

CORRUPT CREATIONS

Chapter 341 - Battle On The Lake Part 2

The Sanctuary Master had no way of ignoring her abilities any longer, so he swiftly retreated until his feet were touching those purple waters created by the pillars, right at the edge of where purple and clear waters met each other. But just as he arrived there, it was as if he was stepping inside his own sanctuary.

A thick purple fog surged upwards, from inside the area of the lake that he dominated and moved towards his front, contending against the raging waves that were mercilessly moving his way, creating many energy blasts when they collided.

As those two Mana Sovereign Realm figures were initiating their fierce battle, the eleven Palace Masters were making their way to those mysterious purple pillars. Every single one of them, was following a style of battle on which they identified and were more confident with.

The Hua Sisters were battling close to each other, fighting against nine elders and sixty disciples on their own and even though they were in a supreme numeral disadvantage, they were pretty much forcing a path inside the enemy formation.

In that environment filled with water elemental particles, practitioners like them, had an absolute advantage.

Hua Jing suddenly cut through the enemy defensive lines, sending water elemental sword attacks towards the nearby disciples. Those unfortunate fellows were not strong enough to support her attacks for longer and many of them were accumulating dozens of cuts and bruises all over their bodies.

But just as she presented a quick stop in her seemingly ceaseless barrage, six Mana Control Realm elders decided to attack her all at once. Despite

feeling their intentions, Hua Jing didn't even turn back to defend herself and kept pressuring those poor disciples down, after she had recovered a bit of her breath.

"Get her! Fast!"

"Stop her!"

"Gooo!!!"

A thick purple energy circled the bodies of those six individuals and every single one of them prepared to release their strongest techniques. But just as they were going to do it, Hua Qing's figure surged from inside the lake, appearing right in between Hua Jing and them.

"Repelling Water Cannon!"

Suddenly, around Hua Qing, a thick layer of water swiftly formed and expanded outwards. That layer carried a very oppressive might and those elders were able to feel the danger it posed to them with just a simple look.

"Get back!"

"Retreat!"

Some of the more experienced elders tried to warn the weakest ones, but the water expanded so quickly, that unfortunately, three of them were caught unprepared.

In a desperate attempt of nullifying the force behind that attack, they used their charged Mana to create their special abilities and use them as shield, but when Hua Qing's ability entered in contact with them, those abilities were swiftly dispersed.

"ARGH!"

"AHHH!!!"

"No!"

Those elders were sent flying through the air, as if they were shot by a cannon. Their protective layer of Mana dispersed and the impact sent them all the way to the deepest parts of the lake. It was unknown if they were dead or alive.

Not letting their comrades' sacrifices be in vain, more elders and disciples charged towards Hua Qing and Hua Jing, completely surrounding them. But the Hua Sisters already knew they would be doing that, and Hua Ning, the oldest and the most composed of the three, used her powerful Mana to create water tunnels and swiftly take her two sisters out of there.

Two tunnels opened up underneath Hua Jing and Hua Qing's feet, transporting them through the lake. They reappeared beside Hua Ning, far away from where they previously were, nullifying every single attempt the elders had done, in order to defeat them.

The Elders from the Illusive Ethereal Sanctuary felt helpless. Their enemies' team work was completely ruling over them.

Not all of the Palace Masters were having an easy time. Actually, apart from the Hua Sisters and The Eleventh Palace Master and Palace Master Shanhu, all the other Palace Masters were pretty much having a complex battle. Some of them were even starting to get tired already.

If not for that powerful water elemental infused rain, full of energy particles that could enhance their connections with the water element and the fact that they were battling in an environment that was really favorable for them, things would probably be way more complicated than what they were at that moment.

Apart from one individual, none of the Palace Masters were able to advance any deeper into the purple waters and the weakest ones, were actually being forced to retreat.

However, the Eleventh Palace Master, lady Yushui, was completely crushing her opponents. She was the strongest one and the most experienced as well, so she was able to fare way better than the others.

Yushui raised both of her hands and tens of thousands of water bullets formed around her. Each one of those bullets, was completely charged with her powerful Profound Mana and apart from the three elders battling against her, none of the others would have a chance to block that attack.

That's why the elders swiftly assumed a defensive formation at the frontal area, expanding their auras to create a thick cloud of purple fog. That fog covered their whole group and protected everyone from any external attacks.

But that wouldn't be enough to stop her attacks. Their defensive measure, wasn't even able to last for a few seconds, before getting torn under the heavy barrage of rapid bullets.

Yushui swiftly shot all those tens of thousands of water bullets, making them ceaselessly impact against that purple fog. Very quickly, huge holes were already being exposed in that defensive purple smoke, from where more bullets were easily able to pierce and penetrate inside.

The poor and unlucky disciples taking part on that fight, were quickly getting exposed to her attacks. They tried their best to stop those water bullets, but their Mana was not strong enough to accomplish that.. Like they were defenseless lambs, they started getting shot over and over again.
