

Chapter 931

To tell you the truth, it would be too simple if you wanted to find someone to know Zhang Fan in the devil. Each hospital has its own elder martial brother and the so-called elder martial brother Tang. Anyway, among the disciples of the ancestral sect, Zhang Fan is the youngest third generation.

But in the capital, it's really difficult to find someone to know Zhang Fan. Generally, people who can get this kind of news are people with status. People will never come to the door and say, "I'm so and so or my father is so and so. In other people's words, I'll lose my share."

Why is it difficult? For example, after this operation, if you are in a hospital in the south, it will be great. After the operation, you go out of the operating room. It is estimated that the doctors have to line up to pay attention to Zhang Fan's team.

But here, everyone is on the card. Although he has recognized Zhang Fan's status in his heart, he wants others to guard at the door, or let others hurry to contact and take the initiative to send business cards.

Therefore, even if someone wants to know Zhang fan through the hospital, it is estimated that others will not take the initiative to interrupt. No, some people start all kinds of relationships to see who comes from tea. It's always in the south, otherwise it's estimated that Lao Chang will change his mobile phone again. Because the tea element is too small, too few people go out.

Wang Mingfa is a little confused these days. Because the meal appointment is a little special.

Wang Mingfa was the regional manager of youtongzi in the frontier. After encouraging Zhang Fan to go to the chieftain tribe, this guy talked about a big natural gas and developed at once.

Not only did he abduct the little nurse from the Municipal People's Hospital, but also he was promoted because of the credit of the municipal hospital. He is the sales boss of oil barrels in the north. If the division of levels is rigid, it is estimated that there will be a deputy ministerial level.

It's worth a desperate trip that year. The blue sky card he gave Zhang Fan is still easy to use. The discount for refueling is too cheap, and the winery owner is envious to death.

It's not that people can't afford any gas money. It's face. How awesome it would be if you took out the

blue sky card in front of a group of businessmen with similar status and the staff of the gas station served with respectful hands.

Zhang Fan doesn't care about face. He really cares about the oil money. With his words, saving a little is not at all.

Really, Jia SuYue didn't wrong Zhang Fan, really stingy!

He got promoted and made a fortune and married a young nurse. Lao Wang was still proud. Touching the satin skin, sometimes he would think of Zhang Fan.

These days, he is a sugar peddler who doesn't have much contact with oil and gas. Don't underestimate this sugar, which has been forced by China in recent years.

In the early years, these things were all strategic materials. People's sugar traders were not simple sugar traders, but almost judged the sugar industry in half of Asia. They were very powerful.

"Why did the sugar King contact me? He also entrusted Lao Chen of the minzong Committee. "

The young wife's face is full of collagen. Every time he looks at it, he can't help pinching it. It's too tender, just like a ripe peach.

"I don't care why people contact you. You should drink less wine then. I don't expect you to get promoted and get rich, as long as you are healthy and can take care of yourself. I want to spend more years with you. Look, your stomach has come out again recently. Don't eat these nights. Drink some milk! "

The young wife said a few words. Lao Wang wanted to shout: I want to live another 500 years!

When I brought the little nurse to the capital, many people were not optimistic about them. They all said that Lao Wang and the little nurse would break up in a few days, because the status gap between them was too big.

The little nurse will definitely be abandoned! Sharing some money is the best ending. Although the people who say this are very sour, it seems that this is the world.

As a result, the couple's crossing is better and more enviable. Really, when Lao Wang was able to take people away, the girl's EQ was definitely not comparable to that of ordinary people.

.....

After Zhang Fan finished the operation for the unknown patient, he went back to the hotel and wanted to return to the tea vegetable. Everyone was eager to return. Finally, Zhang Fan also had a privilege and was ready to let everyone play in the capital for three days before going back. Anyway, the tea vegetable had Ouyang and Lao Gao, so he didn't have to worry.

The next day, Zhang Fan and a group of colleagues went to the street. In particular, several women, dressed in colorful clothes, are deeply afraid of being said to come from the countryside.

The national flag is raised at Chengtian gate and porcelain is seen at the Forbidden City! In order to settle the expenses in the hospital's account, Chen Sheng specially set up a patriotic education.

Just when Zhang Fan felt patriotic education, the Ministry of health organized experts in the capital to a seminar on the next treatment of unknown patients.

Zhang Fan was also invited, but Lu refused " You are still young. Such meetings will be held in a few years. "

Zhang fanle's freedom, in fact, the old man is ready to get angry.

As a result, everyone expressed their own opinions at the meeting. Lao Wang wanted to humiliate Lu at that time, but he exposed himself. Therefore, at this partial internal medicine meeting, he wanted to find the person he had lost.

It's not really a fierce opponent! He said it the longest at the meeting.

Lu always pretended not to hear, and there was no special expression on his face. Lao Wang glanced sideways and thought, "what if the operation is done well? Don't you want me to formulate follow-up treatment?"

After everyone expressed their opinions, the leader of the Ministry of health who presided over the meeting said politely to Mr. Lu: "academician Lu, you can also say a few words!"

This is polite, because the recovery of patients in the later stage is really partial to internal medicine.

Some people are shameless, but old Lu usually pays attention. Unlike Lao Wang, surgery can't go on, and finally went to internal medicine.

"Since the leader asked me to say something, I'll say something!"

Lu Lao smiled.

The leaders of the Ministry of health were a little surprised. Lao Wang felt a little bad, but this kind of venue was his home, and he was not afraid.

"I don't boast when I come to medicine. Although I haven't made any great achievements, I can always call it a bit of a burden! Originally, the risk of the medical industry is great, and everyone's usual pressure is almost to the threshold point. "

When Lu Lao said this, many experts nodded at the same time. This is the actual situation.

The effect of health care reform in all walks of life in China is the worst. This is what elder brother Rong said himself at that time, and everyone knows it deeply.

The leader of the Ministry of health can't sit still. You're talking about it here! He was about to step in.

As a result, Lu Lao changed the topic and continued: "medical treatment is a cause for everyone to work together. Even if you have great skills, you can make a few nails. However, some people, who don't say anything about the dead, have to pull other people's hind legs and suppress the young people for fear that the young people will surpass him.

When the country needs me and my students, I can guarantee that I will absolutely ignore personal honor and disgrace, and my apprentice and students will absolutely ignore personal honor and disgrace.

However, if you are threatened by others and oppressed by others openly and secretly, I will advise you here without naming names. I am not scared! "

As soon as these words came out, the experts in the venue were in an uproar. What's the name? It's all spread in the high-end medical circles in the capital. At that time, some people said that old Lu had a good temper and didn't slap old Wang.

As a result, the old man is waiting here.

Lao Wang was as stunned as if it were thunder! He used to talk to old Lu, but old Lu never got into trouble, so he felt that a gentleman could be bullied. As a result, I don't know why, old Lu's hair soared this time.

And it's crazy to tear your face.

The leader of the Ministry of health sat firmly on the sofa, picked up a white porcelain teacup, drank tea, and looked at the meeting minutes recorded by the officer in his hand, as if he hadn't heard Lu Lao's words.

In fact, his ears stand like police dogs. He wanted to kill one on the spot!

"Oh, I'm sorry to say rude words! Let's be more considerate. Through this meeting, I'll finally tell some people a joke.

It is said that there are a group of robbers who enter the bank to rob. The first sentence when they

enter the door is that money belongs to the state and life belongs to themselves. Lie down for me. "

Lu Lao told jokes at the meeting. Everyone knows that Lu Lao has something to say, but the robber seems to go a little far.

After taking a sip of tea, old Lu continued, "when everyone was lying down, the robber saw a female bank employee in a skirt lying in a big shape on the counter.

The robber said, "please be civilized. We rob money, not color (a)" "

After saying that, everyone was still remembering the meaning of the old man's words. As a result, old Lu continued: "people who are robbers know to abide by their professional ethics and know that they can't do what they shouldn't do!"

Old man Wang's face is green! How bullying! Old man Wang has tears in his eyes!

.....

Wang Mingfa, confused, left at the invitation.

In a so-called private restaurant, the director of the minzong Committee took Lao Wang's hand and said politely, "I'll introduce Mr. Wang, boss Yang of Malaysia, a sugar Tycoon!"

Many units, such as what, actually have nothing to do in a day. They just have a relationship with people.

It looks like Qingshui Yamen. To be honest, it's really hard for ordinary people to enter.

Lao Wang smiled. The young man with a slightly brown face in front of him said, "young and promising. Boss Yang's business is all over the world. It's very enviable!"

"Hey, you're welcome, Mr. Wang."

After a little greeting, several people ate and drank without mentioning what they were doing. Lao Wang remembered his wife's words, didn't drink much, and the dinner ended quickly.

When everyone ate and drank well and led out, the boss Yang smiled and handed a brocade box to Lao Wang, "I know you love reading, and there's nothing to give you. Even if Jinxiu adds flowers, I'll give you a bookmark!"

Lao Wang took it in his hand and knew at a glance that it was a popular bookmark made of pure gold recently. He didn't like reading. It's estimated that he hasn't read for many years.

He was deeply afraid that what others asked for would be difficult for him, so he said, "Oh, do you spend

forty-eight? Recently, he has less eyesight. He doesn't read much!"

He didn't say he didn't read or read, so he waited for the other party to speak.

"You are too modest. I heard that you have served in the frontier and have a good relationship with Dr. Zhang Fan. I have no other meaning. I just want to ask you to invite Dr. Zhang Fan!"

As soon as Lao Wang heard this, the brocade box in his hand was secure“ Zhang Yuan is in the tea house. This meal is a little far away! "

"No, Zhang Yuan has come to the capital!"

"Zhang Yuan has come to the capital?"

"Yes, I still had surgery in the digital hospital yesterday!"

As soon as he said this, Lao Wang immediately smiled and said, "don't worry, boss Yang. As long as Zhang Yuan hasn't left, I'll definitely invite you out.

Others dare not say. If there is delicious food, Zhang Yuan will definitely come! Just wait for my good news! "

Out of the door, Lao Wang quickly called his wife: "Zhang Fan has come to the capital!"

Chapter 932

Wang Mingfa's words and a phone call brought confusion to the two people.

In a word, Zhang Fan was delicious, which made the huge boss Yang think about it. He couldn't take out the originally prepared gift. If Zhang Fan knows, he doesn't know if he will shout. It's a pity.

The so-called delicious food is not to find a higher grade, find a club and arrange several models to solve things. It must be superior in diet. In fact, Zhang Fan wants to be high-end.

Zhang Fan has a heavy workload and consumes physical strength, so in Lao Wang's opinion, he can eat and say it's delicious. First, he has a close relationship with Zhang Fan, and second, he is also a little elegant. It can't be said that Zhang Fan eats a lot.

But in his opinion, Zhang Fan really has no hobbies.

A phone call brought confusion to his wife. When she was in the tea vegetable hospital, she stayed up late and was on duty. Sometimes she was very busy.

After 36 hours, the skin can be peeled off, and the increase of wrinkles makes the little girl several years older. In those days, I always dreamed that I could find a slightly richer husband or a husband with a little energy, so that I could change my job at that time.

As a result, I didn't expect that now it can be regarded as financial freedom. I get up, cook with an aunt, clean up the house with a nanny, and I'm responsible for being as beautiful as flowers. It's really something I didn't even dare to think about before.

Moreover, I used to be a little nurse. When others are polite, they call me a nurse. If you're not polite, they say: Hello! Injection.

Now, my husband and colleagues invite me to dinner. After my sister-in-law's former sister-in-law, my sister-in-law's skin is so beautiful!

It's really a human feeling. But people are like cheap leather. They used to dream of leaving their jobs. Now they often return to the hospital and their posts in their dreams.

It's also very clear. How to thread and how to hand over the scalpel are clear in the dream.

After waking up, I will laugh at myself.

In fact, it's false to say that she doesn't miss. She was tired in those years, but it can be full and exciting. In addition, there is a sense of achievement that others can't curry favor with now, but it's estimated that she won't go back if she really goes back.

When her husband called and said that Zhang Fan would come to the capital and invite Zhang Fan to dinner, she was worried.

Colleagues in those years, colleagues in dreams! Holding a jewel necklace as big as a water blue pigeon egg, wearing dazzling platinum diamonds, wearing an evening dress that shows an extraordinary figure, and then wearing Rhinestone high-heeled shoes inlaid with a shoe Bangzi, a lady's posture appeared in an instant.

Then she kept making gestures in the mirror. She said to herself, "what's the matter with me?"

Yes, looking at herself in the mirror, she feels so strange.

Then take off the expensive decorations and change into a white shirt with a trace of lace at the collar, which shows a slight temperament but not monotonous. Then put on washed blue jeans, glass transparent silk stockings on your feet, and change into an open high-heeled shoe that is neither high nor low.

Then draw a light makeup slightly! It's still the nurse of that year, or the nurse who rushed to the front line to save the lives and heal the wounded. It hasn't changed in my bones!

.....

"Zhang Yuan! My old Wang, are you busy? I'm in tea. Please treat me to dinner. "

Lao Wang hung up his wife and called Zhang Fan.

As soon as Zhang Fan heard it, he knew that Lao Wang was picky.

"Mr. Wang, please don't tease me. We are here for surgery this time. There are many people in a team, so we have no good intention to disturb you. My fault, my fault, brother, don't be angry! "

"Ha ha, I know you're busy. I heard you didn't call you until you were busy. I knew it when you came to the capital. My wife knows you're coming. She's going crazy.

Don't arrange in the evening. I'll greet our tea vegetable people! No matter how many people, the more people Zhang Yuan brings, the happier I am! "

Lao Wang entered the house and thought about how to persuade his wife to keep a low profile on the way. According to his idea, if he didn't have his career for decades, he would show off in front of his former colleagues. It's absolutely impossible to travel in royal clothes at night without returning home. You should show it a little.

But Zhang Fan is not an ordinary person, not an ordinary doctor, not an ordinary frontier president. He has to keep a low profile. Although he dotes on his young wife, he still has to say.

As a result, when I entered the door and saw my wife, I was often as moved as I was in those years. Just like holding his arm and shouting anxiously, "are you okay, are you okay!"

His heart is soft! The more I feel I owe someone else! The more I feel that such a big Begonia flower is a little unworthy of others.

This is the master!

Inside the Forbidden City, Zhang Fan was bored. There are so many people. He can't see how valuable the things in it are. That is, some pure gold things are very attractive!

As an aborigine, Xue Xiaoqiao took a group of people to show off in the Forbidden City as if this was his family.

A group of local goods have never seen the world, "God, this plate can be worth tens of millions!"

"God, look, look, this stick is inlaid with so many precious stones. My God, such a big gem!"

Bayin's saliva is about to flow out. Looking at others' ruyi, he wants to break off the gem.

Zhang Fan realized that he was a layman. Unexpectedly, these people were not elegant.

I've been wandering all day and my legs are thin. I'm not so tired after the operation. Fortunately, Lao Wang's phone saved my life.

"Well, well, hurry back to the hotel to clean up!" Zhang Fan hasn't finished yet.

Some ladies are not happy " Zhang Yuan, we haven't visited the mall yet! "

"Yes, I'm going to buy clothes."

"The last time I came to study, I didn't turn around the capital!"

I don't know what's the difference between men and women. Don't their feet hurt and their legs sour?

It's really going to kill me!

"OK, OK, there's still time tomorrow. You can go shopping by yourself then. Wang Feng, remember? She and her husband are going to invite us to dinner! "

"Wang Feng? Wang Feng, who used to be in the operating room? " The head nurse asked.

"Yes! Which Wang Feng do you know in the capital! All right, hurry back! "

It's really painful. Back to the hotel, Zhang Fan feels that his feet are one size bigger.

If shopping can make anything bigger, it is estimated that men will fall in love with shopping!

In the hotel, several women cleaned up after taking a bath and muttered, "head nurse, is it OK for me to wear this? Will Wang Feng look down on us?"

"OK, do you want to go out and buy a fur coat now?" The head nurse glanced at Bayin.

The head nurse said this in her mouth. In fact, she also cared about it in her heart. She was afraid of being despised by Wang Feng, who became an official wife. There are comparisons between people. In those years, the three of them followed Zhang Fan out of the country.

It's only been a long time since things have changed.

Wang Feng and Wang Mingfa were invited by the two kings. They didn't go to the legendary private club, so they made an appointment with a big box in the roast duck restaurant. The 10-year-old roast duck is still very famous. Lao Wang of this box was booked only by relationship.

Lao Wang asked a bus from his unit to take the couple to the hotel to pick up Zhang Fan and them.

As soon as they met, the head nurse's worry and Bayin's worry completely disappeared. Wang Feng was still Wang Feng.

Now, excited, the three women's excited tears came out. Hold together, jump and shout! I don't know how to express my emotions.

Wang Mingfa looked at his wife and greeted other doctors with a smile.

There was no complaint on the phone. After seeing the face, Lao Wang began: "I don't contact my old brother when I come to the capital. Hey, I'm sad!"

Zhang Fan bowed to make amends.

In a few words, the strangeness that Lao Wang had not seen for a long time suddenly disappeared.

This is a real skill!

Zhang Fan didn't eat a few hundred ducks. How to say the taste? It's not as delicious as the legend.

Wang Feng, who doesn't let her husband drink, is drunk! Bayin was also drunk. The girl's loud voice let the people in the capital see the boldness of the frontier people. At first, Lao Wang didn't drink much wine because Zhang Fan didn't drink.

As a result, Lao Wang let the head nurse and Bayin give him a lot " You can't bully our Phoenix. You know, our Phoenix is the most beautiful in the hospital. It's a hospital flower! "

This is the feeling of colleagues, which can only be cultivated in countless rescue efforts.

Before Lao Wang got drunk, he explained the business to Zhang Fan. He meant to go if you want. Don't

force it. I have an average relationship with each other.

It is estimated that this is Lao Wang. This is the face of a bureaucrat. I promised with a pat on the chest, and I didn't forget to be a good man here.

One advantage sells two. The old man has really read through the three flavors of the workplace.

Zhang Fan also agreed to the invitation. Anyway, I don't go back these days, and others don't ask him for a note. It's great to see a doctor and have an operation. There's nothing to hide.

The next evening, Lao Wang came to pick up Zhang Fan with a black Mercedes Benz.

"I'll go. The leader is the leader. This treatment!"

Zhang Fan laughs at Lao Wang.

"Hey, it was made by the owner. He's waiting at the hotel! "

The party took a car and set off towards their destination. In the capital, not all Hutong yards can sell tens of millions according to the land boundary. But this time when we arrived at our destination, Zhang Fan, who has little insight, knows that this place is not simple.

There are two lions at the door. One lion has a little lion in his mouth and the other one has a stone ball. He doesn't know what to pay attention to or how to put it in.

The vermilion gate gives people a sense of style. The huge palace lantern has been lit up. At the door stood a young man who looked less like a Chinese.

Lao Wang introduced to Zhang Fan: "this is boss Yang!"

The young man hurried up and held Zhang Fan's hand. "It's a pleasure to meet Zhang Yuan. I've heard a lot about you. I'll prepare a simple meal today. Please forgive me if you don't arrive!"

Zhang Fan is embarrassed to speak Mandarin. The door only knows that the yard is awesome.

After entering the door, the garden rockery inside is particularly unique, especially the orchids in the flower garden. It is estimated that Zhang Fan's cool Luze can be changed, but Zhang fan can't recognize it. He thought it was morning glory!

There were women in court clothes shuttling through the yard. Suddenly, they didn't know that they had entered the palace!

Chapter 933

Zhang Fan and others entered the restaurant. To tell the truth, most people don't understand the furnishings inside. For example, the word "Fu" imitated on the stone screen after entering the door is said to be the second piece written by pockmarked son in those years, which is a pair with Lao Yu.

However, in the eyes of Zhang Fan and his gang of young people, the word "Fu" has not attracted the eye with the jade stone base under the word "Fu". This kind of inside information is also displayed to the blind.

I don't know whether it's the drums from the Han Dynasty or the Tibetan temple from the distance of the restaurant. In the sunset, in the super metropolis, there is really a kind of quiet like coming out of the dust. A morning bell and evening drum can make people feel really peaceful.

Originally, when Wang Mingfa said that Zhang Fan was delicious, the sugar tycoon thought of a way. There was a paragraph saying that as long as you have money in the capital, you can't do anything. For example, replace the photos of the city tower with those of your grandfather.

Although it is a joke, it also shows that the city is rich in resources!

Boss Yang finally found the cook after spending a lot of money. It is said that his ancestors have served the emperor in the imperial dining room since the Ming Dynasty. I don't know whether it's true or not.

However, the number of seats received by others is several every month, which is definitely less than the number of days in the current month. If there is no money, let alone play with a status and identity.

After entering the restaurant, the furnishings inside were really antique. There was a pair of couplets in the yingmen nave. The handwriting was scrawled. Even a group of doctors were ashamed. Zhang fanleng didn't recognize a word.

However, the traditional Chinese painting in the middle of the couplet is like an old man and a stubborn donkey with a bee stung and swollen forehead, as well as two boys. Zhang Fan estimated that he should be the birthday star, because he didn't know the couplet and didn't dare to say, for fear of shame!

According to people, this painting is the masterpiece of Shangguan Zhou. Whether it's Shangguan Zhou or Shangguan Zhou, for Zhang Fan and them, um! I don't know.

Into the private room, mahogany tables, chairs and benches, all kinds of animals are carved on the wooden shelves around. There are all kinds of bottles and cans on the shelves.

What I know is a restaurant. What I don't know is that I thought I had entered a museum.

The cheongsam waiters are carrying wooden pots, which makes these young people feel a little uncomfortable. Being served by others and sometimes accepting it calmly is not something that ordinary people can enjoy.

Boss Yang used his heart.

The smell of the tea mixed with the natural sandalwood fragrance in the room is especially pleasant. Even Zhang Fan, who is not very cold with perfume, thinks the smell is very good and smells very comfortable.

This is the Chinese people's requirement for incense. It's definitely not Shao Huanong's lavender. It can hit the head.

Sitting at the dinner table, chatting all over the world, Zhang Fan also has some skills. He is definitely not a hairy boy. When he comes up, he asks, why do you invite me to dinner?

Although he learned that Zhang Fan didn't drink, he still prepared two Maotai, Maotai with soy sauce bottles. Chen Sheng looked straight. Maotai is still available in Zhang Fan's family, but I haven't seen Maotai of this color.

"This thing can't be a fake bar!" Zhang Fan looked at the drooling Chen Sheng.

Chen Sheng thinks Zhang Fan means to drink more!

After a few words, boss Yang asked Zhang Fan for instructions and began to cook.

Talk to boss Yang with brown face. How can Zhang Fan talk? How can he feel like a foreigner? They say it's very literary. Zhang fan can't learn it!

Cold dishes and waiters were like stepping on clouds. They couldn't see that they were walking and brought them to the table like running water.

Pick up the chopsticks. The sandalwood colored chopsticks are a little black. I thought they were holding iron chopsticks in my hand. However, these people don't care. Zhang Fan asked them to use copper chopsticks on weekdays. Now I'm still used to it!

Eight cool and eight hot, one soup. It's not what ordinary people call ten cool and ten hot. Boss Yang also explained that there is no menu in this place. After people asked the guests about their taboos, they set it up.

Don't mention the cold dishes. They taste really good. Just a few hot dishes, Zhang Fan really delicious, but he really didn't eat them made of any materials.

For example, look at your favorite dish, such as ham. It's either ham or delicious.

Seeing that Zhang Fan was curious, Wang Mingfa called the waiter and explained to Zhang Fan.

The waiter is very professional and smiling. She can't see her unnaturalness at all, just as she really welcomes these guests.

The white and clean hands are folded in the lower abdomen, with an obvious Er Hua sound in speaking, which is comfortable to listen to. It's also strange. If an old man uses a childish sound, it's ugly, like crow gaga.

"This dish is made of the hind legs of the South China Sea Black dolphin! Must be more than three years of free range black porpoise. After cutting off the hind legs, the cook will remove the bones and leave the skin! "

As soon as he said this, Zhang Fan was really curious.

In fact, this thing is that after the pig thighs are cut off, they are depilated and cleaned. This depilation is not burning in ordinary restaurants. It takes a lot of effort to scrape them first and then pull them out one by one with tweezers.

Then find a good knife cook and gouge out the pig's leg bones with exquisite knife work without damaging the pig's leg skin.

Because it is to raise pigs, the hind legs of pigs have developed hoof tendons, more muscle and less fat.

After removing the pig leg bone, this thing looks particularly evil. Although it is a black pig, it is still very white and tender after washing.

Especially at the pig's feet, I pulled out the pig's nails with a pink and tender color. It's like a slender thigh in ballet. Really, white thighs, pink toes, how to look, how to feel evil.

Then choose wild Nanyun red mushrooms, mix with fish and secret seasoning, chop them into meat stuffing, and then put them into this pink and tender pig leg.

Roast first. This roast is also very particular. The temperature must be constant at 70 degrees, neither high nor low.

After baking for one day and one night, the juice of red mushroom and fish infiltrates into the pig skin, and the fat of the pig skin roasts out of the surface. The meat skin is slightly tightened, but the color remains unchanged.

Then it was tied up with white silk thread in a special way. It looked like a young white fat girl wearing white fishing net socks, and the plump thigh meat protruded in the lattice of the net socks.

It's important to bundle it, and then steam it in a pot. It's not a simple steaming. You must put this meat leg into a pile of glutinous rice and cover it with lotus leaves.

When steaming, because of the protection of glutinous rice, the water vapor did not enter the meat legs, and the glutinous rice absorbed the excess fat, adding a smell of rice and lotus.

After steaming, take out the meat leg and slice it at high temperature. It can't be thin or too thick, that is, it should give people a sense of fullness after entering the mouth.

Slice and plate, really, quite exquisite.

Eat it in your mouth. The skin and tendons of Q play have a faint smell of rice and grass, and then the soft waxy mushrooms are mixed with fish. Darling, the sense of hierarchy of taste rushes left and right in your mouth.

Hoof tendons beat in the mouth, fish and mushrooms are wrapped around the tip of the tongue, and light juice flows between lips and teeth.

It definitely gives people a delicious enjoyment.

Moreover, the special production method absolutely makes you unable to eat what the thing is made of.

It's just a word, Xiang.

Really, not only Zhang Fan, but also Wang Yanan, who doesn't eat much meat on weekdays, stopped talking. His big eyes flickered like a big cat who ate mouse meat.

This taste is definitely not comparable to holding a stewed pig's hoof. There is no greasy feeling, only fragrance.

Doctors and surgeons, none of them can't eat. Really, they all do manual work. After a meal, several people keep talking.

"Follow the master to see the world!" Ma Yichen whispered to Xu Xian.

Chapter 934

As a doctor, you don't owe anything in terms of food. For example, when the nutrition express is popular, go to see the tooling cabinet of the little gynecological nurse, which is full of nutrition express and snacks.

Did the object buy it? Absolutely not. It's estimated that the average young man's salary can't afford the food in this small warehouse.

There are also native eggs, all kinds of milk, what is really popular, what is there.

Of course, the premise is that you can safely deliver the child to others and take good care of the disease.

Red envelopes are red lines. Many people think that giving doctors red envelopes should be given to all patients. Otherwise, if the doctor doesn't pay attention, it's wrong. If he doesn't give a red envelope, he dares not to pay attention. He's really brave.

In fact, receiving red envelopes depends on people. For example, the patient's condition is good, and the person entrusted with the relationship can also have energy, so the doctor will consider it. If it's a raw call, people will never give it.

The Secretary of the hospital is not a decoration, and senior officials do not Bodhisattva. That's angry King Kong. The doctor really dares to ask for a red envelope. You give it to him before treatment. If you feel unhappy after treatment, you can report it directly, which can make him peel off his skin.

At the Throwing Knife level, people won't be greedy. They don't like money, but they can't lose big for small. Although there is no pricing by the price bureau, we all know that demand determines the market.

But at Zhang Fan's current level, it's not something that pricing throwing knife can solve. In fact, they have also entered a misunderstanding. They think Zhang Fan should fly all over the sky, dignitaries and rich people become brothers.

In fact, it is not. This is the inequality of information. In the capital, go to major hospitals to find major experts and ask Zhang Fan.

Doctors at this level won't say, Zhang Fan? Who can't even recognize the surgical instruments! They just say, Zhang Fan, it's OK. I'm not very familiar with it.

If the inquirer has energy, he will say more. He is a group disciple in general foreign education. He is a famous teacher! His master's degree is a little low. He is operated by Lu and Wu.

Let others belittle Zhang Fan, others disdain, let others boast about Zhang Fan, others will never, in the words of the people of the capital, lose their share.

Compared with ordinary people, this Malay Yang boss is incomparable. With a huge business and real estate all over the world, people can usually sleep in the United States today and in meatball country tomorrow.

However, their family is not a top family in Malaysia, and it is also a mixed race family. The local people do not accept it and can not join the Chaoshan gang. It is very wronged among the rich businessmen.

Fortunately, his grandfather was a Chinese and a capital man, which also allowed the family to slowly move its business to China.

Listen, he's president Yang, who works in the capital of the sucrose empire. In fact, his grandfather's son alone has more than 20, nearly 30, and he's really an old man with a bad prostate.

So there is money, but there may not be much resources. And his mother is a Malay aborigine, which is relatively small in the family. Although the Malays seem to be in power, in fact, the Chinese descendants still look down on them a little.

Others don't like it, but they are president Yang's mother! Not long after President Yang came to the capital, his mother found that there was a problem with his liver.

If Li Jiapo's medical treatment is among the best in Asia, Malay medical treatment is a huge pit. Although everyone in the family is enthusiastic, they may not be sincere.

President Yang took his mother to lijiapo. As a result, people said that the liver tumor was too large and the operation was risky. You can perform venous catheter occlusion to reduce the tumor.

What does it mean? In fact, it means that the coagulant is injected into the blood vessels around the tumor through the vascular system to block the blood vessels. Without blood vessels, there is no food for the cells, and then the tumor starves to death.

However, there is also a risk of surgical failure.

His mother has only one child, but his father is not alone.

So, anyway, he will let his mother live a few more years. In order to do the operation as well as possible.

He inquired in the capital for a long time.

"When it comes to liver, you have to find ancestral disciples. If you can find their second generation, the third generation is also good. In general, liver surgery is someone else's skill. It must be right."

Others also recommend others, such as the golden mean, such as digital hospital. But generally speaking, the group disciples are recommended the most.

The second generation, the sealing knife of the sealing knife, please don't come if you can't come. For example, old Wu of others, is this something that ordinary rich people can invite? If his grandfather comes forward, everyone has a little relationship with villagers anyway. It's estimated that it's OK, and his brand is not enough.

The third generation, he also inquired a lot, and the result said that Zhang Fan is good in surgery at present.

When sleepy met the pillow, he was ready to go to tea vegetable. As a result, Zhang Fan came. It was no coincidence.

After a delicious meal, boss Yang was very satisfied with Zhang Fan's food, but he didn't say at that time. He asked for a meal when he met for the first time. Again, he seemed a little impolite.

Zhang Fan, they had enough to eat and drink. They didn't say anything. How did they pick them up and send them back.

Moreover, during the banquet, because Chen Sheng liked to drink Maotai, people gave Chen Sheng two pieces of Maotai.

Zhang Fan likes to drink tea, just as he doesn't want money. The aroma of tea has sent a lot to Zhang Fan.

Almost everyone had gifts. Several women gave them a set of cosmetics that they were reluctant to buy.

Really, things are quite in place.

"Zhang Yuan, do you think he wants to enter our hospital with such great efforts?"

Chen Sheng looked greedy, but returned to the hospital as if he had not drunk. It's all tested by alcohol for many years. There's still some certainty.

"No, that's not the way to the hospital. Besides, our hospital is in the tea plant. Needless to say, it can be placed in the capital. It can't even compare with the medical circle in the suburbs. What do people want us to do? How far away are we? "Are we in the country?"

He was relieved to hear Zhang Fan say so. As long as he doesn't find Zhang Fan to write a note or go through the back door, he will be at ease. In fact, people take the task. Why can he lead the medical team.

Ouyang explained that he was Zhang Fan's firewall.

"Hey, Zhang Yuan, I took two bottles. It's a bit extravagant to drink it by myself. It's like a crime. Take the rest with you. At least it will save face to entertain individuals in the future. "

Lao Chen took two bottles of Maotai. Whether it's all right or not, but Zhang Fanqiang has to be the same. He can't live up to his face.

"Give me two bottles. I'll get you a bargain. Take the rest by yourself."

Lao Tzu Shaohua likes to drink this. This year, when his Lao Tzu and his father-in-law were together, they slowly changed to drink a cup from time to time. Since others said it, Zhang Fan didn't refuse.

"How about that? Why don't you bring one?"

"All right, go and have a rest. Just give me two bottles."

After driving Chen Sheng away, Zhang Fan lies on the big bed of the hotel to rest. This day is really tired. More tired than work.

Not long after lying down, Lu Ning called Zhang Fan.

"What are you doing?"

"Someone invited me to dinner. I just came back. What's the matter, master? Have you had a rest? "

"We are all in Qingdao!"

"Why Qingdao? Didn't Shifu go to the meeting? Why did he go back in the evening!"

"Hey, old hair!"

"What's the matter!"

Lu Ning, like a chicken thief, told Zhang Fan the process of the meeting.

Then he said, "pay attention to Lao Wang's head in the future!"

"OK, master, don't be angry and spoil your body!"

"Hey, hey, I ate an extra bowl of rice today."

After hanging up, Zhang Fan shook his head. What else can I say? This is the old man's anger. Zhang Fan is not allowed to attend today's meeting because he is afraid that others will have opinions on Zhang Fan.

After a day's rest, Zhang Fan had to go shopping again. Wang Yanan said to buy some gifts for Shaohua. Zhang Fan was right. Then the army entered the city.

With the strong suggestion of Wang Yanan, Zhang Fan bought a lot of things. Now, unlike when he just graduated, he was short of money. Now he still has two children's money in addition to food and clothing.

Just as Zhang Fan and others were about to return home, boss Yang came to the door in person.

It turned out that on this day, people were waiting for their own hands to take various examinations and medical records from their mother. International flights fly around. People really don't care about this money.

Boss Yang who came to the door was even more annoying.

Zhang Fan didn't refuse. Seeing a doctor to save people is his job. And they have a super clinic number.

Zhang Fan looked at biochemical liver function with CT and MRI, and his eyebrows were a little wrinkled.

The location of the patient's tumor is a little troublesome, but it's also right. If the location is not troublesome, people won't spend this effort to come all the way to China for medical treatment.

Boss Yang has a slightly brown skin and a nervous face. He is deeply afraid that Zhang fan can't do it.

Money or no money, it's the same at this time. And this is a filial son.

"It is estimated that you have also asked a lot. At present, in this state, surgery should be done in stages!"

"OK, Dr. Zhang, would you like to operate on my mother?"

"Hey, look what you said. That's what I do. As long as you trust me, why don't I want to?"

"Thank you! Thank you so much! "

"Thank me first. The transition time of this operation is a little long. I am the vice president of a hospital, but I am currently in charge of the work!"

Well, when Zhang Fan said this, he was a little proud.

Boss Yang is more nervous.

"Because of your mother's disease, you must be hospitalized for observation and resection at the right time. Therefore, I suggest that your mother be hospitalized with catechin."

"It's not that I can't, it's the equipment of the tea vegetable hospital..."

It seems that this guy really knows China.

Zhang Fan gave it to Chen Sheng. He can't take the wine for nothing.

Zhang Fan said hello to Xia Lao on the last day in the capital. Xia Lao said that if he had time, he would also invite him to come over for organ transplantation. Zhang Fan was not sure.

However, Zhang Fan who stealthily touched the contact information of female doctor Zhao Yanfang. This is a big cow. Don't look at the arrogant image of strangers, but he really has the ability.

Not to mention her, let's say that Ren Li has a cold face in the unit. Zhang Fan doesn't mind people's attitude at all, because they have skills. As for blending, he thought he couldn't take it down. He still had to find Ouyang about it.

Chapter 935

The tea vegetable team is leaving Beijing.

When I came, it was an order and when I left, it was a certificate of merit.

And it's still an unreported group award. Although the state can't give money, don't underestimate this award. This award hanging in the hospital is like a plaque, which is a kind of praise.

Xue Xiaoqiao, a native of the capital, took the time to go to his own house. His father was afraid that he had the temperament of a young master in an alley, so he sent him to the frontier for exercise. He originally wanted him to be a soldier, but the young man became a doctor.

Originally wanted to exercise for a few years, but the young man didn't want to come according to the situation. It doesn't matter to his family. It's also good for heroes and heroes to show their great plans in the frontier. They worry about Xue Xiaoqiao's parents and Laozi.

But I can't help it. I can't resist my father at the top and my son like a stubborn donkey at the bottom.

Zhang Fan is not attractive, but the frontier is attractive.

Here, don't worry about income. It doesn't matter. The income of doctors is relatively high among the people in the frontier. The house units raise funds and the dining units have canteens. Although it's not good, at least they can eat enough. If you send a wife, it's really a good place.

There is no material anxiety, and the hospital is getting worse and worse. Really, there is absolutely no anxiety of metropolitan people in the morning. You can release all your energy on work and interest.

Really, it's comfortable to think about it.

He went home for a meal and hurried to the father-in-law's house. The father-in-law saw that his nose was not his nose and his eyes were not his eyes. For no other reason, the father-in-law felt that his cabbage had been abducted to the frontier by the pig.

Wang Yanan also took time to go to Shuitanzi hospital. After all, I still have feelings after struggling and suffering here for half a year.

Shuitanzi's orthopaedic director listened to Zhang Fan and didn't pay attention to Zhang Fan. However, Wang Yanan also sent a set of special surgical instruments, which are said to be mass-produced in Germany. The girl was happy, so she had to put the instruments in front of Xu Xian's nose.

The plane flew directly to tea vegetable. Ouyang picked up the plane in person. They didn't pick up Zhang Fan, but the certificate of merit!

The certificate of commendation jointly commended by several ministries and commissions, let alone tea, is estimated that there is no such honor in the frontier except the lotus base. Ouyang holds the certificate of merit, which is called a joy.

"What have you done? Such a high honor!" Ouyang whirled on the certificate of award, thinking whether to show it to the leaders of the government? Maybe some financial subsidies!

Zhang Fan didn't have the courage to say that people's level was not enough. He could only say a few words vaguely. As soon as the old lady heard it, she waved her hand: "all right, stop talking. No organizational discipline at all. Didn't you learn the confidentiality regulations? How was the party class?"

Zhang Fan, who is depressed, can't tell anyone!

Gritting his teeth, Zhang Fan specially bought some special products of the capital for the old lady.

I don't know why, Ouyang generation's pursuit of material is obviously not as strong as Zhang Fan's generation.

For example, if you give Zhang Fan a poor car, he will never be happy to drive it. Ouyang's cars are old Audi for many years. The seats are cracked. It doesn't matter at all.

Nor pursue any famous brands, nor pursue any luxury goods. But her overbearing power is really beyond Zhang Fan's comprehension.

Zhang Fan knew that these could not move the iron soldier. He looked at Ouyang and wanted to speak. Zhang Fan knew what Ouyang wanted to say too well. Zhang Fan knows too much about Ouyang's small movements and expressions. If you don't understand, you can't stand being scolded all the time.

"Dean, don't be busy. Let me tell you something. I found a big winner in the capital this time! "

"Is the capital less and bigger? Don't be naughty. I still have meetings. The health bureau is too busy. It's midsummer. There have been a lot of meetings recently. "

Ouyang turned his triangular eyes, but he also explained.

"No, this is a big Na who combines internal medicine and surgery. She is also a doctor of Xia Lao. Although she is not good at surgery, she has a strong understanding of surgery and internal medicine. She is now following old Xia. It is estimated that the doctor has not graduated yet! "

"Really? She doesn't have a unit? "

"I don't know if she has a unit, but look at her temper, and she has been around Xia Lao all the time. She doesn't even have a phone. I think she doesn't have a unit. Even if she has a unit, it's estimated that she can't mix well.

In the past, I thought you were too unreasonable and unreasonable at all. Compared with her, you are

so reasonable. I was not sensible before. This time I finally understand how much you are... "

Zhang Fan flatters Ouyang, but he can't do it without it. It's going to be summarized for half a year. A lot of broken things are waiting for him. He wants to stutter with Ouyang and ask Ouyang to help him.

"Hehe, according to you, I'm proud!"

Zhang Fan looked at Ouyang in surprise.

"Why, don't I learn something from your young people?" The old lady smiled and said, "let's understand the person you said first. If it's appropriate, I'll go out in person when necessary!"

"That's no problem. You go out and top three!"

Talk and laugh. Zhang Fan's success in making Ouyang forget what to go is also a strategy.

Mr. Ma's boss Yang personally contacted Mr. Chen Sheng. For his colleagues, Zhang Fan generally gave him what the other party was best at. Zhang Fan was not so overbearing about power.

At this point, knowing people and making good use of them is absolutely more useful than any praise.

At home, Shaohua took the clothes bought by Zhang Fan, "Oh, it's so exposed. How can you wear it out!"

"Wang Yanan had to buy it, so I said..." Zhang Fan looked at Shaohua with a bad face.

He changed his mouth and said, "I said my Shaohua looks good in everything. This is OK!"

Shao Hua proudly put on his new skirt and clothes, "how about it?"

"Darling, I don't know. I thought the fairy had left my house. I did something good in my last life! "

In fact, this is the case at home. Zhang Fan generally never quarrels with Shaohua. He doesn't think it's interesting. His home is not a reasonable place.

With specialties and two bottles of sauce and oil bottles, Zhang Fan and Shaohua went to the farm together.

Just entering the yard as like as two peas, Zhang Fan looked at the two Jetta, how Zhang looked at it.

But these two cars make the old men shine. Good boy, boss tea vegetable's car is not as bright as others' car.

A big dish of chicken and a note. Although a meal is not as delicious as that invited by boss Yang, the

sense of fullness is incomparable.

The two old men banged at Maotai and kept commenting, "well, it's pure. It's sweet to drink!"

In fact, they haven't had much Maotai, which is psychological pride.

After a two-day rest, Zhang Fan began to work.

Half a year's work summary began, one word annoying.

Clean government construction, business examination, one meeting after another, and even flood control should be discussed at the hospital affairs meeting!

Chapter 936

Zhang Fan at the meeting also wondered whether the northwest is not drought resistant and how to resist floods every year.

In fact, there is no need to organize a meeting to fight drought. This thing happens every year and everyone prepares every year, but waterlogging is different. What if it doesn't happen? Once it happens, there will be no flood in the northwest. It is estimated that something will happen. Therefore, waterlogging fighting must be mentioned every day every year.

So, in June every year, you can see that the leader's child will go swimming by the river? It's not that parents do well, but that the government should be a major event and explain it to cadres every day.

Zhang Fan also held a meeting in the hospital to explain, but to tell the truth, few people listened. They didn't chat with their mobile phones, just like chickens eating millet and dozing off.

Doctors in pill country of the tea element hospital have now adapted to the life of tea element. When they first came, they didn't eat this, which was not clean, as if they had colored glasses when they came.

But it's much better recently. Zhang Fan doesn't take them as guests when he goes to work for surgery. Unlike some units, others come to study. They are deeply afraid of what the other party is like, and they have to be equipped with a female secretary.

Don't come if you can't adapt. It's easy.

Under the oppression of Zhang Fan, the doctors in Marubeni felt very tired. There were so many patients in their country. They should not only manage intestinal tumors, but also treat other intestinal diseases, otherwise they will go back.

After a routine meal, these bunnies can now hook up with young tea vegetarians after working overtime. They can also get up in the morning and eat steamed stuffed buns and drink Soybean milk while walking.

Don't say yet. The less you take them seriously, the more they listen to you. It's strange.

But in Marubeni, they had a hard time. Just as southerners do not adapt to coming to the north, northerners go to the South and get frostbite.

If you want to integrate into each other's medical system, how can you do without delamination. They started almost from scratch. Is the treatment in Marubeni advanced? Advanced.

Therefore, a group of people eat horseradish and study in the meatball country every day.

Since Zhang Fan became famous in tea, more and more people are looking for Zhang Fan to see a doctor.

A retired old man and woman came to Zhang Fan with a medical record thicker than Kangxi's dictionary.

"When I got up in the morning, I felt the world was spinning. I went to many hospitals and took more medicine than rice, but the effect was not good. Sometimes good and sometimes bad. People say I have a problem with my cervical spine. President Zhang, please show me if I have any incurable disease! "

Zhang Fan took a look at the medical record, Ho! I've seen orthopedics, cardiology, endocrinology, and even health care, but I haven't seen neurology.

In fact, there are few diseases of craniocerebral vertigo caused by cervical spondylosis, and once cervical spondylosis causes craniocerebral vertigo, it is not something you can solve by lying down.

In fact, once you encounter this kind of thing, don't go anywhere. Go to neurology. Most vertigo is caused by otolith. Because orthopedic doctors and endocrinologists have different knowledge structures, they often ignore this point.

Therefore, the neck is pulled out on the traction bed, but when it's time to dizzy, it won't delay at all.

There are also some government employees who have cramps at night as if they were in a crematorium, and they all contracture into wool balls.

Then eat a lot of calcium tablets for dinner. As a result, it still hurts. Before coming to the hospital, I found the leader, entrusted the relationship, and came to Zhang Fan with a note.

Zhang Fan checked it and found that it was all right! In fact, most of them are estimated to have poor sleeping posture. Others lie flat and lie on their sides, and his sleeping is like doing yoga. The more complex the posture, the more comfortable it is.

It's strange that my muscles don't hurt when I sleep like this!

In addition, many old men and women with better conditions at home eat tens of thousands of health products from the golden Maoist country and sell toothpaste and soap products.

It's said that you have all the vitamins in one day!

In fact, according to medical investigation, at present, most Chinese people are not lack of vitamins. The only thing that needs to be supplemented is vitamin D. In fact, other vitamin C and vitamin B foods are enough.

Especially those who sit in the office and see the sun for less than a few minutes a day, no matter how old or young, they'd better eat cod liver oil. There's no need to spend hundreds of thousands for a few dollars. Of course, it doesn't matter if they have money.

Zhang Fan recommended them a few cents or even a few yuan of vitamin D. They took the prescription out of the hospital with skeptical eyes, and then thought to themselves, the doctor is unreliable. Bai Tuo asked him to see a doctor.

This is Zhang Fan's daily work. In fact, the number of serious diseases in the outpatient clinic does not exist every day.

The operation is not a major operation every day, so Zhang Fan's cardiothoracic surgery has finally survived for half a year. In fact, according to the details.

Most of his cardiothoracic surgeries have done lung surgery, and very few heart surgery, which is also a problem of the regional population base.

Now Zhang Fan, it can be exaggerated to say, what surgery he wants to do, which stage he wants to go to, which stage he wants to go to, is very moist.

Cardiothoracic surgery was passed. Zhang Fan looked at the options in the system and thought about it.

Why, it's a kidney stone. Especially now many occupations, such as taxi drivers, such as white-collar workers.

In particular, white-collar beauties, looking at the donkey cards they wear, inlaid with gemstones, actually have a high incidence of stones because of their long-term sitting posture in the office.

In fact, Zhang Fan's choice of Urology is also to make the operation reach a superb level.

For example, general surgery and cardiothoracic surgery, regardless of difficulty and master, Zhang Fan's general surgery is definitely better than cardiothoracic surgery. Because ordinary foreigners do so much in reality.

A large number of operations in reality can sublimate his technology.

So Zhang Fan chose urology.

Li Xiong, director of urology department, is also a strange man. In Ouyang's hands, Gou did not delay the development of urinary tract in the old yellow age.

Ouyang and Lao Huang take the lead. All surgeries are on Lao Huang's side. Only Li Xiong, a urologist, helps Ouyang. But every time he enters the equipment, urologists will never suffer.

I don't know. I thought Li Xiong was a spy developed by Lao Huang around Ouyang.

Really, one person has his own principles. Others can only learn from it, which is difficult to copy.

After the transition from Ouyang to Zhang Fan, Li Xiong has been carefully protecting his one-third of an mu.

But with the return of he Xinyi's study, and with Ouyang slowly fading out of the hospital management and entering the Health Bureau, Li Xiong felt that he could not hold this treasure land.

He can't hold what to do. He is also a chicken thief. He vigorously cultivates the main treatment, so the urology department is the most popular department for doctors' surgery in the whole hospital. But the biggest problem is that there is no leader.

Cut the prostate every day and change the kidney? Sorry, we don't.

Therefore, after Zhang Fan opened the urinary system, he was ready to point the arrow to the urology department.

Orthopaedics has been transformed. Now Xu Xian, Wang Yanan and Zhou Guofu are like a troika, which makes the development of orthopaedics enter a virtuous circle. As long as time accumulates, we will definitely make achievements in the future.

Under the vigorous suppression and development of Zhang Fan, Zhao Quanping has asked other deputy directors to bow their heads. No one wants to curry favor with President Zhang so that they can take him out of the country.

In the anorectal department, Zhao Ziping's Chrysanthemum protection team has surpassed private hospitals in catechin, and the number of patients is slowly increasing. This is a good momentum.

In some departments such as gynecology and vascular department, Zhang Fan has no energy. This time, Zhang Fan has tasted the sweetness in the capital, so he has to build the hospital according to his own ideas.

On Monday, Zhang Fan rarely entered the urology department for leadership rounds. In the past, Zhang Fan generally didn't go to the urology department, which was to save Ouyang's face.

Now, Ouyang is out of hospital management, so Zhang Fan doesn't have to avoid it.

When Zhang Fan took Chen Sheng and the little officer into the Department, everyone was surprised. Li Xiong's eyes turned like a yo yo.

Chapter 937

Li Xiong was too embarrassed to report to Ouyang. When a director of a medical unit, especially a class III hospital, cannot become a discipline leader, it is particularly uncomfortable.

For example, in a department, suddenly a little brother secretly made an achievement, which was also recognized by the government and hospital leaders. Then he was more famous than the director academically. There was no need to think about it. The next department was the civil war.

One person leads one team. Anyway, they start to rob each other of resources. When the higher authorities suppress the directors of the following departments academically and technically, the directors of each department will develop slowly if they are not their own.

This is a disadvantage that cannot be changed at present. Let alone ordinary hospitals, even at the academician level, if there are few resources, it is estimated that Yan Xiaoruhua, a director who distributes project funds, will have to surround others.

So now for Zhang Fan, the hospital is a little small, but just like the old farmer doesn't like the building. Here is his day, here is his land, which has the final say.

It is estimated that this is the sense of control better for the chicken head than the phoenix tail. No matter how small the chicken head is, I can decide!

According to the eyes of people in those years, Li Xiong is also estimated to be a handsome Xiaosheng, with a national face, thick eyebrows and big eyes, a tiger back and a bear waist. When he speaks, he gives people a rumbling chest echo.

It sounds good. I want to play the cello. It doesn't sound good. I talk like a stuffy nose patient.

Looking at Zhang Fan with Chen Sheng and a small officer, he knew that I couldn't hold the Qing Dynasty. Finally, it was the turn of the urology department.

Look at Chen Qi of orthopedics and several deputy directors of general surgery. Now which one doesn't live with his tail between his legs. Gone are the days when gold was distributed in large scales.

Many people wonder why doctors love to be directors so much. Isn't it fragrant to be a famous doctor without a director? To tell you the truth, there is really no way to compare who is more fragrant.

The most noble kind of director is to use his knowledge to make some achievements in medical treatment. There are not many and many such people.

There is another kind, especially in the top-level third-class hospitals, when they can't be academicians, they guard the name of department directors and fly knives all over the world to make money.

In the smaller third class hospitals, it's a little difficult to fly a knife in the name of the director, but when the director has the right to sign the operation, who to operate and what equipment to use, so although the little director doesn't even have a level, you can look behind him. When he leaves the hospital, he is like the boss.

It's still very moist. You don't have to worry about changing the gas tank at home. Some people worry about it regularly. It's definitely better than any master's tutor. The tutor uses his students, and the students are not happy.

And others, many people rushed to him.

So Zhang Fan entered the Department on the first day he opened the urinary system. Most of the

operations arranged at the morning meeting are electric prostatectomy, lithotripsy and bladder tumor,

But when he saw it, there were a variety of instruments in it. Like the world exhibition, Zhang Fan didn't speak after listening. He can't be impatient.

"Let's ask Zhang Yuan to tell us something!" After the shift handover at the morning meeting, Li Xiong didn't ask Zhang Fan for advice, so he said directly.

"Hehe, since the director asked me to say something, I'll say something." Zhang Fan smiled.

Everyone also smiled. Except director Li Xiong and several deputy directors, no one else felt the tension of the atmosphere.

After all, I'm still young.

"Urology is the major department of the hospital. There are more than 20 doctors now?"

"Twenty seven!" One of the little doctors quickly replied.

Zhang Fan nodded.

"The departments with nearly 30 doctors are major departments. They are almost more than ordinary foreigners! What does this mean? It shows that your achievements are still commendable!

Especially in recent years, starting from senior residents, including senior residents, each department can do surgery alone. The amount of surgery in the hospital is among the top three in the surgery. "

Zhang Fan gave a compliment and let a group of old guys hear it. What are you doing? How can you boast.

Before they could figure it out, Zhang Fan said, "it's a good thing that surgery is popular. However, it also represents mediocrity. Can you see the three-level medical ward round system in your department?

I can't see. Everyone can cut electricity, and no one else can! I wonder, how do you consider the documents and lists of promotion titles reported by your department every year? Is it selected according to who is beautiful? Is it time to take turns? Or according to the distance?

My comrades! " Zhang Fan's tone sank, and the doctors in the Department looked at Li Xiong together!

Li Xiong's face is not very good. Although the development of Urology is good, in fact, it is because there are more and more old men in recent years, not the achievements of urology.

But even if Zhang Fan said something ugly, he would listen.

"Look at the hepatobiliary department, the general surgery department, the orthopedics department, and even the burn department you despised before. Comrades, it's time for change.

I will conduct research in the urology department for a period of time, and then prepare to divide the urology department into three departments. You can recommend yourself for the candidate of department director. "

With that, Zhang Fan turned and left.

This volunteer is great. It breaks the interest alliance of a group of old guys. The old friends, who were united as one, looked suspicious.

It can be said that except Li Xiong, everyone else began to consider this branch.

.....

Zhang Fan took the document in his hand, touched his forehead and sighed, "agree to the temporary measures for the management of flood prevention in the near future!"

To tell the truth, Zhang Fan is a little dismissive of the government's practice of holding a meeting without a day's work.

"The northwest should also prevent waterlogging?" Zhang Fan said something to Chen Sheng, and then asked, "what about the high court? This meeting is not... "

Chen Sheng smiled, "Zhang Yuan, this meeting must be attended by the head of the unit or a legal person. What do we say in Northwest China? Don't say the once-in-a-century heavy rain, or pouring rain. As long as the rainfall is a little bigger, something will happen.

Because all kinds of precautions here are not comparable to those in the south. People in major cities in the South can still live as usual in case of a hundred years of heavy rain. If we encounter a ten-year heavy rain here, it is estimated that the city will be paralyzed. "

Zhang Fan doesn't have much experience in this field. After all, he has just left school for a few days.

I didn't take it seriously. As a result, Zhang Fan, who had just finished the government meeting that night, received a call.

I thought nothing had happened recently. I went to bed early with Shaohua and fought for a while. Zhang Fan felt that he was strong and should be able to defeat Shaohua. As a result, he exhausted his strength and finally got a tie.

Lying in bed, Shaohua touched Zhang Fan's belly like a cat. Before they had a few words, the phone came.

Chapter 938

To be honest, when the invention was just popularized, obedience was a symbol of identity.

When Zhang Fan was young, there was a green plum chick. Her father was the leader of the factory. The factory pressed an internal phone. The little girl was so proud that she didn't know her name.

Whoever doesn't listen to her will not take anyone to their house to make a phone call. A group of little children licked it. When they grow up, it's really fucking sweet.

In fact, there are only a few places that can be called by the internal phone. After getting through, a group of little children ran away laughing for fear that others would run out of the phone.

Later, there was a mobile phone. What's more, Zhang Fan remembers the momentum of answering and making phone calls when he saw a mobile phone for the first time.

After the popularity of mobile phones, especially after Zhang Fan went to work, I really wish this thing hadn't been invented.

Doctors also have to rest and live their own life. However, no matter whether you are having dinner or fighting with your wife again, you can call if you have something to do, or you are limited in time.

After going to work and becoming a doctor, doctors are very cautious about calling people with general relationships, while relatives and friends can't avoid it. Therefore, sometimes the phone has become a burden.

Zhang Fan and Shao Hua have just finished the martial arts competition. Zhang Fan is still remembering how people make progress with his eyes closed. In fact, it is necessary to summarize and summarize after each battle or event.

If there is, change it. One day it will be strong!

Therefore, both men and women don't want to be disturbed at this time. The phone rang!

Shao Hua is about to bite off Zhang Fan's ear. There's no way. You can't answer it.

As a result, hey! Father in law's phone.

Shaohua was embarrassed to loosen Zhang Fan's ear and touched the tooth marks on his ear, as if he were petting a dog.

"Dad!" Zhang Fangang shouted.

The old man shouted anxiously, "Zhang Fan, come to the farm quickly. Aunt Shaohua can't do it! The pain turned white. Come on! "

"I'll start now. You take your sister-in-law to the hospital on the farm first."

"They're heading for the city. Your uncle's car!"

After hanging up the phone, Shao Hua has put on his clothes. It is estimated that every time Zhang Fan answers the emergency call, the girl learns!

"What happened to my sister-in-law?" Shaohua takes Zhang Fan's clothes and helps Zhang Fan.

"Dad couldn't explain clearly, so he said it hurt badly. I'll meet you on the road. Are you going? "

Zhang Fan wears very quickly and neatly. He wears a few clothes in summer, covering his head and legs for more than ten seconds.

"I'll go with you. I'm not at ease at night."

Zhang Fan and Shaohua didn't talk much either. Zhang Fan picked up the spare first aid kit at home, went downstairs and rushed to the farm. Zhang Fan has some opinions on the practice of Uncle Shaohua and aunt Shaohua.

For example, in case of an emergency, what is the best principle? Instead of going to a large hospital in the urban area, we should look for a hospital nearby.

Even if they are a small hospital, they always know more than your family.

If you need oxygen, sedation and cardiotoxic, how can there be equipment, instruments and drugs in small hospitals. Especially in modern medicine, let alone ordinary people, even doctors can't do anything with their bare hands.

Aunt Shaohua retired from the Local Taxation Bureau, and her uncle hasn't retired yet, but now she's retired from the second line. The unit reports every day. If you want to go, you can go or not, and no one cares about you.

So the couple went back to the farm, built a small villa and lived an idyllic life. After all, brothers and sisters are on the farm.

Shao Hua's two aunts, how to say. In the age of great aunt, she was a trendy person. She did whatever was popular among the people and was not allowed to do by the state. Moreover, she stepped on the pulse of the times again and again. She was also a talent.

Others say the wheel is deceptive, she says you don't understand, others say MLM is deceptive, she says you don't understand. Anyway, the family made her face up to the sky.

The little aunt, the couple are in the system, especially uncle Shaohua, who used to be the leader. The couple can toss around and have many hobbies. Their love and love also follow the trend.

In fact, it's just what's hot and what's your hobby. For example, silicified wood was popular in the frontier for a while. The couple turned the sky to collect silicified wood and then sold it.

Popular jade, drive to the beach to pick up stones. So I still have two dollars in my hand.

The eldest aunt of the family begged for the road. Let alone not worry about her sisters. She didn't even worry about herself and her children.

My little aunt used to go to Shaohua's house. What are you doing? It's to give some extra things to his family, sometimes bring some wine to his brother, and buy Shaohua clothes or something.

But later, after Shaohua and Zhang Fan got married, they almost didn't go to Shaohua's house.

She is also a wonderful aunt. Other relatives are deeply afraid that they can't curry favor with Zhang Fan. They don't. They feel that the Shaohua family is better than them now. They seem to have a sense of loss. They seem to feel that they have no status to go to the Shaohua family.

It's Shaohua's little cousin. He always runs to Shaohua's farm.

Anyway, Shaohua's father is worried. There is a cry on the phone. The old man is so strong that he can give Zhang Fan to crazy people when playing chess. He really has no idea when he meets this matter.

What about Aunt Shaohua. Say she has no culture. She is a high school student or a cadre who has been organized and trained for half a life in the system. Say she has culture.

But what she did after retirement was not like a educated cadre. Health preservation: almost everything she thinks is good can be soaked in the big health pot.

Ginseng, Codonopsis pilosula, American ginseng, red wolfberry, black wolfberry.

Jujube, Angelica sinensis, Ganoderma lucidum.

And saffron, snow lotus!

Then put in how many chrysanthemums, put some rock sugar, and drink such a cup first in the morning. In her words, women should maintain it when they get up.

Once Zhang Fan met him on the farm. She also asked Zhang Fan if it was OK to buy some wild ginseng. Fortunately, Zhang Fan didn't take it seriously, otherwise she would have hung up.

Where is this maintenance? It's obvious that I don't want to live.

It is often said that traditional Chinese medicine is not poisonous, but natural. If you are sick, you can cure it, and if you are not sick, you can keep healthy.

This is bullshit, really. At that time, there was a particularly famous digestion in the medical circle. A leader ate Liuwei Dihuang pills every day, resulting in renal failure!

I don't know the effect of aunt Shaohua's maintenance, but she has frequent oral ulcers and blisters at the corners of her mouth. People don't listen to what they say.

As a result, I recently did not know where to buy it, that is mineral water, which is rich in all kinds of essential essence of human body, from amino acids to rare elements, from iron to gold, what is really what is strange.

Moreover, this thing is not cheap. Most people don't introduce it and they don't sell it.

A group of retired rich old ladies not only drink mineral water, but also wipe it on their face every day. White is really white, and there is a layer of white skin on their face.

Face is white, this old lady is more attentive, big night and two cups, and then put on a mask, singing a minor tune, the result, singing and singing is not right.

Suddenly there was pain, nausea, and even the milk I drank at night burst out.

And more and more pain, lying pain, sitting pain, face began to cramp. If you want to urinate, you can't urinate. The more you want to urinate, the more you can't urinate, and the more painful it is.

Shaohua's uncle saw that it was wrong. The situation was wrong. His wife's eyes had become dead fish's eyes, and she had no strength to speak.

While calling Shaohua's father and dressing, he couldn't count on his son. Rabbit didn't know where to play. At this time, it was Shaohua's father who could rely on him.

Shao Hua's father really rushed over. When he saw his sister, he contracted with pain.

Muddled into the car and wanted to follow, but his nephew also came back. Uncle Shaohua said a word before he left and called Zhang Fan quickly.

Zhang Fan took Shaohua and drove kuluze towards the farm. It was not far away for dozens of kilometers. He soon saw Uncle Shaohua's car.

When he stopped and got off, Zhang Fan rushed over with the first aid kit and Shaohua. Shaohua's cousin grabbed Zhang Fan's arm, "brother in law, brother in law, what's the matter with my mother. My mother... "

Shao Hua opened his cousin, "don't make trouble in your hurry. Let your brother-in-law check it first."

Shaohua's uncle also looked at Zhang Fan anxiously.

The phone said no. Zhang Fan subconsciously thought that people were in shock.

As a result, aunt Shaohua shivered when she opened the door. In the first mock exam, Zhang Fan thought he was hot, and he had a cold forehead and a sweat.

With a flashlight, Zhang Fan began to judge consciousness: "aunt, aunt..."

"Zhang Fan, come on, come on, it hurts me!" In this way, Zhang Fan knows that people's consciousness is clear.

"Where does it hurt?"

"Waist, back spine, smoking pain, ouch, it hurts me!"

Shaohua's appearance is a bit like her aunt. On weekdays, her aunt claims that she is the most beautiful in the community.

Originally, it looks good. In addition, I like to pack up and dress up. I especially like to use the shawl of Stan women. I don't know which star it is when I wear a blue shawl in summer.

But now, Zhang Fan, I'll go! A pale face, a flashlight under the back of the fluorescence, Zhang Fan touch wet, the original mask.

Aunt Shaohua grabbed Zhang Fan's arm as if she had seen something. He kept shouting pain in his mouth and said to Zhang Fan, "no, I can't! I'm dying! "

Blood pressure, heart rate, pupil probably a judgment, Zhang Fan has a bottom in his heart, and he can't die for a while.

"It's okay, it's okay, there's me!" Zhang Fan asks if it hurts according to his stomach.

"It hurts! It hurts everywhere. "

Results when tapping in the renal area, Shaohua's sister-in-law obviously had more severe pain.

"Get in the car and hurry towards the hospital." Then he said to Shaohua, "you drive with me and be careful."

Then he said to Uncle Shaohua, "I drive!" Then he rushed to the hospital.

Chapter 939

To the hospital and sent to the emergency center. Zhang Fan didn't have to say hello. The guard came out to wait as soon as he saw Zhang Fan's car. As a result, he quickly shouted out the doctors and nurses.

Zhang Fan is not easy to stop. Sometimes being too approachable is the so-called affectation, especially for logistics staff and comrades in the security section.

People take the initiative to help. In fact, they don't ask your dean to solve something for me. People just take the initiative to get close to me. If you refuse and feel that you are very noble, things are not much, but it will cause great confusion to others.

"Does the Dean have a problem with me? How can I get it back? " This is what Ouyang taught Zhang Fan.

Shaohua's uncle entered the hospital and wanted to speak. As a result, he didn't need what he said. The people on duty in the hospital had begun to deal with it in an orderly manner.

Zhang Fan ignored him and followed the doctor on duty into the examination room. Shaohua looked at his terrified uncle and said, "uncle, you have a rest. Zhang Fan is here. After all, he is a doctor in this hospital. My sister-in-law should be fine."

"Yes, yes, yes! Zhang Fan and you are in trouble this big evening." Uncle Shaohua said politely.

"Look what you said, Xiao Wei, go and buy some water. The supermarket outside is open 24 hours."

Shaohua instructed the cousin to buy water. Seeing that his cousin went out immediately, Shaohua specially explained, "buy more bottles and buy them for those who have just helped to carry his sister-in-law."

Abdominal pain, especially pain of unknown causes, must not take painkillers before medical treatment.

Because the essence of pain is that the body gives a warning, and there are many abdominal organs, its pain points are often not particularly clear. It was not clear, and then took painkillers, which covered up the condition.

The doctor didn't hurt anywhere. He didn't find it until he was in shock. Yo, it's perforated. The contents of the intestines should come out and walk.

In the color Doppler ultrasound room, there are a lot of crying and shouting. Especially in the evening, there are no easy emergency patients.

Shao Hua's little aunt, who has become a maggot in pain, curls up on a stretcher and wants to put her head into her stomach.

The doctor in the color Doppler ultrasound room finished the color Doppler ultrasound and said to Zhang Fan with a smile, "Zhang Yuan, what relatives do you have, kidney stones? The stones are not big. You can row them out."

Zhang Fan was relieved when he heard this. Kidney stones can be determined by Zhang Fan, but there is no way to determine the size of the stone. If you can even determine the size of the stone, it is the perspective eye. What else can you do with this function!

It turned out that Shao Hua's sister-in-law drank the essence soup in the morning, and the person who sold her said that this is the essence that can not be diluted, so drink less water.

She believed it.

Then the seller of mineral water told her that in order to make the mineral easier to absorb, it was necessary to keep the mineral water in the body for a long time. Then, aunt Shaohua didn't drink water

all day.

Then drink mineral water before going to bed. Over time, the minerals are absorbed. I don't know. The stones do hang on the kidney.

Many people hold their urine. The urine has reached the urethral orifice, and I have to hold it for a while. Urine is originally concentrated. There is a lot of phosphate in it. Let's look at the Yellow scale hanging in the toilet at home. It's similar to the composition of urine.

If you hold your urine for more time, you will form stones.

Some people don't like drinking water. They can't drink 500 ml of water a day. They live all by saliva. Thirsty people really can't do it. It's cool to go down with a bottle of iced drinks. In fact, at this time, the kidneys have scolded their mother.

Strong tea and liquor can't escape the two brothers who hurt their kidneys. Some people say that my rural uncle gets up every morning with a cup of strong tea like cow blood and still lives to 99.

It's that people have no other pressure or other physical burden. If something doesn't happen, it's OK. Once something happens, to be honest, kidney disease is not easy to treat.

Normal people, adults, people who don't need fresh water, how much water do they need in a day? In this way, urinate at least 500ml. If there is not so much in a day, you should be careful. The garbage in your body can't be transported out. It's nothing for two days a day. It's a big problem for a long time.

Drinking water, which needs about 1500 ~ 2000ml of water every day, is the daily water demand. Eight glasses of water a day, regardless of measurement, is pure hooliganism. Besides, I don't know what happened in recent years.

It is rumored in the Jianghu that you should drink water, otherwise you always let your kidneys work. Your kidneys are too tired, and then you have poor sex.

Brother, you smoke and drink big sword. Your kidneys don't say anything. What's wrong with drinking two salivas? In fact, the function of the human kidney is particularly powerful. The weight of the kidney accounts for about 0.5% of the body weight, but the blood flow of the kidney is about 1200ml/min, that is, it is about 25% of the heart flow.

The heart is purely mobile, which is to attract and spit out, while the kidney has to filter. In short, the flow of the kidney is very large.

However, the only bad thing about the kidney is that it is very similar to the brain.

Nephron, the unit cells that make up the kidney, will not regenerate, that is to say, as many as there are, just like brain cells, one is less dead.

After the age of 40, normal people reduce their nephron by about 10% every 10 years, that is, why the human body has two kidneys? This thing is not used to exchange rotten fruit for a bite, but just like the national reserve force.

People who have eaten kidney probably know the shape of kidney, just like broad bean. But what exactly is the same mechanism inside the kidney.

If we talk about renal calyces, renal calyces and glomeruli, it is too complex. This thing is magnified, just like many funnels gathered together, and then all the funnel openings are renal hilus, that is, ureter.

If you zoom in a little more, there are almost all kinds of charged examples in these funnels, which are hung in the reticular pipe, all kinds of proteins and ions. Here, according to the pressure, the urine goes out and the recovered urine is taken back.

It's very orderly. The structure of the kidney is much more complex than that of the kidney's brother testosterone (a) pill. Once a stone is embedded in various pipes, the urine along the way cannot be discharged.

There are clothes rich in nerves outside the kidney. The urine can't be excreted. It's the same as urgent urination. Once this thing is swollen, it will hurt.

It's like informing the brain. Pee for me. If you don't pee again, your clothes will burst.

After Shaohua's aunt finished the inspection, there was no other big problem, but a stone was embedded.

"Zhang Yuan, after giving you some antispasmodic drugs 6542 and Du lengding, let your relatives discharge stones!"

The doctor on duty in the urology department has long come from the Department. I was disturbed to sleep at night, but I didn't have any impatience on my face.

"OK!" Zhang Fan nodded after watching the color Doppler ultrasound.

Renal colic is really painful. According to the division of medical pain, the pain of this thing is a little lighter than giving birth to a child, but it is definitely more painful than breaking a finger.

So, renal colic is really painful. Even if dolantin relieves pain and 6542 relieves spasm, the pain still exists.

But even if it hurts, aunt Shaohua still has to move" Zhang Fan... "Aunt Shaohua looked at Zhang Fan with a pale face. She lay like a monkey in her stomach, not to mention jumping.

"Aunt, you listen to the doctor. Aren't you the leader of the square dance in the community? You get up

and dance according to the spirit of going in the wind and rain!"

Aunt Shaohua seemed to say that she couldn't move and didn't answer back. Zhang Fan said, "square dance is estimated to be no good. There's not enough activity. There's a rope skipping here. Aunt, if you get up and dance a thousand, it's estimated that the stone can come down."

Uncle Shaohua's face turned into a rag. If Zhang Fan and Shaohua weren't there, it's estimated that he could quarrel with the doctor. In his words, "people hurt like this and let them jump. Isn't it life-threatening!"

Shao Hua is there. If Shao Hua is not there, it's estimated that her aunt won't listen.

Under Shao Hua's supervision, her aunt took the rope skipping, just as the primary school students had just learned rope skipping. After a while, her face was full of sweat, urine was suffocated, and she had to toss like this.

It's really going to kill me.

Listening to the sound of running water from the faucet, her aunt danced for half a night. When defecating, she urinated blood and drained the stone out.

Women are better. It's even worse if they are men, because the male urinator has several strictures. Sometimes it's wonderful if it's stuck in the urinator.

Of course, when the stone is successfully discharged, it's also cool. When it clangs, it's like peeing out gold, smashing the toilet.

Zhang Fan tossed with him all night. Although he was sleepy, he couldn't sleep today because boss Yang of Malaysia was coming with his mother.

Zhang Fan eats other people's meals, so he has to come forward to receive them. Sometimes, don't look cheap. What he waits for is the corresponding pay.

Aunt Shaohua danced all night. She was really depressed to the extreme. Even with pain and fatigue, she discharged the stones and lay on the hospital bed. She said to Shaohua, "I don't eat health products anymore!"

Chapter 940

That night, aunt Shaohua came to the hospital. The doctors in the emergency center didn't know who Zhang Fan was. But the next day, Shaohua accompanied the bed in the ward, which was great.

After the ward round, the head nurse of the urology department took the nurse to the ward round.

"Manager Shao, this is..."

"My aunt! I'm sorry to trouble you these days. " Shao Hua was very polite. To tell the truth, Shao Hua was not so polite when Zhang Fan was not the dean. He was a little reserved.

But with the improvement of Zhang Fan's status, not only did she feel more peaceful, but her parents at home explained all the time, don't do anything.

Shao Hua was polite, and the head nurse was proud. In general hospitals, no matter how big or small, as long as relatives of hospital leaders are hospitalized, they should care about it.

Zhang Fan is even better. Everyone didn't say it, but they looked at going abroad to make money twice. Bayin's little Audi, Zhao Quanping and Song Ping bought a house and a car when they came back. Which one doesn't envy.

After checking the room, the first is the surgical system, which has something to do with urology. For example, although Lao Zhao didn't come in person, he sent Ma Yichen to the door with young doctors.

Then extrathoracic, vascular, and even anorectal came.

Then came the internal medicine. Internal medicine was different from surgery. Those who came alone felt close to Zhang Fan.

For example, Li Hui, the boy not only came, but also brought his wife.

Three say two don't say, hey, a relative of his wife's family and aunt Shaohua are colleagues!

One morning, cousin Shaohua looked silly.

To tell the truth, their family conditions have always been among the best among their relatives.

And his parents are at least a small leader. They have seen the world since childhood.

But today, this situation was definitely unexpected to him. He always seems to take his sister away from Zhang Fan, and he doesn't look at Zhang Fan very much. He thinks that his brother-in-law is a little earthy.

Now, he dare not think so.

He said to his parents and Shaohua, "shit, sister, your husband won't be a corrupt official! Why are so many people fawning on him! "

I fuck the world!

Before Shaohua spoke, his father spoke first: "go, go home, don't add traffic here. It's no use."

I didn't pay attention to Zhang Fan before, but now I have to pay attention to it. If my children are indifferent, it's always bad to provoke Zhang Fan.

Shaohua glanced at him. If her sister-in-law hadn't been ill, she probably thought she could clean up her cousin.

The urology department heard that it was Zhang Fan's relative. He was going to change to a single room. As a result, Shaohua disagreed with everything. The head nurse smiled and left, saying that Shaohua was really easy to deal with.

As a result, no one was arranged for the other two beds in this ward from beginning to end!

Sometimes things come one by one. When you're free, rub your eggs at leisure, and keep your feet off the ground when you're busy.

Zhang Fan steals time in the office in the morning and is ready to squint for a while. As a result, just fell asleep, the phone rang. Before Zhang Fan could answer it, the landline on the table began to ring.

Zhang Fan takes the landline first, and then looks at the mobile phone. While watching.

"Zhang Fan, come on, my wife is going to have a baby. She has a terrible stomachache!" Zhu Bin's voice is in the landline, and Zhu Bin's name is also on the mobile phone.

"Send it to the hospital!" Zhang Fan doesn't care to laugh at him.

"OK, OK, it's already on its way. Are you in the hospital? You must be in the hospital! "

"OK, no, how can I get the plane? I'll go to obstetrics and gynecology." Zhang Fan hung up the phone, rubbed his eyes, washed his face and walked towards obstetrics and gynecology.

To tell the truth, gynecology and obstetrics can handle this kind of thing by pulling out an attending doctor. Although Zhu bin is also worried, he is not so worried as his father-in-law. His father-in-law wants to call all the doctors he knows.

Zhu bin just contacted Zhang Fan. He felt that Zhang Fan was really enough.

But Lao Zhang not only called Ouyang, but also called the director of the women's and children's hospital.

It's estimated that the director of the maternal and child hospital scolds his mother in his stomach. You asked me to go to the city hospital. Did you let me say it or not!

Among the several hospitals of catechin, the maternal and child hospital was established the latest and was also distributed from the municipal hospital in the early years.

However, its equipment is relatively new and has been vigorously developed by the state.

Buildings are easy to build and CT is easy to buy, but doctors are difficult to cultivate. In particular, like the maternal and child specialty in the battlefield, to be honest, with the vigorous development of tea vegetable hospital in recent years, after the merger of two hospitals.

The doctors of the women's and children's hospital are looking forward to the inclusion of them by the tea vegetable hospital, just as they are looking forward to the people's Liberation Army.

But the leaders of the hospital were worried every day. Even if Ouyang couldn't figure it out, he merged the women and children.

Therefore, in general, the leaders of the maternal and child hospital never show their existence in front of Ouyang.

I'm kidding. It's too late to hide. How can I show off.

However, the old road yelled. You can't go without it. The directors of women's and children's hospitals are estimated to be

To tell you the truth, a woman is most worried about her at this moment. It is estimated that her father and mother have had children. She knows.

Lu Renjia was a staunch naturalist before his due date. As a result, when Zhang Fan saw her, the head of the road section was in pain with sweat on his face. He grabbed Zhu Bin's hand and shouted, "husband, no, I can't, please cut me!"

Zhu bin was sweating and holding his wife's hand. He didn't know what to do. He looked at his wife and looked for Zhang Fan everywhere.

Zhang Fan looked and smiled " All right, let's go out! "

Zhu bin was just about to speak. As soon as he heard Zhang Fan say so, he looked at Zhang Fan winking at himself and walked out. Lu Renjia looked at her husband pitifully. Her mouth was flat and she was about to cry.

There is no way. If you can have a natural birth, you must have a natural birth. The fetal position is correct, the uterine mouth is appropriate, the labor process is smooth, and there is no need for caesarean section.

In terms of technology, to tell the truth, tea is more powerful in gynecology and obstetrics than in the whole hospital for women and children.

Not to mention other directors, only LV Shuyan stood in obstetrics and gynecology.

Graduate degree, study in Jinmen for half a year, and then look cold. No matter you are a senior official, a rich man or a beggar, as long as you come to see a doctor, I look the same.

There's no door for me to curry favor with you.

Have ability, personality and appearance. To tell the truth, people are more famous than Zhang Fan in tea.

Almost all people who know Zhang Fan have some skills in the system, and others deliver a baby, and the random publicity of seven aunts and seven aunts has a real reputation.

Lu Renjia and LV Shuyan were also familiar with Zhang Fan. After seeing Dr. LV, Lu Renjia was relieved.

The director of the women's and children's Hospital dared not even speak.

Bursts of crying, Zhu bin was like a grinded donkey, but the production was smooth. The child was born. He was a baby boy. The whole family was happy and didn't know what to do.

Zhang Fan directed the milk powder washing to comfort the pregnant women.

Shaohua's sister-in-law stayed in the hospital for three days and went out of the hospital smoothly. Shaohua said hello to Zhang Fan and hurried back to the farm.

Lavender flowering season is over and it's time to squeeze oil. Whether you can make a fortune depends on these days, so the money fan girl hurried back to the farm.

Essential oil, to tell you the truth, this thing is very expensive. A small bottle, like a bottle of wind oil essence, costs tens of dollars. Zhang Fan doesn't think he can sell it. Can't he have a good meal with this

money?

On the farm, tens of thousands of mu of lavender began to extract essential oil.
