

Chapter 131

At that moment, the Bai family's apartment was packed with people.

Everyone was staring at Felicity with burning eyes.

Felicity was the head of the Bai family and also the director of the Bai Group.

However, how many of them would accept her?

How many of them would acknowledge her as the head of this family?

Therefore, everyone had been keeping a close eye on Felicity's movements recently.

As long as she made the slightest mistake, they would seize the opportunity and force her to step down as the head of the Bai family.

Yasmine cleared her throat and looked at William apathetically. Then, she voiced, "Since everyone is here, let's start the meeting. Although Felicity is the director of the Bai Group, we're still in a transitional period. So, I should preside over this meeting today."

William sneered inwardly. He had not received any news from this group of b*stards for the past few days. They were starting to wreak havoc again.

"In the past two days, I've heard that Felicity has bought a batch of Heption Herb. We all have a

rough picture of the reason. I want to highlight that it was a good move. However, the procedure could have been more meticulous," Yasmine continued.

Steven chimed in immediately. "Why didn't you tell us about such a significant purchase? What's wrong with you? Do you want to hoard all these herbs?"

Steven's statement received a lot of support from others. A man immediately roared, "That's right. Don't think that you can make decisions unilaterally just because you're the director! If the Bai family suffers any losses, are you going to bear the consequences?"

The lady next to Steven hissed, "In my opinion, she is abusing her power for personal gain by opening a separate account. She is acquiring it for her own stash."

Felicity became disheartened instantly. These people were making Felicity the scapegoat for everything!

Yasmine knocked on the table and said, "Alright, stop talking about it. I believe Felicity is not such a person, even though it is indeed a fact that she has mishandled this matter. How about this, Felicity? Since all the funds for this purchase are transferred from the company's account, you have to make sure that all transactions are done well. We will check it at any time."

Felicity knew she was innocent; she did not make this purchase for personal gains.

She knew that Yasmine was playing the good cop at this moment while the remaining Bais were the bad cop.

It seemed they were using this tactic to twist the truth to make Felicity look like a person who had abused her powers.

She was exasperated!

Yasmine saw that Felicity had nothing to say. She scoffed silently and said to Steven, "Steven, do you have any inputs on this matter?"

Steven was already for this situation. He cleared his throat. "The Heption Herb is exclusive to Qena City. It is going to become the main ingredient for the new medicine of the Genuine Care Medical Center. Therefore, we have to be a step ahead. As for Heption Village, we will, of course, pay our visit. However, I have a quicker method to seize the herbs."

Everyone turned their gaze at him.

Steven then continued confidently, "If we purchase it directly from the village, the process would be too complex and time-consuming. The main issue is that the quantity is too small. The method I'm suggesting is to deal directly with the pharmaceutical companies that specialize in herbs. We'll buy in bulk before they notice the

value of the Heption Herb. It's faster and easier, and it will have less chance of developing complications too."

Yasmine's face lit up with joy. Steven's method was indeed faster than Felicity's! Felicity's way of buying the herbs from the plantation owners was too inefficient!

Besides, it might draw suspicion of other pharmaceutical companies in the long run too.

At that time, they would face competition.

Speed was the key factor in winning this battle!

"Okay! I agree with this method. Steven, have you come up with a specific plan?" Yasmine asked.

Steve had naturally expected this question. "Haha, there's a pharmaceutical company in Qena City that specializes in acquiring Heption Herb. Moreover, they've been purchasing it for years, so I'm sure they've long stockpiled tons of Heption Herb in their factory. Let's contact them!"

"Are you referring to the Zhao family of Qena City? You're going to look for Lincon Zhao?" Yasmine frowned and added, "That fellow is a cunning old fox. You'll raise his suspicion."

Steve, however, replied confidently, "Grandma, don't worry. I've been friends with Lincon's son, Nathan, for many years. As long as Nathan is willing to help, this business is a done deal!"

Nathan? Lincon?

William frowned slightly.

He didn't expect Nathan to be Lincon's son.

Neither of them was a decent person. Steven was getting himself into trouble.

Felicity's face was obviously written with uneasiness.

Previously, they had cut ties with Nathan.

And Steven was trying to meet him at this moment...

Steven seemed to have seen through Felicity's apprehension. He said with a smirk, "Grandma, there is something you should know. As far as I know, Felicity has humiliated Nathan in front of a large crowd a few days ago, making the Zhao family resent us."

"What?" Yasmine's face turned red with anger!

"Plus, word has it that Felicity used her power as the director of Bai Group to pressure Nathan." Steven's statement added fuel to the fire.

All of a sudden, the crowd burst into an uproar.

Yasmine's body quivered in red fury. She stared at Felicity as her blood began to quicken!

"Felicity, I entrusted you as the director. It was not for you to abuse your power! We're running a business, so we should always make peace with others! When you offended the Zhao family, have

you thought of the impact it can do on the Bai family? I'm utterly disappointed in you!" Yasmine yelled.

Felicity was depressed. She wanted to argue, but she was tongue-tied.

This was because Yasmine had already bought Steven's words!

She wouldn't believe what Felicity had to say!

She knew that she very likely would be blamed for being short-sighted again. It would be wasting her time to defend herself!

"Well, liaise with the Zhao family now. Steven, you'll be in charge of this matter. You must mitigate the damage that Felicity had done. It doesn't matter if the price is higher. We'll treat it as a way to compensate them." Yasmine didn't even bother to bat an eye at Felicity.

Steven was on cloud nine. "Felicity, do thank me and the Bai family. Our family is doing the best to clean up your mess. Your childish behavior brings this upon our family."

Felicity was so furious that her face turned red.

But William grabbed her hand and comforted her gently, "It's alright. Let's stay still and watch everything unravel itself. We shall see what they are going to do."

Sure enough, Steve added confidently, "Grandma, I

still have another idea to make a bigger fortune. Are you keen to hear about it."

Yasmine froze for a moment before replying, "Tell me about it first."

Steven added, "I'm going to push the marketing team to promote the Heption Herb in the entire city!"

Steven rubbed his palms as he continued, "Think about it. How much can we earn by jumping on the bandwagon of the Genuine Care Medical Center when they release the new medicine? We can double the price of herbs. Besides, the Genuine Care Medical Center can only get the supply from us. We should not restrict our business to be operating on such a small scale?"

Speaking of this, Steven suddenly rose from his seat as he boomed, "We need to monopolize the entire market in Qena City!"

He looked around the people and added, "Hence, I intend to enhance the medicinal value of the Heption Herb! We will highlight its recuperative property, especially in the recovery of male virility. We will draw the first blood in this game!"
