

## Chapter 801

Chinese people have a simple concept of family. Really, without the beautiful word "home", maybe many people can become heroes, heroes and heroes, and go to Liangshan.

When you are angry and want to go forward with a knife, a word about your parents, your children and your lover can make many people calm down instantly.

But sometimes, some specific people can't, such as fire alarm, such as police, such as soldiers.

Because when they enter this profession, there is not only family affection but also a sense of mission in their blood.

For several years, people thought such people were fools, or such people had disappeared.

To tell the truth, if such people are really gone, they can't speak out comfortably.

Standing in the emergency center is also a young mother at the intersection, her hands covering her mouth and her whole body twitching.

Tears flow down your palms like a flood over a dam.

She looked at the door of the medical emergency room on the left and then looked at the right. Her husband, who didn't know life and death, had legs as heavy as gold. She didn't know where she was going or where she could go now.

Pain, love is like a knife.

Maybe there was telepathy, maybe there was a spiritual call between husband and wife. After the young policeman in the surgical treatment room was preliminarily treated by Zhang Fan, he didn't know why. He gently got up and walked to the aisle.

When he saw that he should be the wife of the father-in-law's family, his heart had been sad to the end, and his heart fell a large part towards the abyss.

His first thought was that something had happened to the child.

"Where's the child?"

"Wow!" The young mother, who had been depressed for a long time, looked at the open wound on her husband's arm and looked at other parts of him, and directly burst into tears.

"What did you do? What did you do. You don't answer the phone, you don't answer the phone, poor baby, can't breathe.

It's under rescue now. The doctor is critically ill. Ah! "

Holding the wall, she finally seemed to have a backer. She squatted there and cried loudly.

It hurts. The young policeman's heart hurts more than a knife.

It's really worse. Ordinary people can't bear their occupational exposure. Now their children who are only a few months old are in danger again.

God, are you really blind?

A few steps to his wife. As a man, he can't fall down yet. As a father, he wants to protect his children from the wind and rain. As a husband, he wants to give his lover a thick shoulder to rely on.

"Don't cry. It's okay. It'll be fine. We've all arrived at the hospital. We've all arrived at the best hospital for tea. The baby will be fine. Listen, get up. "

"Are you okay?" She cried wildly in her husband's arms, only a few times, because she still had children in her heart and didn't dare to cry more.

The husband didn't wipe his tears with his big hands and squeeze his face as usual.

However, the resolute face and steady voice still make the young mother feel much better. Finally, she has a backer!

"I, I'm fine. Get up and look at the children. " The young policeman pressed the pain at the bottom of his heart and comforted his lover in the most relaxed tone.

He is a policeman outside and has a clear conscience to the society. He is a father and a husband at home. He wants to raise a sky for the family. This is the responsibility of a man.

That is, the child had an accident today, otherwise the young mother would have seen the difference of her man.

Zhang Fan and his team cleared the wounds of the injured policemen at the first time with the fastest speed.

The police force has one thing in common, that is, holding together, which is also created by special industries.

The other two policemen rushed out to take care of their colleagues' children when they heard something had happened.

Really, sometimes, I have to admire these people. If ordinary people are exposed to AIDS, how can they be in the mood to care about other people's life and death.

But they are not. A group of people gathered together. They surrounded the little old lady Ouyang in the middle, talking and gossiping. Really, the white coat supported the black police uniform. A group of big men and a little old lady.

Ouyang is particularly petite, but the old lady's tone is the loudest.

"What are you doing? Spread out quickly. Don't make any mess. I'll tell you. Do you understand? What about you? Put your arm down and lift it so high! Nice?"

You, take someone and show me the steel bracelets you brought. It's either old or weak or sick and disabled here. Come on, don't be in a daze. "

For a time, Ouyang took over the command of the armed forces. It was strange that everyone listened to the old lady's command.

The deputy director of the medical department who was sent to the epidemic control center to get the blocker walked a little faster than before. When he was about to enter the emergency center, he deliberately accelerated his pace.

"What about blockers?" Zhang Fan also came out at this time. He stared at the empty deputy director's hands, and his voice changed.

"Leadership, leadership, CDC management, people who store freezers go to the bird market to turn relatives for the New Year!"

The deputy director hurried forward to report to the jacket group.

"Where's the key? The man is gone. Where's the key?"

After all, the leader is not professional. He doesn't know what the freezer is. He probably thought it was a safe.

"The key is gone!"

Zhang Fan grabbed the door frame and almost took it down. There was a voice in his heart, "why doesn't he have a little flexibility!"

"Why don't you smash it and get the blocker back? Ah, you're careless about human life. Do you know if you still have a sense of responsibility of medical staff, ah? What do you want to go for? Is it a messenger? Did you go sightseeing? "

Ouyang was furious. The original CDC phone couldn't get through. Ouyang sent someone to get it, which means that it's obvious that we must find a way to get the medicine back. That's good. They went around and came empty handed.

The leader in charge of health care couldn't stand because everyone in the jacket group looked at him.

"Doesn't our hospital have a spare blocker now?"

He hurriedly interrupted Ouyang's anger. At this time, Ouyang was scolding his subordinates. He was slapping him in the face.

Some things can't be said. For example, the establishment of hospitals is actually the establishment of enterprises and institutions, which is a non establishment.

The CDC is a real establishment within the system. In the past, for example, if a dog bit, you could get rabies vaccine in the hospital.

But I don't know why later, all of them were classified into the epidemic control center. Maybe the hospital is not professional.

"The hospital has only two spare copies. Usually, if necessary, they are collected from the CDC." The director of the hospital feeling office bowed his head and whispered the report.

Three people, only two pills. This is not grasping meat. It doesn't matter whether I eat it or not. It's my fucking life. Earlier and later, maybe life and death.

Suddenly, the young mother seemed to understand something. She stared at her husband's open wound and asked with trembling lips, "what's the matter, tell me."

Looking at his lover who was going crazy, the policeman lowered his head with guilt. "He was cut off by suspect. He is an AIDS patient."

The young mother, at this time, only felt that her eyes were dark and couldn't cry.

"Come on, give Xiao Chen and Xiao Wang medicine first. I'm their captain. I can wait. I'm in good health, I..."

As they spoke, the injured policeman, who was a little older but at most in his early thirties, was speechless and shook his lips slightly, but his expression was firm.

"No, call brother Chen and team Yang first. I'm young and not married. The burden is light. Come on, don't delay!"

Another youngest policeman also stood up, perhaps younger, and his expression was the most relaxed.

"I, I..." the young father looked at his comrades in arms in the trench, looked at his lover who was facing collapse, and listened to the cry of the doctor in the medical emergency room. He couldn't open his mouth.

Remorse, sadness, shame and helplessness, this is probably the most unbearable moment in his life.

Listen to who? Who should take the medicine first? Who dares to speak out at this time?

Ouyang!

"What are you doing? What are you doing? Don't you pay attention to me?"

One by one, what are you doing standing up? Don't you think the blood flow is fast? Sit down.

Now, listen to me. You, you go to treatment. "

Ouyang, with a blue face, pointed to the youngest policeman and the young father.

"I..." the youngest policeman wants to defend or be humble again.

"This is an order. You are a small soldier. Do you have any organization and discipline? Go quickly!"

"Yes!" The most relaxed policeman looked at his captain with tears and shouted out loudly.

Life and death, really, choice is not important, the result is the most important. Sometimes, if you dare to face this choice, you really can't have the strength in your heart.

Ouyang not only dealt with the problems in front of her, but also called the director of the medical department at home when she finished criticizing the deputy director.

In a word, go to the CDC as soon as possible to get the blocker.

Without stumbling, the director of the medical department hung up the phone and took his son to the

epidemic control center.

"It's all right. Let's go. The next batch of blockers will come soon. Be obedient. Let's go and don't get angry.

Go quickly. What guilt do you have? It's not that you'll die right away. It's only a short time. It won't delay anything.

Today, if my children do the same, I won't need your humility. I'll be the first to ask for treatment. "

The police captain who led the team, seeing the guilt of his team members, spoke to his two team members in a very gentle language, while patting them on the shoulder with his uninjured arm.

"This is our police, this is our front-line police. Today, this is a party lesson to whip the heart.

I want you to study carefully and experience this class. What should we do and how should we do it. "

The black faced leader looked at a group of men in front of him with red eyes.

Treatment, rescue, waiting, suffering!

The director of the medical department, with his son, has not yet arrived at the CDC. The stationmaster of the CDC has broken the freezer and is going to the tea element hospital with a blocker.

Seeing the director of the medical department, the stationmaster was almost crying! The anger of his superiors had rained heavily on his head.

He shouted in his heart: God, this is the dark cloud that fell on my head!

The blocker was sent to the hospital. At this time, the laboratory department of the hospital had also reported the results.

Weak positive for AIDS!

On this new year's day, it's true that not only doctors, but also leaders and police are tossed up and down, just like a roller coaster in an amusement park.

"Weak positive?" Ouyang took the report and looked at Zhang Fan.

Sometimes, the test of disease is like this, specious, strong positive, positive, weak positive, false positive, negative.

For example, HIV testing, strong positive and positive can't run away, but weak positive means more.

Maybe the patient has other diseases, maybe the patient has latent AIDS, maybe he doesn't have AIDS.

Ouyang dares to give orders and ask anyone to treat first, but she dares to say whether there is AIDS at this time. No, no one dares to guarantee.

Uneasy, the police and doctors at this time are all uneasy. I hope not, I hope not, I hope not.

I hope these steel bracelets are not. Really, there is no time when they have such expectations. But looking at the appearance of these people, I felt like eating *Coptis chinensis*.

"Dean Ouyang, what should I do now?"

The leaders are also confused by the process of getting up and down.

"Whether or not, blockers must be used!"

Zhang Fan said behind the crowd.

"Yes, whether it is or not, we dare not gamble. We must use it. They want to observe.

Now we should not only observe, but also clear the superior hospital to do more accurate specimen testing for us. "

Ouyang nodded and said.

"OK, I'll contact you now."

Ouyang is so awesome today. He not only commands the armed forces, but also the tea stomach and intestines.

This is the charm of professionalism. I know how to do it, but leave it to you, you won't!

The sad young mother looked at her man and entered the treatment room.

Her heart is still hanging.

In the intervention room, Ren Li and doctors outside Er have begun to intervene.

"Secretary Ren, no, the gap is too big to be blocked. The child is dying.

Now you have to open your chest! "

"Are you sure?" Ren Li quickly asks Han Jiangke, a doctor outside her son.

Dr. Han is ashamed at this time. He has just graduated. He has had this kind of operation, but it is also three help and four help retractor. The operation steps are clear.

You can make yourself the main knife. You can't do it. Look at your hands and think about the operation steps.

Dr. Han blushed and said dryly, "secretary, I can't do it."

There are thousands of diseases, many of which cannot be treated, but the most helpless thing for doctors is that I can recite the surgical steps of this disease clearly, but it's not the same thing when I start.

"Go and call Zhang Yuan!" As soon as Ren Li listened, she quickly shouted to the head nurse of the emergency center.

The head nurse turned and ran away. The black silk stockings in the little white shoes shook up like a pony scattering flowers on the grassland.

Cardiac surgery in Zhang Fan's system is open, but Pediatrics doesn't. although pediatric surgery is an insignificant department.

But infant surgery is definitely not a reduced version of adult surgery. It's two fucking things.

Zhang Fan gives the police to Ma Yichen and runs to the medical emergency room.

"Such a big gap!" Zhang Fan's scalp is numb looking at the color Doppler ultrasound.

"What now?" Look at this, Zhang Fan's face changes, and Ren Li has no idea.

It's too late to transfer to another hospital. Whether the door of the emergency room can go out is two questions. What should I do now?

"Do it, prepare for the operation immediately, ask the parents to sign, that flower, and explain the situation to the parents!"

Zhang Fan is really biting his teeth and explaining that he can only spell one now.

What would happen if he failed? Zhang Fan didn't think about it. Now his mind is full of how to operate, how to be the safest, and how to keep the little doll.

As for others, there is no time to consider.

"Good!" The flower picked up the signature and went out of the emergency room.

At this time, the whole hospital was mobilized.

The director of the anesthesiology department who just got up at home didn't put down his job. After a phone call, the director didn't even speak. He picked up his clothes and ran out.

The director of pediatric surgery, the doctor on leave of cardiology department and the old residence of respiratory department all came out from home at the same time.

The young police couple just got a bad but not bad news. They are weak positive. They haven't had a breath in their hearts.

The doctor came out with the critical operation list.

The young police who insisted and tried to stand up cried and cried helplessly at this time.

Cry, sad cry, happy cry, and can't help crying. But this helpless cry, really, in an iron man, makes people look so distressed.

"Sign quickly. Our hospital Zhang did the operation himself. He will go all out."

The flower is crying with her young mother. Is it sad? Not sad, but she just wanted to cry, and the tears couldn't help flowing.

"I sign, I sign!" Tears like pearls hung on the stubble. The young father trembled his hands and wrote down his distorted name. Two words were filled in the column of relationship: father and daughter!

The leaders are going to practice in the superior hospital. The director of the medical department takes the leaders out of the hospital instead of Ouyang. The deputy director stood and rubbed his hands.

Just about to turn around, the director of the medical department saw Shaohua.

Before he spoke, Shao Hua hurriedly trotted a few steps with a smiling face, "director, happy new year, I'll pay you a new year."

The director of the medical department, Qiang, grinned and said, "have fun, have fun. Are you delivering food to Zhang Yuan? "

"Well, I'll deliver dinner to Zhang Fan. Is he in the office?"

Zhang Fan's family in Su province is different from those in other provinces. In other families, the protagonist of the first meal at the beginning of the new year is usually dumplings.

Zhang Fan's family is long noodles. What is long noodles? In fact, it is saozhi noodles.

In the families in Su Province, especially in the families around Lan City, if the housewife can't cook a bowl of long noodles well, it's estimated that she will feel bad during the new year.

This kind of pasta is very particular about mixing flour. It needs to put a lot of alkali and make the white flour into a ball.

The dough on New Year's Day is often mixed by the most powerful man in the family. What we pay attention to is strength and strength.

The dough is shaped, and then the skillful housewives come on. They sprinkle corn flour on the panel and roll the dough into a thin crust with a certain rhythm.

Because of the geographical relationship, Su province has less food than the south, so it can only work on a single wheat.

When the dough is formed, it depends on the time of the housewife's knife worker. Handy housewife chop! Chop! Chop! Cut the folded dough into noodles of almost the same width.

Then a jitter and a corn brush would go down, and at this point the rice noodles were distilled.

Thin but not messy noodles were presented.

Mix the soup, and the potatoes should be Ding, one by one, just like a small square, neatly placed there.

Carrots should be Ding, just like the size of potatoes. They must not be big or small.

White tofu should also be diced tofu of the same size.

This is all a test for knife workers.

Yellow potatoes, red carrots, white diced tofu, and then add meat Sao Zi, wide vinegar and more oil.

Sprinkle with scallions and coriander.

When you boil the pot for dozens of times, you must fish for noodles. The smooth and strong light yellow flour is handed over to the sour and good-looking topping, accompanied by a mouthful of garlic.

Darling, a bowl down, the comfort of the stomach is really unparalleled.

Zhang Fan is good at this, and it is not a traditional tradition on the first day of the new year.

So early in the morning, Shaohua hurried to the hospital with long noodles.

Without taking a bite, she thought that Zhang Fan would stay up late on duty so that he could eat sour

and delicious pasta early.

"Zhang hospital is rescuing patients in the emergency center. It's estimated that I can't care. Let me take you to Zhang hospital's office first."

It's hard for the director of the medical department to say don't wait. I don't know when the operation will end.

After Shaohua entered the office, he didn't know how long it would take Zhang Fan, and he was embarrassed to ask more.

On Zhang Fan's table, he kept using chopsticks to pick up, put down, pick up and put down the noodles. This kind of noodles is afraid of soaking in soup.

Once soaked for a long time, it will become instant noodles.

Slowly, the original heat wanton long noodles, slowly lost the temperature.

The original slippery noodles slowly began to condense and became pimples.

Shao Hua looked sadly at the bowl of noodles in front of him!

## **Chapter 802**

Winter, spring. To tell you the truth, at the time of the transition between winter and spring, the climate of tea vegetarians is good in the northwest.

For example, Su Province next door. Once the first month is over, darling, the yellow sand all over the sky. If the wind is a little stronger, it feels like a demon God is coming. It's no exaggeration to reach out without five fingers in broad daylight.

Moreover, one year when Zhang Fan was in Jiangsu Province, a black storm happened in a city in the corridor, which was said to be the worst in 30 years. The wind was so strong that even the smaller stones were like rolling eggs on the ground.

Then, the masks are out of stock, and it's not enough to bring one. You can't open your mouth. Otherwise, your mouth is full of sand.

Tea is different. When the dust is about to fly in the south of Tianshan Mountain, tea has become spring rain and spring snow falling slowly like oil.

In the wild, from a distance, you can vaguely see a little green fire and breath of life.

A few days ago, in the twelfth lunar month, people who were still cold were timid, wearing down jackets, like newspapers pasted on their bodies, and the cold air poured in.

But just after the new year's Eve, the weather seems to be obviously different. Wear thick clothes. It's not hot when you enter the room.

In the past, Zhang Fan didn't dress seriously and didn't eat by his appearance, so he wasn't very attentive.

When he fell in love with technology, he really realized the mentality of old Mr. rutono.

But it's different after marriage. In a word of hatred, Shaohua is more interested in dressing up than Zhang fanbi.

Take care of your hair regularly. Although clothes are not luxury, they can also be regarded as a small expensive among the working class.

And having a wife who is afraid of your cold really makes Zhang Fan happy. Before going to work in the morning, Shaohua's clothes have been ironed neatly, increasing or decreasing with the weather.

Wearing thermal underwear, Zhang Fan looked at the situation of children. He was not only hot on his body, but also hot in his heart.

Looking at the child's chest not a few bricks, you can imagine how small her heart must be.

The heart of an adult still has a detour, and the heart of this villain is really a one hammer deal. If you can't, you can't. the fault tolerance rate is too low.

Not only does it depend on the skill of the chief surgeon, but also the requirements of assistants and other doctors in the operation team are quite high.

This also explains why pediatric surgery hospitals in China were famous in the past few decades.

Because their team has more strict discipline.

"Zhang Yuan, everything in the operating room is ready." The head nurse in the operating room called Zhang Fan for the first time.

"Good! Prepare for handover! " Zhang Fan hung up the phone and took a deep breath.

"Secretary Ren, prepare to send the children into the operating room."

"Good!" Ren Li nodded seriously. Then he said to the doctors in the internal medicine department: "the preparation of the internal medicine group, cardiogenic and oxygen mask must be synchronized with the children.

Whether the children can safely enter the operating room now depends on us.

Comrades, we must be thousands of times cautious and never make any mistakes.

Because we have no chance. Are you ready? "

"All right!" The female voice is greater than the male voice, and the number of female doctors in internal medicine is still relatively more.

Looking at a group of serious doctors in front of her, Ren Li turned her head and looked at Zhang Fan.

"Zhang Yuan, give orders!"

Zhang Fan looked at the injection needle that had been drawn from the ambulance, looked at several male doctors holding the movable emergency bed at the same time, and looked at the nurses standing side by side and holding up the infusion stand.

Zhang Fan silently said, "don't have an accident!"

Sometimes, in a desperate situation, people are really idealistic.

"European hospital, we are ready to move, and the children can enter the operating room."

Zhang Fan took the phone to Ouyang outside the emergency room and began to call.

"Good!" Ouyang didn't specifically ask again. She knew that in this regard, if Zhang Fan and Ren Li couldn't do well, no one in the municipal hospital could do better.

Time cannot be delayed.

"Elevator group in place." Ouyang started with a walkie talkie.

"The first floor is in place!"

"The second floor is in place!"

"The third floor is in place!"

"... the building is in place!"

The hospital has a special operation elevator, but today, in order to ensure safety, Ouyang directly controls all elevators, and special personnel are on standby on each floor.

It's really the Spring Festival, that is, the breakfast on the first day of the new year. It's too difficult to meet another time!

"What's going on in the aisle?" After the elevator group finished, Ouyang continued to ask.

"Report to the dean that there are no idle people in the aisle."

"Good!"

"Zhang Fan, start!"

With that, Zhang Fan in the rescue room opened his mouth to "prepare!" Then I looked at everyone when everything was ready.

"Start transfer!"

More than a dozen doctors and nurses are almost synchronous, and their steps are almost the same length.

The rescue bed, monitor, ventilator, infusion stand and drugs ready for rescue at any time move quickly and steadily like a cloud of white smoke.

There were not enough people, so Ouyang directly commanded the spare policemen.

Just like wartime management, the police are double duty at every intersection, every corner and every elevator door.

The people who came to see the doctor have seen the sky.

"God, what is this?" A drunken man looked at the dark police in the hospital as if facing a great enemy. He was surprised and couldn't speak.

The quarrel stopped, and the tear gave up. They all stared at it like watching western scenery.

"What kind of person is this? Such a high treatment."

"Well, it's probably the leader."

As a result, when the child came out, everyone was speechless.

The little man lay on the big rescue bed and looked so weak and fragile.

Looking at the children covered with intubation, looking at the blue and purple children.

The child's mother, the policeman's father, are distressed and pull into a lump. I really want to go up and hold the child. I want to ask her if it hurts. I want to see if she cries.

But doctors like walls isolated them.

The rescue bed quickly entered the elevator.

When the door closed slowly, the child's mother held her mouth, tears like rain, and cried without a sound.

Think about yesterday, the child also giggled. Now, looking at the child lying in the rescue bed, really, now she can do anything for the child, but she can't do anything.

When the police saw the purple and blue children, their faces were obviously sad.

Think about your colleagues and your children. Looking at the children lying in the emergency bed is like your own children. It's hard to say.

The child's grandparents were trembling and speechless. The babbling child and the toddler baby were fine yesterday, but who knows, in one day, everything is gone.

In the elevator, "oxygen saturation continues to decline!" Anesthesiologists kept reporting data.

"Strong heart!"

"Breathing stimulants!"

It's hard. It's really hard. Physicians almost use their whole body skills in order to continue the child's weak breathing and heartbeat.

Zhang Fan looked at the data and the sweat in his palm came out. It's too dangerous. The lines on the

child monitor are faint and seem to be straightening soon.

The surgeons looked at the data and dared not swallow the water. They were deeply afraid of affecting the children.

People, life, really, sometimes, looking at the pain of life and death, but after the pain is relieved, you can immediately chew with meat and bones and forget to be proud.

And sometimes, without pain or itching, if you can't come at one breath, you go to another world.

To tell the truth, no pain, no itch, no pain, no discomfort, and then went to another world, not everyone enjoyed the luck.

In death, a strong sense of suffocation and near death are the most terrible. When effective oxygen replacement is not possible.

Like countless steel and copper foils crashing in your ears! Bang! Bang! Fatal impact.

The nostrils are like a bull's nose. They are open enough to put their thumbs in.

In front of me, the color of gold and black kept changing, and my heart was about to jump out.

A strong sense of suffocation, like a boiled and peeled egg stuffed into the respiratory tract, sticks to the respiratory tract, upper, lower and lower.

Moreover, when people's consciousness is awake, it is particularly terrible. Both hands can involuntarily scratch the muscles near the neck into holes.

Perhaps comrades who smoke have had this short-lived feeling. When they get up in the morning and a mouthful of phlegm blocks their throat, the moment of suffocation, if amplified and prolonged, is a sense of near death.

Eight month old child, I don't know if she understands, but when the bean sweat on her small face replaces tears, I can imagine her pain.

The elevator keeps rising, and tens of seconds, just like centuries, makes parents, children and even doctors feel very difficult.

Ding Dong, the elevator door is open. The head nurse in the operating room, led by the anesthesiologist nurse, is already on standby at the door.

Because the operating room pays attention to a strict asepsis, you must wear hand washing clothes when entering the operating room, and you must wear operating clothes when going on the operating table.

So they replaced the physician here.

Ren Li has gone in early to change her clothes.

The physicians who were taken over, looking at the children who entered the operation, involuntarily wiped the sweat on their foreheads.

As if it was a responsibility, it was finally sent out from his own hands.

Really, it's no wonder doctors and nurses have this idea. Such pressure, life and death in a moment of pressure, is too uncomfortable.

Not long after the leader left the hospital, the head of the tea vegetable police station rushed to the hospital with people.

"European Academy, what can we do?"

He reported to Ouyang with a subordinate attitude.

"Maintain order and assist doctors in testing and treating steel bracelets."

"OK, no problem."

The addicted men and women began to be afraid at this time. The posture in front of them was too fierce.

The black police didn't say, and these policemen looked at them with eyes like wolves, as if they could tear them alive.

"Get up and say what about you. Pretend to be a dead dog and can't get up?" That's a kick.

Then the leader seemed to find something and quietly turned to the other side.

In the operating room, doctors simplified everything as much as possible, "Zhang Yuan, body position is ready!"

"Disinfection ready!"

"Complete anesthesia!"

"Start!" Zhang Fan spoke in a low voice, but in words that all doctors could hear.

Open chest, the child is too poor. On his small chest, the original white powder and tender skin turn

purple black, just like burnt sweet potato.

"Knife!" Zhang Fan is holding a knife. Really, if ordinary people can't row down towards such a small and poor body.

But at this time, Zhang Fan, who holds a knife in his hand, can almost say that he doesn't have a little emotion.

No matter how big or short, in his eyes, old or young, in his mind, now is disease.

Under the sharp blade, the soft skin was gently cut away like the wind blowing leaves.

Blood, dark red blood slowly seeped out. Really, there was no fresh feeling.

Just like a plate of duck blood and pig blood, it is dark red and there is no breath of life.

The flesh cracked when the knife was cut.

The thin and soft ribs don't need bone biting forceps. The scissors twist gently and open.

"Chest expander!"

Zhang Fan said softly.

The nurse quickly handed over the chest expander.

"Child's, this is adult's!" Zhang Fan didn't lift his head. When the chest expander was put into his hand, he didn't have to look. He knew it was an adult's. it was too big.

The nurse's face turned white, "this is the only one in the instrument department. I, I..."

Boom! Zhang Fan is angry. Really, on the operating table, Zhang Fan doesn't get angry with his colleagues even if he is serious.

But today, inexplicable anger burned over Zhang Fan's head. The bright chest expander in his hand was thrown to the ground of the operating room by Zhang Fan.

"Go and let the director of the instrument department wait for me at the door of the operation!"

Zhang Fan is angry. Zhang Fan is rarely angry. The originally tense atmosphere in the operating room has improved. I don't know how many levels there are.

Everyone's heart was lifted.

Really, it's easy not to get angry. It's not easy to get angry. The former Zhang Fan, in the operation, can overcome as much as possible.

A hospital can't do everything according to its standards. It's impossible.

But today, Mingming stressed at the conference that we must ensure the comprehensiveness of surgical instruments.

But the director of the equipment department is like a deaf ear. He always enters special households.

You can earn money, but you can't waste your life!

Zhang Fan's anger soared. Really, his hands began to tremble.

Seeing the child open his chest, there is no corresponding surgical equipment. This is not what killing is.

Pressure and pressure, pressure and pressure, if it weren't for the children, Zhang Fan really wanted to go out and point to the director of the equipment department to vent his anger.

Now, get angry. If getting angry can save people, Zhang fan can burn himself.

But it's useless!

"Director Li, it's up to you. You must open your chest and there must be no displacement."

"OK, Zhang Yuan, don't worry!"

The director of cardiothoracic surgery, clenched his teeth and made a hard guarantee.

He specializes in lung, and he knows the relationship between this kind of fixation.

The child is too young to be fixed by two people. Lao Li's big hands directly block the operation field of vision to the point where there is no operation space.

But what can be done? Now it can only be more difficult to continue.

"Zhang Yuan is angry!" The head nurse in the operating room reported the situation to Ouyang at the first time.

"What happened?" Ouyang went to no one and asked quickly.

She knew Zhang Fan so well that she was angry when she saw that everyone was xiangyanghua Zhang Fan. She must have been extremely angry.

After the head nurse reported, Ouyang's face looked blue and blue.

"Go and let the director of the instrument department run to the door of the operation. Take out all the bidding records in recent years.

If you want to die, I dare to bury it! " Ouyang said to the director of the medical office with a cold face.

"Good! I'll go right away. "

The director of the medical office was sweating. Ouyang protects the calf, especially the calf, but today, the old lady will refuse to recognize her six relatives.

Cut, separate, open, expand the chest.

Zhang Fan struggled into the child's chest. The heart, not much bigger than the goose egg, was beating faintly.

It's like going to strike at any time. Click, click, click, the fluctuation is very small.

"Zhang Yuan, insufficient blood volume!"

"For blood transfusion, red blood cells must be sufficient. Now children are hanging on red blood cells."

In the blood bank of the hospital, bags of blood were sent to the operation, "Dean, I have to be prepared. I'm afraid if there is an accident, it's too late to ask for help at this time."

The director of the blood bank called Ouyang.

"OK, I see."

Ouyang hung up and began to ask, "how many doctors and nurses are coming to work today?"

"More than 80 people."

"Prepare to inform those who have not donated blood in the near future, and those who meet the standards, let them prepare to donate blood.

Today's blood donors can have three extra days off. "

"OK, I'll inform you now."

The director of the medical office always appears around Ouyang like a shadow anytime and anywhere.

"European Academy, do you need to donate blood?"

The head of the police station heard Ouyang.

"There is no shortage now, but I'm afraid of accidents."

"There is no need for doctors and nurses to donate blood. They have to save the lives and heal the wounded. European hospital, this task is up to me."

With that, he walked out without waiting for Ouyang to speak.

"I am... Now, our brother, let's face life and death together, a brother who stirs life in a pot.

On duty today, he was cut by criminals with AIDS blood knives.

To make matters worse, his child, a child under the age of, had a heart attack and was in danger.

Comrades, brothers, I always... Ask you, if you are able to donate blood, please arrive at the tea vegetable hospital immediately.

This is not an order, this is an old policeman's request, please! "

For a moment, the words of the person in charge spread out in all the police vehicles and police bands in the tea vegetable area.

Then, the blue and white police cars in the city and nearby counties and districts set out towards the tea vegetable hospital.

"Come on, take me. Our brother is in trouble. It's unreasonable not to go."

"And me, wait, I'll go too."

The black torrent, a collective, a group, formed a torrent into the tea vegetable hospital.

### **Chapter 803**

"I'll go, I'll go, I'll go. I'm sober. Even drunk driving can't use this treatment. I'll go, I'll go. I won't directly catch me and shoot me!"

Early in the morning, a young man who drank a lot of wine on New Year's Eve last night thought that the police didn't go to work for the new year, so he secretly touched his car and wanted to go to his girlfriend's house to pay New Year's greetings.

As a result, as soon as I got to the gate of the city hospital, I saw the motorcade with flashing lights coming in his direction.

Not only the riders of the traffic police, but also the rare off-road criminal police. What is more exaggerated is that there is a black armored vehicle and explosion-proof vehicle behind the team.

To tell the truth, the little young man was scared out of his urine. He grabbed the mineral water frozen into ice on the car and poured it into his mouth.

Ice ballast ran down his throat like a knife, and he showed his teeth in pain.

Most of the bottles went under the ice, but the frightening police car convoy turned into the city hospital.

"I'm scared to death! I'm scared to death. " Wiped the cold sweat on his head, Xiaonian's legs began to tremble.

"It's not new year yet! What's the display of the Chinese new year. There are only two flash lights! "

The driver who drives a black car wants to make more money on holidays. When he sees the team, he quickly stops, lights a cigarette and looks at the team.

"What's the matter? Armored explosion-proof vehicles are on the street? Is it... "

More and more people lie on the windowsill in the residential buildings where the road has been crossed twice.

To tell the truth, in the past, in Suzhou Province, at least it was also a station of a large military region in China, but Zhang Fan really didn't see any tanks or armored vehicles.

As a result, I came to the frontier. Well, I didn't just see it. I also sat in some armed armored vehicles and special obstacle clearance vehicles, together with round helicopters several times.

I was curious before I sat down. I regretted it after I sat down. Really, my intestines can be shaken out.

The motorcade, all kinds of police cars from all directions, traffic police, criminal police and special police, some of them were rotated from their posts. They rushed to the municipal hospital before they could put down their guns.

"Thank you, thank you. I bow to you." The young policeman's father looked at countless strange brothers with tears on his face.

The strong men with sleeves are like fighting in the street, exposing their left arms one by one.

Those who knew and didn't know, and didn't say much, came up and patted him on the shoulder, "you're welcome. The police in the world are one family. If something happens to our family, how can brothers stand idly by.

Hurry to see the children. Don't delay here. " A leader who seemed to do ideological work kindly comforted the young father.

"Thank you, thank you!" The young father was speechless and his lips trembled.

"Add 500 medical expenses to the police child who underwent surgery today." Secretly touched, a policeman saw that everyone didn't pay attention and stuffed the festival fee into the charging window.

As a result, I just looked back and saw several policemen coming. There were no words and they nodded to each other.

The policeman who donated the money touched his pocket, "Hey, forget it, just quit smoking. The family should understand. "

Before long, the director of the blood bank called, "Dean, let the people from the municipal blood bank take some away. There are too many blood donors here to deal with."

Ouyang was still angry and scolded the other party: what's the use of you? He usually shouted that there was no blood. Now there is blood and he can't deal with it.

After hanging up the phone, Ouyang's heart was still unhappy. The older the others are, the more agreeable they are, but the older the old lady is, the more spicy she is.

Looking at the deputy director of the medical office in the distance, Ouyang stood upside down, raised his triangular eyes, waved and called him over.

The deputy director of the medical department has trembling legs.

In the hospital, Ouyang cleaned up doctors and nurses, which was relatively restrained.

However, they are not clinical people. Really, they can kill everywhere.

Don't talk about him. Even if he was not a clinical secretary before, he was treated as a grandson by the old lady. He didn't even dare to say anything.

Anyway, Ouyang can't help with the work in the operating room. He might as well vent his anger here because he's angry and idle.

"Preparation, establishment of cardiopulmonary bypass!" Zhang Fan has calmed down his anger. Although he is helpless, his immediate work is the most important.

"After the commissioning of the artificial cardiopulmonary machine, cardiopulmonary bypass can be established!"

"Start! ~" Zhang Fan ordered.

What exactly is an artificial heart lung machine? In fact, this thing needs to be improved. It's ECMO.

To really explain how this thing works, it's super troublesome. Let's talk about it.

The human body has a big cycle and a small cycle. It sounds like the luck of a fantasy novel.

In fact, the blood comes out of the heart, turns all over the body and then returns to the body, which is the great circulation.

Small circulation refers to the circulation of blood from the lungs to the heart, which is also called cardiopulmonary circulation.

The artificial heart lung machine actually simulates a circulation between heart and lung, replacing the functions of heart and lung.

A small circulation is formed by a machine outside the body, and then the blood is transported into the body to form a large circulation.

It sounds very simple, but at present, China can send rockets into outer space, but this thing can't be made.

Ion exchange, pressure change, blood filtration and concentration, detection of perfusion system. To be honest, the invention of this thing directly makes the technology of cardiac surgery qualitative change.

Just like repairing a car, when the car starts, you can't repair the engine and the heart. But with this thing, even if the engine continues to work, you can't delay the doctor to repair the heart.

In fact, this one of the tea vegetable hospital is a gift given to Zhang Fan by the regional manager of Sandao pharmaceutical. To be honest, not to mention the whole frontier. Even in the whole northwest, the tea vegetable machine is unique.

When the instrument came in from abroad, Zhang Fan's master brother was almost drooling with envy.

The instrument can be delivered, but people charge money. Ouyang bit his teeth and paid hundreds of thousands of training fees to let people's technicians train in tea for several months.

The price of this thing is not the most expensive in the hospital, but it can't be replaced. For example, CT NMR, domestic ones can be found everywhere.

But if this thing breaks down, you have to ask professional engineers from other countries to repair it, and reimburse the travel expenses and air tickets.

When the machine was delivered, Ouyang looked left and right as if he had seen golden pimples.

When the instrument starts, the blood, dark red blood can finally replace the bright red arterial blood.

"I've crossed a barrier." Zhang Fan's hanging heart can be regarded as half.

The child's body finally began to change and fade from the color of black and purple.

Director Li supported the little man's sternum with both hands, and his arms remained motionless.

"Director, I'm going to start." Zhang Fan looked at Lao Li's expression and said softly.

"Zhang Yuan, you can rest assured that there is absolutely no problem and there will be no jitter."

Lao Li solemnly said to Zhang Fan.

"OK, please."

Zhang Fan nodded, picked up the sharp knife and pointed to the little man's heart.

With a heart not much bigger than goose eggs, Zhang Fan took a deep breath.

Like taking a big (a) cigarette, spit out slowly.

But the knife in the hand has been cut to the heart. To be honest, if you simply say that the difficulty of heart repair is not high in the operation.

It's not much different from suturing muscles. It may be simpler than suturing muscles.

Because the muscle of the heart contains a lot of water, it is very tough and easy to sew.

But there are too many things attached to this thing.

Various channels, valves between atrioventricular, various neural pathways and various interspersed vessels.

A little carelessness, such as a slightly larger scar during repair, there is no need to make mistakes, that is, the scar is larger.

This place becomes a stone in the river. You should have seen the stones in the river. When the water rushes through, a vortex will form behind the stones.

This thing, a truth, once a scar is formed, the blood can make a vortex for you.

Heart disease, such as atrial fibrillation and ventricular fibrillation, is like collapse.

It is because the heart beats disorderly, forming a blood flow vortex, which changes the torque of the fluid.

The heart worked hard to squeeze and squeeze, but the blood just couldn't squeeze out. Then it kills people.

A particularly typical metaphor, such as the cow in the pasture. You look at others once. You squeeze them rhythmically, and the milk flows barely. It's special. The cow is comfortable as a massage.

But you can't do it when you get on the hand. You're almost pulling it down, but the milk just can't get out. I can't wait to take my mouth again. As a result, the cow's painful hoof overturned you.

It's all the same.

Moreover, this kind of suture pays special attention to staying in place. What do you mean? In fact, it's like a wall at home.

In the bean curd residue project, the wall was opened accidentally. You killed yourself by adding cement. After the cement solidified, expanded and shrunk, the seam on the wall could not be seen. As a result, the door on one side could not be closed tightly.

Truth is actually such a truth.

Not only these, during the operation, the doctor coaxed the heart to beat like a child while repairing.

Really, it's not surprising that general hospital cardiac surgery can't develop. It's really too difficult.

Like eating salted duck eggs, Zhang Fan gently opened the muscles of his heart. His action was so gentle, just like taking off his clothes and going to bed like a thief after overtime surgery at night. He was deeply afraid of disturbing Shaohua.

Open the heart!

It is estimated that we have all eaten pig hearts, cow hearts and sheep hearts, while few people have seen live animal hearts.

What kind of state is it in this thing.

Outside the heart, like a muscular man. The muscles are towering, and the blood vessels on the surface are angry. At first glance, it is not easy to meet the Lord.

But inside the heart is another scene.

This thing looks like a strong man outside, but inside it looks like a gentle woman wearing slippery white silk stockings.

Although it seems that there are countless wrinkles in the gullies, touching it can make people feel slippery.

If you can't understand, open your wife's upper eyelids and look at her eyelids.

Inside the heart, just like this opened eyelid, the muscle surface is covered with a layer of white, especially smooth, soft and wear-resistant tissue.

Zhang Fan's positioning, really, is not boasting. Zhang Fan's surgical positioning is too awesome.

Once the knife goes down and gently turns over, the gap is directly exposed in the operation field. It can be said that there is no place that can reduce the damage more than this place.

Suture the muscle, big pliers click click, two tooth tweezers are fixed, and a few stitches can be done.

But this thing is deeply afraid of leaving scars. Where dare you use tooth tweezers, even flat tweezers.

Who can guarantee not to leave scars? It's like tearing a hole in a silk stocking and stitching it up. You feel like a pimple.

People's blood is not stupid.

Moreover, the instruments are not ready today. It's hard for Zhang Fan to do the operation.

Just like in the boxing ring, there is endless power and the ability to punch the other party and call his

mother, but the referee tied his hands first.

While Zhang Fan was doing the operation, the sweat on his body kept flowing. The head nurse could hardly change the gauze.

Nervous, difficult, even slippers are watery in the toe seams.

Sew, sew, with the finest thread, with children's ophthalmic instruments, mend bit by bit.

The gap is not much bigger than soybeans. Zhang Fanxian feels like decades have passed.

Lao Li bit his teeth and dared not move his sour arm, although he could not see the operation.

But looking at the sweat beads on the back of Zhang Fan's head as dense as lotus, he really worked hard and insisted.

Young people really can't do this kind of work. It's not that young people have no strength, but that young people are old and firm.

Sew, a little sew.

Finally, the crack was sewn up by Zhang Fan, slowly looked up, slowly took the instrument out of his heart, and then looked carefully.

"Beautiful, so beautiful!" Zhang Fan himself is a little proud.

In such a difficult environment, it was completely and safely stitched up. The joy in Zhang Fan's heart can't be described in words.

The good news is not only in the operating room, but also outside the operating room.

"Dean, according to the report of the laboratory department, the blood of the steel bracelets has been detected.

All negative. "

"Really? All negative? "

"Yes, we repeated it three times and all the results were negative." The tone of the director of the laboratory department was full of joy and pride.

No matter how awesome your clinic is, you don't have to wait for our results! I can't scare you without my report.

"Great, great." Ouyang was so happy that his eyes were almost narrowed.

The deputy director finally dared to wipe his sweat.

At this time, the head nurse in the operating room also ran out.

"Dean, Dean, our Zhang hospital sewed up the child's heart gap. It won't take long for the operation to end."

"Okay, okay, okay! Great. "

Ouyang almost patted his thigh and stood up big thumb.

"Treasure, my baby!" Hearing such good news, the child's mother finally burst into tears and knelt at the door of the operation, with the wall on her head. The one who cried was happy and the one who cried was hearty.

The child's father, with a big mouth, was obviously smiling, but the tears on his face kept sliding from his eyes into his smiling mouth.

He finally dared to put his arms around his wife and wipe her tears. Then face the operating room and wait for your baby.

## **Chapter 804**

In the past, we paid attention to the parents' heart of a doctor. At that time, patients really took the doctor's instructions seriously.

There is such a joke in the tea vegetable hospital, or Lao Gao's joke. It is said that when Lao Gao was young, he examined an old lady retired from a song and dance troupe. The old lady's knee joint was a little uncomfortable.

Lao Gao boasted casually: the old man's waist and legs are so soft. As a result, when she turned her head, the old lady put her legs around her neck.

It seems to say: see if I can! You praise me again.

Lao Gao was almost scared to death.

Zhang Fan's generation has no such treatment. There is really a difference between hypocrisy and sincerity.

The little man was dragged back alive by Zhang Fan from the death line.

A group of doctors watched the little man slowly remove the pipe from his body, although the color of his body was a little pale.

However, the child breathes steadily, sleeps peacefully, and has a steady and rhythmic heart.

Not only the surgeon, but also Ren Li in the observation room next door couldn't help shouting.

It took four hours. It was thrilling from beginning to end. The children were up and down on the line of life and death. The doctors were fighting hard.

Lao Li's stiff stiff arms, Zhang Fan's sweat gown, director of Anesthesiology, kept reporting vital signs and foaming on his lips.

Everyone is telling that they won!

Surgery is different from surgery, especially this kind of super level surgery, which some doctors can't touch in a lifetime.

However, as long as there is one case and it can be taken down safely, it is quite obvious for doctors to improve at this stage.

Just as the two veins of Ren and Du were suddenly opened up at this stage, it is absolutely qualitative change.

There are good aspects, but there are also bad aspects. If the doctor can't take it down, the patient will die on the operating table on the spot.

A person with poor psychological quality is estimated to be unable to pass this barrier in his life, not only in mentality, but also in technology.

Therefore, medicine pays special attention to a step-by-step, especially modern medicine. For ordinary

doctors, they don't need you to eat spinach as a superman for three seconds. What they need is your long-term tenacity.

For excellent doctors who surpass their peers, the requirements are high. Not only a liver, but also a super big heart.

Zhang Fan was pleased, really, especially pleased to see the child slowly pushed out of the operating room.

Thinking about the past countless days and nights, he studied hard and exercised hard, isn't it for this moment.

And today, he is a little proud. In the past, when there were no open operations in the system, he could do a lot, but not a lot. If he could do less, he could do less.

But today, Erwai didn't open it. He had to bite his teeth. I don't know whether he was desperate.

The uneasiness before the operation and the accidents during the operation can really make him unforgettable.

Now, Zhang fan can say proudly to himself: live up to his youth and lose time.

People, don't they rely on this little pride and pride to move forward hard after food and clothing are solved!

Looking at Zhang Fan's mouth slightly upturned, the head nurse of the operation turned her eyes and walked up with a smile.

"Oh, Zhang Yuan, this year is definitely a good omen. It is so meaningful to have such a difficult operation on the first day of the new year. The hospital office must report it to the government.

It is estimated that this operation is still the first case in the frontier. I think our hospital can win a scientific and technological progress award this year.

Zhang Yuan, why don't you tell the European Institute that my professional title depends on you! "

Speaking, he not only leaned over, but also took out gauze to Zhang Fan and deliberately wiped his forehead without sweat beads.

Zhang Fan also wanted to be modest, but at the sight of this posture, he quickly avoided a little. Wiping sweat on the operating table is work, and getting off the stage is ambiguous.

And the head nurse is definitely intentional. Zhang Fan knows her very well now.

"Don't be a demon. It's early to retire. Moreover, I think your skills are wasted in the office. Why? "

Zhang Fan whispered. He was happy today, so he gave her some advice.

The head nurse's eyes are pink“ I like the office, Zhang Yuan. I'm your man, let's..... "

Zhang Fan quickly stood up and left the operating room. Young women can't afford it!

After a short rest, Zhang Fan walked to the operating room with Secretary Ren, thoughtful Lao Li and Han Jiangke.

The operation was successful, and it was a successful operation that didn't hold much hope.

A group of doctors, like children, joked happily.

The electric door of the operating room opened, and they couldn't laugh when they were joking.

In the passage of the operating room outside, there were two rows of police in black uniforms and special police with helmets.

When Zhang Fan came out, the leading police leader slapped, stood at attention, and then shouted: all of us, salute to our angels in white!

PA, the neat policemen neatly saluted Zhang Fan and them with a serious and solemn salute.

Ouyang looked at his group of young people with kind eyes. The old lady was also pleased.

This scene made a group of doctors, doctors who were not good at facing this situation, feel panic.

In particular, Ren Li's original white face is red at once. As for Zhang Fan, she can't see the red, the same micro black for thousands of years.

"Hehe, you're welcome. The leader is welcome. What we do is what we should do.

It is you who should be thanked. Without you, we can live and work at ease. "

Looking at a group of his helpless subordinates, Ouyang sighed slightly and had to stand up in person to let others finish.

No wonder these doctors, Ren Li, a doctor dedicated to reading, learning and trying to improve her skills, can't even make sure of her former colleagues. Where can she be comfortable on such an occasion.

Besides, Zhang Fan has only graduated for a few years. In this case, he has become a success in Ouyang education without hiding from others.

"Thank you. It's too dangerous this time. Really, when I heard that my men were injured and my family was in danger, it was dark in front of me.

Thank you, thank you. "

"Oh, we don't have to boast about each other. It's all work, all work."

"Ha ha, yes, the European Academy said well. It's all work."

.....

After seeing off the police, Zhang Fan looked at the director of the medical department and came to Zhang Fan with the bidding contract over the years.

"What?" Zhang Fan asked curiously.

"The European Academy wants you to see if the procurement has changed."

Zhang Fan knew that Ouyang was going to raise his knife.

He thought a little and said, "the bidding part has been in the meeting. Please check it for me. I will personally write a report on the accident to the dean. "

"Well, why don't you let Secretary Ren verify it then?"

"Well, let the high court have a look. It's no small matter."

Zhang Fan nodded. To tell the truth, Zhang Fan is not a cruel person, nor can he climb up on others' heads.

However, this time, after thinking about it later, he was afraid. What if Lao Li couldn't hold on and trembled at that time.

But what if Lao Li breaks the child's ribs in an accident.

There is no trivial matter in the operation, which can kill people. Therefore, Zhang Fan did not condone it and directly let the leaders of the hospital know what the bidding is.

With that, the director of the medical department understood that neither the European hospital nor the Zhang hospital wanted to cover up.

"OK, I'll take out the results before I rush to work. Oh, by the way, Zhang Yuan, I saw Shao Hua when I came to the hospital. I'll bring you the rice. Ha ha, I guess the rice is cold. "

"Oh, thank you. Has she gone yet?"

"No, it's cold. I'll let you go to your office."

"Thank you, thank you, director."

"You're welcome."

The medical director smiled and walked away.

Shao Hua, who brought the meal in the morning, waited. The meal was cold and the soup was cold.

He climbed on Zhang Fan's desk, looked at the books with bookmarks in hand, leaned against the boss's chair with Zhang Fan's breath, and fell asleep slowly in the slightly hot office.

Zhang Fan was absent last night. Shaohua accompanied the old man to play cards and cook. He got up early in the morning and was a little short of sleep.

At this time, on Zhang Fan's spacious boss's chair, he fell asleep so vaguely.

When Zhang Fan hurried to the office, he saw Shaohua huddled in his chair like a kitten and fell asleep.

He crept over. Before she got there, Shaohua's eyelashes moved slightly, and her eyes opened half asleep and half awake.

"Did you have an operation?"

"Hehe, just got off." Zhang Fan goes to Shaohua, squats down and grabs Shaohua's face.

"I hate it. You smell like disinfectant. Look at your face. It's making a mark on your mask.

Oh, rice! "

Then Shaohua patted off Zhang Fan's big hand. As a result, the rice on the table had already become a pimple.

"Go, go home, go home for the new year."

Zhang Fan takes Shaohua home.

"Why are you so happy today?"

Shao Hua saw at a glance that Zhang Fan was different from usual today.

"Your husband is a genius!"

"Hey, hey, how can you boast yourself? However, I think you're right. Shame!"

"Ha ha." Zhang Fan's heart is as sweet as honey.

In fact, men are like this. They have some small achievements. They absolutely want to be recognized by the people they care about at the first time.

Always be a little child.

"Oh, I took my little daughter-in-law home."

At the gate of the hospital, Li Hui, who had just left work, teased Zhang Fan and Shao Hua from a distance.

"Hehe, are you off duty?"

"Well, go home for the new year. Do you have time tomorrow. Have dinner together. "

"No, take your wife back to your mother's house tomorrow."

Zhang fantou said without looking back.

At home, as soon as Zhang Fan and Shaohua entered the door, Zhang Fan's parents quickly began to get busy.

"What kind of hospital are you? You have to work overtime for the New Year! Early in the morning, Shao Hua sent you a meal without eating.

You don't call whether you come or not. It's so cold. " Although the old man helped cook, he scolded Zhang Fan.

"Yes, Hua, come on, mom has warmed up some hot mash for you. Come and have a drink to warm up your body. It's native egg. Have a taste. Does it smell good?" Zhang Fan's mother quickly interrupted the old man.

She understood what the old man meant. It was like this at home. After all, Shaohua had just married.

But I don't want the old man to scold his eldest son too much. He told Shaohua to taste it, but he carried two bowls of mash in his hand.

"Thank you, mom. Hee hee! " Shaohua happily took the bowl, tasted it and said, "it's made by my father. I know it as soon as I taste it. It's definitely not sold outside."

A bowl of rotten mash made Shao Hua boast like a man Han banquet.

"Shao Hua is knowledgeable and can understand the taste. This mash is used by your mother and me..."

The old man began to show off proudly.

Zhang Fan tilted his head and squeezed Shaohua's eyes, which means: just you thief! You can talk.

To tell the truth, Zhang Fan's father's mash is not very good. Really, there are many songs. It's too fermented. It's like hot sweet wine in his mouth. Anyway, Zhang Fan doesn't like it.

Zhang Fan didn't explain more about his work to his father, nor did he answer back. The old man didn't understand.

"You eat quickly. It's noon. Today you and Hua go to their in laws to pay New Year's greetings.

Stay a few more days. You are usually busy. HuaQuan is with us. " Zhang Fan's mother looked at Zhang Fan. They didn't know whether to count breakfast or lunch. While talking, they began to pack up the gifts to their in laws.

"Mom, there's everything over there. Don't take it."

Shaohua watched his mother-in-law pack a lot of bags and quickly stopped him.

"Silly boy, this is etiquette. You can stay there for a few more days and spend more time with your parents. "

Home and talent are new.

Although the parents on both sides have not gone to school, they are very close to each other.

Zhang Fan drove kuluze to his mother-in-law with Shaohua's bags.

As soon as the car was parked, the old man and woman walking in the community greeted Zhang Fan.

Zhang Fan has lived in this community for a long time, and with the growing popularity in the hospital, there are a lot of people willing to greet Zhang Fan. Almost all the old men and women who don't know are greeting Zhang Fan.

"Oh, my uncle is here."

"Uncle and aunt, happy new year. I wish you a happy new year."

"Ha ha, thank you."

A group of old people watched Zhang Fan and Shao Hua enter the unit door. The old man who often played chess with Shaohua's father said with emotion: "old Shao, which stubborn old man has a good life! See, this son-in-law of others is my uncle! "

As soon as Zhang Fan entered the door, he saw that the old man was busy cooking fish and his mother-in-law was cutting vegetables.

"Mom and Dad, I wish you a happy new year."

"Ha ha, good, good, how can I take so many things. Oh, how much trouble your mother-in-law is. You're not sensible. "

Shaohua's mother said angrily.

"Mom, nothing." Zhang Fan said with a smile.

After the old man put the fish on the pot, he quickly wiped his hands, "I'll talk with Zhang Fan." Then he ran out of the kitchen.

"This dead old man." Shaohua's mother shook her head helplessly.

Looking at Shaohua changing clothes and his mother-in-law in the kitchen, Zhang Fan secretly took out an envelope.

"Dad, take it quickly. Usually smoke a cigarette, entertain your friends and have a drink. Don't let my mother see it, or you'll say me again."

Zhang Fan gave the envelope to his father-in-law like a thief.

"I have money, I have money, look at you, you child." The old man refused and looked at the kitchen.

I don't know when my mother-in-law began to strictly control my father-in-law's economy.

Zhang Fan didn't think it was necessary, but he didn't object. Instead, he stole some money from the old man.

While the old man was hiding money, Zhang Fan went into the kitchen. "Mom, let me help you. You can assign me some work."

"Ha ha, look at you. Go and have a rest. You're tired from surgery all day. The meal will be ready soon. Be hungry. "

"I'm not hungry. I just come to talk to you. I can't care about it at ordinary times."

As he spoke, Zhang Fan sat on a small bench with scallions and peeled them.

"Mom, after fifteen, you and dad will have a physical examination. I have also implemented the school for my cousin's children. Give me a call then. "

While chatting with the old lady about trivial things, Zhang Fan peeled scallions for a while.

"Hey, good!" The old lady secretly wiped her eyes when Zhang Fan didn't pay attention.

My heart is warm. With the promotion of Zhang Fan's fame and status, the old lady sometimes listens to the praise of the hospital family members in the yard and lies in bed at night. She is also sad.

I was deeply afraid that Zhang Fan became a black face Chen Shimei. As a result, the formula did not change. His face was still so black, but his heart was still so sincere.

"You've stripped all the onions." Shao Hua changed his clothes and came out. He almost didn't laugh.

Zhang Fan didn't peel much green onions.

Zhang Fan's heart was not on the onion. After listening to Shaohua, he looked down and couldn't help laughing.

The family laughed and the delicious food was on the table.

Zhang Fan likes fish. The old man specially bought several kinds, including sea fish, freshwater fish and light fish.

And the old man is also a southerner. He is really good at making fish.

Zhang Fan is also welcome. There are few plates of fish left. Make mother-in-law and father-in-law happy.

The father-in-law was drinking a little wine while looking at his wife proudly. That means: "see, old woman, my uncle loves my fish."

In the evening, Shaohua and Jia SuYue had a classmate meeting and offered to go to dinner. Their mother-in-law asked Zhang Fan to go too. Zhang Fan didn't move and shook his head and refused.

It's so comfortable to lie on the sofa and gossip with your father-in-law. Why go to see Jia SuYue and

them.

Zhang Fan was at home chatting with the old man and wife. Shaohua went to a party with Jia SuYue and their classmates.

Three years after graduation, the students have slowly begun to divide into three, six, nine and so on.

## **Chapter 805**

Between cities, between big cities and small cities, how to say, just like Lao Qian's words, those inside want to come out and those outside want to go in.

Each has its own freedom and its own disappointments.

However, this does not hinder some ideas that want others to know that they are doing well and mixing well.

Especially in their early twenties, most of them show off and want others to know that they are already in Hexi.

This kind of showing off is actually very simple, and the idea is also simple. In a few more years, the society will be mixed for a long time.

There are many purposes. Sometimes, this thing seems to be a joke. In fact, there are a lot of people. What fools drink and sing, and what smart people have done to other people's wives.

There are no waves without wind.

At their age, Shao Hua and Jia SuYue happened to be a time when they didn't want to be looked down upon by others soon after they entered the society.

Students who stay in tea vegetable, especially those who have entered the system, if they have some small achievements, they will definitely look like a local snake. If they have face, they will find a place, and the boss will come out to toast.

If students who go out, especially those who are wandering in the capital, magic capital or abroad, jump a little more, they will rush to pay. After that, they will ask everyone to sing, a pair of Childe Wang's cards.

This is a boy, but a girl, nothing more than a traceless show off, show off her work, show off her boyfriend.

Shao Hua, Jia SuYue and Wang Yanan are special cases.

When he went to school, Shaohua was Xueba. Although the conditions at home were general, he was born beautiful, outstanding in learning and tough, which also left an inexplicable feeling for many people.

Jia SuYue, no matter before or now, is a proud princess. With the increase of working years, now packing up makes male and female students can't help but have a comparative mentality.

Wang Yanan is also surrounded. A boy's dress, and now he has become an orthopedic doctor, which has a different flavor.

To tell you the truth, beautiful women come from the frontier. Because there are people all over the country, so all the year round, the beauties here really absorb the advantages of northern beauties and southern beauties.

In the box of the largest hotel in the frontier, Shaohua, Jia SuYue and Wang Yanan sit together.

Of course, it's not the main table. The male classmate who was looking for this place wanted Shaohua to pass, but Shaohua refused with a smile.

On the main table are the head teacher and some teachers of that year, as well as the students who consciously mix well.

"Chen runny nose is so bad now that the boss can reserve a box for him." Jia SuYue whispered to Wang Yanan and Shaohua.

"Don't let your nose run. I'm so sorry if people hear it." Shaohua smiled and patted Jia SuYue.

"What do you hear. Isn't it his nickname! Isn't there a good father-in-law? Who doesn't know! " However, Jia SuYue still listened to Shaohua.

"He is now the head of Huapeng township. He's doing well." Wang Yanan explained to his two girlfriends

while pouring drinks for himself.

"I was a clerk last year, but now I'm the head of the village. Yes, how old is it? How do you know, hehe, isn't it?" Jia SuYue teased with a knowing look.

"Go, there is a coal mine in his township. Didn't it collapse last time? Many injured workers were sent to our section. He comforted us several times."

Wang Yanan explained while drinking orange juice.

"Yes, it's still a big economic town!" Jia SuYue's family are all within the system, so they have a deeper understanding.

Over time, the hall was filled with students of that year. To tell the truth, there were 60 people in a class, but now there are only 20 people and less than 30 people.

Shao Hua, there are more girls sitting on the table, and there are also several boys.

"Jia SuYue, why didn't you go to the main table!" A female classmate, who was also a goblin, sat opposite Shaohua and said to Jia SuYue with red lips.

There is a good relationship between students, and there must be a bad relationship. And this one, how to say, was a school flower in those years.

However, even if you don't deal with Jia SuYue, anyway, you wear a dress today, and I must have a beautiful pleated skirt tomorrow.

In the past, the relationship was not good, but now there are few.

Before Jia SuYue spoke, she began to say: "my nose has to pull me over. I don't think it's smoky there. I can't stand the smell. My boyfriend never smokes in front of me."

Then talk to the people around you.

Jia SuYue's teeth were broken. As a result, Shaohua gently held Jia SuYue's hand and slowly shook his head.

The meaning is obvious: there is no need to be angry with her.

The township head students were exquisite in all aspects during the banquet, and some students outside also wanted to show off.

Therefore, the quality of the banquet is really not low. One bird's nest alone, or Thai, and sea cucumber, one sea cucumber per person.

Wang Yanan is very happy to eat. To tell the truth, the girl has entered the medical profession, especially orthopedics. She can eat more and more, and she doesn't grow meat. It consumes too much.

While eating, Shaohua said to Jia SuYue and Wang Yanan, "unfortunately, Zhang Fan should be brought today. He likes seafood very much."

"All right, classmate party, don't think about your family, it's dark!"

Jia SuYue suddenly thought of the native man who was painful to eat steak.

"Hehe! I like it." Shao Hua said with a smile.

"I heard Shaohua got married, didn't he? Look at you. You didn't say hello to me.

Unexpectedly, among our classmates, you got married early. What does your husband do? "

The goblin female students who did not deal with Jia SuYue were happy to see them talking and laughing. Although they were not despised, their tone seemed to be superior.

Jia SuYue couldn't do it. He opened his mouth and said, "Hey, most people didn't notice Shaohua on his wedding day, but..."

Before he finished, Shaohua quickly interrupted, "hehe, don't listen to the more and more. You are all busy. My family doesn't want to trouble you, so they didn't inform the students. I'm sorry. "

Shao Hua said calmly with a smile.

To tell the truth, Wang Yanan didn't like such trivial intrigues between girls since she was a child, so she seemed not to hear it. She focused on dealing with the food in front of her. It's true. She's like Zhang Fan now.

"Oh, no trouble. What does your family do? "

"Just an ordinary doctor." Shao Hua said, and hurriedly took a chopstick dish to Jia SuYue. "The more you eat, the more you eat, the better you look!"

Jia SuYue's chest fluctuated. "Why don't you tell her? Look at her strength, I'm so angry!"

"You know how you're doing. Why don't you tell others.

OK, eat quickly. Let's go for a walk after eating. I have to go home early. Today, Zhang Fan is at my house with my parents. "

"Didn't you go back to your mother's house on the second day of junior high school?" Jia SuYue asked in surprise.

"My father-in-law was considerate of me and asked me to go back to my mother's house early and stay a few more days!"

"Well! Just know whether you're doing well. Why do you have to say it! "

Jia SuYue is so angry!

"Hey, hey, because you're not someone else. You're mine. "

Jia SuYue was out of breath. One thing fell to another. Really, he didn't run away.

"Hey, it's really hard to earn money now. My fiance's family didn't earn much last year, but I have to buy me a house with more than 5 million yuan. I'm too expensive.

But my parents have to buy it. Now I'm worried about how to decorate the house on the third ring road.  
"

The goblin woman saw Shao Hua's character like water. She didn't know why. She didn't want to show off. She didn't know how to say what she didn't want to say. She just wanted to say it in her heart.

"Yes! It's awesome. When it's developed in the future, you must not forget your old classmates! "

"When they develop, they will develop now. Come on, let's have a drink with our classmates. "

There were also cheers. Jia SuYue listened and was particularly uncomfortable, "what's great, isn't it a big house!"

"It's not big. The Third Ring Road, the capital, is five million. It's estimated to be dozens of Ping. But the location is good. " Wang Yanan looks like a science woman.

"Ha ha, Asian man has a black belly."

Some good students stood up and began to toast " It's getting more and more beautiful. I've opened a company again. Why don't you come and help me! "

"Hua Zi, your temperament is getting better and better. Hearing the news of your marriage, I feel like a thunderclap. I must have a drink today."

"Asian male, our surgical female elite, I admire it. You are my goddess! "

This is a good male classmate who hangs out. Anyway, the truth and falsehood have a feeling of smoke

and cloud in those years.

"Hua Zi, I'm angry. You didn't inform me when you got married. You shouldn't inform them.

But we have a good relationship. I am also familiar with your husband. I must say hello to your husband next time I meet, ha ha! "

This is the biggest snob student in the official position at present.

Others don't know, but he knows Zhang Fan's fame too well. He says he is familiar. In fact, he knows Zhang Fan, but Zhang Fan doesn't know him.

Overall, the atmosphere is good.

Although the goblin girl doesn't like Jia SuYue and always fights with each other, she still has a slight inferiority complex in front of Shaohua in the past, because others study well.

But now, look at her. She can learn how to get married early instead of staying in a small place.

So listening to the compliments from a group of male students, she was not happy. "Yes, your Xueba is married now.

It's a pity, Shao Hua, why didn't you go to the capital city to develop? It's a pity that you studied so well at the beginning! "

"Hehe, big cities have the prosperity of big cities, and small cities have the complacency of small cities. I like tea vegetarians very much. After all, I grew up here."

Shao Hua still smiled so gently.

Looking at the plain face facing the sky, there was no big diamond ring in his hand and no necklace around his neck. The goblin classmate already felt, "the man Shaohua married has no ability."

In fact, Zhang Fan is to blame. When Zhang Fan was a surgeon, he never wore a watch. All the watches bought by Shaohua were put in the drawer by Zhang Fan and dust fell.

Don't wear watches, let alone necklaces and rings. Zhang Fan affects Shaohua and doesn't take these decorations much.

This gives others an idea that life may be unhappy. Really, some people are like this. Like spies, they always want to explore other people's lives.

"When you have time, pull it out and let us meet your family. Don't hide. ha-ha! It's not shameful. "

The goblin classmate drank some wine,; A little bit above, and then look at a group of boys around them. Although I don't like these boys in my heart, I just can't surround others.

"Ha ha!" Shao Hua didn't care much about each other. She said she could. She laughed off in the face of her old classmates.

However, we can't say Zhang Fan.

Although his man is not so romantic and can't coax women to be happy, he is an indomitable man.

"There's nothing you can't see. You drink too much. Don't lose face in front of your old classmates."

Shao Hua's face was frosty.

"Well! You... "The goblin girl was about to speak.

The student nicknamed runny nose hurried out and said, "ha ha, ha ha, it's not that we huazi don't want to, you probably don't know.

Huazi's husband is a leader at the level of president and deputy director of the municipal hospital. It's nothing. He's still a tea vegetable knife.

In the tea is quite famous!

As we all know, being a doctor is very busy, especially an excellent doctor.

Our Asian men were invited by me after three or four visits. Our Asian men are also very famous in the municipal hospital. "

Runny nose students hurried out to ease the atmosphere. In fact, if it was someone else, he didn't have that heart, but Shaohua and Zhang Fan behind Shaohua had to come out to help.

A meal was tasteless. After the party, the three refused the invitation to sing and left in advance.

"Hua Zi, you have a good temper. If I were you, I would never stop."

On the way to dinner, the three men walked hand in hand on the Riverside Avenue of tea vegetable.

"Hehe, why don't I stop?"

"You should slap your big pickup truck in front of her." Jia SuYue separated his hands and taught Shaohua.

"Look, my mother's car is similar to your house.

This is not enough. Shoot your Zhang Fan's cool Luze key in front of her.

Look, two cars. Do you have them? Do you have them? What's the show of a broken house? "

Jia SuYue stood in front of them as if she were the party.

"Ha ha!" The other two people laughed.

"What are you laughing at, Ya Nan? You're talking less and less now. What's up? Miss spring? "

"Go!" Wang Yanan told Bai Jia SuYue, "I'm upset. My family seems to be afraid that I can't get married. I'm running away these days. Seven aunts and eight aunts take turns."

As soon as he said this, Jia SuYue lost his voice, and the girl who taught Shaohua to dress up and force him to punch her face suddenly lost her arrogance.

"What's the matter. "More and more?" Shaohua asked curiously.

"Hey, I went on a blind date years ago."

"How, how?" The other two immediately began gossip.

"The other party looks like five or six, but, but..."

"What's the matter?"

"Hey, I said it directly. The other party has good conditions at home and handsome people. I'm almost moved.

But, who knows, he is not a fun idea. He wants to take me to open a room. "

"Ah!"

"Ha!"

"Laugh, Ya Nan, I won't say it!"

"Well, well, I won't laugh, I won't laugh." Wang Yanan quickly covered his mouth. Although he didn't laugh, the expression on his face

"Forget it. It's not that my aunt can't get married. I splashed water on his face. As a result, this guy ruined my reputation.

Tell the introducer that I have no tutor, and that I follow my father.

Anyway, I don't care about people I'll never see in my life, but I wonder. He said I follow my father.

What does he mean? "

"Whatever your father?" Shaohua also wondered.

"Hey, I don't know. People say you're young!" Wang Yanan said coldly, and then stared at Jia SuYue's

"Ah, what, I'm young." Jia SuYue couldn't help looking at his.

"Ah, I'm going to kill him. Where am I, where am I. Am I young? "

"Ha ha!"

"Ha ha!"

The silver bell like voice sounded by the tea vegetable River, and the three girlfriends were so happy.

After eating and sleeping at Shaohua's house, Zhang Fan felt fat.

On the fifth day of junior high school, Zhang Fan drove Shaohua home.

"Did you give money to my father?"

"Why, did dad tell you?" Zhang Fan asked in surprise "The old man's will is too weak! "

"Cut, it's enough to say, look at my father these days, I don't have to guess. What little action can you escape my eyes? "

Shaohua said proudly.

"Hehe, how powerful you are."

On the fifth day of junior high school, hospital leaders held a hospital affairs meeting.

Before the meeting, Ouyang, Ren Li and Zhang Fan held a small meeting in advance.

The spirit of the meeting means sublimation!

"You see, the bidding documents have been submitted to the meeting, and he dares to start. How dare he.

Also, look at the pharmacy. The use of drugs in it is shocking.

We can't ignore it. It's harmful. I want to give doctors and nurses a mental sublimation. "

Ouyang said to Zhang Fan and Shaohua.

Hospital, to tell the truth, many people are complaining that seeing a doctor is expensive and despised.

In fact, if we simply talk about medical expenses, not about drug expenses, in fact, medical expenses in China are cheap, really.

For example, the removal of a chest filler, the cost of surgery, anesthesia and nursing, all come down, but more than 3000.

But you can try one. The cheapest one in the beauty salon is tens of thousands.

In this, really, I can't say.

"Yes, some money can't be earned." Ren Li also nodded.

Then they both looked at Zhang Fan.

Surgery, a large number of hospital instruments.

"I agree!"

Zhang Fan nodded and then continued, "we need to find a way. Now there are signs. Those who should use small consumables don't have to. They all want to use non-medical insurance materials to get a commission. "

The three meet, agree, and then go to the meeting.

Lao Gao nodded in his heart.

"The white coat can't be tarnished by money. I agree with President Ouyang's proposal."

On the seventh day of junior high school, a police car entered the hospital and took away the director of the equipment department and the chief of the pharmacy department.

Just when the hospital was talking up and down, the sublimation activity of tea element hospital began.

The first batch, led by Zhang Fan. They are all the elites of the hospital. Really, they are the top of the hospital.

**Chapter 806**

The attitude of Chinese towards the Spring Festival is very unusual. For example, the new year begins on January 1 every year, but everyone thinks this doesn't count.

Not only ordinary people don't realize that it's not the beginning of the new year, but also in the unit. Looking at the summary of one year's work and the work plan for the next year, everyone doesn't take it seriously and is wondering how to celebrate the new year.

Only after the Spring Festival did everyone feel satisfied: Well, finally the new year is coming.

In previous years, when we officially entered the work rhythm after the Spring Festival, we usually had a private dinner with better relations in the hospital, and then the more generous department director would also call everyone to have a start-up banquet.

But this year is different. Everyone is too eager to go. Looking at the holiday hospital, the two middle-level managers were taken away by iron handcuffs in the hospital. Who is not afraid!

Then, Ouyang presided over the meeting of the whole hospital and warned everyone not to stretch out your hand and grasp it.

In fact, ordinary doctors don't worry. They don't have a chance to reach out.

However, in terms of mentality and work attitude, Ouyang wants to give everyone a sublimation.

Ouyang held a general meeting and Zhang Fan held a small meeting.

Xu Xian, Wang Yanan and Zhou Chengfu from orthopedics department were called into the office one by one.

"I heard that you have a good relationship with the equipment manufacturer. At 2 a.m. in the evening, you asked others to buy you toothpaste?"

Zhang Fan was expressionless. They gave everyone who came in such a beginning.

Because he heard that orthopedic doctors had a particularly good relationship with device manufacturers, he didn't want these doctors he valued to have this situation, but he didn't know who it was.

So, try one by one, "wronged, Zhang Yuan, I haven't done this before. You have to find out." Xu Xian was in a hurry.

Zhang Fan was relieved when he saw it. The young man's worried face choked red.

"All right, I see. How's the relationship with that flower going? "

"Well!" Xu Xian couldn't react. "That's it."

"Come on, pack up recently. We're going out. "

"Where are you going? Zhang Yuan, going abroad? To stan? "

Zhang Fan took several doctors and nurses back home from the real gold and silver of stanguo, which made everyone in the tea vegetable hospital drool with envy.

A gentleman loves money in a right way. Zhang Fan has no aversion to Xu Xian. As long as you don't sneak around and rely on technology, Zhang Fan gives full support.

However, it is estimated that Xu Xian and them will be disappointed this time.

"Almost. Go and pack up first." Zhang Fan deliberately didn't make it clear, and Xu Xian also ignored it. The young man estimated that he had begun to dream: when he has money, should he decorate the house first or buy a car first?

"Don't slander me!" As soon as Wang Yanan turned his eyes, Zhang Fan knew that it was not this one.

"OK, I see. Go, pack up and tell your mother we're going out."

"Throwing knife?"

"Well, it's also a throwing knife." Zhang Fan sat in the boss's chair and nodded.

"Can you not go? You promised me to study! The year is over! " Wang Yanan reluctantly took the pen holder on Zhang Fan's desk as a toy and turned it upside down.

This is the difference between having money and not having money. Others are waiting for Zhang Fan to take out some money, but Wang Yanan wants to study.

"OK, hurry to work and arrange for you to study when you come back this time."

"Really?"

"Go or not?"

"Good, good, good, Zhang Yuan, you are the most handsome. Really, it's all the truth! Mancha Su is no more handsome than you! Hee hee. "

Wang Yanan happily shook the boy and left.

"Zhang Yuan, it's not me, it's..." after Zhou Chengfu came in, he heard it and his head fell down.

"What?" Zhang Fan was on fire when he saw it. He thought it was Zhou Chengfu.

"I, I, I..."

"Come on, don't say it here. It's time to change places when you go out." Zhang Fan pressed his irritability.

"It's not me, it's the deputy director of the third Department of orthopedics! This has spread in the three branches of orthopedics. "

"Really?"

"Really! Zhang Yuan, I've suffered a loss and can't manage others, but I manage myself. I'd rather take it straight than beg me in song. " Zhou Chengfu looked at Zhang Fan, but his face was calm at this time.

"Well, I'm relieved to have you. OK, go back to work and pack up. We're going out for a few days. "

"OK, Zhang Yuan, where did I go to work?"

Orthopedics is not only a major department of consumables, but also a key department with excessive medical insurance. Of course, it is also the Department with the most problems.

These doctors who value themselves have no problem. Zhang Fan is still happy. The next step is education.

To tell the truth, the integrity education of the medical system is missing, especially with the development of medical treatment, a large number of people focus on money.

There is no way. The people on the podium shout to be clean, but they wear Rolex on Monday and jiangshidanton on Tuesday. What do you want the people below to think.

However, in the tea vegetable hospital, although the atmosphere has obviously changed since Ouyang became the master, it is not enough.

After contacting the government, the government personally arranged a kostra and set off with these doctors who were ready to make a fortune.

"Darling, the grade is not low. It used to be all buses. This time, look, Koster, the treatment is not low. There is still a face in Zhang Yuan! "

In the car, Xue Fei shouted excitedly to the people around him.

From the beginning to the departure, Ouyang and Zhang Fan did not disclose their itinerary.

Listening to the excited discussion, Zhang Fan and Ren Li in the front row looked at each other and smiled.

It seems to be saying, "be happy first. There will be a time to make them cry."

When the car went west, it looked like it was going towards the border line, and the people couldn't stand it.

Tea has such a county, which is known as a poor county all the year round. It is estimated that this big hat can't be taken off every year since there is a saying.

The superior tried to take off his hat, but he couldn't take it off.

Look at the geographical location of this place, it has frightened ordinary people.

Surrounded by several peaks of Tianshan Mountain, a depression is formed in their hinterland, which is no more than ten kilometers long and wide. It is a basin, not much bigger than a bathtub.

It can be said that it is not a basin, but the climate here is different from that of tea element area.

On the one hand, it blocks the warm and humid air flow of the Indian Ocean and the cold current from the North outside the door. Therefore, when people are still wearing down jackets just after the Spring Festival, it is full of peach blossoms.

When the car went up and down around Tianshan Mountain, Xue Fei and them understood that this was not the car for Stan!

"Hehe, Zhang Yuan, where are you going? Let me tell you something now." Xue Fei asked, leaning against Zhang Fan.

"Don't you know when you arrive? What's the hurry?" Zhang Fan closed his eyes and pretended to sleep, ignoring this guy.

Xue Fei looked at Zhang Fan and said nothing. He turned his mouth and returned to his seat.

"Did the boss say where he went?" Not only Xu Xian but also Ma Yichen and Xue Xiaoqiao came around.

"Hey, it's estimated that it's going to the mountains and the countryside to reform through labor. Don't do it in your dream of making a fortune. It's estimated that you're going to free clinic again." Xue Fei said uninteresting.

During the discussion, Wang Yanan shouted, "God, it's so beautiful. Look at it."

Then they looked out of the window. The car climbed the slope first. The road here is a mountain on one side and a cliff on the other. Moreover, the road is still very narrow. The bus can't pass at all, so Ouyang went to the government to borrow Koster.

When climbing the slope, at a glance, it is full of snow. There are thick snow mountains, and there are no other colors. The sun shines on the snow mountains and sends out a dazzling halo.

After climbing around the mountain for a few hours, I reached the middle of the mountain, and then began to run below.

Snow, ice on the road, the driver is absorbed.

When running around the mountain to the bottom of the valley, people's eyes suddenly lit up.

In the distance, there was a lush bamboo forest. The slightly green bamboo made people feel spring in their hearts after watching the snow for many hours.

Looking further away, I can see that on the sunny hillside, Manshan is in pink peach blossoms. Looking from a distance, it is like a pink flame dancing with the wind on the hillside of Manshan.

It suddenly brightened the hearts of those who had been wandering in the mountains for a long time.

"On the other side of the mountain, there are all wild peach trees. This place is difficult to walk. Otherwise, it is estimated that people in the frontier can come to this place to see peach blossoms."

The downhill driver dared to speak. He politely explained to Zhang fan that although Zhang Fan was not the leader of the car class, the people who could borrow such a car from the government were also very energetic.

"Oh!" Zhang Fan looked at the scenery in front of him and nodded his head gently " Master, how far is it?  
" Zhang Fan asked politely.

"Soon, it's estimated that we can get to the county in more than four hours."

"Oh!"

The road down the mountain is not very flat, because it is the hinterland of Tianshan Mountain. There are many rivers. From time to time, a river that says it is a stream, but it is not small.

It's really climbing mountains and rivers.

Before long, it was a large cave like tentacles extending from a big mountain.

Through the cave, Wang Yanan just screamed. This time, it's other people's turn to scream.

Even Zhang Fan was shocked by the scenery in front of him. As soon as the car came out of the cave, darling, I saw a huge waterfall hanging in front of them.

Falling and jumping water droplets, like scattered pearls, beat happily.

The car passed under the waterfall. It was really like sitting in the water on a submarine. It was surrounded by water and crackled on the window. It was shocking and hung the heart of the family at the same time.

"Won't you overturn the car!"

Everyone grabbed the handrail around them.

"This waterfall is seasonal. If you came earlier, you wouldn't see it. But if we come later, we'll have to see the weather before we can leave. In case of heavy rain, you have to eat and drink in the car for several days." The driver explained.

"Is there no other way?" Zhang Fan asked in wonder.

"Alas, many people died when the road was built.

Moreover, there is a lot of rainfall here in summer, and debris flows are common.

The road here is broken from time to time in summer and can't move forward. "

The driver explained to Zhang Fan.

Zhang Fan looked at the road in front of him. To tell the truth, his heart was also quite shocked.

At the beginning, Ouyang said to find a poorer county. Zhang Fan didn't take it to heart. At that time, he

was still proud and charming: "around tea vegetables, are there any counties I haven't been to?"

This time, he really can't say that again. He really hasn't been to this county.

"Why didn't the government think about moving immigrants."

"It's hard for us to come here, but it's easy for stan to come here. This is a pass.

In the past, when the relationship was bad, the importance of this side showed up. As long as the other side was wrong, we can fight directly from this side.

Although the relationship is good now, it is not always guarded. Otherwise, over time, their herdsmen will come quietly. "

Talking room.

Almost all the roads pass through the mountains, winding. The small stone mountain extending from the foot of the mountain peak looks less majestic than Tianshan, but it is still majestic in front of mankind.

The rickety car finally reached the county. It's a county, really, not as big as the towns around tea.

There are few people on the street, even the traffic lights are saved. The few buildings in the county are government buildings, schools, a hotel, and the rest are small and dilapidated houses.

There were almost no pedestrians in the street, only three or four yellow dogs with their stomachs on and their x heads exposed to the sun, and several roosters with a group of hens were digging on the roadside.

The car didn't stop in the county. It can also be said to cross the street directly through the city.

Although it is a county seat, it is actually built on the hillside. The five storey government is estimated to have seven or eight floors in the height of tea, like the dead Potala Palace.

As the car went out of the county, it didn't take long to reach a village. The scene in front of me was like a time travel back to decades ago.

There are still some people on both sides of the road, and the wall is painted with white paint.

"Don't drink cold water, don't play with dogs." XX county Party Committee Propaganda Department!

"Setting fire on the mountain is a crime."

"Fewer children, more trees."

The car entered the village. Darling, in the originally uninhabited village, suddenly, like the kindergarten after school, Hula ran out of a group of children.

The big one pulled the small one, and the small one cried and chased the big child chasing the car in front.

While running, he squeaked and shouted, and a distressing smile hung on his excited face.

The car pulled over and the doctors got off. The children who had been chasing the car stopped and looked at it from a distance. Shyness and timidity were mixed with curiosity.

Some children in open crotch pants, with fingers in their mouths, looked at these strangers curiously.

People from the county government came to the village early.

"Welcome, welcome, welcome the leaders of the city. All the people in Aoshan town are looking forward to it. "

A man who looked like a leader in a jacket, spoke non-standard Mandarin and rushed up with a group of cadres.

"We are not leaders, we are doctors, doctors in the municipal hospital." Zhang Fan held each other's hand and politely explained.

"Why not leaders? All the people from the city are leaders. It's hard, hard. Let's go to the town government first. Please, please, everyone. "

The polite and enthusiastic party invited Zhang Fan and them into the government compound.

Really, it's better than a temple without fireworks. You can still see the breath of that year on the dilapidated buildings.

A faded five pointed star hung on the door of the courtyard. One side of the rusty iron door had no support, and it was askew as if it was going to fall down.

A man at the door looked like a doorman, smiling and grasping the big black dog under him.

"God, where is this? The government still uses big dogs to watch the door?"

Although Xue Fei was also born in the countryside, he has never seen such a scene.

"Hehe, it's not about people. The big dog is trying to prevent the wild things on the mountain from hurting people!"

Uncle's gaping teeth cracked and explained with a smile.

When we arrived at the meeting room, we still had the wooden bench before. There was a newly lit stove in the corner of the meeting room, and the smell of fireworks in a house.

On the table lay a dark green military blanket whose hair was almost ground clean.

"Everyone drink some water. Other things here are not good, but this water is really much better than the mineral water in the city. You don't need to put sugar in it. It's sweet in your mouth."

As he spoke, rows of enamel cups were brought up. The Town Officer smiled and poured tea for everyone.

"I'm the intestines and stomach of the county. This time, I received a document from my superiors saying that the doctors in the city are going to come to the free clinic. Really, we are looking forward to the stars and the moon. We finally look forward to you."

"Hehe, we should come earlier." Zhang Fan said awkwardly.

"It's not too late. The meat on the stove is not cooked yet. Ha ha, let's take advantage of this time to introduce Dr. Li here. "

With that, the county leader pulled out a man who didn't look like a doctor at all.

How to say, the doctor should at least dress neatly and cleanly.

But the doctor has greasy hair and obvious plateau red on his face, which is as bright as touching a layer of butter.

Moreover, he was wearing a leather coat and wearing hand-made over knee boots with turned hair at his feet. It was better to say that he was a doctor than a cowboy.

"Head nurse, can his sterility pass?" Wang Yanan whispered to the head nurse in the operating room.

Zhang Fan turned his head and took a look. The head nurse didn't dare to speak.

"Hehe, I'm glad that the teachers from the superior hospital have come. I'll tell you about our situation."

Dr. Li looked at the legendary doctors in front of him with an excited face. His excited hands trembled and took out his notebook.

## **Chapter 807**

"Dr. Li seems to have studied in pediatrics in our hospital!" Xue Fei smiled and talked to the cowboy doctor in front of him. In fact, the corner of his eye still looked at Zhang Fan.

"Yes, yes, several years ago, the city organized rural doctors to study. I was lucky to go to the city hospital. The teachers' level is really high."

Looking at Lao Lige's polite language, many young doctors don't feel proud.

However, Zhang Fan seems to hear a kind of sadness from his tone.

"Dr. Li, I studied in that department." Zhang Fan asked softly.

"Oh, this teacher, there were too many premature deaths of children here. I was studying pediatrics. The time was too short. I didn't learn a lot of things."

Look, everyone has to gossip, and it's getting late. Zhang Fan quickly interrupts other chatters and asks Dr. Li to continue his introduction.

"I am a village doctor in XX County, responsible for 33 administrative villages and five natural pastures!"

The first sentence raised his head and surprised the doctors below. His tongue fell out.

"33 administrative villages and 5 natural pastures. God, you're alone? "

Xue Fei, especially from Sanchuan, knows this very well.

The frontier is big and how big it is. If you give a specific number, we probably can't understand it.

For example, Xue Fei, who just came to tea, couldn't find a place on the street, so he asked the local uncle. The old man half narrowed his eyes and gently raised his hand. It's not far. Go ahead, where is it!

Then Xue Fei walked for 2 hours!

The distance between villages in the frontier and between counties is too large, especially for counties on the border. The distance between a county and another county is hundreds of kilometers less and

thousands of kilometers more, which is still the territory of a city.

So the frontier is too big. In the past, there was a joke in the frontier, asking for directions to listen to the voice of others. For example, it's not far away. It's short in tone. It's estimated that it's not far away.

If it's not far, it's where... Dragging the back sound, it's estimated to turn over three or four mountains.

Dr. Li, dressed as a cowboy, smiled shyly, "it's just that the place is a little bigger. In fact, there are not many people, just thousands of people.

Moreover, my level is limited. I can only give people at all points some medicine and injections. "

The simple and honest man looked simple, "how do you usually go. How far are the two farthest villages? "

Zhang Fan asked softly.

"Hehe, just riding a horse and carrying the emergency box, one village a day. If the two farthest villages take the main road, it is estimated that they will have to go around hundreds of kilometers. If they climb the mountain, they will be closer. I don't know how far it is."

"What diseases do the people in the village have the most?" Zhang Fan then asked.

"All have a fever and a little more fever. There are also some old diseases, such as hypertension, diabetes, and occasionally one or two fractures and injuries. I can also sew and sew them up. If there is a serious problem, there is no way to do it."

The man looked at the young doctor in front of him. Although he was young, the teachers said that he was already the president of a large hospital. It is estimated that his medical skills should be very high,

He is respected everywhere because of his medical skills. Now he seems to feel that his medical skills are shameful.

"Oh, what do you usually lack? Such as drugs, equipment, rescue supplies and so on? "

"There is no shortage. In fact, there is no shortage of drugs and consumables. The government has given me a room. I only have one horse. I can't take much with me.

It's the stethoscope sent by the county. It doesn't seem to work well in cold weather. Hey, teacher, what kind of double barrel is very good. "

Dr. Li looked at the binocular stethoscope in front of the doctors with envy. His eyes were full of envy.

Listen, everyone felt very funny, and then laughed, double barrel, is this still a thing? Everyone doesn't like what's sent in the hospital.

Zhang Fan gently took out a box from the bag he carried around.

Then he opened it, touched it, closed the box and pushed it over“ Dr. Li, I have a spare one here. I haven't used it much. If you don't dislike it, try it. ”

Zhang Fan said very easily. Dr. Li quickly said thank you while wiping his hands on his body and taking over the box.

Dr. Li doesn't know, but other doctors know too well about the stethoscope. Especially Ren Li and that flower in her heart.

This stethoscope is specially customized for Zhang Fan by an endoscope dealer in Marubeni, which can't be bought with money.

In particular, the flower, which had tried to get Zhang Fan to give to her, turned out that Zhang Fanli ignored it. The flower privately said several times that Zhang Fan was an Iron Rooster and fooled her to the frontier.

But today, this stethoscope that Zhang Fan cherishes very much at ordinary times. It's incredible for everyone.

Zhang Fan is not white, but his hands are in front of Dr. Li, which can really be called white skin and tender meat.

The rough hands held the stethoscope given to him by Zhang Fan and stroked it fondly, "thank you, thank you so much."

"You're welcome. Has Dr. Li thought about it? If he has the opportunity, for example, do you want to work in a hospital in the city in the future? "

Zhang Fan stared into each other's eyes.

The air solidified at this moment, especially the government personnel laughed so embarrassed, and the doctors in the city were so surprised.

Doctor Li gently put Zhang Fan's stethoscope in the box carefully.

The expression on his face was still so humble, "why not? I wanted to go every day when I was young and didn't get married. I wanted to go to a big hospital and learn more advanced technology.

But I'm gone. What about the people here, the old people and children who stay here?

I also want to go. To tell you the truth, I want to go in my dreams, but I can't go. "

The government staff, relaxed, heard Dr. Li's words, really, their tight body relaxed.

"Do you think it's a little strange? Well, starting tomorrow, we'll experience Dr. Li's daily work.

It's easy to stick to one day, it's not easy to stick to one month, and it's not easy to stick to it for 30 years. "

Zhang Fan said whether to laugh or not. In fact, what they don't know is that a few years later, Dr. Li received the best praise for his dedication and career. The state awarded him a name: the best doctor in China!

After Dr. Li's introduction, the atmosphere in the conference room was a little serious, because Zhang Fan's words were solemn on the face of the doctors in the city.

When the government officials didn't know what to say, Dr. Li said, "your teachers have worked hard all the way. We don't have anything good to entertain your teachers here.

The town paid for a meal for everyone. I'm sorry. The conditions are not good. Please forgive me, teachers. "

Most of the vegetables are wild vegetables, but the climate here is subtropical, which doesn't count, but there are fresh bamboo shoots and large leaves that can't be seen at all.

Meat, large pots of beef and mutton, chickens, ducks, fish and geese, that is, the family affairs of dishes are not up to grade. If you replace them with fine and expensive porcelain, it is estimated that the price of this meal is not cheap.

"Teachers, have a taste, everyone. It's not a mountain treasure, but it's not feed.

We have many mountains and little land here. Even the chickens and ducks in our family are driven out and let them find food on the mountain. "

The leaders of the county have gone back, leaving a leader in charge of medical treatment with Zhang Fan.

"How is the development of our county hospital?" While eating, Zhang Fan exchanged greetings with the leader.

"In the past, we still managed to make a living. With more and more private hospitals opened by outsiders in the urban area in recent years, the loss of doctors in the county is very serious.

Especially in gynecology and pediatrics, they can't work normally. " The county leader in charge of health sighed.

"Didn't you think of a way?" Ren Li also put down her chopsticks and asked softly.

"After thinking about it, I can't keep the house and bonus. In fact, I also understand that everyone has a family and a mouth. Education in the city is better and more convenient in all aspects."

After dinner, the male doctors were arranged in the old office, and the female doctors worked on Koster.

"No wonder Xue Fei was surprised that Zhang Yuan went to borrow Koster. It turned out that it was for us to spend the night in the car."

Wang Yanan said something to the flower.

"Well, yes, although he looks like a good man, in fact, he is the thief."

The flower also began to crusade.

Early in the morning, before the sun rose, Zhang Fan and others began to prepare to set out.

"Oh, oh!" Looking at the fog in the distant mountains and the misty fog, Xue Fei patted his chest like an orangutan and shouted at the opposite side.

"All right, let's go."

Zhang Fan didn't bring much with them, just some essential drugs and some common carry on tools. He set out with Dr. Li.

Those who can ride horses and those who can't ride horses ride carriages. Last night's heavy blow cleaned up this novel tool.

Young doctors are like going on an outing. They ride like teenagers. They run around and around with straw hats, like a dead fledgling young Xia.

The female doctors who can't ride a horse are not idle. They jump off the carriage, pick the wild flowers on the side of the road, weave them into straw hats, and then hold a mobile phone.

"There is still a section of the road. If you go on like this, you will be very tired." Doctor Li smiled and said to Zhang Fan.

"It's all right. Make them happy."

Out of the town, the road becomes more and more difficult to walk. Slowly, the horse can't run fast. The carriage driver has to get off and push from time to time.

Climbing mountains and wading through rivers, the big rivers coming down from the snow capped mountains here are so turbulent that they don't even have a bridge. Watching the waves roll, let alone wading across the river, most people are dizzy.

The male doctor dismounted, led the horse, and immediately sat the female doctor. Several female doctors with their eyes closed, such as that flower, such as Wang Yanan, who is careless on weekdays, screamed.

Provoked the accompanying government officials to cover their mouths and secretly laugh.

They had set out before the sun rose. When the sun had climbed in mid air, they were still on their way.

"Have you arrived yet? My waist is almost broken." Wang Yanan vented his anger on Zhang Fan.

"Fast, fast, we walk slowly. In the past, I would have reached the first pasture."

As he walked, Dr. Li scattered the milk pimples on the horse to these lifeless teachers.

Sour milk pimples are contained in the mouth and slowly restore the physical fitness of a group of people.

Another two hours later, the first pasture had arrived, and the team of dozens of people had been pulled long at this time, like thousands of routed soldiers.

Looking at the grassland and tents from a distance, they were greeted by shepherds as big as calves.

The shepherd dogs on TV seem to be elves and very cute, but in fact, the shepherd dogs on the grassland in the mountains can not be described as cute.

With thick hair and a big washbasin head, he ran on the grassland like a lion, not one or two, but more than a dozen.

A group of dogs barked and ran over. It was as terrible as tearing up these strangers.

Not only people, but even horses panicked.

Dr. Li hurried forward and shouted the unique language of a few ethnic groups. Several dogs seemed to know Dr. Li. After sniffing, they still looked at the strangers with vigilance.

After a while, several herdsmen from the tent rushed over, shouting and running.

When I saw Dr. Li, I was very affectionate, just like seeing my relatives, hugging and shaking hands.

First, greetings, "how are the old people at home?"

"OK."

"How are the cattle and sheep at home?"

"Good!"

"How's the dog at home!"

"Good!"

A few minutes later, it was a serious introduction.

"These are doctors!"

The enthusiastic herdsmen almost carried them. Really, it's no exaggeration. They carried the doctors into their tents with such enthusiasm.

Then the herdsmen, riding horses like sentinels, scattered away.

"They sent messages to other grasslands and herders."

Dr. Li introduced them to Zhang Fan.

The older male herdsmen in the tribe entertained Zhang Fan at this time.

"Milk tea, fresh milk tea, milk tea in a silver bowl."

"Horse" a "milk wine, horse milk wine held in both hands."

"No more wine. We're here to make a free clinic for everyone. If you're drunk, you can't work!" Zhang Fan smiled and refused.

Soon, more and more people gathered to see the disease.

On the first day, everyone was full of complaints.

The next day, everyone was silent.

The third day, the last stop of the trip.

"Tomorrow will be our last stop. Although we have only gone a few places, we haven't even finished a quarter of Dr. Li's journey on weekdays.

However, I think, through this free clinic, you may be able to experience something.

OK, now rest. "

The next day, the free clinic on the grassland was over.

The medical situation here is really not optimistic. There are many old people with blood pressure as high as 200.

Reluctant to take medicine, not that he can't afford it, but that he has no place to buy it. In rainy and snowy weather, Dr. Li can't go out.

Therefore, the old people hide Dr. Li's medicine and will take it out unless they can't help having a headache.

There are children who don't get vaccinated on time, especially some children. They are thin and don't look like.

As soon as they checked, Zhang Fan was obedient. There were many roundworms in his stomach.

Dozens of doctors kept seeing doctors and giving them free clinics for two days.

From the morning to the evening, even the first day, the moon was half empty, and there was an endless stream of people coming to see the sick.

If there are patients, doctors have to see them. This is the iron rule. Making an appointment doesn't work here.

From the new stranger to the familiar two days later, the herdsman's enthusiasm has reached the extreme.

When he killed the calf, Zhang Fan couldn't stop it. He killed four or five sheep and horses. Really, they wanted to pick off all the stars in the sky.

Early in the morning, Zhang Fan and his family got up quietly and walked out of the tent. They were leaving here today.

When they got out of the tent and the doctors gathered to call the roll, they were about to leave.

The herdsmen came out of the tent quietly. Old, old, little, as long as they can walk, they all come out.

Language barrier, but the heart is hot, the eyes are real.

The flower was filled with a lot of butter and milk pimples. The little doll pulled the corner of the flower and leaned against her.

Because that flower gave him insect repellent. After eating sweetly, his stomach didn't hurt anymore.

Pieces of dried beef and mutton were packed into Zhang Fan's salute.

"Can't take it away. We have to hurry." Zhang Fan kept explaining.

useless.

I was going to leave quietly, but I didn't get it in the end.

The shepherdess singing the pastoral song stood on the top of the mountain and kept seeing off the doctors with a loud song.

The man on horseback sent one way after another.

Moving, what is moving, this is moving.

That flower, Wang Yanan, the young female doctors stood on the carriage, waving their hands constantly, with tears on their faces.

The male doctors and the herdsman who were about to leave kept hugging each other. Now there is no smell of being tired of each other.

The rest is all real feelings.

"I can't help but want to stay. This is the doctor. It's so great!"

Finally, Wang Yanan could not see them. Wang Yanan was lying in the carriage with a look of unspeakable sadness on his face.

Out of the grassland, into the village.

Here is a village sandwiched in the mountains. There is very little cultivated land and there is an extreme lack of land.

Therefore, young people and adults had planted winter wheat early last year. As soon as the spring began, they all left here to work.

The people who stay in Chuang Tzu are really old and young. In fact, only over 60. Next, only those

under the age of six.

Sometimes people say, why not move?

In the mainland, many remote mountainous areas have been relocated, and thousands of villages have been relocated to livable places.

But not here.

Because this is the border!

## **Chapter 808**

Between countries, for ordinary people, TN is really like a dead child.

Today I want to wear a pair of pants, and the next day I want to peel each other alive.

Therefore, there are not many rich cities on the national border. Of course, not those in the south. After all, there are either fasting or chanting Buddha. Although they will shout, they are still a lot smaller in general.

In the northwest, there are few rich people. Are there any rich people? Yes.

For example, countries that have built pipelines to send natural gas to Mordor are relatively rich compared with the cities adjacent to this country.

In the past, Stan was poor. Really, even a toothbrush had to enter China. Decades ago, the border city was full of people who spoke Yangcheng dialect all over the world.

Anyway, "yes!" "Want it!" Mixed in their language, but you can't ask. It's Yangcheng people for generations.

One question is the most popular clothes in China, but they don't look like fashion clothes. They don't wear them themselves.

Later, their country discovered oil, natural gas and super gold mine, and became a tyrant.

I don't think much of these daily necessities in China in the past. Chinese clothes are out of fashion and turn to Europe.

However, the frontier cities here have developed. There are fewer people. If there are more people in the city, go and have a look. If you don't know, you think you have arrived in the capital.

The armed police all over the world do not say, there are also the garrison points of major cities here, including the border Office of Mordou, the border Office of Hanwu, and even Bird City itself. The streets are full of hotels starting with the names of foreign provincial capitals.

The environment is good. It was originally built in the city near the virgin forest. If you take a breath of the air, people from big cities can get drunk.

With green trees, snow, small population and neat municipal construction, it looks more modern than tea and even Bird Market.

This is rich, but the poor should not only think about their own food and drink every day, but also guard against the next door neighbors coming to steal.

Especially in the border area near the handover of the three provinces of Tibet and Qinghai, obediently, the altitude is high, and the next door neighbors are all poor. The whole family has to hang.

Poverty begets thieves. Really, look at the documentary. In fact, most small-scale conflicts take place here.

Today he will get you some white flour local products, and tomorrow he will get you rockets and firecrackers.

In the villages on this side of the border, in the past, it could not be said that all the people were soldiers, but when the state blew the bugle, the people here could still come out with guns.

Later, when the country became rich and more professional border armed police assumed the responsibility of guarding the border, their task gradually became less and less obvious.

Dr. Li took Zhang Fan and them into the village. From the general construction of the village, we can vaguely see the intention of that year.

Because the village is a bit like a fortress. Outside the village, there are rows of airtight woods around. There are wide and deep canals beside the woods. You can take a closer look at the water in the canal.

Compared with this canal, it's like cat urine.

Moreover, there is only one main road to the village, and there are many houses in the village. On the wall, the paint with color lost can be seen faintly, one or three times.

A group of small broken children with fart (a) shares looked at the people in down clothes and big cotton trousers who came down from the car and pointed and smiled.

Just like Zhang Fan and the villagers who came down from the old mountain, Xue Fei pretended to frighten them with faces. Instead, he attracted a group of little children flying over from a distance with earth bumps, which startled Xue Fei.

"Is this still a child? It's too tough. "

"The dragon begets the dragon, and the Phoenix begets the Phoenix. The mouse's son can make holes. They are nothing. You haven't seen their parents yet.

What's naughty? You can go out with a grenade when you fight! "

Dr. Li smiled and drove away a group of little dolls with fart (a) shares " If you don't run, catch you and eat your little bird. "

"Well!" Xue Fei looked at Dr. Li and felt that he was bragging.

"The climate here seems very hot." Zhang Fan and his family have already taken off their clothes. They only have shirts and trousers. In this way, they still feel hot and sticky.

"Yes, rice can be grown here. Unfortunately, there is too little land. Look which side."

Speaking, Lao Li took Zhang Fan and they looked into the distance.

"See, the vast plain below."

Lao Li pointed to the distance, "see, what a flat place, with lush water and grass. Why is there a wire fence? "

Zhang Fan asked curiously.

"In fact, the so-called River Valley area is not comprehensive. The real river valley area actually refers to the opposite area. We're just on the edge of the valley.

At that time, Lao Lin worked hard to draw the territory Map here, and then there was Lao Zuo's bloody battle with Xiangjiang's children. Otherwise, we don't even have this edge now.

Now this place looks poor and has no future.

As long as the country is stable, it is really a poor mountain and a bad water here. Once something happens, there is a nail and a base here. We can kill the past from this nail and can't stop it. "

Lao Li rarely shows off in front of this group of teachers in his mouth.

"Cough! Cough! Cough! You're not a good doctor. You should learn my words to others. Dr. Li, it's unkind. Cough! Cough! Cough! "

At this time, an old man came on crutches“ Ha ha, it's mainly because what you said is reasonable. If it's unreasonable, ask me to learn, and I won't learn. "

"These are the big doctors from the city." Then he introduced Zhang Fan to them: "this stubborn old man is the person in charge here. Hey, he is in his seventies and is still a working cadre."

Lao Li deliberately introduced both sides in a humorous tone.

"Welcome, welcome." The old man hurried over and covered Zhang Fan's hands.

The old man politely took a share of raw points, "eat first. There's nothing delicious here. They are all old people, chickens, ducks, fish and geese, not to mention pigs, horses, cattle and sheep, just some rice last year."

"Ha ha!" Zhang fanle, really, looking at the old man, he thought of some stubborn old men in his hometown, a pair of oil and salt, and a rural old man full of cunning wisdom.

"No, we'll work first." Zhang Fan said to the old man with a smile.

"Work?" The old man looked at Zhang Fan incredulously.

"Just see a doctor."

"Lao Li, they don't sell medicine under the guise, do they? I can tell you, don't fool me. To tell you the truth, if you cheat, we are all old people, but you can't get out of the village. "

Not only cunning, but also arrogant.

To tell the truth, they were afraid. In their early years, a group of bad guys in the city collected cattle, horses and sheep all over the grassland with bank notes for practice counting.

In the village, the bills counted can't deceive people, but fake goods and three no products are sold by people here.

There is a very famous joke in the frontier about several outsiders. It's hard to tell exactly where they are.

It is said that several people sell pots in the village with iron pots. Big pots are big iron pots used on earth stoves.

The person who bought the pot stood on the iron pot, jumped and shouted: My iron pot is the hardest. It can be a pot for cooking and a bed at night.

Then he jumped on the iron pot. When the people in the village saw it, darling, it was hard.

Then I bought it, but I didn't have any money. It's all right. Go and change the metal at home.

In this way, one pot replaced all the old iron pots and broken iron of village households.

As soon as the man left, the new daughter-in-law poured half a pot of water, brushed the pot for cooking, finished brushing the pot, and then poured water with the pot.

As a result, when something happened, the peasant woman carried two iron pot ears in her hand, and the pot was poured out with the water.

The peasant woman sitting on the ground crying is sad.

It sounds like a joke. In fact, it's very sad.

Later, this thing was not popular. When it came out, what household appliances went to the countryside, darling, what brand was used in the old man's words. We don't know. Turn on the switch, and the meter turns like a windmill. The sound is as loud as a spring cow.

Wave after wave, and then I don't know where the hospital sells medicine with free clinic.

"Oh, you're terrible. You have cancer in your stomach. Take the medicine quickly."

Then thousands of secret magic drugs were sold.

Really, people who were not afraid of the enemy now see that their own people have to be careful, or they will be deceived.

"Hehe, if you don't sell medicine, please show me. This is my work permit."

Speaking, Zhang Fan took out his work permit.

"This thing can be printed in any shop in the city. I've seen a work permit in the name of the State Council." The old man still doesn't believe it.

"Old man, why are you so stubborn." Lao Li can't watch anymore.

"Go, last time you were cheated and cried, why didn't you raise your mind?"

Lao Li's face turned red. Even he who sold divine medicine cheated him. Really, today's liars are professionals.

"They..." Lao Li also explained. Zhang Fan gently interrupted Lao Li's words.

"Is this medium?" Speaking, Zhang Fan took out a small book with a badge, a bright red steel seal and a small photo.

The old man took the little book slightly, opened it gently, looked at it again and again.

"Boy, this is reliable, ha ha! Come on, let's go home and drink some water. You're sweating. Why are you so young? "

"Well!"

Before long, Zhang Fan and his family set up a long free clinic at the head of the village with a long table.

All the patients were old people. Looking at the withered hands like branches and the old people in their seventies and eighties who had to work in the field, the doctors felt bad.

"What's wrong with you?"

"I'm not comfortable anywhere. I feel pain all over when I walk on the Kang at night."

"What medicine did you take?"

"Take any medicine. If it hurts badly, take some pain pills and headache powder.

Girl, let me see. I dare not prescribe more medicine. I'm used to it. What can I do in the future? "

"Well, OK, well, don't worry, don't worry."

With red eyes, Naduo, Wang Yanan, Xu Xian, Xue Xiaoqiao, Ma Yichen and even Zhang Fan, these young doctors really feel bad.

"Yes, I wrote it gently under my hand, and dozens of dollars of medicine was prescribed. In order to increase my income, I prescribed some more drugs with commission without conscience.

The Commission is not much, more than ten yuan, less or even a few cents. It seems that it's really

nothing.

But today, looking at these people today, their conscience is really deeply shocked. "

Zhang Fan has no objection to money and increasing income. To tell the truth, Zhang Fan also loves money and likes to eat delicious food. Even his mouth is becoming more and more tricky now.

However, to make money, especially those engaged in medical treatment, we must rely on our conscience and we must not let this thing blindfold us.

The medical team carefully examined the elderly and dealt with the pain over the years.

The old people in the village are not stupid, "this is a good doctor."

"Doctor, can you show the children the disease! The child's parents are not around. "

At this time, Zhang Fan's serious attitude dispelled the old people's doubts.

"OK, no problem. We have professional pediatricians here. " Zhang Fan said to the old people seriously.

"Iron egg, come and let the doctor in the City show you. Don't you often shout that your leg hurts!"

The children with flying earth pimples came over and looked at Zhang Fan's white coats with a clean face of city people.

The child shyly hid his dirty little hands.

"Come on, uncle, let me show you." Zhang Fan gently pulled over the child and couldn't care about the mud monkey.

"Where does it hurt?"

"Legs, sleep at night, can wake up in pain. I can't sleep until grandpa rubs them for me."

Zhang Fan gently pinched the bones, looked at the child's nails, and then looked at the child's teeth.

"Calcium deficiency! The child is developing and the calcium in the food can't keep up. "

Zhang Fan said to the old man.

"His father mailed a large can of calcium tablets from the city. I'll get them for you." The old man ran away like the wind.

Before long, Zhang Fan knew it was a health product.

"No, sir, I can't do this. I'll give you some ad. you usually give your children something to eat. Don't eat this.

Don't you have a hospital here? Have the children been vaccinated? "

"Hey, the hospital has long been yellow, and the doctors have gone to the city. I used to give preventive injections to the children. Later, for many years, there was no place to see the cold. "

Zhang Fan frowned at this.

There are many things that can be scolded by Chinese medical treatment. For example, hospitals have no place to see a doctor except the top three.

For example, pharmaceutical factories, all TM are fighting to death on the basis of basic drugs. If you sell one piece, I'll sell it for 90 cents. Anyway, all provinces have subsidies, and I dare to buy it at a loss.

It's ok if you want to do basic medicine, but your TN doesn't even have a basic medicine base. They all concentrate on what ginseng and Dan. They say it's promoting blood circulation and dredging collaterals. TM's hit the body are all allergies.

Then the upstream serious children engaged in basic drugs. Foreign pharmaceutical factories stuck their necks and stopped all vegetables. They couldn't even get a penicillin. Really, they were all jokes.

However, there is a system that Chinese people can't scold without conscience. This is the basic Chinese infant vaccine.

The vaccine mentioned here is not a paid vaccine, but a free vaccine. China can't count how much money it throws here every year.

In this way, some parents also take their children abroad to play. To tell the truth, their heads are swollen.

How many children are there in China? After many years, these experiences, really, only population and clinical experience, can't be made up by foreign countries.

Some people despise it, while others are not qualified to fight because there is no doctor.

No vaccine is a big deal. Zhang Fan picked up the phone and called Ouyang.

The old lady sent out the youngest and most promising group of people in the hospital to sublimate, and a group of old guys in the hospital have been tossed by Ouyang these days.

What do you do when you get together for class every day, watching movies and anti-corrosion films

within the system? Are you afraid? Old lady, I'll show you the consequences you're not afraid of.

The old lady looked at her dying cactus proudly in the office, humming a small song on her proud mouth. It was a leisure.

"Dean, the children in this village haven't been vaccinated. I want to reseed. Please help me check the entry of the vaccine here."

"OK. How are you? What is your mental outlook? Do you shout bitter and tired? "

"Hehe, no, really no, one by one. Now it's really like a doctor."

"Ha ha, that's right. Don't sit in the office day by day, just know to put on a black face and think that patients come to beg you. "

Zhang Fan's face is darker!

Before long, Ouyang returned. In the past five years, no vaccine has entered.

"Replant!" The first mud monkey was vaccinated in Zhang Fan's arms.

It was amazing. A group of children wanted an injection. Obediently, they looked at the earth shaking little partner crying in Zhang Fan's arms. The little children suddenly came and scattered.

In front of parents and grandparents, children are two kinds of creatures. Really, old men and women can't shout these children obedient.

What do you do? Grab!

A group of white coats were like devils entering the village. The children were caught all over the village. The little children were crying while running.

"I won't get an injection, I won't get an injection."

The children who are used to the wild in the mountains are really skinny. Xue Fei and their adults are so tired that they almost froth at the mouth before they catch the children.

With tears in their faces, the small faces on the scouring face are full of mud and ravines, like the foundation of a big girl in the city.

Like killing a pig, four or five people press a boy for an injection.

After beating, put a sweet insect repellent in your mouth.

The little children, crying and covering their mouths, were deeply afraid that the sweet candy would fall out. Moreover, after the injection, they felt that they would not be injected again. These little children looked eagerly at the white candy in their hands.

Tired, really tired, more tired than a day of surgery, more bitter than staying up late and working overtime. At the end of the day, I don't even have the Kung Fu to drink water.

However, from the vigilant eyes of the new old men and women, they slowly became affectionate eyes.

Satisfied, really satisfied. Unparalleled satisfaction.

This is recognition, born to be the highest enjoyment.

This is a patent that other professions cannot enjoy.

After a busy day, the doctors finished their work. Zhang Fan led everyone to pack up and prepare to return to the county overnight.

Can't go. The stubborn old man pulled Zhang Fan: "Hey, you boy, didn't you hit my old man in the face? I left without drinking a mouthful of water and eating a meal. Can I be a man in the future?"

"Don't be busy, sir. We'll return tomorrow, otherwise we won't have enough time."

"Don't pull the calf. The wheels of the car turn and will arrive in a minute. Don't you think we're unsanitary here.

Don't worry, the old man, I cooked for Wang beard and couldn't serve you. "

That's what Zhang Fan said. They can't go away.

Then eat.

As a result, I saw a big pot. The huge pot was put up in the old man's yard.

Before entering the door, there was a particularly fragrant meat smell.

"Old man, it's not easy for you to raise livestock, which..."

"Hey, hey, that's all fooling the leaders. The farmer's family doesn't have a chicken, duck, fish and goose. Isn't it a fool? "

"Well!" Zhang fanhan came down, and the old man deceived them as fools.

## **Chapter 809**

"I'm not afraid to eat. Now that life is so good, I can eat poor people, but I'm afraid it makes people uncomfortable.

Come and try my craft, old man. Look at you girls. One by one, you are thinner than the other. You don't know, you think the hospital doesn't have enough to eat. "

The old man happily held Zhang Fan's hand.

After entering the yard, the old man began to shout, "old woman, serve the food first. The doctors have been hungry all day. Take a la carte first."

"Hey, OK, here you are." Not much effort. An old lady who cleaned up came out with her hair neatly combed and treated people and things in a big way. Zhang Fan felt that the sloppy old man was not worthy of the old lady.

Although the clothes are simple, it can be seen from the old man's look that the old lady was definitely a figure when she was young.

After the old man settled down and the doctors sat down, he hurried to wash his hands and pack up the food.

While walking, he blew: "I have to open my stomach to eat today. I'm not happy who commits fraud. You are also blessed. I gave you... "

"Come on, you old man, hurry up. The doctor is hungry." The old lady smiled and pretended to hammer the old man.

The old man went into the kitchen with a smile.

"Don't listen to the old man boasting. He probably picked vegetables in the cooking class at his age.

But don't underestimate the old lady. She was the female leader of the serious working group. "

Doctor Li's gossip said this mysteriously around Zhang Fan.

"Oh, how..."

"Hey, no more. Come and have a taste of wild vegetables. I can tell your teachers that this thing is very expensive. It can only be eaten in spring, and it can only be picked by the hot spring. "

"Dr. Li, don't call us teachers. Really, we should call you teachers.

In recent days, we have realized what is the benevolence of doctors and what is the urgent need to save people. "

Wang Yanan said to Dr. Li. To tell the truth, when the girl was in the hospital department, she was a little afraid of Zhang Fan.

Because Zhang Fan has technology in hand, the rest, because her family is in the medical system, really, no one is in the girl's eyes.

Pride has proud capital, and she works hard, which makes her a kind of scenery.

However, today, the girl said gently to Dr. Li in a rare and modest way.

Education, what kind of education, is not as good as a deep self experience. Therefore, this deep education is estimated to affect her professional doctor.

"Yes, Miss Li, this is my phone. Call us if you have anything.

When I can't help you, there are Zhang Yuan and their secretary. "

Xue Fei looked in admiration at the doctor riding through the mountains and the faded red cross on the rescue bag. How could he look so dazzling.

"Thank you, thank you, thank you!" Dr. Li trembled, turned his head secretly and wiped the corners of his eyes.

I'm not afraid of hardship and fatigue. I'm afraid that others will look down on him and don't understand him. I'm afraid that these doctors in the city think he is a barefoot Jianghu doctor.

Now, Lao Li wants to cry and cry loudly. After 30 years of persistence, he has finally won the recognition and respect of his peers.

Zhang Fan patted Dr. Li on the back and nodded to Secretary Ren. Secretary Ren looked at everyone and

said, "a life experience may not bring painful changes, but we should let everyone understand.

In this world and this country, there are people with the same career as us who insist that they live a different life from us, but they are much higher than us.

And not only this profession, but also many examples for us to learn and think about when we are alone.  
"

Then Ren Li looked at Zhang Fan " Dr. Li, we are going to regularly assign doctors in the city to learn from you. At that time, please trouble you. "

"Yes, ah, thank you, thank you, Zhang Yuan. I thank you for them. When the teachers come, they will take good care of them. "

Just as everyone was sobbing, the old man came, "come, come, come, the meat is ready, let's open our stomachs and eat.

Rice wine, hey hey, the old woman's craft can't be tasted by idle people. " As he spoke, the old man's saliva seemed to fall.

"You talk a lot. You'll drink less later. You're not in good health. This is for the doctors to drink."

"Well, well, boil! Ha ha. " The old woman held the old man. The old man spread his crutches and covered the pot with both hands.

Really, they may have suffered a lot in their life, but looking at their tacit cooperation and gentle eyes, they envy a group of city people who yearn for love and have heard of love.

The black iron pot lid opened. With the water mist blowing on the face, the aroma could not be stopped, so it ran into everyone's nose.

"Come on, Xiao Zhang Yuan, use chopsticks. Ha ha, this dish used to be the chief's favorite. Try it. Fish and sheep are fresh! See what's different. "

Now that you've done it on the table, you're welcome.

Zhang Fan held a small piece of mutton with chopsticks. After smelling it, he put it into his mouth, Shua and his eyes widened.

To tell the truth, as a Northwest man, Zhang Fan actually has a general interest in mutton.

But this dish is really different.

"How's it going?" The old man looked at Zhang Fan with a smile.

"Fresh is different from the freshness of seafood and the plumpness of mutton. It looks like another special fragrance."

As soon as everyone heard this, they started quickly, especially Xue Fei and Wang Yanan. They ate faster than each other and were hungry.

The soup in the big iron pot is milky white. The coriander and scallion floating on the soup surface are like a leaf boat, with a little red pepper and rolling meat pieces. It really looks like a landscape painting.

The old man and the old lady ate a piece occasionally, and then watched a group of young people eat in full swing.

This dish of fresh fish and sheep is exquisite. Ordinary people can't do it.

Sheep are adult rams that are not fanned. In the northwest, this kind of sheep is not eaten very much because the male hormone causes the mutton to be particularly mutton.

It can be said that if the family eats this meat, it is estimated that everyone on the whole floor knows that your family eats mutton.

This meat, ah, must first be kneaded with local alkaline plants, a large number of alkaline substances to suppress the smell in the meat.

Cut large pieces of meat that are much larger than your fist. Then, the most important point comes.

Fish can't be grass carp or crucian carp. It must be a small white strip, a specialty of the river valley. This kind of fish is not long, and there are many fish bones, just like a cactus wrapped with a layer of fish skin.

If you eat it alone, not to mention the northwest people, even those who grew up by the sea can't eat it. It has more thorns and less meat.

It is estimated that the old man and they also accidentally discovered this practice. The more the fish is put into the mutton, the more delicious it will be.

When the mutton is six mature, it is the time to send out the smell of mutton. Put this small white strip into the pot, which is not much thicker than chopsticks and not much longer than little thumb.

Then stew in a large pot over a low heat, gudu gudu. After three or four hours, the fish and fish bones are soft and rotten into the soup, leaving only palatable large pieces of mutton.

Before the last pot, throw in some wild coriander, red pepper, scallion, darling!

Really, Zhang Fan ate a lot of mutton in the frontier.

Braised, stewed, roasted and fried, but I've never eaten mutton with such flavor.

The mutton in this way is thin but not old. The first bite is the fragrant beauty of the soup. The more the mutton is chewed, the more it has a light aroma of fish with a long aftertaste.

"Come on, a mouthful of fresh fish and sheep and a mouthful of old rice wine are very beautiful." The old man advised everyone to drink, but the doctors in the city shook their heads.

The old man didn't insist. He bumped into Lao Li and drank Zizi.

A pot of mutton, a big pot of mutton, eat clean, even no residue left.

"No, it's almost done. It's so delicious, sir. How can I eat other mutton in the future? "

Wang Yanan said to the old man like a spoiled girl.

"Ha ha, if you want to eat, come to me and I'll make it for you. Wait a minute. It's not over yet. "

As she spoke, the old lady came out with a plate of coarse grain cakes“ Eat meat, the stomach is not comfortable, just eat some coarse grain cakes with mutton soup, which is comfortable.

Come on, come on, try it. Don't look down on this coarse grain cake. You probably won't see it in the city.

This is steamed with millet and millet. Come on, girl, have some more to see how thin you are. "

Not only Wang Yanan, that flower, but also LV Shuyan of gynecology department. They probably have a small stomach.

But looking at Zhang Fan's special fragrance, he couldn't help but take a little dip in the soup and taste it. Darling, the meat is fragrant, the fish is fresh, and the grain is mellow. It's really unique.

It's really full of food. Finally, pickled pickles before the Spring Festival don't need to be fried or cut, so they can be fished out of the jar.

Clear water is flushed, and then separated into pieces, one by one. It's slightly spicy in the sour and refreshing. It's greasy and crisp in one bite, and the mouth produces saliva.

Really, there is absolutely no such delicious food fermented in time in a big hotel.

After dinner, the female doctors helped the old lady clean up, and the male doctors surrounded the old man and listened to the old man's boasting.

Listen to his extraordinary years.

Early in the morning, the doctor went home. The excitement and complaints on the way disappeared without a trace. At this time, facing the rising sun, everyone was quiet.

Quietly looking out the window, looking at the mountains and rivers outside the window.

Back at the hospital, Ouyang welcomed the doctors out of the mountain at the gate.

The old lady smiled with wrinkles on her face and couldn't close her mouth when she looked at the doctors who got out of the car one by one.

"It's dark, but healthier. It looks more energetic and beautiful than before. Go back to take a good bath today and come to work tomorrow. "

Ouyang said kindly to several young female doctors.

She knows too much to be inferior. If she doesn't say a big word at this time, she is as gentle as grandma.

After a sublimation, the atmosphere of the hospital has obviously changed. Although it can not be completely changed, this change is like a seed, which will definitely sprout slowly and become a towering tree.

There is still fifteen after the seventh day, but for people working in hospitals, the year will end after the seventh day.

The work has been on the right track. Zhang Fan looked at his application for further study for the new year, considered it, and selected some people from among them to be released for further study.

This kind of selection is very particular. For example, the female doctor has been married for almost half a year. At this time, she can't be sent out. If she doesn't get pregnant, her study will be in vain.

Moreover, another problem is the difference between staff with and without staffing.

Many times, units, no matter in hospitals or anywhere, shout "equal pay for equal work, equal treatment" every day

In fact, it's a lie. Yes, the income is about the same, but what about the future? For example, a nurse ran up and down in the hospital when she was young.

In middle age, those with staffing can develop towards administration and management, but they can't. They can also be head nurses, but those without staffing. Where can they go at this embarrassing age?

She can't run, let alone the management direction. Even a head nurse won't give it to her easily unless she is excellent enough to surpass most people.

Therefore, the turnover rate of nurses is particularly high.

Doctors are the same. The unit also has its own considerations. If it is not prepared, it represents instability. After all, resources are limited.

Zhang Fan is helpless in many things, but for further study, we must choose the best from the best.

First of all, Wang Yanan of orthopedics should be released for further study. Orthopedics is Zhang Fan's test point.

Now the results are obvious, but Wang Yanan and Xu Xian can't stand it yet. They can only come one by one.

When the doctor gets up, he has to send some nurses. Three doctors and seven nurses are not nonsense.

Nurses in hospitals, especially those in surgery and operating rooms, apply for further education.

"Bayin also applied? Hehe, it seems that I'm not going to have children first." Zhang Fan smiled.

"Director Zhao, ha ha, I, tea vegetable Zhang Fan."

"Zhang Fan, I know. I saved your phone. Why did you remember to call me today?"

"Ha ha, isn't it the new year? I'll give you a new year."

Zhang Fan himself felt blushed.

It's not that Zhang Fan is impolite, but that he knows too many people. Therefore, during the Chinese new year, Zhang Fan didn't call in person to pay New Year's greetings, except for his teacher in Qingniao and his uncle in magic capital.

This time, Zhang Fan deeply realized that he didn't burn incense at ordinary times and jumped to the table when he was busy!

"You can do it. It's fifteen. You're so insincere to pay a new year's call.

All right, I'm not idle. Come on, what's up. It's probably not a flying knife. You can't do the operation. It's hard to shout at me.

Do you want to take some orthopedic research projects from me? No problem. Aren't you about to

graduate from your master's degree? Come and be my doctor. There are so many projects that annoy you. "

Shuitanzi's orthopedic director teased Zhang Fan.

Zhang Fan's master's degree, master's uncle's master's degree, and doctors at a slightly higher level all know that the two academicians went through the back door for Zhang Fan for the first time. Everyone didn't know Zhang Fan before, so they all inquired around. Besides, director Zhao and Zhang Fan also had surgery together.

"Hehe, director Zhao, which one of me is a master of general foreign studies!"

"It's all right. There are many doctors of orthopedics on the way. Don't be modest. Anyway, you are also an orthopedic background, which can't be erased. How's it going? Are you interested.

Don't stay in a small place. Come out and see the world. " Lao Zhao kept seducing Zhang Fan.

When a doctor reaches the peak of technology, he must form a team that can hold him up.

Not to mention the others, Lao Zhong's team and Lao Hu's team pull out a doctor casually, which is great.

In addition, for the team that Kobe Bryant had tendon surgery in those years, to what extent were they forced? Almost all the top sports operations were contracted by the team.

Zhang Fan's family knows his own affairs, and he is not willing to fight others, not to mention Lao Zhao. Even his master and martial uncle pretend to be confused about this matter.

"Director Zhao, have time to travel with tea. It's hot. It's estimated that the capital is full of yellow sand."

"Hey, don't mention it. You can drop a kilo of sand when you enter the door and pat yourself. What's the matter? I'll have an operation later. "

Lao Zhao listened to Zhang Fan and avoided talking. He thought maybe someone wanted to see a doctor in shuitanzi. Please contact him. However, according to the orthopedic level, he is not bad himself.

"Director Zhao, that's right. Give me two places for further study in your department this year."

"Oh, why, you have a big heart. You're starting to build a platform now?"

"Hehe, she is a female doctor and an operation nurse. In the future, she will mainly develop to orthopedic surgery. How about director Zhao? "

"OK, but I can't refuse when I need your hand in the future."

"See what you said, on call, all-weather standby." Zhang Fan smiled and patted Lao Zhao on the chest.

"OK, I'll ask our hospital to send a letter to your hospital in the afternoon. You'll send the names of the trainees by text message later."

"Thank you, director Zhao."

"All right, I'm going to the operating room."

Orthopaedic study solved, and then began to urology, pediatrics and general surgery.

For a time, in addition to orthopedics in the north, Zhang Fan sent his people to study one by one in the top hospitals in the south of China.

"Third, I'm going to Fangdong to study general foreign languages. Ha ha, no, ha ha! "

Ma Yichen called his master's classmate.

"Oh, my God, such a cow. You're giving away all your father's property. Cow, Fang Dong, shit, the saliva has come down.

How long, not three days! "

"Half a year, what gift do you give? Our dean of surgery did it for me."

"Such a cow, your Dean is too capable. Who is he?"

"Ha ha, I can't scare you out of speaking. Old martial nephew Wu, ha ha, envy me."

"I envy you. I want to strangle you. I've been there for a long time. I'll contact my friends at that time. "

Ma Yichen, who is in Mongolia, is happy for his classmates and sad for himself.

"Hey, why don't I have such an awesome Dean."

Not long after the beginning of 2010, the tea vegetable hospital caused a sensation, because the number of personnel studying this time was the largest and the youngest over the years, and many of them were inpatients.

Some people are not satisfied, but they can't say it. What can they say? Say they're young? But who is the youngest sitting in the dean's office? Who can be better than him?

When Wang Yanan was about to go to study, there was an accident in orthopedics. Wang Yanan was

crying out of breath and called Zhang Fan.

Proud girl, the first sentence to Zhang Fan is: "master, I don't want to be a doctor. Really, don't I work hard? Don't I study hard?"

But why, why, he died laughing in front of him.

I watched him leave, but there was nothing I could do, woo! Woo! Woo! I'm not willing. "

## **Chapter 810**

Attacking cities and conquering land was originally done by the army, but Zhang Fan was doing it after the Spring Festival.

In the past, the system only opened the general surgery and orthopedics department. Zhang Fangan's liver. The hospital has countless operations, so he can't finish them.

I can't even finish the operation day and night. What can we say about China's medical care? There are good and bad.

But after seeing the doctor, if he asks you to wait, such as appendicitis perforation due to appendicitis inflammation, you can point to his nose to greet him and make him feel overwhelmed.

Overtime is too common in hospitals, so surgery can't be done by one person or several people.

However, after playing open heart surgery and opening the outside of the brain, Zhang Fan was a little unable to perform.

Surgery in some departments such as general surgery, orthopedics and even urology cannot be completed, while the amount of surgery outside the brain and heart is too small to do.

Looking at the requirements of such magnitude in the system, Zhang fan can only go to the bird market to find a way.

Therefore, after the beginning of the new year, Zhang Fan ran the bird market more and more frequently.

General foreigners, Zhang Fan has become a name in the frontier. No matter the general foreign experts in the north and south of the river, throwing knives will never come to the frontier, because there is Zhang Fan here.

Generally, doctors who can fly knives say this to doctors in other hospitals in the frontier:

Oh, it's too far away to turn around time. Otherwise, you can find someone else.

The frontier doctor wondered, in the past, you ran three times a week and never said it was far away?

If you are familiar with a better relationship, people will tell the truth: Hey, ask your tea vegetable Zhang Fan to do it. They are in the frontier. I'll fly a knife again. It's not good-looking.

This is actually the common name agreement of top doctors. For a discipline, the top medical circle is so large, unless there is a problem with the relationship between the two.

If the relationship is OK, it is often: Lao Li, someone asked me to fly a knife to you. I heard that you are very busy. Give me face and make this of mine first.

There is love on both sides! And this is not only a question of friendship, but also a question of income.

Orthopedics, relatively speaking, the difficulty coefficient of orthopedics is a little lower, but in case of serious spinal trauma and spinal deformity, it still needs experts to do it.

Although it's a little difficult, it doesn't seem to have an immediate effect. Therefore, Zhang Fan's orthopedics is not as famous as that of ordinary foreigners.

Moreover, Zhang Fan doesn't need to fly a knife for orthopedic surgery. There are many tea minerals and road risks. The surgery here can't be finished.

But outside the brain and outside the heart are different. These two things need a population base to support them. Therefore, Zhang Fan went to the bird market a few days after work.

"Zhang Yuan, I'll buy you a ticket. You don't make a plane. You have to drive yourself. How sorry."

The director outside the heart of bird City Central Hospital personally greeted Zhang Fan at the door.

Looking at Zhang fanhong's car driving into the hospital, I was drooling with envy.

The car doesn't matter, but this brand has too much face. It's really an identity.

In fact, if it hadn't been for the help of the traffic police at the critical moment, Zhang Fan didn't find it. Seeing that everyone didn't pay attention, the old man climbed to the overcoat cabinet with a ladder like a Acrobatic trick.

He was old and dazzled. One fell carelessly. He just heard a click and the left femur broke directly.

Like a prosthetic leg, the left leg has become a double knee, directly facing the back, the heel is ahead, and the thigh has become a three section stick, thrown in the wind!

At that time, the old man in pain ouch ouch.

It was also a loss that someone in his family called Wang Yanan in a hurry. While calling, he sent him to the hospital.

Emergency surgery was directly pulled onto the operating table on the same day. At that time, Zhang Fan went to the bird market, and Wang Yanan accompanied Lao Gao to operate on the old man himself.

The operation was very successful. As a result, something happened when I was discharged from the hospital.

Orthopaedic surgery, such as femoral head replacement surgery, or some large bone fractures, such as thigh bone, that is, femur and pelvic fractures, these operations seem to look at bleeding as the most dangerous.

For example, pelvic and femoral fractures are often shock.

However, this shock can be rescued, that is, doctors still have time to break their wrists with the God of death.

However, there is another complication. Once complicated, there is almost no time to rescue.

Moreover, this complication is almost difficult to prevent.

Everyone has eaten bone marrow, especially big bones. Take a chopstick, take it out bit by bit, put it in your mouth, smash it, smash it, it's more fragrant than meat.

In fact, the structure of bone marrow is similar to that of fat. On weekdays, as long as you are healthy, adult bone marrow is like an uncle. Where can you lie in the bones safely and stably.

Don't do any work, not only don't work, but also nourish others.

But once there is massive bleeding, when the human body is in a state of anemia, at this time, people

Under this kind of attack, the bone marrow directly turns into bean curd stirred with chopsticks. I don't know how many times.

The mushy bone marrow is completely turned into fat, and then the doctor will rinse it with a large amount of normal saline.

If you eat a mouthful of fat meat, most people can't resist it except those who like to eat fat meat. This thing can make you vomit on the spot.

In fact, the body is the same. No matter how much water is washed, fat particles and invisible fat particles will enter the blood.

It can be said that this thing is inevitable.

After the fat particles enter the blood vessels, this thing floats with the blood flow like a boat floating in the river at the beginning.

If the blood flow is slow and the elasticity of blood vessels decreases, this thing will converge somewhere like a traffic jam.

Then, with the combination of the strong and the strong, the fat particles invisible to the naked eye will fuse into a life-threatening fat aircraft carrier.

Protein can run out of blood vessels from blood vessels and tubes, and sugar and salt can sit in and out of blood vessels.

Fat doesn't work. It goes into the blood vessels. It's a troublesome thing.

When the assembled fat aircraft carrier drove up, it was lucky to be blocked in the lower limbs.

For example, some people, healthy, suddenly walk and limp. And at that time, there was lower limb pain.

It hurts like a dog bites off a piece of meat and can't walk. But after a rest, it may be better again.

It's not Lao Zhao's bluff. If you are over 35 years old and like to eat fat, you don't like meat and smoke, you must be careful. If you don't do well, it's fat deep vein embolism. You must tell the doctor about it.

Blocking your lower limbs will make you lame. Block in your brain. Well, you may not have to do it yourself for the rest of your life.

What if it's blocked in the lungs? The direct is the so-called triple syndrome of pulmonary infarction: chest pain, hemoptysis and suffocation.

This kind of pulmonary embolism often occurs when the patient suddenly changes his face and hasn't put his hands on his chest. As a result, his eyes close and fall to the ground, and he doesn't even have time for rescue.

It's more scary than what's in the movie, so it's right to have less oil and less meat.

Wang Yanan's grandfather, the old man, after the operation, lay in the hospital for a few days and couldn't stay in the hospital.

Yelling to go home every day. Wang Yanan is cruel to the old man every day, but the old man still wants to go home.

Wang Yanan removed the suture, checked it and recovered well.

Pushing grandpa in the wheelchair, he walked slowly towards the elevator and was ready to leave the hospital.

"Grandpa, I've suffered this time. I can't climb up and down again when I go home. How old are you!"

"Well, don't climb. My daughter is a doctor now. I want to listen to women!

Don't listen to your mother. She doesn't know anything. When you become a doctor, Grandpa supports you!

It's good to be a doctor. It's good to be a doctor and heal the wounded. This is accumulated virtue.

Just get married early, and I can bring you children.

It's good for me to see a male doctor. " Then the old man pointed his finger at Xu Xian.

Wang Yanan is an orthopedic doctor. Her grandfather is in hospital and takes good care of her from top to bottom.

It was time to leave the hospital. A group of nurses accompanied Wang Yanan to send the old man, while male doctors came out of the office and watched from a distance.

It can be regarded as a face for Wang Yanan.

"Ha ha! The old man has a good eye. He fell in love with the best young doctor in our department at a glance. "

Miao Juan, head nurse of orthopedics department, also joked with the old man.

Wang Yanan also smiled and teased the old man. He walked slowly to the door of the elevator.

The elevator door hasn't been opened yet. As a result, the old man suddenly changed his face and trembled his hands to lift it, but he couldn't lift it. His chest hurt and his teeth twisted.

Wang Yanan looked at the shadow through the elevator door. Grandpa seemed wrong. He turned around and squatted directly in front of Grandpa.

"Grandpa, grandpa! What's the matter with you? "

As he spoke, the old man slowly slid down from his wheelchair.

"Grandpa! grandpa! Don't scare me. "

Talking, the nurses who had not left and the male doctors standing in the distance all ran over.

"Come on, put it down, put it down, come on! Put the old man flat. "

Zhou Chengfu, Xu Xian and the nurses quickly put the old man flat.

At this time, Wang Yanan's mind was full of dark shadows. There was no professional knowledge, but subconsciously, she knew that grandpa had a big problem.

Tears, in the face of the valiant female doctor, broke the flow of the line. In the dark, she had realized what was the same.

"Grandpa, Grandpa, open your eyes and look at the women. You have to look after the children for the women, Grandpa."

"No! Fat embolism, come on, call the heart. Rescue, push the ambulance. "

Not even the time to move, not even tens of seconds from the onset.

Xu Xian pressed desperately, and Zhou Chengfu went straight to his mouth and gave the old man first aid mouth to mouth.

However, the old man grabbed Wang Yanan's hand and sent it away slowly.

Then the heart stopped slowly.

"Grandpa, Grandpa, wake up, wake up, you promised me, you promised me.

Grandpa, wake up! "

Wang Yanan ran away and sat beside the old man who was just smiling.

The head director of the Department of Cardiology ran over with the flower. As a result, it was still late and looked at the doctors who had given up treatment.

Looking at Wang Yanan, who was already crying softly, several female doctors hurried forward to help Wang Yanan.

Before long, Wang Yanan's mother came up from downstairs.

"I want to call Zhang Yuan, I want to call Zhang Yuan, I want to call my master, he can save my grandpa, Grandpa."

Wang Yanan couldn't cry. He was a good old man. As a result, he closed his eyes in one breath.

Crying out of breath, Wang Yanan couldn't speak clearly on the phone. He kept saying that he was dead in front of me.

Zhang Fan clenched his teeth, hung up the phone directly, and then called Xu Xian.

"What the hell is going on? What happened?" Zhang Fan's voice was on fire.

How can a girl who is so persistent in medicine and medical skills suddenly give up.

Xu Xian answered the phone and said, "Zhang Yuan called me."

Then Xu Xian said it quickly.

Zhang Fan is silent. The doctor is not omnipotent. However, in Wang Yanan's case, it can be said that a close relative died in his own hands.

It really makes the girl feel bad. After hearing this, Zhang Fan said to Xu Xian, "let the hospital logistics help. You send a female doctor to comfort Ya Nan. She is stubborn. Don't anything happen again. Everything is waiting for me."

"OK!"

After hanging up, Zhang Fan called Shaohua and asked Shaohua to come to the hospital to accompany Wang Yanan.

Then, Zhang Fan rushed to tea vegetable all night.

Yu Gong and Wang Yanan are his subordinates, Yu private. Wang Yanan is Shaohua's best friend, Zhang Fan's first serious apprentice, and a very hard-working and hard-working apprentice.

This kind of thing, what to say, Zhang Fan will go back.

In fact, in the medical system, there is a rule that everyone does not say, that is, if a doctor's close relatives need surgery, they often ask their colleagues to do it.

The more you understand, the easier it is to step over the heart!
