

Chapter 891

Digestion, meatball country cattle force is excusable, such as gastric cancer. Their country has the highest incidence in the world, the second Bangzi country and the third China country. Of course, in terms of the number of people, China can still be the boss.

But people's breathing can not be underestimated, especially the research on oxygen free radicals in the lungs is not as thorough as that in Europe and America.

Endoscope, Olympus is loud.

Stethoscope, a bell modest, will dominate Asia.

People are especially good at these gadgets. I don't know why.

After negotiating the terms, marukuo left politely. It is estimated that they will subvert the image of hospitality and generosity in China!

After seeing off the guests, Zhang Fan invited the second secretary into the room. People are very polite, "no, no, it's not good to disturb your rest. I'll just sit in the hall and drink coffee. It's very good!"

When people say so, Zhang fan can't let people go.

"Thank you for coming abroad for surgery this time. Otherwise, we will discredit a lot of things."

Zhang Fan said politely.

"Hey, Zhang Yuan's criticism is right. Our work is not in place!" Zhang Fan is really polite. The second secretary thinks Zhang Fan has something to say.

"It's really good. You see, you helped collect their data. It's not easy for us to collect them ourselves!"

"Thank you. It's all our job! Zhang Yuan, this is what the ambassador personally told me before I came to let you and your team have a good rest. There is also this tea. Listen to your love of Tieguanyin. The ambassador specially asked me to send it. You can give it to me. "

"Well!" Zhang Fan is embarrassed. His hobby has spread abroad!

In fact, this was later investigated by others. What does diplomacy do? It's not just a messenger. This is their basic plan.

After a few greetings, the second secretary didn't bother much, so he got up and left the room. Before leaving, he handed Zhang Fan his own business card. Zhang Fan had no business card and had to leave the phone to others.

People said for a long time, in fact, that's why!

Out of the room, the second secretary sighed a long sigh.

Lonely after excitement, I used to be another family's child, but today I'm looking at Zhang Fan, "others are serious children, other people's children!"

In the suite, whether you take advantage or not, the main problem now is to discuss the operation for the queen.

And it must be written, which needs to be handed over to the Saudi side in advance.

In this regard, Zhang Fan's elder martial brother is an expert. He is engaged in foreign affairs and has too much experience. This is also the reason why Zhang Fan specially asked his elder martial brother to help rather than other elder martial brothers.

There are specialties in technology!

The next day, Saudi Arabia invited Zhang Fan to eat and catch camels. Zhang Fan refused after soliciting everyone's opinions. Just have a meal. It's boring to eat all the time.

That thing is not something that ordinary people can conquer. But camel milk is good. It tastes purer than milk.

"Zhang Yuan, hey hey!" After discussing the operation plan, Song Ping came to Zhang Fan like a thief.

"What?" Zhang Fan is studying with the scheme written by elder martial brother. Specialty is specialty. In some details, I really have to say that elder martial brother has done quite a comprehensive job in this regard.

"Didn't MARUKI agree to let us study? Hey, hey, do you think I'm qualified? I've been following your

baton since you took charge of surgery! "

"Oh, really want to go?"

"Yes!" Song Ping's head is like a chicken eating millet. It's a joy to order.

"Ask your director to report the list. If it is approved at the Council meeting, I have no problem."

No problem is a problem.

Ordinary foreigners are making too much trouble. Bully the good man Zhao Quanping one by one. Don't do it. For a while ago, some people had to quarrel about division. If you don't knock now, it will be fine in the future.

Lao Zhao followed Zhang Fan in earnest.

Moreover, Zhang Fan himself has selfishness, and those who have no selfishness are saints.

Their own team must be young people. People like Song Ping, who are less than forty-nine in their fifties, must be placed in the second batch. Their technology has been finalized. Even if they go to study, if they don't go through scientific research, they won't improve much.

For example, sending Ma Yichen out and Song Ping out will definitely have different learning effects.

However, it can't hurt their self-improvement. Zhang Fan's idea is that four of the five are young people and one is a doctor at the director level.

Moreover, there must be three surgeries and two internal medicine, otherwise Ouyang will never do it.

After a day's rest, it is estimated that Saudi Arabia has explained. In addition to discussing an operation plan with Zhang Fan, no one will disturb Zhang Fan and them any more.

The next day, the dust finally cleared up. Standing on the top floor of the hotel and watching the waves, I really felt like a king in the world.

Get up and wash!

When Zhang Fan came downstairs, everyone in the team was on standby and watched Zhang Fan come down from upstairs.

Everyone looked at the young man quietly.

"How was your rest!"

"Good!"

"Zhang Yuan is very good!"

"Miss Zhang, I slept until dawn!"

"Just rest." Zhang Fan smiled. Everyone's mental outlook was good. With a trace of excitement, there was no need to cheer up.

Operation room!

Zhang Fan, they have been on standby, "debug the instrument!"

Zhang Fan ordered.

"ECG monitoring is normal!"

"The aspirator is normal!"

"The electric knife is normal!"

It's not that Zhang Fan is bored, but that the queen is too boring. The doctors have come, and the patient hasn't appeared yet.

There were three doctors from Marubeni country. They all bled a lot. They were not polite.

Dr. Li of Mordor was full of happiness at this time. Not to mention the harvest after the operation, first of all, the doctor in the capital had been called back by his mentor, and he had to peel off his skin.

When the young man left, he wanted to ask for a marriage. As a result, he didn't even see Zhang Fan's face. The second-class Secretary stopped him directly.

After the equipment was debugged, Saudi Arabia was pushed in by a wheelchair.

It's not like the patients in the first two operations to show their eyes from beginning to end.

The queen was wearing a black variant one-step skirt and the white collar dotted between her neck, just like drawing the dragon's eyes. It seemed that this suit was particularly noble.

It is estimated that it is also the psychological function of everyone.

The queen is not young. She looks almost in her early fifties. Although she maintains well, she still can't hide her illness on her face.

After entering the operating room, with the help of the nurse, the queen got up and nodded to Zhang Fan. Zhang Fan and they also nodded to each other, while MARUKI bowed with a low head.

On the stage, Ma fan!

Into the operating room, let alone identity, sometimes even men and women.

I didn't say what kind of treatment the queen would give. If Ma fan should take it off or take it off, tie it or help it.

He took off his skirt, his lower body was obviously like a baby, and he was wearing a large adult diaper.

It's just changed.

It is estimated that before the operation, the queen took her hand again.

Intestinal surgery, in the United States, there were no requirements, no enema.

Asian countries have this requirement.

But intestinal tumors, whether there is something in your gut or not, even if there is no food, it will stimulate a little blood from your gut.

So, like a large baby, the queen always wears diapers.

It's also very sad.

Chapter 892

In the operation of female general surgery, once the lower abdomen is involved, the surgeon often needs to ask a gynecologist for consultation before the operation.

When the surgeons were preselected, doctors in Saudi Arabia thought of this.

Moreover, it has deliberately made it more difficult for doctors to find patients one by one. Obesity and non obesity, especially in general surgery, are different in difficulty.

A good general practitioner can be a gynecologist, but a good gynecologist may not be able to be a general practitioner.

Therefore, when performing surgery on others at that time, it was to clarify the level of the invited

doctors. Therefore, they actually didn't invite gynecologists, and several medical teams were embarrassed to say.

Who says, who seems to be poor.

And now in order to improve the Queen's operation. Therefore, with the queen into the operation, not only nurses, but also a gynecologist.

It's really different for the same person!

"I am a lifelong professor of gynecology at the Royal Medical Association. I can provide you with all the assistance on gynecology."

For the first two operations, Saudi Arabia never mentioned gynecological assistance.

Zhang Fan thought there were no gynecologists in other countries. As a result, it was the Lord's turn today and invited all the Royal doctors in Britain.

Saudi Arabia has a good relationship with the United States. In fact, its relationship with Britain is endless and chaotic. In the early years, when the Saudi princes were still herding sheep, in fact, this was the sphere of influence of the three islands of others.

Many princes, eating, drinking, whoring, gambling and smoking, almost all play in the three islands. In recent years, the popular celestial bodies and Haitian soy sauce banquets are actually the rest of others.

Using white jade as Tang Jin to describe the royal family is estimated to underestimate the size of others.

In the meatball country, cattle are digesting, while on the other side of Sandao, it is more wonderful.

Now it seems that the three islands can't do anything, and the military and economy are mixed with the old United States.

Even the lights in the city are not as dazzling as our demons.

In fact, to quote a Chinese aristocrat with braids, our ancestors were rich.

Not to mention anything else, let's talk about medicine. A few years ago, Sandao medicine was still the leader on the blue earth.

Cambridge, Imperial University, are all gods.

Later, I don't know what happened. Mishima medicine gradually lost its reputation. Doctors are in big medical disciplines, although they are still world-class.

But I can't get into the top three.

At present, only a few medical journals and clinical disciplines, that is, dentistry and Gynecology, can be held by Mishima medicine.

I don't know what Sandao people think. Anyway, the powerful doctors went to play oral cavity and gynecology.

Is it because of older women?

Zhang Fan looked at a foreigner with a mask in front of him, like a tent on his face.

Although wearing a mask, Zhang Fan originally wanted to give others an invisible smile and wait to stand up and have a careful look.

Zhang Fan couldn't laugh.

Zhang Fan has not met many foreigners, but most of them are from small countries in the west of China.

For example, Stan and Lao maozi.

In any case, these countries are not much richer than China, even if they are rich and. So there is nothing to despise.

But the three islanders are different. It seems that the richest man in the first tier cities looks at Africans.

Obviously, it can make Zhang Fan feel that he is looking down at him with a kind of Ju Gao.

Moreover, he is not only condescending, but even as if he came to give alms. The corners of his eyes are obviously inclined to look at people.

Although he is a European with a big nose, standing in front of Zhang Fan, Zhang Fan is not only not tall, but also inclined his eyes. Zhang Fan is tired for him.

In Shao Hua's words, Zhang Fan is actually a hairy donkey. He should roll along his hair!

Although it is a close word between the two husband and wife, in fact, it also shows that Zhang Fan is a person who eats soft rather than hard.

In other words, if Zhang Fan's personality was not strong, it was estimated that he would not have been a trafficker in school. It would be more comfortable to open his mouth and beg for people than to be looked down upon.

Zhang Fan bowed his head and looked at the short and frustrated in front of him, but tried to put on a condescending big nose.

Although he didn't speak, the anger in his eyes was already burning, and I don't know why.

In the past, Zhang Fan, who was not very angry, had a lot of temper after going abroad. He was really a little flammable, easy to burn and easy to explode.

The master brother on one side also stood up. He was about to ask. The big nose didn't know what happened.

He spoke first, and he had an air of arrogance.

"Disinfection? Is that how you delayed the operation? The royal family invited you to surgery, not to chat. "

Master brother translated a sentence for Zhang Fan.

In fact, Zhang Fan probably understood and understood the meaning. At least he was ordered by his master. In fact, his English is a little standard.

However, this big nose obviously made Zhang Fan not understand the British oral English.

Therefore, the sarcasm in the tone still needs the master to explain.

"Where did this come from? How come it's his turn to draw. "

While holding Zhang Fan, Song Ping stood in front of Zhang Fan.

This posture is to fight first and lead you to sweep the array for me.

People are like this. They are obviously trying to curry favor with Zhang Fan, which is very exaggerated and straightforward.

In fact, Song Ping clearly told Zhang Fan: Zhang Yuan, I flatter you. Do you think I can flatter you?

Zhang Fan gently opened Song Ping. If he was in China, it is estimated that Zhang Fan would not talk much. After all, he was in the operating room.

But now Zhang fan can't help it.

"You are the master knife, and I am the master knife? You're here to help me. You're a consultant at best. If I don't listen to you, you don't count.

Besides, I didn't invite you for consultation? If you want to cooperate, cooperate politely, and leave if you don't cooperate!

If you can't straighten out your attitude and find your position, please go out. You're not welcome here!
"

The translator was a little embarrassed. "Elder martial brother, just tell him what I said!"

Zhang Fan doesn't look well.

"Hey, the boy is angry!" The master smiled.

Doctors, many people think that doctors are gentle, just like the old masters in the early years, are convinced by virtue.

In fact, surgeons, especially those who are more focused on surgery, hardly have a good temper.

The other party's attitude is not good, and Zhang Fan's attitude is even worse. Zhao Quanping wants to be a peacemaker, but looking at Zhang Fan's face, he didn't dare to go up.

"Yes! The master is really angry. "

"You have no right. I was invited!"

Although the translation says so, it actually means that you can't command me!

Zhang Fan's belly fire, the Queen's naked as a white striped pig on the meat case, has been turned over by hemp, and iodophor has been painted all over her belly ~!

As a result, the invited doctor actually wanted to dominate the operation? Is there a hole in the brain, or on purpose?

Zhang Fan doesn't dare to gamble, doesn't want to gamble, and there's no need to gamble. Does he not know gynecology.

Into the operating room, he is the king here, and he is the only commander here.

"OK!" Zhang Fan was angry, but he lost the mood to discuss with the other party.

Without much words, he directly picked up the phone in the operation, looked at the camera on the shadowless lamp and said to the microphone, "we don't need the gynecologist for consultation.

How do you invite him now? How do you send him out to me.

The patient has been anesthetized. If the shit expert hasn't been let out of the operating room in five minutes.

I refuse to continue the operation! "

With that, he threw the phone away.

The three doctors in Marubeni country lined up like wooden people without saying a word.

Quietly looking at Zhang Fan and the doctor of Mishima, the three people didn't even blink.

When they saw that Zhang Fan threw the phone directly, the interpreter quietly told them what Zhang Fan said on the phone.

The three men just nodded to Zhang Fan as if they were alive. In this world, there is only simple sympathy for the weak, and those who are absolutely strong will not be weak.

It is estimated that the experts of Mishima want to get more income by suppressing Zhang Fan.

As a result, unexpectedly, it broke down and kicked barefoot on the iron plate.

Zhang Fan doesn't worry about the Queen's gynecological problems at all. One palace, two nests and one road,

This is not difficult for Zhang Fan.

Moreover, not only Zhang Fan, but also Zhao Quanping.

The doctors who came out of China's early major surgery were very arrogant.

Upper can do cerebral hemorrhage, lower can cut hematoma.

Can give dystocia cesarean section, but also help family planning ligation old men.

Zhang Fan, if he talks about internal medicine, may be modest. As long as it is the scope of surgery,

there are already perfect treatment methods for these diseases.

Zhang Fan is not timid at all. Is the system for nothing? He has worked hard for two or three years, day and night. Is it all in vain?

Zhang Fan Tieqing's face is quite tough. It's just a posture of leaving if he can't.

It is estimated that many people will say that you should bear it, not humiliate the country, and have the demeanor of a nation of etiquette.

If it's something else, maybe we can make a concession, but surgery is absolutely not allowed.

Don't say bad attitude, say a bad word during the operation for this special group.

Often the chief surgeon, from the beginning to the end, from the surgeon to the anesthesiologist, from the surgical nurse to the equipment supply, are all with their own people.

Because the other side of wealth represents power! No accident, Hello, me too.

Therefore, this kind of operation is not a bad attitude. Sometimes, strange doctors can't even enter other people's operating room.

Some medical teams all over the world often sign contracts before surgery.

You have the right when to do the operation, and I also have the right not to do the operation.

This is also Zhang Fan's inexperience. China didn't really think Zhang Fan could win the operation in Saudi Arabia.

Therefore, before the operation, the medical group's own personnel repented and made trouble on the way.

During the first operation, the nurses were wrestled and beaten, as if they had eaten mouse meat.

The second operation, although the operation was successful, the postoperative treatment plan still bothered the doctor of magic capital.

After the third operation, Zhang Fan thought he should be smooth. As a result, he splashed. He didn't know that such a bastard came out of the river.

It's no wonder people want to take it, Zhang Fan. You have been invited by the royal family to have an operation and need gynecological consultation. You don't even bring your own gynecologist. Therefore, people directly underestimate the Chinese team.

He has been able to determine that Zhang Fan really needs assistance in gynecology. Without a gynecologist, they can't do the operation.

Anyway, it was Zhang Fan who begged him. He was born with white skin. Before his ancestors, the sun never set.

Therefore, after the operation, the main knife was young again, younger than his students.

The momentum rose at once.

He felt that Zhang Fan should be just a genius for ordinary foreigners, but after all, he was young, so he would never dabble in gynecology.

Then, naturally, he has to reflect his importance.

It is estimated that in the past, this man may be a gentleman, but none of the people who can get to this point is a fool. The more you can press your peers, the more you can show his high level!

As a saying goes, peers are enemies.

Chapter 893

In the past, Zhang Fan actually spoke very well. Otherwise Ouyang would not see his smiling face and would think of sunflowers.

But now is not the time to talk about who has self-restraint. Zhang Fan came out with a team and said to the big that now he represents the country and to the small that he should be responsible for his team members.

This is a responsibility, so there is no face to talk about, there is no reason to mention.

Zhang Fan glared at the camera.

The prince team was not calm for a moment.

The queen with her tongue out was almost stripped, but the doctor in the operating room has a problem now. The anesthesiologist hesitated whether to wake up or continue anesthesia with the upper mask!

In particular, Zhang Fan's phone directly made it clear that it would be better for me or him!

"Is there time to find a gynecologist now?" The prince asked the doctor of his country with a blue face.

The American team left, and the German team was just watching in the observation room. Who said that Europeans were masked and expressionless. Now their faces are very wonderful. It is estimated that they shout in their hearts: quickly, change the Chinese ones, and we can go on. We don't need a gynecologist.

"Vulgar, primitive man!" The British referee's doctor pointed to the monitor and shouted, looking at the prince, as if he wanted the prince to replace Zhang Fan immediately.

However, Zhang Fan has established his level and technology. It can be said that he has a Jianghu status.

After two games, they were not opponents. Against Zhang Fan, none of them could play. People do a higher level than other teams. How can they change Zhang Fan out.

Although the princes were unhappy, they felt that Zhang Fan didn't give face. But helpless, if you want good, you have to bear it.

The mentality of the rich is estimated to be as good as it must be.

"According to the level of the Chinese team, there is no need to equip gynecologists!" The local doctor in Saudi Arabia said softly.

"How is it possible to perform lower abdominal surgery on female patients without the presence of gynecologists? My God! It's incredible! "

The British jury selectively forgot the operation of the first few female patients.

The Saudi doctor looked at the British referee and said to the prince, "if you have to arrange a gynecologist, you don't have to ask for a British doctor!"

Zhang Fan has really grasped the key point. For intestinal surgery, Zhang Fan has been the best done by these doctors present, while gynecologists may not be the best in Britain.

"All right!" The prince nodded, "please go back to the hotel to have a rest!"

.....

The gynecologists in the operating room were crazy. They thought about how the young man would make an apology to himself later.

As a result, Saudi Arabia asked him to leave the operating room!

His pale face was red and green for a while. He probably didn't know how to get out of the operating room.

"Start the operation!"

Zhang Fan said to others after the pop out left the operating room.

Compared with the first two patients, the Queen's figure is much better, without obvious bloating.

Moreover, long-term regular treatment, vital signs are quite stable.

When the skin is opened, the thin fat is like wearing a yellow mesh sweater.

Open the skin, separate the fat and enter the abdomen.

After touching the abdominal cavity, Zhang Fan went straight to the primary tumor.

Malignant colon tumors can be divided into three categories if they describe people's appearance.

One is protuberant. It's hard to find intestinal tumors because they don't face inward and outward. Because it is a luminal organ, and it is rich in nutrients all on the inner wall of the intestine.

The tumor is not stupid, so it grows towards the inner wall.

If viewed from the outside, this tumor, like an ugly orange's ass, hangs outside the intestines.

Wrinkled and slightly shrunk.

On the inner wall of the intestine, this thing hangs on the inner wall of the intestine like a meat hammer.

Then it keeps growing, necrosis, ulceration and infection.

Therefore, when the meat hammer is found to be used as an enteroscope, it is often hung on the intestinal wall like rotten and moldy cauliflower.

The symptom of this tumor is always like a hen, walking and pulling all the way.

And the things pulled out are also like chicken dung, white, green and red.

Blood in stool is not terrible, but white pus and blood in stool. Because blood in stool is fresh blood, it is often chrysanthemum that gets hemorrhoids, and this kind of white pus and blood, don't be careless, you must open a chrysanthemum mirror.

The second is infiltrative, just like a drop of pink ink on a absorbent paper. The inner wall of the intestine is directly pulled together by pink granulation.

Patients often eat steamed bread and can pull for three days. They prolapse when sitting on the toilet. As a result, they can't get out of anything. Sometimes, it's hard to pull out a finger without putting it in.

This kind of malignant constipation clearly feels that chrysanthemums are open, and the result is that they can't be pulled out. I feel very uncomfortable, which is why someone stuffed eel into it for defecation.

The third is ulcerative, which can't be seen directly. The intestines are like Mars, full of crater like tumor tissue, constantly spitting blood.

Without much exploration, Zhang Fan found the primary focus of the tumor at the first time. The finger ring refers to the outer wall that separates the intestine.

"Broken!"

The Queen's tumor is the first, meat hammer type. And it's broken. What's not broken looks like the pedicle of an ugly orange outside the intestines.

And the broken as like as two peas with chrysanthemum. Breaking the small opening, the pink intestinal wall inside is swollen like a meat ball, forming a leak in the small opening.

When Zhang Fan said that the tumor was broken, all the doctors in Marubeni looked into the abdominal cavity behind the doctor.

If time stops, at this time, the scene is really like the four King Kong in the temple in various positions to see the king of hell open the mouth and break the belly for the kid.

"Scissors! Gauze! "

Without hesitation, after Zhang Fan finished breaking, he cut scissors along the lateral peritoneum for the first time.

Behind him, the doctors in meatball country were nervous and couldn't swallow their saliva.

Because the kidneys lying under the peritoneum are either ureters or large blood vessels from bottom to top.

Zhang Fan's action is too fast without a little hesitation.

A pair of scissors, click! The peritoneum is open. Then the gauze was padded under the open touch at the first time, and almost the whole process was blind cut.

It's also a loss that the queen eats more liquid food. Otherwise, cleaning the leak is a headache for the doctor.

Cut, click, click. From the lowest edge to the kidney corner, more than ten centimeters away, Zhang Fan cut and stuffed the gauze in.

If it is an ordinary doctor, first of all, we should make clear whether the scissors will hurt the ureter and the great blood vessels. We must cut them and have a look.

Zhang Fan doesn't need to, directly without pause, from beginning to end.

Several doctors in Marubeni are sweating out. Although they are not doing surgery, they have thought of the consequences if they do so.

This is the gap, this is the technical gap.

Separation, ligation.

Cut off the intestines, and a section of intestines with tumor was taken out, just like the gourd head, shaking the intestinal secretions and blood like drawing saliva.

Suture, the two intestinal stomas are opposite, thread a needle and lead, and close the intestinal stoma.

Just like a mouth, or a place that men most yearn for.

The anastomosis of the intestinal tract shrinks slowly and sutures in a circle. It is too fine to see that there is a small intestine in the middle.

There is no superfluous operation.

There was no hesitation.

There was no obvious bleeding.

It's like an autopsy.

Too strong.

The experts from meatball countries who had a lot of blood wanted to ask questions and put forward their own questions during the operation.

As a result, after Zhang Fan started the operation, where could they care about questions? They were all questions from beginning to end when they entered the abdominal cavity!

Why can you blind cut?

Why can you avoid the ureter?

Why can you avoid the main artery?

But Zhang Fan did it too quickly and skillfully!

There was no time to ask questions. He looked at Zhang Fan's hands and was deeply afraid of any omission.

The second operation after the sublimation of intestinal surgery, Zhang Fan's operation is more perfect and more convenient than the first operation.

"Clean and close the abdominal cavity!"

The experts on Marubeni's side haven't reacted from the shock. Zhang Fan has begun to close his abdominal cavity.

What is the gap? The more you understand it, the more you understand it.

The three people looked at each other and seemed to say: cheated! For nothing! The woman on the phone is not a good person!

Chapter 894

It's better to go through it with your hand than to go through it a thousand times!

It is estimated that many people, when they were young, my mother twisted her ears and kept telling me.

When I was a child, I didn't think that was right.

But when I grew up, I found that my mother was right.

For example, read countless films and have no code in mind.

But you still don't know what to do without your pants.

Medical treatment, especially surgery, has actually made the most classic embolic interpretation of this sentence.

Zhang Fan had an internship in urology. He and another Xueba were an internship group.

Xueba is also a man.

In the past, there were fewer female patients in urology. As a result, an old lady came to Zhang Fan after they entered the Department. The old lady can pat her chest and swear that people are definitely not coming for these two hairy boys.

When the old lady was admitted to the hospital, it was noon. The teacher just talked about the object. It was not easy to ask each other out for dinner. She asked Zhang Fan and Xueba if they had an internship in obstetrics and gynecology?

Before they shook their heads, the teacher said, "remember to catheterize the patient before work at noon."

With that, he went out on a date with a hairless head.

Zhang Fan and Xueba are in wax.

Both of them are junior brothers, and they have no practice in gynecology. Although they have seen pictures in textbooks, videos in the school screening room and all kinds of empty wells, many people have watched movies.

But how can we say that people look different from each other.

The textbook choices are the most classic, and they are covered.

The teacher has left, and they have no way.

I can only open the catheterization bag and enter the ward like a dog.

The old lady was paralyzed in bed and unconscious.

Then, they did not say anything, and a catheterization made sweat at both ends. Nervous, really, they are so nervous that their tongues are tied. Gray hair, atrophic lower body, they don't know what to do!

Male and female catheterization, no matter what, see urine is successful.

They are in a hurry, like thieves. Anyway, the urinary catheter is inserted, which can ensure that they never enter the anorectal opening.

However, they can't tell whether they entered the urethra or not.

"Old lady, do you feel comfortable?" At that time, Zhang Fan remembered death. He asked.

"Well, it's comfortable!" The old man was paralyzed, his lower body was unconscious, and his son took care of him at home. He went out during catheterization.

The old man looked at the white sweat on their heads. He didn't know whether it was soft hearted or embarrassed. He didn't feel it, but he was very polite to ease their hearts.

The two of them were hanging shoulder to shoulder as if they had done something earth shaking. They ate extra delicious at noon.

Back to the Department in the afternoon, the old lady's son went crazy and looked for them in the corridor.

Although the old man didn't feel in his lower body, he still felt in his bladder. Originally, I didn't urinate all day yesterday. When I got to the hospital, I had a catheterization. The old man thought it was all right, and then he let go of eating and drinking.

As a result, the old lady almost jumped out of the hospital bed at noon.

Seeing them, the old lady's hands were like catching flies. Her hands were dazzled.

It turned out that they didn't insert in the right place. The urethra didn't go in. They went into other places!

When Zhang Fan finished stitching up his abdominal cavity, the doctors of the three pill countries now feel the same as when Zhang Fan and his classmates took off the old lady's pants.

Clearly remember every step and every technique in your mind.

As a result, the abdominal cavity is closed!

Their brains are full of paste.

.....

Surgery is like this. Without a hand-in-hand teacher, it's too difficult to enter the door. Therefore, in surgery, the superior doctor is like a master.

That's why many physicians who are studying have immediately improved their level after coming back from several major hospitals.

Because people saw new treatment methods and learned new treatment ideas.

Surgeons, after a trip to a large hospital, how they used to be, how they are still, just a few more nouns and the names of several experts.

What I know is to go out to study. I don't know. I thought he went out to make friends.

"Secretary Ren, Dr. Li, it's up to you now."

At the end of the operation, Zhang Fan paid cash. I don't know whether it's for ostentation or ostentation.

Pop! Pop! Pop! Several boxes were opened. They were all cash or cash with Lao Mei's head printed on them.

If Zhang Fan hadn't seen this local tyrant style, he would really be shocked.

But I haven't seen this local tyrant style. Not only Lao Zhao and Song Ping, but also Dr. Li of magic capital is so nervous that his toes are buckled together and can be used as a hand.

Ren Li was much better. She not only didn't shake where, but also frowned slightly.

Master brother is also very comfortable. Think about it. Where do people's father-in-law and wife value? They are people who have seen the world.

The ambassador also came to see off. Zhang Fan looked at the two people who had stayed here and said to the ambassador, "it's very troublesome for you, too. Why don't I donate some to you?"

Zhang Fan doesn't understand. He used to give the local doctor a share when he went out. This time, the ambassador entertained himself, so he was polite.

As soon as they said this, Lao Zhao and Song Ping had green eyes.

"I'm so sorry, why don't you..."

"Oh, forget it!" Zhang Fan just wants to know whether he gives money to others or not.

"Well!" The ambassador almost couldn't come up at one breath.

Saudi Arabia not only gave money, but also set up a special intestinal tumor fund for Zhang Fan.

It means that as long as Zhang Fan is willing to do some research on intestinal tumors, their fund can invest in shares.

As soon as he said this, Dr. Li of Mordor began to tremble with excitement. Those with special funds are called doctors, and those without special funds are called research dogs.

Zhang Fan must be welcome if he can take the money.

When they came to Saudi Arabia, they were picked up by a double deck plane and sent by a double deck plane.

When Zhang Fan and others boarded the plane, the ambassador shook his hands vigorously. It is estimated that he was also regretting. Why should I be polite?

Two million dollars in cash, which is not a big head. The fund given to Zhang Fannong is unlimited in the prince's words!

The people on the plane were in a good mood, especially Dr. Li, who was almost in Zhang Fan's arms.

But the tea vegetable airport is crying again.

The glass was just fixed, and as a result, the double deck plane came again.

Chapter 895

Two million, more?

Too much, too much.

In 2010, we could almost buy a residential building in tea.

Big goose head's plane specially sent Zhang Fan and them to tea.

On the plane, several people divided the money. It's not Zhang Fan who is worried, but Zhang Fan looks at Lao Zhao and Song Ping.

Zhang Fan means to share equally. Anyway, when he came here, we didn't talk well, and he's not a fixed team. Let's do business in public.

As a result, no one agreed. In particular, Lao Zhao was excited, but what he said moved Zhang Fan.

"Zhang Yuan, let me say a word. Without you, let alone dollars, we are not qualified to make even this kind of plane. I have never thought of such treatment in my life.

If you divide it equally, we really can't be human. You take half, your elder martial brother and Secretary Ren take the big head, and the three of us take the small head! "

"Yes, Zhang Yuan, the director is right. I agree with both hands." Song Ping made a quick statement.

"Elder martial brother, Ren secretary, Dr. Li, this..."

"Listen to me. Take one million by yourself. We are all assistants. We don't have to divide one, two or three. We share the rest equally. All right, stop talking.

That's it. I'm in charge for you. " Master Zhang Fan directly determined the distribution mode.

Dr. Li looked at Zhang Fan and Ren Li. "Zhang Yuan..." Dr. Li, in his thirties, had a tangled face.

"What? Do you think this distribution is inappropriate?" Song Ping was unhappy first.

He felt that Dr. Li should not be given money. He was an outsider, and the living Secretary of the internal

medicine department was actually capable. It's an advantage to come this time. Now I have to pay money. Song Ping is a little unhappy.

"Say less and go to sleep." Zhang Fan drove Song Ping away. He smiled at Dr. Li and said, "what's the matter, Dr. Li? If you have any opinions, you can directly say that we also work together. No, I'm personally subsidizing you. "

"No, no, I feel very embarrassed!" Dr. Li said, deeply afraid of Zhang Fan's move to give the ambassador another hand, he quickly said: "Zhang Yuan, I just want to ask, do you have any scientific research ideas on intestinal tumors?"

"Oh!" Zhang Fan smiles more brightly. This is talent. More than \$200000 is not much, but not much for such a doctor who has passed the test in mind, character and technology.

"I had the idea of intestinal cancer a long time ago, but it's a pity that no one had no money before. Now I want to set up a laboratory, but there is no suitable scientific research personnel to help me take the lead. You know, my focus is still clinical. "

Dr. Li was even more excited when he heard that \$200000 was gone for a moment.

"Look, look, do you think I'm suitable? My teacher's main research direction is the pancreas, but I still have some ideas about intestinal tumors. "

"Would you like to come to the frontier?" Zhang Fan asked.

"As long as you are willing to support me in intestinal cancer, I think I will!"

Master Zhang Fan looked at them, but his heart was filled with emotion, "this boy will deceive people more and more."

"Well, when you graduate, we'll talk in detail, and you'll think more about it."

.....

In a broken glass airport, Zhang Fan and them finally got home.

This trip was the most comfortable one Zhang Fan had ever had. He didn't say to pick up and send off the plane, and the local tyrant was too generous.

The leader in charge of health in the city and Ouyang took the reporter to pick up the plane. It's too face-saving. The leaders of the city don't dislike the glass in the ground this time.

This proper political achievement shows the effectiveness of his work.

The local reporter of tea vegetable was quite enthusiastic and took the written manuscript to Zhang Fan. Well, everyone knows the content.

Brother master has been out for a week. He directly flew back to the magic capital. Zhang fan can't stay.

When Zhang Fan returned home, all four old people on the farm were there. The family is full of laughter. I heard that Zhang Fan was interviewed by reporters at the airport and had to be on TV.

Darling, several old people can't eat steadily, especially Zhang Fan's father. He specially found reading glasses and stayed in front of the TV. He will watch it once and watch it once, waiting for the local news of tea.

Although tea is also the capital time, everything is done later than the capital. For example, they eat and go to work later, but many Uyghur tea vegetarians use frontier time.

Frontier news is usually broadcast after the central mother's network. Zhang Fan and Shaohua are bored in the small house. Four old people are waiting outside to watch the news.

"Tired!"

"Not tired! Not tired at all. "

Zhang Fan holds Shaohua. They haven't seen each other for nearly a week, so they are tired of being together.

Just as Zhang Fan was about to touch whether Shaohua was fat, he heard that the old man outside seemed to see something.

"Huazi, come out, ah, come out." Zhang Fan's mother shouted Shaohua.

"Zhang Fan, come out, ah, come out." Shaohua's mother shouted to Zhang Fan.

Zhang Fan stuffed his hands into his coat. As a result, the two old women blew up the house like mice.

"What's the matter? What's the matter? " Zhang Fan is sweating.

"Ha ha, look, look, the webcast said you." Zhang Fan's mother wiped her tears and pointed to the TV.

When Zhang Fan and Shao Hua looked up, the host smiled and said, "China's tea element medical team is working for the local people in the UAE

This not only reflects the rapid development of China's medical level, but also reflects the benevolence of practitioners in China's medical industry and the spirit of modern Bethune.

Please read the local newsletter. "

Although it is a short news of more than ten seconds, there is not even a photo. The main reason is that the patients in Saudi Arabia are too special and may be broadcast on CCTV, which is too exciting.

Zhang Fan originally wanted to stretch it. As a result, Shaohua directly held Zhang Fan. Are you talking about you? Are you talking about you?

This makes Shaohua happier than Zhang Fan taking back a million.

Before long, Zhang Fan's phone rang.

"Ha ha, ha ha!" Ouyang laughed at the other end of the phone.

"The government called me specially, ha ha..."

As soon as Ouyang's call ended, Zhao Jingjin and Xu Guangwei also called. They kept congratulating on the phone.

That night, the old man at home didn't even sleep. He kept calling people and asked Shaohua when he could watch the replay of the webcast.

Zhang Fan lied when he said he was unhappy. His mouth couldn't close and his teeth couldn't wrap.

Unexpectedly, the next day was an orgasm.

Originally, Zhang Fan was resting at home. As a result, one phone call after another.

The boss of bird market Qinghua, the boss of the winery and the boss of Huiguang congratulated Zhang Fan one by one.

Then, the elder martial brothers on Lu's side called one by one, followed by the elder martial brother on Wu's side, and then the elder martial brother of Qiu Pai.

Old Lu and old Wu also called. What they said was encouragement, but they didn't make Zhang Fan proud.

"It's not the recognition of the country to be on the webcast, but I can't be proud. Look how many times I've been on the webcast, I'm not proud!"

Also, hurry up and finish your thesis for me and graduate quickly. People can't praise you. You can get a doctor anyway. It sounds good to say it! "

The tea vegetable government originally wanted to send a local news. It was not ready to do anything

about Zhang Fan's going abroad.

Because, Zhang Fan, they made money. If you are called up by the state, you should pay attention to it.

As a result, Yang's mother specially praised it. If the tea vegetable government pretends not to hear it, it won't work.

Although the name of the doctor was not mentioned separately, the tea vegetable medical team, as everyone who knows, is talking about Zhang Fanlin.

Everyone envied and envied. Only two people died crying in front of the TV.

Some big men who engage in ordinary foreigners know Zhang Fan's, and they all know that this young man has a great level of surgery and is still Lu's disciple.

I don't know. Ask in private.

Lao Chang, who is far away in the south, is almost autistic recently.

Because he came out of the frontier and engaged in general foreigners. Some ordinary foreigners in the hospital, who had hardly spoken in the past, specially called him.

When the first big man called him, Lao Chang was still secretly happy. Hey! This is a big man. Please flatter.

He answered the phone in a cheerful tone. In a few words, unexpectedly, people asked, "are you from the frontier and know Zhang Fan, a tea vegetable? If you are familiar with it, please introduce it! "

Almost all the foreigners in the hospital called Lao Chang. Before Lao Chang dared not answer the phone, he knelt in front of the TV with his hands shaking.

Always watching TV, two tears!

Another is the capital doctor who doesn't want to go into surgery with Zhang Fan on the way.

After being recalled by his teacher, his teacher didn't say much about him.

He's quite proud. Look, the teacher still likes me.

In fact, his tutor has given him up, and I don't think it's necessary to talk to him any more.

As a result, when the network came out, his tutor began to have egg pain. Because his students were sent to Saudi Arabia. All the colleagues who knew him inquired about the operation, the medicine used and the treatment.

Now, the tutor was treated as a joke.

Then, the doctor in the capital was scolded as three grandchildren. Regret teeth are almost broken, graduation is estimated to be far away.

Climax can't last long, plain or mainstream.

A week later, the matter slowly subsided. Zhang Fan also entered a normal work life.

Zhang Fan and tea vegetable city hospital are famous.

On this side of the frontier, more and more people are seeking medical treatment with tea.

Patients in both northern and southern Xinjiang.

This effect does not have a great impact on the bird market. After all, most patients still go to the bird market.

But for the local hospital, like the tsunami, the roof of the hospital couldn't be covered.

The newly bought instruments and equipment are still on the way. As a result, in the past, there were some patients in the second and third hospitals.

They are all in the same city. People's tea vegetable city hospitals have been broadcast on the Internet. How can they go to other hospitals?

The leaders of the government are big. They keep asking their subordinates to discuss with the dealers whether they can return the goods.

Tens of millions is not a small number. This momentum is obvious. It hangs when it falls to the ground, and there is no chance to return to the capital.

The president of Chasu Agricultural Bank sits in the leading office in charge of health every day, with ice flowers on his face.

"Don't worry, we'll just join the fun. After a while, we'll line up at the municipal hospital and everyone will come back slowly. You can rest assured that you will never lose. "

The leaders in charge of health probably don't believe it.

Unexpectedly, after the first wave of attack, the second wave of attack came later. Not even let the tea government relax.

On the side of the tea vegetable government, I really went to the hospital to attend other people's celebration with a smile.

Chapter 896

The tea element of spring and summer communication is the ocean of flowers.

The feeling of the frontier should be that rows of Red Star Yang stand on the side of the road, or rows of Zuo Gongliu take root by the canal.

In fact, red star poplar was a fast-growing forest planted by the people's Liberation Army to prevent sand in the border area. Most of it was in the southern border area, and most of Zuo Gongliu was in the border area of Su province.

Wutong tree is the most important of the tea, but it is not known whether it is French or any country. It is also unknown whether the girl of Song family love it. But in the city of tea, there are many kinds of trees.

Palm sized leaves, after the rain washed away at night, the tea in the morning and the light and shadow danced with the wind, just like the dance hall in the 1980s and 1990s, showing extra peace and harmony.

Cities in the south are green and lush after summer. When the tea element just enters the summer, it is green.

In the morning, Zhang Fan eats the love breakfast made by Shaohua, two boiled eggs, hot steamed bread, flower rolls and all kinds of small dishes. It seems that there are many varieties. In fact, he can't escape the word pickle.

I don't know if women like to play with pots and pans at home after marriage. Shaohua hardly pickled these before he got married. Since he got married, the old people went to the farm and Shaohua got out of control.

Sweet and sour garlic, hot and sour screws, all kinds of wild vegetables picked in the field in spring,

dandelion, mountain red, and strips of oil pepper are like entering the pickle fair in the morning.

In fact, Zhang Fan doesn't like kimchi very much, but people get up early to do it. Zhang Fan is also embarrassed not to eat it. Without surgery, he drank milk. With surgery, Shaohua got Zhang Fan some millet porridge and Babao porridge.

Like the young mother who sucks the baby, Shaohua made porridge for Zhang Fan. I don't know. I thought he put the dried fruit shop in a bowl.

Medlar, raisins, almonds, dates, everything, even Dangshen and Cordyceps, but Zhang Fan didn't let them go. It's hard to say whether there is any effect, but Zhang Fan knows that traditional Chinese medicine at least pays attention to the compatibility of kings and officials. If you stew in one pot, it's always wrong.

If you don't do well, you can still eat a skin allergy.

In fact, this is life. Women constantly transform men. Constant dripping wears away a stone. It will transform you as like as two peas.

After dinner, Zhang Fan went out to the hospital first. After Shaohua cleaned up, he went to the farm. Now they are all Shaodong and registered with the state tax authorities. Although it's just a few acres of land and a windmill room that I don't know why.

"The lavender in the field is about to bloom recently. If I come home late, you'll wait for me!"

Before Zhang Fan went out, Shaohua specially explained.

There are more and more patients in the hospital. Ouyang strikes and Lao Gao is tied to the government every day, so Zhang Fan is getting busier and busier.

In the morning, the hospital affairs meeting, one administrative business after another, will be endless as long as you don't go to the operation, especially the administrative officer. If you have nothing to do, take a broken document to ask.

After Zhang Fan returned from Saudi Arabia, the driving force of the hospital was obviously different from that in the past.

In the past, although Zhang Fan also took people to a foreign tribe, although he made money, it sounded dangerous. It was easy to make money, but he had to spend his life, so we didn't care very much.

I always feel that how many countries pay me back. Therefore, the sense of expectation is not strong.

But this time it was different. The families at the airport were jealous and scolded. But the more so, the more the hospital staff have expectations.

In the past, there were few opportunities. We could only climb the title and position desperately, but now, with Zhang Fan and Zhang Fan, we have more choices. For a moment, we are working harder and harder.

Not for anything else, just to let Zhang Fan take him or her out next time.

Two hundred thousand dollars. I have everything, even a car and a room. How comfortable.

Doctors and nurses have expectations, and their enthusiasm for work is becoming higher and higher.

Patients in the northern and southern border areas lined up for medical treatment in tea, but they didn't make everyone cry bitter and tired.

If the income of hospitals is high, the income of indirect medical staff is also high. The attitude of serving the people is much better. I'm more patient and tired, and I have more smiles.

For a time, the patients in the tea vegetable city hospital were overcrowded.

The teachin leader in charge of culture, education and health waited for tears, and did not wait for the return of the source of the disease.

In fact, the hospital is like a meal. It tastes good. In order to have a big meal, people are absolutely willing to wait. Even if other meals are cheaper, if the taste is not good or no one goes, everyone slowly starts to avoid it.

Conformity is terrible.

The second hospital and the Third Hospital, with the high mood of the medical staff of the tea vegetable city hospital, the two hospitals have no patients directly. In the empty yard, sparrows fall in the hospital yard, chirping for food.

"Didn't you say that as long as the equipment is improved, the second and third hospitals can improve the treatment rate? Now the machine has been here for a week. What do you say now? Huh? You want hardware, we tighten our trousers, and you know the city's finances.

You said, "how can I explain to the National People's Congress now?"

The boss of the tea vegetable government was crazy. Tens of millions of equipment were bought. The handover ceremony was almost like selling brain black gold. Even the satellite station was cut off and the advertisements of the second and third hospitals were put on.

As a result, the results seemed to be discussed by the tea vegetable people. There were many people watching the excitement, but there were no doctors.

The boss of the government is worried, the leaders in charge of health are more worried, and the presidents of the second and third hospitals are worried like ants on a hot pot.

In particular, the dean of the second hospital transferred from the Health Bureau, like a boss without business, drove all the doctors and nurses out of the hospital to go to free clinic and distribute leaflets. It was almost necessary for the doctors and nurses to go to the street in white coats and bind people.

Moreover, it is estimated that it has done something that has never been done in Chinese public hospitals. See a doctor and send a blood glucose meter! See a doctor and send medicine. For example, come to the digestive department and take medicine. As a result, the hospital also sent a package of Hawthorn pills.

Doctors and nurses complain. Patients are surprised. They trot when they leave the hospital. Are there free gifts from the hospital?

Suffering, suffering, finally, the large instruments are not powered, and the electricity bill can't be earned for a day.

Finally, the government couldn't hold on.

The boss of the government wants to return the equipment to others if the dealer is not willing.

Finally, the tea government decided to hold a meeting to gather the wisdom of the leaders of the urban medical industry.

In fact, it is to pull Ouyang and Zhang Fan down in the venue.

Ouyang is too thief. When the government can't hold on, she asked the driver to take her full of tea to the villages and towns to investigate. Where is remote, she goes.

Government meetings were all held by the former Secretary of the tea vegetable city hospital and the current director.

Every time, the director was scolded by the leaders of the government, and he was almost crying.

The government wanted to order. As a result, the safety of midwifery in one Township on the left of Ouyang was not up to standard, and there was a possibility of outbreak of hand, foot and mouth disease in the other Township on the right. Leaders need to stop and strictly strengthen health discipline.

Anyway, I'm very busy recently, and things are very serious. It's either human life or epidemic. You see

what you do!

Dealers who want the final payment are getting crazy about the leaders in charge of health.

If a dealer who can sell large-scale equipment into the hospital says a bad word, people are really not afraid of a small city leader you don't bring often.

The leader in charge of health, culture and education almost called Ouyang grandma on the phone.

They know that now this knot must be solved by a capable person.

Others don't have this ability. Medical treatment is too professional. People who are not in this industry can't see the essence.

Finally, Ouyang rushed back from the township. After half a month's research and visiting hospitals and clinics in the sun every day, the old lady's spirit is much better than before.

On Monday, Zhang Fan didn't even have a chance to attend the hospital affairs meeting, so he was urged to the government by a phone call from the government.

In the conference room, almost all the leaders who kept their word were in place. Ouyang and Zhang fan are from the health system. One of the others is counted as one. They were not invited.

The government boss is estimated to be embarrassed. Even the chairman of the meeting was given to the leader in charge of culture, education and health.

"Before 2009, our local medical resources of tea vegetable were quite scarce, which could not meet the medical needs of the surrounding people.

Therefore, with the strong support of the organization and the government, at the beginning of this year, we vigorously developed the secondary hospitals in the urban area and introduced a number of new medical devices with international standards and at the forefront of the country, such as... "

The leader in charge of health just wanted to say that the boss sitting in the main position can't listen. When do you still put on face work? Everyone is not a fool. What are you going to do today.

"Leader Yang, come on, I'm not an outsider. Make a long story short!"

The leader in charge of health was almost squeezed out of his face. It was a shame.

"The development of secondary hospitals is too fast. They do not take into account the income level and total number of local residents, resulting in idle instruments. This is my fault. I am willing to review and take responsibility."

"Well, let's not talk about responsibility today. I brought experts here from my busy work to deal with problems. Ha ha, I'm proud that President Zhang has been praised by the superior leaders. Ha ha, president Zhang must talk freely today.

Moreover, the Secretary of the European Academy of Sciences is an old-fashioned and veteran cadre. He will not disappoint us. We must let experts do professional things.

Secretary Ouyang and Zhang Yuan are the two most professional experts in the tea vegetable area.

Now, you two must speak from your heart. I'm ready for criticism.

After all, we are all for the development of local medical treatment, and the starting point is good. "

The boss of the tea vegetable government, while praising and criticizing himself, is quite low.

Zhang Fan took a pen and pretended to take notes. He wrote quickly. I don't know. I still think he heard something. In fact, the book is full of recent problems in various departments.

He knows very well that he can't handle it.

He can't persuade patients to go to the second and third hospitals for medical treatment. It's estimated that it can make patients spit on their faces.

Ouyang's face was heavy, just like attending the memorial service.

"It's too difficult. At the beginning, the municipal hospital wanted to buy an MRI. I understand how difficult it was for the government, so we thought of various ways.

However, the MRI of the municipal hospital is also barely at a loss. So, it's really difficult now. For a while, I really can't think of any good way.

It may be better if we don't let the second hospital and the third hospital reduce the examination cost a little. Zhang hospital and I will try our best to let the doctors of the hospital send the examination to the second hospital and the third hospital.

As long as the patient is willing! "

Ouyang is serious, but Zhang Fan knows that the old lady is serious and talking nonsense!

The meeting went on like constipation.

Ouyang Taiji starts flying. He will recommend capable people, such as the current director of health, such as the president of the second hospital, and ask the price to be reduced and then subsidized by the government. Later, I said that the volume of advertising is not large enough.

Anyway, there are many ways. You try one by one.

The leaders kept nodding and approving. One by one, they said Ouyang was good, but they just didn't break up the meeting!

Fight for endurance!

Chapter 897

The government's meeting was held until the moon rose in the evening. We still insisted.

It's hard for everyone.

Out of the conference room, Zhang Fan quietly asked Ouyang, "do you have reservations?"

"Don't talk nonsense. It's not ready yet, silly boy. Learn more. Now, they beg us. "

As a result, the government couldn't sit still the next day.

There are people from meatball country.

Keep a low profile and do things with a high profile.

The way of thinking of people in Marubeni is probably too similar to that in China.

They had verbally agreed to Ouyang's request. Before the operation, they were probably very proud. They thought that as long as they looked at it again, there should be no problem. As for what department, or even what hospital, that's just talking.

As a result, I read it once and saw it for nothing.

After the team of Marubeni returned to China, think carefully. No, this technology must be learned, even if it is bleeding. After all, the intestinal tumors in Marubeni are among the best in the world.

Then, the video of Zhang Fan's operation was studied in the general surgery of major medical colleges and top hospitals.

As a result, everyone said it was powerful, but the video alone could not unlock the face of Zhang Fan's technology.

Therefore, people directly contacted several consortia and did not take the government channel. All major intestinal tumors have a common support, and this effect is still quite fierce.

Therefore, before long, the instruments in the respiratory critical illness department were purchased. Then, experts from Marubeni started with some portable instruments and arrived at tea first.

It's really huge.

Not only journalists, but also the principal heads of major enterprises in China, and even the embassy staff in the capital Marubeni, came.

There are 50 bedside ventilators for free, not to mention one department. Almost even the ventilators in the tea element ICU can be changed. Supporting monitor, intelligent rehabilitation training system, extracorporeal membrane oxygenation system, intra aortic thalamic counterpulsation and molecular adsorption recirculation system.

People are really equipped according to the most advanced hospital departments in the country.

In this case, the Chinese side is directly accompanied by the leaders of the Ministry of foreign affairs. The Ministry of foreign affairs has come to lead, and the bird market has to lead, and it is still the top three leaders.

Then, all the gastroenterological leaders at home, like their hosts, kept entertaining the guests.

The leader of tea vegetable smiled politely, but when he looked carefully, the muscles on his face seemed a little stiff.

In aunt song's words, it was a noisy gong and drum, firecrackers and colorful flags.

Almost all the tea lion drumming drums were taken to the hospital by Ouyang.

Moreover, the medical team from MARUKI this time is not only a Northeastern University, Shuntian hospital, Mitsui, Japan, but almost top hospitals have sent people. They are all top hospitals. Even the medical school that persuaded Lao Lu to quit was not qualified.

This shows how serious the meatball country is looking forward to in the anus and intestines.

The representatives of Marubeni came from the abbot of Dongdu to the later doctrine of the mean, and then to the current tea element. Anyway, they came with a learning attitude. Please give us your advice.

Then it was made clear at the meeting that how many doctors will be trained for the tea vegetable city hospital in the future, and roll call. As long as Zhang Fan is in the tea vegetable city hospital, the training is as long as the tea vegetable city hospital needs.

They will continue forever.

The attitude is quite low.

The Chinese side also talked about Uncle Xu and kept talking about the current tea element. What the leaders said was very distinctive.

Then, under the attention of the public, several golden bronze gilt gate signs were hung at the door of the tea vegetable hospital.

University of Tokyo tea cooperation hospital!

Marubeni Kyoto University Tea cooperation hospital!

Tea Vegetable Cooperative hospital, Department of medicine, Osaka University!

One name is bigger than the other.

The gate of tea vegetable hospital is like a row of plaques and walls. The signs of teaching hospital of Frontier university are almost hanging at the corner of the gate. There is really no place.

Chinese people have a characteristic, such as advertising. In addition to putting beauties off their clothes, you may be able to let old people and children have a look. Generally, it is bombing that has some effect.

Otherwise, just put some advertising, it won't work at all.

However, if this kind of excitement is different.

Old people, children, men and women all stood at the gate of the hospital to watch the excitement.

When Ouyang's smiling face was like a flower for the unveiling ceremony, the crowd blocked the street at the gate of the tea vegetable city hospital.

It's no use when the traffic police come. I didn't drive. You mind me? I didn't occupy the road and block

the gate alone.

"Husband, husband, look, look, wow, the tea vegetable hospital has cooperated with the University of marziguo. God, it's so handsome. Can I buy makeup remover honey from Marubeni country here in the future? "

A woman in fashionable dress pulled the man. The man's face is white and scared.

"God, I'll go to the city hospital. It's so awesome. Even the top universities in Marubeni have come to cooperate. It's powerful. I must show off in QQ space." A single dog that looks like a college student.

"This can't be a fake brand for raising prices, can it?" Skeptics of housekeeping.

Anyway, more and more people join in the fun, many of them follow suit.

"Do you know? It's said that the medicinal wine made from snow lotus on the side of tea is super effective. Guess what happened after a paralyzed patient drank it. The man was so insincere that he cured his illness and didn't pay the fee. As soon as he collapsed, he jumped up and ran away, and the nurse couldn't catch up. "

A mysterious man whispered to the uncle and aunt around him.

"True or false?"

"Nonsense, how can it be false? Otherwise, people's Congress will come to our frontier to cooperate with the municipal hospital?"

"That's right, but how do you know so clearly?" Aunt and uncle are curious.

"This medicinal wine was developed by me in cooperation with the tea vegetable city hospital and sold on consignment in the city hospital! I don't tell ordinary people. I think you are kind-hearted and kind-hearted. That's why I told you. Don't spread it. "

Although there are people fishing in troubled waters, most people can see that the tea vegetable city hospital is becoming more and more powerful.

As a local, I certainly hope my hospital will become more and more powerful.

At the unveiling ceremony on that day, some people were happy and others were unhappy.

For example, the leaders of the tea vegetable government don't know whether to laugh or cry. There are tens of millions of huge pits on one side and booming industry beauties on the other.

There is also a field hospital next to the University at each station of chasu. The boss is considering

whether the rent for the next quarter will be renewed. The chasu city hospital is so cruel that even the marukuo will come out.

The stone is too big. They really began to think about whether to take a detour.

"Isn't your sister-in-law's godfather and his aunt's child a nurse in the city hospital? Shout out and eat a hot pot one day!"

This is more pragmatic.

Anyway, on that day, the small frontier town of tea is like the new year.

Quite lively.

Ouyang informed all the counties and cities around tea.

The surrounding hospitals are numb to Ouyang's display now.

The potential is stronger than people. You can't come unless you come. Who knows if you will encounter a difficult patient one day and ask for help in front of people's house!

At the unveiling ceremony, people's experts from Marubeni had to take a picture with Ouyang, and they didn't know what they thought.

After the unveiling ceremony, not to mention the catechin secondary hospital, even the third class hospital in the adjacent urban area was affected. Just stay away from the bird market. Otherwise, it is estimated that the hospitals in the bird market will not be able to hold on.

People paid for it, and many doctors were dispatched. After discussing with Ouyang, Zhang Fan borrowed a lot of translators from frontier University. After all, it is not appropriate to rely on others' translation sometimes.

Therefore, it is equipped with double translation.

Ouyang and Zhang Fan didn't mean well to make it easier for others to learn. Ouyang wished they would never learn.

She is to go to the clinic and make it easier for doctors here to learn.

These doctors in Marubeni are not only students, but also teachers, not only teachers, but also outpatients. Moreover, it is still voluntary labor.

Ouyang can even make oil out of stone, not to mention the doctors in pill country.

In the tea vegetable hospital, the choice of doctors preparing to go to pill country for further study is also slowly carried out.

This time the government did not dare to reach out again. It did not even have a suggestion. Because there is a big pit waiting for Ouyang and Zhang Fan to help them fill in. So, one by one, like enlightened parents, with a fake smile: go play, play with your classmates for a while, and don't go home at night.

In fact, I was so worried that I wanted to beat the child and shut him at home.

Not a week after the first government assembly meeting, Zhang Fan and Ouyang were pulled into the government again.

Zhang Fan has learned well. Don't mention tea this time. He didn't even drink soup. He was ready, otherwise he would go to the bathroom again and again. The eyes of a group of old men seemed to say that his prostate was not working well.

As a result, the protracted war did not start this time, and the boss of the government seemed to be cruel and spoke directly about various policies.

Ouyang, listen, wait for the government to finish.

Ouyang spoke.

The old lady started to buy equipment from the government and started an arms race. She didn't have a good heart.

Really, she dug a hole directly. When the government couldn't climb out, she had to be reluctant and selfless, and look like she was cheated and bullied by the leaders!

Other leaders don't know what they think.

The leaders in charge of health probably cried. Who are they? It's too difficult.

Chapter 898

From thrift to extravagance is difficult, and from extravagance to thrift is even more difficult.

Ouyang took advantage of the advantages of the meatball country in the overall situation. A respiratory critical department is almost the same as the equipment price of the second hospital and the third hospital.

However, the means of maruzi elementary school are not bad. Their arrival has indeed brought

advanced technology, especially in the treatment of patients, which has opened the eyes of tea doctors.

People's doctors, from the admission of patients to all examinations, from color ultrasound to X-ray, from radiation to pathology, can do slides, and do better than the medical technology departments of relevant departments.

Dr. catechin, many young doctors, only read the conclusions of the report. If there is no conclusion, they will be blind. However, there is a sentence below all the examinations. Please combine it with clinical practice.

People are just a suggestion. See for yourself what's going on. However, the doctors on the side of tea vegetable don't say they have got a medical examination. There are few even playing color Doppler ultrasound.

Therefore, the improvement is mutual. Especially when Zhang Fan goes to surgery, a row of doctors in pill country stand straight like guards. Every time, a doctor comes out and asks Zhang Fan to let them go to surgery as an assistant. Zhang Fan is embarrassed to refuse.

Besides, they did get the equipment. However, there are no consumables and no spare parts!

We give away the equipment. The rest is just one word. It's expensive!

Domestic materials and consumables are not universal.

In addition, these doctors who come from other people are just like rich people. They continue to give tea vegetarian doctors small favors. For example, they send you a stethoscope from their country today and a small sphygmomanometer tomorrow.

It works, really, the gadget of the ball country works really well. The doctor who invented the stethoscope in France estimated that the coffin could not be pressed. It was a shame.

Dr. Cha Su is embarrassed to talk to others unless he takes a stethoscope from meatball country.

When people give gifts, they also choose people.

For a time, the fish jump in the tea vegetable hospital was not working well. The big doctors were sent by the doctors in the pill country, and the small doctors asked around the world where they could buy the stethoscope in the pill country.

Like the trend, it can't be stopped. Before long, the tea vegetable hospital was almost occupied, with a stethoscope in the pill country.

Ouyang also had no choice. She asked Zhang Fan to press the custom made by Siemens. The result was useless. Generally, everyone didn't compare with Zhang Fan.

Just like Zhang Fan's technology and cool Luze with scarlet letter license, everyone should be invisible.

This is a small means of pill country, and like the last straw, they made the tea government give up the treatment of secondary hospitals.

"It's too difficult. In fact, the doctors and managers of our secondary hospital are the best. However, when two outstanding people meet together, something goes wrong.

For example, in the tea vegetable hospital, the doctors are first-class and the management is second-class. For example, I am actually an expert in cardiology.

I am a college student who graduated from an old medical college. Even if I get it, I am first an expert in cardiology, then a leader of the hospital, and finally a leader of the Health Bureau.

I also have a number one in medical journals.

But as for management, what do I know and what can I do? I was looking for a qualified job report.

Really, this achievement depends on the help of excellent doctors. "

At the government meeting, the leaders decided to let the municipal hospital take charge of the secondary hospital.

As a result, Ouyang finally opened his mouth. He stopped talking nonsense and playing Tai Chi. Ding is Ding Mao's starting condition.

But what Ouyang said almost made Zhang Fan laugh. If he hadn't pinched his thigh, Zhang Fan would really laugh.

Really, the old lady doesn't know what material it is made of.

Ouyang walked around for a long time. In fact, in one word, the doctor, we can accept it, but the hospital management will not.

Leaders also have a headache. The smaller the place, the more serious the continuous problems between the leaders at the upper level and the organizational units at the lower level.

My sister-in-law's brother-in-law can touch the sheep's intestines anyway.

Moreover, the two hospitals, or dozens of managers, do not want them at all. They are all decentralized to township health centers. It is estimated that some people dare to take their elderly and children to sit in and demonstrate at the door of the government building.

But Ouyang finally began to talk about the conditions, and everyone dared not refuse directly, otherwise the old lady began to play again and couldn't understand. No one's prostate could stand it.

But we can't say that the management is not excellent, that is, we beat ourselves in the face. These people were chosen by thousands of leaders.

In the meeting hall, the leaders began to stumble.

It's too difficult.

"In terms of business, we give our rights to experts and never interfere."

The leader gave in.

Ouyang curled his mouth, and Zhang Fan understood it at a glance. Ouyang means: "you have to be able to interfere!"

Ouyang looked at Zhang Fan. The old lady turned her eyes and looked at Zhang Fan. Zhang Fan immediately looked down and took notes.

The old lady means, "look at me, silly boy, listen!"

After watching Zhang Fan, Ouyang did not show weakness: "without the guidance of leaders, we are nervous. Meetings without leaders are not serious, and we can't go far without the command of leaders.

Under the leadership of the organization, we are the people's Hospital, and we are the people's doctors. Under the leadership of the organization, we have developed from several broken houses to the present building... "

The official tune played by Ouyang was airtight, but also aboveboard and justified. Zhang Fan was stunned.

What is ability? This is ability. Hit others' shields with others' spears.

"Your mother, what medical school did you graduate from? You graduated from the school of political science. Is it better than all of us here! What kind of expert are you? You are a politician! "

The leaders of the government are pulling away their hair.

In the past, Ouyang's superior leaders were not so confident.

Hospitals rely on government subsidies, and equipment depends on the government to buy equipment.

But after Zhang Fan came to the hospital, slowly, slowly, the hospital no longer needs government investment, so Ouyang is full of confidence now. From a small family, Ouyang is definitely a good leader in protecting the family from the hospital.

At present, the government is also difficult to start with the tea vegetable city hospital.

There are too many people staring at Ouyang's position. However, none of them dared to stand up and say that they did better than Ouyang.

As we all know, Ouyang is forced by Zhang Fan in the municipal hospital.

Zhang Fan and Ouyang were like nephews, and when Zhang Fan was a young seedling, Ouyang protected him like a female wolf. People have the feeling of incense.

Therefore, we can only envy Ouyang's good vision.

Ouyang did not bow his head, and the leaders on the government side were helpless.

"Talk about it. I think President Ouyang is still prepared. After all, he is an old organization. How can he only care about his family and look at everyone's embarrassment."

The boss of the government came forward and took the battle himself.

"Yes, the leader knows me. I heard that the equipment in the secondary hospital is vacant, wasted, sleepless day and night, can't eat well, can't sleep well, and even there are a lot of wrinkles. "

The leader in charge of health directly turned his eyes. It's strange to believe you. You probably woke up with a smile!

"Let's talk. We're all ears." The boss of the government has learned Ouyang's power. He used to think that the European Academy was a liar and spent nothing in the government to ask for funds. Now he knows where this is.

"In fact, it's a pity to put such an excellent management in the hospital. It is not easy for us to train a cadre.

Just like toddlers, they can finally run away. How can we put them in the stroller? This is a waste, it is unfair to them, and it is a step back.

Therefore, I suggest that the management of secondary hospitals be allowed to enter the health bureau to be responsible for the overall work and the overall situation. In fact, such excellent managers can not be used for specific small things. "

Ouyang thought out all the methods for the leaders.

People, I don't want them, and I won't pay them. Whoever is promoted is responsible. I'll get you all to the health bureau and let the government pay wages. I accept all technicians.

The leader in charge of health was sweating down. At this time, he realized that the woman would have sharpened her knife and waited for him.

Pit ah, in this way, people directly become city leaders who are not in charge of health, but themselves are hung up! It's funny to say that a leader in charge of health can only lead the Health Bureau, and the health bureau may not be able to lead.

be quiet!

Quiet in the meeting!

Finally, the government leaders spoke.

"I need your assurance that two hospitals must be brought back to life within a year."

The leader is a kind man. He didn't bring Ouyang back to life in a month.

"Yes!"

At this time, Ouyang said lightly instead of being aggressive.

"In the future, the subsidy of the municipal hospital will be halved by our government."

Zhang Fan listened and quit.

As a result, Ouyang said, "yes, but we should intercept the income from foreign medical treatment!"

Step by step, if the brain doesn't work well, it can roll over.

When an expert fights, you have to fight every minute. Where do you have time to think about it? Moreover, it's inferior.

They are all conceited people.

"Yes, but..."

Finally, the two largest secondary hospitals in the urban area have been assigned to the name of the municipal hospital. They are not escrow, but directly affiliated hospitals. The government only supervises and does not participate in management.

Ouyang finally came to the forefront of all former hospital presidents of tea element, and also unified the medical Jianghu of tea element.

Chapter 899

People don't talk much.

Although a little absolute. But it's not just people or things. In fact, it's a little similar.

If the government is determined to make every effort and those who sell iron from the pot want to develop secondary hospitals, there is actually a chance.

The municipal hospital is now lining up like the broken hydropower station in Marubeni, and then the people in coastal cities in China are lining up to grab salt. It's useless. Let's wait until we get it.

If you insist, such as minor diseases and disasters, you won't come to the municipal hospital. It's too painful. It's a queue to go there.

The weather is hot and there are many people. Those without rhinitis smoke out rhinitis.

But the government can't hold on. The fiscal revenue is so low a year. If you really want to sell iron, you can't get by. Moreover, even if it succeeds, Zhu Yu is already ahead of others' municipal hospital. However, if it fails, the consequences must be weighed.

So we simply threw out the burden.

Ouyang has long thought things through. Otherwise, Ouyang won't do wedding clothes for people. The old lady is definitely not a kind-hearted and kind grandmother.

.....

The government handed over the two hospitals to Ouyang and Zhang Fan. Then all the administrative staff were transferred back to the Health Bureau.

Ouyang directly handed over the resettlement of these administrative cadres to the director of the Health Bureau, and then she didn't even enter the door of the Health Bureau.

Before the director of the health bureau could pose in power, he cried.

The establishment of the hospital is different from that of the Health Bureau. The establishment of the hospital is the establishment of enterprises and institutions, while the health bureau is the establishment of civil servants. This guy, dozens of people in the Health Bureau, has disturbed the chicken and dog.

There are men who quarrel, soft talkers and women who sit in the director's office and cry. There are people who surround, chase and intercept the director and have to arrange work immediately.

The director of the Health Bureau wore a white shirt in the morning. As a result, the shirt pockets were torn by a group of old women and hung on his chest like a hangtag. He was so angry that he was foaming at the mouth.

"I'm a disaster star! ~" Sitting in the office, he's going crazy.

In Zhang Fan's cool Luze, "don't look at me. I'm here to help you, but not to be a slave.

You should do it. Don't want me to share it. I didn't do well during my absence! "

Ouyang was half lying on the co pilot's chair, and his thin body was like lying on a beach chair.

"Don't I have a bottom in my heart when you're not here? You still have to take the helm. People don't say that if the train wants to run fast, it depends on the front of the train. " Zhang Fan flattered Ouyang with a smile.

He was really impatient with the administrative business, but the old lady had to let him do it, and he was helpless.

"You boy, don't just say nice things to me." With that, Ouyang sighed a long sigh.

"Now is an opportunity."

Zhang Fan didn't understand. He glanced at Ouyang around him.

Ouyang stretched his waist lazily, just like an old cat basking in the sun.

"Why do you think I have to win two secondary hospitals? Are they big? I'm not a real estate developer. I'm talking about the lack of tea element, but there is no lack of chassis. "

Seeing that Zhang Fan didn't understand at all, Ouyang would have wanted to screw him if he hadn't seen him driving.

"Public hospitals are limited by the state and set up corresponding hospitals according to the population base. For example, we will not set up any more hospitals in the secondary hospitals. We will only expand them instead of setting up new hospitals.

Now, it looks like a burden. As long as the operation and management are good, the future is the basic plate of the hospital. If the volume is large, it will be enough for you to toss! "

"Me? Toss? " Zhang Fan was full of question marks, but he didn't mean to ask. In front of Ouyang, he really felt that his IQ was not enough.

Seeing that Zhang Fan didn't speak, Ouyang then asked.

"What are you going to do with these two hospitals?"

Zhang Fan knew as soon as he heard it. The old lady is expected to give up again.

After thinking about it, Zhang Fan said, "I'm going to have a rotational rest for the treatment group of the departments of the municipal hospital.

For example, a group went to these two hospitals in a month to do some basic treatment. Moreover, on the side of the municipal hospital, there will be no primary and secondary surgery.

All primary and secondary operations are placed in two secondary hospitals, and then some convenience clinics are carried out in secondary hospitals, which not only eliminates the inconvenience of seeing a doctor, but also makes better use of medical resources. "

Zhang Fan said something about his own ideas. At that time, when Ouyang won the secondary hospital, Zhang Fan actually began to think about it.

"What secondary hospital is the branch of our municipal hospital!" Ouyang's mouth turned up. It was clear that Zhang Fan said very well, but the old lady not only didn't praise, but also found some

problems.

"Yes, our branch!" Zhang Fan smiled. It's too difficult to serve.

Ouyang was also happy when Zhang Fan said, "this boy didn't waste my efforts. It's good. A little bit! " Then, the old lady didn't want to chat with Zhang Fan. She patted her deputy, humming operas that Zhang Fan didn't understand, and entertaining herself with her eyes closed.

Surgery is classified into four levels. Level I surgery is a simple operation with low risk, such as appendix surgery.

The higher the grade, the more complex the operation and the greater the risk.

However, whether it is level I or level IV, the operating room is required. Therefore, it is often in municipal hospitals, even in some third-class hospitals. Sometimes, appendix surgery in the morning.

I can't say.

Now, the city hospital has room to move.

Back at the hospital, Zhang Fan, Ren Li, Lao Gao and Chen Sheng from the medical department were all called to a meeting.

"We have a branch. Now let's talk about our thoughts on the branch!"

Ouyang took a sip of tea. In the mist, Ouyang secretly observed Lao Gao.

Ouyang drank two cups of tea and gave everyone dozens of seconds to consider.

Then he said to Lao Gao, "the high court has rich experience. Let's talk first. The superior has to throw us two burdens, which is jealous.

Alas, we not only threw away our baggage, but also stopped some of our funds. Life is sad! "

Zhang Fan thinks that Ouyang accidentally glanced at him. Maybe it's an illusion!

Lao Gao actually had ideas in his mind, but he didn't guarantee whether Ouyang was testing him, but after hearing Ouyang say so, he thought Ouyang might really have no choice.

"Since the European Court said so, I would like to share my views. Although the scale of secondary hospitals is small and the source of disease is not enough, they can develop in the direction of characteristics.

For example, one of these two hospitals can be developed into a specialized heart hospital or a

children's hospital. This may be a way. "

Although Lao Gao said that it was a children's hospital or a specialized heart hospital, in fact, they were all under the guise. Apart from others, there were not enough cardiologists in the specialized heart hospital and the municipal hospital. What branch hospitals should we talk about.

Only orthopedics is now mature.

When Lao Gao said this, Zhang Fan knew it was broken! Lao Gao said again.

Ouyang didn't say yes or no, and then asked Chen Sheng of the medical department to talk about it.

Although Lao Gao is older and has a higher position than Chen Sheng, Lao Gao is actually a technical dog. Not to mention comparing with Ouyang, even Chen Sheng has no political brain.

"Hey, so are the superiors. What can those two hospitals do? They can't catch up with us in picking up shoes.

The people inside are either aunts or young ladies. What can they do.

If I say, no, we can't push it flat and build it into our family area. The environment is good and the trees are quiet. Our hospital is now facing more and more doctors and nurses getting married.

Without a house, how can you work at ease? Last time, Dr. Wang, a general foreigner, asked all over the world where to rent a house. I thought the baby's legs were thin, so I introduced the house of my relatives to him.

I'm not too busy, actually... "

Ouyang kept talking. It was estimated that he could talk about the recent changes in relations between the United States and China, and then talk about the impact of the changes in relations between the two countries on municipal hospitals. Anyway, the topic was far away, but it could also involve hospitals.

"OK, can we criticize the superior? Finding a house for the doctor is your job. Do you want me to give you an award!"

Ouyang interrupted Chen Sheng. Although it was criticism, it was actually praise.

Chen Sheng pretended to be embarrassed and smiled awkwardly, and then got up to pour water for all leaders.

He knew that he would be busy and could not get a promotion.

"Let's talk about Secretary Ren."

Ouyang put down the cup and said to Ren Li with a smile.

"I think the staff of our hospital are very nervous now. These two hospitals are really in trouble.

I can't think of any way to get the best of both worlds. When the outpatient service is a little wasteful and develops into a specialized hospital, it is not easy to operate in the short term.

European Academy, the government deducted part of our funds, but we didn't buy a lot of Cardiology equipment. "

"Hehe, don't worry. The equipment in your heart will happen sooner or later." Ouyang smiled, as if the injustice had come.

Ren Li finished. Ouyang looked at Zhang Fan and said, "actually, Zhang Yuan and I have an idea."

Then he looked at everyone and said, "we're ready..."

Crackling, Ouyang polished what Zhang Fan said and informed everyone.

Lao Gao's eyes were straight. "I want to have an operation. Is it so difficult?"

Chen Sheng quickly raised his head and looked at Ouyang with bright eyes.

Ren Li thought about it and felt that it was also a way.

Zhang Fan was helpless. He didn't know how to explain to Lao Gao later. Sometimes, although Lao Gao is a leader, he can be bullied by Ouyang. Zhang Fan is a little distressed.

In fact, everyone is right, Lao Gao is right, and Ouyang is right.

Ren Li is responsible for the list of cardiac surgery and Zhang Fan is responsible for the list of surgical surgery. Chen Sheng assists general manager Zhang Fan. The high court is responsible for protesting to the government against the government's innocent suspension of the city hospital funds.

In Ouyang's words, anyway, there was no contract signed at that time. Why did the government say to stop? Has the State Council issued documents?

Therefore, she not only asked Lao Gao to protest, but also arranged a car for Lao Gao to pick him up and send him off. She also arranged several eloquent staff for Lao Gao.

"Let's move quickly and break up the staff of the two hospitals as soon as possible.

All young people with a good foundation are admitted to the municipal hospital. Those who are old and

waiting for retirement are arranged to write prescriptions in the convenience clinic. The reward and punishment system must be implemented. Whoever dares to fool around, we dare to drop the knife.

Their free and loose working attitude must not affect our own people. If you dare to make trouble, you can stop paying wages directly. Whoever makes trouble will leave without mercy.

In particular, the explanation work of patients and their families must be done in place, let them go to the branch hospital for surgery, and clearly inform the patients and their families that there are still doctors in our municipal hospital for treatment.

Moreover, it is persuasive to slightly raise the cost of the wards in the two branches, that is, they are special wards. Otherwise, I don't think you can persuade it.

Then reduce the cost of inspection. Anyway, I didn't borrow the debt of the equipment. We're not in a hurry to repay it. "

Ouyang arranged the work task with a click.

If the leaders of the government were present, they would probably die of anger. The old lady even thought of a plan! Moreover, Mingming said well at the meeting.

As a result, Ouyang turned to break up the personnel list of the two hospitals, and then one refused to admit it.

Chapter 900

"It's not easy for me, leader. The salary and bonus of hundreds of people must be paid on time every month. I can be eaten two or three days later.

Moreover, in order to solve the burden for the leaders at that time, I said some thoughtless words at the meeting, but when I returned to the hospital, other leaders of the hospital were unwilling. It was useless only if President Zhang and I agreed. It was just a solitary shadow.

I didn't even dare to vote on the agenda of the Council, so

If you want to criticize me, I'm not in control. I'm wrong. I'll make persistent efforts to unite the comrades and try my best to unite the comrades around me.

....."

"Ouyanghong, you definitely did it on purpose!"

"It's not intentional. I don't count in the hospital alone!"

Lao Gao is still very serious. He makes everything neat from national documents to local laws and regulations. In one sentence, "where did our municipal hospital do wrong and have to stop issuing our funds?"

The leader in charge of health is like swallowing a green headed fly.

The development of tea element hospital is different from that of general regional hospitals. The annual income is close to 4 billion yuan, almost at the same level as the senior official hospital in bird city.

Moreover, the equipment in the hospital is more advanced than that in the tea vegetable hospital.

What's more terrible is that several provincial and even national laboratories have been established in the hospital.

It can be said that although the reputation of the hospital has not reached the national reputation, it has vaguely taken the lead in the Frontier Province.

Just like Nanyun for Hongta and Chuangui for national wine. The government loves and hates.

If you want to promote Ouyang and transfer Ouyang away, you're too old to look good. Most importantly, everyone can't touch Zhang Fan's idea.

Ouyang is just like Zhang Fan's spokesman for the government.

There were two more branches in the municipal hospital. Ouyang moved quickly and didn't spend the night. The brands of the two hospitals were removed and replaced with the branch brands of the municipal hospital. Needless to say, some young and potential doctors were all replaced in the municipal hospital.

Young people, more and more excited!

It used to be a second-class hospital, not even a third-class hospital. When I woke up, the hospital became not only a third-class hospital, but also a third-class hospital and the best local hospital.

It's like a hospital growing up unconsciously.

Not to mention the others, the income of tertiary hospitals is high, not to mention that this is still qualification. In the future, I really want to leave the frontier and show my professional experience.

The city hospital has been fighting too hard recently.

The hospital beds almost occupied the doctor's duty room. Patients came in one by one, and there was almost no free time.

The doctors of the municipal hospital were relieved to join the two secondary hospitals.

First of all, there are more people on duty. Moreover, people from the municipal hospital can also rotate to the branch to work. After all, the work intensity of the two branches is obviously much less than that of the two branches.

The two branches lack nothing. They don't need Ouyang to buy anything for MRI, CT and Cr, and they are all brand-new. Ouyang laughs when touching brand-new equipment one by one.

The old lady is in the first branch today and the second branch tomorrow, just like the Lion King patrolling his chassis.

In the west of China, with the infiltration of tea vegetable hospital, more and more people come to see a doctor.

Especially some of Stan's rich families want to apply for membership cards in tea vegetable hospital.

Those who can go abroad for medical treatment have good conditions. It didn't take long for both branches to turn losses into profits.

The government is like turning a blind eye. Anyway, I won't praise you. As for the allocation of funds, pay back the money owed before we talk about it.

The president of the Agricultural Bank of China estimates that he has green intestines to regret. The government can't provoke him. Is it easy for the hospital to provoke him?

The director of the Health Bureau was almost hanged. The European hospital came forward and finally all entered the Health Bureau on secondment.

Zhang Fan has recently prepared liver and gallbladder papers and written several papers. The master can't pass it. It doesn't mean that Zhang Fan has no intention, but that the gold content is not enough and has to be rewritten.

He was helpless. The old man's requirements are very high. He won't stir the medical circle, but he should be able to use the lancet anyway.

Therefore, Zhang Fan found several elder martial brothers to find some topics so that he could write a thesis earlier and get a diploma.

Normally, Zhang Fan's level doesn't care about these now, but where is the master's obsession.

After a few days of spring rain, the summer of tea is coming.

In hot summer, the sun hung in the sky like a fat man's round face, hot and dripping oil.

The limelight of the municipal hospital is actually a breeze for ordinary people, that is, the occasional chat after dinner.

As long as it's not in the health system, no one pays attention to this piece every day.

I don't know when a draft was popular in China.

Of course, the emperor hung up early in the morning. This talent show is not to engage in the harem, but to choose some talented folk artists, especially singing, super girls, super men and good songs. Anyway, it is wave after wave.

This kind of thing is loved by the public.

"You know, the girl of Wang Laosan in our community has passed the audition and will be a big star in the future."

"Oh, I used to say that this girl has a good future. You see, she was chosen."

Even Jia SuYue was crazy. "Huazi, huazi, I signed up for the draft. Ha ha, the future queen of singing is your best friend. Please flatter me."

Jia SuYue's singing is OK among ordinary people. Shaohua can't say how professional he is. However, she is still happy that her childhood good friend can be a star.

He put down his work, gave up cooking for Zhang Fan, and specially accompanied Jia SuYue to the primary competition. As a result, he came with joy and returned with disappointment.

Jia SuYue was not elected.

Jia SuYue turned his grief into an appetite. After a beautiful meal, he should do something. It's time to go to work, it's time to work, and it's not a matter of time.

Tea element, in this small city, a beautiful Han girl's home looks gloomy.

The girl graduated from the frontier nationalities college. After graduation, she became a Music Internship teacher in primary school. The examination editor didn't know why, but he didn't pass the examination.

Girls are teachers during the day and sing in the evening to make money.

If nothing happens, the girl's life is estimated to be getting married and having children, and then working as a music teacher in a private school or educational institution to teach children to learn some musical instruments.

As a result, the draft came to the frontier.

The girl has a bright voice since childhood and sings like a lark. And graduated from music.

Although I think the star is far away from her.

But who hasn't had a dream yet.

The girl secretly signed up. Unexpectedly, she passed the audition.

Happy at home, the Organizing Committee informed the girl to go to the capital to enter the semi-finals in three months.

The family is not happy yet. The girl suddenly felt a foreign body in her throat, and her voice seemed a little hoarse.

At first, I thought I was tired recently and sang more.

Rest will be good. I didn't expect
