

Chapter 771

The ox head of the owner of the chemical plant, the Audi who entertained the guests in the plant, and a number of vans pulled the injured children towards the city.

The boss is almost green with remorse now. Originally, they were from Beihe. After the Olympic Games, the whole factory was directly moved to the frontier because of pollution.

In the past, these children ran into the factory to play. He also turned a blind eye. After all, the children followed their parents away from their hometown and came to the mountain gully in the frontier. It seemed very poor.

As a result, he never thought that one kind-hearted person had become a bad thing that he regretted all his life. Not only did four children lose their lives forever, but also five were seriously injured and could save several. Now he has no spectrum at all.

Moreover, the next thing waiting for him may be the disaster of prison.

Industry, machinery, this thing is true. It won't be considerate to anyone. Every year, it is crushed by the noodle press. I don't know how many residual fingers there are. Young women stretch out their hands. As a result, a section of two or three bare fingers is missing.

Everyone is wrong, machine?

Moreover, with the development of the frontier, more and more industrial injuries appear.

For example, when Zhang Fan went to the magic capital earlier, there was an example of calcium carbide, but the people in the factory didn't care.

A guard, an elderly guard. At night, the coal in the stove was gone. The place where the coal was put was far away. It was too cold. He didn't want to get the coal.

As a result, I saw a half iron bucket of calcium carbide at the door. How thick is this iron bucket? It's almost as thick as the waist of a 100 kilogram fat man.

When the old man saw it, he was proud. He didn't have to take coal. Let the people who took over in the morning take it by themselves!

Just a little thought, really, is it a bad heart? Not bad, but it was such a small thought that it killed me.

He took a bucket of water and poured it into the iron bucket. As a result, he touched it and there was no fire. Then he turned back to the office to get the lighter.

In less than a minute, the acetylene gas in the iron bucket had filled the air.

The happy old man came forward and lit the lighter.

As a result, the acetylene gas filled the air exploded directly.

Bang, although the intensity of the explosion is not very high, it is in an open environment after all.

However, this burning energy is not small. What does acetylene gas do?

This thing is mixed with oxygen, which is used to cut and weld steel. The energy is many times higher than that of coal.

Bang, the face of the fire, directly burned the old man to death. This scene was like a flesh lump falling into a fiery stove, pricking and emitting oil flowers, which quickly turned into coke.

The burned old man is directly like an African. His hair is bent and tired close to his skin, and his skin is directly like a layer of black asphalt.

The body, especially the prominent parts of the face, such as the nose and lips, are all burned into a plane. The two empty nostrils are as black as the tail exhaust of a racing car.

It can be said that only the tongue of the burned old man was scorched red. It was really frightening to see that scene at that time.

On the scorched skin, there was a constant exudation of fat, broken and ripe oil and water. The old man in his seventies was like a child in an instant!

They didn't learn a lesson and finally caused a bigger accident.

For adults, this kind of thing has nothing to say, but for children, this is true.

If you want to blame, you can only blame the parents for not doing well in their words and deeds. You can only say so. What else can you say.

The motorcade raced into the city. There are injured children and parents in the car.

Employees, who have cars and others, all set out towards the municipal hospital. Even if they can't help much, it's always good to have more people at this time.

The owner of the chemical plant began to shake his hands when he was in the car. He wanted to contact the municipal hospital. However, when he came to the tea vegetable side, he felt that the medical treatment here was just like that and didn't care.

Now there was no way. He thought about it and called the boss who supplied him with clean coal.

He is looking for the right person. In the past, the management of industrial accidents was not very strict.

With the increasingly strict government management, these mining bosses and others do not know, but the municipal hospital must be maintained.

Sometimes, they are even willing to use millions to save an injured person's life! The traffic here is too cruel.

"Lao Chen, are you familiar with the doctors in the municipal hospital? It's better to be a leader!"

The boss with runny nose and silly water makes people tremble.

"Yes, yes, yes, what's the matter." Lao Chen, his heart clanged. It's not how much he cares about each other, nor how close Lao Chen is to the boss of the chemical plant.

It's his own payment, and the other party still presses him for millions.

"I won't lie to you anymore. There was an accident. The children in the factory played with calcium carbide and killed four and seriously injured five on the spot.

Brother, you know, once there are more than a few people, I have to go to jail. You must give me a hand! "

The other party is estimated to be stupid. He promised directly and incoherently at the first time and will help contact.

After the boss called, he sent a message to his wife, "go and ask for the bill. It's OK to spill, it's OK to pretend to be dead, and it's OK to ask for as much as you can."

For such a big accident, the police reported it to the county government for the first time. The leaders in charge of safety in the government are estimated to be swearing.

For a moment, the phones of Zhang Fan and Ouyang rang almost at the same time.

Ouyang was called by the government.

When I called Zhang Fan, I was the boss of the mine, and I called one after another.

After Ouyang answered the phone, he didn't have time to call the medical office. He ran out of the office and trotted all the way to the medical office.

Zhang Fan also chatted with Ren Li. As a result, his face changed color after answering the phone.

"What's the matter?" Ren Li looked at Zhang Fan and asked.

"There was an accident. There was an accident in the chemical plant. Several children were killed and injured. Now they are heading for the hospital. We have to go to the emergency center. "

While Zhang Fan said, Ren Li didn't slow down. After listening to Zhang Fan, she got up at the first time and ran with Zhang Fanchao's emergency center.

"How can children go to the chemical plant?" Ren Li didn't ask her questions. Because Zhang fan runs too fast.

"Fast, we must ensure that there is a vacant elevator to the operating room and ICU.

Now contact the blood bank in the city. Our own blood bank is definitely not enough.

Let the surgeon stop all non emergency operations. " Zhang Fan called the director of the medical office while running.

As soon as Ouyang entered the door, he saw that the director of the medical department had begun to call various departments.

When he saw Ouyang, he covered the microphone and said to Ouyang, "Dean, Zhang Yuan said that several children had been affected..."

"I already know! Do as Zhang Yuan says. Where is he now? "

"I've been on standby at the emergency center."

Ouyang turned directly to the emergency center.

In the emergency center, Xue Fei just came out of the ward with his hands on his back. He has a card now.

The deputy director of the emergency center, and the deputy director who has studied solidly for half a year from magic.

In the past, when he encountered some non orthopedic operations, he really begged his grandparents to invite other surgeons to the emergency center for surgery.

In such a large emergency center, if there are few operations in a month, he, the deputy director in charge of surgery, has no place to put his face.

After Zhang Fan went to the magic capital, Xue Fei finally had confidence under the care of senior brother Zhang Fan.

After coming back, the director of the emergency center and the director of Pediatrics also slowly began to transfer the power to Xue Fei.

Therefore, Xue Fei has a good life now. Looking at the subordinate doctors around him, he tries to make himself look like a leader!

Originally, he stood at the door of the ward with his back to say something. As a result, Zhang Fan ran towards the emergency center with a white coat.

This time, he couldn't pretend. He immediately pushed aside the doctor around him, raised his legs and ran towards Zhang Fan.

"Come on, push out the relief flat car and prepare the defibrillator and rescue drugs!" Zhang Fan ran, and when he saw Xue Fei, he gave orders directly and loudly.

Ren Li was also in the back, running and talking on the phone.

Seeing Zhang Fan and Ren Li, Xue Fei didn't ask. He directly turned his head and began to give orders to the crowd.

And he shouted to the nurse in the emergency center, "come on, call back all those who are off the night shift!"

This is the first large-scale rescue he came back from his study. He must show you that my deputy director Xue Fei didn't sleep!

It didn't take long for the hospital to be ready.

To tell the truth, this kind of rescue is much simpler than the doctor's rescue out of the hospital.

Out of the hospital, manpower, equipment and drugs will definitely be subject to various restrictions. In the hospital, in this area, the key third-class hospitals almost do not need foreign aid.

If foreign aid is needed, in fact, the chance of rescuing is slim.

The motorcade, like the train entering the station, kept honking and rushed into the hospital.

Opening the door, the people in the car jumped out one by one like blood eggs.

The nurses are dumbfounded. This is the injured one! Five children were injured at close range. When they got on the bus, the temperature rose and the blood began to react. They couldn't be blocked.

Adults sitting in the car are blocked by hands, covered by hands and pressed by clothes. Really, this journey is probably the most painful journey of their life.

As soon as Zhang Fan saw it, he immediately shouted, "where's the child!"

"Doctor!" Zhang Fan shouted, and a woman cried directly.

"Cry and beg, get out of the way!" A man pushed the woman away, and then shouted to the group of people in white coats, "doctor, help, help the children, the intestines are out. They are on the seats. We dare not move!"

Although he said he wouldn't let women cry, he himself had tears and a runny nose, and his face was covered with a beard. Red eyes, hoarse voice.

Xue Fei took the nurses to the car the first time.

"Sterile medium order!"

"Pa!" The head nurse put a blue middle single in Xue Fei's hand.

Because Xue Fei didn't look back and put out his hand with his back, the head nurse gave him a heavy, heavy hand.

Zhongdan, directly holding the child's intestines and facial injuries, Xue Fei had to wrap it with Zhongdan in such cold weather.

Then carefully and a petite nurse carried the child out of the car.

The parents, who were already quite anxious, saw that the child's face and body were covered with blue cloth.

Whether they are mothers or fathers, they are on the verge of collapse.

"My baby, my baby. How can I live? " The child's mother jumped at the child like crazy. She was

paralyzed in the place, hands and feet, rolling and crawling, desperately trying to see her child.

The child's father, with red eyes, "he's still alive, he's still angry, he's not dead yet. Why did you wrap him up. What are you doing! You save him! "

Tears, really, sometimes, men's tears flow like broken pearls.

"Get out of the way! Who said he was dead! " The doctors were busy checking the patients, and the little nurse came forward directly and pushed the parents away.

"Oh, oh, oh. Please, please! "

"Stop howling, the doctors can't hear it. Don't you see the doctors using stethoscope!"

Mourning came immediately.

To tell you the truth, no matter doctors or nurses, if they really talk about it, none of them has a good attitude.

It's not that they don't pay attention to it, but that they don't care about it. Although medical treatment is also a service industry, at this time, they are absolutely no less anxious than their parents.

One, two, three, four, five. Half of the children, like ice sugar gourd strung together, were wheeled to the operating room.

Two security officers of the security section ran in front of the flat car and shouted, "give way, give way!"

If they see a wheelchair with mobility difficulties, they run to pull it apart.

A flat car, two doctors and four nurses, kept rescuing, running and rescuing.

One of the older children had no heartbeat. Zhang Fan directly jumped onto the flat car, knelt on the flat car and kept pressing cardiopulmonary resuscitation.

"Come on, run faster. He's dying." Zhang Fan knelt on the flat car and pressed it while loudly urging the nurses who pushed the car.

The nurses' hats fell off and their sweat ticked along their necks and chin.

Just a few tens of meters away, the girls really worked hard to run again, trying to push the flat car.

At this time, time is really precious.

Zhang Fan, kneeling on the flat car and pressing, the blood in the child's wound is like a fountain, poof! Pooh! Click once, blood gushes once. There's no way. Now I really care about my head and tail.

If you don't press it, your heart stops beating. Press it, you lose blood seriously, and Zhang Fan's hair explodes.

At this time, the plasma hanging on the child has not lost much anyway, but there is really no way. We can only fight, fight time, fight luck, fight

Medical treatment, sometimes, it really depends on God. Some people fell from five or six stories high and fell into building blocks. They can be sent to the hospital to make steel plates and nails. Hey, they're alive.

Some people were hospitalized in the hospital. They were about to be cured and discharged from the hospital. As a result, they swallowed a mouthful of steamed bread and choked it. They didn't come up for a few breaths, and then caused heart failure. It was over before they even had time to cut the trachea.

Zhang Fan took the doctors in the emergency center to rescue while running. Ren Li followed and began shaking people directly.

"Let director Li of general surgery go to the operating room for standby now! Let the outsider director Chen take the people from their department and go to the operating room immediately. "

"Resident director, come to the operating room!" Juma Buick hung up the phone, running and muttering: I'm Juma Buick, not old Juma Buick!

In a hospital, there are other patients to deal with, so all of them can be on standby for a short time. When they find that they need it, they must give corresponding command at the first time. This is the responsibility of a leader and a hospital leader.

Therefore, under normal circumstances, hospital leaders can't do it. If they really do it by force, they can only fool around.

Ouyang came with the people from the medical office. Watching Zhang Fan and Ren Li control the scene, she doesn't intervene.

She now knows that her technical internal medicine doesn't pay enough attention to last Ren Li, and there's no way to talk about surgery to last Zhang Fan, so the old lady directly takes the people of the security department to maintain order.

"It's all over. It's time to see a doctor and buy medicine. What are you doing here. What's good? " She's not polite.

Chapter 772

In medicine, there is a famous saying: our doctors will commit sins and accumulate virtue; There will be setbacks and success. The evils we have done are often unavoidable in our work and, of course, irreparable.

In fact, medicine is not a precise subject. Our work object is a living, breathing and complex person, not a jar containing chemical mixtures.

This sentence was said by an emergency chief in the United States.

Ordinary diseases and routine diseases often make doctors think and think again.

This sudden accidental injury is even more difficult. The treatment at this time is not to do multiple-choice questions. I can abandon the bad answers.

Human organs are not leeks, so it is very difficult to choose. Sometimes it's really hard for doctors.

If you want to save your life, you may have to give up a kidney or part of your liver. It is often an empty dream to save your life and keep some organs.

Really, after years of such medical work, the hearts of many doctors are as hard as cold stones.

This is not innate, it is created by the whole industry. He has to be hard, he has to choose.

Operating room, one, two, three, four, five, bang! Bang! Bang, like stuffed steamed bread, the children were sent to the operating room.

From the emergency center to the operating room, Zhang Fan's pressure is almost out of force. This kind of rescue, especially cardiopulmonary resuscitation, is best done by a professional person from beginning to end.

The doctor is a little tired and has nothing to do. It's a big deal to have more rest after finishing. But for patients, a slight pause may cause irreparable brain damage.

Therefore, we often see such a scene. Countless doctors gather together and watch a doctor rescue. That's the truth.

Ordinary, thoughtful and their own patients were shunted at the door of the operating room. Everyone agreed to leave the most serious patient to Zhang Fan.

In the operating room, relatively light children slowly wake up at this time.

Look around all the people with blue hats, blue masks and green clothes, and then look at others holding knives, scissors and sharp needles.

Fright, blood, pain, strange and terrible environment make children who have not experienced anything curl up together.

The little heart swayed and jumped fast. Coupled with the wound on his body, he didn't even dare to cry, just like a cub separated from the herd, he looked at these strange people pitifully.

Itinerant nurses are usually a little older. Looking at the poor child, she wants to come forward to comfort her.

As a result, before taking two steps, the director of general foreign studies stopped with a sound "Don't worry, these bastards should scare, or something big will happen in the future."

Rough words, but good intentions.

On the operating table of cardiothoracic surgery, the director looked at the wound and couldn't say anything.

The child here is a little older. When the explosion, he stood a little farther away, but the damage was not small.

The air energy of the explosion tore his clothes like a big hand, and then the cracked glass debris pierced his chest like a rainstorm pear needle.

On the small chest, there are countless blood holes, either point or sheet, just like the lips painted with red lipstick on the chest. With the child's very weak breathing, these lips keep spitting red ideas.

At this time, the child's chest bulges like a toad to sing.

Originally frozen purple chest, this time because of ischemia, become purple blue.

The other two children are much lighter, but sharp glass is inserted in their faces and necks.

The child on Zhang Fan's side was the most serious. His stomach directly hit the first wave of the explosion.

The wound is like a sunken flower. The meat on the wound is directly the meat strips coming out of the meat grinder, which adhere to the stomach like rags, rising and falling with the blood in the stomach.

Plus the broken intestines, the undigested food flowing out.

Green vegetable leaves, chylous food residues, and digested yellow stool, obediently, stained on the floating meat strips.

The green, yellow and gray ones are really like the instant boiled mutton in the Shabu Shabu with sesame paste and coriander.

The smell of blood and stool is really like that of pigs dissected in a slaughterhouse.

The child's water electrolyte has been disordered and has long entered a state of shock.

Now there is no time to detect the extent of his lack of body fluid. All drugs depend on estimation and the experience of doctors.

Ren Li is the host of the rescue. "3% hypertonic saline is input. Be ready to click. If atrioventricular fibrillation occurs, electric shock cardioversion will be carried out at the first time.

ECG report! "

"Arrhythmia, QT shortening, ST-T wave bending..." the deputy director of Cardiology reported the results of ECG for the first time.

"Use furosemide, come on, furosemide! Zhang Yuan, can the patient get an electric shock now? "

A series of disposal, all in the preservation of the child's heart, or all in the preservation of the child's circulatory system.

However, the loss is always more than the input.

"Yes or no?" Zhang Fan is not sure at all. Really, medical things are often not absolute.

Without electric cardioversion, heart failure that cannot run away, electric cardioversion, aggravating bleeding, is still a heart failure.

Biting his teeth, Zhang Fan biting his teeth, holding gauze in both hands, desperately plugging into the abdominal cavity, constantly plugging. White gauze is stuffed into the child's stomach one by one.

Itinerant nurses and equipment nurses kept passing gauze.

"Electric shock! There's only one chance. Who's on it?" Zhang Fan is already wearing sterile gloves and sterile surgical clothes.

"I'll come!" Ren Li had to stand aside and grasp the overall situation. At this time, that flower stood up.

"Remember, just one chance, absolutely no second chance!" Zhang Fan stared at the flower and said.

The flower closed her mouth tightly, looked at Zhang Fan, nodded and took a deep breath. Hold the electric shock in both hands and put it on the child.

Boom! A lot of gauze came out of my stomach. At this time, I was so nervous that I couldn't breathe well.

Her ears are almost erect like a Hu. She didn't dare to watch ECG monitoring. She was worried that an electric shock would cause more bleeding, and then directly lead to the death of the child.

"Valid! Rewind!" The anesthesiologist exclaimed softly, this sentence, this sentence, the excited red flower really reached the peak of adrenal hormone. If she shouted, she would definitely roar through the sky.

Zhang Fan listens and is effective. Then he quickly took the doctors of general surgery to start.

Fill in the white gauze, quickly take it out, white, white, then half white, half red, then red, green and yellow.

Take it out piece by piece.

"Continue to correct acid-base poisoning, cut open organs and get on the ventilator.

Adrenaline, digoxin, dobutamine injection, ready to dilate blood vessels... "

Internal and external departments are carried out at the same time. Now physicians go all out to create a weak and short-term balance environment.

Now it's time to see Zhang Fan and them. If you can't deal with the damage in a short time, the environment won't last much time. After losing this balance, death will follow, and there is no redundant alternative.

For a normally healthy person, if you have abdominal pain for more than six hours, you don't have to think about it. This is acute abdomen. Hurry to the hospital.

For surgeons, nothing is more terrible than gastrointestinal anastomotic leakage except massive postoperative bleeding.

Think about it. A leak in an anastomotic stoma can frighten surgeons, not to mention this child full of flowers.

This kind of digestive tract is broken in a large area. Let's not talk about the blood or the loss of intestinal fluid. The infection and poisoning caused by the bacteria in the stool diffused in the abdominal cavity made the surgeon's head explode.

This thing is not a point now, but the function of the whole body is facing collapse, just between the lines.

"Come on, find the broken glass pieces!" Zhang Fan, with a doctor from general surgery, lowered his head and found it very difficult to find broken bones and fragments.

I dare not think fast. This kind of trauma, especially when a large area of foreign bodies and sharp tools enter the abdominal cavity, is really quite overbearing.

You need to find the ulcer quickly, don't you, but dare you? afraid to!

There may be a piece of glass under the twelve intestines. If you are a little quick and careless, the old hole is not found, and the new hole comes out again.

"Warm salt water!" Zhang Fan now doesn't rely on his eyes. He relies on his hands. Like rubbing mahjong, he stuffed it into the child's abdominal cavity, groping slowly and moving bit by bit.

With the long-term exposure of the abdominal cavity, the child's temperature is also slowly decreasing. Even the fat on the mesentery in the abdominal cavity begins to slowly change, just like eating the remaining braised meat, and starts to slowly change!

Warm salt water does not dare to pour more. I'm afraid that more salt water will spread the infection. I can only touch where to pour, and I have to suck it out at the first time. Really, this operation is very difficult for Zhang Fan

Just like a boxer, he can beat each other, but his hands are tied together with a rope, and then he keeps letting his opponent's left hook and right hook shine on his face.

Clang, clang, clang, pieces of glass like pearls and diamonds were touched out by Zhang Fan from the child's abdominal cavity.

Really, glass can only be touched by hand. If you are an iron weapon, you can directly irradiate it on the C-arm. Even if Zhang Fan tries to eat rays, he can quickly find out the iron weapon, but the glass doesn't develop under the C-arm. You can only rely on your hands and feel it with your hands.

Really, Zhang Fan's body was sweating constantly, and even his slippers were wet.

Just then, Ren Li was still anxiously urging, "Zhang Yuan, the blood potassium was obviously abnormal, and the blood transfusion had been 1000cc."

Zhang Fan really wanted to block Ren Li's mouth, but he had to listen to people inform him of the patient's signs at any time.

Hard~

Touch, touch, touch. It's really like washing pig's large intestine at home. Zhang Fan doesn't dare to be careless anywhere, from top to bottom.

Touch it over and over again, and you often have to go back and touch it again. Don't say the intestines are full of grease and mucus.

Even if a needle accidentally plunges into the fat layer of the human body, don't even think about it. Hurry to the radiology department. It will never stay in one place and wait for you to find it.

Therefore, the intestinal peristalsis, coupled with lubricity, glass debris, like naughty children, keeps playing hide and seek with doctors.

"Zhang Yuan, no, I can't maintain it!" Ren Li's voice changed.

Really, sometimes, when rescuing, I watch a life helplessly, and it is clear that it will be rescued soon.

As a result, all of a sudden, just as the king of hell was angry and unwilling, he overturned and trampled down the defense established by the doctor in an instant.

Outside the operating room, the boss of the chemical plant looked at the fluorescent lamp in the corridor as if he had lost his soul.

The parents of children entering the operating room are on pins and needles, neither sitting nor standing. Whenever a nurse or a doctor comes out, their thirsty eyes are really pitiable.

In the morgue, parents who lost their children cried with their children in their arms.

When several of the most serious children were sent to the hospital, there was no need to rescue them, and they had lost their lives.

At this time, parents really cut their hearts with a blunt knife.

Even the child's mother, crying, suddenly wanted to hit the wall.

The women around the side were glad that their children had nothing to do and shed tears of sympathy.

He grabbed the mother who wanted to be short-sighted.

"He hasn't been rescued. My army hasn't been rescued. Even if I can't be rescued, I can suffer a little.

God, God, you are blind, my army. "

The people around me can't even persuade. What they can say and what they can say is useless now. It's too late to say anything.

The leader in charge of safety in the county, with an iron face, stood in Ouyang's office and couldn't say a word. He stared at the phone on Ouyang's desk and stared at Ouyang's phone.

Before he came to the hospital, he was scolded by his superiors. First let him deal with the follow-up in the hospital, and then talk about it when he is finished. Really, he is really exhausted.

He is also wronged. He is too wronged. Originally, there was no flour mill in their county. There was no industry. In the past, I managed several blacksmiths who made iron and knives.

As a result, it seemed that factories in the county had been established overnight. At that time, he felt that it was not a good thing. As a result, the good did not come and the bad came.

"Zhang Yuan..." Ren Li's voice has begun to appear helpless.

Zhang Fan clenched his teeth, "start, start the operation, come on!"

"Zhang Yuan, I still can't guarantee the glass in my body..."

"I'll take care of it, quick, surgery!"

Zhang Fan rudely interrupted the operation assistant.

There's no way. There's really no way. I can only bet that the glass in the child's stomach has been cleaned up.

What else can we do? If we delay, we won't even have a chance for surgery.

Now in surgery, an accident is better than no chance to have an operation. Life is at stake. Zhang Fan is biting his teeth. Even if there is an accident, he would rather take responsibility than let the child lose his life.

Chapter 773

Full of broken glass, to tell the truth, Zhang Fan was shocked by this operation.

One eye is fixed on the opened intestinal tract, and the other eye is fixed on the important part of the stomach.

There was a scene in his mind, sewing and sewing. Suddenly, the anesthesiologist shouted: blood pressure is gone! Then the abdominal aorta is like a fountain.

Perhaps Zhang Fan is a pessimist. The hemostatic cotton has been opened and piled up in the hands of the surgical nurse, which is what Zhang Fan asked.

Gambling, although Zhang Fan said it was very firm, in fact, it was all to cheer up his assistants. In fact, he was already wandering in his heart.

After all, no one is sure about this thing.

When he mentioned a damaged intestine, Zhang Fan was like holding a large blood vessel to be broken. His eyes first focused not on the damaged intestine, but on whether there was bleeding under the intestine.

Really, it's like being a thief. I'm worried and tiptoe. Moreover, although he was worried, he could not show it.

You can't show it and don't say it. You have to cheer up other surgeons and take time to appease the physician.

Because Ren Li and her family have done everything they can. If there are any more problems, they must have reached the point where there is no medicine available.

"It's okay, it's okay. No, no, God will forgive the child. "

The flower standing beside Ren Li whispered. To tell the truth, the girl was born well and didn't get slapped by the society. Look at other people and other doctors. They never say this.

God will forgive young people for their mistakes!

I don't know who said this. In this age, people who can be forgiven can only be those who are evil to the bone. For example, at a young age, they clamor that killing is not illegal.

For a normal person, as long as he still wants to live a normal life, the cost of making mistakes is really not that ordinary people can resist.

In the unit, the young man rashly said a leader's fault and was passed on to the leader minute by minute. If this leader is small-minded, forgive you? I can't kill you.

Then, there are small shoes every day. Why don't you wear a shirt today? The next day, why didn't you wear a tie? On the third day, who told you to wear a white shirt and a red tie.

As soon as you argue, the small shoes will directly change into a hat, and a hat that does not obey the leadership will directly press on your head.

There are only a few resources. Not everyone has a luxurious parent. If you lose an opportunity, you may waste half your life.

Because you are not competing with greasy old employees or your leaders. You are competing with your classmates who graduated with you and young people of your age.

Step by step, step by step. After ten years, people who make many mistakes can only look up. forgive? It's too late to regret.

Really, it's better for young people to make mistakes in school. After all, school is relatively gentle and is also a short-distance train for people's life.

And in society, if people who have already figured it out, they can at least live more freely without saying anything else.

After all, not everyone can take the corner of life to overtake, such as a plug-in falling from the sky, or a face high enough to make all heterosexuals or homosexuals tremble at you.

In abdominal trauma, there is a principle that shock should be corrected first. But this sentence also has a premise, that is, when there is substantial organ injury or large blood vessel injury, surgery must be performed to stop bleeding while correcting shock.

When a small piece of glass with smooth surface enters the abdominal cavity, the fish directly enters the sea, one left and one right. There is no regular path for the doctor to grasp.

At this time, Zhang Fan and the surgeons first looked for the bleeding points, especially the bleeding vessels.

In special times, those who can be ligated will never be sutured. Only the thick and irreplaceable blood vessels will be sutured by Zhang Fan.

The human body is really powerful, especially in childhood. It's amazing.

A lifelong professor of the Royal College of Medicine said a particularly famous saying: if you operate on a child and do it well, he will live longer than you.

I don't know whether it is the problem of translation or the original Sandao people's humor is this kind of cold humor.

However, he is to illustrate one thing. Children's bodies have powerful functions of error correction, catch-up and compensation.

For example, if the congenital contracture of the left leg is treated in time, watch the child limp.

In a few years, the contracture leg will catch up, and the normal leg, like a brother waiting for it, will slow down its growth. It's so magical.

And as long as children have talent, they are absolutely qualified to participate in the Olympic 100m Sprint.

Therefore, Zhang Fan's operation is also thanks to being a young child and an adult.

In this way, they ligate blood vessels all over their stomach. Let's not say whether they can save them. When the patient gets off the operating table, intestinal necrosis can't escape. Because adults are stereotyped, compensation is absolutely not as effective as that of children.

Stop the bleeding and find the rupture. The intestines are like policemen, each tube is a section.

"Salt water!" Zhang Fan bowed his head while handling the operation and shouted to the itinerant nurse.

The nurse quickly opened the warm saline and poured it into the patient's abdominal cavity. Zhang Fan pressed the child's small stomach into the salt water.

Several doctors stared round, "are there any bubbles?"

Zhang Fan asked because he didn't see bubbles.

"I didn't see it."

"Zhang Yuan, I didn't see it."

"Well, the stomach hasn't broken at last!" This is good news.

In the abdomen, if you see food residue, you don't have to think about it. It must be the rupture of the upper digestive tract.

If you see purple blue bile, you must have damaged the gallbladder or twelve intestines.

If you see feces, don't think about it. There is damage below the end of the ileum.

If the salt water poured in turns yellow soon, there must be a problem with the urinary system.

This is the principle, this is the principle of rescue. It seems very simple. In fact, these words are only refined.

After Zhang Fan stopped bleeding, the physicians first breathed a sigh of relief. Their blood pressure stabilized, their breathing calmed down and their heartbeat slowed down.

But, surgeons, they don't even dry out the atmosphere.

Inside the stomach, there are yellow, red and green. When salt water enters the abdominal cavity, it is directly like a colorful cocktail. Where can we distinguish yellow, purple, blue and green.

"You broken child, what leek do you eat early in the morning?" The doctors on the operating table are crying.

Children's gastrointestinal function is relatively weak. If you eat some food, you really pull what you eat.

Green leeks. It's estimated that the fart child didn't chew much. He swallowed them in three bites.

And now it's much more difficult for doctors to operate.

"Zhang Yuan, the upper digestive tract is broken. Look at the green leek leaves. "

Zhang Fan looked at his stomach, looked at his upper abdomen, and then picked up the leek leaves and looked carefully. Just put it in your mouth.

"No, the leeks are yellow and black. It's the corrosion of gastric acid and intestinal juice, not from the upper digestive tract."

Look, touch and listen. Really, if Zhang Fan didn't master these skills in the system, he couldn't even be

sure where the leak leaked out at this time.

But it's also a child. If it's an adult, it's even more troublesome.

Children's intestines are pink and tender. Even the fat hanging on the intestinal wall is not much, just like peeled rubber or peeled bamboo shoots. They are white and tender with some powder.

If adults encounter this kind of injury, they can really disgust the dead. There is more fat in the intestines, and then open the abdominal cavity to reduce the temperature and harden the fat.

Feces, food scraps and semi coagulated blood coagulate on it. Really, it's the swill bucket in the canteen. It's oily.

The doctors must also stare at the swill bucket and look carefully for a long time. You can think how disgusting it is.

Zhang Fan took the child's intestines and checked them one by one. It's really like repairing the inner tube of a bicycle when he was a child.

Stroke a section, let pour some water, stroke a section to let some water. The waste gas in the intestines was pushed out little by little.

Originally, the child's temperature had dropped due to blood loss, so the air conditioning in the operating room was turned on very high.

At this time, with Zhang Fan, they stroked their intestines and squeezed out the fermented gas in their intestines. Darling, with such a transpiration of temperature, which flavor, let alone pungent.

Even the eyes are stimulated to tears. The doctors and nurses under the operating table are better. They can't stand it. Get some salt water to wash.

And a few surgeons on the operating table are miserable. Keep blinking, as the saying goes, spitting is good, swallowing tears is difficult to close.

"Zhang Yuan, there is liquid exudation here!" The assistant reminded Zhang Fan, "well, I saw it, too." Several people had red eyes, as if they were crying and doing surgery.

When I was a child, I didn't write my homework well. After I was slapped by my mother, I cried and did my homework.

The nurse walked around the operating room. When she needed help, she stretched out her hand, and then passed the news in the operating room to Ouyang.

"The four children have passed the dangerous period. The most serious one is still being rescued. "

Ouyang said to the leaders of the county without any feelings.

"Oh, I can catch my breath now. I'll report to the leader at home immediately."

After the call, he looked at Ouyang eagerly, "Ouyuan, please give more instructions to the doctors. Four have died. This one must be careful! You can't take it lightly! "

Ouyang looked at the scared and stupid leader and looked down on each other. In case of something, it would be like this. He might as well retire early, "no, my doctor will go all out."

"Let's make a phone call!" When the leader heard that the four children had passed the dangerous period, he unconsciously took the tone of ordering in the past.

Who is Ouyang? Even the leaders in charge of medical treatment in the city gave her three points. Now the leaders of this prefecture and county speak to her in an ordered tone.

Ouyang, who didn't like this one at first, got angry directly.

"You think my doctor is the same as you? You think my doctor won't actively rescue without an order.

Don't apply your caution to my doctor. I tell you, rescue is our responsibility, but it's not the reason why you want to find an excuse to shirk your responsibility.

People are having surgery. How do you give orders? I still have a meeting. Help yourself! "

After that, Ouyang walked away with his head twisted. In a few words, he almost suffocated the leader who had just slowed down a little in the office.

"Unreasonable, unreasonable!" His fingers, like Parkinson's, pointed to Ouyang's far away back.

The intestines are open. Zhang Fan must repair them layer by layer. It's really like using a steel brush to tie pig skin. While sewing the small holes in the intestines, he has to take out the larger touchable glass debris from the intestines.

As for those that can't be touched or taken out, we can only give the little fart child the medicine to moisten his intestines after the operation and let him pull it. It is estimated that the chrysanthemum will also be cut open, which will make the little fart child uncomfortable for several days.

It's hard, it's really hard. It's very difficult for several doctors to do the operation.

Bit by bit, piece by piece. Finally, I looked at my stomach like a broken pants full of patches.

Zhang Fan took a long breath. Even if it was full of foul air, Zhang Fan didn't feel a little at this time.

"Good luck. There is no residual glass residue in the abdominal cavity." Zhang Fan's words really have a taste of rebirth after robbery.

"Yes!" Ren Li returned with her nose covered behind her.

"Oh, look, Zhang Yuan is tired. You don't wipe the white hair sweat. Come on, dip the gauze in xinjier. I'll wipe Zhang Yuan. It can disinfect, wipe the sweat and cool down."

The head nurse in the operating room is like eavesdropping at the door. Really, this woman feels super sensitive.

When Zhang Fan's operation had just entered the final stage, she came in with a fragrance.

She knows Zhang Fan's temper too well. If the operation is not smooth, she won't come in and find uncomfortable. As long as the operation is smooth, she will show her sense of existence.

After receiving the gauze of the itinerant nurse, she stood on tiptoe and carefully wiped the sweat on Zhang Fan's head.

While wiping, he said to Zhang Fan: "Zhang Yuan, the situation of the other four children is more optimistic. After all, the injury is lighter. In this way, the directors are tired and can't straighten up.

I found some high chairs for them to rest for a while. This will be the end of the apprentices. "

"That's good, that's good. There's no big problem with the child in the chest department."

Zhang Fan didn't answer her. The head nurse flattered openly and secretly. He didn't understand it.

"It's okay, it's okay. It looks serious. In fact, it's not particularly dangerous."

Then he looked at the others quietly, and then whispered to Zhang Fan, "President Ouyang quarreled with the leaders from the prefecture and county."

"Oh?" Zhang Fan was stunned for a moment, but he was stunned for a moment, and then he didn't think much.

What else does the head nurse want to say. Zhang Fan quickly interrupted her: "who won!"

"Well!" The head nurse couldn't take it anymore, and then she twisted it gently on Zhang Fan's back waist.

"I hate it. Look at your sister. I'm so bullied!" With that, she glanced at Zhang Fan with a floating phoenix eye, turned her head and smiled at Ren Li and said, "secretary, why don't you go to my office and have a rest.

These surgeons are very rough, and you can resist the smell. "

"It's okay, it's okay. The operation will be over soon. Hold on a little longer. "

Ren Li smiled and didn't talk much.

The head nurse didn't say much, so she stood beside Ren Li and waited for the end of the operation.

Chapter 774

Rescue, from morning to afternoon, dozens of doctors and nurses gathered around a few children and tried to save their lives on the cliff. It was really a disaster.

Parents outside the operating room began to feel helpless and step back emotionally from their initial excitement and irritability.

To tell the truth, the boss of the chemical plant is really benevolent and righteous. No matter whether his management is not in place or not in order to prevent himself from being imprisoned, his first decision is to smash the pot and sell iron to support hospital treatment.

Really, sometimes I run into a black hearted boss and run away. I'm really miserable. Doctors and nurses don't want to curse independently.

Often many things seem easy when they don't happen to themselves. Once they reach their own head, they are really a disaster.

When the children were sent to the ICU from the operation, not only the children's parents were crying, but also the employees who came with them couldn't help crying.

Looking at the children covered with tubes in the ICU, as parents, I really feel sad. I can't tell. It's really the rest of my life.

Looking at the children because of the slow failure of anesthesia, although they are not awake, their faces have been biting their teeth and frowning with pain.

Parents see, which heart is uncomfortable, suffering“ Baby, you have to insist. It'll be fine in a few days. Well, mom will buy you delicious food. ”

This is motherhood.

"Come on, boy, the doctor said, you will recover. You can't be naughty in the future."

This is a father.

The crowd lay outside the glass wall of the ICU, crying and laughing. However, the tears flowing out now are bitter and happy tears.

Zhang Fan and others had breakfast in the morning. It's already more than 4 p.m. now. The gastric juice in their stomach will dig their heart and liver, eroding their esophagus.

Spitting dare not swallow wantonly. I am deeply afraid that after swallowing, my stomach will think it is food and begin to secrete gastric juice again.

After the operation, the doctors of several operations came to Zhang Fan. Of course, the directors left after the operation. They are old and common.

But young doctors are different. This kind of surgery, especially accidental rescue surgery, has a special sense of achievement.

Tired, very tired, but also particularly excited and impatient excitement in my heart.

"Zhang Yuan!"

"Zhang Yuan!"

When several young surgeons saw Zhang Fan's operation, they all came to say hello.

"Why, I want to eat a big family again!" The head nurse hugged Ren Li out of the operating room and saw a group of surgeons at the door of the operating room looking at Zhang Fan unkindly. She fanned the flames and said.

In hospitals, especially in the surgical system, if you miss a meal after an operation and there is no follow-up operation, it is generally the superior doctor who invites the subordinate doctor to eat, which is an unwritten rule.

Looking at everyone's faces with a look like they got 100 points in the exam and went home waiting for their parents to praise, Zhang Fan smiled.

"Have you chosen all the places?"

"Hey, hey!" A group of surgeons showed a bad smile.

"Secretary Ren and head nurse, let's go together. Don't count on the canteen. Let's go out and have some food together. Everyone has worked hard today. " Zhang Fan sent an invitation to Ren Li.

"No, you go. I'm hungry. Now I want to go back and have a rest. Go quickly."

Ren Li doesn't really care about the time to boil. She also has a long time in medical rescue.

But I stood for a few hours from beginning to end today, which was a little unbearable. When I saw their operation, I was nervous and didn't feel much. After the operation, she felt that her calf and stomach began to cramp.

If Secretary Ren doesn't go, the head nurse will not let Zhang Fan go. "Zhang Yuan, wait for me. I'll send the Secretary and change clothes."

A group of people went out of the hospital and talked about today's surgery while walking, just as primary school students kept repeating the wonderful parts on their way to school the next day after watching cartoons and TV dramas.

However, Zhang Fan didn't participate. The head nurse looked at Zhang Fan around Zhang Fan. As soon as her eyes turned, she found the topic.

"Zhang Yuan, how's your married life?"

Zhang Fan glanced helplessly, "what do you say?" He replied angrily.

For married women, and the other party knows that Zhang Fan is not a greasy lecherous man.

Therefore, when there are many people and they are not working, the head nurse is very arrogant in front of Zhang Fan, and often talks about marginal topics.

"Hey, hey, Zhang Yuan is in high spirits recently. You can see that he has been very sweet. However, you should pay attention to your health. Recently, I have found that you have dark circles under your eyes several times. Hey, hey! "

"Go, go, go!" Zhang Fan is embarrassed about what the other party said. There are some people who can say, but Zhang fan can't.

Young women, really young women with high EQ, have a good heat. You should not be angry when you say it. It feels like flirting. It's too difficult!

If the head nurse dares to flirt with Zhang Fan, the nurses dare not. Bayin followed the head nurse and Zhang Fan in small steps and kept pulling the head nurse's sleeve.

According to Bayin's character in the past, he definitely yelled about something, but this time he was a little shy. Zhang Fan had noticed it for a long time, but he didn't say a word.

This move was trained by Ouyang.

The head nurse shook his hand and said to Bayin, "you are worthless. What's wrong with you? You have to let me say."

Talking, he also floated Zhang Fan with his eyes. Zhang Fan seemed not to hear.

"Oh, what a big thing. Zhang Yuan, Bayin wants you to be her witness! "

"What?" Zhang Fan was surprised. He thought Bayin wanted to study. Zhang Fan thought for a long time. The nurses' study arrangement has ended. If people really speak, Zhang Fan wants to reply. After all, people dare to run into the fire when fighting the fire.

As a result, it was not the case.

"Why, I'm glad you get married to the Dean, so we're not allowed to get married!"

The nurse is as white as Zhang Fan, because Zhang Fan's surprise is too exaggerated. If she doesn't know Zhang Fan's personality, she must think more.

"What and what. Bayin, why didn't you hear any news before? It's so sudden. " As long as he doesn't study, Zhang Fan won't tangle.

Bayin blushed and whispered in an abnormal voice, "didn't it fit before!"

"She! I'm dead set. Last time she went to the forest farm for disaster relief, she was rescued from the fire by the militia company commander.

No, heroes save the United States. The United States will fall in love next time. We haven't known each other for a few days, and we're going to get married. "

The head nurse went on and on about the cause and effect.

The forthright Bayin is blushing from face to neck.

"Good thing. I promised! " Zhang fanle said to Bayin with a smile.

"Zhang Yuan, can you go to my hometown tomorrow? I want to get engaged first."

"No problem. Tomorrow is the weekend." Zhang Fan didn't take it seriously.

"Zhang Yuan, Bayin's hometown has a little yard, which is on the grassland!"

"Well, it's all right. It's the weekend anyway."

Zhang Fan heard this, but he had already promised and couldn't go back. Moreover, marriage and funeral are major events in life. It's not good to go back at this time.

"Thank you, Zhang Yuan. Thank you, Zhang Yuan."

Bayin was happy to invite Zhang Fan to his engagement party. He really lost face.

Zhang Fan didn't even hesitate. Bayin made a firm decision. He will definitely regard Zhang Fan as the most important leader in the future.

Zhang Fan is also very happy. Now he has a lawsuit over the study places of doctors and nurses.

"Look, Zhang Yuan is good at talking, so you don't have to worry. Don't worry. You don't believe it."

After the head nurse finished, she said to Zhang Fan, "leader, what time do you start tomorrow? Please come and pick me up."

"Why, are you going too?"

"Look what you said. Why can't I go?"

After all, it was after the meal. Many restaurant waiters lay on the table to rest. When they saw Zhang Fan coming in, they looked at them with disgusting eyes.

No way. The guys who wanted to kill Zhang Fan had no hope.

"Zhang Yuan, why don't you have some roast steamed buns from Buer river? There's really nothing to eat at this point now."

"Hehe, OK!" Zhang Fan looked at a group of guys who wanted to kill him and said proudly.

In the frontier, people who love steamed stuffed buns can be divided into two groups if they are about.

One group is surrounded by firm thin skinned steamed buns, and the other is fans of roasted steamed buns. As for those who like both thin skinned steamed stuffed bun and roast steamed stuffed bun, they will despise them as people without steamed stuffed bun soul.

It's strange.

Roasted steamed stuffed bun is different from thin skinned steamed stuffed bun. Thin skinned steamed stuffed bun can be said to be an alternative soup stuffed bun.

Baked bun is a pasta with Western flavor. For the first time, mainlanders are not used to it.

Thin skinned steamed buns pay attention to a delicious, while roasted steamed buns pay attention to a strong.

The meat filling is fat and thin, with mutton and leather teeth accounting for half respectively. Sometimes there are more leather teeth, otherwise the taste is too strong.

Moreover, the stuffing can not be minced by the meat grinder, but must be chopped with a kitchen knife. The meat stuffing and the juice of leather teeth from the meat grinder are completely lost.

Therefore, when making this meat stuffing, you can often see novice chefs chopping meat stuffing while crying.

When the meat is ready, cumin and pepper, the favorite seasoning of the frontier people, must be put, and the amount must be large. The flavor of the seasoning must come out.

Noodles, we must use frontier noodles, because the sunshine time is very long, and the fiber chain in flour is longer than that in general mainland flour, which is very energetic.

The shape of roasted steamed stuffed bun is different from that of inland steamed stuffed bun. This steamed stuffed bun is a little like a reduced version of leek box.

The stove for baking steamed stuffed buns is also very particular. The stove made of the cleanest red and yellow soil in the Gobi desert is the best.

The inner wall of the furnace made of this soil looks like a smooth cement floor.

First raise the furnace temperature with fruit trees, and then put in charcoal. After the smooth furnace wall turns red, the cook starts to dip water with five fingers and sprinkle water drops on the furnace wall.

Stabbing, stabbing, the steam filled the furnace cavity in an instant. At this time, we must quickly paste the white and fat steamed stuffed bun with a layer of clear oil, which looks like a leek box, but is much smaller on the furnace wall.

Be fast. If you are slow, you can't touch the steamed stuffed bun. This action is like taking a chestnut from a fire. You should be very careful and very fast.

After the steamed stuffed buns are pasted, cover the furnace cover. The base of the steamed stuffed buns is the high temperature of the furnace wall, the surface is the high temperature with charcoal, and there is the high temperature penetrated by water vapor in the furnace cavity.

Ten or twenty minutes later, after opening the lid, a unique fragrance filled the air.

The steamed stuffed bun skin has been slightly yellow and scorched. Bite it gently. It's crispy, just like crispy cakes.

When the steamed stuffed bun skin is opened, the inner layer is a layer of soft and tender flour containing the juice of leather teeth, water vapor and lanolin.

Sticky but not sticky teeth. Chewing, the aroma of wheat, meat and leather teeth burst out.

It's just steamed stuffed bun skin. What's really delicious is meat. Because the slightly charred steamed stuffed bun skin directly blocks the taste inside.

One bite opened the roasted steamed stuffed bun, and the strong aroma rushed directly into the nose with heat.

When it first entered the nasal cavity, it was cumin mixed with pepper. With the decrease of temperature, the smell of meat mixed with leather teeth broke out in the mouth.

This kind of baked steamed stuffed bun has no loss of taste, and the taste is particularly strong.

A meal of baked buns and a meal of Nang pit meat, a group of hungry people were satisfied.

The next day, before dawn, Zhang Fan drove out. After he picked up the head nurse, he set off towards the grassland.

Chapter 775

Life is a big stage. Roles often change. Especially when we grow up, we often have several masks in our pockets.

For example, the head nurse in the operating room was like this. When Zhang Fan first entered the hospital, the head nurse hardly spoke to Zhang Fan.

Even if she had an operation, she didn't say a few words to Zhang Fan. Of course, there was no problem with Zhang Fan's aseptic operation.

She was not too hard for Zhang Fan. The young doctor rotating with Zhang Fan was blocked at the door of the operating room by the head nurse. She cleaned up a lot because of aseptic violations.

When Zhang Fan emerged in the orthopedic department, the head nurse could nod and say hello to Zhang Fan, and occasionally make a joke in the operating room.

After Zhang Fan established his position after several special operations, the head nurse obviously changed.

The head nurse got Zhang Fan a special one for hand washing clothes, slippers and changing cabinets.

This is the treatment at the level of director or deputy director. Zhao Zipeng and Xue Fei were envious at the beginning.

Before long, Zhang Fan became the assistant to the president. Obediently, it was an exaggeration. He not only made a lounge for Zhang Fan in the operating room, but also molested Zhang Fan from time to time with her familiar female advantages.

And this flirtation is quite clever. It often happens inadvertently.

And Zhang Fan, who was still a baby at the beginning, will suddenly realize that this woman molested me again after returning home from surgery!

He became the vice president and took them abroad. When they came back with millions of people, they were even more amazing.

As long as you see Zhang Fan, you can greet Zhang Fan with the most enchanting attitude from a distance. If you have nothing to say, you have to find a topic to talk about for a few minutes.

Early in the morning, Zhang Fan had a big head on his way to pick up the head nurse. What should he do on the nearly 300 km road.

Tiger face? Or... Zhang Fan is very tangled.

As a result, the head nurse didn't talk too much along the way.

Either talk about the weather or complain to Zhang fan that the bonus distribution of nurses in their operating room in the unit is too low and there are too few staff. She can't suppress the little nurses under her hand.

Complaining all the way has almost become an internal meeting of the nursing group in the operating room. Zhang Fan also had to placate others seriously.

In fact, Zhang Fan also breathed a sigh of relief. Seriously, he was a little afraid to stay alone with the head nurse. The old woman's lethality was too strong.

Looking at Zhang Fan's serious appearance, the head nurse's evaluation of Zhang Fan has improved a lot again.

It's not easy to be a nurse, especially as the head nurse in the operating room of a third-class hospital.

I don't know how many people in the hospital are staring at this position. She always has to set out one eye to pay attention to the wind direction in the hospital. Sometimes she wants to be an ordinary nurse.

But when I go to work every morning, the doctors and nurses who come to the past are not only young doctors, but also nurses in the operating room.

Even some doctors with high professional titles and nurses in other departments would greet her with a smile: "good morning, head nurse!"

Not only the people inside the hospital, but also some people outside the hospital will respect her because of this position.

The neighbors upstairs and downstairs, who have vegetables and native eggs, will miss her. Even the leaders of her husband's unit treat her husband differently because of her position.

Whenever she wants to quit and her heart is too tired, she has to bite her teeth and continue.

In fact, she feels wronged. I'm a beautiful and plump young woman. Shouldn't you dull men please me?

The car sped all the way towards the border. The more it went to the grassland, the thicker the snow was. From the beginning, the small snow pile slowly turned into a hill. When it came to the grassland, the world had become a vast expanse.

The two-way two lane road to the grassland has become an ice and snow path that can only barely walk one car.

The snow near the grassland is too heavy. Sometimes even the house can be buried in a heavy snow for three or four days.

Every winter, the workers in the maintenance section can only drive bulldozers and excavators to open a channel in the middle of the road, so that the snow is directly piled on both sides of the road.

There was a recess for returning the car before the road went for a long time. It was like a tunnel battle. The snow was so high that the surrounding scenery could not be seen.

The snow is piling up higher and higher. Often when the Spring Festival is approaching every year, the snow reaches the peak, and then the cars driving here are like driving in the snow castle.

In some sections, the car is like walking through a tunnel opened in the snow. People who are not in the area feel that the scenery is very beautiful.

In fact, Zhang Fan, who is driving, and the head nurse who is sitting on the co driver, don't even discuss their work. Zhang Fan is driving, up and down, left and right, all covered with snow, which is particularly depressing.

I didn't dare to drive the car fast. As the car passed, the snow on the roadside seemed to fall down immediately. It was frightening to see.

"Won't be buried here by snow!" The atmosphere in the car was a little tense. Zhang Fan wanted to ease it, but he made a mistake.

"Bah! Pooh! Pooh! No, it will not. There are so many car wheel prints in front of us, it will not. " The head nurse gripped the seat belt nervously, and her fingers were blue and white.

I finally walked out of the mountain depression and saw the grassland. After coming out of the repressed environment, the scenery in front of them directly brightened their hearts.

The rolling grassland is covered with silver. With the slowly rising sun in winter, light yellow light shines on the snow field. This endless snow field is like a wheel covered in a faint blue light.

The white sheep lying on the snow field move slowly on the edge of the sky. The very blue sky is connected with silver white.

The tent in the distance is like ink falling on the white rice paper to form plum blossoms. The smoke rising from Miaomiao has become ribbons in the breeze, just like in the fairy tale world.

Zhang Fan wants to get out of the car and shout twice.

"It's so beautiful. I came here once in summer. At that time, I thought it was very beautiful. I didn't

expect it to be more beautiful in winter. We seem to have entered the world of white velvet."

The head nurse, with a red face, looked excitedly at the ice and snow world outside the window.

It seems that women have a princess dream! Zhang Fan thought.

Not long after walking, I saw a man and a horse in the distance, and a huge dog running towards them.

As they approached slowly, Zhang Fan and the head nurse saw clearly, and Bayin came to pick them up.

"Zhang Yuan, head nurse!" The girl was dressed in Mongolian unique ethnic costumes. The snowflakes flying from the Malaysia under her body and the big dog chasing behind her looked particularly valiant and heroic.

Stop the car, Bayin suddenly jumped into the head nurse's arms. Bayin, dressed in famous ethnic costumes and with a frozen red face, excitedly said to the head nurse, "I'm afraid you're lost!"

Holding Bayin, the head nurse looked up and down, "it's so beautiful today. My Bayin has grown up. When I came there was only one way. How could I get lost? "

The two exchanged greetings, and Bayin turned and looked at Zhang Fan. At this time, when Bayin threw himself into the arms of the head nurse.

The big dog behind Bayin has a huge dog head bigger than the washbasin, and its thick fur half covers its eyes.

Ha is ha is, the big dog with his tongue outstretched and panting seems to be a little eager to try and jump in Zhang Fan's arms.

To tell you the truth, I'm not afraid. This kind of prairie dog has a thick physique, and it's winter. Its thick fur sets off its ferocity and strength.

The big dog stared at Zhang Fan. Zhang Fan looked at the big dog. He wanted to shout Bayin, but after consideration, he looked at the deep eyes of the big dog. He still didn't dare to shout. He looked at each other for such a minute or two.

Zhang Fan definitely used very gentle eyes in this one or two minutes. The eyes of police dog ah Hu are sharp, and this thing is directly the wilderness!

Bayin and the head nurse looked back and almost didn't laugh.

"Bart, go away!" Under BA Yinjiao's sound, the big dog seemed to drift Zhang Fan's eyes with disdain.

"Oh, Zhang Yuan, this is the shepherd dog at home. He is very good. He won't bite without my

command!"

"Hehe, hehe, good dog, good dog!"

What else can a big dog that is not much smaller than a calf say.

Bayin led the way on horseback, and Zhang Fan followed them in a car. Before long, they came to Bayin's tribal station.

Today is Bayin's engagement day. All the people of the tribe, old and young, have come.

When the child saw Bayin, he ran and shouted in Mongolian, "bride, bride."

The women were busy on the temporarily built stove in the open place, stirring in a pot as big as the military stove with thick wooden sticks.

The steaming mutton kept rolling in the big pot. When the men saw Bayin's guests coming, they all came out of the tent to meet them under the leadership of Bayin's grandfather.

The white hada, the milk wine in the silver bowl, and the old man without many teeth kept singing a toast song that he couldn't understand.

Zhang fan can't drink, but the head nurse is here. Zhang Fan looks at the head nurse and admires her very much.

The young woman dipped her finger with horse (a) milk wine. After respecting heaven and earth, she directly dried three bowls without rest. After drinking, she didn't respond at all. Zhang Fan wanted to give her a big thumb.

Bayin believes in Tibetan Buddhism. In their own words, their tribe is a serious golden family. Waimeng tribe used to show their ancestors tombs and herd sheep.

I don't know if it's true, but the standard of meeting Zhang Fan in the tribe is high enough.

Bayin's grandfather has a high status in the tribe, and Bayin works in the largest hospital in the city. Whoever has a child at home or who has an operation and gets sick can't do without Bayin's help.

Moreover, after Bayin and Zhang Fan made a fortune abroad, it was even more impressive to the people of the tribe.

There are not no college students in the tribe, but it can't be compared with Bayin.

Therefore, on the day of Bayin's engagement today, the tribe almost poured out.

Xuefeng came early. The young man cleaned up very quickly today.

After Xuefeng was cured and discharged from the hospital, he was really tangled about his relationship with Bayin. Does he like Bayin? Yes, I like it from the bottom of my heart.

Beautiful, warm and not pretentious, but looking at the girl's little Audi and the big house in the city, the young man has a little inferiority complex.

When can we reach the level of others by relying on our own few acres of land.

Bayin seemed to understand his idea. Xuefeng went out of the hospital. Without saying a word, he took the young man to the grassland.

Bayin is the apple of her grandfather's eye, but for marriage, the most important thing is to see the wishes of her children.

Xuefeng came to the grassland with Xuefeng. Bayin went from house to house. After a visit from grandparents, uncles and aunts, Xuefeng opened a beef and mutton stall in the urban area with the good character accumulated by the girl in recent years.

Other people's beef and mutton will be out of stock from time to time in winter, while Xuefeng's is not only not out of stock, but also the best beef and mutton.

This time, in just a few weeks, tea vegetarians who eat beef, mutton and Diao mouth recognized Xuefeng's brand.

Xuefeng was also honest. Under the guidance of Bayin, he was slowly accepted by the tribal people by his honest character.

However, the young man didn't catch a cold with him, because he picked the most beautiful flower on the grassland. He couldn't eliminate this jealousy without intoxicating him several times.

Under the witness of Zhang Fan and the head nurse, Bayin and Xuefeng are engaged.

Looking at the two lovers who have experienced life and death together, Zhang Fan is also happy for them from the bottom of his heart and hopes that their future life will be happy.

The pace of the Spring Festival is getting closer and closer. The hospital is also getting busier and busier. The more such holidays, the more lively the hospital is, just like the shopping mall outside.

Drunk, bad belly, fighting, 120 people in the hospital never stopped.

In order to brush enough surgery outside the brain as soon as possible, Zhang Fan grabbed this time period and cheered for surgery.

Xue Xiaoqiao was oppressed by Zhang Fan and couldn't hold on. However, technology is also a visible improvement.

With the determination of a new round of transferred doctors, Zhang Fan took Xu Xianwang Yanan and Zhou Chengfu as the skeleton and established a new trauma orthopaedics department.

The director is a good man in the third Department of orthopedics, director Xue. Because director Xue is not in good health, in fact, Xu Xian, Wang Yanan and Zhou Chengfu are the leaders.

One person takes a group and competes with each other.

Zhang Fan's burden on them is not light. He must win trauma surgery within another six months to end the Warring States era of orthopedics in the hospital.

Whoever can't do it will go back to the original department. There is pressure and competition. The three leaders are like beating chicken blood.

Each of the three people spent a day in the operating room. Under the benign competition, the Department slowly straightened out the trauma.

With the support and help of several top hospitals in the capital, especially Professor Li Cunhou, the scald dermatology has become a hot pastry for a time.

Young doctors, both men and women, who have completed their transfer want to go to this department.

People with good eyesight have seen that large departments are not easy to develop, and the burn dermatology department has been up.

Not only is it tea vegetable, many patients with burns or skin diseases in surrounding cities run towards tea vegetable hospital, and even many patients in bird City, the capital of the frontier, choose tea vegetable hospital.

Ouyang is happy with the good development of the hospital. In the past, during the Chinese new year, the welfare in the hospital was just a little rice and noodles.

This year's hospital income is good, and the retained surplus is still objective. This money can't be distributed indiscriminately. If it is distributed too much, it will be reported.

However, Ouyang is a thief. In this area, Zhang fan can't keep up with others' shoes at present.

Isn't there a difficult enterprise in the city? There are some noodle factories and wool mills.

Simple, let's solve the difficulties in the city. I'll buy some of your noodles, and then match it with beef and mutton. Your wool is good. I'll buy some, and you'll match me with chicken, duck and fish.

Or I won't buy it! The government will bite its teeth!

Just when Zhang Fan kept brushing the amount of surgery and wanted to open the next discipline, a special patient came.

Chapter 776

In the Department of orthopedics and trauma, Wang Yanan was off duty. After 24 hours, the girl couldn't move her legs.

Snow slides, falls, car accidents, fractures and injuries one after another.

The girl can be said to stay in the operating room with people from morning to night. She is very tired, but also very comfortable.

She has the final say in the operation, and she has the final say for who to go to the surgery, although she has only three such opportunities a week, but she can't wait to do it every day.

And she also enjoyed the new doctors looking at her with adoring eyes.

"Elder martial sister is a cow. She has only been working for two years and can perform surgery independently!"

"Among the female orthopedic doctors, the elder martial sister estimated that in the frontier, whether it was technology or appearance, the girl woke up when director Li introduced her condition.

Listening to the doctors shouting to Zhang Fan, the girl understands that this man is the leader.

Without saying a word, he landed on his knees as if he had seen Godfather. He ran over on his knees and grabbed Zhang Fan's trouser legs. The whole body seems to be attached to Zhang Fan's legs.

"Give me a shot, give me a shot, do you think I'm beautiful? Give me a shot. I'm your man. Come on, please. "

Saliva, runny nose, shed a face, the original youth's face should be wanton, and the expression of not bird to anyone has become a prayer of not knowing what is shame.

"As a parent, now we should give the child withdrawal treatment instead of cooperating with her to let her go, which is harmful to her!"

Zhang Fan looked at the young girl and said softly to her mother. At this time, her mother can't afford to blow, and there's no need to talk hard.

Before Zhang Fan said two words, the girl blew up, "I'm not taking drugs, I'm not taking drugs.

I have a headache. I want to relieve the pain. Give me an injection! "

Zhang Fan gently shook his head at her, just about to open his mouth to speak.

Unexpectedly, the girl came up hard and bit off the tip of her middle finger.

Blood, like a water gun, came out of the fingertips, and meat, bright red meat mixed with blood and water gushed out.

The snow-white knuckles hang brightly on his fingers in the blood. Zhang Fan knows that addicts will do anything.

But he really didn't expect the girl to be like this. He was shocked, really shocked.

He had seen the world. He was really frightened by the other party.

Not only Zhang Fan was frightened, but also the doctors and nurses around him were frightened.

Especially when the girl bit off the front section of her finger like a sugarcane, several little nurses standing in the office directly covered their eyes and screamed.

Really, who is not afraid to see the same kind like this?

Looking at Zhang Fan, they seem to be indifferent. In fact, Zhang Fan and they are frightened.

The girl came directly, and the more ruthless fingers were bitten. Only the bones and flesh connected residual fingers were directly pestled on the concrete ground.

On the cement floor of the hospital, in order to prevent slip, it is not very smooth, but the ground with

pockmarks.

Then, he kept using the bloody knuckles, connected with the knuckles with a trace of meat skin, and kept rowing around on the ground.

"I hurt. Give me an injection."

Red eyes, black circles, a runny nose and bloody fingers scratched on the ground. Pull out a long word.

She didn't even look at her bleeding fingers, but stared at Zhang Fan with her eyes.

Zhang Fan looked at the girl. To tell the truth, he felt the squeaking sound of the friction between the bone and the concrete floor.

Just like the sound of sour plastic grinding on iron, people couldn't help shivering.

"Come on, stop her!" Zhang Fan shouted to the doctors around him. Diaphragmatic response, really, looking at this scene, while heartache, it is boundless diaphragmatic response.

Really, doctors are also human. Looking at the girl's self mutilation, the doctors who came forward to stop her were really careful.

Who can guarantee that she will bite, who can guarantee that she will have HIV, really, can scare you to death.

Several strong surgeons put their hands on the girl, and even their heads were pressed to death.

Although the girl is like a skeleton without two or two meat, she can resist like a cow. Her eyes are red and her nose seems to be steaming.

Big eyes, looking at the doctors with an eye that can eat people.

"I'll kill you, I'll kill you, fuck your mother, let me go! Let go of me. "

While cursing, he kept spitting at Zhang Fan and them.

"Come on, what are you doing standing there, bandaged with gauze!" The little nurses were stupid. They stood still when they heard Zhang Fan's words.

The head nurse was the first to react. For the first time, she ran to the emergency room and ran over with an ambulance.

The girl's mother was stunned.

"Wrap it up quickly and give me another piece of gauze."

Zhang Fan pressed the girl's leg, took the gauze and stuffed it directly into the girl's mouth.

When the girl was spitting, the doctors almost broke their heads for fear that she would spit into her eyes.

Just wrapped up the girl's fingers, Zhang Fan, when they were about to go out for the girl.

The little girl began to twitch all over. Rolling his eyes, he began to twitch.

Chapter 777

"No, drug (a) addiction induces epilepsy!" Zhang fantou is big.

Directly turned to the girl's mother and shouted, "did she have epilepsy before?"

"No, no, she used to be fine. She didn't have any diseases. What's the matter? What's the matter!"

Where do women sitting on the ground still have the style of the past.

For withdrawal treatment, in fact, the hospital can't treat it, not without drugs, but without means, because this treatment method is mandatory, just like prison. If the hospital dares to force, people can break the doctor's.

Hospitals don't have this right, so for such addicts, in fact, ordinary hospitals see less.

As a result, I didn't expect to meet a patient today, and I also met a particularly troublesome patient.

"No, induced epilepsy!" Director Li also found the problem. Drug (a) addiction is crazy and irrational.

But it's always controlled by the brain, and now the girl is obviously epileptic.

Lying on the ground, she bent like a shrimp, her neck leaned back, her limbs collapsed straight, like the

moment when the pleasure of death came.

But it was very disgusting. The original thin girl was shaking like a bone shelf at this time.

With less meat, the originally large eyes are more abrupt, just like the eyes of goldfish or beads are about to be squeezed out.

Twitch, keep twitching, just like the great God attached to the body. The muscles of the whole body are like wood, stiff and not as soft as women.

Moreover, a morbid ruddy sweat suddenly appeared on his face, which was secreted from the forehead in an instant and stayed on the forehead without much oil, just like a dense flesh pimple on his forehead.

There are bubbles in your mouth.

Many people haven't seen epilepsy patients spit bubbles. It's like a mouthful of washing powder. Because there is less water, the white bubbles spit out are white and greasy. The bubbles are small, but they are disgusting.

Because after the seizure, the doctor who pressed her hand felt a little pity. After relaxing a little, suddenly, her hands were like fighting in the dark.

Dancing, dancing, and then suddenly tore and pulled, and tore open the sweater he was wearing.

Stabbed, the girl without clothes leaked out of her upper body. If it's on the street or a normal woman, it's estimated that the bystanders can feel cheap.

And afterwards, I will secretly laugh and aftertaste, tut! Tut! Tut! It's so white and round.

But the girl's body can't be seen. The elbow sockets of her left and right arms are like those bitten by countless mosquitoes. The bleeding points of red needles appear in rows directly along the blood vessels.

And the bruises left by blood vessels are in pieces. The scars on the body, the sharp weapon cuts, the teeth bite marks, really, it's like having been punished all year round.

Not to mention that, a big blue snake was tattooed on the neck from the navel to the back waist, then to the chest, and the snake's tongue was near the main artery of the neck.

The body was thin, the ribs were clear, and the cyan veins crawled on the body, just like a human body

uncovering a corpse.

The bra (a) is as empty as a decoration. This body makes people feel uncomfortable. Really, when I look at it, I feel like I keep saying: come on, come on, stay away from me. What is this guy!

"Come on, give it to the antiepileptic first." Zhang Fan shouted to the head nurse.

"Phenytoin sodium, clonazepam, come on!" Director Li began to give oral orders directly.

In fact, these drugs can also be regarded as sedatives. As a result, they didn't react at all after they hit the girl's body.

"The body has been made resistant to poison (a). This is a specific epilepsy. You must have surgery! " The sweat on Zhang Fan's head came down.

Really, all kinds of accidents may occur during medical treatment, but Zhang Fan never thought of such accidents.

Normal people, where can this happen.

Epilepsy, if the disease is explained, really, if you get a professor outside the brain, he may not be able to explain it to you.

This thing is too complicated. What congenital genes, malformations, don't say.

Acquired epilepsy is mainly caused by brain damage, such as brain edema, brain injury and brain tumor.

Especially in patients with brain tumors, in order to remove the tumor, the operation was completed, resulting in epilepsy and convulsions from time to time.

What's the matter with this thing? In fact, it's simple, that is, neurons in some part of the brain are too excited.

Then the brain neurons in this area set up a rebellion and played separatist rule. It did not accept the control of the center of the brain.

The commands issued by the brain are integrated commands. After the summary and analysis of each functional neuron, a unified command is issued.

As for the rebellious part, I don't care whether you are unified or not. I'm hi now.

Then the original brain waves are tick tock, tick tock. At this time, the brain continues to cooperate with other places and continue to slowly send out tick tock, tick tock.

You can't get up every morning and eat it first whether you eat or not.

To tell the truth, human gastrointestinal flora has its own regulation mode. After long-term intervention by external forces, people will be lazy. If you can come, I'll rest and I'll quit.

Then the problem is that the child's intestinal flora environment is getting worse. What hair is yellow, what nails are soft, and what lacks various trace elements is like a chicken.

Therefore, medicine should never be used as a tonic.

Other organs, such as drug dependence, are relatively simple to treat, such as lung cough. If you endure it for a few months, you may be able to completely quit.

The brain can't. once it is contaminated with some dependent things, it's too difficult to quit.

Don't talk about drugs (a). Even ordinary tobacco, people who can successfully quit are cruel characters.

The dependence of the body on tobacco, in front of drugs (a), is kindergarten, but in this way, people are reluctant to part with their bodies.

As soon as they opened their eyes early in the morning, the old smokers were not in a hurry to go to the bathroom or eat.

But the throat coughed to itch, just like the cow's tail got into the throat, itching almost hairy.

How can this happen? In fact, this is the result of the joint crime of respiratory tract and brain.

As soon as the brain finds itself awake, it directly tells the respiratory tract, come on, shake up, shake up, there is nicotine.

When a mouthful of smoke is sucked in, the throat doesn't itch, and the phlegm seems to be gone. In fact, this is not a matter of phlegm. It's all the brain's doing strange things.

These ordinary drugs or other addictive things, the body's dependence on them is very strong.

Poison (a) is unimaginable.

In fact, the brain has resistance to some things. For example, before becoming addicted, you can smoke, smoke hemp, or even light white flour. The brain will have strong resistance to some things.

For example, nausea, vomiting, dizziness, headache, etc. These are actually strong rejection phenomena sent by the brain itself. It knows that these things are not good things.

However, the repulsion is still too weak compared with the pleasure of poison (a), and people are not a

simple carbohydrate, which can produce their own desires and desires.

The brain's natural dependence, coupled with people's curiosity about their own death and desire for various reasons, once addicted, then trouble will come.

Human diseases, not to mention surgery, are almost destructive treatments once the knife is used.

When you open the book of internal medicine, you will find a problem from beginning to end.

That is, except lobar pneumonia, it seems that other diseases will lead to qualitative changes in organ generators.

That means, I got a non lobar pneumonia. After treatment and recovery, take an X-ray. Yo, the texture of the lung is thicker than before.

In fact, it's just like your injured skin. After it is broken, there will always be a scar after the scar heals.

Almost all diseases are like this, depending on how much organ changes in the later stage.

The more changes, the worse the situation.

The most terrible disease is this place. Once the generator changes qualitatively, there will be more problems.

Simply put, for example, the respiratory tract was originally rows of columnar cells, but after long-term smoking, these columnar cells become fish scale cells.

In order to accelerate the discharge of sputum, this change is convenient, but the structure between cells has changed.

Then the pillars secrete various factors and constantly repel the fish scale cells. The fish scale cells don't work well.

Just as mules stay in horses, they are in a bad mood, are excluded, and then get sick, get sick, and become cancer.

That's how most cancers come from.

Large dose of (a) poison. Although the girl has not been taking (a) poison for a long time, the amount is large.

As a result, the drug caused organic changes in her brain. She could have obtained drug (a) in the past, and this change was covered up.

Today, when she was addicted to drugs (a), she was found the last thing she wanted to be found out in front of her parents, and then the doctors forcibly prevented her from self mutilation.

Pain, drug (a) addiction, a little shame left in her heart, and the anger of doctors directly ignited her brain organic changes, specific seizures.

It's like the brain was caught in the door. It has changed, not the original brain.

This extremely excitatory disease, often after the end of seizures, is missing everything that happens during this period.

Just don't know anything.

People laugh for a long time. After laughing, they feel sore muscles all over.

This is that too much excitement leads to a lack of energy in the muscles.

Epilepsy is similar. It consumes a lot of various substances in the body, such as adenosine, endorphin, creatinine, hypoxanthine, etc.

What do these substances do? It's troublesome to explain them one by one.

The human body is like a machine. When doing fine movements, it needs to be fine tuned, and these things are even some factors of fine tuning.

The principle of antiepileptic drugs is to persuade people to put out the fire, stop neurons, or block these consumables.

Even for ordinary patients, many antiepileptic drugs are ineffective. Really, brain diseases are so awesome.

With the A as like as two peas, the antiepileptic drugs are just the same as the fake corn starch made by her.

"Surgery is necessary!" Director Li frowned and said to Zhang Fan.

"Yes!" Zhang Fan nodded, then raised his head to Xue Xiaoqiao and said, "go to the anesthesiology department to evaluate."

Then he said to the girl's mother, "come on, prepare for the operation and sign. After we finish the preoperative examination for her, we must operate immediately."

As soon as the girl's mother heard it, she opened her mouth and wanted to cry. Zhang Fan said directly, "get up and sign. Grind it again. Your girl is twitching into an idiot."

"I, I, I can't be the master."

Her mother was paralyzed directly and couldn't get up. Her two hands were on the ground. She remembered desperately, but she was soft all over and couldn't get up.

Eyes dead looking at the child lying there shaking, crying, dare not cry, shout, dare not shout. But tears, like beads with broken lines, fell down.

Falling on the concrete floor, it was like a voice of regret. It was so weak and helpless.

"Who can decide, let who. Come on, time is running out. "

Zhang Fan was angry and sympathetic. Really, he wanted to get angry. Looking at the collapse of the middle-aged woman, his anger turned into a kind of pity.

With tears in her eyes, she took out the phone and couldn't open it. The head nurse hurried forward to help.

"Wow!" As soon as the phone was connected, the woman cried directly and cried hysterically. Really, the mother's pain for her child broke out completely at this moment.

"Are you XX's father?"

Your girl is going to have an operation. I'm the head nurse of brain surgery of chasu people's hospital. Come right away. "

With that, the head nurse hung up the phone and silently helped the poor woman around him. There was no way to comfort her.

During the inspection, Xue Xiaoqiao took the lead. A group of young men outside their heads carried stretchers, just like soldiers coming down from the line of fire.

Run fast, "call CT, MRI room and EEG room, leave me a place for emergency examination, and come right away."

Xue Xiaoqiao shouted to the head nurse while holding the stretcher.

In the corridor, groups of patients and their families looked at the girl lying on the stretcher and whispered.

"Drug addict, it's said that she is a leading girl. You don't know. She was just in the doctor's office, but she was miserable. She bit her hands off. Tut tut! "

This is a middle-aged aunt. It's hard to say whether she sees it or not, but it must not affect the authority of her family outside her brain.

"Isn't the doctor unlucky?" A young daughter-in-law had a sad face. Her husband got drunk and fought. As a result, he was opened. Now he has a lawsuit with each other every day.

"What's the bad luck? Such a young girl, she has identity in her family, and she doesn't have time to cover it. She dares to make trouble?"

A young man who looked a little literate looked contemptuously at the middle-aged women in the office.

As soon as the head nurse went out and looked at these people again, the fire directly burst out, "what are you looking at, and then see the whole hospital discharge."

In a word, the people in the corridor watched the excitement and walked clean.

In the hospital, the little nurse swears and quarrels with the patient.

When doctors curse, patients often feel uncomfortable. They think they must not be valued in the future. They think they should complain for a wave and then transfer to another hospital.

Only the head nurse swears, and only the head nurse of middle-aged women swears, will make everyone feel that they should scold, scold comfortably and scold cheerfully.

And often some patients or their families are very proud after being scolded by the head nurse. Look, we are familiar with the head nurse.

Chapter 778

During the inspection, Xue Xiaoqiao personally took a group of young doctors, like bodyguards around the stars, and ran out to a doctor in advance to clear the road early.

In the wind and fire, several people pushed flat cars to shuttle back and forth in several examination rooms.

The trembling girl is particularly eye-catching. Really, there are many strange things in the hospital.

Doctors dodged on both sides of the corridor without looking at them. Those who called continued to call and those who told the patient continued to talk. They were curious that they came to see the patient or family members.

When the girl's father answered a phone call, everything has the final say of him. If he meets a little trouble, he will never change the sentence: "don't delay your illness, and go to the city people's hospital immediately."

Even if a doctor in his hospital wanted to do something, he was the first to firmly oppose, "we should know our position, safety first, a lot of salary, you have a penny, why do you want to find something? Are you excellent? I came from the city hospital. I see more than your excellent doctors! "

Now he is running up and down. He goes to the government to shout poverty every day. What outpatient building is broken like a temple. The patients who come to see the doctor are cold. What inspection equipment is broken.

Anyway, he is now focused on infrastructure and equipment.

As for the development of hospitals, if the infrastructure cannot be developed, can the level of hospitals be improved? Without a ten story building, can doctors be up to scratch?

Don't tell me, there are still a lot of people playing the sidedrum for him. The father of the drug addict (a) is also one of them. Ouyang is not easy to deal with, and he disdains to deal with them.

In the past, Ouyang could also seek from music for the ideal in his heart.

But now, the old lady has enough confidence and speaks with a steel tone. With the great stride development of the hospital, the old lady's temperament has also returned to natural color: it's not easy to provoke!

Birds of a feather flock together. Sometimes, that's right.

A phone call to the former Secretary Wang, he is not Chen Qi, Chen Qi is now afraid to see acquaintances, afraid to see former friends, although there is not much contact, but it is still embarrassing to see.

Unlike Lao Wang, he relies on these networks and relationships to do great things.

"Wait, I'll do it for you. Don't worry. Although I'm not in the municipal hospital, I still have this right!"

Big talk, open your mouth and come. Anyway, the patient, into the hospital, can be cured is lucky, can not be cured is unfortunate.

After hanging up, he thought about who to call? A bunch of people in administration give face, but they are all laymen.

It's for the medical office. Forget it. The medical office's direct is Ouyang's dog leg.

To Zhang Fan? Please, he's a doll. I can't pull down this face. Who are you calling? By the way, Lao Gao.

As for Ouyang, except in nightmares at night, when he is awake, the word is directly blocked.

After hanging up Lao Wang's phone, the father was still worried and began to call the related households of the Health Bureau.

For a while, I called everyone who could hang up with the hospital anyway. Sometimes, many people are more concerned about other people's private affairs.

In the morning, these people didn't go to work and the meeting didn't open. They all set out towards the hospital.

I felt a bit of a card face, so I tried to call Ouyang.

Now Ouyang, after arriving at the unit every morning, she must drink some honey water first. She is too angry. She has constipation and is embarrassed to let others know.

After I treated myself for a period of time, I had no effect. I had to drink honey water every day as a psychological placebo.

I don't know if it works. Anyway, if her old man gets up late in the morning, he can only go outside to find a public toilet.

Ouyang usually doesn't answer the phone in the morning as long as it's not his own special phone. It's always silent.

Then he stood by the window, doing the aerobics taught by Zhang Fan to doctors and nurses with poor lumbar spine in the orthopedic department, and took time to look at the door of the hospital.

Which doctor is late, as long as she finds out, she will keep it in mind secretly. As if she can find other people's secrets, Ouyang stands by the windowsill every day.

Moreover, there are miraculous effects. For example, a young doctor was full of complaints, kept complaining, and was picky and disobedient to the distribution. As a result, he got to the level of Dean, and was directly cleaned up by Ouyang.

Ouyang, like a family treasure, pointed out his bad problems to him, and even was late in what clothes he was wearing on the day of the month.

Ouyang was able to say it to him. After criticism, the young comrade was moved to tears. The leader still paid attention to me and didn't give up on me.

He vowed to do something to repay the attention of the leaders, and then entered the assigned department without any complaint.

Often at this time, Zhang Fan looks at Ouyang and is shocked. God, it's awesome. Three words, or swearing, can make a doctor obedient and grateful. It's amazing.

Ouyang doesn't teach Zhang Fan this move. Cats teach tigers. No, Ouyang often tells Zhang Fan and Ren Li at this time that he must care about young doctors.

When Zhang Fan and Ren Li admired her, the old lady went to see her stick saliva play.

When Ouyang was paying attention to the hospital gate that she was only concerned about now, the people who consciously had some energy rushed to the hospital.

"Ha ha, director Chen, why did you come to the hospital?"

"Ha ha, director Wang, Lao Yang's girl is ill. He knows I'm familiar with the hospital. Let me come and find a relationship. What about you?"

"Hi, me too. Lao Yang and I have a relationship. I can't help but come. I saw a big and obedient girl from his childhood. Director Li and I are young outside my head. I'll come and say a word to him."

"Let's go, let's go!"

Yang Kechang, the father of the drug addict girl, entered the hospital. Before he said a few words to his wife, all his friends came.

"Lao Li, this is director XX Yang. What happened to his girl." The person who feels a little face said directly to the director outside his brain.

Lao Li looked at Zhang Fan and said awkwardly, "epilepsy, specific epilepsy."

"Isn't epilepsy only genetic?" Yang Kechang, the father of the drug addicted girl, seems to have heard of the disease in one ear. He anxiously said to Director Li outside his brain.

"This, this..." Lao Li looked at the people around him and Zhang Fan around him. He was a good man. He didn't want to say in front of so many people.

"Hasn't it been diagnosed yet? Why don't I contact an extrabrain expert in the bird market." The man who came to help said.

Then, some people kept calling, "it's all right. An expert in bird market said that epilepsy doesn't need to be operated on immediately."

It's hard to say whether you are kind or not, but at this time, how can you reflect your fame and wealth without making a few calls.

Sometimes, the most difficult thing to deal with is these people with great self-conscious energy. Anyway, if they have the ability, they will deny you first.

Then stand a head higher than you to find something for you. People with real energy often do things first and then talk.

Zhang Fan had to stand up and say, "it's induced epilepsy, not hereditary epilepsy.

And now we must have surgery as soon as possible, or the consequences... If it's convenient... "

Zhang Fan means, if it's convenient, can you talk about it in private.

Sometimes, when the doctor is shy and can't speak, you must think carefully. Why can't he speak?

Is it inconvenient? Is there another outsider.

"Are you?" Section chief Yang looked at Zhang Fan in wonder. After all, Zhang Fan is too young and doesn't have the so-called leadership of these people.

"This is Zhang, the vice president in charge of surgery in our hospital." Lao Li introduced a sentence.

Yang's wife came back at this time. She struggled to stand up and quietly pulled her husband's clothes.

Preconceived, Chen Qi dug a hole, and then her wife hesitated. He thought his wife also felt that the level of the young doctor was not good. Looking at the posture of director Li outside his brain, he seemed to understand something!

He didn't say a word or listen to Zhang Fan. He directly interrupted Zhang Fan and said to his wife, "where's the child?"

"Check it out!"

Her wife drooped her eyes.

"When is it? What else can I do?" With that, picking up the phone seemed to call a leader of a bird city hospital.

After hanging up the phone, I didn't even see the doctor of the municipal hospital. I directly called the former Secretary Wang: "Lao Wang, help me contact an ambulance with your doctors and nurses. I'm going to take my girl to the bird market."

Lao Wang's mouth dried up when he heard it. He knew the level of the city hospital too well, but he had to bite the bullet and promise.

"What's this called?" Lao Wang hung up and sent his doctor and ambulance bed to the municipal hospital.

Xue Xiaoqiao was so busy that he kept contacting the inspection department in advance to leave a vacancy.

Keep greeting relevant departments for cooperation. As a result, just after the examination, the patient was told to transfer to another hospital!

Xue Xiaoqiao was full of fire, but he had to bear it.

The brain outside director of the second class a hospital, embarrassed, cried and smiled at Zhang Fan and Lao Li, "I was also ordered by my superior. I can't help myself!"

Zhang Fan waved his hand and said it didn't matter. Then, he and Xue Xiaoqiao watched the girl be carried to 120 and ran out to the bird market.

Outside the brain, to tell the truth, this department is too difficult. Let alone a city, even a poorer province can't afford to raise super cow outside the brain doctors.

If you want to get out of the brain, don't talk about doctors, just say examination equipment. If you don't order world-class examination instruments, you don't want to understand.

To tell you the truth, this subject is very difficult.

In niaoshi, the ambulance of the second class a tea vegetable hospital rushed to niaoshi as fast as possible. After putting down the patient, without saying a word, he turned and left.

This is what Lao Wang told me. In his words, let's be a line car driver for once. Don't express your immature opinions. Even if people ask, you don't know.

Outside the brain of the Central Hospital of niaoshi Province, as soon as he received the patient, he directly said, "another drug addict."

In the car, the girl's mother has told her husband what happened. At this time, the girl's father has a brain lawsuit, but he is also secretly glad to be transferred to the hospital.

It's not over. When you arrive at the provincial central hospital, people directly tell the girl's parents that your child must have an operation immediately, and if you want to have an operation, you must hire an expert.

Please, please.

Then, the extrabrain director of the provincial central hospital helped to contact the moderate extrabrain director, that is, the director of Lao Li's further study, and the director who had operated on the soldiers with Zhang Fan.

As soon as people listen and look at their itinerary, they can't take it away. "I'll give you the best suggestion to find tea vegetable Zhang Fan!

I really can't get away. At present, the best way is to find Zhang Fan in the northwest.

He is in chasu. Yes, he is vice president Zhang Fan of chasu people's hospital! "

Stupid! Really, silly!

Chapter 779

Director Yang, the father of the drug addict (a), watched the deputy chief physician of bird city hospital at this time, and had a brain lawsuit.

Of course, what can a deputy director of a key hospital in the capital of the other party do to the leaders of prefectures and counties, even the big leaders of prefectures and counties.

To tell the truth, if his brother-in-law hadn't done some buying and selling of tea vegetables, he wouldn't have paid attention to the director.

"Why don't you talk about children? Alas, experts in the capital can't come now. Have you heard of Zhang Fan of tea vegetable?"

He has been to our hospital before. It seems that he is on the side of general surgery. Unexpectedly, he is an expert in brain surgery. Why don't you contact? After all, you are the land of tea vegetable! "

In a hospital, especially a large hospital, it is normal for doctors and nurses in a unit not to know each other, unless there is a famous one.

Zhang fan used to go to general foreign education and never came outside his brain, so he was not famous outside his brain.

Although the experts in the capital recommended Zhang Fan, the doctors in bird city are not familiar with themselves, and they are also doctors in lower level hospitals in the province.

He doesn't want to carry this pot. He can't afford to lose this man. As a deputy director, I still have some cards in the top three at the provincial level.

Besides, director Yang didn't make it clear, so he said it was epilepsy and wanted to go to the ward.

The ward is arranged for him, and the experts who want to clear it are also arranged. As for asking the third class deputy director to come forward and invite the doctors of the lower level hospitals, don't even think about it.

When director Yang was in the tea vegetable hospital, he called friends like helping boxing. A group of people who consciously had cards, status and energy called to the hospital.

He didn't just want to find acquaintances when he called people. In fact, he didn't take the tea vegetable hospital seriously at the bottom of his heart.

Looking for someone not only shows his status, but also shows his ability, but also brings pressure to hospitals and doctors. I don't know what to think.

It's estimated that it's similar to the star hiring fans to pick up the plane. It's a serious and powerful owner who goes to the hospital, regardless of minor illness.

This is the big face of a small cadre. It's really energetic. Do you know Zhang Fan? It is estimated that Zhang Fan's phone number has been set as a key VIP.

When the doctor of bird market said so, director Yang dared not scold. He had already fucked his mother in his heart.

He began to get nervous when things got worse.

"Can't our hospital operate on children? Can't you do it without surgery? Is it necessary to have an operation as soon as possible? "

Section chief Yang also saw the impatience of the other party, but the child was ill and there was no way.

At this time, he really missed the tea vegetable hospital. How enthusiastic the doctors were. They ran before and after, accompanied the examination and stared at the treatment. How good.

Oh, I can't think about it. When I think about it, it's like a donkey being kicked. It's hazy.

"When I left, why couldn't I tell people well? Even if I said hello, it's not so uncomfortable now! Oh, why did you leave? "

Section chief Yang feels uncomfortable. Like people hanging on the balcony of the building without pants, there are a group of spectators below. One of them carries a knife. It's really, up, up, down, down.

"Your child is..." the deputy chief physician pondered a little. He was worried that the other party would continue to haunt him. He simply had no scruples and said directly.

"Because of the epilepsy caused by drug (a), the brain tissue has changed. You see, the examination of tea element hospital is still OK.

Now there have been organic changes in the child's thinking area. If you can't operate as soon as possible and continue to develop, the consequences will be unpredictable. "

"Can't you do this operation?"

As soon as Yang Kechang listened, he was worried and angry, and he couldn't take care of his words.

"Well!" The deputy director was immediately unhappy. He wouldn't be so angry if the experts in the capital didn't introduce the doctors in the frontier.

He was a little angry, but there was no way to explain, "you decide for yourself!"

"I'm sorry, I'm sorry, I'm wrong. I'm confused, director. Now turn back. Is it time for the child to come?"

"It's estimated that the patient can't get on the plane for this disease. Now we can only hope to let the doctor come by plane.

Come up with a way as soon as possible. I'll take someone to give your child some support and treatment. Even if a good man trembles like this for so many hours, he doesn't have much energy. "

With that, the deputy director got up and left.

"What should I do, what should I do!" Yang section chief rubbed his hands, and the skin was almost broken. He didn't think of any good idea.

"Chen Qi, this beast has done great harm to people." While thinking of a way, he gnashed his teeth and scolded Chen Qi for digging a hole for him.

He turned around in the hall of the hospital and called for someone. The person in front of him could not count on it.

He wanted to find someone who really had some weight. He thought about it and thought about it. He thought that if he were a doctor of tea, he wouldn't come to the bird market to operate on his children.

Therefore, he felt uneasy as if he had got a dog and sighed.

"If you know today, why do you have to be a man? Stay on the front line and want to see you in the future!" He said to himself as he whirled around.

I don't know whether to say it to myself or to doctors far away in tea.

It was really difficult to find someone on the phone. Finally, the former secretary gave an idea.

Then, somehow, this guy found the human relationship on Li Hui's head.

Li Hui's brother-in-law can become a class. When he first got married, Li Hui was trembling. He stood in a row of big and thick brother-in-law. To tell the truth, he can change his shape with one punch.

As a result, after marriage, especially after having his own children, he returned to his wife's home. This uncle still has a high status.

First, Li Hui took care of his family more and more after his marriage. Second, it is also because Li Hui works in the municipal hospital.

Li Hui is almost responsible for the high blood pressure and chronic bronchitis of the father-in-law and mother-in-law. Moreover, Li Hui shows someone who has a fever and a cold.

At this point, Li Hui's position in the father-in-law's family has risen. As soon as I entered the door, several sister-in-law, uncle long and uncle short, very moist.

After all, Li Hui's father-in-law's family is an old tea vegetarian, so the section chief soon found someone

close to Li Hui's family.

My brother-in-law, the father-in-law, asked Li Hui for this matter. In front of ordinary people, section chief Yang still has a little weight.

Li Hui did not dare to agree. Just ask. For Zhang Fan, Li Hui has now regarded him as his only heel in tea, so it's about Zhang Fan. He doesn't dare to promise.

When he was about to go to work in the afternoon, Li Hui wandered around the administrative building for a long time. He came early and came at noon. However, he didn't go up because he was worried about affecting Zhang Fan's rest. He looked at the time on his mobile phone and went to work.

He just tidied up his clothes, rubbed his face, and made his muscles more relaxed upstairs.

For the patient in the morning, Zhang Fan is still very sorry. He was so young that he was ruined by poison (a).

Moreover, he actually wants to see the organic changes in the brain caused by poison (a). Unfortunately, people don't give him a chance.

"Please come in!" Hearing the knock on the door, Zhang Fan said. Seeing that it was Li Hui, Zhang Fan stood up with a smile.

"Why, I'm free today?" Zhang Fan took Li Hui and sat on the reception sofa.

Li Hui purposely flashed up and down the sofa. "Where? When the weather changes in autumn and winter, the respiratory department is full of patients. Lao Ju has been crazy recently. He asked our doctors to publish papers and learn English. His head is big."

Li Hui said to Zhang Fan with a sad face.

"What?" Zhang Fan knows the problems of Lao Ju. He is the only doctor in the hospital who has studied abroad. He has a good level and has a good temper.

Moreover, the experience of the respiratory department can't be poured into the posture that the needle can't be inserted, which is a bit of the meaning of Ouyang's management of Cardiology in those years.

"Secretary Ren of the Department of Cardiology and your younger martial sister recently wrote a paper. It is said that the influential molecules are very unusual, so our resident director is jealous."

"Oh, what, do you have an idea?" Zhang Fan thinks Li Hui also wants to find some scientific research projects and publish papers.

"I don't have any thoughts. My wife doesn't have enough milk (a) and the children have to eat at night. I get up two or three times in the middle of the night every day, and I don't sleep enough. I feel dizzy all day.

When are you going to have children? You have to refuel. My children are almost able to walk. "

"Ha ha, worry about you. Don't drink tea."

"No more! Will you go back to your hometown this year? " Li Hui asked again when he had nothing to say.

"Don't pull the calf, just say it quickly. What's the matter?" For Li Hui, Zhang fan can still chat more or less without the identity of the dean. This is the feeling of suffering together in those years.

"Hey, hey, I told you, but you should chat freely. If you can, don't force me..."

"Come on, you can't do anything that can't!" Zhang Fan smiled.

"Didn't a girl who took poison (a) go to the bird market this morning?" Li Hui smiled.

"What?" Zhang Fan probably understood when he thought about it. Either the girl's condition has worsened or the operation in the bird market is estimated to be a little difficult.

"They went to the bird market, and they pushed it directly to the experts in the capital. As a result, the experts recommended you and said that you were in the frontier, so he didn't have to come!"

"Oh, please come to you."

Zhang Fan looked at Li Hui.

"No, I didn't ask for it. I'm a nobody. The child's relatives and my father-in-law, who used to be neighbors, really couldn't save face, so they begged me to come.

Don't think about it. I heard you've been out of your mind recently. I think you've focused on out of your brain recently.

Besides, the girl has a very special medical record. I'm here to see you. Otherwise, I'll never be bothered.
"

Li Hui looked at Zhang Fan, stared at him, and quickly told Zhang Fan the whole story. Moreover, the bastard had a way of talking. He not only picked himself up, but also seemed to be considered by Zhang Fan.

"Hehe, your mouth! It can really confuse people's five mysteries. " Zhang Fan smiled.

"No. What do you say now? There is also a number one person in tea. I can't hold you back. Ask about my reputation in the Department.

Even people as difficult as Lao Ju say that the quality of our incoming doctors is the best! "

Li Hui was relieved to see Zhang Fan joking. When the matter was finished, he didn't worry about Zhang Fan's answer.

Zhang Fan originally wanted to see this case, but now Li Hui came to build a bridge and simply took someone to see it.

"Hehe, I reluctantly agreed to see your face this time!" Zhang Fan nodded.

"Don't look at my face, I'll look at you..." Li Hui explained quickly.

"OK, you call me. It is estimated that there are still flights now. If it is delayed until tomorrow, it is estimated that even if Lao Xue from the capital comes, he may not dare to do this operation."

Before long, someone came to Zhang Fan. He was very polite. Zhang Fan said he would take several people with him. The other party was not vague at all.

The car picked up the car and got on the plane. Xue Xiaoqiao, the director outside the brain, Lao Li and Zhang Fan sat together.

Xue Xiaoqiao looked at the empty space in the past. When he saw that there was no stewardess, he had no mind to continue to pay attention. He said to Zhang Fan, "Zhang hospital, how did they figure out how to let us go to surgery."

"When they heard that you came from the capital, they figured it out!"

Zhang Fan is quite resistant to the small plane of tea vegetable. Before the plane takes off, he wants to fall asleep early.

So I didn't want to chat with Xue Xiaoqiao. Xue Xiaoqiao glanced, "Zhang Yuan, you said this organic change, what if it was in the respiratory function area."

I can't sleep. To tell the truth, when Xue Xiaoqiao first came to tea, he looked proud and charming. Anyone can see that this young man probably came to gild.

As a result, after Zhang Fan and Lao Li had several operations, he directly fooled his girlfriend into tea.

At ordinary times, as long as you are free to see Zhang Fan, you have to ask a few questions. You practice your Kung Fu very hard. Even now Lao Li outside your mind is very optimistic about Xue

Xiaoqiao.

Of course, Zhang Fan is also optimistic about the development of Xue Xiaoqiao outside God.

"What do you say? Don't have nothing to say. Sleep for a while, sleep quickly, and have an operation later."

Zhang Fan urged Xue Xiaoqiao to shut his mouth and eyes as if he were coaxing a child.

Lao Li smiled and said to Xue Xiaoqiao, "hurry to have a rest. The director of the golden mean in the capital called me. It was Zhang Yuan recommended by him."

"Oh! What a cow! " Xue Xiaoqiao looked enviously at Zhang Fan who closed his eyes and pretended to sleep, and then closed his eyes.

Small plane, Tu Tu. At the bird market, as soon as you leave the airport, someone will pick you up.

After entering the hospital and the brain surgery room, the director of brain surgery of the provincial central hospital greeted him with a smile.

"Dean Zhang, hard work."

Lao Li is familiar with the God of the bird market. He acted as an introducer, "this is the director of the bird market God, director Wang. Brain tumor surgery is unique. "

"Oh, director Wang, nice to meet you, nice to meet you!"

Zhang Fan smiled politely and held director Wang's hand.

It must be very powerful to get the recommendation of the director of the golden mean brain surgery University, and he is so young that he has become the president of a third class hospital. Therefore, director Wang is very polite.

"Alas, we have a slow development outside the brain in Northwest China, and we don't have any organization. If it weren't for the introduction of experts in the capital, we don't know when we would know you.

This time, we must learn from Zhang Yuan. Zhang Yuan must be generous in giving advice. "

Surgery, this thing, I've heard and seen two different things. Being polite is really polite, but it's still a little sour in my heart.

Brain is a wonderful department. As the saying goes, outside the brain, it is a department with high gold content.

The income of doctor directors should be high, but in the northwest, this sentence is not very suitable.

In the northwest, the department outside the brain can't do orthopedics, general surgery, or even obstetrics and gynecology.

Directors of provincial hospitals often rarely go to prefectures and counties. Because there are so many operations that prefectures and counties can't do, he may not be able to do it.

Therefore, this department sounds very tall, but generally young doctors rarely take the initiative to choose this department, mainly because they have no "future".

The discipline cannot develop, just like a child without a mother, such as orthopaedics, the annual orthopaedic meeting, and orthopaedic doctors in the whole frontier will participate.

Outside the brain, it can't be organized. The equipment manufacturer wants to pay for organization, but there is no leader!

"Hehe, learn together, learn together."

Zhang Fan smiled.

"Go and bring the examination results of the patient to Zhang hospital for them to see." After talking to a young doctor outside the door.

He said to Zhang Fan again, "Zhang Yuan, please check first. I'll let them prepare what they need. I have another meeting, so I won't attend it. "

"OK, you're busy. Thank you, director Wang. "

Director Wang left. There was no meeting in the afternoon. He was in the office of the deputy director of their department.

"Lao Chen, do you think this young Dean is reliable?"

"It's hard to say, but the director of the golden mean should be reliable." The deputy director thought about it and said to the director.

"I think so, too, but I inquired about it in the morning. How can I say that he is engaged in general foreigners."

The director outside the brain couldn't figure it out.

"Hey, whatever. Lao Guo is looking for something. Let him go to the operation. We pretend to go to the

meeting.

He is also funny. He knows that it is the damage caused by smoking (a) and has to pull to the Department. Isn't it uncomfortable for him? "

Lao Guo is the doctor sought by the father of the girl who smoked (a) drugs. He is the deputy chief physician outside the brain.

The office is also Lao Guo's competitor. As for Zhang Fan, in fact, he had inquired about it long ago.

For Zhang Fan, he didn't say anything, "he's an orthopedic doctor."

However, I don't know why, he just didn't tell the director, let alone Lao Guo.

He thought privately, did he find the wrong person? It shouldn't be. Find the wrong person. This young Dean can't be stupid. Come on.

Just when they were tangled, Zhang Fan had brought people into the operating room.

Before the operation, the patient's family wanted to talk to Zhang Fan alone, but Zhang Fan didn't promise. In his words, "this is a hospital level consultation operation. If you have anything, talk to the bedside doctor. I'm just here for surgery. "

Into the operating room, "director Guo, less assistant. Would you like one? "

This was Zhang Fan's polite words. Outside his mind, four people surrounded one head and couldn't stand away.

Lao Guo hesitated for a moment, but still didn't go, "hehe, you go first in Zhang hospital, and I'll go again if there is a lack of people."

"Good!" Zhang Fan nodded.

Prepare for surgery.

Chapter 780

In the operating room of the provincial central hospital, many passing nurses and anesthesiologists smiled and nodded to Director Guo.

Director Guo took Zhang Fan with them and walked in the channel of the operating room. He was a little complacent and secretly squinted his eyes at the young Dean around him.

"The hospital is big, and the personnel change frequently. You come today and he leaves tomorrow. I'm not familiar with the people here. Put on a mask and buckle a hat. I don't know them at all!"

He said to Zhang Fan with a smile.

"Oh, yes! However, along the way, there are still many doctors and nurses who know director Guo! "

Zhang Fan's problem is not good. He doesn't look like an expert leader. Just like Ouyang's words, anyone can pull his face like a sunflower.

Lao Li next to him seems not to have heard. He is quite recognized by Zhang Yuan, and he is old. He is a little old-fashioned. The leader's conversation has nothing to do with his subordinates.

Xue Xiaoqiao couldn't do it. He listened to Zhang Fan chatting with each other, and his heart despised him.

"You are the person who takes the stage as an assistant to the great director of the golden mean. Is it necessary to please him!"

He was not angry, so when he was ready to interrupt, a woman came across with a notebook in her hand and kept pointing to the nurse and the doctor.

In fact, Zhang Fan's idea is to have more flowers and fewer thorns. He wants to have more extracerebral surgery here in the future. This is the difference between people.

"It's time to cut your hair. You can't hold your hat. I'll tell you, don't go into the operating room next time."

"OK, OK, head nurse!" The young doctor ran away against the wall like a mouse sees a cat.

Glancing at the doctor, the young man was quite respectful on weekdays. The chief surgeon gave a warning and let him go.

In the operating room, the head nurse is qualified to stop your operation because your sterile conditions

are not up to standard. Therefore, young doctors meeting the head nurse in the operating room is really like a mouse seeing a cat.

Then the doctor said to the nurses around him, "the time for the ultraviolet lamp is almost enough. It's time to replace it. When there are few operations at night, let the equipment department hurry to replace it. They've said for a few days. What's the matter with them!"

When Lao Guo saw the head nurse, he smiled at the head nurse and said, "the head nurse is busy!"

When the head nurse looked up, it was Lao Guo outside her head. She even smiled and said a serious Hello, "director Guo, who is in charge of the operation today? Why didn't you write it clearly on the operation sheet? A simple hospital, does our hospital have a dean outside the brain? "

If the department wants to have an operation, the bed doctor must first fill in a written thing similar to the operation application form and hand it to the director or superior doctor.

What disease, patient name, bed number, age, gender, doctor in charge and assistant should be written clearly.

Then it is handed over to the superior doctor for signature or the director for signature, and then sent to the operating room. The operating room will arrange nurses, anesthesiologists and operating rooms. Finally, they will pick up the patient number and the anesthesiologist will make a ward round before operation.

This operation is an emergency operation outside the brain. The bed doctor in the Department saw the lawsuit of the director in the Department and didn't dare to ask in detail. Anyway, the superior said it was Zhang hospital, so he wrote a Zhang hospital.

But outside the brain, there is no famous Zhang Yuan, and none of the directors outside the brain who came here is called Zhang Yuan.

Therefore, the head nurse said Lao Guo about this thing. People, this thing, dislike the poor and love the rich, hold high and trample low. It exists everywhere. Many people are.

Today, if it's an orthopedic operation or a general surgery, people will fill it in like this. The head nurse will never ask. She has to prepare the best operating room for people at the first time.

But the doctors outside the brain don't live in their hands, so they have no position in a large surgical system, and Lao Guo probably won't have a chance to be the director outside the brain in the future. It's just a common thing for the head nurse to step on him.

In the past, Lao Guo was a little bit of a person. He liked to be cheap and careless with little nurses, so the head nurse couldn't see it in his heart. This time, he found an opportunity and scolded him.

People are like this. Every drink and peck has its roots.

Lao Guo asked the head nurse to say a big red face, but he had nothing to refute. An old yellow tooth in his mouth was almost broken.

In this way, he has to face it with a smile. Otherwise, the head nurse will tear his face and stop the operation. If there is an accident, the responsibility is still his.

"Hey, the patient is in a hurry. It's a little special. I'm sorry, head nurse. I'll pay attention to it in the future."

He didn't introduce Zhang Fan. It's all like this today. Let's ask a doctor from a lower level hospital to fly a knife. Where does the old face go.

He didn't dare to look at Zhang Fan. He was still showing off just now. As a result, he leaked his butt in the blink of an eye. At least he is a man of dozens of years old. He is still a little embarrassed.

The head nurse looked at his low posture. After glancing at him, his voice was not very loud, but the weight of what he said was still ditch group "Use dessert, my Dr. Guo. We can't always wipe your surgeons' ass!

The little girls in our department don't like to have surgery with doctors outside your brain! " Seizing the opportunity to knock and beat, she also wants to protect the calf. She is also a long character.

Lao Guo blushed. Really, head nurse, he had no choice. It is estimated that the bedside doctor with him began to get angry again.

When the head nurse finished, he turned to continue his business. As a result, after turning his head, he suddenly seemed to have forgotten something and immediately turned around again.

At this time, Xue Xiaoqiao just touched Zhang Fan, which means, look, you hold people up and hurt them again!

The head nurse turned his head and stared at Zhang Fan and Xue Xiaoqiao. Xue Xiaoqiao thought he had committed aseptic operation, but when he thought about it, he didn't. Hats and masks are all good. Wash clothes and slippers have been changed.

Just wanted to speak, the head nurse stared at Zhang Fan and stared at him. He didn't get out of Lao Guo's mood. Suddenly, his eyebrows and eyes tattooed immediately, like waves, and came out at once.

"Oh! Dean Zhang, why do I look so familiar? On second thought, there are few surgeons like you in our hospital.

You haven't come to the operating room for a long time. Today's general surgery didn't write your name. "

Zhang Fan smiled again. Before opening his mouth, the other party hurried forward for two steps and half grabbed Zhang Fan's forearm, as if he were very familiar.

He came up to Zhang Fan and whispered, "which director of liver and gallbladder can't do the operation again. Pull you to strengthen your courage. You're too easy to talk!"

When director Guo saw the head nurse, he took a few steps forward, so he drew a little distance from Zhang Fan. The head nurse thought they were two waves of people.

At this time, the head nurse left Lao Guo and ran to Zhang Fan. Lao Guo was ashamed and had no place to put his hands.

"Hehe, isn't the Chinese New Year coming soon? Tea vegetarians are also very busy, so they haven't come lately. The head nurse looks a little tired recently. "

Zhang Fan knows too much about the nursing industry. The little nurse should praise her good skin. A young girl with water cares about this most.

The middle-aged head nurse can't boast about his skin. It's a little ambiguous to boast about others. When he brings a long person, he says that the other party is tired and tired, which is better than giving gifts.

"Zhang Yuan is still powerful. He is really a leader from surgery. He can see the problem at a glance.

So many operations, so many people, new doctors and nurses, and old doctors who don't worry, alas, my heart is breaking.

Which operation did you help today? I'll take you there myself and prepare the wash clothes for you. Why didn't you wear them! You are so forgetful. Have you forgotten where you put it? "

Enthusiastic and angry, for a time, the people watching were dazzled.

Zhang Fan's pleasant speech is the smallest aspect of this enthusiasm. The biggest aspect is that Zhang Fan has become famous in the hepatobiliary department and leveled the hepatobiliary Department of the central hospital.

The head nurse knows Zhang Fan's level too well, so even if Zhang Fan doesn't speak well, she has to be polite, but just stay away.

In China, the number of surgical invitations at the hospital level is average, which is very few compared with doctors flying knives privately.

Hospitals do not love themselves to make trouble for themselves, and do not want to take the initiative to admit that their level is not good. They must turn to other hospitals for help.

It is often the patient who makes a request and wants to ask a doctor to do the operation, and this thought can't be done with his mouth open.

First, the bed doctor must agree and the department director must approve, so as to succeed.

In other words, not everyone can invite throwing knives, and not everyone can throw knives.

To tell the truth, if a patient encounters a more serious disease, it is best to treat it locally.

Even if the local medical level is not enough, it is more convenient, fast and cheap to go to the city where you don't know.

Don't be sick. One question is the capital and the other is the magic capital. Do you know where the door of other people's hospital is open?

Do you know the cost of local hotels? Do you know the cost of local hospital care? Of course, it doesn't matter if there is a lot of money.

Therefore, throwing knives, which is not recognized but not controlled, is actually a good behavior for ordinary people.

You can think about how an academician doctor can turn his operation schedule to your head.

Therefore, people who scold throwing knives are still a little ahead. The head nurse of the Central Hospital knows this thing.

Her attitude towards Zhang Fan illustrates a problem. Can such people be rude? At the critical moment, they can save lives.

"Director Guo and I had surgery outside the brain today. Hehe, when we came, we didn't say hello. I'm sorry!"

Zhang Fan smiled.

Hi!

The head nurse could see it with a mask. Her mouth opened under the fluorescent lamp and on the mask. There are two bulges up and down. These two lips are big. It looks like the seam is bigger than the seam. It can be regarded as a hole!

"Oh, I said Zhang hospital, Zhang hospital, Zhang hospital. There was no surgical director surnamed Zhang in our hospital. It turned out to be you.

Aren't you afraid? "

"Ha ha, the patient has entered the operating room, head nurse." Zhang Fan smiled and didn't explain.

"Oh, oh, I'll take you there. I'll take you there."

The head nurse turned and took the lead to the operating room outside her brain.

As he walked, he thought to himself, "this hospital is so powerful that it can be done both in the liver and gall, and outside the brain. Good boy!

Do you want a contact information later? "

Being disturbed by the head nurse, Lao Guo can't boast and show off. His face is red and green. He is even ashamed and angry. If he didn't wear a mask, he would have foamed.

Xue Xiaoqiao looked at this posture. Isn't this the operating room of the central hospital? How can it look more and more like the operating room of tea vegetable.

Lao Li followed Zhang Fan, looked at Zhang Fan's back and smiled helplessly. He knew Lao Guo and knew that Lao Guo loved face before. At this time, Lao li felt a little embarrassed.

After entering the operating room, the head nurse listened and Zhang Fan took two people. After looking at Lao Li and Xue Xiaoqiao, the head nurse said to the itinerant nurses, "take out the appropriate surgical clothes for the experts and don't make disposable ones. Take the large one, Zhang Yuan. How strong they are. "

"OK, head nurse." The nurse quickly took away the disposable surgical clothes that were ready to be opened.

Is there a grade in the operating room? Yes, very obvious. This place can't escape the secular rules.

Some doctors with ordinary surgical skills often wear disposable surgical clothes.

This kind of surgical clothes is the kind of blue plastic film. It is airtight. The operation time is a little longer, just like a steamer, full of sweat.

The conventional surgical clothes should be prepared for the patients who have emergency surgery.

Can't we just prepare more sets? The shelf life of sterilized surgical clothes is only one day, and they are re sterilized after one day's use.

Therefore, for several operations today, prepare several surgical bags, and then reserve a few. There are also times of disinfection of surgical bags. More disinfection will reduce the service life.

In order to reduce the expenses of their own departments or to meet the requirements of surgical agents, surgical departments often prepare one-time for poorly skilled and young doctors.

Moreover, disposable surgical clothes are also the favorite of nurses. They throw them away when they use them. They don't want to be conventional surgical clothes. When doctors use them up, they have to clean them up.

But some big takers don't like to wear disposable ones, so doctors with poor technology can only bear it.

Moreover, if your skills are not good, even the little nurse will bully you. Hurry up, oh, why are you slower than XX? It's bad luck to build a platform with you.

It's no exaggeration!

Doctors are very fucked up. Before the age of 35, most of them pretend to smile and interrupt. You may see that some doctors come out of the operating room with a face like the indignation of taking a stool.

This depression is more depressing than Zhang Fan's small business in college. You may hear many doctors hanging up because of overwork. This is a breath, for self-esteem and self-improvement.

Therefore, in surgery, the heart should be big, the face should be black, and the body must be as strong as a donkey. Otherwise, you can't stand some complaints among colleagues in the early stage.

At the beginning of the operation, Zhang Fan took the lead, Xue Xiaoqiao helped him and Lao Li helped him. Before the operation, Zhang Fan asked Lao Guo again whether he could go to the operation.

This time, Lao Guo didn't even say anything and waved his hand. Lao Guo's heart hasn't slowed down yet. It's too embarrassing.

Surgery outside the brain is very different from surgery elsewhere.

Liver, gallbladder, pancreas, spleen and kidney. If this kind of tissue degenerates, do you want it? It's like a bad apple. The boundary is clear, and the rotten is rotten.

Want it? It's integrity. Like the white steamed bread falling into the cesspit, you can only find a way to cut it off.

It's different outside the brain. It's a wonderful thing.

Its resistance is not enough. It is still very powerful. A blood-brain barrier can block many bacteria and

macromolecular drugs.

To say that he has enough resistance, this thing is integral once it goes wrong.

It's like tofu. When a place breaks down, it becomes dried tofu or stinky tofu. Just a small piece, it turns black and zoom.

In other places, it becomes hairy tofu, covered with white hair.

For example, the girl who takes (a) drugs, her brain actually degenerates in a small place, but other parts of her brain, in the cerebrospinal fluid containing hormones, all make mischief again, as if she were infected.

Nonsense, willful and random to issue various orders.

Go and dance for me.

Go and undress me.

Go, give me a drink of urine!

Really, the brain variation caused by poison (a) is light.

There are those who can fantasize people into beasts and demons. Therefore, many drug addicts suck a few mouthfuls and feel terrible.

After being saved, the nose and lips were bitten away, like ghost films.

It's not strange at all.

“CT ! ”

Therefore, the examination outside the brain is very important. After opening the brain, we should compare the examination results.

Zhang Fan said to Lao Guo.

Lao Guo kept silent and his head was almost stuck in the crack of the wall.

Lao Guo hasn't reacted yet. The head nurse has been busy.

"It's not the CT of the Central Hospital, it's tea!"

The CT brought by Zhang Fan from magic capital is the best at present, better than that of the central

hospital.

"Not in the medical record, Zhang hospital!" The head nurse looked through the medical record and couldn't find it.

"Huh?" Zhang fan stops his preparations and takes a look at Lao Guo.

"I'll call, I'll call and ask them to deliver it."

The head nurse took a disdainful look at Lao Guo, immediately picked up the internal phone in the operating room and called.

"Xiao Li, are you confused. Don't learn from your teacher if you don't prepare all the materials for the operation. You will be confused at a young age.

Come on, run and send all the patient's information. Experts are waiting. "

The head nurse crackled, and Lao Guo couldn't sit still.

"Mom, what did you do today? It's too old!"
