang Fan had the cheek to mix here for a year. Even if it was sensational, Lao Shao couldn't come out. He was too familiar.

"Dad, mom!" Zhang Fan changed his mouth.

"Hey!" The old couple couldn't close their smiling mouths.

"Aunt and uncle, why don't you feel reluctant at all? It's funny!" Shao Hua's cousin is a little reluctant to stand on one side.

This bastard is not afraid of anyone at home, just Shaohua. Now Shao Hua is getting married. He should be the happiest. No one will bully him in the future, but now the boy feels like he is missing something. Looking at his uncle and aunt, he is more and more unhappy.

"In the days to come, you will go through countless ups and downs. We as old people don't have too many extravagant demands. We just hope you have a safe life and a happy marriage.

Shao Hua will give it to you later! "

"Dad, mom, don't worry!"

"Huazi, when you get married and become a mother, wife and daughter-in-law, you must be filial to the elderly, take good care of your husband and educate your children."

"Yes. Mom and Dad, I know. "

Although familiar people can't be familiar anymore, when Zhang Fan wants to go out with Shaohua on his back, Lao Shao still can't help wiping his eyes. Shaohua's eyes are also red.

"Set off!" Lao Gao took the opportunity to shout, and the bride went out.

In the auditorium, Zhang Fan's parents and Lu Laowu, the boss of the tea vegetable government, sat at the first table. Moreover, Ouyang did not know why, but was pulled to this table by Lu LaoLa.

"Zhang Fan has made great contributions to today. Look at today's situation and your protection for him today. You must sit here, or he will feel uncomfortable."

Ouyang listened to Lu Lao's words, which was happy, which was satisfied. She was very happy, really happy, wearing a skirt.

Hundreds of tables, in terms of the marriage of ordinary Chinese people, this scale is nothing, but look at

the identity of the guests at the banquet, nothing else. If these guests are organized, they can immediately set up a number of surgical hospitals in China.

When Zhang Fan and Shaohua appeared, the host of tea vegetable TV station began to play enthusiastically.

"In this golden autumn October, a day of national celebration..."

"Now let's invite witnesses! Let's welcome academician Lu, who has made outstanding contributions in the field of surgery in China. Lu is not only today's witness, but also the master of our groom. Applause!"

Old Lu came on the stage with a smile and applause.

"Darling, when did the boy put such a big tree on the plate?"

Boss Qi grabbed Zhao Jingjin and asked.

"You know!" Zhao Jingjin happily picked up sprite in front of him.

Old Lu said Zhang Fan and Shaohua. He not only gave instructions, but also made requirements. To sum up, getting married means growing up and working harder in the future.

After the old man came down, Ouyang went up. Ouyang was wearing a skirt and light makeup, looking at Zhang Fan and Shaohua.

The old lady is very happy today.

"As the leader of Zhang Fan, he is working and studying..."

After the wedding banquet, old Lu and old Wu couldn't leave if they wanted to. Ouyang followed with a group of people. Finally, old Lu and old Wu discussed it and went to the clinic for three days.

The two big takers nodded and behaved very well. Almost all the experts who came to Zhang Fan's wedding gave Ouyang face. None of them ran away from the clinic for at least one day.

Tea vegetable TV station rarely blocks all advertisements and broadcasts this news all day.

Not only Ouyang, but also the government was so happy that they didn't know why. A small frontier city came to visit so many great gods. God, it's not a dream.

Batu is the supervisor of Zhang Fan. After the wedding, he should be responsible for entertaining the guests and helping them.

Zhang Fan finally married Shaohua, the bride, into the door.

Making bridal chamber is a characteristic of Chinese people. In the early years, this activity actually reflected the popularity of the new couple and the hospitality of the family.

Later, it became a hint, a kind of single and curious activity.

What to eat apples, carrying your daughter-in-law is a thing of the past. There are too many people. Zhang Fan's new house can't help these people. Zhang Fan has to take young people to KTV.

"A platform call." Bad boy Li Hui shakes a group of single Wang to let Zhang Fan and Shao Hua perform.

"I won't! Another one, another one. "

Zhang Fan protects Shaohua. There are too many salty pig hands. Not only boys, but also single women are crazy here.

"Come on, let me show you!"

With that, Li Hui held Xu Xian and then held Xu Xian's leg in his arms. The two suddenly became a very ambiguous posture.

"Look, look, don't laugh!" Li Hui couldn't help laughing.

"Bang Dang, bang Dang, woo! Woo! Woo! The train has arrived! " At this time, Xu Xian cooperated and said, "what station!"

"To the capital station!"

Not only language, Li Hui also pulled Xu Xian's thighs around like a chain on the grunt of a train, and then they went in and out!

It's too ambiguous.

It's impossible not to do it. Zhang Fan has some prestige as the dean at this time. He is embarrassed by a group of people.

Shao Hua's EQ is a little higher than Zhang Fan. Seeing these bad boys pay more and more attention.

Shao Hua said to Li Hui quite seriously and emotionally, "I'll give you a toast. When you came to the frontier from Su Province, Zhang Fan told me about your original life.

It's not easy. When he was alone, there was no place to eat or drink. You didn't forget him.

He will never forget you. Take him to eat braised meat and xiaosanchuan. He can't say it. I thank you for him. I'll dry this glass of wine. Feel free! You are his good friend. "

"Well! Well, I'll do it. It's absurd for our suffering. " Li Hui doesn't know why he thinks of Wang Sha. The idea of tossing Zhang Fan next time is gone.

Then, Zhang Fan became everyone's wine.

"Hua Zi, Congratulations!" Jia Suyue took the Baijiu, wrapped it around Shao Hua, and drank with Shao Hua. "We are sisters forever!"

"Well, she's a good sister! Always. " Shaohua hugged Jia SuYue.

"Zhang Fan, you must cherish Shaohua. Well, promise me! "

"Well! Don't drink, you're drunk. "

"I'm not drunk. I'm not drunk at all. Huazi is my best sister. I want to hear you say the most emotional words to huazi! "

"Er!" Zhang Fan's scalp is numb.

"Come on, I really haven't heard you say anything emotional to me." Shaohua saw that there was something wrong with Jia SuYue's mood, so he urged Zhang Fan.

Zhang Fan gently closed his eyes and thought of Shaohua. In the windy evening, Shaohua stood quietly in the distance in a light blue windbreaker.

"The most important thing is to condense your eyes and infinite meaning. It seems that you have met in your previous life." In a group of semi intoxicating songs, a love word from Zhang Fan struck Shaohua's heart like a Hong LV bell and rang through Jia SuYue's ears.

"Deja vu in a previous life." Jia SuYue was drunk. She leaned against the sofa and was dizzy.

She remembered when Zhang fantu appeared in front of her. She insisted that he invite him to eat steak. His cramped appearance was as vivid as before her eyes.

Remembering this morning, she saw Zhang Fan from the window, like a knight, leading an army convoy.

Thinking of today's grand wedding, I have no choice but to regret the original ah, if only there were in the world!

Where does he still have the shadow of that year!

"The bride sings a song!" After dealing with Li Hui who braved the bad water, others have no characteristics.

After all, married men and premarital men are two species directly. Others just make trouble to let Shaohua sing. They can't think of anything like reporting to the platform.

Shao Hua got up boldly, took the microphone and began to sing.

At this time, LV Shuyan gently sat beside Zhang Fan, "today is your happy day. Can we have a drink? I know you don't drink well. Have a drink. "

"OK, thank you!"

"Thank me for what?"

"Thank you for coming!"

"Hehe, there are many people coming! Zhang Fan, one step late is one step late. You see the person who is drunk for you today... "She said, lifting her head to dry the Baijiu in the cup.

To tell the truth, for Jia SuYue, Zhang Fan is not afraid at all. He is as careless as fire. He comes and goes quickly.

LV Shuyan is different, just like oil, tearing, as if she is always looking at you and paying attention to you in the distance. Zhang Fan doesn't like this feeling.

I really don't like it. He doesn't know what others need, but he knows what he needs. But he didn't want to make Shaohua uncomfortable.

After drinking the wine, LV Shuyan gently left. Zhang Fangang was relieved and Wang Yanan came over.

"Don't make trouble. I'm haggard today!" Zhang Fan looked at the way Wang Yanan wanted to talk and stopped, and his heart was directly bad.

He is not the kind of person who can be handy among the flowers.

"Er!" Wang Yanan was unhappy. "Why, why can't I talk. You are haggard, is it good for you to marry a daughter-in-law? "

"Oh, well, that's good." As soon as Zhang Fan heard it, he knew that he wanted to be bad. His muscles relaxed. It was too difficult!

"Zhang Fan!"

"What!"

"You're married today!"

"If you have something to say, you can't learn..."

"Hum, have you contacted me about my study?"

The girl knows that Zhang Fan will definitely go on vacation for some time after his marriage, but time doesn't wait. The list of doctors sent by the frontier to study will be reported soon.

"Ha ha!" Zhang Fan finally laughed!

"No problem."

When he got home, everyone knew that Zhang Fan couldn't drink, and no one gave him a drink.

In the new house, in the bright red new house, Zhang Fankou's water came down.

Jiangshan, what is Jiangshan, this is Jiangshan.

Heshan, Shaohua biting Zhang Fan's arm!

Three points of tenderness, black and white, in charge of rivers and mountains, a word to accompany!
