

Chapter 941

When an industry becomes a super overlord or forms a monopoly pattern in a region or city, the authority of the unit or company will definitely be valued by the government.

Even if you sell tofu, if you can monopolize all tofu in a region without relying on policies, the government will have to give you six eights.

Because there are too many employees extending around this industry.

In the early years, it was not a central area around the tea vegetable hospital. First, there was no government office building, second, there was no cultural landscape, that is, there were many trees on the two rows of roads.

But now, with the development of tea vegetable hospital, the surrounding hotels are taking risks. Lao Huang era is just a few small hotels without business license. One room has four or five beds and ten yuan a night.

The patients and their families who came to see doctors in the surrounding counties can barely make a living. It's better in winter. Anyway, the frontier government attaches great importance to heating.

There is a joke about heating in the frontier. It is said that there are three people in a family. The heating at home is too hot. Children who have just reached the age of three can only climb naked when they come home. Their parents are big underpants and short T-shirts.

I can't stand it. People sued the government and said the heating was too hot!

In summer, the summer of tea vegetable is not like other northwest cities. No matter how big the sun is, it is cool and windy to stay in the shade of trees.

Because of the abundant precipitation and long sunshine time, tea has a feeling of the south in summer. It's hot and muggy! Man is like a mouse. He wants to get into a hole in the ground.

Later, when Ouyang became the president, the number of patients increased, and the surrounding small hotels without business licenses could not be opened.

Although the rich boss was optimistic about the hospital, he was still a little hesitant and did not invest much, so he casually transformed a residential house into a hotel.

With Zhang Fan's promotion, the municipal hospital became more and more powerful. There was no hesitation. The government couldn't close its happy mouth. The land that no one wanted before suddenly became a prime location.

Xi Ci's boss was engaged in real estate in Chasu. We can't miss this opportunity. Brush it. The largest and most luxurious five-star hotel in Chasu was built opposite the hospital.

Xi Ci's boss and Zhang Fan have a little relationship. Boss Shen's nephew came to play with tea and almost hung up with his butt against the excretion port of the swimming pool.

If Zhang Fan hadn't been there at that time, the Shen family would have been the queen. They know Zhang Fan's level too well.

The female boss is also quite a chicken thief. She invited Zhang Fan to go to the south. Of course, Zhang Fan wouldn't agree. In fact, people are exploring the bottom of Zhang Fan and see that Zhang Fan has become a hospital legal person.

Don't worry, the luxury hotel is starting. People call it the best hotel in the northwest.

Not only their family, but also the lucky people who opened a small sampan. Those who dug stones in the early years of the frontier also came.

Anyway, there are large hotels near the four doors of the hospital.

Not to mention on both sides of the street, the places with big palms, flowers and medicine are extremely prosperous. Not to mention the others, cousin Shaohua's tabloid kiosk is said to be willing to contract 500000 a year.

However, it is said that the owner of the hospital canteen is seriously sad.

In the past, we didn't pay much attention to this profit, but with more and more hospitals and more patients, this benefit has been valued.

In the past, the boss felt that his relatives were bullish. For hospital employees, let alone ordinary employees, even ordinary leaders of the hospital were indifferent.

As a result, unexpectedly, his relatives couldn't catch up with the hospital! This is embarrassing. In the past, he couldn't see the doctors in the hospital, let alone the logistics and nurses.

Now, it's too late for him to curry favor.

Many restaurant owners with some famous tea ingredients want to contract the canteen. Zhang Fan directly sends out words through this wind. As long as the food is good and cheap, clean and delicious, they can contract and bid.

The canteen owner regretted his stomachache. In the canteen with thousands of staff, the patients couldn't count the number of good businesses and couldn't go on.

Really, his relatives don't want to stand out for him. He takes Maotai and Zhonghua cigarette

Zhang Fan didn't even let him in. What a bully! It's not Zhang Fan who bullies people, but he bullies people. What's cooking called rice? Steamed bread can be used as bricks.

On the sidewalk outside the hospital, the urban management doesn't allow the road to be occupied during the day, but at night, the brightly lit, fruit and snacks have become the economic center of tea.

After Zhang Fan ordered Urology, he didn't have a special operation for several days. It's not a urinary tract infection, or an old man with swollen prostate who can't pee.

Carry a urine bag. He's arrogant in the corridor. He can quarrel with anyone. It's estimated that he's suffocated. After it's unblocked, he's a little uncertain.

In the past, Zhang Fan could go to any operation, but now he also wanted face. When Zhang Fan was tired of signing, a special patient came.

In hospitals, conventional patients are divided according to the severity of the disease, such as ordinary diseases, critical diseases, critically ill diseases, or waiting for labor and physical examination.

It's also strange to divide by identity. For example, if you don't queue up and register, you can find experts. For example, if you don't have a disease, you can see a doctor. Anyway, sometimes it's more important for doctors to understand each other's identity than to understand the symptoms.

If according to the special, some diseases are quite special. For example, only tens of thousands or even hundreds of thousands of people have one, such as mirror people, albinism, and even rare acromegaly.

Relative to these diseases, the larger the city, the more such diseases can be seen. Doctors in small places may look at them in books.

There is also a special kind of disease, which is caused the day after tomorrow. For example, in a car accident, it suddenly hit paraplegia and crushed all its limbs, leaving only its trunk.

Zhang Fan met a very special patient today.

In tea, herders are not races, but occupations. The people with grassland, especially the Bayi people with large grassland, are still very moist. They don't agree with each other. The sheep and horses on the mountain are very rich.

Although some herdsmen wear oily leather robes, they can't see the original color. They have two red faces on their faces, as if they are very poor. In fact, you can go to the grassland and have a look. Zhang Fan's cool Luze is not a good car on the grassland. Some people have four or five.

But, to tell the truth, people regard this grazing as a life, not a career. Therefore, it is impossible to rely on the herdsmen in the pasture for the meat supply in the market, so many specialized breeding households appeared.

Especially in the frontier, vast territory and abundant resources, it has natural advantages in breeding.

In the border areas, a large part of farming and planting come from the mainland.

I don't know. Because of the wind, donkeys have become a scarce commodity. Dongshan people ask around the world who has donkeys. In the past, no one wanted donkey skin. Now a skin is more expensive than donkey meat.

Therefore, in bar County, where tea is close to the river valley, there is a large farmer. He raised foxes a few years ago and then black and white flowers. After the depression of the milk industry, pigs and sika deer have also been raised. Anyway, he has made money.

The boss's surname is Wang. Boss Wang came from a hard background. He used to live a hard life and couldn't look at his clothes. He stood with a small worker, and others thought he was working.

Frugality can also be said to be deduction. Compared with Zhang Fan's deduction, others are called big deduction.

。 Not only thrifty in food and clothing, but also wash your face once every three days to save water. Hundreds of donkeys factory, took care of two people, and then worked with their three people. It was very hard

Especially in summer, when the donkey is in heat and fighting, it needs someone to intervene. Otherwise, after the two male donkeys bite, the donkey skin will be worthless.

So the old man slept like the adjustment aunt of the neighborhood committee. His ears stood up and he was deeply afraid of donkey fighting.

As a result, something happened that night!

Heavy rain, pouring rain, the umbrella can't hold up. Donkeys are not stupid. They all squeeze into the

shed. I don't know whether one donkey took the initiative to touch the girlfriend of another donkey, or what.

Anyway, it's in the donkey's circle. Stubborn donkey, stubborn donkey, although this thing is not as big as a horse, it has a good temper. Sometimes fighting is an endless thing.

The old man was worried. He took a miner's lamp and a whip to drive away. In the past, when people appeared, the fighting donkeys scattered. After all, they were domesticated, not wild.

As a result, it was estimated that the bad weather affected the donkey's mood. The old man's whip crackled and couldn't break up several fighting donkeys.

In a hurry, the soles of his feet slipped and the old man fell down. The miner's lamp also fell into the mud. It was not old at all. It was in its forties, but it was too stingy and looked like an old man.

The soles of Lao Wang's feet slipped, and the donkeys fought and fled, as if they were frightened.

Lao Wang didn't hurt. When he heard the donkey run away, he was relieved. As a result, unexpectedly, before he got up, a donkey who was estimated to have lost the fight turned to him.

The old man didn't pick up the whip in his hand, and the lamp fell to the ground. He saw a donkey head coming towards him. As soon as he was about to reach out, he felt that his crotch was squeezed by a road roller.

It hurts him. He can't shout out.

This place is not injured like other places. Men who can hurt can hold their breath. For example, when a woman goes down, a man covers his crotch and rolls on the ground, but there is no sound.

Why not shout? Doesn't it hurt? Are you pretending? Is it to touch porcelain?

No, it's because of too much pain. The nerves directly cause the muscles of the whole body to spasm, and even the vocal tract can't shake.

Lao Wang Kou, so he seldom takes a bath. This place is coquettish and smelly. It has a great male smell. It can be said that it is volatilizing the characteristics of men all the time. And Lao Wang also likes to eat money meat, so

As for the donkey, the male donkey who lost the fight was angry at the smell.

I can't beat other donkeys, and I can't beat you? And you threw your legs away and laughed at me?

Really, in summer, thin pants can't stop the donkey's teeth gnawing trees and grass.

Lao Wang's place exudes a strong smell again. The donkey's teeth are like an accurate missile, and he is right at once.

With a click, it was like eating sugar beans, which made Lao Wang's six souls fly five souls.

It's not enough to bite down. The donkey still put his head on it, as if he said it didn't taste good, but he didn't let go.

Lao Wang button, never wear any pure cotton pants, even if he doesn't wear cotton underwear, he buys cheap materials, such as Charles Wang and Dacron. Anyway, which is wear-resistant and which is cheap.

Fortunately, it's not cotton. If it's cotton, it's estimated that Lao Wang's life is in danger. Let alone herbivores don't eat meat. Sometimes they still eat it when they see blood.

The wear-resistant material pants blocked it. The donkey bit and couldn't break it. It was estimated that he was afraid of being whipped, and then quietly drilled into the donkey group.

Then a group of donkeys, like melon eaters, stood motionless and watched Lao Wang roll silently in the mud. I can't even find a killer.

Lao Wang's wife waited for a long time, but she didn't see the old man coming back, so she sent her son to have a look.

Xiao Wang took his cell phone and lit the light. As he walked, he shouted, "Dad, Dad, Dad!"

It's dark and rainy, and sometimes the donkey barks. Young people are a little afraid. He shouted a few times and felt wrong. He bumped his courage and walked forward. Hey, he saw his father rolling in the mud like a clay man.

He hurried forward to see that the old man's face was blue, and the green veins on his forehead were like his father's luck. His eyes were red and wanted to eat people.

But what do you call it? His father is a desperate struggle. Take a closer look, my God, the lower body is full of blood.

Hurry up and drive the donkey cart with his mother and take the old man to the county hospital.

County Hospital, because of the heavy rain, there was no patient in the emergency department, and the single doctor was fawning on a little nurse.

They all held the little nurse's little hand in their hands. Looking at the little nurse's face dripping, he was a little excited.

As a result, two clay figurines carried a clay figurine into the Department and shouted, "doctor, help,

help!"

As soon as the doctor had a brain lawsuit, he walked over with his legs tilted, "what's the matter? What are you shouting? Stop shouting! "

"Kicked by a donkey!"

The doctor angrily took the scissors to cut open his pants. With a click, when he cut and tore open his pants, the doctor immediately cooled from head to foot.

His tent collapsed in an instant.

"Hurry, hurry, send it to the municipal hospital! Come on, stop bleeding while walking, come on! "

Then take the little nurse on the 120, disinfect and stop bleeding. After sending the patient to the hospital, the little nurse who looked at him kept winking at him.

Like an old monk, he read the surgery book word by word without looking up at all. The little nurse left angrily.

He is really scared. He can't relax in a few days! If you scare him so many times, it's estimated that he can take the postgraduate entrance examination.

Therefore, people should focus on this thing!

In the tea vegetable emergency center, the doctor on duty saw this posture and asked Xue Fei to come here at the first time.

Xue Fei's head grew big. The mouth opened and couldn't close, "come on, Zhang Yuan, come on!"

There's no way to call Zhang Fan. This is Xue Fei's big move.

Chapter 942

Because it was a urological disease, the doctor in the emergency center not only called Xue Fei, but also called the urological doctor for urgent consultation.

The urologist came and looked. Darling, his hands were shaking. Compassion, what is compassion.

It doesn't mean that anyone who is poor will have compassion.

Most people feel that they may also encounter this misfortune, so they will be full of compassion.

When seeing old man Wang's injury, the male doctors pressed their chrysanthemums together and their legs were close together, as if they would infect and want to avoid.

"Stop bleeding and pain first! Come on, the patient is in pain and shock. "

The bleeding looks fierce. In fact, it hasn't reached the level of shock. It's mainly painful!

After the pain relief needle went down, disinfected and stopped bleeding, Lao Wang finally shouted, "my mother, it hurts me. God, woo! Woo! Woo! " Sobbing like a wolf.

The urologist trembled as he dealt with it. "Call our director quickly."

In the hospital, not everyone can call Zhang Fan.

One level has one level of reporting objects.

Li Xiong answered the phone and rushed to the hospital.

.....

God is fair. When you are happy, you will open a back window and leave you some regrets. You must not be happy to the end.

It is estimated that there are not many male genital injuries on weekdays. It seems that this injury should be rare.

In fact, there are many damages to the capsule and stem, sometimes alone, and more often both together. Because this place is quite fragile.

If roughly divided, it can be divided into two categories: closed injury and open injury.

It means one is broken and the other is not broken. If you subdivide it, really, men tremble at the literal meaning.

Laceration, avulsion, denudation, rupture of cavernous body, partial or complete fracture.

This is a small part of open injuries. Closed injuries include riding injury, kicking injury, contusion, fragmentation, dislocation and torsion injury.

What does that mean? This shows that there are many cases of injury. If there are no cases, how can there be so many disease names.

It can be said that the names of injuries in other parts of the body can be found here, but some injuries here can not be found in other parts of the body. This is probably the secret door left by God's fear that men are too rampant.

However, fortunately, this place has rich blood flow and strong healing ability. In this place, general injuries and even dislocation can be recovered, and the recovery ability is still relatively strong.

For example, in the early stage of contusion, don't feel pain. Rubbing may be better. Remember, ice compress! Absolutely miraculous.

The general damage in this place, such as severe rupture, can also pull the leopard skin to sew it up for you.

It can be said that it is not afraid of men's own death.

For example, if you put it in a beer bottle, you don't know whether he has nowhere to pee or what, or what's in his head.

Even if this is not enough, some people give it a ring and a rubber band. One circle is not enough, but many more. It's not hair. It can't be tied.

The blood flow in this place is quite rich. When you plug the bottle mouth, wear a ring and tie leather tendons, you feel soft and weak. However, once the blood flow is not smooth and swelling occurs, the severity is definitely unacceptable to ordinary people.

Once swelling occurs, the consequences are quite frightening, and those who are light will lose the function of inheritance.

Severe direct necrosis! If this thing is necrotic, it's terrible. It's like digging a tree, uprooting it, and making a fistula at the pubic symphysis to form an artificial urethra.

Just like the Bumblebee pees in the movie, a dark mouth is really frightening.

Li Xiong came a little earlier than Zhang Fan because he called him early. Li Xiong's position in the

surgical system of tea vegetable hospital is actually quite embarrassing.

He can't be as domineering as the director of other departments, nor as dignified as the director of other departments, so he always has a wooden face, so that others can't see his ideas.

After arriving at the emergency center, he looked at the patient's wound. Lao Li frowned, "we can't handle it. We're going to transfer to another hospital. We can't delay!" After Lao Li finished, Xue Fei seemed not to hear.

Lao Li bit his teeth. Although he could not see the joys and sorrows on his face, his crown was almost instant noodles.

He knows Xue Fei is waiting for Zhang Fan, but Zhang Fan hasn't had surgery in the urology department. In this case, shouldn't he listen to my urology director?

Xue Fei looked like the back of his ear. Li Xiong didn't leave. He stood beside the patient. He wanted to see it today. If Zhang Fan came, he would also say that he would transfer to another hospital. He must teach the young deputy director. He doesn't have to listen to Zhang Fan about everything.

"Stop bleeding, relieve pain, and quickly infuse estrogen. We must calm him down." Xue Fei continued to direct the doctor to treat the patient.

He knows Zhang Fan too well. Although Zhang Fan sometimes doesn't do much surgery in some departments, people who can even win anorectal reconstruction will worry about this, so he ignored Lao Li.

.....

Zhang Fan, who is at home, is comfortable in the dream village at this time. Shaohua had enough time to eat folic acid, and the couple had almost closed the mountain for afforestation, so they had to prepare for a baby.

Zhang Fan completely got rid of the plastic bag containing JJ.

Shaohua is very busy during the day these days. Extracting oil from tens of thousands of mu of lavender is not a simple thing. Although they are not from their own home, they are all from the villagers. Without Shaohua, everyone seems to lack something.

Shao Hua also had to stare at him all the time. Women and men are really different.

For example, when a man is tired when he comes home from work, he really doesn't want to shake his hair. He wants to lie quietly on the sofa in a daze or watch TV, but he doesn't want to move.

Women are different. Their tired legs cramp, but they still have to talk. Shaohua not only talks to Zhang

Fan, but also calls Jia SuYue to complain, "so tired, everyone won't let me go!"

Zhang Fan turned his white eyes, but he also turned them secretly.

In the evening, it's different. After closing the mountain for afforestation, Shaohua doesn't know where to look. It's strange to say that it's easy to get pregnant or have a boy.

Zhang Fan talks about science, she tells you metaphysics!

Tossing around every day, Zhang Fan was very happy at the beginning. As a result

Tired during the day and at night, he finally went to bed in the dark. As a result, the phone rang again. Zhang Fan's hands were sour and his back hurt, but he couldn't go. This is his responsibility.

When I got to the hospital, I saw the trauma of the wounded, not to mention others. Zhang Fanxian's Brothers shook for a while. They were really scared.

"Zhang Yuan, the urology department has little grasp of this operation. The patient is young. Once he loses his function..."

Li Xiong was still responsible. He told Zhang Fan the key. Zhang Fan frowned and said, "you can do it! I'll come! "

Chapter 943

Zhang Fan has seen too many injuries in tea and even quarks. Although there are few industries in the border area, it can't support many mines. Although there are few people, there is a yearning for freedom and a love of driving.

The noodle press shortened the young woman's onion like four fingers, the big truck pressed out her intestines, like a toad shot on the road, and all kinds of mines were smashed unlike people.

There was also a bold and unconstrained northwest man who lit his knife after a disagreement. He was injured in a group fight, and his head was cut off like a blood gourd.

It can be said that Zhang Fan's surgical growth is accompanied by bloody storms. It sounds like a Jianghu boss. In fact, ordinary Jianghu people may not have as many trauma as Zhang Fan has seen.

But seeing the patient bitten by a donkey, Zhang Fan, as a homosexual, really hurts for him. The wound is too penetrating.

To talk about reproductive trauma, we need to talk about the general structure of this thing.

Man's evolution or the God who created man is more stingy. For example, the brain is the most important, so the brain is protected by the hardest bones, and the spinal cord extended from the brain is also hidden in the spine.

The slightly inferior heart and lungs wear a slightly inferior rib coat.

In the abdomen, it directly becomes muscle. No matter how hard the muscle is, it can't compare with the bone. Wait until the male reproductive system, especially the external reproductive system, to tell the truth, there are not many muscles.

The master of creation, like fooling people, created a safety underpants for men. Starting from the abdomen, the lower the muscle, the thinner. For example, many people, such as Zhang Fan, have abdominal muscles.

Although he didn't roll out the iron, Zhang Fan insisted on exercising. Over time, his body is still quite stylish. Strip with meat and dress with style. That's what Zhang Fan is talking about.

Whether you roll iron or not, you can't practice anything if you want to practice without muscles in the lower abdomen.

To tell you the structure of the lower abdomen and pubic symphysis, to tell you the truth, there are no more than six doctors who can speak clearly.

You may think how beautiful the anatomy course in medical school is. In fact, it's all bullshit. Absolutely didn't point to anything and say what stem it was and what lip it was.

Zhang Fan's Renxie teacher was an unmarried little teacher. When he went to the reproductive system, he broke down the male and female organs, and couldn't see the original appearance at all.

Just say, look, there's a blood vessel here, look, there's a plexus here. You should pay attention to it after you get married. It's easy to get hurt here. No one laughed at the joke, because in the face of a plate of things like steak segmentation, they could laugh.

In fact, the human body has a safety pants from the lower abdomen, that is, the so-called fascia. What is this thing? In fact, it is covered in the lower abdomen like thick white safety pants.

Without bones and strong ligaments, I made a little of this thing to fool people. Can safety pants be safe?

Under the fascia is a layer of fat, yellow fat, not thick, but the color is very clear.

Then there are various functional muscles. The function of functional muscles is to make the finger joints flexible like the muscles of fingers.

Below the fat is actually the cavernous body. Many people know the cavernous body. This thing is too famous.

However, in the end, I don't know.

Stem, if you look at it at the anatomical level, is actually a little like the inventor of the word "rocket". Well, it has a little medical knowledge!

The ischial sponges on both sides covering the bottom of the stem support the spherical sponges. If you think about the Chinese rocket to be launched, it's actually quite similar.

It's just a column. There are two small columns under the column to help the column.

In fact, it is three muscles full of gaps, which are full of various capillary venous plexus.

You can also understand that two muscles are supports and one muscle is a gun tube. In fact, the principle is such a principle.

A cannon can only hit far with a support, and a seat can cushion the impact.

So there is fat and fascia in the gap between the three cavernous bodies.

Some parents are worried about their children's little brother. They go to the hospital to take off all their little children. They have to let the doctor see whether it is crooked or not, and whether there is a problem.

In fact, whether it is crooked or not is not a big problem. Just as the muscles of people's left and right hands are different, it is the same reason.

The two muscles of the auxiliary stem are also stronger and slightly weaker. They can't be seen before congestion. When the little boy gets up early in the morning and gets congested, the difference is amplified, and then looks like a crutch, which is crooked.

This is normal. Don't listen to the hospital in a certain field. This won't work. This will affect the couple's life, the length of time, the quality and the hardness in the future. Surgery must be done to correct it!

Then the operation is finished. Well, it's not crooked, but it's not congested!

The massive bleeding of the patient's wound has been stopped, and Du lengding's pain has been relieved a lot.

But Lao Wang was more upset than before he fainted.

Two hands like holding a basketball to the top of the head, trembling eyes desperately want to see their own things, what's the matter.

To tell the truth, just like a cat after ligation, there is sadness in its eyes.

Seeing only two legs is like smashing hairy tomatoes and scrambled eggs.

The red ones are blood and muscle, the yellow ones are fat and, and there are two small balls that tremble when exposed to the air.

The bite of meat eating animals is usually like a sharp weapon scratch, with obvious scars.

Herbivores are different. They are born with big teeth, and the scars after biting are like rotten pieces of paper torn by children at will. Wrinkled skin mixed with black hair and dirt on both legs.

Darling, with the heat brought by hot blood, Sao Qi filled the nostrils of doctors with the smell of blood.

The muscle contracture and convulsions caused by neuralgia are like a yellow bug crawling in scrambled eggs with tomatoes, which makes people have a desire to pick out the bug.

The stem can't be seen. The place where melanin was deposited and the lack of hygiene, the torn skin is stained with blood and fat, and the body is black and red. It's like a frostbitten finger.

She was also given estrogen and wilted. At this time, she was like a scorched catfish, curling her beard, drooping her head and twisting hard in the red and yellow soup.

The place where the big plate teeth are inserted is as black as the eyes of insects!

Pain, coupled with the inhibition of estrogen, should have been reduced to a minimum.

But the edema caused by the injury and the obstruction caused by venous reflux made the stem swell at this time.

Really, as long as you are an adult male, you will really tremble when you see this scene.

be not afraid of? Not afraid is absolutely false.

"You can't delay preparing for the operation. Director Li is right. If you delay again, there will be a problem with the function."

Lao Li wanted to say, opened his mouth, and finally didn't say anything" Zhang Yuan... "

"Director Li has a rest. It's late at night. He Xinyi and I will have the operation."

Zhang Fan doesn't want to tangle with what he doesn't do. The official freshman crushed people. Lao Li is helpless.

"It's been blocked for a long time, but it still hasn't been blocked. It seems that Zhang fan can really do urinary surgery! Why does he know everything? "

Lao Li's heart is twisted. It's too difficult. In front of Zhang Fan, he is not the director, just like a little doctor.

This kind of operation is emergency operation. During the day, nurses in the operating room will generally be grouped. For example, you are a general surgery group, you are an orthopedic group, and you are a gynecological group.

In the evening, no matter what group you are, what group you meet, and what group you do.

Bayin just delivered a caesarean section, and the anesthesiologist shouted, "Bayin, Zhang hospital has an emergency operation, can't you go?"

"Go, go, go! I'll be right there! "

The little girl can be a person. She has a good reputation in the Department.

So they took good care of her.

Although he is a little nurse, his husband's beef and mutton stall and his own salary are very nourishing. She went to the superior hospital for further study for half a year. Now the head nurse in the operating room has trained her next head nurse.

Therefore, he is also a blessed man.

The girl didn't lie on the credit book waiting for her superiors to send apples. She graduated from college and recently discussed with her husband that she didn't want children for the time being. She had a correspondence course and was ready to take down her undergraduate course.

Moreover, there has been a wind of papers in the hospital recently. It is estimated that it is due to the accumulation. Various departments are either cooperating or alone, all wondering about the papers.

When grass-roots doctors rely on their professional titles, they should have papers. In the past, they were asked to write papers, one by one, just like a dead father, because they had to spend money.

Where do grass-roots hospitals have any scientific research, they need papers, which means they need to send money to journals and magazines. A paper that can go up to the national level can't be broken without 10000 or 20000.

Therefore, not only does Zhang Fan have a headache when mentioning the paper, but other doctors also have a headache.

But now it's different. There are many patients in the hospital, many operations and many cooperation units. Slowly, everyone unknowingly began to carry out high-level research.

In fact, it is such a thing. Without scientific research soil, we can only spend money on irrigation. With this environment, we can cultivate the flowers of science and technology.

The hospital is thriving as a whole. Zhang Fan is also happy to see this situation. He has a headache writing his own paper because his master has high requirements. For others, he also spoke at the Council meeting.

As long as the original is not bought with money, the hospital directly subsidizes the cost, and rewards are given according to the influencing factors.

The patient was pulled into the operating room, and he Xinyi came from home“ Oh, what's the matter? Was it blown up? ”

Because Lao Wang didn't like to take a bath, the blood washed the dirt between his legs like dynamite!

"Hey, hey, no, the donkey bit it!" Ba Yin winked at he Xinyi and whispered.

I'm not a bit embarrassed. There's also a sense of not gloating and not being deeply sympathized with!

After all, they don't!

"Donkey?"

Chapter 944

Chinese is powerful. If you want to be accurate, you will never find other meanings in the language. One is one and two is two!

It can be precise, it can also be vague. What's more awesome is that clearly there is no one or person in the whole article. After listening to it and reading it, everyone will understand it at once. Oh, it turned out to be talking about this person or this thing!

For example, Bayin and he Xinyi whispered like thieves. Bayin actually expressed very accurate meaning, that is, biting.

However, he Xinyi didn't have to open her mouth to speak. Looking at her surprised expression, she knew that in her mind, it was definitely dark at night, and a big man was ferociously facing a poor little donkey.

It's true that it's dark, but not the poor little donkey. These donkeys, if these guys can laugh, they may kill a group of donkeys, and then the small newspaper will definitely watch the excitement.

Then there are hundreds of female donkeys. Why did they laugh and die in the middle of the night? Who did it? What is hidden behind the accidental death? Behind all this, is it the distortion of human nature or the decline of morality? Is it the outbreak of sex or the helplessness of hunger and thirst?

Please pay attention to the annual presentation "approaching the donkeys" of XX newspaper at 8:00 tonight. Let's follow and remember to enter the inner world of perverts.

Lao Wang, like what really happened to the donkey, entered the operating room. Before anesthesia, he looked pitifully at Zhang Fan and he Xinyi.

"Doctor, you must use snacks. Really, Lao Wang, I'm still young. How can I live without my grandchildren!"

The painful face is deformed, but the mouth is still nagging. It is estimated that this is also the last expectation of men. I don't know how cruel the unbeaten elder sister who took the initiative to wield a knife was.

"Don't worry, we will do our best! Stop talking. You're going to be anesthetized. What's wrong with

playing! "

He Xinyi misunderstood Bayin's words. Her tone was not very good at this time!

"Speak well!" Zhang Fan glanced at her.

This girl is more proud than Wang Yanan. Not proud or not. Although they are all surgery, Wang Yanan is an orthopedic department, and this girl is a urology department.

Every day, we deal with old men walking around with urine bags. Although these old men can't walk steadily, to tell the truth, they have prostate problems. When they are young, they definitely go out of androgen anytime and anywhere, so they are more difficult to deal with one by one.

Therefore, it's better to keep a stiff face, a pair of unattainable, a pair of high above, a look down on people, and a doctor, so the old men are still in awe of her and are deeply afraid of what will happen to their brothers.

This is also a means. You don't see the little nurses in the urology department. They often cry angrily by the old men. You can't sue others yet.

In fact, the number of patients in hospital departments also has many characteristics.

For example, the old men and women in the respiratory department are thinner and hotter than each other.

Endocrine patients are rich, speak and do things relatively slowly and softly.

In the Department of Cardiology, patients can lose their temper one by one.

Urology, it can be said that it is relatively difficult. People don't get angry with you, but they rely on leather words in strings. If they don't know, they think they are talking about crosstalk.

People who can be laughed at can't stand it. For example, a young girl who is not married is often angry and doesn't cry. When the head nurse asks, the little nurse is embarrassed to say!

Zhang Fan glanced at he Xinyi, and he Xinyi converged a little. However, he probably scolded: "men don't have a good thing!"

Although Zhang Fan didn't let Li Xiong go to the operation, Li Xiong still couldn't let go. Don't look at these people. They were more stubborn than before. In fact, he was still a good man in his heart.

After entering the operating room, Li Xiong had a lawsuit on his face. Bayin also wanted to talk about how the man was injured. Originally, women were curious about this. Without gossip, the raging fire

should not burn people to death.

"The donkey is really funny. It's not good to bite somewhere. I have to bite..."

"Prepare the equipment well. What's curious? Did you think about the donkey?"

Lao Li is furious. It is estimated that Ba Yin is dissatisfied with Zhang Fan.

Bayin's mask protruded. It must be his tongue.

"Director Li is right!" Zhang Fan smiled. This condition is not something that can make people serious.

After anesthesia, start disinfection.

Not to mention animal bites, even if people bite, there are quite a lot of oral viruses.

So it needs to be disinfected.

Hydrogen peroxide does not want money to wipe on the wound, dirt on the body, blood stains after blood coagulation, and the donkey's mouth grass dregs, under the white foam He Xinyi holds the oval and clamps the gauze continuously to wipe.

"How long haven't you taken a bath? The gauze is black!"

She didn't respond to the wound. The dirt on her body made he Xinyi shiver.

After the disinfection, Zhang Fan and he Xinyi had an operation. Lao Li, who couldn't say the operation, went to brush his hands after they brushed their hands and put on their surgical clothes.

Zhang Fan smiled and didn't speak, but he still recognized Lao Li in his heart. This comrade can still be saved.

At the beginning of the operation, you can smile before the operation, and you can't be careless after the operation.

Zhang Fan gently turns over the cracked bag with pliers and probes in with his fingers to feel whether he is damaged.

Only in the bag is actually semi fixed, and the two brothers live in separate rooms. From the outside to the inside is the skin, wrinkled skin. The two brothers are afraid of heat. Their skin is wrinkled and easy to dissipate heat.

So that's why young people can't often take sauna. High temperature really kills sperm.

The skin goes in the fascia, then the capsular septum, and there is an external fascia outside. Therefore, the peripheral tissues layer by layer fix the single and half in the capsule cavity. Without these fixation, you can't find it just along the vas deferens.

Unraveling these outer protective layers is just like peeling and boiling half cooked eggs.

Zhang Fan's fingers probe inside along the crack. Whether it's good or bad depends on the hand feeling. Whether it's round, whether there's a blister feeling, whether there's swelling, and whether the temperature has increased.

It all depends on the feel of the hand. You can't see it. You can't see it for real. Tear down the wrinkled house of others!

Zhang Fan half raised his head and half closed his eyes, as if he were looking up at the sky again. Urinary surgery has not been done before. Although it has been done many times in the system, there is still a gap in reality.

This is that the hand feeling has not been practiced, and the liver is not enough!

"Director Li, touch it." After all, many people have multiple guarantees.

Lao Li is still proud and charming, "little he, you touch it!"

Eager to try, he Xinyi was not modest at all and directly stuffed her fingers in.

The crack is not big. Zhang fan can only put in one index finger, while others just put in all the index finger and middle finger.

He Xinyi touched it and said, "the integrity is OK. There is no obvious gap, swelling and swelling. The temperature is not high."

The itinerant nurse quickly recorded these, which can be regarded as the patient's disease file.

"It's really a blessing in misfortune. There's no problem with Zhang's epididymis. Now you can repair the stem!"

He Xinyi said to Zhang Fan. The Bayin fingers around her are wrapped with silk thread. It is estimated that she also wants to touch it.

"OK, start repairing!"

Easy first and then difficult. It is not difficult to repair the wrinkled skin and fascia torn by the big plate teeth. As long as the action is gentle, reduce the secondary injury and recover quickly.

The hardest thing is actually the sponge. It's brittle. Because it is like a sponge, there are all kinds of gaps, all kinds of gaps, and many capillaries.

In fact, just like waffles, once forced, not only pulling is absolute, because it is layered. Once the opening is opened, there is a problem with vascular reflux, either it can't be filled, or it can't reduce swelling.

The stem is like a wounded insect, full of holes. What Zhang Fan and he Xinyi did in the operation is uncomfortable.

The space is a little bigger. Because the organization is fragile, he doesn't dare to pull it apart with a hook, so Lao Li doesn't dare to take over.

Zhang Fan put his finger in and touched it. He constructed the injured situation in his mind, then put it in with a silk thread needle clamped by pliers, and sew up the damaged place according to the situation in his mind.

To tell you the truth, the operation is quite full. Touch it before suture and after suture. Really, Zhang Fan's operation was quite awkward.

But in Lao Li's eyes, it's different. His heart is full of alpacas flying all over the sky.

"How could he, how could he!" It's not Lao Li.

But the stem repair, especially the functional repair of multiple wound composite injury, is estimated to be the most difficult operation in urology. Although it is not as complex as renal tumor or renal transplantation.

But it's really not easy to let you dance ballet. Lao Li feels that Zhang fan can't worry about it.

When he placed the needle, he felt like he was eating waffles. He could feel the sound between the needle and the tissue as the needle walked through the cavernous body.

Repair, keep repairing, the inside is repaired, and the outside tissue defect can only be filled by cutting a piece of leopard skin. Really, this is this place. If other organs are bitten by a donkey, it will definitely be a pit in the future.

The original hideous thing is even more ugly after repair. There are black thread heads and scars everywhere.

"Will it leave a scar! It feels like it's covered with barbs!" Bayin's idea is always strange. Other people really haven't thought about it.

"Well!" Zhang Fan almost didn't laugh!

"Scarring is certain, but it won't be a barb when the granulation tissue is filled!"

He Xinyi explained.

A black bug made Zhang Fan and his team achieve more than 10 a.m. from midnight.

It's been more than ten hours. After the operation, he Xinyi bandaged the insects like baby silkworms.

"After going back, we must pay attention to urine. Once there is obvious bleeding, we must not be careless!"

Zhang Fan explained.

Chapter 945

After many operations, there are many places to pay attention to. For example, you can't squat in the urinal after hip replacement. You must use the toilet. Otherwise, if you are not careful, you will have to go to the hospital for ten minutes, because after replacement, muscle relaxation is particularly easy to lead to dislocation.

After abdominal digestive tract surgery, you must eat a light diet. Don't feel that you have done the operation. If you breathe and shed blood, you should make up for it! Then every day big kidney, every day big fish big meat.

To tell you the truth, there is no need to mend the blood shed by the operation. If you are greedy, don't rely on the operation. When your feelings are hurt, you have to hide in a place where no one is there to lick. Not to mention the digestive tract, people also have to rest. Resting the digestive tract works better than anything you eat.

After Lao Wang's operation, he suddenly wanted to be the same overnight. There is a kind of money that bastards spend me to earn again. This man used to make Yan Jiansheng ashamed, but once he experienced life and death.

Generous is like the capital of tea. If you are injured, you have to make up. Where you are injured, you have to eat where to make up. What a simple concept!

The man in the donkey farm called the donkey. He killed several at one time. They were all magnificent.

Whether you want to eat meat or revenge is not what outsiders can say.

Braised money meat and cold money meat are placed in large bowls on the table on the hospital bed.

I have to eat it in the morning. I don't even eat a bag. I just eat money meat.

Zhang Fan's first operation on the urinary system was deeply afraid of problems in the prognosis of the patient. He came to the urology ward round in the morning.

As soon as I entered the door, I saw a bowl of meat rings like chess.

Zhang Fan is also a snack. He doesn't know much about fashion. He doesn't know much about any mood or petty bourgeoisie, but he still has some skills in terms of food materials, to tell the truth.

As soon as I looked at the things in front of me, I saw that Lao Wang was going to stretch out his chopsticks and shouted, "stop, don't eat!"

Lao Wang's mouth was open and his teeth were shining with cold light. He probably hated it in his heart.

"You're afraid of excess androgen now. Didn't you see the doctor to give you estrogen every day? You can't eat this! "

Before the operation, Lao Wang was so good. Like children in kindergartens, what did the doctor say? After the operation, after fastening the disposable paper cup, it was like wearing outside his underwear. He learned to challenge!

"I've suffered a great crime. I have to mend it. Doctor, you don't know. It hurt me so much at that time. Why don't you have some!"

Zhang Fan has no way to say. He Xinyi doesn't give him a good face, just like training his grandson“ Do you know how many hours we stood for your operation? Do you know how hard we worked for your operation.

Now I'm not obedient. I'll leave the hospital immediately. What do you like to eat? "

He Xinyi with a tiger face really has the posture of a child general. Lao Wang's wife quickly grabbed Lao Wang's chopsticks. "Listen to the doctor, how can you be as stubborn as a donkey."

Lao Wang had steps and whispered, "it's right to make up what you eat!"

He checked Lao Wang's injury, looked at whether the drainage bag was unobstructed, and then watched he Xinyi change Lao Wang's dressing.

Because of the bleeding caused by the operation, after blood coagulation, the original black and red Caramel stood on Lao Wang's stem. Just like fried eggplant, with white gauze soaked with blood.

Darling, it's really the capital chicken roll sold by KFC with ketchup.

Many things are easy to put when they are put, such as dressing. Simple primary school students will.

A pack of disinfectant gauze, done.

When desirable, it is quite troublesome.

After blood coagulation and dehydration, the adhesion is quite strong. It adheres to the knife edge and the injury. When changing the dressing, it is sour and cool, especially in the sensitive area.

Sticking salt water has no effect at all, and he Xinyi is not in the mood to take it slowly for him.

"Bear it, bear it, and you'll be down soon. Don't shout, what do you shout for a man? Does it hurt so much? "

Just listen to the prick. He Xinyi took down the dressing accessories. For dozens of seconds, Lao Wang was as painful as being bitten for the second time. With tears, he Xinyi is about to call grandma.

The surgical blade and injury recovered well. After Zhang Fan comforted Lao Wang like a frightened little girl, he left the urology department.

There is no need to work. The knife has been lit. Not only Lao Li, but also other urologists don't know the depth of Zhang Fan now.

I didn't shine a knife in the urology department before. We think Zhang Yuan is not good at urology surgery. As a result, not doing is not doing. When they do, they are startled. A group of doctors look at Zhang Fan with admiration.

Zhang Fan is also very proud. He can make them fall in love without the identity of the dean. He is also very energetic.

Tea in May and June has entered the world of flowers. There are wild flowers all over the mountains, especially on the hillside near Tianshan Mountain. The air is sweet, and the flying big headed bees are buzzing around.

Because of the large area and few people, the natural style here is absolutely unique.

Moreover, the long sunshine makes the flowers, fruits and vegetables here different. Even the sugar content of honey is particularly high, and the honey in which flowering season has the aroma of which flower.

However, good things should also be handled carefully. In the past, tea vegetable honey was exported and earned euros directly. As a result, everyone was optimistic about making money, and the government strongly supported it by providing interest free loans and providing honey varieties with high honey production.

I thought I could get rid of poverty and get rich, but I didn't expect that honey could not be sold.

Everyone keeps honey in a swarm. In order to sell well, some people add sugar to bees, and they don't need to collect honey, but directly feed white sugar to bees.

The decline of quality is like jumping off a cliff. Foreigners are not stupid. Don't! Then the streets are full of honey sellers!

Shao Hua's lavender is actually a truth. According to the dimension and sunshine, the frontier lavender is absolutely no worse than the lavender in Provence.

Because the flowers of lavender are not trumpet flowers one by one. They are a bunch of flowers, just like mutton kebabs.

Therefore, the people here are smart. In order to produce more oil, they add a large number of flower stems. There is more oil, but the quality is not good. Frontier essential oils are often supplements to other people's French essential oils.

Shao Hua adheres to the idea of doing what he wants to do. This time, he makes essential oils according to the method of France.

Lavender essential oil is actually steamed out. Put flowers in a large pot, and then steam. It cools out the oil like distilled alcohol. It's tough.

Looking at Shao Hua's tired face, Zhang Fan is distressed.

However, Zhang Fan will not stop Shaohua's work. Can't Zhang Fan afford it? No, after all, Shaohua is still young. Zhang Fan doesn't want Shaohua to leave society.

On the farm, Shao Hua was also a little nervous. In the past, she had no concept. She didn't know how big 10000 mu was and how many things could be produced. Now she knows that just picking the flowers on the edge of the farm is as many as several hills. It can be imagined how many they will have if they are all harvested.

"Do you think lavender essential oil can wake up and repair scars?"

In the evening, the couple were lying in bed. Shaohua was the only one in Zhang Fan's arms and asked uncertainly.

She is a little worried about the market. Her family is not a big problem, but hundreds of farms grow lavender. The income of farmhouse is estimated to be seed money.

Especially Shao Hua and Zhang Fan's parents, the two old people are now enthusiastic. The people with the farm seem to have returned to their youth.

But now it's not what it was. Things can't be sold. It is estimated that Shaohua is the most stressed.

Zhang Fan has no concept, just like people who have just entered the industry, looking at which restaurant has a very good business. As soon as I entered the industry, I knew that looking forward to people coming to dinner was more painful than looking forward to the stars and the moon.

Finally, a guest came. As a result, the food could not come out quickly, which could drive people crazy.

Zhang Fan seemed to have doubts about Shaohua's tone. He thought, "there are still some functions to wake up the brain. After all, it's a pungent smell!"

"What is the pungent smell, the fragrance of perfume volatilization?"

Shaohua pinched Zhang Fan's breast meat.

"Oh, yes, the function of refreshing the brain is. As for the recovery of scars, this is nonsense."

"Hey!" Shao Hua sighed and said nothing.

In the hospital, the doctors of tea vegetable and the doctors of Marubeni get along very well. Although the communication is not particularly smooth, although everyone can speak a few words of English, the original level is average. In addition, the English of Marubeni is as original as the third brother, so gestures are more convenient than conversation.

However, this does not affect everyone's academic exchanges. It is always easier to see than to say.

The papers of ordinary foreigners came out one by one. Surgical refueling and internal medicine are not relaxed. The second batch of people who can go to the meatball country to see the posture of Zhang hospital still have to live in their hands.

Therefore, around abdominal diseases, the tea vegetable hospital has published more than a dozen papers.

It can be said that almost all came out in the same period. After all, we can't just covet Zhang Fan's reward. The most important thing is to go abroad for further study.

Although the standard of the paper is not very high, this grade is still very strong in regional hospitals.

Who doesn't know, the papers of grass-roots hospitals are all measured by the paper company, and how many can be written seriously.

Whether the health bureau or the hospital leadership, it is not difficult for everyone to turn a blind eye.

As a result, when everyone resorted to fraud, the tea vegetable hospital emerged.

Papers are issued one by one. In fact, according to the number, there are not many. In terms of the level of Chinese paper irrigation, many journals are not recognized by major colleges and universities, which is OK according to the Yamen with professional titles.

After dozens of papers were sent out, Zhang Fan felt good. Ouyangle's mouth couldn't close, which means that the hospital began to develop in the direction of scientific research and is no longer a single clinical treatment!

The old lady's mouth hasn't closed yet. She's looking for trouble!

Chapter 946

Generally speaking, China's medical system is a three-level diagnosis and treatment system. Inpatient, attending, deputy director or director, this is a normal treatment group.

Doctors above the attending level sit in the outpatient department, while residents are responsible for and assist superior doctors in treating patients in the ward.

Once in three days, the deputy director or the chief doctor comes to the ward round. If an accident occurs, the lower doctor must report it to the higher doctor within the specified time.

Therefore, residents, attending doctors, deputy chief doctors and chief doctors are not administrative positions, but professional titles. The department director is an administrative position and generally an academic leader in the Department.

Many doctors are called senior attending doctors or senior resident doctors. Once every five years, I pass the professional title examination, but I may not be able to be applied for.

Especially in large hospitals, there are many people and few staff. Often many people have to take the associate high school entrance examination before they can be hired as the attending doctor. Only such people can call senior doctor XX.

In regional hospitals, this competition also exists, but there is not so much pressure at the main level. Often, the pressure is concentrated at the level of deputy director and director.

Rare things are expensive, so if you pass the exam, you may not be able to be hired. How can you be hired? Everyone has similar surgery, and you may not be better than me.

At this time, the importance of the paper is reflected. In an area, there are several senior professional titles in the medical system every year. Therefore, when everyone is fooling with the health system, it is to talk according to seniority.

But tea element is like a dark horse. Papers are popping out, and they are not small Jianghu journals. They are published in class a journals, which is beyond people's grasp.

Some doctors in several provincial hospitals in niaoshi don't want to. There are so many Wotou every year. It's a round of tea.

In particular, some doctors who don't go academically and can only come in turn are worried like bubbles in their hearts. Seeing that he could reach Zhenggao immediately, the tea vegetable hospital quietly took the black hand.

They are angry. Why don't you publish early or late? It's my turn. You start publishing. Isn't this bullying?

A year later than the professional title affects many things, such as income, fame, opportunities, and progress. Unlike schools, it gives you a chance to catch up.

Unless there is a good father in the workplace, it's a little late and wait. If you go to the hospital together in two years, you have to call someone else's director!

Therefore, when the tea vegetable hospital began to make achievements, everyone was not used to it. A camel came out of the sheep. Now everyone is stupid. What should we do? Fuck him!

Some people are like this. If they can't do it themselves, they hope that others can't. They can't eat. When they see their neighbors eating rice, they think about how to block each other's chimney.

Not only did he not want others to work hard, he also tried his best to organize others to develop with his grade in the industry. In their own hospital, for example, young doctors improve the suture method and collect treatment data.

He is just that people don't do their jobs. He also warned young people in a very serious tone not to aim too high, but to learn all his skills first.

There are still a lot of these people. The young generals of that year later joined the University and stayed in the unit. Sometimes if a unit has a strange saying, go and check it. They can't escape these people, either the originator or or the promoter.

They are the most active when the unit or superior sends out any spirit. One day I don't worry about business. I look up and beg to be a leader one day.

Moreover, these people like to have a team, such as what association and what society. Anyway, they are not up or down in some units. The leaders above are embarrassed to say him, and the people below can't say anything about his group.

Together, a party for three or two days is like someone else's Taishan meeting. People talk about business and they talk about gossip.

"Hey, did you hear that the children of the second cousin of Lao Wang's brother-in-law's mother-in-law have become XX officials."

"Hey, Lao Wang, I've solved the problem of your relatives' children going to school. Please find an expert to see my relatives."

There are from all walks of life. Anyway, we can do business and exchange what we need!

There is a doctor here, a member of the First Affiliated Hospital, surnamed Yang. The college students who made trouble in those years also worked as department directors for a few days earlier, but after all, people in such provincial hospitals still have inside information. Before long, he was knocked off his horse

Later, I didn't know how to mix with a graduate tutor, and I didn't suffer from his students. Anyway, they are all related households, either to study or to mix diplomas. What kind of teacher has what kind of students.

After the director was dismissed, he felt that the hospital owed him and did not go to surgery. He received some rich wives in the clinic day by day and worked as health doctors for them.

He had everything, but the chief physician of the hospital couldn't be hired. Seeing that it was his turn, the tea vegetable hospital emerged.

Generally speaking, the frontier doctors of ordinary foreigners all know the tea ordering hospital and Zhang Fan. But he didn't know. He didn't listen to professional things, so he just played with it.

So, he didn't know, and no one told him, who is serious to deal with him.

He wants to build a tea vegetable hospital, which is for his peers. It can't be said that those with a higher professional title are unwilling to deal with him, and those with a lower professional title are embarrassed and can't pull down his old face.

But he has a wide range of ways and many friends. At the party, after eating and drinking enough, he told a member of the frontier newspaper: "Mr. Chen, how is the effect of your Liuwei Dihuang pill? Do you feel much better than before? Don't be busy denying it. I saw you with a female reporter a few days ago..."

"Shh!" The President Chen in Dr. Yang's mouth is the deputy editor in chief of the newspaper. He has a white face and little beard. He is tall and tall. When he was young, he was estimated to be a Xiaosheng.

In those years, his wife coveted his appearance. As a result, after the powerful father-in-law retired, he began to compensate for his lack of love. Of course, he is still afraid of Lao Hu at home.

Therefore, when Lao Yang said this, he looked around like a thief and said with an obscene smile, "cow, the effect is good. I thought I was young again. Eight times a night!"

"Hey, hey, I got you a concentrated pill this time. The effect is better! You can make it! "

"Really. Take it out and let me see! "

It's really a hungry ghost in color. Lao Yang doesn't know where to get the pills. Anyway, he bought a lot of Epimedium recently. It's said that he used a lot when breeding non estrous animals.

"You have to do me a little favor!"

"Hiss!" The deputy editor in chief Chen was breathing in the air conditioner. He was not swollen below and crazy above.

"A little busy is a difficult thing!"

"Look at what you said. I can ruin your friendship. It's not a big deal. Maybe I can give you face. Do you know tea vegetable? "

"I know. Why don't you know? I built the earth in the tea vegetable County for several years. In a poor

place, I haven't thought about it all my life. What's the matter? Who annoyed you?"

"Offend me, tea is not qualified enough. How can we say that we are all provincial experts! I just don't like people in these remote areas. You say it's not good for you to look at the country honestly when you stay in the poor mountain valley. You have to resort to fraud.

You don't know. The tea vegetable hospital hasn't published more papers in class a journals in the past ten years. There are a lot of them.

I'm giving you material. If you expose it, it's the result directly. How difficult the doctor-patient relationship is now, and they are still practicing fraud. Isn't this fooling the superior leaders? "

"True or false?" Lao Chen's eyes are bright. I dare not do it in the system. I'm not doing it yet. It's a small hospital or a regional hospital!

"There's nothing like this. If you have an idea, I can send you materials! I didn't tell anyone else, but I told my brother you. "

Lao Yang, you know!

"All right, do him!"

"Ha ha, yes, take out the end of your bed. As long as you have achievements, isn't the editor in chief yours! Come and have a toast, brother! "

Just as Dalang should drink medicine, Wuliangye drank it.

The dizzy head of President Chen has begun to choose words and sentences. How can I make a sensation, how can I attract everyone's attention, and how can I make others feel that I am a pioneer in cracking down on counterfeits.

Pure wine! I don't know if he will have a chance to drink in the future. Anyway, he thinks he will drink Maotai in the future. Wuliangye doesn't deserve him.

Gone!

Chapter 947

Heaven makes rain, but woe to man.

The editor and Dr. Yang are not big officials. Maybe they are not even officials. But the eyes grow on the top of the brain. You ask him who the capital is, and he can really tell you how he got rich, what his

resume is, what his wife is engaged in, and whether his brother-in-law is a white glove.

I can tell you exactly, just as he promoted himself. As for the truth, different people see different things.

They take this kind of chat as a way to support their status or contacts. In fact, if they really care about it, that is, it's almost right and wrong with the old ladies in the streets. Whose daughter-in-law bought new clothes and exposed her shoulders and meat, and whose man didn't pull the zipper when he went out, the dark ones leaked out!

It's all hearsay and boasting.

But if you let him put his eyes under it, I'm sorry, his eyes are bad!

Even in the bird market, people look up. Ask who has the largest company and who has the most power. He knows it clearly. As for the following prefectures, counties and regions, don't even think about it.

Therefore, one does not know much about the profession, and the other is not grounded. It can be regarded as a character who consciously has a grade and breaks away from low taste. And they are different from ordinary businessmen.

Businessmen speak of harmony, they speak of dignity.

Therefore, I don't know Zhang Fan or tea. Even if someone talks to them, they are not interested. What can a doctor or a regional hospital talk about!

Originally, they could not see and ignored the lower level hospitals. As a result, the lower level hospitals are now too bold to think about grabbing the director's quota.

If you don't give him some color, he doesn't know how many eyes Lord Ma has.

When the times abandoned an industry, they really didn't even say hello.

Who can think that in the future, newspapers and magazines can be reduced to the point that no one wants to send them?

But in 10 years, people are still brilliant. It is estimated that it is also the last fireworks.

Like others, deputy editor in chief Chen's days in the frontier daily are still very moist. Although he can't go up, the welfare of the newspaper office is good. He is also a leader in all kinds of cards during the new year's festival, and his income is even better. If he meets a wronged leader, hundreds of thousands are also good.

The rouge tiger at home is too fierce.

After listening to Dr. Yang's words and taking Dr. Yang's things, he came home, lit cigarettes and made tea, closed the door and said to his wife that he wanted to write a manuscript, and then aftertaste the memories of playing with young people.

Since he can be in the limelight and boast that he is the guardian of the people, he is most willing to do it. He did not dare to scold the government for borrowing courage, and he did not dare to scold his superiors for borrowing two courage.

But he can clean up the units in the lower prefectures and counties, not counting the units in the government system. He can definitely catch them. If the lower hospitals are a big wrongdoer and anxious about public relations, maybe he will have another income.

Not only sold Lao Yang's favor, but also became famous and gained a good reputation, but also got tangible benefits. That's great. Before the manuscript was written, he began to think about how much money it would cost to prepare and tea vegetable hospital.

It's estimated that a new female reporter's plate bright strip exhibition will cost a little more.

Is there anyone in the world who gets rich overnight

Deputy editor in chief Chen has a strong foundation and knows how to attract people's attention.

Sharp pen, sharp language and detailed data. He extracted the number of papers published by the First Affiliated Hospital, the Second Affiliated Hospital, the Central Hospital, the provincial hospital, the National Hospital, and even the Provincial Maternal and child hospital over the years.

Then, the number of papers in the past ten years and the number of papers this year are also listed.

Seemingly adhering to the reporter's neutral report, the article is secretly inducing the public to feel that the tea vegetable hospital is practicing fraud.

At the end of the article, when doctors began to be eager for quick success and instant benefit, and the white coat changed color, can people still count on their benevolence? I would like to advise the leaders of the hospital that the king of Chu has a thin waist and many people in the palace starve to death.

People's eyes are bright!

He can't publish the daytime edition of Frontier daily. But the frontier evening news, which is semi commercialized and more popular with the people, is still OK.

After writing, old Chen Meimei fell asleep. In the dream, he and again

Tea element, Ouyang, who has not been seen for many days, appeared in the municipal hospital. It would be strange if she didn't appear when the hospital published so many papers and showed her face.

Although the hospital papers have gained a lot this year, we can't hold a meeting to commend them in a big way, which is a little too much. However, you can lead the ward round!

Ouyang has a figure of more than one meter five. Although she said she was one meter six, Zhang Fan didn't have one meter six by visual inspection, but people say one meter is a few meters, and two meters is OK.

Old lady Ouyang is in the middle, and Zhang Fan is a little behind, just like Anne baby with her bear doll.

Behind him was Lao Gao, then Lao Ju, Lao Chen, and some middle-level cadres.

"Let's start with the digestive department. The digestive department has given us a face. We can't ignore others."

Ouyang slightly tilted his head and looked at Zhang Fan.

"OK." With a promise, Zhang Fan asked Lao Chen to call the digestive department.

In the past, Ouyang ordered it directly. Now she began to respect Zhang Fan imperceptibly in front of others, but when she was alone in the office, should she scold or scold.

There is no one. Master Zhang Fan is not so strict. It's also a personal style!

The huge crowd walked in the corridor of the hospital department. Like Jingjie tiger, all the family members were asked out of the department ward and waited at the stairs.

"This is the president of the municipal hospital! Darling, what a prestige! I heard it's an expert! "

"Their vice president, the young black faced doctor, is said to be very powerful. Young people have the momentum of stock experts, that is, a little black and white! "

This is a family member whose condition is stable and who will be discharged in a few days. After seeing the leader of ward round, he gossip on one side.

The seriously ill family members, one by one, watched with anxious probes, hoping that the experts would stay in their ward for a while and check more. Maybe there would be a miracle?

And doctors are different. The doctor who published the paper stretched his face hard, but the smiling wrinkles between his eyebrows and feet couldn't be stretched out.

The doctor who did not publish his paper gnawed his teeth with regret.

The most urgent thing is to come to the Intern Doctor. The university is about to graduate. In the past, undergraduate students were reluctant to come here. Now undergraduate students can hardly come in. What can come in is either exceptionally excellent and let the leaders treat each other differently, or his father can let the leaders treat each other differently.

However, most of them don't have such a father. Therefore, those with good foundation and recent solid internships can go to the front and hope to be asked by the leaders. So as to leave an image for the leaders.

And some of the learning is not very good, afraid of humiliation, how obscene, how to come, all want to hide, deeply afraid to let the leaders call names and ask questions.

Those who don't slip in and don't go up and down hope to finish the ward round quickly so as to get off work early.

"Nine patients, patients with cirrhosis after esophageal variceal ligation. At present, the patient's vital signs are stable. After many discussions between our department and hepatobiliary department, we absolutely choose to perform venous modified surgery on the patient. "

"Yes!" Ouyang nodded and Zhang Fan looked at the medical record with the medical record. At this moment, he doesn't have to speak and encourage people! No, encourage people! Ouyang can stretch fan N Street.

"Yes, I'm careful." Then he turned to the patient and said, "you may not know. The doctor has just published your treatment for this disease in the country's top magazine.

His level can be found in the whole country, and he is especially excellent among the young doctors in our hospital. Therefore, we should treat the disease at ease and actively cooperate. If you can meet such a doctor, your recovery is not far away. "

In two words, the patient and the attending doctor are trembling! In fact, Ouyang exaggerates, and the top magazines are divided into three, six, nine, etc. in fact, they can also be operated, but the degree of difficulty is different.

"If you learn it, you should teach it. Which students did you bring? " Ouyang then asked.

Then several interns were eager to try. Ouyang asked a girl who looked like a good student to answer the question.

The question is not difficult. The girl answered very well.

Ouyang nodded and patted the attending doctor on the shoulder. "I recruited you in those years. There was a problem in the Department. I was worried that you would drift with the tide, and finally it was over. But you didn't disappoint me. Yes, keep working hard. I continue to wait for your next good news. Don't be complacent about your previous achievements. "

The short Ouyang patted others on the shoulder. The attending doctor was red eyed and bent slightly. How do you think it makes people feel ridiculous, but no one laughed. One was more serious than the other.

Gastroenterology, cardiology, endocrinology one by one. What patients should do is to wait in the ward when they are about to arrive.

The doctors can't. the Department is on standby. It's almost noon and the stomach is growling. But the ward round is not over yet. Who dares to go.

Respiratory department, Laoju's chassis. This department has the most problems, but the results are also the best.

The reputation of several other departments is created through the number of directors.

The respiratory department was either, or Lao Ju became the director. After a few years of weather, he knocked over the respiratory departments of several other hospitals. At the morning meeting every morning, residential English has become a scene of the hospital. The use of various advanced treatments, not to mention tea, some have not even carried out the bird market. They have been playing very smoothly.

But there are many problems. Like the small kingdom, they do everything, such as drug rebates, big prescriptions and robbing patients.

Surgical patients are robbed in the same department, such as bone one and bone two.

The Department of respiration robbed the sick to the point of shameless, no matter whether you have heart diabetes, anyway, as long as they cough, they will be treated.

It's also strange that endocrinologists are petty bourgeois women doctors. Cardiologists are more and more urgent, while respiratory doctors love money more and more.

For example, Zhang fan used to teach in the respiratory department. He was famous for his love of money. For example, when Li Hui became a father, he took care of the patient's death.

Ouyang also knew this situation. It was hard to say before, but now she jumped out of the third world and said to Zhang Fan when she entered the Department: "the respiratory department is different. Look, the fruit basket has entered the doctor's office. Is the duty room full of milk and fruit? "

Zhang Fan smiled. "The resident director is busy and the clean government construction of the Department is a little behind. It's all my fault. I have arranged too many things for the resident director. I admit my mistake. I'm willing to review it at the hospital affairs meeting."

Lao Ju blushed and couldn't speak. The two sang in unison and put Lao Ju in the air. His face is so hot that he can make pancakes. In the past, Ouyang was hard, and he had to bite his teeth. But now, when he meets Zhang Fan, he can't say that he is too good at being a leader!

The internal medicine ward round ended in the afternoon. It is said that Lao Ju patted the table in the Department.

Surgical ward round can only be put on the next day, because surgeons can't wait. People all go to the operating room and can't do ward round.

While Ouyang was playing with authority, the frontier Evening News published the newspaper of tea vegetable hospital.

Ouyang usually doesn't read the evening paper. People also read Renren daily and frontier daily. As for the evening paper, she doesn't have that Kung Fu.

As for Zhang Fan, who doesn't even watch the webcast, expect him to read the newspaper?

But someone will see it.

Chapter 948

On the farm, Zhang Fan's father and his father-in-law read the newspaper with reading glasses. Although they both graduated from high school and primary school and worked as workers for most of their lives, they are still at the same level for newspapers and network broadcasting.

But it's better than watching TV, selling goods and queuing up to get eggs.

"In laws, come and see. Come and see. The municipal hospital has been criticized."

Shaohua's father saw the newspaper first. His face was blue. He was not angry, but worried. Whether Zhang Fan is excellent or not, the first is his girl's husband.

And it's so excellent and reassuring. To tell you the truth, my father-in-law likes Zhang Fan as much as my mother-in-law looks at Zhang Fan.

He doesn't smoke, doesn't drink, can talk, has filial piety, and has always been kind to people. Sometimes, he thinks how good his eyes were at the beginning. It's estimated that he was open.

Don't talk about making money. Although the couple never said income, it depends on the way they spend money. Buy a car and buy two. There are hundreds of thousands a year!

However, for these things, the old man was filial to his children at that time. He never talked or asked. It was Shaohua's aunts and uncles who occasionally gossip. Shaohua always said with a smile that there was not much to live.

Zhang Fan's father took the newspaper and read it hard with reading glasses. He was a little worried and said, "there won't be a problem. Do you want to rectify the wind before?"

Although they have been leaders, what is the difference between what the young generals did and this.

"No, we can't go to the city. Although we can't help, we can still give children a little comfort. What's wrong with being an improper leader? We can't even eat a hot meal every day. We go to work before dawn and get off work after dark. Even machines have a rest!"

Zhang Fan's father-in-law said to Zhang Fan's father.

"Yes, let's go back to the city and give it to his mother-in-law and her mother first. Don't say it. It's just adding chaos."

"Yes!"

The two old men made a plan in an instant and drove back to the city. I can't even care about chickens, ducks and sheep.

The two old ladies also wondered, what happened to the two old men today? Did they have a draught?

In fact, both of them are worried for nothing. If it's really blowing, can it be placed in the life plate? Can you put it with whose dog bites and who loses something and offer a reward in the newspaper?

Hurried back to the city, Shaohua looked at several old people in surprise when he opened the door.

"Let's have a rest!" Shaohua's father opened his mouth and said nonsense, "where's Zhang Fan?"

"I haven't finished work yet. What's the matter?"

"It's okay, it's okay. Cook quickly."

With that, the two old men sat down and smoked.

"What's the matter?"

Shao Hua asked the two mothers.

"I don't know. No one bothered them. Forget it. Who knows which tendon is inappropriate."

A pot of porridge disturbed in Zhang Fan's home.

Ouyang was directly mad with anger.

"What is the purpose of propaganda? Can such articles be published? Ah, there is no investigation. It is taken out of context. People are innocent and don't want their faces. "

For fear that Ouyang would be angry, the old man of her family secretly sent a text message to Zhang Fan.

"Dean Zhang, Ouyang was watching TV at home. As a result, someone called her and told her that you were in the newspaper in the hospital and that you were cheating. She's going crazy. "

Whose wife is distressed. Although Ouyang is unreasonable, her old man still cares.

Zhang Fan looked at the fog at the end of the text message. Recently, he didn't hear what the hospital had done. His superiors didn't come to check, and the patients didn't complain.

After a while, Shaohua's phone also came.

Shaohua's mother and mother-in-law are easy to fool, but Shaohua is not easy to fool. It is right to say that children see their parents more clearly.

Looking at his father's face, Shaohua knew that something had happened, something big had happened, and it had something to do with Zhang Fan.

She took the two old men into the study. After a few words, the two old men confessed.

Shaohua looked at the evening paper brought by her father. After reading the article, she was also

angry. Although she never participated in Zhang Fan's work, she was happy that Zhang Fan had a high honor. She was sad that Zhang Fan was criticized.

Although it's the evening news and the life column, it's something from the publicity department after all. This thing is official.

Shaohua didn't dare to delay, so he called Zhang Fan quickly.

"OK, I see. Tell your family. Don't worry. It's nothing. Is it our job to make fraud?"

After hanging up, Zhang Fan asked Chen Sheng to find him an evening paper. Chen Sheng thought, "the work has not been done in place, and the newspaper for the president has not been ordered!"

He kept it in mind.

I quickly found a newspaper and sent it to the office without reading it.

Zhang Fan looked for a long time, because it was an article to get rich, Zhang Fan was not interested.

Can articles about getting rich be published in newspapers? In the newspaper, we all know that making a fart is better than going to the bank if your hair is dyed yellow!

After reading the article, Zhang Fan thought a little.

"Dean, I'll review. I didn't order all the newspapers for you. I..."

"Come on, what and what. Look at this article. The old lady is angry at home. You call the old lady to the hospital. Don't bully the old man at home. It's not easy for the old man. "

Zhang Fan didn't take it seriously. One generation is different from another. People after the 1980s lived in the era of the most drastic changes in China and experienced things that had never been experienced in previous generations, so they are relatively more Buddhist.

Chen Sheng's eyes brightened when he saw it, but he didn't speak.

"Dean Chen, tell me, we didn't burn the incense of that temple. Or because the God learned from the Scriptures, he even got a newspaper to denounce us. "

"Dean, this was done by professionals. It's not the people in this line who worry about this matter, and it's the people in bird city hospital. I'll ask who wants to be promoted this year. It's among these people!
"

After a while, Ouyang also came.

It's coming soon.

Enter the door with a black face.

"All know?"

Zhang Fan nodded. Chen Sheng quickly got up and said yes, and then made tea for the two leaders. Although Chen Sheng is now the vice president, in fact, he mainly did his previous work, and still did his previous work to death.

"You can't give up this matter! The common people are easy to cheat, otherwise they really think that we are cheating, and our hard work will be in vain. "

Ouyang's tone is quite severe. It's been a long time since he was so angry. Zhang Fan thought, "as for!"

But I didn't say.

Then Ouyang began to assign a task, "go to the Publicity Department of our city with President Gao and take the newspaper.

Zhang Yuan and I went to the city to find leaders. I just wanted to ask, is this still popular now? "

"OK, after I come to the hospital tomorrow..."

Ouyang directly interrupted Chen Sheng's words and went directly tomorrow instead of coming to the hospital. Zhang Fan came home to pick me up tomorrow morning.

.....

Zhang Fan, who thought it was unnecessary, came home and saw the uneasy look of his family. He was angry and wanted to chop this thing with a knife.

It's so bullying that the four old people are scared like chickens in winter. They almost tremble.

The frontier evening news, as far as the frontier people are concerned, can't even get out of Xingxing gorge. It's not like other big newspapers.

But there is still influence.

"I said, a regional hospital even equipped with a helicopter. The Dean played well. Now, people's newspapers have disclosed that piaji once, the egg broke!"

"This kind of hospital should be closed, and the leaders of this kind of hospital should eat peanuts!"

There are many good things. Looking at the newspaper, I wish they had replaced the police.

However, it can't blame the people. Sometimes, the hospital does too much.

Add money to any operating table and give an abortion to anyone. People don't know what kind of hospital you are. They know that these guys have lost their conscience.

The director of the health bureau took the evening paper as if he had drunk honey. He knew that although there was no way to take Ouyang, he just wanted to see Ouyang unhappy.

Otherwise, I train like my grandson every day and can't vent my anger. Now it's good. The stone is big and meets a hammer.

"I won't go to the tea vegetable hospital to see a doctor in the future. It's so hanging. What combination of professors and experts from meatball countries and what golden mean come here to establish a laboratory. It's too fake. They're trying to raise the outpatient fee! "

Some people understand, "this article is a bit sensational. The municipal hospital has made rapid progress in recent years! Ah, I don't know whether the newspapers now believe it or not! "

One night, the tea vegetable hospital became the object of discussion in the tea vegetable area. As for whether the tea vegetable hospital is fooling people, we have become two factions.

It's very!

There's something wrong!

And Zhang Fan is gnashing his teeth to ease the old men and women.

"I'm really not corrupt. Oh, why don't you believe it? You drive your car. I earned it hard."

"Son, I'm a little poor and I don't eat well. In fact, it's okay. You can't greedy for public things for this benefit!"

Zhang Fan's mother tried to persuade him.

"Your father and I have been in the factory for thirty years. I haven't taken any iron wire or screw in the factory. I'm poor. I'm ambitious and upright. Who dares to gossip about me? I can slap it in the face because I'm not ashamed of you.

If you really take someone else's money, return it quickly... "

Zhang Fan was crazy. "Tomorrow, the old lady can't keep her temper. She must let it out and let them see how many eyes Lord Ma has!"

Shao Hua didn't worry much. Zhang Fan's income was clear to her. She was engaged in finance, so she was very relieved.

"Did you provoke anyone. These days, if you're busy with your work, you'll be busy with yours. I'm an old man at home. Don't worry, I'll give them relief tomorrow, and they'll be fine.

It's just an evening paper. Look what they value! "

The old man and the old lady are like this. As long as they can be on TV, they think it's true. As long as they can be on the newspaper, they think it's right. This is not the trust in TV stations and newspapers, this is the trust in the government.

Chapter 949

Early in the morning, tea vegetarians in the summer morning, the city is like putting big mirrors on the street. Because of the snow, the weather is hot for a few days, the snow mountain will adjust, and then it will rain heavily at night.

When people get up, the accumulated water formed by the rain on the street slowly ripples in the breeze. The blue sky, pink flowers and green trees are reflected in the ponding on the street, which makes people feel like living in the legendary Peach Blossom Land.

However, few people see this kind of scenery, because after the morning peak, cars, bicycles, motorcycles and Breakfast sellers on the street are scolded by passers-by because the accumulated water is splashed by passing cars.

During the traffic jam, the driver's restless horn and his head stretched out of the window shouted and scolded, "Hey, x, you immortal, oh, won't you go forward a little, let me go first!"

All of a sudden, let the city live. After running in the morning, Zhang Fan entered the anxious city from the fairyland. He was not used to it at all. He likes a quiet and beautiful city and a city full of life.

Before Shao Hua had eaten his breakfast, Ouyang began to call.

"Where have you been? Shall I go downstairs now?"

Zhang Fan couldn't eat any more with steamed stuffed buns. He hung up the phone and hurried downstairs, "you can't go until you eat!" Shaohua chased out.

"What are you eating? The old lady probably didn't sleep all night last night. She's waiting for the sun to rise and look for something!"

Zhang Fan said as he walked, Shaohua still stuffed him with a steamed stuffed bun.

"All right!" The old people were relieved by Zhang Fan and Shaohua, but Zhang Fan's mother always felt flustered.

"Mom, don't worry. What should he do in the morning. You can rest assured that I know exactly how much money he takes every month. There will be no problem. "

.....

After entering Ouyang community, I found that Ouyang had gone downstairs“ European Academy! "

"Why so slow!" Ouyang rolled his eyes and got into the car. It's not too late for a gentleman to take revenge. It's hard for Ouyang to spend the night.

He helped Ouyang into the car. The car was too high and Zhang Fan didn't get the pedal. It was a little difficult for the old lady to get on the car, but the old lady loved to sit.

After getting on the bus, Zhang Fan felt that the old lady was very angry, such as the puffer fish to be fried. Unexpectedly, after getting on the bus, the old lady began to talk about strategy.

"I've made an appointment with the leader. When you get to the place, you first report the recent achievements of our hospital, especially the income. Don't keep it at all. If the financial subsidy is not subsidized, you can't hide it.

I'll wait for him to open his mouth! "

"Oh!" The sweat is coming down. It's too chicken thief. The person who wrote this article must have cried.

At the office, the Secretary politely invited Ouyang and Zhang Fan into the office.

You're welcome. No, you can't. a person who dares to pat the boss on the table and a boss who is polite when he sees it, can you be polite.

Make tea in a white porcelain cup. When the Secretary closes the door, the leader smiles and says to Zhang Fan and Ouyang: "I tell you the truth, the government is really poor. The wages of government personnel have to go to the bank to prevent waterlogging and heatstroke in summer. Your subsidies..."

The government leaders thought Ouyang was threatening to ask for money. It was said at the meeting. Privately, he thought Ouyang and Zhang Fan would give him this face.

Unexpectedly, Ouyang didn't come for money. She said to the leaders: "how can we not understand the difficulties of the government? We are also tea vegetarians. In recent years, the city has undergone earth shaking changes. Without the persistent development of the leaders, there is no today.

With the development of cities and a large population, hospitals can improve their technology, otherwise they are castles in the air. "

I've been immune to flattery for a long time. When the leader heard that Ouyang's sun was rising in the West today, he looked on guard. Make up your mind and be careful.

Ouyang looked at the leader's cautious face and said to Zhang Fan, "Zhang hospital, report to the leader the work of the hospital during this period of time."

When he came, strategy and tactics had been discussed, so Zhang Fan was ready.

After looking at the leader, the leader smiled at Zhang Fan's face.

"Well, I'll listen to the results of our tea star unit, but I'll have a meeting later. You see, isn't it..."

Zhang Fan immediately said, "let's try to make a long story short."

Then he began to report: "last year, the income of the hospital was \$3 billion, mainly from the medical treatment of local people and the income of people in surrounding areas.

In the first half of this year, our income has reached 3 billion yuan, and the decline rate of medical treatment of local people and surrounding people has increased, while the medical income of Stan countries and other provinces has increased significantly..."

Listening to this report, the leaders are very confident. Who says that we don't have a big enterprise, which can create foreign exchange? Why not a big enterprise!

The results are brilliant.

At the end of the report, Ouyang directly said: "at present, the hospital has reached a bottleneck height, but the hospital has not been reasonably protected by the government! It is estimated that this year's income will be so much, and it is estimated that it will fall off a cliff in the second half of the year. "

The leader's eyes are round. Don't you take a knife to gouge out the heart and flesh!

"What's going on!" The leader's tone is quite serious.

Ouyang immediately handed over yesterday's evening paper.

The more the leader looked at his face, the darker his face became, and his fingers turned blue and white.

"Did the hospital fake?"

"No, every paper is the result of our doctors' hard work and research. There is absolutely no fraud. Some people are jealous. "

As soon as Ouyang finished, the leader directly patted the table and said, "this is nonsense and deceives people too much!"

Then he picked up the phone and called the Secretary in, "go and invite the leaders of the publicity department!"

In bird market, editor in chief Chen and Doctor Yang smiled with the newspaper.

Because the people responded strongly, they didn't expect to cause such a sensation.

Just when Lao Chen was thinking about his extra money and Lao Yang was thinking about his professional title, an official letter from the tea vegetable government was sent to the frontier newspaper.

The frontier newspaper is a department level unit, and the tea vegetable family is a sub provincial unit. What's more, the leadership of tea is still the stomach and intestines of the frontier, which is great.

After an accountability official letter was sent to the frontier newspaper, there were chickens flying and dogs jumping in the newspaper.

Editor in chief Chen and Dr. Yang drank the celebration wine at noon. Editor in chief Chen proudly boasted to Dr. Yang about his position in the frontier news industry. At this time, the phone rang.

As soon as Lao Chen saw that he was his immediate boss, half sober and connected with the phone, he heard his boss's roaring voice: "why aren't you on duty? Where are you going? Is that how you work

with your salary!"

The frightened old wine woke up directly and said with his tongue tied, "I, I, I'm going to collect wind!"

"Pick a fart and get to the newspaper office in half an hour, or don't come later!"

The leader of the newspaper directly burst out rude words, and Lao Chen's legs were soft. His face was pale with fear.

Lao Yang asked in wonder, "what's the matter? Who dares to threaten you if you don't respect the position of the newspaper? "

Deputy editor in chief Chen didn't have the desire to speak. Holding the bottom of the wall like a disordered drum, he tripped and ran out.

Chapter 950

Zhang Fan's idea is very simple, that is, to clarify in the newspaper. It is the mistake of the newspaper. First, to return the innocence of the hospital. The hospital is originally a place where moral standards are required, such as analogy schools and police.

Second, let the family rest assured that they don't count on what they say, but they still need newspapers or television to clarify.

Ouyang's thinking is not simple. It's too easy to clarify! She asked the other party to admit her mistake, publish an apology in the newspaper, and then took advantage of the situation to make a wave of advertisements. Can you let go of Ouyang's bite.

The tea vegetable government is confident this time. The boss of tea vegetable and Ouyang stand on one side. Although they were not the opposite in the past, they calculated each other most. This time, everyone has the same goal.

But the news system doesn't look at it. It produces newspapers and sells newspaper lists, but people are under the control of the publicity department, and then under the control of the news department. The meaning of the bird market is also big and small.

Let's stop making trouble and remove the party from his post, will you?

Ouyang is willing or unwilling. Now it's not the matter of the parties, it's the matter of two units. Do you have a press department? I have the Ministry of health!

The newspaper gritted its teeth and said it was a mistake, not a mistake. The hospital insisted that it was a mistake, not a mistake.

Often collective to collective, when personal interests are involved, in fact, it can't last long. For example, the superior told the hospital president to take into account the overall situation.

The Dean absolutely cares about the overall situation.

But Ouyang is different. She doesn't want to go up again. How important she sees the reputation of the hospital is something that others can't understand.

Just when the two sides were entangled, mango station broke another big news.

A few months ago, Zhang Fan performed thyroid surgery on a singing girl. The surgery was so perfect that he could not see the surgical scar when stretching his neck. Under the spotlight, he could see the white neck like a swan. Where were the scars?

The little girl also worked hard and sang until the final. Single parent families earn tuition by singing. They are also frontier people. They are also beautiful and sing well. They are more inspirational and have more positive energy. Everyone also likes this little girl like a fairy.

The final fight was particularly fierce. The last song of the little girl, grassland night, sang emotional tears. I won the championship without accident.

At the time of award presentation, the girl lost her grand stage style and was shy.

The host asked the girl to say a few words. The girl thought about the hard life over the years. When she almost gave up singing a few months ago, tears swirled in her tears.

In the close-up lens, everyone can't help feeling sorry for her. It's only when people win the prize, not before they don't win the prize.

"I thank my mother..."

Finally, the little girl said emotionally, "I must thank our frontier tea vegetable hospital here, especially Doctor Zhang. At that time, I was disillusioned and felt that my life was over.

As a result, he smiled and said to me, how old are you! Don't worry, there's no problem with the operation. You won't leave a scar at all!

Thank you, Dr. Zhang. Thank you, the medical staff of tea vegetable hospital. Thank you! "

If mango station is bigger than frontier daily, it is estimated that frontier daily is not enough.

Not to mention the frontier, in China, people's mango talent shows are quite fierce. From grassroots to tomorrow's star, who doesn't want to pay too much attention.

The frontier people, especially the tea vegetable people, were silly. "I'll go. I'll say that our tea vegetable hospital is very awesome. Don't you see my idols have surgery here."

"Yes, the tea vegetable hospital is very powerful. Last time I had hemorrhoids..."

"Maybe it's to operate on celebrities. It's more attentive!"

"She wasn't famous at that time!"

The frontier Daily has been waiting for this matter to drag on for a few weeks. No one will pay attention if everyone has no passion. If you want the newspaper to apologize, think again!

As a result, the stars of mango stand up.

The leaders of the newspaper were angry. Whether it was tea vegetable hospital or not, they didn't expect it.

Deputy editor in chief Chen was unlucky. The unit hung him up first and didn't say how to deal with it. Aren't you good at writing, so write your experience!

The newspaper is tough on the outside and not soft on the inside. Let you make trouble for me. Is it easy for deputy editor in chief Chen to go now with his wife at home and sit in front of his desk.

Looking at his own review, he had a dead heart and changed it eight times. The superior also said that he didn't know deeply. He even wrote out his hatred for the teacher when he couldn't wear a red scarf when he was a child.

When the unit asks for trouble, the female tiger in the family is like eating people. Eating a meal with yellow teeth and blood mouth is like a gift. Really, he can eat Doctor Yang raw at this time.

Lao Yang also feels that things are wrong now. The phone has blackened Lao Chen. What brothers and

friends are too childish.

The tea vegetable government took advantage of this trend, and your newspaper was very hard spoken. I advertised on TV. I didn't say anything about soft and hard advertisements, but also pointed at the newspaper.

Why, not for others, just because the tea vegetable hospital is now the largest profit-making unit in the tea vegetable area. What winery and pastoral area are brothers in front of the tea vegetable hospital. It is not easy for their own area to produce such a hen laying golden eggs. Can we not protect it.

When everyone slowly wanted to forget this matter, the tea vegetable hospital was put on top of everyone's conversation after dinner.

There is such a special city in the frontier. There is a lot of coal. There are also a lot of coal in other provinces, such as Xishan and Xishan. However, it must be dug deeply. If it is not done well, there will be an accident. Moreover, because the coal mine belongs to a relatively single coal mine, so

The city in the frontier is different. Firstly, its coal mine is a large open-pit coal mine with less sulfur. It is the best smelting coal in industry. Moreover, when the coal mine was discovered, the place was already a large farm.

This kind of farm was a soldier at that time. Later, although the gun was put down, it was still no problem to pull out and kill several stans around, so ordinary private bosses can't take it down at all.

People play with explosives more smoothly than private bosses. Finally, the farm shares and Huamei chemical established a four unlike enterprise. With good luck, they can't stop it.

Coal mines were discovered one after another, and then oil and heavy metal mines came out. Darling, it will develop next time.

This city is estimated to be the earliest time when China entered the textbook.

Medical treatment and education are free, and the house is distributed. Even meals, there are resident canteens in each community, and they are free. Three meals a day and subsidies are given to give birth to children. Here are not married girls, but generally recruit a son-in-law. Who would be foolish to leave such a place.

Although the city is small, it is particularly harmonious, and the relationship between people is quite harmonious. Bus drivers feel as if they have a sense of ownership.

Material is up, but some things can't be bought by money at once. After all, the place is not good. It depends too much on the country. For example, their medical treatment is reluctantly.

Although free, but we are not short of money ah, sick directly to the bird market. Local leaders don't

think it's a thing. We have money. Why can't we invite a great God.

People's high level is not comparable to that of a deputy editor in chief of a newspaper.

We thought about it and finally chose the tea vegetable hospital. Zhang Fan's followers are understood.

And recently, there seems to be a wind blowing crooked tea element. In the spirit of providing charcoal in the snow, the city directly invited tea element.

If you invite, you can invite. They also put the invitation on the TV station.

It means that our city hopes that the tea vegetable hospital will come to our city for medical treatment!

Ouyang never dreamed that bad things could turn into good things. He continued to fight a lawsuit with the newspaper, and then hurriedly sent Zhang Fan back to organize people to go to the coal city.

This is a local tyrant. When Zhang Fan left, Ouyang specifically asked, "bring more people and let them see our power! Drive the most advanced surgical vehicle in our hospital! "
