

## Chapter 951

Ouyang sent Zhang Fan away. She didn't finish the calculation. She finally caught the opportunity. It's not her character to leave the bird market so easily. Especially this time, the tea vegetable government also supports Ouyang openly and secretly.

Just as their own bear child finally sent out a disaster to others, it is estimated that they are all relieved. The most comfortable thing is the director of the tea element Health Bureau.

There is a saying that Sansheng is unfortunate, and the county magistrate is attached to Guo; Three evils, attached to the provincial capital of Guo; Full of evil, attached to Guo Jingcheng. He didn't know what level his misfortune was. In his life, he always served as Ouyang's deputy and Secretary of the tea vegetable hospital. Then he didn't wake up from a nightmare.

It's half-time now. The mental outlook of the staff of the health bureau is different with or without Ouyang. In Ouyang's eyes, if the tea vegetable hospital is her own son, the health bureau is the birth of her husband's lover.

It can be imagined how much the director has been wronged.

Not to mention Ouyang looking for something in the bird market. After Zhang Fan returned to tea, he began to call troops and generals.

This is to go to a local tyrant city. You must take out something to make the other party absolutely, well, tea vegetable hospital is still OK.

Zhang Fan has received such a local tyrant City, not to mention others. When he was in the breast department, he met one. The thymus plugs the prosthesis, so that both the mother and the elder sister become breast cancer.

The rich woman was scared to death. Finally, she made an appointment for almost all the experts who could be invited with money from the harbor, to the magic capital and to the capital.

Deeply afraid of her unstable posterior position, she didn't have an operation in other places, but came

to tea vegetable for an operation. Before the operation, the doctor made a ward round. Like a superior doctor, she lifted her clothes and pointed to her chest to tell Zhang Fan about the operation plan.

Really, it's no exaggeration at all. At that time, Zhang Fan was surprised. He thought he met a colleague. At the last question, he knew that there was a mine at home.

Therefore, this time, just like boasting wealth and drying goods, Zhang Fan brought all the equipment he could bring“ On the four-dimensional color Doppler ultrasound belt in Germany, pull the CT beside the bed of Jinmao... ”

Then, the convoy, directly the convoy, told the vast convoy that the tea vegetable government was not at ease. The whole process was equipped with traffic police to open the way. Joking, if something happened, the tea vegetable government would probably cry.

The hospital is not allowed to pull the equipment, and the hospital people do not listen. The government has not paid for these equipment. The pull bar is deeply afraid of problems, so it can only be protected in the whole process.

The drivers passing by on the highway were dumbfounded. The big red card cooluze is followed by a land spaceship on a trip to Europe, then an operation vehicle with the Red Cross, and a small wheel truck Stan got from Jinmao.

Darling, and the traffic police follow. What's this for! The two cities are not far apart. Just like people, they go to school in the same school. They have a mine at home, but not at home.

The income of the two cities can not be compared. People call them small harbors in the north. They are not called northwest. They are directly small harbors in the north. It is no exaggeration at all.

After entering the city, the doctors of tea vegetarians don't envy that they are all fake. The streets are full of luxury cars and even taxis. Passat, who has been joking for 10 years, has no such treatment from the county leaders.

Land Rover, sports cars and even brightly dressed Hummers are everywhere.

The urban construction is extraordinarily foreign, and the streets are extremely clean. The specialty stores on the street are obviously several grades higher than tea.

In the tea vegetable market, checklists and adidi are all placed in shopping malls such as Vientiane exchange, and the clothes signs for riding and the models for selling suits on the coal city street show that I have money anyway.

In the car, men's eyes are fixed on the big legs or luxury cars in the street, and women are also fixed on the big legs and the specialty stores on the street.

"Sister Wang, sister Wang, look, bag, bag of donkey card!"

Bayin pulled Wang Yanan's arm and was excited. Last time she went to the capital to buy a bag, but she didn't have enough time to buy it. I didn't expect that there would be one in coal city. She was excited.

Zhang Fan also whispered in the car. I heard that the coal city was very rich before. I didn't expect it to be so rich.

Children who go out to college in this city don't have to worry about work. As long as they want to come back, they will be arranged here. It can be said that people have arranged from birth to death.

It's great, but it's still difficult to be the top of scientific research and medical treatment.

But for ordinary people, this is directly the dream city.

.....

Bird market, Ouyang, she had a showdown. To borrow the lines of a movie, I don't pretend, I have a showdown.

Didn't you say academic fraud? Then I'll show you what academic fraud is.

From skin transplantation to liver tumors, from liver tumors to intestinal tumors in cooperation with Marubeni.

Ouyang directly gave it to the newspaper, and then took out all the awards for rescue and disaster relief. In fact, there is no need to take them. These have made the leaders of the newspaper sweat like rain.

Is this the district hospital? Is this the border area hospital? Is this the hospital where you can arrange your empty teeth.

Ouyang's persistent posture completely messed up the newspaper. and.

The government feels that this will not work. Finally, when the inspection team entered the newspaper, the leaders of the newspaper were stunned. They quickly posted an apology in the newspaper and sent out deputy editor Chen.

Deputy chief editor Chen was also stupid at this time. He didn't expect to provoke a unit he couldn't afford, and a regional hospital was so forced.

He was unwilling, crying and shouting and confessing to Dr. Yang.

Although it can not be said to be a crime, the superior leaders know this kind of thing.

The president of the first affiliated hospital took the opportunity to directly delegate Lao Yang to the branch of the First Affiliated Hospital, and Medical University also took back Lao Yang's employment letter.

Lao Yang's regretful face was swollen. "This, this, this is such a fucking bully!"

After this time, the frontier medical community finally knew about the tea vegetable hospital. No matter the doctors of internal surgery, this time everyone knew that the tea vegetable hospital was very good.

.....

Coal city hospital, when the medical reform did not start, in fact, in major cities, the equipment of affiliated hospitals may not be the best, and often the hospital equipment of some enterprises is the top.

For example, the affiliated hospitals of the chemical industry and large mines, and even the identification of many occupational diseases are in enterprise hospitals, not local hospitals.

Why? Because other people's enterprises have money, they think these hospital equipment is a small sum of money. They buy 64 row CT and large MRI without blinking.

Some hospitals, such as those in Beihe steel works, developed very well. They could compete with military hospitals in terms of scald a few years ago.

However, the development of most hospitals is just like that.

There is a joke about an enterprise hospital. It is said that the maternity inspection of a pregnant woman from beginning to end is in this hospital. It is said that it is a single child.

Doctors and family members are treated as a child.

Then when giving birth, one was delivered, and the doctor was about to get off the operating table. The midwife shouted, "Yo, yo, there's another one!"

It's a joke. It's sad to think about it. Therefore, coal city had to invite Zhang Fan and them to make a visit.

The hospital in coal city is very large, but it also has the characteristics of enterprise hospital. The yard is estimated to be about the same size as the tea vegetable hospital, but you can't even see a patient in and out.

**Chapter 952**

The welcoming team greeted the medical team of tea vegetable hospital at the gate of the hospital. There are no girls and silver bowl horse milk wine, nor hada embracing highland barley wine. After all, it is mainly Han nationality here.

Although there was no singing and dancing, the level of the welcoming team was very high. The second leader of the city personally took the government officers and the staff of the hospital to meet the tea element medical team at the gate of the hospital.

Moreover, their second leader is not called the chief of the room. They are generally called political commissars, such as League political commissars and division political commissars. A regiment corresponds to a county and a division corresponds to a city.

Ordinary workers and cadres do not carry titles. At the division level, although they can't take out guns to scare Stan, they have military ranks and can be called heads.

In recent years, the scale of such groups around the frontier has gone bad. In the past, a family's regiment was definitely larger than a local county, and now it is shrinking.

However, the development of coal city is still good.

This coal city is very special. It is said that it is an enterprise. It has its own public security organs and laws, and some functional units in local people have them. Whenever something happens, these people become the army again, and even their registered permanent residence is different from that in local areas. It is said that it is the government, but people participate in production and operation, and they should pay taxes every year.

There are several rich cities in the frontier. Although Erdos, who is not famous for selling woolen sweaters, is famous, the output value of others is no lower than that of woolen sweaters.

However, it is an industrial city after all. The black smoke and green trees are dark, and there is a lot of dust. Looking at the street is very clean, you can go shopping for half an hour and touch your face with coal ballast.

But fortunately, Zhang fan can't see it, the nurses are miserable, especially the ladies who have been waiting at the gate of the hospital for a long time. The expensive cosmetics seem to be dotted with countless pockmarks, which is also the characteristic of this city!

There are restaurants in the streets all over the world. Compared with tea, the decoration scale of people's street restaurants is relatively high. If you are serious, the tea vegetable is a small restaurant, while others are restaurants.

For example, the three Sichuan fried dishes of tea vegetable are generally called small three Sichuan home cooked dishes, and others are Sichuan restaurant. The streets are full of cars from side a.

People here are rich. Many people work here, but they have houses in the bird market, so cars usually use side a number plate. Moreover, there are many luxury cars.

Toad mouth Porsche is hardly seen in tea vegetarians. There are many here.

"President Zhang, welcome. I've heard your name for a long time. Although the city is very close, we are always close to the world, but we always have a narrow margin. Today we finally see the real God!"

Zhang Fan didn't expect people to be so polite and have such high specifications. If so, if the boss of the tea vegetable government comes, it is estimated that this specification is the only one.

In fact, the main reason is that people's coal city and oil city are integrated. After Zhang Fan and Li Cunhou rescued several fire fighters in the oil city, Zhang Fan's name became a myth in this system.

Industrial cities, especially chemical cities, have never been hit by fire, and if such cities, such as coal chemical industry, are bombed, it is definitely not comparable to the gas tanks in ordinary cities.

In the past, few people could survive once they were seriously injured. Therefore, the leaders here do not look at the results, but at safety. There were no major accidents when you were in office. Well, this person has a set of management and can be reused.

If there is a major accident and the board is shot, it is usually taken to revise the party history. Chemical accidents, to be honest, can not be prevented.

What should we do? It would be beautiful if we could have a means to mend the way after the sheep have died. Sometimes whether to repair history or be managed for food is decided by two people.

Therefore, when Zhang Fan and others came, they were very enthusiastic.

After entering the hospital, Zhang Fan and their children felt what local tyrants were.

The hospital building has been built for some years. I can't see it from the outside, but as soon as I go in, darling, where is the hospital? I don't know. I think it's a hotel.

The marble floor is as bright as a mirror, which makes people reluctant to stand on it. The window of the high hall is bright. After entering the tea vegetable hospital, where can you see the ground? It's full of dark people.

"There are few patients in the hospital!" The hospital president said with embarrassment.

"It's okay, it's okay!" Zhang Fan smiled. What else can I say? This unit can't be said to expect more people, but there must be a problem with fewer people.

In the office, the people of both sides were divided into two rows, and the political commissar of others did not sit in the middle, but also sat on their side. Here in coal city, first introduce the situation of their hospital.

"After the establishment of our hospital in 57, after several generations of human development, there are more than 3000 medical staff..."

Zhang Fan listens, darling, there are enough people in this hospital. It's almost three times as many as the medical staff in the tea plant hospital.

"At present, there are more than 900 senior and deputy senior talents. In recent years, around President Hu..."

"All right, all right, let's talk about our current difficulties!" The political commissar interrupted the president's introduction. Everyone knew that he was asking others to help.

What you said seems like you're very awesome. There are thousands of senior and deputy senior people around... Why do you invite people here! One is better than the other, and one falls faster than the other at the critical moment.

The leaders of coal city are also depressed. Such a large hospital and so many experts can't help at the critical moment. They transfer to another hospital and ask for superior support. It's embarrassing to say so.

In fact, this is the problem of most enterprise hospitals. After all, people's main business is not medical treatment. Although they have money, in the early years, when everyone was very poor, people's hospitals were really awesome.

But with the development of the enterprise, there is no pressure to breed within the enterprise, and the income is guaranteed in drought and flood. Slowly, with the development of the times, these hospitals have become the current state.

Bloated and powerless.

The president of the hospital was embarrassed to death. Listening to the political commissar, he was almost dead. He was as sad as a mother.

"Hehe, let's get to know each other slowly in the next work. After all, the hospital is specific to the point. It is said that it cannot be cleared. Let's discuss each other in our work! "

Zhang Fan smiled and solved the siege. Frankly, he came to make money, not to make a face. There is no need to embarrass others.

"Let's introduce our personnel and equipment. Leaders are requested to inspect in the next work.

The medical team of our tea vegetable hospital consists of 30 members, including internal and external women and children, testing, radiology and so on.

The equipment includes bedside CT, four-dimensional color Doppler ultrasound and on-board Dr.

There are also rescue operation vehicles, of which d3r9 vehicles are equipped with comprehensive operating bed, anesthesia ventilator, desktop rapid steam sterilizer, operation shadowless lamp, monitor, multi-functional operation flushing machine, defibrillation monitor, bone marrow intraluminal injection system, micro infusion pump and other medical equipment and instruments.

Early surgical treatment or emergency surgery can be carried out by installing auxiliary devices such as oxygen supply system and air disinfection device.

It can realize aseptic operations such as appendectomy, gastrectomy, enterotomy, thyroidectomy, hernia incision, cholecystectomy, tumor removal, internal fixation of fracture and gynecological delivery.

It is the most advanced surgical vehicle in Asia... "

Zhang Fan solemnly introduced the personnel and equipment of his team. In fact, it is to show off his wealth. This is what Ouyang specially asked. Chen Sheng pulled out all the manuscripts. I don't know how many beards he wrote.

How can you show luxury in a low-key? To be honest, it's too difficult.

Zhang Fan bowed his head and was embarrassed to look at each other! Is there such a rich man!

The commissar didn't understand, but he seemed to be very powerful. He kept nodding his head as if taking notes. And others don't believe it.

"Boast and return the most advanced in Asia!"

"It's bullshit. There are more than 3000 operations a year. Why doesn't he say that their hospital has 30000 operations a year!"

The leaders of several hospitals looked at each other and seemed to say in their eyes: "the young man doesn't know how to do the operation. He is very good at boasting!"

Ouyang thought that we came from a poor place. If we want to make money, we can't let others look down on us. Unexpectedly, these people don't know the goods!

### **Chapter 953**

Some people, usually gentle, whether acquaintances or strangers, have contacted people who say, well, this is a very cultured person.

But once you get in the car and get on the road, be good, it's great. Those who are slower than him are second goods, and those who are faster than him are madmen. Anyway, people on the road can't overtake his car.

There is also a peer. For example, when Lao Hu looks at Lao Shen, his eyes are picky. He just thinks he is better than him.

The leaders of Meicheng hospital felt that Zhang Fan boasted. In fact, they also had this mentality. Local hospitals broke their head in pursuing further study, but no one in enterprise hospitals rushed to study.

Because people have enough places, otherwise they won't have 3000 people, one-third of whom have senior professional titles. So I don't see much, and I don't want to pursue a higher level, so I'm a little sit back and watch the sky slowly.

While introducing Zhang Fan, the political commissar quietly pointed to the name of the equipment on his notebook and whispered, "do we have this four-dimensional color Doppler ultrasound?"

"It's useless. Just like ordinary color Doppler ultrasound, what we can't see clearly, his can't see clearly."

"Do we have this?"

"This film is printed. We have a special film development room!"

"Do we have this car CT?"

What's as like as two peas, "this is for external surgery, actually doing CT in operation room is exactly the same as CT in the operation room."

Two people ask and answer, fooling laymen is really such a thing.

"Where are our things expensive, or are their things expensive?" If you can't find out technically, the political commissar will directly ask the price.

"Well!" The Dean muttered and muttered, and the political commissar stared at him.

"Almost! The price difference is not big. Our CT is several times larger than his CT, which is a little cheaper! "

The equipment in those years had fallen behind. Later, there were not many patients when buying equipment. The things you bought were just like goods!

The president of Meicheng hospital looked at Zhang Fan and said in his heart, "what's the use of good equipment? Isn't our equipment good!"

After the meeting, it was generally harmonious. The political commissar left after the meeting. He specially asked the tea experts to have a good rest and take good care of their lives.

Of course, the hospital leaders are obedient. Anyway, if there is no patient, we should eat first!

They don't have to go out and directly entertain the medical team of tea vegetable in people's canteen. At first, Zhang Fan thought that the Dean was very good. But the meeting meal doesn't matter. Just eat enough.

As a result, I was stupid when I entered the door. A three inch thick carpet was spread from the door to the hall, with big peonies in the middle. Zhang Fan thought it was too much in the hospital!

It's very popular. Buffet. Roast duck, cold water fish, prawns, abalone, and even sea cucumber like a big mulberry!

This makes a group of tea vegetarian doctors more and more angry“ Master, look, look, look! "

Wang Yanan takes the prawns and wants Zhang Fan to have a look! Zhang Fan said angrily when dealing with fish: "you eat more elegant. If we have a mine, we can get you a canteen like this, but we don't have it. Now we invite tenders!"

Wang Yanan glanced at Zhang Fan and thought, "let me eat more elegant. You're almost eating your tongue yourself. It seems that Shao huahungry is looking for you. "

Looking at a group of doctors staring at seafood, the president of Meicheng hospital gracefully ate some cake, smiled and said, "there are still few seafood in Northwest China!"

If there are any leaders, there will be any soldiers. Everyone is afraid of losing face and eats. If they are in the restaurant in the operating room on weekdays and just listen to the sound, they think they have entered the pig farm!

It's too fierce to eat!

.....

Ouyang kept on in the bird market, and the government was annoyed, "what are you doing, a lesbian!"

Ouyang is waiting“ Why didn't the master's program we applied for be approved to us? Are we easy to bully? Today's newspapers bully and tomorrow's schools bully. Are we the people's Hospital and the party's hospital? "

People are more reasonable than anyone.

"Your qualifications are not enough. You don't even have a famous academic leader. Don't say Zhang Fan. His level is high, but he is not young after all!"

People didn't tear their faces and say that he graduated with a master's degree!

Ouyang smiled and said, "look, old Lu and old Wu are already visiting experts in our hospital. Look at the president of Foreign Affairs..."

Darling, Ouyang's list was taken out, and the president of Medical University began to shake his hands.

This is not the posture of applying for a master's degree. This is the posture of becoming the president. The medical university doesn't even have an academician. She got two. What are you doing!

The headmaster is crying. It's too TM bullying.

Your hospital's eyes are higher than the top. You cooperate with the golden mean today, with foreign cooperation tomorrow, and with Bluebird the day after tomorrow. When did you ask me? Now you

want a master's degree. You have red mouth and white teeth.

Can I grant it to you? Therefore, the master's degree of tea element can't be approved.

Government leaders feel that they owe the tea vegetable hospital, just like mud, "we must study this matter carefully! Don't worry, you must! "

Ouyang went home with satisfaction. It is said that later, the leader of bird market said to the leader of tea vegetable: "this female cadre is not ordinary!"

.....

The doctor, who eats and drinks well, began to work.

The leaders of Coal City attached great importance to it this time. They directly ordered to have a physical examination!

First line units first physical examination!

If a city orders and wants a city to act as a whole, it is difficult to tell the truth. Unless money is paid, even if money is paid, it may not be able to mobilize all people, because some people don't need money.

And the quality of this kind of city, which has been trained for decades, is really enviable. The government order is like a horn, really, quite powerful.

All units began to transfer classes for physical examination. People entered the hospital like ants. Even retired old men and women came to the hospital to ask when it was our turn.

The government has also given a saying, first on the job and then retire!

When a large number of employees came for a physical examination, the doctors of tea vegetable were not envious.

Because there were many workers who were injured at that time, in their early years, Lao maozi turned his face. At that time, the country was unable to find oil fields or did not have the technology to dig. Anyway, even the cars in the capital were wearing leather hats like ah San.

What's in here, liquefied gas.

How did the liquefied gas come from at that time? Coal chemical industry. Turn coal into a combustible gas. At that time, the technical conditions were poor. In order to meet the needs of the country, to tell the truth, these people really suffered.

I don't want to climb the ice and lie on the snow. I just want to say that the conditions at that time can be met if there are conditions, but also if there are no conditions to create conditions. Accidents often happened in those years, and workers would be burned if they were careless.

It's rare to see so many severe burns in agricultural cities. The first batch of physical examination workers were watched by tea doctors. They didn't feel good. Dozens of such workers are really incomplete. Many people are retired or gone.

The existence of this little bit of workers has made doctors hold their hearts.

We have all seen coffee colored silk stockings. When a person's face is attached after being burned by chemical oil, the fat and skin on his face are burned together in an instant.

Then, the undulating tissue of the face almost became a flat plate, and the nose, eyebrow and lips all instantly became meat coke.

And it's not a smooth flat plate, but thousands of gullies. It's really like wearing wrinkled silk stockings on your face for a week, which makes people dare not look directly at you.

At that time, because of pain, his hands covered his face. Those who could keep his hands were lucky. Most people's upper limbs and hands were like a meat red wooden stick. Where did they have hands.

"Why not let them retire or recuperate?"

"We've also tried. We don't let them go to work. We keep them. They think they're useless. They either go home and have a first wife or drink too much. They'll die unexpectedly soon!"

This is the dialogue between Zhang Fan and the leaders of the hospital!

Looking at these workers who are not young but are injured in their prime, the eyes of tea doctor are full of pity.

However, they looked at the doctor and smiled with what kind of serenity. Although they were like monkeys, they smiled really sincerely.

"It's no pity to live without worrying about food and drink. Who made our country poor in those years! If you don't, I don't, how can the country become rich! "

In a few simple words, the eyes of those who say it can contain tears.

"What's wrong?" Zhang Fan pressed the bitterness in his heart again and again, and asked the workers opposite quietly.

"As long as the weather changes a little, the scalded skin will hurt, as if you can't touch it. Wearing

clothes is like hanging a layer of thorns! "

"How did you solve it?" Zhang Fan asked while checking.

"What else can I do? I took painkillers in the early days, but the effect was good. I had a stomachache after eating too much, so I had to endure it later. I get used to it. I asked many doctors, but I couldn't help it. "

Looking at the calm smile in front of him and the faint helpless worker in his words, Zhang Fan really wanted to say that he couldn't say it, just like a pimple blocking his throat.

"This is a nerve scar. It forms a neuroma. It needs a small operation. It won't hurt like this after it is finished."

Zhang Fan gently explained.

Hold it. There are a lot of these patients.

In the history of human diseases, in fact, most fatal diseases are not primary diseases.

Generally speaking, minor diseases usually cause serious diseases. For example, Lin Daiyu coughed and hung up. In fact, tuberculosis causes severe pneumonia, and the lungs cough out.

For example, pneumonia, in fact, ordinary pneumonia has no power in front of current technology.

But why do hundreds of thousands or even millions of people die every winter like a sickle.

In fact, there are underlying diseases, such as pneumonia caused by the same bacteria or virus infection, and the risk of diabetes is much higher than that of ordinary patients.

Because sweet things like this, people like to eat, bacteria and viruses also love to eat, and the most feared is that the underlying disease is not just a diabetes.

## **Chapter 954**

In fact, the epitome of the development of coal city is a bit like China. It is more violent and the time is shorter.

In the early years, they couldn't. There is no independent trading right to farm land. You can't decide who you want to sell coal to for a few dollars.

Suddenly, another day, it is estimated that the leaders feel that they are too tired of taking charge, and

then let them make their own decisions. As a result, everyone is not used to it.

The salary of tens of dollars a month has changed into thousands of dollars, which is not suitable for meat traders with drastic changes.

It is said that in the first half of the wage reform in the coal city, the restaurants and shopping malls in the coal city were overcrowded. I don't know how many bosses and landlords were tired.

In fact, the first thing for newly rich people is not to wear, improve their living environment, improve education and so on, but to eat! I used to see stewed pig feet and pig head meat. When I walked by, I smelled that the water was flowing down.

But there are only wool tickets in my pocket. I can only smell them. I don't dare to smell them more. I'm afraid I'll be blinded when I smell more. But now it's different. It's thousands in January. We have money.

Pig head meat, stewed pig feet, buy half a pot! Eat, drink, and your stomach is like blowing balloons. You don't have to calculate by week. It's bigger by day, much faster than pregnancy.

When the big fish and the big fish came to serve, the rich and ill came, high uric acid and diabetes. It seemed that they were all rushing to the next three roads. The next three roads were also aggrieved. Your mother's three way was good and good. I didn't take any advantage after three roads.

In fact, there are also hypertension and hyperlipidemia.

This is not one or two, but a group. Just like infectious diseases, you can imagine how terrible it is for a generation of people in a city to pee with sugar.

What's more terrible is that the city also has a terrible basic disease, lung!

Coal mining and dust industry, such as cement plants, have a terrible disease, silicosis!

Almost all human secretory organs go in and out, such as kidney, pancreas and liver. It is difficult to

precipitate some toxic waste.

The lung is different. You take a sip of soil and a sip of smoke. It seems that it's OK to smoke. However, smoke and haze contain small particles, which can't come out when they enter the lung.

After the child's lungs were opened, they were all pink and tender. They were as fresh and tender as Piggy's nose.

The lungs of adults are like light colored marble, with a spot on the left and a spot on the right, which is really like the spot on the face of the elderly.

This is all dust and garbage that you breathe in. The lung is like a sticky pocket. The dust sticks there when you go in. Occasionally, you cough as if sputum came out. In fact, it just didn't enter the lung and was brushed out by the brush in the airway.

A small amount of dust can cause such a situation. What about a large amount of dust.

Simple, stinky tofu is estimated to have been seen. When a large amount of dust enters the lungs, the color of the dust determines the color of the lungs. For example, most coal mines are coal particles, so the lungs are full of black particles, just like black stinky tofu.

For example, when the lungs of workers in a cement plant are opened, it is like a flour bag in the rain, and it is like a paste in the chest.

What is the lung? It is an organ for exchanging oxygen. When oxygen comes in and carbon dioxide comes out, it can be said to be an organ full of holes. How can we exchange gas without holes.

When the dust blocks these holes, the lungs have no function. If there is another underlying disease, such as heart disease, hypertension and diabetes.

OK, just like the old doctor said, eat whatever you want!

If you are older, let alone encounter any serious illness, you often have a hard time with the flu every winter. This is why there are hundreds of years old farmers, not hundreds of years old coal miners.

So it's really useful to wear masks in smog!

Physical examination, round by round physical examination of employees, the situation is particularly not optimistic, especially the elderly workers, who have experienced poverty.

It is estimated that many people have seen the photos of the iron man jumping into the mud. To tell the truth, there were countless such iron men in those years.

Yes, Zhang Fan. They have taken in almost 300 people in one day. This data makes the leaders of

Meicheng hospital lose face.

It was not Zhang Fan who asked for trouble, but when he saw the workers coughing up their lungs, he couldn't help it!

"They have received a lot of patients!"

"Hum! That's not it. What's it like after treatment? "

In the hospital, Zhang Fan did not support their work.

However, the tea vegetable medical team did not flinch. This difficulty is not a problem for them!

Shake people!

At Zhang Fan's command, all the doctors on leave in the tea vegetable hospital gave up their leave. Half of them were in tea vegetable and half came directly to coal city.

"What is this for? What's this for? Come here? "

The most worried thing is the medical staff of coal city hospital.

It is easier to ask God than to send him.

Such a good hospital infrastructure, such good equipment, and not far from tea, Zhang Fan has ideas, what kind of master and what kind of apprentice, really, there is nothing wrong.

You don't need Ouyang to point out. Zhang Fan is greedy.

"Zhang Fan, good news!" Ouyang and Zhang Fan communicate on the phone.

"What's the matter? Did the bird market give us money? "

There are only two things that can make Ouyang so happy. The tea vegetable hospital won the award and paid for the tea vegetable!

"Hey, there is no money. The leaders of Frontier Province said that the tea vegetable hospital is under the control of the tea vegetable government. They have no obligation to give money!"

As soon as he said this, Ouyang really wanted money!

"What's the matter!"

As soon as Zhang Fan listened, he didn't send money, and there was nothing to look forward to in his

heart.

"Hey, hey, our master's program is going to be approved. My classmates in Medical University told me privately that they have reported it to the Ministry of education!"

"Really? This is a good thing! " Zhang Fan is also very happy, but the feeling of joy seems to have no funds. It seems that colorful tickets make people more happy.

"Well, the master's program set up by general foreign teachers will be more confident when we recruit in the future. This graduation season, I want you to lead the team out of Xinjiang and go to other schools. We can't always recruit people in one area. "

"OK!" Zhang Fan agreed without thinking about it.

After talking on the phone, Zhang Fan and they began to prepare for the operation.

Ten years ago, the equipment here was estimated to be in the largest hospitals in the country.

Although it can't be compared now, it is much better than other poor regional hospitals.

There are all kinds of equipment, but no one works.

Those who work either run away and change jobs or are abandoned can only be an appendix.

What a scholar said in three years is right.

## **Chapter 955**

"My God, can the operation still do this?"

The surgeons in the coal city hospital were foolish. Looking at the movements under Zhang Fan's hands, masks couldn't stop the dark hole in the middle.

What a surprise!

To tell the truth, Zhang Fan has had surgery since he became a doctor, which can surprise doctors in the county hospital. To tell the truth, he can't scare others in other hospitals.

For example, in your liver center tumor surgery, when you come down, people think about how he did it and how I could do it.

Because they are all old doctors, and they keep learning and making progress, and have seen too many talented doctors.

I haven't seen the county hospital. There are less than 180000 people in the county with such a population. It's not even a big village in the south.

So people were surprised.

The coal city is different. Their knowledge, like their equipment, is still retained more than ten years ago. People have what they want. Even publishing medical papers has their own journals, and they don't play with you in your place.

Therefore, when Zhang Fan performed neuroma surgery with Wang Yanan and Xu Xian who played with snakes, the doctors standing under the operating table were dumbfounded.

The idea of early neuroma surgery was lesion treatment. In fact, to put it bluntly, where the pain destroys the neuroma.

In the early years, the view was that when this thing broke down, it would never grow like hair. After the death of nerve cells, it was considered to be non renewable.

With the further development of zoology and biology, the medical community believed that the nerve would regenerate, but the regeneration ability was very poor.

It seems that there is little difference between non renewable and poor regeneration ability. In fact, it is not, just like the secondary growth pursued by men, can rise a little is not!

But the doctors didn't have this idea. The scalded skin was to find a way to preserve the facial organs, and the scalded limbs were simply embedded with stumps.

This kind of operation is deeply afraid of voids, which will lead to subsequent inflammation and even tumor formation. Therefore, it is done very tightly, just like the pockets tied after the farm collects food, and the stumps of the limbs are sewn tightly.

Some people's nerves may make do with their lives in this pocket. But some people's nerves don't want to. I was originally a slender body. I don't care if I make it like this?

Sir!

Then, the nerve begins to find an outlet at the stump. If you can't find an outlet, then if the tree bears fruit, it will grow a nerve stump tumor for you.

This thing, because many nerves gather together, just like a sales terminal, everyone can't show their incompetence. Therefore, if you touch it a little, you can quickly send a message to the brain. It's not good! No, I met, I met, avoid it.

Then the brain was worried. So many salespeople gave feedback that they couldn't take it lightly, and then they began to discharge directly, so the pain appeared.

Don't touch it, even if you touch it, it hurts like a knife.

Zhang Fan's current operation is like this, performing contact pain surgery for these injured workers. Because it is a late derived nerve, blood vessels are also like, very rich.

In the coal city hospital, they still give some painkillers when the patient is in pain according to the early treatment method. For the operation, because it is difficult to remove it at one time, and because the patient has almost only one chance of operation after skin scald, they almost never talk about the treatment method of this operation.

It's like stealing a bell.

But today is different. Zhang Fan is here!

Retired, not retired, as long as there are such symptoms can come to see a doctor.

Now, in the coal city, the masses gradually understand.

This is a master.

"Our hospital? Eat and drink, doctor! "

In the operating room, Zhang Fan started the operation with people.

The patient's skin condition is quite bad, so there is no epidermis. Because of perennial pigmentation, the patient presents brown.

As like as two peas, the color of the shadow is more intense, like the chocolate cake. It is the same as the chocolate cake, and the wrinkles formed on the cake are just like the patterns on the cake.

In some places, there is no damage to the hair follicle. Without the obstruction of white skin, the hair is

particularly thick, pinch by pinch!

At the beginning of the operation, the scalpel cuts the scar formed after scalding and presents fat. Really, what is chocolate yellow peach sandwich cake? This is what it is.

Where can it be cut according to normal tissue? Zhang Fan, with a scalpel, cuts slowly along the outside of the scar. This operation, unlike normal operation, needs to be cut layer by layer according to the anatomical structure.

The organization here has lost its sense of hierarchy. This kind of operation is the last thing surgeons like to do.

Because it's abnormal, you don't know what's under your knife, whether there are blood vessels or big nerves, you don't know. It's all by hand.

Therefore, there is a saying in the surgical Jianghu that the chief surgeon can perform surgery and the director can take over the surgery done by others.

Because the injury is like changing the basic circuit of the human body, it is unreasonable, so it is quite difficult.

Zhang Fan cut the chocolate yellow peach sandwich cake, separated and adhered bit by bit, looking for the neuroma of the telegram bit by bit.

In the operating room, a group of surgeons in the coal city stood behind the tea doctors, and the saliva in their mouth was coming down.

Not greedy, but shocking!

Not greedy, but envy.

He is also a doctor and a surgeon, but what have he done over the years? He muddled around every day. Finally, he was muddled by the days.

White neuromas, like cream pimples, are planted in the muscle layer. With the traction of the muscle, they wriggle.

It seems that Zhang Fan is very dissatisfied with their arrival. Quarrel chicken and quarrel. I'll send a telegram again.

"Hardener!"

This kind of extended nerve is different from the congenital nerve. The congenital nerve is just like the wire at home. It is wrapped in three layers inside and three layers outside, and still has a certain

hardness.

The day after tomorrow, I wear less clothes, just like a reptile, crawling there.

Therefore, if you want to cut clean, you must make it hard.

When the hardener rushed in, the white nerve like a reptile visible to the naked eye, like a bud sprouting from the ground, turned up, just like a little boy, a little JJ after getting up in the morning.

Cute, cute.

Cut ~!

One operation, two operations, three operations.

.....

"The doctors from the tea vegetable hospital came to our hospital and performed more than 20 operations today!"

"The doctors of tea vegetable hospital are more and more professional!"

In the government departments of coal city, leaders also pay attention to the hospital“ It seems that we can't do without change! "

The commissar said to the boss of the government.

"Yes, I didn't expect that we were so backward!"

At this time, the leaders of coal city hospital did not know that the government had a killing heart.

They were still drinking and bragging when they were drunk, "that's what Zhang Fan's operation was like. I did better than him a few years earlier!"

Just as the mouse was drunk and wanted to find a cat, he thought that the tea vegetable hospital was just like that, and so was Zhang Fan.

## **Chapter 956**

Day one, day two, day three.

For three days, the doctors from the tea vegetable hospital really didn't even sleep.

What do people like to do most? Conformity.

For example, when two people quarrel on the street, if few people watch at the beginning, everyone won't watch.

Afraid of good things, they not only onlookers, but also told the latecomers, "she stepped on her foot, and then the red one said you apologized, and the blue one apologized, but the red one thought she was not sincere enough, and then the two quarreled.

At present, the level of the two is almost the same. It can be said that they are equal. It depends on who has something to do first! "

Then more and more, if the police do not come, it is estimated that someone will definitely shout: "if you can move your hand, don't make a noise and fan her!"

Watching the excitement is not afraid of big things, and then the two began to compete in the street.

Seeing a doctor is the same. At the beginning, it is physical examination, and then surgery. More and more people come to see a doctor. Even if they are not ill, they also come to have a physical examination, as if they will suffer if they don't take advantage of it.

It is estimated that there are not so many patients since the establishment of Meicheng hospital.

The people who originally wanted to see a doctor in the bird market didn't go either. First, they planned to let the doctor of tea vegetable take a look.

The workload is particularly heavy.

"Comrades must eat well. We can eat whichever restaurant in coal city has delicious food, but!"

If you don't have a good rest, you can only let everyone eat well. Zhang Fan had an operation and didn't have time to rest. He also had to see how the doctors in other departments were. While cheering up, he asked the elderly doctors to pay attention to medical accidents caused by fatigue.

Even half of the doctors did not have a tea city doctor to support a hospital in the coal city awesome.

Zhang Fan looked at the situation and had to call Ouyang: "Ouyuan, comrades are too tired. It doesn't work like this. Something will happen. "

"I'll find a way right away. What should I do? What should I do ~!" Ouyang can't help it now. It's too short of people.

The leaders of the coal city government have contacted Ouyang. Although this system is like an enterprise, others do it more like the government. For example, people usually find Zhang Fan for such things.

However, leaders of the coal city felt that it was not right to speak, so they had to talk to the boss of the famous doctor of the hospital.

What they meant was to entrust the hospital to the tea vegetable hospital. Ouyang was happy and sad.

Happily, there is another fat meat. This hospital is not comparable to the second branch hospital and the third branch hospital. With proper equipment, it is a third-class hospital in the region.

Sorry, there is no one here. You can't split the doctors and nurses into two teams.

You can spit out the fat in your mouth. You can imagine how sad Ouyang is.

Think, think of the advanced doctor in Marubeni. Now the peak period of medical treatment of tea element has passed, and she doesn't want them to be idle.

Besides, these are unstoppable.

.....

I don't know how the telephone between Meicheng government and Ouyang reached Meicheng hospital. This time, a stone startled countless birds.

The surgeons who had been observing the operation and even wanted to learn from Zhang Fan were also asked by the leaders of the hospital to arrange tasks. The nurses in the operating room were also called to learn about integrity and ideological education.

Anyway, it's a meaning. I'll call everyone away. Just you people, I'll see how you play.

The way is people think. Really, no one can do this. People's ideological education is also important!

Zhang Fan and his colleagues are biting their teeth to deal with waves of patients. In a week, a group of

doctors are as tired as peeling off their skin. They are really tired.

When they came, the leaders of the coal city hospital lined up to welcome them. When they left, the coal city hospital only sent an officer to hand over them, and then it was like abandoning them.

I'm afraid they won't go.

The doctor of tea vegetable is not a taste in his heart.

But when the team of tea vegetable hospital came out of the hospital door, everyone looked at the crowd on both sides of the road. Everyone's originally uncomfortable mood suddenly became moved.

I saw the workers holding big banners, modern Bethune, angels in white, skilled doctors

The brocade flags are held in the hands of the masses as medals, especially those who were injured and lost their hands, with the prosthesis installed by Zhang Fan, which is so flexible and unobtrusive.

"Thank you, thank you! I wish you wouldn't go! "

The workers' excitement and tears have been turning in their eyes for many years. After the passion in those years, there is endless pain. Now, some people still remember them! Someone is still thinking of them!

Their demands are not high, really not high.

"Have a glass of water! Come often in the future! "

Zhang Fan was so moved that they couldn't speak. The long street was full of seeing off patients.

"Yes, we will come often!" Zhang Fan said that he didn't know if it could be realized. He took over the golden flag as heavy as a kilo sent by the workers with both hands.

The language is thin. In this rich, poor, modern and conservative City, Zhang Fan feels a boundless sense of achievement.

Tired, tired, what's the matter? In this age, people come to see off spontaneously on the ten mile long street. Not everyone can do it!

In the administrative building of coal city hospital, the hospital leaders saw this situation and their teeth were broken. The simulated bronze tripod on the table fell and clanked.

In the inpatient department of coal city hospital, doctors and nurses stood quietly by the window and looked enviously at the doctors and nurses of tea vegetables on the street.

The same occupation, the same industry, but I'm really sour.

The motorcade moved slowly in the crowd, and the doctors' tears fell on their faces like running water.

Feelings are rarely felt in this impatient society.

Now, they have realized the sublimity of this industry.

The reason why the doctor-patient relationship is so tense now is that people hope that this industry is good and that the employees in this industry have a little kindness.

No matter how long the journey is, it will end. Looking at the crowd behind him, the Bayin in the car was crying.

My heart is sad, but I can't say it.

The people on the bus quietly looked at the scenery outside the window. No one spoke, but their hearts probably remembered this moment.

The motorcade got on the highway and headed for tea.

Halfway through the road, Zhang Fan's phone rang and Chen Sheng's phone rang.

Almost all sounded one after another.

Chen Sheng's phone call was from Ouyang and Zhang Fan's phone call was from the political commissar of coal city.

Zhang Fan's heart, bang Dang.

"Something's wrong!"

Don't think about it. When Zhang Fan got on the phone, he only heard the political commissar say loudly: "president Zhang, turn around, something's wrong!"

On Chen Sheng's phone, Ouyang shouted, "have you been on the highway? Turn the team around. Something's wrong in coal city!"

## **Chapter 957**

Coal mines, especially after the country's development on the fast lane, this resource suddenly became valuable.

In the past, there was no way to go to the mine. And in old age, miners have a saying that students don't borrow money.

The danger of this job can be imagined. Although the salary is relatively higher, for example, in 2010, their full-time salary was almost ten thousand.

But not everyone can make this money. Not to mention the others, it is said that the degree of darkness and depression under the mine is not capable of ordinary people. For those with poor psychological quality, when they go down to the mine, the rubble and water drops dropped by didi Lala can be scared crazy.

No more private mines. In the early years, private mines were like gambling. It really can't be said.

The nature of the country is better, but there are also accidents.

Most of the coal mines in coal city are open-pit mines. After digging out the soil skin, there is black gold below.

However, a small part of the coal must be mined, and these mined coal can be called gold in coal. It has low sulfur, low phosphorus, stable heating, coking and cohesiveness.

These mines do not enter the market. They are dug out and sent to Baosteel. It is said that the country's special steel depends on Baosteel, and Baosteel's fuel for some special steel must be this kind of coal.

Therefore, these mines not only cannot be stopped, but also must have high production. Good things, God won't give them easily. These mines have complex geology and half life aquifers. When they go down the well, it's like entering the plum rain season in the south. They tick like God has a prostate. Their urine is not clean, but they tick endlessly.

Just a few hours before they left, there was an accident in the mine. When the shift was handed over in the morning, a novice in the mine saw that no one was paying attention and went down the mine with a lighter and cigarettes.

What I was afraid of in the mine was open fire. The gas was originally the companion of the mine. As a

result, the young man didn't take it seriously. He thought it was all right. Click, the lighter caught fire, and then the flame and explosion came to his face.

Mine roof fall!

Fortunately, the mine was not deep, and six unlucky miners were injured. Really, no rash disaster.

The leaders in the mine were almost hanged! We quickly organized people to go down to the mine to save people. The area of roof falling was not large. We dug and dug, and finally dug out one of the five unlucky perpetrators.

When you dig it out, you can't see it. Black red, black red, directly six pieces of meat fell into the coal pile.

"Let the medical team of tea vegetable prepare for operation." The commander and political commissar of coal city called the leaders of coal city hospital.

"Well!" The sweat came down. To be honest, the cold air of the air conditioner was blowing, but the voice of the dean who answered the phone changed " They just left! We also... "The Dean wants to say that we also welcome you away!

"Who let them go? Ah, what do you eat? The watchdog is not as good as the watchdog! Please come back right away. "

The Dean had a dead heart. The superior didn't let them go, but our legs were on them. Although we didn't cooperate and had a bad attitude, we didn't rush people.

He regretted hammering his chest into a pit and holding his mobile phone. When he left the tea vegetable hospital, he deleted Zhang Fan's contact information, deleted it!

The leader of the government was also worried and didn't expect him to contact. Therefore, the commander contacted Ouyang and the political commissar contacted Zhang Fan.

No matter what the sordid among doctors, can you hesitate at the moment of endangering human life!

No!

However, the team got on the highway and the next exit was tea!

"We're on the highway! We'll speed up now, go down the next exit and turn back. "

Zhang Fan said to the political commissar of coal city.

"It's too late! You stop, stop now, I'll find a way. "

The flashing motorcade stopped at the roadside of the expressway, and everyone waited quietly.

Before long, I saw the traffic police flashing lights in the distance of the highway.

"Turn around quickly. This side has been closed. You can turn back safely!"

Didn't say anything more, just turn around and return.

On the other side of the highway, the drivers are stupid!

"My God, come on, come on, look, 120 escort and 110 escort. This cool Luze with red license plate is too awesome. Who is doing inside? Open a special line. I'll go, come on, take a picture."

It was also said that the couple drove a newly bought private car to the high-speed coal city to play, "are you going in the wrong direction? So many cars of others go east on another road. Only a few cars on this road also go east. Are you retrograde!"

The co pilot's wife is almost asking. Are we wrong? Are they wrong? Isn't the coal city in the east?

The vehicles of the team, regardless of whether the surgical vehicle is a large car, are still racing very fast.

There are also good things on the highway next door, "are there any laws for you to drive so fast? I drive like this! "

Then a few young people drove their cars and raced with the tea vegetable motorcade.

Soon we arrived at the exit of the expressway, and the entrance had been sealed. It was estimated that there was a team of traffic police waiting on the roadside of the expressway. The noisy police lights were dazzling as if they had entered the disco.

There are not only police cars, but also a lot of small cars beside o, "come on, Zhang Yuan, let's lead the way, you keep up!"

They don't stop and drive directly towards the coal city hospital.

At this time, the boys who were racing felt that something was big, because he was speeding, and the other party

The tea vegetable team entered the coal city again. The seeing off crowd had not finished yet. Some were walking around the street. "Hey, look, look, the tea vegetable medical team was moved. It came again when I left. I have to go home and ask my sister-in-law to register quickly. She didn't get on the

wheel last time!"

Some people also said strange things, "I'll go and get addicted. Isn't it cheap enough for people in coal city, a rotten tea vegetable hospital? Can I send it like this! It's not the medical team in the capital! "

The motorcade went straight into the hospital and the doctor got off. When he was in the car, Zhang Fan divided the medical team through the walkie talkie. The team leader took people into a team without a bit of panic.

This is the true skill that has been practiced for many years.

It's like people in coal city hospital. They don't know what to do, but they try to pretend that they are very busy.

At the door of the operating room, the leaders of the coal city hospital saw Zhang Fan and they were moved to tears.

When they met Zhang Fan, they were definitely more excited than their parents.

Because when Zhang Fan didn't come, the leaders of the coal city were about to eat them. They had to make them come up with a plan to burn and smash. For this kind of compound injury, they took a hammer plan. Isn't it difficult!

"Zhang Yuan..." the smile piled up on the president's face of coal city hospital wanted to wag his tail. Both hands didn't know how to reflect his excitement and desire.

Zhang Fan ignored it and didn't even say hello. This is not to look down on people, because now is not the time to be polite.

"Report the condition of the wounded!" What Zhang Fan said has no emotional color!

"Well!" The Dean stammered. He pushed the director of surgery out.

"Zhang Yuan, six wounded..."

## **Chapter 958**

As Zhang Fan walked, the surgeon in coal city reported the situation.

"The most serious patient is estimated to be the blasting point. 64% of the whole body is burned. The collapsed beam and column injured both lower limbs and led to abnormal spine!"

There is no time. Zhang Fan has no time to disinfect thoroughly. He can only use disposable disinfectant. There is no way. The most important thing for routine surgical hand washing is not the use of various chemical disinfectants, but the most thorough disinfection is to brush your hands with a pig brush for ten minutes.

Zhang Fan stretched out his hands and immediately a nurse came up to help him put on his surgical clothes. Listening to the report of the surgeon in his ear, Zhang Fan ignored the leadership of Meicheng hospital from beginning to end.

It's impossible to have a little resentment. It's like being deeply afraid that Zhang Fan robbed his throne. I almost said you left. As a result, you did the operation!

Change the surgical clothes, "where's the examination?"

"I took an emergency blood routine and biochemical examination. I didn't dare to do other examinations and directly pushed it into the operating room."

The doctor who reported the condition in coal city blushed a little.

"Xu Xian, you and Wang Yanan are in the same group. If you have pelvic and femoral fractures, you must pay attention to vital signs. Xue Xiaoqiao and Dai Yuhang are in the same group. If you can have one-stage brain surgery, you must have one-stage surgery. Zhou Chengfu and you..."

Zhang Fan kept grouping while asking someone to dress him in surgical clothes. The doctor who received the order replied loudly, "yes!"

The atmosphere was immediately set off. It seems that the medical staff of the coal city hospital, which used to be like ants on a hot pot, have a backbone. Although they have not received any orders, it is also a good thing to be taken over.

The commander and political commissar of the coal city government also entered the operating room "This is president Zhang of tea vegetable, and this is the commander of our government. "

The political commissar quickly introduced it again. Zhang Fan nodded, wearing a surgical cap and a mask. He couldn't see whether there was an expression.

Although the expression could not be seen, the commander's eyes could see that he was going to be angry.

After appeasing his family outside, he entered the operating room for the first time.

"Dean Zhang, how confident is the operation."

The tone was a little anxious and stiff.

"There is no laboratory examination, not even an X-ray. At present, I haven't seen anyone. Where can I get the assurance!"

If not in surgery, Zhang Fan may consider his tone and tone.

But in the operating room, this place is not a place to play polite words. If you can, if you can't, you can't.

What should be is what. If you can't come, especially the chief officer of a region of the other party, he should make corresponding deployment in combination with the doctor's words.

Moreover, after entering the operating room, Zhang Fan is serious about Zhang Yuan. Here he is Wang!

As soon as the political commissar heard that something bad had happened, his monitor's temper exploded, and there were really no people in this place, coal city, who spoke to the commander in this tone.

So he was afraid that they would quarrel! Because he can't run away. If the wounded has a problem today and the superior hits the board, his ass will hurt.

He just wanted to explain for them. As a result, the commander gently raised his hand, motioned the political commissar not to speak, and then stared at Zhang Fan for a second or two. He didn't dare to stare more.

Because the knife he saw from Zhang Fan's eyes was sharp.

"It's all right. I'm a little worried. Zhang Yuan, please! " Put your hands together and bend your neck slightly!

Zhang Fan nodded without saying anything more " I'll try my best! "

Then nobody paid attention and took people directly into the operating room.

Angry, really angry. A division level cadre could not get down at the door of the operating room.

However, the commander knows that it is definitely not a hammer that dares to lose his temper and make the leaders stand down at this time.

However, Qi cannot be suffered in vain.

Turning around, the flesh on his face turned sideways and his eyes narrowed, just like the moment when an old cat wanted to catch a mouse, his claws stood up.

"Why not check, ah! What do you eat? Ah, such a big hospital can't even take an operation. Ah, boast to me every day. What do you say? It's advanced here and excellent there.

Now, at the critical moment, you don't deserve to check shoes for others. "

With that, the commander and political commissar left the operating room.

The leaders of the hospital turned white.

After Zhang Fan entered the operating room, his heart tightened when he saw the wounded.

It's burning too much.

The meat on the face was impacted by the fire, like watermelon. It was red and black. There was a faint smell of barbecue in the face muscles and turned out muscles.

Edema, the whole body is as puffy as blowing air. Lying on the operating table, the swelling of the whole body is like a sheepskin raft.

Moreover, the clothes brought by burns adhere to the skin, just like a black pearl hanging all over. It can be said that there is no good meat from head to foot.

"Call Li Cunhou and ask him to find a way to get the transplanted skin from the laboratory. It's estimated that this man can't do without skin."

"Good! I'll get in touch now. " With that, Chen Sheng began to call for the first time.

In the capital, Li Cunhou has had a good time recently. The clinical trial in the European Union is coming to an end, and the launch of the product is not far away.

Now people are directly famous scholars. Today they are invited to brag in this country and tomorrow they are invited to give lectures in that country.

It can be said that he suddenly became an international expert from a doctor studying abroad.

When the mobile phone rang, he looked at Zhang Fan's.

His mobile phone is only known to his family, superior leaders and Zhang Fan. The number he released is held by his assistant.

"Zhang Yuan! Ha ha, I miss you... "

"Professor Li, I'm Chen Sheng from the tea vegetable hospital. Have you seen me! We are now in the coal city hospital. One of the wounded is badly scalded, with a large area of scald. Zhang Yuan asked me to ring you for help.

It was Zhang Yuan who wanted to call you personally, but now Zhang Yuan has had an operation and can't spare time. "

Chen Sheng quickly introduced the story.

"OK! I'll come myself. I have to help with this field! I'll fly now. "

"OK, I won't thank you. Let Zhang Yuan..."

"All right, stop talking. Zhang Yuan and I are not so polite. "

Hung up.

Zhang Fan's operation has begun.

The skin is not the most serious, although it seems that people can spit out the lunch.

However, as long as Lao Li brings the materials, Zhang Fan is sure to put a layer of skin on the young man.

At present, the most serious is the spine.

The spinal column injured by the landslide hit his waist four or five vertebrae firmly.

Waist four, waist five and sacral one are the places where the human body bears the strongest gravity.

Many people work for a long time and sit for a long time. When they get a little older, they feel backache.

In fact, there are abnormalities in waist four and waist five.

If this place is abandoned, so is this man. Just like the truck girder is broken.

## Chapter 959

The president of the coal city hospital and some people who occupied the leading position felt that it didn't matter when they learned that the tea vegetable hospital was coming here. Moreover, they are still working hard to let a group of people who are more remote and not rich than them see what advanced medical treatment is.

Their idea is: I didn't go to your chassis to show off, but you came to us to show off. Well, let you see!

As a result, after the arrival of the tea vegetable hospital, almost all the motorcade, surgical vehicles and inspection vehicles can be regarded as the world's top equipment.

Then they were sour!

It's so sour.

I still keep comforting myself. What about equipment? Water can't do with equipment.

When the doctors of the tea vegetable hospital didn't show their skills, the leaders of the coal city hospital felt bravely that if they had any uncertain cases.

Do it yourself, hey! Save face and see how they leave! Look, they still have the face to show off. No, they have some good equipment. I was rich ten years ago!

The idea is good, but the reality is too cruel.

When tea doctors start physical examination, surgery and treatment.

They were sad. They dare not take out their own level in front of others, just as they were small landlords before liberation and met big local tyrants in the Internet age.

It hurts your self-esteem!

Isn't there a doctor in the world? This is still a country's doctor. You don't love each other anymore? We didn't provoke you. Why did you come to the coal city to step on us?

Most ordinary doctors in coal city want to learn some technology, but the leaders don't want to. No one dares to annoy the leaders to learn technology. Otherwise, it's different whether you can use it or not.

Therefore, the leaders of coal city hospital are just like a San who wrapped his head in those years. I'll give you a non cooperation! I ignore you, and the general doctor is like an aggrieved little sister. My mother won't let me play with you!

The main reason is that the brand of tea vegetable hospital is not big enough. If it is the provincial top three medical team in bird City, it is definitely another scene. So ah, this world still depends on clothes, not people's world. What can public do to public.

After the coal mine accident, the leaders of the coal city directly contacted Zhang Fan of tea. After all, Zhang Fan is local, and they know Zhang Fan better because of their different status.

In fact, the president of coal city hospital also contacted. There are general hospitals and farm general hospitals in bird city. The leader of the coal city called at the first time.

As soon as the other party heard about the situation, they didn't know how they heard that Zhang Fan was in the coal city. Just say, what call do you call us? Please Zhang Fan!

Let Zhang Fan do it!

When you hear that. You don't know. The heart of the leader of the coal city hospital at that time was as sour as drinking three kilograms of old vinegar. It was hard to dig the heart and liver.

Now he knows that Zhang Fan is not something he can compare with, and Zhang Fan is not something he can neglect.

However, there is no regret medicine in the world. Zhang Fan said before entering the operating room: even the basic examination is not perfect!

In this sentence, beating the commander and political commissar of the coal city is like not wearing pants. Not to mention the face, even the ass is swollen. At least it is also an administrative unit at the municipal level.

As a result, is that how you lead? Is it so brilliant for more than ten years, known as a small harbor in the frontier? The hospital under its jurisdiction doesn't even dare to do a basic examination. Is it okay to claim it?

It hurts. In a word, the leaders of coal city can't stand in the operating room! Next, it can be imagined

whether the face of the leader of coal city hospital will be beaten into a pig's head.

"I'm going to report to the superior now. What do you need from the doctor here? We can't do the examination, but the logistics can't let the boy prick his hair anymore.

I'm afraid to lift my head now. The hospital must be reformed! "

Out of the operating room, the commander looked quite angry, as if he had thrown his sleeve and left. In fact, he also found a step for himself. Don't I have a big commander to face?

Where there was no one, he explained several things to the political commissar.

"OK, I'll watch here! If the leader wants to criticize, I will admit my mistake with you! "

"Now it's not about admitting our mistakes. If the wounded can't be saved, we just want to admit our mistakes. We don't have a chance. I think that boy still has some skills. I hope I'm right. I hope he's also a real expert! "

"There should be a level. Can't you boast such a great reputation?" The commissar's face was also worried.

Professor Li Cunhou in the capital now has a big face. As soon as he got his boarding pass at the airport, a leader of the airline came out and personally welcomed him into the VIP room.

Really eat and drink!

Lao Li also lamented that when he returned home, who knew him? When he was very helpless, he found experts from all over the country to start the experiment. As a result, none of them succeeded and he was about to give up.

As a result, Zhang Fan succeeded in a trip to stone city. Lao Li, who is drinking coffee in the VIP room, will smile when he thinks of Zhang Fan!

So, although Lao Li is in the sun now, when Zhang Fan needs help, he hesitates at all and flies directly to the frontier.

In the operating room, Zhang Fan and his colleagues have already started spinal surgery for the wounded. The injuries caused by smashing are the exotic flowers in the trauma. Not to mention the big stones, the hammers hurt the fingers. Among the minor injuries, this kind of injury is the most difficult to deal with.

Spine, the girder of the human body!

Many people, for example, feel uncomfortable when they fall asleep. Then they find a masseur and ask

someone to press it.

So, in modern medicine, the neck seems to support a head like a stick.

In fact, there are too many things here, not to mention orthopedic doctors with practice certificates. Even if it is a great difficulty in orthopedics, generally speaking, when physical massage is restored, it is generally not easy to move the neck.

This place is too dangerous. Everyone thinks that the masseuse is so awesome that his neck rattles. In fact, it's like a three-year-old child holding a knife in front of his little JJ. It's quite dangerous.

Massage, massage lumbar vertebrae, massage thoracic vertebrae are all OK. Don't press the cervical vertebrae. Once you encounter a second knife, click it and get it displaced. If it's light, you can get incontinence at that time. You have to be fed for dinner.

The worst is to die on the spot.

So sometimes I hear someone say to you, "are you sleeping? Come on, I'll give you a press! "

You must refuse!

The wounded died a lot and didn't hurt their neck. If they hurt their neck, they probably can't wait for rescue.

But the lumbar spine injury is also quite severe.

Lumbar surgery, if orthopedics is compared to a garden, spinal surgery is the most precious flower in the garden.

Other fractures are relatively simple. Great. I'll give you a steel plate. If I can't, I'll give you an external fixation. If I can't, I can get you a man-made bone.

But not the lumbar spine. Many people, with poor lumbar spine, rashly choose surgery. Then it brings endless pain.

Because spinal surgery is too difficult. This thing is not a straight line, it is a curve. Apart from others, the setting of lumbar torque can destroy 90% of orthopedics doctors here.

Therefore, when lumbar surgery is a last resort, don't choose easily. Be careful when you have to choose. This is the key! A province may not have experts in this field!

Even Lao Mei doesn't have so many powerful experts on the spine. Let them have a spine expert from one state. It's estimated that Jinmao can't do it.

The wounded was unfortunate, but fortunately, he met Zhang Fan. Although Zhang Fan has no self perception in orthopedics, he has not been able to surpass him in terms of surgical techniques in the spine.

Sometimes Zhang Fan is a little ashamed, mother. He has an orthopedic background. Now the level of orthopedics is not as strong as that of ordinary foreigners, and there is no one! Sometimes he doesn't dare to report again.

I'm Zhang Fan, an orthopedic doctor!

Lack of confidence!

Zhang Fan's operation began.

Xu Xian and Wang Yanan's surgery also began.

The operations of Xue Xiaoqiao and Dai Yuhang also began.

Zhou Quanfu, their operation has also begun

The workers' families were also informed that outside the operating room, women with children cried like tears, and even fainted.

Inside lies the pillar of the family. If the pillar falls, the family will be finished.

Crying children have milk to drink. That's right at all.

The master's program applied for by tea vegetable hospital was ignored when they came according to the rules. As a result, after Ouyang had a fight, Ouyang returned to tea in his front foot, and the news came from his back foot.

It is said that this time not only gave a master's degree to general surgery, but also to orthopedics and burn department.

Ouyang took the phone and muttered, "why give it to orthopedics? Why not give it to your heart? I Ouyang can't be ranked in the frontier? Not as tall as he is? "

Ouyang is also sour!

**Chapter 960**

Frontier Medical University also knows one thing now, that is, they don't play with the tea vegetable hospital. If they really play something fun, will they still have face in the future?

You see, there are only two academicians and super academicians. Although they are guests, their closed disciples are the Dean there. Almost half of the top cattle in East China and half of ordinary foreigners were brought in by an operation.

Look at yourself. Are there any academicians? It's all tears. There was one, but it was seduced by Jiangsu and Zhejiang!

Although I always feel like being forced by tea, there is a saying in the Jianghu that when I can't hold it down, I'll order a flower!

The face of the two bigwigs still needs to be given, so the master's degree of general surgery was given.

In the burn department, although not as aggressive as ordinary foreigners, there are no two academicians like the door god. But others have already made achievements, that is, the inside information of tea vegetable is really poor. Otherwise, it is more than enough to get a doctor's point for this project.

As for orthopedics, the cattle went in and left their tails. They simply sent the Buddha to the West. They gave them two. They gave them orthopedics directly. Although they were known as the closed disciple of a big man and fooled for several years, they were properly registered orthopedic doctors!

This is also unexpected to Zhang Fan. Does medical university have the heart that Zhang Fan may make achievements in orthopedics again? Anyway, it's a business without cost. One more is one more.

If you really make achievements, medical university can show its face, isn't it!

However, the news was suppressed by Ouyang. She was not willing to let Lao Gao show off after knowing it.

Zhang Fan doesn't know the good news. After the improvement of teaching and scientific research, the hospital is more attractive after all. No, ordinary doctors are no longer a problem with the current volume of tea vegetable hospitals.

However, if you want to find a higher and more sought after doctor, it is a little difficult.

Zhang Fan, who doesn't know the good news, is in trouble in the operating room at this time.

For a spinal operation, the routine is four people, one main knife and three deputies.

But after all, they are not in their own hospital, and most of the wounded have fractures, so there are not enough hands.

Xu Xian, Wang Yanan and Zhou Chengfu all took people to other operating rooms. What Zhang Fan left for himself is not an orthopedic doctor.

Although Li Xiong is the director of the urology department, he was born in major surgery. When he was pulled to the operating table at the critical moment, he can still be used as a major surgery. It is estimated that he can't do it now. He can barely make a living by being a help.

Since Zhang Fan played his hand in urology, it is estimated that Ouyang has also done work for Li Xiong in private. Lao Li is very cooperative with Zhang Fan now.

Second, help LV Shuyan, a proper gynecological future Da Na. Since she came back from Jinhe's study, with the support of the gynecological director, she is not only the general manager of gynecological hospitalization, but also the teaching secretary of the Department.

If it weren't for Zhang Fan's black Zhu Yu, she would be a very powerful young doctor in the tea vegetable hospital. Her spirit of suffering is no less than Wang Yanan, and her EQ is higher than Wang Yanan.

Popularity reputation is much better than Wang stubborn.

It's just that the marriage is poor. It's said that she can't see a lot of talented people on a blind date.

Compared with Lao Li's orthopedic surgery, LV Shuyan is much worse in orthopedics. After all, she is not a major surgeon and needs Zhang Fan's advice to do anything, but she is a gynecological surgeon after all, and there is no problem with anatomy.

Three doctors, two non orthopedics, want to do such serious spinal surgery, Zhang fantou is big.

"Director Li, suck blood!"

"Dr. Lu, pull the hook again, and you can't see it!"

There were a lot of problems at the beginning! Surgery, especially emergency surgery, is sometimes like this. If you can't, you have to give it to me! If you really can't, the patient will hang up. So it's easy to drive ducks!

Zhang Fan, who usually doesn't talk much during the operation, kept pointing the two people like tuberculosis today.

After all, I'm not an orthopedic doctor. Let alone the details. Sometimes Zhang Fan doesn't know what to do if he doesn't say it, especially LV Shuyan.

Zhang Fan is hard to do. The two assistants are also sweaty.

Especially when fixing the spine, many people don't know about fracture fixation. They think it's broken. The doctor should hammer in a steel plate and it's done.

In fact, it's not. First of all, doctors should try to make the broken bones look like children's blocks. At this time, the requirements for doctors are quite high.

A doctor without a sense of space can make him cry in the face of a pile of bone debris.

The skilled orthopedic doctor, with thick fingers, can find which bone belongs to that one at the first time.

It's no exaggeration to spell it for you.

The fracture is broken badly. Really, the requirements for the cooperation of doctors are too high.

For example, when a bone is broken into five pieces, two assistants take two pieces each, and then the master knife takes one piece in one hand and a steel plate in the other, and then keeps making gestures to see if it has reached the physiological anatomy position.

If it's more broken, tie it up with steel wire first, and then fix it.

Bones are not meat. This thing has a temper.

"Your uncle, if you let me come here, will I come here? I want to change my position! "

A bone block with grease can't keep your hand. Moreover, if you put it in a slightly different position during shaping, it can make you angry.

The master knife gestures well and the position is good. Then gently put on the steel plate, pick up the electric drill and start drilling where the two ends of the fracture are not damaged.

This is the most difficult time because of the vibration of the electric drill and the uneven strength

between the assistants. The assistant or the master knife paid little attention, and the broken bones and building blocks collapsed again.

So, usually at this time, you go to the orthopedic operating room and listen to the doctors yelling.

"Move up, don't be too strong, break it, hold on, there are eight eyes left, hold on! Never move! "

These are skilled orthopedic doctors, and now Zhang Fan's assistant has two knives.

Draw the hook to suck blood. They did a good job.

When it's time to put together the building blocks, it won't work.

A flexible finger in the bladder area, kidney area and prostate is like a monkey's finger. At this time, it makes people feel that his finger is extra thick, thicker than a cucumber!

"Lao Li, can you pull back a little? The torque of the bones is crooked!"

Director Zhang Fan stopped shouting and directly looked up and shouted at Lao Li. Lao Li was sweating and anxious. He didn't even have the idea of answering back.

There is an idea in his brain now: if I have orthopedic surgery in the future, I will be my grandson ~!

It's too difficult for him. The old man didn't have a specific step in his mind. Maybe it's OK to make a simple limb fixation. But here is the spine, broken like bean curd residue. I can't even get on the steel wire. It's all up to the doctor's hands.

All the broken bones are the same. Zhang Fan has to put this here and that there. It's too difficult. The place is so small that the three heads are almost together.

It's too hard. I think my prostate!

Lao Li is almost crying. For many years, I haven't been reprimanded on the operating table for many years. My heart is broken, but he still tries to cooperate with Zhang Fan. This is Dr. Hua.

After training Lao Li.

And LV Shuyan, LV Shuyan is even worse!

In gynecology, people are very awesome now. They can pick up and do both obstetrics and Gynecology, and they do quite well. Now all the doctors in the Department call her Miss Lu except the director and deputy director.

They worked hard.

But today, small and delicate fingers, like chocolate bars, are straight without a little aura.

At ordinary times, Zhang Fan is a little hiding from LV Shuyan. Anyway, he always feels as if he owes others.

Although in a hospital, there is very little communication.

But today, Dr. Lu stopped shouting. Zhang Fan roared directly at Dr. LV: "Lv Shuyan, how did you learn to dissect? Can broken bones be put like this? Can't you see the front and back? Are you wood? "

LV Shuyan was nervous and didn't know what to do. I can't blame Dr. Lv. The broken bone was soaked in normal saline, and then the shredded meat on the bone was scraped clean, just like the bone residue sucked by Taotie, clean and without blood.

And it's a small broken bone residue, not an orthopedic doctor. How can you tell its pros and cons.

Just like, it's hard to show your thigh hair and let others distinguish between male and female!

If Zhang Fan roared so loudly in gynecology, it is estimated that LV Shuyan would have refuted it, but now, people can only scold him. Who makes him do bad.

She never thought that I would quit!

I won't serve you anymore. I have the ability to let Shaohua do it!

This is the doctor, this is the doctor in the grass-roots hospital.

If there is a glass heart, it is estimated that you can cry and fall off the equipment and go home to find your mother.

Therefore, generally, doctors have few good tempers, unless they have reached the top, even if they have reached the top, there are few good tempers.

Look at Lao Zhong. Is his eyes and expression a good match? no

Zhang Fan shouted and spelled. It was too difficult. Sometimes with a little carelessness, the bone fragments collapsed again.

Really, impatient people may be able to throw surgical instruments out of the window.

Zhang Fan roared on the operating table. Chen Sheng was anxious to dig his heart and lungs.

He knew that Zhang Fan had never been so manic in the operating room. It must be the bad operation

that made Zhang Fan so angry.

What should I do?

Just wait?

At this time, Lao Chen, who worked as the director of the office of the three dynasties, reflected his ability.

To tell the truth, his EQ and ability are absolutely online if he can serve three generations of presidents. He was never Ouyang's lineage, and then he became Ouyang's lineage, and then he became Zhang Fan's lineage. Chen Sheng has a lot of skills.

"Come on, bring me the orthopedic roster of your hospital and let them stand by at the door of the operation!"

He took over the right of coal city hospital directly.

The president of the hospital was hesitant and vague. He was fighting in his heart now.

One is looking forward to the success of the operation, the other is looking forward to Zhang Fan's failure.

Really, people can't see it at ordinary times. They can see their nature at the critical moment.

Chen Sheng is not used to this problem. Although Lao Chen mews like a kitten in front of Ouyang, he is as modest as Zhiduoxing in front of Zhang Fan. I have to be a little girl everywhere.

Because Ouyang and Zhang fan are too fierce. They are fierce people and have to be female.

But in the face of the leadership of coal city hospital, it is not enough to be Lao Chen's Apprentice. Lao Chen called the political commissar directly.

The political commissar is waiting at the door of the operating room. A political commissar who compares with municipal leaders patrols around the door of the operating room like a waiter. When he sees Chen Sheng's phone.

His heart was clattering. He was afraid to report to him on the phone that the wounded were hopeless.

Then, Lao Chen became the temporary president of the hospital!

"Orthopedic doctors must run to the door of the operating room for me within two minutes. Those who don't get there will be dismissed!"
