

## Forgive My Ex-husband Chapter 203

Nelson was accompanied by Melinda. William arrived at the police station in a hurry. It was a matter of finding Jonas, so those policemen were especially serious, asking the exact time when everyone met Jonas for the last time.

Based on the information of these people, the police had generally confirmed the time when Jonas had disappeared. Then it was recorded in detail.

William was the last one to see Jonas. The police interrogated him carefully.

"Ah! It must be him!" William suddenly shouted in righteous indignation, his eyes filled with anger. He had to go through the CEO's schedule except his private one.

Jonas only contacted one person at that time, Jerry Xi!

Thinking of his identity, William felt even more suspicious of this possibility. He couldn't help but feel worried that the boss might have been killed.

All of them looked at William. He had a long face, and they all realized that this matter wasn't that simple.

"William, please tell us who that person is. Maybe it's also a clue." The police was the quickest to respond, but both Nelson and Melinda were attracted by the man William said.

William looked at Nelson in a dilemma. At last, thinking of the safety of Jonas, he made up his mind and said, "His name is Jerry Xi. He is very similar to our CEO. A few days ago, our CEO asked me to gather information about him, and when I found out that he is CEO's half-brother, he went out to meet him."

His words astonished Nelson. Melinda felt enlightened. She had wondered why there were two people in the world who looked like each other.

"Is it Mr. Jonas who made that appointment?" Those policemen were good at getting the point. Hearing that it was Jonas asked that man out, they felt there was something wrong with the case, and the one who was involved in it should be the illegitimate child of the Gu family.

The police began to headache. The rich were always annoying, and such things had happened often.

"The CEO made the time of that day. But that man delayed it till the next day and made an excuse that he couldn't find the place. Then the CEO asked him to decide it himself. It was definitely premeditated."

Thinking of the scene at that time, William said all his doubts. Nelson sighed.

"William, do you remember the place they met?"

"He might have sent the location to the CEO in the form of text. We need an investigation." William regretted not asking more at that time. If he had asked, things would have been clear now.

find Jonas's messages, they then investigated where Jerry was.
