

Chapter 971

During the operation, many people feel that staying in the passage outside the operating room and praying for the god Buddha all over the sky seems to be very loving or filial.

In fact, everything is decided before entering the operating room.

All kinds of thrills and accidents in the operating room are actually fooled by outsiders or insiders.

Can an operation be performed? In fact, it has been evaluated by the doctor when it is outside the operating room. If the difficulty of this operation exceeds the doctor's level.

You can rest assured that doctors will never pull patients into the operating room.

Unless it is a small hospital with few operations a year, doctors can't wait to take off their clothes when they see patients and see them pull up on the table and use a knife. The larger the hospital, the more cautious the doctor is, regardless of emergency or non emergency.

Unless you are a government patient, Kung Fu must be outside the operating room. After all, medical treatment is not buying clothes and pants. It's amazing. I can go to the mall to change.

This is, not common sense.

Hanging hanging is the focus of anal prolapse surgery, and looking for hanging point is the focus of this operation.

Don't underestimate the search for this hanging point. In recent 100 years, doctors in anorectal department have searched for three points, all of which are unsatisfactory. After all, it doesn't work as well as the original one.

Some hang on the sacrum and some hang on the sacroiliac joint. For example, Changhai Hospital in Mordor, the first hospital in the world to use silk instead of thigh fascia lata, has done a great job in.

Moreover, none of the patients who have been followed up for more than ten years has relapsed. It is also a wonderful hospital. It is also unique to be famous in a city with light diet. You said that if you were in Sanchuan, the capital, and served with pepper every day, it would be either constipation or diarrhea.

However, Zhang Fan will not look for hanging points, because no matter how he looks for them, these points are not as good as others. What he does is folding, which is to find a way to fold the intestines according to the length in the abdominal cavity.

It's simple to say, but the difficulty of this technique goes beyond finding the suspension point.

Because if you don't do the folding operation well, intestinal infection and intestinal obstruction will come one by one. There are many advantages, little damage, and the biggest advantage is that it is only operated in the abdominal cavity and will not affect other organs of the patient.

However, the difficulty of this operation is so high that the medical industry has begun to eliminate this operation. It can also be said that there are few doctors who can do this kind of operation in the frontier.

However, Zhang Fan is an exception.

"Look, this operation must not damage the intestines, otherwise it will infect and adhere."

Because the intestinal contents of the lower abdomen are not comparable to those of the upper abdomen. The intestinal contents of the lower abdomen are all mushy feces. Here, the intestinal tract will take shape only after absorbing the water of feces.

Therefore, once the intestinal tract is damaged, even if there is a tiny needle eye, all kinds of bacteria in the contents of rice soup enter the abdominal cavity, followed by human life.

Zhao Zipeng stared round and tightly at Zhang Fan's hands.

This kind of stitching is simple. As we all know, there is a layer of skin on the surface of ham. What Zhang Fan needs to do now is to stitch inside this layer of skin.

The needle and thread pass through this layer of skin, but they can't penetrate. It's that simple. The thickness of the needle and thread is about the same as that of the skin, so the needle must walk in the middle of the intestinal mucosa.

There can be no offset at all.

Zhang Fan holds the intestines in one hand and the needle holder in the other, "pay attention, enter the needle vertically, and then translate it 90 degrees. Hurry, the needle feels wrapped. When the needle is still a little dry, he starts to move forward slowly. If he feels a sense of breakthrough, he can give up this operation."

"Yes!" Zhao Zipeng's head is full of strength, but he has a lot of MMP in his heart. Let alone let him learn. The parenteral model is not much thicker than needle and thread. It's frightening to look at it " Why is it so difficult for Zhang Yuan to come? How can I learn? "

Folding, like folding fried dough sticks, the intestines are folded into a lump by Zhang Fan in the lower abdomen, and the large intestine is rolled up like nine curved red intestines.

If you stand up and look like this, darling, it's like a big bug standing in an animation.

One needle at a time, Zhang Fan put his hands into a needle between exhaling and inhaling. Zhao Zipeng watched as Zhang Fan breathed.

"It's too difficult!" Zhao Zipeng is almost crying. He thinks that even if he can't reach the top chrysanthemum doctor, he always puts it above the waist. But today, after watching the operation of Zhang Yuan, he thinks he's still near his ankle.

Let him learn this operation, let alone one year. It's hard to say how it has been for ten years.

After folding, not to mention anal tightening.

Folding is not easy to understand, but tightening is relatively easy.

Everyone should have seen the round target paper for shooting.

If the ten ring dots in the middle of the target paper are the anus, what Zhang Fan has to do now is to rotate around the anus between the nine rings and the eight rings with a silicone mesh belt clamped by a vascular clamp.

"Open your eyes!" Zhang Fan said softly, and Zhao Zipeng immediately handed over the sharp knife.

The so-called eye opening is actually cutting a hole near the anus, and then inserting the vascular forceps along the gap between the muscles.

It's terrible to think about it. If you don't say anything else, when the operation is finished and your hips are exposed, it's like opening two eyes on both gluteal muscles! If the patient recovers well, maybe his eyes will become dimples. If he is a person with scar constitution, it is really two eyes.

Zhang Fan stuffed the vascular forceps, and Zhao Zipeng immediately stuffed the index finger into the anus and intestine.

He still knows this, because Zhang Fan wants to tighten. He usually uses his middle finger during inspection. At this time, he needs to show his finger, otherwise it will be too loose.

You can think about it. Put up your index finger and have a look. The diameter of this place should be so

large. Don't put what shouldn't be put. Although the muscles have contractility, they can play like rubber tendons. If they are broken, they can't recover.

If you don't want to have eyes or dimples on your ass, don't fool around.

"How's it going?" Zhang Fan asked Zhao Zipeng while shrinking.

"Just a little tighter."

Finally, like helping zongzi, the patient's anus and intestine were contracted.

"I had an operation and gave me a liquid diet."

"OK!"

Zhao Zipeng finished, looked at Zhang Fan and said, "Zhang Yuan, can I write a paper on this operation!"

This time it's Zhang Fan's turn to sweat, "well, what can I write about this operation?"

"I want to track it and report it as an example! After all, this kind of surgery is rarely seen in journals. "

"OK!"

After the operation, Zhang Fan reflected again. Is he asking too much of himself?

"No, it must not be. The old man has high requirements for me!"

Chapter 972

Many times, in fact, the work in the hospital is relatively boring and boring.

In the eyes of outsiders, such as flesh and blood, crying is nothing in the eyes of doctors and nurses, and even a ripple will not float in my heart.

See too much and feel too little. Say an anti human word, there is no empathic experience, and the emotion can only be revealed by the system and salary.

People who have been abroad will always despise all kinds of bad attitudes of the Chinese medical system, but few people mention the feeling of waiting. It can be said that nothing else. A long wait directly destroys everything, unless you have money, especially a lot of money.

After the operation, Shaohua cleaned up Zhang Fan's things at home. To tell the truth, Zhang Fan has already packed up his things. But Ouyang called Zhang Fan again.

"Although the weather is hot, we still need to bring several sets of formal clothes. To reflect the style of our hospital, we still need you to stand at the front desk!"

Zhang Fan's heart is sweet. The old lady can speak now. She doesn't want to be honest before. She hates Zhang Fan for being too dark, just like the old farmers who have been in the field for decades.

Looking at Zhang Fan's face with a smile, Shaohua asked. As a result, Shaohua prepared a large suitcase of clothes for Zhang Fan.

"It's worn when the weather is particularly hot. It's worn when entertaining people. It's for washing. It's hot. If you don't have time to wash, you can change it directly."

After settling down with Zhang Fan, Shaohua hurried to the farm. Recently, Shaohua's mouth blistered.

Because after tens of thousands of mu of lavender essential oil was extracted, the former second dealers were a little afraid and didn't dare to take the plate. The amount was too large.

People on the farm wanted to make a fortune. As a result, after flocking to lavender, they used to feel that the previous essential oil could not be sold at once. Some second-class dealers also accepted it, but the price was very low.

Everyone turned their attention to the Shaohua family. Shaohua recently contacted the larger second-class dealers everywhere, thinking that he could give more prices. It doesn't matter to him, but these people on the farm have nothing to do with their own family, but several old people can't bear it.

As a result, the larger the second dealer, the lower the price. To be honest, the girl felt pressure for the first time.

However, the four old people and Shaohua didn't tell Zhang Fan about this. They felt that if they told Zhang Fan about this kind of thing, Zhang Fan had no way to increase his troubles. Moreover, Zhang Fan's work was very special, so they wouldn't bother him if they didn't bother him.

Therefore, Zhang Fan doesn't know.

After cleaning up, Zhang Fan, Ouyang and Chen Sheng set out with two officers.

Instead of staying at the bird market, I went directly to Sanchuan. For nothing else, I came to Sanchuan's mouth and anus.

To tell the truth, Xihua's oral force is known all over China.

But this area is also a wonderful place, oral cattle. This thing has historical reasons. In the earliest time, people's school was established by integrating the medical advantages of several developed countries.

Oral cattle do not say, people are also powerful in the anus and intestines, which makes people look sideways. In other regions, if a system is powerful, it will make the adjacent or related systems powerful. After all, there is a joint relationship.

However, Sanchuan is different. People directly own this thing.

It's still inconvenient to go out of Xinjiang. It's still a little far to drive. In the era of no high-speed railway, you can only take a plane. Zhang Fan, they are the first batch to enter colleges and universities for recruitment.

Not early. The area is too poor. We can only do it earlier.

On the plane, Ouyang and Zhang Fan sat together, "let's go to Sanchuan first and then accompany the capital. After that, we go directly to West Lake, then magic capital, and finally green bird. Have you contacted old Lu and old Wu? "

When Ouyang came out this time, in order to get good policies, he also boasted to the government. He guaranteed a minimum of ten masters and five doctors. Therefore, the old lady said that she was not nervous. It was all a lie.

Of course, the policy will come when the cow is blown. The master's resettlement fee is 300000, divided into one set of housing, and the doctor's resettlement fee is 500000, divided into one set of housing.

Because the tea vegetable hospital now has not only two branches, but also has almost talked with coal city. Coal city hospital is about to become the third branch of tea vegetable. The leaders of tea vegetable think they are very awesome. This can boast the regional interpretation of politics, so the rare atmosphere lasted a while.

However, this condition is also average in 10 years.

Don't think about the top doctors. Look at the conditions of Su Xichang. The cost of settling down alone is one million, but they also give a suite. Although it's frightening that these places haven't developed in

10 years, they have shown their rich and powerful side.

Can the house of tea vegetable be compared with that of Su Xichang? No, so Ouyang was so nervous that he couldn't blow the cow by himself. As a result, he finally returned to tea and nothing. That would be a bit embarrassing.

Therefore, the old lady finally had to let Zhang Fan go through the back door to find his master and uncle.

"I said hello. Alas, it's difficult for the two academicians to endorse and advertise for us."

Zhang Fan said with emotion.

"It's all right. I'm not a certain field hospital. I'm a non-profit hospital within the serious national system."

Along the way, they kept discussing the enrollment, mainly because Zhang Fan and Ouyang didn't have much confidence.

Getting off the plane was like entering a cage. Really, when I got off the air-conditioned plane, what came to my face was the muggy temperature in Sanchuan. It was sticky, sticky, just like a lump of warm sticky sputum sprayed on my face. I always felt that there was water flowing on my face and my body.

"It's too hot!" Zhang Fan took off his suit and wore a short sleeved shirt. The sweat on his face couldn't stop flowing. The hot Zhang Fan wanted to find a hole in the ground.

Several people hurriedly took a taxi to find the reserved hotel. On such a hot day, Zhang Fan didn't plan to go out again today, because the next day was the recruitment conference.

A woman is a woman, regardless of age. On such a hot day, Ouyang and the two young officers went out shopping!

Chen Sheng wants to ask Zhang Fan out. After all, he has come to Sanchuan, but Zhang Fan shakes his head like a rattle drum and resolutely doesn't go out. The weather was a little cooler at night, but the fire turned into a small fire, and the steam in the drawer still existed.

Ouyang and the three of them were like fishing from the water, but in this way, with the special flattery of the two little officers, Ouyang was still very happy.

At ordinary times, Ouyang hardly goes to the streets in tea vegetarians. This time he came to Sanchuan, he was addicted. I guess I'm glad to go shopping. Ouyang invited everyone to dinner at night and paid out of his own pocket!

Small county liver, a sea of people, several people are sweating, but the food is also very cool. It is said

that the food in Sanchuan is spicy. In fact, relatively speaking, it is called spicy and fragrant, and it also has a bit of hemp rather than pure spicy.

Zhang Fan loves this kind of food in general, but Ouyang likes it very much. Although it's spicy and thin, it can't stop.

In the sound of trump, Zhang Fan ended the first day of the three Chuan.

Chapter 973

It's delicious and difficult to digest. It's often said that it's like a bad result after being stained with a bargain that shouldn't be touched. But that night, Zhang Fan, they were really delicious and difficult to digest.

In particular, the old lady was very angry. As a result, she ate a little more because it was delicious. The spicy old lady squatted on the toilet and felt uncomfortable. Ouch!

This is because of gastrointestinal discomfort, not food, that is, the so-called soil and water discomfort.

Upper spicy lips, lower spicy ditch door! That's all right. Sanchuan hot pot is a little better. The spicy is not so thorough. Why is the anus and intestines next door powerful?

It is estimated that it has something to do with their hotpot being hotter than Sanchuan.

There is a joke that people in China, especially in QQ group, can't talk about one thing, that is, whether the hot pot in Sanchuan is delicious or the hot pot in the capital is delicious.

As long as this word comes out, no matter what happens, it can skew your building and make an earth shaking noise.

When Zhang Fan got up in the morning, he glanced at Ouyang. "Didn't the Dean rest? Also, I'm not used to sleeping in the air-conditioned room. I didn't sleep well last night! "

Ouyang ignored Zhang Fan and turned his white eyes. He didn't sleep well. Ouyang spent most of last night on the toilet. Can you sleep well!

Chen Sheng whispered to Zhang Fan, "the old lady had diarrhea last night!"

"What's the matter? I didn't buy you some medicine. Don't be dehydrated on such a hot day. It's so hot today that I have to go out again. It's not good to have heatstroke. "

Zhang Fan also whispered.

Some people need to be booed by others, while some people, don't enter Ouyang, she doesn't need other people's sympathy, let alone sympathy. Even if she cares a little, she feels uncomfortable.

"I brought the medicine, took some montmorillonite powder, and drank a cup of normal saline in the morning."

These were reported to Chen Sheng by two small officers.

"Oh, my face is not very good. If not, let the old lady rest in the hotel!"

Zhang Fan glanced at Ouyang's face again.

"Well, you have to say this!" Chen Sheng has a rather difficult expression.

"Dean, today I'm mainly going to talk to the students about my intention. I may not be able to sign the contract. Otherwise, you can turn around today and wait for you to make a grand debut tomorrow and the day after tomorrow. It must be a sea of people in such hot weather. "

"No, I won't go. I always feel unstable. Let's go. It's okay!"

There was no way. The old lady didn't listen to advice. The party had to go to Xihua.

Graduation season, to tell you the truth, the school is not good, and the learning tasks are heavy. In fact, it is estimated that only the school can realize what comfort is.

The school is simple after all.

Looking at the crowd queuing outside the venue, Zhang Fan was a little proud, "we didn't suffer this crime in those years!" Of course, Zhang Fan also forgot his hesitation.

The Organizing Committee of the school gave a place to the tea vegetable hospital. Chen Sheng and two young officers were busy hanging up the advertising pictures he brought.

Before the venue opened, their recruits entered the venue. Not long after the layout, Zhang Fan found that the booth next to them was also a frontier hospital.

"Dean, next door is the hospital in Mengzhou, the frontier!"

"Oh, really! Let's go and say hello!" Ouyang said to Zhang Fan.

In fact, people's hospitals in Mengzhou have long found the tea vegetable hospital. To tell the truth, they all turned green when they first saw the booth of the tea vegetable hospital.

Mengzhou is not far from tea, and most areas are separated by a Tianshan Mountain. But the natural environment of Mengzhou can't compare with tea. It's OK that Mengzhou is in the north of Tianshan Mountain, but not in the south of Tianshan Mountain.

At the edge of Tarim Desert, people can be buried in sand cities in summer.

Moreover, due to the vigorous development of tea vegetable hospital in recent years, graduates of Frontier Medical College can not stay in the bird market. Most of them will choose tea vegetable. Therefore, there is a lot of pressure in Mengzhou.

In order to escape this pressure, they thought of working with tea and came to Sanchuan for recruitment.

As a result, I didn't expect to meet again thousands of miles away, and it was next door. The leader of Mengzhou led the team had a longer face than the donkey.

Mengzhou is a delegation this time. Government leaders led the team to recruit doctors for hospitals in the state and county.

Looking at Ouyang and Zhang Fan coming over, the leaders of Mengzhou greeted them with a bitter smile.

"President Ouyang and president Zhang, you also come to Sanchuan for recruitment!"

The leader of Mengzhou said hello, and an alpaca flew by in his heart, "it's not good where you go. Where we come, you come, and it's still next door to us. Isn't it going to kill yourself!"

It's really bitter to think about the tasks assigned by the government.

"Oh, yes, there are too few medical graduates in the frontier, so we also want to come here and see how many people we are going to recruit this time."

Ouyang greeted with a smile.

It can now be said that hospitals in the mainland may not know about tea element hospitals, but the major hospitals in the frontier are too familiar with tea element.

From a third class hospital in the prefecture capital, people are more famous than the provincial hospitals in niaoshi. Don't you understand!

"Hey, let's have a look. We may not be able to sign some."

The leaders of Mengzhou were almost crying. They originally wanted to recruit 30 people, but today they became tea vegetable neighbors. It is estimated that all three are problems.

Because everything is afraid of comparison.

Ouyang smiled and didn't talk much, so he looked at the advertisement for the hospital.

The recruitment of medical units is actually showing off their wealth.

It's no exaggeration.

For example, when other enterprises introduce their units, they often talk about their achievements, such as what our unit has done in recent years and where it is located.

The hospital is different. First put the number of beds, then the hospital equipment, then the number of doctors, and finally the salary.

Ouyang looked at the recruitment advertisement in Mengzhou and relaxed a little.

Because the largest hospital here has less than half the beds of the tea vegetable hospital. I'm looking at their equipment advertisements. What are they.

Not even a nuclear medicine center.

People from the two regions are really embarrassed to talk for a few minutes.

Ouyang and Zhang Fan returned to their platform.

"Ha ha!" The old lady finally had a smile on her face.

Zhang Fan knows why the old lady smiles without asking.

"Put the billboard introducing the hospital in advance. After you put it, others won't see it."

The old lady's words also had confidence. Chen Sheng and the two young officers quickly put the

billboard forward again.

"Ah! We are not prepared enough this time! "

Ouyang sighed.

"What's the matter?" Zhang Fan asked in the same way.

"We should make the brand bigger and use more colors. You see, there is no difference between us and the one next door."

"Hehe, it mainly depends on the content. They are all educated people. Size and color don't matter much." Zhang Fan smiled.

"You too! Look at our introduction. The hospital has 2000 on-the-job employees, 300 with medium and senior professional titles and three branches! " Ouyang has included all the coal city hospitals that have not yet been negotiated.

"Mainly our equipment!" Zhang Fan teased the old lady again.

"Yes, I just walked around quietly when I first came in. There was no one better equipped than our hospital in the venue. Hey, our tea vegetable hospital had the best conditions!"

Zhang Fan nodded with a smile. In fact, he didn't say anything in his heart, "those who are more powerful than us are waiting at home. Who else comes here to recruit!"

Chapter 974

Teachers in universities, especially in the medical department, do not look up to the major expert directors in the hospital. Not to mention university professors, ordinary teachers don't look up to them.

Especially the professors and teachers of basic disciplines despise the major experts of the hospital.

In the words of teachers, "what do they know? Do you understand? Just take out the scientific research achievements of our teaching and research office. They don't know what this is."

For example, professors in the anatomy teaching and research department often say this in class: nerves. The people who know nerves best are not in the Affiliated Hospital, but all in our teaching and research department.

Pathology is even better. In the hospital, the pathology department is like an unknown passer-by, but not in the school. Sometimes not only the hospital, but also the public security will ask.

Therefore, the teachers in the school despise the doctors in the hospital for not paying attention to the foundation.

After Ouyang took a turn, he was proud. "After that, we still have to come out and have a look. We can't always be at home. We always think we can't. In fact, we can still!"

Ouyang is proud.

In the booth next door, the leaders of Mengzhou wanted to find a new place, and the advertisements of the two companies came out.

Look at others, settle down 500000 and divide the house.

If you look at your own family, there is only 100000 resettlement fee. This is still a master's fee, but the doctor's fee is not mentioned directly.

Looking at other people's equipment, there are seven or eight of the best equipment in Asia, and what about them?

"Big dog!" The leaders of Mengzhou are gnashing their teeth and muttering.

Finally, the door of the hall opened, and these prospective graduates poured in like water.

Mingming still has a green face, but he tries to make himself look a little more mature by wearing a suit and wearing green and Dai.

Applying for a job is probably the first step for them to understand the cruelty of society.

The originally quiet hall was like a group of fly bombers. In the buzzing, everyone tested each other's depth.

Resume copying is more delicate than one, and girls' resumes are generally better than boys' ones.

However, when hospitals recruit personnel, they tend to favor boys.

After a while, Zhang Fan had the most students around their booth. It was dark and vast. Zhang Fan couldn't breathe.

Because they all study medicine, everyone knows the goods.

"I'll go. This hospital is awesome. Look, Olympus has the most advanced gastrointestinal endoscopy. It's too exaggerated. Xihua doesn't have it!"

This is a little girl dedicated to the Department of Gastroenterology. When she saw the gastrointestinal machine that can only be seen in the magazine, her mouth was surprised and could not close.

"God, look at the latest CT and MRI. It's a local tyrant. It's so awesome to drive the hospital."

The students who didn't surround the first circle exaggerated and pointed to the billboard of tea vegetable and exclaimed loudly.

On the booth in Mengzhou next door, there were two or three birds, and they still couldn't squeeze into the booth on the side of tea. The leaders of Mengzhou were almost crying.

You can't compete. If you compete, you have to hang yourself. "Time is bad!"

Although there are a group of students, none of them is a master's degree, let alone a doctor's degree. Even there are no students in the Department of Stomatology.

There is not much to say about stomatology in Xihua. Few undergraduate graduates are employed here. Most of them have studied postgraduate and doctoral degrees, while almost all of them have entered the Affiliated Stomatological Hospitals of medical colleges in major provincial capitals.

A few went to the dental clinic made by the southern club. Ouyang and Zhang fan are not satisfied with them, nor are the students.

"Where is tea? Frontier! It's still on the border! " Although I didn't ask whether you ride camels at work, everyone was a little lost.

"Why is it not a better city? Why is it in the frontier!" Some directly say what Zhang Fan doesn't like to hear.

"It's just a little far." Some speak more tactfully.

But, in a word, it's too remote.

But there are also those who want to go, "teacher, does your hospital pay for the resettlement of

undergraduates?"

Zhang Fangang wanted to say no, Ouyang answered directly, "50000, one single dormitory, the conditions are very good!" This was decided temporarily by Ouyang.

Zhang Fan glanced at Ouyang. He didn't think Ouyang agreed to 50000 without discussion, but felt why he didn't 50000 when he first came!

Unfortunately, China is developing too fast. 50000 is not very attractive.

Several students have submitted resumes. Although Zhang Fan is also short of doctors, not all students have to recruit. Chen Sheng and the students they ask for information, Ouyang and Zhang Fan begin the preliminary screening.

In fact, it is also simple, that is to ask some questions, such as the definition of malignant hypertension, the use time of tourniquet and so on. It's not difficult, but if you don't study hard, you won't be able to answer.

This job fair is not only organized by Xihua students, but also organized by major medical schools in Sanchuan, so the level of students is still uneven.

In the two-day job fair, Ouyang just recruited two stomatologists. They were a couple.

They couldn't arrange each other in their respective hometown, and their family didn't seem to support each other very much. Then they discussed and decided to choose tea vegetable hospital as if they were at the end of the world.

It seems that if you want to go, you should go far away.

These two people are from Xihua stomatology department, and their level is good. Ouyang signed a contract with them for the first time, which is a little deceptive.

"You can rest assured that the hospital will definitely focus on training you two. You can choose any major hospital in the country. If you have the opportunity to study abroad, it's not a big deal.

Don't worry about accommodation, but you don't have a marriage certificate. I must let you have one room each. The settlement fee for you two is 100000. The welfare distribution room of the hospital is going to be built this year. I'll put you on the list in private. "

The old lady tried to put on a kind expression with triangular eyes. Grandma wolf signed two people.

As for the master and doctor of Stomatology, don't think about it. It's too scarce. People don't come to the job fair.

In addition to two doctors, Zhang Fan recruited three higher nursing students, all of whom are five-year undergraduate nursing students, and their level is good.

Overall, the effect is not very good.

Several people said in two days have dry tongue, and the result is not good. There's no way!

"How many did you recruit?" After all, he was a fellow countryman. When the hall was about to close, Ouyang went to see the situation in Mengzhou.

"Well! We recruited ten people! " The leaders of Mengzhou have a look of decline.

As soon as he said this, Ouyang felt bad for a moment. She doesn't think so.

Originally, I was a little dissatisfied, but now I'm even more dissatisfied.

This is not good for the old lady. She likes to compete. She has to compete with others at any time.

"All Xihua's?" Ouyang asked reluctantly. Then he felt that the question was inaccurate and asked one more question: "are they all Xihua oral?"

The leader, who was already in decline, looked even worse. Holding his breath, he probably wanted to get angry, but he endured and said: "no, it's all from northern Sichuan and southern Sichuan! Are you recruiting from Xihua? "

The leaders of Mengzhou feel angry, but they can't sulk. No, it seems that the booth on the tea vegetable side hasn't been established. It's estimated that few people have been recruited.

So he also wants to block the gas for Ouyang.

"Of course, we are still two students of Xihua Stomatology, especially excellent! Or a couple, this is the most stable! "

Ouyang looked up and was proud!

Chapter 975

In Ouyang's world, life is like salted fish without competition and competition. For example, the attitude towards Jinmao, Zhang Fan after the 1980s, they always feel that Jinmao's weapons are advanced and science and technology are developed.

In Ouyang's eyes, they all disdain. What Scuds and invisible big planes are idle. If you want to work, you

can stew you like a chicken, and drown you in the ocean of the people.

Anyway, most of this generation are high spirited and will find trouble if they have nothing to do. I can't tell whether it's good or not, but who is her subordinate and still values her subordinates. To tell the truth, it's very comfortable.

If someone bullies you, people don't have to think about it. They will come out directly. If they don't pay attention, they will make three points. It's even more reasonable.

However, the social development is still too fast, which makes Ouyang overwhelmed.

"Isn't it good to take root in the frontier, write about life struggle and realize your life ambition?" Old lady Ouyang didn't upset Sanchuan's string, and didn't beat Sanchuan's steaming weather. As a result, she was defeated by the job fair.

Lying in the hotel, the old lady suffered from heatstroke. Looking at Zhang Fan, the old lady felt even worse.

Zhang Fan took the temperature of his wife and took saline. He laughed and said, "I'm afraid of what. We already have Wutong tree. Are we not afraid of Phoenix?"

It's mainly because we have high requirements. Otherwise, you're a little worried about how many people have to come to our hospital today. "

"I look at Xihua's oral department. My eyes are greedy!" There was no one else, just Zhang Fan and Chen Sheng. The old lady told the truth.

In fact, it does not complain of simultaneous interpreting of the old lady. When it was time for the tea hospital, the dental graduates in Xihua were just like legends.

Now it seems that our hospital has some strength and can take two steps. As a result, the talents they can see don't even come to the job fair.

"We are mainly internal and external women and children. After all, oral cavity is a small department.

We are not greedy. After internal and external women and children get up, Xihua will always come to our hospital."

Zhang Fan has no choice but to say so, mainly because Xihua's dental graduates are too popular.

"Your master is in Qingdao. If your uncle were in Xihua, what military hospital would you go to?" The old lady has complaints!

Zhang Fan has no way to interface.

"Dean, although there are not many recruiters, let's not entertain them."

Chen Sheng knew how to persuade Ouyang and told her to work directly. The old lady came out of her grievances.

"That's no good. We're too few people. How can we treat others badly? Ask about and book a better hotel. Don't let others think we're too poor to afford a meal."

"OK, if you don't attend, you're not feeling well today, or..."

Turning his eyes, Ouyang took off the cold towel on his forehead and sat up.

"How could I not be present! Go and inquire about the restaurant, even if there are hot pots! "

"Hehe, the restaurant has inquired. I'll wait for you to confirm." With that, Chen Sheng told Ouyang about the restaurant.

"You'd better eat fried vegetables, have some drinks and see who drinks." Ouyang is full of spirit when he talks about work. I don't feel dizzy, my eyes don't spend, and I don't feel sick.

To tell the truth, Sanchuan cuisine is powerful. There is a saying that there are Sanchuan restaurants where there are Chinese people. It's really hard to say, but it's true that there are small Sanchuan everywhere.

Even foreigners know about double cooked pork and Kung Pao diced chicken.

However, in Sanchuan cuisine, this is not famous. In the spicy country, the state banquet is a boiled cabbage.

It's strange.

Zhang Fan is a eater, while Chen Sheng is a big eater. Zhang Fan is delicious, but he won't look around the world to find out what's delicious, and he won't be able to be this thing.

But Chen Sheng is different. Chen Sheng not only tastes delicious, but also deliberately inquires and collects, and knows quite well about the tastes of Zhang Fan and Ouyang. To tell the truth, this is also very good.

For example, today, he found a restaurant. It is said that the ancestor of the restaurant owner was the neighbor of the great eater. It is said that his ancestors gave advice to others.

It's claimed that it belongs to the owner, and there is no official organization to identify it, but the boss's non spicy dishes also stand a place in the world of spicy hot pot and spicy string.

Just as it was not serious not to wear a suit and not to attend a meeting without superior leaders, it seemed that eating hot pot was not dinner. Before Zhang Fan and his colleagues left Sanchuan, they invited five signed graduates to have a meal.

You can boast about your wealth in recruitment, but you can't eat, so the restaurant is not a private club, or a restaurant with high popularity and a little higher grade.

The couple are from the county below the capital of Sanchuan. It can be said that Sichuan people seem to be very much away from Sichuan. In fact, most of them are migratory birds.

It is to make money outside, and then eventually return to Sanchuan, while few high-end talents leave Sichuan. There is a saying in Sanchuan that if you can't get into the schools in the capital and magic capital, you often only choose the schools in Sanchuan, and don't think much about other provinces.

If their families did not object, or if they stayed in society for a few years, they might not choose to go to the frontier.

The boy in the Department of Stomatology, named Yu Wenlin, has a special spirit. Especially those with white and tender skin can get out of the water. It is estimated that this is the characteristic of Sanchuan people. Zhang Fan doesn't talk about height in Sanchuan, but depends on his skin color. Others know that Zhang fan is an outsider.

Don't mention girls in Sanchuan. Boys feel very good on their skin. It's tender, just like the tender tofu in Sanchuan.

The girl in the Department of Stomatology is Ning Yi. She is petite and cute. She looks like a doll. Her flickering big eyes with white skin color are really beautiful.

There are three students in the nursing department, two are girls and one is a boy. To be honest, senior nursing is the best employment in the medical department.

Many senior nurses often enter some foreign-related hospitals after graduation. Boys are especially popular. Male nurses are very popular in operating rooms, ICUs and psychiatric departments of major

hospitals.

These students are Zhang Fan. They picked up the leak because they are all frontier people!

The dishes ordered by Chen Sheng are also quite standard.

Especially the boiled cabbage, it really has all kinds of color, flavor and taste.

There are almost no spicy dishes on the table, which is also to accommodate the old lady.

What left the deepest impression on Zhang Fan was an air dried duck, which was well done. When you eat it in your mouth, there is a taste of wine, just like the alcohol chocolate you ate when you were a child. The faint taste of wine makes the mellow flavor of duck play incisively and vividly.

Not only did Zhang Fan feel delicious, but several students also opened their eyes. They all think that Sanchuan's diet should be spicy. Unexpectedly, the non spicy taste is also quite delicious.

In order to create a more relaxed atmosphere, two young officers kept looking for topics with several prospective graduates.

"Wow, your skin is so good. How do you maintain it?"

"Yours is also good. I like wheat color. It looks healthy." Ning Yi said to the two little officers with a little shyness.

Ouyang said to several people with rare and gentle: "yes, this experience can be told to your Zhang Yuan!"

The little officer covered his mouth, wanted to laugh and dared not laugh, but there was definitely a smile between his eyebrows and eyes.

Several prospective graduates were a little embarrassed and looked at Zhang Fan. In particular, Ning Yi and her boyfriend looked at each other and seemed to say, "is this the workplace culture? The boss bullies the second? "

Zhang Fan smiled. He knew this was Ouyang's active atmosphere. Next, he must introduce him.

"Laugh if you want. Why cover your mouth!"

When Zhang Fan finished, the two little officers immediately laughed.

"Although your face is a little dark, but your surgical level is very powerful. Do you know the latest frontier academic in dermatology?"

"I know that allogeneic transplantation and free skin grafting were invented by Professor Li Cunhou of Zhongyong University. It seems that the second author is from tea element hospital."

The only male nurse looked at Ouyang and said what he knew.

"Yes, it's good to pay attention to the frontier of disciplines in school. The second author of allogeneic transplantation is your Zhang Yuan, and the inventor of the operation is him. "

"Wow!" I don't know if it was installed by everyone. Anyway, the three senior nurses looked surprised.

And the two oral students are also very powerful.

After all, it's just a graduate student. It's still too green. The appearance of oral students is definitely pretended. If Chen Sheng pretends, ordinary people can't see it.

After a meal, Chen Sheng asked for a few student ID number to buy them tickets for September.

The next day, Zhang Fan and others set out for the capital.

Chapter 976

Peidu can be described as a big city. The chassis is large, the stairs are high, and there are many overpasses. It is exaggerated that high-rise buildings cover high-rise buildings. Sometimes when you look at the past, you feel that the whole city is like old maozi's dolls, one by one.

It has been said that navigation often makes mistakes in the accompanying capital. You can think of a city that can fool computer programs. It feels stunned to people who come to the accompanying capital for the first time.

Moreover, the weather in the accompanying capital is hotter than that in the capital of Sanchuan. Sanchuan can also make people feel that if they are staying in the cage drawer of small steamed buns, the accompanying capital is directly the cage drawer of large steamed buns.

Moreover, I don't know what the reason is. When I was in the three rivers, I saw what people in the street chatted about. Zhang Fan felt that he could still understand. Trump was still very pleasant to hear.

As a result, it was a little troublesome to listen to people in the Peidu. In particular, the chat between old men and women was completely incomprehensible.

Although there was a light rain, Zhang Fan's sweat flowed down like rain.

It's really good to be at home for a thousand days, but it's difficult to go out for a while. Zhang Fan, they come to recruit, there is no pressure, but this summer, the summer in the south is too hard.

Tongtong is as hot as the hot pot in the capital.

For the northwest, as like as two peas in the shadow, the rooms without air conditioning are exactly the same as the external environment, and there is no sense of temperature drop.

It's no exaggeration to say that sweat is flowing in the soles of your feet.

"What shall we have for lunch? It is said that the hot pot in the capital is very different from that in Sanchuan. " After entering the hotel, Chen Sheng came to discuss dinner with Zhang Fan.

"The old lady can't eat. Let's have something light."

"The old lady just told me that she can have some hot pot!" With Zhang Fan's tone, Chen Sheng secretly began to call Ouyang old lady.

"Hehe, OK, you can eat hot pot!" Zhang Fan smiled and thought, "I'm greedy?"

In a city where the soup pot is regarded as an evil way, the slightly spicy hot pot makes people feel that if they swallow the fire again, the more they eat, the more spicy they are. The weather is hot, the hot pot, and the sweat is like a stream.

The enrollment situation of the accompanying capital is worse than that of Sanchuan. Many students prefer to stay in the second class hospitals in the surrounding districts and counties rather than leave the accompanying capital to go to the frontier.

Don't sound like an area of the capital. According to the area of the capital, it's not too much for other cities. An area hundreds of kilometers away also pulls the hip.

After eating a hot pot, he left the capital directly. The old lady has no spirit to talk.

"From this situation, we can see how difficult it is for the state to support the West." On the plane, the

old lady whispered to Zhang Fan.

Zhang Fan thought and wanted to say something, but he couldn't say anything.

He didn't expect to get a bald head in the capital. Originally, he thought that the anorectal department in the capital was not bad. How could he accept so many digestive talents, but there was no one.

The clothes are useless, and Zhang Fan is helpless.

The old lady lost her confidence in going to West Lake to recruit. In terms of material level, the West Lake is even more powerful. Since ancient times, this place has been described by scholars as a fairyland.

If you want to take the students here and the excellent students to the northwest, to tell the truth, it's difficult!

When the plane flew over the mountains and approached the West Lake, it looked down on the plane, like a world after heavy rain. There were lakes everywhere, like jade.

After getting off the plane, someone came to pick it up this time.

To tell the truth, although Zhang Fan is in the northwest, his reputation is more obvious in Jiangsu, Zhejiang and Shanghai. The people who picked up the plane were not strangers. There were several senior brothers of Zhang Fan and Dr. Li who went to Dubai with Zhang Fan.

Dr. Li Guanghai, the doctor of pancreas, went to Dubai. Because the doctor in the capital was rushed back by Zhang Fan, it became a joke in the industry. Therefore, Dr. Li was liked by the teacher and looked at him differently when he came back.

Dr. Li is also very grateful to Zhang Fan. He has always been in touch with Zhang Fan. Although Zhang Fan tempts him to go to the frontier after graduation, he can't make up his mind.

After all, he has a family. Listen to the legend of the Great Northwest. Snow is like a millstone and flying stones are big, which makes him hesitate.

Zhang Fan's level, he is clear, but it is difficult for him to give up big cities and the West Lake, which has a good level of science, technology and education.

Therefore, knowing that Zhang Fan is coming this time, I also want to have a good talk with Zhang Fan. Whether to go or not depends on this conversation.

Most of the elder martial brothers in Jiangsu, Zhejiang and Shanghai belong to the Department of old Wu, and most of them belong to military hospitals, but they also belong to ordinary hospitals. Relatively speaking, they are very powerful in the Department of general foreign studies here.

Not to mention anything else, there will be an annual general foreign affairs meeting. All the people sitting on the rostrum are their division brothers. Moreover, they are now in their prime, and it is time to make achievements. If they are described by strength, the general foreign department in the capital can't get involved at all.

When the plane landed, several elder martial brothers had been waiting at the exit.

"This is my elder martial brother, this is my leader..." Zhang Fan introduced each other with a smile.

Ouyang smiled very happy at this time.

When getting on the plane, although the elder martial brothers asked about the flight, they didn't say to pick up the plane. Zhang Fan didn't say to Ouyang. Unexpectedly, several elder martial brothers came.

"Our Zhang courtyard is also occupied!" Chen Sheng looked at the two stunned little officers. The meaning in his eyes was too obvious.

"Guanghai!" Zhang Fan gave Dr. Li a hug. He must find a way to abduct this guy back to tea. So after introducing all the senior brothers, Zhang Fan specially introduced Dr. Li Guanghai to Ouyang.

And when introducing, he squeezed Ouyang's eyes gently. They have a tacit understanding in this regard. Two people can understand something more difficult than this, not to mention such a small thing.

Ouyang was especially enthusiastic towards Dr. Li, "Oh, Dr. Li, I'm almost hearing your name. Zhang Yuan told me every day that when you were in Dubai, I didn't believe how high your level and business ability were. As soon as I saw you today, I believed it. It took a smell of books."

Several elder martial brothers are different. Is Dr. Li so famous?

Ouyang has no idea about Zhang Fan's elder martial brothers. One of them is the pillar of their own hospital. Don't even think about it, but their students can think about it.

And Dr. Li, according to Zhang Fan, has to work hard.

Although Dr. Li is in his thirties, he has been in school and has not worked hard in society, although he also has these intrigues in his own scientific research team.

But compared with Ouyang and Zhang Fan, it is a comparison between a fresh little white rabbit and a thousand year old monster.

Chapter 977

Chen Sheng is busy enough in Sanchuan and the accompanying capital. Two big men Ouyang and Zhang fan can't go all over the world to inquire about places to eat and places to stay. The two little clerks can act as coquettes for ouyangsa. They come to a strange city, which is still much larger than tea. They don't know how many times the population and want them to work. If they lose it, it will become a big deal.

Therefore, the arrangement of the recruitment team depends entirely on Chen Sheng. Don't underestimate the arrangements before and after the saddle. To tell you the truth, Chen Sheng still has the ability of the elders of the three dynasties.

It's hard for everyone to adjust, especially Ouyang's hard to serve. Live better, the old lady is too expensive, and live almost. Although she doesn't say it, she must have a bad face all day.

If Zhang fan does this, it is estimated that he will break up in three days. This thing will test EQ too much.

But at the West Lake, Lao Chen can finally have a rest. Because there was no need to arrange anything. The recruitment was arranged by Zhang Fan's elder martial brother. The leaders of the outreach Department of Medical University came to contact Chen Sheng early.

Accommodation, you don't have to worry about yourself. From getting off the plane, a Koster has directly become Zhang Fan's riding tool in the West Lake. The driver is a local. It can be said that the door to the city is clear.

He took them directly to a villa near the lake area, which is said to be a sanatorium. A senior brother of Zhang Fan was the president of the hospital.

There are many Chinese sanatoriums. If ranked by quantity, it is estimated that the West Lake can not be ranked, but in terms of quality and luxury, the West Lake is definitely ranked in the top three.

Zhang Fan, the elder martial brother, was a naval hospital in his early years. Later, he felt that he couldn't fight, and he also felt that his medical talent was general.

I found this place for the elderly.

The sanatorium has a high level. It is backed by small hills and faces the lake. There are all kinds of trees

in the yard, from hot springs to swimming pools, from basketball courts to bowling alleys. You can enjoy projects you can't meet on weekdays without going out.

Moreover, the work here is quite leisurely. Only one or two groups of old people come here to recuperate every spring and autumn. Elder martial brother Zhang Fan doesn't have much work.

It is to arrange doctors and nurses to measure blood pressure, blood sugar, regulate the body, and do nothing else.

In midsummer, almost only the staff in the hospital, because it was too hot, there were few people to recuperate. In the words of elder martial brother Zhang Fan, after going to work in the morning, take a swim first, and then have breakfast.

I went to the badminton court and took a shower. It was noon. After dinner, take a lunch break, go to the chess and card room to play cards in the afternoon, and then get off work.

Zhang Fan's mouth is watering.

"This is a nursing home for you. You've been living for years!"

Zhang Fan's elder martial brother smiled and didn't say much. In fact, when people reach his level, they live a particularly natural and unrestrained life. In fact, they are like an invisible person in the industry.

Look at the martial brothers in the same period, and then look at yourself. Who knows, when it was late at night, he also regretted his choice when he watched the papers published by the division brothers in journals and their appearance on TV.

Therefore, only you know whether the shoes are suitable or not, and others can't envy you.

Because he has the most time, Zhang Fan's trip is accompanied by elder martial brother.

The relationship between the martial brothers can only continue if they have come and gone. Relatives won't kiss if they don't leave for three years, let alone the martial brothers.

Elder martial brother knows more about the future of Zhang Fan in the medical field, so he must accompany Zhang Fan this time.

Therefore, Zhang Fan's arrangement in the sanatorium is quite advanced. It is exaggerated that Zhang Fan and Ouyang have a villa, and Chen Sheng and two junior officers have a villa.

The decoration of the villa is comparable to the five-star presidential suite. Especially after getting up in

the morning, the sun shines on the lake, and the birds sing and flowers smell behind. It really makes people feel that they live in a fairyland.

Don't worry about accommodation. As for eating, don't worry about Chen Sheng. From beginning to end, if breakfast is not suitable, it is estimated that breakfast has been reserved.

During the trip of a few days, the elder martial brothers have already said hello. He will host today and you will host tomorrow. Directly let a group of tea vegetarians feel that they come to recuperate, where they come to work.

Especially the two little secretaries and two little girls are excited these days. I used to know how much Zhang Fanniu was. To tell you the truth, they didn't have a little concept.

I always feel that the technology is better and I know more people. Unexpectedly, when I came to the West Lake this time, I knew that Zhang Fan was extraordinary. Needless to say, how can ordinary people live in this villa?

"You say how enviable the wife of Zhang Yuan is." After arriving at the West Lake, the most famous elder martial brother here received the wind from Zhang Fan and returned to the villa.

The two little girls looked at the yard. There was a spa, so they decided to be extravagant, otherwise they would live in the villa for nothing. In the spa, the two enjoy massage and chat while enjoying.

There is no tea element in this kind of place. They have seen it on TV. In the past, they were particularly envious, so they came in to see the world with their teeth.

"Yes, how envious. If my husband has such a great ability, I guess I can wake up in a dream."

Because there were technicians, they didn't dare to talk much. When it's over, there's no money here

The next day, they were more interested in Zhang Fan " Zhang Yuan, I made you some green tea. I didn't put it when I knew you didn't drink medlar. "

"Zhang Yuan, I polished your shoes again!"

Zhang Fan's cold sweat came down. Although on weekdays, they respect themselves very much. But they are all well-organized people. They are not so attentive. Sometimes they play a little temper.

I didn't expect to have such a good attitude after sleeping all night!

Chen Sheng smiled and said nothing.

At breakfast, Ouyang said to Zhang Fan, "I'll take Xiao Wang to talk to Dr. Li first. You take President Chen and Xiao Li to the University."

The old lady almost gave up college. So I want to contact Dr. Li earlier.

"OK, why don't I contact Dr. Li and ask him to come here. You're running around on a hot day... "

"Hey, that's right. We should be polite to the virtuous corporal and let others come here. What's the matter. In fact, it doesn't matter whether you go to the university or not. Let's entertain your teachers and brothers in advance and let them introduce some of their students to us. "

"Hehe, I told my martial brothers that it's not necessary to entertain. However, the introduction may not be successful. I still have to go to school. "

"That's OK. You, President Chen and Xiao Li will work hard today. I won't go. "

After breakfast, the soldiers were divided into two ways. Xiao Wang looked at Xiao Li with envy. The main reason was that old lady Ouyang was not easy to serve. How good Zhang Fan was and how easy to talk.

Chapter 978

On the news, we often see that Dr. XX, master XX, was cheated by an illiterate into giving birth to a nest of children in the mountains. It's hard to say whether it's true or false. However, the concept given by the media is that reading is stupid. Then the useless theory of reading came.

It's hard to say whether it's true or not, but the current medical situation is that the higher the education, the more popular it is.

As an analogy, undergraduate students in medicine are like apprentices who have just entered the school. They often work as doctors for a lifetime. At most, they follow the rules and work according to the means invented by their predecessors. Whether they can make achievements or not, but the probability is too low. Especially in the current medical environment in China, it is at most a person who knows what it is and why.

Even some don't even know.

The master's degree is like some little stars with their own traffic. I have understood the three flavors in this circle. In the right hospital and in the right position, the probability of achievement is very high.

When you arrive at a doctor, you have made some achievements. As long as you work hard, you can still make achievements. As for the size of the achievements, no one can say.

What are the medical achievements? In fact, it is not decades ago. Decades ago, when others made a knife edge of 78 cm for the appendix, you used a knife edge of 1 cm.

People think that this is achievement, but it is not. The so-called achievement now is some microscopic and genetic discoveries or understandings.

So, it's been many years. The big guy who won the Nobel Prize is engaged in clinical practice? Almost all of them have been in the laboratory for many years. This is also the helplessness of China.

For example, Li Jiapo, why is medical treatment so strong. There are few people. Some doctors go into clinical practice and some doctors engage in scientific research.

The boundary between them is very vague, because many doctors work part-time after work or scientific research. Anyway, people are busy.

But not in China. The boundary between scientific research and medical treatment is very clear. Many department directors and experts in large hospitals seem to be academic. In fact, most of them copy other people's research or beat drums for others.

The real research is not in some clinical research institutes, so in recent years, the country is also thinking about ways to improve the education of medical practitioners. There will always be brilliant talents.

It is said that reading too much will become stupid. In fact, it should be said to be more pure.

Ouyang knows very well that if you talk with undergraduates, let alone what achievements the hospital has made, as long as you are a top three and pay more, you can deceive many students. If the hospital is located in a developed city, you will flock to it directly.

If you talk about what can be done and what achievements can be made in the hospital, people won't listen.

Therefore, tea element has no advantages in this regard. When it comes to wages, it's not as much as developed cities. Although it's the top three, it's not the top three directly under the Ministry of health. The region is still very poor.

Almost in the eyes of undergraduates, this hospital has no specialty.

Of course, if the tea vegetable hospital can accept poor students, the school is not famous, and others can tolerate the bad place of your hospital.

Because it's too difficult for an undergraduate to work out something in scientific research, and if he really wants to take the path of scientific research, people also go to study for a doctor.

Therefore, for undergraduates, don't work and live near the counties around developed cities.

Although the work will not be so dazzling, but the pressure is small. If you have a serious illness, you can transfer to another hospital if you don't agree with a word. If you have no conscience and a big prescription, don't be too moist.

At present, the tea vegetable hospital can only lure masters and doctors according to the conditions, but the geographical restrictions limit this condition. The greater the achievement opportunities, the more enterprises.

However, there is a Zhang Fan.

In a teahouse in the West Lake, Ouyang and Xiao Wang made an appointment with Dr. Li. Dr. Li couldn't get out in advance. Although he was about to graduate, his mentor didn't leave, and he was embarrassed to leave.

The tutor treated him fairly well. On weekdays, he didn't say that he would go back after the money was paid to him in order to pour out the invoice. He didn't say that he would go to tutor his children, let alone wash socks and cook for the teacher's mother.

But since I was a little younger martial sister, the teacher not only began to be nervous about the relationship between the teacher and the mother, but also was not so generous to several martial brothers. In the past, a project could dew some soup. Now, it's good to give one or two thousand a month.

It's not easy to live in the capital, but it's not easy to live in the West Lake. His wife is a teacher. In order to subsidize the family, she has to go to other areas to secretly teach her after work.

It's not easy to tell the truth.

But Dr. Li is kind and righteous. Although he is about to graduate, he always cares about the teacher's good and respects the teacher very much.

So waiting to get off work, the tutor was busy quarreling with Shiniang these days, and there was no new topic, so he hurried to the teahouse agreed by Ouyang.

The northern teahouse is different from the southern teahouse. In the early days, the northern teahouse played mahjong under the banner of the teahouse. There was a miasma in it. You were drinking tea and people didn't entertain you.

The southern teahouses, especially the teahouses on the west lake side, better under the banner of teahouses, actually sell singing and snacks. Especially snacks, don't look at such a small dish, the price is cheap.

When Ouyang sat waiting in the teahouse, he was embarrassed to always ask the little girl in the service uniform to ask, so he ordered some snacks. Waiting for the original suffering, Ouyang's fire kept rising when he heard squeaky and incomprehensible playing and singing.

Secretary Wang chose the place. Looking at the sweat on Ouyang's forehead, Xiao Wang was afraid to take it. This is that he is inexperienced and not as meticulous as Chen Sheng.

Therefore, although it seems that there are many opportunities around the leaders, it is actually very difficult. If you don't vote for the leaders once, twice, you have to finish class three times.

It has been said in the system that a person who can be a good secretary is definitely an exquisite and multifaceted person.

Ouyang's ancestral home is actually from the West Lake, but her father is a subordinate of Uncle beard. He leaves home young and has no hometown tradition. He likes to eat vinegar fish.

In Ouyang's generation, there is no hometown tradition. It's better to play a model play and let the old lady hum.

At the critical point of Ouyang's outbreak, Dr. Li finally came. When he saw that there was no Zhang Fan, Dr. Li was a little disappointed, although he covered it up very well.

But in front of Ouyang, his Taoism is nothing at all.

"I heard that the scenery here is good and the atmosphere is relaxed. I made an appointment with Dr. Li here. I don't know what Dr. Li thinks of this place. If it's not suitable, we can change places."

It is impossible for Ouyang to admit his mistake.

"It's okay, it's okay, it's good. Has Zhang Yuan gone to recruit students? "

As soon as Dr. Li sat down, he asked Zhang Fan.

Ouyang smiled softly, "if you don't pay attention to Zhang Fan, you won't be so anxious. As long as you're in a hurry, I'm not afraid. Let's take our time! "

"According to Zhang Yuan, old Xia will come to school too. He will come later. Have you got Dr. Li's degree? "

"Well, the paper has passed." Dr. Li stared at the Longjing tea in front of him and didn't know what to think.

"It's not easy. He graduated without delay and got his doctorate smoothly. Dr. Li's professional quality is still very strong."

Ouyang was carrying tea. At this time, the old lady was not in a hurry. While talking, she looked at Dr. Li with the corners of her eyes. The playing and singing in her ears was also pleasant.

Dr. Li didn't know whether he didn't want to talk or was not good at talking. Hearing Ouyang say so, he smiled modestly and didn't talk much.

"I wonder if Dr. Li has a child?" Ouyang began to talk aimlessly.

Dr. Li is a little anxious.

"Not yet." It's getting shorter and shorter.

Xiao Wang looked at the two people as if they were talking more and more. The girl's heart was made up of a lump. Ouyang was angry. She had seen it before, let alone her. Even the former Secretary of the tea vegetable hospital could tremble when Ouyang was angry.

"Zhang Yuan, help, come quickly!" Secretary Wang didn't Miss Zhang Fan so much.

Chapter 979

Zhang Fan in college is a little embarrassed this time.

Elder martial brother said hello and someone from the university came out to receive and arrange. For general recruitment, universities have a high attitude, especially universities with strong professional nature. People are not afraid that their students have nowhere to go after graduation.

At a job fair, many companies, almost all of which are major pharmaceutical equipment companies in the world, including any large multinational company that can be listed in the top 500.

Zhang Fan in the medical area stands out from the crowd like a chicken. He will greet the leaders of one company and another company.

"Hello, Zhang Yuan. I heard you came to the West Lake. I specially came to see you. When you have time, I'd like to invite you to our production base in Suzhou, Wuxi and Changzhou."

This is a vice president of Johnson & Johnson Southern Corporation. In fact, he didn't know when Zhang Fan came, but when he saw the tea sign, he immediately sent the staff who had seen Zhang Fan to recognize him.

"Zhang Yuan, you come to recruit students in person. We Siemens are often preparing to establish the most advanced technology line in Asia in Suzhou Wuxi. As our strategic partner, please visit and give us lectures and suggestions."

The companies who come to say hello are more responsible than the students who come here to know.

Standing aside to help the director of the University Outreach Department standing on the stage, his heart was full of shock, "how dare he be? The regions of so many enterprises came to say hello responsibly. How many instruments did he buy and how many kickbacks did he get!"

Two officers, one male and one female, saw envy, jealousy and hatred from each other's eyes. Their eyes were full of one meaning: "it's better to be outside the mountain. No one cares. Take as much as you want."

Originally polite, they were even more polite, with a slight sense of alienation.

Zhang Fan did not expect that there were so many medical equipment enterprises in this job fair. In fact, this is the inside story of Su Xichang. There are too many large enterprises around.

Hospitals, especially small hospitals, are not competitive when they come here to recruit directly. There are not many Chinese clinical graduates, especially undergraduate graduates, who work in the industry. Most of them either enter the system as civil servants or enter such multinational enterprises.

Therefore, small and medium-sized hospitals and hospitals in remote areas should not only fight against the siphon of large hospitals, but also fight against these medical related enterprises.

"Zhang Fan, how's it going? Have you recruited anyone?" Tang Zhenghao, a senior brother who was the vice president of Xihu Yifu hospital, called Zhang Fan.

Lao Tang is a disciple of Wu Lao. He is a serious person from Jiangsu and Zhejiang. It is said that his ancestors donated money to anyone. Anyway, he is very powerful both at home and himself.

He studied medicine from marubukuo, and then he studied Doctor Wu after returning home. He is also a rare elder martial brother in the military medical system.

At that time, when I went abroad to study at University, I could find a big man to read a doctor when I returned home. After that, I could be a leader in Yifu hospital. Think about it, I was a very powerful person.

Apart from others, the Chinese medical system took the old maozi road in the early years, and then the medical treatment in Marubeni had a great impact on the medical treatment in the north. At the beginning, many famous hospitals can almost see the shadow of Marubeni medical treatment.

But many large hospitals in the South later learned from Europe and America, such as Shaw Hospital. Although its reputation is not particularly strong in the country, it was the first mainland hospital in China to pass the International Hospital Accreditation (JCI).

Not to mention anything else, this one is quite awesome.

It's conceivable that he studied medicine in maruzi country, then returned home and became a teacher in the military department. As a result, after graduation, he can mix in the medical circle of European and American departments, which are all details and skills.

Moreover, this elder martial brother is not generally arrogant. For example, the elder martial brother in the sanatorium, old Tang doesn't contact him much, although he has almost no contact in a city.

But old Tang is nice to Zhang Fan. He thinks Zhang Fan and he are the same kind of people.

"Hey, I can't say. I didn't even have students to ask early in the morning." Zhang Fan reluctantly complained to Lao Tang on the phone.

"This shit is not what you, the executive dean, did. You said you don't want to change jobs to engage in administration. Why are you involved in this? All right, leave a few people. I'll call the outreach department and let them take charge. You come to the hospital and let's do an operation together."

Old Tang said to Zhang Fan impatiently.

"Elder martial brother, why don't you find some research laboratories for me, or our hospital will really break the chain."

"Come to the hospital first! I'll send someone to pick you up. "

"All right!" Zhang Fan seems to be wronged. In fact, he is impatient. When he hears that he wants to have an operation, he is actually happy, but he can't be too happy, otherwise it will hurt the enthusiasm of Lao Chen and Xiao Li.

After hanging up the phone, Chen Sheng looked over. Zhang Fan wanted to explain. Chen Sheng spoke first, "Zhang hospital, go to the hospital, show your hand and scare them, otherwise you always feel that our hospital can't do."

"Ha ha!" Zhang Fan smiled and didn't need to explain. Lao Chen directly found excuses for Zhang Fan.

Before long, a BMW came to the venue to pick up Zhang Fan " Hello, Zhang Yuan. I'm sent by president Tang to pick you up! " A very energetic young man politely invited Zhang Fan into the car.

Zhang Fan came to recruit students. Although he paid more attention to wearing shirts, trousers and leather shoes, compared with this young man, Zhang Fan was obviously fooling around.

On such a hot day, the young man wears very formal clothes, and even his tie is very comfortable.

After getting on the bus, he asked Zhang Fan about his satisfaction with the air conditioning temperature and whether Zhang Fan drank drinks. The young man looked straight and smiled and didn't speak.

Zhang Fan knew at a glance that this was not an employee of the hospital, and he didn't know that it was the medical device or pharmaceutical company.

People directly sent Zhang Fan to the operating building. Looking at the hospital, Zhang Fan envied. He was really envious.

"Too rich. The endoscopic center is bigger than our surgical building! " In recent years, the tea vegetable hospital has gradually become rich, but compared with other hospitals in Jiangsu and Zhejiang, one is in the sky and the other is underground, which can't be compared.

Zhang Fan is still staring at the mirror center of others in a daze. He is muttering in his heart how his mirror department can become the mirror center. Old Tang Qin came out of the operating building.

Following Zhang Fan's eyes, old Tang also looked at the big characters in the center of the mirror.

"I said, why don't you come to Yifu? Although the Dean can't be the president, the deputy director of the endoscopic center is still fine. The annual operation volume of our endoscopic center is estimated to be about the same as the total operation volume of your hospital. "

Old Tang's words sound ostentatious, but people don't mean it at all.

Nature is like this, but in other people's position, they often speak one by one.

"Hehe, elder martial brother, the director of your endoscopy center should be a general foreigner, and the endoscopy of orthopedics should also belong to the endoscopy center?"

"This is mainly the cavity mirror of general surgery. Don't be greedy and can't chew. I won't advise you. The teacher told me last time that your stomach and intestines are very powerful. Today, there is an operation of liver and gallbladder combined with stomach and intestines. Let's have one together. "

Old Tang knew that Zhang Fan didn't want to and didn't say much. He directly took Zhang Fan into the operating room.

Zhang Fan has entered many hospital operating rooms, the capital, magic capital, and even the largest and most advanced operating room in Dubai.

But generally speaking, there is no Yifu operating room, which makes people feel good. They all say that Jiangsu and Zhejiang people are smart. In fact, they do really well in details. The equipment placement in the operating room definitely took some thought.

"Come on, let me introduce you. This is my younger martial brother, little martial brother, Dr. Zhang Fan." Old Tang entered the operating room, clapped his hands, attracted everyone's attention, and introduced Zhang Fan to everyone.

Zhang Fan also thought about getting to know everyone. As a result, after the old Tang introduced Zhang Fan, none of the others introduced him.

Zhang Fan tilted his mouth. Lao Tang seemed to think it was not inappropriate. Then he said directly to a doctor, "bring the medical record and examination results to Doctor Zhang."

A doctor in his early thirties, definitely above Zhang Fan, hurried to take all the medical records and examination results.

When he handed it to Zhang Fan, he whispered, "little martial uncle, my name is ba Wenbin!"

Zhang Fan smiled and nodded. He also saw that Lao Tang's temper was definitely bad, but he must have no problem being a man, otherwise his students would never make their own decisions.

Zhang Fan looked at the medical records and various examination reports.

Another doctor quietly moved a high stool to Zhang Fan.

"Little martial uncle, sit and watch."

Zhang Fan smiled. It seems that old Tang's rules are very big!

Chapter 980

In terms of diet in China, if any province or region has the best diet, it is estimated that it can play a dog's brain. Every province has its own taste, and you think it's delicious. People in other places don't look at it.

For example, hairy eggs are regarded as delicious food by people who like to eat. People who don't like to eat can spit out the gallbladder when they see others eat them.

Not to mention some foods with strong smell, such as stinky tofu, which can divide people.

But to say where people eat fine, it is estimated that Jiangsu and Zhejiang people can definitely rank top three. Eat a freshwater crab, even tools can be invented, eat a small fish, and carefully place a specimen of the finished fish bones.

Let's say the Yangtze River knife fish that many people haven't eaten. To tell you the truth, is it delicious? Taste aside, fish bones are not food that ordinary people can place.

However, as for the complexity of food sources, northerners are definitely not as diverse as southerners. It is not that northerners are not delicious, but unconditional. The biggest difference between the north and the south in gallbladder diseases is that there are many stones in the north and flukes in the south.

What is the gallbladder? The gallbladder stores and condenses bile. What is bile? Bile is secreted from the liver to emulsify fat.

Why emulsified fat? Emulsified fat can be absorbed by the human body.

In short, fat can be directly decomposed and absorbed in the human body. Only with the participation of bile, fat pig elbows and fat sheep tails can become small fat particles one by one, and the intestine can absorb them at this time.

Once you eat too much fat, the body secretes too much bile, and then accumulates too much in the gallbladder, this thing may turn into stone. Eating some fresh food may also let some insects enter the gallbladder.

Many times, when the current technology develops to the present, it seems that the gallbladder is useless. This is wrong. It can let thousands of surgeons ride in luxury cars.

Because there are too many gallbladder diseases.

For example, the well-known clonorchiasis is rampant in southern China, because it has caused surgeons to remove many people's gallbladders.

In epidemiology, there is a saying that 60% of bile duct diseases in Yangcheng are caused by clonorchiasis.

It can be said that Chinese people, whether they eat greasy northerners or light southerners, actually have a lot of gallbladder problems.

Moreover, southerners pay attention to a fresh. The word seems to put some salt in the north, but southerners are different. River fresh and seafood always highlight a fresh.

In particular, some people like to eat a drunk shrimp and a raw fish. Zhang Fan knows what it is, but what is this raw fish? He didn't know.

Zhang Fan doesn't know how delicious it is. But some people like to eat.

Lao Kang's patient this time is a patient with gallbladder problems caused by eating drunken shrimp.

Three days ago, the patient had a sudden "drill top like" pain, nausea and vomiting, accompanied by fever, restlessness, holding his stomach and bending his knees. He was treated in the local county hospital.

After antispasmodic drugs, the patient's condition was relieved. He left the hospital and went home. In the evening of that day, the fever increased with obvious chills, jaundice and shock symptoms occurred. He went to the local hospital again and was transferred to Shaw Hospital.

At that time, when the county hospital saw the patient, they didn't let the doctor start, and they were directly sent to Shaw Hospital.

Because at that time, the gallbladder, which was originally an organ like purple grapes, became a blood gourd, the bacteria had entered the blood, and the patient had become a diffuse hepatobiliary vascular

basket.

This situation is too dangerous. Almost one mistake is multiple organ failure, so he was directly transferred to hospital.

After the patient was admitted to the hospital, the scene at that time added a trace of strangeness to the emergency center of Shaw Hospital in this hot summer.

Blood is like a virgin when it is in the blood vessel. Once it enters other organs, it is a rabbit. Stimulation of blood, stimulation of parasites in liver and gallbladder.

Although the patient was in shock, he kept hiccups.

Because of the movement, the body position changed, resulting in severe vomiting.

You can imagine that in the hottest weather in the south, a person kept vomiting, white fish, green and yellow vegetable leaves, and black flakes that didn't know what they were.

Puff, puff, puff, puff, puff, puff, puff, spit, spit, spit, spit, spit, spit, spit, spit, spit, spit, spit, spit, spit, spit.

More disgusting, because the patient is in a coma, his mouth and nose are full of vomit.

The nurse kept wiping with alcohol gauze.

This is nothing. When the contents of the stomach were vomited clean, the doctors and nurses, especially the nurses, just breathed a sigh of relief, the climax came.

Shrimp shaped patients, like old dogs in rural areas who eat indigestible things, have obvious body ups and downs from the lower abdomen like waves.

The nurses didn't take it seriously, because the stomach contents were almost vomited. After all, a person's stomach contents were so little. No matter how much he ate, the headquarters could have more than two large medical plastic bags.

The nurse in charge of the emergency center took a group of trainee girls and instructed them to wipe while explaining to them.

"This patient must prevent his vomit from blocking the airway after hiccup, so he should hold up the patient's jaw with both hands to keep the patient's airway smooth, and he must observe carefully..."

This kind of explanation is the most effective. It's not as effective as putting slides on a thousand times.

When the nurse in charge was explaining, waves of hiccups came out.
