

Global Towers: Starting With The SSS-Rank Talent, God-Tier Extraction

Chapter 22: Reputation Ranked First, Unlock the Class Template with Speed

Liu Yan hurriedly changed into the newly obtained Wind Rider Set.

After putting it on, he immediately felt that his various attributes had obtained a huge increase, and his body had become much lighter and stronger.

At the same time, he had also obtained two powerful skills.

At this point in time, the rest of the Awakened were basically still wearing F-grade equipment. Occasionally, some would have one or two pieces of E-grade equipment, but almost none of them had D-grade equipment.

Yet Liu Yan was already fully equipped with D-grade equipment that was also a set compatible with his hunter class.

The gap between Liu Yan and the other Awakened was once again widened.

Liu Yan looked at the remaining equipment.

The equipment with the lowest grades had directly turned into materials.

Those with higher grades had turned into parts of the Wind Rider Set after Divine Extraction.

As for the normal graded equipment, they had turned into higher-grade equipment.

As of now, after Divine Extraction had been used on all of the equipment, most of them were in the E-grade, and a small portion was in the D-grade.

To Liu Yan, these pieces of equipment were not of much use. After all, he already had an even more powerful D-grade set of equipment, the Wind Rider Set!

However, to the other Awakened, these pieces of equipment were undoubtedly incomparably powerful.

As such, Liu Yan took these pieces of equipment to the trading platform and put them up for trade.

“Many pieces of E-grade and D-grade equipment available. If you want them, come quickly. First come, first served!” Liu Yan shouted.

Hearing that there were E-grade and even D-grade equipment, quite a number of Awakened immediately surrounded them.

They were about to enter the extremely dangerous level two of the Tower. With even one more powerful piece of equipment, they would be able to greatly increase their strength.

With strength, they would be able to survive better and obtain even better equipment later on.

As such, high-graded equipment was very much needed by them.

They no longer had any more fierce beast corpses, so Liu Yan chose to exchange for various materials, herbs, spirit fruits, and so on.

These materials and consumables didn't have much use to the other Awakened at the moment since couldn't use them, so they were very willing to give them up in exchange for equipment.

1

But to Liu Yan, those things were very useful.

They hadn't transitioned their classes yet, so they didn't need those things.

Unlike them, Liu Yan had already changed his class to become a hunter. At the moment, his attacking methods were mainly archery, traps, and familiars.

All three methods required a large number of resources and materials to upgrade.

Soon, the trades were completed.

The few pieces of equipment that were useless to Liu Yan were snatched up by other Awakened at high prices.

In turn, Liu Yan obtained a pile of materials, herbs, spirit fruits, and some gold coins.

“Bro, thank you so much. With this equipment, my strength can be increased by 30%, and I'll have many more opportunities in the future!”

“Yeah, me too. With this equipment, my chances of survival will be much higher.”

“My strength had been barely enough on level one. I wonder what level two which is even more dangerous will be like.”

“ ... ”

The few Awakened were extremely grateful to Liu Yan. The equipment meant a lot to them.

With the equipment, their strength had improved considerably. As such, they would have a better chance in the future whether in survival or improvement.

At the same time, they were also secretly shocked and terrified.

High-grade equipment, without exception, could only be obtained by hunting high-level beasts.

Since Liu Yan could take out several pieces of E-grade and even D-grade equipment at once, it meant that he had killed many high-level beasts.

What had this person experienced on level one of the Tower? Could it be that he had wiped out a group of high-level beasts by himself?

2

The few of them couldn't figure it out, but they didn't dare to ask too much. They understood that since Liu Yan had been able to produce so many high-level equipments, his strength must be above theirs.

They simply could not afford to offend such an expert.

After the few of them left, Liu Yan's heart was filled with joy.

In these three rounds of trading, he could be said to have gained both fame and fortune.

Not only were his actions of great help to these Awakened, but Liu Yan himself had also obtained an unimaginable amount of benefits.

After these three rounds of trading, his strength had once again received a qualitative increase.

At this moment, a notification sounded in the Tower.

[The reputation system is officially open!]

[By hunting fierce beasts, obtaining equipment, partner's strength, obtaining money and materials, trading, and so on, you can obtain corresponding reputation points!]

[The rewards for the first round of reputation statistics are being distributed...]

Instantly, all the Awakened excitedly looked at the newly appeared reputation ranking.

Those who had performed well on level one were especially filled with anticipation.

It was said that those with high rankings on the reputation ranking list could receive unimaginable rewards.

At this moment, names appeared one after another on the ranking list.

The results were similar to what Liu Yan had guessed.

He had hunted many powerful beasts, obtained many equipment and resources as well as a wolf cub, and had also traded a lot with the previous three rounds of trading.

All of these combined gave Liu Yan extremely high reputation points.

Naturally, he was ranked first on the reputation ranking list.

Moreover, He guessed that his reputation points should be very much higher than the person ranked second.

At the same time, a notification appeared in front of Liu Yan.

[You have been ranked first in the reputation statistics this time. Reward: 9 freely allocatable points that can be added anywhere!]

9 freely allocatable points as the reward?

1

Logically speaking, the reward for being first on the ranking should be very rich and not so simple.

Very quickly, Liu Yan noticed the difference.

Although these 9 freely allocatable points sounded similar to the allocatable attribute points obtained from leveling up, their effects were vastly different.

Allocatable attribute points could only be added to the eight attributes, but these freely allocatable points could be added anywhere.

Liu Yan naturally wouldn't waste them on the eight attributes. With Divine Extraction, he could easily improve his attribute points. There was no need to waste these freely allocatable points at all.

Immediately after, he added these points to the class template that he had just obtained.

2

Currently, the archery, traps, and familiars section on Liu Yan's class template were still empty.

He added three points to each column and immediately checked his class template.

[Archery]

[Steady Shot]-[Precise Shot]-[Rapid Shot]-[Long-range Shot] (to be unlocked)

[Traps]

[Create Traps]-[Remove Traps]-[Upgrade Traps]-[Multiple Traps] (to be unlocked)

1

[Familiars]

[Familiar Identification]-[Taming]-[Absolute Order]-[Synchronize] (to be unlocked)

Seeing the changes that had occurred, Liu Yan was immediately pleasantly surprised. He hadn't expected that the class templates would be improved by so much.

Every freely allocatable point could bring about a huge improvement.

With the usage of nine freely allocatable points, the increase was unimaginable.

Liu Yan understood that if he didn't have these points and relied on himself to attempt unlocking any one of these three columns, he would have to spend a lot of time, sweat, and effort, and even then, it would take God knows how long to achieve the unlocking of these nine columns.

1

But now, he had been able to do it all at once, and his strength had increased explosively!

Chapter 23: Level 2 Opened, Merging of Towers!

Liu Yan looked at the changes in his class template after he had added the points.

First, he looked at the Archery column. Steady Shot meant he could shoot more steadily, then Precise Shot which allowed him to shoot at a target accurately from a hundred meters away, and finally Rapid Shot which made his shooting speed much faster.

With this, he could shoot many times in a short time in a high-intensity battle, which undoubtedly increased his fighting strength.

1

After that was the Long-range Shot whose specific effects could only be known after it had been unlocked.

Just the three points added to the Archery column had already improved Liu Yan's archery abilities greatly.

The next column was Traps.

Although traps were not as directly useful as archery, they would undoubtedly be of great use in his subsequent adventures.

This was especially so when he had to face powerful fierce beasts. With the Traps column as assistance, Liu Yan could deal with and create even more powerful traps.

The first was Create Traps which filled Liu Yan's mind full of many ways to make traps.

The second was Remove Traps, which meant that not only could he create traps, but he could also dismantle the traps set by others to ensure his safety.

The third was Upgrade Traps which allowed him to upgrade the traps he had created, increasing their effectiveness.

The next was Multiple Traps whose effects could only be known after he unlocked it.

The last column was the Familiars column.

The first Familiar Identification was relatively simple. It was just that he could identify the beasts, giving Liu Yan a lot of knowledge about them.

The second was Taming, which made it so that he understood how to properly tame wild beasts.

Liu Yan could be considered lucky to have successfully subdued the wolf cub from before so easily, which was largely thanks to his Animal Affinity skill. Under normal circumstances, it wouldn't be that easy to tame a wild beast.

The third was Absolute Order which allowed him to better control his familiars and better coordinate with them in battle to display greater battle strength.

The next was Synchronization. Just its name sounded very powerful. Liu Yan was somewhat looking forward to unlocking it faster.

At this moment, the hexagram formation before them flashed, and a middle-aged man with a gentle face appeared. It was their assistant principal.

Upon seeing this person, the group of Awakened instantly surrounded him.

“Assistant principal, you're here!”

“Assistant principal, it's too dangerous in here. Many of our classmates have died.”

“When can we get out? Can we still get out alive?”

“...”

After all, these Awakened were just students before. They had just come of age and had no choice but to enter the Tower to undergo such training.

They had been fine before and had always been alert since they were always in danger.

But at this moment, when they saw the assistant principal, they could no longer hold their emotions in.

The assistant principal looked at everyone and quickly comforted them, “I know that you have worked hard to reach here and that the journey has been dangerous, but I also hope that you understand that from the moment you entered the Tower, you are no longer students. You are the Awakened. You are the future of the Federation and the future of humanity. I hope that no matter how dangerous and difficult it is, you can grit your teeth and persevere!!”

After hearing the assistant principal's words, the group of Awakened gradually calmed down.

After all the training they had gone through in this, they had also gradually grown up.

Regardless of whether it was their physical strength or mental state, they had all obtained a certain level of growth.

Seeing this, the assistant principal continued, "Everyone, time is pressing, and I'll have to be concise. Words of comfort aside, I have something important to inform you. Right now, you are on the resting platform between levels one and two. In a while, you will enter the even more dangerous level two. Level two is located at the [Elemental Peak] where there will be elemental secret realms. In those secret realms, there may be all kinds of treasures and fortuitous encounters. What you need to do is to do everything in your power to reach the peak. If you manage to remain alive within the stipulated time, you will be qualified to enter level three of the Tower! Remember, you are the future of the Federation and the future of humanity. How far you can go will determine your future strength and also affect the survival of humanity!"

3

Just as the assistant principal finished speaking, the announcement sounded in the Tower.

[Level two of the Tower trials is about to begin!]

[Tower 105, 106, and 107 have been merged. The ranking list and reputation rankings have been merged!]

As the announcement sounded, two huge hexagrams appeared on the resting platform, and the Awakened from the other two Towers were teleported over.

Liu Yan was originally in Tower 105, and he was first on Tower 105's ranking list.

Seeing that the ranking lists were now merging, he noticed that the person who ranked first in Tower 106 was Chu Long.

Seeing the name, Liu Yan was a little surprised. Chu Long was his neighbor's younger sister, who was petite and cute.

6

Previously, he had been quite worried that something bad would happen to her if she entered the dangerous Tower. He didn't expect that his worries had been unnecessary.

Not only had Chu Long survived, but she had also ranked first in Tower 106. It seemed that her strength and luck were pretty good.

Liu Yan then looked at the name of the first ranker of Tower 107, whose name was Sun Ren. He didn't recognize the name, so he didn't think too much about it. Instead, he looked for Chu Long in the crowd.

At the same time, a man beside Liu Yan was looking at Liu Yan with hatred in his eyes.

His name was Sun Yi. He had originally been ranked first in Tower 105, but Liu Yan had suddenly appeared and snatched his rank as well as his reward.

The grade of Sun Yi's talent was quite high, and he had encountered many dangers along the way, which had increased his strength by a lot.

During the beast tide, Sun Yi's life had been in danger many times. He had gone through a lot of hardships to kill many fierce beasts.

But he did not expect that after exerting so much effort, his results would be snatched away by Liu Yan out of the blue.

Sun Yi did not think that Liu Yan was stronger than him. He just thought that Liu Yan was lucky and should've picked up a bargain somewhere.

2

As such, he had been planning to take revenge on Liu Yan for stealing his first rank.

When he saw that his brother, Sun Ren, was ranked first in Tower 107, Sun Yi's eyes lit up. He went into the crowd to look for his brother, prepared to work together with his brother to take revenge on Liu Yan on level two of the Tower.

2

"Liu Yan, just you wait. I want you to spit out everything you stole!" Sun Yi looked at Liu Yan with hatred in his eyes and went to look for his brother in the group of Awakened from Tower 107.

However, Liu Yan did not notice this. Instead, he kept looking for Chu Long.

5

After searching for a while, Liu Yan finally found her. At this time, Chu Long was wearing a leather armor. She was standing in a corner and waiting quietly with a calm face, obviously not as lively as before.

Liu Yan quickly wanted to go over and greet her. However, level two of the Tower had officially opened by then.

With this, the group of Awakened walked towards the hexagram array and entered level two.

Seeing this, Liu Yan had no choice but to enter level two first.

Chapter 24: The Powerful Mountain Guardian Beast

After a rainbow-colored light flashed and a wave of dizziness, the world before their eyes lit up.

What appeared in front of the group of Awakened were countless towering mountains that reached into the clouds.

These mountains were all different.

Some were lush green, some were filled with volcanic rocks, and some were covered in ice and snow.

At first glance, they were all different.

The combination of so many elements was extremely magical.

“So this is the Elemental Peak? It’s so magical!”

“It’s said that there are secret realms inside which contain all kinds of dangers as well as treasures.”

“I’m afraid that this trip will be another dangerous one. It’s already pretty good if half of all of us can survive.”

“That’s right, but those who can survive are all elites and will grow into true experts.”

“Indeed, danger coexists with opportunity!”

“ ... ”

1

The group of Awakened felt extremely emotional.

As soon as Liu Yan entered the range of the Elemental Peak, he could feel the battle intent of his young wolf cub [Dream] who was in his storage ring.

10

Ever since he had added the freely allocatable points to the Familiar column, Liu Yan could feel the thoughts of his familiar more clearly.

As such, he could feel the emotions and thoughts of Dream.

At this moment, Dream seemed to be very eager for Liu Yan to reach the top of the mountain. There seemed to be something there that was very attractive to it.

Liu Yan himself was also very eager to reach the top of the mountain and enter the secret realms as soon as possible.

At this time, after a short period of emotional sighs, the group of Awakened set off one after another.

They weren't here for a trip, but for adventures. They didn't have the time to admire the scenery or sigh.

Very soon, the group of Awakened set off and rushed towards the peak of the mountain.

Although Liu Yan had set off a little later than the others, speed was his strong point, after all.

Without even activating any of his skills and just by relying on his terrifying agility attribute, Liu Yan had easily caught up to all the Awakened and even surpassed them.

At the same time, he activated his B-grade skill, Swiftsteps.

He instantly felt that his footsteps had become much lighter. At the same time, the distance of every step he took forward had also increased by quite a bit.

With that, Liu Yan's speed received a terrifying increase. He rushed up the mountain in an instant, leaving the other Awakened far behind.

"Damn, who is that person? Is he a monster? What kind of speed is that?"

"It seems to be Liu Yan, the person who ranked first on Tower 105's ranking list."

"Didn't they say that Liu Yan was a rookie? And that he only managed to survive because he was lucky?"

"His speed is invincible!"

"..."

When the group of Awakened saw Liu Yan's terrifying speed, they were all amazed.

In the blink of an eye, Liu Yan had already disappeared from their sight as he rushed towards the peak of the mountain.

At this moment, the mountain that Liu Yan and the others were climbing was fire-attributed.

The entire mountain was filled with fire elements.

Thanks to his Spirit Vision, Liu Yan was able to discover some beasts from a relatively long distance.

Since his trip had just started, the beasts he encountered were mostly level two and at most level three. They weren't very strong.

Liu Yan's current level had just reached level four, but his actual strength was already above level eight or even level ten. Dealing with these level two and three beasts was really an easy task.

Every time his Spirit Vision detected any beasts, Liu Yan would prepare in advance.

Once in proximity, he would shoot arrows.

In Liu Yan's Archery column, Steady Shot, Precise Shot, and Rapid Shot had already been unlocked.

As such, it was extremely easy for him to shoot accurately while he was hurrying along.

The moment his arrows were shot out, the weak level two or three beasts would be instantly killed by Liu Yan.

Occasionally, when he encountered a small group of beasts, Liu Yan used the Wind Rider Set's skill Three Shots, allowing him to shoot three arrows at the same time that hit them accurately, instantly killing them.

After killing the beasts in an instant, Liu Yan stopped to use Divine Extraction on their corpses.

Although the levels of these beasts weren't high, they could still provide him with some attribute points.

Great oaks grew from little acorns. Liu Yan wouldn't let go of any chance to increase his attributes bit by bit to increase his strength.

[Divine Extraction of the level 2 beast corpse has been successful. Obtained: strength +8, vitality +4, adaptability +10!]

[Divine Extraction of the level 3 beast corpse has been successful. Obtained: vitality +21, speed +18, spirit +15!]

...

On the way, Liu Yan killed beasts with ease while obtaining attribute points with Divine Extraction.

If there were no beasts in his path, he directly used Swiftsteps and hurried on.

On the other side, the other Awakened weren't so lucky.

There were many paths to climb the mountain. They didn't know which path Liu Yan had taken, so they couldn't take the path that he had taken to avoid beasts.

Along the way, they also encountered level two or three beasts.

For Liu Yan, level two or three beasts were extremely weak and could be easily killed in an instant. But for the vast majority of the Awakened, they would have to undergo a huge battle just to kill these beasts.

Some experts were relatively strong, but it still took them some time to deal with the beasts.

This was especially so for the majority of the Awakened who didn't have any perception-type skills. Even if they were strong enough, they would sometimes be caught off guard by the beasts' sudden attacks, and some of them might even be injured.

If one was injured at the beginning of the climb, it was practically a death sentence.

After all, there was still a long way to go, and there were even more dangers waiting ahead.

On the other side, with the support of his powerful strength, Liu Yan quickly arrived at the peak of the mountain.

When he arrived at the peak, he saw the mountain guardian beast, a fire Kylin.

According to the instructions of the assistant principal, every elemental mountain peak had one or more mountain guardian beasts. One had to kill the mountain guardian beast to become the peak master.

Liu Yan checked its stats.

[Fie Kylin Mang]

[Level: 8]
