

Chapter 871

People who do beheading business on the border are actually seasonal.

For example, in winter, you can't do snake head business, because it can really freeze to death on the plateau.

Generally, at this time, it is the prime time for smuggling, such as fur of wild animals, white flour, taking (a) private gold, etc.

For example, in the early years, the woman who was known as the richest man in the frontier actually made the first pot of gold by relying on gold and sheepskin.

Although it seems that fur is not expensive, in fact, in the upper class of Europe, this thing is super expensive. For example, Tibetan sheepskin, it is said that a complete piece of fur is equivalent to gold of the same weight.

When people identify sheepskin, the method is quite simple. Whether an adult sheepskin can pass through an ordinary ring is the standard.

Really, it's much better in recent years. The country has been cruel. If you meet such people, you can shoot them directly. A few years ago, there were so many crazy people driving and sweeping sheep with guns in no man's land.

In summer, when the temperature is high, it is the best time for snake head business. At least, this business will not be shot, so everyone chooses when the weather is hot.

Some ran to China and some ran out of China.

On Hongtong, many people go abroad from this line, then enter Stan, then go to Europe from Stan, and finally choose a small country to change its name and hide.

On the contrary, it is at the handover of winter and spring, which is the quietest time here, because at this time, icebergs will melt. No one can guarantee that there will be avalanches. Most avalanches occur in this season.

Many mountain scenic spots are not open in this season, just afraid of avalanches.

In this season, to be honest, these people who do illegal business will definitely find a place to get up. They won't come in at all. It's not worth it! Once you meet a snow mountain, you will die!

People who do illegal business in the frontier have a saying. The armed police are the eldest, the snow mountain is the second, and the third is the one who legally carries a knife. The eldest and second need to be feared. As for the third, it scares the ordinary people.

In this dangerous season, some mountaineering enthusiasts or donkey friends sneak into the mountains, ignoring the obstruction of the border police.

To tell the truth, the border police in China are quite powerful. Ordinary people don't know. They always feel as if they dare not shoot, either because they are inside or because they are children's soldiers.

Therefore, these donkey friends can't grind the border public security, and they don't listen to persuasion. They enter the mountain from the corners while others don't pay attention. China is too big, and their main task is not to manage donkey friends.

Therefore, this season is also the most tongue wasting season for border police.

A group of people who thought they had strong survivability entered the mountain.

Mountaineering, especially in the cold plateau, is also mountaineering in the frontier. To be honest, it's unwise to choose this place.

A little carelessness can be sieved by Stan as a stowaway biubiu BIU.

Moreover, this kind of extreme sports has very high requirements for the human body. This thing is more powerful than anyone who has more muscles, perseverance, money and the number of red blood cells in the blood.

A group of men and women, sleeping in the open air, set out for giogory. Perhaps in recent years, stimulated by local tyrants, for example, a president conquered the top of the world, and a big man showed his Scissor hands on the top of the direct.

Then, this group of people did not know what to think, and had to conquer the highest mountain in the frontier.

To tell you the truth, it's hard to say whether those big men who climb the top directly love mountaineering, but if you let others climb the first mountain in the frontier, they will never come.

Why?

Although the first mountain in the frontier is not well-known, it is quite difficult to climb. Even when the Chinese professional mountaineering team climbs this mountain, the mortality rate is as high as 27%.

And they are still professional. Sometimes, in order to climb a mountain, they even have to do four or five years of preparation. The backup team is so powerful that it is incredible.

But this group of donkey friends, carrying the so-called top equipment in China, set out. The more difficult it is to walk, the more tired it is to walk. Even if someone wants to give up halfway, there is no chance. It's too late to cry for parents.

Regret, quarrel, appeared in the team.

The team of more than a dozen people split into two camps, one must conquer old Joe and the other must turn back.

In a tent under a cliff, the two camps criticized each other like enemies.

The wind blows!

The border police on horseback patrol the sacred border line with one foot deep and one foot shallow.

Under the strong ultraviolet radiation, it's useless to smear anything on your face. It's peeling one by one. It's painful to look at the red and black on your face.

Just as a team of border police approached the mountain, an avalanche occurred.

The snow mountain rolls down from the top of the mountain like a huge tsunami. The cries and movements of the weak snow on weekdays are like thousands of troops charging.

"Retreat, I can't get through today. There's an avalanche!" The platoon leader looked at the avalanche in the distance, comforting the horses and pulling the police dog into his hand.

Just as the border defense team was about to evacuate, it was far bright yellow and blue, as if a team of people were shaking.

"No, someone, guard!"

Border police are really armed. Who will come to such a place. Danger always exists, either beheaders or plateau wolves, which are not easy to provoke and reason.

Click! Click! Ka, several border police officers dismount quickly and guard!

The bright colors are getting closer and closer, "no, it's the people! Come on, past two. "

Although it is suspected that it is common people for the time being, because it is almost certain from the bright clothes and staggering steps, they can't help being careless in this environment. Maybe someone is pretending.

The two soldiers got up and ran towards the crowd in the distance.

This group of people are actually donkey friends. At the foot of the cliff, they finally parted ways. A group of people continued to set off towards the mountains, while another part returned home.

As a result, only a few hours after the crowd separated, an avalanche occurred. Under the great power of nature, the group who ran home was called a crying father and mother. With a runny nose and tears, I wish my mother had given them two more legs that year.

Under the snow, where can you run fast? On weekdays, brothers and sisters and brothers and sisters are useless at this time. One runs faster than the other, and one is deeply afraid of being buried.

Really, the embarrassment of landing with both hands is not worth mentioning in front of death.

"Oh, my God! Help me, I twisted my ankle! "

"Brother, brother Wang, give me a hand!"

They tried desperately to stay away from the avalanche.

The soldiers running over looked at the avalanche in the distance, looked at the crowd, and heard the familiar Chinese!

Without hesitation, they accelerated their speed, ran towards the crowd and ran towards the avalanche.

One of the donkey friends suddenly saw the military green in the distance. He was so excited that he didn't know his last name.

"PLA, come on, come on, help me, PLA, come on, you hurry!"

When I came here, I was so excited that I became a panic now.

Chapter 872

In fact, the main ethnic groups of several stans in the northern foothills of the Himalayas can find corresponding ethnic groups in China.

The diet is also very similar. For example, in the emirate, although their diet is a little different from the national diet on the border, they always feel that the taste seems to be a system.

The young chief of the emirate is finally leaving the hospital. The boy recovered very well. After more than two months, he watched Chinese TV every day. It seems that the boy can speak a few words of Chinese soon.

The president of the emirate came to the tea plant in person. People still came to pick up their son under the slogan of visiting China to learn the new chemical industry of tea plant.

People at their level really understand what can be done and what can be said and done.

For example, this time, it is clearly a private affair, consuming special planes and money, but we must not say so verbally.

The bosses of chemical plants whose tea vegetable is not much bigger than the workshop in the South sweep the floor and pave the roads every day, and even hit balloon slogans. Unfortunately, the chiefs of others directly entered the tea vegetable government, and did not mention visiting any enterprises at all.

After the last physical examination before discharge, all indicators recovered completely, the mental outlook of Shao chief was much better than before, and his face rich in small freckles was a little healthy and ruddy.

The chief is quite satisfied. The Chinese government has repeatedly said that it can reduce or exempt the treatment cost of more than 1 million yuan. However, people look down on who. They not only give the full amount, but also say that the price is not expensive.

Ouyang, standing on one side, smiled happily. Although the old lady handed over the power of the hospital to Zhang Fan, she was nominally the boss of the tea vegetable hospital.

The chief was very happy. After watching his son recover and his mental outlook was quite good in all aspects, he had to thank the chief surgeon at that time.

The doctors of the tea vegetable hospital and the envy and jealousy of the tea vegetable government staff thought that when the local tyrant wanted to make money, they just wanted to invite the chief surgeon and government leaders to dinner.

"It seems that people are not stupid. People are well. There is no need to bleed any more!" Two small government officials standing almost one stop from the crowd center chatted with schadenfreude.

Many people have this mentality, that is, they can't see others powerful or they can't see others eating meat with a big bowl.

When a president comes to China, the Frontier Province doesn't know who is the number one. Anyway, the chairman of the Congress personally comes to tea vegetable to receive him.

The tea vegetarian government has also prepared a banquet hall. As a result, it seems that people are ready to invite doctors to dinner. The president's special plane directly brings a team of chefs, and the ingredients are provided by himself, which is also a wonderful flower.

Can't you discount it with Zhang Fan's idea? All the way, so hard.

In the banquet hall of the tea government, Ouyang, Zhang Fan, Ren Li, as well as the director of general foreign affairs and the doctor who had surgery at that time came.

The tea vegetable government also has a face. They are also very happy to show their face in front of their superiors.

The food is fast. How to say, it's western food, not all western food. It's not Chinese food.

Anyway, it's a little Central Asian.

For their so-called roast meal, Zhang Fan has no appetite. The yellow oil and water and thick spices on the camel meat are almost full as if the camel had tinea.

Finally, a special pastry of the emirate came up, which became the highlight of the banquet.

The people on the government side are not stupid. They know exactly how the young chief got into the hospital and how he operated on tea. They look at the baked food that the doctors don't move. They also look at the flying of chopsticks, knives and forks, but they don't even touch any oil on their mouth.

But the last pastry of the chef team is really unique.

Bakrava!

In a big plate not much smaller than the big table, four chefs carried it to the table.

Zhang Fan looked, "cut cake?"

He and Ren Li looked at each other and saw surprise from each other's faces.

In fact, the folk snacks in the frontier are similar to those in the Emirates, but they are different. Just like the evolution, they have their own characteristics.

"Come on, come on, let's have a taste!" The president of the emirate personally held a piece for Zhang Fan and them.

Vegetarian, you can still eat it. Zhang Fan gently took a bite, "Hmm!" My eyes are bright.

Anyway, it tastes good. Although it looks very similar to cut cake, layer by layer has an obvious sense of hierarchy, but it is definitely better than cut cake. The cut cake looks tempting, and the betel nut is everywhere. You can get tired of people in one bite.

This is different.

What the hell is bhaklava? It's actually a sandwich. But people's practice is quite special.

In fact, the staple food of several Central Asian countries is wheat. When they make bakrawa, high-end chefs pay attention to it.

First of all, the half fermented dough layer by layer is about 0.1mm thick. It's like transparent paper. It's as thin as a cicada's wing in your hand and can dance with the wind.

Then the thin dough was covered with a variety of dried fruits layer by layer, such as walnuts from the Emirates, almonds from Stan, pine nuts from baki, and dozens of nuts from Central Asia.

Layer by layer, spread nuts, and then brush a little condensed milk and brown sugar. The thin dough is stacked one layer after another. When it is about a dozen layers, it begins to be cut into diamond pieces.

The milkshake wrapped on the dried fruit looks very attractive.

Then put it in the oven. I don't know whether they can't cast a pot or why. Anyway, a lot of their food is inseparable from baking.

Under high-temperature baking, the dough absorbs condensed milk oil and slowly becomes brittle. Under high temperature, the white wheat dough also turns yellow slightly.

After roasting, before the production is finished, take out the oven and pour it on the sugar syrup made of their special frozen honey, cream and olive oil at the first time. Just like pouring water into a crystal steamed stuffed bun, it can be regarded as pouring in.

When the thin and crisp dough meets the frozen liquid, it will cool down instantly. Jiaosu's Pastry broke, and the original round golden pastry burst instantly, just like a golden hedgehog! There is also an alternative artistic conception.

Zhang Fan took a piece and bit it gently. Obediently, the first is milk fragrance. The rich milk fragrance burst between his teeth, and the thin and golden skin burst slightly between his lips.

Then gently bite, the pastry collapses in the mouth, sweet! Extremely sweet, but not greasy, absolutely not as boring as cut cake.

The plant fat in nuts is mixed with wheat starch to produce a large amount of mixed flavor. It is like drinking a mouthful of milk. When the mellow smell of milk is still between the teeth, eat another mouthful of fried pine nuts, protein and oil, starch and oil, and various aromas mixed with starch, protein and oil.

yummy! Direct, sweet and fragrant without a little implication.

"Doctor Zhang, how does it taste?"

The chief smiled at Zhang Fan and translated for the first time.

"Especially delicious!"

"Just like it. Dr. Zhang can visit our country when he has time. At that time, he can taste a lot of delicious food with our national characteristics!"

The chief came here not only to pick up his son, but also specifically asked the people's Hospital of chasu city to train doctors in their country.

The government promised happily, but the details are waiting for the following people to talk in detail. Ouyang's eyes turn and turn. Zhang Fan knows that the old lady is estimated to have begun how to calculate the cost.

Zhang Fan thinks he can't eat delicious food. Once he eats delicious food and eats food that he still remembers or never forgets, there will be an emergency here in the hospital.

The food hasn't been digested yet. The border police directly called the tea vegetable government.

How can the border police say that people are actually from the army. The tea vegetable police system only cooperates with people, but has no direct jurisdiction over them.

The government is crazy. Half of the team of more than a dozen people have disappeared! It seems that not only Zhang fan can't eat the conference meal, but also the government can't eat it. Once he eats it,

something will happen!

Boss Cha Su personally called Zhang Fan.

When he first became an assistant to the president, the government sent a special phone call to Zhang Fan.

Without a trademark, it's heavy and has a long standby time. It can defend itself like a brick. There is also a telephone book. In the words of the government, the telephone book must not be lost.

The look in the officer's eyes at that time was also very obvious. Try it if you lose it!

Zhang Fan really didn't dare to try. He is an adult and is no longer a child.

When Zhang Fan first started, he wanted to find a safe to lock this thing.

The special phone almost never rang. If it weren't for the occasional flashing signal light, Zhang Fan thought that this thing had no external horn and was a defective product.

Results rang today, "a piece of the winter wheat, a piece of the sorghum, ten miles of the lotus pond, ten miles of the fruit fragrance."

The solemn and loud sound sounded like a bomb in Zhang Fan's quiet office.

The sound of the phone is as high as that of a fake mobile phone with four external speakers.

"I'm XXX. At the foot of the jogori mountain, some people encountered an avalanche and lost contact with a large number of people. The border police have gone to a camp. The local environment is very bad and the temperature is very low.

Now, I order the tea vegetable hospital to send elite soldiers and strong generals, with the leaders of the hospital as the responsible team leader, to rush to the place of departure as soon as possible to ensure the life safety of the masses and commanders and fighters as much as possible. "

"Yes! Let's go now. "

This is the first time that Zhang Fan has been ordered by the government.

For a moment, the hospital moved. The personnel of the emergency center of the Department of surgery quickly prepared the necessary equipment and first-aid drugs to be carried. The rescue aircraft donated by the emirate and maintained by the Chinese government have also been on standby on the roof of the emergency center.

It didn't take long for Ouyang to come to the hospital just as everyone was preparing.

"Don't panic. You're their brain now. If you panic, it's like the body is in disorder, and all the rescue will be greatly reduced." Ouyang saw that there was nothing to explain, so he grabbed Zhang Fan and whispered a few words.

"OK, European Academy, I know!"

"Go ahead and be safe. If you can't do anything, you must ensure everyone's safety!"

Ouyang looked at Zhang Fan and hesitated.

Zhang Fan nodded.

When he was about to get on the plane, Ouyang said, "let the high court go too!"

Although the old lady suppressed Lao Gao on weekdays, and the suppressed Lao Gao became Lao short, she was still relieved of Lao Gao at the critical moment.

In fact, the old lady wanted to go, but she finally held back. She knew that she would never grow up without experience. There are no shortcuts in this industry. He doesn't have many lives in his hand. He doesn't grow up.

Just like life, you can't grow up without a blow.

With the rescue plane, it is really fast and convenient, which also saves a lot of trouble for the traffic police of tea vegetable. Otherwise, in case of an emergency, the traffic in the whole city will be paralyzed for a long time.

The plane flew in the direction of North northwest. It was driven by soldiers. This is also a special case of catechin. The aircraft is owned by someone else's catechin hospital, the maintenance is paid by the government, and the staffing of flying the aircraft is the military.

Chapter 873

You say that the government is not greedy for money. It has built high-speed roads that have been in operation for decades, and has been charging with signs, and the prices follow the market.

Even if the loan is repaid, it is estimated that it will be paid off. Why not dissolve it? Are you afraid of a Li Chuang Wang from these toll collectors?

But you say that the government is greedy for money, such as all kinds of rescue and support. The government never talks about money. Even if he is in danger due to personal reasons, he will rescue first

and then talk about money.

The government also recognizes that in this regard, the government is better than banks and better than most countries. We must admit that we can't put down the bowl and scold our mother when we are full.

Not to mention the rescue helicopter, even 120, such as Lao Mei across the sea, even their middle class will make emergency calls only as a last resort.

Anyone who has a little ability to go to the hospital will never make an emergency call. It is said that the bill for one use of this thing can hurt a middle-class family.

On the Chinese side, when drunk, they beat 120, and even the couple quarreled. The wife scratched her husband's face and dared to beat 120.

Don't say Lao Mei, just say Xiao Tai, whose full name is Medicare. In fact, ordinary people in their country don't dare to call 120. It's too expensive!

Under the guidance of the border police, the helicopter landed a few kilometers away from the incident. The mountains are rugged. It's not easy to find a platform to land.

And let these ordinary doctors drag the rope from the air to the ground. It's probably choking. Doctors are not special forces, and the soldiers flying planes don't expect them to jump. If you really jump down, it's estimated that several of these people will have fractures.

As soon as they arrived at the scene and got off the plane, Zhang Fan realized that it was not easy. It's spring. Spring returns to the earth, but the wind on the mountain is like a knife, and the face hurts like an opening.

The commanders and fighters of the border public security didn't say much. A team of people directly came forward, lifted the equipment and ran up the mountain. People carry horses in order.

"Dr. Zhang, the situation is not optimistic. According to the rescued personnel, a total of 17 people have come, of which seven have lost contact. They were nearby at the time of the avalanche, and now two

hours have passed.

All our soldiers have entered the avalanche site and began to rescue people.

The others who were saved didn't matter much, but they were frightened. "

Sitting on the horse, Zhang Fan listened to the introduction of the battalion commander.

"Who the hell are they? What are you doing here? "

Zhang Fan, who was sitting on the horse, felt frozen in a few minutes. He seemed to be naked and sitting on the horse naked. A gust of wind blew through and his toes were almost unconscious.

When talking, open your mouth and pour the wind into it. The internal organs are cold. The intestines keep rumbling. It is estimated that the fat in the intestines is almost half solidified.

"Said to be a member of some Hiking Adventure Club. In our border defense, we have repeatedly warned not to enter the mountains this season and not to organize any exploration this season.

Unfortunately, some people still entered the mountains. This time it is estimated that... "

Looking at the obvious plateau red on the battalion commander's face and the dry and purple lips, Zhang Fan also sighed.

When horses come to the foot of the mountain, they can't ride. The mountain road is too rugged. It's no different from dying to let a group of ordinary people who ride on the flat road.

Dismount and climb the mountain.

It is estimated that few people will climb mountains at an altitude of three or four kilometers. At this height, to tell the truth, it's quite troublesome to walk on a level road. The doctors dare not walk faster.

Because of the panic, the heart is like a car in s gear. Seeing that the speed is over 4000, I still feel that there is not enough oxygen. My mouth is wide open and I breathe in. I still feel as if I want to suffocate, just like a fish on the shore.

Tired, step by step, it's like carrying a heavy load on your body. It's difficult to lift steps.

Zhang Fan and their younger ones were able to walk independently, and Lao Gao had to move forward with the help of the border police.

Looking at the young soldiers around, bright eyes, but the scars left by peeling on the face, really, it makes people feel an inexplicable pain. If it's cold, the light is still strong.

The ultraviolet light is so strong that it is just like the disinfection of the operating room under the ultraviolet light bulb. With sunglasses, tears keep flowing.

Finally, on the way, ten rescued explorers met Zhang Fan.

Some cry into tears. Strong men like cattle cry, and tears form ice skating on the stubble.

Some stared blankly, like dolls, moving forward under the drag of border soldiers.

What's more, she was shaking like a pendulum. She swayed step by step. Her trembling lips didn't know what she wanted to show.

The frontier people love to play. In the northwest provinces of China, the frontier people love to play is particularly prominent.

For example, when the QQ car first came out, the tea vegetable street was full of QQ cars. Young people, whether they had a house or a fixed job, just wanted to find a way to borrow money to buy a car.

What? Go to see apricot flowers in spring, virgin forest in summer, Lake in autumn and skiing in winter. Anyway, it's a word. How fun and how to play.

Moreover, there are many border nightclubs. When Zhang Fan first arrived at tea, he felt that on the edge of the streets of the whole city, it was either a meal or a hotel, or a hotel or a nightclub.

In the evening, the Han nationality has a nightclub, and a few ethnic minorities also have their places of entertainment.

When I play, I am dazzled most of the night at 4 a.m.

What's more, the most obvious thing is that the frontier side, in the collision of Chinese and Western cultures, will leave its essence in its dress. For example, before marriage, it is absolutely not possible in Central Asia. There is no such thing here. Seventy or eighty year old old man, seven or eight times a dozen times in his life is not a rare thing.

The eldest son has grandchildren, but the youngest child sucks his fingers with his bare ass. anyway, the pressure is not as great as that in the mainland.

There are also clubs, cross-country clubs for self driving tours, and heroes in Mombasa Nairobi. In fact, they are all left over from the frontier.

Looking at the explorers staggering down in front of them, Zhang Fan, no matter what they think, first of all, they have to give others a physical examination.

Almost all these people are in their twenties. There are men and women. They don't know what to think. It seems that they are how to stimulate and how to come.

"Come on, check vital signs!" Although one by one with all kinds of fear, but the consciousness is clear, the necessary examination still needs to be done.

"Xue Fei, take a nurse and check them on the spot. When you're done, hurry up to catch up with the big army. Comrade battalion commander, please arrange some soldiers to help. "

"Good!"

Xue Fei and the battalion commander of the border police nodded at the same time.

Xue Fei pouted as he examined.

Cold ah, the stethoscope and sphygmomanometer used to be like holding an ice pimple in your hand.

"Doctor, help them! Save them! " A girl who came slowly had tears on her face. The antifreeze oil on her face swirled down like an ice monkey.

"Worry about yourself first! Where's the discomfort? Is there any pain? If you're sprained and turned, say it quickly. "

Xue Fei's tone was not very polite. Although this guy usually laughs and laughs, he used to play mahjong. In fact, he doesn't think he was made of two Qian Hu.

Look at these young people. The clothes they wear and the ones they step on are not cheap.

Xue Fei met in Vientiane exchange. After buying this set, don't even think about it.

All rich households!

"I sprained my foot." One of the girls whispered.

Xue Fei probably checked it. In fact, it's nothing. These people still have some skills. Even women practice the tendons and flesh on their bodies. After touching them, they didn't break a bone. They hit a splint and asked two young soldiers to send them down the mountain.

Then Xue Fei and they continued to chase the big army.

Zhang Fan, they finally arrived at the place of the incident. Looking at the snow peak falling down like a mountain, Zhang Fan's surprised mouth couldn't close.

When Zhang Fan came to the frontier, he saw the scene after an avalanche for the first time. It was like

building an snow mountain overnight. People are no different from ants in front of this thing.

The soldiers kept struggling with the shovel and kept digging, and the police dogs in the green warm vest were constantly barking.

"What do we need to do now?" Zhang Fan asked.

"Frostbite is very serious. Many soldiers have frostbite. Can we deal with it urgently first? We don't have enough manpower, but we have to insist. "

"Good!"

In the tent set up by the soldiers, Zhang Fan and them began to treat.

Really, it's the poor soldiers.

When the soldiers entered one by one, Ren Li, who was cold and beautiful and had few words on weekdays, shed tears painfully.

"It's all right. It's not the coldest time yet. If it's the coldest time, it's estimated to be serious.

According to the rescued group, they are divided into two teams. The missing team is a little older, people in their 30s and early 40s. They are afraid of going up when they are young, and have great courage when they are old! "

The shivering little soldier, with white teeth exposed, awkwardly explained to the tearful female doctor without words.

"Does it hurt?"

Ren Li didn't seem to hear what the little soldier said. She gently stroked the young child's hands and asked softly.

"Hey, hey, it doesn't hurt. It's itchy. It's like a lot of ants lying on their hands. People can't help but want to scratch!"

Being gently touched by the female doctor, the little soldier wanted to take it back like a soldering iron on his hand, but he was afraid of hurting the female doctor. His black red face was like a fever, with a clear nose and a grin. His smile was more ugly than crying.

A row of doctors treated the soldiers. Frostbite is very serious. When shovel, it can also wear leather gloves.

When shovel dogs are barking, they can't use spades, and they must dig with their hands. Some anxious soldiers take off gloves, sweat is mixed with snow, and imperceptibly put their hands to frostbite.

Chapter 874

In fact, among the top hospitals in China, military hospitals are the worst in this regard.

In fact, other countries are almost the same. For example, the American army has a special scald and frostbite Research Institute. People can reach the level of lameo in terms of scald and frostbite treatment.

Ordinary people can encounter a fire in their life, or severe frostbite in their life, because the country is forced.

For example, in the Middle East War, civilians were actually the most severely burned, about 10%. In Hiroshima, Marubeni, 70% of civilians were burned that year.

Everyone seems to think that burns should be more serious than frostbite. In fact, fire and water are ruthless. Neither of these two things is easy to provoke.

Scald is difficult to treat, so is frostbite.

Moreover, many people have a misunderstanding that people are frostbitten and frozen stiff. Without saying a word, they take off their clothes and wipe them with snow, as if they can save people alive immediately. In fact, this is all bullshit.

People are really frozen. If they do this, those who save people and those who are saved may have a grudge. One wants the other to die quickly.

There are two types of frostbite.

One is non freezing cold injury, the other is freezing cold injury.

Non freezing cold injury, northerners can be proud to say that we have never met this thing, but many southerners have a deep experience.

Northerners have dry weather and heating. This kind of frostbite is very rare. Southerners without heating rely on shaking in winter. Because the air humidity is high and the temperature is low, frostbite

and even liquid exudation appear at the ends and exposed parts of many limbs, such as auricles, nose, face, hands and toes.

This kind of red chilblain is easy to treat, but it is also easy to relapse.

It's like mayonnaise on the skin. The blisters are connected with the blisters. After the blisters break, the clear water seems to be flooded. The frostbitten place is as hot as eating the super spicy anal (a) door. It itches. I want to lick it with my teeth and tongue.

This is because the temperature drops and blood vessels contract, resulting in local rupture of skin and tissue cells.

In this kind of frostbite, this is not serious, the most serious is trench foot. It is no exaggeration that this disease will directly lead to thrombosis, followed by necrosis and severe amputation.

Another more serious type of frostbite is freezing cold injury. The process of human body resisting severe cold is probably like this.

When the temperature drops, the body will reduce heat dissipation and improve heat production, just like in winter, the cold skin is cold, but the heart always feels burning. In fact, this is the body improving heat production.

When the body can't dry the external temperature and freezes, the temperature doesn't need to be too low, it's just the temperature — At 5 °, the cell liquid will slowly freeze, and then it will break like a glass bottle filled with water in winter, and people will hang up at this time.

Therefore, every winter, when the frontier just enters winter, the number of drunk people who freeze to death is the most, because at this time, it's just cold, they feel all right, and as a result, they become popsicles overnight. However, the ice in the external environment doesn't form much, but people freeze into popsicles.

For serious treatment of frostbite, it's right to take off your clothes first, and it's nonsense to put snow on people and rub it on their skin to make their skin red.

You should take off your cool clothes, put on a blanket and wrap it, and then get out of the cold environment for the first time and give hot drinks. Chinese hot water is omnipotent. This thing is right.

Old hair is usually filled with high alcohol. How can this thing be said? It can save an emergency and kill a person.

Because alcohol volatilizes, it can continue to take away a large amount of heat source, resulting in secondary heat dissipation.

Rapid and correct rewarming is the most effective method. Fill your mouth with hot water and let the body soak in 40 ° flowing constant temperature hot water. You have to input heated glucose solution into the vein, and insert a thermometer into the anal (a) door to monitor your body temperature at all times. At this time, the body surface temperature does not count.

This is a formal and effective rescue method.

As for what fire roast snow rub ice compress is not good, remember, this is not roast mutton, even if it is roast mutton, the frozen mutton skin is roasted into charcoal, but in fact it is still ice pimples.

Snow rubbing and ice compress are deceptive. Freezing cold injury will only accelerate the rate of death.

The soldiers, because of exercise, quickly dig snow, resulting in sweat on their bodies. As a result, they take off their gloves, resulting in blood stasis, which is non freezing frostbite.

After entering the tent, the temperature was a little higher, and the expressions on the faces of the young dolls were particularly

How to say that, one by one, he is timid, his hands are hanging in the air, his fingers are separated, and his face is like drinking a mouthful of old vinegar. It is sour and astringent. In fact, after the skin warms up, the potassium ions in the broken cells enter the peripheral tissue fluid.

Tingling, itchy, red and swollen fingers, like ten carrots inserted in black steamed bread, the liquid kept overflowing.

"They can't go outside anymore!" Ren Li said coldly to Zhang Fan and the battalion commander. Secretary Ren was angry.

"What is this injury? Look at me, don't you still want to go! There are not enough hands. One more person, one more strength! " As soon as the battalion commander opened his mouth, he stretched out ten hands that were really like carrots dipped in sauce and said carelessly.

"Do you want them to stop! Don't you want a hand yourself? "

Ren Li said loudly. Her tone was severe and her eyes were sharp. Really, she had a bit of Ouyang's style.

"But there are not enough people. There are lives under the snow. Don't you have more hope if you have more people! I also love it. I also love my soldiers. I can't help it. I can't get on the large machinery.

I can't help watching... "

Suddenly, the battalion commander looked at the children around him with a naive face. His voice was so low that it was like a child who made a mistake to admit his mistake to the teacher.

"I disagree, Zhang Fan. They are also patients now." Ren Li didn't give in and stared at Zhang Fan.

"Those with severe frostbite must be treated. Simple bandage is not enough. How old are they? They can't bring pain to their later life."

Zhang Fan agrees with Ren Li.

The battalion commander has to talk.

"It's been several hours. Even if you can't freeze, you'll suffocate from hypoxia! Now they are also patients!" Ren Li said loudly.

To tell the truth, no one dared to say this, but Ren Li said it.

Lao Gao patted Ren Li on the shoulder and said to the battalion commander, "ask for help. You can't do it recklessly."

"Please, I'll ask for help with you. You and I will bear the responsibility together." Zhang Fan nodded.

The grinning battalion commander nodded his head, while the soldiers on one side secretly twisted their heads and wiped the tissue liquid on their faces, which may be tears or frostbite.

They are also a living person, not steel.

At the foot of the mountain, the rescued people slowly came to life, began to chat and talk, and their eyes became flexible.

"Little soldier, where are you taking us?" One of them is fair skinned. Although he is wearing a bloated assault suit, his bodybuilding still makes people feel that he has made great efforts in his body.

"Take you to our camp and wait for the superior's arrangement!" The little soldier whispered.

The order given to him by his superiors was to take these people to the camp.

"Isn't there a helicopter? What are you doing back to the camp? Just take us back by helicopter. Don't take off your pants..." "I guess I feel saved by others, so I didn't say that."

In fact, it can be judged at a glance from his posture, clothes and eyes. The young man is a little open.

I don't know anything, I can't do anything, but even if my family has money, there's no way.

The soldier didn't speak!

"Hi! No plane, what! When I get home, I'll buy one myself! "

There are rich people everywhere and people who don't understand the world.

"Stop talking. Lao Yang on the mountain don't know what's going on. Don't say a few words." One of them whispered persuasion.

"They deserve it. I said to look back. I didn't listen. How did I get into this club? I was lame! The dog skin is professional and almost lost his life. "

At this time, he was alive. When he was playing, he didn't say this and went down the mountain. At this time, he was alive.

In his eyes, it is estimated that there is no money in this world. It is also that the pendulum has not played enough!

There is nothing wrong with one or two, but there are many such people. In the camp, the camp instructors who stay at home have black and red faces. At this time, they are almost at the bottom of the black pot.

There are those who dislike canned food, those who want to take a hot bath, and those who want to take them down the mountain and go home at the first time.

A battalion has been pulled up. The camp has tasks to patrol. Where can we assign people.

"Go, call the government and let the government pick it up. I can't serve." The instructor is getting angry.

In the city, the government has also made a mess. It's said that the heavy snow has crushed several children. They are holding the thighs of government officials, crying and sniveling children's mothers, children's fathers who call around to ask for relations, and people who are ready to take people to search the mountain by themselves.

When the call for help came from the mountain, even those with great energy called the Red Cross and the newspaper to put pressure properly.

Some relief organizations have also come, including blue sky and Tzu Chi.

But it was not only on the plateau, but also on the border. They are really powerless.

Around China, to tell you the truth, in the past, although other countries had a small population and small places, there was no one to deal with.

It's only in recent years that I've been honest.

But there is also a third brother who makes trouble on the border from time to time and sends some people from time to time.

In the past, it was estimated that the slap did not hurt the old three. Now they not only have a good relationship with Lao Mei, but also have a close relationship with Lao maozi, just like their wedding every day. The relationship on this boundary is very complex.

In particular, the pass leading to the frontier from the Tibetan border of China is really staring at it all the time. Ordinary Chinese rescue troops simply don't carry guns and ammunition and can't use it.

Here, the real gun is single. Sometimes, you talk well, no matter what you use!

The government is like a nanny. There are as many children as there are families. It's a child, but it's twenty years old. It's also a child.

The government is busy appeasing and urging on the phone.

Really, the police and the army are really hard to do, especially in the border areas. Asking for kindness and iron blood at the same time is almost neuropathy.

In the tent on the top of the mountain, Zhang Fan disinfected the soldiers and then coated them with thick antifreeze oil, just as their hands were wrapped with old-fashioned solid engine oil.

At this time, "come on, dig out one, come on, dig out one!"

Shout loudly, people shout and dogs bark. Search and rescue dogs are very smart. If they really rely on people and snow like mountains, it is a problem to dig in which direction.

Chapter 875

Old people often say that many kinds of flowers and few kinds of thorns. At ordinary times, we don't seem to feel the meaning and truth of this kind of words.

When Zhang Fan and their explorers dug frozen roe deer on the snow mountain, an invitation from the United Arab Emirates was sent to the Chinese tea vegetable municipal government through the embassy.

The government is quite surprised. Although there are many religious believers and folk exchanges are quite frequent, there is not much warmth between the governments.

After carefully asking the Chinese Embassy in Afghanistan, we knew the whole story.

It turns out that an old queen of Saudi Arabia has a high status. It is said that she has a lot of children, and her mother's family is also very powerful. I don't know whether it's because I have more children or because I'm old. I slowly began to have incontinence.

If people's consciousness is vague, incontinence is the same. They can't feel it anyway.

But if you have clear consciousness, normal diet and free movement, resulting in incontinence, it's too embarrassing and can even be called torture.

For example, a group of wealthy wives with egg sized gemstones competed for beauty. As a result, the incontinent lady felt wrong as soon as she took a bite. She immediately lifted her robe and ran towards the bathroom. She saw that she ran. At the moment of opening the door, she puffed in her white gauze skirt and a pool of golden yellow came out along her legs.

Really, at this moment, she has a dead heart. All the local experts saw it and found it was a tumor. Surgery was recommended for intestinal tumors. The queen was not at ease with her own doctors and wanted to be treated by doctors from other countries with high medical level.

Because she is a woman, although she is a queen, it is not convenient to go abroad for medical treatment. But people don't need money. Brother Qian came forward. European, American and even old maozi were invited.

There was nothing wrong with China. To be honest, China was in the Middle East. In 2010, its tentacles could not reach in. Moreover, in terms of medical treatment, it is not a rival to developed countries.

There's nothing wrong with China, but the tea vegetable side is lucky.

It turns out that China has a good relationship with Laos and Pakistan. Although it has a general

relationship with Saudi Arabia, Saudi Arabia and Laos are also very good.

In fact, the blue earth is like a palace fight. Everyone is intriguing.

Saudi Arabia has money, but there is a wave next door. Although people don't have as much money as Saudi Arabia, they can fight. Fortunately, Saudi Arabia has more money and more younger brothers.

Every wave has eggs, and Lao Ba also has eggs. Moreover, Saudi Arabia and Lao Ba are the same in faith. Therefore, Saudi Arabia and Lao Ba are very close.

Lao BA's relationship with Yilang is not good, and the relationship between China and Yilang is good. Therefore, the relationship between Lao Ba and Yilang is constantly cut and disordered.

At the beginning of the Lao Ba earthquake, Zhang Fan was the first to enter the disaster area and establish a medical base in the disaster area. Lao BA was grateful. Unfortunately, he had no money and had difficulties at the beginning, so Zhang Fan brought a big red flower to them when they came back.

I thought it would be gone. As a result, Lao Ba knew about Saudi Arabia. Lao Ba patted his chest and praised the Chinese doctors as a flower. He even called the doctors who had entered the disaster area a miracle doctor.

Saudi people have a lot of money. Although they don't believe what Lao Ba said, this little brother has strength, so he still needs to give face. Then, through Lao BA's introduction, in order to reassure his eldest brother Lao Mei.

Saudi Arabia sends the invitation letter to tea vegetarians through the United Arab Emirates!

People really don't take Chinese doctors seriously, but after all, they should be polite between countries. They should appoint a doctor, a designated time and a designated place. If they are willing to help, they will send a plane to pick them up!

As for whether to let the operation or not, say again!

On the Chinese side, not only the small government but also the big government are happy. Sleepy really bumped into a pillow. China tried to touch someone else's body, but Saudi Arabia was afraid that his boss was unhappy. He was always secretive and unwilling to open his mind. This is also an opportunity to communicate with each other and explore the depth and length of each other.

Capital, "why do they appoint a doctor of tea element, and also name and surname."

The big men of the foreign ministry gathered.

"It is said that it was recommended by Pakistan!" The staff responsible for this matter introduced it in detail.

"Oh, I see. Dr. Zhang Fan, who graduated from which school, what degree, and how about surgical skills. Is it necessary for us to ask the golden mean or digital hospital to send some doctors to help. "

In fact, the leaders of the Ministry of foreign affairs are quite euphemistic.

Do you think a small city beyond the great wall can represent the medical level of China? Although I'm asking the doctor's level verbally, I actually mean to go to several experts and pretend to be a doctor of tea.

"This time, the other party invited Chinese doctors through a third party. Why don't we think about it again?" Another big man in diplomacy thought about it and said softly.

"Yes, or let the golden mean send someone?"

The big guys are going to make a decision.

At this time, the officer in charge of this matter raised his hand and said, "leader, as far as we know, Dr. Zhang Fan is really not simple."

"Huh? It's not easy. " The leader wrinkled his forehead, and people's time was arranged by minute.

"Zhang Fan, graduated from China..." the officer opened his notes and had to report.

"Get to the point!" The result was interrupted.

"Zhang Fan is a closed disciple of Lu Lao, an academician of the Chinese Academy of engineering, and often goes to Wu Lao's Fangdong hospital to fly a knife!" When the officer finished, he saw that the leader seemed willing to listen, and quickly said, "last time there was a dispute in the South Sea, my navy soldiers were seriously injured and their lives were at stake.

At that time, old Wu was unable to go to sea because of his age. Old Wu recommended Dr. Zhang Fan to the Navy headquarters for the first time.

Dr. Zhang Fan lived up to the expectations of old Wu, and our navy soldiers were treated. This was on the internal (a) reference! "

"Oh! What else? It seems that you are very optimistic about this Doctor Zhang Fan! "

As soon as he said this, the officer stopped talking and began to take notes with his head down.

"What do you mean?" The boss turned and asked another boss.

"This medical action seems simple, but it is actually an opportunity for our country. The Queen's tribal

power is very strong. We still have to be careful. "

"Yes! In this way, call Mr. Wu and let him decide who to travel. We can make reference. After all, Mr. Wu is always the authority of the outside world in China. Even if we break our head, there is no other professional. "

"OK, that's the best way."

"Form the meeting report as soon as possible!"

"Yes!"

Zhang Fan's name also began to appear slowly in front of national leaders. When asked about Mr. Wu in terms of diplomacy, Mr. Wu said directly, "Zhang fan can be competent. If we are careful, we can send some authoritative experts to assist. Of course, it is mainly Zhang Fan. After all, people have named their names."

Then, there was a quota for Saudi Arabia, and experts from the north and the South scrambled to kill each other.

Many people think that doctors have a wide range of contacts and speak widely, but they are not wide at all.

Doctors are actually quite cautious in communicating with patients in diagnosis and treatment activities. To be selfish, if the relationship with the patient develops very close, the doctor is ready to receive telephone consultation from the other party all the time.

Everyone has their own life, but illness doesn't divide time, so

This is for ordinary patients and people with higher positions. Ordinary doctors want to curry favor, but others don't look at it.

Therefore, only directors and medical experts with high reputation have the so-called contacts, ordinary doctors, that's all.

In big cities, there are many experts. After all, there are not many who can fly swords abroad. If there is the first time, the second and third times will be smooth. Therefore, one by one, like a carp jumping over a dragon's gate, the eight immortals cross the sea, and the great sage shows his magic power.

In the invitation letter from Saudi Arabia, Zhang Fan was the first and Ren Li was the second. A total of eight places were given.

My God, the six places under my body have made people feel hot and have committed red eye disease.

"Zhang Fan is not even a doctor. His master's major shows that he is reading. How can he represent China's medical level?"

"They asked Zhang Fan to go by name."

"I'll go. Did you drink too much oil? Then I must be one of the places here! "

Zhang Fan, they don't know that the Chinese medical circle is boiling. They are still digging holes in the mountains to drink wind.

It's scary and frightening. That's right.

In the early years, there was a saying that people were locked in the freezer and told him that the temperature was 20 degrees below zero. In fact, the cold storage was at room temperature. As a result, the people who were locked in were almost frozen in less than ten minutes.

The psychological effect is sometimes particularly obvious.

The explorers were divided in two ways. Turn back all the way and continue the other way.

It was not long before I went back. What I want to continue is to rest in the tent, reserve energy, and then conquer the snow-white mountains.

The mountain peak was not conquered and Xuebai didn't touch it. Instead, Xuebai pressed it under his ass.

Fortunately, their tent is on the edge of the avalanche. If they go inside again, they can't dig it out. It can only become an ornament of the snow mountain.

When they were the first to dig it out, Zhang Fan and his team rushed over. In just a few tens of meters, their lungs were going to explode. On the plateau, it was too difficult to have vigorous activities!

Gasping for breath, his hands trembled and touched him, "it's useless. It's hopeless."

One was dug up, and then the tent was connected. One by one, it was like pulling carrots. All seven people in it were dug out.

Seven are dead, five are dead, and only two are alive.

"Come on, this woman is still alive. Come on, come on!"

As long as there is help, no matter what the reason, it is Chinese, and we should go all out to treat it.

On the plateau, oxygen is thin. To be honest, the most inconvenient thing for soldiers is to drink water.

When the alcohol stove was lit, the water was boiling, but the temperature of the water couldn't even boil the eggs.

If soldiers on the plateau eat Ramen for the new year, they usually eat finished food, such as canned food.

Because the water temperature can't rise, it's inconvenient to eat noodles. Compared with the following ramen, you must use a pressure cooker, otherwise the noodles are not cooked.

In the base, no matter what kind of ramen you like to eat, the people's cooking class will lower capillaries and noodles that are not much thicker than your hair. If you force others to lower two thin, obedient, it is estimated that the pot is like a steel wire, and the noodles can stand up for you in the bowl.

A man and a woman still have a breath of life. In the tent, all doctors and nurses start. What are you doing? An open vein channel, a twisted garment.

Outside the tent, the soldiers also started to use diesel and alcohol to make a fire and boil water.

The strong black smoke from diesel fuel made ah San nervous at the foot of the mountain. "Can their tanks go up the mountain?"

Chapter 876

Ordinary clothes are no different from paper under the sharp weapon in the operating room. They can be taken off in a few clicks.

But this kind of professional submachine suit can't work. It's like a car tire. I don't know whether it's added with steel wire. It's very troublesome to twist. Moreover, because it's frozen, the clothes are like an iron sheet.

Small scalpels and scissors don't work at all. Seeing people die, the clothes can't be taken off at the critical moment, and the doctors and nurses are going crazy.

"Go!" When the battalion commander saw it, he waved his hand and the young and strong soldiers went up.

The army stabbed a pull, click, click, several times poked a hole in the clothes.

"Be careful, be careful. Now they have been frozen into popsicles. If you don't pay attention, they can break into several sections from the middle!" Zhang Fan specifically explained.

Without the breath of life, it has long become a popsicle. His face was very restless. You can think of the situation at that time.

Under the snow, oxygen is already thin. Fear, suffocation and cold. The more fear, the more severe the struggle, and the more severe the struggle, the more oxygen consumption.

Their faces are like frozen in an instant, their eyes are very round, their wrinkles, open mouth and protruding tongue are like lifelike wax statues, and even the taste buds on their tongue can be seen clearly.

When the avalanche came, one of them was knocked unconscious by a small oxygen cylinder flying from the tent before he reacted. Then, like hibernation, they directly became quick-frozen dumplings with less consumption and the filling was not frozen through.

Really, the luck was great. When it was almost frozen through, it was dug like a radish and let the soldiers dig it out.

The other woman is actually not a mountaineer.

What people admire is the travel of walking and the love of love. Carry a bag, dare to go into Tibet alone, carry a travel bag, and go to northern Europe to see the aurora.

Money is not money, maybe it is not important. People just pursue freedom.

Free and easy for a long time, like a man, love to the bone.

She thinks of herself as Sanmao, but people don't want to be a bearded Hexi. She finally made up her mind to live a good life. As a result, people regarded her as a youth brigade.

She felt hurt, so she followed the team up the mountain. When the avalanche came, the Wenqing girl, somehow, suddenly entered a state of self sadness.

"I would like to turn into an eternal sculpture in this cold world. I just hope you can fall on my shoulder when you are tired!"

Frankly, perhaps, she has a desire to die. Slowly, due to lack of oxygen, she was in a coma, and she calmly entered a coma.

Seven people, just two.

No one survived. It's so terrible.

Click, click, like a young man eating a popsicle, the clothes on the two men were finally taken off.

At this time, the soldiers, like serving food, carried buckets, pots, buckets of hot water, pots and pans of hot water, and poured hot water into the buckets tied with waterproof cloth.

Limited by the conditions, the two were put in a bucket, which was filled with heat like practicing kung fu.

"The heart rate began to rise slowly. As long as their temperature can rise now, it will be saved. "

Zhang Fan and they stared at the monitor in front of them.

"Look at the temperature!"

"Good!"

The little nurse lifted up her sleeves and put her hand in! The anorectal thermometer was taken out.

"No! Still can't. the water temperature must be 40 degrees. The water temperature is too low. "

Zhang Fan frowned. There was no way. The conditions were limited. When the boiling hot water left the fire source, it could go down several degrees in an instant, and then pour it into the bucket. Before long, the water temperature fell below 40 degrees.

"What can we do?" The cold snot, Hara's battalion commander asked nervously.

"There is no better way to speed up the circulation of hot water."

"OK!" The battalion commander turned around and left.

The soldiers were divided into three teams. One team served hot water as food, and the other team looked after the fire source. The other team went down the mountain into the camp and began to move all the oil in the camp towards the mountain.

Really, let's not talk about the material cost of sending out rescue, but the number of times these soldiers go up and down. If they are placed in the scenic spot, it is estimated that the richest man in a small city can't stand it.

Buckets of hot water, pots of hot water, soldiers' sweat and exhaled heat are hung on the side of hats and eyebrows and eyelashes, just like rime in winter.

Looking at the hot water in their hands, really, they also want to soak happily, wash comfortably and soak comfortably.

"Continue to monitor body temperature!"

A lot of thermometers have been put in this time. When it's frozen, it's too difficult to put it in for the first time.

The anus and intestines are all brittle. You should insert the thermometer, but you can't damage the skin, because it's too brittle. If you're not careful, the anus and intestines frozen like frozen tofu skin are a hole.

In case of intestines, be careful that the thermometer is broken. It's too difficult. The little nurse can't put it in. Zhang Fan's hand is painted with paraffin oil. Zhang Fan is like taking out the baby's ears, bit by bit, facing the anorectal mouth, it will freeze. Otherwise, it's too sour.

Slowly, slowly, the people in the bucket changed from green to ruddy. Slowly, finally, the ruddy became purplish red. Like the colored marinated meat, their skin finally became cherry red.

"It hurts! they hurt! It hurts! "

Female patients are first conscious, close their eyes and shout pain!

"Where it hurts, where it hurts!" The little nurse shouted in her ear.

"Legs, legs, legs!"

Then, the male patient also slowly realized, "where is uncomfortable, where are you uncomfortable."

"Where am I?"

There was no time to answer. Zhang Fan kept clamping the male like a bird's beak with surgical pliers.

"Does it hurt? Do you feel it? Talk! Come on. "

On both feet, no feeling!

No feeling on both legs!

In the thigh, the upper edge of the thigh began to have pain caused by clamping.

"What's the temperature!"

"The anal temperature has exceeded 34 degrees!" The nurse quickly took out the thermometer and held it flat before her eyes.

Zhang Fan frowned.

It's true that there are tigers before and wolves after. Now the temperature rises slowly, but they still can't live without this hot bucket, but frostbite has led to necrosis of their lower limbs. Surgery must be done as soon as possible, or Kwai will not be able to keep it.

On the mountain, only emergency rescue can be carried out. If you want to have an operation, there is no door. Even a hot water is very difficult. If you want to have an operation, you really despise the altitude of others.

"What should I do?"

Zhang Fan's brain turned desperately, "are there any urgent measures?"

He thought and thought and thought, but he couldn't find a way to get the best of both worlds.

Looking at the two men in the bucket who are in their prime of life, Zhang Fan is unwilling.

"Is there something wrong?" Looking at Zhang Fan and their medical staff, the battalion commander asked softly.

Their legs developed thrombus due to frostbite, leading to ischemic necrosis and had to be operated on.

"It's all right. We can carry them down."

"But they can't leave the hot bucket or the heated glucose!"

"Well!" Redness and swelling is like a carrot's hand touching his forehead, "what will happen if you leave the bucket."

"The temperature will drop and it is estimated that he will die."

"Where not mountain surgery, is it just a leg problem!"

"Yes!"

"Then let them soak in a bar. They have earned money to live under the avalanche. There are still five lying outside!"

Free and easy, open-minded!

Really free and easy, open-minded!

It is estimated that this is the crude madness of Chinese plateau soldiers.

This is also the doctor's helplessness!

Three hours later, the sun's eyes were useless, and the two surviving explorers were saved.

But along the way, their groans tortured the medical staff and accompanying soldiers like ants.

"It hurts! Ouch, it hurts! Doctor, please, show me, it hurts! "

The pain after frostbite, the burning sensation after frostbite, and the itching numbness that can make them itch into their bones.

Really, this kind of compound feeling is like a knife cutting meat, a soldering iron scalding the skin, and a current passing through the whole body. It's really painful like cramping and peeling.

Crying is not like crying, and laughing is not like laughing. The two people tied to the stretcher are like cattle. For a moment, they moo like from their soul, and for a moment, they cry out in pain! For a while, he was choking and out of breath.

I guess I've never been so painful in my life.

Only at this time can they understand that the ordinary life within their reach is so precious and missed by them. How much perseverance, how much hope to stimulate.

Now how much regret.

Plain light is true! It's true.

The helicopter took off and returned with medical staff and two seriously injured explorers.

"Why can they both fly, but we can't? It's not fair. I'm going to complain to you. "

The soldiers looked at the trouble seeker like fools.

At about the same age, why is it so different.

It seems that we can't give up treatment! This disease, slap this medicine is still insufficient!

The rescue plane suddenly landed on the first-aid platform of tea element. The crowd on the ground surged and the cry was loud.

If they survive, parents are anxious to see if their children are injured, whether they have sound limbs and complete facial features.

The parents of the dead children cried, "Why are other people good, just my children dead, all go together, why are they good! Why? "

If they're all dead, there's probably no such thing.

On the plateau, groups of soldiers, holding their hands, frozen red and swollen hands, can't even take chopsticks, and don't know whether their mother and father will feel bad.

.....

Get off the plane, "come on, get into the operating room!"

Zhang fan can't care about the crying people. The two lying on the plane are suffering from shock.

Ouyang was outside the operating room, like a little donkey with an eye mask around a millstone, turning and turning, turning and turning.

Chen Sheng, the director of the medical department on one side, was dizzy for the old lady.

Ouyang said in his heart for a while, "why let us go out? We worked hard."

After a while, he said, "let's go out a few more! They are all big men in the industry. They can also be regarded as making friends! "

The old lady hesitated. The pressure was too great. The tea vegetable government couldn't decide.

It's not for technology, it's for money. Who wants to know whether China's medical reform road is good or not.

For example, those who open clinics can hardly get into the third class hospital.

Those who have the ability are all crowded on the same road for intrigue!

Therefore, the quota this time is like water in a hot oil pot. Puwai, it's almost fighting.

Chapter 877

The medical industry, how to say, is actually similar to writing articles. They all feel that their own writing is full of flowers and other people's shit.

You can scold me for being ugly, or you can say I'm black hearted, but if you say I'm poor in surgery, it's estimated that I'll never stop hating.

In general, only those in the industry can understand and know who is doing well. Although evidence-based medicine in China is not very reliable, we are not blind.

For example, in meatball country, the five-year follow-up of intestinal cancer is called a cow. Whether the surgeon does well or not depends on who has a bright voice and who has great power. Come on, let's talk about the data.

In the early years of Chinese medicine, they studied laomaozi, and later Laomei and marukuo. In fact, most of them studied marukuo.

I don't know why. I haven't learned a bit.

Doctors in Marubeni can only open private clinics if they have the ability. It can be said that other experts have a wide road and can't have a career. If they can't do well in research, they can open clinics to make money.

In China, on the contrary, most private hospitals are of average level, but the treatment of colds is the most powerful. When dexamethasone is injected, God doesn't know what symptoms are gone, which makes people think it's a miracle doctor.

The path of Chinese experts is relatively narrow. In the end, almost all of them are intriguing in their official career. This thing can't be argued, otherwise they have no right to speak.

For example, the capital circle, the magic circle and the later developed largest village level city in China despise one.

When the road is narrow, the competition is fierce. Okay, look at the results!

On the operating table here, Zhang Fan opened the skin of his lower limbs. The blood vessels were like an oil pen core that had not been used for several years. It was full of emboli.

The man's two legs were hopeless and had to be amputated as soon as possible. A woman's one leg and one arm are hopeless. She should also have an amputation as soon as possible.

The price is too high and the price is too tragic.

Destruction is always easier than construction.

The family also died and signed the operation signature.

Amputation, in fact, is not a major operation.

Once an electric saw is put on, just like a wood furniture factory, bones are not worth mentioning in front of steel.

Many people will say that the bones are good and the muscles are good, so we can't save them again?

To tell the truth, if the bone is broken, the doctor can't fix it internally, but can fix it externally. If it can't fix it externally, there will always be a way to graft it.

The muscle is broken. It's a big deal to cut it. In the future, it's only a pit at most. After the patient can drink two liang, he bragged in front of his friends, "see, this is the mark of Laozi's bloody street in those years! At that time, which machete was called a sharp..... "in fact, only he knew what was going on.

But once the skin of the body is damaged and cannot be transplanted, it can be said that how much skin is damaged, how many bodies must be cut off.

For many injuries, such as scalds and crush injuries, the doctors worked hard to protect not the inner muscles and nerves, but the outer skin.

If this layer of skin is gone, there is nothing in it. I can't keep it.

And if there is a problem with blood vessels, it is also very serious.

Nerve damage is amazing. In the future, this place will shrink. For example, some people have a stroke. Slowly, one side of their face seems to have been given a weight loss needle. There is less and less meat, which has become an awl face.

In fact, this is used for advance, waste and return.

But if blood vessels are damaged in a large area and cannot be transplanted, how many blood vessels are broken, how many bodies must be cut off.

Because this thing, without blood vessels, there will be no oxygen nutrition. Without oxygen, cell tissue will die. Over time, it will become rotten meat, and then endless infections will rush forward.

So when the skin should be protected, it must be protected! The ultraviolet light is strong. It's time to apply sunscreen. Apply a little.

When you want to pay attention to blood vessels, you must pay attention. When you can eat less sugar, don't eat with your mouth closed. You can't die of greed.

Amputation is simple, like a willow with skin. Where the skin is bad, the bones should be cut off a little more, otherwise the skin can't wrap the bones and tissues. This thing is not like chopping meat. It cuts off the belt and bones.

Just like the clothes in the early days of China, the cuffs should be longer, otherwise the family will be poor.

The part of the skin that grew out was originally cylindrical, but turned into two pieces of skin.

At this time, it is necessary to sew, just like pinching dumpling skin. The distance between stitches must be the same.

Otherwise, the stitched muscles will bulge out and throw out, just as the meat stuffing of dumplings is exposed.

The dumplings show the meat filling. It's nothing.

But if a little meat is exposed at the amputation place, it will be a big trouble in the future.

First, the infection is controlled. After the scar tissue is covered, this place is like a switch.

If you touch it gently, it will hurt. If you rub your clothes, it will also hurt.

Therefore, Zhang Fan is holding a curette, Xu Xian is holding scissors, and Lao Gao is holding a brush.

Pig's trotters are as like as two peas and they can't see a little bit of residual meat and blood vessels and nerves.

After cleaning up the wound, we must pay attention to a round and round suture without edges and corners.

Just like the furniture in kindergarten, the edges and corners should be sewn into ellipses.

The suture effect is the best. After the scar on the stump is healed, it must be round like the head of a turtle. Otherwise, it will hurt like a barb. Rubbing will hurt. It is also an obstacle to the installation of prosthetic limbs in the future.

Although it's not a major operation, it's quite time-consuming.

The hungry doctors had to fill their stomachs with glucose solution to slow down.

After the operation, looking at the parents who were crying and fainting with empty trouser legs, everyone felt bad. The original contempt was also diluted by the sadness of their family.

"Ouyuan, what's the matter?" Zhang Fan dragged his lead filled leg out of the operating room.

Too tired, this day is too full.

"Hey, I don't know what to say! Go to the office first. Dean Gao, you too. "

After entering the office, Ouyang said so. Zhang Fan looked at Lao Gao. "What's the government's opinion?"

"No problem, follow the superior's arrangement!"

"Hehe, we all know it's a piece of fat!" Lao Gao smiled.

"Is the other party sure we need surgery?" Zhang Fan's focus is different.

"Didn't say, that is, if you are willing to go, give feedback to others."

"The European Court, my opinion is that we must ensure that there must be five places, including me and Secretary Ren. When we went to the rescue, we didn't complain or shrink back for fear of an accident.

Therefore, those who should go must let others go. I'll leave one of the remaining three places for my foreign-related master brother to participate. As for the last two places, we don't worry about who we love. "

When I first went to the rescue, the director and deputy director of general surgery also went to Saudi Arabia. This time, I didn't say whether to have surgery or not. As long as I had surgery, Zhang Fan was the main knife. There was no problem for the two directors to be assistants. I arranged the master brother just in case.

As for pulling your master or martial uncle, it's probably impossible. And there's no need.

"OK, I think so too. Since you agree, I'll report the list. Don't attach your signature. Dean Gao and I can write our names on it.

What do you say, high court! "

Lao Gao was silly. It turned out that the woman was waiting for him here. She thought that the old lady had relaxed her hands pinching his neck. As a result, people didn't think so at all.

"I....." Zhang Fan looked and hurried to speak.

"Cough! Cough! I am also the president of the hospital! " As soon as the triangular eye stared, Zhang Fan had no choice.

Lao Gao nodded helplessly.

"Protecting young people is what our old friends should do, right, the high court."

"Yes!" His teeth are broken. Isn't Lao Gao willing to protect Zhang Fan and them? To tell you the truth, Lao Gao is absolutely willing to.

But the feeling of being forced is really like being X by a dog. It's not good! What a bully!

Ouyang has figured out everything! Annoying, come on, my old lady is waiting here, but I can't make Lao Gao comfortable. Recently, Zhang Fan released Lao Gao, which made Ouyang uncomfortable.

Although the mouth does not say, but seize the opportunity, a hammer still has to knock.

It is estimated that this is the so-called politics.

"Director, it is..." out of Ouyang's office, Zhang Fan said to Lao Gao embarrassed.

"Hey, nothing. Don't mind. After fighting for half my life, if there is a sudden change, I still feel uncomfortable.

When you go out this time, don't have too much pressure. It's yours. It's yours. It's not your demand, but it's unsatisfactory. "

Lao Gao clapped Zhang Fan on the shoulder with a faint sense of interest.

Zhang Fan doesn't care about the two of them. To tell the truth, Lao Gao and Zhang Fan bring another Ren Li, which is not enough to give Ouyang shoes.

Dragging the steps that are estimated to be a little edema, Zhang Fan returns home.

It's really good to have a wife. Zhang Fan was so tired before. When he was single, he went back to the dormitory and fell into bed. If he didn't eat, he had to sleep first.

Now, Shaohua looks at Zhang Fan's tired face and feels distressed like an old hen protecting her chicks.

"Have a mouthful of soup first!"

"I want to sleep. And I want to tell you good news. "

"Let's not talk about the good news. You look tired and your mouth is peeling. Why are the socks wet. I'll pour you some hot water, you bubble your feet! "

Shaohua doesn't care about good news or bad news at all. She only has tired Zhang Fan in her eyes.

really To bear, Zhang Fan has to bear, to love, Zhang Fan's love for her is not vigorous, but like the spring breeze, a SIP is sweet. Zhang Fan doesn't worry about anything at home, but Shaohua doesn't feel difficult at all.

Even Shaohua's father's relatives and mother's relatives now surround Shaohua's family as the center.

Although he didn't hope to have such treatment, looking at the happy appearance of his parents, Shaohua couldn't express his pride. This is my man, the man who sheltered me from the wind and rain.

Holding a little swollen foot, like coaxing a child, Shaohua coaxed Zhang Fan to sleep early.

It is estimated that Shao Hua is already reading childcare books and is becoming more and more skilled.

"In a few days, I'm going to the UAE for consultation!"

After Zhang Fan finished, he fell asleep gently.

I'm so tired.

"Hey!" Shaohua gently covered Zhang Fan's stall, stared at his slightly dark face, and then sighed.

I don't know whether I want him to be more and more skilled or ordinary.

Contradiction!

Chapter 878

Saudi King (a) invites Chinese doctors to have surgery!

With the spread of the news, it not only caused an uproar in the medical circle, but also hit a huge wave in the surrounding organizations of the medical circle.

"China's medical level has been at the same level as that of the United States!"

That's a compliment.

"Licking dogs is not enough for doctors in our own country. They queue up every day. They even send people abroad to lick dogs and lick dogs in white coats!"

This is scolding!

"China's medical treatment has been recognized all over the world, changing the backward face of the past."

It is said that this was said by the Propaganda Department of the underground Hutong. It is clearly a newspaper and a cup of tea waiting for retirement one day, but an authentic official voice looks like a leader above the section level.

Then slowly, slowly, the topic changed.

Saudi Arabia can marry seven or eight wives. Locals don't have to work and sleep at home every day!

The godfather of my cousin's wife's third uncle and sister-in-law sells curtains in Saudi Arabia, earning millions of dollars a year.

Many people pay attention to it, and those who go through the door and want to compete for the final place are also like crucian carp crossing the river.

Some people take the official channel and want the government to order.

There are also smart people who go directly to ring old Lu and old Wu wooden clocks.

If you go through the official channel, you don't have to spend money. There's no fixed number. I'll go all out to fight for you. However, there are many people competing, and they have made great efforts, you know! But you still have a chance.

Those looking for Mr. Lu and Mr. Wu can load a car with their journal papers published in recent years.

In fact, those who compete for places are second rate experts in some large hospitals.

First class experts disdain to rob. First, people in Saudi Arabia didn't send a letter to them, didn't invite them by name, and rushed to them. Don't I have face?

Second, the invited doctor is a closed disciple of old Lu. He is a junior. He feels a little embarrassed whether he is ordered by the government or goes to someone else's school.

Third, in fact, the hearts of these people are the same as the mirror. Is there a gap between their own level and the old United States and Europe? Why is the invitation of Saudi Arabia the same as joking? Really, they are all Millennium foxes. Who do you play Liaozhai with!

That is, a group of laymen from the government want Chinese doctors to kill all sides, and then Saudi Arabia will directly hand over the oil pipes to China for oil refining!

Serious big men, except old Lu and old Wu, who know Zhang Fan well, others are not optimistic. Who wants to take a long-distance plane to play? It's not idle and boring.

Therefore, sometimes experts pretend to understand that there are a lot of things to fool the government like fools.

The Ministry of foreign affairs didn't have the application form of top experts, and it couldn't decide. Since Lao Da said to let Lao Lu and Lao Wu give advice, they simply gave the ball to the two old men directly.

"You haven't made much progress in English, but German is still improving. After the teacher checked the students' summer homework, Mr. Lu began to comment on Zhang Fan. "

"Master, I can read through the journal with my dictionary now."

Zhang Fan said without words. There are many thresholds for language. It is estimated that Zhang Fan's English has reached a certain threshold. Anyway, listening to others, he is very familiar and seems to understand.

When I read an English journal, I seem to be very familiar with it. I feel that it is such a thing. But it's bullshit to get it straight.

Mr. Lu sometimes wants to open Zhang Fan's head. It is said that Zhang Fan's level of surgical technology, IQ, perseverance and self-discipline should be the best choice. Why is it so difficult to get English and German!

But the old man still endured it. Who makes this bastard's surgical technique too good.

"Well, keep up your efforts and don't slack off." After the criticism, he was rewarded again, and then he began to get down to business.

"You want your master brother to go there, but there are still two places. How do you deal with it? Your martial uncle also means that. After all, he wants to have an operation. You don't have to think about other things, so you can think about the operation."

"Master, in fact, people are not sure whether to let us do the operation, and they really want to let us do the operation. I am the main knife, and the general foreign affairs director of our hospital is the assistant, and then the master brother raids the array. How can it be enough?"

"That's right. Your martial uncle and I have settled the two places for you."

"Thank you, master, thank you..."

"Well, use more snacks. You can't even take down your daily conversation. You also say you have made great progress."

Finally, the old man couldn't help but blow it over.

The old man is serious. He can save lives and heal the wounded on the operating table by wearing a coat. He can take off his coat, put on a suit and tie, and talk freely under the flash.

Not only he, but also his brothers and even his teachers came here like this.

Therefore, the old man also asked his disciples.

Old and modern.

The quota was soon determined by the Ministry of foreign affairs. The remaining two quotas were collectively launched by Mr. Wu through the capital branch of the surgical association.

They are all young people. After all, people are advocating how old everyone is. If an old qualified person is sent, the surgical leaders here in the capital of magic capital will lose face.

In the selection of candidates, it really made the bosses spend a lot of time. The young heroes who can enter their eyes are at least doctors. It's really difficult to find someone who has made achievements in

clinical surgery younger than Zhang Fan.

Send a master's degree for fear of being delayed. Send a doctor for fear of being laughed at.

It's really difficult for the branches in both places.

Finally, I found two doctoral students in scientific research, who are called Zhang Fan, to give support and help in scientific data.

In fact, I can't find a young general practitioner with exquisite surgery!

Zhang Fan is really a little famous this time in China. Looking vertically, I don't seem to think it's powerful.

But such a horizontal comparison really shows that the boy is a little powerful.

Zhang Fan doesn't worry about the outside world. He also has a backstage! Shake people if you don't agree!

At home, Zhang Fan still has to listen to his wife!

Vientiane exchange, "you said that in terms of medical treatment, at the international conference, whether you wear this orthodox suit or a slightly relaxed casual suit."

Shaohua's legs have been slimmed down, that is, the Vientiane exchange of tea is not large. If it's large, Zhang Fanzhen's tasilang (Uyghur spoken language: no means)!

"Leisure suits!" Zhang Fan talks freely. How can he know? He hasn't even attended formal high-end meetings in China. I'm so tired. I'm beginning to perfunctory.

"Really or not, don't take it seriously! I'll buy you both suits, and then we're going to choose a tie. "

"Why don't you buy me a white robe? It's convenient!" Zhang Fan is tired and almost turns his eyes. Obviously, his physical strength is definitely better than Shaohua, but shopping is not someone else's opponent.

"Hee hee, be obedient and good. Don't be careless. You represent me when you go out! I don't want to lose face! "

Shao Hua, like Zhang Fan who became President right away, made a fresh start from inside to outside. He had to clean up Zhang Fan's hair and prepare all kinds of things for departure. In fact, Shao Hua was more tired than Zhang Fan.

But, tired and happy. I didn't say it, but I was still happy.

When the old man knew that Zhang Fan was going to Saudi Arabia, his mother-in-law couldn't close her mouth. Zhang Fan's mother took the phone and called her relatives one by one.

Although Lao Tzu Zhang Fan said that it's nothing great to be a state, I'll burn you. But when there was no one, I still turned out the old traffic map I brought in my notebook and looked for it bit by bit with reading glasses. Where is Saudi Arabia? Why can't you find it?

In the hospital, everyone is also a doctor in the city hospital. When I was in my own hospital, "Hey, why didn't you let me go around? I heard that the city where Zhang hospital had their surgery was Dubai, which was very good and luxurious. The ground was full of gold!

As soon as Zhang Yuan makes a move, it's absolutely no problem. Then when people are happy, they send a piece of gold and let them hold it back. It's beautiful to think about it! "

Out of the hospital, I met my colleagues in other hospitals. My former classmates immediately raised their eyes much higher than before.

"It's nothing. It seems that Zhang Yuan is a little reluctant to go this time. When I saw him yesterday, Zhang Yuan told me that there are a lot of work in the hospital. Now there are such bad things over there. If the European hospital hadn't stopped it, Zhang Yuan would have sent me this time.

Ah, Zhang Yuan still likes to use young people. The European Academy is not good at this. It's a bit old-fashioned! "

He really saw Zhang Fan. Zhang Fan looked like he was dying. Shaohua tossed during the day and at night. Zhang Fan was a little tired.

I don't know why I'm so excited!

The fellow doctors and Zeng Jin's classmates were shocked and stunned when they listened to each other's words " Don't be so awesome! "

Ouyang has just started to beat the people of the tea element Health Bureau. Although they seem calm, they report black, write letters and do everything.

Because Ouyang is too overbearing, he doesn't know what kind of way to win over first, then unite and then operate on his official career.

Raise your knife directly in front of people. Anyway, the old lady, no matter why you are, as long as you are not obedient, either hair distribution or hanging high to read the newspaper.

There are many people who want to work and show their love for being an official.

There were too many reports and too many complaints. When the superiors had to send people down to investigate, the local tyrant group came to tea vegetable for medical treatment. All at once, all the discordant voices disappeared.

The people of the tea vegetable health bureau also understand that this ancestor is different from the former secretary. This is really stunned!

Zhang Fan is playing a game of chess in his heart, but Ouyang is not playing another game of chess in his heart.

Zhang Fan kept selecting young people to study and study. At that time, Ouyang didn't say it. In fact, he still felt a little petty in his heart.

But there is no way. The platform is like slaughtering a cow, but there is only a milk pot. You can only cut meat strips with a knife and get meat porridge.

Now the government has given conditions. Ouyang doesn't want to eat a vegetarian meal.

Without Zhang Fan, it is estimated that the government wants her to be the head of the Health Bureau, but she won't come.

But now, there is Zhang Fan, and Zhang Fan still has ambition in his heart. Ouyang has hope.

Ouyang is not afraid of Zhang Fan's ambition. Now she is afraid of Zhang Fan's muddling along and complacent with the status quo. Therefore, I was angry to see that Zhang Fan smiled like a sunflower like Lao Gao.

Now, she thought about how to make the milk pot bigger and turn it into a marching pot. The old lady's heart is big enough to cook a cow in a big pot.

Therefore, the old lady started to destroy the withered and decadent, disobedient, strange and strange, and did not do anything. All of them were distributed. She had no time to run in.

Then use the method of killing three people with two peaches to let several secondary hospitals take the initiative to lean over.

She knows that if she asks the government, the resistance is estimated to be too great, and everyone wants to criticize it.

But let several secondary hospitals make trouble by themselves, let them put pressure on the government and let the hospital doctors make trouble. When the government can't eat, ask her.

She then reluctantly made a move, and then pushed the boat with the water.

Therefore, now the old lady tries her best to let Zhang Fan improve. Even if Lao Gao does something, Ouyang really closes his eyes.

Chapter 879

When the government gave back the list, it said that Chinese doctors were willing to help. Then there was waiting. The Chinese side originally wanted to let the doctor go by himself, but they said they didn't.

A few days later, people sent a letter directly to the United Arab Emirates and sent their own plane.

Rich, people are really rich.

As for how to coordinate, these are not Zhang Fan's worries. Now he is worried about how to arrange the work of the hospital after he and Ren Li have gone for a few days.

Give it to Ouyang. The old lady doesn't know how to annoy her these days. The hospital won't come.

Calling is either a meeting or on the way to the meeting. Anyway, I'm busy. Don't bother me if you have nothing to do.

Give it to Lao Gao, who made Ouyang lose his energy.

Finally, the hospital could only be handed over to Chen Sheng temporarily, and the directors of various departments were told to cooperate with Director Chen's work.

But privately, Zhang Fan also explained to Chen Sheng. If necessary, he should contact Ouyang.

In fact, Ouyang's family has already informed Chen Sheng. She is now training Zhang Fan to cultivate his details and overall view.

Tea vegetable airport, "good, good, good, great, great, great!"

In the Civil Aviation Office, several people gathered together to look at the documents issued by their superiors!

"747 ! I'll go. Is it necessary for such a big plane? The bird market has never stopped this type of plane."
"

"There are demons and the capital. We can barely stop at the airport. Why is the tea vegetable hospital so powerful now. They were picked up by a special plane at home. "

"Yes, it's getting worse and worse. The expert team of the bird market last time came to the plane."

"Good thing, I used to have a disease and have to go to the bird market. Now our tea vegetable hospital is also cow. There's no need to go to the bird market!"

On Monday, after Zhang Fan explained his work, he set out with the team. Two young doctors from the capital and magic capital also rushed to tea vegetable and Zhang Fan.

Zhang Fan's master brother came several days in advance, and was pressed by Zhang Fan to be an extra expert on tea for a few days.

When the master came, he went to Wu's office. Wu didn't know where to get a list of the invited teams.

And he specifically explained to Zhang Fan's master brother: since he has gone, don't go through the motions. Take out the spiritual outlook of the Chinese people and let them have a look!

The old man is still very good.

The most famous team this time is Germany and the United States.

The German team is led by a professor of the molecular tumor research center of Munich University, with the general foreign team of the Affiliated Hospital of others. It is estimated that Saudi Arabia has enough chips.

The team can still have a relationship with Zhang Fan.

But as time goes by, I can't be strong. What can I do even if I'm a brother.

The team from the United States is a team of cancer experts from Mayo medicine.

Originally, Lao Mei meant that you send people over and we'll fix it for you. As a result, the queen did not know what to think. She was not only unwilling to go to the United States, but also unwilling to have surgery in her own country. She had to go to the United Arab Emirates.

But fortunately, people have money, it doesn't matter.

MARUKI, I went to the medical team of Northeast University. I don't know. I think it's still a university in northern China.

Lao maozi was also invited. Finally, the Chinese tea element medical team was invited. Not even a University signed title. The tea vegetable government wanted to hang up the tea vegetable University, but Ouyang quit! Go back.

You don't even have a medical school. Is that funny!

Before the list was determined, Zhao Jingjin and Xu Guangwei of the bird market made a phone call every day. Unfortunately, it was useless, but it made them more concerned. They felt that their relationship with Zhang Fan was not in place!

747, finally in a small rainy day, fell at the tea vegetable airport. The small plane of tea vegetable is like quail and Eagle next to others.

Moreover, the 747's landing was a great momentum, because the tea vegetable airport was a military airport at that time. Later, although it was renovated, it was still small in scale.

Next to the airport is the office building, and the civil aviation family hospital is also next to the airport.

In the past, small planes took off and landed, and everyone didn't feel noisy. Moreover, the airport was still in a small forest, which made the sound much lower.

As a result, the 747 fell down safely that day, but the glass of the surrounding civil aviation family courtyard and office hall was terrible, all like an earthquake.

Although the civil aviation side has already made preparations, the civil aviation families look at the big plane like watching a play.

"This is to pick up Dr. Cha Su?"

"Good boy, what a cow!"

The goose headed plane stopped at the tea vegetable airport. The health leaders of the government and Ouyang personally came to see them off.

"We must give the name of our tea element so that other countries can understand our tea element. I hope our experts and scholars... "

The leader in charge of health delivered a speech on the edge of broken glass on the ground. The environment was too bad. The original speech for half an hour ended in ten minutes.

Ouyang specially said a few words to Zhang Fan: "let's go out this time as an eye opener to see the medical level of other countries.

Don't put too much pressure on you. If you don't have surgery, no one will do anything to you.

I'll wait here for you to come back. Don't worry about things at home. I'm here. "

After waving away from his family, he got on the plane under the guidance of his stewardess.

Zhang Fan thought that the stewardess here also wrapped their heads and only showed their eyes, just like the masked great Xia. As a result, they just had one more neck, not a white scarf around their neck.

Airline stewardess is as like as two peas.

This is a special plane. There are no other passengers. After getting on the plane, darling, it's Zhang Fan's turn this time. They are surprised.

The two floors are large and luxurious. The eyes are full of local tyrant gold.

In the roar of the plane, the plane took off.

This plane is much more stable than the tea quail plane.

After the plane took off, Zhang Fan felt that there were so many bathrooms on the plane, which was quite convenient.

Stewardess door also looked at these tea vegetable doctors curiously.

Although the plane is stable, Zhang Fan is still worried, so he looks very mature and stable.

The two researchers looked at each other and said, "I'm not old, but I'm very stable ~!"

"It's estimated that we can't have surgery this time. The team here is too strong."

Master, I don't mean to say that tea is the worst. In fact, it doesn't need to be said. People with clear eyes will know at a glance.

Although everyone's heart is not uneasy, they still wonder what they want to do.

There was a lot of food on the plane, but everyone was in no mood. If you lose face after you go out, you'll be embarrassed.

Chapter 880

This time, they were all slightly older general foreign doctors. Zhao Quanping, the director of general foreign medicine, and his younger martial brothers Song Ping, director Song.

If you describe Zhao Quanping's character, it is slightly like Lao Gao, but he lacks the talent to be a teacher than Lao Gao. He can't even make up his own younger martial brother Song Ping.

For example, Lao Gao, although Lao Gao has made little achievements in the Ouyang era, the disciples brought out by others and the talents discovered are still very powerful, such as Xue Fei, deputy director of emergency department, and Zhou Guofu, acting director of the third Department of orthopedics.

These are people's disciples, and even Zhang Fan was brought by people at the beginning. Not to mention anything else, Lao Gao is still very powerful in exploring talents and taking apprentices.

Zhao Quanping is a little worse.

In the Department, several deputy directors are like horse thieves in business. One deputy director is a mountain.

At the beginning, if the liver, gallbladder, anus and intestines had not been separated, it was estimated that Lao Zhao could not hold it down.

Because Zhang Fan and Zhao Jingjin led the liver center tumor surgery, and Xu Guangwei, the president of the first affiliated university and professor of Bian university, secretly told Zhang fan that the application for a master's degree in hepatobiliary medicine of tea vegetable hospital was about to be passed.

Although it is good news, Zhang Fan also has a headache. The director of general foreign studies is too face-to-face, and several other deputy directors are proud. After the establishment of the master of liver and gallbladder, it will not work without the assistance of ordinary foreigners.

When it comes to technology, Zhao Quanping's technology is actually no worse than Xu Guangwei's and Zhao Jingjin's, but it's because he doesn't have his own solid team, nor has he gathered a few people together to help. Although it seems calm now.

That's because Zhang Fan suppressed it. Orthopedics and anorectal have changed. It's time to try

general surgery this time! If you can't integrate, you can decompose. Otherwise, combat effectiveness will never go up.

On the plane, Zhang Fan almost took domestic flights, from the largest to the smallest. It's really not boastful. Zhang Fan has taken them. Not to mention the others, in terms of food, the food on the plane is the best.

A few hours later, Zhang Fan was gently touched by the elder martial brother while he was half asleep.

"It's going down! Dubai is here. " Elder martial brother looked out of the window and whispered to Zhang Fan.

"Oh, that's fast."

I don't know when Dubai was suddenly praised all over the world.

Gold everywhere, milk flowing in the river, money is like reaching out to Dubai and becoming a millionaire. So, Zhang Fan, they are very curious.

The plane descends. It's stable. Open the hatch! Zhang Fan stood on the corridor bridge, smelling the familiar air smell and looking at the familiar weather outside, "did you fly wrong? The plane turned several times in the sky. Did you fly to Su province?"

Zhang Fan couldn't help wondering, because the weather outside was gray, and the place connecting heaven and earth in the distance was like earth. The sky was full of sand and dust, golden and yellow. It's as like as two peas in the new year's day.

Where the blue sea and blue sky are all fooling people.

Even the smell as like as two peas, the mixture of the sheep and the sand in the sand air.

"No wonder people want Baotou!" After getting off the plane, people in the United Arab Emirates also sent a contact group with an interpreter. The young translator smiled brightly when he saw Zhang Fan and them.

Zhang Fan and the master brother took a look. Although they didn't say it, they all knew, "this time, they really accompany the prince to study. They don't even have a person in charge. The person in charge of contact knows where to arrange Zhang Fan and them to stay."

If he comes, he will be at ease. Zhang Fan doesn't feel unhappy. But don't give me a chance. Just give me

a chance. I can definitely show you. I Zhang Fan didn't give it in vain.

Accommodation people did not wait. In a glass hotel like a sail, Zhang Fan was arranged by them. If it weren't for looking at the sea, Zhang Fan really felt that he had returned to his hometown.

As soon as he settled down, Zhang Fan wanted to prepare for a rest, so he was informed that Saudi Arabia would let the experts go to the conference room for a meeting.

Zhang Fan quickly washed his face and set off with the team“ Secretary Ren, why don't you take a break. Let's just go. ”

Seeing the fatigue on Ren Li's face, Zhang Fan advised.

"It's all right. I'm here and I'm not tired."

China is the last notification and the last one to be welcomed. People from other countries have had a rest for a day. Therefore, when the Chinese expert group came in, it didn't look very energetic.

Both the organizers and experts from other countries participating in the conference are like they haven't seen each other. After a slight glance, he turned his head and ignored it naked.

Because the meeting hasn't started yet, all teams are chatting on their own.

"This time, we should pay attention to the United States and the ball country! They are our strong enemies. " The German team chatted in private.

"We must win this operation. The prince has promised us that if we successfully complete the operation, he will give us additional scientific research donations. We are the strongest. "

The American team is confident.

Looking at the team of Chinese experts who were very similar to them at the meeting, the experts of Marubeni bent slightly towards Zhang Fan. Although they didn't stand up, they looked like bowing.

"In terms of digestion, we are the top. Why should we contact doctors in China?"

With a smile on his face, his words made people feel as if he had invited the Chinese team and lowered them to a lower level.

The maozi team also came. They looked more like Europeans and Americans than the wild with Mongolian blood.

Saudi Arabia is really rich.

Not only the expert team invited the world's top, but also many patients.

"World class expert team! As long as it is an intestinal tumor, you can sign up! The most important one is free, including food, housing and travel expenses. Sounds beautiful! "

Then, more than a dozen patients similar to the Queen's tumor were invited. The patient thought they were full of love.

Money doesn't mean people are stupid. In order to choose a better doctor and operate on the queen, they even rehearsed.

The host arrived at the scene, all men, all white robes, all beards. Although they were shaved smooth, they still made people feel like a hedgehog hanging on their chin.

It is said that this group of people belong to Wang Housheng and are also a high-yield household!

At the beginning of the meeting, people didn't talk about the queen or what experts were asked to do. What they said and what they said meant was that their Health Foundation invited the world's top medical team at any cost to bring gospel to the patients in all world for the sake of world peace and human health in the world!

And also made it clear that if they quit at this time, they will also offer travel fees and expensive lucky and hard expenses! When I said this, it seemed that my eyes were glancing at the Chinese medical group.

Lao Zhao's mouth was crooked.

Zhang Fan's master brother smiled gently. He often went abroad. He knew that the world was not so harmonious and harmonious, and respect needed strength.

Zhang Fan has no expression.

Ren Li has frost on her face.

Two of the participating doctors were fidgeting. They think they can operate on the queen when they come, and then return home with a good reputation all over the world. It is estimated that they have dreamed of being accepted by major colleges and universities when they return

As a result, now we have to rehearse, or actually compete with the world's top experts on the operating table.

And it seems that the Chinese medical team does not seem to be recognized!

His mouth was like a pig gallbladder, and his bitter face became a rag.

Looking at the young Zhang Fan, they all began to regret. Before they got on the plane, they thought that Saudi Arabia recognized Zhang Fan. At that time, they thought that Zhang Fan was young and promising, and had a good atmosphere.

Now look at Zhang Fan. They regret that Zhang Fan is young and puts people on the operating table. Then it was disgraced to the world! Their nervous and anxious expressions made Marubeni's more despised.

Prince regiment, with deep eyes, looked at the expert team under the field, and no one quit. On the middle east side, although they look like Chinese.

Actually, it's different. Apart from others, the eyes of an eagle like a wolf are different from the kind eyes of China.

Some women will say, wow! So handsome, as deep as the deep lake. Really, the Queen's hat is not so easy to wear!

Before long, a young Saudi held a box in his arms, just like a box in domestic secret ballot, with his mouth facing up. He held the box and asked the teams of experts to take a note from it.

"What are they doing!" Zhao Quanping asked incomprehensibly.

"Draw lots!" Zhang Fan said expressionless.

"Well!"

Five teams, five patients, five notes.

All female patients, all female patients with intestinal tumors. Even the chronology is the same.

Even the location and size of the tumor are almost the same.

"It's too childish and disrespectful. Zhang Yuan..." Lao Zhao's lips began to tremble.

He is like this. He is obviously an expert, but he can't hold his breath. He has been bullied by several martial brothers for half a life and hasn't realized anything.

"Take it easy. Are you still afraid of surgery?" Zhang Fan said softly.

"Please have a good rest today. Tomorrow morning, the operation starts. Please put forward what equipment and instruments you need. We will be satisfied. Thank you! "

With that, the white robe team got up and left.

When they returned to the hotel, they were not in the mood to go out for a walk or have dinner together. The two doctors were like their dead father, and their neckties were wrinkled.

"Come on, let's have a little meeting? If you are tired, rest first. "

Zhang Fan said to the two doctors.

"I, I, I'm fine!" One of the doctors in Mordor looked at the doctor in another capital and hesitated.

"I'm tired!" The doctor in the capital didn't even look here. He turned and entered the room.

From childhood, he was mostly Xueba. He felt so ashamed this time. Moreover, in order to prevent the failure of the operation and let him take responsibility, he decided not to participate with Zhang Fan and them.

In fact, he just didn't experience in society and took himself too seriously.

Even if the operation fails, does it have anything to do with him? No, But what if it works? Therefore, if you study well, you may not be smart or successful.

Zhang Fan nodded indifferently, "have a good rest!" After all, he is the leader of the team. What should be comforted is to be comforted.

"Mom, I haven't had an operation yet. Some people have no confidence first. They all....." Lao Zhao is like an old grandmother, talking in pieces.

Zhang Fan glanced at him and he stopped immediately.
