

Global Towers: Starting With The SSS-Rank Talent, God-Tier Extraction

Chapter 3: Pick Up Scraps in the Beginning, Become Heaven-defying in the Later Stages

1

Yan Yuanzhi, who had a powerful C-grade strength-type talent, was actually instantly killed by a level 1 saber-toothed tiger!

5

When the group of students saw this, they were all extremely frightened and looked at the saber-toothed tiger with a face full of fear.

Fortunately, the saber-toothed tiger seemed to be afraid when it looked at the crowd and saw that there was a faint white halo covering the students' bodies. It left.

"Damn, fortunately, we still have the beginner's protection halo. Otherwise, we'd be dead for sure."

2

"Yan Yuanzhi took the initiative to make a move just now, and the beginner's protection halo had disappeared immediately."

"This is only a level one monster, and it's already so powerful? Even Yan Yuanzhi with the C-grade talent isn't a match for it!"

2

"Looks like our instructor is right. The beasts in here are extremely powerful. We have to be extra careful and not be as arrogant as Yan Yuanzhi."

"What a pity. He had such a good talent at the C-grade, yet he was instantly killed in the beginning. If he had been careful, he would've been destined to become an expert."

"We should form a team. We'll only have a chance if we work together to deal with the beasts. There's no chance at all if we face them alone!"

“We have to hurry up. The beginner’s protection halo is about to disappear.”

“ ... ”

Following that, the students discussed among themselves as they quickly formed teams and prepared to work together to deal with the beasts.

1

At this moment, Liu Yan was also secretly surprised at the strength of the beast, and was eager to increase his strength.

An SSS-grade talent was bound to be incomparably powerful. He had to make use of it to grow stronger. He couldn’t be like Yan Yuanzhi, who had fallen before truly growing.

According to the description, this talent could extract everything.

Since it could extract non-living things, then could living things be extracted as well?

To confirm his guess, Liu Yan came to the side of the tree that had fallen from the palm strike just now and used his talent.

1

With that, a faint green light enveloped the tree. The tree quickly withered, and an invisible power flowed into Liu Yan’s body.

[Divine Extraction of the tree has been successful. Obtained: vitality +0.00001!]

9

Seeing the stats that he had successfully extracted, Liu Yan was speechless.

Using Divine Extraction on these trees could make him stronger, but the progress was a little too slow.

If Liu Yan was given enough time to extract all the trees in the forest, he would be able to improve a lot in a day.

However, the key point was that he did not have that much time now.

That being said, there was also good news. At the very least, it meant that he could also extract living creatures.

Immediately, Liu Yan set his sights on Yan Yuanzhi’s corpse which was not far away.

2

Seeing that the other students were all busy forming teams and no one was paying attention to him, Liu Yan hurriedly walked over.

There were two holes in Yan Yuanzhi's chest, and fresh blood was continuously flowing out from them. His death was extremely tragic.

Coming into close contact with a corpse, Liu Yan's heart was filled with fear.

However, to become stronger and survive, Liu Yan had no choice but to endure his fear and touch it.

A green light enveloped the corpse, and a few lines of words appeared in front of Liu Yan.

[Divine Extraction of the corpse has been successful. Obtained: Strength +0.1, D-grade skill "Strength Enhancement"]

4

[Strength Enhancement]

[Grade: D]

[Effects: in Berserk mode, your strength will increase by three times while your spirit will decrease by 50%]

Seeing the notification, Liu Yan was ecstatic.

His strength attribute had directly been increased by 0.1. Although 0.1 did not seem like much, Liu Yan could clearly feel that his strength had improved by a little.

It would've probably taken at least half a month to achieve this effect via abnormal exercise or training.

Apart from that, he had also obtained a D-grade skill.

Liu Yan guessed that the skill extracted was somehow related to the corpse's talent. Since Yan Yuanzhi had awakened a C-grade strength-type talent, the skill Liu Yan had extracted was then a D-grade strength-type skill.

Immediately after, Liu Yan's gaze shifted to the dagger on Yan Yuanzhi's waist. This was a beginner weapon issued by the Federation.

Due to the scarcity of equipment, a beginner was only allowed to choose to obtain one piece of equipment issued by the Federation on his first entry of the Tower.

At that time, Liu Yan had chosen a piece of defensive equipment as a precaution. As such, he was now lacking a piece of offensive equipment.

After taking Yan Yuanzhi's dagger, Liu Yan took a look.

[Federation Special Dagger]

[Grade: F]

[Effect: Attack +10]

Liu Yan immediately used Divine Extraction.

A white light enveloped the dagger, and a notification appeared before his eyes.

[Divine Extraction has succeeded in extracting the impurities. Congratulations on upgrading the dagger to E-grade!]

3

When Liu Yan looked at the stats again, the effects of the dagger had already changed to "attack +50".

Instantly, Liu Yan's overall strength had received a huge increase.

Firstly, his attributes had received a certain increase.

Secondly, he had obtained a D-grade strength-type skill, which had improved his strength quite a bit.

Lastly, he had two pieces of equipment now, one offensive and one defensive, both of which were E-grade.

It could be said that Liu Yan's strength had increased several times in an instant!

1

On top of that, this huge increase was only the initial effect of his SSS-grade talent, Divine Extraction.

1

Liu Yan understood that the true strength of his talent lay in the fact that he could continuously use it on all sorts of non-living creatures and living creatures, which would allow him to continuously increase his strength in all aspects. He had unimaginable growth potential.

4

If Divine Extraction was used to extract the impurities of equipment, it could upgrade the equipment, turning waste into treasure.

If it was used on corpses, Liu Yan could obtain attribute points and skills, constantly improving himself.

Liu Yan pondered over his next plans.

Although the SSS-grade talent Divine Extraction was incomparably powerful, it still needed time to grow.

Especially after witnessing the strength of the beasts in this world as well as Yan Yuanzhi's tragic death, Liu Yan understood this even more.

If he wanted to survive in this world, he had to be careful and not be arrogant.

A level one beast was already so powerful. Liu Yan couldn't imagine how powerful a beast at a higher level would be.

1

Fortunately, he could use Divine Extraction on corpses. With that, Liu Yan's path would be much simpler, and he could just tag along behind his classmates.

2

In the process of fighting beasts, the corpses of beasts and humans would be inevitably produced.

Liu Yan could then extract the corpses of both humans and beasts.

From the corpses of humans, he could obtain corresponding skills and certain attributes.

From the corpses of exotic beasts, Liu Yan guessed that he could obtain certain abilities, but more importantly, he could obtain many attribute points. After all, the attributes of beasts were very powerful.

This also meant that in this Tower, Liu Yan didn't even need to fight with beasts in the early stages. He only needed to constantly pick up scraps, and he would be able to obtain all sorts of powerful skills and large amounts of attribute points.

1

This way, by continuously picking up scraps, Liu Yan could crazily increase his strength. When his strength was sufficient, he would be able to easily defeat beasts alone!

After thinking all this through, Liu Yan felt much more at ease.

As expected of an SSS-grade talent, it was truly incomparably powerful and was simply heaven-defying.

Relying on the Divine Extraction talent, Liu Yan could rapidly increase his strength without any life-threatening danger in the early stages.

2

And in the later stages, when his strength had grown, Liu Yan would no longer have to fear the beasts. He would be able to continuously defeat high-level beasts and increase his strength even faster then.

His potential in the future was unimaginable. There was simply no upper limit!

1

It was a heavily injured level 1 beast that was still currently healing itself!

When he saw its attributes, Liu Yan immediately understood that those who had just awakened were no match for this blood wolf in a one-on-one fight. However, there had been two of them, but because it was their first battle, they did not dare to go forward. That was why such a tragedy had happened.

The blood wolf was clearly on the verge of death, and the other people had only needed to muster up the courage to fight to definitely win, yet, they chose to flee because of fear...

4

Liu Yan raised the dagger in his hand and prepared to fight.

Although there was a certain difference in attributes, Liu Yan had two pieces of E-grade equipment on him. With this, he was no weaker than the blood wolf.

Apart from that, Liu Yan also had a skill. In addition to the fact that the blood wolf was already on the verge of death, he was completely capable of dealing with it.

The only thing he had to take note of was to overcome his fear and not retreat at the last minute!

“I’ll let you be the first stepping stone on my path to becoming stronger!” Liu Yan’s gaze turned cold as he raised his dagger and charged forward.

1

The blood wolf, which was licking its wounds, noticed Liu Yan’s arrival and immediately stood up, staring coldly at him.

However, Liu Yan was not afraid at all. He immediately activated his D-grade skill, Strength Enhancement.

Veins popped out all over Liu Yan’s body, and his muscles rapidly filled with blood.

1

The berserk mode had been activated!

With that, Liu Yan’s strength was instantly increased by three times.

Gripping the dagger tightly, Liu Yan charged forward.

The blood wolf also pounced forward.

Liu Yan did not dodge. Instead, he used his equipment’s armguard to block it.

1

He felt a wave of pain, but at this moment, he had no time to think about it. He gripped the dagger tightly and stabbed it at the blood wolf’s head again and again.

After a few hits, blood spurted out, and the blood wolf gradually loosened its bite and fell to the ground.

Liu Yan was worried that it wasn’t dead yet, so he went up to stab it a few more times. After confirming that the blood wolf was indeed dead, he finally let out a sigh of relief.

3

Panting heavily, Liu Yan took a long time to recover.

When he looked at himself again, he realized that he was covered in blood, in a sorry state.

Liu Yan checked his forearm. Under the protection of the equipment, he hadn't been injured, which was a relief.

The equipment that had been upgraded to E-grade with the Divine Extraction had decent defense. To think it could withstand the bite of a level 1 blood wolf.

At this time, Liu Yan had gradually regained his composure. He hurried to the front of the blood wolf's corpse and activated Divine Extraction.

A green light enveloped the corpse.

[Divine Extraction of the blood wolf's corpse has been successful. Obtained: strength +2, vitality +2, agility +3!]

1

At the same time, Liu Yan felt a warm current flow through his entire body. The strength in his body had clearly improved, and his physical toughness had also increased by quite a lot.

Other than that, he felt that his body had become much lighter, which meant that his speed had also increased significantly.

Liu Yan was quite surprised that he could obtain so many attribute points at once.

1

With this, he somewhat understood the pattern of Divine Extraction. Using the talent on the powerful beasts would allow him to obtain more attribute points, to which the trees and corpses of newly-awakened people were far inferior.

2

However, other than attribute points, he did not obtain anything else.

The skill that he had obtained from the human corpse previously was extremely powerful though. The Strength Enhancement had helped Liu Yan greatly this time.

1

After his first battle with a beast, Liu Yan gradually gained some confidence.

Although the beasts were powerful, they were not invincible. As long as he could overcome his fear, they were actually not that terrifying.

However, in terms of combat techniques, he was still lacking. At the moment, he didn't have any other skills other than a strength-type skill, so he could only fight head-on.

It would be fine if he encountered weaker beasts, but if he encountered a stronger beast than himself, it would be troublesome.

"It seems that I still have to continue improving my strength. Although my strength has increased greatly, it's still not enough", Liu Yan thought to himself.

After roughly cleaning up the blood on his body and putting away the dagger, Liu Yan got up and was about to leave when he noticed the two human corpses beside him.

Only then did Liu Yan remember that there were still two corpses that he had not used the Divine Extraction on.

After the battle with the blood wolf, he had been quite nervous that he had almost forgotten about such an important matter.

Liu Yan quickly went to the front of the two corpses and used Divine Extraction.

Green light shrouded the corpses, and lines of notifications emerged before Liu Yan...
