

## Chapter 901

Tea, summer!

Finally entered the summer, in the northwest, what is spring? The most in spring is that the children are wearing cotton padded jackets and baking the heating. They read with the teacher: spring is coming and the little swallow is flying back!

Children growing up in the northwest have a weak concept of spring, while tea is relatively much better. The spring breeze in February is like scissors, but it always feels warm and cold in spring. A sleet can always beat people who take off their big cotton clothes home and continue to put on their down jacket.

Summer is different. The city suddenly became lively. When you are in love and go shopping hand in hand, the little boy has to drill into the fountain of the square with his bare ass.

In the evening, the sheep's lungs and rice intestines in the tea vegetable Street quietly turn into barbecue, mutton head and spicy sheep's hooves.

Three or five groups of people who got off duty were drinking lethal beer, eating cold mutton and eating spicy sheep's feet.

In the frontier, roast mutton is really roast mutton, rather than the pocket roast in the mainland, or even rabbit meat to fake mutton.

The child's fist big flesh pimples are worn on the willow branches. On the stove without open fire, every drop of Lala is emitting tempting oil smoke. When he sees the passing crowd and the boss with white hat, he will raise the barbecue and shout twice.

In fact, Zhang Fan doesn't eat beef and mutton for a long time, and he doesn't miss it very much. However, for Zhang Fan, the sheep's hoof and mutton in summer are still delicious.

The mutton made of tea vegetable is quite exquisite, and there is absolutely no burning smell of smoke. When the boss deals with sheep's head, it's not like a pig's head to be roasted by fire. They usually peel off the sheep's skin on the sheep's head and cut off the sheep's ears.

Moreover, the cooking method of sheep's head is different from that of sheep's hoof. Sheep's hoof pays attention to a soft and rotten, and sheep's hoof tendons should have a sticky feeling of collagen in their mouth.

Lead a person to endless aftertastes, especially the round orbicularis near the sheep's eyes. It is absolutely the essence of the mutton. The fat is not boring, the thin ones are not Chai, and the mouths are swallowed in the mouth. The more chewing, the more people can't stop, the taste is really endless aftertaste.

On Friday night, the weather was too hot. Shaohua didn't want to cook at home, so he took Zhang Fan out to dinner. The steaming heat in the hotel made them have no appetite at all.

Strolling around, I met Lu Renjia and Zhu bin. They couldn't stand the heat at home and went out to enjoy the cool.

Lu Renjia is about to give birth. A few days ago, Zhu bin called Zhang Fan to make an appointment with Zhang Fan and his bed.

"Oh, president Zhang Da and chairman Shao also went shopping in person?" Zhu bin laughed and joked.

After the young man got married, it was estimated that under the influence of his father-in-law, he had lost his original criminal police face. When he saw everyone with a black face, he put the gun in a disagreement.

"Hehe, take your wife to cool off!" Zhang Fan shook hands with Zhu bin.

The two women whispered these words together. Shaohua looked at Lu Renjia's big stomach with envy and had to touch it from time to time.

"It's too hot at home. Have you eaten yet? Let's find a quiet place to eat."

Lu Renjia couldn't blow the air conditioner. Finally, he ate casually on the roadside. Watching the big TV taken out by the boss, several people chatted while eating.

"After all, is Caesarean section better or natural delivery better? I heard people say that natural childbirth does not suffer. As soon as I sleep, the child comes out. I also heard that children who give birth naturally have a strong sense of direction. What's the matter with you? "

Zhu bin kept asking, and Zhang Fan disdained to explain to him. Instead, two women chattered about which way was better.

"Natural childbirth, I must have natural childbirth, for the sake of the child!" It's really better to be a mother. Everyone knows that natural labor hurts, but Lu Renjia said decisively.

"I want a natural birth, too!" Shaohua's lips were stained with chili oil and looked particularly bright red. Zhang Fan inadvertently looked at Shaohua's belly and was slapped by Shaohua.

At this time, Zhang Fan generally chooses not to hear. No matter what the other party says is right or wrong, Zhang Fan generally won't speak, otherwise he won't be able to talk this day. Once Zhang Fan opens his mouth, he will become what he says everyone listens to.

Therefore, Zhang Fan also took it for granted by several people, as long as they were happy.

Suddenly, the two women who were chatting stopped talking. Shaohua grabbed Zhang Fan's arm and kept shaking, "look, look, the girl on TV, she was chosen. Wow, she's so beautiful and her eyes are so big!"

Not only Shao Hua, but also Ren Jia, a big belly woman, was a little excited. Zhu Bin's two nervous hands are held below. He is deeply afraid that his wife will be excited and the child will fall out.

Zhang Fan looked up and looked at the girl in the local news, "your eyes are a little too big!"

He thought the girl's eyes were a little sick and her voice was not loud, but Shaohua was not happy.

"Your own small Mimi eyes just can't see other people's big eyes. This is jealousy." With that, the two women laughed, as if they had finally found something wrong with Zhang Fan.

Shaohua also tried to blink his big eyes in front of Zhang Fan.

Small cities can become stars as long as their character is not too bad. In the eyes of the people in their hometown, they are like their own friends or small hair. They are definitely powdered by everyone.

Even if the girl on TV is a primary, it can't suppress the local people's love for her.

As a result, unexpectedly, it was really prophesied by Zhang Fan.

On Monday, just after Zhang Fan went to work, the director of the double gland department called, "Zhang hospital, are you busy? There is a patient here. Come and have a look."

"OK ~" Zhang Fan hung up the phone, explained to Chen Sheng, and took Xiao Wang of the medical office to the double gland department.

The double gland department was an affiliated Department of general surgery in the early years. Later, it was separated. This department is the Department with the largest number of female surgeons in the

hospital. Not only doctors are more women, but also patients are women.

The double gland department is thyroid and breast surgery. These two organs, in the eyes of ordinary people, have no connection, but why should they be put together.

In fact, the relationship between the two glands is very unusual. The higher the thyroid activity, the higher the incidence of breast cancer.

Moreover, these two gland diseases are too easy for women.

Those who have a big temper, love to get angry and have a strong liver fire are easy to get thyroid diseases. They love to sulk. They are unhappy when they encounter anything, and they are also easy to get thyroid diseases.

Therefore, in the thyroid department, it can often be seen that a woman with big eyes has a sad face like Lin Daiyu. When she sees the tree leaves falling, she has to sigh, or her face is excited, as if she is ready to quarrel at any time.

Zhang Fan got off the elevator and walked in the corridor with his head down. Generally, he wouldn't take another look at others. He was very cautious.

The hospital has four departments with high incidence of quarrels, including pediatrics, emergency, facial features and double gland department.

The first three departments will not make trouble for no reason, but the double gland department is different. It is not that the patients here love to quarrel, but that they are easy to get angry and quarrel because of this disease.

In the tea vegetable hospital, there was a joke that two patients with hyperthyroidism were in shock because they had a look at each other.

As soon as I entered the Department, I saw a middle-aged woman sitting on the ground, crying bitterly.

"God, why do you want to force our mother and daughter to a dead end. Seeing that the child finally has a way out, you're like this. Why don't you let me die? "

The young girl standing on one side, Zhang Fan, looks a little familiar, not his face, but his eyes. The girl's face was gray and her big eyes seemed to have lost their vitality, just like a pool of stagnant water. She looked out of the window and was a little eager to try.

"Zhang Yuan!" Wen yunyun, the director of the double gland department, said hello helplessly when she saw Zhang Fan.

Then he said to the middle-aged woman sitting on the ground, "stop crying, our dean is coming. His skill

is very high. Your child's operation is not a problem. "

As soon as the middle-aged woman heard this, she looked at Zhang Fan with tears in her eyes, and then she had to climb over and beg Zhang Fan. Zhang Fan quickly pointed with her hand. The little officer of the medical office and the doctor of the double gland Department helped the patient up.

Zhang Fan glanced at Director Wen. Director Wen was also depressed, but he didn't explain much.

In fact, this is the case in the workplace. Sometimes superiors don't want to hear your explanation. The more you explain, the less beautiful it is.

Director Wen, who graduated from junior college medical school in his early years, is now working harder and harder in the director of tea element hospital, especially in the glandular department. Good technology is one aspect, and he should be able to catch up with the new treatment schemes that are changing with each passing day.

Other subjects don't have her pressure.

Because of the glands, the research in the early years was not thorough, and everyone was specious. With the improvement of science and technology, the treatment methods also changed with the improvement of science and technology. Many previous treatments were denied.

"What's the matter?" The middle-aged woman was helped to the chair. After she calmed down a little, Zhang Fan asked. Moreover, Zhang Fan also looked at the young girl standing next to the middle-aged woman. He always felt as if he had seen her somewhere.

"Dean Zhang, please, you must have a good look at the child. The child's life is hard. She has suffered since childhood. Her heartless father never cares about our mother, and the child has been replaced.

But children never complain. They go to work during the day and sing at night. They are constantly harassed by people. When they come home, their pillows are soaked with tears.

Finally, the child came out and was selected by the draft. As a result, the child felt flustered these days, his hands obviously trembled, even his tongue trembled, his voice became hoarse, and he couldn't sing any songs.

God! "

Looking at the child's mother crying out of breath, Zhang Fan turned and looked at the young girl carefully.

The girl is really beautiful, tall, slim, white skin, and a neutral beauty on her firm face.

Although the girl's mother is not young, she can also see from her eyebrows that she was definitely a

pick in those years.

Originally, the girl's mother was a member of the tea vegetable song and dance troupe in her early years. In those years, there were many people chasing her, and there were many excellent people, but the girl loved to be pretty. The girl's mother chose a beautiful student in the same unit as her.

Unexpectedly, getting married became her disaster. With a big belly, she was finally abandoned by the beautiful Xiaosheng and chased other women away.

After eating enough with the child, he finally saw that he was going to show up. As a result, the child was ill.

Moreover, he was told to the draft company. If the draft company hadn't seen the girls too excellent, it would have given up.

Although they didn't give up, they also clearly told them that if the recent treatment is not good, or there are obvious scars, they have the right to give up.

Therefore, the girl's house is really like a bolt from the blue.

## **Chapter 902**

Zhang Fan asked someone to help the woman sitting paralyzed on the ground. Looking at two helpless women, it really touches the eyes and breaks the heart!

Young women, in particular, have a morbid beauty on their faces. White as paper face, trying to maintain the last bit of dignity. But, helpless, her blood filled the whole face.

"I'll check it first. What's specific? I'll check it first."

Zhang Fan said softly.

Because the pre selection was conducted in the bird market, Zhang Fan estimated that they had been treated in the bird business.

This is really the case.

The mother and daughter of the orphan and widowed mother are in the community of an art troupe.

To tell you the truth, life is hard. In particular, this middle-aged woman had beautiful people in her early years. The knock at the door in the middle of the night, the ill intentioned greasy man looked at the mother and daughter as if to strip their eyes.

Guard against men, but also humble the ugly shrews in the community and units!

Because she's a single mother.

What hardships they have not suffered, what sins they have not suffered. That is, the country has laws. Otherwise

With the reform of the unit, the couple's life is becoming more and more difficult. If you want to get money, you must please the leaders, be able to stage, travel and socialize.

The widowed mother and the widowed mother lived on a barely enough salary for more than 20 years. The child finally grew up, and the child's spirit is distressing. Life seems to be slowly developing for the better.

It seemed that everything had changed for the better, and it turned out to be a thunderbolt on a sunny day.

God, this screenwriter has not changed for their family!

Take your daughter to the hospital in bird city. When you hear that you want to have no surgical scar on your neck, you need to use imported beauty drugs, you need to use imported beauty lines, and you need to find experts. Everything is money.

Moreover, because her daughter was working, her boss didn't buy her medical insurance.

The child's mother's heart is as cold as ice water in summer.

What really kills people is not love and hatred. When the child's father abandoned them, the child's mother didn't think it was so difficult. What can really kill people is

Now, when hearing the medical expenses said by the bird City doctor, the child's mother's heart is like glass residue.

Sometimes she wants to wipe her neck and jump upstairs. But she couldn't bear to see her child so obedient, so prosperous and so successful.

So, with the last bit of hope, they came to the hospital in their own city.

Zhang Fan asked the girl to sit on the chair and lie down on the back of the chair like a donkey. Then he touched it gently.

Thyroid examination is like breast examination, but relatively speaking, thyroid examination is a little more difficult.

In fact, just like pasting a screensaver on your mobile phone, you must squeeze out the bubbles under the screensaver. This kind of examination is almost the same. In fact, you are looking for a lump.

Women and men, especially married women, are the most in the Department of double glands.

What is thyroid disease? It is estimated that many people have heard of it. But I've only heard of it. For example, the big neck disease and goldfish eye were actually thyroid related diseases.

In academia, there was a trend that the country should not iodize! Because they can guarantee seafood for three meals a day and seafood for them.

Therefore, I don't think China should add iodized salt. What's the specific situation? From the patients with big necks all over the world before liberation, China has hardly seen this disease now.

Therefore, sometimes it is more terrible for experts to lose their conscience. For example, there are cases of vitamin poisoning in the United States every year, which is a gimmick made by Nobel Prize winning scientists to make money.

.....

In fact, four points should be paid attention to when seeing a doctor: why you get sick, how to treat it, how to recover, and how to avoid it in the future.

When doctors encounter a disease or learn an organ, they almost ask themselves.

Where did this guy come from (histology, embryology, can be treated from the root), several brothers (are there any substitutes), what hobbies and taboos do you have (what drugs are sensitive to, and what drugs are easy to be poisoned).

Relatively speaking, the treatment of glandular diseases is a little more difficult than that of non glandular diseases.

Because this thing is a processing enterprise with supplied materials, no one can accurately determine whether this thing is due to its own problems or from the outside.

Moreover, there are many diseases of this organ.

It can be Hypofunctional or hyperfunctional, and can give itself a pimple. It can have inflammation and cancer.

Let's talk about the two most common types of this organ, hyperthyroidism and hypothyroidism.

The girl in front of Zhang Fan is a typical hyperthyroidism patient. This disease is a consumptive disease. It obviously eats more and loses weight, and the gastrointestinal peristalsis is very fast.

Often food will not be discharged until it is fully absorbed. It can be said that what you eat pulls what you eat, and it is still thin. If the symptoms are serious, female amenorrhea, male sheep tail, there is no problem at all.

So why do you get this disease?

Textbooks and even major journals talk about the cause of this disease. They want to bring in all the words they know. In fact, it is because the cause is unknown.

But what is certain is genetics and emotion.

Especially women, when puberty or life changes, they often have great emotional changes, which leads to the occurrence of this disease. Therefore, the regulation of self emotion is very important. Tolerance and outbreak are not good methods.

There is no cure for this disease! All drug treatment is actually a comfort treatment to see whether the body can recover itself. Only, and only surgery is the effective treatment at present.

Hyperactivity leads to impotence. Like two twin brothers.

Hypothyroidism is actually insufficient thyroid secretion. There are reasons for insufficient incoming materials and thyroid failure.

This disease is powerful in children. Once the disease is not treated in time, the child is a dull disease.

In adults, the first is rough skin. When suddenly one day, you take a bath and feel that your body is like fish scales, you must pay attention that it is hypothyroidism, not your skin care lotion.

Fat, hair loss, constipation, sallow complexion, no desire, and a low voice like a cow roar are all symptoms of hypothyroidism.

Moreover, often some women, especially young women. Hands and feet are cold. I want to put my feet and hands into others' stomachs every day. In fact, at this time, it is often a symptom of mild

hypothyroidism.

After the examination, Zhang Fan washed his hands and said to the patient and his family with a smile, "it's not a big problem. Don't be nervous. This disease is not a very serious disease. It's OK to have a small operation. "

"Will you leave a scar? Can it be cured? Expenses... "

Really, sometimes, in medical treatment, it is not the disease that makes patients worried, but the silver.

After hearing the price, the child's mother was not relaxed, because the price difference between the bird market and tea vegetable was too large, she began to worry about the doctor's level.

If she were herself, she might not be so nervous.

"Mom, it's here for treatment. I've heard of Dr. Zhang! " The girl who hasn't spoken since Zhang Fan entered the door spoke at this time.

"Oh!" Her mother looked puzzled.

"I used to be a teacher at school. The teaching and research director of the school was shown by Dr. Zhang. At that time, their house collapsed. As a result, after the operation, they were fine. "

Although the girl's voice is a little hoarse, it sounds really good.

Zhang Fan's heart is sweet, not because of the girl's praise, but because of the recognition of ordinary people.

Zhang Fan now, although there is no big money, there is no pressure in ordinary life.

Therefore, in the words of point loading force, the material civilization has reached a certain level, and now the pursuit is a spiritual civilization.

Not to mention the medical industry, other industries are the same. Who doesn't like to hear a good word. Moreover, in the medical industry, which pays more attention to reputation, she was suddenly praised by a girl who has no connection with medical treatment.

Zhang Fan's heart, that is called a sweet yo.

"You have confidence in me and I will do my best to let you recover as soon as possible."

Although there was no obvious smile on his face, Zhang Fan, who turned up at the corners of his mouth, could see it. He was very happy.

Zhang Fan was happy, and the patient's mother and daughter were saved as if they had fallen into the water.

After arranging the operation time, Zhang Fan went back to the administration building.

Ouyang's dripping water wears the stone. Zhang Fan has taken over almost all the business of the hospital.

Now Zhang Fan has to slowly accept this fact.

"The doctors in the second branch hospital are off duty!" Back to the administration building, it's bullshit.

"What's going on!" Zhang fantou blew up.

"At work, he said he was dizzy and went home to have a rest. However, other personnel in the hospital said he went out to do private work.

Many bedridden patients need catheterization and disinfection, so he secretly contacted others and went to work by himself. "

Chen Sheng of the medical department reported the situation to Zhang Fan in detail.

"Who is in charge of the second branch now?"

Zhang Fan took a sip of tea.

"It hasn't been specified yet..." Chen Sheng said to Zhang Fan in a rare and pinched way.

To refuse and welcome is like a girl in first love who is secretly held by someone.

Zhang Fan is not his first brother for a long time. He drinks tea with a cup. He doesn't even have to look up. He knows that Chen Sheng's eyes are absolutely hot.

In hospital administration, doctors usually have two ways if they are separated from clinic.

1、 As far as the medical department is concerned, it is the director of the medical department at most, and it is difficult to be promoted to the level of dean. Fortunately, on weekends, if you have a good relationship with the Dean, you can have a good time.

The second is to go to the Department Director and strive for the dean in the future.

The of the medical department is like having never been a chief officer in the system. Generally, it will not be promoted to the president.

In the past, Lao Chen didn't have a chance and didn't think about it. As long as he controlled the director of the medical department and didn't be taken away, he didn't have any ideas in his heart.

Because looking at several vice presidents, not to mention others, there is only one Zhang Fan, just like the second generation, which is prohibitive.

But now there's a chance.

"Have an idea?" Zhang Fan smiled. As soon as he put the cup down, Chen Sheng immediately stored water for Zhang Fan's flattery.

"I still have some ideas when you are here. If you are not here, give it to me in this hospital. I don't want it at all."

Chen Sheng is telling the truth. However, such words can make people listen and feel that he is sincere.

In fact, this is the art of speaking.

"OK, you are in charge of the second hospital. Write a notice yourself and I'll sign it. Who do you think is suitable for the third hospital? "

"Well!" Chen Sheng looked at Zhang Fan and wanted to say what he didn't dare to say.

"OK, director Chen, I'm still young and experienced..." Zhang Fan didn't finish his words.

Chen Sheng hurriedly said, "Juma Buick, let the director of Juma Buick take charge. It can definitely be handled. "

Zhang Fan, hey! Shit, it's really a good man and a smooth horse. In a word, Chen Sheng solved Zhang Fan's troubled private affair.

### **Chapter 903**

The instruments and equipment of Marubeni have continuously entered the tea vegetable city hospital.

The respiratory department suddenly became high-end.

In the past, two or three bedside ventilators were like babies. Doctors were not at the deputy high level. Such beds with bedside ventilators could not be reserved.

Many patients who had to be transferred to ICU were directly handled in the respiratory department. Respiratory doctors raise their chest to a few sizes when they walk.

In the tea vegetable hospital, the leader of calf care is Ouyang. As long as you are reasonable, Ouyang can be domineering enough to quarrel with the leader.

However, the European Academy is not the most protective of calves. In fact, Juma Buick is the most protective of calves.

On weekdays, Lao Ju's Kazakh flavor of English floats over the respiratory department.

They often call themselves elites.

I don't know whether Zhang Fan has little contact with people or what. People like them all have something in common. Ordinary people are definitely less motivated than the Han nationality.

For example, in a team dominated by Han nationality, as long as they are team members, they all have the heart to be the boss.

And in order to be the boss, he is preparing all the time. Once the conditions are ripe, he can't run away.

However, Kazakh people are different. Relatively speaking, they enjoy life more. Ordinary members do not have a heart of loving their superiors. Anyway, there are always small mistakes. If there are mistakes, admit them and don't change them.

And has become the industry's elite, the attitude is also very similar. Anyway, I don't participate in the struggle for power and profit, but I don't recognize your authority, and I'm relatively generous.

For example, Lao Ju likes to say: Hamas (all meaning)

In internal medicine, to tell you the truth, the relationship between doctors is very tense, not only in a department, but also in a group.

For example, the sharing of drug rebates.

The main treatment is to take more than hospitalization, the deputy high school takes more than the main treatment, and the director takes more than the deputy high school.

However, there is little technical repression in internal medicine. You will, and so will I. unless you're a super big man, don't think about taking more.

Then there is the discord between doctors and their hearts, such as robbing patients, pressing beds and intriguing.

However, respiratory department is the most harmonious department in all internal medicine of tea.

It's not that doctors are so rich that they don't eat fireworks, but that Lao Ju doesn't participate in it. Lao Ju doesn't take it, and then the doctors below are in harmony.

Lao Ju neither opposes nor supports it, which is an attitude of contempt. How to say, it is like a gentleman or a Western aristocrat.

Juma Buick not only does not participate, but also protects the calf to be unreasonable. They were in the capital city when SARS broke out. They made contributions, and there was no cause and effect under their buttocks.

So, I'm quite confident. What's the matter with your leadership? Can you still refuse me to be a doctor? Can you exempt my department director?

What's more, people's tribe is one of the best in the tea vegetable area. It is said to be separated from the golden family. I don't know whether it is true or not.

However, almost any unit can find tribal relatives as leaders.

When Zhang Fan was transferred from the respiratory department, Lao Ju was very strict with the following doctors. English reading every morning.

If you fail to pass the examination, you will be deducted from the bonus. Doctors in a department are like fooling him. One by one, they speak Kazakh English. They leave the respiratory department of the municipal hospital. It is estimated that no one can understand this thing.

But the doctors are not so enthusiastic about Lao Ju, one director at a time, and one good leader at a time.

For example, the original temperate people almost ate in the hospital. No matter who is right or wrong, Lao Ju can scare him to death. Ouyang can't do such a thing, and Zhang fan can't help it.

Therefore, living in the tea vegetable hospital is like a wonderful flower.

He felt that Ouyang had no level, and Ren Li had an average level. As for Zhang Fan and Lao Gao, in his words, they could do nothing in surgery. The sheep slaughtered in their tribe are of surgical level.

Therefore, the respiratory department can't be blown in by the wind and splashed with water. This time, because of Zhang Fan, the respiratory department has entered a large number of instruments and equipment.

Lao Ju has a little respect for Zhang Fan. After seeing Zhang Fan on the road, he can take the initiative to say hello. Otherwise, people are like Zhang Fan's leaders. They never take the initiative to say hello, not only to Zhang Fan, but also to Ouyang.

Just stare at you. When you ask him, he never opens his mouth.

You say he doesn't speak the rules. He never jumps up and down. You say he speaks the rules and never takes the leader as the leader.

In fact, Zhang Fan and Ouyang don't care if you take the initiative to ask or not greet. In fact, people have this mentality. I have technology and I don't beat anyone.

"You should inform director jumabek to come to my office." Zhang Fan said a word to Chen Sheng.

"Good!"

After waiting for a long time, Lao Ju came and looked at the lawsuit after entering the door.

"Ha ha, director, how are you recently? Are you busy in the Department?"

Zhang Fan stood up with a smile and invited the old house to the reception area.

"Well, it's OK. I don't have a family name!" People are not in the mood to report to Zhang Fan.

"Ha ha!" Zhang Fan turned his eyes and smiled. He didn't care. People are like this. There's no way.

"It seems that the Department is too busy. I wanted to add some burden to the resident director, but I think I'd better forget it and change the endocrine director!"

With this, Zhang Fan will make a show to call Chen Sheng.

Chen Sheng didn't come in. He knew that Lao Ju would not give face to the leaders, so in order not to embarrass Zhang Fan, people found an excuse and didn't enter the office.

He's a chicken thief.

Zhang Fan tried to make a phone call.

Lao Ju quit, "she? What will she do? Endocrinology should go to our respiratory department. " Lao Ju looked disdainful.

"Ha ha, don't underestimate endocrinology. How much did you earn last year and how much did others earn from endocrinology? My comrade brother, let's look at the data."

Without waiting for Lao Ju to refute, Zhang Fan directly said, "the third hospital has joined our hospital, but the people in the hospital are terrified and can't meet the requirements in all aspects.

So, originally, I think the resident director is responsible. Your management level and your vision are good.

But... "

Zhang Fan stopped talking, picked up the cup and began to drink tea.

I haven't eaten pork and I haven't seen a pig run. How did Ouyang lift his appetite in those days? How did he lift his old house now? You still have a big face. You can't speak English that no one can understand. You speak your self-confidence.

I don't have that confidence! My English is also good!

Zhang Fan drinks tea without delay. Lao Ju has a reaction.

"Going to be the president of the third hospital?"

"Here you are, Dean of the third hospital. Would you like it without the support of our hospital?"

Zhang Fan glanced and said disdainfully. When Lao Ju asked, it was the meat on the chopping board.

It's Zhang Fan's turn to pretend.

"Actually, the Department is not busy. It's summer. Old patients go and die. They're not busy at all now. Moreover, young doctors are very motivated now. In fact, I have nothing to do now. "

"Oh! In fact, I prefer you, but what! "

Hanging is like walking a dog. Lao Ju's heart goes up and down.

On weekdays, the boss of heaven is his second son, which is because he thinks he has no chance. Although he thinks his level is good, he is still a little nervous in his heart.

"Endocrine is not good. My Zhang hospital, when we cooperated to rescue patients, when did endocrine happen. Not to mention anything else, if there is an emergency patient in the Third Hospital, she can't preside over the rescue.

Do you want to stare at the third hospital every day? Can you rest assured? No, no, absolutely not! "

When he entered the door, Lao Ju looked impatient, just as Zhang Fan was his creditor. He sat on the sofa and looked at people obliquely.

However, now let Zhang Fan's saliva come down, and his waist is three points shorter.

"That makes sense!" Zhang Fan took the tea cup and said with a smile. But, still don't let go, just smile at him. There are many capable people.

It's up to you now.

"Zhang Yuan, you know my personality. In fact, there is no bad heart, just love face..."

Zhang Fan wants you to bow your head.

If you don't give up for fighting, I'm afraid I'll be too brave.

Now the legal person of the hospital is Zhang Fan. When Ouyang was the director of the Health Bureau, he couldn't be an enterprise legal person because he was in the government. People directly handed over the legal person to Zhang Fan.

Therefore, Zhang Fan now has to be cautious, because he is actually responsible for every instruction and word he says.

"Hehe, I still believe in the level of the resident director. After listening to these words today, I know the resident director better.

People, in fact, that's it. If you want to communicate, how can I know if you're busy, isn't it, my resident director! "

"Yes, yes, yes!" Lao Juhan came out " My mother, Ouyang is really haunted. When people leave, it's hard to deal with those left. "

"The third hospital is very special. The composition of doctors and nurses is quite complex. There are those who are about to retire immediately, there are many related households, and there are also doctors in front of patients who smoke Mohe cigarettes to feel the pulse.

So, resident director! " Speaking of this, Zhang Fan got up, put down his tea cup and stood behind his desk. There were two flags on the table, with red flags behind him.

Next time, it seems that the momentum will rise.

Quite serious Zhang Fan faced Lao Ju, who couldn't help standing up.

"The responsibility is heavy and the task is arduous. The hospital committee and I have chosen thousands of people. I think you, comrade jumabek, are courageous, capable, able to withstand pressure and face difficulties.

Now, on behalf of the Academy Committee, I would like to ask you, comrade jumabek, if you have the confidence and confidence to correct the atmosphere of the third Academy in a short period of time.

Do you dare to stop the unhealthy tendencies of the third people's court? "

Old Jubi's white face was covered with blood.

"I can, I can, I will, please order ~!"

"Good! Breathe! I love to hear that. Now go back and wait for the documents of the hospital committee. Remember, before they are published, this... "

Lao Ju almost said that he would not sue his parents and his wife and children!

A meal of rubbing, let the old house become a person!

In the past, the cake was so big, so everyone was like an enemy. Now the cake is bigger!

After walking for a few minutes, Lao Chen, like a ghost, quietly walked into Zhang Fan's office. While storing water for Zhang Fan, he smiled and said to Zhang Fan: "when the resident director went out, he was fast. He caught up with the trot.

Moreover, he looked serious, but strangely, he took the initiative to say hello to me today. Do you think it's strange? "

"Ha ha!" Zhang Fan smiled, looked up at Lao Chen and didn't speak.

Old Chen Shanshan said, "why is it wrong? If the European Academy, the European Academy will be happy to say it. Isn't this the right place to scratch? Why isn't Zhang Yuan like this? "

"Open the Committee tomorrow and inform the European Academy!"

"What if the European Academy doesn't come? Shall I send someone to pick it up? "

"Forget it, just notify. In addition, the trainees are coming back. How many study report meetings are

you going to prepare!"

"OK, Zhang Yuan. What scale? "

"It's inside the doctor. You don't have to open it in the whole hospital."

"OK!"

Chen Sheng carefully recorded Zhang Fan's orders and sighed in his heart, "one is king Xuan of Qi and the other is king min of Qi. It seems that this one likes to be pragmatic and low-key! "

In the morning, Zhang Fanfei quickly finished his administrative business. He was different from Ouyang. Ouyang wanted to keep a record of the security personnel on the guard today.

However, Zhang Fan is different. He pays attention to the big and releases the small. He is willing to divide power, but only if you listen to me!

#### **Chapter 904**

Surgery is divided into emergency and elective.

For example, if the appendix is perforated and the intestinal obstruction blocks the car, it should be operated on as soon as possible, or it can kill people.

Many operations are scheduled, such as the package on the breast. In fact, the timing is to complete the inspection, and then pick a lucky day to operate. For example, when men ask for a girlfriend, they are most worried about whether their girlfriend has a holiday recently!

In fact, the doctors who cut the package are the same, and they often worry about it.

Some operations require preoperative medication. For example, hyperthyroidism requires medication for three to seven days before operation. Just like the money meat people eat, this thing can only be cut when the donkey (male donkey) is most excited.

The medication of double gland department can't worry about Zhang Fan anymore. To tell the truth, all the colleagues Zhang Fan met along the way were very good.

For example, several advanced doctors who are about to return this time.

For half a year, I ran like a wild donkey on the grassland and disappeared in the blink of an eye.

In the capital, Wang Yanan brought some changed clothes when he came. When he left, he was still ready to take these changed clothes back.

She didn't go to the Forbidden City with green bricks and yellow tiles or the long wall built with bricks.

For half a year, I spent all my time in the operating room.

It's better when she's busy. When she's free, she can't forget her grandfather who died in her arms.

Now, the girl's level in orthopedics has definitely changed qualitatively.

Moreover, the heart is stable and the hand is more stable.

It's not as rough as it used to be. Put on a white coat and stand where you don't have to ask. An expert's momentum is obvious.

"Ya Nan, in fact, your talent and understanding are absolutely first-class. Especially your female delicacy is a special development trend in orthopedic surgery.

For example, in the future joint repair, your delicacy can definitely make the operation reach the most perfect state.

Hey! Surgeons, in fact, just a few years of prime time. The past is the past, life is not a comeback.

Stay! I can assure you that as long as you get your doctorate in the future, I will solve the staffing problem for you at the first time.

Moreover, I can send you abroad for further study in the future! "

Shuitanzi's director of orthopedics kept fooling Wang Yanan. He is bragging about this matter, and he is bragging again when he goes abroad for further study.

However, what he can guarantee is that Wang Yanan can stay in the capital and stay in shuitanzi hospital! This is already awesome.

Are there any doctors who go to shuitanzi to study harder than Wang Yanan? Yes, absolutely, and there are not a few.

However, the director of orthopedic university doesn't know or see it. Moreover, other people work hard, but the operation round can't come.

Somewhere in shuitanzi, a row of returnees are waiting for surgery. Generally, doctors who study abroad can only do emergency surgery at night.

However, Wang Yanan is different. Zhang Fan, the dean of the family, has explained it to him.

Although one is an expert in the capital and a vice president of a hospital outside the frontier. But Zhang Fan's level still convinced the other party, so the director put Zhang Fan on the same level as himself.

At first, he wanted to accept Zhang Fan. As a result, Zhang Fan's teachers were not only no less famous than him, but also almost monopolized in Nanhua.

Therefore, when Wang Yanan came, although he didn't speak, he was still very concerned. The more attention, the more like, the more attention, the more want to keep this girl.

Wang Yanan smiled, and the director felt that the girl was too expert.

"Director, I want to go back!" Smiling Wang Yanan makes people feel cold.

"Hey, why are you like your Dean? What does he know and what does he know? His level... His level is OK, but it's barely, and he doesn't do his job. He's only a graduate student in general foreign studies now!

It makes people laugh to death. You listen to me and stay! In a few years, you will be better than him! "

"Thank you, director. The capital is not short of Wang Yanan. However, there is a lack of me, really is a lack of me. Thank you! "

With that, the girl stopped laughing and the tears in her eyes were sliding!

Stay, fools know. But if you stay, you won't be Wang Yanan!

Where she falls, she must get up! Bite your teeth and get up. Otherwise, isn't it good for people to be a rich woman? Do you have to do manual work?

Looking at the tears in Wang Yanan's eyes, the director of shuitanzi couldn't say it.

"Ah! Why so stubborn! But yes, not stubborn. I don't see it yet. OK, if there are any obstacles in the

future, remember me in the capital. And a bunch of your colleagues for half a year.

Go ahead. Be safe on the way. Bring a message to your Dean. He doesn't understand anything! "

"Thank you!" Hold back the tears. Really, the girl made a great impression on the director of orthopaedic University in shuitanzi.

Watching Wang Yanan out of the office, he was a little regretful!

Wang Yanan came out of the office. The nurses in the Department and the doctors who had taken the stage crowded up.

"Really want to go? You're stupid. Isn't it good for us to cooperate? " One obvious is that the single dog is going bald. The doctor is anxious.

"Hehe, I'll invite you to drink more tea in the future!" Wang Yanan beat him on the shoulder.

Dr. bald is even worse! This is the person I like, this is my favorite character, this is the queen of my dream!

"Ya Nan, don't go. I'll take you to Wangfujing. I'll take you..."

"Hehe, I have to go. I will miss you! You must say hello to me when you come to the frontier in the future, or I will be sad! We must remember that there is a friend like me in the frontier! "

Little girl, since I first met everyone who can lift three sentences, she has become popular. Is this sleek? No, it's mature.

In a few words, the little nurses' eyes were red.

When she left, the girl packed big and small bags, all gifts. The little nurses collectively gave Wang Yanan lipstick and various chemicals to greet his face.

There are also various percussion hammers, stethoscopes and measuring rulers sent by male doctors.

I'm leaving! Standing on the plane from the capital to bird City, Wang Yanan just looked back at this strange and familiar city.

.....

LV Shuyan in the city next door almost twisted her hair into a twist.

"I will continue to take the doctor's examination! I want to continue to win. No, I want to go back. I want him to know that I LV Shuyan is not a vain person.

He's married! You have to have your own life. He's so dark. What's good about him? He can't find it when the light is off!

How nice it is here. The city is so big that everything is convenient. A 24-hour convenience store is a variety of shopping malls. People wear so fashionable.

And the frontier? "

Although LV Shuyan's treatment is not as good as Wang Yanan, it is a gynecological hospital after all. There are many female doctors. Relatively speaking, everyone is more implicit.

However, after coming out, she saw more and knew that the medical level here was much better than that in the frontier.

She wants to stay, continue to test Bo, and then stay in the big city. But in my heart, I can't forget which piece of blue sky, which piece of forest and grassland.

I can't forget

Finally, she let go of her hair and looked in the mirror. The girl said to herself, "I hope I'm right. I hope you can take us further!"

Then he picked up his luggage and left the training hospital for half a year.

.....

Ma Yichen, who is far away in the magic capital, has been drunk every day recently. The young man has a sweet and diligent mouth, good character and hard work. Like his father who was a wine dealer, he is liked everywhere.

It was originally a likable young man, and a leader who was so powerful that he could take the boss of the foreign-related hospital out to fly a knife, which made a group of general foreign doctors in mordou like this young man.

"Pony, tell the truth about my skills. Don't be polite. Don't take me as your guide. Tell the truth!"

A foreign-related vice-high School of general foreign studies has a little too much to drink.

"Cow, your level doesn't need other words to describe. Just one word, cow!"

"Ha ha! OK, just have this sentence. When you go back, if you have any problems with your paper, just say hello. I'll give you a name. There's no problem. "

"Thank you, thank you!" Ma Yichen toasted the doctor with both hands.

"Remember to take me to say hello to your Dean..."

"Sure, sure!" Ma Yichen's heart is too strong for the five bodies that Zhang Fan admires now. People can affect the magic capital in tea.

.....

He Xinyi of the urinary tract and Dai Yuhang outside the brain broke out the biggest quarrel since they fell in love.

"Why go back? Beyond the Great Wall, we should not consider ourselves, but also stay here for the sake of our children. "

Dai Yuhang, who lives in the eastern provinces of China, doesn't want to go back.

However, his girlfriend, he Xinyi, a tea vegetarian, didn't use any persuasion. The one who has drilled the tip of an ox horn needs to go back.

"The people here are people, but the people in the frontier are not people? I didn't force you to stay. I'm going back! "

The female surgeon who can do urology is not for nothing. She is too powerful. She specializes in dealing with male water pipes. She has no personality and is not domineering. It is estimated that she can't work.

"Xinyi, children in the future..."

"Come on, who promised you a baby. You whet haw haw, whet haw haw, in a word, go or stay, and waste less time. "

Dai Yuhang stopped talking and bowed his head to make a silent resistance.

"Well, I can see your face! Do you like someone younger. Do you think I'm from a small city? Do you think I'm a local girl.

OK, you're great. You heartless, you ungrateful thing. "

With that, he Xinyi slammed the door and left. Dai Yuhang got up in a hurry and ran after him. As a result, he left with his luggage.

Dai Yuhang grabbed his hair in distress, love? No love? But he just likes to be controlled by her. Is this cheap leather?

Dai Yuhang has entered an abnormal mode. Now he is not thinking about whether to stay, but into a philosophical mode. Who am I, where am I from and where am I going?

He Xinyi opened the door without waiting for him to understand.

"I can't carry my luggage. Take me to the airport!"

Dai Yuhang carried his luggage and left an egg. He returned to the tea vegetable obediently.

Several people gathered in the bird market. Zhang Fan specially asked Chen Sheng to pick up people in the bird market.

Whether Zhang Fan is nervous or not, absolutely. He is flustered in his heart. Really, the temptation of big cities and big hospitals is so fucking sweet. He has a system, otherwise

As a result, he underestimated himself, or he underestimated the charm of the frontier. He went out a few, counted one, and came back a lot.

Zhang Fan in the office do not know how many times secretly happy!

## **Chapter 905**

For further study, when Zhang Fan went out, to tell the truth, the temptation was not the major hospitals.

In fact, it's great to work everywhere, that is, the building of the hospital is high and the building is low.

What can really tempt people is the city. Skyscrapers, convenient facilities, and even dogs dressed on the street are a place that people in small cities are overwhelmed with envy.

To tell you the truth, Zhang Fan is psychologically prepared. Accept the ending of beating dogs with meat buns.

Fortunately, everyone is back!

Recognition and recognition are actually more difficult than improving technology.

It's easy to stand up. The tea vegetable hospital stood up in the old yellow age.

When the tea vegetable hospital came to Ouyang's hands, it can be said that Ouyang became rich.

Whether Ouyang got a lot of equipment from the government or because various equipment manufacturers sent a lot of equipment due to Zhang Fan.

Anyway, the hospital has become a big Mac in Ouyang's hands. Apart from others, the light and Power Bureau has specially pulled three special lines for the hospital. It is said that what is a double circuit is obviously an odd number, and people have to call it an even number.

And in Ouyang's words, it is now not compared with the sanjiahua hospital in the same city.

The proud old lady has now put her goals in the hospital of senior officials.

But she can also feel the current changes in the hospital. She knew that if she continued to control the city hospital.

Well, the tea vegetable hospital is at most a bloated ordinary hospital. It's almost impossible to go further.

What kind of person is old lady Ouyang? What others play is her nose and eyes.

Sensitive to the general trend, when others are still ignorant, they can already distinguish what kind of incense is in their nose and what kind of odor is the odor.

In fact, Ouyang was not born with this sensitivity. He suffered losses.

For example, in the old yellow age, especially at the end of the old yellow age, hospital surgery was like a battlefield, and all capable doctors stood on their own.

It seems that the hospital is booming. In fact, it doesn't have a little combat effectiveness. Everyone is focused on robbing patients.

Ouyang almost patted the table with Lao Huang at that time.

But Lao Huang thought he was right. He did a good job! Ouyang is too domineering and unreasonable.

Therefore, when Ouyang, like a hamster, makes the hospital bigger and bigger, Ouyang feels that he is

going to delegate power.

Otherwise, he is not responsible for his ideal. Although Ouyang is unreasonable, in fact, he is a perfectionist.

She discovered Zhang Fan, and the more she understood, the more she felt that Zhang Fan was powerful, but her personality was not very satisfactory to the old lady.

So she forced Zhang Fan. Technically, she could do nothing, but administratively, she was too thief.

She is going to exercise. Zhang Fan is going to be strong with tea.

Stand up and get rich. We have achieved our goal. Now we can say that we have entered the post Ouyang era.

Therefore, to be strong is the task and mission entrusted by Ouyang to Zhang Fan. Then she hid behind her back as a sneaky peeper.

Zhang Fan is sitting in the office, his face is almost wrinkled into a rag, and his heart is bitter!

Ouyang has never experienced anything. He has shot a gun and fought a cow. The experience of others is put in front of Zhang Fan. Zhang fan can't be said to have experienced this life.

In Zhang Fan's words, the autumn wind is bleak. It has changed the world!

How happy I used to be, what surgery I wanted to have, what surgery I wanted to go into that operating room, into that operating room.

Work is what he expects, not only the improvement of technology, the increase of income, but also all kinds of sense of achievement.

Now, like a grocery store, his brain has to think about everything.

Although all kinds of maladjustment, but in order to go further, no matter how difficult, Zhang Fan also clenched his teeth.

Moreover, he also wants to build a hospital team different from Lao Huang and Ouyang.

The hospital team in the old Huang era is like a pile of crabs in a basket. I can't get out, and you don't go out.

Ouyang's team is like a herd of wild cattle. Ouyang is always in charge. Without Ouyang, the team has no combat effectiveness immediately.

Therefore, Zhang Fan wants to build a team like wild geese. Everything depends on people. Therefore, Zhang Fan is full of confidence in his future study.

When Zhang Fan was considering how to deal with the second and third courts.

The door of the office was knocked.

"Please come in!"

"Zhang Yuan, the debriefing meeting of doctors and nurses for further study is ready.

Will you join? "

The deputy director of the medical office knocked on the door and entered Zhang Fan's office.

Chen Sheng from the medical department has gone to the second hospital. He doesn't care about things here.

So I left it to the deputy director.

The deputy director is determined to curry favor with the vice president who is younger than him but more powerful than him. However, he usually has no chance.

Chen Sheng, like a shadow, won't give him a little chance at all.

"OK, I'll come right away." After finishing, Zhang Fan cleaned up and followed the deputy director to the conference room.

In the conference room, the doctors who came back from study saw Zhang Fan with a lovely smile on their faces.

Zhang Fan is also a heartfelt smile. Zhang Fan is easier to be accepted by doctors than Ouyang.

"OK, everyone is here. Next, the first item of the meeting, please invite President Zhang to speak on the stage!"

The deputy director half bent over and handed the microphone to Zhang Fan.

Zhang Fan's heart was a little diaphragmatic, and the doctors under the stage couldn't help frowning.

Although hospitals are also within the system, they are always different, especially those with technology. In fact, they hate this set in their hearts.

It's important to open your mouth and close your mouth. Can't you say something unimportant?

Zhang Fan took the microphone, smiled and looked at the doctors below.

"Hehe, my speech is not an important speech. President Hu's speech is an important speech."

When Zhang Fan said this, the following doctors immediately gave warm applause.

Even a young doctor secretly shouted, "OK, Zhang Yuan, good!"

The deputy director of the medical department, his face has become pig liver.

Zhang Fan gently asked a group of doctors to put their heart in their chest. It's not important to say whether it's heavy or not.

"Let me say a few words. The first round of study is over. Look at your confident faces.

To tell you the truth, I'm happy for you. You went to big cities and really went to learn things.

Some doctors haven't come out since they entered the hospital. You are good! "

Zhang Fan's few words warmed the atmosphere in the venue.

"It's getting worse and worse!" LV Shuyan thought.

"Zhang Yuan is Zhang Yuan!" Ma Yichen's heart is warm.

Their efforts are recognized and recognized by their superiors. Really, half a year's hard work seems to be for these words.

"Now that you have learned, you have returned. Well, if it's a mule or a horse, it's going to be pulled out.

Starting tomorrow, the hospital will organize an expert inspection team. Do you have confidence? "

"Yes!"

"OK, just have confidence! Next, I'll give it to you. Please talk about your gains and feelings of learning.

Wang Yanan, you are the first! "

Wang Yanan stood up and took the microphone.

**Chapter 906**

Thyroid surgery is scheduled.

When people come to such a critical juncture, they really believe those who do not believe in God. The patient's mother secretly knelt on the ground in the corridor at night and prayed. It can be said that almost all the gods she knew prayed.

Early in the morning, when the first ray of sunshine came into the ward, the girl lay on the treatment car and was pushed out of the ward by the nurses. A faint smile was squeezed out of the pale face.

The girl has really suffered these days. Because it is a consumptive disease, the doctor specifically explained to eat high calorie food. She never eats fat meat. She gets up in the morning with pig elbows, pig hooves at noon and braised meat at night.

"Mom, don't worry, it's okay."

"Well, it will be fine. Certainly! " As she spoke, the girl's mother was about to cry, but it was unlucky to cry before the operation, so she tried to bear it.

However, the worry in my eyes can't be eliminated.

Glands, various glands, such as thyroid, pancreas, tonsil, thymus, etc. there are many, many glands in the body.

But what is a gland?

If you use professional language to describe it, it's bullshit. Not only ordinary people don't understand it, but also many doctors who don't specialize in it.

In fact, these glands are the lead of medicine or bomb.

For example, many people know why the skin is rough. It is vitamin A deficiency. But Dunton carrot is almost a rabbit. It's still lack of vitamin A.

This is because you don't have thyroid hormone. Without it, the vitamin A you eat turns in your intestines. How did you get in or how did you get out.

For example, many strong men look like Zhang Fei, glaring, but they are not interested in women. It's not his orientation, but his hormone is not enough.

Really, it doesn't secrete much at ordinary times. It doesn't even have the saliva of an ordinary water dragon.

However, without it, people not only love to get sick, but also have no fun. Moreover, IQ will be significantly affected.

Especially the brain. This thing has a great impact on the brain. So, in fact, the brain can be called a drug commander. I love this special thing.

Moreover, the thyroid has a brother called parathyroid gland.

It has a particularly obvious impact on the absorption of calcium. What you eat calcium in calcium, like climbing stairs and flying, is all fake. Without the regulation of parathyroid gland, it's useless even if you eat stones.

"Don't worry, it's okay!" Zhang Fan saw the girl's panic in the operating room and said with a gentle smile.

Warm words, three winter warm.

Comforted a girl. Zhang Fan beckoned Ma Yichen to start the operation.

In the operation observation room, the director of the double gland department, several directors of general surgery and the staff of the medical office were all present.

Just like the on-site report, now that you have returned from your studies, if you want to convince others, especially a group of directors, you must pull it out and slip away.

"Master, I went to disinfect!" Ma Yichen said to Zhang Fan with a serious face.

Zhang fan! Ma Yichen didn't call Zhang Fan's post.

He and Ma Yichen are in the city hospital. The boy is a master and has a good level. In the past, it was estimated that the heart was not in the municipal hospital.

Unexpectedly, I went to the mainland this time and now I'm enlightened.

"Hehe, good!" Zhang Fan smiled and nodded.

Zhang Fan thought it would take some effort to subdue the boy. Unexpectedly, he went to the devil's capital, the baby

Zhang Fan said that it was false not to be proud. The person he valued finally jumped into the bowl.

After disinfection, Ma Yichen also knew that there were many hospital directors and experts in the observation room outside the operating room, so the young man was as serious as the big test.

"Take it easy! Just show your level. " Zhang Fan specially explained.

Thyroid surgery is quite common in general surgery. However, this operation is much more difficult than appendectomy.

In some hospitals, the general examination surgery for general surgery is subtotal thyroidectomy.

Where's the thyroid gland? Roughly speaking, both sides of the Adam's apple! No Adam's apple and women, where to find, where the clavicle intersects two horizontal fingers upward! It's that simple.

Zhang Fan stood on one side of the operating table and looked at Ma Yichen. "This patient is a singer. The requirements for postoperative scar and sound are very high.

The difficulty of the operation is here. You have no confidence, no pressure.

You don't have to worry about the others in the observation room. Whether you are sure or not, everything has me.

Now tell me the truth, are you sure? "

Zhang Fan's voice is not loud, but the envy of other doctors and nurses is about to drool!

Ma Yichen thought a little, "master, I have confidence!"

"Good! Just have confidence. Start! "

In the observation room, the female director of the double gland Department looked as if she was unwilling to say to Zhao Quanping, a general foreigner: "you are too overbearing. Zhang hospital is eccentric. Not only let your people do the surgery in our department, but also take you abroad.

We are a separate department. How can you let your doctor do our surgery? "

"Oh, come on, don't be cheap and sell well! There are only a few masters in our department, and pony is the most potential master.

Not only the surgical technique is good, but also the character is good. Now Zhang Yuan is partial and wants to put him in your department. I haven't been wronged yet! "

Lao Zhao said with a smile. He is now surrounded by Zhang Fan No. 1. Since he followed Zhang Fan to the United Arab Emirates, his status at home has been much higher.

Someone also listened. His wife was as gentle as when she first got married decades ago. Moreover, with the support of Song Ping, the work in the Department has changed greatly. It can be said that it is old-fashioned and everything is satisfactory.

In fact, the director of the double gland department doesn't care much about whether to do the operation in her own department. What she cares about is that Zhao dough was taken out by Zhang hospital.

They mixed their mouths. During the operation, Ma Yichen began the operation.

A thread gently drew a red mark on the patient's white neck.

Because this kind of operation is on the neck, and the longer the neck is, the more obvious the surgical scar is.

Therefore, if you don't see it after the operation, you have to study the doctor's skills.

A line, a slightly red line. During the operation, a knife must be cut from the left side of the neck to the right side of the knife. There can be no back knife, ups and downs and uneven force.

Otherwise, the patient's neck is like being bitten by a dog with open teeth.

Ma Yichen took a knife and looked at Zhang Fan. Then gently, the knife into the skin.

Just like cutting paper with a paper knife, it is clean and neat, and a very thin surgical incision slowly appears.

At the two transverse fingers above the suprasternal notch, make an arc incision along the dermatoglyph, and both ends reach the outer edge of sternocleidomastoid muscle; The knife edge is just inside the patient's skin wrinkles.

Steady, the hand holding the knife is quite steady.

Zhang Fan nodded.

Cut the skin, subcutaneous tissue and platysma, pull up the upper and lower flaps with tissue forceps, separate the loose tissues behind platysma with a knife, up to the lower edge of thyroid cartilage, and lower the sternal handle notch.

This kind of operation, the knife edge looks very small, but the depth is still enough. Because the glands are almost hidden with the recurrent laryngeal nerve.

There are few blood vessels in this space. It is often easy to bleed when it is too deep or too shallow. The incision must be protected with a sterile towel.

Zhang Fan opened the incision with a small retractor and sutured the anterior jugular veins on both sides with No. 4 silk thread.

As an assistant, he showed Ma Yichen a clean and clear vision of the operation.

## **Chapter 907**

"Tut! Tut! Tut! " In the observation room, the director of the double gland Department kept nodding.

"There are no weak soldiers under the strong general. Look at the pony. This operation has less bleeding and less damage. It's true that the devil has obtained the scripture! ~"

Nothing can be compared. Once there is comparison! That's too shocking.

For example, Ma Yichen's age, not to mention the main knife thyroid, several of them in the observation room, whether they were playing with their appendix or pulling the hook with their large intestine head.

If you want to operate the thyroid, you may not be qualified.

However, Ma Yichen is now able to master the knife. And the operation is not inferior to the general vice high.

Zhang Fan also kept nodding.

"Here, we must probe the recurrent laryngeal nerve clearly. Even if it is slower, we must confirm it."

Zhang Fan gently followed Ma Yichen's scalpel and pointed out the key points. After all, it was human life, so Zhang Fan still couldn't relax.

Ma Yichen did well, but after all, he still couldn't compare with Zhang Fan. With Zhang Fan's extensive

experience in surgery, where the pony is a little rusty and where it is a little lacking, Zhang fan can see it at a glance.

Zhang Fan said while watching Ma Yichen's operation. Generally speaking, the only lack of pony's operation is the precipitation of time. The surgeon is too important for the precipitation of time.

Many excellent surgeons had a problem when they were young. Of course, for example, ordinary people don't count.

For example, doctors who engage in breast surgery often touch their loved ones and keep thinking when they sleep. Not hungry, but think again. Why did the main knife cut like this in today's operation? Why is it different from that in the textbook?

For example, ordinary foreigners always rub their lover's belly and draw on his belly with the tip of a finger. The lover doesn't know. He thought his husband drew love on his belly. In fact, people are thinking about surgery.

Of course, those who engage in anorectal Department sometimes get kicked out of bed by their lover.

In fact, excellence makes sense. It's not that you take a rebate one day and go home to find a place to hide. Such people do not know whether their material requirements are high or not, but they must have strong restraint.

Absolutely know when and what to do.

From the beginning to the end of the operation, there were no other problems except a few that made Zhang Fan feel that Ma Yichen needed to be improved.

The thyroid gland, like a fat butterfly, lies on both sides of the organ and hides in the muscles.

Therefore, during the examination in the hospital, the doctor will often ask you to swallow, and then roll your neck with two hands like pinching the crop of a chicken.

The fat thyroid gland was cut off and the operation was over.

Suture the wound!

"With a small needle and thread, try not to expose the incision!"

Zhang Fan specially explained.

"OK, master!" After the operation was closed, Ma Yichen wore a mask, but the smile on his face was quite obvious, and his big eyes stared at Zhang Fan. Just like a child who has passed a hundred exams, he must ask the teacher to wear a big red flower.

"Hehe, yes, good. Keep up your efforts! After going down, change the chopsticks for a pair of copper chopsticks. The stability and accuracy are not enough. After going down, you need to work harder. You can't just rely on this limited opportunity on the operating table. "

Ma Yichen is very stupid. He wants to change chopsticks and copper chopsticks! Baby just nodded his head, a head of fog: where do you sell copper chopsticks?

Zhang Fan is cool. To tell you the truth, it's really cool.

From small to large, all students!

In school, he didn't even have the right to collect homework books. He didn't feel this pleasant feeling at all.

But today, looking at Ma Yichen's expression when he listened to the teacher's homework, Zhang Fan was so happy.

Looking at Ma Yichen with a blank face, Zhang Fan wanted to hum Dao Lang's song: I'm looking up at the moon!

No wonder the old man likes to call to check his homework. It's great. It's a joy that disciples can't feel!

Out of the operating room, the patient's mother, like an eagle catching a chicken, was clearly on the ground. As a result, she threw herself on the operating flat car as if she had come down from the sky.

Zhang Fan was shocked " My God, you must be careful. Don't press it on the wound and crack the knife edge that our doctor finally sewed. "

Now Zhang Fan knows. No wonder some nurses shout Hu Da when they are surprised!

"Girl, girl, how's my girl?" The girl's mother looked at Zhang Fan's face and looked forward to it, but she was afraid of hearing any bad news.

Staring at Zhang Fan's face tightly, just as Zhang Fan's mother-in-law saw Zhang Fan for the first time, she didn't know whether to see flowers, but she definitely looked for whether there were pockmarks on her face and whether her facial features were sound.

"Don't worry, the incision of the operation can hardly be seen. As long as the line is removed, it will never affect the appearance of your girl."

Zhang Fan, like an old hen, stopped the girl's mother with two hands and quickly explained to her.

At this time, the girl's mother cried out like a sigh of relief.

The voice of snot, saliva and tears, covering his mouth, is like the fierce wind pouring into the corridor in winter.

Zhang Fan looks at Ma Yichen, and the rabbit doesn't come up to pull people!

The popularity of Ma Yichen made some people who thought Zhang Fan was eccentric speechless. Now, no one dares to say, no one dares to say that he will do better than the pony after he goes out to study.

Next, the highlight is not on male doctors, but on several female doctors.

Wang Yanan, a knee operation in orthopedics, darling! Wang Quanfu gave a thumbs up.

LV Shuyan was originally liked by the director of Gynecology, but now she is even better. She was directly appointed by the director of gynecology as the leader of a group.

He Xinyi, a beautiful frontier girl, is even more amazing.

Darling, what is a beautiful prostate resection under the electric knife? The white and tender prostate is flat like a piece of comfortable soap under the electric knife of others. It's called a mellow, and it's called a normal.

When the men were discharged from the hospital, he Xinyi gave them a thumbs up and said: Gax!

Indeed, several people gave power, which also made Zhang Fan awesome in his first power exhibition after being a legal person. His face was bright, and the people in the hospital were more convinced of Zhang Fan.

On the third day of Wang Yanan's return, he appeared in the municipal hospital and shocked a group of orthopaedic elders. After that, he shouted to have a party with Shao Hua, Jia SuYue.

Zhang Fan didn't want to go. Some of their girlfriends go to dinner and talk about it by themselves.

But Wang Yanan had to ask Zhang Fan to pay, and Shaohua couldn't pay.

In the unit, Wang Yanan is not talking now. My uncle is the section chief of the Health Bureau. Shut up. My mother is from the Health Bureau

Now the girl has transformed into a big girl. She is no longer standing at the door of the operation biting her teeth and saying that Zhang Fan is an ignorant little girl.

The little fat sheep of tea vegetarians are doing more and more business. Zhang Fan is embarrassed to go to the little fat sheep for dinner. It's free to go to the family once, and it's free to go to the family once. Sometimes if the female boss of the family is in a restaurant, she has to send Zhang Fan wine, tea and drinks.

Zhang Fan seems to have gone to free food. Therefore, after going once or twice, Zhang Fan was no longer interested in going. I don't know if the female boss is the same idea.

After all, on the hot pot table, the doctor delivered the child with a kitchen knife, and the criminal police and the top ten outstanding young people stood outside the door. They didn't even dare to write a novel like that!

Although the ending is good, it's scary!

Therefore, Zhang Fan later, they generally went to goose head to eat hot pot. The goose has become a road bully on the three islands, and in the frontier, especially in tea, it is a dish.

Especially boss Sanchuan's spicy goose hot pot, darling, the taste is called a fragrance.

Especially the big goose's claws, the so-called goose webs, when you chew the fine meat on the claws, and then bite open the bone marrow cavity of the claws. The chili oil flowing out of the claws is matched with the less greasy goose oil.

God, it's really fragrant. I can't wait for you to suck your fingers again.

Shaohua took a bottle of Frontier red wine at home. Zhang Fan's family is not short of wine at all. The boss of the bird market wine dealer brought Zhang Fan some red wine once.

Zhang Fan didn't want others to turn his face. "A few bottles of rotten wine, do you think this is bribery? First, I don't contract the building of your hospital. Second, I don't want to give you medicine and equipment. What are you worried about!

It's a friendship of friends. If you think I'm up, don't ask! "

In the goose paw gate, Zhang Fan and Shao Huagang came in, and Wang Yanan and Jia SuYue also came.

The three girls are like children, hugging and hugging, one or two, and the intimate Zhang Fan is almost jealous.

"All right, eat quickly! The soup in the pot is boiling! "

**Chapter 908**

The three girls eat pink faces, red lips and spicy little tongues. They look very good!

The more you eat, the more spicy, the more fragrant, and the more you eat, the more you want to eat, so pepper appetizers are right.

However, Zhang fan can't stand it. This thing requires not only a strong mouth, but also a fierce anus and intestines. Otherwise, getting up the next morning will definitely make you cry mom!

"Greedy woman!" Zhang Fan gently shook his head and poured juice for the three people.

Several people who had drunk some red wine were even more pink and tender under the stimulation of pepper, just like the longevity peach in the flat peach garden.

Zhang Fan shook his head and laughed at several people.

People are also strange. If Zhang Fan had laughed at him in the past, Jia SuYue would definitely give Zhang Fan back.

But now I don't know why. The girl wrinkled her neck, pouted, and then said to Shaohua, "your husband can't give up money. Show your trainer's Dharma!"

Shao Hua smiled and said, "you eat less. It's not easy for my husband to make money." Then she ate more slowly than anyone!

Wang Yanan was full, went out to wash his hands, and then entered the box.

Stand beside Zhang Fan and stand aside. Zhang Fan is hairy. Wang Yanan looks straight at him. Zhang Fan feels that Wang Yanan's eyes look at him like a goose plucked from a hot pot.

Shaohua smiled secretly. Jia SuYue wanted to show his disdain, but felt it inappropriate, so he pushed Shaohua, blinked and opened his mouth, as if to say again: look, you're happy!

Can Shao Hua not be happy! It was originally for Yanan, but Wang Yanan told Shaohua the reason, and then he must let Zhang Fan out.

Zhang Fan doesn't know why. He's really afraid of being bitten by Wang Yanan, because Wang Yanan's expression is too solemn. So serious that Zhang Fan thinks she has a fever or a broken string in her head!

Just when Zhang Fan decided whether to stand up and defend, Wang Yanan picked up the tea on the table with both hands.

"Master, apprentice brought you tea!"

Wang Yanan's serious and solemn expression made the two girls who had giggled unable to laugh. It's too much like the same thing, too serious, so serious that they feel it's a sin to laugh.

They stopped laughing, but Zhang Fan laughed instead.

"How can anyone worship the teacher after eating and drinking enough!"

Zhang Fan said with a smile.

But Wang Yanan didn't laugh.

"When I was full, I had the courage to catch up with you.

Before, when I first met you, I thought you weren't as good as my operation.

Later, I thought I didn't work as hard as you. You taught me my first operation.

I wasn't sensible at that time. I always think it should be. I always think your technology is a little better than me.

However, when my grandfather fell into my arms, my heart was broken. I wanted to take off my white coat and leave this heartless place.

Later, you let me go to the capital, you let me out of guilt, you let me broaden my horizons.

When I was in the capital, I learned what it is that there are people outside, but the farthest is you around me!

When I got to the operating room in the capital, I realized that the things you taught me were too precious. "

With that, Wang Yanan stood straight in front of Zhang Fan with tea.

"Well!" A few words made the air freeze.

It's a little heavy.

"First of all, now everything is your own efforts. Master led me in, but... "

Zhang Fan is probably addicted to being a teacher. No wonder his master and uncle train him like a monkey. Now that I'm a teacher, I'm sure I have to put on a show.

As a result, "Asian man is still standing. Can you say a happy word then!" Shaohua pushed Zhang Fan.

Zhang Fan is right to think about it. The girl is still guilty and can't give pressure anymore.

"Oh, yes, yes, yes. Then I'll drink it?" Zhang Fan asked Wang Yanan with a smile.

Wang Yanan didn't laugh.

Zhang Fan took the cup and drank it all at once. As a result, the tea was a little hot. Zhang Fan didn't spit out "This silly apprentice! "

"Ha ha, good! Ya Nan, call Shiniang! "

"Each theory is different. You take advantage of me, ah!" Wang Yanan finally showed a lively side.

Zhang Fan really doesn't want a pimple in the girl's heart in the future.

Jia SuYue glanced at Zhang Fan, and then made trouble with the other two.

.....

Marubeni's doctors studying in the tea vegetable hospital cooperated well with Zhang Fan. To tell the truth, people really admire what they did in seeking advice.

Zhang Fan is not clumsy. How much you can learn is your own skill. Tea element's own doctors and doctors in Marubeni country compete with the same efforts.

This is something Zhang Fan didn't expect.

When all the affairs of the hospital slowly started towards Zhang Fan's goal.

At noon, a hurried phone call disrupted Zhang Fan's rest.

Zhang Fan, who had surgery, lay on the sofa and took the time to squint for a while.

I've had several intestinal tumor operations these days. To be honest, I'm a little tired.

As a result, the brick can defend itself, and the secret phone rings.

"President Zhang, I'm XXX of the government. Now there is a vicious fighting time at the intersection of the expressway. The wounded are seriously injured, and there are pregnant women. Now, the municipal hospital must send professional doctors, especially obstetricians. Be quick! "

"Good!" Zhang Fan jumped up all of a sudden. He was not sleepy.

Hospitals are afraid of such accidents with pregnant women. This kind of thing is too dangerous. If the maternal mood is stable, it's better. If the mood fluctuates greatly, sometimes it's massive bleeding, which is often a matter of one corpse and two lives.

While running, Zhang Fan called Chen Sheng of the medical office.

"Come on, let 120 ignite and stand by at the door of the emergency center immediately, and inform the director or deputy director of Obstetrics, general surgery, orthopedics, cardiothoracic surgery and brain surgery to assemble at the emergency center immediately."

There is no place to stop the plane at the highway intersection, otherwise Zhang Fan will call air support. At least we have a plane.

"Yes!" As soon as Chen Sheng heard it, he knew that something had happened and that it was still a big deal.

Because almost all the doctors in various trauma departments were called. So he didn't dare to wait. He quickly asked his men to start calling. He specially asked 120 drivers to stand by.

It turned out that the two waves of merchants who bought scrap from the iron plant of the tea plain steel plant had a quarrel, and finally evolved into a fight.

In the frontier, purchasing waste products, to tell the truth, ordinary people feel that this job is not only shameless, but also dirty, and it doesn't seem to have much money.

In fact, some talented people have made a lot of money from this business. Especially the people of Nanhe almost monopolized the waste business in the frontier.

There is a steel plant in chasu. There are good coal, gold mine and oil field natural gas in the frontier, but there is no good iron ore.

Either the sulfur is high or the content is low. Then, the steel plant of tea element, which sounds like a steel plant, is actually a furnace. Its main business is actually making scrap iron and steel, and almost

doesn't make steel from ore.

Therefore, these businessmen who specialize in the business of steel scrap sell waste steel to tea plant from other places, and then buy other people's bituminous coal ash from tea plant.

The smoke ash of steel plant is the additive of cement.

This one in and one out is not only an empty car, but also a business. Therefore, there are many people competing for this kind of thing.

Good business, but this kind of business is not capable of ordinary people. Without people and money, this kind of business can't be done at all.

As a result, an accident finally happened at noon in the hot and dry early summer. When they arrived, the air was full of fishy smell.

## **Chapter 909**

As a senior doctor, surgeon. Zhang Fan knows too much about the events on the bloody street.

If two unarmed boxers fight, and then someone yells 120, in fact, you don't have to bring anything, just bring two stretchers.

At most, just get some glucose oral liquid and mask.

Glucose is to add a little energy to the two people, and the mask is to prevent them from spitting on each other.

If it's a group fight, it's dangerous.

If it's armed group fighting, the situation is even more serious.

If there are pregnant women in the armed group, the doctor can't think of it.

In the group frame at the intersection of tea vegetable expressway, there are pregnant women.

Originally, the expressway intersection in the urban area of chasu is very special, because this place is already the last section of Huaguo expressway, and even Huo has come to the end.

Therefore, near the intersection here, there are all kinds of small restaurants. Some sell noodles, some sell chips, and there are slightly higher grade fried restaurants because there are steel mills nearby.

In the early years, almost all the purchasers of steel mills and the purchasers of production waste were Nanhe people.

They wear ordinary clothes, which are not as bright as those in Jiangsu and Zhejiang, nor the brand face of Dongshan businessmen driving luxury cars.

They are all dressed like migrant workers in the city.

In those years, no one paid attention to their industry. Can those who collect garbage and resell junk make a fortune?

But when the largest chain supermarket in the frontier was opened by the people of Nanhe, everyone suddenly realized that the people of Nanhe were too low-key!

Then, in the traditional industry of Nanhe people, many local people are involved.

For example, in this steel plant, locals finally got involved through relations.

Of course, it is estimated that the dog pulled the sheep's intestines, or the search level is relatively high. Although it was involved, there is no way to directly prevent people from continuing to work in Nanhe.

But the people in Nanhe are all key figures, such as the workshop director in the workshop, the doorman in charge of vehicle entry and exit at the gate, the weighing scale administrator and the warehouse keeper in charge of the warehouse. Anyway, they are all key figures that the county magistrate is not as good as the current one.

And there will be trouble. Without the local people looking for the top leader, the people below you will treat me as a second generation.

Therefore, as long as people's cars from Nanhe come, they will go ahead of the local people's cars, pull goods first, load goods first and make money first.

The local people are not convinced. I spent a lot of money looking for leaders. Why can't you collect

garbage?

But the fact is right in front of them. They really can't do it!

Jealousy, jealousy, contempt and unremitting are brewing among the two groups of people.

As a result, I don't know whether it was hot or the crickets in the trees shouted too loudly, and the war between the two groups broke out.

At the street restaurant at the intersection of the expressway, both groups of people have just invited the people from the steel factory to finish their meal and drink wine.

The businessmen in Nanhe go out to pee. The expressway is at the end. Where are there any toilets? Everyone is on the roadside and pees when they pull their pants. It is estimated that even if there is a bathroom, this group of men will be convenient on the roadside, not to mention drinking wine.

Nanhe people are proud while peeing. Today they have ten cars, while the locals have only two!

Large volume, more qualified to negotiate prices with other enterprises. So I was very happy. I peed. I heard a man who was also peeing behind me scold.

"I'll send you to XX on XX! Are you crazy? You peed on the wheels of your grandfather's car. "

Anyway, with the curse of women at home, it means that you are blind and you splashed your urine on the wheels of my car.

It's hard for anyone to say whether it splashed on the car wheels. They have drunk five fans three times. In fact, they can't see it locally.

Some people said that they did not dare to go up Liangshan without three-thirds.

Can you be a simple person in a field with little system?

It's all cross Jianglong!

Nanhe people don't show weakness. They lift their crotch, zip up and scold.

He travels far and wide, has a rich language, and has a sharp tongue. The locals who scold can only point at them with their fingers and foam at their angry mouth. They can't scold. It's too oppressive. Others scold him ten times, but he can't say a word.

The curse became louder and louder, and then three or four locals came out of the restaurant.

Call as soon as you come up. If things had stopped here at that time, the people of Nanhe would have

been beaten, lying on the ground and calling the police, it would be over. But it is estimated that their business will be difficult to do.

The adult world is cruel and there is nothing wrong with it.

Nanhe people look at the wrong posture. There are so many people. Turn around and run, and the locals catch up.

Nanhe people entered a restaurant at one end, and three or four locals also chased in. As a result, they were a few steps slow.

Just after entering the door, the people in Nanhe took the kitchen knife of the restaurant. According to the people who just entered the door, it was a kitchen knife at the beginning and opened the ladle directly. The first local people who entered the door didn't say a good knife, so they lay down!

Then, he became a Nanhe man running after several others.

The locals are in another restaurant. There are dozens of people. Although they are not together, they

Then, a dozen people came out with benches, kitchen knives and bricks.

There are two brothers on the side of Nanhe people. The one who comes out to pee is his brother. Listening to the outside, his brother looks up from the window and chases out with the kitchen knife of the hotel.

Two people hit a dozen people.

Nanhe people employ local drivers. The drivers dare not go on. They can only call the police. This is the best of benevolence and righteousness.

Two people back to back.

Normally, many people beat few people. It is estimated that more than a dozen people can chop these two people into dumpling stuffing.

But the old saying makes all the sense. Father and son soldiers fight against tigers.

One dares to die for one, and the other dares to die for the other!

Tragic, more than a dozen people and two people are really like a battlefield.

Where there is still a little hesitation, where the knife goes is where the skin is cracked.

The two brothers risked their lives. The eldest brother's thigh bone was broken with an iron rod. One

arm and one leg of the second brother hung on his body like three sticks. Blood all over his face, that's it. The eldest brother and second brother are still carrying a knife, back-to-back.

And the other side is not good-looking. People fight with knives and sticks. As long as they catch one, they will get it to death. Two of the more than a dozen people were chopped on the ground without knowing life or death.

The twitching body is like a muscle under the current that is broken from time to time.

If you count the first one to be opened, three out of a dozen people don't save.

And a lot of minor injuries. Just at this time, there was a scream from the restaurant.

It turned out that the first person to be opened came with his wife. After loading, he sent his wife to his mother's house on the way early.

The result is that the people of Nanhe can jump the queue and let them load the goods later and later. His wife is a big belly woman and has a soft temper. He was scolded by his wife and drank wine.

The more you want to be angry, the more you want to be angry. When you see the Nanhe businessman after you go out, you are ready to bully people with many people.

As a result, he was the first to receive water.

When a group of people went out to fight, the big bellied woman didn't worry much because there were so many people here. And it's common for men to fight.

Then lie down and look at it. It's wrong. Where's your husband?

Who is her husband? She knows better than anyone. Can this downwind battle be less of him?

But the more you look at it, the more you look at it, the more wrong it is. It's not the people on your side who beat each other. The crowd not only beat, but also was cut down by others. And it really seems to be risking your life.

As soon as the woman's heart tightened, she went out of the door. She didn't dare to go to the place where she fought. She had a big belly and bumped it. She also knew good or bad.

Then, when I went out, I saw the bright red mark on the road in the distance.

I don't know why, she followed the mark and went straight to the door of a hotel.

Before entering the hotel, I heard the owner of the hotel call the police like a dead father.

"No matter what I do, no matter what I do, they come in and grab my kitchen knife. I don't even have time to react. All the tables, chairs and benches are rotten. You have to pay, small business! "

All the voices are crying. It's really people sitting at home. Disaster comes from heaven.

These people not only don't consume in their own restaurants, but also open their heads with white brains mixed with blood, just like the people who hang strawberry cream cake on their heads to their own hotel and lie straight in the center of the hotel.

At that time, the diners were scared away without even paying for their meals.

The big belly woman found her voice and entered the door. The boss who called waved his hand angrily, which means to go to another house. I don't operate here.

As a result, the big belly woman's eyes opened and saw her man lying upright on the ground in the middle of the restaurant.

If it wasn't the clothes and trousers that she cleaned up for him in the morning, she really couldn't see that the person lying on the ground was her husband.

The blood has long dyed his face like a pig's head plunged into a red paint bucket. It is visible to the naked eye. He turned out a white head wallet with black hair and white brain. The blood is like the broth in the pot boiling under a slow fire.

The woman can't open her mouth. She's so flustered that she has to jump out of her throat.

I just wanted to come forward and have a look. As a result, my stomach hurts like my intestines are tied up.

All of a sudden, the woman tried to grasp the wall or something around her and sat down slowly. However, his eyes were dark, his hands and feet were weak, and he had severe abdominal pain.

She tried her best and cried, "help, help, kind-hearted people!"

After shouting, she climbed on the ground, holding her man's ankle with one hand and touching her stomach with the other hand.

She cried, but she couldn't even cry.

It hurts. She seems to have seen Hu da.

Now, she really wants to be a gentle person.

The boss on the phone is crazy!

Lying one did not say, and now came in and climbed down another.

The boss hung up and came swearing.

"I'll tell you, it's not my group. It's the people outside who cut it. Don't blame me!"

It means that it has nothing to do with me. It was beaten by outsiders. Don't play dead dogs here for me.

As a result, as soon as the boss with the phone came to the front, there were golden lights in front of him.

Because he clearly saw that there was blood in the lower body of the woman, and it was still flowing blood. Look at the woman's body, it was a big belly.

He's crazy, really.

A man lying on the ground can live or die. But he can't ignore the big bellied woman lying on the ground. He can't see it, even in his conscience.

"Baby mom, come on! Come on! " Crazy, he gently held the woman and pulled her into his arms. Then, I don't know what to do.

His children are seven or eight years old, but he really doesn't know what to do. Isn't it a hospital thing to have children! The big hand of the chopping spoon pressed and pinched on the lips under the woman's nose.

One side shouted loudly, "come on, did you die in the house, you immortal, come on."

## **Chapter 910**

How many accidents can ordinary people encounter in their lives?

Watching the news and reports, I feel like I'm dying. There are accidents almost every day. When the base is large, everything will happen.

In fact, for ordinary people, there are only a few real accidents that they can save without waiting for first aid.

Foreign body entering the airway is one of them, and accidental labor is one of them.

Who is difficult, who is easy?

No solution.

Because those who can't be saved are simple, and those who can't be saved are difficult.

For other accidents, to be honest, the best way is to call 120 early, and then let the patient lie on the ground waiting for rescue. Of course, if you know first aid, it's different.

Others are not much to say, just talk about the treatment of foreign bodies in the trachea entering through the cavity.

Especially for children, take a glass ball, put it in their mouth, spit it into their hands, play with it, and then suck it into their mouth. It seems very sweet. Let's not talk about the problem of cleanliness. Did the little boy start practicing early?

The parents turned a blind eye. As a result, a glass ball entered the airway. Then the blue and blue children are like fish on the shore. Moreover, in terms of big data, almost male patients are definitely larger than female patients.

Whether it's a little man or an old man!

Some slapped on the back, and even put their hands in and took them out. The result is self-evident.

To deal with this situation, clapping on the back, looking back and digging out are all useless. Heimlich's first aid is the only way for ordinary people to do it.

Other tracheotomy and tracheoscopic removal are not the ability of ordinary people or even ordinary doctors.

So, it's okay. In fact, you can have a look. Maybe you can save people one day. What's the taboo and not taboo? You don't expect to have a level 7 floating slaughter. At least you can pretend to be a force!

Relatively speaking, the probability of encountering a multiple parturient or midwife in China is getting lower and lower. Of course, this also shows the development of eugenics and health conditions from another side.

When the tea vegetable 120 came to the scene with the operation vehicle, the three men in a coma and the two brothers who relied on the adult figure did not need to operate on the spot.

Brain injury, big bone fracture, no one is simple. Can only be rescued while pulling back to the hospital for surgery. Moreover, to tell the truth, this kind of injury, life and death, really from heaven, can be pulled back to the hospital and can't die.

If you can't live, you may not live even if you operate on the spot.

The real danger is lying on the belly of the restaurant. It wasn't due yet. As a result, seeing that his husband didn't know his life and death, he was suddenly excited, and there was severe pain and red.

To tell you the truth, if the hostess of the hotel hadn't given birth at home, it would be one corpse and two lives today.

Hot water, toilet paper and even the table are all put together to form a bed.

It is estimated that if the doctors in the hospital can't come, the landlady will definitely start.

People are forced out, really. In this desperate situation, few people can think of gains and losses and consequences. Ordinary people who dare to fight are heroes.

LV Shuyan leads the team, assisted by Xue Fei. A crowd began to deliver the baby.

In this rescue, the most difficult is not the doctor, not the hospital, but the patient.

"Come on, come on! The child will be out soon. If you don't refuel, the child will suffocate. Come on! "

LV Shuyan shouted loudly like a fierce woman. And the big belly woman with tears on her face said, "child, child father!"

"You can't even guarantee life or death for you and your children now. What else do you want to do? Give me strength quickly."

Unmarried never understand married. Although quarreling and bickering every day, I can't express my annoyance when I see each other. I wish he or she could travel for a week.

However, he or she has long been the pillar of each other's life!

"No! Come on, get on the operating car. You have to use forceps! Or something will happen today. She has no desire to survive. "

LV Shuyan was angry. Obstetrics and Gynecology, if not surgery, is often a midwife, is an auxiliary role.

But big belly is beginning to feel loveless.

Changed the stretcher and got into the operating car.

The car pulled up its lights, sounded its horn and drove quickly towards the hospital. Zhang Fan also got on the operating car.

"How's it going now?" Zhang Fan changed his surgical clothes. He didn't expect the scene to be so heroic.

As long as almost all the injuries are seriously injured, and there is a pregnant woman like a bomb, the other wounded can only sustain their lives now.

"The situation is not very good. She doesn't cooperate very much! If it weren't for the fetal position, it would be a big trouble today. "

LV Shuyan looked at Zhang Fan while preparing the equipment.

Since she came back from her studies, LV Shuyan has become the assistant director of Obstetrics and gynecology.

Not one department, but assistants in gynecology and obstetrics. It can be said that she is the third young middle-level leader after Zhang Fan and Xue Fei.

The medical industry stresses professional titles, such as inpatient, attending, vice senior and Zhenggao. Only by entering the vice senior level, can we go further in administrative positions.

Between these titles, they are calculated according to five years. Now the girl is really recognized by gynecologists and obstetricians.

"What do you need me to do?" Zhang Fan asked while wearing gloves.

LV Shuyan was a little stunned. She seemed to think of their rotation in obstetrics and Gynecology, and Zhang Fan asked her at that time.

Now time flies, he is already the dean.

"I'm going to use forceps. Help me at the critical moment." After LV Shuyan said a word gently, she began to operate.

She was no longer the girl crying in the dressing room. She is the only young doctor who dares to use

forceps in the tea vegetable hospital.

The palace was wide open, but the big belly couldn't make it out with a little strength. LV Shuyan had no choice. She picked up the forceps and began.

What is forceps?

Many people probably haven't seen it. This thing is like a big clip for holding coal balls in the north, but the pliers head is hollow, just like two crossed tennis rackets.

It's all metal. You can imagine that this thing will hurt when it's stuffed into the birth canal to bless children.

How big is this thing? Slightly smaller than a child's head.

Obstetric forceps, in the history of Obstetrics, are one of the instruments that cause the most damage to infants.

Some people use this thing to break a child's arm, pull off a child's ear, even blind a child's eyes, and even directly cause the death of a baby.

However, it is also known as one of the greatest inventions of obstetrics.

Therefore, in large hospitals, this kind of equipment is less and less used, and is often replaced by negative pressure suction. When it really needs to be used, it is at the expert level. Ordinary doctors can't play at all.

Its position is like a double-edged sword, hurting others and yourself.

LV Shuyan reached into the palace and touched the position of the child's head and body.

When the baby is in the mother and fetus, there are many strange positions, two legs hanging on the shoulder, one leg hanging on his neck, and even hanging the umbilical cord as a rope.

Everything.

At this time, when there is no choice, the doctor adjusts the strange position correctly with one hand, then inserts the large pliers into the birth canal and holds the child's head with two oval pliers heads.

Put the blessing on both sides of the ear and put the ear into the hollow of the pliers. Can you determine the location?

No, the birth canal is so big that you can't enter the forceps, and you can't enter the forceps.

Really, at this time, doctors must be gods and have perspective eyes, otherwise they can only bet on their feelings.

And the force is also wonderful. If you have little strength, you can't pull it out. If you have great strength, you can't pull it out is a dead baby.

Determining the position, LV Shuyan took a deep breath. His hands began to force, just like a tug of war.

The child is stuck in the birth canal like a bottle stopper of red wine. LV Shuyan's face was red.

"Come on, come out. The child is coming out. Come on! "

Zhang Fan cheered loudly. Big belly woman was like a crying baby, constantly crying and talking in her mouth.

Really, I want to go up and slap her in the face. Just as she couldn't understand her thoughts, she couldn't understand the doctor's mood now.

LV Shuyan began to tremble and her hands trembled.

This force is too wonderful to be described by experience. It can only be felt by hand.

Zhang Fanyi saw that the situation was wrong. He changed his hand and grabbed the forceps in LV Shuyan's hand. "How about the strength? Am I right? I'll exert myself. You can control the direction."

"OK, slow down, be sure to slow down! Never use brute force. "

To tell the truth, Zhang Fan's strength control in the operation can almost be called a master.

However, with forceps, he is really inexperienced.

In the birth canal, the child has the friction between itself and the mother, the attraction of negative pressure, and the contraction force of muscle peristalsis.

All these rely on pliers and the child's head and neck to resist. Really, a little carelessness is definitely an accident.

Sweat, before long, they were like washing a sauna, with sweat beads hanging on their eyebrows.

A slight "bang!" Like the bottle of champagne, the child was pulled out of the matrix by the two people.

LV Shuyan grabbed the child, wiped a pair of gloves on the child's face, hooked his index finger and stuffed it into the child's mouth, then quickly cleaned the meconium and fetal fat in the child's mouth, and then pulled off his mask.

On weekdays, the small cherry mouth does not hesitate, just like gluttonous eating pig head meat, which includes the child's nose and mouth.

The labor process is too long, and the child has developed hypoxia.

The child hasn't recovered yet. As a result, the pregnant woman has a lot of bleeding.

It's really a leak in the house and rain at night.
