

Chapter 11 The Only Virtual World Game

Li Chen'an continued to watch the live broadcast. He was terminally ill, and this time it was a turnaround. But is there a threshold for genetic evolution and learning?

"You must also know that it is difficult to learn gene evolution. Once you move wrong, it will be harmful to the body. The experimenters all studied in virtual helmets. Secretary-General Angus smiled and said, "Now, I will announce the common resolution of the whole Blue Star Alliance!" All human beings on the Blue Star can receive a virtual helmet for free as long as they are six years old. In the virtual world, all human beings can choose from ten evolutionary methods.

This announcement excited Li Chen'an, Yang Qingshuo and others. It was boiling all over the world, and countless people cheered.

"If you are a terminally ill child, even if you are under the age of six, you can get a virtual helmet after applying." Secretary-General Angus said, "In the virtual helmet, in order to let everyone learn the evolutionary method, only a virtual world game has been created."

"Virtual world game, its creative difficulty is much more difficult than creating a city with a population of hundreds of millions! Combined with the crystallization of civilization on fluorescent Mars, we created this game called Evolution of Life.

"Life Evolution can not only learn the genetic evolution method, but also collect data on the body evolution of everyone in the game. The evolutionary data of hundreds of millions of people are constantly summarized. I believe that one day in the future, we human beings will also create stronger evolutionary methods to make our human beings stronger and live longer. Secretary-General Angus said, "And in the personal space of the game world, we can also learn and scientific research. I believe that as long as we human beings work together, we will definitely become stronger and go further in this vast starry sky."

"Technology changes human beings."

"From today on, we human beings will enter a brand-new era!" Secretary-General Angus proudly said, "As for virtual helmets, all countries will be distributed in three days. The game Evolution of Life officially opened at 9 p.m. Beijing time on July 25.

In the last sentence, according to different translations, the pronunciation is also different.

In Sakura Country, it is officially opened at 10 p.m. Edo time on July 25.

In Tianzhu, Peacock City officially opened at 6:30 p.m. on July 25th.

In the White Eagle Federation, it was officially opened at 8 a.m. metropolitan time on July 25.

In the Kingdom of Rome, it was officially opened at 1 p.m. on July 25th.

...

People all over the world are excited.

In Xia, Mingyue City, Jiangnan Province, Xu Jingming's home.

"The state has issued a notice that all regions of the country will receive virtual helmets." Li Miao said repeatedly.

Mr. Xu also looked at his screen and smiled, "As soon as the press conference was over, the message was sent. It's really efficient."

Xu Jingming also checked it.

Detailed arrangements are made all over the country, as is Mingyue City. Places where counties and districts receive virtual helmets have been announced.

"I will start to pick up the helmet at 1 p.m. tomorrow. There are twelve pick-up points in Xicheng District." After reading it, Xu Jingming said, "Submit the application now, and we will set it at the nearest collection point - the gymnasium."

"Let's choose the same time period."

All the families present submitted applications and quickly determined the collection point - the stadium collection point.

At 5:00 p.m. on July 22, Xu Jingming's family was queuing up at the Xicheng District Gymnasium in Mingyue City. Because each family has a prescribed time period, it's their turn to queue for only three minutes.

"Virtual helmet." Xu Jingming held the receiving box and was curious and looking forward to it.

This is a new object. Although human beings have long imagined it, it is now it that it is really exposed to.

Nearly 100% virtual? It's incredible.

"Let's go home."

Xu Jingming, Xu's father and mother, Mr. Xu, Li Miaomiao and his parents left together. Hundreds of people still enter the gym, entering and leaving, and the people who leave happily hold boxes.

At this moment, people with different skin colors are receiving virtual helmets throughout the Xia country and even around the world.

...

In the expectations of people around the world, time finally came at 9 p.m. on July 25.

"A Shuo, it's time. Come on." Xu Jingming also contacted his friends by video phone.

"I didn't expect that I still had a chance to grow up." Yang Qingshuo's eyes were also full of dynamism, "Goodbye in our game."

Hang up the phone.

Xu Jingming walked into the bedroom, and Li Miaomiao also talked to the two female assistants on video: "Come on, everyone, Life Evolution is a game that almost all human beings can play on the whole Blue Star, and the popularity will far exceed all games in history. In the future, this virtual game will be the battlefield of our studio.

"Yes, boss." Two female assistants, Sister Kong and Xiao Zeng, answered in unison.

"Start on the battlefield!" Li Miaomiao clenched his fist, and both female assistants also shook his fist. Li Miaomiao immediately hung up the phone.

Xu Jingming couldn't help laughing hoarsely when he looked at this scene.

"What are you laughing at?" Li Miaomiao glanced at Xu Jingming and held a red virtual helmet in his arms. "This virtual helmet has extremely high technological content. Even if it is manufactured on a large scale, it costs at least tens of thousands of yuan. Seven billion free distributions worldwide... The cost is amazing.

Xu Jingming nodded: "In such a big event, there was no leakage before this press conference. And this is really a lot of money, which also benefits all human beings. It not only makes all human life evolve, but also doubles life expectancy. It makes more possible for people to make use of nighttime. People use time... is actually four times as old as before.

"Not only that."

Li Miaomiao said, "And this has created an unprecedented game. Seven billion people around the world can get virtual helmets at the age of six. Do you think who will not log in to receive virtual helmets?"

"If you don't log in to the virtual helmet, you will give up four times your life." Xu Jingming said.

"So, the players of this game are almost all people in the world." Li Miaomiao was extremely excited and then lay down. "No, let's go in quickly. I can't wait to see the 100% virtual world."

"I don't know what's in this game world." Xu Jingming also lay in bed, took up the silver-gray helmet on the headboard, "Let's go."

"Virtual world!" Li Miaomiao is also looking forward to it.

Xu Jingming and Li Miaomiao, who were lying on the same bed, looked at each other and put on virtual helmets.

At this moment, countless people around the world wear virtual helmets and enter the virtual world one by one.

...

Xu Jingming first felt that the metals in the helmet were attached to his scalp, and his scalp was slightly numb, so he felt that consciousness was rapidly sinking.

Boom!

"Xu Jingming, welcome to the world of life evolution."

Chapter 12 First Entry

Xu Jingming looked around in surprise. This was an illusory space. Only a man in a blue shirt smiled and said, "I'm your game leader. After you learn all the functions, I will disappear."

"Game leader?"

Xu Jingming looked at the other party and couldn't help touching himself. His muscles were tight, and there were scars of fists in both hands, and kicked his legs again. "This is exactly the same as my real body, and there are leg injuries."

"Virtual helmets can scan the real body and ensure that it is 100% virtual." The man in the blue shirt smiled and said, "Don't doubt the technology of the virtual helmet."

Xu Jingming was secretly shocked: "Now the scanning of the hospital can indeed make it impossible to hide everywhere in the body, and the scan can reach the cellular level. But those are all expensive machines. Now everyone has a virtual helmet and technology so powerful? Yes, it took the Blue Star Alliance a long time to overcome the virtual helmet manufacturing technology."

"Hello, Xu Jingming. In the world of life evolution, your game nickname is automatically locked as 'Xu Jingming'." The man in the blue shirt said.

"Only real names are allowed?" Xu Jingming was surprised.

"Yes." The man in the blue shirt nodded, "This game virtual world is divided into three major spaces, namely personal space, mission space and battle space. The mission space is not open yet. All you can use is personal space and combat space."

"Personal space and battle space?" Xu Jingming is curious.

"Please select your personal space." As soon as the man in the blue shirt waved his hand, a huge map appeared on his side. "The area of this world is 3,600 times that of the Blue Star. You can choose any place without ownership. The red sign means that there is already the owner."

Xu Jingming looked at the map and pulled it with his hands, and the map quickly enlarged it.

"What a big game world." Xu Jingming quickly chose a beautiful snowy mountain top, and there was also an ice lake at the top of the mountain. "OK."

"Personal space, lock." The man in the blue shirt nodded, "Every time you log in, you will appear directly in your personal space."

Wow.

The surrounding scene was blurred, and the man in the blue shirt and Xu Jingming quickly fell down and fell to the vast world over there.

In the vast game world, countless meteors fall at this moment, which is the countless players of Blue Star.

...

At the top of the snowy mountain, next to an ice lake, a cabin appeared, and Xu Jingming and the blue-shirt man also appeared next to the wooden house.

"The cabin is your place to live." The man in the blue shirt pointed to the wooden house, "The wooden house is surrounded by 100 meters, which is your territory. No one can enter the cabin within 100 meters without your permission.

Xu Jingming saw at a glance that on the other side of the ice lake, there was also a wooden house landing, a female player and a woman in a red robe.

In the blink of an eye, there are already five wooden houses around the ice lake, but they are at least two or three hundred meters away, and we can barely see each other from afar.

"The top of the snowy mountain is really cold, and the temperature is so real?" Xu Jingming immediately opened the door of the wooden house, walked into the house, and closed the door to feel much better.

Looking at the ice lake scene through the window, Xu Jingming couldn't help sighing, "The environment is really beautiful, 100% virtual, and it's incredible. In reality, it is not easy to build a house in such a beautiful environment, but this wooden house is smaller.

"You can choose to buy a bigger house, click on your personal panel, and you can buy it here." Men in blue shirts guide.

Xu Jingming looked at the detailed introduction that appeared on the personal panel.

"As long as you spend money, can the residence become bigger? One hundred yuan, one thousand yuan, ten thousand yuan... The maximum is 10 million yuan? Ten million yuan, can I buy a place on the clouds? Xu Jingming was surprised.

A fairy house on the clouds overlooks the earth. It is estimated that the rich are willing to buy it.

"Buy a 10,000 yuan." Xu Jingming gently said that the cabin where he is now live immediately changed and turned into a Chinese-style house with a construction area of thousands of square meters. The yard also has two or three thousand square meters. The area around the edge of the courtyard is Xu Jingming's territory.

"Li Miaomiao is contacting you..." Xu Jingming was prompted.

"Insignificant." Xu Jingming contacted him.

"Jingming, this game world is too real. If you try to invite me, I should be able to appear directly at your place." Li Miaomiao said excitedly.

The man in the blue shirt also said, "The initial setting of the friend list is to temporarily make all the owners of your address book, social circle and bank remittance list as friends. You can contact them directly. They can only come here with your invitation and their consent. Of course, they don't need your consent to leave, but they can return to personal space in an instant.

Xu Jingming looked at the list of friends: "I didn't even know so many people. This is the aunt selling fruit at the gate of the community, right?

Mom."

Xu Jingming tried to invite all his parents, grandpa, Li Miaomiao and his girlfriend's parents.

Soon...

One after another appeared outside the courtyard one after another.

"Jingming invited us to come."

"The scenery here is good, but it's a little cold."

Mr. Xu, Xu's father and mother, Li's father and mother, and Li Miaomiao trembled at the gate of the courtyard, and Xu Jingming immediately opened the door.

"Jingming, why are you a big mansion?" Xu Hong stamped his feet and walked in. "I'm a cabin."

"It costs money." Mr. Xu's clothes beside him changed and put on a down jacket. "There are many functions on the personal panel. I just looked at it and explored a lot of functions. Buy clothes, otakus and other items, as well as various functions such as watching platforms and martial arts arena.

"Dad, you are having a good time." Xu Hong smiled.

"Is there so many functions?" Li's father and mother were surprised.

"To learn the evolutionary method, you must go to the martial arts arena." Mr. Xu is very proficient. "After learning, your body evolves and you can go to the battle space!" Carrying out all kinds of battles, human beings who have evolved stronger, and those with stronger combat skills have an advantage in battle. The Blue Star Alliance should be to collect data on

the physical changes after our evolution and prepare for deriving the new evolutionary method, but I am very satisfied to live to 160 years old. Haha, I really didn't expect that there would be such a big opportunity when I was old. It's good to live for a long time. You can catch up with this good era.

"What is the observation platform?" Li Miaomiao clicked to check, "Watch the live broadcast, players can choose to live broadcast their own martial arts scenes and battle scenes? Grandpa, you are so awesome. As soon as the game world opens, you have figured so much.

"When I played mobile games, I got Fmvp at the age of 18. After retiring, I worked as a game anchor for so many years. I can guess these routines of games with my eyes closed." Mr. Xu smiled and said, "But this game world is really amazing. There are many operability in personal space. You can drink tea and chat face to face thousands of miles apart. You can work and study. Schools can teach students here... In terms of social networking, completely crush the original social software.

"Well, video chat software can't compare with this game world." Li Chen'an nodded.

"And live broadcast. The live broadcast platform in the past is almost over, and you have to change careers immediately." Mr. Xu sighed, "I have lived for so many years and seen the changes of science and technology to society again and again, but this time it has changed too much to the whole society."

Li Chen'an smiled and said, "Mr. Xu, since the Blue Star Alliance has done it, it must have prepared a lot of plans. We ordinary people don't have to think too much, at least for us ordinary people, this is an unprecedented opportunity.

"Let's practice the evolutionary method quickly." Xu Hong smiled and said, "Many people are estimated to have begun to practice."

"Let's go, practice quickly." Mr. Xu disappeared out of thin air and returned directly to his personal space.

"Let's go."

One by one dissipated.

"I'm back." Li Miaomiao was the last to leave and dissipated and returned to personal space.

Xu Jingming clicked on the personal panel and carefully studied the function of personal space.

"In your personal space, you can read. Here are all the textbooks of compulsory education, many auxiliary teaching materials, and even some cutting-edge materials of science." Xu Jingming looked at it and ordered a few physics books at will. He studied physics in college.

Books appeared on the bookshelf.

"This virtual game world is not just a game. It can hold meetings, meet friends, study, and even engage in scientific research." Xu Jingming was amazed that there were too many functions.

"Go to the martial arts arena." Xu Jingming opened the martial arts field and chose to enter.

The scene in front of you is changing.

This is a canyon with green mountains and green water. Xu Jingming looks around. The scenery is really beautiful.

"This is the martial arts arena." The man in a green shirt said, "The martial arts arena can help you train, such as practicing genetic evolution and practicing combat skills. There are also all kinds of training here. You can set the different strengths of the training partner, and you can also freely adjust the martial arts field environment.

Xu Jingming gently clicked on the panel, and immediately ten books floated and slowly fell down. The covers of these books were all Chinese characters.

"Please study ten evolutionary methods carefully first." The man in the blue shirt said.

Xu Jingming began to read at ease.

Ten evolutionary methods, including five male evolutionary methods and five female evolutionary methods. Of course, the size of the blue star is strange, and some people are more special and suitable for heterosexual evolution.

Chapter 13 Evolutionary Law

It took half an hour, Xu Jingming read all ten evolutionary methods. In fact, there are few words. The evolutionary method is mainly a set of complex exercise movements, which needs to be learned through virtual teaching.

Ten evolutionary methods are all named after animals.

The five evolutionary methods suitable for men are named Xuan Turtle Evolution, Python Evolution, Shadow Leopard Evolution, Giant Bear Evolution and Tyrannos Evolution. From the names, you can guess the different tendencies of these five evolutionary methods.

"Every evolutionary method actually fits?" Xu Jingming was a little surprised, and the books were marked with the fit.

Xuan Turtle Evolution (compatch 72%), Python Evolution (98% fit), Shadow Leopard Evolution (82% fit), Giant Bear Evolution (91% fit), Tyrannos Evolution (93% fit).

As for the five female evolution methods, the fit is less than 50%.

"The fit is calculated based on your real body and can be used as a reference." The man in the blue shirt said, "In the end, you still need to make a choice after practicing the evolutionary method."

"In the game world, you can practice any evolutionary method, even if you practice it wrong or omissions, and your body becomes weaker or stronger. You can reset it to a real body." The man in the blue shirt solemnly reminded, "But there is no medicine to regret learning in reality. In reality, once the evolutionary route is determined, it can only be promoted along that evolutionary method. The same evolutionary route must be chosen in the game.

"I understand." Xu Jingming nodded slightly and asked, "These five evolutionary methods can cure my leg injury, right?"

"All these five evolutionary methods can be reborn with amputated limbs. Your minor injury can be completely cured as long as you practice it for a day or two." The man in the blue shirt said.

Xu Jingming nodded slightly.

The evolution of life is amazing! This is the charm of technology.

Then Xu Jingming clicked on the personal panel and clicked on the virtual teaching of Xuan Turtle Evolution.

An illusory body appeared in the canyon and began to practice the first genetic evolution method, Xuan Turtle Evolution, in front of Xu Jingming.

Xu Jingming decided to test it one by one from a low fit.

"The speed, strength and rhythm of each move are required, and it should also be combined with breathing." As soon as Xu Jingming began to practice, he found that it was very difficult.

"The tricks are getting faster and faster, and the breathing is getting faster and faster." Xu Jingming cooperated with the breathing and only felt that his heart began to hurt, and the skin all over his body felt hot, so he finally practiced halfway.

"Poof."

Xu Jingming couldn't help spitting out blood.

"You are already injured." The man in the blue shirt beside him said.

"This is a pervert than any exercise I have learned." Xu Jingming covered his chest and clicked on his personal panel to restore his body to its peak state.

In the game world, don't worry about injury, because you can return to the peak at any time.

"It exercises can even change genetically and eventually transform to a higher level of life." The man in the blue shirt said, "Of course it is very difficult, so let you learn in the virtual world."

"Come again." Xu Jingming tried again.

Again and again.

The whole set of movements, from slow to fast, breathing is getting faster and faster, and the heart is like a pump, working more and more intensely.

For various reasons, Xu Jingming failed again and again.

One until the sixth time!

"Humph." In the end, the breath of his nostrils was covered with blood. It was blood stains, but Xu Jingming finally completed a complete set of movements.

"Congratulations on practicing Xuan Turtle Evolution to the first level. It's amazing that you have only practiced it six times." The man in the blue shirt said.

Xu Jing sighed brightly and secretly.

I am the world's top martial arts player. How accurate the control of the body is, I have to practice six times to reach the first level. If you are an ordinary person, how many times do you get it? A hundred times? Three hundred times?

"Is there an extra combat power panel?" Xu Jingming was surprised and found that a sub-column - the combat power panel appeared under the personal panel.

Player: Xu Jingming

Genetic Evolution: Xuan Turtle Evolution (first level 1%) (the practice time is less than one day, it can be improved)

Body: 12 (adult males who have not studied the evolutionary method, the average value is 5)

Skills: Not available (please practice as soon as possible and determine the skills)

Basic combat effectiveness: not available (please carry out actual combat as soon as possible)

"How can you improve if you practice less than a day?" Xu Jingming looked at that line of words.

"In the game world, you don't need to practice hard over and over again like reality. As long as you are sure to practice, you can be promoted to the limit of your body." The man in the blue shirt said.

Xu Jingming tried to click on promotion.

"Pratise Evolution Method is practiced three times a day, at least one hour apart. After 39 days of practice, your body has metamorphed and evolved, and your body index has reached 39.

"After 1051 days of practice, your body has evolved to the limit, and your body index has reached 53.

"If you want to continue to improve your body, please elevate the Xuan Turtle Evolution Method to the middle level."

Xu Jingming just clicked and felt that his body had metamorphicated. His chest and back were much wider and thicker. His whole body was much stronger, and his arms and legs were thicker. There was an extremely strong force between raising his hands and feet.

Xu Jingming picked up a pebble in the canyon and threw it out. When Xu Jingming only felt that his whole body was like a large engineering equipment, running tightly and suddenly throwing out the pebbles.

Whew.

The pebbles tore the air, leaving an air wave, which crashed and broke on the distant rock wall, which made Xu Jingming a little shocked.

Xu Jingming picked up another pebble, with a little hard force in his right hand. He shouted, and the pebbles were crushed to pieces, and the debris slowly fell from his fingers.

"I can be like this in reality?" Xu Jingming whispered.

"Just like your combat power panel reminds you, as long as you practice three times a day, your real body can improve to this in 1051 days." The man in the blue shirt said, "This is the evolution of human beings."

"Can you choose any weapon and armor in this martial arts training ground?" Xu Jingming checked the various functions of the martial arts arena. He can choose weapons, armor, escorts and battle scenes, with many functions.

"Almost all cold weapons in the history of Blue Star are available here." The man in the blue shirt explained.

Xu Jingming stretched out his hand, and a long gun appeared out of thin air: "Heavier, heavier." The martial arts arena is specially designed to assist in practice, and the weight of weapons can also be freely adjusted.

A one-handed bayonet in the right hand tear the air.

Follow Xu Jingming with a gun in his hand, stepped forward, and sent forward with a thick left arm holding the handlebar. Poof! The long gun turned into a phantom and stabbed more than a dozen guns in a row, and several shots remained in mid-air.

"It's a little awkward to use the shooting method." Xu Jingming looked at his arms as thicker as before. He was much stronger. "This body is too clumsy."

"The body is reset to a real body." Xu Jingming gently changed rapidly, returned to the state when he first entered the game, became thinner, his leg injury returned to his body, and the scars were also back.

"The next evolutionary method." Xu Jingming began the virtual teaching of Shadow Leopard Evolution.

Nowadays, countless people all over the world are seriously studying the method of evolution.

On the martial arts arena.

Xu Jingming learned four other evolutionary methods at an amazing speed.

After learning five times, he raised the Shadow Leopard Evolution Method to the first level. When the practice time was raised to three years, Xu Jingming was much thinner and more flexible than reality. He ran 100 meters and could finish it in five seconds.

After learning it three times, the Giant Bear Evolution Method and the Tyranno Tiger Evolution Law have been practiced.

The Giant Bear Evolution Law has the greatest impact on the body. After rising to the limit of the body, Xu Jingming's height was increased to 1.98 meters, which was infinite, like an upright bear. After the Tiger Evolutionary Law reached the limit of the body, it reached 1.85 meters tall and became stronger.

"Just practice once, you have learned the Python Evolution Method, which is worthy of 98% of the fit." The man in the blue shirt sighed.

Xu Jingming raised the practice time of Python Evolution to 982 days on his personal panel, and also to the extreme body. He is only one centimeter taller, but his muscles are much tighter than before, full of endless resilience, and his spine is like a dragon, which can easily convey physical strength.

"Try the gun." Xu Jingming stood in front of the rock wall. As soon as the long gun in his hand moved, he left a shadow of gun. The tip of the gun was on the rock wall of the canyon, and more than 30 guns were pierced in the blink of an eye. The hole in the rock wall formed a five-pointed star.

Xu Jingming looked at the rock wall with satisfaction: "The deduction of the virtual world is really awesome. The Python Evolution Method is indeed the most suitable for me."

"Five evolutionary methods, which are powerful, are giant bear evolutionary methods. Physical strength is the evolution of the black turtle. The power and physique are flexible in all aspects, which is the Tiger Evolution Method. The fastest and most flexible is the shadow leopard evolution method. But... the strongest body toughness and most suitable for me is the python evolution method.

"It's also the easiest for me to practice Python Evolution. I succeed in one time, and my physical improvement is also the most obvious." Xu Jingming nodded.

They are also the first stage of the evolutionary method, after being upgraded to the limit.

Only the python evolution method can reach 63, the tyrannos evolution method is 60, and the other three are more than 50. If you want to practice the lower fitted female evolution method, it is estimated that the body index will be lower.

"As long as you don't start practicing in reality, the virtual world can be reset at any time." Xu Jingming thought, "Let's tentatively practice the Python Evolution Law for a few days."

Chapter 14 Real Cold Weapon Battle

"You can explore the martial arts arena function slowly." The man in the blue shirt beside him said, "Next, I want to tell you the battle space of the whole game world."

Xu Jingming nodded.

The world of life evolution is mainly divided into three parts: personal space, mission space and combat space.

"Wow."

The man in the blue shirt waved his hand.

In front of him, there were five figures choosing weapons and armor.

"The battle space is for five people to choose weapons and armor... After entering the map, they will fight life and death with the five enemies, killing all one side dies, and the other is convenient for victory."

The man in the blue shirt waved again, and the picture turned into an ancient town.

Small town, drizzle.

There are ten people scattered all over the town.

"Whew."

An arrow broke through the rain and shot at the enemy. The enemy hiding on the roof noticed something wrong. When he turned his head and looked at it, the arrow was so fast that the enemy could not react too late, poof! An arrow penetrated the enemy's head. At the moment it was shot, the enemy turned into a shadow and dissipated and withdrew from the map.

"Kill!" There was a tough man who ran out, straight to the archer who set the dark arrow and threw out the short spear in his hand.

One spear after another, throw it out one after another! Behind him is a short spear with a full back.

The archer was so scared that he ran away and shot the bow and arrow back. Obviously, he was in a panic and moved the target. He was not accurate at all, and he didn't meet the other party.

"Poof." Halfway through the way, he was penetrated by a short spear, his fur armor penetrated, and the archer turned into a virtual shadow and dissipated.

"One by one can only attack long distances. It's really boring." A tall and strong man two meters tall, with thick armor and only his head exposed, sat in the middle of the town, carrying the wine jar and drinking, and his voice resounded through the town. "Come on, come one-on-one with Grandpa and me."

"You are naive. I'll meet you for a while." A female swordsman in red light armor strode out.

...

The cold weapon battle scene in front of him, arrows, spears, axe, long gun, sharp sword... made Xu Jingming see his blood. The most dangerous battle mode of the martial arts weapon fighting he pursued in the past 20 years is the scene in front of him!

"In reality, there are all kinds of security measures in martial arts and weapons fighting. How can you have such a good time?" Xu Jingming was excited to see it, which was the most suitable stage for him.

"The battle space is to let five teammates fight with five other opponents in cold weapons." The man in the blue shirt said, "You can choose heavy armor, but your body will be greatly affected. Choose a lightweight soft armor, and the defense will be weak. Each has a trade-off."

"Far attack, melee, ambush..." The man in blue shirt smiled and said, "Because the game has just begun, the battle level is relatively weak. The battle in front of you is a good battle just broadcast live, but there are still many problems. Five people fight five people, and more importantly, teamwork."

"Of course, if you are strong enough and one person destroys five people, it's your cow." The blue-shirt man laughed and said, "But the high-level battle is the top group of masters of Blue Star. Cold weapon combat skills, combat strategies, and teammate cooperation are all very important."

Xu Jingming nodded, "Five to five? There is no one-on-one?"

"Not yet."

The blue-shirt man said, "The core game mode set in this virtual game is to form a team of five people and fight with cold weapons."

Xu Jing was clear, but his eyes were hot.

Isn't the most coveted dream of every professional martial arts player? Isn't it this cold weapon fighting scene? And the best thing is that fighting in the game and dying is just a game failure.

"Each player is also ranked according to his strength." The blue-shirt man said, "The weakest is the star, the silver moon level is one step higher, and the higher is the Sunday level!" The highest is the divine level.

"Star players are novice players."

"Silver-month players, the basic combat effectiveness threshold is 150."

"Oneday players, the basic combat power threshold is 400."

"God-level players, the basic combat power threshold is 1000."

"There are two ways to get a level up. One is that the previous level reaches the full star and reaches the basic combat effectiveness threshold, and it can be upgraded. The other is to reach 120% of the basic combat effectiveness threshold. You can directly participate in the grading competition. Through the grading competition... you can directly reach the new level.

"For example, a novice player with a basic combat strength of 480 and the first battle can participate in the Wednesday grade competition. Once passed, it will be directly a Sunday player. There is no need to rise step by step from the stars." The man in the blue shirt explained.

Xu Jingming nodded slightly and looked at the personal combat power panel.

Player: Xu Jingming

Genetic Evolution: Python Evolution...

Python Evolution (first level 5%) (exercise time 982 days, not to ascend)

Body: 63

Skills: Shooting (second-order 71%), footwork (second-order 11%)

Basic combat effectiveness: 756

"My shooting and footwork?" Xu Jingming was a little surprised.

"Before you practiced shooting in the martial arts arena, the virtual game automatically identified your shooting and footwork level." The man in the blue shirt explained.

"Basic combat strength 756, how is it calculated?" Xu Jingming asked.

The stronger the body, the higher the body index. Skills are all kinds of combat skills. A strong body and powerful combat skills determine the basic combat effectiveness. The man in the blue shirt explained.

Xu Jingming nodded slightly and looked at the shooting method on the panel. The shooting method was his most confident: "The top ten shooting skills in global history are only 71% in the second order?"

"The shooting skills must be hone in actual combat before they can be slowly improved. It's not that easy. On the contrary, I have only practiced the Python Evolution Method once, and there is still a lot of room for improvement. Xu Jingming began to practice again.

Practicing the Python evolution method over and over again, the game leader, the blue-shirt man, stayed aside silently.

I have been practicing for a long time.

"Li Miaomiao is inviting you." Suddenly, I received a prompt.

Xu Jingming also stopped, and he was also a little tired of practicing. He gently agreed to the invitation.

Swish.

Xu Jingming appeared on the beach, and there was a magnificent building in front of him. Li Miaomiao walked barefoot on the beach and smiled, "Jingming, how about it? This island is all mine."

"How much did it cost?" Xu Jingming asked with a smile.

"One hundred thousand yuan." Li Miaomiao said, "A small island specially selected, otherwise it will be more expensive."

"It's been six hours since I entered the game. I almost figured out the game, haven't I watched the live broadcast?" Li Miaomiao asked.

"I haven't gone yet." Xu Jingming said that he has been practicing the python evolution method carefully. As a professional martial arts player, he usually practices pile skills and various moves. It is also normal to practice it for a few hours. The python evolution method is much more powerful than any pile skill. It fundamentally changes the muscles, bones and muscles. The level of life has changed, and life expectancy can be doubled. He Nature is crazy and focused.

"You must watch the live broadcast." Li Miaomiao took Xu Jingming and clicked on the observation platform.

There are a large number of live broadcast scenes on the observation platform.

"The live broadcast is too hot." Li Miaomiao said, and then clicked on one.

An old man sat there talking eloquently.

There are countless seats below. At this moment, hundreds of people have listened to it. Xu Jingming and Li Miaomiao also appeared out of thin air and sat in two positions. Wow, some audiences also dispersed and left. It's normal to come and go.

The old man sat on it and said, "Every time in the face of transformative technology, human society will change, which is also the time when many people change their fate. And this time, the birth of virtual world games will change more thoroughly than in the past. For example, live broadcast... In the past, live broadcast was to watch videos. Now I'm talking above, and everyone listens down. We can even interact closely one-on-one."

"The martial arts arena can be set up at will. So the scene can be set up as a study, stage, and concert hall.

"This will completely change the live broadcast market and the education market, which is an extremely vast industry." The old man said.

"Let's go."

Li Miaomiao disappeared out of thin air with Xu Jingming, and other players also entered the live broadcast room.

Another live broadcast room.

Xu Jingming and Li Miaomiao appeared out of thin air. They sat in the empty seats. At this moment, hundreds of players were watching the battle. There was a snow in front of them.

In the snow, ten people are fighting life and death with cold weapons.

"We fight in the appearance of the snow battlefield, and we can bring our own magnification mirror to magnify the battle scene in the distance." Li Miaomiao said that Xu Jingming tried a little, and one of the battle scenes was quickly enlarged.

Pull to the nearest distance, as if watching someone else's fight three meters away.

"Dang." A woman blocked the opponent's axe with a shield in her left hand and stabbed the enemy's throat with a sword in her right hand. The enemy also dissipated into a virtual shadow and withdrew from the map.

"It's really exciting." Xu Jingming was amazed when he saw it.

How can there be such a real excitement in the World Martial Arts Competition?

"This is the real live broadcast." Li Miaomiao sighed, "Listening to songs is the singer sitting below on the listening platform singing. In class, you are sitting in your seat and listening to the teacher. To watch the battle is to be immersive and watch it up close."

Chapter 15 Times Have Changed

"All live broadcast platforms are far from comparable to the live broadcast of the virtual world." Li Miaomiao said, "In reality, those live broadcast platforms are completely ruined. Tiger Shark Group is also going to decline. Li Miaomiao's eyes are cold.

Although she didn't say anything, she was extremely hostile to Cheng Zihao.

Cheng Zihao, first lure, then coercion! In the face of the pressure of the Cheng family of Tiger Shark Group, how many people can withstand the pressure? Li Miaomiao woke up from nightmares several times.

The other party also forced his parents through his uncle! Li Miaomiao was even more angry. She loves her parents very much. She doesn't want her parents to be involved, and her parents don't want to worry about herself.

No matter how angry it is, the Tiger Shark Group is too large. Li Miaomiao can only stand it. He has abandoned the live broadcast account of tens of millions of fans for several years and changed to a new platform to completely blacklist each other. This is the only thing Li Miaomiao can do. She has no evidence of a real hammer and does not dare to retaliate at all.

"Tiger Shark Group, it's going to decline." Xu Jingming also understands.

During that time, the pressure brought by Cheng Zihao was too great.

Cheng Zihao forced his girlfriend to seduce his girlfriend. In this kind of thing, a man was furious. But there is no evidence, and I have no way at all.

He is also forced by the other party, and he can blackmail the other party. Fortunately, Miaomiao has been standing on his side. Miaomiao woke up in a nightmare at night. Xu Jingming was also very distressed and only hated his powerlessness.

In the end, I was forced to leave Binhai City, which seemed free, but actually embarrassed.

The Internet has also been blocked.

I once thought that I had opened a martial arts acupe in my hometown all my life as a coach. Unless I could come back and win the first place in the world, it would be difficult to stand out.

But...

Times have changed! Human society has ushered in a virtual world!

"The days when Cheng Zihao's rampant are gone." Li Miaomiao said.

Li Miaomiao looked at Xu Jingming with a smile: "However, Jingming, your future is a hundred times wider than in the past, and your real future is infinite."

"Oh?" Xu Jingming has an association.

Think about it, humans first landed on Mars in 2036. After that, a virtual helmet should be found on fluorescent Mars one year. In 2052, the World Martial Arts Competition was held for the first time in the world! And all countries fully supported it, and all kinds of media kept promoting it. The popularity immediately won the world's first fighting event, and some legendary players paid hundreds of millions of yuan.

Xu Jingming nodded. It was true that the World Martial Arts Competition was not available a long time ago, because it was too dangerous, but in 2052, the world's efforts to promote this event also puzzled many people.

"And this virtual world game is also a cold weapon fight." Li Miaomiao said, "And almost everyone will learn from All Blue Star."

"Now look back, everything can be explained."

Li Miaomiao said, "Thirty years ago, countries were ready to prepare for the virtual world game Evolution of Life."

"In the past three decades, various fighting genres around the world have been excavated and reappeared on the stage." Li Miaomiao said, "I checked the information. Before the World Martial Arts Competition... Weapon fighting is very niche. Traditional martial arts genres such as Bajiquan, Xingyi and Tai Chi in China are mainly to exercise the body and practice boxing. Weapons have long declined. It is the nearly 30 years of World Martial Arts Competition, which has enriched them again."

"Thirty years, what I have cultivated is fire."

"These fires will burn completely in the world of Evolution of Life." Li Miaomiao said, "Let the whole Blue Star people learn cold weapon fighting faster."

Xu Jingming nodded.

Looking back, everything is easier to understand.

"Speaking of which, it was only in 2056 that countries around the world formed the Blue Star Alliance." Li Miaomiao said, "But the first World Martial Arts Competition was held in 2052. Obviously, the importance of martial arts and weapons fighting made countries push forward immediately before they could form an alliance."

"I even think that the world should spend so much more than just for games." Li Miaomiao speculated, "Or, this virtual world game is worth doing this by countries around the world."

Xu Jingming nodded and gave a thumbs up: "Xiaomiao, I think you're right."

p; "I'm just guessing." Li Miaomiao smiled and said, "Anyway, human beings around the world play this game, so martial arts weapons fighting... will have a real future."

"Jing Ming, if he can play in the virtual world, he will become the top ten in the world. It will be much more dazzling than the first in the world in the past. Li Miaomiao said, "Because of this game, I don't know how much more popular it was in previous events."

"It's even more difficult." Xu Jingming said, "In the past, a total of 32 people around the world participated in each World Martial Arts Competition. In the past 30 years, a total of 522 people have appeared in the World Martial Arts Competition. Including A-level events and B-level events, there are more than 20,000 professional martial arts players registered in the Martial Arts League worldwide!"

In the past 30 years, there have been more than 20,000 people. Nowadays, there are 7 billion people competing, and everyone will learn the method of evolution. Everyone can carry out dozens or even hundreds of life-and-death fights every day... It is much more difficult to rush to the top ten in the world than the world in the past. Xu Jingming said.

"Are you confident?" Li Miaomiao looked at the man he liked. After getting acquainted him online, the first time he met in reality was in the fighting hall. When she saw Xu Jingming practicing guns from afar, she was attracted by Xu Jingming's concentration.

"Of course."

Xu Jingming's eyes bloomed with unprecedented charm, "I have a first-mover advantage, and now they are also in virtual world games. How can I not be confident? And the more masters there are, the more wonderful the world of cold weapons fighting will be.

"The more wonderful it is?" Li Miaomiao asked.

"Don't you think your blood boils when you see cold weapon fighting?" Xu Jingming looked at the snow ahead. In the battle of ten people, the last man stood at the end with blood, looked up and laughed. His team won.

Seeing this, Li Miaomiao realized something and thought, "Maybe only with the love from the bottom of his heart will let Jing Ming relax his training three years after he retired. In today's era, Jingming will definitely shine far more than a hundred times as much as it is. My Li Miaomiao has a good vision. The chosen man is the best!"

Thinking about it, Li Miaomiao smiled beautifully.

"What are you laughing at?" Xu Jingming asked.

"Laugh at you to take the first place in the world. I will become the first lady in the world." Li Miaomiao curled his lips.

"Oh, then I have to work hard. The first of the seven billion people is not easy. Xu Jingming smiled.

At 4 a.m., seven hours after the virtual world game Evolution of Life officially opened.

Penghai City, the skyscraper of Tiger Shark Group.

Inside the elevator.

Cheng Zihao and Cheng Zitong were in the elevator, and the elevator kept going up.

"Brother, what did you think Dad was looking for us?" Cheng Zihao asked in a low voice, full of uneasiness. He was urgently called in the virtual world game.

"The second one." Cheng Zitong whispered, "To see the situation clearly, after the global live press conference, the group's stock price fell for more than a month and plummeted again. Although the group was urgently suspended, after the virtual world game opened, have you been in and seen it?"

Cheng Zihao nodded.

"It's incomparable. Now all live broadcast platforms have been completely crushed by the world of Evolution of Life. 100% virtual, how can we compare?" Cheng Zitong shook his head and said, "This is not what human resources can resist. We can't stand it in the face of the general trend."

"Then Dad is looking for us?" Cheng Zihao asked.

"Dad has been in the company these days and hasn't gone downstairs." Cheng Zitong said, "Wait a minute, listen more and talk less."

Ding!

The elevator stopped and stopped on the 153rd floor.

As soon as the elevator door opened, it was a very large office. Cheng Zitong and Cheng Zihao walked out of the elevator and saw their father Cheng Liwei sitting at their desk in the distance.

Cheng Liwei's hair is almost completely white, and his face is much older. He is looking down at the files on the screen.

"Dad." Cheng Zitong came forward, and Cheng Zihao also said obediently, "Dad."

"Come on."

Cheng Liwei looked up at the two and said, "I'll inform you of the news that the family trust will go bankrupt completely within a few days."

Chapter 16 The Cheng Family

"Bankruptcy?" Cheng Zitong and Cheng Zihao are all a little confused.

"Dad, have you come to this point?" Cheng Zitong asked.

Cheng Zihao said eagerly, "Dad, the coming out of virtual glasses also had a great impact on many Internet companies. After being hit, our Tiger Shark Group finally became stronger. If the virtual world can't defeat us this time, we can also penetrate into the virtual world.

"No chance." Cheng Liwei, with an old face, shook his head gently, "This time, unlike the last virtual glasses. Last time, the technology came out first, and then authorized many companies... There is a long-term transition, and we are also prepared."

But this time, it is the Blue Star Alliance that directly distributes virtual helmets. The virtual world is directly open to everyone, completely impacting the previous online market.

"In the past month or more than a month, the group's stock price has been falling, and it has plummeted after the press conference. Although trading is temporarily suspended, as long as the suspension is released, it will plummet again, and the market value will fall below 1 trillion yuan. Cheng Liwei said calmly, "Multiple banks have frozen family trust assets and asked us to repay in advance."

"Will the market value fall below one trillion?" Cheng Zitong and Cheng Zihao all know that the situation is not good.

The 8.2% of the group shares owned by the Family Trust are worth less than 100 billion yuan. Are you insolvent?" Cheng Zitong asked, "Dad, what about the investment in other aspects of the family trust?"

"The family is based on the network industry, family trusts, and most of the investment is the network industry. Under this shock, most valuations have to be 20% or 30% off, and some will die directly. Cheng Liwei said, "The original assets of the family trust were 900 billion yuan, and the debt was more than 300 billion yuan, which was very safe. But now these assets are afraid to be worth less than 200 billion yuan.

"So much difference?" Cheng Zihao is even more confused.

His good days are all family trusts and family-controlled Tiger Shark Group.

"There is nothing we can do. The emergence of the virtual world is beyond the ability of human beings to resist." Cheng Liwei shook his head and smiled, "It's ridiculous. I didn't get any wind before for such a big thing. Obviously, the Blue Star Alliance doesn't care about the death or death of Internet companies at all.

"The Tiger Shark Group will not die. After all, the asset statement is very good." Cheng Zitong said, "But the 8.2% stake of our family is estimated to be taken away by the bank soon."

"Don't worry, your assets are completely isolated from the family trust assets." Cheng Liwei looked at his two sons, "As a family trust manager, I have to bear the price. But you two will not be affected. You two will keep a low profile in the future. After all, the Cheng family is very mediocre without the Tiger Shark Group."

Cheng Zitong and Cheng Zihao were silent.

"No more? Is it all gone?" Cheng Zihao trembled slightly and looked at his father, "Dad, over the years, you have given your eldest brother 5 billion yuan, but only 2 billion yuan. It's unfair."

"Second, these are all in accordance with the rules of family trust." Cheng Zitong said.

"Dad, you are so unfair." Cheng Zihao looked at his father.

"Unfair?"

Cheng Liwei looked at him, "First, your eldest brother is older than you. The family trust is the first cash payment when you reach the age of 22. After that, it will be distributed year by year. If you are young, you will pay less. Who can you blame? Second, the stronger the investment and operation ability, the more family trusts will be added. You don't have as much investment ability as your eldest brother. Who do you blame? Third, I filled in the big hole you poke before. I filled it in it in billions of dollars one after another, and there is also a favor! How can I be half right to you?"

"But I have nothing left!" Cheng Zihao looked at his father.

"I'm bankrupt. What else do you want?" Cheng Liwei pointed to the door and said, "Get out!"

Cheng Zihao looked at his father red.

"Get out!" Cheng Liwei pointed to the door.

Cheng Zihao turned around and left, leaving only Cheng Liwei and his eldest son Cheng Zitong left in the office.

"Dad, the second one is in a hurry." Cheng Zitong whispered, "Although you have given your second brother 2 billion these years, his investment ability is too poor. I guess there is not much left. I know it will be gone in the future, so I'm in a hurry."

"Remember."

Cheng Liwei looked at his eldest son Cheng Zitong, "From today on, don't give your second brother a penny!"

Cheng Zi and Tong Wei were stunned: "What if he starves to death on the street?"

"Just starve him to death!" Cheng Liwei said indifferently, "Our Cheng family is no longer the Cheng family of the past, and we can't afford to lose again!"

"Yes, I see." Cheng Zitong answered.

...

In Cheng Zihao's office.

"Bang, bang, bang." Cheng Zihao frantically smashed all the items that could be smashed in the office.

"Old man, you are so cruel!" Cheng Zihao could only grit his teeth, then gently touched the watch, gritted his teeth and said resentfully, "Now, get out of here now!"

Ten minutes later, the middle-aged man with some water on his hair came to the office and said, "Boss, I was still in the virtual world before. When I got your news, I came as soon as possible."

"Come on, how much money do I have in my investment company?" Cheng Zihao asked.

"There are still more than 120 million cash." The middle-aged man immediately said...

Zi immediately said, "The rest are investments in all aspects."

"How much are those investments worth?" Cheng Zihao asked.

"Many are angel investments, and you can't quit in a short time." The middle-aged man said, "Some investment in the network industry may be wasted, and the impact of the virtual world is too great."

"What I asked is, how much can these investments be refunded, sold, mortgaged, and how much can they be exchanged?" Cheng Zihao asked.

"One hundred million." The middle-aged man thought for a moment and said, "Reluctantly."

"I invested 500 million yuan, and that's all that left?" Cheng Zihao is unwilling to accept it.

"The Internet industry is too miserable now." The middle-aged man said helplessly, "And our own three companies have signed so many people, and there are so many employees, and the monthly expenditure is about 20 million yuan. We can only keep cash for about half a year."

"Only for half a year?" Cheng Zihao whispered, and his lips turned white.

"Fortunately, the chairman helped solve the big hole last time, and the company is still stable in a short time." The middle-aged man said again, "The last time he filled the hole, the chairman said that you were not allowed to borrow money from outside again."

"Don't mention him."

Cheng Zihao sat in the seat, covered his head, "Get out of here, I want to think about it."

"Yes, boss." A middle-aged man went out obediently.

"Cash can only last for half a year? Is the family trust gone?" Cheng Zihao's eyes were full of blood and unconsciously grabbed his hair. "What should I do? What should I do?"

Virtual world.

Xu Jingming guessed that the Cheng family would be miserable, but he was not in the heart to pay attention to it. He is now in the 'wu arena' in martial arts's personal space and experience the accompanying function of the 'wu arena'.

Martial arts arena, in a canyon with green mountains and green water.

Three bandits attacked from three directions and besieged Xu Jingming.

Xu Jingming held a long gun and waited calmly.

When the bandit approached three feet, Xu Jingming immediately rushed to the right and greeted the knife on the right.

"Kill." The knifeman grinned and culled directly.

"Poof."

As soon as Xu Jingming's long gun moved, it was like a poisonous snake out of the hole. The head of the gun was poked under the neck of the swordsman and bandits, and it had been withdrawn.

The knife and bandits were pierced through their necks and dissipated directly. The remaining two bandits, without any fear, rushed more and more crazily.

Xu Jingming only gave in one step. The head of the long gun betted twice, and the two bandits were shot in the heart and eyebrows respectively, turning into illusions and dissipated.

"The training of the basic combat power 800 is indeed relatively weak, so it is also suitable to be familiar with shooting." Xu Jingming didn't feel difficult at all.

The control of distance and the control of reaction time make his shooting like art, easily killing the virtual training of the martial arts arena.

Buzz!

"Huh?" Xu Jingming gently saw from a distance that in the other side of the martial arts arena, a burly middle-aged man was looking over. The burly man's eyes were like tigers, and his deterrence was terrible.

"Master?" Xu Jingming is a little uncertain.

"Hahaha, am you surprised to see me getting younger?" Liu Hai laughed.

"Congratulations, Master, the global martial arts community has speculated over the years that if Master, if you were 30 years old, you would participate in the World Martial Arts Competition, I'm afraid you would be the greatest king of the World Martial Arts Competition. Now that human beings have evolved, Master can satisfy everyone's speculations and imagination. Xu Jingming is also looking forward to it.

Liu Hai is a legend all over the world.

Forty-five years old, he is very old in the fighting world, and his condition is much worse than that of his twenties. Master Liu Haineng has participated in five martial arts competitions in a row since he was 45 years old. The second time was in the top three, and the last time he was the first in the world.

How strong was he at his peak? This has always been speculative.

"The past is not worth mentioning." Liu Hai smiled and said, "Jingming, a 30-year professional martial arts event, there are only more than 20,000 registered professional martial arts players worldwide. Nowadays, there are more than 7 billion people competing with more than 20,000 people! In the virtual world, you won't get hurt and tired. You can choose to accompany you at will and fight life and death. They will grow up more than ten times faster than our actual training.

"In a month or two, we professional players still have advantages."

"Half a year! It only takes half a year... We professional martial arts players will be completely submerged. Liu Hai looked at Xu Jingming, "But this is the most suitable era for us martial arts players!" There has never been an era in which there are so many martial arts players now.

"Yes." Xu Jingming nodded. People all over the world are learning. Cold weapon fighting. How has it been so prosperous?

"We already have a good foundation. If we seize the opportunity, we can soar to the sky!" Liu Hai looked at Xu Jingming, "Jingming, don't let this era down."

"Uh-huh." Xu Jingming's blood is also boiling, and he also wants to make a world in this era.

"By the way, have you been graded? Have you reached the divine level?" Liu Hai asked.

Chapter 17 Rating Competition

"Not yet." Xu Jingming explained, "I have been practicing martial arts arena."

"It's important to practice hard, but life-and-death fighting is also very important!" Liu Hai asked, "Is the basic combat effectiveness enough?"

"Enough." Xu Jingming nodded and looked at his personal combat power panel.

Player: Xu Jingming

Genetic Evolution: Python Evolution (Middle 20%) (Practice time 735 days, not to improve)

Body: 115

Skills: Gunwork (second-order 75%), footwork (second-order 16%), shielding (second-order 62%)

Basic combat effectiveness: 1380

After all, I have been practicing in the martial arts arena for nearly eight hours. The Python Evolution Method has reached the first level once. Now it has reached the intermediate level by 20%. After raising the body to the limit, it is naturally stronger.

After the evolution of the body, the strength, speed and nerve response have changed in all aspects, so Xu Jingming is also choosing a companion in the martial arts field. He is very familiar with his shield and shooting skills to ensure that he can fully give full play to his strength.

"It's good to have enough combat effectiveness." Liu Hai nodded, and he also knew that the basic combat power threshold of the divine level is 1000, and if you want to enter the divine level directly by relying on the 'segmentary competition'. The basic combat effectiveness needs to reach 1200, and the difficulty is still very high.

"After you retired, the shield method was not relaxed, did you?" Liu Hai asked.

In the national team, there are many teammates to accompany you. After retiring, the training partner is much worse. Xu Jingming said, "But I practice several times a week."

"Practicing shielding is very helpful for mastering physical strength." Liu Hai said, "This is a lifelong thing. You can't relax."

"Disciples understand." Xu Jingming said.

He has practiced shooting since he was a child. After entering the national team, Master Liu Hai taught himself shielding.

Master's shield originated from the Taiji vein.

"Hurry up and set the grade. Now there are 31 people who have reached the divine level. In the land of Xia, there are hidden dragons and crouching tigers." Liu Hai sighed quite and hung up the communication.

"Is there already 31 people?" Xu Jingming did not hesitate to click on the personal panel and went directly to the battle space.

...

When you first enter the battle space, it is nothingness.

A blue-shirted man appeared in nothingness and said, "Xu Jingming, welcome to the battle space. Your basic combat effectiveness has reached 1380, exceeding more than 20% of the 'divine' basic combat effectiveness threshold. You can directly hold the 'divine-level' rating competition. Do you want to hold a grading competition?"

"Okay." Xu Jingming nodded.

"Battle space is divided into five environments. They are small towns, mountains and forests, cities, snow and ancient battlefields. Please select one of the environments as your designated venue."

Xu Jingming thought for a moment and said, "Mountain forest!"

"Please select your equipment." The man in the blue shirt said, "There are two weapons at most, and there should be no protective equipment on the head."

"There is only a head in the whole body, which must be exposed?" Xu Jingming asked.

"Yes, even if you wear heavy armor, your head must be exposed." The man in the blue shirt nodded and said, "This is the rule set by the virtual world game, so when fighting, the head will be the biggest priority. You must be careful to protect."

Xu Jingming nodded.

Tap and start selecting equipment. He has experimented many times in the martial arts training ground, so he is also very proficient.

"A set of lightweight armor, the close-fitting does not affect movement." Xu Jingming chose his body equipment. After selecting it, he wore dark red armor and stepped on a pair of light and strong boots.

"Double shields, with a diameter of 60 centimeters, are relatively light." Xu Jingming carried the double shield behind him, stretched out his hand and chose a long gun.

"Long gun, weighing 36 kilograms, is quite good." Xu Jingming is holding a long gun.

Full-body equipment, a set of close-fitting lightweight armor, including boots, weighing 55 kg. The double shield weighs 30 kilograms and the long gun weighs 36 kilograms. For Xu Jingming, whose body index reaches 115, it is indeed a relatively light equipment. Those heavy armor weigh hundreds of kilograms, and of course, the defense effect is much stronger. The cultivation of Xuan Turtle Evolution and Giant Bear Evolution is more suitable for choosing that kind of heavy armor.

"Let's start the rating competition." Xu Jingming clicked to be ready. Suddenly, five maps appeared in the void ahead, and then he fell directly to the 'mountain forest' map.

After the rain, the mountain roads are muddy.

Xu Jingming came from nothingness, stepped on the mud and looked around.

There were weeds under a big tree in the distance. A sloppy man sat cross-legged on the clean weeds with a sword around his waist. When Xu Jingming appeared, the sloppy man looked up.

"I'm not afraid of death. Let's have another one." The sloppy man whispered to himself, smiled softly, and slowly stood up.

"Cloth, there is only one sword?" Xu Jingming observed his opponent, "He is wearing cloth, but I am a protective armor and a long gun against the sword, which also has a great advantage. He is at an absolute disadvantage in external equipment, so he may be very strong.

If the strength is weak, the equipment is weak. That's too unchallenging.

"Since I'm here to die, I'll give you a ride." The sloppy man moved, and his body was blurred when he moved. He was extremely fast and rushed straight to Xu Jingming.

Xu Jingming stood in place and waited calmly.

It's close!

Xu Jingming held the handlebar in his left hand and the waist of the gun in his right hand, so he wanted to take action.

"Whoo." The moment the sloppy man approached, his figure twisted strangely and the sword flashed.

Boom.

The long sword split on Xu Jingming's long gun, but this long gun was like a dragon at sea. With a slight shock, the barrel of the gun hit the sword with a terrible force. The sloppy man flew backwards away. His feet lit the tree trunk next to him, turned over and landed in the distance. The hand holding the sword trembled.

"So fast and flexible." Xu Jingming looked at each other, "I'm not as good as him."

Sloppy...

The sloppy man stared at Xu Jingming and approached slowly again.

He also wanted to kill with a sword, but with a three-foot sword and arm, he must be close enough to stab Xu Jingming. However, Xu Jingming's long gun is 1.6 meters away. The sloppy man has not yet brought his attack distance closer, but has reached Xu Jingming's attack range! This is the advantage of weapons! The sloppy man was also forced to attack Xu Jingming's long gun.

You must split the long gun first to get close.

Huh.

The sloppy man approached again.

"Dangdang."

He surrounded Xu Jingming, moving at high speed, stabbing like lightning again and again, colliding with Xu Jingming's long gun in search of a good opportunity.

"My body is above me. The swordsmanship is not bad, but the equipment is too poor." Xu Jingming understood this, "The normal way to kill the enemy is to kill him with the advantage of equipment. But... it's not necessary."

When the sloppy man patiently tried again to find a good opportunity.

Xu Jingming moved his long gun in his hand.

"Hiss!"

Strange wind roar.

A blurred gun tore the air and even formed an air wave. The tip of the gun had reached the sloppy man. The sloppy man panicked and waved his sword to block it, but it blocked the air. There was a hole in his throat, and the tip of the gun was even withdrawn.

The sloppy man covered his throat and fell down.

"This is my unique 'shadowless thorn'. You can't stop it when you enter my attack range." Xu Jingming said silently, "Your body speed is faster than mine, but not as fast as my gun."

After killing the sloppy man, the world of mountains and forests began to dissipate after the rain, and Xu Jingming returned to the land of nothingness.

In the land of nothingness, there was a slow-motion picture of killing in mid-air: Xu Jingming's long gun was so fast that the air was torn, the air waves split on both sides, the tip of the gun pierced the neck of the sloppy man, and the sword of the sloppy man was only waved halfway, which was obviously much slower.

Battle score: 98.

Level: One divine star.

And Xu Jingming's personal combat power panel is also displayed on the side--

Player: Xu Jingming

Genetic Evolution: Python Evolution (Middle 20%) (Practice time 735 days, not to improve)

Body: 115

Skills: Gunwork (second-order 75%), footwork (second-order 16%), shielding (second-order 62%)

Basic combat effectiveness: 1380

Actual bonus: 20%

Combat strength: 1656

"Is there a bonus in actual combat? And more fighting power?" Xu Jingming said, "No wonder it was previously called the basic combat power, and with the actual combat bonus, it is the complete combat power."

"Yes, it is also very important to grasp the timing of fighting and the use of various factors." Xu Jingming is very clear.

"Congratulations on passing the final competition with a full score of nearly a full score." The man in the blue shirt smiled and said, "I want to tell you something. As of this moment, the virtual world game has been open for 8 hours and 36 minutes, and there are 32 god-level players in Xia."

Xu Jingming nodded much faster than himself. There were indeed dragons and crouching tigers in the land of Xia.

"Are you going to start the battle?" The green-shirt man asked, "Players in the battle space are all in teams of five people, and five other people fight life and death in one of the environment of the mountains, snow, cities, towns and ancient battlefields."

"In the battle, you can queue up alone and let the game arrange four teammates for you. You can also invite your friends to form a team and fight again."

"Single people go to line up?" Xu Jingming was puzzled, "Que in line?"

"Yes, there are only 32 divine players now. Some are on the martial arts arena, some watch the live broadcast, and some choose to queue up and withdraw. It may take some time to form a team of ten people. The man in the blue shirt explained, "Now is the first day of the game. There are too few divine players and the queue is very slow. After ten days and a half months, the queue will be much faster."

"Then start queuing up." Xu Jingming had an expectation in his eyes, "The one who can become a god now is not an ordinary master."

Xu Jingming clicked the battle button.

A prompt appears - "Six people are ready..."

"There are six people in line now." The man in the blue shirt said, "The battle will not begin until there are ten people."

"How long do you think it will take?" Xu Jingming asked.

"It may take some time. The longest of the six people has been in line for two hours." The man in the blue shirt said, "In the early days, there were also queues, and the queue was also cancelled. While you can line up, you can practice martial arts arena, watch the live broadcast, and even go offline! Once there are ten people, I will send you a notice immediately! It only takes three minutes to go online."

Xu Jingming nodded slightly, "Then line up."

"Once this battle begins, this will be the first divine battle of Xia." The man in the blue shirt said.

"The first divine battle in the State of Xia?" Xu Jingming thought about it.

-----Nexta-topic words-----

Thank you for your support. Here are the leaders of the League in recent days!

My leader ranks first: Jiu Suihe, the leader of the Silver League.

Then the fairy, the same silver alliance leader!

And... I want to read good books, right? 1234, Fantasy 0 Broken Love, but Tianchen, IU's little fan, Mo Weinaqian, 2018 Alive is faith, Ka Fengyun v, Aishechang, Egg 0 Bad, Bazhanghe, Gao Xiaoning, Tuoshan Tianxian, Brokenhong x, Charlescc, Crabs should be rampant, clear as water, work hard as crabs. My name is Tang Wutong, Sanshengyuan longitudinal hunter, the heroes in heaven come to cross demons, the brightest boy 9527, Tiandiquan, Puerto, support tomato new book, Canghai 1 moment, sss west, tobyshen, life eternal wisdom. The above are the latest added alliance leaders. .

Tomatoes are compared with each other to prevent omission. There are also many readers and fans, including old fans who have supported it for many years and new fans. Thank you!

Tomato will try to write good novels. Grip your fist! Come on!

Chapter 18 Live Broadcast

On the virtual world observation platform, in one of the live broadcast rooms, hundreds of viewers watched it, and Li Miaomiao was also among them. She is listening attentively and listening carefully.

"The strength of the swordsman, 70%, depends on your footwork." A man with jeans is practicing martial arts, teaching swordsmanship, "Now I have a virtual 500 combat training partner."

Wow, a bandit with a machete appeared, and the fierce culprit was killed.

"Sword is an extension of the hand."

"You only need to control the distance from the enemy through footwork." The man in jeans was like a phantom, retreating several steps, which made the bandits split out angrily.

"The other party cuts the knife. It takes time to split the knife again. This time... is when we move." The man in jeans made up the opportunity for the other party to split out. A progressive stab sword stabbed the bandit's neck like a poisonous snake. He pulled out his sword and retreated in an instant, and the robber turned into illusory dissipated.

"Swords have many disadvantages in cold weapons, such as being relatively short and not strong enough. But its advantage is that it is flexible and as fast as lightning. We need to take advantage of its advantages." The man in jeans explained.

Wow.

In the stands, Xu Jingming appeared and sat down next to Li Miaomiao. The viewing platform is a live broadcast room where you can choose 'friends are watching'.

"Miaomiao, what are you looking at?" Xu Jingming is now in line and has been practicing for more than eight hours and tired, so he also took a break.

"Learn swordsmanship." Li Miaomiao looked at Xu Jingming and said, "I have been practicing swords in my spare time for seven or eight years, and you, as a master, have taught me personally. I thought swordsmanship was good, but in the virtual world game, I worked hard, and my basic combat effectiveness was barely 156, and I was not qualified to participate in the grading competition. I played in the stars for more than two hours before I was full of stars! Upgraded to the silver moon level! As soon as he rose up, he lost three games in a row. Fortunately, this game will not be downgraded. I am now at the Silver Moon level of 0 stars.

Xu Jingming nodded, "Take your time. Don't worry. It's only the first day. Most people are novices and are still on the stars.

Li Miaomiao sighed, "The threshold of the Sunday level is 400 basic combat power, and the divine threshold is even more than 1,000 basic combat power. I have lost three consecutive defeats in the Silver Moon level, alas..."

"By the way, this anchor Cong Yao, who has won the Olympic epee medal, has also participated in the World Martial Arts Competition." Li Miaomiao said, "The swordsmanship he speaks is quite useful."

"Cong Yao is very powerful." Xu Jingming nodded.

When the man with the explanation of jeans glanced across the stands, he also saw Xu Jingming and nodded slightly. Xu Jingming also nodded.

"He is now a 28-star on Sunday! In the Wednesday class, 29 wins and 2 losses, the swordsmanship is very good. Li Miaomiao said, "Now in the live broadcast, in terms of swordsmanship, he should be the top few."

"There is no divine player live broadcast?" Xu Jingming asked.

"Yes! But there are no divine players who are good at swordsmanship. Li Miaomiao sighed, "There are too few divine players now, and there are only 32 divine players in Xia. There are only three people live! If we want to learn swords, we can only find the Sunday grade."

Xu Jingming clicked on the watching platform and watched the live broadcast of his friends. Unexpectedly, 125 friends were broadcasting live.

"Many of your friends are broadcasting live." Li Miaomiao exclaimed.

Professional players should also be popular. The popularity is very high, and the appearance fee is much higher. Xu Jingming said that many friends still have to run themselves even after retiring, and many of them participate in variety shows.

"There are nearly 1,000 professional players among my friends, and there are not many live broadcasts with more than 100." Xu Jingming continued to watch the live broadcast and saw A Shuo.

Yang Qingshuo was conducting a live battle. Xu Jingming immediately clicked it, and the live broadcast screen became larger.

"This is your good brother Yang Qingshuo." Li Miaomiao looked at it and exclaimed, "It's awesome. Those who can enter the Wednesday grade on the first day of the game are all top professional players. They are 32 stars on Sunday. Even if they win in a row... they still need to win 31 games in a row!"

"He is quite powerful." Xu Jingming watched.

...

Yang Qingshuo's live broadcast room.

Snowy battlefield.

"We should give full play to our advantages. For example, if I am fast, then we should find a single opponent and break them one by one." Yang Qingshuo, wearing leather armor and holding a silver gun, ran fast as lightning on the snow, straight to an opponent with a big shield and a sledgehammer opposite side.

While running, Yang Qingshuo also explained that the voice of his voice could be heard by the audience in the live broadcast room.

Because it is 32 stars on Sunday and is a player who has been in the World Martial Arts Competition, the explanation is also very interesting. Yang Qingshuo's live broadcast room is quite popular, and thousands of people are watching the game.

The strong man with a shield hammer was tall, but slow. He watched Yang Qingshuo chase him, but he couldn't escape.

"Whew."

Yang Qingshuo's figure was like a ghost. After walking a few steps around the strong man, several shots were stabbed out in a row. The strong man with a shield hammer was also a professional master. He carefully raised his shield to protect himself, but after all, the gap was still wider.

The fifth shot from the side rubbed the edge of the shield and stabbed the strong man on the head, and the strong man's figure turned into nothingness.

"Beautiful."

"Oday-class opponents took away with a few shots."

"It's so fierce..."

"That's awesome. 32 wins and 1 loss. What a monster. Take it alone!"

"Yang Qingshuo has announced his combat effectiveness, and his combat strength has reached 970. The threshold of the Sunday level is 400, and few of them can block him at the Sunday level."

The audience was amazed and warmly rewarded.

Reward all kinds of gifts.

Yang Qingshuo looked at it and was overjoyed. At the same time, he continued to say, "When we fight, we should choose our restrained opponents. For example, the opponent just now is bulky at first glance, but we are flexible and fast. You can do your best, but it's difficult for the other party to meet us."

"Look, the one in the distance has a double knife." Yang Qingshuo stared at another opponent in the snow in the distance, "I guess the Shadow Leopard Evolution Method has practiced like me, but he is not as fast as me. The double-knife weapon is shorter than me, and we can easily harvest him. We must try our best to break them one by one before the other team meets. In the later stage, our team will have a numerical advantage and win easily."

Yang Qingshuo rushed over quickly.

...

Xu Jingming looked at it and was relieved: "A Shuo, heroes also have a place to use martial arts, and they can also make money through live broadcast."

"Friends from all over the world are all working together." Xu Jingming looked at one live broadcast room after another. It was not clear that there was no live broadcast, but the friends who were live broadcast were all in the battle.

I also queued up to fight, just because it was a god, and it was a little difficult to gather a full of people.

"Miaomiao, where are the divine players in the live broadcast?" Xu Jingming asked.

"Here's it." Li Miaomiao studied the live broadcast thoroughly and quickly clicked out three live broadcast rooms with three people, all of which were the same scene--

In the empty place of the battle space, there is only a hint: "Seven people are ready..."

"Live broadcast, no one is there?" Xu Jingming smiled.

"Live streaming can lock the battle space." Li Miaomiao said, "All those who can become gods now rely on the grading competition. It means that their basic combat effectiveness is at least 1,200, all of which are monsters. Many players in the World Martial Arts Competition can't reach it."

Xu Jingming nodded and looked at the live broadcast room of the three divine players.

"Panda Zhang Qian, Archer Wang Yi, Female God of War Sun Yuting." Xu Jingming pronounced the names of these three people, all of whom were very famous.

Li Miaomiao was also excited: "Before, due to the physical fitness gap between men and women, the World Martial Arts Competition has always been a stage for men. But

nowadays, women also have suitable genetic evolution methods, and they are no longer physically vulnerable. On the first day, women became divine players. Archer Wang Yi... The archery champion of the three Olympic Games, the great demon king of the archery class.

"The divine archer is very horrible." Xu Jingming nodded and the archer was very threatening in the cold weapon.

Sun Yuting, the goddess of war, won the first place in the two Women's World Martial Arts Competitions. But the popularity of women's events is much worse than that of the World Martial Arts Competition. Li Miaomiao said, "Nowadays, you can really prove yourself."

"The number of female professional players is also much smaller than that of men." Xu Jingming nodded and said, "It's because the heat is generally low and the income is generally low."

This is also normal.

Because the World Martial Arts Competition is gender-ended, and women can also go to the competition.

But women are indeed physically weak. In the highest world martial arts competition, men are the most dazzling.

"With genetic evolution, women's physical talent is no less than that of men." Li Miaomiao pointed to him, "Three live broadcast divine players, two are female players, which can be seen in this proportion."

"Well, what is that? The top live broadcast room?" Li Miaomiao was surprised.

Xu Jingming also saw that a live broadcast room on the observation platform was top.

"Xia Guo's official live broadcast room?" Xu Jingming and Li Miaomiao both saw the names.

"Let's go and have a look."

The two of them entered gently.

Wow!

As the only top live broadcast room on the observation platform since the opening of the virtual world, a large number of viewers are constantly pouring in, and the stands are infinitely wide, with 2 million people, 5 million people... More and more people have come in.

Xu Jingming and Li Miaomiao also came in, sat in the position and saw the distance from afar.

"Enlarge it." With a gentle click, the live scene in the distance quickly brought it closer to your eyes.

Three people sat in front of the commentator.

"This is Xia Guo's official live broadcast room." The host is the official gold medal host 'Liu Xin'. Next to him is a man and a woman, two middle-aged people. Liu Xin smiled and said, "Today is the first day of our official live broadcast room. The two people next to me are Huang Yong, the head coach of the national martial arts team, and Qin Yiwen, the coach of the women's team."

Huang Yong and Qin Yiwen waved their hands: "Hello, everyone."

"At the beginning of our live broadcast room, the audience has exceeded 10 million." Liu Xin smiled brightly. One of her smiles can become popular on the Internet, and the official media also regarded her as a treasure. Now the first live broadcast of Xia Guo in the virtual world is to let her be the host.

"We will start broadcasting for the first time, and the live broadcast will be the first divine battle that our Xia Guo is about to start!" Liu Xin said.

Chapter 19 Xia Guo's Official Live Room

In the conversation room, the number of viewers in the live broadcast room continues to increase.

Li Miaomiao sighed: "The virtual world is open for nine hours. Everyone is a little tired whether they practice evolutionary methods or fighting. There are many people watching the live broadcast. At this time, the official live broadcast room has exceeded 30 million people.

"After all, it is the only live broadcast room on the top of the observation platform." Xu Jingming also watched the audience numbers keep jumping.

At this moment, in front of the platform.

The host Liu Xin continued, "According to the information I got, Xia Guo has not exceeded the 40 stars of the Wednesday level. And the Yao-grade 50 stars are the full star... So now you can become a god-level, only through the rating competition to represent their basic combat effectiveness, at least 1200!"

"That's very difficult." Huang Yong said, "I have learned that most of the basic combat strength of ordinary professional players is only 200 or 300. The top professional master who can play A-level martial arts competitions generally has a combat effectiveness of 500 to 800. If he can enter the World Martial Arts Competition, his combat effectiveness generally does not exceed 1000.

"1200, what is the level? That's the level that is expected to become a martial arts master!" Huang Yong smiled and said, "In my opinion, the 33 gods are either famous professional martial arts, legends of other fighting schools, or folk wonders."

"Folk chives?" Liu Xin said in surprise.

"People hide dragons and crouching tigers." Huang Yong smiled and said, "Like my master Liu Hai before he fought in the first World Martial Arts Competition, who knew he was so powerful?"

"There are still many female masters." Coach Qin Yiwen said, "Men and women each account for half of human beings. Nowadays, there are ten evolutionary methods, and women also have five evolutionary methods, which are no less than men's physically. It can be expected that in the future, in the divine hands, the proportion of women will probably account for about half.

"I'm also looking forward to the battlefield for masters in different fields." Huang Yong said.

Host Liu Xin suddenly said, "The audience in our live broadcast room has exceeded 100 million!" As of this moment, 33 people in the State of Xia have reached the divine level. Eight people are ready for the first divine battle. I believe it will start soon. Before we start, let's talk about the divine masters who participated in the war.

"First of all, there are three people who broadcast the public broadcast, Zhang Qian, nicknamed "Panda", Sun Yuting, known as the "God of War", and Wang Yi, the archer." Liu Xin said, "Lead coach Huang Yong must be very familiar with Zhang Qian."

"Panda Lao Zhang, the largest Internet celebrity in the field of martial arts fighting." Coach Huang Yong laughed and said, "He used to have more than 50 million fans on the Internet, known as the 'wu kaleidoscope'. His 'three-point and two-edged knife' is definitely as a martial arts master."

Qin Yiwen, the coach of the women's team, said, "There were many doubts about his strength on the Internet before, because he had never participated in the World Martial Arts Competition. But this time, on the first day of the opening of the virtual world, you can reach the divine level. He also proved himself."

"Many people can't believe that a big Internet celebrity in the field of fighting can reach the divine level ahead of many professional players, but Zhang Qian did it." Host Liu Xin said, "I'm looking forward to his performance in this divine battle."

In the stands, Xu Jingming and Li Miaomiao also noticed the popularity of the live broadcast room.

"The audience who came in exceeded 160 million." Li Miaomiao was amazed.

"This speed is really exaggerated." Xu Jingming said.

"One pass, ten to one hundred. Once the battle begins, more people will come in. After all, it is the first divine battle in Xia. Li Miaomiao said.

Xu Jingming looked at Li Miaomiao and said with a smile, "Miaomiao, I also lined up for this first divine battle."

Li Miaomiao was stunned.

"God-level battle? Jingming, are you also in line?" Li Miaomiao asked, "Are you one of the eight?"

"Uh-huh." Xu Jingming nodded.

"Jingming, can you show me your personal combat power panel? Don't worry, I won't spread it." Li Miaomiao's eyes are all shining.

Xu Jingming pointed a little and showed it.

Player: Xu Jingming

Genetic Evolution: Python Evolution (Middle 20%) (Practice time 735 days, not to improve)

Body: 115

Skills: Gunwork (second-order 75%), footwork (second-order 16%), shielding (second-order 62%)

Basic combat effectiveness: 1380

Actual bonus: 20%

Combat strength: 1656

"Wow..." Li Miaomiao looked as if he saw a pile of jewelry and was extremely excited. "On the first day, the evolution method is intermediate? The basic combat effectiveness is 1380, which is much higher than the threshold of 1200..."

"I'm a big shot. Your little bit of bit is much more than mine."

"Are you getting 20% bonus? What the hell? My actual combat bonus is 0%. Li Miaomiao looked at the panel and looked up at Xu Jingming, "Jingming, I have watched so many live broadcasts, and many anchors have disclosed their combat power panels. This is the most exaggerated."

"There are also strong middle players in the strong middle school. After all, 33 people became gods on the first day." Xu Jingming said.

"Jingming, you're going to catch fire! When the battle begins, you ten people will definitely pay a lot of attention and fans. Li Miaomiao said, "I knew... your future would be a hundred times that of the past, but I didn't expect it to come so fast. This is the first day of the opening of the virtual world! It's only nine hours open!"

On the commentary stage, female coach Qin Yiwen said, "In the environment of cold weapon fighting, the threat of the magic archer will be very large. I believe you will see the performance of the magic archer Wang Yi later."

"In addition to Panda Zhang Qian, Archer Wang Yi, and Sun Yuting, the female goddess of war, head coach Huang and I also know the two gods who participated in the war, namely, Master Dong Xu of 'Tricky Double Knives' and 'Miao Dao Female' Lian Shuang." Qin Yiwen laughed.

"This is what I asked about among my friends. Brother Dong Xu told me in person." Head coach Huang smiled and said, "Brother Dong Xu, who is over 50 years old this year, is an

older generation of martial arts masters. At that time, he was also the third in the world who won the 11th World Martial Arts Competition. His 'tricky double knives' has changed endlessly, and many world masters have lost to his double knives."

"Miao Dao heroine Lian Shuang is also the coach of our national team's women's team." Qin Yiwen said.

"Many male players have consulted her on the use of Miao Dao." Huang Yong smiled and said, "Now I have become a god on the first day, which also proves his strength."

"There are nine ready divine masters!" The host Liu Xin suddenly said excitedly, "It's almost there. It's almost time. There's only one left from ten people. This divine battle may start at any time.

The number of people in the live broadcast room is also rising, exceeding 200 million.

Suddenly, the host Liu Xin, the commentator Huang head coach and Qin Yiwen were all excited.

"Ten people are full!" Liu Xin's voice was loud, "The first divine battle is about to begin!"

Xu Jingming, sitting in the stands, also received a prompt: "Ten people are ready, and the battle is about to begin!" Xu Jingming, please prepare your weapons and equipment.

"Miaomiao, the battle has begun. I'm over." Xu Jingming and Li Miao Miao on his side.

"Go quickly." Li Miaomiao was urged with excitement.

Xu Jingming disappeared.

"Dad, Mom, come quickly, come here quickly." Li Miaomiao immediately contacted, "Uncle, aunt, grandpa, Jing Ming also participated in the first divine battle of the State of Xia. Come to the official live broadcast room of Xia."

"Second aunt, third aunt, fourth aunt, uncle, come to the official live broadcast room quickly."

"Old students, the first divine battle has begun. Have you seen it?"

"Sister Kong and Xiao Zeng, retweet it to me and ask someone to come to the official live broadcast room."

Li Miaomiao kept calling friends and was very excited.

"You and your mother came early." Li Chen'an and his wife also came to their daughter.

"Insignificant." Xu Hong, his wife and Mr. Xu also came, and Xu's mother said repeatedly, "You just said that Jing Ming also participated in this first divine battle?"

"Look ahead and let's begin." Li Miaomiao pointed to the commentary platform ahead.

...

On the curved commentary platform, host Liu Xin, commentator Huang Yong and Qin Yiwen now look at the emerging battle space.

In the battle space, there are five people on the left and five on the right, and they have begun to choose to equip weapons.

"All ten divine masters appeared. The team on the left were 'Hercules' Gao Chong, 'Blood Axe' Wang Qiao, 'Miao Dao' Lian Shuang, Sun Yuting, the female goddess of war, and a 97-year-old senior named 'Liu Jianfeng'. It seems that I have never heard of this old senior in the fighting circle." The host Liu Xin was a little surprised. She could only see everyone's name and age, and she didn't know anything else.

These five people, the other four, are well-known, but Liu Jianfeng didn't hear about it.

Huang Yong and Qin Yiwen, the coaches of the national team, also showed confusion. They knew a lot of insiders, but they had never heard of the name.

"The 97-year-old senior can become a god player on the first day, which is really amazing." Huang Yong said something.

Host Liu Xin continued, "The five teams on the right are Wang Yi, the 'gun demon' Xu Jingming, the legendary boxing champion Wu Sai, Master Dong Xu, the 'tricky double knife' and Zhang Qian, the panda we are familiar with."

Chapter 20 The drizzle in the town, the divine battle

Xu Jingming clicked to enter the battle space and saw four other companions, opposite five opponents in the distance.

"Xiao Xu." A short-haired middle-aged man looked at Xu Jingming with a smile.

"Brother Dong." Xu Jingming said politely that the middle-aged man in front of him was Master Dong Xu, who was also under Master Liu Hai, but he was much better than himself.

"Our team is really gorgeous. Brother Dong Xu and Jingming are both veterans of the martial arts arena." As the largest Internet celebrity in the field of fighting, Zhang Qian, a chubby panda, has a wide range of contacts. "Wu Sai is a world-class boxing champion at two levels. Not to mention Wang Yi, the goddess of our archery class.

"Hello, everyone." Wang Yi smiled and cherished the words like gold.

"I haven't played martial arts very much. Please forgive me." Wu Sai, the boxing champion, was very strong and smiled, "My weapon is double shields!" Our boxers use double shields, which is easier to get started. At that time, we will resist everyone in front of us and resist the opponent's attack.

"I'm a three-pointed two-edged knife, which is the surest." Zhang Qian, a panda, said, "Take some more hidden weapons."

"Double knives and hidden weapons." Master Dong Xu said.

"Gun and double shields." Xu Jingming said

"Bow and arrow." Wang Yi said.

Zhang Qian, a panda, was overjoyed: "Very good. Jing Ming and Wu Sai both use shields, so our team's defense is much stronger. After all, there is Hercules Gao Chong on the opposite side."

"Gao Chong!" Xu Jingming, Dong Xu, Wang Yi and Wu Sai all took a few points.

Now they can see the five people opposite, and what they care most about most is Hercules Gao Chong, because it won the first place in the world martial arts competition! The Martial Arts Alliance gave it the title of Hercules.

"Please ask a team member to choose weapons and equipment first." The sound of the virtual game is ringing.

"The weapons are selected in turn." Zhang Qian, the panda, explained, "Let's choose one person, and then two people on the opposite side choose. We choose two more people, and two people choose on the opposite side. In the end, there is only one choice left on the opposite side... Because the two sides see each other's weapons and equipment, they can choose restrained weapons and equipment.

"I'll be the first choice. I only have double shields." Boxing champion Wu Sai soon wore armor and held double shields.

...

In Xia's official live broadcast room, as the game began, the number of viewers soared rapidly.

"It has been 38 million and is still rising. There are so many people. Xu Hong exclaimed.

"Both sides are choosing weapons and equipment." On the commentary stage, the host Liu Xin said, "Wu Sai is a world-class boxing champion at two levels. His steps dodge and his heavy punches are famous. He chose Double Shield first! On the other hand, Gao Chong, the 'Hercules' and 'Blood Axe' Wang Qiao, chose weapons and equipment respectively.

"Gao Chong chose heavy armor, and the visual weight should be at least 300 kilograms." Head coach Huang Yong exclaimed, "Even in the virtual world, everyone's bodies have evolved, and the burden of wearing 300 kilograms of heavy armor is still not small."

"Gao Chong, he won the world's first place in the 22nd World Martial Arts Competition! He is famous for his great power. Looking at his stronger and burly figure than in reality, he should practice the Giant Bear Evolution Law, which is famous for his strength. His strength should be more terrible. Qin Yiwen exclaimed, "In addition, with his shooting skills, the threat is very high."

"Blood Axe Wang Qiao, the 12th World Martial Arts Competition was first appeared, but he won the second place in the 15th World Martial Arts Competition." Huang Yong continued.

"The last player, the 97-year-old predecessor, Liu Jianfeng, chose a sword? This is the only one in ten who only chooses one sword. Sun Yuting, the goddess of war, is all shield and sword cooperation. In cold weapon fighting, the one-handed sword is still very bad. Liu Xin was surprised and immediately said, "Okay, now there are five people on both sides, and all the weapons and equipment have been selected. Which side do you like, two coaches?"

"The team on the left." Huang Yong said, "Sun Yuting, the goddess of war, and Wang Qiao, the blood axe, are both shielded and attack weapons, which are suitable for frontal attack. There is also Hercules Huang Chong killing head-on! Elder Liu Jianfeng and Miao Dao heroine Lian Shuang are good at physical speed and can carry out sneak attacks and assassination. Of course, the most important thing... I'm very optimistic about Huang Chong!"

"I like the team on the right, because the team on the right has our magic archer. This is the only archer among ten people." Qin Yiwen said, "Fist Wu Sai and Gun Demon Xu Jingming both carry double shields, and Xu Jingming has also used double shields in the world martial arts arena."

"His double shields were passed down by Master Liu Hai after entering the national team. He has a high talent in shielding. In the World Martial Arts Competition, he has also defeated his opponent with double shields, which is still very powerful. Huang Yong also said.

"Two who use double shields protect the divine archers. The archer can play to his heart's content. Qin Yi...

Qin Yiwen said, "I am optimistic about the team on the right in this battle."

...

"Come on, grandson." Mr. Xu shouted, the most enthusiastic.

"They always praise that he is so noble, and don't talk more about Jingming." Xu's mother is the way.

"Highly strong should be the strongest of these ten people." Xu's father was also an insider in the circle and commented, "The game was really beautiful at the beginning. Others needed all kinds of competition wisdom to play. He played the game, and he didn't hide at all!" In the end, he abruptly rushed to the first place in the world. When Gao Chong retired, Master Liu Hai once commented that the martial arts circle of the State of Xia was on the domineering of guns... Gao Chong should be the first!"

"Don't be prestige!" Mr. Xu stared, "It's timid before it starts? The most important thing to play the game is one word, do it!"

Xu Hong immediately smiled, "Dad, you're right. Jing Ming's leg injury is also the first to impact the world. At least he can wrestle his wrist with Gao Chong.

"Uh-huh." Mr. Xu looked at the battle space and said, "My best thing is the brother named Liu Jianfeng. He is 97 years old and is a god on the first day."

"Uncle, do you know this old man Liu Jianfeng?" Li Miaomiao asked.

"I have also traveled all over the world, and I have also visited various genres in China. I really don't know it." Xu Hong said, "But Liu... Jingming's master's hometown of 'Liu Hai' and the Liu family in Cang County, Hebei Province, practice martial arts, and there are many Liu surnames."

"The battle begins!" Li Miaomiao looked at the battle space.

"Virtual world, our first divine battle in Xia has begun now." Host Liu Xin said highly, "The map of this battle is a map of the town."

Ancient town, drizzle.

Ten people scattered all over the town.

Xu Jingming appeared on the second floor of a restaurant wearing dark red light armor, holding a long gun and carrying double shields.

"The Miao Dao heroine Lian Shuang and the old generation Liu Jianfeng opposite should be good at assassination. We must gather first to protect our archers." Panda Zhang Qian said through the voice call in the team, "Of course, Brother Dong Xu can act alone."

"Okay."

None of the five people in the team disagreed.

Through the internal map, you can clearly know the location of your companions.

"Wish." Xu Jingming walked down the staircase of the restaurant and came out of the back door. The drizzle floated on his face like silk outside, which was very refreshing. Xu Jingming walked forward carefully against the wall and listened carefully to everything in his ears.

On the other side.

Master Dong Xu, with a thin body, is practicing Shadow Leopard Evolution. He wears leather armor and looks like a ghost. He walks through the alley with two knives in his hand, looking for prey.

...

The five people from the other team have long been unified.

"Brother Wang Qiao and Sun Yuting, you two will gather with me first. Mr. Lian Shuang and Mr. Liu Jianfeng, you should act freely. It's better to kill the magic archer first at the beginning of the battle. Hercules Gao Chong spoke through the voice of the team.

"At the beginning of the battle, everyone was scattered all over the town, which was the best opportunity to assassinate the archer." Miao Dao heroine Lian Shuang's figure was blurred, swished up the roof, walked carefully, and looked for the target from a height.

Mr. Liu Jianfeng, who was as thin as a monkey, disappeared from the town after turning around his waist.

"What a fast speed!"

In the live broadcast room, the host Liu Xin, commentator Huang Yong and Qin Yiwen all noticed Mr. Liu Jianfeng, and Huang Yong even said, "The teams on both sides, Dong Xu, Lian Shuang and Mr. Liu Jianfeng, should all be good at physical speed, but they can obviously see... Mr. Liu Jianfeng is the fastest and most flexible. "

Swish.

Mr. Liu Jianfeng walked through the town, sometimes stopping to look. Once he took action, he ran far away and disappeared into an alley in a few steps.

Liu Jianfeng suddenly stopped, his ears moved, carefully walked to the inn next to it, came to a room of the inn, and looked at it quietly by the window. He saw a figure walking carefully not far away, just Xu Jingming.

"Mr. Liu Jianfeng, I found the gun demon Xu Jingming!" Huang Yonglian shouted, "Xu Jingming hasn't noticed anything yet. He is in danger!"
