

GOF 1061

Chapter 1061: Golden Bone Jar

One day later.

As Han Fei went deeper into the Bone Jar Burial Ground, the number of Bone Jars didn't decrease, but increased.

At first he saw one at a time, but gradually he saw five to six corpses at once. Han Fei rushed forward and found the first golden bone jar.

Before Han Fei approached, he saw a young man's corpse sitting on a bone jar with two sabers.

For some reason, Han Fei found that the young man seemed to be more agile than the other corpses. The blue soul fire in his eyes was flickering, and Han Fei wondered if he still had any thoughts.

Since this guy was using sabers, Han Fei took out the Blood Drinking Knife. With his previous experience, Han Fei didn't hesitate to slash out with the Draw.

The moment the Draw was used, the young man pressed his two sabers together and a hundred saber beams instantly slashed out.

Clang! Clang! Clang!

"So fast."

Han Fei frowned. This person is so fast!

In an instant, the hundred saber shadows slashed through the Draw. The young man seemed to put his hands together, but at that moment, he had already slashed out hundreds of times. His speed was the fastest Han Fei had ever seen.

Han Fei rushed forward, not planning to use any other skills. Since he had encountered a saber expert, he wanted to compete in saber techniques with him.

The Draw originated from the Saber Sutra, a heavenly-level divine-quality combat technique. Of course, not the Draw alone could be considered a divine-quality combat technique.

The Draw was only one of the moves in the Saber Sutra. As for the Saber Sutra, it was a culmination of hundreds of saber techniques. It included saber techniques, saber control, saber intent, and saber realm.

Therefore, Han Fei immediately knew that this young man was a genius who cultivated the swift saber. Furthermore, he was definitely a genius. Han Fei was sure that it wouldn't be a problem for this man to sweep through more than half of the strong masters in the same realm as him in the Thousand Star City and the Scattered Stars Island.

When Han Fei attacked, he saw two shadow saber souls appear behind the young man. The two sabers hung on both sides of him as if they were under his control.

Clang Clang Clang!

After a clash, Han Fei's expression changed slightly. This young man's saber was so heavy. Although he hadn't used a secret technique, he still had the strength of two waves.

However, the moment his blades clashed with the young man's, Han Fei immediately felt that something was amiss.

"A saber-wielding technique with saber intent. And the saber is very heavy?"

SWISH!

It seemed that all four sabers were moving at high speeds. Not only were they fast, but they were also very heavy! This made it impossible for Han Fei to defeat his opponent with just the Draw.

With a thought, another Blood Drinking Knife appeared in his left hand. If one saber couldn't block it, he would use two.

Thus, in this strange place, the two figures were completely drowned by the violent saber beams. At this moment, they were almost invisible, but large swaths of saber beams shot out from all directions. The ground was covered in saber marks.

Han Fei struck out with both hands and slashed out with two Draws. The young man's figure suddenly vanished, leaving only a hundred saber beams and a long saber that had been sent flying.

Han Fei's body suddenly turned, because there was also a saber beam sweeping over from his side. The saber beam was like a half-moon arc that contained a tearing intent. As the saber beam swept past, sand and stones flew.

"Saber realm?"

Han Fei's pupils were constricted. It wasn't a big deal if this person had comprehended saber intent. After all, he was once a peerless genius and was very likely from ancient times. It wasn't impossible for him to comprehend saber intent.

However, this strike had a realm to it. There were faint fluctuations of the power of laws in this strike. Han Fei could clearly sense that if he were in this half-moon arc, he would definitely be injured.

After all, from saber intent to realm, it meant that this person had reached a unique level in saber cultivation. The tearing intent could even slash at the soul.

"He's so strong."

However, Han Fei wasn't afraid. If it was saber intent, he had already comprehended saber intent when he comprehended the Invincible Path.

However, he was still lacking in terms of realm.

Clang Clang Clang!

After this saber beam, the youth's four sabers returned once again, producing the feeling of him striking out a thousand times.

Han Fei realized that he could only defend and had no time to counterattack. This was because the opponent's saber was too fast, and he could barely keep up.

After half an hour, more than a thousand bloody marks appeared on Han Fei's body. Although he hadn't been injured, this young man was definitely the most talented person he had ever encountered. He had clearly surpassed Ning Jingyao, Nameless, and Sun Mu at their peak.

That's not right. This saber technique is at most comparable to a heavenly-level divine-quality. However, my Saber Sutra is also a heavenly-level divine-quality. How can it be so much weaker? Is it just because the other party is very fast?

Han Fei's hands were like phantoms as he used the 64-Dimensional Fish Dragon Dance. As he blocked the storm-like attacks, he was thinking that he had neglected the realm.

Nameless's 300-meter sword domain and Ning Jingyao's Astral Demonic Saber had certain realms. Nameless's realm was that within 300 meters, his sword could reach anywhere, and the 300 meters was his world.

Ning Jingyao's Astral Demonic Blade borrowed the power of the starlight. As long as the starlight enveloped him, the blade would produce endless strikes.

Although Han Fei had invincible saber intent, the speed of his saber was still a little slow. It could only be said that if his saber speed could catch up to the youth in front of him, the other party would definitely lose.

However, the problem now was that he couldn't catch up with this guy.

An hour later, Han Fei felt that his soul was slightly injured. If it weren't for his freakish physique, he might have been defeated within ten seconds.

"No, I definitely can't keep up with his speed. I can only strengthen my attacks."

Han Fei's mind returned to the Draw. He had Invincible Saber Intent and could pour all his spiritual energy into a terrifying strike, but it was still not enough.

Swish!

The Draw and the Void Piercing Strike instantly bloomed at an extremely short distance.

However, as Han Fei expected, when Han Fei's saber struck, the other party's body directly swapped with one of the sabers in the saber beam. It was useless.

"No, I have to lock onto him. But how? The Sacrificing Punch should be able to do it. However, the time it takes is relatively longer."

"Oh? The Sacrificing Punch is an explosion of energy. The energy exists in the void and can ignore space. Then, can I set up energy around me and inject energy and spiritual energy into the saber?"

Han Fei's eyes flashed as energy spewed out of his body. The Blood Drinking Knife in his hand hummed as he stomped his foot and the Coiling Turtle Array appeared.

In that brief moment, Han Fei slashed at the air, and the young man's body disappeared again and appeared on Han Fei's right.

However, the moment he appeared, a saber suddenly erupted in the void and swept in front of him.

Ding! Ding! Ding!...Slash!

Even after a hundred strikes, the youth was still beheaded.

The surrounding saber beams instantly shattered into nothingness.

Han Fei heaved a long sigh of relief. So at this stage, the commonality of combat skills is that they can be interchanged. The combination of energy and spiritual energy far exceeds the eruption of a single force.

Han Fei understood.

However, Han Fei didn't look very happy. This was the first golden jar he had seen. Ordinary people would probably be instantly killed. This was a true life-and-death moment.

Without his strong physique, if Han Fei didn't want to retreat immediately, he would have to unleash his full power at the first moment. Only by using the Law of Gravity, the Void Lines, and the Sacrificing Punch could he win.

"This won't do! My attack speed is still too slow. Quick Blade Technique, interesting. I have to warn Xiaobai and the others to be careful of the golden bone jars."

When Han Fei went back, Luo Xiaobai was fighting with the corpse of a hunter. The other party was an explosive type of hunter, so every attack was extremely powerful.

Although Luo Xiaobai had many traps, many of them couldn't control the other party at all. Therefore, she was forced to use the Life Substitute Art.

Han Fei wasn't worried when he saw this. To kill a manipulator like Luo Xiaobai, control alone wasn't enough. He had to burst out and keep up with the speed of Luo Xiaobai's death substitution.

Han Fei said directly, "Xiaobai, be careful of the golden bone Jars. When you encounter one, use all your means. If you can't beat it, retreat immediately."

"Puff!"

Luo Xiaobai emerged from a blue flower. "Got it."

Han Fei glanced around, ignored Luo Xiaobai, and began to search for the other three.

A moment later, Han Fei saw a scene that left him at a loss whether to laugh or cry. He was surprised to discover that the three of them had already encountered a golden bone jar. Their opponent was an armorist. At this moment, the three of them were being suppressed by the other party and were turtled up in Le Renkuang's Ultimate Defence.

This armorist was extremely powerful. Sword control and sword intent spread out for a thousand meters, and this thousand-meter area was his sword domain.

It was like a killing array. At the same time, there were at least seven exquisite sword techniques striking in all directions. There was a rain of swords from the sky, shimmering sword beams, armor-piercing sword beams, and sword beams that resembled dragons...

Li Luoluo's worms were useless here. The armorist wasn't human to begin with, so he wasn't affected by Li Luoluo at all.

However, Han Fei was surprised to find that Li Luoluo seemed to be a different person. Li Kuang?

Li Kuang charged at the Infinite Defense Array a few times. The long staff in his hand was like thousands of afterimages, but he couldn't withstand the endless sword beams. In an instant, he was forced back.

Zhang Xuanyu's Three Tremors to the Sea had just broken through a few waves of sword rain when he was forced back by the endless Sword Qi Killing Array. The Momentary Time attack was blocked by the shadow turtle shell in front of the armorist, preventing it from hitting his body.

Le Renkuang was only slightly better. With the help of the Sky Swallowing Technique, he kept trying to approach the armorist. However, the armorist wasn't a fool and knew how to retreat. Furthermore, the armorist also summoned a huge sword in the sky with the intention of blocking the Sky Swallowing Technique.

Han Fei watched from not far away. The three of them tried to rush out at the same time, but they only lasted for about thirty seconds before running back to the Ultimate Defence array.

Han Fei was speechless. This armorist was ridiculously strong!

Chapter 1062: Ancient Geniuses

When Li Luoluo saw Han Fei, she immediately shouted, "Brother Han, come and help."

Zhang Xuanyu shouted, "No, fighting such a powerhouse is exciting. Awesome."

Le Renkuang was speechless. "If you have what it takes, why don't you run out of Ultimate Defence and have some fun?"

Han Fei said, "You guys fight first. I'll take a look here."

Han Fei had no intention of attacking, because the three of them had clearly blocked the armorist. However, they couldn't find a way to deal with this guy for the time being.

However, after what he had just experienced, Han Fei realized that the people inside the two Golden Bone Jars were both terrifyingly strong.

He wasn't exaggerating. Any one of them could match the so-called ten geniuses. For example, the one he had encountered had cultivated Saber Intent and Saber Realm to the limits.

Now, it was the same for this armorist. This armorist had forcefully produced a Sword Domain. Furthermore, there was an armor-piercing sword intent in the sword beam that prevented Le Renkuang and company from escaping.

Han Fei couldn't help but think that the Undying Soul Realm was really just a place to hone combat skills.

He felt that it wasn't the case. If it was just to hone combat skills, it shouldn't be so difficult here. Even if it was meant to hone combat skills, it should be battles between equal opponents.

However, at this moment, the corpse in the golden bone jar could almost easily crush a genius.

Was the other party really powerful? No, that was because the other party had developed a new direction after reaching the limits of his combat technique.

In this direction, such as domains, battle intent, or realm, it was because of this non-combat technique that they were so powerful.

Instantly, Han Fei was enlightened.

"So that's how it is. Towards the end of a battle technique's cultivation, the effects of the battle technique itself aren't that great. Instead, what matters is the comprehension of one's realm. One needs to find a suitable combat style and battle intent. This is the true purpose of the Undying Soul Realm."

Han Fei suddenly shouted, "Listen up, all of you. You have to think of a way to leave the combat technique itself and create a new concept for your combat technique. You have to have a high framework. You have to find the realm produced by the combat technique at its peak, such as a domain or battle intent."

Zhang Xuanyu gritted his teeth. "It's not that simple. Go do what you need to do! We can hold on. After all, energy and spiritual energy can be imagined indefinitely. There's no rush."

Han Fei nodded. Even if the three of them couldn't stop the armorist, they could retreat if they really wanted to.

However, when the armorist saw Han Fei, he diverted his attention to attack him.

Han Fei smiled and strolled through the sword energy. He floated in the air and twisted his body, escaping his opponent's attack in the blink of an eye.

Seeing that the three of them were fine, Han Fei turned around and went to find Luo Xiaobai. He felt that the strength of the cultivators in the golden bone jars was too high. Luo Xiaobai might not be able to defeat one alone, so they should explore together.

When Han Fei saw Luo Xiaobai again, he found that she was also walking towards him.

Han Fei said in surprise, "It's been resolved?"

Luo Xiaobai nodded. "The cultivators in these bone jars are a little too powerful. I was just about to meet up with you."

Han Fei immediately grinned and said, "That's good. Go find Fatty and the others. The three of them are being beaten up."

"Huh?"

Luo Xiaobai was somewhat surprised. The three of them were together but were still being beaten up?

This wasn't a joke! There weren't many people in the entire Thousand Star City who could suppress the three of them as Hidden Fishers.

Han Fei added, "It's one against three."

Luo Xiaobai: "..."

Han Fei smiled and said, "Pay attention to the comprehension of the realm. When combat skills are honed to the end, the key to the problem may no longer be the combat skills themselves."

Luo Xiaobai nodded. "What about you?"

Han Fei looked into the distance. "I'm fine. I want to take a look inside."

Luo Xiaobai said, "Be careful."

The two of them walked past each other and left. Having been used to the way Luo Xiaobai interacted with him, Han Fei didn't find it pretentious at all. Although they were fellow disciples, everyone knew they had their own paths.

...

Han Fei returned to the place he had just been. After such a long battle, he didn't find anyone coming to cause trouble. It seemed that no one had come.

Furthermore, now that Luo Xiaobai and company were together, even if someone wanted to cause trouble, they wouldn't be afraid unless a few of the top ten geniuses had joined forces.

However, the only ones who could come together were Chu Qingyan, Sun Wu, and Yang Nanxi. The person ranked ninth was from the Chen family that had never gotten involved in the Thug Academy's matters, so he didn't care. Zhang Mingkun, who was ranked tenth, could also be considered one, but he hadn't appeared at the Demon Plant Soul Realm. Presumably, he might not come to this soul realm either.

As for people other than the ten geniuses, they might not take the risk. After all, this was already the depths of the Undying Soul realm. They had already begun to come into contact with the Golden Bone Jars. If they were careless and encountered one, the consequences were not something ordinary people could withstand.

As for ordinary geniuses, it was impossible for them to enter this place. They might not be able to deal with any bone jar here.

Han Fei felt that this might be the reason why the big clans weren't willing to attack in the Undying Soul realm. They knew their strength and knew that they could go very deep. If a large number of geniuses from the big clans came, half of them might die midway.

Passing the previous golden bone jar, Han Fei continued to move forward. He found that the bone jars were very rare now. Even ordinary bone jars had disappeared. After walking for a long time, he finally saw a new golden bone jar.

This time, Han Fei encountered a manipulator.

The moment the short woman's corpse appeared, grass grew everywhere. With the golden bone jar as the perimeter, the grass extended more than 3,000 meters.

The girl looked at Han Fei, extended her hands, and grabbed a purple vine.

Han Fei thought to himself, No matter how strong the vines are, can they block my saber?

However, after taking a few steps, Han Fei realized that the grass had already grown to his knees. Just as he was about to attack quickly, he was surprised to find that he suddenly slowed down twice as fast.

"Not good. Another domain?"

Han Fei immediately didn't dare to wait any longer. He used his upgraded Draw again. As it was too fast, Han Fei saw the corpse being slashed by the saber.

However, upon seeing this scene, Han Fei's heart sank. How could a top genius die so easily? Clearly not.

Indeed, at the next moment, a clump of grass in the grass transformed into a human. Who else could it be other than the corpse?

"Death Substitution."

Han Fei felt a headache coming on. This should be how many people felt when they encountered Luo Xiaobai, right? No matter how fast and powerful their attacks were, the other party could easily withstand their attack with the Death Substitution Art.

Furthermore, the combat technique was clearly locked onto the manipulator from a moment ago. However, after being attacked, the operator was no longer the one being attacked.

Han Fei was stunned. Manipulators were the same as spirit gatherers! They didn't show their might in the early stages, but could be bosses in the late stages. Facing this manipulator, the Draw was clearly useless. The other party could easily dodge the Death Substitution Art.

Furthermore, the grass under his feet didn't stop growing because of Han Fei's daze. In just a moment, it had grown to Han Fei's waist.

Although the grass didn't appear to be entangled, it was unknown what happened next.

Boom Boom Boom!

The Invincible Fist roared out, and in the blink of an eye, more than a hundred punches smashed through. Hundreds of paths were crushed by Han Fei in the grass. However, the grass had already grown to his chest where it wasn't crushed. The manipulator was still watching this scene quietly from afar.

Han Fei couldn't help but feel his teeth ache. He extended his hand and the Infinity Water appeared. Water vapor gathered in all directions and gradually formed ten thousand blades that floated in the air.

However, the grass had grown taller than a human, and there were vines everywhere in the grass.

Just as Han Fei was about to attack, he suddenly lost his footing and sank into the ground.

It turned out that the ground had been hollowed out by the manipulator, and it was filled with vines. The moment Han Fei landed, countless vines swept over.

Han Fei wasn't flustered. With a wave of his hand, the Million Knife Art poured down and drilled into the ground.

"Puff... Puff... Puff..."

The underground storm surged as ten thousand blades swept out like a tornado. All the vines that attempted to sweep over were instantly shattered.

However, at some point in time, the weeds that had been growing luxuriantly quickly and in large numbers swept underground.

In just a moment, the ground where Han Fei was had been covered by shattered plant fragments and mucus.

No matter how powerful the Million Knife Art was, it was only relative. If plants turned into liquid, could the Million Knife Art still shatter them?

The answer was clearly no.

Han Fei discovered that these plants had already been ground into fine grass by him. They were like liquid and were gradually solidifying.

At the same time, he saw thousands of hair strings form in the liquid.

Han Fei grabbed a handful of the hair and found that they were extremely tough. Furthermore, the hair attempted to burrow into his body.

Explode!

The Million Knife Art instantly exploded, equivalent to the detonation of Infinite Water. At that moment, it was like the self-destruction of ten thousand semi-divine weapons. The sea of spiritual plants instantly collapsed.

When Han Fei appeared again, he was covered in dust. And within 3,000 meters, everything was in ruins.

Han Fei saw that the manipulator seemed to be seriously injured, but he didn't doubt that if he didn't self-destruct the Infinity Water, the other party would probably have other follow-up actions.

That feeling was very likely similar to Luo Xiaobai's parasitization.

"This has already exceeded the scope of combat techniques!"

Han Fei couldn't help but sigh. This manipulator wasn't that strong because the shattered spiritual plants were rapidly gathering and growing.

This wasn't a combat technique at all, but a pure domain—a spiritual plant domain.

Chapter 1063: The Effect of Will

Han Fei couldn't help but marvel. If the opponents he had encountered were all at this level, he would probably have died long ago.

However, when fighting a manipulator, combat skills were actually useless. They didn't rely on combat skills at all, so Han Fei didn't continue.

The Void Lines were released.

With a flip of his hand, the law of gravity descended.

He used the Draw again. When the Manipulator used the Life Substitute Art again, the Void Lines that were scattered in all directions were directly pulled over.

After all, she was a corpse formed from the soul world. Therefore, even if one could see it with the naked eye, she was still a soul.

At this moment, Han Fei used all his tricks. The other party was naturally no match for him. After all, the Void Line wasn't something ordinary people could have.

If Han Fei only had the Law of Gravity, he might have been able to fight the other party for a long time. But at this moment, the manipulator was killed by Han Fei in less than ten seconds.

...

Han Fei didn't rush to find the next Golden Bone Jar. He was thinking: If it were me, what domain should I embark on on the path of invincibility?

Logically speaking, he could be like Du Jiangliu and be absolutely invincible within a meter of him.

However, this wasn't actually a domain. It was more like a realm where one had absolute control over a certain area around them.

It sounded simple, but in fact, it was extremely difficult to achieve absolute control.

"Why does a domain exist?"

As Han Fei walked forward, he frowned. He had seen the soul warrior's Saber Intent, the armorist's Sword Domain, and the manipulator's spiritual plant domain. Only the first lay stress on intent, while the other two valued control.

However, be it in terms of intent or control, he had actually reached the peak of his strongest path.

Han Fei's own path was invincibility. He wouldn't develop independently based on every combat skill.

However, could the Invincible Heart create an area-of-effect domain?

Han Fei stopped and tried to release his invincible fighting intent, but he felt that the strength of his body and faith didn't seem to make his surroundings dangerous.

Han Fei couldn't help but wonder if this fighting intent could be turned into a corporeal attack.

Han Fei looked three meters in front of him and seemed to sense an indescribable charm in the air. However, this charm couldn't be directly converted into an attack.

“Eh! Since the Invincible Battle Intent can be used on one’s body, why can’t it exist as a form of power?”

Golden light flashed on Han Fei’s body as an illusory fist mark appeared in front of him. However, the resistance seemed to be a little strong.

Han Fei was delighted. “There’s hope. I have to find someone to fight.”

...

The deeper one went into the Bone Jar Burial Ground, the fewer Bone Jars there were. As ordinary Bone Jars appeared less frequently, the Golden Bone Jars naturally appeared more frequently.

Without any deliberate effort, Han Fei quickly encountered the next Golden Bone Jar.

However, this time, he seemed to see a towering object in a distant, blurry spot behind the golden bone jar. He didn’t know what it was.

Han Fei thought that it might be a collapsed building, so he didn’t pay much attention to it.

When Han Fei approached the Golden Bone Jar, a light suddenly flashed under his feet. Han Fei subconsciously used the 64-Dimensional Fish Dragon Dance and took a step forward.

However, as soon as he stepped out, he realized that there were arrays appearing on the ground nearby. An ax beam emerged from the arrays, and a saber beam attacked him from behind. He seemed to see Zhang Xuanyu and the others in front of him. It was clearly an illusion.

“An array? A spirit gatherer?”

Han Fei’s heart skipped a beat. As a spirit gatherer, although he was often treated as a combat soul master, he was still a spirit gatherer in essence.

The abilities of a spirit gatherer were of great use to him. Not only could he cultivate in arrays, but he could also help refine artifacts and cooperate with other team members. In particular, when it came to arrays, he could create a defensive array with one step. He could even be treated as half an armorist.

And now, he had encountered an ancient spirit gatherer who was good at using killing arrays.

Han Fei deliberately didn’t attack forcefully and tried to condense a fist shadow with his Invincible Fighting Intent. However, the fist shadow began to fade after ten meters.

“Huh?”

Han Fei stepped into a Coiled Turtle Array and blocked the enemy’s attack. He frowned at the domain he had just comprehended and thought, It doesn’t seem to be enough!

“It’s only ten meters, but its strength has already weakened. It seems rather useless!”

At this moment, on the bone jar opposite him, a young man’s corpse had already stood up. He held a halberd in his hand and was silently looking at him.

The Coiled Turtle Array shattered. Han Fei stepped out another Coiled Turtle Array and gave himself a Seven Spirits Killing Array. When the time came, the surrounding metallic aura erupted and the saber shadows clashed.

Seeing that the other party wasn't in a rush, Han Fei wasn't in a rush either. He was still trying to study his invincible domain.

He called this Invincible Battle Intent an Invincible Domain. His goal was very simple. Within the domain, he must be invincible.

Clang! Clang! Clang!

Ding! Ding! Ding!

Crack!

The two spirit gatherers fought in arrays. Because the Ideal Palace had infinite spiritual energy, they could use it as much as they wanted. However, although many arrays appeared, they weren't complex ones.

Here, the use of spiritual energy was all a desperate gamble. The killing array's lethality was also extremely great. The ground and void in all directions were filled with saber beams and sword shadows, as well as the sound of axes, poles, and spears clashing.

During this period of time, both parties remained motionless. From time to time, illusory fist imprints would appear in the void. They were accompanied by faint golden light, but unfortunately, none of them could break through the killing formation's range or enter a ten-meter radius around him.

"Not long enough? Then let me try stacking them together!"

Han Fei tried to gather his invincible battle intent and condense it into a punch. However, although the punch wasn't weak, the invincible domain that had a radius of ten meters collapsed at the moment of Han Fei's punch. Apart from the direction of the punch's tip, the other domains in the area collapsed, unable to withstand the killing array's attack.

"No, this isn't a domain."

The ancient spirit gatherer on the other side didn't seem to want to wait any longer. On the ground, the flashing array began to gather as a killing array was brewing.

Han Fei frowned. He imagined the spiritual energy and forcibly changed the path of the ancient spirit gatherer's array. The power of their souls collided.

Boom!

The terrifying soul blast shattered all the surrounding arrays and struck the two of them.

The Soul Controlling Array emerged from Han Fei and the ancient spirit gatherer at the same time. They ignored the shockwave and continued to attack with the array.

"Interesting."

The corners of Han Fei's mouth curled up. He had never met such a powerful spirit gatherer. His proficiency in array, especially killing arrays, was clearly more than his.

It wasn't that he didn't know enough, but he was far from being able to use dozens of different killing arrays as the other party.

However, they were both array masters. The power of their souls wasn't weak either, and they could use all their strength. Even if he was lacking in arrays, it was impossible for the other party to use the array to kill him.

As long as his opponent couldn't set up a killing array, there was no chance of winning. This way, he would have plenty of time to try using the Invincible Domain.

"Since we can't shoot beyond ten meters, what about within ten meters?"

With a thought, golden saber beams appeared beside him. The saber beams swept like a storm, resembling the Million Knife Art.

However, this wasn't what Han Fei wanted. This was because the Infinity Water could also transform into the Million Knife Art. It was meaningless to use his invincible domain as the Million Knife Art.

"Since it can transform into a saber, it can also transform into a human, right?"

For some reason, Han Fei suddenly thought of the giant mural he had seen in the Thousand Star Proving Ground.

As the Invincible Battle Intent shrank, a golden phantom gradually overlapped with Han Fei's main body. A golden phantom about twenty meters tall appeared.

The golden phantom looked almost identical to Han Fei himself.

However, the moment the golden phantom appeared, Han Fei felt that his strength suddenly increased significantly.

"Eh? The power of laws?"

"No, this is battle intent."

Han Fei was somewhat surprised. He had thought that since the Invincible Battle Intent couldn't form an area-of-effect domain, he would take it back and condense it into his body?

However, Han Fei didn't expect that his invincible battle intent, which had been distributed and returned to him in another way, could increase his strength!

Logically speaking, this was impossible. After all, according to the law of energy conservation, the total mass of blood he spat out would definitely not change! This was a principle that everyone understood.

However, his strength had clearly increased significantly. Han Fei estimated that it had increased by at least 30%.

"No, there's another power inside."

Han Fei couldn't help but think of Yang Deyu, Cao Qiu, and even the Sea God's Descent.

Suddenly, he realized that this was the so-called will of the War God.

He had reached the limits of his path and had produced a will. By adding that will to himself, it allowed his strength to undergo a qualitative leap?

This was different from his ability to enforce the law. It was also in the form of a golden giant, but one was a law enforcer and the other was a special will. He didn't know if the two could be stacked.

Unfortunately, in the Ideal Palace, one's law-enforcement abilities couldn't be used. Otherwise, he could give it a try.

Han Fei suddenly grinned and rushed forward. The ancient spirit gatherer was expressionless, but a large axe appeared in his hand. He leaped into the air, and under the light of the axe, an array appeared.

"Eh! Arrays can be used this way?"

Chapter 1064: Spirit Guardian Corpse

Seeing that the ancient spirit gatherer had used an axe, it was obvious that the other party was also a soul warrior. Otherwise, a spirit gatherer would only be beaten if he fought a soul warrior head-on.

However, the way the other party attacked shocked Han Fei.

That's right! Why can't I use an array when attacking? If I fuse an array with an attack, wouldn't my strength be better?

Han Fei immediately threw out a golden fist.

In the next second, the void exploded as the golden fist was split apart by the axe.

This wasn't the Han Fei from before. This was Han Fei, whose strength had increased by at least 30%. Even if he hadn't completely comprehended the ultimate invincible will, his golden fist was not that easy to be blocked.

However, at that moment, not only was the punch blocked, but it was also shattered. Not only that, the other party's attack was still descending, but its might had decreased by more than 70%.

Immediately, Han Fei could roughly figure out how powerful the other party's array was. Under the double power of the attack and array, it was as if his attack was augmented with the law of gravity. His strength increased by at least 50% or even double.

Han Fei felt as if he had discovered a new continent. His heart surged and he couldn't calm down. Thankfully, he had come to the Undying Soul realm. This was damn useful!

He had only fought these ancient elites a few times, but he had gained so many insights that it was possible that his combat strength would increase several times. Was there anything better in the world?

Han Fei punched again and shattered the axe beam.

At the same time, he activated the Draw. This time, he was a little slow because when he slashed out, an array—the Wave Splitting Saber Array—appeared.

Han Fei clearly felt that the power of the Draw had broken through the shackles. The power of the saber was 80% stronger.

On the one hand, it was the power of will. On the other hand, it was the power of the Broken Wave Saber Formation.

Of course, this was also because this was the Ideal Palace, so Han Fei didn't have to worry about the consumption of spiritual energy. In the outside world, if he drew his saber and drew or slashed out an array formation with all his might, it would be difficult to achieve such a huge increase in strength.

However, this was for others. Their upper limit of spiritual energy was limited, but did he have it? No. This also meant that even in the outside world, as long as he replenished his spiritual energy quickly, he could still obtain nearly 80% of his strength.

This wasn't as simple as one plus one equaled two. It was like 20 waves of strength versus 36 waves of strength. The former would definitely be reduced to dust.

Swish... Crack!

The ancient spirit gatherer used a defensive array to resist Han Fei's strike. Unfortunately, Han Fei's strength had increased too much, and the defensive formation was shattered. The axe exploded, and the spirit gatherer was cut in half.

Han Fei grinned and looked at his hands. If he could comprehend these things before entering the Demon Plant Soul Realm, would he be afraid of Chu Qingyan and the others?

If he guessed right, Yang Nanxi and company would more or less gain some insights here. This was also one of the reasons why the young geniuses of the Thousand Star City were more powerful than ordinary geniuses!

However, none of them were spirit gatherers. Therefore, it was obvious that they didn't have the same feelings as him!

At most, they could comprehend the power of will or the power of a domain.

For example, in Han Fei's opinion, Yang Nanxi's shocking hammer might not be a combat skill at all, but a manifestation of will.

"So that's how it is! I was wondering why those people were so strong. So there are still so many tricks up their sleeves."

Han Fei suppressed his joy and quickly calmed down.

This was because he knew that all of this was only temporary. Once he became an Explorer, they would be able to absorb spiritual energy and energy from the void as they fought. When that happened, everything he had comprehended would be available to them.

Therefore, these insights could only help him become stronger as a Law Enforcer. Once he faced an Explorer, he would still be blasted to pieces.

However, Han Fei didn't panic at all. It was enough for him to reach the level of Law Enforcer first.

At the Explorer level, it might even involve the Great Dao. When that happened, new powers might appear, and he might also have new insights.

Thinking of this, Han Fei realized that this trip was really worth it. He hadn't even reached the end of the Undying Soul realm, but he had already comprehended and learned so much. It was already very profitable.

In particular, this ancient spirit gatherer had given him a huge surprise. He had taught him another way to use array formations. As long as the speed at which the array formation was drawn was fast enough, the strength of a spirit gatherer could actually be terrifying.

After this battle, Han Fei was full of confidence. He felt that with his current strength, he might be able to pass the Undying Soul realm.

Logically speaking, the Golden Bone Jars were already very difficult to cope with. Ordinary people would probably find it difficult to take a single step if they encountered a spirit gatherer like him or that ancient spirit gatherer.

He didn't even know how to fight before he was trapped and killed by the grand killing formation drawn by the other party.

In terms of overall strength, Han Fei felt that this ancient spirit gatherer should be stronger than the three he had seen before.

...

Han Fei walked forward. Unlike before, he encountered three more Golden Bone Jars.

He originally wanted to circle around them, because Han Fei felt that the Golden Bone Jars might only teach him something other than combat skills, such as will, domain, and intent.

However, just as Han Fei was about to circle around, he realized that once he overtook the Golden Bone Jar closest to him, the jar would start moving and someone would come out.

However, ever since Han Fei comprehended his will and mastered the new usage of the array formation, the Golden Bone Jar couldn't stop him.

At this moment, Han Fei also saw the towering object. He originally thought it was the remains of a dilapidated building.

But now, it wasn't a building at all. It was a rhombus-shaped tower that was about 200 meters tall. On the side facing Han Fei were the words "Monument to the Lost."

"Monument?"

Han Fei pondered for a moment. It seemed that the people here were all cultivators who had died in battle. Based on his intuition, if one wanted to reach the monument, he would have to be at least in the top ten of the Genius List.

It was basically impossible to bypass the Golden Bone Jars.

However, if people used human wave tactics, they might be able to reach this point. However, the sacrifice might be huge.

Another method was to gather all the heavenly talents and hunt the ancient heavenly talents in the golden bone jars. With the personalities of those big clans, it was impossible for them not to have thought of this.

Perhaps they had already tried, but they definitely hadn't succeeded. Otherwise, their names would definitely be on the stone monument outside the Soul Realm, and they would be at a very high position.

Under the monument were five crystal bone jars in a pentagon.

The golden bone jars were already so powerful, so how powerful would the people in these crystal bone jars be?

Han Fei stopped in his tracks, not daring to go forward. The main reason was that the five jars were too close. He was afraid that if he went a little closer, five people would suddenly appear. What if... he was given another perfect combination?

Holy sh*t, Han Fei felt that it would be difficult for him to withstand the sudden appearance of five super-geniuses.

For example, if five Golden Bone Jars were placed in front of him and five ancient heavenly talents jumped out, the scene would be too beautiful to even imagine.

Han Fei thought for a moment. Should he go back to Xiaobai and the others, or should he move forward to take a look?

Move forward? If five really came out, he would run. If only one came out, he could consider giving it a try.

With this in mind, Han Fei reached out a foot wretchedly.

One step.

Two steps.

After about a hundred steps, he was only about a hundred meters away from the monument. The jars didn't move at all.

"Oh? Could they be broken?"

Suddenly, just as Han Fei raised one foot, his foot stepped into the air.

"Hiss!"

Han Fei immediately wanted to run. This wasn't about invincibility. It was a strategic retreat. He would retreat first and observe the situation.

However, when Han Fei looked back, he found that the scene had completely changed. He was surrounded by withered tombs and bones. There wasn't a way back at all!

"Seriously?"

Suddenly, Han Fei felt someone watching him and hurriedly looked back.

What he saw made his scalp tingle. This was because five youths were smiling at him under the monument.

Yes, smiling.

Aren't these f*cking corpses? Shouldn't they be expressionless with glassy eyes? Why are they smiling at me?

There were five of them—three men and two women. Some carried armor boxes, some carried daggers, and some held poles...

"It's over. I'm courting death. Why was I so reckless just now?"

At this moment, information appeared in Han Fei's eyes.

<Name> Spirit Guardian Corpse

<Introduction> An ancient cultivator perished, leaving behind a wisp of his soul, which was refined into a corpse puppet by strong cultivators. It retained very few memories and switched into an undead creature. Spirit Guardian Corpses exist for the purpose of guarding spirits. They are all voluntarily reincarnated undead creatures. Their strength remained at its peak when they were alive. Those who are not human will be killed.

<Level> 59

<Quality> Undead

<Contained Spiritual Energy> None

<Collectable> None

<Unabsorbable>

Upon reading the introduction, Han Fei couldn't help but be surprised. Weren't these gravekeepers? Usually, one chose to guard the grave because he couldn't bear to part with the dead. Otherwise, who would be willing to guard a grave forever?

However, there was a line in the introduction: "Those who are not human must be killed." It was interesting.

He was a human!

Therefore, these spirit guardian corpses wouldn't really kill him?

Just as Han Fei was hesitating about whether to fight...

Suddenly, one of the spirit guardian corpses spoke.

The spirit gatherer said, "Humans can survive. If you defeat us, you can pay respects."

Chapter 1065: The Strongest Combination

Han Fei smiled awkwardly. "Hi!"

Han Fei smiled. "Do you still have your memories?"

However, no one answered him. Instead, they took up their respective formations.

Han Fei sighed. So smiling doesn't mean friendliness! However, it's good that these people won't fight to the death with humans. Otherwise, I'd have to think of a way to inform Luo Xiaobai and the others. As for worship? It should mean worshipping this monument, right?

Han Fei seemed to understand something. In fact, the main purpose of the Undying Soul was this monument, right? So there would be corresponding benefits after paying respects to the monument?

However, on second thought, Han Fei felt that something was amiss.

Although the Golden Bone Jars were difficult to tackle, they would be tackled in the end. No matter how powerful the five-man team was, there were only five of them. The Ideal Palace didn't only have the ten geniuses. Beyond the ten, there were definitely many other geniuses.

Could it be that he couldn't beat the five of them?

Han Fei didn't dare to be negligent. He activated the Devil Change and chewed on the mint leaf in his mouth. Opening his Yin-Yang Divine Eye, he took a step forward and the Golden Giant formed by his invincible will appeared.

As an experienced fighter, Han Fei naturally wouldn't make the lowest mistake of underestimating his opponent.

With a step, the Six-Spirit Armor attached to his body, and the Void Lines floated out. With a swoosh, Han Fei disappeared from the spot.

The moment Han Fei moved, the opponent's hunter had already disappeared. The manipulator raised her hands, and a towering tree rose from behind her. The thousands of vines were like steel cables and long black iron whips that lashed the air with crackling sounds.

BAM!

The armorer smashed the box to the ground. When the box opened, a thousand streaks of light swept across the sky like streams of light.

When the spirit gatherer raised his foot, a series of chains appeared. Just like a mechanical technique, one small array after another quickly lit up with a clicking sound. The embryonic form of the array instantly appeared.

As for the soul warrior, with his body as the center, his aura surged as though a mini-universe had erupted. The long staff in his hand burned like heavenly fire.

"Shoot!"

Han Fei was stunned. Are you kidding me?

"Gulp!"

Han Fei swallowed. His first reaction was that these people couldn't have been Hidden Fishers when they were alive. He didn't know about others, but as a spirit gatherer, did he know how to carve arrays?

He was clearly holding a machine gun and firing wildly. Every bullet fired was equivalent to setting up a formation. This speed was twice as fast as the spirit gatherer he had just met!

Also, why did the soul warrior feel like he was even stronger than when Tang Ge fought with all his might?

As for the manipulator, are you a f*cking manipulator? A hundred-meter-tall tree just appeared with a whoosh? I wonder how Luo Xiaobai will react when she sees it.

As for the armorist, there was no need to say anything! The speed at which he attacked was like a rainbow that blotted out the sun. Was he an armorist?

Before he could think further, Han Fei suddenly felt a cold light appear at his neck.

"Hiss! That fast?"

Swish!

Han Fei's figure suddenly disappeared. However, just as he appeared, the cold light gave him the feeling that it was following him like a shadow, as if it was always sticking to him.

"Holy sh*t, can it keep up with my flash speed?"

Han Fei's eyes turned cold. A golden shield formed by his invincible will appeared in front of him.

"Chila!"

Amidst the flickering flames, Han Fei immediately felt the sharp aura of metal erupt behind his head.

Crack!

The Six-Spirited Armor shattered as the golden giant struck out with one hand, but the figure had long vanished.

Hiu! Hiu! Hiu!

Countless steel cables shot out like ten thousand arrows in an instant. At the same time, a thousand streaks of light descended like rain.

Han Fei was shocked. What kind of cooperation was this?

Too fast! It was almost too fast for Han Fei to react.

Han Fei's body was like a phantom, drifting between the countless steel cables and the rainbow. From time to time, the Blood Drinking Knife would block, and his body was almost twisted into a fried dough twist.

At that moment, Han Fei didn't even consider using the 64-Dimensional Fish Dragon Dance. Because this scene was too intense, the rhythm of the battle was too quick. Han Fei used the Fish Dragon Dance to its peak, subconsciously.

Ding! Ding! Ding!

“Million Knife Art.”

The Infinity Water suddenly appeared and spun crazily around Han Fei, forming a blade storm. The Void Lines were retracted and directly locked onto the hunter who was floating everywhere and couldn't be seen at all.

BAM!

The endless saber wave storm shattered as an extremely huge staff shadow struck across the sky. It was like a small mountain that shattered the Million Knife Art.

At that moment, a hundred formations were activated at the same time. The illusory images in front of Han Fei flickered faster than lightning.

“F*ck you!”

Han Fei was stunned. Why didn't the big clans arrange for people to challenge the Undying Soul realm together? Such an attack... In an instant, those who were weaker than the top ten geniuses were basically doomed.

Even though Han Fei had tried his best, he could only barely dodge. If a Hidden Fisher had such strength, how could ancient humans be defeated?

Han Fei was the first to doubt it. If all of them had such strength, the ancient humans might be able to attack the sea demons' lair.

Explode!

Without hesitation, Han Fei detonated the Infinity Water and struck dozens of small arrays, shattering the steel rope vines.

With a flip of his hand, he slashed diagonally with the Draw. With his other hand, he clenched his fist and struck out with the Nine Palaces' Dragon Roar.

Boom...

As soon as the explosion happened, the thousands of sword shadows seemed to transform into rays of light and slashed at Han Fei and the Golden Giant.

Ding! Ding! Ding!

In midair, Han Fei sensed the cold light again. Knowing that the hunter was here, he flipped his palm and summoned the law of gravity, using the highest level of the law of gravity, random gravity.

Han Fei's body rolled in midair, and dozens of steel cables appeared on the ground, trying to catch him.

Swish!

Han Fei flashed a hundred meters away, his back covered in cold sweat.

“Perfect. Too perfect.”

In just three seconds, Han Fei felt a chill run down his back, as if he had experienced a great battle. He had used all the skills he had at his disposal, which were at least twenty of them, but he only narrowly avoided their attacks.

Han Fei had to admit that in terms of teamwork, the five of them were even better than his five-man team.

Even if Xia Xiaochan was still in the team, it was unlikely that the five of them could reach such a level of cooperation.

At this moment, the formation appeared again. Han Fei's Yin-Yang Divine Eye flashed, and the power of his soul directly destroyed the other party's formation.

The Void Lines all retracted.

Under such a rhythm, Han Fei was very certain that the Void Lines couldn't capture anyone. The only thing he could do was to deal with this hunter... As long as the other party approached, he would have a chance.

Rainbow light spread out.

Han Fei didn't know what kind of an armorist this was. How could armorers fight like this?

Han Fei dodged again and deliberately revealed a flaw. One of his legs was caught by the vines.

Indeed, it was very sad as the cold beam shot out from his abdomen.

"Holy sh*t, stop it!"

Han Fei was soul-shocked. He punched down and the Void Lines spewed out.

Hum!

Suddenly, Han Fei realized that he had slowed down by 20%. It turned out that there was an array formation under his feet that reduced his speed.

Swish!

Han Fei dodged again. If he didn't dodge, he would be castrated.

Thud! Thud!

The Million Knife Art returned and surrounded Han Fei.

Then, Han Fei saw the armorist disappear, and a spinning fireball fell from the sky.

On the other side, the soul warrior tore through the air. The staff shadow was thicker than the stone pillar formed by the Embroidery Needle. It was like a pillar that held up the sky. The next second, it smashed over.

"Let me..."

At this moment, Han Fei really wanted to curse. How could he deal with these alone?

“Hoooooo!”

The law of gravity descended around him. Han Fei clenched his fists, his eyes cold and his anger rising. Two Sacrificing Punches exploded at the same time, one punching the sky and the other punching the ground.

His soul was colliding with the opponent’s spirit gatherer. The Million Knife Art was sweeping away the steel cables and vines, and the Golden Giant was attacking the void, hoping to stop the opponent’s hunter.

Han Fei felt that this battle was too difficult! Little did he know that outside the Undying Soul realm, there was an uproar.

On the stone monument, Han Fei’s name rose to 51st place. The rise was so great that it left everyone speechless.

People from the big clans were shocked.

“How is this possible? He jumped to 51st place? What’s going on with Han Fei?”

Someone was surprised. “That’s not right. The others from the Thug Academy are definitely there too. Since they aren’t on the rankings, it means that they lost the first round in the depths of the Undying Soul.”

Someone wondered, “Could it be that Han Fei was exploring the soul realm alone?”

With that said, everyone looked at the person who had spoken as though they were looking at a fool.

What kind of joke was this? Although they hadn’t personally come, the top ten geniuses had once passed the soul realm. Furthermore, some of the ten had joined forces to pass the soul realm many times.

Even so, Jiang Nanyu, who was ranked the highest on the Genius List, was only ranked 59th. Yet, Han Fei had become 51st? Didn’t this mean that Han Fei was stronger than Jiang Nanyu?

A member of the Luo family secretly left to quickly inform Luo Jiutian of this news.

People from the various families also left to deliver the news.

Wang Santie, who had turned into a youth, felt his scalp tingle when he saw this scene. What kind of person is Han Fei? Although the Undying Soul realm only ranked second, it was extremely difficult to pass!

Yang Nanxi was powerful enough, right? She was ranked 23rd in the Demon Plant Soul Realm, 26th in the Blue Sea Soul Realm, but what about the Undying Soul Realm? She was ranked 89th and had almost failed to enter the rankings. What did that mean?

As for the ordinary people, they could only sigh. This Ideal Palace was probably going to produce a monster.

Chapter 1066: Battle to Break Out

As the discussion in the outside world continued,

Han Fei's scalp tingled.

Or rather, this wasn't a fight at all. If he didn't have enough trump cards, he would have been defeated countless times by now.

However, Han Fei keenly noticed that a stone monument appeared in the void, but unfortunately, he didn't have the time to look at it.

With Little Fatty's help, his strength increased a little. If possible, Han Fei would definitely let Little Gold possess him, but with the Phantom Glass Wings, there was nothing he could do!

In fact, Han Fei couldn't be seen under the monument at all. The endless steel cables pricked the area like a porcupine.

The neon light almost covered the entire area within a few thousand meters. In the illusory void, apart from the sound of clashing weapons, nothing else could be seen.

Han Fei felt that every second was exciting. He had been ambushed by the hunter more than a hundred times, but the Void Lines hadn't caught him once.

It wasn't because the Void Lines weren't good enough, but because the other party's spirit gatherer was too annoying. Han Fei felt that even if Old Jiang was here, he might not be faster than this person.

Boom Boom Boom!

Clang! Clang!...Ding! Ding!

After half an hour, Han Fei's soul power and his body's reaction rhythm had reached a perfect level.

In fact, through the Yin-Yang Eyes, Han Fei could still see the weaknesses of these five people. For example, this hunter seemed to be able to flash in the void and attack in the void like Chu Linyuan.

The void here wasn't the space Han Fei was seeing now, but the real void.

However, every time the hunter appeared, there would be a void quake. Although... the quake was extremely fast! If Han Fei was given a chance, a one-on-one chance, he could definitely defeat her.

However, as a perfect team, these people definitely knew their strengths and weaknesses very well. Even if everyone had flaws, they would work together to eliminate them.

Han Fei was quite uncomfortable at this moment and was highly focused. He felt as if he was in a storm.

However, Han Fei had barely gotten used to it.

It wasn't that he hadn't fought Luo Xiaobai and the others before. It was just that it was very early. Later, when Xia Xiaochan left, they rarely sparred with each other.

However, at this moment, the long-awaited experience overwhelmed him again.

Even with the protection of the Yin-Yang Divine Eye and his super powerful soul, Han Fei was still inevitably attacked.

This was because not every attack could be dodged. Some attacks had two attacking means. Even if you could dodge the first, you couldn't dodge the second.

This allowed Han Fei to unleash the full potential of his close combat techniques. Almost every three seconds, Han Fei would switch between seven or eight footwork techniques.

Almost every moment, Han Fei had to pay attention to the state of his muscles. He had to dodge whenever he needed to borrow strength, when there was a slight deviation, or when he had to flash out...

After fighting for an hour, Han Fei already felt numb. Although his body was dripping with blood, he didn't panic at all. He even entered a rather magical state.

At this moment, Han Fei was slightly dazed. His body would subconsciously react according to the source of the danger.

On the void stone monument, Han Fei's name was rapidly rising. At this moment, his name had already jumped to 18th place. In the outside world, there was a huge commotion. Everyone was horrified.

Two hour passed.

Han Fei's name had already appeared in sixth place.

Outside, Chu Qingyan and company had already arrived.

At this moment, their expressions were solemn.

Yang Nanxi said, "Can he reach sixth place in that place?"

Sun Wu gritted her teeth and said, "Actually, we should have taken action this time."

Chu Qingyan shook her head. "It's not the right time. The Undying Soul realm isn't like other Soul realms. The undead creatures there don't attack selectively. They only attack indiscriminately. You can't take them there. Even if you go there, how many people do you think can withstand the combined attacks of those five?"

Li Xuan looked at the stone monument and was silent for a while. "We've underestimated him. Regardless of whether he has the help of others from the Thug Academy, this result has proven their strength. The people from the Thug Academy are indeed not to be underestimated. I won't get involved in this matter for the time being.

Sun Wu immediately gave him a sidelong glance. "At this point, do you really think you can stop just because you say so?"

Li Xuan sneered. "Zhang Mingkun didn't come. I'm afraid that fellow has already expected it. Don't forget that we are at the peak of the Hidden Fisher level. We can't use the power of the laws! At this level, you know that you are no match for him, but you still want to court death. What's the difference between you and a fool?"

Chu Qingyan said, "This time, Diwu Weiguang and Luo Jiutian aren't around."

Li Xuan scoffed. "So what? They've already passed the Undying Soul realm. Do you think their strength will still be the same as in the Demon Soul Plant realm after they come out?"

This question made Chu Qingyan and Yang Nanxi's faces sink. Indeed.

The Demon Plant Soul Realm was only about battles against demon plants, while the Undying Soul Realm tempered one's combat skills to the extreme. Upon reaching the extreme, one would gain insights.

They had benefited greatly from this place and their strength had improved significantly. Han Fei and the others weren't fools. How could they have entered this place without finding anything?

Just as Li Xuan was about to leave and everyone was thinking of a solution, a Chu family member suddenly came to Chu Qingyan and said, "Miss, Cao Qiu has entered the Ideal Palace."

"Huh?"

Everyone was taken aback as their expressions darkened.

Chu Qingyan immediately said, "Cao Qiu is alone?"

The man said, "Cao Tian and Cao Jiaren also came in. However, the three of them didn't go together. Cao Qiu went to the Demon Plant Soul Realm alone."

Seeing Chu Qingyan remain silent, the person said, "Miss, should we..."

Chu Qingyan glared at the man. "Do you think ordinary means are enough to deal with someone who has awakened the bloodline of the War God?"

Chu Qingyan said, "Let's go. We won't cause them any trouble before we reach the fifth soul realm."

...

At this moment, Han Fei didn't even have the chance to use the Divine Healing Technique on himself.

However, he suddenly realized that something was amiss. He realized that the five of them were working together in such an intricate manner that his Void Lines could only protect him and not attack.

However, this perfect cooperation made Han Fei suspicious.

"They seem extremely powerful, but they haven't exceeded the limits of the so-called top geniuses. Their combat strength fluctuates too little. They seem to have borrowed some kind of power."

Boom!

Han Fei exploded the Infinity Water and cast the Divine Healing Technique on himself to observe these people from all angles. Then, in the neon light, he felt as if there were invisible threads that were slightly swaying in the void.

"Eh! What's that?"

A strange light bloomed in Han Fei's eyes.

He condensed his will and protected his body, hoping to take a breather.

Han Fei's eyes quickly passed through the layers of neon fog and vaguely sensed that there seemed to be a vein of the world, which was directly connected to the five of them through the monument.

Just like the Void Meridian, if Han Fei hadn't felt that there was something wrong with their strength, he might not have noticed them even with the Yin-Yang Divine Eye.

"Was it the monument that gave them power?"

Han Fei's heart skipped a beat. No wonder after fighting for so long, he could only barely hold on and couldn't injure any of the five.

If they really had such talent, didn't that mean that all five of them had the potential to become kings?

After all, he didn't have such a strange feeling when he faced Chun Huangdian. Even if the five of them were slightly inferior to Chun Huangdian, they definitely had the potential to become monarchs. The ancient cultivators would only protect the five of them and definitely wouldn't let them easily perish!

SWISH!

With a plan in mind, Han Fei began to flash crazily...

The hunter that followed like a shadow needed Han Fei to flash.

This was because the moment he flashed, he had the greatest flaw.

Smack!

Han Fei's Six Spirit Armor shattered again, and his body was stabbed in the abdomen.

Of course, the other party wouldn't stop. The soul warrior's body was like flames as he struck out with his staff, instantly striking Han Fei in the body.

The moment Han Fei flew out, the steel vines in the air grabbed him and pulled him to the tree.

At that moment, Han Fei saw the armorist smash over like a meteor. With a thought, a terrifying electric current tore through the air.

"Chila!"

Little Gold leaped forward and struck the void meridian with Lightning Blade.

Although he was injured, it was worth it.

Han Fei successfully held back the three of them with this blow. The spirit gatherer was on the ground, so the armorist in the sky was the best breakthrough point.

At the moment the Lightning Blade blasted out, the Infinity Water transformed into ten thousand blades that swept towards the manipulator. However, the direction of the sweep suddenly changed and struck the void.

Smack!

A slight crack sounded. At that moment, the armorist and the opponent's manipulator in the sky turned into nothingness and vanished.

And on the void stone monument, Han Fei's name suddenly rushed from sixth place to second place. Han Fei's name even wanted to reach first place, but after a few attempts, it failed and finally fell to second place.

When Han Fei landed on the ground, the Coiling Turtle Array appeared beneath his feet and the Invincible Golden Body emitted clanging sounds. This was the result of Han Fei landing in the Spirit Gatherer's killing array.

In exchange for the two of them disappearing, Han Fei had made a killing.

When the neon light and the thousands of steel cables disappeared, the surroundings became emptier again. However, Han Fei didn't dare to be careless. Although he had resolved two of them, he had fallen into the array and the danger hadn't decreased.

"Hmph! You think I don't know array formations?"

Chapter 1067: Human Hero Monument

In the beginning, Old Jiang didn't give Han Fei the Great Thousand Pill Sutra, but the Spirit Gathering Scripture. That was right! With Han Fei's personality, how could he study alchemy every day? He couldn't even have enough time for fighting.

With the Spirit Gathering Scripture as the catalyst and Old Han's guidance, he could supplement it with the Ocean Book. In fact, Han Fei didn't lack methods to set up arrays. He just needed time to familiarize himself with them.

Once Han Fei had enough time to consolidate and use these arrays, he was confident that his achievements in arrays would be at least as good as Old Jiang's. It would be easy for him to kill law-enforcers with arrays.

In the past, Old Jiang would always set up some arrays in the Twisted Forest for Han Fei to break. Now it was a real battle, because Han Fei's choice just now gave the other party time to repair the array.

Once the array was activated, the terror of a spirit gatherer was shown.

At this moment, Han Fei seemed to be in an illusion. He couldn't see the hunter, the soul warrior, or the spirit gatherer.

Surrounding Han Fei were more dense blades and swords than the Million Knife Art. Some of the terrifying attacks emerged from the ground, some reached out from the void, and some turned real from illusions.

Shua!

Amidst the thousands of attacks, a flash suddenly appeared. Han Fei immediately turned around and smashed the mysterious hunter's fatal blow.

Bang!

As soon as the attack was broken, Han Fei felt a tremendous force on his body. He was blown away by a rod and crushed on the ground.

Bang!

The terrifying force caused Han Fei to break a defense array. While he was blown away, almost a hundred attacks landed on him and Han Fei's injuries worsened.

However, Han Fei did not panic. As he stepped on the ground, a series of Coiled Turtle Arrays appeared one after another.

However, when the sixth array appeared, one of them exploded. It turned out that the other party's spirit gatherer was fighting with him for the right to carve the array.

Han Fei smiled. That was what he was waiting for.

At this moment, although there were staff shadows, daggers, and thousands of swords, Han Fei suddenly scattered the Void Line in all directions.

Of course, Han Fei didn't do this to hook them, but to make them realize what was going on and buy him time.

Although it was only a short time, Han Fei had already imagined a large amount of spiritual energy and sent it to the ground.

Boom!

The ground began to shake violently.

This was supposed to be a farming method. There were so many plantations in the Thug Academy, so he naturally couldn't water them with spiritual energy. It was Han Fei's usual method to water them all at once.

When the spiritual energy on the ground exploded, the array on the ground started to become unstable. The other party's spirit gatherer was forced to stabilize the array and let the spiritual energy out continuously.

At this moment, it was time for Han Fei to break the array. The law of gravity descended and spiritual energy surged on the Million Knife Art, breaking through the armor like a drill.

Smack!

Han Fei drilled a hole in the array. As soon as Han Fei appeared, he flashed almost at the same time as the hunter.

Swish! Swish! Swish!

Without the manipulator and the armorist, a hunter could not stop him! Seeing Han Fei rushing at him, the other spirit gatherer immediately retreated, chose to give up the array and cast Wind Escape.

"Heh! You wanna run?"

“The Draw!”

The third Void Vein was cut by Han Fei and the fleeing figure of the spirit gatherer stopped.

Han Fei sneered and stopped. The hunter slashed at his neck. However, just when he was about to succeed, Han Fei suddenly stopped. Han Fei tilted his head and grabbed at the air with one hand, grabbing the hunter out.

“Ha! Without the protection of the spirit gatherer, how can you block my Void Line?”

After killing the hunter, only the soul warrior remained.

On the Void Stone Monument, Han Fei’s name appeared again, directly at the top of the list.

Han Fei shook his head and put away the Infinite Water and the Blood Drinking Knife. A rusty rod appeared in his hand. What else could it be but the Embroidery Needle?

Han Fei grinned. “Now that your perfect combination has been broken, I’m definitely going to win this battle.”

...

In the outside world.

“First place, first place again.”

“Oh my god! Who is this Han Fei? He’s first in the Undying Soul Realm?”

“There’s a show to watch this time! No wonder the Thug Academy wants to return! Such a prodigy is rare, right?”

“This time, the big clans will have headaches. The number one on both lists. This Han Fei is probably more talented than Jiang Nanyu!”

Chu Qingyan and the others had already left. However, they had already received the news halfway.

Yang Nanxi exclaimed, “Number one?”

Someone said awkwardly, “He is indeed number one.”

Chu Qingyan narrowed her eyes. “Only Han Fei?”

That person nodded: “Only one, the other four are not on the list.”

Chu Qingyan said, “In the fifth soul realm, find a way to separate Han Fei from the others. Kill him and leave the others alone.”

Yang Nanxi licked her lips. “What a powerful fellow. I really want to see what kind of opportunity he obtained in the Undying Soul Realm to actually rank first.”

Sun Wu’s eyes flickered as she thought, Han Fei must die! If he doesn’t die, he will definitely become a great enemy of the Sun Family.

...

In the Undying Soul Realm.

Han Fei panted slightly.

It took him more than half an hour to finish off this soul warrior in close combat. With this ability, he was much stronger than Chu Kuangren.

At this moment, Han Fei cast a few Divine Healing Techniques on himself before he came to the monument.

He raised his head and looked up. For some reason, he was moved.

It was unknown if it was this monument or the people it commemorated were worthy of respect, or the monument itself gave off a solemn feeling.

Anyway, when Han Fei looked up, he felt very small.

Han Fei thought of what those people had said before: Only when you beat them can you pay your respects to them.

Han Fei thought for a moment and bowed three times to the monument. After all, these people died to protect mankind.

They were indeed worthy of respect!

After Han Fei bowed three times, the top of the tower suddenly shone with golden light, and a golden page slowly fell into Han Fei's hand.

"This thing again?"

Han Fei reached out and took the golden page. He saw strange and incomprehensible lines but no words.

"What is this? Opportunities in the seven Soul realms? Doesn't that mean that every soul realm has a golden page?"

Han Fei couldn't help but think, This is only the second Soul Realm! There are still five more Soul Realms. This is a bit difficult!

Han Fei was confident that he wouldn't have been able to defeat the five people if he hadn't comprehended the invincible will and the magic use of arrays.

Even if he could hold on for a while, he would be defeated within a hundred seconds.

After all, the slightest mistake could lead to a thousand miles of error; a single mistake could lead to a complete loss.

After examining the golden page for a moment, the golden page slowly faded into his body again.

Only, even though this golden page disappeared, the golden light on the monument was still there, not fading.

In the haze, Han Fei seemed to see an illusory image reflected on the monument.

The picture was shown in the corner of the city gate of a giant blue stone city. The city was not shown. In Han Fei's vision, there was a torrential wave. Giant turtles lay on the sea surface, and octopuses stretched their tentacles to the sky. The thousand-foot-long sword energy was glowing like the sunset. Strong masters were emerging in large numbers.

That was the scene in the distance. Nearby, spiritual energy light surged and multicolored lights filled the city. Every ray of light was released by a person in battle.

In the waves, shrimp soldiers raised their spears, crab generals carried hammers, and bug soldiers wreaked havoc.

In the smoky battlefield, Han Fei's eyes found the five people who were fighting with him.

However, what he saw was not how powerful they were, but rather the scene of the five of them walking together, blocking a thousand troops, bravely facing death.

The moment Han Fei saw them, the five of them were covered in blood. The manipulator's big tree spiritual plant was already mostly bald. The armorist's armor box was already lost, and he held two knives in his hands, looking valiant and fearless. The soul warrior took the lead and swept his staff.

The spirit gatherer seemed to have run out of spiritual energy. The female hunter was protecting him. However, one of the hunter's arms was broken.

At that moment, the five of them seemed to be talking to each other. Suddenly, they turned around and grinned in Han Fei's direction, and their smiles looked careless, helpless yet nostalgic.

In the next moment, the wave collapsed and the five of them disappeared into it.

Han Fei was very moved by this scene. Watching them die unflinchingly, he couldn't help but recall the scene when he first saw the five people, when they were all smiling.

The last scene in Han Fei's eyes was no longer those five people, but everyone on the battlefield. A hazy white light suddenly appeared on their bodies.

As the white light gathered towards the sky, they saw a huge hand crossing half of the city. It stretched out its fingers and wrote the word "person".

Han Fei narrowed his eyes, as if he had been stabbed in the head by the astonishing power of the word "human".

It was not the power of a single person. It was the white light emitted from the bodies of countless people. That was how the word "person" was written. It was pushed all the way to the end of his vision.

The scene ended.

The image in his eyes disappeared, but Han Fei froze for a long time. After a long time, Han Fei finally exhaled slowly. "Human power."

Chapter 1068: Passed

Han Fei's heart was heavy. What did humans experience in the Age of Doom?

Han Fei had seen this scene in Heavenly Desolate City. In the end, even Dangling Fishers had to fight bravely and die.

And now, this Monument of the Returnless could be called the graveyard of the Returnless! It had also witnessed the same history.

If Heavenly Desolate City was a city that had collapsed, then which city did the cemetery of the Returnless memorize?

At least, one thing was certain: whether it was Heavenly Desolate City or the unknown graveyard of the Returnless, they should have collapsed at about the same time.

The humans had fought with all their might, but in the end, no one knew who had turned the tide and created the floating islands, allowing the humans to slowly recover to this day.

“The price is higher than I thought!”

Han Fei couldn't help but sigh. How many places like Heavenly Desolate City and the graveyard of the Returnless were there?

Han Fei's heart trembled. How many people had died in the battle?

At this moment, Han Fei was even more curious about the Age of Doom.

Was it really impossible for humans and sea races to peacefully coexist? Old Shu Shan had once said that there was a period of harmony between humans, sea races, and demonic plants. When was that?

What he was even more curious about was: just how much hatred did the humans and the marine race hold against each other? How could they disregard the lives of billions of living creatures?

Han Fei felt that no matter how bad he was, he would never do such a thing.

Not only humans, sea demons, demonic plants, all living beings had emotions.

Even the sea demons had emotions. Every living being was an independent entity. They had love, joy, and sorrow in their lives. What was worth them sacrificing everything for?

Han Fei clenched his fists and sensed that the golden light on the monument was retracted. When he looked back again, he had returned to the outside world.

Under the monument, five crystal bone jars stood still, unmoving.

But at this moment, in Han Fei's eyes, the five bone jars were five tomb keepers. They fought to the death when they were alive, and their souls were still intact after they died.

“Sigh!”

Han Fei bowed three more times at the Monument of the Returnless before he turned around and left.

He guessed that the last scene he saw was definitely not meaningless.

Perhaps the greatest meaning was to warn the descendants of humanity:

Once upon a time, there was a group of ancestors, young or old, guarding the continuation of human civilization with their blood and lives. To this day, their will remained, protecting us humans.

For some reason, Han Fei felt that he had overlooked something.

At this moment, Han Fei's heart was full of a sense of urgency. The war between the Scattered Stars Island and the Thousand Demon Valley was inevitable, and it was close at hand.

Thousand Star City was behind the Scattered Stars Island, and it was said that there was a sea demon royal city behind the Thousand Demon Valley. At that time, if there was really a great war again, how many people would have to die?

Han Fei suddenly felt proud.

No matter what, he had to become stronger!

In this world, only the strong could change the situation and determine the result of a war. He could not see that far. All he could see was the war seven years later.

What was laughable was that the big clans of Thousand Stars City were still fighting amongst themselves in search of the Heavenly Palace. They did not know that once the sea demons obtained the remains of the king, they would likely face even more terrifying consequences.

At the very least, this might concern the safety of the Yin-Yang World.

Han Fei soon found Luo Xiaobai and the others.

Actually, the four of them were already very close to the graveyard of the Returnless. However, when he saw them this time, he realized that the four of them seemed to have changed.

Le Renkuang was the most obvious.

Han Fei remembered that this guy was still using the Ultimate Defence to block the enemies' attacks, but at this moment, all four of them were wearing dark blue gold-plated armor and were fighting two ancient paragons.

Han Fei remembered that Le Renkuang had an Armor Cover Technique, but the quality of the technique was equivalent to his Six Spiritual Armor Array, so it wasn't quite useful.

However, it was obvious that the dark blue armor was extraordinary. Zhang Xuanyu and the soul warrior exchanged blows, and ripples appeared on the armor. More than half of the power was removed by the armor.

In addition, Le Renkuang's Sky Swallowing Technique had changed into a huge mouth full of sharp teeth that looked like a ferocious mouth. The suction force was even stronger, and the original suction became voluntary devouring. Explosive fruits were swallowed by the mouth in the void.

As for Zhang Xuanyu's change, Han Fei was a bit frightened. His Momentary Time seemed to have changed too. He was far away, and the spear gleam didn't seem to reach out at all, but in fact, the spear had already landed on his opponent.

"F*ck, time froze?"

Han Fei was a bit frightened. Zhang Xuanyu actually froze time within his limits? How did he do that?

Clearly, the flow of time outside the range of the spear gleam was normal and no one was affected. However, wherever the spear gleam pointed, the time was frozen. In other words, the enemy did not even know that Zhang Xuanyu had launched an attack.

However, he couldn't see any changes on Luo Xiaobai. It seemed that her speed of summoning spiritual plants had increased. It seemed that she could summon any creature she wanted with a thought. This must be the power of the Divine Manipulator family. As for whether Luo Xiaobai had learned anything, Han Fei couldn't tell.

As for Li Luoluo, she still controlled the bug army. However, after those bugs died, they seemed to be devoured by other bugs and mutated.

At this moment, Le Renkuang had already swallowed the manipulator's Endless Fruit. Zhang Xuanyu attacked with his spear and killed one of them. Then, he attacked and killed another enemy as assisted with Luo Xiaobai's trap and Li Luoluo's tangling.

Han Fei was slightly relieved. Zhang Xuanyu's Time Freeze was not unbreakable. He needed to build up his power. Although it seemed to be very powerful, as soon as he used it, others wouldn't just wait for him to attack. Besides, Zhang Xuanyu needed some time to build up his power, and he needed someone else's help.

"Phew! That's really scary. If he really used such a strange spear technique in an instant, I'm afraid no one would be able to block it."

Everyone had noticed Han Fei.

At this moment, coming to Han Fei, Zhang Xuanyu put his arm around Han Fei's shoulder and said, "Fei, did I look awesome? Let me tell you, I suddenly unleashed my potential to the maximum at the critical time. This time, you won't be able to dodge my attack. Aren't I awesome?"

Han Fei patted his shoulder and said, "I've seen it already. Basically, you still won't be able to touch me in combat. You'd better sneak an attack on others."

Zhang Xuanyu : "..."

Le Renkuang said in amusement, "What about me? I just discovered the enhanced version of the Sky Swallowing Technique. And this armor, do you see it? It's probably comparable to a semi-divine weapon."

Han Fei thought for a moment. "The quality is indeed comparable to a semi-divine weapon, but except in the Ideal Palace, your strength won't be enough to last you for a long time. Of course, it's not bad for you to use it alone. For all of us, we all have semi-divine armor, so it'll be somewhat useless."

Le Renkuang: "..."

While Zhang Xuanyu and Le Renkuang were embarrassed, Luo Xiaobai asked directly, "Why are you back?"

Zhang Xuanyu immediately said, "Yes! Didn't you go to the front? And you were gone for a long time... How was it? What did you learn?"

Han Fei said, "You'll see what I learned in the future. But you'd better go to the graveyard of the Returnless first."

"The graveyard of the Returnless?"

Li Luoluo pointed at the distant, faintly discernible monument. "Is it that one?"

Han Fei nodded. "Yes, that one."

Li Luoluo asked, "Is it very difficult to break through?"

Han Fei thought for a moment and looked at them. "Very difficult."

Luo Xiaobai and the others frowned.

For Han Fei to say "very difficult", it was clear that the place was not to be underestimated.

Luo Xiaobai frowned immediately. "Are people likely to be killed there? Did you pass it?"

Han Fei shrugged. "People aren't likely to die there, but you should try it first."

...

Han Fei watched Luo Xiaobai and the others enter the Monument of the Returnless. It wasn't that he didn't want to go in with them, but when Han Fei approached, Luo Xiaobai and the others disappeared, so he just stayed outside. It seemed that the graveyard of the Returnless was no longer open to him.

However, it was similar to what he had imagined. Within ten seconds, Li Luoluo was the first to be eliminated and appeared outside the graveyard of the Returnless.

However, Li Luoluo was severely injured. The moment she came out, she collapsed on the ground, her soul unstable.

Han Fei cast the Divine Healing Technique on her and asked in surprise, "Were you injured?"

After a while, Li Luoluo recovered a lot and looked at Han Fei in shock. "I was stabbed to death as soon as I entered. What kind of combination is that? How can anyone pass such a fierce battle as a Hidden Fisher?"

Han Fei thought for a moment and said, "Let's wait and see."

Han Fei was puzzled. That's not right! Is it because I won that I wasn't seriously injured?

After about 80 seconds, Le Renkuang came out with a whoosh and looked at Han Fei in shock. "Fei, why didn't you come in? I can't defeat them! My Ultimate Defence was blown up."

As soon as Le Renkuang finished speaking, Zhang Xuanyu came out with a dumbfounded look, as if he was wondering who he was, where he was, and what he was doing.

Han Fei patted Zhang Xuanyu's shoulder. "Yuyu! Reality is cruel. I know you can't last three seconds without Fatty."

Zhang Xuanyu was speechless. "I just want to know how many you killed? Anyway, I only killed one."

Han Fei was stunned. "You killed one?"

Le Renkuang said with a trembling face, "I created the opportunity for him."

As for Luo Xiaobai, she only came out after about 50 breaths.

The moment she came out, Luo Xiaobai took a deep breath. "I can't defeat them. I can only kill the manipulator."

Immediately, everyone looked at Han Fei.

Zhang Xuanyu asked, "How long did you last?"

Han Fei suddenly grinned. "I passed it."

Everyone : "..."

Chapter 1069: Blue Sea Soul Realm

Han Fei's words stunned everyone and they all gasped.

Le Renkuang was almost cross-eyed. "Huh? You... passed it?"

Zhang Xuanyu's face stiffened for a moment. "No, Feifei! It's not embarrassing if you lose, but don't brag. The insane speed, the terrifying strength, the inhuman cooperation, and the arrays all over the ground, and you told me that you cleared this level?"

Luo Xiaobai was also stunned. "Really?"

Han Fei said unhurriedly, "Fine! Let me tell you the truth. I killed two."

"Hu!"

Everybody was relieved. That's right! Even if Han Fei were here, he wouldn't have been able to get through the battle.

...

Outside the Undying Soul Realm, figures were running in all directions.

The students of the Thug Academy were basically all on the list.

Luo Xiaobai took over Jiang Nanyu's position and ranked 59th while Jiang Nanyu became 60th.

Zhang Xuanyu was ranked 79th.

Le Renkuang was ranked 81th.

Li Luoluo was not on the list.

Initially, many people did not see Li Luoluo as a member of the Thug Academy. Hence, they did not show any concern for her.

However, the Thug Academy's four students were all on the list, and their rankings were so high that everyone was shocked.

Besides, Luo Xiaobai had directly taken over Jiang Nanyu's position. This made countless people speculate that Luo Xiaobai was a top prodigy on the same level as Jiang Nanyu.

Not to mention Luo Xiaobai, everyone was shocked that Zhang Xuanyu and Le Renkuang were on the list. Most people might not know what the graveyard of the Returnless was like.

However, the top ten geniuses were all ranked here.

Even if everyone's situation was different, the highest ranking was only the 59th ranked Jiang Nanyu had got.

If there were any special factors in the Demon Plant Soul Realm that made Han Fei rank first, such a thing happened twice in a row, so it was not a matter of luck.

Even Luo Xiaobai and the others didn't know that Han Fei had almost used all his combat skills in the previous battle.

Without the 64-Dimensional Fish Dragon Dance, he wouldn't be able to make it.

Without the third level of the Indestructible Body, he wouldn't be able to make it.

Without the Yin-Yang Divine Eyes, he wouldn't be able to make it.

Without the law of gravity, he wouldn't be able to make it.

Without the Infinity Water, he wouldn't be able to make it.

Without spirit gathering and arrays, he wouldn't be able to make it.

Without those fancy battle techniques and Ren Tianfei's previous training, he still wouldn't be able to make it.

...

These powers that ordinary people couldn't even possess were fully displayed by Han Fei alone. However, he barely won with his body as bait.

From this, one could see just how difficult it was to pass the graveyard of the Returnless!

When Luo Xiaobai and the rest walked out of the Undying Soul Realm, they looked at the stone monument immediately.

Wow!

"Huh?"

"Ah!"

Shocked, Zhang Xuanyu looked at Han Fei. "Fei, you, you, you... Didn't you just kill two? You..."

Zhang Xuanyu opened his eyes wide and looked at the first name on the stele, dumbfounded.

Le Renkuang roared and thought of a bunch of skewers out of nowhere. He bit them crazily and stared at the stele, breathing heavily.

Li Luoluo exclaimed in surprise, "Han Fei, did you really pass it?"

Li Luoluo was utterly shocked. If she hadn't been to the graveyard of the Returnless, then that would have been fine. But she had been there! Only by going there would she be able to understand how strong those five people were. That wasn't something that could be won by a sea of people, nor was it something that could be overcome by one or two prodigies!

If one had to describe those five people, it would be an army. As long as they were within their battle range, Li Luoluo could not think of anyone who could defeat them.

Luo Xiaobai looked at Han Fei deeply. "How did you manage to pass it?"

Han Fei smiled. "Maybe it's because of my strong physique! Otherwise, I wouldn't have been able to hold on."

Zhang Xuanyu glared at Han Fei. "Then why did you lie to me?"

Han Fei shrugged. "I told you, but you didn't believe me."

Zhang Xuanyu : "..."

At this moment, many people had already fled. These few killing gods were all here. What if they started a massacre?

Some people still believed that they wouldn't die in the ideal palace, so they stayed and observed Han Fei carefully.

Someone pointed and asked, "Which one is Han Fei?"

Someone replied, "That one, not fat or very handsome."

Han Fei's face darkened. Is this how you distinguish me?

Luo Xiaobai said, "Let's go! I don't like being watched."

Han Fei nodded and they quickly disappeared from their sight.

In the crowd, Wang San Tie rubbed his chin. I should be able to earn more money from these powerful people!

No, I have to think about it: What information can I get to trade for more resources from them...

"Wait! Why do I have to benefit from Han Fei?"

Suddenly, Wang San Tie shouted, "Everyone, I have the information of the Thug Academy for sale, which are the identities of Han Fei and his friends. If you don't buy it, it'll be a big loss for you. Perhaps their path just suits you. Come on, buy quickly..."

Someone looked at Wang San Tie in surprise. "How do you know that?"

Wang Santie sneered. "Yes, I know everything about the Thug Academy. As the saying goes, the path of a genius can be emulated. Some have worked hard for hundreds of years but have achieved nothing, while others have risen overnight. Let's see how everyone chooses this opportunity..."

Wang Santie's words moved many people. There weren't many weaklings who could come to the Ideal Palace, and they all had the capital to back them up. However, the road ahead was a long one, and no one knew where to go. Wang Santie's words immediately evoked the desire in their hearts. What if there was a chance?

Immediately, someone asked, "How much?"

Wang Santie spoke unhurriedly, "This information is only sold for a hundred people. It requires a hundred people to view it at the same time. Otherwise, wouldn't it be a loss if you sell my information? The price is not high. Ten intermediate soul fruits or one advanced soul fruit per person..."

"Shit, profiteer."

"Son of a b*tch, are you robbing us?"

"I must be f*cking crazy if I pay you this price."

Wang Santie said leisurely, "It's up to you whether to buy it or not, but do you still have any memories after leaving the Ideal Palace? Do you still remember the current results of the Thug Academy? Do you still want to know more about the Thug Academy? Sometimes, you have to be decisive and firm. That's all I have to say.

Someone's expression changed as he gritted his teeth. "Alright, count me in."

Someone looked at the direction where Han Fei and the others left. "Fine! If the news is false, I'll kill you."

Wang Santie was not afraid of this.

Ever since he left Sky Meditation Garden, he had been collecting information about Han Fei and the others. After all, it was hard for him not to suspect that the quake in Sky Meditation Garden had something to do with them.

The result had given him quite a shock. That was why he had first-hand information.

Of course, this information might not even be worth mentioning in the eyes of those big clans.

However, in the eyes of ordinary people, that was another story. After all, who from the big clans would spread information about the Thug Academy?

...

The Ideal Palace was an examination field. Those who came were undoubtedly going to the seven soul realms to improve themselves.

Other than the Seven Souls Realm and the Creation Temple, there were no other opportunities in the Ideal Palace.

Therefore, Han Fei's goal was the Blue Sea Soul Realm. It was hard to say whether they could pass this Soul Realm or not.

The Demon Plant Soul Realm and the Undying Soul Realm had brought them too many benefits. In just a few days, the effect was even comparable to their cultivation in the sea outside the Scattered Stars Island for a year.

Of course, they could not completely erase the credit gained from their overseas training. There was a saying that went, 'accumulation makes the best of the best'. Without sufficient accumulation, they might not be able to comprehend the more powerful forces outside of battle techniques.

Outside the Blue Sea Soul Realm, when Han Fei and the other three arrived, many people had already recognized them. After all, the name of the Thug Academy had caused a huge uproar in the Ideal Palace.

Looking at the thousands of people outside, Han Fei and the others were startled. They wondered if these people were here to kill them!

Someone saw Han Fei and said, "Han Fei? I have information to sell."

Someone fearlessly rushed over. "Everyone, I know the secrets of the Blue Sea Soul Realm."

Han Fei was about to say something when someone ran over. "Miss, don't believe them."

It was a member of the Luo Family.

He said to those people, "Go cheat somewhere else."

Luo Xiaobai asked, "What happened?"

That person from the Luo Family said, "Miss, the Blue Sea Soul Realm is the least complicated of the seven Soul Realms. It is also the most suitable place to train. This place is often explored in groups of five. You can hunt sea monsters in the Soul Realm and obtain soul crystals. Of course, its level of danger is only similar to that of the Demon Plant Soul Realm. The further you go, the more dangerous it becomes."

Luo Xiaobai nodded. "How did those people of the big clans react?"

That person said, "They might have temporarily given up moving against you on the previous few secret realms. Their current whereabouts are unknown."

Luo Xiaobai nodded. "Got it. We'll go to the Blue Sea Soul Realm ourselves."

Then, Luo Xiaobai looked at Han Fei. "Do you think they will give up?"

Han Fei shook his head. Of course not. Unless Old Han and Ren Tianfei fell out with the big clans of Thousand Stars City, they could only attack them in the Ideal Palace. This was their only chance.

Zhang Xuanyu said, "I smell danger."

Le Renkuang nodded. "They must be waiting for us."

Li Luoluo's eyes flickered as she said slowly, "Your Thug Academy has so many enemies."

Han Fei sneered. "We'll deal with whatever comes our way. Since we're given the chance, let's show them what we can do! Seven Soul Realms, ha, we'll pass them all."

Chapter 1070: Large Creatures

Within the Blue Sea Soul Realm.

Han Fei and the others were facing a Mantis Shrimp, which made them look weird. If Nine Tails was here, he might be very interested in this Mantis Shrimp.

The Mantis Shrimp was as black as ink and extended over a hundred meters. Its limbs were cold and sharp like blades.

At this moment, Han Fei threw a punch with an array mark on it. Han Fei took half a step back while the Mantis Shrimp rolled in the sea several times.

It was not because the Mantis Shrimp was slow. In fact, in terms of speed, the Mantis Shrimp attacked as fast as lightning. The stronger the Mantis Shrimp was, the faster it attacked.

Not to mention Han Fei, even if the big shots of the Ye Family came, it would be useless. For example, Nine Tails might be watching students in school every day, but if he really fought, he would be even more terrifying than Little Gold and Little Fatty.

However, because he had Nine Tails, Han Fei knew creatures like the Mantis Shrimp too well. When they waved their limbs, their punching posture, movements, and even thoughts flashing in their eyes couldn't escape Han Fei's eyes.

Han Fei's attack was successful. Zhang Xuanyu's spear pierced through the shrimp, Luo Xiaobai activated the Parasitic Technique, and Li Luoluo manipulated the worms to drill into its body. Le Renkuang had nothing to do except to guard Luo Xiaobai and the others in case they were sneak attacked.

Buzz!

The Golden Giant appeared and Han Fei punched out at the same time, creating a huge hole in the shrimp's body. Then Han Fei reached out and grabbed a fingernail-sized crystal out of the Mantis Shrimp's head.

After killing the Mantis Shrimp, Han Fei scratched his head. "This is a soul crystal? It's a little small."

Han Fei threw it to Le Renkuang and said, "Eat it!"

Han Fei was no longer interested in the soul crystal. In Wang Santie's words, everything in the Ideal Palace was related to the soul.

However, after eating the Fate Soul Fruit, Han Fei found that his soul's realm seemed to be much higher than his own. He didn't know if it was a good thing. If he deviated too much, would it affect his spiritual power? He had to check it after he went out.

After all, it wasn't as if he could only come to this ideal palace once. As long as there was a need, he could come at any time.

Le Renkuang chuckled. "Sure! If you don't want it, give it to me."

Han Fei could hear people fighting in his ears, but he was not interested at all. Instead, he put his arm around Zhang Xuanyu's shoulder and looked at Luo Xiaobai. "Do you think it's a bit wasteful if the Blue Sea Soul Realm is the same as the Demon Plant Soul Realm?"

Luo Xiaobai pondered for a moment. "I'm not sure now. However, from your information and the information given by my family, it seems that even the fourth soul realm is the same. It's just that... the soul crystal has turned into the Visualization Stone. Although the Visualization Stone can also be used as a weapon to kill the soul, it's more to help cultivators improve their soul. If we look at the value alone, it seems similar."

They had passed through the first two Soul realms. Now that they were at the Blue Sea Soul realm, everyone felt much more relaxed.

First of all, they were most familiar with sea creatures.

At this moment, most of the sea creatures they saw were those they had seen before. However, when these creatures reached a certain level, they would become exceptionally powerful.

For example, if Han Fei and Le Renkuang were not around, it would be very difficult for Luo Xiaobai and the other two to kill the Mantis Shrimp. After all, shrimp were agile and fast.

At this moment, with the temporary addition of Li Luoluo, their team was almost fearless of all enemies. If Xia Xiaochan was here, their teamwork would be perfect.

Therefore, in the first half of the soul realm, the few of them were like a hot knife cutting through butter as they advanced. All the creatures along the way could not stop them for more than 30 breaths of time.

Only when there were very few people and the atmosphere became increasingly strange did everyone stop.

Zhang Xuanyu said, "I smell blood."

Zhang Xuanyu's spiritual beast was very sensitive to the smell of blood. It could even trigger the blood in the enemy's body, so he reminded them immediately.

Han Fei also smelled it, but he was not surprised.

Along the way, the creatures of the ocean were stronger than each other. The giant crabs they met just now were so tough that even Zhang Xuanyu's spear could not penetrate them.

Luo Xiaobai said, "Although the Blue Sea Soul Realm is simpler and can be used as a training ground for the team, the living beings here are also stronger. However, if it's really that simple, I'm afraid that the big clans would have already cleared it. Since they haven't completely cleared it, it means that there must be some living beings here that they can't defeat even if they join forces. It's just that... ordinary people can't reach there."

Han Fei pondered for a moment. "Let's not talk about whether we can win or not. Let's go and take a look."

Just as the few of them were preparing to move, a few huge, swift shadows appeared in the dark seawater. The first thing that appeared were those scarlet eyes.

Han Fei narrowed his eyes. "Dragon Eel."

Han Fei remembered the first time he met the Dragon Eel in the level-two fishery. At that time, he felt that the Dragon Eel was the strongest creature he had ever encountered.

Although he met the Dragon Eel again on the Steps into the Sea, Han Fei had never seen such a big one before.

Those eyes were more than a hundred meters away from them, and three of them appeared at once.

Han Fei suddenly shouted, "Be careful of the electric current."

As soon as he said that, a thick blue light emerged from the bottom of the sea. Han Fei and the others were swallowed by the electric current.

Roar!

"Fat, fat... fatty."

"Armor... armor... armor..."

Dark blue armor appeared on their bodies. However, the armor was not very effective. They were trembling like Parkinson's patients.

Fortunately, Han Fei was used to being struck.

At this time, he clenched his fist and formed a defensive array beneath his feet. He punched out.

However, the speed of the Dragon Eels was definitely not slow, especially those that were so big. It was unknown what rank the Dragon Eels were. Clearly, they weren't ordinary Dragon Eels.

A giant tail whipped at him and Han Fei's fist was broken. In the end, when the punch landed on one of the Dragon Eels, it only pushed it back more than ten meters.

Another giant tail was already lashing at Le Renkuang and the others. The third one opened its bloody mouth and bit at Han Fei and the others.

"Ultimate...Defence."

Dong!

Crack!

Huge waves were surging. Le Renkuang was protecting Luo Xiaobai and the others to buy time.

Zhang Xuanyu, on the other hand, used Soul Explosion directly. It was impossible to use the Momentary Time now.

Luo Xiaobai summoned a kind of glowing water plant. A large amount of electric current was channeled into the spiritual plant. A huge Blue Piranha Plant bloomed from the bottom of the sea, and thousands of vines blocked their surroundings.

As for Li Luoluo, she was surrounded by countless bugs, which were like fireflies, shining brightly. Electricity flowed through their bodies.

This was the terror of marine creatures!

They didn't need any fancy Battle Skills. They only needed to rely on their innate strength and characteristics to display a power that ordinary people couldn't resist.

Han Fei's face changed slightly and he shouted, "Guard it."

While he was talking, Han Fei had already rushed forward. The golden giant was still like a little thing in front of the giant Dragon Eel. The Void Line caught a Dragon Eel directly, and Han Fei blocked one head-on.

Le Renkuang tried to kill the remaining one. He activated both the Majestic Mystic Spell and the Violent War Body at the same time. Holding the True Martial Devil Blade, he attacked bravely in the electric current.

Bang! Bang! Bang!

At this moment, Han Fei was standing in the mouth of the Dragon Eel. The Infinity Water entered the Dragon Eel's body and exploded.

However, when he was close to the Dragon Eel, Han Fei suddenly felt his heart palpitate. Even the Demon Purification Pot trembled slightly, which made Han Fei have to be careful. There seemed to be something wrong with the Dragon Eel.

On the other side, Le Renkuang slashed the dragon's head with his Frenzied Sword, and intense flames flickered on the seabed. Luo Xiaobai summoned the Fog Flower Powder and covered the area.

Zhang Xuanyu's Tertiary Body exploded, and the Three Tremors to the Sea was attacking furiously.

Li Luoluo didn't have the Majestic Mystic Spell, so she was still trembling.

A moment later.

The three Dragon Eel corpses collapsed. The five of them were covered in dust and looked at each other speechlessly.

Le Renkuang's face trembled. "This... is not easy to fight, is it?"

Zhang Xuanyu said solemnly, "I was almost unable to use any secret techniques. This Dragon Eel is indeed tough."

Luo Xiaobai frowned and said, "In fact, the Dragon Eel is not particularly strong. It's just that its defense and strength are beyond our imagination. Its electric current is as strong as thunder and extremely fast. That's why we lost the initiative. If the Dragon Eels had been replaced by the Purple Sand Eels or the Wind Thunder Flood Dragons, we wouldn't have been able to kill them so easily."

Han Fei looked into the depths of the Blue Sea Soul Realm and said doubtfully, "I didn't expect the Dragon Eel to be so powerful. Also, their souls seem a little strange. The Blue Sea Soul Realm doesn't seem as simple as others say!"

Li Luoluo hurriedly replied, "That's right, that's right. It's not simple. Also, what kind of secret technique are you using? How can you withstand an electric current of this level?"

Luo Xiaobai said, "This is the secret of the Thug Academy."

Before Han Fei said anything, Luo Xiaobai replied. The quality of the Majestic Mystic Spell was beyond imagination. In terms of the level of the secret technique, it was almost incomparable in the entire Thousand Star City. Li Luoluo had not been accepted by this group yet. In fact, she might never be accepted.

"Hmph, alright, alright!"

Han Fei pondered for a moment. "Should I go forward alone?"

Zhang Xuanyu shook his head. "It's the training of a team. Why did you run away alone? Do you want to go solo?"

Luo Xiaobai said, "Let's go together! I want to see what's wrong here."
