

## Chapter 881

When he came to the UAE, Zhang Fan was also a little nervous. Maybe he would let a group of experts from all over the world show their cards, show their previous achievements, compare their birth and their own hospitals, and then talk about their advantages and their published papers.

At the beginning, he was really worried that if he talked about his achievements and birth, he had no other advantages except to take out his master and uncle, let alone compare with other countries in the world, even with the top hospitals in China.

For the paper, at present, there is a liver central tumor, which can be taken out slightly, and this is the second author. And this thing is not an intestinal paper!

To be famous, this is not a tea vegetable, this is not a frontier, and no one knows how awesome he is in Zhang Yuan.

In terms of birth, it's estimated that it's even worse. Even people in China's own country don't look up to the medicine in Northwest China.

In fact, he also has psychological preparation. If he comes here, he should come to relax! See if it's full of gold and if the river is full of milk. Surgery, probably won't give him a chance.

As a result, unexpectedly, the men's tiantuan in Baotou is still very pragmatic.

This is the chance!

Zhang Fan didn't say what he thought when he came. Looking at Shaohua's worship eyes and the concern tone of the master on the phone, he prepared what he wanted to prepare as much as possible.

He doesn't want to disappoint those who care about him.

As a result, it was all useless.

It's useless!

The model of gloves and the brand of equipment, ranging from a needle to a retractor, Zhang Fan passed them one by one.

There is no need to worry about the cost. There is no medical insurance, and there is no control over the first, second and third level drugs. People have made it clear that we don't need money.

Zhang Fan and master brother, report the equipment, Zhao Quanping and Song Ping record, check the deficiencies and fill the gaps. Ren Li and the doctor of Mordor screened drugs.

Although Dr. Li of Mordor hesitated when he attended, he still worked very seriously and at a high level. Especially in the use of drugs, the suggestions given by others were quite good.

And he himself, looking at this group of doctors in Northwest China so serious and professional, his worry has also been reduced a lot. At least these people are not two knives, and he has slowly and unconsciously integrated into the team.

They are young people and technical. In fact, they are very simple. If they can't, they can't. the expression on their face is clear.

If it were a group of foxes for thousands of years, Zhang Fan might not be able to do it.

"Tomorrow I will be the master knife, master brother one help, Lao Zhao you two help, director Song three help."

"Good!"

"OK!"

"No problem."

"Secretary Ren and Dr. Li, please stand up for us tomorrow and help us with medication."

"OK!" Ren Li said softly.

Dr. Li of Mordor nodded. Although he didn't speak, he already regarded himself as a member of the team.

"Do you have anything else to say?"

Zhang Fan asked again.

"No more!"

"Everyone has a light diet tonight. Don't eat dairy products tomorrow!" Lao Zhao made a special remark.

"Hehe, Lao Zhao thinks well." Zhang Fan boasted. Obviously, he is an old doctor. Lao Zhao has to say more. It's not that he shows off, but that he has this extra caution in his character. Maybe this is why he can't be a leader.

Everyone is not in the mood for dinner. Except Zhang Fan, everyone else is full of pressure.

Even the master is full of pressure.

And Zhang Fan is completely relaxed. If he gives a speech on the stage tomorrow, he will really be unable to sleep.

Now, Zhang Fan is not afraid at all!

Others looked worried. Zhang Fan ate a round belly in the room.

Then he complained with Shaohua on the phone about the weather in Dubai for a while. After reporting peace to the master, his uncle and the European Academy, he lay down on a big bed that could lie for five or six people and fell asleep steadily.

"What are they talking about? Are they asking for help on the phone? Are they going to go home. I'm afraid of losing face in the venue. It doesn't matter to come down and talk about it. Art is not as good as people. It doesn't matter to come out after practice. "

The doctor in the capital, in Dr. Mordor's room, seemed very comforting and said to Dr. Li in Mordor.

"You too. We have to participate. We are also doctors from famous universities, okay. Afraid of what they do, we probably won't go to the northwest in our life. Ah! "

"Since we are abroad, we are a team!"

Dr. Li wanted to say something, but he held back.

"Cut ~ ~ OK, when are they going to leave! I've been making a plane for a whole day. Hey! I deserve the fact that I'm not famous! "

Seeing Dr. Li's melancholy face, he thought that Zhang Fan and they were ready to go home, so he didn't know how, but he was a little happy.

"Didn't say go back!"

"What? Are they really going to have surgery? God, horses don't know how long their faces are. What about you? Are you going to help them, too? I can tell you, if it's embarrassing, it's all lost abroad

If you put someone else's patients on the operating table, it will be an international dispute. If you think about it, they are ignorant and fearless... "

"OK, you're tired too. It's time to go back to your room and have a rest!"

Dr. Li had to see off the guests. The man went a little too far. He can't listen anymore.

It makes sense that people can come out, they can be selected by Saudi Arabia and invited by Saudi Arabia.

You are still exposed to the light of others. Even if they can't compare with the top doctors in the world, you still have to feel this love. Even if you don't feel it, at least you should accumulate virtue in your mouth.

Without speculation, the two talked harmoniously before getting off the plane, which turned into passers-by. Choice is greater than effort. Sometimes it's true.

I was speechless all night.

Early in the morning, the window was gray!

The tall buildings outside are all hung with a layer of grey gauze.

After eating a little bread, Zhang Fan took a car into the largest private hospital in Dubai.

Medical treatment in Dubai is also free for all, but the best hospitals are all private hospitals.

The local Chinese have a joke that the doctors here have a good attitude and friendly service. The TN is slow. They can make an appointment for a fracture until the bones grow.

Although Chinese doctors have a bad attitude and a bad temper, they won't delay.

Other teams have three or four people who are specially responsible for contacting. Zhang Fan has only one Chinese student as a guide.

Moreover, the little girl seemed very unhappy and ignored Zhang Fan and them. I don't know why she can go abroad. It seems that she is superior to others. She is clearly here to serve, but her conscious status is higher than that of Zhang Fan.

Saudi Arabia has less money? Or look at other teams and make her feel inferior?

The name of the hospital is also very atmospheric, Dubai American hospital!

In Dubai, it is said that major countries have hospitals, such as the famous Dubai German hospital.

China also has it. It is said that the name of the golden mean is still hung. Who knows whether it has anything to do with the golden mean in China. However, the local government is also very angry because the hospital often secretly makes people (a) flow.

Therefore, it is reasonable for Chinese doctors to be ignored here. It is illegal for people from other countries to flow, but the Chinese hospital here doesn't care whether you violate the law or not. As long as you can make money, you can do it secretly.

China is not the first country in the world, otherwise.

Americans are very proud of the name of the hospital. After all, the hospitals in their country are among the best in Dubai.

In Dubai American Hospital, all nameplates have English notes. The American team is like going home. The doctors in the hospital seem to be former colleagues and very affectionate.

"Your operating room is No. 5. I can't get in. Don't go wrong yourself. Ask more if you don't know. This is not China. Don't make a fool of yourself! "

With that, the little girl left!

No one cares about her.

"Enter!" Zhang Fan took a long breath.

"Come on!" Ren Li whispered.

"Come on!" Several other people cooperated with each other and squeezed their fists to cheer up.

Secretary Ren didn't see it when he was in the hospital. When he went abroad, he was really able to do psychological work, which was quite in line with the role of secretary.

In fact, everyone held his breath.

They said they were invited, but they were ignored, despised and looked down upon by people in their own country. Even the people in their own team felt no hope.

Angry or not? To tell you the truth, not angry is false, not a wooden man. How can you not be angry.

If you don't earn steamed bread, you can earn breath.

However, they are not hairy boys. They won't make a big noise because of this.

We have to make an equal position.

Since you're here for surgery, come on! I'll see you on the operating table.

Being respected comes from fighting, not making trouble.

Status is also played out, not out of trouble.

Holding his head high, Zhang Fan and them stepped into the operating room.

In the operating room, all instruments and supplies were prepared according to Zhang Fan's requirements.

The camera with a slightly flashing red signal was also aimed at the operator.

In a conference room in the hospital, Saudi princes sat with several local doctors, as well as doctors from Britain and France.

They even invited the referee.

Zhang Fan sat in the operating room, closed his eyes and waited quietly.

"Dr. John, do you think the doctors in the United States and Germany are better at intestinal surgery this time?"

"In fact, our royal medicine is the most powerful. As for them..."

Proud British and French doctors commented one by one, but just like roll call, one, two, three, four, to the fifth, everyone ended the comment as if they had a tacit understanding.

## **Chapter 882**

The patients were all women of the same age.

The difference is mainly in skin color. For example, Zhang Fan's patients say black. She is not so black, but she can't say that she is white, that is, yellow in black and brown in yellow.

I don't know which country came from. Even if I wrapped my face before entering the operating room and changed my surgical clothes, it's strange that the headscarf on my face had to be taken off after entering the operating room!

People in China have done a good job in this regard. Especially in the border areas, people are not

allowed to drink in the economic school. As a result, drunkards all over the street die of drunkenness every winter.

Divorce is not allowed. Those who chant scriptures on the horn get divorced seven or eight times.

When the woman took off the scarf on her face, Zhang Fan looked at it and didn't turn the country into the city! Anesthesia, disinfection.

Song Ping began to disinfect, and Zhang Fan washed their hands.

After disinfection, Zhang Fan put on their surgical clothes and gloves on the operating table. After being disinfected with Iodophor, a woman's belly looks like a piece of fat with pig skin pressed by a car, especially uneven.

"Stretch marks are so heavy!" Zhao Quanping said softly after taking a look.

"Not stretch marks!" Master Zhang Fan shook his head.

"Yes, it's not stretch marks." Zhang Fan also said.

In fact, it's really not stretch marks, but after the patient's rapid obesity in the short term, the skin can't keep up with the accumulation of fat, resulting in cracks in the stomach. It's like climbing a pile of flesh colored insects, with cracks in the belly and in all directions.

"How much pressure his husband's heart is!" After disinfection, Song Ping, who was on the operating table, shook his head and said.

"Ha ha!" Zhang Fan's master brother and Zhao Quanping smiled. But when Zhang Fan didn't respond, everyone smiled awkwardly.

Zhang Fan on the operating table, just like Bao Gong, doesn't talk about friendship at all. Song Ping thought the atmosphere was a little tense and wanted to drive a car to ease the atmosphere.

result! The nurses laughed, but Zhang Fan didn't respond.

The instrument nurse is a Chinese Uyghur girl, while the itinerant nurse is a Chinese Kazakh girl. It was not Zhang Fan who saw it, nor did they talk and communicate, but when Song Ping drove, both girls laughed!

In Dubai, in fact, this situation is not uncommon. People have said that in Dubai, only 10 of the 100 people are local aborigines, and the others are foreigners.

Palestinian people who rent, Filipinos who are nannies, ah San who is a worker, and Chinese who are engaged in marriage agencies!

Ren Li shook her head helplessly under the operating table and thought, "these vulgar surgeons!"

.....

Colon tumor is a disease that dislikes the poor and loves the rich.

Before 1990, this disease could not enter the top three in China. Two thousand years later, this thing has become a probe in malignant tumors, second only to lung cancer.

Moreover, the more developed the urban economy, the higher the incidence of intestinal tumors. In the intestinal tract, the most common site of tumors is the rectum, followed by the colon. However, with the changes of economy and diet, colon cancer has changed the pattern of rectal cancer in China.

As like as two peas in Saudi Arabia and neighboring countries, It's not nice to say. Now it seems that the rich people in Dubai and the Middle East are local tyrants, driving Prado and wearing prada. Their pets are either tigers or lions.

In fact, more than 40 years ago, they were still riding camels and carrying multiple sheep in the desert. If you are hungry, suck a mouthful of sheep's milk and eat a piece of Nang cake! From time to time, I have to fight with my current pets.

As a result, the oil was dug up and suddenly became rich. Then the diet immediately began to change.

A few years ago, although there were many pregnant sheep that could give birth to four or five sheep, in fact, they still needed to weigh the meat.

As a result, after becoming rich, the old wheat cakes are no longer delicious, and the Chinese old Fu tea is no longer fragrant.

From the previous high fiber diet, it has become a refined food with high protein and high fat.

Laomei is like this. The fat content in the diet is more than 41.8%.

Why is fat easy to cause colon cancer. Because the digestion of fat requires the participation of bile, high fat stimulates a large amount of bile secretion.

This thing combines with fat to become aromatic hydrocarbons that are particularly similar to carcinogens.

The general died before the battle. I'm not afraid of your arrogance. I'm afraid of how many times you come.

There is also the reduction of cellulose. What is cellulose.

Generally speaking, it's grass you can't digest. There are actually two mechanisms for cellulose to prevent cancer in the intestine. First, reduce the concentration of fat and bile. Second, accelerate and reduce the retention time of food in the intestine.

Jianghu heroes often say that you should be happy with gratitude and hatred. In fact, life is the same. Eating comfortably and pulling smoothly is happiness.

For example, after protein and fat are digested, they are like mucus, mixed with bile, greasy and adsorbed on the intestines. The peristalsis of the large intestine is from top to bottom, wave by wave, just like a bug moving forward. It looks like a large range.

However, for this digestive product like mucus, propulsive effect is very small. At this time, the role of cellulose comes. It is like a woven bag. Put these things in, such as the dehydration and molding of instant noodles, and directly form a column. Then, at this time, the propulsion of the intestine plays a role.

Just like in the morning, many people cough their lungs out, but sticky phlegm just doesn't work or can't come out. In fact, the truth is the same.

This is particularly obvious in today's children. They don't like eating vegetables, and their parents don't insist. After a meal of milk and a meal of food marked by two old men, they don't understand defecation for three or four days. The child has a big stomach every day, and the mother holds the Kaiselu every day.

Parents think they love their children, but they don't.

In addition to eating habits, there is also one of the most carcinogenic reasons, that is, parasites.

Why is the digestion of Marubeni country so bad? People's endoscopes. Olympus has almost monopolized all digestive endoscopes, because people have many patients.

Generally speaking, in terms of the fat content of food, compared with the United States, small

meatballs can be directly regarded as vegetarian animals.

But there are many colon tumors in Marubeni country all over the world. The reason lies in parasites, especially schistosomiasis, such as Jiangsu and Zhejiang in China, which is also a high incidence area of colon tumors.

In fact, it is also because of the diet that people like to eat fresh products. How fresh, how to come. As a result, I ate a belly of insect eggs!

The fat woman on the operating table is an example. She is a heavy fat lover.

It is estimated that when herding sheep in the past, watching others eat meat and envy became hatred. When oil was found behind the yard, it got out of control and served with roast lamb chops every day.

As a result, before long, the antelope, whose body was like an elf on the grassland, suddenly became a walrus.

The arm is as fat as the thigh of an ordinary woman. Lying on the operating table, the stomach is like a PU fan. The meat is drooping on the edge of the operating table. It's black and yellow. Without looking at the face, I thought there was a second senior brother lying on it.

Her fat thighs are like two doors. I don't know how her small feet support her to wander the Jianghu.

It's really more difficult to operate on this obese patient, another obese female patient.

.....

"Are you Chinese?" Ren Li asked curiously when she saw that the two nurses understood Chinese.

"No, we are citizens of the UAE!"

"Oh!" Ren Li nodded and said nothing more.

The operation begins!

For the operation of ordinary people, the doctor usually marks a white mark with the handle in advance. This is to prevent the blade from deflecting when cutting. Second, it is also to let the assistant purposefully pull it slightly with gauze.

The incision is as like as two peas. The cloth must be tightened before it can be cut, otherwise the cloth will be like a dog gnaw. The same is true for surgery. When cutting, the skin should be tight.

And this fat woman can't. She must not let her assistant pull outward on both sides.

Because when a woman has a belly full of fat, her skin is like a pregnant sleeve full of water. You don't have to pull. As long as you open a small mouth, the fat can make a big hole in your thin skin.

There is a story about a young man quarreling with a middle-aged man. The young man intimidated the middle-aged man and gently scratched and pulled on the middle-aged man's stomach with a knife.

The young man is bluffing. He didn't even cut the middle-aged man's shirt. As a result, the fat middle-aged man, with a big belly, scratched and pulled, his belly was like a broken zipper, puffing, puffing, and there was a huge hole in his stomach.

The young man was finally convicted of intentional injury. Young man, thank you for the shirt. If it wasn't for the shirt, I guess my intestines would come out.

Song Ping and Zhao Quanping, with one hand on their lower abdomen and the other on their upper abdomen, were afraid that the knife edge would crack. One up and one down.

"Yes, they all started. Now they are doing skin disinfection and then entering the abdominal cavity. Several teams are similar, but the team in the United States has a big knife edge.

Well, it's the smallest in Marubeni. In the German surgical team, the knife edge is not big or small. "

The referee team commented on the operation while explaining to the Prince Group. As for the Chinese team, people directly ignore it. We all know that this team is a face project. We were not prepared to let them go.

As a result, these people were not ashamed to have actually had surgery, which also made people in Britain and France even more dissatisfied.

What is discrimination? They won't point to your nose and say you're a loser like street aunts. Other people's discrimination is to ignore and ignore you.

"Oh!" The prince's team did not pay attention to China at all.

At the beginning of meatball country, it was done fastest. The knife edge is small, and there are few bleeding points. If there are few bleeding points, there is no need to stop bleeding. Therefore, when other teams are still stopping bleeding, they have entered the abdomen.

Abdominal surgery, is a layer of entry, not as we think, a knife cut down, directly open the abdomen, pull out the intestines, it is killing pigs, not surgery.

Zhang Fan is not in a hurry with a knife, because he thought about it during the operation. As master and uncle often say, slow is fast. The so-called speed is not the result of speeding out, but that there are no redundant steps in the process of excellence. This is fast.

At this point, Zhang Fan's team is also good. No one wants anything.

Master brother's technology was born out of his master, and Zhang Fan's essence in general education was actually born out of Lu Lao and Wu Lao. The other two assistants were actually learning from Zhang Fan under the suppression of Zhang Fan.

So the team is very harmonious.

Cut the skin neatly to expose the fat. Normal patients should remove the fat and look for the abdominal white line at this time.

.....

### **Chapter 883**

Zhang Fan's patient, with a knife, is a layer of staggering fat. The fat is too thick. The fat thickness is definitely more than five fingers thick.

"Pull!" Zhang Fan whispered.

Song Ping and Zhao Quanping took white sterile gauze, put it on the fat and began to pull towards both sides. Just like a big watermelon that is too sweet, the fat meat is split like the pulp of a watermelon.

It's too thick. After the gauze was pressed for a while, the two gauze became a baby's belly pocket.

Stop bleeding! Zhang Fan holds an electric knife like a dragonfly, hissing! Hiss! Hiss! Electrocoagulated all the bleeding in the fat layer quite quickly.

"Big gauze! Dip in water and get wet, come on!" The bleeding in the fat layer was stopped by electrocoagulation. As a result, the instrument nurse was still stunned.

If the operation nurse of tea vegetable had already prepared the wet gauze for the chief surgeon to use, and the nurse was still in a daze.

They are usually in the hospital. In fact, they rarely have surgery. As a result, they entrusted Zhang Fan with their blessing this time. Because there are too few Chinese speakers in the whole hospital. They are

not skilled in such a big operation for the first time, but they don't pay serious attention to the operation.

Zhang Fan is not used to their problems. This is an operation, not a play.

The tone is severe and the attitude is not good. After the operation, many doctors seem to have changed. In fact, this is the true face of this industry. I want the doctor to be kind and gentle like my mother! It's good manners not to open your mouth and swear.

The instrument nurse opened her mouth and wanted to say something, but looked at Zhang Fan's cannibal eyes and didn't dare to speak.

The instrument nurse muttered reluctantly, "what's so great about this operation!"

Zhang Fan didn't hear it, but Ren Li and Dr. Li on one side heard it. Ren Li's face turned red, but she endured it again and again.

Wet gauze is used to cover the cut fat. Fat doesn't look oily. In fact, this thing is most afraid of drying. Once it is dry, it will be damaged.

After operation, many patients' abdominal incision kept flowing oil. Either the aseptic operation failed, or the fat layer was damaged when the operation was not covered with wet gauze.

Break off the fat layer. It's really too thick. If you slap it down, the fat layer hasn't reached the end. Breaking off the fat, the abdominal white line was exposed.

"Raise it a little. It's full of oil. Be careful not to damage the intestines." Zhang Fan explained to the master brother.

"Good!"

The abdominal white line is actually a layer of tendon sheath tissue like the shell of ping pong ball, which is the most solid defense device of the abdomen.

This thing is generally flat, because it has strong toughness and small scalability. The patient's abdominal white line is just like an angry volleyball.

Zhang Fan and master brother alternately pull up the abdominal white line with pliers. Just like passing, I

pull up three centimeters in front, and then you take over three centimeters in the back, and then I take over you and let go.

In fact, I'm afraid that the tweezers will pull up the abdominal white line and intestines together. Finally, pulling and pulling, the white line was pulled into a tent, just like men's underwear when they got up in the morning.

"Knife!" Because of Zhang Fan's severity, the nurse was much more agile at this time and stared at the operation all the time. She didn't dare not be serious. If she was really driven off the operating table by the doctor, it's estimated that she won't want to go on the operating table and have an operation in the future.

The knife passed the top of the tent, and the abdominal cavity puffed, like inhaling and exhaling. The smell in the body finally came out.

"There is effusion!"

"Record the number of effusions!"

The suction device is like sucking juice, and the liquid in the abdominal cavity is sucked out.

"Eh!"

Hearing the doubts of the referee team, the Saudi prince with a hat looked over.

"The Chinese team is not behind at all. Their speed is similar to that of other teams! The speed of Marubeni has slowed down. "

"Oh!" The prince nodded and said nothing. He didn't understand. Looking at the monitor, either yellow oil or red blood, just like the roast hump he ate in the morning, he felt a little sick. It's also strange. He didn't feel it when he ate. When he looked, he couldn't.

However, in order to please his mother, he fought against nausea and a group of brothers.

There was no laughter in several operating rooms.

It's not how difficult the operation is, but about face and income.

Not only in Marubeni, but also the careless Yankees, there was silence in the operating room.

Surgery, pay attention to a preoperative, intraoperative and postoperative.

Don't say it before the operation, just say that during the operation, the operation field should be exposed as much as possible. The postoperative recovery should be perfect. If you want to recover

perfectly, you should reduce the injury as much as possible during the operation.

Therefore, this is a contradictory problem.

Doctors in Marubeni country started to do the fastest and the incision was the smallest. As a result, they considered the incision too much. After entering the abdomen, they found that the incision was not enough because the patient was too fat.

Then, I had to extend the incision again. The result was originally the first, but it became the last.

"Ugly!" I don't know whether to scold the patient or himself. Anyway, the main knife muttered.

.....

When the abdomen was opened and the peritoneum was cut, all the tissues in the field were exposed.

Purplish red liver, like a thief who didn't hide well, the whole body was in the upper abdomen, and the lower part was exposed with the gallbladder.

It was covered with fat, like the intestines in a white pearl T-shirt, like a beautiful woman taking a bath. As a result, a black man broke in and kept wriggling in the bath basin.

After the belly of ordinary people is cut open, it is like a big pot with all kinds of water. Whether you want to eat fat intestines or thin intestines, you have to keep stirring with chopsticks and exploring.

The operation is almost the same, but the positioning is more accurate. But no matter how accurate the positioning of this thing is, you have to find it when it enters the abdominal cavity.

The patient's abdominal cavity is like a marching pot, not to mention, but also a marching pot with fat oil to overflow.

Preoperative examination, CT, angiography and positioning were very clear.

We think that the operation is actually after the laparotomy, the lesion is cut off.

As like as two peas, you can't see the anatomy of the human body. If you cut the abdominal cavity, you will be dumbfounded. The inside things are exactly the same. You can't even distinguish between the left and right.

In the textbook, there are marks one by one to tell you what this is and what that is. After opening the abdominal cavity, there are no marks.

For example, the appendix, the simplest one, is cut at the Michaelis point. As a result, the finger enters and touches it. I go. There is no meat strip thick with the little finger. What should I do? For the sake of

face, we can't make the surgical incision bigger.

What should I do?

You can only pull your intestines, just like rolling your intestines, pull them out and put them in, pull them out and put them in. You really don't know whether this thing is in the front or in the back.

The little doctor was almost crying. He took a hand of oil and couldn't find his appendix.

The appendix is still an organ with a specific location, but the tumor is not necessarily.

The intestines are three-dimensional. This thing is in the front and back. You can't be sure by inspection.

You can only check, determine your own coordinates in your heart, and then locate and search.

For anatomy, Zhang Fan is too cow. It is estimated that according to Zhang Fan's current level, he can definitely compete with his martial uncle.

Cut open his stomach. Like rubbing mahjong, Zhang Fan put one hand into his abdomen and rubbed the whole abdomen once. Especially in some places where the examination can't see clearly, he really looks for whether there are tumors in other parts.

At this time, doctors in other operating rooms showed their differences in operation methods.

The United States and Marubeni first locate the primary tumor, that is, the main tumor should be determined first, while Germany and China are a little similar.

After all, the formulation of China's general foreign principles was made by Qiu Yezi.

At this time, the judges also sat up straight and looked at several screens very carefully.

Because now the operation is just beginning.

In the United States, the meatball country rolls its intestines, while Germany and China are like playing mahjong.

Just as mahjong is the quintessence of China, Zhang Fan feels great. After touching it quickly, it's over, while Germany is still touching it.

This thing depends entirely on hand feeling and experience. You can't see it. Sometimes you pinch a fat particle. Whether it is a tumor or not depends entirely on hand feeling and experience. If the hand feeling is poor, turn the intestinal tract to the bottom. As a result, it is a fat particle.

Therefore, while Germany was still touching, Zhang Fan had begun to locate the primary tumor, while

Marubeni and the United States had not found the primary tumor.

Between fast and slow, Zhang Fan and others were a little faster than other operating rooms at this time.

British experts looked at Zhang Fan.

"They pursue speed too much. It seems that the inspection is very rough!"

French experts don't recognize Zhang Fan's speed.

Generally speaking, medical treatment in Europe and the United States is also divided into 369 grades, but they just look down on medical treatment in Asia. Whether it's Marubeni or China, they always have a vision that you can't.

French experts think Zhang Fan is too fast. He can't do it at this speed.

British experts did not say that Zhang Fan was fast, nor did they agree with the French. Instead, they stared carefully at the screen, looking at the United States, meatball country and Zhang Fan.

Because at this time, the three operating rooms began to determine the primary focus.

Although Zhang Fan had one more step than them in the examination of other parts, at this time, the three operating rooms opened their intestines at the same time.

When Zhang Fan looks at the patient's examination, he actually has a reference in his heart. In medicine, many experts have their own set of reference judgment methods. Textbooks are the most classic, but not necessarily the best.

"Look, look, the Chinese first identified the primary focus of the tumor." Experts from the Royal Society pointed to the display screen and said to the princes of Saudi Arabia.

"Oh! Are they the fastest? Is their level so great? "

"No, I'm not sure yet, but as far as tissue anatomy is concerned, Chinese doctors may..."

Before the Englishman finished, the French said, "maybe it's luck! The operation has just begun! "

With regard to the front and rear feet, the United States, Germany and meatball countries have found the primary focus.

At this time, the judges and princes included Zhang Fan in the list of observation objects.

**Chapter 884**

Ordinary surgery is difficult to compare among doctors of the same grade. Who does well and who doesn't.

Unless there are long-term patient follow-up visits and a large number of patient data support, we can probably draw a conclusion, which may not be accurate.

Moreover, even in general surgery, the difference is not big. It is not that doctors really have no difference, but that the human body has a powerful error correction function.

Therefore, between ordinary doctors, the boss is often unconvinced and the second. In a department, the division brothers are all the first surgeries with good self-confidence.

Only in sports medicine and cancer can we see the level of a doctor.

For example, in the United States, the team that operated on Lao Ke and Dayao almost took all the operations of top sports.

The tumor, you do an operation, the patient did not die in five years, and most of the operations done by others can live for more than five years, which is the comparison.

Because the human body's powerful error correction ability can't be done in front of limits and tumors. Therefore, at this time, the quality of doctors is reflected incisively and vividly.

An athlete worth tens of millions can still hit the door and jump high after the operation, but the doctor who can't perform the operation seems to have recovered. As a result, his sports career has been ended.

Of course, all this is piled up by money. Top doctors are actually a kind of resource.

There are many doctors. Doctors can go from ordinary doctors to expert doctors. There are too many constraints.

It will be even more scarce if there are several top doctors at the expert level. This thing must talk about talent. Surgeons, in their forties and early fifties, it was the time to master it.

As a result, some doctors, smoking and drinking, great health care, spend forty-eight, the technology is not mature, and people have been abandoned.

Therefore, a top-level doctor does not know whether he is free from low taste, but his self-discipline is absolutely strict.

In several operating rooms, Zhang Fan is the youngest. His reaction speed, his energy and his attention are also the most powerful. Under the training of the system, his technology is no less than that of any doctor here.

Two items plus one, slowly, Zhang Fan's advantage on their side is getting bigger and bigger, more and more obvious.

Colon, popularly speaking, is actually large intestine, fat intestine fried meat, which is used.

Its shape in the human body, the whole colon, is actually like a Chinese character.

Under the greater omentum, the large intestine is covered, and there are circles of small intestine under the large intestine.

The connection between the small intestine and the large intestine is on the left of the same word. When looking for the appendix, if you roll your intestines upward and pull it to the anus, you can't find the appendix.

In a circle of colon, the location of the tumor is different, and the scope of resection is also different.

In fact, the removal of tumor is similar to the artillery coverage on the battlefield. According to the tumor as the center, the surrounding lymph should be removed and the same tissue should be removed. Anyway, when you see the tumor, you should cut off the front, back, left and right tissues to reduce residual tumor cells as much as possible.

After Zhang Fan determined the tumor, he began cleaning.

Encirclement and rescue, ligate the blood vessels first.

The blood vessels of the human body are very thief, so are the blood vessels of the abdominal cavity. People are afraid of death. They are either stuck in the bone seam or hidden in the tendon.

In the abdominal cavity, there are neither bones nor tendons, and the intestinal tract is unreliable. Therefore, people walk in the fat layer.

Pliers, clamp, clamp, clamp, keep ligating. Don't look, don't look, don't grope. The blood vessels hidden by patients are like beautiful women taking off their clothes. Zhang Fan knows where there is what and where there is nothing.

Faster and faster!

"Wipe your sweat!"

"Scissors!"

Judges, at this time, slowly shift the focus of observation to the display on the side of China.

As soon as an expert makes a move, he knows whether there is one.

In the front, there are some foundations. I can't see that you are higher than me. At this time, other people have to judge whether the blood vessels wrapped in the oil bag are ligated without any consideration.

"Oh, my God!" French, don't say luck at this time.

Cut off the surrounding blood vessels, card, card, card, clamp the intestines at both ends of the big curved pliers, and scratch with a knife.

"Gauze!" The cut colon was wrapped in white gauze.

"Elder martial brother, cut open and look at the tumor."

"Good!"

Zhang Fan gave the task to his elder martial brother, and he continued the operation.

Flow like clouds and water. Don't stumble at all. Zhang Fan's operation is like twice the video.

Lymph node dissection, "curette!" The big instrument like a ear spoon is in Zhang Fan's hand.

Just like scraping ice cream, brush! Brush! Brush! One piece of lymph at a time, one piece of lymph at a time.

"God, there are arteries here! God, he's too brave! "

Others use tweezers to clamp one by one, while Zhang Fan directly uses a curette.

Fast and precise, soft and powerful.

There was almost no bleeding in the operation field.

One of the lymph nodes should be cleaned without leakage.

Marubeni's operation was meticulous, and Zhang Fan did it.

American surgery is thorough, and Zhang Fan did it.

German surgery pays attention to an accuracy, and Zhang Fan still did it.

Not only did it, but also did it better and more perfect.

Faster and less damage.

"Stone carbonate disinfection, suture broken end!"

A tumor operation made Zhang Fan an art.

Cut off the intestines and start suturing.

This suture is quite exquisite. The intestine is prone to edema and blockage. If the suture is poor, it will be troublesome after the operation. Don't talk about defecation. It's hard to sew. You can't even fart.

Zhang Fan's sewing speed, the nurse was so nervous that she couldn't even keep up with threading. The more anxious she was, the more she couldn't keep up. She was almost crying.

"In the operating room on China's side, another nurse should be sent to the operating table to assist."  
Saudi Arabia's own doctor whispered to the prince.

Two threading nurses, supply Zhang Fan.

The intestinal tract was sutured and the anastomosis was completed.

"Cleaning!"

Zhang Fan's abdomen has to be cleaned and closed. Only in Germany did he start to remove the tumor.

The tumor has just been removed in the United States.

And Marubeni turned back because of the operation. At this time, even the cleaning was not completed.

"Count the gauze, count the instruments, and prepare to close the abdomen!"

How aggrieved and unpopular they are before the operation, and how refreshing they are now.

Great.

The more you do, the more you do, the more you feel that China is powerful.

"Their doctor is too good." French doctors can't imagine. How can they be so bold and clean? It's beyond their imagination.

The operation is over!

"Secretary Ren, Dr. Li, it's up to you next. Please try your best to improve the patient's postoperative treatment."

"OK!"

They nodded.

"Are they the best?" The princes asked in wonder, it was originally an addition to their younger brother's face. Unexpectedly, it bloomed?

"No, it's too early! After the operation, we need their whole operation video to make further comparison before we can draw a conclusion. But also consider their postoperative treatment. "

Saudi Arabia's own experts explained.

"Although it is not certain that they are the best. But they can already call it a world-class intestinal cancer team! "

British experts further confirmed that France has entered confusion!

## **Chapter 885**

A meal is as fierce as a tiger!

Elder martial brother and Zhang Fan did less surgery. They thought it was a routine operation. They didn't think much about it. They just felt that this little martial brother was too fierce and fierce.

Lymph node dissection is like a woman's makeup painting lipstick. One can inadvertently paint the pale and thin lips plump and sexy.

After entering the abdominal cavity, the master brother went all out. He really went all out. Otherwise,

he felt that he couldn't keep up with the younger martial brother's actions. At this time, he really understood why the teacher loved and indulged the boy so much.

"This is not what conventional education can teach!"

Master brother doesn't know, but Zhao Quanping and Song Ping know that after all, they cooperate with Zhang Fan to do surgery many times.

On weekdays, Zhang Fan seldom pays so much attention to speed. Unless it is necessary to be fast, Zhang Fan seldom is so fierce.

This time they also know that Zhang Yuan is really a cow. It's too fast. In the past, I didn't show all my strength to take care of them!

Looking at Zhang Fan, especially Song Ping, I decided to listen to the little Dean in the future. I can't do anything below. It's too fierce!

In fact, Zhang Fan also has a comparison in his heart.

There are many such masters gathering, in fact, many. Every year, major device manufacturers have some top medical experts touring the world.

For example, the retired chairman of the American Federation of Orthopaedics, who was taken by device manufacturers to tour the world's medium-sized hospitals, was not forced. Why didn't they go to the pool.

Although this is just a proposition composition written by Saudi Arabia, in fact, many people and organizations have paid attention to it.

For example, major instrument manufacturers, especially some instrument manufacturers of intestinal staplers. Doctors compete in the operating room. They compete outside the field, "the American medical team uses our products!"

In particular, Marubeni directly and clearly stated that all endoscopes checked by doctors in advance this time are owned by Olympus. Olympus wishes the patient a smooth operation! I feel honored to serve the royal family!

Not only device manufacturers, but also major medical organizations are paying silent attention.

The embassies of various countries also pay close attention to it. The ambassadors of the United States, Germany and Marubeni came, holding their breath.

The operation is over!

"It is estimated that the other operating rooms are not over yet!" Master brother looked at Zhang Fan and said softly!

"Oh?" Zhang Fan gently replied. He stared at the patient and seemed to have some feeling in his heart. However, he always felt that he couldn't pull it off as if he were covered with a layer of yarn in front of his eyes.

"When I went to Germany for further study, their chief gastroenterologist may not do better than you. Although not a hospital, they are all at the same level, and no one is much higher than anyone.

Let's go and have a rest. "

"Good!"

Out of the operating room, because they were arranged in the innermost room, Zhang Fan passed the operating rooms of several other teams when they came out.

In the operating room of Marubeni, lymph nodes are also swept. They probably know that they are slow, so they won't rush to catch up, but they do the operation more carefully like an old dog.

Their surgical wound was just like Zhang Fan's, so detailed that there was no trace of bleeding. Even the bleeding was wiped clean with gauze.

When Zhang Fan and others passed by, Song Ping looked curiously at the observation window at the door.

In fact, he couldn't see the operation, but he just wanted to lie on the window and let the people inside see his face. If he didn't have a mask, he would definitely see that he was grinning.

The doctor at the platform of MARUKI inadvertently saw the Chinese team at the door!

However, when I held my breath, I not only didn't speak, but also didn't even have a ripple in my heart. They didn't regard the Chinese team as an opponent.

Passing by the operating rooms in the United States and Germany, Song Ping also quietly passed by, learning that Zhang Fan raised his head and held his chest up, and never looked inside again!

It was mainly because Lao Song was hit by the disdainful eyes of the doctor of Marukuo. He was lying on the window of the operating room like a monkey!

Looking at Zhang Fan's back, Song Ping despised herself: "Song Ping, Song Ping, why can't you put two liang of oil in a dog's stomach? Hold on, hold on, hold on. Just like Zhang Yuan, we must hold on! "

Master brother and Zhao Quanping whispered, because out of the operating room, they found that their operation was the fastest.

They are still very excited, because they are all old doctors. They all know that the operation is absolutely perfect. There is absolutely no trace of anxiety, just like learning slag handed in the test paper in advance.

But looking at Zhang Fan walking in front, their smiling faces were pressed again and again.

"Is that what you Zhang Yuan usually do?" The master asked Lao Zhao.

"Well, yes, we Zhang Yuan are rarely excited!" Zhao Quanping said definitely.

In fact, sometimes Zhang Fan is very excited to have a near death operation. After all, the sense of achievement after saving people is full!

This time, it's not that Zhang Fan is not excited, but when the operation is finished, his heart suddenly feels like his liver and gall. But this feeling can't be grasped. Therefore, Zhang Fan breaks his head and recalls the plot of the operation and wants to catch the shadow.

This feeling is too precious. If caught, he can definitely raise another level in intestinal surgery.

Out of the door of the operating room, the moment the electronic door opened, a lot of people with hats stood outside, and even the jury came.

Chinese doctors conquered them with their own skills, and Chinese doctors told them with technology that we are not adding heads!

Those who have the ability should be respected. Although there has not been a replay of the video, especially the experts in the industry have seen that the Chinese team is no less than any expert team this time.

The prince of Saudi Arabia smiled one by one. Although the referee team was more reserved, the despised eyes had disappeared.

"My beloved doctors, you have worked hard! On behalf of my father and my mother, I send you my most sincere greetings! "

Zhang Fan's expressionless face was held in his arms by the other party and gently patted his face! He didn't say a word. He just nodded. The sudden feeling in his mind made him feel uncomfortable.

Master brother hurried out to help Zhang Fan salute each other.

"Zhang Yuan is angry!"

Lao Zhao and Song Ping looked at each other. The meaning in their eyes was very clear. Their boss was unhappy.

The original scene of laughter was slightly embarrassing.

"My younger martial brother is a little tired. As we all know, surgery is still very energy-consuming! This operation is perfect. I can say, perfect. Our operation is world-class and the most perfect!

And not just in speed! "

Master brother is not modest at all. If Zhang Fan were to say it, Zhang Fan might not be able to boast about himself so naked!

"OK, OK, come on, arrange the rest of the expert group. Remember, we must arrange the best!" The prince told the official in charge of the reception with a straight face. He also thought Zhang Fan was unhappy.

He thought about it himself. If his level was world-class, he would be treated unfairly. Let alone surgery, he would probably go home. So

The calmer and even colder Zhang Fan's expression makes these people feel that although he is young, the doctor is too powerful and young, but the momentum of the expert has risen!

If there are outsiders, I'm not interested in asking more.

There was no need to go to the original room. They directly arranged Zhang Fan and them to enter the presidential suite on the top floor!

He also said that if there is any dissatisfaction, please be sure to raise it, and they will try their best to meet it.

The original room had surprised a group of doctors who had never seen the world. Instead, it was the president's suite, and Lao Zhao's voice of swallowing saliva came out.

You can't describe it with luxury!

"What's the matter? Are you unhappy?" While everyone was still stunned, Zhang Fan's master brother whispered a question.

"Elder martial brother, I seem to have some feeling, but I can't catch it."

"Well!" The sweat came down, and the master brother had such an understanding, but he had just returned from Germany at that time. He was 40 years old at that time.

He didn't know that Zhang Fan had realized it for a long time in terms of liver and gall. If he knew, it was estimated that the master brother could cry jealously.

"Come on, you go and have a rest. Forget the others. I have everything!" With that, he arranged for Zhang Fan to enter the bedroom, and then quietly closed the door.

He knew that such an opportunity was too valuable to ask for!

Before long, the doctor from the capital came to Zhang Fan's suite. When they left the operating room and were about to be changed, Zhang Fan knew that something bad had happened. He's not stupid at all.

Just think about it, and don't plead, but think again, the opportunity is in front of you, go? No? Finally, he bit his teeth and came here. Face is only worth a few money.

"I was wrong! I apologize. I still have a lot of research in the medication of tumors. Please give me a chance. I will never let you down. I can help you. "

Master Zhang Fan quietly looked at each other. Although he couldn't cry, he had seen too many high-end talents who weighed the pros and cons. He could do anything in front of interests.

Although he was a little disdainful, he didn't make decisions for Zhang Fan.

"Zhang Yuan is tired. After he has a rest, you can come and explain to Zhang Yuan in person."

"Thank you, thank you!" Out of the room, the doctors in the capital almost broke their heads!

Before long, the Second Secretary of the Chinese Embassy in Afghanistan also came.

For Zhang Fan, they knew exactly how they were invited. At that time, they all wanted to stop it.

They are too clear. If they are invited and don't come, they can explain to each other. If they come, the operation can't be done, or even something happens, it's really hard to explain.

As a result, before they could find out clearly, they agreed in a hurry at home. They couldn't even wait for others to pick them up. They were afraid that Saudi Arabia would go back on its word!

Dr. catechin came and returned the same doctor. He didn't even have a particularly famous expert. It is said that the ambassador threw his teapot angrily at that time. The experts invited by others are tea vegetarians. In China, the information about Zhang Fan's master brother is actually a tea vegetarians doctor!!

If something happens, it's an international joke! Therefore, the embassy has scattered all the people out, looking for newspapers and reporters, thinking about how to wipe your ass at that time.

As a result

The ambassador was crying with a broken teapot!

## **Chapter 886**

Repeat!

The referee team resumed the game!

"The American team is still good in tumor postoperative reconstruction, that is, lymph node dissection remains to be discussed!"

"The German team, from excision of lesions to lymph node dissection, is whether reconstruction will cause postoperative obstruction, which needs to be verified by time."

"The pill country is good in all aspects, but it is a little slow. The patient may have infection after operation, and the exposure time is too long!"

"Lao maozi's operation, well, their operation technology is a little backward."

Comment one by one and form written words one by one. Moreover, these words need to be responsible.

Therefore, no one dares to talk nonsense according to their preferences.

As for China, they used to disdain to evaluate it, but now they don't know how to evaluate it.

Accuracy, cleanliness and speed are all the best. It embarrassed them.

"Fortunately, I didn't say China before the operation. Otherwise, my face will become lieba."

"Is it the best operation done by the expert team in China?" Asked the prince.

"No, an operation doesn't mean anything. At most, it can represent those in these teams who have reached the world level and those who haven't reached this level!"

This is to Lao maozi.

Hairy bear, it's decaying! It is no longer the red style of the past.

"After the operation of the last batch of patients is completed the day after tomorrow, we may be able to screen out whose team is the most qualified to operate on the queen. Moreover, we also need to investigate their postoperative treatment! "

Money is prudence! Not only the preliminary, but also the semi-finals!

Before long, each team knew the achievements of their own team and other teams.

"Next time, we must pay more attention to speed. Zhang Fan, a disciple of Qiu sect, follows green bird Lu Lao.

Academician Hua Guowu's liver tumor center operation was improved in his hands, and he is good at Qiu's knife technique.

Although there is not much information on intestinal surgery.

But this operation also shows that Zhang Fan is better than the blue in another way. Not only in the liver and gallbladder, but also in the stomach and intestines. "

In the team of MARUKI, the doctors bowed their heads as if they had committed a crime! They are always very powerful in details. Not long after the operation report came back, they collected Zhang Fan's information through major domestic medical providers.

Even Zhang Fan likes to eat seafood. They dug it out. It's terrible.

"Oh, my God, how can China, how can they... We are the best!

No one can go out today. We must have a good rest. Tomorrow, we will prove that we are the best! "  
Cried the Yankee incredulously.

"It is said that the chief swordsman of the Chinese team is a disciple of the Qiu sect. Their technique is very similar to ours! However, I believe we still have a chance! "

The team in Munich, Germany, began to pay attention to China at this time.

"I was appointed by the ambassador to greet all experts and scholars." The second secretary turned his head to find Zhang Fan. The information clearly stated that Zhang Fan was the master knife and the youngest one.

But after talking for a long time, there was no Zhang Fan in it.

The Secretary thought of the ambassador shaking with a broken teapot. He wanted to laugh but didn't dare to laugh. However, I was really angry. Think about the uneasy mood of the embassy from top to bottom, just like prisoners waiting to be shot.

Now, not only Saudi Arabia, but also the United Arab Emirates have sent letters of thanks to the embassy.

I'm so angry. In the past, China exported a little big and dark commodities at most, and I had to curry favor with each other all the time.

Now, China has stood up in high-end medical treatment!

"Can you let me see Dr. Zhang? Hehe, the ambassador wants me to personally express my condolences to Dr. Zhang.

We didn't do a good job in the preliminary work. I want to apologize to Dr. Zhang. When the operation is over, the ambassador will meet you in person. "

The second secretary was very polite. He didn't tell them. All their hands were scattered to wipe the ass of the tea vegetable medical team. Otherwise, it is estimated that he will not come, but at least one counselor has started.

"Dr. Zhang is a little tired after the operation and has already rested. You know, the operation is very big and it is a test for the physical strength and energy of the main knife. Moreover, Doctor Zhang is not particularly used to the climate here. "

Zhang Fan's master brother explained that there was no way. People from other countries came. It can't be said that Zhang Fan was meditating in his bedroom! And make complaints about the weather. Anyway, the weather here is really bad.

"OK, please greet Dr. Zhang on behalf of the ambassador and all the personnel stationed in Afghanistan. I won't disturb your rest.

Thank you, thank you! "

He can't say something, because only the ambassador can say it, and he can only say it in his heart.

When I first came, no one cared. Although I had a meal and rest and everything was arranged, what kind of disregard was quite obvious.

Now, it's different.

"Experts, we will have a day off tomorrow and another operation the day after tomorrow. If you need special requirements, you can put them forward to me."

Several officials asked politely.

Tired? In fact, I'm not tired. This kind of operation is very common in huaguoda hospital. Sometimes, one main knife can do two or three sets a day.

Zhang Fan wants to settle down, but others don't. They are very relaxed now. They thought they could not fall behind. Unexpectedly, they became the first horse!

"Can I go out for a walk?" Song Ping looked at Lao Zhao and Zhang Fan's master brother.

They all came to the legendary Dubai. It seems really regrettable not to go out.

When I first came here, I was nervous and not in the mood to see the outside world. Now live!

He speaks Chinese.

"Yes, but we still need three people to act together. I'm a little tired, so I won't go. Who will go? "

"I won't go either!" Ren Li shook her head.

Song Ping prayed to see Lao Zhao. Lao Zhao and Song Ping told the truth in the past. They wanted to have a fight when they met.

In the Department, Song Ping is the deputy director of the number one trouble. However, the

relationship between the two seems to have eased a lot this time, and Lao Zhao wants to go further.

So he said, "just right, I also want to go around!"

One less person, Dr. Li of magic capital smiled and said, "two teachers, count me one!"

Dr. Li is not stupid.

The three wanted to walk around the hotel together. Unexpectedly, officials from the United Arab Emirates directly sent a car to escort them everywhere they want! Even the interpreter.

"Wow! WOW! WOW! Look, a team of sports cars! " Song Ping pointed to the sports car opposite.

They are all from small cities. Although the streets here are still dominated by Marubeni cars, the probability of sports cars is still quite high. Dr. Li didn't show any feeling of city people in the car.

"I'll go. There's really a lion!" Lao Zhao really saw a man from the United Arab Emirates holding a lion.

Although several people went out of the hotel, they didn't get off. Even if the translator said they could get off and walk around, several people didn't get off.

It's just a look. I've been here. That's enough.

The prosperity in front of them does not belong to them. Even if tea is small, it is home.

They have no envy.

Zhang Fan is lying in bed, very lost!

Feeling was like teasing him. He made a circle in his mind and didn't even let Zhang Fan catch a hair.

"It seems that the accumulation is not enough!" Zhang Fan said to himself helplessly.

This kind of thing can't be forced.

Lying in bed, he was not sleepy and could not grasp his feelings. Zhang Fan got up and went out of the bedroom.

I saw master brother and Ren Li chatting.

"How's it going?" Seeing Zhang Fan, elder martial brother hurriedly asked.

"I didn't catch it!" Zhang Fan shook his head helplessly.

"It's all right, it's all right. It's estimated that the breakthrough is fast. It's the same with my first feeling, which has tortured me for months. Your sister-in-law thought I had someone outside! "

The master smiled and said.

Zhang Fan smiled and didn't say how he felt for the first time!

"Zhang Yuan, look, this is the postoperative treatment plan I discussed with Dr. Li. The patient is too old. Combined with the operation, I think we should give up radiotherapy and just carry out chemotherapy... "

Ren Li smiled and said to Zhang fan that she didn't understand the feeling of surgery, so she didn't say much, so she took out the patient's treatment plan.

"Elder martial brother, what do you think?" In this regard, Zhang Fan knew his shortcomings, so he didn't express any opinions.

"Yes, Secretary Ren and Dr. Li's treatment plan are well considered."

The three discussed for a while, and Ren Li went to have a rest.

"Doctor of the capital..." the master brother said something to Zhang Fan.

"No, we have enough people. Let him continue to rest! I'll tell him later. " Zhang Fan shook his head.

It's not domestic. If you didn't take responsibility, you would back down. If the personnel were not tea vegetarians, it is estimated that the team would be scattered by him at that time.

I knew you wouldn't come. If you only sent him a doctor in cancer, it wouldn't be wax sitting, so Zhang Fan directly refused.

"No, you don't have to! There's no need to affect your mood. I'll call home and ask his mentor to say to him. "

Zhang Fan didn't speak. It is a matter of human life and national honor. Sometimes, we have to be cautious.

When Zhang Fan came on the first day, they delivered the food they wanted in the hotel. The food was tasteless and no one paid attention to it.

result. Today is different. People come and invite in advance. They can't go without going. Their warm beard seems to be laughing.

Since the sentiment can't catch it, Zhang Fan also decides to have a big meal, not for nothing.

It's really a little like serving tea and good tea.

But this is the world.

The expert team gathered.

The restaurant is very high-end and has the characteristics of the United Arab Emirates.

The crystal lamp feels bigger than Zhang Fan's living room.

The status of the participants was particularly high. The Prince Group from Saudi Arabia personally attended the reception medical group.

Zhang Fan originally thought that maybe it was the seafood buffet on TV, with a big crab and a thick shrimp. Then all kinds of sea fish, all kinds of seafood, all kinds of shells. Let go. It's okay to eat.

As a result, he was disappointed.

Saudi Arabia entertained Zhang Fan and them with the most polite food.

Grab the camel!

In front of a team, there was a camel like a camel with yellow mud, and it was a whole camel.

As for the taste, it's really hard to describe. What you like to eat, such as Lao song, specializes in humps. Eat a mouthful of oil, do not like to eat, such as Zhang Fan, holding dates, eat so uncomfortable.

## **Chapter 887**

Respect!

Full of respect.

The royal family specially sent a Chamberlain to follow Zhang Fan's team, making it clear that you can put forward anything you want to do with the Chamberlain, or even drink!

It's inconvenient for Saudis to drink. It's inconvenient! Even if the prince wants to drink some flower wine, he will fly to Europe. Therefore, from people's attitude towards Zhang Fan and them.

It can be said that strength brings dignity. If you don't have strength, relying on relationship can only be ignored.

Fortunately, Zhang Fan, they have strength.

At the end of the first day of operation, Zhang Fan and them did not relax. In the living room, holding the text issued by the jury, the people sat around and discussed. Since they came, they should make a little noise. They can't come silently, and then walk silently. This is not Zhang Fan's style.

"During the operation, a large part of us delayed a lot of time because of the nurses. I suggest changing the nurses!"

Zhao Quanping took the text and looked for something to improve bit by bit.

"Yes!" Zhang Fan nodded. The two nurses who had the operation seemed to have a little conflict.

"Give them a chance. After all, they came from China." After all, Ren Li is a woman with a soft heart. She didn't say what she heard from the nurses, but she didn't think it was easy for them.

"No, it's an operation. It's inhuman. Change must be changed. Just like the rescue in cardiology, without a qualified nurse, the rescue effect is greatly reduced." Zhang Fan explained to Ren Li.

"All right!" Ren Li did not insist.

"Our postoperative medication is relatively conservative. Do we need to be more aggressive? Treatment in the United States, Germany and even Marubeni is quite radical! "

Dr. Li of magic capital never said anything about the operation. He was only responsible for the postoperative medication he was responsible for. As for the maozi team, Saudi Arabia had given up because they were not arranged for the second round of operation.

Zhang Fan looks at Ren Li. He really can't take this one down.

"No, that's our highlight. A large number of secondary injuries caused by drugs, patient tolerance and treatment effect are unpredictable.

We are conservative, but we can slowly adjust from conservatism until the efficacy, injury and tolerance reach a coincidence point.

If there is secondary damage at one point, the effect will be poor if you want to look back. "

One by one, people kept looking for places to improve. The glory in front of people is bought by the earth after people eat.

.....

When Zhang Fan and his family were in the United Arab Emirates, Ou Yang, a tea vegetable, began to play with her mind.

"Secretary, equipment procurement application of the second Institute." The office secretary of the health bureau took the document to Ouyang and returned with a smile.

This kind of Secretary for the overall situation is not the kind of secretary of the government. Leaders scold whenever they want.

This kind of secretary can't get in without some skills at home. However, we all know that the old lady is not easy to mess with, so whether she has the ability or not, she is like a sheep when she sees Ouyang.

No, sheep can't. If the old lady doesn't agree, she will be sent to the countryside. Who's not afraid.

The third hospital made a lot of money during the consultation in the emirate. Not only was the hospital full of enthusiasm from top to bottom, but even the tea vegetable leaders wanted to do a good job.

You Ouyang can make the tea vegetable city hospital come into being. Are we worse than you?

Therefore, the third hospital applied for many large-scale instruments. When reporting, Ouyang not only didn't stop, but also reported the application documents to the government for the first time.

Government leaders, especially those in charge of health, shouted loudly, "this is an opportunity, this is an opportunity for the tea element health system, and this will be the second tea element Municipal People's hospital!"

A group of laymen patted their heads and felt very right.

Then, financial support, although the CT procurement was not as advanced as that of the tea vegetable city hospital, it was not that they didn't want to buy it, but that they couldn't buy it. It was sent by the equipment manufacturer to blend with Zhang fancai, so they retreated and asked for second place. The procurement was slightly worse than that of the city hospital.

But the price is really good-looking. When the tea vegetable boss signed, he really signed with a cool breath.

Originally I wanted to buy nuclear magnetic resonance, but this thing is too expensive to support the finance and taxation of tea. But the other equipment was almost changed.

Except that the third hospital has paid some bonuses to the doctors, the rest of the money is financial support.

Ouyang didn't stop at all.

When the leader of the tea vegetable side was ready for Ouyang to make trouble, it was useless to take out the words thought out in advance. It was a little busy in vain.

Did Ouyang turn sexual?

The third hospital equipment.

The second hospital quit. Why? The government's efforts to replace the third hospital are barely enough. It is estimated that another hospital will go bankrupt.

It was originally a small border town with no industry. It relied on a little tourism and farms. Therefore, the leaders were a little weak when the second hospital came to make trouble.

Moreover, the leaders of the second hospital did not know whether they were fooled by the following people or what. They assured the leaders that they could take loans and be responsible for their own profits and losses!

The leader of the second hospital was originally the Secretary of the Health Bureau. After being delegated, he also clenched his teeth and wanted to do something.

Being fooled by the following people is a saying. He is unwilling to say it. What reassures him most is that he has seen failed businesses, but who has seen failed banks?

I've seen restaurants without business, but who has seen hospitals with bad business?

Even if the city hospital is a cow, there are still some sources of disease in the second hospital.

Therefore, people are confident that they should rely on themselves.

I didn't look for Ouyang when I was in charge of Finance and taxation. Now I'll talk to Ouyang again, which makes the leaders feel embarrassed.

The president of the second hospital said that the prospect seemed really good.

As a matchmaker, the Agricultural Bank of China, the largest bank of tea and vegetable, lent money to the second hospital to make the second hospital self reliant.

This time, the tea element medical market is like boiling water into hot oil, and the oil and gas soar to the sky.

"Dean, they have bought a lot of things. We....." Chen Sheng of the medical department is a little worried and angry these days.

"No hurry, what's the hurry. Let them buy it. We'll see. These things will be mine sooner or later, ha ha!"

The old lady recently moved the cactus to the office of the Health Bureau. Watering the flowers and thinking about things, the cactus has developed Narcissus!

Many times, just like farming in rural areas, his family made a fortune growing garlic last year, and then the next year, garlic all over the world. As a result, when they harvest, they roast garlic, sweet and sour garlic, mashed garlic and rice under garlic petals. If they don't make money, they feel uncomfortable eating.

The tea element medical market is now in such a state. Is there anyone who can see clearly? Yes

"Your family Zhang Fan has gone to Dubai? God, I didn't take you. Why didn't I take you, ah! If it were me, I would follow and buy! "

Hearing that Zhang Fan went to Dubai, Jia SuYue was more excited than Shaohua. He shouted loudly when he spoke excitedly.

"Yue Yue, my God, you're going crazy. Drink some yogurt quickly. I've taken it. He's going to work. They called me yesterday and they didn't even get out of the hotel gate. "

Shaohua quickly covered Jia SuYue's mouth. The girl is crazy. It's frightening. Several young men who led the table had seen it secretly. At this time, they took the opportunity to look at it openly, and several others were eager to interrupt.

Due to Jia SuYue's excitement, some fashion trends that girls pay attention to are often released in Dubai, and it is said that they can buy a limited edition. Therefore, Jia SuYue's eyes are as bright as lights.

"Hey, Dubai, they didn't even get out of the hotel gate. It's really..."

After that, he was afraid that Shaohua would be unhappy and hurriedly said, "do you think your black stone will buy you a gift. Will you give me some at that time, my Hua, I like you best! "

The two chatted. When Zhang Fan was there, Jia SuYue rarely asked Shaohua out.

When Zhang Fan was away, he became Shaohua and asked Jia SuYue. With the change of Zhang Fan's identity, Shao Hua is becoming more and more cautious. He will always be with Jia SuYue and Wang Yanan.

"He doesn't have time when he goes out to work. Do you eat or not? I'll go. Inviting you to dinner won't stop your mouth.

Has Yanan called you recently? "

Jia Su is eating instant boiled mutton. It's getting hotter and hotter. It's estimated that he won't be able to eat mutton in a while. So this time, they came to little fat sheep to eat instant boiled mutton.

"No! I went to a big city without conscience, and there was no news when I went to the capital. I sent a text message to me a long time ago, saying that she had arrived in the capital and everything was going well.

Then there was no phone call or information. Sometimes I called her, either turned off or no one answered.

What you know is to study, but what you don't know is to go to jail. Is the study of medicine so terrible? Don't even have the time to make a phone call? "

"Oh, she's too strong."

Wang Yanan, who was far away in the capital, completely conquered shuitanzi's operating room.

Originally, the director of orthopaedic University explained that everyone took good care of her from top to bottom.

As a result, the girl had an operation. She worked too hard.

Her hair was originally short, but somehow she twisted it into a board inch.

From trauma to joint, from joint to spine, from spine to tumor. She followed all kinds of surgery and all kinds of treatment. She studied hard. If she didn't understand, she asked. If she didn't understand, she turned the book.

The whole is a replica of Zhang Fan's study in Qingniao. He even likes shuitanzi's orthopedic teaching.

"Ya Nan, our hospital has places outside the establishment. As long as you graduate from master's degree, I can take you directly to my doctor and stay here directly. At that time, the preparation of anything will not be a problem.

You don't have a date yet. Stay. You can choose the best guys in the capital! "

Wang Yanan always smiles and doesn't agree or disagree.

When the girl grew up, not only did she like teaching, but even the nurses in surgery liked the female doctors from the frontier.

Atmosphere, never haggle over every detail.

Not only Wang Yanan, but also the doctors who went out. Like drowning people, they tried to seize the opportunity to save lives and absorbed advanced treatment methods like a sponge.

Do you want to stay in a big city? Thought about it, but Zhang Fan, like a magnet, attracted them and attracted them back.

"The boss heard that he went to Dubai to fly a knife?" In foreign hospitals, doctors discuss in private.

"Well, it is said that it was summoned by Zhang Yuan who came last time."

"Hey, pony, are you familiar with your Dean? Can you talk? Next time you go abroad to fly a knife, take us with you. "

The foreign doctor joked with Ma Yichen.

.....

At night, lying in bed, Zhang Fan went to sleep early. As a result, he tortured the sentiment of the day and was clearly caught by Zhang Fan in his dream.

It's really thoughtful day and dream night. In the dream, Zhang Fan is having a daytime operation. What he felt dissatisfied with and what he felt needed to be improved were improved one by one in his dream.

One night's dream, a whole night, is like being single for 30 years and emptying the inventory for 30 years.

The next day, fortunately, there was no operation. When Zhang Fan got up, his steps were vain. It was really like a strong man entering his bridal chamber.

He washed his face in a hurry. Zhang Fan said hello, hurried into the bedroom, and then entered the system. He was afraid that he would be tired all night and his achievements would be forgotten.

In the system, Zhang Fan enters the operating room and starts the intestinal tumor from scratch. The

feeling in the dream was really caught by Zhang Fan.

The more you do, the easier it is. Once, twice, ten times!

Out of the system, his stomach rumbled with protest, but Zhang Fan was quite excited.

Gastrointestinal perception! Gastrointestinal sublimation!

### **Chapter 888**

There are too many smart people in the world.

Zhang Fan's dizziness tortured by perception in bed finally got a big return. This is not a coincidence. It is a quantitative change to a qualitative change.

It has already accumulated to a certain level. It can be regarded as gushing out in the hands of top intestinal experts.

Zhang Fan is dizzy for promotion. Master brother took several others to seize the time to study the advantages of other teams.

Not only is the medical team of sinocatechin studying, but other teams are not relaxed.

He said: the Chinese medical team is lucky, but he has long put the Chinese team in the position of his opponent.

"His speed doesn't seem to be very fast. But did you find that from beginning to end, he didn't have any superfluous movements. There is even predictability... "

On this day of rest, Marubeni watched Zhang Fan's operation videos repeatedly, and even asked their domestic equipment manufacturers to send all the operation materials left by Zhang Fan in Mordor.

"He is too thorough in anatomical research. We are careless. This was originally our strength, but now it has become the strength of China."

The German team watched the video and they were very similar to the operation method, and they

didn't know whether it was sweet or bitter.

"Predict, look, he can predict. The control of bleeding points is too strong. We need support! "

When Americans didn't watch the video, they protested and watched the video. It was soft!

Finding a problem is to solve the problem. From Zhang Fan's operation video, they also found their own shortcomings. Although they can't make a big breakthrough for a while, at their level, as long as they can find the problem, it is quite expected.

Operation day!

"How are the doctors resting. Are you satisfied with your room and board? " When the Saudi attendants saw Zhang Fan and them in the hotel hall, they immediately came forward to greet him.

These days, they are on standby almost 24 hours a day, just to serve the experts of several hospital teams.

"Not bad, not bad!"

Without words on the road, various medical teams set out to enter the hospital.

Enter the operating room.

Still female patients, still elderly obese female patients.

It can be said that the examination is almost similar to the previous patient. If you don't look carefully, you think the examination results of the previous patient are left in the operating room.

"Start!" After disinfection and sheet laying, Zhang Fan said softly.

This operation is the final circle, okay? Who will do the Queen's operation? Not only do medical device manufacturers pay more attention, but embassies of various countries and even companies with more interests in Saudi Arabia are paying more attention.

After all, they are the royal family. Although they are secularized, they can

The operation began, as like as two peas and a hook were put into the abdominal cavity.

We all know that the knife cuts a hole in the skin, but many people may not know what and how to pull the hook.

In fact, it's very simple. Many people probably have seen the mouth. The doctor takes a small mirror with a handle and then a small drill. Before drilling, the mirror is like an endoscope. After drilling, the mirror is a retractor.

Pull your mouth open and wide with the handle. Sometimes, after reading the stomatology department, your teeth don't hurt, and you feel your face hurts, as if someone twisted your face.

In fact, abdominal surgery is the same.

After entering the abdominal cavity, Zhang Fan immediately became much faster than the chief surgeon of other teams.

Without realizing the value, Zhang Fan has been on a benchmark with their level. With the feeling, Zhang Fan is more at ease at this time.

The referee team in the observation room looked at Zhang Fan's operation display screen. One by one, they were silent and stared at the young people in the display screen.

If it hadn't been for the fact that several people shook hands with Zhang Fan in the operation hall before the operation, they might have called for a change in the chief surgeon of China.

Especially the British experts, although they are old and can't compete with the younger generation, they still have a good eye.

"Did he have reservations about the last operation?"

"Well, the level has risen to a higher level. The Chinese are too cunning!" French doctor, almost jumped up.

Experts watch the doorway and laymen watch the excitement.

The prince of Saudi Arabia doesn't know whether the operation in the display screen is good or not, but the British and French experts invited around him are not calm, and even the doctors in his own country are in a commotion.

"What's the matter? What's the matter? "

"The main knife in China is very powerful. The operation the day before yesterday is very different from today's operation."

Saudi doctors explained it themselves.

"Is it good or bad?"

"It's getting better, the operation has become more severe, and the injury and accuracy have been improved a lot."

"Well!" The prince of Saudi Arabia didn't speak, but he clicked in his heart, "it seems that he didn't entertain well on the first day!"

Zhang Fan is getting more and more comfortable here. Just like riding a bicycle before, he has now become a motorcycle. He feels very comfortable.

In the past, we had to be careful. At this time, it's too simple in Zhang Fan's eyes. The steps of the operation have been greatly simplified, and the injury has been reduced a lot.

It is useless to prepare blood supplies before operation, because the bleeding during operation is almost negligible.

Zhang Fan's master brother, come on, follow Zhang Fan" After sleeping all night, how did younger martial brother become so powerful? "

Zhao Quanping and Song Ping looked at each other.

"In the future, I'll see if you dare to make trouble. Zhang Yuan has a temper. See? Zhang Fan's level yesterday is to accommodate us. Today he took out his real skills."

Lao Zhao looked at Song Ping. He felt that Song Ping could understand what he meant.

"I can't make any more noise. Zhang Yuan is too scary. Lao Zhao is too thief. He already knows the level of Zhang Yuan, but he doesn't say he is transparent. " Song Ping looks at Lao Zhao and then at Zhang Fan.

The operation was carried out quickly. The tumor was removed and the lymph nodes were cleaned at one go.

The nurses specially equipped for China on the operating table were directly equipped with two instrument nurses.

This time, there is no lack of cooperation.

Zhang Fan's operation ended more than half an hour earlier than the previous one.

Postoperative treatment, patient observation do not have to worry about Zhang Fan.

"Their operation is over!" In the observation room, the referee team was stunned.

When Zhang Fan and his team finished, the other team had not even removed the tumor.

"Today, all teams have made progress, but in front of the Chinese team, everyone's progress is not worth mentioning!"

What the British say is still very pertinent.

"Can we let the doctors in China take the lead and let the main knives of several other teams act as assistants, and combine the strong and the strong. Is the operation better?" The prince has a good idea.

As a result, not only British and French experts did not recognize it, but even doctors in their own countries did not support it.

The operation is over.

"Did you hide your hand?" After the operation, the master brother said to Zhang Fan dissatisfied.

"I broke through last night!" Zhang Fan whispered to the master brother.

"Breakthrough?" I don't say it's OK. When I say it, I feel bad for a moment. When he broke through that year, he felt that the previously confused places had a direction and a direction of efforts.

But the little younger martial brother's breakthrough is that the operation level has been improved by several levels“ Is my breakthrough false? "

After leaving the operating room, Song Ping stopped showing off this time, but walked quite steadily in the channel of the operating room, holding his head high!

"They're over!"

"They're over!"

"They're over!"

## **Chapter 889**

Everything is afraid of comparison.

Even if not compared with others, Zhang Fan's operation is better than the last one.

Not only in terms of speed, from surgical wound to lymph node dissection, it has significantly improved a level, but also some small hand segments on the micro level, which have been refined in the macro

aspect of the operation.

After the operation, Zhang Fan was in a much better mood. Ordinary foreigners have been open for a long time, but only the liver and gallbladder have been improved and realized. Other disciplines are as stable as an old dog, and there are no signs of loosening.

Zhang Fan wondered if he should find a famous hostel to study. As a result, I had a feeling under pressure.

It seems that people still have to be under pressure.

The Chinese team left the operating room. Outside the operating room, the Saudi prince regiment personally met Zhang Fan at the door of the operating room this time.

In the operating room, the people of MARUKI found Zhang Fan and they had left.

"They must have rough surgery! Sure, otherwise I wouldn't have finished the operation so early. "

Because they are all Asians, Marubeni is very sensitive to Chinese people. When they walked through the door, Marubeni's doctors recognized Zhang Fan at a glance.

"Gentlemen, please come on, the victory belongs to us!" The chief knife of MARUKI country swallowed his saliva, and his voice was full of self-confidence.

Both Jianghu people and life fighting people.

No one will give up on themselves and easily admit defeat. At this level, almost all are people who never say die.

Zhang Fan is not used to the face-to-face comity of the prince regiment. After the operation, the prince regiment was even more warm and polite to Zhang Fan.

They are not welcome. There is a local proverb that I deal with the enemy with my cousins and with my cousins.

In fact, in a word, when the paternity is the same, whoever has a powerful mother and wife can take the opportunity to reach the top, and then spend endless money. Therefore, when Zhang Fan showed obvious skill, the bearded princes smiled with extra sincerity.

When the operations of other teams were finished, the faces of other medical teams were obviously not very good-looking.

Because they lost inexplicably.

When they came, they imagined that the enemy had thought well and did not take China to heart at all.

As a result, China won the first operation. Everyone feels that they underestimate the enemy and neglect. They feel that there are still a lot of technologies that haven't come out. Moreover, when looking for tumors, China is right. They always think that China is luck.

Although they seem to deceive themselves, they still prefer to believe that China is really lucky.

After the first day of surgery, expert groups from various countries kept looking for their own shortcomings, and even several doctors took turns to take charge of the surgery in their best fields.

Lymph node dissection, severe lymph node dissection, tumor resection, severe tumor resection. Almost one team did their best.

As a result, just like joking, the harder you work, the greater the gap. The harder you work, the greater the disappointment.

When they finished the operation, they didn't wait for the resumption of the referee team to call out the video of the operation just ended, and the scene began to compare.

The United States, Germany and Marubeni have not been left behind. Lao maozi has returned home, while Zhang Fan and they went back to the hotel early to have a rest. For the resumption, in Song Ping's words, it is: not interested!

"My Lord! Why can he find the blood vessels with tumor variants ahead of time next year? "

"How can lymph node dissection be done like this? The following is the artery. How did he control the strength? One more point is the rupture of the artery. How did he do it? "

Marubeni's team's face is too green to be green, just like the Green Persimmon without much sun.

If they lost to a famous Chinese scholar, they would have endured it, but today they were beaten by a small doctor in the northwest frontier of China.

The heart is really very depressed, just like the baby's heart is bitter and the baby can't say it. He can't even explain or even make excuses.

This time, several medical teams really came prepared.

If you take the Queen's operation, you can smoothly enter the Haihe country in the future.

These countries are local tyrants. It's almost said that there are many people coming at a silly speed.

Moreover, several countries have also given considerable support to the medical treatment.

As a result, I woke up and found that someone had touched the champion. Really, that is, modern. If I move up for so many decades, it is estimated that several people in Marubeni will pull Zhang Fan to see their intestines on the spot.

Officials from Saudi Arabia and the United Arab Emirates are still very enthusiastic about these expert teams. Although others have failed, these experts are still world-class doctors and will not turn their faces because they almost recognize others.

"The day after tomorrow is the operation day. I invite experts and scholars to the observation room."

The prince smiled very charming, and his blue face was shining, just like Pluto who often robbed Oliver with Popeye.

"No, there is no such item in our itinerary. Only others watch our surgery in the observation room. We have never watched others' surgery in the observation room.

You can choose whether we need surgery or Chinese surgery! "

The Yankees are probably confused with anger. They clearly lost, but they don't admit it. There was a slight threat in the tone.

But they threatened the wrong person. Wang Zi Tuan looked at those in white robes as if they were fasting and chanting Buddha, but these guys played with lions and tigers.

Can a lion or tiger be a pet? In myth, this is what Manjusri Bodhisattva can do.

Before comparison, the Yankee cow was a cow, and people put up with requests. Now they have better ones and don't pee them at all.

If at the national level, Saudi Arabia absolutely hugs the Yankees' thighs, but at the personal level, these princes are very wild, let alone you are a doctor. People even dare to fight American ministerial leaders.

The Yankees scolded and walked away, saying they wanted to protest!

The expert team of Marubeni has been smiling. After the Yankees left, they bowed gently, "it's our fault that we didn't help you, but for the operation the day after tomorrow, we must come to the observation room. If you need any help from us, don't refuse!"

It's very nice to say. In fact, meatball country is not willing to lose. However, they must see Zhang Fan's operation again, or have an accident? Or some man-made accident?

The German medical team didn't go either. Shrugging their shoulders, they also wanted to see it.

The preliminary treatment plan has been customized.

The Saudi prince regiment decided that the queen would be treated by the medical team of Chinese tea.

When the announcement was issued, people who paid attention to the medical operation were in an uproar.

No one will be surprised whether the United States, Germany or even Marubeni win.

The result was finally won by the unknown Chinese team.

If it weren't for the Royal spokesman, everyone would think it was false news.

The Chinese Embassy, "really? Are you sure? Is the message confirmed? "

The ambassador holding the armrest of the chair was shocked by the news and was half seated.

Tea Su's team can enter the finals. He already feels that his goal has been achieved. As long as he is not the last, that's enough. It's a long face.

I didn't think so. This time my face grew up.

"Yes, I'll be there." As the second secretary in contact with the tea vegetable team, he reported the good news to the Ambassador with a smile.

"Great, great, great! Come on, send the news back home. If you stay in the hotel today, you must be responsible for the tea vegetable team. After all, they are not used to language and life. They have to meet any requirements. If you can't decide, call me at the first time. "

"It is said that Doctor Zhang Fan likes drinking Tieguanyin. He doesn't like black tea and coffee here..."

The ambassador almost rubbed his hands. I was going to lose face, but

What a surprise.

When the second secretary said this, the ambassador gave the Tieguanyin hidden in the cabinet to the second secretary.

He said that this is good tea and should be rewarded to Doctor Zhang Fan. He kept comforting himself that the teapot is broken and the teapot is broken. He should borrow flowers to offer Buddha.

In China.

"What did I say? Ha ha, what did I say. Our medical staff are still very good. This time, we must take the opportunity to make their oil a few cents cheaper for us. "

The Ministry of foreign affairs, when the ambassador gave back the information, the two leaders who had made the decision couldn't close their mouths.

If you are sure, you may not be so happy. This unexpected joy really makes people suddenly feel that the sense of happiness is too strong.

The United Arab Emirates.

Although the meatball country looks like a little place with a big egg, this country really can't be underestimated.

"We must have an operation with Zhang Fan, the chief surgeon of tea vegetable. The injury rate of his operation can be almost half as low as ours. Although there are videos, he is still not familiar with his last hand.

We must learn this technique. For our country, for our country's medical health... "

The person in charge of the medical team, through their local ambassadors, called not only government officials, but also business leaders here.

.....

"The medical team of Marubeni suggested that we replace the Queen's assistant for surgery. They can send the best doctors to assist the Chinese medical team.

For the sake of the Queen's health, they would rather let the best doctor in Marubeni be an assistant. "

The princes thought it was good to speak well and pleasant to their ears. After all, medical treatment is like this. There is no best, only better.

"What's your opinion?"

There are no doctors from other countries this time. They are all Saudi doctors. For the Queen's disease, it can really be said that Saudi top doctors are in the UAE all day.

"Since we have decided to let the Chinese team operate on the queen, if there is a change, we should discuss with the chief surgeon of China."

Marubeni not only gives Saudi Arabia high sounding. Moreover, people are prepared with both hands.

When the tea vegetable team was on the road, they were more serious and solemn. They were afraid of being seen as happy.

After entering the hotel, Dr. Li of Mordor began to tremble, "we won, we won. We really won. "

"Ha ha, of course we won, ha ha!"

Lao Zhao and Song Ping were particularly happy.

Master, I'm a little steady, but I'm still a little incoherent when I call the teacher.

The dimples on Ren Li's face laughed.

They can't help but be agitated. In the medical field, especially in general foreigners, almost all surgical methods are carried out by foreigners.

This is why Mr. Qiu and Mr. Wu are particularly famous in China, not only because they have done well in surgery, but also because they have created a high level of liver and gall that foreign countries have not done.

Zhang Fan is also happy.

Just as everyone was smiling, the Saudi servant said that experts from the meatball country came to visit.

"Huh? What are they doing? "

People before the 1980s probably didn't like this country. Even if their wells are empty and powerful, they can't make these generations feel good about them.

## **Chapter 890**

Marubeni has no burden on others to learn and imitate the strengths and advantages of other countries.

They think that since others are advanced, why don't we study.

When they are weak, they are like a sheep. Once they surpass, their faces will be ugly.

Therefore, this big egg country is very contradictory.

When the door was opened, the medical team of Marubeni made a 90 degree bow, just as Zhang Fan was more polite when they went to the bottom of the sea, or when they went to a high-end club, the girls shouted uncle.

This battle, this battle, to tell the truth, Zhang Fan was stunned. The Second Secretary of the Chinese embassy also rushed over. Now Zhang Fan and they are already people. If something really happens, the ambassador may be able to stew him.

"Please accept our respect, sir!"

Marubeni brought an interpreter.

People gave a big gift at the door. Zhang Fan, after all, came from a country of etiquette. They were always embarrassed to shut people out.

However, there is no need to think about it. People who are so humble are not cheap. They definitely come to beg.

However, if Zhang Fan abandons his status as a doctor, they are actually ordinary people.

Zhang Fan's vice president is a little less thrilling. He is protected by Ouyang and helped by Lao Gao below. In the distance, there are two leaders of the same level as the industry God, so he has never experienced any big intrigue.

Even the master brother doesn't have any struggle experience. Although he is a foreign-related Dean, he is a business unit after all. The people in this unit seem to be angry with children in the system.

Zhang Fan's family, a medical elder brother in China's early years, said that if you enter, you will save the world, and if you leave, you will save the people.

It seems that doctors in China have a political mind. In fact, it is not. Modern medicine is a natural discipline.

Chinese medicine in the early years was different. It was not only a discipline of saving people, but also included the philosophy of the birth of China. Gold, wood, water, fire and earth, five elements. Yin and Yang, this thing is a philosophy.

Therefore, people can not only sit in the temple as an official, but also practice medicine and walk barefoot in the Jianghu, but now doctors can't. If they fiercely put a doctor into officialdom, it's estimated that they can be sold and help others count money.

It is not that modern doctors are stupid, but that modern doctors have not studied the so-called philosophical system. Learn some Freudian psychology and go all the way to morbid and lower three ways.

Therefore, in the face of the courtesy and humility of others, I knew they wanted something, but I still let them in. If Ouyang were here, he would never be so good with each other.

"We are willing to do everything we can to help you do a better job in the Queen's operation. Please rest assured that we are just assistants. Any benefits are Chinese and gentlemen's."

"Well!" Zhang Fan looked at it with everyone. Zhang Fan is not stupid. Can you help with the operation he can complete.

But it's too polite to see each other. It's a little hard to refuse.

"Our Chinese side has determined the surgical personnel. Even if necessary, we can send doctors from home, so I'm sorry."

The other party smiled and let Zhang Fan refuse with a black face. It's really difficult for these people.

But the second-class Secretary didn't give it for nothing. When he saw Zhang Fan's face embarrassed, he stood up directly.

While talking to the people of the meatball country, he also said to Zhang Fan: "Doctor Zhang, please rest. Everything here has me."

Good door god, Zhang Fan gave a thumbs up in his heart. After all, not many people naturally like to be evil.

"Please wait a moment!" People in Marubeni do not give up.

"Saudi Arabia also means that. Please rest assured, sir. We just want to help you."

The more simple, the less simple!

"They want to share our table fee?" Zhang Fan looked at the tea vegetarians. Although he didn't speak, he didn't have to say the meaning of holding his index finger with his thumb.

"Absolutely!"

"It must be!" Song Ping and Zhao Quanping nodded and said positively.

Ren Li is almost dizzy. Who are they!

Master brother thought more. He gently pulled the second-class secretary's clothes. "They probably want to learn my younger martial brother's surgical techniques."

"That can't let them succeed." The second secretary will call the ambassador right away. You're amazing. I don't count. Let my boss tell you.

"Wait, wait a minute." Master brother knows that Zhang Fan's technique can't be learned by looking. If you can learn by looking, you're too sorry for the subject of surgery.

Master, why are you so sure, because he can't learn!

The curettage spoon on the surface of the main artery is like scraping. It is brushed with an iron spoon, even scraping the lymph of the belt meat. This level is definitely not something you can learn by looking at it.

Master brother knows that Zhang Fan has been cultivating his team. If he does not lack people, he will not let him from far away in the magic capital to help, nor will he bring an old doctor of two ages who is about to enter the trembling eyes.

Not to mention the others, Marubeni is really a cow in terms of general surgery and gastroenterology. Therefore, he said to Zhang Fan, "they can train your people! It's estimated that they won't see your operation.

And even if they don't let others see it, it's estimated that the video of the operation will be taken back by others for research. In fact, it doesn't make much sense for them to go to the operating table. What do you think? "

Master brother said so, Zhang Fan was a little moved. In terms of great feelings, the progress of medicine should benefit all mankind.

In a conceited way: come on, if you can see it, I won't do general surgery in the future!

Just like the old general of China went to the United States to see other people's helicopters, others generously let you see!

Zhang Fangang wanted to agree. Ren Li said softly, "Zhang Yuan, let's say it to the European court!"

As soon as Zhang Fan listened, he immediately said with shining eyes, "Hey, how can you forget the leader."

Ren Li is embarrassed! I wanted to explain, but I didn't.

In fact, she means that the old lady is a bone scraping expert. She thinks Zhang Fan is wrong.

However, Zhang fan understands what she means. Ren Li is neither a man of right and wrong nor a person enthusiastic about her official career. She really wants to help him. Otherwise, why don't Song Ping and Zhao Quanping say so.

"Ouyuan, ha ha, have you had a rest?" Dubai is more than four hours later than the frontier. This time is estimated to be the time for the old lady's lunch break.

"No, no, how, how, everything is all right!" After they went to the UAE, the old lady was always empty in her heart. Although she kept playing with her heart, Ouyang didn't let go of the level of leaders of the second and third hospitals.

"I have good news for you. Saudi Arabia has decided to let our tea vegetable medical team operate on the queen."

Zhang Fan said on the phone with a smile. After all, it is a small border city, and the level is not high. The Ministry of foreign affairs will not specially inform the tea vegetable hospital.

"Good, good, good, great! Surgery is important, and you are more important. You must take good care of yourself. After all, you are not in your own country. Be careful. I won't talk to them. I'll congratulate you when I come back.

All right, you also have more rest. If you have nothing to do, you'll hang up. " The old lady stealthily wiped her tears on the tea vegetable side, and her voice was a little choked.

Just like her own child, she has finally achieved success. The old lady really can't say the sweetness and bitterness in her heart.

"No, European Academy, there's another thing I want to report to you..." Zhang Fan said about it again.

"What, there is such a thing. Are you dough? Let others knead it!"

The original choking voice immediately increased by seven or eight degrees, just like the old hen who was going out to fight immediately, the hair exploded.

"We can send someone to study in meatball country!" Zhang Fankou's water is coming down.

"No, there is no such good thing. You can't just send some people. You call Secretary Ren."

"European Academy!" Ren Li blushed and looked at Zhang Fan. Fortunately, Zhang Fan didn't understand wrong. Otherwise, it's a problem how to explain to a small leader much smaller than herself.

"Do you think we need an intracardiac ICU or a respiratory and critical care unit?"

Ouyang knives are polished. If Zhang Fan could call, she knew Zhang Fan was sure.

Now the development of surgery is too fierce to let the internal medicine down.

Ren Li held the microphone and said to Zhang Fan, "Zhang Yuan, the European institute wants to establish..."

Before he finished, Ouyang shouted at the other end of the phone, "don't discuss with him. I can still decide. He hasn't become the Dean yet! I'm asking you now. "

What does she do? Even if she is not in front of her, she knows what Ren Li does.

"Secretary Ren, you decide, internal medicine, you decide."

"European hospital, or we need the respiratory critical department, but can we get there?" Ren Li asked hesitantly.

"Whether you want to arrive or not, you have to!"

After saying that, Ouyang asked Ren Li to open the release and began to command on the spot.

"Ensure that five people in our hospital study in your hospital in turns every year, and they must study in a real way without mixing water."

"No problem. Absolutely guarantee the same training as doctors in our hospital. Can we have surgery? "

"It's not over yet! Under the assiduous study of our president Zhang, we don't know how much we have suffered and suffered. Look, our face is tired and black. Do you want to get cheap like this? At least you are a developed country! "

The second-class Secretary blushed when the voice came out of the phone. It was not shame, but

inferiority. This is the diplomat! This is the ambassador! Experts are among the people!

Zhang fan can't wait to hang up.

"Please, please!" The experts of meatball country despised it gently in their heart. Even if you have an expert in surgery, what can you do, what can you do?

"In the face that our two countries are neighbors, I need a complete set of hospital equipment! The level must reach the level of specific functional hospitals in your country, and the equipment must ensure the same level as that in your country. "

The sweat is coming down. Really, the sweat is coming down.

Many things in this kind of hospital are embargoed. As soon as the woman opened and closed her mouth, she almost scared the experts of meatball country to death. Other people's specific functional hospitals, such as ministerial hospitals in China, are not a matter of hundreds of millions of yuan, but a matter of billions or even tens of billions.

His face is purple, but if you ask for help, the meatball country is really indomitable.

"It's not that we don't want a specific level of hospital. We can't do it. Even if the equipment is given to you, we can't pass the customs!"

Be as humble as you are.

"Can't you do that? Is that how you learn advanced technology? "

Ouyang was not moved by the politeness of others, but began to cross examine!

"Come on, come on, you can't do anything big. Surgery is OK, but you can't be an assistant. "

"We..."

"Then build me a hospital!"

It's unreasonable. It's too unreasonable. Experts in Marubeni country keep wiping the sweat on their forehead with a white handkerchief. The super star hotel air conditioner is too fake.

"OK, we won't have surgery! However, we must have the right to ask questions, and your doctor must have the responsibility to explain to us. Please rest assured that we will never interfere with the doctor's operation. "

"More questions? Then set up a respiratory critical illness department for me. Stop bargaining, or I'll hang up! "

A hammer knocks golden flowers in the eyes of experts in the ball country! Then I had to agree to this unequal condition.

Ouyang's momentum is too strong. Opening your mouth is the hospital, and closing your mouth is a specific level. Experts in Marubeni are a little regretful. Even a respiratory intensive care department seems to cost a lot.
