

Emperor 3231

### [Chapter 3231: For The Sake Of The World](#)

One could only imagine the trio's dilemma back then. Killing the most powerful dark lord left them laden with injuries. Moreover, fixing the rift wasted their energy and vitality.

The second dark lord knew that the three immortals had the home-court advantage in the expanse so he avoided any direct confrontations. He made the fallen ones buy time.

This made it difficult for the three to kill him right away.

"The temptation of darkness was too much so many experts switched sides. If that had continued, the pillars of Three Immortals would be gone even after we kill him." Emperor Nong said.

If they needed to kill all the fallen ones to get to the dark lord, the expanse would run out of masters.

"That's why we needed to enter Three Immortals again." He continued: "We stayed on the pursuit while using our dao heart to find suitable candidates."

"So you found Zither Empress, Fire Ancestor, and the others, letting them form a powerful alliance to face the darkness. Very helpful on top of stopping individual experts from falling." Li Qiye understood the plan.

"Right." Emperor Xi nodded.

Their disciples didn't let them down either. These brilliant geniuses eventually became the most powerful progenitors. They recruited powerful alliances and entered the expanse.

"After several bloodied battles, we finally managed to stop and imprison the second lord. We thought that we would have been able to refine it completely..." Emperor Xi paused for a bit.

Emperor Sui sighed after getting to this point.

"A traitor, Fire Ancestor." Li Qiye said.

"Yes, he fell to the third lord." Emperor Sui continued with melancholy: "The third one hid the entire time while continuing to recruit people."

Fire Ancestor betrayed them when they thought victory was certain. This was surprising because he was Emperor Sui's prized disciple and had numerous meritorious achievements against the darkness.

"That's why he earned the trust of the third one." Li Qiye nodded.

Fire Ancestor managed to get a strand of hair and a fingernail from the third existence, clearly a showing of trust.

"So the ambush allowed the imprisoned one to escape and we couldn't find them afterward." Emperor Sui said with disappointment. It didn't feel good to be betrayed by the disciple he trusted the most.

"The unicorn needs help in order to win. There's no chance for him going alone against you three after the death of the second one." Li Qiye also understood the unicorn's plan.

“Haha, the second one lost patience and was captured by you.” Emperor Xi said.

The grievously injured dark lord no longer showed up later as well, the same with the third one. The latter continued to work in the shadows in order to build up an army.

The second lord took advantage of the heavenly tribulation and suddenly escaped out of the expanse.

He needed to replenish his vitality and Three Immortals was the perfect target. Unfortunately, he ended up being captured and refined by Li Qiye.

“Later on, we stayed here in order to watch the rift, look for the third one, and heal our injuries. We also sent our dao avatars to look for the tree, that’s the only way to fix the gap.” Emperor Nong spoke while looking at the tree in his hand.

In the end, Li Qiye was one step ahead of them and found the tree. Emperor Nong had no choice but to make a deal.

As for the unicorn, he knew that the three immortals have been keeping an eye on the expanse still. Thus, he chose to order the other progenitors and experts to cause chaos, hoping to attract their attention.

The invasion on Three Immortals had the same goal. He wanted the three immortals to come back so that he could move on to the next step of his plan. Alas, they didn’t bite. Moreover, Li Qiye came out of nowhere and ruined it completely.

“All along, those from that world outside still want to come here. We don’t know how much longer we can last without this tree.” Emperor Sui stared at the tiny rift and said.

“It’s over now. Brother Li had dealt with all of this on his own, this is a peerless contribution to the worlds.” Emperor Nong smiled.

This was no exaggeration. Li Qiye killed two dark lords and swept away the darkness on top of finding the tree. His contribution was above theirs right now so they had nothing but respect for him.

Li Qiye didn’t say anything and focused his gaze on the rift.

“We should start and mend the rift with the tree. No more problems later on.” Emperor Xi suggested.

Previously, they were very curious about the unknown world but this was no longer the case. The existence of this rift meant a potential disaster for Three Immortals.

For them, nothing was more important than the survival of Three Immortals. Thus, they threw away their curiosity and desires before mending this rift. Everything would be the same again.

“Not going to take a look?” Li Qiye asked with a smile.

“No!” All three answered at the same time.

“I will though.” He smirked.

The three became serious because this wasn’t a joke. This pertained to the survival of all.

“You mean...?” Emperor Xi asked.

“Three Immortals have been exposed, they know about this fatty piece of meat now. It’ll do a good job at curing their hunger. You don’t think they salivate while thinking about it?” Li Qiye said.

The three knew that their world was a prime target now after the formation of this rift. These other beings wanted nothing more than to devour it.

“We’re sinners.” Emperor Sui sighed.

“Fixing this rift is a temporary solution, not permanent. I’m positive that it is inevitable. No one will be able to escape in the future.” Li Qiye’s eyes became profound.

“Elaborate, Brother.” Emperor Xi earnestly asked.

“Take them all down! Go all out with this opportunity. There won’t be another one.” Li Qiye said.

The three exchanged glances. They were the strongest cultivators of this world but after fighting the dark existences, they knew that this unknown world was unimaginably frightening.

“We’re not being unduly humble when saying that we won’t be able to do anything there. It’s not about staying alive for us since death isn’t enough to atone for our mistake. However, this rift must be fixed for the sake of Three Immortals.” Emperor Xi said seriously.

“I’m not telling you three to go. It’s my personal wish so I’ll go alone. It’ll be selfish to bury Three Immortals by forcing you three to go there.” Li Qiye smiled.

### [Chapter 3232: War](#)

Li Qiye’s suggestion could have earth-shattering consequences. The trio became austere.

“I don’t think winning will be easy.” Emperor Xi mused.

He put it as nicely as possible instead of saying that Li Qiye wouldn’t be able to put up a fight. Though they haven’t seen this world, they had a pretty good idea after the first three invaders.

They would definitely not be able to return after a trip there. Of course, they knew that he was quite strong, stronger than any of them. Alas, the consequences would still be grave.

“Not easy indeed.” Li Qiye chuckled: “Just going to kill a few, I don’t plan on winning completely. It’s impossible to do so by just fighting randomly. Plus, it’s a good training session.”

The trio smiled wryly after hearing this. He spoke as if they were just common battles. This was far from the case. They would be awfully destructive and perilous, worse than any other wars.

“You still have more potential than us.” Emperor Sui pondered for a bit before suggesting: “Why not cultivate some more? Perhaps you’ll be able to cross through the final gap and become a true immortal. That’ll guarantee your victory.”

The group had a high evaluation of Li Qiye. His potential was the highest they have seen. If becoming a true immortal was possible, he should be the first one to reach it.

“They don’t exist for sure. Here, Three Immortals can’t gestate or accommodate one. Just imagine the price.” Li Qiye shook his head.

The three furrowed their brows, contemplating.

They all believed that true immortals didn't exist. They weren't true immortals despite their titles. Others incorrectly chose to call them this.

Perhaps they were true immortals in the eyes of regular people, but they knew that there was a long way to go before reaching this level. Moreover, there was no established method for them to reference.

"That's why it is only a legend. I'm sure even in the case that it is possible, you guys won't want to see the trade-off anyway." Li Qiye chuckled.

The three started thinking about this issue.

"Your world is blessed with fortune, able to escape through many epochs. Will this continue on in the future?" He then asked.

"We know but we don't have the same courage like you to walk on this path." Emperor Nong sighed in response.

"I disagree, it's because you three have things tying you down." Li Qiye said: "We're humans first before we're cultivators, right? Otherwise, we're no different than them."

"You are correct." Emperor Xi nodded and said softly: "Opening this rift is not out of the question but please consider. I don't think you'll be able to return."

He put it as nicely as possible. Li Qiye's result should be a miserable death in that unknown world. He had no reinforcement on top of knowing nothing about it.

"Well, I'll kill until either I'm dead or there is nothing left. A death like that will still be worth it." Li Qiye let out a burst of heroic laughter, treating this matter with a carefree mindset.

The three respected his decisiveness since they couldn't do the same thing due to certain scruples.

"Looks like we'll have a lot to prepare." Emperor Xi said with a solemn expression.

"Yes, the calamity will come so do your best. The three thousand worlds will change, let's hope that the new world will be better." Li Qiye nodded.

Li Qiye had decided to fight and made ample preparations. He also readied his mindset because the consequences might be unfavorable, to say the least.

"You're right, let's get started then." They no longer hesitated, deciding to fully support Li Qiye with their resources.

As Li Qiye said, Three Immortals have been exposed. The top existences would never stop trying to come back here. Another rift would mean the end of Three Immortals and they wouldn't be able to stop it.

That's why Li Qiye's current goal was actually a great method. He might not be able to win the whole thing but given his abilities, he should be able to kill many of them.

The trio had plenty of resources after living for so many years. This was a great help for Li Qiye. Now his own treasuries filled with the materials from several redemption grounds have resulted in something incredible.

As Li Qiye and the trio were preparing for the attack, the rest of the world enjoyed peace.

The top masters in the expanse found this quite strange. There was no news of Li Qiye after visiting the three immortals so speculations arose.

“Another cultivation session, maybe? In order to become an immortal.” One progenitor said.

“Maybe he’s already an immortal and wants to take the next step, becoming a golden immortal.” Another master said.

Of course, golden immortals were only mentioned in the mortals’ stories and tales. No such level existed as far as they know.

“What is he actually doing? He’s already powerful beyond imagination.” Others simply didn’t know. They believed that he was already at the apex of cultivation. There was no getting stronger.

This particular thought was understandable. In the past, they thought that the dark existences were at the top but Li Qiye still easily killed them. How could there be something above him?

Most importantly, he was unbeatable in this world. Perhaps the three immortals together still couldn’t take him on. Therefore, he was at the ultimate limit of this world.

Of course, a few progenitors knew about Li Qiye’s higher pursuit, that he wouldn’t just stop here.

This peace was only a prelude before his next shocking move. A terrible storm brewed on the horizon.

Those in the deep crevices of redemption grounds started gazing at the azure. They seemed to notice a few things.

“It has been too long.” An ethereal voice sounded. It could only be heard and understood by the selected few.

“Perhaps someone is finally able to take the next step. This is an opportunity.” Another sighed.

“A chance to break the balance. Which side will the scale lean on?” One more from a redemption ground spoke.

They understood that the incoming battle carried great significance. All three thousand worlds would change regardless of the victor.

“It won’t be inferior to that past war.” Another person lamented.

### [Chapter 3233: Tearing The Sky](#)

The storm finally arrived after a brief interlude.

“Rumble!” Three Immortals and the expanse suddenly trembled as if it was the end of days.

A tsunami capable of reaching the sky nearly smashed the stars down at the expanse. A giant seemed to be rending heaven and earth, wishing to tear the world in two.

“What’s going on?” The inhabitants panicked in confusion.

The stars rustled, on the verge of falling down if this kept up.

“Rumble!” One wave after another kept on smashing the sky, intending on drowning the high heaven.

The cataclysmic phenomena frightened everyone. They have to get on their knees and pray once more.

The masters and progenitors in the expanse, on the other hand, remained calm.

“What are they doing?” They could tell that this was a man-made event, not natural disasters.

Only the three immortals and Li Qiye could affect the world to this level. This piqued their curiosity.

“Are they actually doing this? It’s too dangerous.” A progenitor who knew the inside story had a good guess.

This knowledgeable group became frightened because, in the case of failure, all of Three Immortals would go down too.

“It’s starting.” Those in the redemption grounds were actually excited instead of being afraid.

They knew that this day would come when Li Qiye asked for their amazing resources back then.

“Perhaps success is possible.” One existence murmured in these secretive places.

Another seemed to disagree. It had a serious expression as it gazed into the sky, capable of peering through any world. It reached the deepest location above but didn’t see anything.

“I wonder if that person is still around or not.” One overlord mused.

The invincible progenitors couldn’t hear this quiet voice. However, the other overlords countless dimensions away heard it clearly.

That person - even the strongest overlords put on a serious expression after hearing these words.

They were confident in Li Qiye’s expedition but once this person was mentioned, they felt great pressure.

“It has been a long time since his last appearance. I don’t think anyone knows.” One overlord quietly said. [1]

Only those who knew about him understood how frightening he was. However, he had disappeared a long time ago. Nonetheless, these overlords knew that he was still alive.

After all, they were still alive. How could he die before them? It’s just that no one knew what he was doing right now.

The powerful existences back in the nine worlds and thirteen continents also felt the powerful ripples.

"It's beginning." One terrible being in a deep dimension started fleeing to safer pasture. He knew that this might be the start of another disaster.

"I hope changes will come from this." A person with a profound gaze residing in a burial ground said.

They knew that a disaster would come from this battle along with a change in momentum regardless of the outcome.

"Crack! Crack!" Tearing sounds could be heard by all in Three Immortals and the expanse.

"Look, the sky is cracking!" One person shouted.

All looked up and sure enough, a crack appeared on the sky vault, looking just like a star.

Everyone felt as if there was an invisible barrier up there being forcefully torn apart.

"Crack!" The tearing continued. The sky would be split in two if this continued.

"That's..." The top masters in the expanse took a deep breath. That was a world barrier being torn apart - something they definitely couldn't do.

"They want to enter a different world?" They realized what the four were up to right away.

"Can they do it?" The widening crack left them in fear, afraid for the worst.

Meanwhile, regular people back in Three Immortals thought that the sky was breaking down. Despite a lack of information, they instinctively trembled. Their survival instinct told them that this was definitely bad.

"Crack!!!" The sound intensified and could be heard everywhere.

The greatest existences watched with bated breath, especially those in the redemption ground.

"Boom!" Darkness suddenly oozed into the crack with the force of a primal flood, engulfing the world.

This was a monstrous existence from the other side wanting to invade Three Immortals.

The dark affinity naturally scared everyone out of their wits. They felt darkness entering them in the blink of an eye.

"Shit!" The top masters immediately fled with haste, afraid of a repeat of the past.

"Boom!" However, this invasion was interrupted by an immortal light - a supreme technique capable of affecting everything.

All felt feeble and insignificant in comparison. The power instantly repelled the mighty darkness, pushing it back to its own world while not damaging Three Immortals in the slightest.

The crack in the sky was illuminated by this immortal light. Inside this bright expanse was a wondrous figure - Li Qiye.

"Rumble!" He flew towards the crack, wanting to reach the world on the other side.

"So fierce." The top masters were amazed at Li Qiye's invincibility.

## [Chapter 3234: World of Death](#)

A single punch repelled the darkness in a domineering fashion. The inhabitants of Three Immortals were left speechless on their knees.

They saw the majestic figure in the immortal light earlier - unique and peerless in history. Progenitors and immortals weren't worth bringing up in his presence. He was the only true immortal.

"Prime! It's Prime!" An ancient existence in Three Immortals shouted emotionally.

"He's saving us again!" Tears flowed down everyone's cheeks as they kowtowed.

"Prime Progenitor!" Li Qiye's title echoed across the world, becoming an eternal legend.

Many masters in the expanse also bowed deeply to show their respect.

"Boom!" Li Qiye stepped into the other world without any hesitation or fear.

Each step was decisive and convincing. He didn't look back a single time as if there was nothing here that could hold him back - a testament to his dao heart and desire.

He wanted to enter this world with the greatest momentum, taking the problem down at its source.

"Seal!" The three immortals roared right after he got in there and worked together to use a mighty force to push the world barrier, closing the rift.

"Rumble!" The rift gradually became smaller. This process appeased the spectators, saving them from further anxiety.

They knew that the closing of this rift would mean that their world was safe again.

Of course, ordinary people had no idea how much power and resources were spent by the three immortals to close it.

After the rift disappeared, the three immortals returned the tree back to the stars.

"Buzz." The stars became lively again and rotated with incredible speed. This rotation spread life to the rest of the world.

As this affinity seeped into the fabrics of reality, a tiny change occurred. It was unnoticed by regular people, only the powerful masters could sense it.

"This is..." A powerful progenitor became startled.

"The world is awakening?" Another master speculated.

Meanwhile, those in the redemption ground didn't care for this change. Their eyes were fixated above the sky, waiting for the worst.

"Who will die in this generation?" One overlord murmured.

The three immortals shared the same feeling. They watched with a dignified expression since this was only the beginning. They needed to prepare for any development.

The ones back in the nine worlds and thirteen continents didn't have the privilege of watching this in person. However, they sensed the ripples of power.

"I hope for the best result." A terrible creature in a dark dimension said.

"Yes, both sides dying in battle is the best outcome." Many dark eyes opened, but not all the way out of fear.

Another existence had an even better wish: "Maybe more than just that. Let him sweep through and even fight that villainous heaven. Nothing is better than both of them dying."

Li Qiye was definitely a threat to them but what looms above was even worse. It had forced them to hide for millions and millions of years. That's why they wanted to see all of their enemies dead.

\*\*\*

Li Qiye entered another world in a dominating fashion. This was a place no outsider has been to before.

He stood there, seemingly the unbeatable master of the universe. He scanned the area and understood everything after a flash in his eyes, capable of deducing the possibilities.

This was a silent world. No other affinity existed outside of death. Time, space, grand dao, and all else - dead.

Their death didn't come from time and withering. They were simply sucked dry; all of their essences taken to the last bit. Only a shell of a world remained = akin to a lifeless boulder.

An ashen hue permeated the land. No light could be seen since they have been drained already; the sun, moon, and stars had nothing left. Many stars have actually fallen down to the ground.

This world was massive. In fact, the three thousand words that Li Qiye knew might not be as big as this one.

Even the strongest character and their power wouldn't make a difference when coming here, similarly to a drop of water touching a desert.

However, his presence was instantly noted by many eyes opening wide. Alas, they didn't bring life to this world, only more darkness.

No, that's incorrect. Darkness was actually a type of power, an affinity of sorts. The darkness here wasn't the same. This was a black hue of death.

Existences awakened and brought with them terrible abysses capable of swallowing everything. Even a little stone would be robbed of everything after falling in, leaving only behind the useless dregs.

After arriving here, people would find out that the darkness wasn't the scariest thing. The unknown murkiness was far worse.

At the very least, darkness was still a form of life. Here, only death and devourment.

In other words, they would understand the source of darkness. Once this murky aura became filled and satiated, it would turn into darkness.

The top masters and progenitors would feel powerless while standing here. Their legs would start trembling.

Fighting wasn't necessary because they knew of their grim outcome. On the contrary, Li Qiye withstood the black devourment as if he was above them.

"Boom!" During his arrival, a loud blast could be heard as a monstrous creature was pushed back.

This was the thing wanting to invade Three Immortals but failed due to Li Qiye's interference.

"Ages flew by, finally a guest." The existence's voice echoed.

He used an ancient language transmitted by his divine intent. Those who didn't know this language still understood him.

### [Chapter 3235: Secret](#)

Li Qiye saw a monster standing there just like an uncrossable evil mountain.

It was an unknown creature, shrouded by a massive cloak. It looked a little tattered, seemingly belonging to a beggar. Obviously, this was a supreme artifact.

Its weapon of choice was a long sickle, causing it to look like the harvester of life. Just one swing would devour billions of lives. Progenitors wouldn't be able to escape.

It stared straight at Li Qiye; its gaze was the only brightness in this forsaken world, capable of stealing people's souls.

Nonetheless, Li Qiye calmly met its gaze, undeterred.

"No, I am no guest, just an executioner who will sever your dog head. Remember, I am Li Qiye, Fiercest, your end. Hear my name and cower in fear."

"Boom!" A massive palm blotted out the sky above them as another monstrous existence awakened.

Its palm was large enough to hide whatever was behind it. One couldn't see its true appearance.

"Fear? What's that?" It spoke the same ancient language: "Oh? Not bad at all. Can't remember the last time I've tasted such a feast." It salivated while staring at Li Qiye.

"Indeed. Eras of refinement, a supreme true fate, a virtually peerless dao heart, made contact with the nine heavenly scriptures and treasures too? We can be full thanks to this fatty meal." The sickle wielder agreed.

One didn't need to see its expression to know how much it wanted to devour Li Qiye right now.

"Count me in." A third creature appeared, looking like a specter.

It manifested in space and became part of it. Its form and size remained unknown. It simply had three bizarre white eyes. Their movements seemed to be twisting the fabrics of reality.

They didn't exude a terrible presence nor an invincible aura. Alas, time came to a still.

One shouldn't doubt the fact that they could devour Three Immortals, the nine worlds, and the thirteen continents in one gulp.

If they were to go there, they would turn everything into food, including the mighty Immortal Emperors and progenitors.

Just their diabolical form alone was enough to instill fear, no need for any aura.

"You all look like feasts to me too. I'm sure that it'll be very nutritious devouring you three but unfortunately, that's not my intention." Li Qiye smiled.

"Then what is your intention?" The sickle wielder spoke. Its voice had no emotions, seemingly always the same across the years.

Perhaps time itself wasn't a limiting factor for them. This affinity might as well not exist.

"I will kill all of you. Don't you want to go down there? I'll deliver you down there and fulfill your wish." Li Qiye smirked.

"True, there's a chance of coming down in that case." The three-eyed abomination said.

"How interesting, I'm afraid your world can't handle our death though." The being with the gigantic palm had strange-sounding laughter.

"There's a trade-off, for sure." Li Qiye smiled: "Your stinky corpses will spoil the land at first but they'll become great fertilizer, healthier soil and trees will come in time."

"That's your goal in coming here?" The sickle wielder glared intensely, wanting to see Li Qiye's dao heart.

"No, that's just an additional prize." Li Qiye smiled: "I'm here to kill you all, that's all."

"You think you can kill us alone? It's true that you're powerfu-" The monstrous palm laughed and said.

"No, he's extremely strong, he has a primordial will!" A faint voice came from deeper in this world.

The three nearby instantly focused their gaze, resulting in three blinding rays intending on drilling through Li Qiye.

The experts below had no chance of withstanding their intensity.

"We were careless, that is indeed a primordial will." The three-eyed abomination confirmed.

"You're that person?" Li Qiye asked after also focusing his gaze towards the direction of the faint voice.

That person. The atmosphere became frozen. The three terrible monsters became serious as if Li Qiye had just uttered some taboo words.

Silence took over for a moment.

"No, I am not." Eventually, the faint voice answered and broke the tension.

"What a shame, I want to kill him too." Li Qiye revealed a nonchalant smile. This attitude of his would still be there even if he was facing the most terrible creature in existence.

“What an audacious remark, wanting to kill him.” The massive palm spoke while trying to analyze Li Qiye further, wanting to see what he was going to kill that person with.

“You. Not enough, still not enough.” The faint voice said: “I’m afraid you can’t even get past us.”

“Is that so? We’ll see about that. You’re coming out to fight me?” Li Qiye smiled.

“No rush, let the three of them test your strength first. Oh, and we don’t do one-on-one either. A feast like you has to be shared. It’s too bad that we each will get less.” The voice nonchalantly said.

The creepiness of this response would make anyone imagine that they were laying on a platter, waiting to be cut and eaten.

These existences, from beginning to end, viewed Li Qiye as food, nothing more.

“I’ll get started then, my fertilizer. I’m sure even the villainous heaven shares this sentiment.” Li Qiye chuckled.

“Hmph! The bastard!” The voice scowled.

The other three gradually surrounded the area around Li Qiye, ready to kill him.

“Show us your power.” The sickle wielder uttered.

“Boom!” Death energy emerged as a coffin materialized above Li Qiye, the same with the Death Scripture.

“Both the scripture and treasure?” The other two existences’ eyes narrowed at this sight.

“That’s right, enough to kill you all.” Li Qiye confidently said.

“Kill us? Perhaps you don’t know that your world didn’t even exist back when we possessed them.” The three-eyed abomination revealed.

“I’m aware. It’s a shame that the primordial backlash rendered them useless in your possession anyway unless you have a death wish.” Li Qiye smiled.

“You know quite a bit.” The sickle wielder became surprised.

Those who knew this secret should no longer be around. Alas, there was one standing in front of them right now.

“Clank! Clank! Clank!” Twelve dao laws above him formed a defensive barrier.

Above them were three maelstroms. These fifteen affinities combined together into an everlasting entity.

### [Chapter 3236: Sky Shattered](#)

The primordial will draped down to protect Li Qiye. He became an indelible mark in history - the embodiment of the beginning.

“We once had the primordial will as well... what a shame...” The faint voice said from somewhere in this world.

The three terrifying existences looked fixedly at Li Qiye and the primordial will. They couldn't help licking their lips. This will might be more tempting than his flesh.

"The primordial will shall return today." The gigantic palm said before audibly salivating.

"The three of you can't do it." Li Qiye slowly unsheathed his weapon - an ash-colored long saber.

It seemed to be made from the toughest material in history. Its appearance wasn't quite impressive but the three existence's eyes narrowed as they became serious.

"Such a familiar aura." The three-eyed abomination sniffed.

"Of course, I'm sure you can't forget the aura of the villainous heaven." Li Qiye looked capable of killing immortals with the saber in his hand.

He spent unspeakable efforts in order to create this weapon. The main material was the meteor taken from the Jilin Clan, forged with all types of flames and the power of the heavenly tribulations.

"No wonder why it's so familiar." The gigantic palm stared at the saber and said.

The thing they feared most in this world - the villainous heaven! This saber had a similar aura, no wonder why they found it so familiar.

"Its name is?" The sickler wielder asked.

"Heavenseize. I was going to name it Doghead Blade because I'll be decapitating you all with it, but it'll be too much of a waste. After all, the saber wasn't solely created to deal with your bunch." Li Qiye said.

"Heavenseize." The trio repeated, not caring about the taunt after.

Li Qiye picked this name because as long as the high heaven was around, he would rob the power of its tribulations.

"It's been a long time since I've tasted flesh." The trio stopped worrying about the blade and became impatient.

In their eyes, he was already a meal waiting to be consumed. They just needed to kill him first.

"His blood and flesh are ours." The sickle wielder asserted, leaving no room for negotiation.

He wasn't talking to Li Qiye but to another of his peers far away.

His eyes stared towards a particular direction, waiting for a deal.

"If you three can kill him, I'm sure no one else will try to compete for his flesh and blood." The faint voice answered again.

The three became excited after hearing the guarantee. They turned their sight towards Li Qiye again.

This meant that no one else would try to compete against them for his body - exactly what they wanted.

"We're feasting today, I can't believe how long it's been. Our stomach will be filled today." The gigantic palm gulped greedily.

“Right.” Gleams appeared in the other two’s eyes, looking like two hungry wolves.

“Come, I’ll kill you three first then the rest.” Li Qiye laughed.

“Boom!” An immortal light oozed out of his body and formed a golden frame.

He looked like a golden immortal in the mortal myths with an invincible aura. The existences here furrowed their brows at this sight.

“Clank! Clank! Clank!” The three summoned their weapon.

The sickle wielder’s weapon was obvious - a sickle. It had a white glow capable of cutting through time and the head of its enemies.

A strange weapon appeared next to the three-eyed abomination. It resembled a boomerang circling around him, made from numerous flashing fragments assembled together.

Upon closer inspection, these fragments turned out to be stars. This weapon was refined from numerous worlds and their stars but most importantly, all the living beings as well.

The creature with the gigantic palm’s weapon of choice was unsurprisingly a gauntlet made from unknown metals.

It could withstand the strongest force in the world. There were five precious gems engraved on it; each contained a different power - yin yang, time, space... Just one gem alone contained enough power to kill billions in the blink of an eye.

“Die!” Li Qiye was the first to attack as his primordial will exuded a radiance that fuses with his own.

A horizontal slash aimed straight for the sickle wielder - a move as simple as can be. However, it contained the most profound variations and saber dao in existence. Even a saber god wouldn’t be able to understand it after trying for a lifetime. It could easily split open three thousand worlds in the blink of an eye.

The sickle wielder retaliated with a vertical swing. It wasn’t aiming at Li Qiye but rather everything in front of him.

Just one flash coming off the blade could kill a progenitor. This cut separated Li Qiye from their dimension.

Though they seemed to be inches apart, they were actually in two different worlds. The cut successfully separated all karmic ties connecting them, resulting in an unsurpassable gap.

Not to mention an ordinary expert, progenitors and True Emperors wouldn’t be able to traverse this newly-created zone.

However, Li Qiye’s saber didn’t give a damn. One could be born thirty million years in the past or thirty million years in the future, this slash would still decapitate them and heads will start rolling on the ground.

The zone was instantly destroyed. Speed and distance weren’t limitations for his Heavenseize as it cut the sickle wielder, causing him to bellow in pain.

At the same moment, the three-eyed abomination's boomerang struck Li Qiye. Dodging or using defensive techniques were meaningless before this blow.

"Boom!" This force could destroy all of Three Immortals but was stopped by the primordial will. His golden body caved in but wasn't penetrated.

The gigantic palm also made a move. The five gems became resplendent, unleashing the power of five different affinities.

### [Chapter 3237: World Broken](#)

"Boom!" Karma and the samsara were reduced to ashes.

However, the punch was stopped by an incredible shield appearing in front of Li Qiye. Not even an immortal could break through.

"Eternal Bulwark! He's the deserter back then! Kill him!" The existence coldly uttered. [1]

"Boom!" He punched again after speaking.

This bulwark wasn't created by Li Qiye. A supreme overlord from one of the six redemption grounds gave it to him.

"You're the one who's going down!" Li Qiye laughed and activated his World Seal.

A second Li Qiye came out, exactly identical to the first. This Li Qiye stepped out and looked unbeatable as well.

He held the Death Coffin and activated the grand dao, smashing it on the existence's massive palm.

The explosions forced the huge being to stagger backward!

"Perish!" The three-eyed abomination came again along with one struck by the saber earlier.

"Rumble!" The colossal world started cracking by the destructive shockwaves emanating from this fight.

Meanwhile, many pairs of eyes were watching with greed. The outcome didn't matter too much to them; they would feast on the losers all the same.

The impacts were strong enough that the other worlds felt it as well, from the nine worlds to the thirteen continents...

"Rumble!" Inside the nine worlds, people couldn't help but look up because it sounded like the sky was being torn apart. However, there was no visible damage.

The fear resembled that of a child sleeping at night during a thunderstorm while two giants were fighting outside the window.

"A natural disaster?" The inhabitants of the three thousand worlds were lost, suppressed by an unknown force. They didn't have the courage to look up in the sky.

"Everything's changing, we need to run now!" On the other hand, the top masters have predicted this and entered a cautious state.

In the nine worlds, dao runes wove all around the land in a complex manner. These were the momentums and auras created by the wise sages across the generations.

“The sky is breaking.” A person in a burial ground was capable of seeing deep into the azure: “Begin, this is the first development, it might be an opportunity.”

“It might be our era...” Back in the thirteen continent, eyes hiding in the darkness gazed upward and murmured.

“That person hasn’t shown up but the old man is there...” In Three Immortals, an observer could see the actual fight and quietly said.

The sky in the various worlds could be pierced at any moment by a power beyond anyone’s imagination. Emperors and progenitors were nothing in comparison, fearing for their own lives.

The inhabitants had no choice but to start praying for a savior or whichever gods and deities they believed in.

“Boom!” A loud blast resulted in cracking noises.

The landmasses of the nine worlds started shifting and everyone could sense this terrifying movement.

“What’s going on?!” They naturally bellowed in fear.

“The world barrier is broken so the nine worlds are moving!” A top master turned pale from this realization.

“This is the end?” The displacement of the nine worlds and the broken barrier terrified everyone.

“It’s a good thing that this fight isn’t happening here.” A supreme overlord shuddered. The nine worlds would have been destroyed after several moves in that case.

People looked up and saw a terrible tribulation ocean gathering above. Lightning bolts danced around like true dragons. Each bolt could pierce through the earth.

“Damn it all, even the villainous heaven wants to join in?” Those in the burial grounds or in the hidden dimensions became startled. No one knew what the heaven wanted to do with these tribulations.

The ones in hiding were the most terrified. The result of this tribulation descending would be unthinkable.

Some had no clue what was going on up above. However, the ocean consisted of thousands of tribulations by this point - more than enough to end their world.

The overlords watched with a solemn expression. The tribulations were the same as an executioner’s sword looming above their head.

The strongest overlords didn’t dare to make a rash move right now. They had no idea what the villainous heaven was intending to do. They have been hiding for so long now; just one wrong move and all of the time would be wasted.

“Boom!” Another loud blast came from above the firmament. Everyone felt as if the sky had been penetrated.

“Rumble!” Night descended on the nine worlds.

“What is that?!” People saw a massive thing falling down from the nine firmaments - something resembling a massive creature.

Darkness also poured down like a flood around it. It could be the creature’s blood.

“Boom! Boom! Boom!” Lightning bolts from the tribulations immediately headed for the creature, resulting in a relentless onslaught.

Explosions detonated and pieces of flesh fell off. All these tiny pieces were reduced to dust by the numerous bolts.

However, the creature was just too large. Some pieces still escaped the net and slammed into the ground.

“Boom!” An entire plain got hit by one and became nothingness. Forests and mountain ranges disappeared in a split second.

Worst of all, dark lava started melting the ground, turning the area into nothing but death.

#### [Chapter 3238: Calamity](#)

The fish that managed to escape the net slammed on the ground. The aura oozing from it made the trees nearby grow at an insane rate. The rocks started glowing as well.

Evil trees and fiendish rocks howled and took over. The area became a gathering of hellish creatures.

“The calamity is here.” This became the consensus of the frightened inhabitants.

“Go!” Many emperors and top masters in the nine worlds and thirteen continents appeared. They worked together to take away the regular people, saving them from being devoured by the calamity.

“Boom!” All three thousand worlds shook from the destructive impact.

This was only the beginning. Another hole broke again above and another massive figure dropped down.

“Rumble!” The second creature aimed for the nine worlds but the heavenly tribulations above immediately sent bolts against it.

However, the bolts have been expended to deal with the first one. The second barrage was far from being as strong.

They pierced through this monster but couldn’t make it explode entirely.

The creature finally slammed into the nine worlds, breaking that section of the world barrier.

The lands started pressing against each other; the oceans churned with tsunamis. The apocalypse was coming.

“Buzz...” The dao runes existing in the nine worlds became resplendent. Numerous figures appeared and began protecting their assigned sections.

“Move it!” They began transporting regular people into a safe haven as well.

The breaking of the nine worlds wasn't actually that bad. It just meant a free drift of the continents. However, the problem was the second monster that had landed.

“Boom!” In reality, this creature was already dead. However, a murky aura oozed out of it and devoured everything nearby - all the affinities. The nine worlds would be consumed by this murky miasma at this rate.

“Activate!” One majestic figure had an impressive aura of an Immortal Emperor. He also had a dao fruit with the ability to teleport everything away.

Its target was the devouring miasma, sending it to the sky once more.

“Immortal Emperor Zhan!” The experts in the know shouted his title - the newest emperor brilliant enough to compare to any of his seniors.

“What's going on above the firmaments?” The masters started wondering.

“Boom!” Their thoughts were interrupted by another explosion. A third creature fell down from above.

“Fuck! Our worlds are finished if this goes on!” One spectator shouted in horror.

The first two monsters have crushed the nine worlds. If more gigantic creatures fell down, not a living being would be able to survive.

“Rumble!” The stars around the falling trajectory of the creature exploded.

No one would be able to stop it; they could only watch the destruction of their worlds.

“It's over.” Despair came next.

“Boom!” Suddenly, a hand reached out of a bottomless abyss in the nine worlds, moving straight for the falling creature.

This was one of the burial grounds - Heavenfall.

“Boom!” The impact should have been too much for anyone to handle yet the hand was able to shoulder this creature.

Dark miasma oozed out of the creature but the abyss retaliated with a divine beam.

“Break!” An ancient voice from the abyss bellowed. More beams shot out to stop the corrosive darkness.

“Boom!” The spectators watched in awe before this ultimate contest.

A third party suddenly joined in - the heavenly tribulations from the ocean went down with full force.

The lightning bolts' target was actually Heavenfall Abyss, completely engulfing the place.

“Ahhh!” The overlord of this burial ground was annihilated by the lightning tribulations.

“Curse you! Villainous heaven!” A miserable cry echoed for the world to hear.

Finally, the abyss exploded from this incredible force. The walls collapsed and nothing was left beneath. A burial ground was destroyed just like that.

“That wretch!” The other overlords gazed at the tribulations, realizing that the villainous heaven wanted to destroy these monstrous abominations along with them. They became more cautious as a result.

This was the case in the thirteen continents as well. The tribulations instilled dread into everyone, especially those hiding in deep dimensions.

“Those corpses are peerless, just one is enough to change the situation.” An overlord in a burial ground murmured.

These monstrous abominations were destructive to the land but for those strong enough to refine them? The result would be incredible.

“Boom!” One more monster fell down from above, the fourth one.

“Rumble!” The broken nine worlds couldn’t withstand another impact.

No overlords tried to stop it from hitting the ground this time. They coveted the corpse but the tribulations were still waiting up there. Heavenfall Abyss was the perfect example; the place stood no chance.

“Buzz.” After a bright flash, a mighty tree stopped the corpse with its branches.

“The primordial tree!” Someone shouted.

“Rumble!” The tribulations erupted again and sent down terrifying lightning bolts.

“It’s coming down again!” No one dared to think about grabbing that corpse from the tree.

However, the tree exuded its primordial light and shouldered the myriad worlds. Loud detonations ensued as it withstood the lightning barrage.

“So powerful.” The overlords became startled.

“Boom!” While the tribulations were attacking the tree, another shadow emerged above the sky - one more monster was falling down.

#### [Chapter 3239: Ancient Ming’s Appearance](#)

“Bang!” The fifth corpse carried an enormous level of dark energy, ready to engulf the nine worlds.

As it drew closer, the continents and the bottom of the oceans started deforming with cracks.

Meanwhile, the tribulation was preoccupied with the primordial tree, unable to destroy the fifth corpse.

The miasma of the corpse began defiling the ground even before it touched the ground.

“Splash!” A blue tide gushed out of nowhere and swept away the fifth corpse.

“Dead Immortal Lake!” An overlord looked over yonder. Sure enough, this tide came from one of the twelve burial grounds - Death Immortal Lake.

“Boom!” The tide dragged the massive corpse back into the lake.

The water turned dark right away with chaotic currents. However, bright radiance and a mighty force stabilized the area, stopping the invading darkness.

The ocean of tribulations above sent down a barrage of lightning bolts. They looked like lighting serpents attacking the lake.

By this point, the lake had activated a great formation capable of concealing everything. The lightning bolts managed to pierce through it only to find that the lake was nowhere in sight.

The tribulations being preoccupied by the primordial tree gave this burial ground a chance to steal one of the corpses.

“They actually did it.” The other overlords became shaken and jealous.

These heavenly corpses were priceless, to say the least. Of course, they were nefarious and unlucky but obtaining them meant having an ace card for the future.

“Boom!” Down came the sixth corpse from above.

“One more?!” The inhabitants and cultivators in the nine worlds couldn’t believe it. They desperately prayed for the calamity to end.

All eyes were on this next corpse. The overlords were tempted to make a move but they were still wary of the tribulations.

“Buzz.” A dao portal emerged, looking like the gate of hell due to its deathly aura.

A colossal figure walked out of the portal. His imperial aura could crush the firmaments.

“Clank! Clank! Clank!” The nine heavens and ten earths were forced to become his armor plates.

“Who is that?!” Everyone could tell that he was an Immortal Emperor. However, his aura was strange due to the abundance of death energy within.

Ordinary cultivators couldn’t recognize this extraordinary emperor.

“The Ancient Ming!” However, the overlords in the burial ground became serious. Their eyes could pierce through the dao portal to see the other side.

This was unnecessary because the portal itself opened up more. A supreme kingdom emerged with a strange piece of floating block there. This block seemed capable of turning into anything in the universe.

“The Corporeal Zone!” One overlord recognized this artifact.

“They want the corpse.” The goal of this newcomer became obvious.

“Tian Tu, don’t even think about it!” A man flew out of Heavenly Corpse Burial Ground. His divinity swept through the realms, looking quite invincible.

He stood tall and straight with sharp features. His armors were pulsing with boundless light containing the celestials and other ancient images.

He was an Earth Immortal who had a conversation with Li Qiye in the past. Now, the wound in front of his chest was nowhere to be seen.

He was far stronger now because Li Qiye had put in a good word for him with the old ghost, completely changing his fortune.

“Long time no see, Lin Shaoxuan.” The emperor in the sky took a look and furrowed his brows.

He raised his hand and unleashed enough death energy to kill all living beings.

“Die!” Shaoxuan roared and thrust his spear forward, releasing a draconic energy that can burn the sky and kill the gods.

“Rumble!” The fight between these two made the world tremble.

“No time to play with you!” The emperor turned around and the kingdom behind him shot out a death ray heading straight for the enemy.

“Boom!” Shaoxuan used his spear to block the ray but since it contained the power of the Ancient Ming, he was continuously pushed back.

“Begin!” The emperor commanded. Numerous figures came out of the portal; many among them were Immortal Emperors.

The overlords in the burial grounds became interested. It looked like this race wasn’t fully exterminated. They finally showed up to obtain this heavenly corpse.

“Start.” An old man appeared on top of the Corporeal Zone with a conspicuous pair of hands that were stained with blood.

“Buzz.” Bloodhand Butcher activated the artifact. It sent out a light connecting their team.

“Boom! Boom! Boom!” A third party joined the fray - Worldguard True God! He fired the Netherlord Hexagear Launcher straight at Immortal Emperor Tian Tu.

“Stop it!” The emperor was blown away from the formation. However, the rest of his team worked together to use their artifact.

A corner of the zone melted and rushed over like a tornado. It turned into a shield to stop the incoming shots from the launcher.

“Boom!” Next, the entire zone melted and encompassed the kingdom along with the masters of the Ancient Ming.

An armored giant materialized instead. Its head touched the high heaven; just one swing was enough to sweep away the stars.

It immediately caught the falling corpse.

“Up!” Bloodhand Butcher commanded. All the Ming members gathered their vitality together, allowing the Immortal Emperors to use the zone.

This armored giant was divine and extremely powerful - the manifestation of the Sky Destroyer Immortal Physique.

The Immortal Emperors wouldn't have been able to catch the corpse due to its weight and invasive miasma. However, the Corporeal Zone in this form had no issue doing so.

After the successful catch, it turned in order to leave.

“Don't even think about it.” A man appeared above heavenly Corpse Burial Ground, looking like the master of the cosmo.

Even someone as powerful as Lin Shaoxuan paled before him. They weren't on the same level at all.

Old Ghost, here in person! He took one step forward and swung his hatchet, opening the heaven and earth in the process.

“Boom!” The armored giant retaliated with a punch consisting of three affinities - power, speed, and weight.

#### [Chapter 3240: Seeing The Dark Crow Again](#)

“Boom!” One swing of that hatchet was enough to change the ebb and flow of an epoch. It represented the supreme of an epoch.

“Bam! Bam! Bam!” The armored giant staggered backward, destroying the landscape beneath.

One could see a scar on the giant's fist now. Remember, the Corporeal Zone was one of the nine Heavenly Treasures. However, the hatchet still managed to leave a mark - a testament to its prowess.

“Buzz.” The armored giant exuded a golden light that eventually condensed into a top layer. The thing seemed to be cast from gold - a sign of indestructibility.

Indestructible Diamond Physique! Another form of the Corporeal Zone.

“Senior, why must you interfere?” Immortal Emperor Tian Tu's voice came from the giant.

Old Ghost's involvement caught them completely off guard. His appearance was a big deal since he was someone who had fought the heaven before, an epoch lord. They weren't on the same level in the slightest.

Their race had several emperors but this was far from enough. The only thing that allowed them to resist the old man was their peerless heavenly treasure.

“I'm afraid I've made a deal with someone else. I'll kill all of you and take the Corporeal Zone.” The old man smiled.

“Kill him!” Bloodhand Butcher commanded, aware that a peaceful negotiation wasn't possible.

The emperors and experts of the Ming poured all of their might into their heavenly treasure.

“Rumble!” Indestructible Diamond, Furious Immortal, Sacred Spring Physique...

The appearance of these physiques resulted in violent quakes across the nine worlds. The Corporeal Zone was unreasonably heavy already. The activation of certain physiques made it even heavier. This increase didn't stop at all; the nine worlds wouldn't last at this rate.

“Oh man...” The spectators were in awe at the sheer size of this giant.

“Break!” Old Ghost attacked, not wanting to see the Corporeal Zone fully activated or it would be hard for him to suppress it.

“Clank!” His hatchet's gleam became as bright as snow. Its bright was intense enough to pass through the world barriers and reach the other worlds.

“Take it down!” Lin Shaoxuan and Worldguard True God also utilized all of their arsenals against this artifact.

They knew that if the Ancient Ming were to get this corpse and refine it, they would be able to rise again. The nine worlds would fall into darkness once more.

“Boom!” The monstrous power nearly destroyed the surrounding area. The nine worlds weren't faring well against the shockwaves. Fortunately, the countless dao runes that have appeared earlier were tying the worlds together. Otherwise, nothing but ashes would have been left.

Old Ghost looked unstoppable with his hatchet as he attacked the giant. Even the other overlords were amazed by his power. His heroism didn't wither with age at all, still as domineering as the past.

“All in!” The Ming members roared, pouring all of their vitality into the giant without holding back.

The longer they lingered around, the worse the situation would be for them. As long as they could escape with this corpse, they would be able to return one day and feast on the inhabitants of the nine worlds and the thirteen continents.

“Rumble!” The armored giant's strength crazily surged. Eventually, all twelve Immortal Physiques became one.

This was far more terrifying than an Immortal Emperor possessing all twelve at grand completion, hundreds of times stronger.

“What a shame, this isn't the previous epoch any longer. Your Corporeal Zone hasn't opened the new page!” Old Ghost watched the armored giant becoming stronger than a dozen emperors before commenting.

“Clank!” He raised his resplendent hatchet again.

By this point, everyone knew that he could kill these emperors with one swing if they weren't hiding in the giant.

“Boom! Boom! Boom!” Unfortunately for him, the ocean up above started gathering lightning bolts. It only took a second before a waterfall of bolts went straight at the old man.

A while ago, it was fully focusing on the primordial tree but couldn't take it down. It decided to split its firepower into two sections now.

"Screw your sister, Villainous Heaven! Activate the defense!" Old Ghost cursed loudly and commanded.

"Boom!" His burial ground became dazzling and built a massive wall above him.

"Rumble!" The lightning bolts struck the wall, resulting in violent vibrations.

Meanwhile, the primordial tree seemingly turned into a maelstrom to drag in the lightning bolts. This meant that it was attracting the majority of the tribulation's firepower.

Nonetheless, the barrage hitting Old Ghost was still strong enough to make him stagger.

Most importantly, more tribulations were forming in that ocean, bright enough to deter all gazes.

"That's an incoming heavenly execution." The overlords of the burial ground grimaced at this sight.

"Take him down now!" The Ming forces saw the opportunity and mustered all of their strength.

The armored giant unleashed a world-destroying blow straight at Old Ghost. This could be a chance to kill him while he was suppressed by the tribulation.

Loud explosions ensued as the old man fiercely swung his hatchet and released a tornado at the giant.

He knew that time was of the essence since a heavenly execution was coming down for his head.

Unfortunately, the tribulations lowered his offensive potential so the giant had the upper hand.

"Boom!" The stars exploded from another blow as Old Ghost got repelled.

"Damn crow! Do your thing now or I'm finished!" Old Ghost was feeling it from being attacked on multiple fronts and yelled.

"Buzz." Each inch of the land in the nine worlds started resonating with an insane force. Laws assembled and rushed to the sky like a tsunami.

The lineages of many emperors joined in harmony. Imperial auras ravaged the area as majestic figures appeared.

"Emperor Min Ren, Empress Hong Tian, Emperor Tun Ri...." Old ancestors around the world shouted.

This was towards the end of an epoch and people have nearly forgotten about these invincible emperors. Now, their dao avatars have shown up again.

The laws eventually formed a spear capable of taking on any foe and killing immortals!

"Nine Worlds' Evil Subduer!" An ancestor who had seen this weapon before bellowed. It killed everything in its path back then.

A colossal pair of wings appeared after the spear. It blotted out the nine worlds and let a terrible shadow.

"Dark Crow!" The overlords in the burial grounds shuddered after seeing the wings again.

“!!!” The members of the Ancient Ming turned pale, including great characters like Immortal Emperor Tian Tu.

This existence massacred their race back then, forcing them out of the nine worlds.
