

# 1 Month To Doomsday But I Awakened Before That

## Chapter 16: The Chemical Plant Was on the Verge of Explosion and the Mutated Wolves Were Blocking the Way

**Translator:** EndlessFantasy Translation **Editor:** EndlessFantasy Translation

The taxi sped towards the direction of the smoke,

At the same time, many fire trucks and ambulances were also rushing to the scene.

Additionally, the radio station was broadcasting the incident.

“There’s been a leak at XY4 chemical plant. A small explosion has just occurred. Things are getting dangerous. The rescue team is trying to get there as soon as possible! As for the cause of the leak, it has yet to be determined. Also, the chemicals have flowed into a nearby river! Its specific element is still unclear, but this chemical plant has been known for producing highly explosive substances. In order to prevent further casualties, the residents of this area had been evacuated to safer places. To those who are involved, please cooperate with the relevant units!”

..

This was the cause of the thick black smoke.

The chemical plant was on the verge of a bigger explosion!

Su Chen’s mind could just picture it.

“Sir, let’s stop here! I dare not go any further!”

The driver pleaded.

Su Chen got out of the car two streets away from the chemical plant.

“It’s too scary! Run! Who knows when the next explosion would occur.”

“I just passed by that area and saw an ambulance carrying out a wounded person. It’s too tragic!”

The people on the street were panicking.

Even though he was some distance away, Su Chen could still smell the strong scent of chemicals.

The flames in the distance soared, lighting up the evening sky.

Su Chen activated his scamper skill

The wind whistled in his ears. Shortly after, Su Chen arrived outside the chemical plant.

Half of the building was engulfed in a sea of fire.

It was also spreading rapidly.

The firemen had only arrived not too long ago while ambulances and rescue teams were on standby. They tried to keep the situation under control.

There were hundreds of firemen in orange clothing.

After jumping down from the fire truck, they quickly set up the necessary equipment.

Then, they aimed the hose filled with high-pressure water at the building.

Powerful streams of water shot out, making loud noises.

Unfortunately, the fire was fierce and the water jets could only cool down the area a little.

If they wanted to put out the fire, they had to look for the source.

...

The situation was urgent.

Su Chen was about to walk into the building but he was stopped by a security guard.

“Young man, can’t you see the monstrous fire? Everyone is running away from the danger. Why are you doing the opposite? Is this an amusing scene for you? Don’t treat life as a joke.”

Su Chen just wanted to sign in but if he said that, the security guard would probably go crazy!

So, he ignored the security guard and took a detour.

He arrived at the other side where the firemen were situated.

Then, he calmly analyzed the situation around him.

“Things are not looking good. A flammable and explosive nitrification substance was leaked.”

A field commander was explaining the situation to his team members.

“That substance is extremely hazardous. Once it explodes, there will be severe consequences. Furthermore, another explosion will occur after the first and the power is ten times greater! At present, the location of the leakage is yet to be identified.”

After hearing what the commander said, Su Chen began thinking to himself.

‘As long as the leakage is patched up, the situation will be under control.

‘The firemen will be able to put out the fire if there are no massive explosions. This incident will also not escalate further. ‘

Su Chen quickly put on a protective suit and a breathing device.

He walked toward the tank area.

After checking each tank, he found out that tank number four was the one leaking.

Simultaneously, there were some wolf-like figures running around the place!

They seemed to be bigger than ordinary wolves.

Their deep blue eyes were emitting a cold light.

Did these wolves mutate ?

Why would they appear in the chemical plant ?!

Wolves!

There were definitely more than one because wolves travel in packs!

Anyway, there was no reason to catch their attention.

The place was very noisy due to the roaring flames. There was also the ear-piercing sound of a tank being torn apart.

The mutated wolves did not notice Su Chen.

More wolves' footprints appeared on the ground as he got closer to the leak.

To be precise, they were gigantic.

At the leak, there was a large group of mutated wolves. They were licking the nitrification substance like crazy.

The wolves were as big as oxen and their fur was as sharp as steel spikes!

There were at least twenty or thirty of them.

Moreover, they were not afraid of the fire and could move freely in it.

'I didn't want to harm you, but I have no choice. Otherwise, an immeasurable disaster will happen.

'Unfortunately, you'll be victims of my Thunder Blade!'

Su Chen did not have much time to think.

Time was limited!

He used his Thunder Blade and killed a mutated wolf who was busy devouring the nitrite.

This instantly caught the attention of the wolves!

They saw that their companion was killed.

Their eyes instantly turned fierce and red.

They quickly surrounded Su Chen and slowly approached him.

Su Chen did not even frown!

He held the Thunder Blade in his hand,

If any of them approached him, he would just kill them, which was exactly what happened.

The wolves attacked one after another, but they all fell to the ground.

They were easily sliced apart by the Thunder Blade.

Before long, more than half of the mutated wolves were killed.

Seeing that they were no match for Su Chen, the leader of the wolves tilted its head and howled into the sky.

It ordered the other wolves to retreat and they fled.

After that, Su Chen immediately approached tank number four.

There was a big hole at the bottom of the tank.

The chemicals were still oozing out and getting closer to the fire.

Su Chen looked around to see if he could find anything to plug the hole.

Apparently, there was a cement wall between each tank.

‘This will do!’

Su Chen waved his Thunder Blade and cut out a piece of cement from the concrete wall.

Then, he used it to fill the hole in the tank.

‘Perfect!’

Meanwhile, the firemen had come with better equipment.

To their surprise, the leak was already fixed!

As for Su Chen, he quickly left the place.

On the way back to the hotel, Su Chen heard the system’s voice.

“Ding dong! You have successfully checked in at a dangerous explosion chemical factory. Your reward is a max-level protective suit! This protective suit can help withstand 1,000 degrees of heat and cold.”

The system’s reward was really timely. Su Chen was extremely happy.

“Help!”

Suddenly, a figure pounced on the taxi that Su Chen was in.

“Help! Help me!”
