

GOF 1341

Chapter 1341: Dragon Ball

Even if the two Stone Hous died, Han Fei's Void Lines couldn't get any soul from them.

After they shattered, Han Fei picked up a stone and squeezed it casually, and the stone exploded.

The old turtle said, "Stop squeezing it. It's just an ordinary stone."

"Hiss!"

Han Fei couldn't help taking a breath. A regular stone? I can't even cut it with Snowmourne?

The old turtle said, "The Stone Hous are too strong. They were just two ordinary statues. They couldn't have been so strong without the aura of a powerhouse. Even I wouldn't have been able to do that."

Han Fei thought to himself, Who do you think you are? The Stone Hous have a name called "Longing for the Emperor's Return", so even an idiot should know their master's level.

However, Han Fei was a little shocked. On this random island, were there even traces left by an emperor?

Perhaps the old turtle was right. Under the influence of the aura of the strong, even ordinary stones could be so abnormally strong. It was very likely related to the Dao heart the old turtle mentioned.

Boom...

Just as Han Fei was about to ask about the Dao heart, the center of the cave suddenly began to collapse. However, there was only a small part of the cave that collapsed, and a scorching power drifted out.

Seeing that it was scorching hot and a suppressing pressure was rushing out, Han Fei didn't dare to be negligent. After fighting the Stone Hous, he knew that there might be traces of an emperor. If he was careless, he might die on the spot.

This had nothing to do with whether he took the path of invincibility or not. Being surpassed by others by countless realms, no matter how much of a heavenly talent he was, what was the use?

With a flash between Han Fei's eyebrows, Little Black and Little White appeared. Han Fei was about to ask Little White what was going on inside when he saw Little Black jump out with a swish.

"Hey hey! Son..."

Han Fei was speechless. This little guy is getting more and more disobedient. Is it a place where you can just rush in?

The old turtle said, "Let's go in! It's so hot. I'm afraid we've encountered a strange fire."

Han Fei realized that it was possible. The Female Ba just now was being burned by a strange fire all the time, but where was the strange fire?

Now, Little Black slipped into the hole. There was probably pure Yang energy inside.

With a thought, Han Fei recalled Little White into Forge the Universe and followed Little Black into the cave.

Buzz!

The moment Han Fei stepped into the cave, he immediately felt a scorching heat without any moisture.

In front of his eyes, it was like a scale-like cave. It was not large, only a hundred meters in size. At the center of this cave, there was a golden pearl that occasionally emitted a red glow.

Before Han Fei had the time to recognize what it was, he saw that Little Black had approached the thing and was revolving around it.

Han Fei shouted, "Son, don't move yet. Let me take a look first."

Han Fei's first reaction was that this was definitely a f*cking spiritual treasure comparable to the Blue Sea Ice Sand. This was because the temperature here had already exceeded the previous magma lake's temperature. The terrifying heat above 4,000 degrees celsius was very similar to the situation of the Blue Sea Ice Sand.

Faced with such a temperature, Han Fei still didn't panic. He even dared to poke through the bottom of the magma lake. The temperature at that moment was comparable to the surface of the sun. How could he be afraid now?

Perhaps because Han Fei's fire resistance was high, or because the space in this cave was small, in fact, except for the ten-meter radius of the pearl, the temperature difference was not large.

When Han Fei got closer, information popped up in his eyes.

< Name > Fire Dragon Pearl

< Introduction > The core pearl of the Fiery Dragon. When the Fiery Dragon dies, the core pearl has no place to store and will automatically evolve into a flame until it's burnt up. The Fire Dragon Pearl is a special treasure for fire cultivators. It can be used for refining and fire resistance. Only fire cultivators can use it.

< Effect > If a fire cultivator wears it for a long time, he can cultivate a fiery body, fiery eyes, and other magical powers.

< Remarks > It's in a declining state. This Fire Dragon Pearl has been burning for a long time, and its remaining effect is less than 10%..

Han Fei's heart did a flip when he saw the message. Was this less than 10% of the original effect?

Dragon balls? Holy sh * t, can I summon a divine dragon to make a wish or something after collecting all seven of them.

Of course, Han Fei was not that stupid.

Although this was not a spiritual treasure of the world, he didn't know what the fiery dragon was.

However, they were known as dragons, not flood dragons or big serpents, but real dragons.

The old turtle didn't know the dragon race at all, so he didn't recognize the Fire Dragon Pearl. He said, "This thing looks quite extraordinary. It seems to be a fire-nature exotic treasure, but it's still not as good as the Blue Sea Ice Sand. Otherwise, you wouldn't have been able to approach and observe it without being hurt."

Han Fei: "I know."

Then, Han Fei said to Little Black, "Son, is this edible? If it's edible, just eat it."

Little Black replied coolly, "Yes."

Little Black opened his mouth wide, and the surrounding scorching fire suddenly drilled into his stomach.

The Fire Dragon Pearl was swallowed by Little Black too.

On the surface of Little Black's body, the fire was steaming, and from time to time, fire was dispersing in all directions.

Then, with a thought from Han Fei, Little White in Forge the Universe seemed to have a reaction.

Immediately, Han Fei let Little White out. Then, the two little fish, one black and one white, circled around him again. When they swam, it was like Tai Chi and Yin-Yang were spinning. This was the symbol of their level-up.

Buzz!

Sure enough, Little Black and Little White flashed and leveled up without stopping. From the looks of it, after swallowing this Fire Dragon Pearl, Little Black and Little White would upgrade to at least level-65.

Han Fei thought that it would take them some time to level up this time. There was no danger here, so he sat cross-legged and began to heal his injuries.

...

Just as Han Fei was sitting cross-legged to cultivate, there was an uproar outside.

Zhang Xiaotian, who was defeated by Han Fei, didn't really leave. As a reincarnated powerhouse, he knew that there was a treasure hidden under the mountain. How could he give it up so easily?

The road that Han Fei had just taken should be the best road, which was the original path. But now, he needed to blaze a new trail.

As long as the place was basically confirmed, he could find out which road he needed to take. He would get there anyway.

Therefore, Zhang Xiaotian blasted apart several other mountains.

After blasting through three mountains in a row, Zhang Xiaotian finally cleared a path.

When the last mountain was blast open, blood Qi soared to the sky like a pillar of light.

At this moment, the other creatures that were gathering over crazily instantly got their target.

Outside the dragon-might area, all kinds of creatures were gathering. There were already tens of thousands of beast creatures shuttling through the mountains. Some demon plants crawled out of the ground and moved deeper into the mountain. There were also big birds flying in the sky, hovering low and scanning the mountains.

At least half of the Heavenly Talents from the Water-Wood World, Blood Sea Divine Wood City, and the White Shell Royal City had gathered.

Without any exception, these people all ran towards the mountain that Zhang Xiaotian had blasted open. It wasn't just these people, all other creatures were also heading there.

As the saying went, one opened the road upon which others traveled.

About three hours later.

The cave that emitted overwhelming blood Qi was already surrounded by a large number of creatures.

However, surprisingly, except for the Heavenly Talents of the three major factions who entered this cave, few other creatures entered. Instead, they were absorbing the blood and Qi that was escaping.

In fact, everyone, including Zhang Xiaotian, knew that the blood Qi was extraordinary.

However, smart as Heavenly Talents, they were also greedy. If some random escaping blood Qi was so extraordinary, how extraordinary must the treasure inside be?

Therefore, a large group of people had already rushed in.

However, the three parties were evenly matched.

Shrimp Youwei, San Qi, and Xu Ye were together, and there were five people from the White Shell Royal City.

The Blood Demons in the Blood Sea Divine Wood City were extremely sensitive to blood, so at this moment, six of them had gathered here. There might be more people gathering over.

And there were only three people from the Water-Wood World.

At this moment, the three parties didn't attack easily. In front of them, there was a long river. This river was not as simple as an ordinary underground river. The water here was red, and the river was filled with thick blood Qi, which looked quite strange.

To be precise, this should be called the Blood Qi River.

Because no one knew where this river led to. Could they pass it? How could they pass it?

Therefore, at this moment, a total of 11 people from the White Shell Royal City and the Blood Sea Divine Wood City were pressing on towards the 3 people from the Water-Wood World.

Shrimp Youwei smiled. "Aren't you bugs fearless? Why don't you dare cross the river now?"

A single-horned bug hummed. "Humph! We Insects are fearless, but that doesn't mean we are stupid. This river is full of Blood Qi, and our perception cannot penetrate it. We can't see the end of it. We don't even know where it leads to. Who dares to cross it easily?"

San Qi sneered. "Do you think you still have a chance to choose? Cross it now or die."

A charm flashed under a Blood Demon's feet. "Do you think the three of you can stop a dozen people from the two royal cities?"

While the two parties were arguing, he suddenly turned his head and looked at the Blood Qi River.

A small boat floated over.

A big bird from the Water-Wood World was quite knowledgeable.. He had seen Han Fei use this kind of thing, which seemed to be called "Boat".

Chapter 1342: Blood Qi River

In the Water-Wood World, including the creatures on the Cloud Sea Divine Tree, no one had any concept of "boats", let alone the Blood Sea Divine Wood City and the White Shell Royal City.

For most cultivators, they had never even heard of it.

More often than not, they just occasionally saw boats in the countless secret realms in the ocean.

However, boats were either made of special materials or preserved in special places. Otherwise, if they were soaked in seawater all year round, they would eventually corrode and leave nothing behind.

When the big bird saw the boat, he said, "Follow me."

The creatures who could come to the island were all Heavenly Talents. Who would be willing to wait for death? The big bird and the insects were not stupid. Of course, it was impossible for three people to challenge a dozen people. If they were so stupid, they wouldn't have been sent to this island to compete for resources.

Swish!

The big bird suddenly attacked, grabbing two insects with his two claws. As he flapped his wings, a gust of wind rose and he flew straight at the boat.

Shrimp Youwei and the others felt that this boat was very weird. Even if they were Heavenly Talents, they had never seen a boat before!

However, this bird knew the boat was safe, so he flew to it.

"Where are you going?"

"Get down."

The people from the Blood Sea Divine Wood City and the White Shell Royal City thought that the bird had discovered something when they saw that the three people from the Water-Wood World were really bold enough to charge at the boat.

Immediately, two from each side flew up at the same time.

Similarly, they also flew towards the boat. Although these two parties didn't know what the boat was, seeing that the three people from the Water-Wood World were flying straight towards there, at least it meant that it was safe there.

Xu Ye, who was the tenth on the Genius List of the White Shell Royal City, probably wanted to show off in front of Shrimp Youwei and win their approval; or maybe he had entered the Genius List, so he was a little cocky and flew out too.

But Shrimp Youwei just threw out a spear.

The remaining four people from the Blood Sea Divine Wood City all activated their runes. In mid-air, a long flame snake appeared, and countless saber shadows slashed at the big bird and the others.

However, even the big bird didn't expect that the moment he grabbed two insects and flew into the Blood Qi River... Immediately, his wings seemed to be filled with lead water. After flying less than a thousand feet, his body quickly descended.

"Hum!"

The two caught bugs immediately flapped their wings to relieve the pressure on the big bird. This was the benefit of the creatures from the Water-Wood World, which could fly.

The three of them flew at the same time and the big bird immediately felt a lot more relaxed. However, the descent was almost irreversible. The three of them only felt their weight getting heavier and heavier.

The big bird shouted, "Let's burn our blood and spiritual energy and fly over."

"Huff!"

At that moment, three balls of light, burning with vitality and flapping their wings crazily, flew towards the boat a few kilometers away.

The people chasing the big bird were different.

The problem was that they didn't have wings!

Someone had already discovered this problem the moment he flew out. A person from the White Shell Royal City flew a thousand feet away, only to find that his body sank uncontrollably. He immediately tried to turn around.

However, with a clang, he hit an invisible barrier, which stunned the others. There was a barrier here?

At this time, Shrimp Youwei and the others had noticed that their attacks were falling from the sky and couldn't hit their opponents at all.

Clearly, they had miscalculated. There was indeed a problem with this Blood Qi River.

The person who wanted to come back clutched the glass-like barrier desperately, but still fell straight down. He immediately shouted, "Give me a hand!"

In addition to Shrimp Youwei and San Qi, another person extended a long whip, trying to buckle the person. However, as soon as the whip was caught, the person who helped him found that he was pulled over uncontrollably.

Shrimp Youwei and San Qi stepped back at the same time and pulled together. With a bang, the long whip broke, and the man stopped moving forward.

The guy who pulled the whip failed to fly to the boat or go ashore and almost dragged another person into the water. He stomped on the invisible barrier and tried to return to the boat.

Unfortunately, it was too late!

Plop!

As the first guy to fall into the Blood Qi River, everyone's eyes, including the perception of the big bird in the front, fell on him.

The moment he fell into the Blood Qi River, he seemed to be fine.

The man breathed a sigh of relief and shouted, "There's invisible gravity suppressing here, so we can't fly for a long time. I'll swim through the water... Not good, my leg..."

The man's face suddenly changed and he began to struggle crazily.

San Qi shouted, "What's wrong with your leg?"

The man was horrified. While trying to swim back with his hands, he shouted, "I can't feel my legs at all..."

However, nobody chatted with him anymore at this moment.

This was because everyone saw that the flesh and blood of this person who was swimming was melting, and his bones had been exposed. With the power of his hands, part of his body floated up the Blood Qi River.

However, this scene was even more horrifying. Below his chest, the flesh and blood had melted, leaving only bones.

Shrimp Youwei said solemnly, "He is dead."

San Qi and the other person's faces were all dark, especially the person who had just helped. He broke out in a cold sweat. What the hell was this place? That guy had only soaked in the Blood Qi River for a while, but his flesh and blood were gone? It was horrifying!

The big bird and the two insects in front instantly panicked.

Xu Ye also panicked. What the hell is this? Is this Blood Qi River so terrifying?

Among the two Blood Demons, one of them was emitting a large number of runes. With a flash in the air, he flew a kilometer forward.

At this moment, the big bird was the first to rush onto the boat.

He suddenly flapped his wings, and hundreds of long feathers shot out like sharp arrows.

An insect was about to drop into the Blood Qi River, but fortunately, a big feather shot at his feet.

As he stepped on it, he jumped and finally flew to the boat. The other insect was better. Even with his own strength, he could reach the boat.

The moment the two insects came up, the big bird roared, "Explode!"

Bang! Bang! Bang!

Blood and water splashed across the sky, and ripples spread out. The huge force shook the small boat away.

Those who still had some hope were all dumbfounded!

Xu Ye shouted, "Don't go..."

One of the two Blood Demons was not strong enough. She screamed, "Sister Wolf, help me..."

However, the Blood Demon in front who could travel through the void didn't care about her at all. At a life-and-death moment, you can only blame yourself for not having the means.

The one called Sister Wolf looked at Xu Ye and said, "Hey, the one from the White Shell Royal City, let's cooperate to fight the three of them. Otherwise, neither of us can pass the river."

Hearing that, Xu Ye immediately agreed. At this time, as long as he wasn't a fool, he would agree.

Bang! Bang!

The tide of blood caused by the big bird was broken, and one of the bugs said, "I was so scared. The Blood Demon fell too."

Another insect said, "What are you looking at? Don't you see that those two people are already chasing us?"

The two bugs bickered. "Poke them down too."

"Let me poke with my horn!"

"Go to hell!"

The big bird flapped its wings and raised a gale. Hundreds of big feathers flew straight at the Blood Demon that suddenly came at them.

Bang! Bang! Bang!

Chi la!

They all attacked with all their strength. Who didn't have some means?

The Blood Demon tried to block it with the rune armor. However, she underestimated the strength of the insect. The big horn thrust out, and its strength was all in this thrust. How could she block it easily?

With a bang, the woman was also knocked into the Blood Qi River.

“Ahhh~”

Xu Ye, who was also rushing towards the big bird, suddenly changed his expression.

Those who could come to the island were all Heavenly Talents. After all, the eighth to twelfth places of the Genius List had all been wiped out by the Fish Dragon King, so it was Xu Ye's turn.

In fact, there was still a gap between Xu Ye and the real tenth place on the Genius List.

The Fish Dragon King had the Near at Hand Technique. If it were the Fish Dragon King, he would be able to do it in a few steps, but what about him?

A big horn thrust over, and hundreds of Flying Feathers also flew over. For the guys from the Water-Wood World, they were always willing to sacrifice as long as they could kill him.

If he wanted to charge forward and fight a 1v3 battle, Xu Ye wasn't confident.

However, if he couldn't get on the boat, he would still die.

Xu Ye had no choice but to fight. However, when he was about to break the horn with the long whip and try to break the Flying Feather Array with force, he saw another boat.

Immediately, Xu Ye smiled.

But immediately, he felt terrible. That ship was more than 2,000 meters away from him, but he was less than six meters away from the Blood Qi River. It was impossible for him to fly over.

In an instant, with a thought, Xu Ye threw a battle suit on the Blood Qi River. He stepped on it and jumped up, shouting, “Explode!”

Boom!

Blood waves beat. The big bird and the insect had no time to attack Xu Ye. They could only shout, “Guard the boat.”

Xu Ye took the chance to cross and landed on another boat in the blink of an eye.

As for Shrimp Youwei and the others on the shore, they quietly watched the Blood Qi River.

Looking at Xu Ye who was steering the boat away, Shrimp Youwei said casually, “Don't panic! Since there is a second such weird thing, there will be a third, a fourth...”

On the other side, the remaining Blood Demons were also discussing and clearly stated that they would not leave until the boat arrived.

Chapter 1343: Dragon-Might Mystic Barrier

While these people were thinking about how to cross the Blood Qi River, Han Fei had just opened his eyes from his cultivation.

Little Black and Little White had successfully leveled up.

Sure enough, as he expected, the two little guys had both upgraded to level 65. At this moment, they were swimming happily. The alienation between Little Black and Little White was gone.

After Little White swallowed the Blue Sea Ice Sand, Little Black always hid when she came out. After all, Little White was too cold back then, so Little Black didn't dare to come close.

Now, after swallowing the Fire Dragon Pearl and the Strange Fire, Little Black could barely resist the extreme coldness from Little White.

However, even so, although the two little fish began to play again, Little Black still didn't dare to get too close to Little White.

It could be seen that the power that Little Black ate wasn't enough.

Han Fei thought of something. "Son, don't panic. When I find more treasures, I'll get you a Big Red Trunk, and you can eat as much as you want!"

Bang!

While Han Fei was teasing Little Black and Little White, he suddenly felt the ground shake. It seemed that a battle had erupted not far away, and the impact of power had triggered the ground veins.

Because of the violent vibration, Han Fei could feel that this power was not very far away from him!

Han Fei frowned. He was not here for the Fire Dragon Pearl. His real goal was the Dragon Essence Energy! He hadn't seen that thing yet, so he couldn't let it be snatched by others.

Han Fei immediately said, "Little White, feel the source of the vibration."

Because the power of the explosion was too close, Little White turned around and looked at a corner of the cave. "Dad, over there, go down."

Han Fei praised, "Hey! My daughter is awesome."

Han Fei waved his hand and the Infinity Water appeared. It turned into a blade gyro and began to drill into the scale-like rock wall.

Ding ding ding!

Even the Infinity Water drilled for more than 20 seconds before it drilled a hole in the rock wall. Like a driller, it quickly passed underground.

After about half an hour, Han Fei dug more and more easily. In the end, he actually encountered a tunnel that had been dug.

"Huh! Someone dug a tunnel...? Wait, it's not new. These traces seem to have been there for countless years."

The old turtle said, "The blood Qi ahead is very heavy."

Han Fei sniffed. "OK! Let's take a look."

Because the road ahead was smooth, Han Fei ran very fast. In a minute, he came to an underground port.

Yes, he confirmed this was a port because Han Fei discovered that there was a small river crossing here. By the river, there were a total of 9 small boats. These small boats were about twice the size of his Wind God Boat. From the looks of it, they were made of ordinary wood.

However, Han Fei certainly knew that the boats were extraordinary.

How many years had this place been secluded from the outside world?

Looking at the red river and the intense blood Qi on the river, a boat that could sail on such a weird river was certainly not something ordinary.

Han Fei pondered for a moment, reached out, pulled out a shark, and threw it to the shore. Half of the shark's body was in the water, and the other half was on the shore.

Then, a terrifying scene appeared. Half of the shark's body began to melt, and its flesh and blood melted in the blink of an eye. Han Fei casually dragged out most of the fish bones.

The old turtle said in surprise, "Blood pool? There must be something evil in such a huge blood pool."

Han Fei bared his teeth and said, "How can it be? Are you sure it's an evil creature? How can the dragon essence be in this place?"

The old turtle said, "Well, I don't know much about dragon essence. However, as far as I know, there are many reasons for the formation of the blood pool. The most common one is that there was a great battle here and many strong masters died. Their Qi and blood were not extinguished and their souls lingered. They wanted to revive, so they devoured other creatures with their own flesh and blood. In fact, this kind of person is stupid to believe such nonsense."

Han Fei smiled and said, "Hehe, you're an idiot to believe such rumors. Anything else?"

The old turtle said, "Also... Some people are in a half-dead state and use this method to absorb external lifebloods to nourish their bodies, so that they can recover in the future. However, there are very few people who can really recover. At least, I haven't seen many in my long life."

The old turtle paused for a moment. "The other is that someone is nurturing corpses with the power of the dead. However, this place has been empty for countless years. Even if someone was nurturing corpses here, he might have left long ago."

Han Fei's heart did a flip. "What if he hasn't left?"

The old turtle was silent for a moment. "Then he should be quite powerful. If he can persist to this day, I'm afraid the things he nurtures will be extremely terrifying."

Han Fei secretly pinched his fingers and calculated but didn't figure anything out.

The old turtle said, "Why are you pinching your damn fingers? The Heavenly Secrets are all messed up, which means that anything can happen. It's useless no matter how you calculate."

Han Fei pondered for a moment and decided to explore it.

If he guessed right, the Dragon Essence Energy was definitely extraordinary. If he didn't dare to compete for it, there would definitely be others competing for it.

In that case, why didn't he compete for it? He was walking the path of invincibility! Besides, in terms of speed, there should be no creatures comparable to him.

With this in mind, Han Fei immediately walked to the ferry.

Looking at the boats, Han Fei grinned. He jumped on one of the boats and pressed it, and the other boats disappeared from the Blood Qi River.

"Collect, collect, collect..."

The old turtle was lost for words. "What are you doing? Scared that someone will compete with you?"

Han Fei smiled. "Anything is possible! I've already opened the way. I can't do it for nothing. Besides, what if my boat breaks on the way? I have to reserve a few boats, right? The point is... if I take other people's paths and make them have nowhere to go, all the opportunities will be in my hands."

The old turtle was speechless and thought to himself, I've never seen such a shameless person who snatched all the boats! He didn't leave any opportunities for others!

The old turtle said, "Then you'd better go now! The shaking just now seemed to be from the blood pool, which means that someone has been here and gone in."

Han Fei paused and nodded slightly. "That makes sense. Since we have to explore this place, we have to take the opportunities."

Han Fei jumped onto the boat, pushed the blood water with one hand, and flowed into the pool quickly.

On the way.

Han Fei asked, "Old Yuan, what do you think is under the pool of blood?"

The old turtle said, "The blood pool is the blood pool. There's usually nothing under the blood pool. Basically, all the things that can be corroded have been corroded. Of course, some things that can't be corroded will be left down there. However, no one can get them! Well... It's just relative that no one can. Take this blood pool as an example. Even if you have an amazing physique, you'll die in it. There's no second possibility."

"Oh? So corrosive?"

Old Turtle Yuan said in disdain, "What's such a big deal about this place? This blood pool is not terrifying. I once heard of a blood pool purgatory, which is a place that suppresses kings and emperors. Legend has it that it can even corrode emperors."

Han Fei's lips twitched. "Have you seen it?"

The old turtle replied, "I've heard of it."

Han Fei said, "Then you haven't seen it."

The old turtle couldn't help but burst into fury. "Of course! If I had seen it, would I still be chatting with you here? I would've been dissolved a long time ago."

Han Fei looked at the river and couldn't help exclaiming, "In other words, there might be a lot of good things hidden under the blood pool! But no one can take them."

The old turtle didn't comment on that.

Han Fei took out his fishing hook and thought for a moment. Fishing lines are not important. I can make more even if they are damaged! With my current strength, I can hunt creatures below the Venerable level.

Swish!

He dropped the fishing hook, but after three seconds, he pulled the hook up, only to find that it was broken.

Prepared for the fishing line to be corroded, Han Fei was not discouraged at all. He extended his hand and pointed, and spiritual energy gathered into a net.

Han Fei cast the net of spiritual energy down, only to find that he had lost contact with the spiritual energy. It turned out that the blood pool could corrode spiritual energy too.

"Tsk, tsk. Interesting."

The old turtle rolled his eyes. "Stop trying. What do you think the blood pool is? Your fish pond?"

Han Fei shrugged. "I'm just trying. What if I succeed?"

Han Fei floated on the boat and saw a white mist only two hours later.

When he saw the mist, Han Fei immediately felt that something was wrong!

Usually, when a mist appeared in such a weird place, something bad would happen.

"Fuse!"

Without any hesitation, he fused with Little White and Little Black. With Han Fei's current strength, as well as the growth of Little Black and Little White, there were no side effects if he just fused with them.

Besides, after the fusion, as long as he didn't fight, he could still maintain it for a long time.

He used the Yin-Yang Divine Eyes. The moment Han Fei entered the mist, his expression suddenly changed. In the mist, there was a familiar breath... dragon might.

The old turtle asked something else, but Han Fei ignored him.

"Dragon might? Is the dragon still alive?"

"Wait, who said that there is no suppressing power after Dragonfall?"

Han Fei realized that in the Ideal Palace, just a dragon soul made his body almost unable to move. Although the mist was filled with dragon might, it was far from enough to make his body unable to move.

Although his current strength was different from before.

However, in the face of the pressure of such a powerhouse, the so-called Law Enforcer realm and Explorer realm were probably not much different. The reason why the pressure wasn't enough was that there were no dragon souls here, let alone living dragons.

With this in mind, Han Fei was immediately relieved.

Bang!

The moment Han Fei calmed down, he heard fighting sounds.

Han Fei sensed that an explosion rippled over.

Han Fei murmured, "More than 300 kilometers? I can take a look."

Chapter 1344: Blood Mud Roll

When Han Fei came to the place where the battle just broke out, he found that a bug had turned into a human shape, holding a strange weapon like a vajra pestle in his hand, and was fighting dozens of blood pythons.

Han Fei was stunned to see those blood serpents. Were they formed by the blood in the pool? Half of their bodies were in the pool, and the other half was outside. Judging from their bodies, they were more than 20 meters long. Why were there so many of them?

Obviously, it was very difficult for the insect to kill them.

When he saw Han Fei, he immediately shouted, "Han Fei? Come on, give me a hand."

Han Fei clenched his fists, and with a bang, a series of golden fist marks blasted out. The Infinity Water pointed, and the Ten Thousand Knives in One swept across, instantly killing these blood pythons.

Han Fei couldn't help but ask, "Why are you alone? Where are the others?"

The insect hummed and sat on the boat. "We separated! When we came in, there were three of us, and we found that this Blood Qi River actually has many tributaries that flow to different places. As it happens, we could see other boat shadows on the Blood Qi River, so we split up to find the way. This way, the chances are better."

Han Fei frowned. "Many tributaries?"

Han Fei was stunned. Why didn't I see any tributaries?

However, Han Fei didn't panic. He asked quickly, "What about those big snakes? Are there many blood snakes under the pool?"

The insect nodded quickly. "Yes, there are a lot of them. I'm most afraid of snakes, but what I'm afraid of came at me. And the snakes were so big. I was so scared."

Han Fei was about to say, "You might just be unlucky..."

However, Han Fei suddenly realized that something was wrong. What he was afraid of came at him!

Han Fei couldn't help but take a deep look at the insect and suddenly said, "Not good, the snakes came again."

The bug hummed, picked up his weapon, and stood beside the boat. "Where are they? Where are they?"

Han Fei said quickly, "There, can't you see it?"

The insect trembled slightly, but at the next moment, he saw a dark red shadow flash past at the bottom of the water.

Whoosh!

The blood water burst open, and a huge head extended out.

"Roar!"

The blood python roared. There was no stink in its mouth, but only blood and Qi.

Han Fei's pupils were constricted slightly. There must be something wrong with this place!

In fact, when Han Fei shouted that there were snakes in the pool, there were no snakes in the pool at all. It was only because the insect stared at the pool that a Blood Python emerged from it.

The moment the Blood Python appeared, Han Fei didn't see any information.

In this way, Han Fei was certain of one thing: the creatures in the blood pool were completely made up of the fear in the human heart.

This bug was afraid of snakes, so when he was drifting alone on the boat, he was worried that there would be creatures in the pool, namely snakes...

Therefore, all this actually stemmed from his fear.

Han Fei was not in a hurry to help kill the blood python. He just let the insect and the blood python fight. Then he saw the vajra pestle-like weapon in the insect's hand flash. In the void, the insect horn was also colliding against the python.

Bam! Bam! Bam! The Blood Python's defense was very strong, and it completely blocked the full-strength attack of this insect.

The old turtle said in surprise, "So that's how it is. It's not that this bug is weak, but that this Blood Python was created by him. Therefore, the real strength of this Blood Python is completely based on this bug's imagination. If he thinks he can't beat it, then he can't beat it, but if he thinks he can, then he can."

Han Fei nodded slightly. "That's why I feel that this place is very special. It even has this weird method."

Han Fei immediately imagined countless Sun-Moon Shells flying in front of him...

However, nothing appeared.

"Humph, unreliable."

Han Fei began to imagine that a large amount of spiritual spring and spiritual fruits emerged from this blood pool! However, this idea might be too forward and he didn't get any response.

The insect was still fighting. Seeing that Han Fei was motionless, he immediately grew anxious. "Han Fei, this big snake is extremely fierce. Help me."

With a thought from Han Fei, the Infinity Water rolled, and the Blood Qi Snake collapsed.

The insect was stunned and immediately shouted, "Hiss... Han Fei, are you already so strong?"

Han Fei couldn't help rolling his eyes. "Strong my ass! This Blood Python is something you imagined. In fact, it doesn't have any particularly strong power. You think it's very powerful, so it's very powerful. I think it can't withstand a single blow, so it can be easily destroyed."

The insect was stunned for a moment, as if he hadn't figured out what was going on.

After a long pause, he said, "Is it imagined by me?"

Han Fei shrugged. "Why don't you try thinking of another one?"

The insect shook its head quickly and said, "I don't like snakes. There are no snakes in the Blood Qi River. It's all fake and illusory. In fact, there's nothing inside..."

The bug mumbled for a long time before he finally calmed down.

Han Fei asked, "Okay, who are you? How many people came with you?"

This insect was not an idiot. As a top Heavenly Talent of the insect race, when he realized the problem here, he naturally had a way to control his thoughts.

The insect said, "I'm Chong Liuliu! I came with Chong Xiaochong and Phoenix-Head Seven. The three of us found this place, but we were hunted by more than a dozen people from the White Shell Royal City and the Blood Sea Divine Wood City."

We had no choice but to enter the Blood Qi River.

Then when we floated on the river, we found that the Blood Qi River was sandwiched by mountains, and many tributaries appeared. Because no one was chasing us, we scattered to explore."

"I see."

Han Fei sighed. He wasn't surprised that two silly bugs and a bird had escaped from so many people. They were all top Heavenly Talents. Nothing was impossible.

However, the insect said that there were many roads here...

Then the problem came: why didn't he encounter any mountains when he came here? Why didn't he find any road?

Han Fei immediately said, "Follow me now."

Through Little White's perception of danger and the sensitivity of treasure, after a brief pause, Han Fei began to fly quickly in a certain direction in the mist.

Han Fei didn't know if it was because of the insect, but after only a hundred seconds, Han Fei encountered a mountain. In the mist, he found three tributaries.

Chong Liuliu said, "See! I'm not lying to you. There are many roads."

Seeing the roads, Han Fei immediately shouted, "Shut up, close your eyes. I'll control the boat."

Han Fei suspected that there was something wrong with the roads. Therefore, he simply closed his eyes and drove with Little White's perception.

Bang!

After traveling for less than half an hour, nothing happened. It seemed to be very safe on the Blood Qi River.

But at this moment, Han Fei suddenly opened his eyes and stepped onto the bow. Hearing the sound, Chong Liuliu opened his eyes and immediately appeared beside Han Fei.

Looking at the dark mass of things in the blood pool, Chong Liuliu was horrified.

Chong Liuliu: "This is not what I thought. My mind is clear now."

Han Fei said, "I know that it's not an illusion this time. It seems that there are really creatures in this blood pool."

"Crack, Crack, Crack..."

He heard cracking sounds on the hull.

Han Fei and Chong Liuliu quickly turned around, only to see many palm-sized, soft, abalone-like things on the side of the boat.

Information popped up in Han Fei's eyes.

< Name > Blood Mud

< Introduction > This is a plankton that feeds on rotten poison and blood. Even high temperatures and poisons can't kill them. Their bodies can withstand high temperatures. Their poison sacs are even effective on Venerable-level creatures. Once the blood mud is stuck to your body, it will turn into a pool of blood, turn into poison, and fuse into the body of the person who is stuck to. They won't leave until all the energy in the person is drained.

< Level > 63

< Quality > Rare

< Contained Spiritual Energy > 79,43 Points

< Edible Effect > Inedible

< Collectable > Blood Poison

<Absorbable>

< Remarks > Group creatures. The greater the noise, the easier it is to attract their attention.

Han Fei couldn't have felt worse when he saw those creatures.

Chong Liuliu extended his hook-like big hand, as if it wanted to directly hook these Blood Muds to death.

Han Fei shouted, "Don't let them touch your body. You can only attack from a distance."

Chong Liuliu was stunned and immediately retracted his hand. He opened his mouth and let out a scream.

Hualala!

A mass of Blood Mud was blown apart by his scream.

However, the Blood Muds in the water were surging, and more and more of them were appearing and even made the surface of the Blood Qi River bulge.

Han Fei secretly cursed, This idiot, he didn't even know what the enemy was before he used such an area-of-effect attack...

The sound attack had a wide range. You could've launched an infrasound wave! All it would take was one shock wave to shatter the Blood Muds.

But look, he shouted it out just like that? Now the surrounding Blood Muds must have all been attracted over by him!

Han Fei shouted, "Stop screaming. Are you an idiot?"

With a thought from Han Fei, the Million Knife Art was launched, and a large amount of Blood Muds was cut into pieces by the knives. However, the water around Han Fei and the others had completely stirred.

Bang!

A bulge exploded, and Blood Muds spurted out like a fountain.

"F*ck!"

"Ahhhh!"

In the blink of an eye, even though Chong Liuliu, as an insect race member, had already gotten used to the sea of bugs tactics, seeing this scene, he panicked too.

Han Fei grabbed Chong Liuliu's big horn and appeared a thousand meters away with a swish. The two boats behind him were thrown away.

At the moment Han Fei left the ship, the two boats were pushed up, and a large amount of Blood Muds crawled all over the hull, filling up the ship.

Han Fei stood proudly in the air, activated the Near at Hand Technique, and quickly jumped out of the space.

Chong Liuliu paused and then shouted, "Not good, our boat is gone."

Han Fei walked a dozen steps before he waved his hand, and a new boat appeared on the Blood Qi River.

The two landed on the boat, and Han Fei immediately scolded, "Don't attack with sound waves. Shut up. You bug race people are the best at making noise..."

Roar!

Not long after the two of them landed on the boat, they heard vague sounds echoing in the distance.

Han Fei frowned. It seemed to be... a dragon roar?

Chapter 1345: Heaven· Earth· Sea

Han Fei had been thinking about it!

He had been thinking about the Dragon Essence Energy, so hearing it, he thought to himself, No one can snatch it from me!

Therefore, after hearing the dragon roar, Han Fei hurried to activate the hull without hesitation. He was not worried about the lack of boats at all. After all, there were still nine in Forge the Universe!

Han Fei kept pushing with his palms, and the surface of the Blood Qi River exploded, pushing the hull forward in the opposite direction, making it like a gas cushioning boat.

Chong Liuliu watched on the side speechlessly and thought to himself, My sound waves might be a bit loud, but they're not as loud as yours!

The dragon roar was not close, and Han Fei felt that it was at least a thousand kilometers away.

At this time, the two hadn't left the waters of the Blood Muds, and Han Fei's movement had indeed alarmed this group of Blood Muds. Although they were not fast, Han Fei was not fast either. Along the way, there were also Blood Muds gathering.

Soon, Han Fei and Chong Liuliu saw blood surging behind them.

Chong Liuliu shouted, "They're coming! They're coming!"

Han Fei said, "Why are you panicking? What if you alarm them? They haven't caught up with us yet, right?"

The boat on the Blood Qi River was not a fishing boat after all.

Therefore, its speed was not fast. Even though Han Fei kept slapping the river, in less than half an hour, they were still caught up with by the Blood Muds both from front and behind. At this time, the two had only run about 500 kilometers.

At the moment when the fishing boat under his feet was swallowed by the Blood Muds, Han Fei grabbed Chong Liuliu again, slipped away, and flew a kilometer with each step.

Chong Liuliu felt that Han Fei was really strong. He could be so unyielding and reckless even in such a dangerous place.

Besides, Han Fei was using the Near at Hand Technique, wasn't he? It was said that this was the law enforcement ability of the Fish Dragon King in the White Shell Royal City. He didn't expect Han Fei to be able to use it too.

Chong Liuliu's idea was simple. Sure enough, the Heavenly Talents of the Water-Wood World are more powerful. The White Shell Royal City? The Blood Sea Divine Wood City? All trash.

...

Han Fei and Chong Liuliu were still controlling the ship to rush forward.

Not only Han Fei and Chong Liuliu, but other people were also attracted by the dragon roar.

Thousands of kilometers away, Zhang Xiaotian's hands were shivering. He was standing on a piece of land, and in front of him was a spiritual fruit that looked like blood jade.

Even before he reincarnated, he didn't know what this thing was. Now he was even more dumbfounded.

After picking the spiritual fruit, Zhang Xiaotian looked back at the Blood Qi River. Someone must have found this place and is coming here.

Unfortunately, this place was too strange!

If it weren't for the fact that he had wasted too much time in the Dragon-Might Mystic Barrier, Zhang Xiaotian felt that he would have found the right path long ago. Or to be exact, he would have been the fastest one.

Although Han Fei came directly from the entrance, it was definitely not easy to walk from the entrance. If he guessed right, he would also encounter some treasures, but it would take time to collect them.

After all, along the way, Zhang Xiaotian had collected a lot of things and wasted a lot of time. However, it seemed that the most important things were still ahead.

As a Heavenly Talent, Zhang Xiaotian didn't feel any sense of crisis. Even if he were to fight Han Fei head-on, he wouldn't flinch. This time, he wondered which of he and Han Fei had obtained more treasures. Zhang Xiaotian wasn't sure yet, but it was obvious that he was faster than Han Fei in terms of speed.

As for the other Heavenly Talents, Zhang Xiaotian didn't care at all. In his eyes, except for Han Fei, no one from the three major powers could beat him.

At this moment, Zhang Xiaotian just looked back and didn't plan to ambush them. Time was precious, and he didn't want to waste his time ambushing a few weaklings.

Zhang Xiaotian stepped into a slightly dilapidated teleportation array. The moment he entered the teleportation array, he set up a self-destructing array.

Yes, he didn't want to leave this road to others. After he used this teleportation array, he would destroy it. If Han Fei discovered it, it would be uncertain who would win in the end.

Just after Zhang Xiaotian left, in less than 20 seconds, a woman in a red dress appeared on this land with a swish.

"Huh? No one?"

The blood demon looked around and found that this so-called land was less than a kilometer long, which was not the end of the Blood Qi River at all.

Bam! Bam! Bam!

Just as the woman was about to leave, she heard continuous rumbling in the Blood Qi River.

The woman's expression changed drastically. Who was so f*cking crazy? There were creatures in the Blood Qi River. Once they were targeted by that thing, they would be doomed.

Scared, the woman jumped onto her own boat and secretly pushed the hull forward in order to continue looking for a way.

When Han Fei and Chong Liuliu arrived, Chong Liuliu shouted, "Han Fei, there is land and mud there."

Han Fei sniffed and frowned. Zhang Xiaotian had stopped here just now, and a Blood Demon seemed to have stopped here too.

Looking at the mass of Blood Muds chasing behind him, Han Fei didn't go ashore but chose to pass by.

When he passed the land, Han Fei scanned around with his perception and was surprised. There were traces of teleportation arrays?

The old turtle: "You seem to be slow."

Han Fei shook his head. "Don't panic. All roads lead to Rome. I'm not the only one who came in. In front, Little Black and Little White wasted some time swallowing the dragon ball, so they took the upper hand. However, don't panic. Obviously, they are not much faster than me. All I need to do is to catch up with them."

Han Fei kept heading forward.

After a while, he encountered some blood river branches of different sizes again.

With Little White's help, Han Fei didn't stop at all. He simply pressed on along the Blood Qi River.

Somewhere along the way, they encountered a large hollow mountain dome. The two of them passed along the Blood Qi River under the dome.

However, after entering this tributary, Han Fei found that the dome above his head seemed to be getting lower and lower. The top was almost invisible just now, but now a dome appeared a hundred meters away, and the mountains on both sides of the Blood Qi River became narrower and narrower.

"Hiss... This seems to be the right path," the old turtle said via voice transmission.

At this moment, the Blood Muds behind him had caught up again. Perhaps, this Blood Qi River was all their territory.

Han Fei stomped, and seven or eight Spirit Gathering Arrays were imprinted on the stone walls on the two shores.

He suddenly took out his fishing hook and hooked it dozens of kilometers away.

Swish!

The spiritual energy produced by the Spirit Gathering Arrays could indeed mislead the Blood Muds.

The Spirit Gathering Arrays were impacted by the Blood Muds several times and gradually dimmed and collapsed. At this time, Han Fei had pulled the boat away with the help of the fishing line at the dome of the mountain.

When they were flying in the air, Han Fei and Chong Liuliu saw that there was only the Blood Qi River below. All the Spirit Gathering Arrays had been completely broken, and the Blood Muds would probably slowly catch up.

However, in terms of speed, they were much slower than Han Fei now. After all, Han Fei was flying like swinging on a swing, traveling dozens of kilometers every swing.

Therefore, there was nothing to be afraid of. He wouldn't be killed by a group of law enforcer-realm Blood Muds!

They travelled for more than 200 kilometers soon. With a hand behind his back, Han Fei waved the fishing hook from time to time, anchored it to the rock walls on both sides of the shore, and swung forward.

This method saved him a lot of effort, which dumbfounded Chong Liuliu.

Chong Liuliu thought, This is the right way to steer a boat. If they can only drift on the river, how slow will it be?

Suddenly, Han Fei saw that on the top of the distant mountain, there seemed to be a huge rock hanging down. After a closer look, Han Fei was relieved. It turned out that there were some murals engraved on the rock.

Chong Liuliu: "What's that?"

Han Fei took a closer look. Those patterns were quite exquisite. Right above the boulder, there was a monster with a human head and a snake body. It looked like a snake spirit, but the person was a man, not a Snake Girl.

Beside the Snake Spirit, there were standing cranes that were raising their heads and whooping, and swan geese bending over and dancing...

That was all he could see...

The only terrifying thing was that the snake spirit's eyes seemed to be watching the people coming and going in the Blood Qi River.

Han Fei frowned. Why are the snake spirit and the auspicious birds drawn together?

This kind of mural popped up from nowhere. It was really hard to figure out its meaning.

About half an hour later, Han Fei felt that they should be reaching the end of the Blood Qi River soon, because there was already the smell of vegetation on the shore.

Sure enough, after only a hundred seconds, Han Fei found a huge stone door in the distance. Under the stone door, there was a broad road from the shore to the door.

In the middle of the road, there was a person walking. When he took a closer look, he saw that it was Zhang Xiaotian.

Chong Liuliu shouted, "It's Zhang Xiaotian, the strongest man in the White Shell Royal City."

Han Fei said, "Shut up. I know."

Zhang Xiaotian also realized that Han Fei and the others had come, but he didn't even look back. It seemed that they were not his enemies at all.

Chong Liuliu tried to jump ashore, only to be stopped by Han Fei. He shouted in a low voice, "This road is not easy to cross."

Han Fei looked at the road that was only a thousand meters long and a hundred meters wide.

On both sides of the road, there was a row of bushes and thorns.

Because they looked too orderly, Han Fei realized that the demonic plants on the two sides should be a kind of killing seal.

Besides, Han Fei felt a strong suppressing power here, which could be seen from the shivering legs of Chong Liuliu. Although Chong Liuliu hadn't realized it yet, Han Fei could perceive that the dragon might here was very powerful.

Han Fei immediately looked at the T-shaped stone door that was hundreds of meters high. On the stone door was the painting he saw on the boulder just now, but the painting on the door was more complete.

Han Fei glanced at it and found that this painting was divided into three parts. One part was the cross line in the T shape, which was a thousand feet wide and more than 50 meters high. This part of the painting was in the sky.

Beside the Snake Spirit, the cranes that were craning their heads and whooping and the swan geese that were bending over and dancing were heavenly auspicious birds.

There was a sun on the Snake Spirit's left, and a creature that Han Fei was familiar with appeared in the sun. It was a three-legged golden crow. He had never seen it before, but he had heard of it before.

On the Snake Spirit's right, there were three moons. There was a fish shadow in the moons. Han Fei didn't know what it was.

The second part was the middle part of the T-shaped painting, which was about 100 meters wide and more than 200 meters high.

If it was the first half, Han Fei could still understand it. It seemed to be above the nine heavens, where there was a very noble powerhouse, who was very likely to be the so-called Emperor.

But Han Fei couldn't understand the part below. This part clearly depicted the myriad races in the human world. On land, there were all kinds of creatures, but not many were shown.

Among them, there were humans, beasts, and some strange creatures offering sacrifices. In the sky, there were three palaces.

Han Fei couldn't help but ask, "Old turtle, do you know what those three palaces are?"

The old turtle was silent for a long time. "The legendary Tri-God Palace."

Han Fei was stunned. "Tri-God Palace? Which three gods?"

The old turtle pondered and said, "Don't ask that question again. That's a place that even I'm not qualified to ask. Few people know where they are. I only know that the Tri-God Palace is very powerful. Apart from the Tri-God Palace, there are some special forces that haven't shown on this painting. But once it involves the Tri-God Palace, no matter how small the forces are, they are behemoths to you. Even if you have become a king..."

The old turtle's voice was quite heavy, as if he didn't want to discuss the problem. This was the first time Han Fei had discovered that the old turtle talked about something so timidly.

Han Fei didn't ask further.

Clearly, this so-called Tri-God Palace was still very far away from him.

After all, even the old turtle didn't want to talk about it, and he didn't even hear of it!

Han Fei continued to look.

The last part of the T-shaped painting was the sea. In the sea, there were no cities, but there were many behemoths. In the painting, there were many marine creatures, from sharks to seaweed, octopus, shellfish, etc.

Among them, there was a row of relatively illusory figures.

Among them, one that Han Fei knew was Mermen. Their tails were very unique and beautiful.

In the end, there seemed to be a huge shadow in the deep sea, which made his scalp tingle. Is this what the real world looks like? Even kings are nothing?

This painting showed everything from the sky to the Tri-God Palace and the sea. The existence of the so-called Heavenly Palaces and the Royal Cities was not even mentioned.

Han Fei even suspected that the history depicted by this painting was far before the Age of Doom. The existence of the Tri-God Palace showed that it might be the so-called Age of Gods.

"Huff!"

Han Fei frowned slightly. "Perhaps when I enter the Heavenly Palace one day, I might be able to come into contact with this more obscure history, right?"

Chapter 1346: Dragon Essence Energy

While Han Fei was stunned, Chong Liuliu glanced at him, not daring to disturb him.

After a long time, when Han Fei came back to his senses, Chong Liuliu asked, "What do you think? Do we take this road?"

Han Fei thought for a moment. "Do you want to walk in front or behind?"

Hearing his words, Chong Liuliu immediately said, "I'm very loyal to my friend. Of course, we'll walk together."

Han Fei: "..."

Han Fei was speechless. Very loyal? Shouldn't you give me the way?

Of course, Han Fei didn't care about that.

He asked this question because he wanted to say that this road was not easy to walk. If Chong Liuliu wanted to walk ahead, there might be a certain danger.

However, the insect race's brain capacity might not be very sufficient. Especially in terms of these twists and turns of thinking, unless they had already transcended the tribulation or reached the Venerable realm.

Han Fei looked back. Wait? Of course not!

Although this road seemed to be only a thousand meters long, Zhang Xiaotian had only walked more than 400 meters, not even 500 meters.

Since Zhang Xiaotian was a reincarnation, he must have had means to continue walking forward. Take Bai Suzhen for example, she was the reincarnation of the Water Immortal. How talented was she? When he had just entered the Demon Subduing Tower and had not yet split his soul, there were still losses and wins when he fought her.

Zhang Xiaotian was also the reincarnation of a strong master. To be able to reach this level of strength, he was indeed not weak. After all, he had already transcended the Four Nine King Tribulation, and his Nine Bloody Spears were really not weak.

Han Fei frowned, issued an order in his heart, and grabbed an arrow from the void, shooting it at Zhang Xiaotian.

However, as soon as the arrow reached the top of this road, he felt a golden flash, and Han Fei felt a huge force reverse to him.

Bam! Bam! Bam!

Han Fei retreated seven or eight steps in a row before he finally stopped. There was a trace of blood dripping from his hand.

Chong Liuliu quickly said, "You can't attack him. Even I can see that. How could he leave his back to you under such circumstances? There must be certain rules on the way, or he wouldn't have dared to do that."

Han Fei nodded. "So, I'm just testing it out. The arrow just now wasn't powerful."

Han Fei took a deep breath and said, "Okay, then come with me. However, if you feel that you can't go on, don't force yourself. In such a dangerous place, the more you force yourself, the less good it will be."

Chong Liuliu immediately said, "Of course not. The Insect race has always been straightforward. We will grab whatever resources we can get no matter what. But as for those we can't get, even if the resources are placed in front of us, we won't grab them."

Han Fei was briefly stunned. Really? Is the insect race so sensible? Why does it sound so unreliable?

Han Fei stepped onto the road without hesitation.

The moment one of his feet landed, he felt a terrifying pressure pressing down on his head. This feeling reminded him of the pressure he felt when he encountered the dragon soul in the Ideal Palace.

Chong Liuliu, next to him, dropped to the ground with a thud the moment he came in, turning into a big two-horned bug and lying on the ground like a turtle shell.

Han Fei took a deep breath. Although this terrifying pressure was not weak, it was not enough to make him unable to move. This place was like a test. The mysterious person he met in the grassland probably didn't know that such a place existed on the island!

Han Fei couldn't help but turn his head and look at Chong Liuliu. "How is it? Can you still hold on?"

Chong Liuliu said in a trembling voice, "I feel that I'm going to die. My insect life is about to collapse. What power is this? It's horrible! My soul is about to be crushed."

Han Fei was speechless. "If you can't go forward, don't come up. To be honest, with your current look, this opportunity probably has nothing to do with you."

However, Chong Liuliu replied with a trembling voice, "No, this power is too terrifying. If I can withstand this pressure and continue to move forward, it will be beneficial to my cultivation. Besides, the opportunities may be given to different people separately. It depends on how far each person can go. I am a Heavenly Talent of the insect race, and I will never admit defeat."

Han Fei was almost amused. You're already shaking like this. Why can't you admit defeat?

Han Fei thought to himself, Although it proved that I couldn't attack others outside, can I do it on this road?

With a thought, Han Fei took out a dozen of the Great Coiled Turtle Array maps and threw them to the Coiled Turtle Array. "Take them. These are defensive arrays. If you encounter any danger, open one. Take your time. I'm leaving."

Chong Liuliu happily took the array maps.

However, he immediately realized that something was wrong. You can still walk under such pressure? Are you kidding me?

However, as soon as Han Fei finished speaking, he strode out. Yes, he literally strode out! Even in front of the dragon soul, Han Fei could still run.

At this moment, the dragon soul hadn't come out, and there was only some pressing power, so how would Han Fei be afraid?

Watching Han Fei quickly distancing himself from him, Chong Liuliu was lost for words. I'm a Heavenly Talent of the insect race. Even if I can't compare to Han Fei, I'm not that much weaker.

Stimulated by Han Fei, Chong Liuliu immediately held up his claws, squinted his eyes, and rushed forward crazily.

As he charged forward, he felt that he was awed every second.

Every time he took a step forward, he felt that his claws softened. He felt that he had already rushed far down, but when he opened his eyes, he found that Han Fei was even further away from him.

He looked back, only to be rendered speechless. He had been running for a long time, but he didn't even run 50 meters. And Han Fei had already gone down more than 200 meters.

Chong Liuliu let out a long breath. "It's horrible..."

He trembled and stopped, and Han Fei wasn't any better.

After walking 200 meters, Han Fei felt that something was watching him.

This feeling of being watched immediately reminded Han Fei of the feeling when he first met the dragon soul. This made Han Fei subconsciously activate the Invincible Will.

Sure enough, when the Invincible Will appeared, a golden light condensed on the surface of his body, and the pressure on Han Fei was greatly reduced. Only then did he continue to walk forward quickly.

Zhang Xiaotian didn't even need to look back. He had three hearts and nine brains in the first place, so he could certainly see Han Fei. Seeing Han Fei walking so quickly, he was a little surprised.

"The path of invincibility?"

Zhang Xiaotian's face darkened and his eyes were full of surprise. Although they had fought before, he didn't know that Han Fei had embarked on the path of invincibility.

"No wonder, no wonder there was a strange power in Han Fei's strength in the previous battles."

Zhang Xiaotian immediately made up his mind. His body suddenly began to change, his feet became octopus tentacles, and his hands held two strange spears, supporting him on the ground.

One behind the other, but Han Fei was obviously faster.

After walking 300 meters, Han Fei took a breath, looked at Zhang Xiaotian's back, and shouted with a smile, "Hey! Take it easy. Don't fall."

Zhang Xiaotian snorted. "Catch up with me first."

The poor Chong Liuliu tried for a long time but only managed to move 80 meters away. It wasn't even one-tenth of the arduous journey of a thousand meters.

At this moment, someone else arrived behind him.

With a chirp, a big bird flapped its wings crazily and controlled the boat. At the same time, flying feathers filled the sky as if it was fighting someone.

On the same boat as the big bird, an insect phantom appeared in the sky, colliding with a Blood Demon.

Behind them, four Blood Demons and Shrimp Youwei and the other two were all alive.

However, they had only taken three boats in total.

As for the reason, it could be seen from the distant rising water slope: the Blood Muds were surging. The boats must have been consumed.

At this time, Phoenix-Head Seven shouted, "Chong Xiaochong, it's Chong Xiaochong, and Han Fei. Let's go ashore quickly."

Chong Xiaochong buzzed. "I'm exhausted. These people are so annoying!"

Chong Xiaochong shouted, "Chong Xiaochong, here we come."

Phoenix-Head Seven said, "Something is not right. They must have encountered something difficult. Look, the three of them are in different places and moving forward slowly."

Chong Xiaochong was slightly relieved. It seemed that the difference between coming early and late wasn't that great!

Not far away, Shrimp Youwei and San Qi looked at each other.

Shrimp Youwei frowned. "It's inconvenient to fight in the Blood Qi River. But what's the situation with that road? Why is it so difficult to walk a thousand meters?"

San Qi said, "Look, Han Fei is chasing Xiaotian quickly. Xiaotian has slowed down."

Another person asked, "Can we launch a sneak attack from behind?"

Shrimp Youwei sneered. "If you don't want to die, you can have a try. If that can be done, do you think Han Fei and the insect will let go of this opportunity?"

The man flinched. "It seems that we're all going to take that road."

On the other side, a Blood Demon said, "This road might be a test. Besides, it seems that we can't attack each other on it. Let's land as soon as possible. Don't fight the bird and bugs."

At this moment, Han Fei had barely reached 400 meters.

However, there was only a thin layer of the invincible will left in his body. He looked back and found that everyone had come. However, at this moment, he had no choice.

All of a sudden, Han Fei noticed that there was a force slowly entering Zhang Xiaotian's body. Although it wasn't much, it did exist. The force was like a wisp of smoke and wafted gently.

"Is that... Dragon Essence Energy?"

Han Fei's face suddenly changed. Zhang Xiaotian had already surpassed 500 meters and walked 50 meters more. He could absorb the Dragon Essence Energy as soon as he passed 500 meters?

"Damn it, are you forcing me?"

"Roar!"

"Tiger King!"

With a deafening roar, as soon as Phoenix-Head Seven and Chong Xiaochong rushed onto this road, they saw Han Fei roar at the sky. Then, his body began to change and grew many strange furs.

A fierce tiger appeared.

The fierce fight between the dragon and the tiger began.

Han Fei's pupils suddenly narrowed. With the power of a king, he roared and his body glowed golden.

Han Fei roared, "I'm gonna flatten your path today!"

Chapter 1347: Dragon Bones

At this moment, Han Fei seemed to have felt the Dragon Essence Energy. However, because he came a little late, Zhang Xiaotian took the upper hand.

At this moment, if he didn't use all his methods, wouldn't all the opportunities have been taken by Zhang Xiaotian?

As soon as the tiger's might was released, Han Fei's eyes narrowed, and his body glowed golden.

Han Fei shook his body and jumped out like a tiger. He felt pressure permeating in all directions, but with a thought, his eyes turned fierce, and he roared at the sky.

"Roar!"

Behind.

The others were all dumbfounded.

Even Shrimp Youwei and the others found it incredible. What the hell is Han Fei? Is he really a human being?

Phoenix-Head Seven murmured, "It's a beast. Is Han Fei a beast?"

Chong Xiaochong said, "It doesn't matter what race he is from. Let's rush forward! This pressure is too terrifying! It must be a great opportunity."

Han Fei strode forward intimidatingly, and it only took him ten seconds to walk a hundred meters.

Feeling the tremor of his soul, Han Fei roared, "I am going to be a king. How can your mere pressure keep me in check? Break..."

Zhang Xiaotian had never seen such a strong person. He saw that the ferocious beast that Han Fei turned into was trembling and bristling all over, but it was still moving forward.

After only several seconds, Han Fei came to him.

Han Fei glanced at Zhang Xiaotian, feeling the strange power that was entering his body, and sneered. "This opportunity is mine."

Zhang Xiaotian curled his lips. "We haven't reached the end yet. It remains to be seen what the result will be. You can attack now and let me teach you a lesson."

Han Fei simply ignored Zhang Xiaotian. Do you think I'm stupid? If I take action at this time, the rules will definitely restrict me. The advantage I gained with so much pain might be gone!

With this in mind, Han Fei opened his mouth and swallowed the weird energy from the void.

"Huff!"

When the first mouthful of surging Dragon Essence Energy drilled into his body, the Dragon Essence Energy swam in his body, partly blending into his flesh, partly blending into his bones, and partly clearing his mind.

Han Fei couldn't help being refreshed. Could Dragon Essence Energy promote the growth of soul power? But there was no ownerless soul!

Unfortunately, the amount he absorbed was too little.

At this moment, he was only a few meters ahead of Zhang Xiaotian. It wasn't the time for him to be complacent yet.

"Glaring Vajra."

"Fuse."

"Attach."

"Devil Change."

Han Fei's eyes changed color, two eyes appeared on his shoulders, and his body bulged. Behind him, a golden giant appeared out of thin air. At this moment, Han Fei didn't want to hide anything.

In fact, even if these trump cards were shown to others, besides the Invincible Will that might be recognized, it was really difficult to distinguish the others.

Han Fei felt that the sourness of his flesh was relieved a lot.

At this moment, he roughly understood what Dragon Essence Energy was. In fact, it was a special kind of energy, although he didn't know the difference between this kind of energy and the so-called Chaos Energy.

However, this power could cleanse the body, improve the physique, and stabilize the soul.

After being baptized by the Dragon Essence Energy, he felt that the most fundamental benefit was the increase in strength.

However, this was not enough!

If that was all there was to it, the powerhouse in the tomb probably didn't need to remind him.

Therefore, either this wasn't true Dragon Essence Energy, or the amount of Dragon Essence Energy wasn't enough. So far, both situations were possible.

After all, he was at the door.

The door hadn't been opened yet, and the road in front of it wasn't something ordinary people could walk on. Could it be that what was inside the door was the true Dragon Essence Energy?

Han Fei quickly overtook Zhang Xiaotian. However, just as he was about to sprint to the end, the scene in front of him suddenly changed.

As if the chaos in the world had just appeared, Han Fei found that he was blocked by layers of fog. He looked forward, only to see a figure emerging from the white fog.

When he saw the figure, with a bang, Han Fei fell to the ground. The terrifying pressure even exceeded the dragon pressure just now.

This scene stunned everyone, including Zhang Xiaotian. What was going on?

Zhang Xiaotian suddenly realized that there should be a special power 600 meters away. Otherwise, with Han Fei's powerful state just now, he would definitely go all the way to the end.

However, it was not over yet. With a series of popping sounds, cracks appeared on Han Fei's body one after another. In an instant, golden blood gushed out.

Earlier, Zhang Xiaotian didn't think that Han Fei was really much stronger than him. He thought it was just that Han Fei had transcended the tribulation earlier. But now, when he saw the golden blood flowing out, he felt terrible.

Zhang Xiaotian couldn't help murmuring, "It's beyond the bloodline of humans?"

Zhang Xiaotian was shocked. He was different from those ordinary Heavenly Talents who were inexperienced. He was old and knowledgeable!

Being able to reincarnate wasn't something ordinary people could do in the first place. However, at this moment, he was still shocked. Even in his two lives, this was the first time Zhang Xiaotian had seen someone surpass the limits of the race when he was still an Explorer.

Immediately, Zhang Xiaotian narrowed his eyes slightly and stopped walking. At least, what Han Fei was experiencing now must be terrifying. He had to think about it.

At the forefront.

Han Fei was pressed to the ground. He tried to stand up with all his strength, but he didn't seem to be able to do so. The shadow in the sky seemed to be watching him, and the gaze alone made him even unable to stand straight.

The old turtle was also shocked. "Not good. This is not a dragon's might, but an imperial might. What did you see? Why is there an imperial might?"

"Roar roar roar!"

Han Fei made a muffled roar in his throat. "How the f*ck would I know? This b * stard, he's looking at me."

"Hush!"

The old turtle was shocked. "What are you cursing at? Do you want to die? How dare you insult an emperor?"

Han Fei snorted. "What do you know? He's just a phantom. It seems to be a phantom reflected on the door. That's not a real person."

The old turtle shouted, "Even if he's not a real person, you can't curse him! The perception of an emperor is beyond your imagination. Even if he is billions of kilometers away from you, he might be able to perceive you. Maybe, as long as you say his name, he will know that someone is talking about him."

Han Fei gritted his teeth and said, "I don't know his name. No, I have to get up! I walk the path of invincibility. How can I be lying on my stomach? Roar..."

Han Fei rose.

However, halfway through, with a crack, his front claws were broken. In the next second, he fell down again.

Gulp!

Han Fei's miserable look stunned everyone. How f*cking terrifying is this pressure? Even a monster like Han Fei can be suppressed to this level?

Everyone looked again, only to see that Zhang Xiaotian had stopped walking and began to absorb the power escaping from the void. Although he didn't seem to absorb much, he had been absorbing all the time!

"Holy Light Technique."

Buzz!

As the healing holy light fell, black and white light shot out of Han Fei's eyes. He suddenly remembered something, the "Dao heart" that the old turtle mentioned.

The old turtle said that when one's Dao heart was firm enough, he could ignore the physical pain.

To put it bluntly, it means immune to all physical pains!

Han Fei felt that he hadn't reached that level yet. However, what if he forcibly erased this pain?

“Heaven! Enlightenment! Divine! Technique!”

Buzz!

A terrifying holy light was descending.

In an instant, golden blood flowed back from Han Fei’s body, his wounds healed, and his bones recovered.

Bang!

Under the stunned gaze of everyone, Han Fei suddenly got up, raised his head, and roared at the phantom.

“Roar!”

Han Fei used another hundred years of his lifespan. The moment he got up, he rushed forward on the road.

Bam! Bam! Bam!

Every time Han Fei took a step, the ground would shake violently.

However, the moment Han Fei got up from the ground, the white mist around him dispersed, and the figure at the end of the white mist finally disappeared.

In the eyes of others, Han Fei’s figure began to fade as he ran.

After that, Han Fei disappeared.

Zhang Xiaotian’s face suddenly changed. Han Fei made it? Han Fei knows the Heaven Enlightenment Divine Technique? Han Fei has the human king bloodline?

Zhang Xiaotian knew that a long time ago, the human king traveled east, which was his Dao. Han Fei knew the Heaven Enlightenment Divine Technique too? Could it be that the human king was still alive and Han Fei was his reincarnation?

Seeing that he was only less than 30 meters away from him, Zhang Xiaotian hesitated. He had fought Han Fei before and knew how strong Han Fei’s physique was. He also walked the path of invincibility and had a lot of luck! In the end, he even used the Heaven Enlightenment Divine Technique before he successfully walked this path. Could he do it?

Zhang Xiaotian took a deep breath and tried for a long time to reach the place where Han Fei fell. Instead of moving forward, he began to absorb the strange power.

Zhang Xiaotian narrowed his eyes. “Han Fei is an unusually lucky man. It’s up to the White Armor Emperor to decide how to deal with him. I’m still growing. There’s no need for me to fight Han Fei to the death.”

...

On the other side.

Han Fei roared and rushed towards the gate. However, the scene in front of him changed and he found himself on a red land.

On this land, there was a large skeleton, which was 30,000 feet long. With the large bones as the boundary, there were a total of 95 Blood Qi River tributaries.

“Hiss!”

Seeing this scene, Han Fei gasped. “Are... are these dragon bones?”

Chapter 1348: Devouring Dragon Essence

Han Fei had never seen such a shocking scene before.

This feeling was like the first time he saw a dragon boat. His heart was full of shock. He remembered when he first saw a dragon boat, he felt that how could there be such a big boat in this world?

Now, Han Fei felt the same. How could there be such a huge creature in this world? Before, Han Fei had some imagination about the legendary dragons and expected to meet them in the future. However, even the imagined dragons were not so huge!

Although Han Fei had seen a dragon soul in the Ideal Palace, he had only seen a big head back then. Now, all he could see were dragon bones.

His bones were crystal clear and jade-like, and there were even faint red threads on them.

On these dragon bones, the faint red threads were still trembling slightly, as if these red lines were supporting this huge body.

Directly in front of Han Fei, there was a dragon head. The dragon teeth and horns on the head were just as rumored. The horns were like a deer’s, the head was like a camel’s, the eyes were like a bunny’s, the neck was like a snake’s, the abdomen was like a clam’s, the scales like a fish’s, the claws like an eagle’s, the palms like a tiger’s, and the ears like a bull’s...

Han Fei was still amazed by the amazingness of the dragon bones when he suddenly thought that it couldn’t be an azure dragon, right?

After all, the thing he had obtained earlier was the Fire Dragon Pearl. But what about the Azure Dragon? It was also called the Eastern Green Dragon. Although he didn’t know if it was called this in this world, no matter how he looked at it, it didn’t look like it was playing with fire.

At this moment, Han Fei looked at the intimidating dragon bones that were wrapped with red threads and slowly recovered from the shock.

Burple ~

The red threads suddenly emitted a faint red glow.

On the surface, the dragon’s skeleton was covered with red threads that looked like blood threads.

However, Han Fei and the old turtle discovered that something was wrong almost at the same time. These red threads were all from the 95 tributaries of the Blood Qi River.

And these lines were not blood energy at all, but the Dragon Essence Energy that Han Fei had just absorbed.

However, just now outside the door, the Dragon Essence Energy was in the state of wandering wisps.

But now these were like veins in the void, intertwined. In terms of volume, they were far more than the Dragon Essence Energy outside the giant door.

The old turtle said, "This should be the so-called Dragon Essence Energy. There's no mistake. However, what I don't understand is that this dragon shouldn't be comparable to the Emperor. How did it die behind this door?"

Han Fei frowned. "Are you sure we are behind the door?"

The old turtle thought for a moment. "Well! I'm not sure. It might be in another space."

Han Fei said, "The Dragon Essence Energy is gathering, and it just happened."

Han Fei saw that at the center of the dragon skeleton's eyebrows, the Dragon Essence Energy began to condense into a cocoon. It clearly happened when he came in.

Han Fei asked suspiciously, "Old Yuan, doesn't this look like an array?"

The old turtle pondered for a long time. "It doesn't look like an array, but it seems to be a certain power resurrecting."

"F*ck!"

Han Fei was stunned. "Resurrection? He's been dead for so long and only has bones left. How can he still be revived?"

The old turtle said, "His body can't recover, but his soul..."

"Shit!"

Bang!

Without a word, Han Fei instantly condensed a fist and punched at the big cocoon.

Splash!

A large cloud of Dragon Essence Energy gathered into a mist, like a huge shield, but was blasted back dozens of meters by the Sacrificing Punch. Then, it surrounded the power of the Sacrificing Punch.

Bang!

The Sacrificing Punch exploded, but it was still enshrouded by a massive amount of Dragon Essence, and the big cocoon was not damaged at all.

Han Fei's face changed drastically. "Not good. The human powerhouse in the deserted tomb is an enemy of the dragon race. If this dragon soul awakens, how can I leave alive? Old Yuan, attack and kill him."

Buzz!

A bloody mist spread out, trying to wrap the red cocoon where Dragon Essence Energy gathered and protect it.

Puff, puff, puff!

The old turtle attacked, but red lines spread out, and the black mist power of the old turtle was instantly stabbed into a beehive.

The old turtle shouted, "No! My current strength is too weak. Unless you have Chaos Energy to supplement me, we can't resist this Dragon Essence Energy."

Han Fei turned into a big ape and extended his hand, and the Embroidery Needle appeared in his hand.

"Monkey King's Three Thousand Sticks!"

Han Fei wanted to break the red cocoon now. No matter what, he couldn't let anything strange be produced from the big cocoon.

At this moment, Han Fei attacked with all his strength, launching a thousand waves of force.

"Roar!"

"Pfft!"

All of a sudden, dragon roars seemed to be echoing from the red cocoon.

Han Fei instantly vomited a mouthful of blood, and the Embroidery Needle in his hand was knocked flying. Is this guy really resurrecting?

The old turtle roared crazily, "Charge in! Come on!"

Han Fei was lost for words. "Do you think I'm crazy? That's a dragon. Wouldn't it be suicidal if I rush in?"

The old turtle said anxiously, "No! Do you forget how you devoured my power back then? As long as you attack it, it can't deal with you. Or rather, it can't deal with your calabash.

The old turtle continued, "According to you, dragons and humans are enemies. How can he let you go if he resurrects?"

Han Fei realized that what the old turtle said made sense.

Although he didn't know if this big cocoon was really dangerous, he really panicked now. He felt that if he couldn't kill this cocoon, he would probably die this time.

It couldn't be said that this premonition was self-deception. At the Explorer level, he had even comprehended the Great Dao. Things like premonitions had already become part of his instinct.

Han Fei gritted his teeth. "Twin Divine Technique."

Two masses of mist suddenly rose.

With a thought from Han Fei, the black-mist Han Fei entered Forge the Universe, and the white-mist Han Fei stepped in front of the big cocoon.

When the red mist saw Han Fei take the initiative to come over, countless red threads immediately rolled over.

When he was only half a meter away from the big cocoon, Han Fei seemed to see a shadow swimming inside. Although it was very vague, if he guessed right, it should be a snake-shaped dragon.

Seeing this scene, Han Fei became even more solemn. He was here to hunt treasure, not to deliver a package. When encountering such a prehistoric super powerhouse, the thing he had to think of was to prevent himself from being possessed by this kind of creature.

However, because of the Demon Purification Pot, theoretically speaking, he wouldn't be possessed. This was why the old turtle asked him to forcibly charge at the Dragon Essence Energy.

Han Fei was lost for words. He didn't know what the strong master in the deserted tomb was up to. Why did he ask him to do such a dangerous thing? That was a real dragon! Even if it died, it wasn't something that he could deal with!

Bang!

Han Fei returned to his human form, surrounded by the Ten Thousand Knives in One, and held the Sacrificing Punch in his hand. Looking at the mystic barrier of Dragon Essence Energy, with a bang, Han Fei crashed into it.

When the surrounding space became sticky, Han Fei drew his sword. Snowmourne bloomed with a dazzling brilliance, forcibly opening a crack in the mystic barrier.

At this moment, Han Fei finally rushed into the Dragon Essence Cocoon.

“Void Lines.”

In an instant, all the Void Lines were attached to the big cocoon. Han Fei knew that it must be him who was injured, but he still did it. He needed to activate the Demon Purification Pot.

“Roar!”

Following the Void Lines, Han Fei heard the dragon roar one after another.

“Pfft!”

As he expected, Han Fei kept vomiting blood. He felt that his ears were ringing.

At the moment when his soul was injured, the Demon Purification Pot's stress response mechanism would be activated. Otherwise, if his soul was injured or even died, where would the Demon Purification Pot go?

This was Han Fei's plan.

Han Fei roared with golden blood in his mouth, “Absorb now!”

Buzz!

At that moment, between Han Fei's eyebrows, a small vine leaf stuck out, green and luxuriant. Then three such small vines extended out at once.

In Han Fei's mind, the old turtle looked at the Demon Purification Pot that was spinning above his head. He had thought that he could take the opportunity to escape when the Demon Purification Pot was weak.

However, as soon as the old turtle moved, the calabash pressed down and hit his shell.

"Cough, cough ~"

Smack!

The old turtle snorted, and a crack appeared on his soul armor. He was too scared to move anymore.

The old turtle was pressed down by the Demon Purification Pot and didn't dare to move at all. The Dragon Essence Energy outside began to gather towards Han Fei like crazy.

The originally independent cocoon had now become two.

Roar! Roar!

Han Fei screamed.

This was because countless amounts of Dragon Essence Qi began to enter his body. In addition to the little vine swallowing, Han Fei felt that all the blood in his body was boiling.

In short, his flesh, bones, and soul seemed to be burning. The most terrifying thing was his skin, which turned bright red, making him look like a monster.

"Hu... Hu..."

Han Fei was wolfing down the energy with the absorption technique. After only a minute, he had gained three times more weight.

"No! I still have to practice the Indestructible Body."

Chi la!

This time, he was really on fire. His skin was burnt to nothingness in an instant, and the Dragon Essence Energy rushed directly into his flesh and meridians.

"Ahhh!"

The feeling of his bones being rubbed into powder was back at this moment.

"Hold on, hold on! As long as I make a breakthrough in this Indestructible Body, I won't feel any physical pain and only need to guard my soul."

While Han Fei was in agony, the dragon shadow next door began to roar deafeningly.

Han Fei felt his head was dizzy and was about to explode. His body hurt, so did his soul. It was so painful that he felt that his body didn't belong to him anymore.

"F*ck, Heaven Enlightenment Divine Technique!"

Han Fei felt that if this went on, even if he didn't die from the pain, he would be shaken to death. Immediately, he activated the Heaven Enlightenment Divine Technique again. No matter what, he had to relieve the pain a little, which wouldn't take many years of his lifespan.

Therefore, in one of the two red cocoons, a white light descended from time to time. In just half an hour, the white light descended more than 30 times.

An hour later.

With a click.

Han Fei suddenly opened his eyes. He made a breakthrough.

Chapter 1349: Slaying Dragon Soul

Han Fei was already numb from the pain. Just like smoking weed, every once in a while, Han Fei would use the Heavenly Enlightenment Technique on himself to cool himself down.

Relying on the fact that he could absorb the vitality of creatures, Han Fei didn't panic at all. He could use this chance to practice the Indestructible Body.

Before he finished cultivating the Indestructible Body, Han Fei couldn't hold back anymore. In all aspects, he had been polished to a solid state and had a breakthrough. It could be seen how much Dragon Essence Energy Han Fei had absorbed this time!

However, this was not all. A breakthrough woke Han Fei up from his dizziness.

At this moment, the dragon shadow next door was no longer howling.

As for Han Fei, he felt that his lower half body had been transformed into a golden body. Even his arms and his spine had become golden.

The only remaining parts were his ribs and skull.

At this moment, what was still transforming into the golden body was his ribs.

Han Fei was stunned. How could his skull become golden?

Holding back the pain, Han Fei asked, "Old Yuan, will my head break if my skull becomes golden?"

Unfortunately, the old turtle was being suppressed by the Demon Purification Pot at this moment. If the Demon Purification Pot didn't leave, he wouldn't dare to say a word, so Han Fei got no response from him.

Han Fei thought that Old Yuan had temporarily lost contact with him because of the Dragon Essence Energy!

At this moment, Han Fei felt that his ribs should have become golden, but his head hadn't been transformed golden yet...

Anyway, the Dragon Essence Energy seemed endless. He had to use it to improve his realm first before talking about anything else.

An hour later.

After using the Heaven Enlightenment Divine Technique another twenty-some times, Han Fei's ribs had been tempered, and only his skull hadn't turned golden yet.

Instead of tempering his skull in a hurry, Han Fei injected the Dragon Essence Energy into his body and crazily consumed the spiritual spring in Forge the Universe.

Level 75...

Level 76...

Han Fei was about to break through the barrier of an intermediate Explorer in one fell swoop.

However, with the terrifying spiritual energy and the Dragon Essence Energy surging in his body, before the barrier was broken, Han Fei's skull suddenly cracked with a crack.

"Pfft!"

He vomited a mouthful of blood, only to discover that there was a crack between his eyebrows.

Han Fei: "???"

Han Fei had never thought that cultivation would make his bones crack! What kind of mechanism was that?

"Is it because my skull hasn't been tempered yet?"

Suddenly, Han Fei thought of something. Could it be because he used the Twin God Technique? After all, the black-fog body was only half of his own.

He didn't think that the Dragon Essence Energy could kill him immediately.

Whether he hid in Forge the Universe or used the Twin Divine Technique, he should have a chance to escape. Han Fei gritted his teeth and summoned his white-mist body.

Buzz!

Removing the Twin Divine Technique, Han Fei's body and soul became one.

Immediately, Han Fei's fat body began to shrink like a balloon as if it had a vent.

"Huff!"

After a hundred seconds, when his body was restored to the three-fold size, Han Fei felt that it was about enough. He should be able to make another breakthrough.

Boom...

Smack!

"Not good! Heaven Enlightenment Divine Technique!"

When a huge amount of energy hit the barrier, Han Fei's glabella suddenly cracked again, and another crack appeared on the top of his head. Han Fei had a strong headache and felt terrible.

Buzz!

The white pillar of light descended, and Han Fei was revived as if he had just taken a mouthful of elixir.

At this moment, the old turtle said tentatively, "Don't try again."

Han Fei was shocked. "Huh? Old Yuan, you're still here? Tell me what happened first."

Only then did the old turtle secretly heave a sigh of relief. He was afraid that Han Fei would kill himself. Otherwise, before the Demon Purification Pot took him, Han Fei would have killed himself.

The old turtle said, "Can you move the calabash away from me first?"

Han Fei cast the Heaven Enlightenment Divine Technique on himself again and immersed his soul into his sea of consciousness, only to see that the Demon Purification Pot was pressing on the old turtle's shell.

Also, a crack appeared on the shell.

Han Fei's eyes narrowed slightly. The Demon Purification Pot hadn't attacked the old turtle for a long time. It didn't make sense for it to attack the old turtle at this moment!

The old turtle must've been doing something just now, but he failed to do it.

Han Fei said leisurely, "Old Yuan! We're already so familiar with each other. Let's be honest. I won't ask what happened... But tell me first, why can't I make a breakthrough now?"

The old turtle pondered for a moment and seemed to accept Han Fei's suggestion. Seeing that the Demon Purification Pot didn't respond to Han Fei's question, he said, "Skull is the most difficult place to transform into gold. Your strength has increased too much, but you haven't succeeded in refining your skull. Your strength is extremely unbalanced, causing you to be unable to break through. Besides, although you haven't formed a golden body, you have refined too much of it this time. Your soul was almost split in half a few days ago. This is also an imbalance. Therefore, with your top spiritual heritage that exceeds ordinary meridians, it is impossible for you to break through. Even if you break through the barrier of the intermediate Explorer, your foundation will inevitably be unstable."

Hearing that, Han Fei immediately understood! He had thought that it was because he had used the Twin Divine Technique...

The old turtle added, "The Dragon Essence Energy has begun to reduce. Think of a way to break the big cocoon and see if you can shatter it and swallow its soul."

Han Fei was stunned. Is the old turtle asking me to kill a dragon soul?!

Wait...

Han Fei suddenly woke up. Yes! This was just a dragon soul in a state of recovery, not a real dragon phantom. Why couldn't he kill it? Didn't the old turtle say that his strength had grown a lot?

"Roar!"

When another Heaven Enlightenment Divine Technique was activated, Han Fei roared, "Explode!"

Without the nourishment of the water, the explosion of the Infinity Water this time was not as powerful as the last time.

However, Han Fei's continuous breakthroughs also allowed the Infinity Water to grow at the same time. Therefore, its power was not much weaker.

At this moment, Han Fei's body was already numb from the devastation of the Indestructible Body, and he didn't care about the pain of the Infinity Water's self-destruction.

The Dragon Essence Energy exploded, and the Sacrificing Punch burst out again, hitting the big cocoon next door that had a dragon shadow in it.

"The Draw."

"Knock on the Heavenly Gate."

"Roar!"

Han Fei even used the Hundred Beast Soul Subduing Roar.

Didn't you just roar at me?

Fine, now I'm here to kill you. Roar again if you have the ability! If you can't kill me, I'll kill you.

As he expected, at the moment when the Hundred Beast Soul Subduing Roar burst out, the dragon shadow in the big cocoon fluttered and dragon roars burst out again. This time, Han Fei's nose and mouth were still bleeding, but he felt better than before.

When the big cocoon opened, Han Fei jumped in with a swish.

When the old turtle proposed to him just now, Han Fei was already prepared. He would first kill the dragon soul, then absorb the Dragon Essence, temper the golden body, and then make a breakthrough.

In this way, he would finish the process perfectly.

However, this first step didn't seem to be easy to take.

As soon as Han Fei jumped into the big cocoon, the Void Lines attached to it.

Suddenly, Han Fei felt a terrifying soul power attack him. He immediately shivered and shouted, "Fuse."

Little Fatty was an ancient exotic species with a weak divine beast bloodline. He could ignore the mental attacks of all creatures within ten levels higher than him.

Now, Han Fei was faced with the soul impact of the dragon phantom. Although Little Fatty was not strong enough, his mental resistance was not weak. Plus with his body, it was difficult to break.

Bang!

Under the terrifying impact, the surrounding void collapsed. The power of this soul attack exceeded imagination.

A scene that chilled Han Fei's heart appeared. On his shoulder, one of Little Fatty's round eyeballs completely exploded.

At that moment, Little Fatty said telepathically, "Kill him now. I can only survive one more attack."

Han Fei was furious to hear that. He didn't expect Little Fatty to be seriously injured and almost die.

"Roar!"

As soon as the second dragon roar was heard, on Han Fei's shoulder, Little Fatty's remaining eyeballs exploded, and Han Fei's face bled.

But Han Fei didn't care. His eyes were bloodshot, and he roared, "Calabash, kill it!"

"Roar!"

The Hundred Beast Soul Subduing Roar erupted.

However, this wasn't enough. Even if the dragon soul had just awakened, it wasn't something that Han Fei, an intermediate Explorer, could break.

At the critical moment, the Demon Purification Pot seemed to understand Han Fei's meaning, so it unhurriedly cut off a vine that was absorbing the Dragon Essence Energy.

The vine caught the seven or eight-meter-long dragon phantom.

"Roar... Burp..."

The dragon soul seemed to want to continue roaring.

However, the little green vine strangled it and silenced it. Then, the little vine went deep into the dragon shadow.

With the help of the little green vine, the Void Lines temporarily controlled the resurrected dragon soul.

"Damn it, explode!"

Shua!

The vines immediately constricted, and Han Fei activated the Soul Guarding Array. Dozens of Coiled Turtle Arrays broke through the air.

Rumble...

In the outside world.

Queen Life and the White Armor Emperor were waiting for the result.

Some people had just entered. Now, most of the creatures on the island had gathered in this mountain.

Rumble...

All of a sudden, everybody saw that the mountains in the mountain range were collapsing one after another.

Smack!

A terrifying array suddenly appeared, covering the entire mountain range. In the array, the Blood Qi River was still surging.

Queen Life and the White Armor Emperor looked at each other solemnly. "There's a blood pool here?"

Chapter 1350: Endless Dragon Essence Energy

The blood pool that should have been in an independent space collapsed because of the death of the dragon soul, causing the whole mountain range to collapse and the blood pool to be exposed.

However, they only saw the blood pool. Outside, there was still a dense blood aura array. Unless a strong master took action, this place wouldn't be broken.

At this moment, the people who were floating in the blood pool didn't feel this way. They only felt that the earth was shaking and the mountains were shaking. Apart from that, there were only the blood muds still fighting them.

But as long as there was a boat, the Blood Muds were not a big problem. After all, other people were not Han Fei. They didn't dare to make too much noise and attract the attention of all the Blood Muds in the waters.

At this moment, the biggest problem was that the door where Han Fei and Zhang Xiaotian were at didn't appear and was still hidden somewhere.

The White Armor Emperor and Queen Life were not looking at the people in the blood pool at all, but at Zhang Xiaotian and Han Fei...

Countless beasts were fleeing crazily. The intense blood Qi here horrified them. However, there were also Dragon Essence Energy overflowing in certain places. Many creatures gathered over and swallowed crazily.

The Insect King, Changshui Qin, and Yun Chu seemed to have received the news. They all reached out and grabbed a wisp of Dragon Essence Energy. No one had seen such power, including Queen Life and the others.

...

"Cough, cough, cough..."

Han Fei, dripping with blood, lay in the middle of the magnificent Dragon Essence Energy like a dry fish. His body slowly began to swell again.

Buzz!

The white pillar of light descended, and the Heaven Enlightenment Divine Technique was activated again.

Han Fei estimated that this time, he had consumed at least 300 years of vitality to assimilate the cultivation and growth this time.

However, Han Fei didn't practice the Indestructible Body at this moment, but split out hundreds of wisps of souls.

The dragon soul perished, leaving a large number of ownerless souls.

Compared to the pure golden body, the growth of soul power was the most important. Once his soul power grew, it would cause his comprehensive strength to begin to recover or even rise.

Therefore, compared to the cultivation of the Indestructible Body, Han Fei wanted to replenish his soul power more.

When wisps of faint blue soul fire returned to his mind, Han Fei clearly felt that his soul power was increasing.

However, he also discovered that the Dragon Essence Energy outside was gathering nonstop and automatically wrapping him up like a big cocoon.

In this way, Han Fei's body could hardly withstand this power.

No! I can't waste such surging energy. I can send some to the Sea Quelling Painting.

On the other side.

In the Sea Quelling Painting, B and her family were on Earth Nine's territory.

This family had never seen land creatures. In the Demon Refining Tower, they had never thought that there would be such a magical place in this world.

Zhang Yao and the snake demon both felt that this was probably the most comfortable life they had had in all these years!

Bai Suzhen didn't feel anything. She had a cold personality. Although she was curious about the little animals in this world, these animals were too weak and she wasn't quite interested.

When Queen Life entered this place, she already knew where she was. As she knew that Bai Suzhen was the reincarnation of the Water Immortal, Queen Life appeared in front of the Water Immortal in the image of a hermit in the Sea Quelling Painting.

For this reason, Queen Life threw Punishing Saber out of his cottage. Punishing Saber could only run to accompany Fire Seed while Queen Life occupied the grass cottage on the top of the mountain.

At this moment, Bai Suzhen was standing under a peach tree and talking to Queen Life who was in the cottage.

Bai Suzhen asked, "Is the growth of demonic plants really so easy?"

Queen Life said, "Demonic plants may be the creatures that have lived the longest in this world. You're talented, have an ancient seed, and have this body now. In the future, you'll be able to cultivate two Daos. Don't catch one and lose another..."

Buzz!

While they were talking, Han Fei's voice suddenly appeared in the Sea Quelling Painting.

“Tree Spirit, Punishing Saber... Listen, I’m going to send in a batch of energy now. Eat as much as you can! Don’t slack off. Try your best to eat. If you can’t eat it up, use it to expand this world. Senior Zhang Yao, Bai Suzhen, you have karma with me. You can eat the energy too...”

Tree Spirit and the others quickly replied, “Yes, Master.”

Zhang Yao saluted. “Thank you, Brother Han.”

Queen Life was briefly stunned. How much energy are you going to send in? Can’t you see there are so many people here?

In the grass cottage, Queen Life asked indifferently, “What about me?”

Han Fei was stunned and immediately said, “Of course you can eat whatever you want. Mine is yours, isn’t it?”

Han Fei was speechless. Unless Queen Life allowed him, he couldn’t call her his junior sister.

Han Fei thought to himself, I still need to work harder. I should make breakthroughs as soon as possible. Even if I just become a Venerable, it’ll be good! Then I’ll be much closer to becoming a king.

Of course, Han Fei also knew that his growth rate was already terrifying enough. If it was any faster, it would be a little abnormal.

Swish... Swish...

The entire Sea Quelling Painting began to emit terrifying energy. The Dragon Essence Energy instantly filled this world.

At first, just a small amount of power was wafting in the Sea Quelling Painting.

However, after half an hour, all the plants and ordinary creatures in the Sea Quelling Painting began to make breakthroughs.

Half an hour later, the plants in the Sea Quelling Painting grew crazy. Tree Spirit and the other four stood in the air and began to swallow the energy frantically.

Zhang Yao and Bai Suzhen were also surprised. What’s going on? Such terrifying energy is thrown in like it’s free of charge. What on earth is Han Fei’s background?

Even Queen Life was a little stunned. This was not normal natural energy, nor was it Chaos Energy, and it had nothing to do with Chaos Energy. This was a new kind of energy! Where did Han Fei get such a huge amount of this kind of energy?

Queen Life knew Han Fei’s personality very well. This must be because Han Fei couldn’t eat the energy up himself. Otherwise, he wouldn’t have sent this energy into the Sea Quelling Painting.

Unfortunately, the Queen Life in the Sea Quelling Painting was just a wisp of soul of the real Queen Life and couldn’t absorb much energy.

At this moment, Queen Life suddenly said, “It’s enough. The spiritual energy in the painting is limited. If you want the creature in the painting to absorb the energy, you also need to send in a large amount of

spiritual energy and spiritual spring. Now, the spiritual energy here is already very thin. If you stuff more energy in, the creatures here will self-destruct because of the excessive energy.”

Outside, Han Fei was laughing happily.

He didn't know how much Dragon Essence Energy there was. Anyway, he had already felt that the amount of Dragon Essence Energy had dropped a lot from the beginning.

The Demon Purification Pot was sucking, so was the Sea Quelling Painting, so his absorption speed was much slower. He could take a rest.

Hearing that, Han Fei glanced at Forge the Universe and found that there was only a little more than a million kilograms of spiritual spring left.

Han Fei's heart skipped a beat. Am I so poor again?

A million kilograms of spiritual spring meant more than a billion points of spiritual energy.

However, Han Fei usually got rich easily by robbing others. But when he snatched Zhang Xiaotian's Heavenly Tribulation, he consumed nearly half of his resources. Then, when he was swallowing the Dragon Essence Energy, he consumed a large amount of spiritual energy to make a breakthrough, which resulted in a shortage of spiritual spring.

Han Fei gritted his teeth. With a thought, he only left half a million catties of spiritual spring for himself, and the rest were all sent into the Sea Quelling Painting.

At this moment, the ownerless souls outside hadn't been swallowed up yet!

At this time, it was inappropriate for him to continue to practice the Indestructible Body, let alone make a breakthrough. He could only think of ways to stuff it into the Sea Quelling Painting!

Swish! Swish!

When a huge amount of spiritual energy flowed into the Sea Quelling Painting, the corner of Queen Life's mouth twitched slightly, and she thought to herself, This bastard is really rich and willful.

She said, "It's not enough. If you want the creatures here to be the same as on the outside, I'm afraid it'll need ten times more spiritual energy. This amount of spiritual energy can only last for one day, provided that the energy can't be sent further in. Otherwise, it can last for an hour at most."

Han Fei was speechless. "Okay, got it."

Seeing that the energy couldn't be stuffed into the Sea Quelling Painting anymore, Han Fei thought to himself, How long has it been since the last time Forge the Universe was expanded? Since this huge amount of energy can't be used up in the Sea Quelling Painting for the time being, I'll put it in Forge the Universe first.

The Fish Dragon King, who had turned into a Millennium Snapper, was really like a dry fish these days. Han Fei didn't let her go, so she just lay on the ground, seeming to be recalling the past.

Suddenly, she saw nothing but darkness around her.

The Fish Dragon King: "Han Fei, what do you want?"

Han Fei said, "Calm down. There is something that you can't see. Just stay there."

"Expand..."

The spiritual spring rolled up like a storm, and infinite pure spiritual energy filled Forge the Universe.

Now, it was different from before.

Back then, Han Fei only used ten thousand points of spiritual energy every time, at most hundreds of thousands. But now, he used hundreds of millions every time!

Therefore, Han Fei directly prepared 100 million points of spiritual energy for this expansion.

While consuming spiritual energy, he injected the Dragon Essence Energy into Forge the Universe.

Another half an hour passed. Han Fei didn't know how many hours had passed. In short, the Sea Quelling Painting had been completely sealed and no more energy could be sent in.

The Demon Purification Pot was still sucking, which solved many problems for Han Fei.

Forge the Universe had been expanded to a radius of 5,000 meters. The larger the area Han Fei expanded, the more spiritual energy was consumed. When it expanded to a radius of 5,000 meters, the actual spiritual energy consumed was 1.5 billion points.

Normally, Han Fei wouldn't panic at all. This amount of spiritual energy was not even enough to deduce a great technique!

But not now!

Now, Han Fei's spiritual spring was scarce again. Plus all the spiritual fruits and spiritual energy he had, he only had five or six hundred million in total.

He cultivated the Indestructible Body and made a breakthrough. All of this required energy, so he had to save some for himself!

But fortunately, he had almost finished swallowing the ownerless souls.

Han Fei felt that his soul had been greatly improved. Although it didn't return to its previous peak, it had definitely skyrocketed.

At this moment, Han Fei realized that he should continue to practice the Indestructible Body with the dwindling Dragon Essence Energy.

Once he cultivated the Indestructible Body, he would need to use the Heaven Enlightenment Divine Technique again.

Once he used the Heaven Enlightenment Divine Technique, he would have to consume his vitality.

He had lost seven or eight hundred years of his vitality. Even if he sucked up all the people on the island, it wouldn't help! After he got out, he would have to find a way to swallow more vitalities!

"Alas! I can't use up the Dragon Essence Energy. What should I do?"
