

## Chapter 911

Buy a peach can meet sweet and unsweetened. In fact, seeing a doctor is almost the same. You can meet a high-level doctor or a doctor with mixed papers.

The doctors in the emergency department at sunrise on weekdays are all young doctors, and few doctors at the deputy high level and director level go out of the emergency department.

If today's obstetricians and gynaecologists send out a doctor who is fooling around, it will definitely be one corpse and two lives. They don't take it with them at all.

Therefore, Lao Mei's film was not understood when he was young, and he was not young to understand.

"Life is like chocolate. You never know what's next!"

Zhang Fan and LV Shuyan changed positions. She went to deal with the maternity and he went to deal with the children.

Because Zhang Fan's rescue is higher.

Zhang Fan held the child, while rescuing the child and printing it between the child's nose and mouth, while constantly massaging the child with his thumb.

If there are good people, they will definitely say that this is an indirect kiss.

In fact, if possible, Zhang Fan is willing to give this opportunity to others. Who loves who comes!

It's like eating soap and fat pig meat stained with shit. It has a beautiful hair. Its throat is full of hiccups, and even its tongue slips.

The meconium and fetal fat on the child taste too

The blue and purple child was finally rescued by Zhang Fan. Four lotus root like limbs kept shaking, as if shouting again: get out of here, I want my little sister.

In the operating room, LV Shuyan and gynecologists began to rescue pregnant women.

Zhang Fan finally sent the crying child to the obstetrician. He took the paper and wanted to wipe his tongue out.

There's no place to complain about such things. It's natural to do such things after eating this bowl of rice.

.....

People who study in hospitals have shown corresponding standards in their relevant departments.

Xue Fei of the emergency center, needless to say, put his achievements there. The former transfer center has now carried out all emergency operations. Moreover, there is no need to ask for help and put out the fire.

Chrysanthemum protection team, anorectal department. As the chief inpatient, Wang Zipeng has supported the whole department. In the past, he could only do hemorrhoids. Now many operations have been carried out, and the work of the Department has changed with the naked eye.

In the third Department of orthopedics, Chen Qi had a problem and was sent to the clinic. At that time, the three branches of bone were almost scattered. Now Zhou Chengfu leads the team, with Wang Yanan and Xue Fei leading.

The third Department of orthopedics has become a flower of tea element hospital in minimally invasive surgery.

It goes without saying that doctors in Marubeni have become a scenic spot.

I don't know whether the Chinese people are strange or human beings are like this. For example, there are few patients in the general clinic, and the doctors are almost idle counting hair. The expert clinic next door is overcrowded.

Now, doctors in Marubeni go to the clinic like stars holding concerts.

Three floors inside and three floors outside.

And the old lady shouted outside the crowd: is it a sphygmomanometer? Does the doctor grow well inside? Do you have a rendanhu?

Doctors in Marubeni have seen so many patients. They protested to Zhang Fan: "we're here to learn technology, not to be coolies."

If according to the past, Zhang Fan estimates that there is no way. Maybe they're going to cancel their

clinic.

Now Zhang Fan, who has been trained by Ouyang, has begun to suffer from abdominal darkness“ This is the treatment of famous doctors! Don't be dissatisfied. Moreover, who finds the patient, who can be a help! ”

In this way, doctors in Marubeni are very motivated, because people come to study in 369 grades, and often many doctors can't get help.

In general, the message from Marubeni is that tea is really powerful in intestinal tumors.

Then, Marubeni began to send a letter to tea vegetarians, which means that doctors can be sent, and they will definitely train them according to the highest standards.

MARUKI sent a letter!

MARUKI sent a letter to the tea vegetable hospital!

MARUKI invited Chinese doctors to study!

The news spread like wildfire and could not be stopped.

Over the past few years, people only look at Lao Mei, and the rest feel inferior to China. Compare everything with old America.

Indeed, the country is developing very well. I don't know about other industries, but in Asia, the medical treatment in meatball countries is still very powerful. Even Li Jiapo, who is looked down upon by everyone, has very good medical treatment.

This time, everyone looked at it eagerly, and someone even said bitterly: "five places, can the tea vegetable hospital send so many people? Don't make up for the number and lose the face of our Chinese people. "

There are people who say sour words, but there are no people who rob. The major hospitals in bird city have long understood this truth. Tea vegetable hospital cannot be provoked. Once provoked, it will become a tea vegetable branch.

In fact, this is also true. For example, the central hospital and the First Affiliated Hospital, now Zhang Fan is almost the chief surgeon of others.

Several other hospitals are at least senior officials. People also have face. No, we can ignore how the first hospital and the central hospital are, but we must not let Zhang Fan put his hand in again.

Therefore, except that Lao Zhao, Zhao Jingjin and Xu Guangwei, the First Affiliated Hospital, wanted to

get some light, several other hospitals just blocked the news.

People on this side of the capital also envy it. After a trip back to Marubeni, it is estimated that it can be improved a lot in the industry. But there are lessons to be learned.

When I went to the United Arab Emirates, I killed a shameless man and robbed a place. As a result, Zhang Fan returned it and was complained by the superior leaders. Therefore, few people outside China dare to rob Zhang Fan's achievements now.

"The European Academy is going to study the list of meatball countries this afternoon. Can you come here sometime?"

Zhang Fan calls Ouyang himself. If you forget the old lady, there will be no good fruit to eat.

As a result, unexpectedly, the old lady was like a different person: "I'm not even a hospital legal person now, so I won't come. Let others dislike you when you come! "

Zhang Fan, who said this, began to reflect on what he did wrong and what made the old lady cold!

Zhang Fan wanted to explain. As a result, Ouyang said, "OK, don't bother me. Recently, the second and third hospitals have improved a little, but the number of patients still can't come up. Can you contact the people in the west? At least we even renovated the hospital. We can't leave it idle! "

It turned out that Ouyang was worried about it.

It's really a few waves to send a plane, pick up my son and come to see Stan people in tea and vegetable area.

But after the climax, just like entering the sage time, suddenly, only two or three birds came here for treatment, so Ouyang is a little uncertain now.

Zhang Fan is enjoying good luck in the medical industry, and the old lady has been cooking oil and flowers in recent years. As a result, the bull seemed to blow big.

In fact, Stan's side is not all rich, nor are they all patients, and Zhang Fan's fame has not been really recognized. Two one blessings.

The hospital opened to make a fortune. As a result

For this matter, Zhang Fan is powerless. He can't go to other people's countries to bind people for medical treatment.

However, there is a good saying.

Those who save themselves are saved by heaven, and those who abandon themselves are abandoned by heaven.

Two branches of tea vegetable city hospital have come.

## **Chapter 912**

When many people are in deputy positions, they are not comfortable as department directors or chief doctors, and there is no possibility to display their ambitions.

For example, Lao Gao, his main office has become a government building.

He can't go without going. Ouyang is like an alarm clock. He calls once every three days to ask about government funding.

Ouyang really didn't expect the government to allocate funds, but she couldn't let Lao Gao interfere with Zhang Fan.

So now Zhang Fan really has to take care of big and small things. Even the wild cats in the hospital call spring, someone reports to him.

For example, Zhang Fan should know the list of students who go to marukuni for further study, then pull Ren Li, Chen Sheng and Lao Gao together, hold a small meeting to unify their ideas, and then hold a general meeting to announce it.

This is all learned from Ouyang. However, this method was not pioneered by Ouyang. It is estimated that he also learned from Grandpa Mao.

Chen Hong went to the municipal hospital with Zhang Fan and Li Hui. It was also a flower among the newcomers at that time. The girl was more progressive. He is not only the Secretary of the Youth League Committee of the hospital, but also a young Juncai of the municipal Party committee.

As a result, after Zhang Fan worked hard, the girl was silly. Although Zhang Fan licked her like Li Hui at the beginning, she felt that if she had good eyes, she could still win Zhang Fan.

It's too late to say anything now. But people are not simple. In the hospital, she often claims that they are the 09 generation. What do you mean? In fact, she and Zhang Yuan are hospitals together and have a good relationship.

Her statement has a market. Where there are people, there are Jianghu. That's right. She often calls on people who went to the hospital together to get together.

Zhang Fan was also invited, but every time Zhang Fan refused with a smile. He doesn't like this woman very much. He is too scheming. Standing in front of her, others look like fools.

I don't know where a woman got so many official addictions. And as long as Zhang Fan sends a notice, she first responds accordingly.

Such as the hospital, the canteen. After Zhang fan used the meal allowance in all small shops in the hospital, she immediately suggested changing the canteen owner.

Although these are small things, Zhang Fan never expressed support on any occasion. He is now a legal person. He must speak accurately. Everything is possible, not like talking to the patient's family.

Yes, no, No. Never leave room for reverie for others.

For example, Chen Hong asked her husband to find a leader of the government when she went to the pill country for further study. If Zhang Fan thought she had helped himself and approved her move, he would be passive now.

Therefore, at the beginning, Ouyang told Zhang Fan not to underestimate anyone, especially those with great ambitions!

If you open a hole, there will be all kinds of relationship notes coming from behind.

Zhang Fan's main task now is actually to adjust the personnel of each department, just like the system. In each department, he must have a corresponding person, and then let this person pull up a small team.

Pull up a team that can come when called, fight and win. Then, after integration, he is directly a huge team and platform.

Of course, these are all dreams. Now he has won three departments.

Therefore, the road is long and dangerous.

"Xu Xian, well, let him go out this time, and then the flower can go out..." Zhang Fan thought in his office.

There are many official affairs in the unit, and now there are even many private affairs. With the promotion of Zhang Fan's fame and status, now more and more people want to deal with Zhang Fan.

For example, Zhu bin and Lu Renjia asked Zhang Fan for escort. There was no way to refuse this kind of thing. Several people were friends through life and death. For example, when the blue and white group came for a physical examination, the boss personally led the team, and Zhang Fan wanted to come forward to receive it.

If it weren't for Chen Sheng, Zhang Fan would be absolutely busy.

Ouyang is really helpless for the two branches now.

If you are in a big city, you don't have to worry about these hospitals. But tea is not good. It seems that in a city with a population of 50W, it is estimated that one-third of people go to the mainland to work every year.

Therefore, when the tea vegetable city hospital became the leading hospital, the other two branches of the general hospital were hungry.

Almost everything is good plus good. There are many things to add flowers to the rich brocade. The diversion of refueling in the municipal hospital, appendix, gallbladder and even some elective operations are placed in two branches.

However, most of the treatment costs belong to the general hospital. Because the doctor came to treat it. Otherwise, the tea vegetable people will never agree.

Ouyang now feels as if he has been dug a hole by the leaders of the government.

Otherwise, why did people dump the two branches to the municipal hospital so happily. Because government leaders have more detailed data.

Take the loss as a bargain!

Now the old lady has no choice. She gives the task to Zhang Fan, who is also in a mess.

Sometimes, when luck comes, you can't stop it.

Just when Zhang Fan thought it was shameless to advertise. There are people from meatball country.

They really have a deep and detailed understanding of Zhang Fan's technology.

For the surgical techniques of intestinal tumors, they must win.

Although the intestine is the place where food and nutrition are absorbed, the absorption of drugs is too poor.

For example, intestinal infection leads to diarrhea. After taking antibiotics, there is a wave of dissolution of the stomach and decomposition of the liver. When reaching the intestine, there is almost no amount of medicine.

If you enlarge the dosage, the human body can't stand it. If you can't cure the disease, you will be poisoned. Therefore, there is only surgery for intestinal tumors, and there is no other way.

Is Zhang Fan's technique powerful? It's too powerful.

As long as there is no diffusion, Zhang fan can definitely cut it clean. It's all a legend.

But there are too few patients. Experts from Marubeni have been here for two months. They have all become guest experts of tea vegetable city hospital and are busy going to the clinic.

Occasionally, there are one or two patients who can't even help.

Therefore, they want Zhang Fan to go to the meatball country.

As a result, in Ouyang's words, Zhang Fan is currently a Provincial cadre, and it is difficult not to assign him!

There's no way. The experts in meatball country cry. They let a group of old tea vegetarians surround them every day. They're about to collapse.

Finally, several hospitals will definitely let the patients of their own country come together!

It's really blossoming inside the wall and fragrant outside the wall.

Zhang Fan, they most want to win the surrounding stans. As a result, MARUKI started first.

Are there many intestinal patients in Marubeni.

Quite a lot of them are said to have this disease in a certain generation of emperors. It is conceivable that they have an urgent need for this technology.

Not only their own patients, but also Mongolian patients, they invited a lot.

The cost of treatment is subsidized by the government.

Although this country seems to feel bad now, in fact, it is still a big country in Asia.

The intestinal tumors in their country and those outside Mongolia actually have the same goal.

For example, they eat raw fish and meat for years. For example, snow fat cattle, put some mustard and soy sauce. It's really raw. Moreover, almost all fish, especially fish, can be sliced as long as they come from the sea, and then pursue a delicious taste.

A large number of parasite eggs enter the body. If adults enter the mouth, most of them can be killed in the stomach.

People secrete hydrochloric acid, but insect eggs may not be able to kill them. The insect lives and works in the intestinal tract, eats enough intestinal contents, and then starts to bite the intestinal tract.

The intestines were broken, healed, healed, and then bitten.

As a result, cancer appeared.

A large part of cancer actually comes from this. For example, gastric cancer, such as oral cancer, all come like this.

The scar healed, and then the scar, the scar broke again. When people get angry, they enlarge their moves.

The Mongolians, in fact, are somewhat similar to the Marubeni state.

This country, how to say. In his early years, he was still a family with China. Later, I don't know how. Just like Li Jiapo, his feelings for China are very complex.

Because it is located in a plateau, high altitude, and how developed the Ministry of industry is.

Therefore, they don't use much pressure cooker, which is a standard tableware in China.

Then there is the half cooked food, especially the habit of European and American people. They eat the beef with blood.

A mouthful of meat and blood made them feel good. Then there is heavy drinking.

There are many intestinal diseases.

When Marubeni was about to send patients for medical treatment and surgery, Ouyang finally put his heart down.

The government has finally seen hope. Tea vegetable city hospital really saved the two branches.

All the formalities are handled urgently.

The government came forward in person. Public to public, things are simple.

The tea and vegetable hospitals are clean and clean. Zhang Fan and his colleagues are waiting for the patient to come to the door and light the knife.

What's more, with the help of his elder martial brothers, Zhang Fan finally published his paper.

And it's in a world-class journal.

The elder martial brothers called to congratulate, but Zhang Fan felt uncomfortable. Really, according to his level, is it still a matter to publish a few papers?

As a result, it became a big problem in his hands.

Finally on the lancet. Zhang Fan called the master at the first time.

It's not showing off. Zhang Fan wants to ask, is this always OK? Can graduate students graduate?

The paper was passed by Lu Laomian as difficult.

### **Chapter 913**

In frontier areas, especially on grasslands, seasonal changes are sometimes not calculated according to years. For example, heavy rain can turn into heavy snow in a day. It's no exaggeration.

If one day, the price of cattle and sheep on the street of tea vegetable suddenly rises, it doesn't have to be considered. It's definitely that there is snow on the alpine meadow in summer or too much snow in winter.

Zhang Fan's family is like this recently. It's mutton every day. The old men and women raised sheep to get rich.

For such things, Zhang Fan never spoke. Whether to make money or not is to let the old men and women have a place to exercise.

As a result, I really answered that sentence. I don't count those who are rich and hairy.

In the summer, who could have thought that there would be heavy snow and didn't prepare much feed, so they expected to eat grass. Then, even frozen and hungry, dozens of sheep became frozen mutton.

"Mutton soup for breakfast, mutton stew at noon and yellow stew at night. Life is a little better recently! "

They didn't tell Zhang Fan about it, but they couldn't digest the mutton every day.

Go home at night and have a look. It's a pot of stewed yellow. Zhang Fan is almost out of control. Moreover, the mutton in summer is not delicious. It is at the stage of fattening up. How can it feel like forced tooth plugging.

Shao Hua smiled, "you are satisfied. You can eat mutton and shout. When they come, parents can't say. "

"What's the matter?" Zhang Fan asked.

"It snowed heavily in the alpine meadow. The sheep raised by the old men and women are almost frozen. Several people are having a hard time these days! "

"Are you okay?"

"It's all right. They were going up the mountain and I stopped them. " Shaohua gave Zhang Fansheng another big bone.

"That's all right. People are fine. The sheep are also frozen. We can't let the old men and women come back and have a rest for a while. When the weather is fine, go back. "

"Those who wear fur coats are completely frozen, but those who wear down coats have no problem at all. The sheep are gone, and there are a group of chickens, ducks and geese. They will never come back. "

"It's not good for you. It sounds like schadenfreude!"

Zhang Fan smiled.

"Don't talk nonsense!" Then Shao Hua said, "lavender is about to bloom. I've been a little busy lately. To contact the travel agency, contact the studio. Wait, my sister will raise you later! "

Shao Huahong's face makes him feel like he is dominating the Jianghu.

"OK, I'll have a soft meal in the future!" Zhang Fan didn't take it seriously " If you are rich or not, let it go first. You can spare some time. Anyway, there are no sheep at home. You can bring the car back to the old people.

They got their driver's license. "

"Well, OK."

"Can you stop eating mutton tomorrow. I can't digest it. " Looking at a plate of braised mutton, Zhang Fan began to worry.

"The fridge is full, and there are two left. Give it away. It's frozen mutton. I can't take it out. Throw it away. It's a pity. So I'll eat it tomorrow! "

Usually eat mutton, a few hundred dollars, I don't feel much meat. But these days, Zhang Fan is really depressed.

"I can't finish it. We can't finish eating. I'll make a mutton dinner at home tomorrow. I'll contact some friends to eat. "

Zhang Fan began to think.

"Li Hui, what are you doing?"

"Oh, Zhang Yuan! Miss you, holding a baby at home. What's up? "

Prodigal son can't look back. He feels like a person when he looks back. Now he goes home after work and holds the baby when he comes home. The QQ space is full of photos of the baby.

"The sheep raised by my parents and my father-in-law's mother-in-law are frozen to death. I'm sorry to give it to you, but it tastes good when braised. Come to eat it tomorrow. It's my treat! "

"Ha ha, it's a treat in Zhang Yuan. It's strange. OK, what time tomorrow, can you take your family? "

Zhang Fan invited colleagues from the hospital, including Wang Yanan, Li Hui, Wang Zipeng, Xu Xian, Xue Xiaoqiao, Ma Yichen and LV Shuyan. They can be regarded as a wind for the group of people studying.

None of the students came back, which raised Zhang FanTai's morale.

Spending public money to entertain them, Zhang Fan felt sorry. I feel a little lost spending my money. Ah, it's such a stingy person.

If Zhang Fan wants a treat, he will still have a dinner at home.

Darling, the city hospital is shaking.

Who doesn't know, it's time to confirm the list of trainees to Marubeni country.

Last time I went to study, Zhang Fan invited me in advance.

It's another treat now.

Those who have ideas are in a hurry. You have to find a way to participate.

"Li Hui, are you busy? Writing medical records? Your respiratory department belongs to your medical record. Our director asked us to use your as a template! " Wang Hong from respiratory department and endocrine Department came to Li Hui.

At that time, Li Hui was Wang Hong's Tianzi No. 1 licking dog. As a result, I learned later that I had been played.

But licking a dog is licking a dog. If you change it again, you still can't change the licking nature in your bones.

Originally, when Li Hui saw Wang Hong, he was still taut and looked like Lao Tzu.

As a result, Li Hui couldn't sit still at the sound of Wang Hong.

"Where, I think more when writing medical records. For example, systemic, a disease cannot simply think about the respiratory system, such as COPD. This disease affects many systems. From heart and lung to digestion, it can even affect endocrine... "

Li Hui said that the white foam came out from the corners of his mouth.

Wang Hong's IQ is not high. It's hard to say, but her EQ is quite high.

Listening to Li Hui's nonsense, she looked at the sky. He didn't have to talk. He held his cheeks in his hands. His small mouth pouted. His red lips made Li Hui drunk without drinking.

The more he spoke, the more excited he became. Li Hui felt that he was possessed by Lao Hu.

"Please!" It seems that the situation is almost the same. You can't light it anymore, or you don't know

what's going on. Wang Hong seized the opportunity and said.

"You said, you said, you said, as long as it was done, it would be done properly for you." Li Hui hasn't reacted yet.

"I heard that Zhang Yuan invited you to dinner tomorrow. I also want to go. You won't refuse such a simple thing!"

A sunny day is a dry day!

The roaring Li Hui is tender and scorched outside.

"You won't really refuse me!" Wang Hong's expression was moving, and her tears seemed to be spinning.

Wang Hong, who has become a young woman, is more plump than when she was a girl, and her EQ is much higher.

In three words, Li Hui at the top went to the room.

Zhang Fan is his only and final relationship with tea. There are many brothers and sisters in my mother's family. One by one, I'm in good health. But they are ordinary people.

Now my brother-in-law and brothers beg him more often. What friends are hospitalized and relatives see a doctor. If you want them to help, you can't count on anything but physical work.

Therefore, he attached great importance to Zhang Fan's relationship.

Licking a dog belongs to licking a dog. Li Hui's thing is thick face.

Wang Hong felt that she had won Li Hui. As a result, Li Hui's face changed from red to white, then green, and finally recovered. She was ready to thank him.

As a result, Li Hui said with a smile, "where did you invite me? My wife was invited by the wife of Zhang Yuan. I took a room and I was with you. No right!

You don't know. They have a good relationship. I can't! "

Wang Hong looked at Li Hui carefully, then stood up and left without saying a word.

smooth and clean!

Then Li Hui called his wife with a guilty heart. Being a teacher's wife is too difficult to deal with.

Originally wanted to use Li Hui, but now this guy is smarter.

Wang Hong can only pass her husband.

His husband is a young leader in a functional department of the government and has business dealings with blue and white.

Finally, I don't know how. I entrusted a vice president of Qinghua to call Zhang Fan.

This is not empty talk. It must be returned in the future.

Wang Hong.

Other aspiring people also think of ways.

"Zhang Yuan's treat!" A couple working in the hospital got off work and chatted in bed.

"Hey, it seems that the number of students to study in meatball country needs to be determined! Why don't we give Zhang Yuan some gifts? "

The wife who works in the pathology department leans against her husband and is tangled in her heart.

My husband is in the urology department. He has always been like an invisible person. He is honest, so in the past, nothing good could happen to him.

"Hey, what does Zhang Yuan lack! You didn't see Lao Chen and Lao song from ordinary foreigners. You followed Zhang Yuan abroad and bought them all. If Zhang Yuan didn't open kuluze, it's estimated that they would definitely buy kuluze. "

"What should I do? Your business is now in the bottleneck period and you are not young. Now Zhang Yuan likes to use young people. You don't have many opportunities. "

The wife in the pathology department feels very uncomfortable. His man is good at everything. He takes care of himself and doesn't flirt. He's just a little too honest. He never has any redundant ideas.

Even seeing the leaders is a simple and honest smile, which won't happen at all.

"See, maybe Zhang Yuan..." the male doctor felt a little distrustful.

Zhang Yuan's treat!

In the hospital, not only ordinary doctors were excited, but even Chen Sheng called.

"Zhang Yuan, the business of the second hospital has obviously increased a lot recently. I will follow your

instructions and strive to improve the service quality of medical personnel from top to bottom... "

Zhang Fan is wrong. Chen Sheng seems to be reporting his work. In fact, it's all nonsense.

"I have something to say. I wash mutton. Busy! " To treat, Zhang fan can't let his wife do it alone, so he also rolls up his sleeves and handles mutton.

"Do you have time at the weekend? I'd like to invite you to dinner!"

"OK, I see. The mutton at home is frozen to death. I didn't call you if I wanted to find some young food. If you don't like it, come!"

Zhang Fan explained.

"I like to eat frozen mutton, especially..."

"Well, come home tomorrow afternoon. Who wants to come? You have a good grasp of the list. There are too many people to sit in the family. "

"OK!" Chen Sheng smiled.

That's the result. Zhang Yuan will definitely give face when he asks, but it seems that he is spoiled and charming. Although this is nonsense, it can make the leaders comfortable.

Lao Ju, Juma Buick will also come.

The proud old house now fully recognizes Zhang Fan.

Because Zhang Fan didn't claim power, he didn't expect that Zhang Fan made a report and nominated him and Chen Sheng as vice president.

This makes Lao Ju's pride disappear in front of Zhang Fan.

So now he is also actively moving closer.

"One dead mutton, one two have to get together! We can't make up our minds. There are more and more people! " As time goes on, more and more people will come.

Zhang Fan said to Shaohua.

"Come on, there are a lot of mutton. There are several. Don't do it. Go clean up. I'll let my cousin and sister-in-law help. "

Hearing that a large number of people from the hospital were coming, Shaohua immediately stopped

Zhang Fan from continuing to wash mutton.

Shaohua didn't do it either. After calling her brother and sister-in-law, she quickly cleaned up the house. Dried fruits and flowers were placed on the table, and the ground was wiped again and again. Those who are busy have to assign Zhang Fan to wear appropriate clothes.

.....

## **Chapter 914**

You can't wear a sky blue tie at home. Although it was summer, Shaohua still wouldn't let Zhang Fan look like an old man with big underpants. Although he was comfortable, he always had little respect for the guests.

Zhang Fan originally wanted to call some people to come and relax, but now he seems to have extravagant hopes for him.

Shaohua's cousin and sister-in-law came quickly. The couple sold steamed stuffed buns in the newspaper booth of the municipal hospital. Because they cleaned up clean and full, their business was very good.

At that time, after Zhang Fan became an assistant to the president, the couple didn't have the shallow eye socket, as if the municipal hospital was their own. Brother Shao Huatang even plans to quit.

Deeply afraid of bringing bad influence to Zhang Fan. Their income is good and good. There is no problem with 10000 yuan a month. Although they work hard, they are definitely more comfortable than being a big worker and a small worker on the construction site.

However, there is such a problem at home. They would rather suffer a loss than drag down Zhang Fan.

The times have changed, but we can't deny them all.

For example, their children, who originally went to primary school in the county, wanted to go to key middle schools in the urban area, and had little chance.

At the beginning, they didn't want their children to enter key junior middle schools, but they wanted to

enter schools in the urban area. They were very embarrassed. As a result, Zhang Fan made a phone call and asked him to sign up directly.

When they went, they all felt incredible!

When I arrived at the school, I saw what was incredible. The director of the Academic Affairs Office entertained me personally and said that the headmaster had told me that he would not give up the money for repairing a school toilet.

Their generation is stereotyped, but their children study well.

But Zhang Fan didn't let them leave. Because their steamed stuffed bun porridge has become the breakfast order of the hospital staff. It's not everyone's face, but the real intention of others.

My cousin and sister-in-law came in and didn't have time to start. They brought local chicken, rabbit meat and vegetables at home. Zhang Fan was embarrassed. Although people can't say anything nice, what they do is to let Shaohua and Zhang Fan know that they are grateful.

They didn't talk much. Their front feet came in and Bayin's back feet came.

Few nurses go out to study. Most of the places in the hospital are for doctors.

But Bayin went out. As soon as the little girl came in, she called her sister-in-law affectionately. She was not very enthusiastic about Zhang Fan. Milk tofu made at home, beef sold by his husband Xuefeng, big and small packages.

Bayin is now driving a small Audi and living in a big house. Her husband is strong and moist like a calf. In the hospital, the head nurse of any department gave her face.

She can also be a person. She has hardly found Zhang Fan.

It wasn't long before Bayin came in. Li Hui and his biology teacher also entered the door without children. Without saying a few words, Chen Hong also entered the door.

Zhang Fan is also going to look at gossip. As a result, whether Li Hui or Chen Hong, he is calm like a friend, talking and laughing.

The guests came one after another according to their relatives. The women went into the kitchen to help, and the men chatted in the living room.

Chen Hong secretly compares herself with Shaohua " Well, it's not so beautiful. I should be more beautiful than her! But the temperament is good.

Hey, it seems that leaders still support people! Look at other people's smiles. They are really smiles! "

Chen Hong sighed slightly in her heart.

Women are particularly sensitive. They are very polite to Chen Hong and Shaohua. For Bayin, Shao Hua was very close, "Bayin, come and pour me tea!"

People are like this. Bayin said sweetly, "sister-in-law, are you so particular about pouring tea? I always pour tea with a handful of tea and a cup of hot water. There is no such thing! "

"Tieguanyin has a cup of hot water. It will be bitter for a long time!"

"Oh! My sister-in-law knows so much. " Simply a little naked flattery, but Shaohua likes this girl, straightforward!

Shao Hua's attitude towards Bayin made even the nurses in the operating room a little jealous " Xiaonizi, I'm so lucky. How can I have eyes with Shaohua? "

Chen Sheng entered the house with a large army.

"Zhang Yuan is a treat. We haven't eaten since this morning, so we're waiting for this mutton."

Chen Sheng shouted exaggerated before entering the door.

"Ha ha, director Chen, come in and sit down. Why is the resident director still carrying drinks? "

Zhang Fan and Shao Hua warmly invited everyone in.

Always living in front of others is still proud and charming. When the country was in danger, he dared to go up, or he borrowed all the chairs and stools of the neighbors from the medical system in the tea vegetable area.

Shao Hua looked wrong. He hurried to the restaurant outside the community with Bayin and Wang Yanan and ordered a lot of dishes. She never bothered Zhang Fan about such things.

Many female doctors came, especially those in internal medicine, cardiology and endocrinology.

Most people met Shao Hua for the first time. They were a little more in their hearts.

However, Zhang Fan's vision was quite powerful. It can be said that Shaohua was really a trace of time.

A frozen mutton became a hospital dinner. Zhang Fan was also secretly alert. Now he is not the Wu Xia Amun in those days.

No one took the initiative to mention going to marukuni for further study.

We want to boast about the decoration, but Zhang Fan's decoration really can't boast. We can only say that the home is clean!

I don't know if everyone has eaten well, but the four sheep brought back from the farm eat clean.

Having had enough to eat and drink, everyone didn't bother Zhang Fan much, but Shaohua left Bayin and Wang Yanan, but Li Hui didn't go either. In other people's words, he was half the owner.

"Is your gynecologist Dr. Lu married?" Shaohua and Bayin clean up the pots and pans, and they talk secretly.

"No!" Bayin secretly looked at Zhang Fan. Seeing that Zhang Fan didn't pay attention, she quietly said to Shaohua, "there are a lot of people in the hospital thinking about Zhang Yuan. I thought about Zhang Yuan when he wasn't married.

However, our Zhang hospital has a high vision and composure, and after seeing your sister-in-law today, it is estimated that all their thoughts will be gone in the future! "

The girl's expression of two faces is too powerful. It seems that there are a lot of contents. In fact, he didn't say anything, but Zhang Fan has nothing to say in his private life.

After a meal, in fact, it also explains one thing from the side. Tea vegetable city hospital has entered the era of Zhang Fan.

Although Zhang Fan didn't have this idea, Chen Qiao wore a yellow robe and couldn't tell right and wrong with his mouth. However, the current situation is what Ouyang expects.

The old lady knows that her achievements in this life are the city hospital. Now she can't consider the extent of the city hospital.

For Zhang Fan, she knows that the young man has no technical problems. His character is even better. From his attitude towards Lao Gao, although Ouyang often dislikes it, he is still quite recognized in his heart.

However, the only worry is Zhang Fan's character.

Xiangyanghua, who can smile, blooms. Moreover, without wolf nature, it seems immune to the temptation of power.

Therefore, this is what Ouyang has been worried about.

Now, the old lady doesn't look at pouring cactus on the large platform of the health bureau all day. She has nothing to do to clean up the director of the Health Bureau. In fact, she is staring at the municipal hospital.

For example, she doesn't comment on the list of students who go to Marubeni for further study. Now she is waiting for Zhang Fan to see if he can resist the thousands of human relations in the world.

Otherwise, she thought she would give Zhang Fan a class.

The declaration list of vice presidents of the hospital was approved, and Jumabek and Chen Chengcheng were the newly released vice presidents.

In particular, although Chen Sheng ranks behind Lao Ju, he is mainly responsible for assisting Zhang Fan.

"You've been out of clinic for too long. I want Lao Ju or Ren Secretary to lead the team in Marubeni this time. What do you think?"

Zhang Fan takes the list and asks Chen Sheng.

After a little thought, Chen Sheng said, "the resident director and Secretary Ren can go either way. I'll forget it. However, according to the grade, Ren Shu's record is slightly smaller. "

So far, after Lao Chen finished speaking, he stopped talking as if the language behind him was improperly organized.

"Oh, I see."

Personnel is politics.

That's right at all.

Ren Li's family is the nominal number two of the hospital, which is supposed to be higher than Zhang Fan, but Lao Chen knows that Ren Li can only be the number two forever. If Zhang Fan leaves in the future, this place will be the place where he competes with Lao Ju.

So

The list of Marubeni's advanced studies has finally come out.

This time, Zhang Fan biased the quota to internal medicine. Because there was too much time, it was only three months. Surgery had no effect at all. Therefore, five of the five quotas were all internal medicine.

Ren Li led the team. The flower in her heart, breathing, endocrine and digestion, was on the list.

Moreover, the staff are almost always younger. Zhang Fan didn't ask everyone to take turns according to the arrangement of seniority. He wanted to speed up the development of the hospital, so he had to break the routine.

## **Chapter 915**

It is called the summer solstice because the days are long and the shadows are short!

The summer solstice of tea has finally arrived. It's no surprise that it lights up at about five o'clock in the morning, but in the evening, it's more than eleven o'clock, and the sun is still on the top of the mountain and doesn't want to go home.

In China, it is estimated that tea is the last urban area to set the sun. Tea vegetable children rarely hear their mother say this: father-in-law sun has gone home to sleep, and you're going to sleep, too.

In summer, tea is the world of flowers. Northwest China is OK in summer. There are many green trees, but generally speaking, it is still short of water. Leaving the city, it is distressing to have less green on the hillside.

But tea is different. There is plenty of rain. There is only a little white hat tip on the snow mountain in the distance, and the forest at the waist of the mountain is as green as ink jade. It feels like a tropical rain forest anyway.

The grassland at the foot of the mountain is different. Ten thousand flowers are dotted on the flat green carpet and swing with the wind. Red, pink and blue, and then scattered into a group of sheep like white cream beans, slowly moving in the grassland.

With the blue sky, there are bright lakes and winding streams on the edge of the grassland.

Really, the heart can be drunk. If there are a flock of sheep, another shepherd girl, darling, the gods will not change.

It is estimated that Lao Xu walked thousands of kilometers and didn't die when he came to tea. It must have something to do with the environment here. Raise people!

At the tea vegetable hospital meeting, Zhang Fan announced the list of students to study in Marubeni. Not only did he announce the list, he also announced the conditions of his choice.

From the business level to the hospital demand, it is clear one by one.

In fact, this kind of thing will not be recognized by everyone. For example, Ouyang always only announced the results and never explained. Then wait for someone to jump out.

However, Zhang Fan has no mind. It is not easy to be fair in general, and it is not easy for everyone to live and work. There is no need to dig a pit and wait for others to jump in.

This may be the difference in the ruling philosophy. Ouyang has nothing to do to compete with others. She is always fighting or on the way to fight. It was really characteristic of their time.

Zhang Fan wants everyone to feel the friendship of colleagues in a unit more.

It seems a little silly to say such words in the workplace. In fact, it is not. It is estimated that many people will say that it is medical treatment in what industry is the most stable in China.

Because once you enter a public hospital, if you don't choose the high branch to take the test, few can be transferred.

Not to mention the transfer between hospitals, even between departments.

Medical treatment is a turnip and a pit. The cooperation efficiency between familiar colleagues is also more skilled and accurate.

It sounds good.

What's bad is that in this stable environment, once there is dirt between two people, it will be decades.

Therefore, ordinary doctors in the hospital dare not take the lead at all. In fact, this means a bit of class solidification, so Zhang Fan wants everyone to have more ways out now.

If you can't get into a position, you can get into a professional title, if you can't get into management, you can engage in scientific research.

In general, I want to bring vitality to the hospital.

The staff who went to Marubeni for further study were sent away, and the number of patients in the two branches slowly increased. However, almost all of them are from Marubeni and Mongolia, and they all have gold masters to carry the pot.

Zhang Fan is not afraid of more surgery, but less surgery. With the help of this wave of medical treatment in Marubeni country, the technology of doctors of tea general foreign affairs can be significantly improved.

Of course, Marubeni did not suffer. People sent some top doctors, so the progress is also obvious. Moreover, the people in Marubeni are really smart.

When you see the effect and the effect of improving the amount of surgery, you start a lot of soft text publicity. After all, the cost of bringing people from their own country and Mongolia is really distressing. It's too expensive.

If you can't enjoy China's medical insurance, you have to give additional medical funds to the tea vegetable hospital. Zhang Fan and Ouyang bite hard in this regard.

In order to reduce costs, they not only publicized the refueling in their own country and called on everyone to come for medical treatment at their own expense, but also started Sao operations in the magic capital of China and Jiangsu and Zhejiang.

"After and cooperation between China's medical and tea element hospitals, the resection rate of intestinal tumors has reached the international advanced level."

A large number of Chinese people go to the pill country for physical examination every year, and they all have copper in their hands. After the pill country found intestinal diseases, they directly recommended the tea vegetable city hospital.

And secretly said that the top intestinal doctors in their own hospital are almost all in tea, so

"Where is tea?"

No one can help but know that China is too big. Some people began to ask Du Niang curiously. As a result, they found that small hospitals in a small border town had made advertisements in the pill country.

And it's tough. Almost all the top hospitals in the island country are constantly advising them to go to tea element. Your tumor can get the best treatment in tea element.

Some believe, some don't.

Most people who don't believe that platinum and calcium tablets have been washed for a generation won't think that the medical treatment in a small border town can be more high-end than that in Marubeni.

They feel that the hospitals in small border towns may have some hidden secrets with the state-owned meatballs. Public relations is strong enough to let foreign hospitals advertise, and there is no one!

If Marubeni recommends traditional strong medical provinces, such as Mordor, such as the capital, more people believe.

But the good thing is that seeing a doctor is different from selling goods.

When the disease came to blind ointment, even Dafen was believed. Moreover, this is a national public hospital, not a certain field hospital, so some people came to tea.

Externally, Ouyang's sickle grinds fast and smooth. It hurts to brush and cut the meatballs of Asian developed countries.

Ouyang's boast has finally come true.

The income of the two branches, like eating sildenafil, suddenly jumped from hundreds of thousands of yuan to tens of millions.

At the beginning, the government thought that even if the tea vegetable hospital, Ouyang and Zhang Fan were forced, they could pay their wages to the two hospitals on time. If they could pay more bonuses and allow the government to recover some funds, it would have exceeded expectations.

As a result, a careless person cultivated a super large hospital.

Moreover, this income is not the same as the patient of West Stan. There is no income today or tomorrow.

This is almost a hen laying golden eggs. With the influx of patients in southern China, the hospital is like inlaid with Phnom Penh. In less than half a year, the income of tea element hospital has exceeded that of Laojiao distillery, the largest enterprise of tea element.

At the beginning, the government signed a bow agreement, and now the boss of the government regretted smashing his chest into a nest.

"President Ouyang is really a heroine. In just a few months, the two semi dead hospitals have become the top hospitals in all urban areas of the border. It's amazing!"

In the most luxurious reception hall of the government, like meeting foreign guests, the boss of the government invited Ouyang, Zhang Fan, Lao Gao, jumabek and Chen Sheng together.

The grade is very high. Under the picture of great unity of all ethnic groups under the picture of thousands of miles of rivers and mountains, on the carpet of big peony, rows of beige cloth sofas, I don't know, I thought I had entered the general assembly hall.

This time, people have a long memory. The oral agreement with Ouyang was conducive to the hospital's recognition, but not conducive to the hospital. The woman turned away.

It was also called that the hospital committee did not pass, and sent Lao Gao of their hospital to the government to ask for accounts every day. The tea vegetable government was like Lao Lai.

"It is the government organizations that dare to act boldly and break through, breaking the medical deadlock of tea for many years. We have made today's achievements under the command and leadership of our leaders.

We dare not take credit for it. Without the support and vision of the government, everything is on paper. Tea vegetable hospital seems to have made some achievements now. In fact, it still has a lot of internal diseases.

For example, our scientific research seems to cooperate with the golden mean. In fact, people take the lead. We can do marginal work at most.

If we do not seize the opportunity now, this situation, which seems to be in full swing, will not last long.

So, leaders, we are bitter, we are anxious. Today, leaders call us over. I know that leaders absolutely suffer what we suffer and think what we think.

The president of the high court also told me that the funds for the hospital have to be discussed at the meeting. I think our leaders will not watch the loss of opportunities!

We will certainly understand the meaning of leadership, carefully study and figure out the strategic position of leadership, and carry out medical scientific research as soon as possible. Now wait for government funding.

With the strong support of the government, we will not let the government down! "

The old lady knows her own family. Her age and her qualifications are now estimated to have come to an end. Even if she were given another promotion, she wouldn't agree.

Therefore, she is now a little reluctant to be just. If she catches the conversation, she will ask the government for benefits.

The boss of the government is crying. It was as like as two peas of gold who thought about the money, and the result was that he had exactly the same idea.

Ouyang's words made the government staff's teeth start to ache.

Although hospitals are enterprises and institutions, they are different from general enterprises and institutions.

For example, tea distillery still relies on government support, official wine use and policy support every year. It dare not disobey.

Other people's hospitals don't rely on your government's support at all. They want policies. The government has no policies to take.

Therefore, Ouyang clenched her teeth. She is going to implement a problem today. It is time to issue the funds owed by the government to the hospital. Want to ask me for money, there's no door.

"The use of huge funds of enterprises and institutions can only be used through government research. President Ouyang, do you think this is OK? First you hand over the money to the government, then you write the feasibility report, and then the government issues the funds.

It's good to have the courage to do things, but we still have to abide by the rules and regulations. After all, they are the people and leaders of the organization. We can't take the lead in breaking the rules of the organization. "

The leaders in charge of health are also well prepared this time. The amount of money is too large.

If you take a little, how many big things can you do. So this time, almost all leaders came with various rules and regulations.

"Self responsibility for profits and losses is the standard that the leaders promised us at the beginning."

"But why do you want us to allocate money?"

"Shouldn't the money be allocated? The regulation says that the government can deduct and punish. Moreover, our hospital committee didn't agree. I didn't count.

Our starting point is to share the pressure on the government. We don't want to dig the corner of the country. We can't just assume our obligations without rights! "

What you can say, but nonsense. Ouyang was quite polite to the boss of the government. For the superior in charge, the superior in charge who did not understand medical treatment, he chopped and chopped, and the other party was speechless in a few words.

On the battle of words, on the rules and regulations of the medical industry, it is estimated that no one can say that tea has been eaten by Ouyang. People eat by this. You use your hobbies and other people's

housekeeping skills to fight. It's strange not to eat.

"Zhang Yuan, what are you going to do next? The government is also embarrassed. Look at the heavy snow a few days ago. It is difficult for herders. Thousands of sheep are killed and injured.

Also, education is the country's Centennial plan, but you see, there are dangerous buildings everywhere. As leaders, we should have great feelings and not be small. "

The government boss has no choice but to see Ouyang's oil and salt fail to enter.

He thinks that Zhang Fan is young and obsessed with technology. It's estimated that it's better to fool, and now the legal person of the hospital is not you Ouyang. Your red mouth and white teeth nonsense is simple. I won't talk to you.

Ouyang's mouth also said it was dry and took a sip of tea with a white porcelain cup. He secretly glanced at Zhang Fan in the gap of tea and squeezed his eyes.

Zhang Fan glanced at Ouyang and he understood.

What snowstorms and dangerous buildings are fooling people. The state has special funds in this regard.

The tea vegetable government can't help it.

Enterprises, apart from a winery that can only sell wine in the frontier, are minerals, but minerals are national. The rest of the chemical industry and cement almost have to rely on state funding every year to survive.

## **Chapter 916**

It was Zhang Fan's turn. The leaders sitting on the beige sofa leaned forward and gave Zhang Fan extra respect and expectation. No one even leaned against the armrest on the sofa.

As like as two peas in the boss's standard, then in the government, absolutely not. Just like GE's movie, fan's office is exactly the same as the one who has come to the guest. Things seem to have changed from the founding to the present, as if they were all made from an enterprise.

Ouyang carries tea with appropriate temperature. Although she can't hide her eyes through the water mist, who is she? She stares at Zhang Fan directly and naked.

"If we want to give young people more opportunities, their ideas can't be guessed by our elderly people. Suppressing their ideas is irresponsible to the future and it's time to disappoint the present. Moreover, Zhang's ability to operate such a large hospital without any experience is beyond doubt! "

Although the government boss did not name Ouyang, his tone was already very urgent.

It means, "you're less involved with me. Now I ask someone else about the hospital legal person!"

"Ha ha!" Zhang Fan smiles before speaking, standard configuration.

Ouyang seemed to have predicted it for a long time. With disdain on his face, he looked at Lao Gao. Their eyes were, "laughter is useful. Can you save money and ask for money? You can hold it for me later! "

The others sat more solemn than Zhang Fan and Ouyang, especially the sweat on Chen Sheng's forehead.

It's too difficult. The leaders of the government get together. He doesn't know how to get through at that time.

We must not be biased towards the government, or we may be eaten alive by Ouyang when we go back.

However, how to speak? Thinking oil and water seeped from his forehead.

On weekdays, when units compete with each other, cooperate with each other and unite with the outside world, everyone doesn't think much. They are definitely on the same front.

Lao Gao doesn't care. He has thought about it. If he wants to speak, he is talking about the national policy for medical institutions. He has changed the money he owes!

Lao Ju also wants to do well. He is a hero. If he is allowed to speak, he will talk about the backward medical and epidemic prevention in the west, especially in the northwest.

It's difficult for Chen Sheng inside and outside. He can't talk about China US relations in this place!

"Our hospital, the Central Hospital of bird city and the First Affiliated Hospital jointly carried out the liver central tumor laboratory.

The results are very good. We have determined the clinical treatment path of surgical improvement. It is estimated that we can report this result to the Ministry of health in the second half of the year. Maybe the treatment of Liver Center tumors in the future may come from our tea. "

Zhang Fan smiled at the leader and said.

Zhang Fan has a good attitude, quite good, and a posture of reporting.

He knows a truth. He doesn't reach out and smile. Compared with Ouyang, in the words of an old man, people have paid for the tea vegetable hospital, sweat and blood.

Age is also there. People can be proud and charming. People can be cruel, but Zhang fan can't.

But Zhang Fan has also let Ouyang adjust for several years. If he doesn't have any ideas and brains, it's estimated that Ouyang can be angry on the spot.

Zhang Fan first explained the laboratory results of the central tumor. People in the medical industry generally don't worry about these results.

However, now listen to what Zhang Fan said, report it to the Ministry of health and promote it all over the country. How powerful it is.

After listening to Zhang Fan, the government boss looked sideways at the leaders in charge of culture, education and health.

The leader nodded gently.

"Yes, I didn't expect that our tea vegetable hospital should have such a large and advanced experimental project, and it is about to succeed. Good, good! "

Achievements must be affirmed. This is the law. No matter what you talk about, people should first affirm their current achievements.

The government boss is also waiting. You always have a reward when it's over. After boasting, he encouraged Zhang Fan and said, "go on, go on, let's listen to the ideas of our young experts. We don't know if we don't listen. We're shocked when we listen to them. Ha ha! "

"Ha ha!" Zhang Fan smiled again.

"In fact, this scientific research project can only be said to be a pick-up. Because the first person in the surgical research of liver central tumor is my uncle, we just took a half step in his scientific research project. "

"Oh!" The government leaders stopped talking and took out such a big academician. What do you want me to say!

"There is also the research and development of large-area skin transplantation materials. Although it is a joint research with the golden mean University, we prefer clinical because we have no R & D ability. If we have R & D ability, the market is immeasurable! "

"Oh? Can we fight for it? After all, is clinical still very important? " The leader's interest was completely seduced by Zhang Fan.

"Hehe, when Professor Li brought the materials, it was the end of the research and development. Almost all the patent papers had been published. Now it is estimated that the effect is not great.

However, I will still follow the instructions of my leaders and try my best to strive for the benefits and benefits we deserve. "

What Zhang Fan said was quite pertinent, and the leaders listened to him.

That's right. Don't learn everything from Ouyang. You can't be naughty and call the shots. If the cadres are the same as Ouyang, how can the work be carried out.

After glancing at Ouyang, the leader said to Zhang Fan, "instructions are not instructions. After all, you are experts. The most we can do is to help give some ideas. If the government needs to negotiate with the golden mean University.

Zhang Yuan, you can rest assured that we absolutely give our full support. We can't bully people because we are small hospitals or because we are border hospitals. This is absolutely impossible! "

"OK, thank you, leaders. With your support, we can have confidence and talk to them!"

Zhang Fan didn't laugh this time, but said to the leader quite solemnly.

"You record it. We must put it on record. We must pay attention to the matter of Zhang Yuan!" Looking at Zhang Fan, the leader said to the Secretary General.

As soon as Ouyang heard it, she knew that Zhang Fan began to set up " Well, that's right! "

She was relieved. She leaned back on the sofa and drank free tea. She still muttered, "this tea is not bad!"

"If you throw away the costs and expenses, there is not much clinical income." After the Secretary General finished recording, Zhang Fan began to get to the point.

Leaders also began to be serious. Hard goods came.

Listening to Zhang Fan's words, everyone nodded. I don't know whether they agree with Zhang Fan's words or say they know!

"In terms of income, in fact, scientific research is the big head. For example, if we take the lead in the research and development of new materials for skin transplantation, it can be said that the patent fee for this scientific research achievement alone is estimated to exceed the financial revenue of our tea vegetable region. "

"Well, that's what I say, but high income also means high investment and high risk!"

The leader of the government said. It's not stupid. It's impossible for them to make sense in a few words.

"Therefore, we are still very weak. We will not move some research in many frontier fields for the time being."

Zhang Fan continued.

"Yes, don't aim too high. Zhang Yuan's idea is right. He can't eat a strong man in one bite."

"However, we can't stop, otherwise we can only follow suit. Moreover, with the end of the study of doctors in Marubeni country, I can say that our advantages of tea will disappear or even lag behind bit by bit."

As soon as they said this, the leaders looked at each other.

Of course, everyone is happy that money can come back from the hospital. If they don't come, in fact, as long as they stay in the tea vegetable hospital, they can continue to make money like this, which is tantamount to the meat rotting into the pot. How can it be beneficial to the tea vegetable area.

However, if such a good profit is taken away by the meatball country, everyone will be uncomfortable.

"Can we stop working with them?" This was asked by the leader in charge of health. Of course, the boss can't ask, but that's what the boss's eyes mean. It's just for him to say.

"When they were in the United Arab Emirates, they had seen my operation, and there were video data. Even if we stopped cooperation, it would be a little delayed at most."

Zhang Fan explained to the leader in charge of health.

Ouyang curled his lips and despised him in his heart: "just thinking about conservatism, thinking about conservatism. There is no momentum at all. Playing out is the best defense!"

"It's a pity!" Several leaders probably think so.

"Because of our current advantages, with the suggestions and decisions of our hospital committee, we want to carry out all-round cooperation with the medical industry in Marubeni country in the field of intestinal tumors.

Their intestinal treatment is advanced in the world. Through cooperation, we can not only learn other advanced technologies, but also improve our advantages in all aspects.

Now this resolution has been adopted by the Academy Committee. After it is documented, it will be reported to the government as soon as possible so that the leaders can point out the direction for us. "

Zhang fan lights his sword.

Leaders know that this is a circuitous strategy. The ultimate goal is not to pay, but also to play by themselves and live a rich life by themselves.

But the temptation is so sweet!

Bird city and the capital's hospitals don't say cooperation. They can let others help. They all quarrel in the border areas. It seems that they have made great achievements. They want to go to the newspaper every day and go to the central mother!

And tea vegetarians now have to cooperate with other people's meatball countries. How many hospitals are there in China? This still hasn't produced results. If it has, darling, I don't dare to think about it.

"Who leads and how to cooperate?"

"As the leading Party, we invest in the construction of infrastructure. They provide equipment, and both sides jointly provide scientific researchers and share achievements! Although there is no plan yet, Marubeni is also interested. "

"How much money do you plan to prepare for cooperation?" I don't even ask how much you can turn in.

The topic has completely changed.

"The initial investment is estimated to be about one billion, mainly infrastructure. Our two branches can be used as clinical treatment bases, but the experimental base still can not meet the standard.

They also proposed that they could be fully responsible for the funds as long as they set up a laboratory in their country, but I rejected it. "

"Yes, as like as two peas, we must reject it. If we have enough to eat, we will think of the end of the pot. This is exactly the same as some of our cadres. We need to boycott it."

The government boss looks at Ouyang!

Ouyang is like a person who has nothing to do!

Love who, this is the thickness!

"The initial investment is not much, but it is also a big project after all. How do you imagine it?"

The leader in charge of industry can finally speak. The leadership in the tea vegetable tube industry is too oppressive. Generally, he doesn't have anything to do with meetings. It's either sheep or cattle, grass or Nang!

"Because it's infrastructure, we don't understand it after all, so we want to hand over this aspect to the government, so we want the government to help us!"

As soon as Zhang Fan finished, darling, everyone was enthusiastic and smiled!

"Yes, yes, yes, Zhang Yuan is powerful!"

"Zhang Yuan is an expert!"

Can we not laugh at the investment of more than one billion yuan!

"Early investment, we can make a one-time payment to the government!"

Zhang Fan then came another bomb.

The atmosphere in the hall is getting better and better. Everyone began to show their teeth with laughter.

"However, in the later stage of investment, it is estimated that we can only give up part of our interests in exchange for the investment of Marubeni. Although we look at some money now, it is estimated that it is not enough!"

Zhang Fan's regret on his face is like thinking wrong.

"How much is the difference? We can contact the bank! You are quality customers! The government can still stick to it and squeeze out some funds to support you, but it has to be our investment, not appropriation! "

Ouyang is proud. Can she not be proud? She thinks Zhang Fan has passed the current level!

**Chapter 917**

Ouyang has a lot of ideas. It's difficult to take one step and look at ten steps for one thing, but looking at three steps is still a little methodical.

For example, she asked Lao Gao to go to the government to work every day. If she could get the funding back, it would be best. In fact, it wouldn't hurt if she didn't come back.

She dragged Lao Gao into the government. First, the government didn't want to think about or intervene in the affairs of the hospital. Second, she didn't let Lao Gao be a senior counselor for Zhang Fan. Even she couldn't get any ideas for Zhang Fan, and it also delayed Zhang Fan's own growth.

As for Chen Sheng, Ouyang is still assured of his approval. While Lao Ju, Ouyang has never worried about him. First, he is obsessed with high technology and second, he is particularly noble. Therefore, this team is still very good for Zhang Fan in the future.

In Ren Li's heart, Lao Ju breathes. Zhang Fan is the general manager of internal and external medicine. Lao Gao specializes in dealing with the government. When he needs a black face, Chen Sheng is a thug, and the organization team is ready for Zhang Fan.

Now Zhang Fan has drawn a big cake for the government.

The big cake of professionals, to be honest, sounds extraordinarily beautiful. In fact, there is no way to measure the difficulty and time with ordinary enterprises.

Yes, if there is a leading scientific and technological invention, it can indeed turn a hospital, a laboratory or even an area into a local tyrant.

The money, time and technicians in this are not optimistic anyway.

Moreover, the medical profession has such a precedent.

When Lao Mei's Johnson & Johnson was still a workshop, people's leaders thought they could make money by relying on vitamins.

Because it seems a little exaggerated to say that this thing can cure diseases. But it is also a drug, which is really needed by the human body. At that time, their drug level was just like that, and there was no top card to take.

Therefore, the leader decided to vigorously tap the potential of vitamins. But the result is that it can't be sold, just like brain gold. After the sky high advertising is sent out, the effect is not good, and the golden hairs don't buy it.

Businesses are closing down and looking for children.

Finally, they took out all the resources and funds to find the big man who won the Nobel Prize in medicine that year.

Then the boss endorsed and drew a big cake for Lao Mei. An appropriate amount of vitamin supplement is beneficial to body and mind. Hello, I am good, and she is good!

As a result, Qiangqiang has become the world's top pharmaceutical enterprise, and the golden hairs are overwhelmed by vitamin poisoning every year.

Although they are all picture cakes, they are actually the same, because there are too many uncertainties in scientific research. If you really get rid of the disease as Zhang Fan said, you will despise other people's science too much.

However, Zhang Fan's scientific research level can definitely reach several levels at least in the tea plant. Anyway, the money is earned by the hospital, and the hospital has not taken it out as welfare, and has not let several leaders divide it privately and do business. Everyone has confidence.

In the early years of China, there was a saying within the system that no matter how confidential documents were, they became notices when they were distributed to the county and regimental levels. The meeting on that day, although it can not be said to be top secret.

But because there was no document, it was a verbal matter at most. The government meant to discuss internally first, but Zhang Fan was almost bored the next day.

First, Cha Su and some businessmen he knew, such as blue and white, mining and real estate bosses, talked about the past and the present on the phone. In a word, does Zhang Yuan need to take a stake? Money is not a problem.

Then there is the bird market. Almost all the owners of some cards call Zhang Fan, especially the winery owner who has kept private rooms in bird market for a long time. He is also a license issued by the food and drug Bureau and can invest in the alliance with Zhang Fan!

Zhang Fan couldn't laugh or cry. "Just make your foreign wine. Do you understand the medical industry? I'm not afraid to lose. "

"What do I know, but you know! How about it? Is it OK or not? I can still make a billion or so. "

The winery owner was generous.

"All right, don't join the fun." Zhang fan can't explain to him that hospitals are different from pharmaceutical enterprises, but everyone thinks that hospitals should study sildenafil.

So

"Well, what Zhang Yuan says is what he says. Don't forget your brother! " As soon as the winery owner heard this, he knew that it was estimated that the individual businessman would not play, and he didn't bother much.

"You can participate in infrastructure construction. You know the estimated amount of our early investment. If you are interested, you can go to bidding."

Zhang Fan thinks the winery owner's character is OK. The other big boss of bird market who is familiar with Zhang fan can send a message on holidays at most. Maybe it was the secretary who got it.

The winery owner is different. Zhang Fan got married. At that time, there was no way to get married. People wrapped a package. In the bird market, whether Zhang Fan came or not, Sheraton's hotel room will always be kept for Zhang Fan.

Zhang Fan doesn't listen to what he says, and he will send someone to give him some small gifts during the new year's festival, not to mention red wine. If Zhang Fan hadn't stopped him, the so-called Raffi would have been able to pull a car. That's how people come.

"Oh, Zhang Yuan, if you make infrastructure like this, you won't be afraid of being built a bungalow for you?"

"Hehe, trust the government!" Zhang Fan smiled.

"Oh, ha ha, it seems that I'm worried. When will Zhang Yuan come to the bird market? Your little sister-in-law is pregnant. Take your pulse and see if it's male or female!"

"Stop talking nonsense, all right, I'll hang up!"

As soon as the winery owner heard Zhang Fan say so, he knew that Zhang Fan had a back hand and didn't say much. They were people who could hold both urine and words. They turned around and began to talk nonsense.

In fact, Zhang Fan was not worried, because the agreement with Marubeni at that time was that the two countries shared interests and responsibilities. At the beginning, the experts of Marubeni had to write this on the letter of intent. They were afraid that Zhang Fan would withdraw the ladder and leave.

After Zhang Fan handed over the foundation, the supervision and acceptance was handed over to the people of Marukuni, so he was not worried at all.

This kind of thing that can only be understood but not expressed in words can be done with people in Marubeni. If they are people from western countries, they absolutely don't understand Chinese culture.

With the increasing flow of people in the two hospitals, more and more patients know the intestinal tumor technology of tea element hospital.

In fact, there are no aborigines in the border area.

Since ancient times, there has been a collision between China and the West in this place. You come and go. People in this place have become dog brains in three or two days. There has been no peace in this place since the Qin and Han Dynasties to my Qing Dynasty. Pockmarked son almost overturned his son-in-law here. Many place names in this place are in Mongolian. As a result, there are not many Mongolian people here.

Then Lao Xu colluded with Lao Zuo and left some Xianghu children here. This blocked the drooling hands of Maozi for decades.

Later, several of the country's field troops took off their military uniforms and put on civilian uniforms, which made this area stable. More thousands of Hunan women entered Tianshan mountain before they were serious and stable.

Then a group of young intellectuals came to the frontier, which completely made it more and more secure.

Therefore, there are many unique customs in the frontier, including the customs of Xiangjiang River, Jiangsu and Zhejiang, and the customs of the old devil people. Finally, they converge into the unique customs of the frontier, which is also a place that accepts all rivers.

Later, some left and some left. It is estimated that a large proportion of them remained. Later, many people want to go back to their hometown for their children. If there are good results, brothers and sisters will help.

There are also bad results. My parents and I are gone. Go back to the lawsuit with my brother and sister-in-law's face. Legacy? There's not even a place to stay.

Anyway, there are joys and sorrows. There are everything.

Shaohua's mother had a sister who suffered in the commune when she was young. She was from West Lake.

The first-hand vinegar fish is made for Zhang Fan to swallow his tongue. Shaohua's mother has studied for a long time and always owes a little taste. It is estimated that this is the taste of her hometown.

Shao Hua calls her Xiao Xiao. She is Shao Hua's mother's few friends. Sometimes such friends are closer than relatives.

Zhang Fan also followed her name as Xiao Xiao. A few years ago, her child's college entrance examination was not ideal. She wanted to let her child go to the mainland to the West Lake. Generally speaking, there were more opportunities in the West Lake.

A family of three went to the West Lake with frontier cotton, frontier dried fruits and large and small bags as if they were fleeing.

For decades, things have changed, parents have died, and the two brothers have their own lives. The home of that year was long gone because of demolition.

The family just wanted to see if the children could develop in the West Lake. If the brothers and sisters could help, it wouldn't matter if they couldn't help. It's a wish.

As a result, when you arrived at the West Lake, the two brothers hesitated, and the sisters in law were even more wary of their family as they were against thieves. What they said was that the state asked you to go to the frontier. You didn't provide for the elderly and didn't end up. The demolition of your family has nothing to do with you.

She knew that her child was still young and couldn't live without her. The two places were really thousands of miles away. When her parents were ill, her heart was like a knife, and her tears could only flow into her stomach.

Now she is not going to divide her property, but thinking about her mother's family and her brother. However, the parents are gone, and after all, the mother's family is gone.

It was an embarrassment at that time. The big brother and the second brother were like constipation. The three of them put down their things and went out the door. They didn't say much. The children were sensible. They went to the largest rural city in China, where they made boxed meals and engaged in catering. It's not a great wealth, but also a foothold.

The two brothers looked at the northwest specialties in large and small bags at home. In fact, they felt uncomfortable, but money is really something that can't be said. Watching my sister leave sadly.

The two brothers forcibly gave their sister thousands of dollars. If he hadn't missed his childhood family,

he might have thrown money on both of them.

Her brother after all! They can do it, but she can't.

The trip to the West Lake completely extinguished their family's expectation of returning home.

Luck will never come true.

The big brother and the second brother were divided into three houses because of the demolition. If the house is put in the frontier, it is estimated that there is not much.

But this place is in the West Lake. The three suites are really built of gold. It's a serious middle class.

As a result, within a few days of her eldest brother's retirement, there was blood in his stool. Like a rooster, he squeezed all the way without diapers. He thought it was a holiday.

Go to the hospital for an examination, intestinal tumor!

Then the family hurried to the meatball country. They had money and three suites. Of course, they had to go to the meatball country.

As a result, doctors in Marubeni recommended Chinese tea. Others don't know. Their family knows too well that tea Su has a sister there!

## **Chapter 918**

Hospitals, especially those in big cities, give most people the feeling that there are many people, hospital beds have to wait, and even accommodation is difficult to find.

Therefore, many people who go to other places for medical treatment should first ask whether they know their relatives and friends. If there is a hospital, it is best. If not, it is OK to be familiar with the head.

Some large hospitals are so huge that there are seven or eight gates. When outsiders go, it takes several days to get familiar with the surrounding environment of the hospital. It's very difficult, so there's nothing wrong.

With the establishment of various laboratories, especially intestinal surgery, more and more people came to the hospital after a wave of recommendations from marukuo.

People from all over the world speak foreign languages and Putonghua.

At that time, Ouyang and the leaders of the government felt that the two hospitals were empty. When could they be a little popular.

Before the leaders reacted, the three hospitals were already overcrowded. The rate of intestinal surgery is several percentage points higher than that of complete resection in other places, which means that the cure rate is much higher.

Not only the leaders did not respond, but also the tea vegetable citizens did not respond.

It's like having a sleep and suddenly having many more relatives and friends. Relatives and friends who had not been contacted before suddenly began to contact frequently.

Everyone felt as if the world was suddenly full of love.

Shao Hua's wife also retired. Her child's house and marriage are a big stone in her heart. Therefore, although she retired, she continued to work hard, and her family also has land.

Right next to Shaohua's manor, Shaohua's Lavender base was also on fire recently.

At that time, the girl thought very clearly, that is, she engaged in tourism photography in the flowering season, and then sold essential oils when the flowers faded. Her family planted lavender in a large area. When the farm workers thought about it, they all followed suit to plant lavender.

Unexpectedly, it has really become a scenic spot.

Ten thousand mu of flower sea, a breeze blowing, darling, waves of blue and purple flowers, and then the breeze with the fragrance of flowers, is really spectacular.

Zhang Fan also took time to see it. It's really good-looking. Moreover, some girls do not come once enough, but often.

Especially in QQ space, you took a picture in white gauze, and I also want to wear white gauze. You wear a sky blue, like a flower fairy, I must also become a flower fairy.

If a girl is willing to come more, there will be more people willing to follow. The people on the farm said

they would charge per head. Shao Hua disagreed, and everyone was willing to listen to her. Photography and shooting were free, but they couldn't trample on it.

More people came down this time, as if they had got some big bargain. It's said that it's free. On weekends and holidays, darling, it's like the team sent it from the city. There are even beauty lovers in the bird market.

For a moment, the farm was wearing a hat as big as a millstone and a long skirt that could be used as a carpet. It was long enough for someone to carry it from the back, but there was a lack of material on the shoulder.

There's no money for photos, but there's money for meals. On weekdays, Zhang Fan's worried mutton, native chicken and native eggs are sold off at once. Zhang Fan told his mother that it's OK not to eat mutton. You should always keep some eggs.

"People who don't work want eggs!" This is what his father said, but when he came home, he still had eggs.

Not only did the old people of Zhang Fan's family see the return money, but the people on the farm were also happy. The chickens, ducks, cattle and sheep they raised were made into vegetables, which made more money than selling them to second-class dealers.

Shao Hua took advantage of the large number of people and also played the name of her manor, blue demon girl! It sounds like a sea demon, but it can't stop others from listening!

From Zhang Fan's point of view, this 10000 mu sea of flowers is really good-looking, but it's also good-looking. Speaking of flower fragrance, it doesn't accord with Zhang Fan's smell anyway.

Some photographers hold their faces in their hands, squint their eyes, and put their noses over the flowers. It would be more beautiful if there was a butterfly.

One by one, like being intoxicated, I don't know that I was fainted in the branches.

But how did Zhang Fan smell it? How did he feel the burping smell of a cow full of grass. But this kind of idea also wants to think for yourself. It's estimated that Shaohua will have to chase after it.

She wore a mask herself. She said she was afraid of tanning. She probably couldn't smell it. How to say, Chinese people pay attention to a simple and elegant fragrance and a long one.

And this flower tastes strong and domineering. For example, the pillow made of this thing can suppress the smell of men's head oil. No wonder the people of France like this thing very much.

At the busiest time of Shaohua's family business, she received a call from her eldest brother. They haven't contacted for many years, and they don't know how her eldest brother knew her phone

number.

When a phone call came down, the big brother's tone was full of a breath of death.

It's impossible not to make a phone call. They fly into the tea plant from the bird market. Looking at this small border city, their hearts are cool. What good hospitals and doctors can there be in such a small city.

The family really felt cheated by the little devil. As a result, the family went to the tea vegetable city hospital, and their hearts became hot and then cool.

Because of the large number of people seeking medical treatment in the intestinal specialty and the dialect of the registration office, it makes them feel hot. It has no effect. There are absolutely not so many people.

As a result, when asked about the registration, he said that the registration was over and that he would be early tomorrow.

The family forgot that there was a close sister in the city.

The city's hospitals seem to have grown stronger overnight, while other industries in the city have not been notified.

Then, the restaurants around the hospital, as long as they can cook the rice, don't be too expensive. The business of one or two is hot. Even the children who have been released from school are hurriedly washed. The reason why the restaurants are hot is that the little children keep cursing.

The hotel ten kilometers near the hospital doesn't even have a house.

The family can't spend money. This place is not a metropolis. After all, it's a small city. The sudden influx of people makes the locals strange.

"Gold fell from the sky to tea?"

The family finally found a small hotel in the corner of a city.

The next day, I got up at five and went to the hospital. As a result, I lined up to tell them that I was late.

"Why don't you call his sister-in-law!" At this time, women feel that their men can't stand it, and after all, they are close brothers and sisters.

The man bowed his head and didn't say a word. He just covered his head and went back to the small hotel.

That day, the family didn't sleep. In the afternoon, they went to the hospital to line up and finally hung up the number.

The doctor of tea vegetable arranged for them to go to the second branch hospital and wait for the operation. They inquired and inquired, and finally knew why the people here came.

Want Zhang Fan to operate on them, but they are such a famous doctor or leader that his sister doesn't know. Then trust the relationship to spend money and visit friends with fellow villagers.

After thousands of inquiries, I finally heard that my sister-in-law and Zhang Fan's mother-in-law came from the same farm, and it is said that they have a very good relationship.

At this time, I have to call.

## **Chapter 919**

Sometimes men are cruel, sometimes women are cruel. For example, Shao Hua's brother, she really doesn't want to take care of her brother. She lives her own life and doesn't communicate with her old and dead. In fact, it's nothing.

But when I was a child, chasing my brothers in the alley, and then thinking about the railway station, when the two brothers took the money and gave it to her, her heart softened.

Her husband is also a good man. Really, looking at his wife's uncomfortable appearance, he said to his wife, "they are not human. We are still human. Since we ask for the door and it is a matter of human life, we can pull one."

Shao Hua was tearful when he said this. It doesn't matter if she suffers some crime. At the beginning, her husband followed her back to her mother's house and didn't even drink a mouthful of water. Now she is so generous.

Shao Huaxuan holds her husband in her arms. She really has mixed feelings, happiness and sadness. She can't describe it.

The couple drove to the city. On the way, they thought about how to give their brother a little face and tell him what he was not.

As a result, when I saw that my brother was dozens of years old, just like my father in those years, I looked at his gray face. What past and hatred turned into tears.

Two brothers and sisters over half a century, holding together, were crying in the tea vegetable street, which was so puzzling.

"Brother, what's the matter with you!"

Perhaps people can see through everything in the world when they are at their weakest.

The tears of the two families overflowed from their eyes.

After making things clear to her sister, she arranged her sister-in-law and nephew in her house in the city. They had a yard with Shaohua's family. Later, Zhang Fan took their father-in-law away, so they were not in the same community.

After thinking about it, Shaohua and Zhang Fan still didn't go directly to find Shaohua and Zhang Fan. Although he is also very close to Shaohua, after all, he is looking for someone else's husband.

The woman asked the man to go home to entertain her brother and sister-in-law. She turned and went to the farm.

In fact, they all want more, because they have received the equipment of the severe respiratory department in Marubeni, they require that the main knife must be Zhang Fan. A severe respiratory department doesn't sound like much.

If three hospitals at the national level are equipped with such departments, it is estimated that few hospitals in the country can have this ability.

So it's short to take other people's things, so the main knife for intestinal tumor surgery is Zhang Fan. Let Zhang Fan's number of general surgery go up.

But I'm really tired. I entered the operating room before dawn. I couldn't leave the hospital until it was dark. It was really painful and happy.

People are different. With the change of environment or status, others have different attitudes towards them.

Like a girl, no one teases. It's not that they are ugly or have a bad temper. It's because they are so excellent that boys don't dare to provoke them.

And Zhang Fan is actually like a beautiful and excellent sister now. We are not afraid to tease, but want to leave the opportunity to tease at the last and leave it to the most important moment.

Relatives and friends, especially the relatives of Shaohua's family, don't bother Zhang Fan at all. During the new year's festival, the family is like a social fire, with a sea of people, but few are willing to ask Zhang Fan.

This time, Shaohua's mother had to help Shaohua when she found Shaohua's mother with red eyes.

Shaohua's mother called Shaohua first and then discussed with the old man. They didn't dare to tell Zhang Fan's mother and father that they were deeply afraid that Zhang Fan would be difficult to do.

When Zhang Fan came home, Shao Hua said, "Hey, I thought something made your mother so embarrassed. Even if I didn't say it, I did the operation."

Shaohua quickly asked Zhang Fan to call his mother in person. After Shaohua's mother received Zhang Fan's call, she couldn't say what she was satisfied with.

Shao Hua is gentle at night, just like water. Between husband and wife, in fact, Shao Hua also has a small temper on weekdays, but he still takes care of Zhang Fan. After all, Zhang Fan is too tired.

Occasionally, Shao Hua is particularly gentle, which makes Zhang Fan feel that it is of great significance to improve the level of surgery.

Shao Huapeng's incident is not just an example in tea. In the past, among relatives, frontier people were not discriminated against, but they always felt uncomfortable.

As soon as others hear that you are from the frontier, they are quite surprised and ask: are you from the frontier?

It always makes frontier people uncomfortable. Moreover, when it comes to the frontier, it is often overseas on the edge of the mountain.

As a result, many tea vegetarians have lost face this time.

As soon as relatives call, they ask, do you know the city hospital of tea vegetable?

Do you know the doctors and nurses of the tea vegetable city hospital?

The tea vegetable people have a sudden sense of pride.

After sending away the people who went to study in Marubeni, Zhang Fan took the time to have intestinal surgery, but he couldn't feel the loss of time.

At the weekend, Zhang Fan received a group of intestinal experts from the bird market. They also came to the tea vegetable city hospital. They said they came to investigate. In fact, they came to steal teachers.

Originally, Frontier Medical University treated tea vegetable hospital as an internship hospital. As a result, this time, it was not only willing to become a and cooperative unit with tea vegetable hospital, but also put a master's degree.

"If it were not for the fact that the papers and periodicals of the tea element hospital have not been developed at present, it would be no problem to put a doctor's point here. The level of Zhang Yuan has no problem teaching doctors now. "

The president of Frontier Medical University came to tea vegetable hospital in person and praised Zhang Fan and tea vegetable hospital.

Other compliments, such as what technology, cooperation with other hospitals, Zhang fan can accept it calmly. As a result, when people mention this matter, Zhang Fan is embarrassed.

He even stumbled with his master's degree. It's really embarrassing to take a doctor.

Fortunately, Ouyang will not be absent from this meeting, otherwise Zhang Fan will not be able to answer.

In fact, other people's praise also has another meaning, that is, what's wrong with you? You should also be close to our school, otherwise you can't even apply for a doctorate.

The establishment of the master's degree program is not only agreed by the university itself, but also reported to the Ministry of education. Moreover, tea vegetarians also need heavyweight doctors, but Zhao Quanping, a general foreigner, is barely qualified.

Therefore, when Qingniao's master called and asked Zhang Fan to make a graduation defense, Zhang Fan rarely delayed. If you let Zhang Fan go to Qingniao before you let him go.

Zhang Fan is definitely procrastinating, just like children who don't finish their homework don't want to enter the school gate.

But this time, Zhang Fan thought it should be the end of his study day.

Shaohua's farm was busy, and Zhang Fan flew to Qingniao alone.

In the northern coastal cities, Zhang Fan doesn't know much about several other cities.

But he is still familiar with Qingniao. Qingniao is a city with a little petty bourgeoisie, so every summer, young men and women come to this place in flower skirts and shirts.

Zhang Fan was not in the mood for sightseeing. When he got off the plane, brother Lu Ning took Zhang Fan to the hospital.

"Younger martial brother, you can finally graduate from the master's degree. Congratulations!"

Lu Ning drove his German car and teased Zhang Fan.

"OK, elder martial brother, you have graduated from the doctor for several years. Thanks to your data this time, otherwise I guess the master will swear. "

"Oh, you! If you use snacks in your research, the master will be happy. "

Zhang Fan tilted his mouth.

The graduation defense of master students in general foreign studies, the death heart of students in Qingniao Medical University.

In previous years, I was a teacher and professor in the school. As a result, today I don't know whether the Ministry of education is ill or the big guys want seafood. Almost all the big guys from ordinary foreigners came.

"I'll go. What do you mean? All the professors in the master's reply are academicians, including Mr. Wu of Fang Dong, Mr. Chen of West Lake, and even Mr. Xia, the big man of organ transplantation. Is this going to destroy our whole army!"

Two master of medicine dogs were crying when they looked at the professor.

Both of them are master's students of general foreign studies. After finding their units, they are waiting to go to work with their degree certificates. As a result, when they hear the news, they feel like brewing a dog.

"Doesn't it mean that old Xia and old Qiu don't deal with each other? Our dean is master Qiu's own disciple! "

Up to now, there is no way to change the quality of the paper you wrote. Gossip is probably also a feature of Chinese people. You are not afraid of death. You must gossip before you die!

"No, it's all big guys. Why don't you pay?"

"Fool, I don't know. Come, come, come, I'll popularize it for you."

In fact, almost all the leaders of ordinary foreigners came because they had a new student. It's not designed to embarrass them.

In general hospitals, doctors who can become big men are sealed by the people in the hospital.

Medical boss, it doesn't matter what students are all over the world. It's great. I'll get you a medical educator when you hang up.

I don't care what level your position is. Even if you become the Minister of health, everyone doesn't recognize it very much.

If you can really become a big man, first of all, you must have a high professional height in this industry. Second, you must have initiative. These two points are the most important, and the others are accessories.

For example, Mr. Lu and Mr. Wu are both apprentices of Mr. Qiu, but few people know why Mr. Wu is famous all over the world.

It's not how powerful Mr. Wu founded the East. It's someone else who pioneered the Chinese blood vessel map of the liver and the liver surgery for the youngest patients.

There are many surgical methods in medical treatment. The most fear is whether it is difficult. The most fear is that no one can create it. As long as you can think of creating it, you are not afraid of being sublimated by someone.

Therefore, in terms of medical treatment, China suffers from the lower level of modern science and technology. If the science and technology in those years were a little more powerful, these old guys are estimated to be able to fly to a higher level with China's medical treatment level.

This year's scientific research dog was nervous, and Zhang Fan, the student who took over the shift, trembled.

"Master Xia hasn't been out in recent years. I didn't expect him to come after I sent an invitation. I didn't expect him to come after I said something about you.

And old Chen of the West Lake. The Ministry of health invited people, but they didn't go. Your face is not small! "

Old man Lu's face to Zhang Fan is not good.

As soon as Zhang Fan left, he disappeared like a golden light. Today, he cooperated with Marubeni and tomorrow with the United Arab Emirates. He looked like a swordsman and didn't pay any attention to scientific research.

So old Lu is very unhappy.

He wants to build a first-class apprentice integrating scientific research and clinical research. In the past, students had some talent in scientific research, but their clinical talent was almost. Now there is finally a clinical super powerful, and the result of scientific research is a mallet.

Therefore, the old man didn't give Zhang Fan a good face.

Zhang Fan was about to cry. "Master, I'm ashamed. Can I lose my job in my own people? You really want people to ask if you can get these immortals. You don't look good on your face!"

"What's wrong with me? These people are either my elder martial brother or my teachers. What am I afraid of! Regret now? It's late. You'll wait to become famous in the general circle! "

While bluffing, the old man was proud to know that he was afraid. He was afraid of dead pigs, not afraid of boiling water, and didn't care about anything.

Zhang Fan wants to run away. It's too scary.

"All right, go back and make more preparations. When you reply the day after tomorrow, say you know, and say you don't know if you don't know!"

Like an ant on a hot pot, Zhang Fan drags Lu Ning to do a drill.

"It's no use. What do these people ask? You and I can rehearse it? All right, I'll tell you the truth. The old man is worried that others will talk about your failure to go to full-time in the future, and specially find someone to endorse you. "

One day, the sweat on Zhang Fan's head slowly subsided for a while. It's not that he's timid, it's that these people are too cruel.

Old Xia, old Wu and old Chen, by analogy, are like the cattle made in China with two bombs and one star. They all exist at the tiger level in the industry.

Zhang Fan felt that time was too fast for the first time. I didn't feel much. It's time for his defense.

## **Chapter 920**

"I'll go, too excited, too excited! Guess who spoke to me, guess who spoke to me. Do you know that my idol, the highest god in my heart, has spoken to me. "

The master's dogs who answered were all excited and stupid.

When I didn't reply, I felt that all the monsters inside were world-class monsters. After the reply, I felt good. All the monsters inside became idols.

Zhang Fan looked at the crazy students in the distance, and his heart was full of 80 or 90 buckets flying up and down like butterflies.

Others don't know what happened. He's one and two. In the face of these people, if you really lose someone, you can enter the medical history of China in the future.

It will definitely be written by the author of the teaching book: in the summer of 10 years, Chinese medical experts found the disadvantages of master's education, and the examinee Zhang Fan

In fact, Lu always deliberately scares Zhang Fan, because the bastard is not developing towards his predetermined track. How can you please the old man without scaring him.

This time, in fact, it's not what Lu Ning said to endorse. For people at Lu's level, these are just a process.

This time, Lu specially invited Xia Lao for a reason. Because Zhang Fan's operation is so complicated that Lu Lao can't guide Zhang Fan now.

Say he doesn't do his job. His technology really doesn't have to be said. Say he works hard, but you see, he wants to do almost everything today, tomorrow, tomorrow, and the day after tomorrow.

He doesn't think so. Since your surgery is complicated and you don't want to stay in the study of one organ, well, I'll get you a little complicated. It's the first person in organ transplantation in China. It's enough for you.

Therefore, when he invited Xia Lao, he was bluffing Zhang Fan. After Lu gave Zhang Fan's information to Xia Lao, Xia Lao's curiosity could not be covered and went directly to Qingniao.

This is the difference between big men and ordinary people. Ordinary experts are always afraid that others are better than him, and big men are always curious about this genius. It would be better if they could adjust it.

It's a bit exaggerated to give Zhang Fan a reply meeting alone, so other students met the rare opportunity in a hundred years. Not only academicians, but also mountain monsters.

For those who work hard, opportunities suddenly hit him on the head like meat buns falling from the sky.

For example, there is one who has some experience in lung transplantation and wrote a paper in this regard. He was originally prepared to write the last such paper in the future, because he wants to get married and have children, so he can't rely on love to generate electricity.

I have to make money!

As a result, at the end of the defense, old Chen of the West Lake directly said, "are you interested in coming to the West Lake to study for my doctor?"

Wa was excited and almost cried. She read the doctor of an ordinary professor and the doctor of Chen Lao. To tell the truth, all of them were doctors, but the results were different!

On and on, it's fucking different!

Zhang Fan, not to mention the sweat in his hands, even in his shoes. It's like wading in a river. A twist between his toes can make a splash sound.

I want to slow down, but it's his turn.

After entering the meeting, Zhang Fan first looked at his martial uncle. As a result, his martial uncle was wearing a mask. There was no point in his eyes, as if he were all acquaintances.

"Old man!" Zhang Fan wanted to run over and put his face in front of him and let him take a closer look at himself.

At the beginning of the reply, the questions asked by several big men were actually routine. Zhang Fan said that he thought it was the same thing, which was frightened by the master.

At the end of the defense, Zhang Fan was not afraid for a moment and felt that he was still very awesome.

"Zhang Fan, ha ha, do you have any views on organ transplantation? This is a digression, not your defense score."

Old Xia looked at the young man in front of him. When the young man entered the door, he saw that the young man was a little nervous. He thought that he should be very calm to get the approval of so

many people in the operation. He didn't expect to be nervous.

But when the defense was over, he found that this young man was a clinical advocate, because few of you interrupted him in presenting his clinical knowledge.

Because people are right and have ideas. But once it comes to scientific research, this guy will taste it and won't extend it at all. How to ask, he won't jump out of the scope of the paper.

The old man smiled. Mr. Xia and Mr. Qiu were a generation. In terms of achievements, they are almost the same, but Xia Lao suffers losses because he can't do other scientific research and technology in China.

Therefore, it seems that there is no boss Qiu in the name, but with the improvement of China's scientific research strength, Xia Lao's research is becoming more and more powerful.

After Xia Lao asked a question, Zhang Fan thought about it. Now that he has passed the defense, he is bold and fat.

"If we can solve the problem of rejection and organ transplantation, the biggest obstacle now is the operation time, especially the link between organs and allogeneic organs.

If the wound injury of blood vessels and vascular bed can be reduced during the operation, the survival rate of organs will be much higher with the reduction of secondary injury.

It is wrong for us to transplant major arteries and veins while ignoring small blood vessels... "

In terms of defense and scientific research, Zhang Fan is really a grandson in front of them. Don't look for questions after surgery. He can't even answer other people's questions.

But if it comes to clinic, he is not afraid of anyone here. Although these people exist in the medical field, Zhang Fan's experience in clinical practice is absolutely not bad.

For example, the disadvantages of transplantation, he is not red mouthed and white toothed nonsense. He doesn't know how many times he has experimented in the system. After practicing one blood vessel by one, he knows the results too well.

Listening to Zhang Fan's words, old Xia and old Chen nodded, especially old Xia turned to old Wu and said, "how many specialist patients have you sent him!"

The old man whispered to Wu.

"Hehe! Old Xia, what do you think of him? " Mr. Wu's answer was not what he asked.

"We have a high understanding of clinical practice." Old Xia said thoughtfully.

Zhang Fan was the last student to reply. After this time, Lu Lao also entered the meeting and sat aside.

"What do you think of his transplantation? He systematically learns transplantation and doesn't frame him on a single organ."

"I don't think I can teach him!"

After thinking about it, old Xia said something to old Wu.

Then he went on: "between skill and skill, he should have his own way of training. You and I actually know the problems he realizes, but there is no way for him to answer, right?"

Zhang Fan said nothing, and then was driven out by his master.

After seeing Zhang Fan go out, Xia Lao continued: "clinically, his way of thinking is quite comprehensive, but he is very conservative in scientific research. Therefore, my suggestion is to let him continue his clinical practice. When the quantitative change reaches the qualitative change, all the problems you worry about will be solved.

Now the environment is paying attention to technology and ignoring technology. Everyone is flocking to pay attention to technology. Without technology, technology is a castle in the air. "

Lu is a little depressed. He wants Zhang Fan to take the road of scientific research. As a result, old Xia said that Zhang Fan should go first.

"Old Xia, according to your statement, it is estimated that he spent too long in the major surgery. Now he dabbles in everything. Will this..."

"Ha ha, you've been in the lab for a long time! I came out of the big clinic. Your master came out of the clinic! "

As soon as he said this, Lu always wanted to refute, but he couldn't refute it.

"Hehe, just in time, I have a patient in my hand. Recently, we have considered a lot of schemes, which are not suitable. You don't think he's good. I'm optimistic about his direction.

How about letting him get started and let's have a look? "

Old Xia smiled at old Lu.

"OK!"

Zhang Fan was driven out. Others invited him out. He was driven out.

But he didn't mind at all, "ha ha, I'm a master!" The first time, he showed off to his wife.

Then call Lu Ning and Ouyang.

Lao Chen was crazy by the certificate card. He was crazy by the foreign language card!
