

Chapter 921

For the preparation of the exam, Zhang Fan's teachers and brothers count one, and even some are master tutors, "you focus on your thesis and never give full play to it. Don't think a mouth can shock these big guys.

It's good if you don't show it! "

Zhang Fan firmly implemented the scheme given by his teachers and brothers, and didn't talk about cross line things around his own paper.

When Ouyang learned that Zhang Fan's paper had passed, the old lady put down the watering pot with a smile and went to the hospital.

"President Zhang is now a master, or a master graduated from an academician. Don't you have a sense of urgency? Don't you have a sense of crisis?

Still thinking about going out with your Dean in the future? Day by day, I know right and wrong, gossip, and even some people, even without qualification certificates, think about the object of love.

I tell you, you Zhang Yuan said well, I'm not something you can fool.

Starting from the next quarter, two people will be released to graduate school every year, and the salary will be raised by one level. Moreover, when you Zhang Yuan go out, give priority to those who work hard!

Think about it. Take a small book every day and treat drug dealers like other people's sons and daughters. They don't want two or three cents for their souls.

Decide which is more and which is less. The quarterly assessment starts next month. If you fail, I must ask you Zhang Yuan to put forward the ranks of municipal hospitals. I tell you that there are many villages and towns of tea vegetable! "

Zhang Fan is Ouyang's confidence. How high Zhang Fan goes, she has enough confidence.

Now that Zhang Fan has become a master's degree, the old lady suddenly feels that these undergraduates are no longer popular. She keeps expanding externally and raising her requirements internally.

Anyway, I have to give Zhang Fan who I can match inside and outside. I'm sorry, I won't wait for you.

Qingniao, old Lu sent off old Xia and old Chen. When he was at the airport, old Xia said to old Lu, "I'll talk back to Han first, and then go to the capital to wait for your teachers and disciples. The patient this time is very special. Don't scare your little apprentice again.

Don't want to give it to me! "

"Hehe, good teacher Xia, I know. You go first, and I'll take him to you later! "

In the face of Xia Lao, Lu Lao can only be a younger generation and can't even talk back, because he is also his teacher.

But don't give me this sentence. Old Lu feels strange in his heart. Does his apprentice become a classmate?

Send old Xia away quickly. Old Lu feels that he shouldn't frighten him like this on the way back, and then he can frighten the accident!

"All right, stop grinning. Isn't he a graduate student! How many masters are there among my students? "

But when the old man saw Zhang Fan's black face smiling, he couldn't help mocking.

Their generation pays attention to a rule. When the master speaks, the students should listen. For example, Zhang Fan's elder brother, a close master, is more than 40 years old. He is also a figure in the magic capital. In front of the teacher, he is still like when he was studying.

But only Zhang Fan, not only dare to laugh with the master, but also can laugh with the master, so when they finish a sentence, the emperor loves the eldest son and the people love the youngest son.

"Master, if I don't pass, I guess you have to say, look at my students, how many are undergraduate! ~"

"You're also interesting. You haven't improved your study much. You're getting thicker and thicker."

"Hey, hey! Master, when can I get my degree certificate? "

"What? Hurry? "

"It's not urgent. I have to miss you more and want to be with you more..."

"All right, talk well!" I guess the old man's goose bumps are up.

"The tea vegetable stall is getting bigger and bigger. Now I feel a little difficult and tired!"

Zhang Fan told the truth in front of the master.

"What's the matter?" The old man stopped laughing.

"The operation is more and more complicated and difficult, but there are few who can seriously help me block it. I'm not afraid of the operation, but today, many operations stop there waiting for me."

"You mean you want to come to me?" The old man asked deliberately.

"Neither! Just..." Zhang Fan glanced at the old man. Why didn't the old man play cards according to the routine!

"Hehe, do you want someone here? Forget it. I haven't taken students for a long time. Your teacher's stall is no smaller than yours. Who do you let go? "

"You help me find good seedlings, such as a newly graduated doctor. Don't do pure scientific research for the time being. You must be able to go to clinic!"

"Pick and choose what you can. Do you have a doctor in your hospital?"

"No, I came to ask you for help!" Zhang Fan pretends to be wronged.

"OK, accompany me to the capital the day after tomorrow. As for other things, we'll talk about it after it is over!"

The old man didn't promise, and Zhang Fan couldn't do anything. He couldn't lie on the ground and go to the capital. Zhang Fan didn't ask.

Zhang Fan was lying in the hotel, thinking, where can I find some finished masters? In fact, he just gave the old man a high condition. He thought about letting the old man pay back the money, but he didn't think about it.

Mr. Lu has already started to call: "how many doctors have you brought in a few years? Have you graduated from clinical?"

Anyway, he asked all the students who were qualified to take a doctor. Now it seems that doctors and masters are everywhere. In fact, they are still scarce, especially in the frontier. Even ten years later, it is

estimated that there are no doctors in regional hospitals, while most of the provincial capital level are masters. As for doctors, they are estimated to be produced and sold by themselves.

Zhang Fan asked people to be both doctors and clinical, the conditions are too difficult!

The return of the students is not optimistic. It is too difficult for them to graduate with a doctor and send them to the frontier. So there's no doctor.

There are a few clinical masters who are willing to, because it is either the professor or the president who asks about this matter, and it is clearly said that it is his younger martial brother and important person.

My younger martial brother is the president of three hospitals in the frontier. Needless to say, he still carried forward the central tumor of old Wu. Although the hospital is on the border, it is particularly convenient to go abroad to fly a knife.

As long as you go, you are the Imperial Guard, and as long as you go, you are the direct line of your younger martial brother. This temptation, not to mention the first and second tier cities, even if a third tier city is estimated to have a bunch of masters willing to go.

But Cha Su, look at the map, all TN of them have gone abroad! It's ok if there's golden hair or balls next to it, but if you look around, Lao HA can be a little rich. The rest of Stan can be called Asia, but it's one, two, three!

None of the doctors are willing to go, but three or four graduate students are willing to go with little martial uncle, because these are all clinical masters. It is estimated that the examination of doctors is suspended. It's better to Bo!

At the weekend, the old man took Zhang Fan and Lu Ning to the capital. Xia Lao has arrived in the capital.

Why is old Xia not well-known? Because the old man brings out fewer students. Compared with old Qiu, although it can't be said that there are many disciples all over the world, looking at Nanhua, there is one. Almost all the surgical directors of large hospitals have a little shadow of old Qiu.

And Xia Lao, there is only one postdoctoral brought out! This also shows how difficult the road of organ transplantation was.

For the capital digital hospital, Zhang Fan still feels about the digital hospital because it costs less and is not like a local hospital with many factions. Even if you eat eggs from the left and from the right, you, me and him should be separated.

There are already a group of people waiting at the elevator door of the intensive ICU ward in the hospital. Expert ward rounds are also carried out by academicians and experts outside the hospital,

especially the director of the severe ICU. Although it is not necessary to receive him at the door of the hospital, he always has to meet him at the door of the Department.

After contacting old Xia and old Lu, their two teams met at the surgical building. Old Lu took Zhang Fan and Lu Ning, and old Xia took a female doctor. Although Yan Dai was slightly applied, the grade was estimated to be about thirty or forty years old.

Old Xia greeted them with a smile. Old Lu hurried forward and "let the teacher wait for a long time."

"It's okay, it's okay, we just arrived. Is Xiaodao a professor now? "

"Professor Xia, you are still an associate professor!" Lu Ning also hurried forward to say hello.

Zhang Fan was deeply afraid of the old man and asked him if he was a master now! So, as soon as Lu Ning finished, he quickly said, "Hello, Professor Xia!"

"Good, good, you too, Dean Zhang!" The old man is not a learned fool.

When the female doctor saw old Lu and them, she smiled and nodded to old Lu.

It's not that people are reserved, but that they can't open their mouth. Lu has been famous for many years, but although he is young, his bones are old. Here, he is the same generation as others! So I can only smile.

She said a few more words to Lu Ning.

When old Xia and Zhang Fan were joking, the female doctor turned her head and looked at Zhang Fan carefully. She felt that she had never seen him. Moreover, it seemed that there was no such person in the major foreign language periodicals. Then she suddenly asked, "who is this black boy? Zhang? Lou? No! "

Then he looked at Lu Lao with admiration, contempt and a compound vision of enlightenment!

Many fields have father to son, but it is a little difficult in the technology industry, so some experts can't pass on their technology when they are old, but their contacts should pass on anyway.

There are many times. We often see a super old man with a hairy boy with no clean hair on his mouth worship the mountain around. And he said he was his last disciple.

I don't know whether the technology is proud or not, but the business is really proud.

So old Xia's female doctor issued a soul like question! And when Zhang Fan's face looked at her like a sunflower, she just gave her a fake smile and couldn't fake it anymore. Then she quickly turned around and chatted with Lu Ning.

"Well! Damn it, not all professors are despised! "

Although Zhang Fan is not angry, he is always a little embarrassed. In fact, they both want to be bad. It is estimated that such a thing can happen in such people.

Not to mention anything else, even ordinary people will do face things now.

The hospital is busiest in the morning, especially on Monday morning. Many people gave some medical advice, "if you can't go on Monday, don't go to the hospital on Monday."

This is all bullshit. The doctor is the most complete on Monday, and he is really going to get sick. The disease will control whether you are on Monday or not?

Chapter 922

The door was despised. Zhang Fan moved back and stood slightly behind. Zhang Fan is not the kind of person you despise me and I will go up and fight you.

The female doctor looked at Zhang Fan from the corner of her eyes and thought, "it's OK. She knows how to advance and retreat!" Then she didn't think much. After all, she didn't pay much attention to a person who came to pull business with someone who didn't know whether it was her father or what relationship.

Several people didn't introduce much, because the doctors in other people's departments are estimated to be waiting.

Sure enough, they entered the surgical building. As soon as the elevator door opened, a group of doctors were waiting at the door.

The patients and their families in the elevator are stupid. What is this?

Although we didn't know what it was, we knew it was definitely not our own. Then they looked at each other in the elevator and came to find a difference.

Old Xia dressed simply. He was a retired old man in the street, and old Lu was a little more rigid. Everyone looked at old Lu and the female doctor.

"Old Xia, Hello, hard work, old Lu hard work!" The Department Director shook the hands of the two old people, and then nodded with the others.

The others didn't think about it. They came forward to shake hands and looked at the big guys with a smile.

The two teams of people are like the Jianghu joint, standing and watching according to their seniority, with a smile on their faces.

After the big guys shook hands and everyone was ready to lift their legs, the director of ICU saw Zhang Fan hiding behind the crowd.

"Ha ha! Zhang Yuan, you're here too! " The director stretched out his hands and held Zhang Fan's hand.

The female doctor is stunned!

And other doctors in the ICU were stunned!

Who is this?

"At that time, I wanted to talk more with Zhang Yuan in Shan'an. I was on business and couldn't help myself!"

Last year, when I was in Shan'an, someone from the navy was injured. At that time, Lao Wu sent Zhang Fan to Shan'an. At that time, the digital hospital also sent someone to Shan'an. Because the situation was urgent, I didn't talk deeply.

Zhang Fan almost forgot the man in front of him. As a result, he was mentioned. Zhang Fan immediately remembered.

"You're welcome, director. Shan'an didn't have your support at that time. It's estimated to be choking! " Zhang Fan said with a smile.

"Ha ha, I like listening to Zhang Yuan. Ha ha, please, old Xia, please! "

While inviting others, the director of ICU stood with Zhang Fan and gave seat C to Xia Lao and Lu Lao.

The pride on Lu Lao's face. He used to put out fire for the little disciple, but now the little disciple can

make him have a sense of achievement. Now it seems that there is nothing wrong with being clinical!

The doctors in the Department finally changed their clothes with Lu Ning and the female doctor in the middle. Old Xia said to the director of ICU, "let's go and see the patient. Please introduce the patient to academician Lu. "

While walking, the director of ICU personally introduced the patient's condition.

"Patient, male, 35 years old. After graduation, he served as a foreign correspondent for a long time. He often sent back first-hand news materials to our country. It is meritorious! "

Set the tone!

Zhang Fan understood as soon as he heard it. As an adult and a Northwest Industrial University, it sounds like there is no golden mean or buffalo force. In fact, there are many unsung heroes in these two schools.

Patients are not in the general ward, but on another floor. Soldiers handle them when they enter.

"After returning home at the beginning of this year, the patient inexplicably had nosebleed, low fever, poor appetite, and even transient syncope. Routine examination after treatment found that the patient had liver and kidney failure.

And it's still unexplained liver and kidney failure. After treatment, we even used detoxification treatment. Although it had an effect, the patient still could not avoid liver and kidney failure.

They are ready to transplant the patient. As a result, a large number of tuberculosis plaques appear in the patient's lungs, and even tuberculosis deposits appear on the bones. So we have to stop organ transplantation. "

Listening to the introduction of the director of ICU, Zhang Fan frowned. This is the disease without obvious inducement. Organ failure occurs in the short term, and other symptoms are not typical.

This is definitely not caused by ordinary diseases. A latent outbreak of tuberculosis alone is not conventional tuberculosis.

Old Lu also pondered, and old Xia nodded.

"The diagnosis is not clear, the cause of the disease has not yet been found, but the time of the patient is limited. We must remove the tuberculosis focus as soon as possible and do organ transplantation."

Old Xia said.

"The difficulty now is that the patient has multiple organ infection foci, and the body is difficult to

support this major operation. After the surgical consultation in our hospital, we give conservative treatment suggestions, but the patient can't hold on."

The director of the ICU whispered because they were outside the ward.

Just like the Crystal Palace, patients in the isolated sterile ward should wear protective clothing in and out, because patients are too fragile. It is estimated that a little bacteria or virus can kill them.

"Did you take a sample, did you take an organ sample, and what was the result?" Asked the woman doctor.

"After sampling, no pathogenic source was found except that some heavy metals were tuberculosis bacteria."

"Medical records!" Zhang Fan said.

In terms of diagnosis, Zhang Fan lags behind others several levels, so he doesn't consider these things. Now he needs to see whether the patient's body can support the operation through cases.

I took the case and Zhang Fan looked at it again.

Everyone looked at Zhang Fan.

"I need to check the patient!" After entering the working state, Zhang Fan had no humility and no so-called politeness.

"Change Zhang Yuan's protective clothing!" The director of ICU immediately said to the doctor behind him.

Zhang Fan completed the operation under such simple conditions when he was in Shan'an. Now the director of ICU still has some confidence in Zhang Fan.

After entering the sterile ward, Zhang Fan and a nurse entered the ward. Physical examination, from top to bottom.

The patient's head was resting on an ice cap and his body was full of pipes.

The human body is very wonderful. Really, for example, the brain, the commander-in-chief of the human body, in fact, its commander-in-chief power is not great. The heart, intestines, lungs and even some muscles have their own permissions. The simplest thing is that you may not be able to control farting. This is the best thrombolysis.

Usually we don't interfere with each other. At most, the heart secretes a little hormone to affect other organs.

But once entering a crisis situation, the brain should first protect itself, and other organs should also protect themselves. The balanced body will be completely disordered.

Moreover, on weekdays, the body gives people an illusion that people control their own body! For example, what you like to eat, what you eat, what you like to do.

In fact, they are all illusions. This is what the body wants to do, and then secretes various hormones to affect people.

In other words, people play with your mind, not your mind with people's body.

Physical examination shows that the patient is like a great Xia in the Jianghu. He has many scars and even obvious bullet marks. This is not an ordinary great Xia!

The muscles on the body have begun to shrink, and the skin is drooping like the neck of an elderly woman.

Zhang Fan checked from head to toe and did it slowly. Look at the skin, look at the pupil, look at the reflex. Not even the anorectal genitals.

After half an hour's inspection, Zhang Fan took a warm bath in his protective clothing.

People outside are quietly waiting.

The female doctor can't wait. She thinks it's time to quickly screen the cause. This kind of examination is not necessary.

Just as she was about to speak, Mr. Xia handed her a document and said, "it's too late for screening. Now clearing the focus is the primary task. Organ transplantation can only be done after the lesion is cleared. Look at this. If necessary, you should cooperate with him! "

The female doctor was a little uncomfortable. After all, the first impression affected her.

After taking Xia Lao's document and opening it, the doctor was stupid.

"The golden mean has done craniocerebral surgery and large-area skin transplantation research. He is superior to the blue in liver and gallbladder center tumors. He has even done major orthopedic surgery. God, who is this?"

Or Xia Lao handed it to her. She thought it was a novel. In fact, there are some things you can see and some things you can't see. If you go to Shan'an, you don't mention it.

After Zhang Fan's examination, out of the ward, the nurse and young doctor helped Zhang Fan take off

his protective clothing, and there was no time to wipe his sweat.

"How's it going?" Asked old Lu.

"The patient's physical signs have reached the stage of collapse. Fortunately, his desire for survival is strong, his nerve reflex is OK, and he can be operated on at present."

Zhang Fan thought about it and said.

You can operate!

Really, as soon as this was said, everyone was inexplicably relaxed.

No matter how confident Zhang Fan is, there are few doctors who dare to operate now.

Looking at a wounded hero, it ended like this, and everyone felt uncomfortable.

Now someone dares to take over!

The director of ICU asked again, "Zhang Yuan, can you really operate?"

"Yes!"

Chapter 923

Tuberculosis, to tell you the truth, many people now feel that this thing seems very far away. It should be the disease of the black uncle in Africa.

In fact, at present, China is still one of the 22 countries with high burden of TB in the world, and the number of patients is second worldwide. The number of patients per year is about 1 million.

How to say this disease? It is not easy to treat when it occurs. Four combination drugs, like chemotherapy, cause serious damage to human body when killing tuberculosis.

And this disease is a very serious disease. For example, for other diseases, people have dignity. After they get sick, the disease won't care what happens to you. I can break out as I should. I have the pride of breaking the boat.

Of course, it's relatively easy to treat. After all, it's easy to clean up.

Combined with this disease, it is like an old man with a black belly who is always obscene behind the disease group. When the patient is strong, it pretends to be dead in the patient's body.

Really, motionless, like a harmless little rabbit or an old man who is too fat to see his brother, is harmless to society. No infection, no disease, and no physical function problems.

But once the patient is weak, or has been defeated by other diseases, it will show its claws and teeth and attack the city.

So in the early years of China, there was a tradition that when the aging function of the elderly decreased, if there were young babies at home, the elderly would not be too intimate. It sounded cruel. In fact, this is the wisdom of life summed up over the years.

For example, 90% of AIDS patients have tuberculosis infection. Many AIDS patients often die of tuberculosis. Sometimes, be careful when you should be careful!

Tuberculosis is like love. It happens unconsciously. Talk face-to-face, sneeze or cough, and you may get caught.

The most terrible thing is that this thing is not picky about food. Although it likes to stay in the lungs, it comes from the neck lymph, meninges, peritoneum, intestines, skin and bones. It can survive, and it will be very moist.

Therefore, the patient in the digital hospital is not a poor doctor, but a doctor who is too specialized. The doctors in the abdomen thought it could be done, but the doctors outside the brain thought it couldn't. The orthopaedic came over and said he could have a try.

This makes everyone very cautious. Now, there is little effect of making a single organ. The effect is the same whether it is done or not. At present, the final thing is to transplant the lesion at the first time after it is completely removed.

Therefore, the digital hospital contacted Mr. Xia and wanted him to consult and operate.

But Xia Lao is indeed the first person to transplant organs. In fact, there are only a few organs that may be transplanted, and this patient is almost systemic tuberculosis. What should we do?

He was also difficult to do. Just when Xia was difficult to do, Lu gave Zhang Fan's information to Xia. The light bulb in Xia's head was as bright as a light bulb!

Elder brother Yixiu!

Sure enough, Zhang Fan, who came out of the big clinic, really dared to take over. If the time goes forward a year, even if Zhang Fan points to the sky to draw stars to ensure that he can do it, no one pays attention to him!

But it's different now. Zhang Fan's words have the ability to take root.

"I want to report to my superiors!" The director of ICU said for the first time.

"OK, you report."

Because there are too many doctors who come to the consultation. They come while they are happy and return when they are disappointed. There are too few doctors who can perform surgery from beginning to end and achieve a certain height.

Therefore, the leaders have no hope, otherwise can such patients be seen by ordinary doctors?

Can we gather experts from various departments for surgery in batches or at the same time.

Yes, yes, no, No.

First of all, tuberculosis is like a dandelion. If you don't clean an organ, it won't take long for others to come again. And it can't be eradicated.

At present, the patient's state can't stand the blow of multiple operations. If the patient doesn't die after one round of surgery, it is estimated that the doctor will die.

So, No.

Just like unified surgery, gather a group of leaders from various departments for surgery.

In fact, it can't. this thing is similar to the battlefield. Surgery is actually a war. You go hand in hand and always have a commander, so it's OK.

The difficulty is here. There are few people who dare to stretch out their hands. Big surgery can have highly skilled doctors, old and dead. Even those who adhere to the front line, such as Xia and Wu, are OK in a short time. If such a large operation is really stretched out, it will harm others and yourself, and people have to obey the old.

And Zhang Fan, like a budding flower, slowly has his own taste, the taste of sunflowers, in a group of shrinking flowers!

After the leader learned about Zhang fan through the report, he knew that this was the last chance for the patient.

People are also generous. What they directly give is that the military system and even the Chinese medical system, who they want to cooperate with, as long as you need it, you can put it forward and do it immediately.

Then let the president of the digital hospital be the backup team leader!

"Zhang Yuan, what do you need us to do! Experts in brain surgery, general surgery, vascular and orthopedics have been on standby. " The director of ICU came with the president of the hospital.

This operation can't be done by one person.

Zhang Fan hesitated. Lu looked at Zhang Fan and said, "what do you need? For the sake of the patient, now is not the time to hesitate."

"I need a doctor who works with me!"

Zhang Fan nodded and looked at the president of digital hospital and the director of ICU.

"OK, I'll let someone take their past resumes and let you choose."

"No, I need to cooperate with a familiar doctor!"

"Well!" What should I do? Is it the bastard who blew the cow and then erected a wall?

The president of digital hospital frowned and could kill flies.

"What do you mean? Do you want your martial brothers to come here? " Asked old Lu.

Zhang Fan shook his head. When Lu saw it, he was about to drag Zhang Fan's ear down. He had to hesitate to say anything.

"The teachers are all foreigners!" Zhang Fan looked at the master, then looked at the president of the digital hospital, and then said, "I need the help of the doctor of my tea vegetable hospital!"

As soon as this was said, everyone felt that it was nothing. The doctors of tea vegetable hospital did cooperate with Zhang Fan more skillfully.

"Give me the list. I'll inform the political department now and let them contact the local government."

Zhang Fan hesitated because almost all of his doctors were inpatients, and even there were few attending doctors. However, there must be a doctor who must be familiar with his orders and resolutely implement them. Therefore, he has to reveal his situation.

Other people's teams pull out all professors, and even the chores are associate professors, but their own teams pull out all inpatients, so they are embarrassed to call a team!

"The general foreigner asked Zhao Quanping, my master brother and Ma Yichen to come over."

Zhang Fan began to cook like a chef.

Zhao Quanping and master Zhang fan are all chief doctors. Even master Zhang Fan's brother is quite famous. The recording personnel record and those familiar with medical treatment explain to the president of the digital hospital.

But who is Ma Yichen?

He's a resident!

The leaders looked at Zhang Fan and didn't speak.

"Outside the brain, let Xue Xiaoqiao, Dai Yuhang come over!"

Xue Xiaoqiao? Dai Yuhang?

The leaders still didn't speak.

Zhang Fan then said: "orthopedics Xu Xian, Wang Yanan, Zhou Chengfu."

What the fuck's your name? There are all those who play with snakes!

The leaders frowned a little deeper. Zhang Fan's words probably made them look a few years older.

If Lu hadn't been there, people would have interrupted Zhang Fan.

"He Xinyi, skin..."

Except that master Zhang Fan is a little famous, the rest of the list can be said to be anonymous.

Such a big operation, such an important person, you got me a group of unknown people. This is not a children's play!

The president of the digital hospital didn't talk to Zhang Fan and directly said to Lu: "academician Lu,

patients are meritorious to the country. Don't worry, we can definitely let any doctor in China come."

That means, you still let your apprentice think, think again!

Old Lu turned and looked at Zhang Fan.

Zhang Fan gave Lu Lao a look, a firm look.

The matter of human life is not a small matter. Moreover, this operation is like ballet on the egg skin. If one can't dance well, it's the egg yolk.

Therefore, Zhang Fan absolutely does not allow his assistant to question him on the operating table. Is there any such thing, absolutely. If you ask a group of big people to have an operation, the east one can't do it, it should do it, and the west one I've done it before, it should do it.

Is the operation still done.

Therefore, Zhang Fan would rather be a little tired than have absolute authority. We must not let the operating table become a debate contest.

Some people will say that the preoperative discussion is over. This is a fool to the layman. The operation is dynamic. We can only study the general direction, not the small details.

This is why surgeons are as strict as the army.

Zhang Fan insisted, and of course Lu insisted.

"Why don't you discuss the chief knife again?" The old man still has confidence. If you let me think about it, I'll let you discuss it again!

In front of the digital hospital, not to mention the president, ordinary doctors can make friends with him three points lower, but who is the old man? Although he can't be ranked in the top three in his own school, he is also among the top ten in China.

Not that I am too weak, but that my school is too strong.

The old man was unhappy when he saw that his apprentice had been underestimated. He just felt that his child had grown up. Would it be appropriate for you to forcibly pull him to the kindergarten!

Look at what Lu said. The president of the digital hospital is difficult. If he has some way, will he invite outsiders?

"Hehe, everyone's mood is understandable. Zhang hospital is also for patients. Zhang Yuan, do anesthesiologists and nurses need to be equipped? "

"The anesthesiologist just let the digital hospital out. I really don't have a suitable one in my hand. Nurse, we'll bring it! "

The president of the hospital looked at Zhang Fan and Lu Lao. My heart is also at sixes and sevens. Although the main knife is Zhang Fan, he can't run away if something goes wrong.

The position of president of digital hospital is really not ordinary.

hesitate!

The director of ICU whispered to the Dean: "Dean, make up your mind. There's no time. If you let him go..."

"OK! I'll ask the of the political department to inform the doctors on the list now! "

The hospital director bit his teeth. There's no way. It really depends on Zhang Fan whether he lives or dies.

Chapter 924

"European Academy..."

Zhang Fan said the whole thing over the phone, but omitted the patient's personal information. Just as in the rescue, Zhang Fan wanted to gossip. Who wasn't curious. As a result, Ouyang pouted and your level was not enough.

This kind of thing really can't be said casually.

The old lady was excited. Really, the old lady who was lying in the boss's chair rubbed and jumped up.

"Do you need me to go there? If you need me, I'll go with them!"

"I'm not at home now. Secretary Ren also went to the meatball country. You have to look after our house. Now the stall is so big. If you leave, there will be no leader who can be involved in an accident!"

Zhang fanhan has come down. He knows Ouyang too well. Such a big thing is to show his face in the industry. Come and have a look. I Ouyang led a team to have an operation in the capital digital hospital!

If ordinary patients or even leaders, Zhang Fan will definitely let Ouyang lead the coquettish. He doesn't care and doesn't love the limelight. He doesn't think it's interesting, but Ouyang absolutely likes it.

But this patient is so unusual that he doesn't even have a name on the medical record.

Second, when Ouyang came to the capital, he showed his face, and the benefits could not be less. But this time, even if the country let Zhang Fan pay at his own expense, Zhang Fan was willing, so Ouyang could not come.

"Oh!" Ouyang was like a child watching others eat ice cream but he didn't. He was depressed.

With the increasing size of the hospital, Ouyang's style has become more and more convergent in the hospital, and even he hardly comes to the hospital. Zhang Fan knows what Ouyang means. He's not a fool. How can he not understand it.

"Dean, our basic dish is still tea vegetarians. If you are not at home, I feel like stealing a chicken and touching a dog. Secretary Ren is not at home this time. You must lead us next time. I have a headache without your overall planning.

You'd better hurry up and tell me something to pay attention to! "

This kind of person can't be comforted. The more comforted she is, the more she feels as if others are pitying her.

Just call her a donkey and she'll be happy.

Zhang Fan said so, the old lady was proud“ Hum! It's OK. I'm not dazzled by small achievements.

I'll tell you, you go out and have surgery. Don't let others lead you by the nose. I'm worried about you. As soon as others say it, you feel uncomfortable on your face.

This time you bring out a team. You must be tough and show that I am the first and I am the king of the world. Even if we are not, we should show it.

Second... "

The old lady talked on the phone for half an hour. Although she was suspected of being wordy, Zhang

Fan listened with gratitude. Really, such words are like only father and son can say, and Ouyang really turns all the losses he has suffered in his life into words.

The digital hospital can only be transmitted to the hospital through the bird market and then through tea.

Ouyang has been in the hospital, "meeting! Call Xu Xian, Ma Yichen... They're all here for a meeting. "

Does Chen Sheng think he has to swear again? But the old lady's expression doesn't seem very similar!

"Don't ink, good thing, come on, go and shout!"

Chen Sheng gave a quick cry and quickly asked the officer of the medical office to inform him. Then he took someone to arrange the meeting.

He is now the vice president, but he also works in the medical department. Zhang Fan asked him to recommend candidates. He said he was reluctant to serve the leadership and was reluctant to leave the leadership. What he said made Zhang Fan unable to pick on!

The doctor is in place, the nurse is the head nurse in the operating room, the head nurse in the ICU, and the instrument nurse is Bayin.

When they entered the meeting room, they saw Ouyang walking around like hemorrhoids. They couldn't sit down!

"Ouyuan, everyone is here!" Chen Sheng interrupted Ouyang.

"Oh, sit down. I'll inform you now. Later, it is estimated that the government will let you go to the capital! "

"Wow, go to the capital! Go to the capital! " What do a bunch of people do without asking.

People in other regions don't know how they feel about the capital, but people in the frontier still have great expectations for the capital.

Especially xiaobayin, whose eyes are full of stars, "Tiananmen Square, the Forbidden City, the Great Wall, roast duck!" Even the mouth began to patter.

Because the frontier is too big and the tea is too far away, it takes one day to get out of the frontier. Therefore, frontier people have a special longing for the capital. For example, restaurants in other provinces have general business in the frontier.

The restaurant selling ducks is in the frontier. It's full every day. Does it really taste good? No, they come from the capital, just like if someone came back from a meeting in the capital, the dragon beard crisp is

standard.

Is this thing delicious? Anyway, Zhang Fan thinks this thing is not delicious at all.

"All right, look at you worthless!" Ouyang smiled and scolded "Your Zhang hospital has an operation in the digital hospital. I need your help. "

Then his face changed.

"I would like to emphasize discipline here. This is not what Stan and emirate you follow. This is our capital. You represent the tea vegetable hospital.

You have to show me the style of our hospital. Who wants to lose face and lose the chain? You Zhang Yuan is reluctant to clean up, but I am willing to come back and see how I clean up you.

When you go to the operation this time, don't bring unnecessary things. You must be careful and complete the order of Zhang hospital correctly and seriously. See? "

Although Ouyang's face was serious, there were young people below, one or two with smiling faces.

Answer loudly: "I see!" Ouyang's heart still looks down on the surrounding stans, although they are the gold masters~

"OK, just know. Go and prepare. Coordinate things at home. If you can't handle them, report any problems directly to the hospital, and I'll tell you everything! "

"Good! Thank you, Dean. " Like a chorus!

Ouyang likes this momentum, the momentum of the crowd.

"Well, I have a good mental outlook. Break up! "

"Dean, Dean, Lao Zhao doesn't care about so many people. The rest are young people, and none of them is older. Zhang Yuan does big things, and sometimes small things... "

After the meeting, Chen Sheng followed Ouyang for the first time. Lao Ju glanced at it from a distance, turned his mouth and left.

"Do you want to go?" Ouyang glanced.

"You said there was no one to do chores. You don't worry. This group of people went to eat, drink and Lazar. They greedily ate their stomachs and affected the operation. They are all political events! "

"That's right, all right, you go and prepare, and you lead the team. The second hospital and the Third

Hospital... "

"Dean Ju, Dean Ju, he is familiar with others. He is best at this kind of thing."

Chen Sheng sold the old house directly.

The municipal government informed the tea vegetable government at the first time.

The leader in charge of health in the tea government thought about taking a team to the capital.

The purpose of going is different from that of going.

The leader in charge of Health knew that Ouyang could not talk, so he called Zhang Fan.

As soon as Zhang Fan answered the phone, he thought about what you were doing here? But you can't say that.

"It must be good for the leader to lead the team. It's just that I'm called by someone else's hospital. Shall I call your leader?"

The leader in charge of Health knew there was no play, so he hung up with ha ha.

The tea vegetable hospital was shocked up and down. Everyone just envied when they went to Stan and the emirate. But going to the capital this time is naked jealousy.

"European hospital, we still have better doctors in urology. For example, you say I can."

Li Xiong had a talk with Ouyang that year. He almost never contacted Ouyang in private.

But this time, Lao Li is also jealous. How many people can become famous in the capital in their life? This opportunity is too precious.

"All right, watch your home. I don't have a chance!" Ouyang didn't mock him.

Not only Lao Li, but also those with a little professional title are unwilling.

"Zhang Yuan is eccentric!"

"Yes, Zhang Yuan is eccentric!"

"Zhang Yuan despises us old guys!"

"Yes, Zhang Yuan is slowly eliminating us."

Chen Qi seized the opportunity to jump up and down in the hospital. He thought it was an opportunity, maybe a chance to turn over.

Go to Stan and Emirates. The old guys won't make trouble, because everyone wants face, but they can't go to the capital.

"What are you doing? What for? Want to rebel? " Ouyang's triangular eyes stared.

Not only Ouyang, but also Lao Gao came.

"I didn't make trouble. What are you doing?"

"European hospital, high court, this is to go to the capital. Zhang hospital selects all young people. Haven't we contributed to the hospital?"

As soon as he said this, Ouyang was embarrassed to swear directly.

"There are many opportunities. Who thought we could go to stan throwing knife before? Even throwing knives in the Emirates? Who would have thought that our tea vegetable hospital could cooperate with the golden mean and Marubeni. Even the hospitals in niaoshi didn't like us before.

Why? Have you thought about it?

Also, why does Zhang Yuan choose young people? Is this the problem of Zhang Yuan? My old man, let's think about it! "

Lao Gao spoke.

Lao Gao's character is still strong.

Everyone was still a little unwilling, but Ouyang stared, "Chen Qi, do you want me to tear your face so that you can be honest? Zhang Yuan has a good character. I can't get sand in my eyes. You can weigh it yourself! "

In a word, Chen Qi's heart is cold.

Not to mention others, Zhang Fan didn't expect that the attraction of the capital was so strong that a group of old men made trouble.

The government informed the hospital for the first time that there was no straight-line plane to fly to the capital. Originally, it wanted to change planes.

As a result, the airline suddenly came out with one more direct flight to the capital, and didn't let the tea vegetable hospital busy from beginning to end. Someone else had a special person responsible for the

whole process.

Xiaobayin looked left and right on the plane. Because the plane was not full, he sat with several of their colleagues in the hospital!

"Sister, special plane, special plane, this is my second time to be a special plane!" She said to the head nurse in the operating room.

"Hehe, it seems true."

Everyone was happy.

After the plane flew steadily, Bayin jumped up and down to give everyone snacks, "milk pimples made at home, come and have a taste."

"Bayin, sit down and put away all your snacks. Before the operation, everyone's diet must be formulated by me! "

Chen Sheng has a black face!

Don't tell me. I can't do without such a person.

Chapter 925

Under normal circumstances, it is not easy for airlines to get a direct flight to a small city. People also have to eat and make money. However, with the increasing flow of people in the tea vegetable hospital, this time people sell it to the government and open a direct flight.

Bayin stuck out his tongue on the plane, but how did he get the milk pimples back.

Discipline must be observed.

In the hospital of bird City, this time everyone is not silent. To be honest, in the past, frontier people envied several stans around them, such as Kazakhstan. It is said that people drank milk and ate bread every morning, one sausage and one, and the river was full of milk.

But in recent years, it's Stan's turn to envy China. The legends are similar. It seems that the frontier people eat one

Therefore, it's not unusual for everyone to go to the tea vegetable hospital. But this time people fly in groups, which makes people unable to accept.

"Tea vegetable hospital cow, now it's across our capital hospital!"

It's acid gas inside and outside. Just like a child with a runny nose who has been following behind his ass before, he suddenly didn't see him for a few days. He looks like F4, or the original F4. Can he feel uncomfortable!

Power is stronger than people, and envy is useless. I can only look forward to one day. Suddenly, everyone feels that the master of tea vegetable is in the bird market!

The party simply brought a few changed clothes, and Chen Sheng brought more things. He was intentional, and Zhang Fan brought the handy equipment.

However, Zhang Fan has a lot of handy instruments. It's a big box. Because Zhang Fan's surgery is too complicated, Chen Sheng feels that Zhang Fan doesn't take anything he can use.

Does the capital hospital have no equipment? This is the job of others and can achieve an outstanding attitude.

"Zhang Yuan!"

"Master!"

"Hey, hey!"

After seeing Zhang Fan, a group of people seemed to have not seen him for a long time. They were very friendly.

I didn't talk much and went straight to work.

"The patient's vital signs are not very good this time. The operation conditions are also relatively poor, so we should get familiar with the scheme and the patient's physical state as soon as possible these days. "

Zhang Fan introduced the state of the patient.

"Have all the doctors of tea vegetable come?"

In the digital hospital, the president asked the officer.

"It's all here. A team is all here. It's really young. Some don't seem to be as mature as the graduate students in our hospital!"

The president of the hospital, yahuazi, is a little sore. Generally, the doctor who flies the knife is not 40 or 50 years old. He has become famous in his own hospital. That's good. This time, all the young doctors come here. They can't be young doctors.

"First arrange experts to discuss their scheme and tell everyone that we must check it!"

The chief experts of various departments of the hospital also know, and even some experts from other hospitals who know Zhang Fan know that Zhang Fan has brought a delegation to Beijing this time!

After Wang Yanan came to shuitanzi hospital, he called the director of his department for further study.

Li Cunhou even stays with Zhang Fan in the digital hospital every day. Without Zhang Fan, he can't stand his ground in the Department, but now he's great. He's a young scholar and won the first prize in science and technology. There's already a rumor in the Department that he's the next director.

This time is different from the first time Zhang Fan came to the capital. At that time, he was bullied. Zhang Fan went home with tears to complain to his master and uncle. But this time, Zhang Fan came with the regiment, and everyone knows that there is Zhang Fan.

"Has the hotel been booked?" After Zhang Fan explained, he asked Chen Sheng.

"The hospital has arranged dormitories for three people, and some have to squeeze with doctors in other hospitals. On such a hot day, I wonder if we can find a nearby place to live by ourselves."

"OK, don't be stingy! According to my standards, everyone treats equally. Recently, I don't think I can care about anything. You can fuck more snacks in the Chenyuan. "

"Ah! Good, good! " Zhang Fan shouted Chen Yuan, and Lao Chen's bones were three points lighter.

The next day, after seeing the patient, Zhang Fan and the doctor team of tea vegetable submitted the operation seminar.

Xia Lao and Lu Lao have a rest these days, but the female doctor and Lu Ning accompany Zhang Fan and another Li Cunhou. In fact, the team is also very powerful.

The superior acted quickly. After the materials were submitted, the digital hospital invited a considerable number of experts to demonstrate.

What is the argument? Is to demonstrate the feasibility of the operation.

This kind of thing, Zhang Fan also helpless. For example, you have to let others demonstrate, but you let them operate, and they can't do it. Those who can do surgery have to explain it to others!

However, it can be regarded as a caution about human life!

"Dr. Zhang, please explain your current diagnosis and treatment plan for patients."

I don't know where to invite experts. Zhang Fan doesn't know much and has a familiar face.

To tell the truth, the collision between North and south medical treatment was particularly fierce after 2003.

Normally, Zhang Fan should be from the north, and his master is also from the north, but the school is indeed from the south, or the south is unified for half a day.

It's also embarrassing, so Zhang Fan is not as smooth in the north as in the south.

There were seven or eight experts, one of whom had frost on his face and looked at Zhang Fan as if he were looking at him.

The disease, diagnosis, to tell the truth, they don't know, and Zhang Fan doesn't know.

However, the problem now is to save lives and deal with the current life-threatening problems.

So talking about diagnosis is nonsense. At present, we can only say the treatment plan. In fact, it's the same as beating a hamster. Which one do you hit.

It sounds like playing. In fact, many diseases are diagnosed with question marks?

For example, there is no definite definition of what is a functional disorder. In fact, there is no way to find the cause, diagnose, and treat the symptoms.

For example, the child always plays truant, the teacher is also very good, and the students have love, but he just doesn't play truant. When he asks him, he can't say one, two or three.

Then, in order to cure the disease and save people, parents beat one meal first, one meal can't, and then another. This is actually the same as many treatments in hospitals.

Zhang Fan asked the experts who were looking at him, and other experts looked at him differently, because they came to the digital hospital to demonstrate the feasibility of the operation.

But now he has a problem for Zhang Fan.

Some things seem very simple. But it's different to say it or not.

For example, if the operation fails, it is to find the source, and then someone will say that the diagnosis is unknown and the operation is rash!

Then the child has no mother. It's a long story. The doctor will report to the medical office every day!

Zhang Fan is not stupid. Upon hearing such a question, he said: "at present, the patient's life is critical and multiple organs are facing failure. In order to perform the transplantation operation as soon as possible, the expert group suggested that the focus removal operation should be performed as soon as possible after discussion!"

This is also an explanation.

However, expert seems to have a grudge against Zhang Fan, Leng Shi asks again "As the chief surgeon, don't you have a diagnosis? "

He caught this sentence and wanted Zhang Fan to spit out a word, and then the meeting minutes. It was really killing without blood.

People in the industry know that this kind of operation is definitely not fully guaranteed. Otherwise, Zhang Fan would not take over.

Lu Ning, who is sitting with Zhang Fan, is angry. Although Lu Ning is a scholar, he is still very upright in school for half his life. He said to Zhang Fan, "this old man is really a toad playing with frogs and ugly flowers!"

Zhang Fan almost couldn't help laughing.

Seeing Zhang Fan's face stretched hard, Li Cunhou thought Zhang Fan was angry, so he whispered, "don't be angry. Now you're wrong to be angry. People are waiting for you to be angry."

"Who is this?"

Zhang Fan asked.

"He! Hehe, professors in Colleges and universities control the certification of our medical system. In those years, they competed with your teachers for academicians, and the result was... "

"Oh!" Zhang fan understands. No wonder he hasn't seen this man. He came up with a concealed weapon to find Zhang Fan's anus and intestines. This is a pot for the old man!

"The diagnosis of the patient requires the expert group to make a conclusion. The signs of the patient can't support for a few days at present. What I can do now is to clear the lesions of the patient's body! Sorry, time is limited. I also need to discuss the problems that will occur in the operation with the team.

The operation report has been reported. If you agree to the operation, please inform me as soon as possible. If you don't agree to the operation, we have to go back to work! "

With that, Zhang Fan directly got up and left!

Um! The old man was confused. He felt that Zhang Fan was so enthusiastic that he should actively get close to them, otherwise he didn't want to be in the future? As a result, the man went straight away.

"Can such a person be a doctor? You see, do you understand the rules? Is there any organization and discipline? "

Some of the others pretended to read the operation report, some pretended to answer the phone, but they didn't agree with him anyway.

They are all foxes for thousands of years. Who doesn't know who.

Just like a gourmet, if you let him say what he says is right, if you let him do it, he may not be able to do it.

Zhang Fan left directly, but the expert group can't go because they also have to report.

"I firmly oppose making him the chief surgeon!"

The man who didn't deal with old man Lu said directly, "for such a unruly man, we have no confidence that he can do his duty as a doctor on the operating table."

"Why don't you ask Mr. Wang to take over the patient?"

The president of the digital hospital is not happy. He should be careful and strict, but he didn't invite anyone to smash the pot!

"Well! That's my opinion anyway! " Then the old man left.

The officer looked at the president of the digital hospital, meaning whether it was recorded or not.

The president of the digital hospital nodded, which means recording.

Other experts have also expressed their views, which are generally conservative, but the problem can not be maintained now.

On the same day, the operation report and expert opinions were reported at the same time. The next day, the superior leaders estimated that they also found experts and finally agreed to the operation.

In the morning, before the sun rises, Zhang Fan and his team have set out from the hotel.

Chapter 926

The diet in the morning is very simple, but the calories are quite high. A small glass of water, then an egg and chocolate.

To tell you the truth, Zhang Fan doesn't like this kind of diet very much, especially when he gets up early in the morning and chews it with chocolate as a steamed bread. He's really bored. When he takes a bite, his blood sugar instantly rises a lot.

But there's no way. Today's operation will be a protracted war.

Entering the operating room of the hospital, old Lu and old Xia also came.

"Angry yesterday?" Lu asked with a smile.

"No, it's just a waste of time! Didn't bring you any trouble! "

"Hehe, that's good. He said he did it for us. I didn't show it to him. I don't go out yet when Lao Gua told me?"

With that, old Lu cheered the other doctors of tea vegetable.

"They are all great guys and good girls. I'll congratulate you after the operation!"

It's better to engage in other departments. Ma Yichen is excited and wants to call shiye.

But when she didn't recognize her school at this time, she even got red. His eyes kept looking at Zhang Fan.

"Hehe, you are ma Yichen! Your teacher is known all over the world under my banner. As a result, you are still an undergraduate. You are good. You are already a master. Work hard! "

The old man saw the most excited Ma Yichen in the crowd and said with a smile.

Dolls are silly. Their eyes are full of water.

"All right. Master, we're in! "

"Well, go."

Ma Yichen is as tall as stepping on a five inch thick carpet.

"Can you, can't you rest first, and then you go in the second round?"

Zhang Fan said to Ma Yichen, "that is, if the pony doesn't rest first, old Lu knows you. After you have a taste, I'll go first. "

Zhao Quanping envied that he was about to chop Ma Yichen into meat.

It is estimated that most people do not realize this mood. Those who engage in technology worship such legendary characters. Really, just like one day, father Ma suddenly patted you on the shoulder and said, "brother, we are cousins who have been separated for many years!"

That's the mood.

The operation was divided into two rounds. In the first round, orthopedics were also carried out at the same time when extracerebral, extrathoracic and general surgery were carried out. They eliminated the lesions on the peripheral small joints.

In the second round, if it goes well, after the extracerebral, extrathoracic and general surgery, the orthopedics department will start the large joint.

"Are you ready?"

"Ready!"

Although the operation room can not speak loudly, but the response of everyone is awesome.

Zhang Fan looked at serious faces, firm eyes and warm heart.

He's not alone anymore.

It is no longer Zhang Fan who came to the capital without an assistant.

"Start, brush your hands and wear surgical clothes."

The blood before the stage has now calmed down. Wearing the legendary adult diapers, men and women, they really put on their surgical clothes naked.

The temperature in the operating room can't be low, because the patients can't stand it, the patients can't stand it, and the doctors can only stand it.

The five doctors on the operating table, Bayin, were crowded into few positions.

The head nurse is a itinerant nurse.

"Start!" The operation is open.

The focus starts with the lungs.

How to describe tuberculosis in the lung.

There are many forms of tuberculosis. What is exudative, like rotten meat, keeps spitting bad water.

What proliferative, like the pimple on the forehead, grows bigger and bigger, and finally becomes a piece of acne.

There is also cheese like. In fact, the cheese is broken and covered with long hair.

After the operation, the first thing to be done is the abdomen. The brain can only be used after opening. The brain can't provoke it. It's not like the intestine. You can cut it if it's unpleasant.

Opening the patient's abdominal cavity instantly gave doctors a lump in their heart.

Really, when the abdominal cavity was cut, the intestines that should have been pink and tender were all like children entering puberty, full of flesh pimples and dense.

With the intestinal peristalsis, meat pimples are crawling slowly like thousands of meat insects!

There are white gray buds at the tip of the raised flesh pimples. One or two is really nothing.

Thousands of yellow bases and white buds can give people a hairy feeling.

You can imagine how terrible it would be if you ate very fluffy.

The chocolate eaten in the morning is like joining the army of meat pimples, which is swollen and restless in the throat of doctors.

Wang Yanan, they don't look at the patient's abdomen.

Although the bone is also very serious, it is much better than the abdominal cavity.

White rust spots are attached to the bones, and tuberculous patches like bird droppings accumulate near the joints.

Before the operation began, the experts in the observation room said everything.

There is a guide to the operation, "this operation should first deal with the simple, should start from the bone, and then step by step!" This is supposed to be in orthopedics.

Some people also looked at Zhang Fan's team who was too young to say sour words: "zupai is zupai. Such a young doctor has already started such a major operation. It seems that the grading system of the Ministry of health should keep pace with the times!"

It's estimated that the hospital can't stay in the system.

There are also mutual discussions, "the patient's signs are so serious that it is estimated that the situation of abdominal bone and brain is still very serious."

When Lu Lao and them entered the observation, although everyone spoke in a low voice, they still talked one after another.

But when the operation starts, the camera puts the patient's abdomen in the observation room. Everyone stopped talking, and the person who instructed Jiangshan began to shake his head. His sarcastic face was stretched hard, and his eyes to explore the operation were staring round

"Is this directly implanted into the abdominal cavity?"

Someone asked incredulously, but no one explained and no one continued.

"Director, you come quickly, after abdominal cavity opens, the tuberculosis of one abdomen is located, estimate what that Zhang, cannot do down!"

The old man who didn't pay with old Lu didn't go far. Although he didn't come to the operating observation room, he was nearby. After hearing the news, he came to the operating observation room.

As soon as I entered the door, I looked up“ What did I say? Be conservative. Be conservative. Well, no one listens. Now look, what about the lesions in the abdominal cavity? The patient's body has already reached the critical line. Now close the abdominal cavity and kill. How did such irresponsible doctors

learn from teachers. How does his teacher teach? "

Authority and authority are sometimes indistinguishable to laymen.

Just like the economic center and the political center, you can't tell which city is powerful.

Lu is always the technical authority. He is the authority in surgery, but others are the authority in evaluating whose technology!

When the abdominal cavity was opened, Zhang Fan and them were stunned. They had thought of the worst situation. As a result, opening the abdominal cavity still had worse waiting for them.

It's really with the world-class boss just out of the novice village. If the disease is a little lighter, it is not difficult, but a little more is the result of quantitative change to qualitative change.

Just as locusts are not terrible, but they will be terrible when they spread all over the world.

"Zhang Yuan, continue? The patient may not be able to hold on! "

Zhao Quanping Khan came down. This is the operation. This is the uncertainty of laparotomy.

Modern high technology, in fact, most examinations are really just assistance. Only by opening the abdominal cavity can one or two be determined.

"Teacher, I think so, as long as we are fast enough!"

Ma Yichen said. Although they had different opinions, they didn't start and quietly waited for Zhang Fan's order.

This is the advantage of your team. If you have an expert at this time, you may be able to fight. But now it's different. Everyone will only tell Zhang Fan what they think.

They all want to help Zhang Fan and how to do the best operation.

This is why Lao Li has his own Jiangsu and Zhejiang team, Lao Hu has his own capital team, Lao Zhong's team is even more exaggerated, and Lu and Wu are directly the disciple team.

Sometimes, surgery is not much different from doing black work. You must have an assistant you feel you trust.

In the operating observation room, the doctor on the operating table seemed to be in a daze again. The old man who didn't pay with old Lu was already angry.

"Too much fun, too much fun!" As if he could not help the explosion, he took out the phone and began

to call.

"I complain that the digital hospital is careless about human life! The leader is too childish, too childish. Come and have a look. The doctors who underwent the operation are now stupid. After opening the patient's abdominal cavity, they don't know what to do. Now they are as numb as a chicken. "

While making a phone call, he squinted at old Lu, "you bang se, you bang se, want your apprentice to go out. OK, I'll make you famous today. Boo, boo, you're an academician. What's the matter? "

Lu Lao was also shocked. He didn't expect the situation to be so serious, but he wasn't in a hurry.

If someone will try before the operation, it is estimated that there are no people who can even try to open the abdominal cavity now.

Now if you can sit down for the operation, it is estimated that only Zhang Fan will be here.

Mr. Wu is good at it. Maybe he can spell it when he is 20 years younger, but now he is 70 or 80 years old. He is going to wear diapers without surgery. How can he!

Can you do it yourself? Lu Lao thought for a while and didn't dare to think further.

As for the nearby clamor, as long as he doesn't enter the operating room and affects the operation, he likes to say what he likes to say.

"Yes, we're going to fight for speed now, pliers, start!" The phone just hung up with the person who didn't pay old Lu outside the operating room.

Zhang Fan started.

He's moving!

He's starting!

Well, he started!

If the abdominal cavity is opened, most doctors will definitely give up according to the routine. How to cut it and how to sew it. Doctors are not gods, and modern technology is not so developed. There are infinite possibilities.

Sewing, in fact, according to the evaluation, is not a doctor's mistake.

However, after opening it, if you move, you will say more.

Many people were a little sorry when Zhang Fan moved when he opened.

"Still too young!"

"Yes, too young." Many experts looked at each other. They heard the phone call just now.

"Yes, still young!" Seeing that Zhang Fan began to move, old Lu couldn't help saying.

"What, he's young and he's not sensible. Why don't you stop it now? Ah, why don't you stop it when you're a teacher? Can you be held responsible for the consequences? "

The caller saw that Zhang Fan dared to start, and there was a little convergence in front. If Zhang Fan didn't do it, Lu Lao would go away in frustration at most.

But if he did, he wouldn't be afraid to tear his face if he looked at the monitor.

Well, this hometown, go straight to the battle naked.

Chapter 927

Seeing that Zhang Fan started, old Lu was more relieved. He knows this little disciple too well.

Looking at the simple and thick, in fact, you can know by looking at your eyes. It's a little like a pig with a face. It means loud and clear in your heart. Although you're young, you're actually a thief. Otherwise, there are many skilled people. Which one can be the president of the third class hospital in a short time, and which one can gather a group of people as assistants when he was young.

Bit by bit, this has its roots and heels.

Moreover, his little disciple has two attitudes when he doesn't go to surgery.

Without surgery, a sailor who didn't eat spinach was just like a sailor who ate spinach.

When I saw Zhang Fan start the operation, the one around me came directly to him. The old man smiled!

People at this level are not stupid. One thinks he can't get off the stage today, and the other thinks he can get off the stage today.

So, this is the difference of cognition.

"Hehe, how can I teach my disciples? Want to cheat? Don't be impatient. I'll teach you how to be a master today.

The level is lower. I can't be an academician. In fact, it's nothing. My age is up to the line. This is the number of days. However, if your level is low, you should not mislead people's children.

And still learn medicine, you not only don't harm people's children, but also don't neglect people's lives.

I'm not criticizing you as an academician. When you should be modest, you should be modest. Don't think you're old, but it's no use living on a dog when you're old.

You can't do surgery, or you haven't seen surgery, don't take your level to measure others, it's not good!
"

Old man Lu will not be angry. He will fight like a street warrior with a red neck and staring eyes. People have status. Even if they swear, well, he will pound them wherever they hurt!

Who says that academicians do not curse people, but it hurts to scold people!

Can you not hate the fierce people in the opposite? When he joined the academician, it was estimated that he had his last chance. When he was old, people chose Lu Lao.

Therefore, he felt that old Lu should give it to him. He was an elder. Then he cut and dipped it in vinegar to old Lu.

Lu Lao's words rammed into his heart. If he were an old man of his grade, he would probably die of anger.

But they maintained it well, although the angry lips began to tremble and the corners of their mouths began to flow bubbles.

However, the combat effectiveness has been greatly reduced. According to the status, the other party is an academician. According to the achievements, people can't be forced by ordinary foreigners. Is it according to the age?

"Hehe, your mouth is hard, your mouth is hard. OK, we'll see. We'll see. Others are afraid of you. I'm not

afraid. I must fight with you medical bullies and learning bullies to the end. "

Although the old man was not an academician, he was also a meat eating figure. The others didn't look at it and let them quarrel, "old Wang, calm down, calm down!"

"Lu Lao dissipates Qi, dissipates Qi, all for patients, all for patients."

This is a slight difference in identity.

"OK, OK, others have digested it. How old are they together. All right, all right! "

This is similar.

People like them don't stand seedlings and let two old men fight. They are not biased, but they will never get involved in your gratitude and resentment.

They are not ordinary people, and this kind of gratitude and resentment can not be persuaded by one or two words.

Old man Wang's phone was still powerful. Before long, the leaders of the Ministry of health, the leaders in charge of the security department, the leaders of the army, the government, the Propaganda Department, and even the United Front Work Department came.

You say that patients in other people are expensive, safe, military and propaganda, but it has something to do with your united front!

Anyway, it's the one lying on the operating table. His identity is complex enough.

When the leader came, he couldn't quarrel. It's estimated that old man Wang didn't dare to quarrel. He was short in every quarrel. He felt very uncomfortable in his heart.

So when the leader entered the observation room, the white foam around Lao Wang's head and mouth didn't come and wipe, "how did you decide to have the operation? The diagnosis was unclear. What did I say at the meeting?

Ah, how do you supervise and manage it? Don't digital hospitals belong to the Ministry of health? "

It's enough for people to be short of Lu and the Ministry of health.

To tell the truth, the Ministry of health in China sounds very famous. In fact, it's just like that. The top doctors can't manage it, and the top hospitals can't manage it.

"Digital hospitals really don't belong to us. They belong to the army!"

The leader from the Ministry of health didn't even know anything when he entered the door. Like his son, he was taught at home, but he didn't know which little officer behind him said such a sentence.

The old man couldn't put his finger in the air. He was scolded by old man Lu and fainted.

"There is still the right of supervision! Don't pass the buck with me. Take a look. Take a look at the patient's abdominal cavity. Is it time for surgery? "

The leaders in other fields don't have that confidence, but the leaders of the Ministry of health dare to take the lead.

He is not asking for trouble from the Ministry of health. In fact, he is burning the fire.

It's all within the system. He knows too well. He's too good at turning big things into small ones and turning small things into nothing. If he doesn't make things bigger now, maybe these people will recognize the responsibility when they look at old man Lu's name.

But as long as the matter is big, he believes that these people will never admit it.

Even those from the Ministry of health can't understand it. Doctors are busy with the operation of abdominal organs on a monitor. No problem?

The health system does not understand, and other systems do not understand.

But look at the anger on the face of the old expert Wang. Everyone is very serious.

"What's going on!"

Finally, someone couldn't help asking. At a glance, the golden beans were frightening.

The president of the digital hospital stood upright with his legs and said in a report: "the patient's condition is more serious than expected. At present, experts have two views, one is that the operation should not be performed, and the other is to continue the operation. "

"If I'm not mistaken, I'm continuing the operation now, aren't I?" The leader asked.

"Yes!"

As soon as the president of the digital hospital reported, the leaders were angry.

"What did you do early? Why didn't you discuss it clearly before the operation? Now the patients are on the operating table. You don't have a unified plan. How did you do it?

Is the capital too nurturing? You need to go to the grass-roots level for exercise. Are you responsible? "

The leader was angry and cleaned up the dean of the digital hospital first.

The sweat is coming down.

Really, no rash disaster.

Can do this position, we must have the bearing capacity of this position.

"At present, the patient's physical signs are stable, and we are helpless. If we delay..., and we can't invite foreign experts."

"Go, what words, you..."

The leaders are impatient. The military leaders are not local leaders. If they don't clean you up in person, they will get angry on the spot if they hold a meeting late.

Old Lu said: "the situation is very serious. The Dean has done a lot of work. Without him, it is estimated that the patient has been hopeless. Now I'd better wait for the result of the operation! "

Old Lu saved the life of the president of the digital hospital.

Old man Wang still has to speak. Old Lu said to several leaders, "at present, it looks very serious, but as long as you do it step by step, it should be no problem."

Generally speaking, Xia Lao should have a high status, but generally speaking, he is a floor sweeper in Shaolin. His kung fu is very awesome, but he doesn't ask about worldly affairs and interests, so no one listens.

At this time, Xia Lao said, "the young man's level is OK. I hope there is some!"

As soon as this was said, everyone stopped talking.

When the leaders of several systems come, they can't go.

Everyone sat quietly in their chairs and looked at the bloody monitor in front of them. No one spoke.

People who don't understand this are really disgusting and diaphragmatic!

Those who understand it will enjoy it.

However, the more old man Wang looked, the more he felt wrong.

Because the bastard in the monitor seems to have extraordinary Kung Fu!

Zhang Fan holds pliers in one hand and a sharp knife in the other.

Zhao Quanping held an attractor in one hand and gauze in the other.

Ma Yichen held the hook in one hand and tweezers in the other.

Several people cooperate quite tacitly, and there is no verbal communication at all.

At this time, Zhang Fan didn't like to talk in the operating room, and his working skills were shown.

Assistants don't have to communicate at all.

What should be done and what should be done is just like a whole, without any stumbling.

This is the style of a leader or a master knife that affects the style of a team.

Abdominal surgery is ongoing.

Bone surgery was not delayed. Wang Yanan, Li Guofu and Xu Xian went to battle together with pliers, forceps, bone file and bone knife.

Banging, banging, banging!

"Is that ok?" The leaders can't understand it completely. It's all meat. They can't ask if they want to ask.

Orthopedics is better.

Knowing that the doctors were doing very well, I couldn't help but ask when I saw the doctors greeting as hard as a mason, carpenter and blacksmith.

"The tuberculous plaque is attached to the bone and cannot be removed with ordinary instruments. It must be removed together with the periosteum."

The president of the digital hospital explained.

The leaders looked at the monitor. The meat on their faces was jumping. They didn't want to see it, but they couldn't help looking at it.

The more old man Wang looked, the more uncomfortable he felt, and the more he looked, the more he couldn't sit still.

The team cooperation is tacit. The main knife is too awesome. The lesions at the bottom and side of the intestinal tract do not need to be turned over. The knife is directly cut and hung blindly. Moreover, there

was almost no trace of blood on the wound.

The accuracy made Lao Wang's head afraid.

At the peak of his craft, he never thought he would dare to have such an operation.

He felt more and more dry inside, his tongue became more and more knotted, and his hands began to tremble.

In the curved tray near the operating table, the plates of the tuberculosis dish, which were filled with salad dressing, were carried down.

Itinerant head nurses should not only be responsible for these, but also wipe the sweat of doctors without touching the ground, and constantly compare instruments with instrument nurses.

Really, in the operating room, the atmosphere is serious but not tense.

Everyone knows what to do.

At this time, they didn't think much, so they thought about how to let the man finish the operation safely.

Chapter 928

It's hard to leave when the leader comes. These leaders also say they are tired and work hard on weekdays.

As a result, the superior asked them to deal with the problem, because the level of old man Wang's complaint was very high, otherwise several departments would not come together.

Since the superiors attach importance to it, these leaders can't jump on the way. Boil, half an hour, one hour, three hours. I don't know how many times my mother's bathroom has been running. The people in the monitor have been acting like a replay.

"How long will it take to finish?" A leader of the propaganda department really couldn't stand it, so he asked.

"This is just the beginning!" The president of the digital hospital whispered a reply.

"Well!" In an instant, the leader wondered if he would stop by to see his prostate?

Operating room.

The knife has moved, and the art must be finished! Zhang Fan's idea is not to do, to do the best.

This is the rule, this is his own rule, this is his own rule.

For doctors, the operation has really just begun.

The lesions in the abdominal cavity are like a basin of lotus pods magnified several times. Zhang Fan and others don't listen. The head nurse will change the biological tissue belt one time and the biological tissue belt one time.

Tuberculosis looks like a whelk, but its appearance is yellow, just like cheese.

And what's going on inside?

It's gray and white tuberculosis. If many people squeeze through acne themselves.

A pair of two nails, and then sniff, milk white mixed with a trace of blood came out of the acne.

It is easy to get addicted to this kind of thing, and the more crowded it is, the more it can not stop. Then, after a few years, the crater face and foundation are all more expensive than others.

It's not a matter of two fingers in the abdominal cavity. We should not only clear the focus, but also reduce the damage of organs, but also speed up the speed.

Even if you use chopsticks as a meat and vegetable clip, it will take a long time to finish it, not to mention this kind of thing.

Zhang Fan kept digging, digging! The precise technique on the surface of the organ is like a child eating Oreo's ice cream. It is quite accurate to dig all Oreo without a trace of cream.

The operation is too big. It takes too much time for Zhang Fan to finish it alone. He can insist, but the patient can't.

Therefore, Zhang Fan's first step is to dig and dig, and the remaining meat pit is filled by Ma Yichen and Zhao Quanping. How to fill it is to sew it.

Three people move very quickly in the abdominal cavity, three hands, the movements are unified.

Zhang Fan dug one, Ma Yichen took over one, Zhang Fan dug the second, and Zhao Quanping took over the second.

This operation focuses on the cooperation of a team and the efficiency of a team.

The difficulty of operation is not high, but it takes time. How to shorten the time and reduce the injury is the difficulty of operation.

Otherwise, the operation is perfect and the patient hangs up.

The sweat beads on Zhang Fan's head are finally more than the acne in the patient's abdominal cavity.

Lao Zhao couldn't hold on.

The wrinkles on the forehead above the mask are turning into a sand dog.

"Lao Zhao, you go down and have a rest. You'll go on the next round. Let my elder martial brother go. "

Then he glanced at Ma Yichen. Ma Yichen looked at Zhang Fan's young and tender face. Although he didn't speak, he made it clear that I could still fight!

This man is very strange. On the white and tender face of the pony, people can feel that the young man is energetic at a glance.

And Zhang Fan, if there is no sweat, is also a spiritual guy, but once there is sweat, he feels particularly tired.

Color is still very important.

In a few minutes, Master Zhang Fan was on the stage.

Master brother came up and took a look at Zhang Fan.

"Elder martial brother, the first removal of the lesion is over. You and Ma Yichen will definitely miss something if you continue the second time. I'm going to do orthopedics now. "

"OK!" Master brother doesn't talk much.

With the master brother, Zhang fan can rest assured. This is the difference between the director and the director. After all, the master brother has done many more operations than Zhao Quanping, and it's not pleasant to say. One is boiled out on the assembly line, and the other is adjusted by a famous teacher alone. There is always a difference.

There is no need to explain. Zhang Fan and master brother changed positions back to back.

You can't determine the number of abdominal lesions before laparotomy, but orthopedics is good. You can know where there are X-rays.

Tuberculous foci are densely distributed in the abdominal cavity, like meat insects attached to the surface of organs.

The bone is another form, because there are many blood vessels in the abdominal organs, that is, nutrition can be eaten anywhere.

Therefore, the lesions in the abdominal cavity also look soft and weak. You don't have to chew at all.

But on the bones, tuberculosis lesions are different. Just like the hives, they attach themselves to the joints and form a large lesion. Attached to the joint surface is a piece, and then it becomes smaller and smaller as it is farther away.

It's really about science.

In the abdominal cavity as like as two peas, a single hand tweezers, like a steak, a knife and a fork, really think about it.

Not in orthopedics. Lesions are like cement on bones.

Knives and forks are of no use to others.

On the bone, bone knife, bone file and scraper are necessary, and the general scraper is not enough. It must be made of manganese.

In the observation room, we finally found that there was a change in the monitor, otherwise we all thought the monitor was broken.

"Change. Change! " The leaders twisted their buttocks on the chairs and looked at each other as if they understood.

"Eh? Why did the doctor change to the lower position? Isn't he the main knife? "

The propaganda leader asked curiously.

The president of the digital hospital hurried to explain.

Lao Wang is really more restless than the leaders now.

Shame is humiliating in the system. In fact, it doesn't matter what you can do to me when you reach the status of others. It's a big deal. I pretend I can't hear it.

But not today. "Impulsive, impulsive!" Lao Wang felt regretful.

If there were only the leader of the Ministry of health, he wouldn't worry much, but today an impulse call was a little high-level, and then there were a lot of systems.

Looking at Zhang Fan in the monitor and Lu Lao, who is as stable as Mount Tai, his regretful teeth are almost broken.

Want to go, dare not go, suffering, really like a single baked on the fire, deeply afraid of baking and frying.

"No! Dr. Zhang, the patient's heart rate increased significantly and his blood pressure began to drop! "

Just as Lao Wang gritted his teeth and regretted pulling his hair, the anesthesiologist suddenly shouted to Zhang Fan.

With this sound, the quiet operating room and observation room immediately exploded like a gun battle.

Everyone else's heart was lifted. Although most people can't be called good people or bad people, they always want him to be better when facing the same kind, especially when facing the danger of the same kind.

So, a sudden alarm sound, let everyone's heart be!

Lao Wang also pained his head and his heart was in his throat. He stood up and looked carefully at the monitoring data on the other monitor.

Lu Lao also quickly looked at the monitoring data. At this time, the vital signs changed. It was really terrible.

This means that the patient's compensatory ability is insufficient.

Surgery, which was able to improve seriously in those years, is actually three elements.

Pain relief, anesthesia, infection.

In fact, these three points revolve around a balance, that is, to create a false environment for the body function and tell the body, don't be afraid, your baby is still the same as before, didn't open your stomach and cut off your intestines. We just touch you!

But bleeding, temperature and exposure of organs always make the body feel bad. This guy lied and said he didn't take off his clothes. As a result, he took off my underpants.

Can you bear it? Of course, I can't bear it, and then the body begins to have all kinds of abnormalities.

The brain can't control the body after being anesthetized. Once this false environment can't be maintained, it can't deceive the body. Various organs of the body began to think about how to make themselves look stronger.

The liver intercepts blood, the kidney intercepts blood, and even the heart itself dilates blood vessels to intercept blood.

Then, suddenly, there was not enough blood, the blood pressure could not rise, and the heart was worried. The commander of the brain drank flower wine and was unconscious. It began to make its own decision and jump!

Then the heart beat as if it were going to take off.

In fact, this is the simplest explanation, which involves many physiological and pathological changes, various factors, various hormones, what brain gut peptide, what nitric oxide, what angiotensin, especially complex.

Especially in this state of stress, you don't know where something will happen.

Just like when people are nervous, the urethral ring muscle will relax and urinate automatically. At this time, maybe that organ will bleed because it is too nervous.

Therefore, this moment is very dangerous in medicine, also known as shock, also known as functional collapse.

Zhang Fan has just picked up the axe. The patient's body has egg fibrillation. I don't know. Anyway, Zhang Fan has egg fibrillation.

During the operation, this kind of shock without obvious inducement is the most dangerous. The doctor doesn't know which piece to move, which makes the body have this kind of problem. It's different from bleeding.

The abdominal cavity is open and the bleeding is blocked, and this is really tricky.

"Come on, stop, gauze, salt water warm gauze!"

The Ba Yin studied is really different from the previous Ba Yin.

If in the past, Bayin would not know what to do at this moment.

Now, when the anesthesiologist called the police, Bayin had begun to infiltrate the gauze.

This is a team, this is the quality of a team.

Really, a little less, a little less. In normal times, it has no impact at all, but once there is a problem, if it can't be stopped at one point, the whole army will be destroyed.

Gauze, a large number of gauze with temperature, like express packaging, tightly stuffed all the opened organs of the patient.

"Come on, let Secretary Ren..." Zhang Fan forgot what he was worried about. Lao Ren went to the meatball country.

What now?

Zhang Fan must give orders at the first time.

Chapter 929

Doctors, doctors also pay attention to a Mount Tai collapse in front of the same color. This is absolutely no exaggeration.

The training of medical routine is to impart basic knowledge to doctors in school.

From the beginning of junior year, students will be allowed to go to the hospital for internship, then practice in the fifth year, and Practice for another year after graduation.

Three years of clinical participation is often to train doctors to give full play to their knowledge in a special environment.

Many doctors, you let him sit on the bench and make a cup of tea. Let him say that if there is another beautiful woman sitting opposite, it is estimated that his knowledge can be compared with that of top professors. From the most basic to the most cutting-edge, he has covered a wide range. It seems that he knows everything related to people. Can tell you the truth.

It seems that not giving him a Nobel Prize is sorry for his knowledge.

But when faced with special circumstances, such as the patient's sudden near death state, his mind is like paste, and all the basic and cutting-edge technologies are forgotten in the Atlantic Ocean. He must have said in his heart, where's my director!

This is no exaggeration, so modern medicine, especially when recruiting personnel in hospitals, will say that this is a mature doctor.

Don't you have to cook when you're not mature? I'm not afraid of cooking, but it's too difficult to cultivate.

When the patient's life state is facing collapse, an entire human system appears in Zhang Fan's brain in an instant.

"What's wrong with the heart, blood vessels, nerves and organs."

Sometimes the human body is really fragile. When you open the abdominal cavity, you involve other people's intestines. If you pull a little harder, it will also be unhappy.

Open the abdominal cavity, the temperature drops, and it will be unhappy. If bacteria appear after long-term exposure, it will also be unhappy.

Anyway, just like women in their physiological period, you don't know where you have provoked others.

However, there is always something wrong or not considered. But people just don't tell you. You have to guess. If you guess correctly, maybe you can't guess. Well, most men understand.

All the experts in the observation room began to think about it at the same time. In the originally quiet venue, everyone discussed with each other.

"Insufficient blood volume?"

"No, Dr. Zhang's operation is still good, with little blood loss. It should be the lack of stress response control. "

"It's not right. Look at his technique. It's quite accurate. He's ready for the three flavors of Qiu's Sabre

technique."

Lu Lao also thought again, what's wrong.

All this happened at the same time. And Zhang Fan has no clue now.

He was already cautious about this destructive operation. Unexpectedly, there was still a problem.

"Open all the venous channels that can be opened."

When you don't know what to do, first prepare various channels for the patient!

This sentence was said by Lao maozi's surgeon in his early years.

Don't look at the old maozi's coarseness. He holds out his hand like a hairy bear, but in the overall view, he is definitely not a strong country.

The head nurse quickly opened the passage on the patient.

When the operation stopped, the doctors were as careful as thieves not to touch the patient's organs. The doctors on the operating table were like devout believers, hoping that the body could relax a little.

Old man Wang didn't say anything schadenfreude at this time. He's not stupid. When you see signs, you can make trouble. When something happens, you must not make trouble.

"I think we should let the experts in our heart help. Why didn't we get ready before the operation!"

The tone seemed to be a pity, but the layman didn't understand. The leaders frowned as soon as they heard it.

I guess I'll have an operation when I'm not ready!

As for technology, they can't understand the technology in front of Zhang Fan.

This is the result theory. Many non-technical leaders look at the results.

It sounds utilitarian, but it's better than saying nothing.

Zhang Fan's early operation convinced many people, even Xia Lao's female doctor was convinced.

They have been partial to scientific research since their undergraduate course, and then master and doctor. Although they are the first person to transplant in China, they actually prefer internal medicine research.

So, don't look at her skill. Let her have an appendix. It's estimated that Lilly can't do it.

However, if we talk about the mechanism, each of the old Xia's students is someone else's opponent.

At that time, when Xia Lao asked the female doctor to assist Zhang Fan, Zhang Fan didn't think it was necessary, and the female doctor thought that Zhang Fan was just like that.

Although they don't despise each other, they still have a feeling that they don't look up to each other.

As a result, Zhang Fan's early operation was quite good. She couldn't do it herself, but she still had some vision.

When the anesthesiologist called the police, she got up immediately, said a word to old Xia and went directly into the operating room.

Zhang Fan thought again, whether to use cardiotoxic diuresis or coronary vasodilator.

The effects are the same, but the mechanism is different.

This thing can't be said to be a mechanism. Internal medicine is troublesome. Here's the trouble. If you want to talk about the mechanism, you should start with cells, and then set up embryos through physiology, biochemistry and pathology.

Therefore, now most surgeons only know what they use and don't know why. That's why physicians despise surgeons. In other words, surgeons don't know anything!

Old Xia's female doctor Zhao Yanfang is in her early thirties. She also has a story.

From the first year of undergraduate, I fell in love with a male classmate in my class.

Xueba is different from ordinary people. Other people's love affects their studies.

But she is different. She not only doesn't affect her studies, but also supervises her boyfriend. She can get a scholarship from time to time. She is such a good woman.

After graduating from college, she got a master's degree. Her boyfriend didn't get a master's degree, so she worked. If you don't get a master's degree, you become a master's degree.

After the girl and her boyfriend graduated, one was in the unit and the other continued in school. Pretty good, too.

As a result, after working for a few years, my boyfriend felt that going to master's degree was meaningless and had no sense of achievement. After lying in bed, just like students at school, they listen to their girlfriend's class.

Then it was gone. Then her boyfriend married a little girl with big legs.

In the end, there are no big long legs in class!

She was also delayed. She became a doctor, and it was even harder to find someone.

Therefore, she is hostile to male doctors, especially young male doctors. She always thinks that male doctors will like girls with long legs and black silk stockings. When she opens her mouth, she will be coquettish and call her father.

But seeing Zhang Fan's level, she felt that the doctor should not be, otherwise he would not be so young and skilled. She still had some vision!

People are so strange. If she doesn't like her temperament, she will never come out. She will be reserved and wait for people to beg her.

But when she saw Zhang Fan's level, she felt that he was also a superficial person who was obsessed with learning and didn't like black stockings and long legs.

So, without anyone saying anything, she went into the operating room.

"Try diuretics!" Zhang fan can only think about this in his heart and can't say it.

When I was about to say furosemide, when I just said furosemide.

Zhao Yanfang entered the operating room: "if you want him to die quickly, use furosemide! The potassium ion is abnormal. Do you still use furosemide? "

Although the words are mean, they make sense. Zhang Fan, they use this medicine, just give it a try, hit it in a little to see the effect, and change the medicine if it doesn't work! This is actually how surgeons use drugs.

A rhetorical question, a typical rhetorical question, is like a policeman questioning a thief, a teacher questioning a student, and a wife questioning a husband who came back with long hair last night.

Toe high, arrogant and condescending, not the queen is better than the queen!

The mask and hat covered her face, otherwise it would be a cold face.

She thinks highly of Zhang Fan, not what kind of person who wants to develop the relationship between men and women, but what kind of person who seems to find the same kind, but she still can't avoid the mentality of comparing with others.

Also a strong man!

With that, Zhang Fan was stunned. One of the surgeons on the operating table was stunned. Even the anesthesiologist was stunned.

In the basic Department of medicine, it is roughly divided into clinical, anesthesia, Stomatology, pharmacy and public health.

This is a discipline that goes hand in hand. No one is better than anyone.

Clinical doctors are so-called big clinicians. Both women and children inside and outside are capable. In the past, they could do anesthesia.

But I can't do dentistry because people's oral cavity has become one early.

Anesthesia was separated relatively late in China. Although it was in the operating room and he was asked to engage in surgery, it was estimated that he could not do it, but there was no problem in letting others engage in internal medicine.

Therefore, when Zhang Fan said furosemide, the anesthesiologist actually thought so. As a result, no one refuted and mocked.

His mind will be full of mechanisms, all kinds of mechanisms.

Zhang Fan is different. As soon as people say it, they react immediately, "Oh, it's not appropriate to use furosemide now!"

"Listen to me, six channels of vein are open!"

"Open!"

"OK, you can't take it off if you continue the operation. Now I use medicine to maintain it. Is two hours enough? "

In a cold voice, Zhang Fan is almost crying. It's too timely. Two hours, he's done enough.

The elder martial brother was also excited. He knew that his younger martial brother would have finished the operation in two hours.

This is an awesome man. He has the ability! It's right to look down on you.

Within a few minutes, the patient's life was stable.

Zhang Fan and his men rushed to battle with axes, axes, knives and forks.

On the joint, Zhang Fan's bone knife was connected to the focus of tuberculosis. The hammer clattered several times. It seemed that the patients were beating on the bed!

How to describe this focus at the bone and joint. It looks like the white sugar wrapped in peanuts that everyone ate in the early years. It's a little rough, and its hardness is similar to that of low-quality cement.

And inside, it's like the milk that children spit out when they eat too much, piece by piece.

Bang bang, the tuberculosis on the patient was cleared by Zhang Fan one by one.

The patient's vital signs have been stable from beginning to end. Even Zhang Fan's vigorous efforts to remove joint lesions have not worked miracles.

"That's awesome!" Zhang Fan looked at the monitoring data as steady as an old cow, and his heart was almost full of admiration.

"Better than Secretary Ren! Better than your one!" Wang Yanan glanced at Xu Xian playing with snakes.

Xu Xian skimmed his mouth!

Chapter 930

Many times, not only books or films, but also experts and scholars are easy-going. He has a good temper, speaks well and has a kind attitude.

In fact, talking to most experts can really make people feel inferior. There is absolutely no sense of approachability.

It would be nice not to be domineering!

After all, learning is not business. Of course, Zhang Fan is so kind. It is estimated that he did business in those years. Although the business is small, he was once a businessman today!

Clearance, from abdominal cavity to joint, from joint to craniocerebral injection, finally, more than seven hours, under the alternation of two rounds of doctors, the patient's focus was finally cleared.

The patient's state, when opening the abdominal cavity and joints at the beginning, was like measles, full of flesh pimples and white sticky phlegm.

There is no ruddy feeling.

It seems that most people can't understand this situation. In fact, it's very simple.

Older people definitely feel it. Young people follow their mother to the vegetable market.

Just like the meat in the meat case, where is the fresh meat? Although it's bloody, it just gives you a feeling of red and fresh.

But if it's frozen or sick, it's definitely a feeling that can make you sick and repulsive.

Now, in the abdominal cavity of the patient, a belly of black silk thread is like countless patches, and the joints of the body are like wearing a rotten autumn pants, with holes everywhere.

However, at this time, it will only make people feel full of a sense of life, full of a sense of brightness, and there is no disgusting state.

"Is the operation finished?"

The leader of the Publicity Department asked in an uncertain tone.

"It's done. It's done. The lesions have been cleared up now. The patient's life state is particularly stable. As long as he recovers, he can do transplantation. "

"Oh, it's successful?"

"Succeeded!"

The leader didn't know whether to celebrate his ass or the success of the operation. His tone was full of joy.

In the operating room, the doctors were not as excited as they thought. They couldn't move. Their legs were straight for seven or eight hours.

Especially Wang Yanan, the girl did physical work. Really, she felt the meat on her thighs trembling slightly.

"Give me a mouthful of glucose, I can't help it!"

After the operation, the focus was cleared, but the patient's whole body had to be sutured. Now the operation is the final conclusion. I have to continue to work after drinking sugar and salt water.

When holding one breath, when the patient is dying, he doesn't feel tired at all.

At this time, one is counted as one, as if it suddenly softened.

Zhang Fan hardly spoke before and during the operation. When the team pulled out for the first time, it encountered such a big operation, and there was a situation that could scare people to death during the operation.

But everyone insisted. No one fell off the chain, so I was really glad that my efforts were not in vain.

"Everyone is tired. After the operation, I'll treat you to a big meal! Choose good food and expensive food. We'll eat whatever we want. "

"Ha ha!" Lao Zhao and master brother smiled.

Wang Yanan glanced at Zhang Fan and thought, "it's too stingy. Everyone's legs are straight. What can you eat at this time!"

Others, such as Xu Xian and Xue Xiaoqiao, didn't care and didn't speak. It's tiring to do such a big operation, but my heart is still full of a sense of achievement. As for eating and drinking, they don't pay much attention, and they are not as selective as Zhang Fan.

Only Bayin was excited“ Zhang Yuan, Zhang Yuan, let's go to Wangfujing, let's go... "

After Zhang Fan finished, he looked up and wanted to invite Zhao Yanfang. Zhang Fan wanted to blend with such a powerful man. Just about to speak, the man said, "hurry up! I have to prepare the transplanted data! "

"Well!" Zhang Fan is embarrassed to open his mouth. It sounds like he's a little low-end!

It's easy to cut, but it's slow to sew, layer by layer, just like a thousand layer cake, needle by needle.

In the observation room, Lu got up. The old man supported Zhang Fan on the platform for seven or eight hours. He really couldn't hold on.

He stood up, Lu Ning quickly helped him, and then the old man glanced at Lao Wang's head.

"Still young!"

After saying nothing, Lu Lao left!

Lao Wang doesn't even know what to do with his red head! Others laughed and said, "yes, still young!"

The operation is over.

The patient was pushed to the ICU. Zhang Fan lay on the ground of the operating room and gave a comfortable groan.

Not only him, but the young doctors lay in the operating room in disorder, and no one said anything about them except Lao Zhao and master brother.

Because they are qualified!

Outside the hospital, it was not long before Lu's disciple had an operation that everyone couldn't do. The news was extremely exaggerated.

Especially some so-called circles.

"Hey, you know, I heard that a super cow doctor came to the digital hospital!"

The capital has many meals and gossip, all kinds of meals and circles.

And those who talk about this kind of thing are elderly people. Younger people generally don't care about it.

Gossip, some when chatting, some in mind.

After enough rest, comfortable lying and soft waist, Zhang Fan and them went out of the operating room and changed their clothes.

"Let's go and have dinner. Let's choose something good to eat!"

"OK, save you a meal. I want to sleep and have some instant noodles!"

Xue Xiaoqiao didn't even want to go back home and didn't want to go any further.

"No waiting after expiration!"

"BUCKLE!"

Wang Yanan whispered that since she recognized Zhang Fan as a teacher, she had dared not laugh at

Zhang Fan openly.

This also makes Zhang Fan feel very good! It's not good to be laughed at by Shaohua's best friend!

Although everyone said to eat instant noodles, Chen Sheng had already prepared them for everyone. In the hotel, Chen Sheng walked around the lobby like a watchman and a woman.

"Yo, yo, yo, I'm back. I'm back at last." People don't need to ask more. They can know that the operation was successful by looking at everyone's face.

"Quick, quick, quick, first drink tea to moisten your throat, and then drink some soup. The beef soup is a little salty, just to add some salt to everyone.

I don't know when you'll come. It's noodles in sour soup. Drink some soup, eat a bowl of noodles in sour soup and have a good sleep! "

Don't worry about Zhang Fan. People think very carefully inside and outside.

After all, he was also a doctor. He knew what Zhang Fan needed most at this time.

The patient's focus was removed. Then he waited for recovery and prepared for transplantation. If Xia didn't say he wanted Zhang Fan to help, Zhang Fan didn't want to go. Because the transplant operation is not difficult, the difficulty is after the operation.

While Zhang Fan was resting, someone found a relationship and wanted to know Zhang Fan.
