

GOF 1411

Chapter 1411: Put On A Show

Han Fei didn't expect that someone would dare to disrespect him after he had just assumed office.

Boom!

In the sky above the central city, a dazzling knife light shot into the sky.

...

Bang!

Han Fei's roar caught everyone off guard. Many people on the Scattered Stars Island were taken aback.

In a carnival shop, someone was drinking. Suddenly, he heard a thunder, and then his butt trembled, and the wine cup in his hand was overturned.

In the Guild of Fishers, many people were fishing. This was their daily job.

Someone was overjoyed. A Blood Spirit Shrimp was about to take the bait, which was worth a lot of money. When the Blood Spirit Shrimp was about to bite the bait, a roar came from the sky, and all the creatures near the sea fled in fright.

"F*ck, what happened?"

"That voice sounds familiar... Huh, isn't that Marshal Han's voice?"

"What's going on? Who is Marshal Han going to kill?"

At this moment, many people on duty saw a terrifying knife light sweep across the sky, directly cutting a huge hole in the sky.

Han Fei stepped in the air and pointed at the sky. "Which family are you from? How dare you attack the mayor's residence?"

Originally! The big clans were here to negotiate, but Han Fei was too domineering and didn't care about the consequences, so they were helpless.

They couldn't kill him. If the supreme commander of the Scattered Stars Island was killed by the big clans of the Thousand Star City, the consequences would be dire.

The Scattered Stars Island was full of elites of the human race. Once they had a grudge with the Thousand Star City, it would be troublesome.

The big clans couldn't defend against so many people! There were too many of them. Any one of them could rise to prominence in the future. Killing Han Fei would make countless enemies for the big clans.

Yesterday, the big families were here to negotiate, but Han Fei wanted too many resources. They really didn't want to invest such a huge amount of resources on the Scattered Stars Island alone.

They couldn't attack Han Fei nor avoid him.

Therefore, these big clans planned to give part of the required resources and then negotiate with Han Fei in private. Han Fei should know when to stop.

But who knew that as soon as this idea was proposed yesterday, Han Fei immediately cursed and even wanted to attack them. With the strong masters of the seven major sects here, what could Chu Qing and the others do except to return in disgrace?

Today, the people who came were different.

There was no telling how many Venerables the Zhang family had sent over, but another one had come now.

Back then, Han Fei failed to steal from the Zhang Family, which caused Li Daxian to start a fight with the Zhang family's second ancestor. In the end, the Sky Dissecting Finger was used and the second ancestor of the Zhang family was killed.

Therefore, the person of the Zhang Family came with anger today.

Although he couldn't touch Han Fei, the Zhang family had another trump card, which was currency.

Whether it was the currency of the Thousand Star City or the 36 towns, in fact, in the end, the Zhang family was responsible for reclaiming the useless pearls and then destroying them.

The reason why it was the Zhang family was firstly because the Zhang family controlled the dragon boats and could get a share of the Scattered Stars Island's resources, and secondly, the Zhang family was also responsible for the various markets in the Thousand Star City.

In terms of wealth, none of the Chu Sect, Cao Family, or other big families were a match for the Zhang Family.

Besides, because the Zhang family controlled the currency, no one dared to touch the Zhang family. Otherwise, if the Zhang family shook the world with their wealth, ordinary people wouldn't be able to resolve it.

It was fine to let them fight, but to settle accounts... the other families were indeed helpless.

But now, the dragon boats in the level-three fishery were gone, so was the Zhang Family's privilege on the Scattered Stars Island, but they still had to be responsible for regulating the economy. Therefore, Zhang Zhihuo felt it necessary to talk to Han Fei.

It was precisely because of this that the big clans pushed the Zhang family out to negotiate. After all, the Zhang family was best at negotiating and doing business.

If the economy collapsed, the Thousand Star City and the 36 towns would be in chaos, so would the Scattered Stars Island.

Zhang Zhihuo had already made up his mind before he came.

Even the finances of the Scattered Stars Island had to be controlled by the Zhang family to some extent. Where would the pearls collected from the Pearl Divers' Port go? This was all controlled by the Zhang family.

If Han Fei didn't want the world to be in a mess, fine, hand over the level-three fishery or waive the resources the Zhang family had to pay.

Zhang Zhihuo even felt that he could talk to Han Fei about the king's corpse.

And this was why Zhang Zhihuo dared to forcibly break the seal.

However, when he led the crowd over, he found that Han Fei actually refused visitors behind closed doors.

Damn it! You asked us to pay the money, but you refused to see us? Are you deliberately torturing us and slapping our faces?

Making a Venerable waiting outside your mansion for so long, who the f*ck do you think you are? Even an Explorer would be angry if being treated like this, let alone a Venerable.

However, what Zhang Zhihuo didn't expect was that Han Fei would directly cut him with a knife. F*ck, this is a negotiation. Why are you cutting me?

Han Fei burst into fury and pointed his knife at the sky. "Tell me, who are you? If you don't give me a good reason, I'll kill you today."

Chu Qing and the others hid in the void and sneered secretly.

Ye Kai said, "Han Fei is just a reckless idiot who only knows how to fight! If the Zhang family takes action, Han Fei won't be able to deal with them at all."

Chu Qing said, "But the Zhang family might not necessarily take action. Currency is a big deal. With the slightest carelessness, they will become sinners. However, it's not bad to let Han Fei become enemies with the Zhang family first. Even if the Zhang family endures it now, how can the humiliated Zhang family let Han Fei off?"

Zhang Zhihuo and Han Fei looked at each other in the sky and Zhang Zhihuo shouted, "I'm Zhang Zhihuo from the Zhang Family. I'm here to negotiate. Why are you refusing to see me?"

Hearing that he was from the Zhang family, Han Fei thought to himself, I've never seen this person before. It turns out he is from the Zhang Family.

However, the moment the guy came, Han Fei knew what his intentions were. Xue Shenqi and Mu Tianfang had both reminded him of this matter. They mentioned the Zhang family's ability to control the economy.

Han Fei had originally scoffed at it.

Handle the economy? I know how to do that too! I don't know how to do complicated economies, but how can I not know how to create innovative economic patterns and find some think-tanks to advise

me? After all, I've even seen the integration of the global economy. What's the big deal about the Zhang family?

Secretly, Han Fei had already gone to the Scattered Stars Sixth Unit, which was the one devoted to research.

Back then, the Poison God Cao Qiu invented was used by that unit.

When Han Fei showed them the paper currency he invented and the rules on barter, the entire Scattered Stars Sixth Unit was shocked.

They knew that Han Fei had done another great thing. This guy wanted to redefine the currency model!

Once this method was carried out, the existence of pearls wouldn't be so necessary.

At that time, paper money and pearls could be both used as currency. The situation would be complicated and difficult to interfere.

Some people in the Scattered Stars Sixth Unit speculated that with two kinds of currencies, Zhang family's role was no longer that important.

In fact, besides the Scattered Stars Sixth Unit, Han Fei had also consulted the Scattered Stars Fifth Unit.

The Scattered Stars Fifth Unit was the most secret supervision department on the Scattered Stars Island. Ordinary people didn't know of their existence at all. Even many people who knew the Scattered Stars Seventh Unit didn't know that there was a supervision department.

When he took over as the supreme commander, Han Fei set up a new supervision department. His real purpose was to investigate openly what could be investigated openly and investigate secretly those that could only be investigated in the dark.

By doing this, he could control the island firmly.

Although Han Fei had never really been a leader, how could he not know these things?

Besides, he was the one who devised the system in the City of Justice.

He proposed the plans and strategies.

As for the problems in the implementation process, he could modify the rule while implementing them. It was the job of a leader to organize a think tank to collect opinions and draw up various rules.

Therefore, the moment Zhang Zhihuo announced his name, Han Fei immediately knew his purpose.

At this moment, the Venerables all flew over, wondering who Han Fei was going to fight.

When they saw Zhang Zhihuo, they were speechless. Han Fei, you are really a tough guy. You are only the supreme commander of the Scattered Stars Island, not a real king yet, and not yet taking over the Thousand Star City and the 36 towns!

However, Han Fei took the initiative to shout, "How dare the Zhang family threaten me with the currency of the entire human race? Do you know that the currency will affect the entire human race and

shake the foundation of the human race? The Zhang family of the Thousand Star City wants to shake the foundation of the human race for their selfish interests? You deserve to be executed... Humph, hack!"

Zhang Zhihuo: "???"

Zhang Zhihuo was dumbfounded. I haven't f*cking said anything yet! You son of a b * tch, why are you so dramatic?

The Venerables: "???"

Chu Qing was alarmed and immediately said to Zhang Zhihuo via voice transmission, "Not good! Brother Zhang, Han Fei is setting a trap for you. Even if you didn't have such plans, Han Fei's sound waves had spread throughout the Scattered Stars Island. Now, I'm afraid the entire Scattered Stars Island has heard it!"

Zhang Zhihuo felt a chill down his spine. F*ck, can you not roar at the entire Scattered Stars Island for no good reason? Do you think it's glorious for us to fight?

However, at the next moment, a scene that made all the Venerables speechless appeared.

Zhang Zhihuo's voice sounded in the void, "Han Fei, don't go too far. Do you think you can say no to us? I'm afraid you can't afford the price you're going to pay!"

Zhang Zhihuo was stunned. I didn't say anything!

Everyone looked at Han Fei. The voice came from Han Fei's side, echoing in the void and covering the entire Scattered Stars Island.

Han Fei was putting on a show right in front of them. He didn't even bother to conceal it.

Sure enough, after Han Fei said that, the entire Scattered Stars Island went crazy.

Someone who was drinking immediately slammed his cup to the ground. "What a vicious Zhang family. No wonder Marshal Han is so furious and wants to kill him. This guy wants to subvert the economy of our human race!"

Someone burst into fury and roared at the sky, "F*ck... old b * stards of the Zhang family! Marshal Han is only asking for resources from you, and you dare to harm billions of human beings? You deserve to be executed!"

Even the itinerant cultivators of the Thousand Star City were dumbfounded when they heard that. They kept saying, "The big clans are despicable. The big clans are really a cancer of the human race!"

Someone shouted angrily, "The big clans are evil! They want to destroy our human race! They deserve to be executed!"

Chapter 1412: Slaying A Venerable Under the Sky Hanging Mirror (1)

At that time, the soldiers on the Scattered Stars Island were in an uproar.

For a moment, all kinds of curses were heard ceaselessly. It really reached the point where the sound of cursing could shake the sky.

Even if the big clans didn't want to give resources, they didn't have to threaten Marshal Han with the stability of the entire human race...

Zhang Zhihuo burst into fury. "Han Fei, stop slandering us!"

In a panic, Zhang Zhihuo shouted, trying to defend himself.

However, now that Han Fei had said that, he didn't know what to say. Could he say that... he wasn't the one who said those words just now, Han Fei pretended to be him, and Han Fei's purpose was to make the million soldiers on the Scattered Stars Island hate the big clans?

However, Han Fei had already finished his acting. At this time, how many people would believe him? Would these soldiers believe Han Fei or him who popped up from nowhere?

In desperation, Zhang Zhihuo said to Han Fei telepathically again, "Han Fei, don't make it public. We can discuss the resources you want."

"Discuss?"

Han Fei's lips curled, and golden light suddenly radiated from his body, and the shadow of a giant tore through the void. "You broke into my residence and threatened my human race. How can I tolerate you? If I don't kill you today, how can I take over the Scattered Stars Island?"

Chi la!

Han Fei tore the void, reached out, and grabbed, and a large mirror fell into his hand.

It was none other than the genuine Sky Hanging Mirror.

This magical mirror could show scenes tens of thousands of kilometers away. Xue Shenqi had personally shown it back on the ancient battlefield.

Han Fei shattered the void, and his voice sounded in Zhang Zhihuo's mind, "You think you can threaten me with currency? Your Zhang family's estate that has accumulated for tens of thousands of years is now destroyed by you.

Zhang Zhihuo shouted, "Han Fei, all this is just your self-directed act. What has it got to do with our Zhang family?"

Han Fei sneered. "You're already here. If I say that it has something to do with your Zhang family, it does. Of course, if I say that it has nothing to do with your Zhang family, it doesn't."

Zhang Zhihuo was already furious, but Han Fei's words forced him to hold back his fury. He shouted, "What do you want?"

A cunning gleam flashed in Han Fei's eyes. "The big clans usually believe in the same principle: As time goes by, all the unfavorable factors will eventually fade away and then be forgotten. No one will hold you accountable for the dirty things you did in the past. Therefore, you can be as despicable as you'd like. Anyway, everything will be forgotten... However, today, your Zhang family was pushed to the front

to bargain with me, and now you want to retreat and get out of the trouble? That's wishful thinking. I'll give you two choices. One is that let's fight for three thousand rounds and I'll try my best to kill you. The other is that you let me crush you three times to reassure the hearts of the million soldiers on the Scattered Stars Island."

"Impossible!"

Zhang Huo was furious.

Han Fei had even brought the Sky Hanging Mirror. How could he not see this? He had already run into the void. Why did he bring the Sky Hanging Mirror with him? Needless to say, Han Fei, this b * stard, just wanted the entire Scattered Stars Island to see his miserable defeat... This person was really shameless!

Zhang Zhihuo's heart was as clear as a mirror, but he couldn't explain it to the soldiers on the Scattered Stars Island! He had been set up by Han Fei!

The Zhang family had existed in the Thousand Star City for tens of thousands of years. If he was defeated by Han Fei three times, that would be a great disgrace!

Zhang Huozhi shouted, "Chu Qing, Ye Kai... Come and help me!"

However, Han Fei turned the round mirror in his hand, and the sky curtain above the Scattered Stars Island opened. What was happening in the void was fully displayed.

Seeing the scene, even Yang Kun, who had just taken a step back, retreated.

Including the seven major sects, everyone's expression changed. Han Fei's move was too ruthless. What did the big clans want? Face... And they came to negotiate with Han Fei just to try to take back some face.

However, Han Fei wanted to slap Zhang Zhihuo in the face and the whole process would be live-streamed.

Millions of pairs of eyes were staring at the void. Who the f*ck would dare to come up?

With Han Fei's unscrupulous personality, what if he set them up during the battle? Then wouldn't their families lose face?

At this moment, on the Scattered Stars Island.

Countless people looked up at the sky.

In that picture, Han Fei was wearing a battle suit, shining with golden light, and ten thousand knives circled him like dragons. In the black misty void, knives hung on the long star river, producing more than ten terrifying knife streams.

Someone exclaimed, "Oh, Marshal Han has made a move! F*ck, I've never seen a Venerable fight in my life!"

Someone cursed, "What are you talking about? Marshal Han hasn't become a Venerable yet! It's said that he's only a peak-level Explorer. He's crossing realms to kill a Venerable."

Gulp!

Many people swallowed crazily, looking at the terrifying saber beam river.

As soon as the sky curtain opened, the scene of the battle between the two parties was immediately magnified countless times. Only one shocking saber beam would make one's scalp tingle, not to mention tens of thousands of them?

The Empyrean Waterfall.

Big Yellow meowed. "Han Fei, Han Fei is fighting. He's so strong."

He Xiaoyu and her teammates looked at the sky blankly.

Beside her, the armorist swallowed. "Is, is this the combat power of a Venerable? I'm afraid even our entire brigade can't resist this slash, right?"

Next door, the manipulator said, "A brigade? Even a whole legion can't resist it. This kind of power is already beyond our imagination. We can't judge it with ordinary standards! As long as its aftershock touches us slightly, we won't be able to withstand it."

He Xiaoyu took a deep breath and looked at Jiuyin Ling, only to find that Jiuyin Ling was as calm as before.

On the Transverse Mountain, outside a small house, Xue Shenqi watched this scene indifferently, expressionless.

However, Xue Shenqi had complicated feelings. He didn't know if it was the right decision to give the position of supreme commander to Han Fei.

My Sky Hanging Mirror is used in battles. What are you doing? Are you showing a movie?

Somewhere in an unknown space, the corner of Han Guanshu's mouth twitched. Holding a cup of tea, he muttered to the void, "Our son's personality is a bit different from ours! I hope our daughter can be better."

...

In the void.

Han Fei thought to himself, I was wondering how to gather the Power of Will! And you sent me this meat bun! No matter what, I'll eat it first.

Zhang Zhihuo didn't accept his suggestion, so Han Fei certainly no longer waited. He simply shouted, "Thief Zhang, today I must kill you."

Boom ~

The Sacrificing Punch suddenly erupted, and the extremely domineering Sky Fist showed its power at this moment. Seeing Han Fei's punch, all the Venerables watching narrowed their eyes.

Jian Sanqing said, "In just ten years, Han Fei has grown into another Ren Tianfei."

The Fire Moon Fairy shook her head slightly. "No! Although Ren Tianfei is very arrogant, he is also very direct. He said he would kill his way through the Thousand Star City, then he killed his way through the Thousand Star City. Do you think Han Fei would do that?"

The atmosphere immediately became serious. Han Fei? This boy was very shrewd and was especially good at acting. He knew very well that he just needed to tell the story to the people who needed to believe it. Just now, Zhang Zhihuo fell for Han Fei's trick. He imitated his speech blatantly!

"Beast King Technique."

At this moment, on the Scattered Stars Island, Han Fei was the only king here, regardless of strength.

Han Fei was not afraid at all. His body expanded and grew to the height of the War Giants.

In his hand, wherever Snowmourn passed, snow and ice fell, the void was frozen, and sword marks tore the sky. Just looking at it made one's body turn cold and feel a chill.

Someone trembled. "What a horrible power! It looks so cold!"

Someone's eyes glowed. "He's so strong. Is this the power of a Venerable? Is this the real power of Marshal Han?"

At this moment, many people felt that it was no wonder Xue Shenqi gave the position of supreme commander to Han Fei... He was too f*cking powerful. A peak-level Explorer was chasing a Venerable all the way? How exciting!

Zhang Zhihuo finally got angry and shouted, "Han Fei, don't go too far. Do you really think I can do nothing to you?"

Han Fei sneered. "Then try it?"

Buzz!

With a thought from Zhang Zhihuo, the hundred-mile void instantly turned into a sea of fire.

"Fuse!"

A flame serpent stood behind Zhang Zhihuo and then drilled into his body.

Zhang Zhihuo's eyes, nose, and mouth were all on fire. It seemed that his flesh and blood were burning, and flames were spewing out of the gaps of his battle suit.

"Burning Sea of Fire!"

Hundreds of thousands of people on the Scattered Stars Island were frightened by the terrifying flames. The newcomers who had just come to the Scattered Stars Island were so frightened that they fell to the ground.

Chu Qing said, "Brother Zhang, Han Fei's Great Dao can seal space. Be careful."

Zhang Zhihuo issued an order in his heart, and a wave of fire rolled up, setting up a fire seed within a thousand kilometers. Even if Han Fei really had a way to seal the void, he had a way to leave.

“Han Fei, just because I don’t want to kill you doesn’t mean I don’t dare to fight you. The Zhang family won’t touch the fundamentals of the human race, neither now nor in the future. Don’t be an unreasonable person.”

Ignoring that, Han Fei continued, “Are you afraid now? You want to compromise? It’s too late. If I don’t kill you today, how can I take over the Scattered Stars Island?”

“Fuse!”

Han Fei roared, and the terrifying Pupil Spell was activated in front of so many people for the first time. He looked like an emotionless king.

Whoosh!

The giant Han Fei opened his mouth and swallowed. In the sea of fire, dozens of flame pythons turned into pure flame energy and were directly swallowed by Han Fei.

Zhang Zhihuo was dumbfounded. F*ck, what is this thing? Can it even absorb my Great Dao fire?

Zhang Zhihuo was dumbfounded.

The other Venerables and the million soldiers were dumbfounded too.

Next to a certain coastline, Lin Wu looked at this scene in horror and mumbled, “Senior Brother is so strong! Is... this the path I’m going to take?”

“Roar!”

The Hundred Beast Soul Subduing Roar was used.

In an instant, a hundred beasts flew across the sky, and the rumbling sounds were distorted again and again.

Clang! Clang! Clang!

Zhang Zhihuo’s face was twisted when he heard the sound of the Nine Sounds. These were powers that many people had never heard of. Zhang Zhihuo felt that his head was about to explode under the blast.

Although he hadn’t just entered the Venerable realm, he was only at the peak of the junior Venerable realm and was still far from the intermediate level. As for Han Fei, his strength had already exceeded his own.

At this moment, a terrifying power a thousand meters long, like a primeval python, blasted at Han Fei.

But in front of everyone’s eyes, Han Fei didn’t dodge at all, but just withstood the terrifying flame shock with his body alone.

From time to time, Han Fei would take a big gulp. In just a few seconds, he had swallowed the fiery serpent.

“Techniques are sealed in this space.”

Zhang Zhihuo immediately felt that something was wrong. He turned into a flame, and as the flame burned, he appeared thousands of kilometers away.

However, as soon as Zhang Zhihuo appeared, a sword shadow shot straight at his head.

He had no chance to escape at all!

Zhang Zhihuo thought that he had run away, but Han Fei activated the Near at Hand Technique, making Zhang Zhihuo only ten kilometers away from him.

Chi la!

Zhang Zhihuo was cut into pieces by the sword. Then, frost flowers quickly froze in the void.

Han Fei raised his sword and frowned. Not dead?

Chapter 1413: Slaying A Venerable Under the Sky Hanging Mirror (2)

On the Scattered Stars Island, millions of people gasped.

They were shocked by the sword light. A super powerhouse who should only exist in legends was killed by Han Fei with one slash?

Gulp!

Someone gasped. "Marshal Han, you really dare to kill him!"

Someone was dumbfounded. "Marshal Han, this is too powerful! A Venerable-level powerhouse can be killed so easily?"

Someone cursed, "Well done."

Chu Qing and the others' expressions changed. It seemed that the spatial power that Han Fei controlled wasn't as simple as sealing the void. This guy could actually control the void. With such a great technique, no wonder a peak-level Explorer dared to kill a Venerable.

On the Emyrean Waterfall, Ning Jing curled her lips too, thinking to herself, I taught him this technique, which is my unique technique.

Xue Shenqi watched this scene quietly. He probably knew that Han Fei's purpose was to obtain the Power of Will. Only the supreme commander of the Emyrean Waterfall knew this secret.

No one from those big clans had ever been chosen as the supreme commander because the previous supreme commanders were afraid that the people of the big clans would discover this secret after they became the supreme commander.

And those who knew this secret wouldn't easily tell this secret to others. If one more person knew it, it meant one more competitor.

Xue Shenqi thought to himself, If Han Fei can become a Venerable, I'm afraid he will really cause a huge uproar. As long as he is not in the Thousand Star City, the big clans can't do anything to him now. When

Han Fei becomes a Venerable, he will certainly go to the Thousand Star City. At that time, wouldn't there be great chaos?

However, he would have to wait until the crisis on the Scattered Stars Island was resolved.

At this moment.

Before the blood rain fell, Zhang Zhihuo appeared again.

Han Fei said telepathically again, "You can dodge it once, but let's see if you can dodge it twice."

Zhang Zhihuo was shocked. He discovered, to his shock, that he couldn't beat Han Fei? What was that supposed to mean?

In terms of strength, Han Fei was not much stronger than him.

In terms of soul, Han Fei should not be as strong as him.

Regarding the mastery of the Great Dao... Zhang Zhihuo wasn't sure about this.

Han Fei was too sinister. His control of space seemed to be beyond ordinary. It shouldn't be something an Explorer could have!

Furthermore, this guy's physique was too strong. He actually swallowed his Great Dao fire without being injured? He had broken his Great Dao! How could he fight again?

In fact, it was not that Han Fei could swallow Zhang Zhihuo's Great Dao fire, but that Little Black could.

The terrifying flame was absorbed into Han Fei's internal organs.

Little Black immediately absorbed it. All that was left was pure energy, which couldn't shake the current Han Fei.

And Han Fei's behavior just now clearly meant that he didn't want to leave him a way out. If he hadn't separated a piece of his soul and hid it in advance, he would have died.

This meant that Han Fei really wanted to kill him, and he really dared to kill him! This kid was lawless and didn't care about the price at all.

From the moment Han Fei pretended to be him to speak, to the fact that Han Fei killed without considering the consequences, Zhang Zhihuo thought that Han Fei was just a bloodthirsty person. Although he was stronger than Xue Shenqi, he was far behind Xue Shenqi in terms of intelligence.

Could it make sense for him to reason with such a ruthless killer?

Instantly, Zhang Zhihuo's body that had just been reborn split into countless flames that scattered in all directions.

But Zhang Zhihuo said, "Han Fei, I agree."

Han Fei sneered in his heart. "Why didn't you agree until now? Fine, in that case, I'll let it go if you let me beat the hell out of you twice more. However, the Zhang family must take the lead to give me the

resources right away. I think you must have brought the resources with you. As the richest family in the Thousand Star City, it's impossible for you not to have one last trump card."

No matter how angry Zhang Zhihuo was, so what?

Before he came, he had vowed to force Han Fei to surrender. After he came, to be honest, he was dumbfounded! He had never seen a person as reckless as Han Fei.

Han Fei shouted, "Rebirth with blood? Let's see how many times you can be reborn!"

Han Fei stepped into the air, followed by snow and ice.

In the sky, the fire was ablaze.

Even through the sky curtain, ordinary people couldn't see the battle in the void with their naked eyes.

Someone was puzzled. "Wasn't the Zhang family's Venerable killed just now?"

Someone sighed. "That's a Venerable. How can he die so easily? They can be reborn with a single drop of blood."

Someone said angrily, "I really don't know how such a person cultivated into the Venerable realm. He doesn't take the lives of ordinary humans seriously at all!"

Someone echoed, "Not only do they not take our lives seriously, but they are simply a cancer of the human race, crazily embezzling the resources of the human race. The resources of the 36 towns are incomparable to those of the Thousand Star City."

Someone was discussing, "Do you think Marshal Han can win?"

"Nonsense, of course he can win. Marshal Han is so strong. We've seen it for ourselves. He beat the Zhang family's Venerable to the point of being unable to fight back. Do you remember he killed two sea demon Venerables? However, the big clans are stronger."

The million soldiers on the Scattered Stars Island were all looking forward excitedly.

However, Chu Qing and the others' faces had already turned black.

After Zhang Zhihuo was killed just now, although the battle between Han Fei and Zhang Zhihuo was in full swing, it no longer felt like a life-and-death battle.

As Venerables, everyone knew what they were doing.

Sun Baisheng's face was stiff. "Zhang Zhihuo has compromised."

Yang Kun immediately said, "Are we really going to give such a huge amount of resources to the Scattered Stars Island? Can the Scattered Stars Island assimilate so many resources?"

Chu Qing's expression was ugly. "It's not a matter of whether they can absorb these resources or not. The problem is that the Scattered Stars Island accepted our resources, but they won't appreciate us. They will only think that the big clans of the Thousand Star City have compromised."

Ye Kai nodded. "Yes, but this is his territory. If we want to see the remains of a king, we have to see his face before the battle."

Yang Kun roared, "Damn it. I really want to kill him!"

Boom... Boom ~

In the void, Zhang Zhihuo was blown up again. Han Fei was like a Vajra God of War, and the picture flashed away.

"Great! Marshal Han is awesome!"

"Marshal Han, kill him. Let the big clans know that we humans will never succumb to them."

"The big clans should be wiped out ~"

"Marshal Han is invincible!"

"Marshal Han is invincible ~"

"Marshal Han is invincible ~"

In an instant, on the Scattered Stars Island, millions of people shouted at the sky in unison.

It was a magnificent scene!

And Han Fei himself didn't notice that when these million people were united, a certain will seemed to descend, and the essence of the human world gathered here.

Han Guanshu noticed it. Holding a teacup, he smiled at the scene.

Ning Jing also noticed it and was dumbfounded. Is this how powerful Han Fei is in the Yin-Yang World? Millions of people shouted in unison and soared into the sky. This feeling... It made her a little absent-minded. It was a bit like when the queen united the four races.

Boom...

The flames exploded again, and Zhang Zhihuo was reborn again.

The crowd was in an uproar three times in a row. Zhang Zhihuo was reborn three times, but he didn't really die.

This also made many people realize how terrifying the Venerable realm was! With Blood Rebirth, Zhang Zhihuo could actually fight Marshal Han to this point?

All of a sudden, the sound waves surged in the void. "Han Fei, I won't use human currency to threaten you. I'll give you the resources you want."

In the darkness, a large number of Sea Swallowing Seashells and Sun-Moon Shells appeared.

Seeing this, Han Fei finally stopped and grabbed all the resources.

Han Fei scanned with his perception and found that the resources were about the same.

He couldn't care less about the verification.

Han Fei immediately turned his head and looked into the void, shouting, “Where are the resources of your families? If you take them, give them to me. If not, get the hell back to the Thousand Star City.”

When the million soldiers saw the massive amount of resources, they were all excited. They had already tasted the benefits of Spirit Awakening Fluid, and there were scenes of breakthroughs everywhere on the island recently.

At this moment, the Zhang family had been subdued by Marshal Han and given the resources, which would all be given to them! Han Fei was fighting for them!

At this moment, the million-strong army knew that the big clans weren’t one family. Now that one family had given the resources to them, what about the other families? Would they give the resources?

Everyone held their breath.

Han Shuai tried to kill him, only to get a batch of resources. If these people didn’t give them the resources, would Han Fei continue to attack them?

“Hmph!”

A leisure voice sounded in the void, and then many Sea Swallowing Seashells and Sun-Moon Shells flew towards Han Fei.

In the sky, hundreds of Sea Swallowing Seashells and Sun-Moon Shells flew towards Han Fei, which made countless soldiers grin.

“Hahaha ~ Marshal Han is invincible!”

“Marshal Han is so fierce! That’s really great!”

“Haha, they said they wouldn’t give us the resources, but they did in the end, didn’t they? Damn it. If we don’t teach them a good lesson, they won’t listen to us.”

“I don’t know if Marshal Han can control the battle and command the battlefield, but in terms of robbing, Marshal Han is definitely the strongest.”

Slap!

This person’s head was immediately slapped, and someone scolded, “F*ck, what are you talking about? Marshal Han is not robbing but is gaining resources for us! He is upright and aboveboard!”

Hearing this, many people scratched their heads. Upright? Aboveboard?

Chapter 1414: Omnipotent Power of Will

Han Fei won this battle.

It could also be said that the million soldiers on the Scattered Stars Island won the final victory.

Zhang Zhihuo was very aggrieved. He certainly didn’t want to lose to Han Fei. When he came, he never expected this result.

However, Han Fei was determined to kill him from the beginning because he really wanted his life.

Could Zhang Zhihuo resist it? If he could, he wouldn't have been killed by Han Fei three times. In the first clash, Zhang Zhihuo knew that if he didn't agree, Han Fei would definitely kill him.

For a Venerable, his life was the most important. Even the interests of his family weren't worth his life!

Therefore, Zhang Zhihuo compromised. He took the lead to hand over resources, and the other families had to do the same.

Why?

The million soldiers of the Scattered Stars Island were all watching the live telecast! If someone was unwilling to give the resources, wouldn't he anger the public? This was definitely not a wise move. Besides, with Han Fei's strength, if someone refused to hand over resources, the consequences would be even more serious!

At this moment, Han Fei was very popular, and the big families didn't want to fall out with him now...

Looking at the expressions of the Venerables, Han Fei smiled faintly. He found this familiar feeling again. These big clans all bullied the weak and feared the strong. As long as you are strong enough and have the confidence to confront them, they will shrink. Just like in the Age of Doom, even if he killed their members in front of the big clans, so what?

The big clans had profound assets and many strong masters. Although they were powerful, such families often had a lot of fears. They weren't alone and had too many properties. This was why Old Han and the others could overawe these big clans.

When a huge amount of resources were gathered by Han Fei, Han Fei shouted, "Wang Lin, come and collect resources. Tell me if there is anything wrong."

"OK! Marshal Han, I'm here..."

Wang Lin's heart was still trembling.

Just now, he trembled all over while watching the battle. Unlike ordinary people, Explorers like him could more or less tell the difference.

After all, in terms of realm alone, Wang Lin was already an intermediate Explorer.

What Wang Lin was most worried about at that time was not whether Han Fei could grab resources, but if Han Fei really killed Zhang Zhihuo, the consequences would be dire! The Zhang family was the richest family in the Thousand Star City. Zhang Zhihuo came to the Scattered Stars Island to negotiate, but ended up being killed? Wouldn't the clan be angry?

Now that Zhang Zhihuo was still alive, Han Fei had acquired five large resources. To be honest, the Scattered Stars Island couldn't assimilate such a huge amount of resources for the time being.

Han Fei's resources alone had occupied all the Fei-Yan-Mu Furnaces on the Scattered Stars Island. The Spirit Awakening Fluid, spiritual fruits, and spiritual spring were all distributed to every soldier as perks.

Of course, the more Spirit Awakening Fluid, spiritual fruits, etc., the better. Even if there were more of them, the soldiers on the Scattered Stars Island could still assimilate them. However, those refining materials, combat skills, etc., couldn't be digested in a short time.

Wang Lin didn't mind the huge amount of resources. They could at least increase the combat power of the entire Scattered Stars Island by 10%. If the rest period was long enough, they would definitely be able to deal with the next full-scale battle.

Just now, Han Fei glanced at the Sea Swallowing Seashells and the Sun-Moon Shells that Zhang Huo threw down. There was no seventh level of Void Fishing in them, so he threw them all to Wang Lin.

After that, Han Fei looked at the sky and shouted, "Now, all human beings and sea demons are in a state of war. I thank you for your donation resources. However, a war is coming, so don't run around. I need your help."

While speaking, Han Fei was still regretful. Unfortunately, too few Venerables had come! There were only six of them, so they couldn't provide a lot of help. Among them, he only trusted Cao Shuang from the Cao Family a bit.

However, the Cao Family was not necessarily a good thing.

When Faceless caused a ruckus in the Thousand Star City, Old Han had asked the Cao Family to take action, but they didn't.

The Cao Family didn't offer any help, nor did they make any trouble. They were just neutral.

There were four Venerables from the seven major sects. Because of Tang Ge, he was relatively close to the Heavenly Sword Sect, and the Venerables of the Sea Cloud Tower could also be trusted.

Except for the Sea Cloud Tower and the Heavenly Sword Sect, he couldn't believe the other sects of the seven major sects. To be honest, Han Fei didn't believe anyone except his own people. This was because the sects in the Thousand Star City had been infiltrated by the major families before.

In Han Fei's opinion, the real purpose of these people's coming here should be the king's corpse, even including the Venerables of the Sea Cloud Tower.

"Humph ~"

Zhang Zhihuo and the others left one after another. After all, there was no room for negotiation. They had already been defeated and given the resources.

Zhang Zhihuo thought to himself, If I talk to Han Fei about the resource allocation of the level-three fishery and the Scattered Stars Island at this time, I'll probably have to fight him again. Then let me wait until the war between the human race and the sea demons ends! The war will break out soon. Let's see if Han Fei can still be as arrogant after the war!

Ignoring the Venerables of the big clans who had already left, Han Fei cupped his hands at the strong masters of the seven sects. "Sorry for making a scene."

Jian Sanqing, the Fire Moon Fairy, Mu Tianfang, and the others all took a deep look at Han Fei, bowed, and said goodbye.

However, in the opinions of these people from the seven major sects, it was obvious that Han Fei had long been prepared. He was just waiting for the Zhang Family to jump into his pit.

Why did he ask them to come back? Although he said he needed their help, it was actually more like a deterrence.

From the battle today, Han Fei's strength was even more terrifying than they had imagined. He could kill Zhang Zhihuo! Basically, Han Fei could kill anyone below the intermediate Venerable level here.

Perhaps some people thought that the Zhang family only knew how to do business, but they were rich and had resources! Zhang Zhihuo was only one step away from becoming an intermediate Venerable, but he was still beaten up by Han Fei.

Be it speed, strength, or soul, he looked weaker than Han Fei. Zhang Zhihuo's strongest Strange Fire had even been swallowed by Han Fei. They had never seen such a scene before.

Whether it was the Beast King Technique or the Hundred Beast Soul Subduing Roar, they didn't know it. Only Cao Shuang knew very well that the swallowing technique Han Fei just used was a secret technique of the Cao Family.

However, Cao Shuang didn't speak, because even the Cao family themselves only knew that the Cao family's secret technique was passed down from their ancestors. As for where their ancestors got it, which generation of ancestors got it? There were no records.

Han Fei withdrew the Sky Hanging Mirror, the sky curtain was closed, and the Scattered Stars Island was jubilating.

For most ordinary people, the battle of Venerables was nothing. They wanted resources, which was true!

In the eyes of everyone, in fact, they didn't care much about resources such as spiritual fruits, spiritual spring, or even weapons. They could get spiritual fruits themselves. As for weapons, in the past seven or eight years, the Fei-Yan-Mu Furnace had been operating at full power, and many soldiers on the Scattered Stars Island had used Semi-Divine weapons.

It could even be said that all Hidden Fishers used Semi-Divine weapons. Some even had more than one.

Those who didn't use Semi-Divine weapons were mostly below the level of advanced Hanging Fishers. Among advanced Hanging Fishers, Semi-Divine weapons were already common.

What they really wanted was the Spirit Awakening Fluid.

For Han Fei and the others, a hundred kilograms, a thousand kilograms, or a ten thousand kilograms of Spirit Awakening Fluid were nothing.

However, that was for people like Han Fei.

For ordinary people, the Spirit Awakening Fluid could improve their physique. They could even use the Spirit Awakening Fluid when they were about to cross realms. The more they used, the better the effect! Who wouldn't like it?

While everyone was very happy, Han Fei was also very happy. Except for the few people like Xue Shenqi, no one knew that Han Fei's greatest gain from this battle was... Power of Will.

At this moment, Han Fei returned to the mansion.

The two Hidden Fisher guards half-kneeled. "Marshal Han, please forgive us. We failed to stop them."

Although they said so, the two guards looked calm, their blood was surging, and their hearts were racing. It seemed that they were extremely excited.

Han Fei extended his hand and supported them with an invisible force.

Han Fei said kindly, "It doesn't matter. He is a Venerable. How can you stop him? I was too absorbed in cultivation to notice the anomalies in the outside world. You were almost killed."

With that said, Han Fei waved his hand and activated the Holy Light Technique, quelling the steaming blood of the two of them. Then, he waved his hand and threw ten kilograms of Spirit Awakening Fluid at each of them. "Take it!"

The two of them were dumbfounded. Didn't the marshal give us too much Spirit Awakening Fluid? Although ten kilograms of Spirit Awakening Fluid wasn't very expensive, it was still more than thirty thousand points of credits.

"Marshal, we can't take it. This is our duty."

Han Fei smiled and patted them on the shoulders. "Take it. Although I'm not rich now, twenty kilograms of Spirit Awakening Fluid is nothing for me. You are loyal to me. I should thank you."

In Han Fei's heart, the old turtle rolled his eyes. You are already so bad, but you're still pretending to be kind? Do you have a conscience?

Collecting the Spirit Awakening Fluid, the two guards were excited and flushed.

"Marshal Han, I'm willing to do anything for you."

Han Fei frowned. "No, not for me, but for the Scattered Stars Island and the human race."

"Yes, Marshal Han."

While they talked excitedly, Han Fei locked his mansion again.

After a few days, Han Fei once again felt a large amount of Power of Will enter his body.

Even at this moment, there was still the Power of Will entering his body. Obviously, at this moment, many people were excited, touched, and praised him.

Han Fei was determined to use the Power of Will to unveil the mystery of the mist bridge and comprehend his Great Dao.

However, when he was about to sit down and continue to study the secrets of the bridge, the old turtle suddenly said, "Han Fei, I think you can figure out your Great Dao later."

Han Fei was stunned. "Huh? Why do you say that?"

The old turtle said, "Do you really want to kill Zhang Zhihuo today?"

Han Fei nodded slightly. "It doesn't matter even if I kill him. The big clans have their limits. One person's death is not enough for them to erupt."

The old turtle said, "That's not what I'm talking about. What I mean is that even if you try your best, it's still very difficult for you to kill a Venerable if you don't take him by surprise. This shows that your strength is still a little lacking. Therefore, I think that you should increase your strength first. If you want to become a Venerable, you have to disassemble spiritual energy to the extent of the Venerable realm at the very least!"

"Huh?"

Han Fei couldn't help but ask, "Do you mean that I should use the Power of Will to improve the disassembling degree of spiritual energy?"

Chapter 1415: Make Trouble

Reminded by the old turtle, Han Fei was stunned for a moment. Although he couldn't use all his Great Dao, he had figured out part of its power.

For example, his Great Dao could make something out of nothing.

Then what about the degree of spiritual energy disassembling? Could it be activated through the Great Dao? He can try disassembling spiritual energy with the magical Power of Will!

...

"Wait, what if I use the Dao rune infiltration method?"

Something suddenly occurred to Han Fei.

The Insect King had once told him about this method. However, at that time, Han Fei hadn't fully grasped his Great Dao, nor had he fully grasped the ability of making something out of nothing.

Although he had tried it later, he still felt that the Dao runes couldn't quickly permeate spiritual energy. However, what if he replaced the Dao runes with the Power of Will? After all, Power of Will was also a kind of power of the Great Dao.

With this in mind, Han Fei's heart stirred. A point of spiritual energy appeared in front of him. Although it was imperceptible, it emitted a dazzling light.

Han Fei activated his Dao Seed, and with a thought, the invisible Power of Will quickly rushed towards this point of spiritual energy.

With this impact, Han Fei found that a kind of power was infiltrating, seeming to be entwined with the power of the Great Dao in spiritual energy.

"Fuse!"

Han Fei's heart kept beating. This was because he discovered that the Power of Will was tens of thousands of times more effective than the Dao rune infiltration method. The disassembling speed was extremely fast!

At this moment, Han Fei used the Yin-Yang Divine Eyes so that he could feel the flow of the Power of Will.

This was a feeling he had never had before. Now that the Power of Will was gathered in this point of spiritual energy, Han Fei had a hunch that he could find its trace.

Sure enough, when the Yin-Yang Divine Eyes appeared, Han Fei immediately saw an extremely weak, light blue, weird power that seemed to be drilling into the depths of the spiritual energy.

"It's it, it's it!"

Han Fei immediately smiled, which stunned the old turtle. He thought to himself, Can Han Fei see the invisible Power of Will?

However, the old turtle suddenly sensed something and said, "Han Fei, don't be excited yet. What you see is not necessarily the so-called Power of Will, but a dynamic feeling that your Power of Will penetrates the depths of spiritual energy. What you should pay more attention to is that little bit of spiritual energy, not the Power of Will."

Hearing what the old turtle said, Han Fei frowned and his heart turned cold. It seemed that what the old turtle said was true. What he saw was indeed a trace of the Great Dao, not the power of the Great Dao itself.

"Hu! You startled me. I thought I saw the Great Dao!"

Han Fei was immediately relieved.

The old turtle was also lost for words. "Do you think you can see the Great Dao so easily? There are thousands of Great Daos, all of which are different. What can you see? What is the Great Dao exactly? No one knows!"

Han Fei immediately focused his attention on the spiritual energy itself.

The spiritual energy cloak was quickly infiltrated.

In Han Fei's mind, he was quickly disassembling this bit of spiritual energy. Every time he went deeper, he felt that this bit of spiritual energy was more difficult to penetrate and separate. The more he went deeper, the more powerful this bit of spiritual energy seemed to be. The real power of this bit of spiritual energy seemed to have exceeded 1.7 times its normal explosive power.

Han Fei felt that the spiritual energy was quickly infiltrating his body. After only a moment, it increased a little.

67%.

68%.

69%.

70%.

...

As the Power of Will penetrated, the threshold of 70% had been broken.

Immediately, Han Fei felt that the infiltration became more difficult. It was like two magnets. The closer they were to each other, the greater the repulsive force produced.

At 72%, Han Fei felt that the Power of Will he got from showing a movie in front of millions of soldiers was almost exhausted.

In Han Fei's body, the old turtle felt a chill down his spine. Is this the power that human beings call Power of Will? Strange! The disassembling degree of spiritual energy is improving too fast!

At this moment, Han Fei had already stopped. In front of him, two points of spiritual energy appeared, one big and one small.

Looking at the two points of spiritual energy, Han Fei suddenly had an idea. If he disassembled one point of spiritual energy to the end and gathered the rest, wouldn't he still get one point of spiritual energy in the end?

Also, could he disassemble a point of spiritual energy into two points, then split two points into four points, and four points into eight points?

In this way, theoretically, he could get infinite spiritual energy. However, in terms of disassembling, he needed to disassemble it into eight points of spiritual energy, and then he would get eighty-seven percent of spiritual energy, which could reach the level of the Insect King.

Han Fei immediately told the old turtle what he thought, and the old turtle sneered. "Han Fei, do you think all cultivators are fools? If it's really as simple as you say, why did the sea demons disassemble spiritual energy and perceive power?"

Han Fei frowned. "But theoretically, it's feasible."

The old turtle said, "No matter how you disassemble one point of spiritual energy, you can only get two points of spiritual energy in the end. The bigger one is the power that you can already control. Remember, it's something you can control, because you can only disassemble so much. As for the remaining spiritual energy that you can't disassemble, that's something you can't control. Therefore, continuing to disassemble it is meaningful. Every time the power you disassemble becomes one percent more, it means that your control over this power becomes one percent more. Although your mind is racing, you forgot that the most fundamental thing about disassembling spiritual energy is not really to disassemble a point of spiritual energy into two points and use the power of two points, but... you can completely control all the power contained in this point of spiritual energy."

Han Fei was silent for a moment. "So, as for the separation method I mentioned, no matter how much I separate, the final result will always be 50% disassembling degree and not much higher?"

The old turtle said with a smile, "I can tell you that this method will work, but it's not what you think. As you said, there are also benefits in disassembling. You can comprehend the power of balance. You can try it later. It's quite beneficial for combat, but not for understanding energy like spiritual energy."

Han Fei sighed. F*ck, the Power of Will that he worked so hard to get only increased his spiritual energy disassembling degree by six percent?

Han Fei immediately pointed his finger and blasted the spiritual energy away.

However, the next moment, he saw a fire mark appear. The spiritual energy that had been disassembled by 72% blasted out nearly one point eight meters.

“Hiss ~”

Han Fei couldn't help but ask, “Wait... Old Yuan! When you were in my realm, how many times more power could you exert from one point of spiritual energy? 1.8 times?”

The old turtle said leisurely, “Don't be cocky. In the Explorer level, theoretically speaking, the highest limit of spiritual energy disassembling is two times. Of course, these two times vary from person to person. Therefore, the power unleashed is different. If you want to catch up to me, you'll have to disassemble at least three or four percent more. If you want to surpass me, you'll have to disassemble at least eighty percent.”

Han Fei was a little frightened when he heard that. An Explorer could reach 80%? This couldn't be simple.

The Insect King was already a Heavenly Talent, wasn't it? Up to now, his degree should be around 88%. The old turtle had also said that 85% was already the standard for Heavenly Talents.

Han Fei was about to speak, when the old turtle said, “You want to ask what's the highest degree for the Explorer realm, right?”

Han Fei nodded. “Do you know?”

The old turtle chuckled and said, “There's no need to pursue this deliberately. The disassembling of spiritual energy isn't something that an Explorer needs to do. Therefore, as long as you reach 70%, you can become a Venerable. It doesn't mean that the higher the disassembling degree, the stronger the Venerable is. As long as you catch up later, it will be the same.”

“Huh?”

Han Fei was stunned. “The same?”

The old turtle said casually, “Yes. That's why I asked you to uncover the mystery of your Great Dao later. Look, in just half a day, although it seems that your strength hasn't increased, your combat power has increased by nearly 10%. Isn't this more useful than trying to solve the mystery of the Great Dao?”

Han Fei realized that the old turtle's reminder was right. This guy must've realized that he was in a dangerous situation. If he didn't improve his strength as soon as possible, he might die with him.

Han Fei grinned. “Old Yuan, you're really something. To thank you for your reminding, I'll find a Venerable to let you absorb his vitality.”

The old turtle said leisurely, “You should worry about yourself first! Although I don't know the situation of the sea demons here, the Venerables on your side are much weaker than those on the Water-Wood

World's side, and they are not united. If there is really a royal city like the White Shell Royal City, I don't know why you take over the Scattered Stars Island. Because such a royal city is definitely not something the current Scattered Stars Island can defeat."

Han Fei's eyes turned cold, and he sneered. "But... it hasn't appeared yet."

Han Fei rose and continued, "Now, my disassembling degree is up to standard. All I need to do is to unveil the mystery of the Great Dao. As soon as the mystery is solved, I can become a Half-Venerable."

The old turtle seemed to have guessed something and asked, "Wait... What are you going to do?"

The old turtle knew Han Fei too well. When this guy found that the Power of Will was so useful, he would definitely try to collect it. With the daily supply of Power of Will of millions of soldiers, it would take at least several months for him to accumulate enough Power of Will.

Could Han Fei afford to wait? Even if he could, he probably wouldn't.

Therefore, the answer was obvious: Han Fei wanted to contrive an event, a big event that could shock millions of soldiers.

Chapter 1416: Take Precautions

Three days passed in a flash.

After the battle, there were too many things to deal with. All kinds of problems, when the major departments couldn't solve them, had to be sent to the Marshal's Mansion.

Han Fei felt that he was even more tired than being an Emperor. Although he didn't have to do everything personally, he had to keep an eye on literally everything.

Fortunately, he had the Twin Divine Technique.

At this moment, only Han Fei's white mist body was guarding the mansion, and the black mist body went to the bottom of the Empyrean Waterfall.

The Star Turtle asked, "Boy, how did you break the seal last time?"

Han Fei replied ambiguously, "I came back to find an answer..."

Standing next to the corpse of the Cloud Whale again, Han Fei didn't try to grab the Cloud Whale's demonic origin. He circled the corpse over and over again.

Although the Cloud Whale had died, its scales, flesh, and bones were all exuding the aura of the Great Dao. This was why a large amount of Spirit Awakening Fluid could be produced here.

Han Fei walked here many times and tried to perceive it again and again, but in the end, he was a little puzzled. Although this corpse was exuding the aura of the Great Dao, he couldn't feel the strong power of the Great Dao at all.

So he asked the old turtle.

However, the old turtle said, "With my current strength, I can't peep at the king. If I cultivate for another hundred years, I'll definitely be able to see his Dao."

Han Fei rolled his eyes. I'm not even thirty yet! I can't wait a hundred days for you!

Although the old turtle couldn't pry into the Cloud Whale's Great Dao, he accidentally asked, "For some reason, I feel that this Great Dao is not strong! Even if a king has been dead for so long, his Great Dao shouldn't be so weak!"

Han Fei was puzzled. "Weak? How weak?"

The old turtle said, "It's just not strong. I don't know if it's because its demonic origin was ruined or something. By logic, its aura of the Great Dao should be at least several times that of now."

Han Fei was also lost for words. It had already died, so what was the difference if its Great Dao was strong or not?

After three days of fruitless exploration, Han Fei appeared in the Sea of Pearls through the Cloud Whale's Demonic Origin again.

Sure enough, with such a long distance, the Twin God Technique immediately became unstable.

Han Fei felt a strong attraction. He had to return to the Scattered Stars Island immediately.

When the black mist body returned to within ten thousand kilometers of the Scattered Stars Island, the feeling that the Twin God Technique was about to collapse disappeared.

"Woo ~"

When the black mist body was about to rush to the Marshal's Mansion, Han Fei saw that the Cloud Whale on the Scattered Stars Island had just taken off and was only a hundred kilometers away from him.

The Cloud Whale was flying towards him.

Han Fei was not in a hurry. He was quite curious about the Cloud Whale and didn't think that it was a creature from the Yin-Yang World.

Where did Tang Yan get this guy from back then?

"Woo ~"

Although the Cloud Whale was huge, its speed was not slow at all. It swam in the clouds like a fish in water. Han Fei stepped to the Cloud Whale with his black fog body and saw many people on its back, who were flying to the teleportation island.

These people had all undergone rigorous investigation and were confirmed to be returning to their hometown.

In the subsequent work, Han Fei also expressed that it was not that he didn't want them, but that the 36 towns really lacked talents.

Every soldier who had returned from the Scattered Stars Island would be a renowned figure in the 36 towns.

Therefore, they should be happy to have such an opportunity. How comfortable would it be to go back and live a carefree life? If they could teach some students and tell stories, their lives would be perfect.

At this moment, someone was complaining, "Son of a b * tch! I'm still healthy. I don't understand why they sent me back."

Someone laughed. "Don't you know why they sent you back? Your foundation has been damaged and you can't make any progress. Do you want to stay here and wait to die in battles?"

The man cursed, "But I'm a junior Hidden Fisher anyway! Am I not strong enough?"

Someone laughed. "Yes, you're strong! The problem is that Marshal Han may think that it's better for us to teach the younger generation in the 36 towns and dig out talents. Don't forget, the Scattered Stars Island is going to be open to the 36 towns. Marshal Han is taking precautions."

Someone echoed, "Actually, Marshal Han is right. The casualty rate of the people from the 36 towns who come to the Scattered Stars Island is actually much higher than those from the Thousand Star City. In the end, what's the reason? Isn't it because the comprehensive strength of the 36 towns is not as good as that of the Thousand Star City? Even the ordinary people in the Thousand Star City live in a place with complete information and have long known the existence of the Scattered Stars Island. But it has been kept a secret from our 36 towns and they told us the island is a dangerous unknown place... Even when we came to the island, they still kept it a secret from us for a while!"

Someone was lost for words. "That's because we are really weak! When we just came, if we really went to the deep sea, we would have died ten or eight times... However, I still don't understand. Why do they have to keep it a secret from the Thirty-Six Towns? If it's dangerous, it's dangerous. Can't you just tell us?"

Someone said, "Why? It's because the 36 towns are weak and don't have the ability to help in the battle. Then why do they bother to make everyone panic all day long? On the contrary, treating the Unknown Place as a pursuit, this can stimulate the cultivation enthusiasm of the people in the 36 towns."

Someone sighed. "But now, the Sea Demon Royal City is going to come out, and the people in the 36 towns can't live in dreams anymore. This time, a large number of strong masters are returning to their hometown, which must have caused a shock."

Han Fei didn't pay much attention to their discussion. In fact, they were right. This was what he thought. Just like when the City of Justice was founded, how could the surrounding towns rise quickly without the support of strong masters?

"Woo ~"

Suddenly, Han Fei noticed that the Cloud Whale rolled its eyes and looked at him. And when it saw him, it opened its mouth slightly as if asking for food.

"Huh?"

Han Fei was shocked. What realm is the Cloud Whale in? How can it see my black fog body?

He had fed the Cloud Whale several times before.

This guy should be able to recognize him. Although there were many strong masters on the Scattered Stars Island, every time he saw this guy, he would feed him and communicate with him. There were probably not many people like him.

Han Fei remained calm and didn't feed it. Otherwise, a crab or a lobster floating in the air would've scared the people on the Cloud Whale to death.

Although Han Fei didn't feed it, someone on the Cloud Whale's head said, "The Cloud Whale opened its mouth. Does it want to eat something? This foodie."

As they talked, someone took out a big squid, which was a rare creature and was only level-38. It was not very strong, but fortunately, it was big.

The person who spoke patted the Cloud Whale's head. "Xiaoyun, come on, open your mouth."

Seeing that someone was feeding it, the Cloud Whale looked away from Han Fei and bit the big squid into its mouth, flying happily to the teleportation island.

Han Fei, on the other hand, stood in midair, stroked his chin, and murmured, "A legend creature, the kind that can't grow up? Interesting."

Han Fei didn't think too much. He turned around and quickly returned to the mansion.

A moment later.

Han Fei pushed the door of the Marshal's Mansion open and shouted in a low voice, "Relay my order, all inspectors, come to discuss matters."

The inspectors on the Scattered Stars Island were at least peak-level law enforcers. When Han Fei got the nine-star token, which was specially given by Xue Shenqi, he was only a peak-level Hidden Fisher.

Generally speaking, below the inspectors were the Adjudicators, brigadier generals, and chiliarchs. They were all law enforcers, and the positions below them would be taken by Hidden Fishers.

After a while, a total of 35 inspectors came to the mansion. Among them, 21 were Explorers.

When Han Fei saw these people for the first time, he was actually a little surprised. He was surprised that there were more than 20 explorers on the Scattered Stars Island, but Xue Shenqi said that there were still some who hadn't taken up posts. So in fact, there were more Explorers than this number.

Han Fei nodded slightly. He had underestimated the Scattered Stars Island before. There were indeed many strong masters here.

However, on second thought, Han Fei realized that there couldn't be more than fifty of them, probably only about thirty. Compared to the Thousand Star City or the Water-Wood World, there were too few of them!

At this moment, Han Fei looked at these people and said, "Everyone, you have been in your position for many years. Marshal Xue trusts you, so do I. Next, I'll discuss with Marshal Xue and the other Venerables how to deal with sea demons. This matter is quite secret. Therefore, for some time to come, unless you encounter something you can't solve... don't disturb me for the time being."

Everyone was stunned and then realized that Han Fei was probably making a big move.

Now there were as many as a dozen Venerables on the Scattered Stars Island! With such a powerful force, even they felt that Han Fei wouldn't be idle.

Sure enough, Han Fei had only been in office for a few days, but he had already taken a move.

Everybody immediately replied, "Yes, Marshal Han ~"

Han Fei nodded and looked at one of them. "Where is Meng Liang from the Trans-Island Inspectors?"

Meng Liang was a little surprised. Why did Han Fei call him?

However, Meng Liang immediately responded, "I'm here. What orders do you have, Marshal Han?"

Han Fei said solemnly, "Although hundreds of thousands of soldiers have returned to their hometown, it's still not enough for them to wake up the people living in dreams in the 36 towns immediately. We Scattered Stars Island should do something too. Arrange for someone or you to go to the mayors of the 36 towns to tell them that you can arrange for the Heavenly Talents in the towns to come to the Scattered Stars Island to observe the battlefield regularly. Your inspection team knows the battlefields on the island best. I'll leave it to you."

Meng Liang asked in surprise, "Why the rush?"

The others were also taken aback. Han Fei's purpose was to alert the 36 towns as soon as possible. However, no matter how they accelerated the process, a person needed time to grow up!

Han Fei said leisurely, "If you don't have a long-term plan, there will be immediate problems. You have to take precautions for everything! This is not a big action. They have to know the stories they heard are not stories but truth."

Meng Liang immediately nodded. "Yes, Marshal Han."

Han Fei nodded slightly and looked at everyone. "Okay, go!"

Chapter 1417: Sneak in for Reconnaissance

The Transverse Mountain.

When Han Fei first came to the Scattered Stars Island, he had been hearing stories about the Transverse Mountain and felt that there must be many secrets hidden in this mountain.

At least, there was a secret that everyone knew: there was a bottomless hole in the Transverse Mountain. As for where that bottomless hole led, no one knew. However, it would produce Spirit Awakening Fluid.

At that time, Han Fei wasn't even qualified to enter it.

Now that he had already become the supreme commander, he naturally had the right to inspect it.

At this moment, Han Fei was standing at the periphery of this bottomless hole that had a radius of more than 200 meters. There were strange rocks everywhere around it.

Looking down, Han Fei found that the cave could limit the perception of the soul. Therefore, he could see things more clearly with eyes than with perception.

Of course, even if it was slightly clearer, this bottomless hole was unfathomable. In Han Fei's eyes, it was just darkness below.

At this moment, not far behind Han Fei, Xue Shenqi's voice sounded, "After many inspections, no one will appear in the underground city if going down from here."

Han Fei couldn't help turning his head. "How did you investigate it?"

Xue Shenqi said, "Threw something down and went to the underground city to search for it, but we didn't find anything. As you know, the underground city is not big, so it doesn't lead to the underground city here."

Han Fei shrugged slightly. The supreme commanders of the past had controlled the Scattered Stars Island for so long, but they hadn't figured out anything yet. How could he have the time to bother with this now?

Immediately, Han Fei changed the topic. "So you think there's something wrong with this bottomless hole? In order to prevent any problems here, you asked all the explorers on the Scattered Stars Island to live on the Transverse Mountain, right?"

Han Fei knew this when he just came back. After all, he was one of the top powerhouses on the Scattered Stars Island. Many years ago, Han Fei was far from the Explorer level, so he didn't know this place.

Han Fei's perception swept across the Transverse Mountain. There were as many as 500 law enforcers and explorers here. Of course, most of them were law enforcers.

Han Fei asked suspiciously, "Is the Transverse Mountain equivalent to a slightly more advanced Emyrean Waterfall?"

Xue Shenqi said indifferently, "You can say that. By staying here, we can collect the Spirit Awakening Fluid that comes from here."

Han Fei saw a small wisp of Spirit Awakening Fluid floating up from the bottomless hole. His eyelids twitched, but he didn't say anything to Xue Shenqi, but said to the old turtle, "Can you feel what's down below?"

The old turtle said, "I'm not omnipotent. My perception can't go down. However, since Spirit Awakening Fluid can be produced indefinitely here every day, it means that there must be some kind of Great Dao rule, the remains of an expert, or some kind of spiritual treasure below... Otherwise, the Spirit Awakening Fluid won't be produced inexplicably."

Han Fei gathered his thoughts and didn't ask further. Instead, he looked at Xue Shenqi and said, "I'm going to the sea. So I may have to trouble Mr. Xue to cover up for me and help me handle the military affairs on the island."

Xue Shenqi had said earlier that although he had temporarily resigned as the supreme commander, he wouldn't let Han Fei mess around. If anything went wrong, he would come forward.

At this time, Xue Shenqi frowned. "Going to sea? Have you figured out the secret of the Empyrean Waterfall?"

Han Fei said, "The Star Turtle said that it would be able to suppress it for three months at most... I haven't figured out what's underneath it yet. However, I can tell you one thing very clearly. That king's corpse can't make a person break through and become a king."

Xue Shenqi's pupils were constricted, and he asked telepathically, "Are you sure?"

Han Fei smiled. "I've set up soundproof barriers around us. Zhang Zhihuo and the others can't hear us."

Xue Shenqi asked again, "Are you sure? This is not a joke. Whether the corpse below is valuable or not... This matter involves a lot of things."

Han Fei nodded. "At least for now, I'm very certain, but will there be any special changes after the corpse appears? I don't know yet."

Xue Shenqi asked, "What's down below?"

Han Fei smiled. "Mr. Xue, why don't you let me keep it a secret for another three months?"

Xue Shenqi looked at Han Fei thoughtfully and didn't ask further. He simply said, "I can help you with your duty, but I need to know what you're going to do."

Han Fei's lips curled. "There's nothing to hide. I'm going to pry into the secrets of the Ten Thousand Demon Valley. This matter is urgent. If it weren't for the corpse under the Empyrean Waterfall, I would have been there."

Xue Shenqi knew Han Fei's trump card, but he still frowned and said, "The current Ten Thousand Demon Valley should also have peak combat power of the Venerable realm. Are you sure you can investigate it?"

Han Fei smiled. "Whether or not I can, at least I can ensure my own safety."

Xue Shenqi wasn't too worried about Han Fei's safety.

In his heart, Han Fei was born with a silver spoon in his mouth. If he had to think of a person like Han Fei, Xue Shenqi could only think of Cao Qiu.

Back then, the two of them got together by a fluke.

However, Cao Qiu was still defeated in the competition for the Sea Quelling Painting. But so what? Cao Qiu was still a Heavenly Talent.

The Cao Family used the power of the Cao Family to pamper him and pave the way for him. There was news that ever since the boy's seal was removed, his strength had risen crazily, and he swept across many Thousand Star Proving Grounds and was invincible among his peers.

Han Fei had more powerful people behind him than Cao Qiu. Although Xue Shenqi didn't know who Han Fei's mother was, Han Guanshu seemed to only have one son, and it could be said that he had given everything to him.

At this moment, with Han Guanshu and Ning Jing, who was a Half-King, how could anyone kill Han Fei? A Half-King was enough to be called the strongest combat power in the entire Thousand Star City. Her strength was definitely on the same level as that old b * stard from Chu Sect.

Xue Shenqi said indifferently, "If it's just an investigation, don't spend too much time. As you know, the Star Turtle can't last long. This war will break out sooner or later."

Han Fei said with a smile, "At least three days and at most ten days. I'll be back within ten days."

...

Everyone thought that Han Fei was still in the mansion, but he was already 100,000 kilometers away now.

Here, Han Fei took out the Venerable Token. After all, it wasn't safe to go alone. He had to have a guard.

The moment he took out the Venerable Token, he saw Jing'er walk out of the void with a swish.

At this moment, Jing'er was holding a skewer of roasted squid in her hand. As she ate, she said, "I can perceive your dark mist body. Even without the Venerable Token, I won't lose you."

Han Fei grinned. "Is it delicious?"

Jing'er nodded quickly. "I have to say that although the overall strength of your Yin-Yang World isn't too strong... you really have a lot of food. In the fair, wow... there are so many delicious foods..."

"Blah, blah, blah ~"

Jing'er simply couldn't stop talking.

Han Fei interrupted her. "Come with me to the sea demons' camp to take a look. If we're lucky, I'll let you experience the smell of a Venerable-level great demon in a few days."

Han Fei didn't ask if Old Han was around. Old Han's whereabouts had always been mysterious!

Since he didn't stay in the Scattered Stars Prison, God knew where he usually stayed. However, since he knew about his return, he should know that he went to sea.

One day passed.

In the waves of the deep sea, a pair of figures stood on the sea.

Han Fei asked, "Jing'er, what's the range of perception for peak-level Venerables and Half Kings?"

At this point, Han Fei was stopped by Jing'er. Han Fei immediately guessed what was going on, so he asked this question.

Jing'er thought that Han Fei's growth was so fast that she couldn't understand it. She also knew that Han Fei was not a king's attendant but a candidate for king or even an heir. Therefore, she didn't keep it a secret.

She said, "For me, when I was in my peak state, my real perception range was actually about 20,000 kilometers. But in addition to perception, there is also a certain premonition, which can also be called intuition. This range may reach 50,000 kilometers... Well, premonition is hard to describe. If someone is particularly hostile to me and has reached the point of obsession, maybe I can detect him more than 50,000 kilometers away. Oh, provided that the person can't be much stronger than me. Otherwise, even within 20,000 kilometers, the other party has a way to avoid my perception."

Han Fei's eyes narrowed slightly. A peak-level Venerable was already at this level? That was 50,000 kilometers! His current perception range was less than 10,000 kilometers.

It was definitely not because his soul was not strong enough, or his talent was not high enough, but because he didn't live as long as them.

As long as he lived long enough, Han Fei felt that it shouldn't take him more than a hundred years to double the strength of his soul.

Han Fei took a deep breath. "What about a Half-King's?"

Ning Jing said, "A Half-King's...? Well, at least 50,000 kilometers. However, a Half-King's perception of certain events may cross space itself. For example, even if something happens 200,000 kilometers away, as long as you want to see it, you can see it. If you plan to go somewhere in advance, although you can't perceive there, you can directly teleport there. Alas... but you must not appear, and the sound can't be too loud.. With your dark mist body, even a Half-King won't easily detect you without deliberately searching. Who would search for a pure darkness in the darkness for no reason?"

Chapter 1418: Ten Thousand Demon Valley Today

Han Fei was quite familiar with the Ten Thousand Demon Valley.

In order to rob the Ten Thousand Demon Valley, he had specially memorized the topography of the entire Ten Thousand Demon Valley. However, Han Fei had never been to the Blood Demon Valley. The main reason was that he had been determined to break into the inner part of the Ten Thousand Demon Valley, so he didn't have a chance to go to the Blood Demon Valley.

This time, Han Fei was here specifically for reconnaissance.

Something must have changed in the Ten Thousand Demon Valley and the Blood Demon Valley today. For example, during the battle in the Sea of Pearls, the Blood Valley Five Restrictions appeared. Was it really a trump card hidden by Blue Feather?

Although Blue Feather said that, it might not be true.

To the humans, of course Blue Feather would say that this was his trump card. He certainly couldn't say that those were goons sent to me by the Sea Demon Royal City.

Because of the Blood Valley Five Restrictions, Han Fei's first goal was the Blood Sea Valley. He had to ascertain the basic combat power of sea monsters first!

When he was less than 50,000 kilometers away from the Blood Sea Valley, Han Fei said to the old turtle, "Old Yuan, I know that your perception ability is definitely stronger than mine. You just don't reveal it. My soul power is not enough, and my perception can't hide from a real expert... Therefore, it depends on you to investigate the enemy."

The old turtle was lost for words. "So, you had already planned to use me when you were on the Scattered Stars Island?"

Han Fei smiled and said, "Old Yuan, we are already so familiar with each other. You should know me! Only if I am strong, I am invincible, and I become a king, can we live longer. Besides, in the future, I may have a chance to find your sealed body. Think about it, an emperor's body. Are you willing to give it up?"

The old turtle cursed, "Of course I don't want to give it up. But why are you so nice?"

Han Fei sneered. "If I become a king, how much do you think I'll be afraid of emperors? To be honest with you, I still have a lot of things to do in the future... Becoming a king is just my first step."

The old turtle sneered. "Keep bragging! Become a king first."

While they mocked each other, they reached a tacit understanding.

Jing'er naturally didn't follow him, because she was afraid that the other party had a Half-King who would discover her. In that case, it would be even harder for Han Fei to sneak in. After all, if the traces of a Half-King was found, the other party's expert would definitely pay more attention to everything in the nearby sea area. How could Han Fei possibly escape the other party's strong masters' perception scan?

And if Han Fei snuck in alone, once he encountered any danger, he could take out the Venerable Token and position himself. Then Jing'er could come over very quickly.

To be honest, Han Fei was also afraid! If the other party had a Half-King, although he wouldn't worry that Jing'er would be killed here... the other party's strategy and tactics would definitely be adjusted and they would be more careful in provoking a big battle.

At that time, once a battle broke out, it was very likely that a big war would break out, and there might be no three-month preparation period. After all, the sea demons also knew that there was the remains of a king on the Scattered Stars Island. Why did the Half-King come? It was definitely for the remains of a king!

Therefore, on the one hand, the other party would be more cautious and send out stronger forces; on the other hand, they would speed up the strategic and tactical arrangements and invade the Scattered Stars Island in advance!

Therefore, Han Fei didn't let Jing'er follow him all the way.

After that, it took a full five hours before Han Fei walked more than 50,000 kilometers and slowly entered the Blood Sea Valley.

Compared to the splendid Ten Thousand Demon Valley, there were exquisite seaweed decorations and various decorative caves. The Blood Sea Valley was more like a slum. Even with the luminous seaweed decorations, it was mostly in clusters. On the valley cliffs, one hole appeared after another, like a beehive, there was no telling how many people were stuffed inside.

Han Fei swam in the Blood Sea Valley at an extremely slow speed for more than six hours and found many unusual places.

Uh... In fact, Old Yuan discovered these unusual things.

The old turtle had been explaining, "The entire Blood Sea Valley is a large mountain composed of 308 seabed hills. Most places are deep, the cliffs are straight, and there are many deep ravines... The population is quite large. From the Awakening Realm to the Sea Spirit Realm, there are nearly 3 million people..."

Han Fei's eyelids twitched slightly. "Good, very good. The population of Scattered Stars Island is twice as large as theirs."

In fact, Han Fei's face had turned dark, although he was still comforting himself.

Han Fei knew that the sea demons wouldn't come all out in combat. They would drive endless sea creatures to attack the island, which was the most terrifying thing.

Besides, these three million people were just ordinary Inferior Man-Fish and Red Demons. In Han Fei's eyes, those creatures that hadn't evolved completely were nothing to be afraid of. However, it was not a good thing for the million soldiers on the Scattered Stars Island.

In the Yin-Yang World that stretched for eight million kilometers, there must be many Half-Mermaids and even powerful creatures that hadn't transformed yet...

As there was no royal city before in the Yin-Yang World, these powerful creatures were not completely unified. With the appearance of a royal city, many such itinerant cultivators should have been gathered.

Therefore, although Han Fei looked awful, he felt lucky.

Three million people could be resisted! He didn't panic at all. Inferior Man-Fish and Red Demons, in terms of weapons, equipment, and combat skills, were inferior to humans.

Therefore, the human side had no reason to lose.

However, a moment later, the old turtle said, "Three Venerables and 38 Dao Seeking great demons have been found..."

Han Fei immediately asked, "How strong are the Venerables?"

The old turtle said, "Two juniors and one intermediate."

"Phew ~"

Han Fei was relieved. Good, very good! As long as there weren't advanced Venerables, everything would be fine.

As for the 38 great demons in the Dao Seeking realm, although the number startled Han Fei, it also confirmed his guess that the Blood Sea Five Restrictions were fake. These were all powerhouses who suddenly appeared. Just in the Blood Sea Valley, the number of Dao Seeking experts was almost comparable to the number of explorers on the entire Scattered Stars Island.

Fortunately, the big clans and the seven major sects all had explorers coming, which could be considered a part of their combat power.

However, Han Fei was immediately alarmed. This was just the Blood Demon Valley! The Half-Mermaids in the Ten Thousand Demon Valley had always despised the Inferior Man-Fish and the Red Demon. It could even be said that they discriminated against them.

Now, even the overall power of the Blood Sea Valley was so strong. Then what about the Ten Thousand Demon Valley?

Perhaps because there were not many strong masters in the Blood Demon Valley, no one found that a shadow came in and swam around.

Han Fei sneered. "These sea demons are really careless. Although the Ten Thousand Demon Valley and the Blood Sea Valley are only 20,000 kilometers away, if a strong master sneak attacks here, there will definitely be heavy casualties."

The old turtle sneered. "As long as the other party is in the Half-King realm, no... As long as they are at the peak of the Venerable realm, a mere 20,000 kilometers will be crossed in the blink of an eye. Unless your father and Ning Jing attack at the same time and flatten this place with great means, it's impossible for a Half-King to sweep 10,000 kilometers with one blow."

Han Fei said perfunctorily, "I was just saying."

In fact, when the old turtle proposed this proposal, Han Fei had the same idea. Assuming that he had a way to lead the crowd to attack this place, if they could kill the more than three million ordinary sea demons here, it could definitely seriously injure the Ten Thousand Demon Valley.

After all, no matter how powerful the Ten Thousand Demon Valley was now, it was impossible for it to be stronger than the White Shell Royal City. With such a huge number of troops eliminated, if they fought again in the future, they could only count on the people in the Ten Thousand Demon Valley.

The old turtle suddenly said solemnly, "Han Fei, I advise you not to do that. Although you humans and sea demons are enemies, the sea demons are still creatures of the world. You can kill hundreds or thousands of people from time to time, and if you hadn't done it yourself, nothing would have happened. However, do you know how terrifying the Heavenly Blood Tide that will appear when millions of creatures die is?"

Han Fei was stunned. "What do you mean?"

The old turtle asked, "Let me ask you, are sea demons really bad people?"

This question stunned Han Fei.

In terms of race, the sea demons were certainly ferocious. Besides, with the story of the stone monument, the sea demons seemed to have deliberately destroyed the other races.

However, in a real sea demon society, they were actually no different from human society. At most, they had different customs and living conditions...

In terms of ruthlessness... Of course, not all sea demons were ferocious. There were still some sea demons who were upright. Perhaps, they just stood on different sides!

Han Fei looked at the vast sea and said, "In this infinite sea, how is it possible that only three million creatures die every day? You are the Demon Emperor. Why would you care about the life of three million sea monsters?"

The old turtle said, "Of course I don't care. What I care about is that this might become your negative karma. You can launch a sneak attack now and kill these 3 million ordinary sea demons. But if a sea demon powerhouse kills a million human beings because of this matter... Do you think this negative karma has nothing to do with you? Can your Dao heart still be firm and can you still take the Great Dao?"

Han Fei was horrified. According to what the old turtle said, it didn't seem to work. He could kill these sea demons, but if he did it, the consequences... might be unbearable.

Of course, this was also the rule between humans and sea demons. Perhaps one party could take advantage of the occasional loophole to kill some of the other party's heavenly talents. However, blatantly killing millions of weak people from the other party? This had never happened in history.

Han Fei gave up this idea. He could trick his opponents once in a while, but if he suddenly killed three million sea demons for no reason... even if there was no punishment from the heavens, the sea demons would be infuriated. Then, if both parties played dirty, the world would be messed up.

Han Fei said lightly, "Got it! In fact, in the end, it's still because we're not strong enough. If I'm a king and completely destroys the Ten Thousand Demon Valley, leaving no survivors, then who will come to take revenge?"

The old turtle said leisurely, "The premise is that you become a king first."

Han Fei fell silent and swam towards the Ten Thousand Demon Valley.

But Han Fei's goal was not to go straight to the Ten Thousand Demon Valley. From Chixue Huan's memory, Han Fei saw an Abyssal Chasm appear between the Ten Thousand Demon Valley and the Blood Sea Valley, and strong masters walked out of that chasm.

This crack was Han Fei's main reconnaissance target this time.

He didn't dare to speed up. It took him half a day to quietly arrive at the periphery of the Abyssal Chasm.

It was not that Han Fei saw the cracks, but that he found demonic energy turbulence here.

The old turtle said, "There is a crack 2,000 kilometers to your left. There, there is an advanced Venerable and two intermediate Venerables guarding it."

Upon hearing this, Han Fei realized that the sea demons here were much stronger than those in the Blood Sea Valley. Furthermore, this place was closer to the Ten Thousand Demon Valley, and there were three Venerables guarding it.

It could be seen how important this place was to the sea demons.

With Han Fei's current strength, he could kill ordinary junior Venerables. If it came to intermediate Venerables, there was a 90% chance that he wouldn't be able to kill them. After all, there was an insurmountable gap between the Explorer and the Venerable realm. No matter how ordinary a Venerable was, their comprehensive strength wasn't something a Half-Venerable could compare to.

Han Fei also knew that he could kill a junior Venerable because of his golden body. If it weren't for the fact that he had cultivated the Indestructible Golden Body in advance and his strength had improved greatly, it would be extremely difficult for him to kill a junior Venerable.

Han Fei said, "Let's take a look."

Chapter 1419: Not Good! Something Big Has Happened

Undersea cracks were actually a common landform.

Not to mention dozens of kilometers, hundreds of kilometers, some even extended even millions of kilometers. These seabed cracks were various, and there were all kinds of strange creatures living in them.

At this moment, Han Fei was swimming slowly. Under normal circumstances, no one would notice him.

At the very least, it was not easy for even advanced Venerables to detect Han Fei's black mist body. Therefore, Han Fei dared to press deeper.

Finally, after he slowly moved forward, he saw the crack with his own eyes.

When Han Fei saw it with his own eyes, he found that this place was already enveloped by an array. Around the crack, there were tens of thousands of arrays.

On the array, a void crack flashed from time to time, and a large amount of demonic energy and Spirit Awakening Fluid seeped out of those cracks.

Every time these things came out, they would be gathered by an invisible force.

"Hiss ~"

Han Fei suddenly gasped. "Old Yuan, that's Spirit Awakening Fluid, right? Is there a king in this crack?"

The old turtle said indifferently, "It's hard to say. I don't feel the aura of a king. However, even if there is a king, he can't come over. Otherwise, how can there be a place for you humans?"

Han Fei observed here for a whole day. He was willing to wait here because he wanted to see what kind of person could come out of this crack.

Bang!

Just as Han Fei was wondering if he should go to the Ten Thousand Demon Valley to investigate first and then come back to take a look... Suddenly, there was a sound of breaking the seal.

Then, a lobster jumped out of the crack with its claws on the cliff.

However, there was no intact shell on the Lobster Soldier. Clearly, he had been seriously injured from the other side.

The corner of Han Fei's eyes twitched, and he frowned. A great demon at the peak of the Dao Seeking level had come out just like that? It could be seen that even if this crack was not connected to the capital, there must be many strong masters on the other side!

The moment the lobster soldier appeared, he looked around and immediately said respectfully, "Master Yu Chuan, nice to meet you, Venerable Xun, Venerable Chen..."

The advanced Venerable said calmly, "Oh, I was wondering who it was. It turns out that it's you, Qian Yuliu. Why, when can the experts in the city come?"

The lobster soldier, Yu Liuqian, turned into a human form and hurriedly bowed. "Master Yuchuan, the channel is still not stable. Our king is strengthening the seal. Our king said that no one will come over in the next month."

"Oh? Why is that?"

Qian Yuliu said, "Because Master Qingliu wants to come in person."

"Huh?"

The advanced Venerable suddenly rose. "Really? Lord Qingliu is a Half-King. Can he really pass this narrow passage?"

Qian Yuliu said, "My lord, it's exactly because the passage is narrow that our king has asked Master Qingliu to come over. At that time, Master Qingliu wants to use a secret technique to broaden the passage. In this way, more experts in the city can come over."

"Really?"

The three Venerables looked at each other.

At present, the Ten Thousand Demon Valley didn't have a Half-King level powerhouse guarding it, so they couldn't stay calm. Although Blue Feather had said before that for so many years, there had never been a Venerable-level powerhouse on the Scattered Stars Island, they didn't know if the humans' Thousand Star City had a Half-King level powerhouse or not.

Although the people from the Yin-Yang World couldn't become a king, it didn't mean they couldn't become a Half-King. Besides, in the war to sneak attack the Sea of Pearls and the Scattered Stars Island a few days ago, at least one peak-level human Venerable had appeared. Furthermore, the peak-level Venerable from the Ten Thousand Demon Valley had said that there was a mysterious aura descending, which might also be a peak-level Venerable.

Because of this, Venerable Cao Xuan, who was a peak-level Venerable in the Ten Thousand Demon Valley, gave up attacking the island and retreated temporarily.

Anyway, in his opinion, the return of the Royal City was certain. The reason he wanted to take down the Scattered Stars Island was nothing more than to make a name for himself.

However, the sea demons and humans had fought for tens of thousands of years. If they could be taken down easily, they would have done so long ago. Therefore, when Cao Xuan discovered that human beings were not weak, he chose to lay low for a while, accumulate strength, and plot to invade again.

It occurred to Zi Yuchuan that their king perished in the war between the human race and the sea demons, so the sea demons' Royal City had to hide from the Yin-Yang World. After so many years, the new king had already transcended the tribulation, and it was the day the Royal City returned.

The king wouldn't come over for the time being, but if a Half-King came, he would still be invincible in the Yin-Yang World.

Zi Yuchuan shouted, "Okay, I've got it. Yu Xun, take him to the Ten Thousand Demon Valley and report this to Master Cao Xuan."

Among the three Venerables, one of them got up, stretched out his hand, and left with the Lobster Soldier.

Han Fei, who was hiding in the dark, overheard their conversation. They didn't expect that anyone else would come here because there were all arrays next to the crack. Besides, they were speaking in the sea demon language, which human beings couldn't understand at all!

But when Han Fei heard the word "our king", he couldn't have felt worse.

As he expected, it was the Sea Demon Royal City! The Sea Demon Royal City of the Yin-Yang World was about to emerge again.

The old turtle said, "Look, they have a king."

Han Fei said crossly, "I'm not deaf. Even if they have a king, so what? He can't come over. Otherwise, if he comes alone, who in the entire Thousand Star City can be his match?"

Han Fei suddenly looked at the Undersea Chasm. "Old Yuan! Do you think we can blow up this teleportation array?"

The old turtle said leisurely, "Someone from the Sea Demon Royal City can come here, which means that the seal stopping them from coming over has been broken. Or rather, the entrance is already there. How can you blow it up?"

Han Fei said, "I have billions of demonic stones. This is just a channel..."

Then his voice faded away.

This kind of space channel seemed to only be related to the Great Dao of Space. Spiritual Energy Explosion was probably too low-level compared to it.

Han Fei calculated in his heart. The other party didn't send a Half-King over until a month later, which meant that they didn't have any now? In other words, Ning Jing should be the strongest person now!

Han Fei's heart did a flip. Although Queen Life had told Ning Jing not to help him easily, and told him that the path of kings was rarely completed with the help of others...

However, this temptation was very strong!

Holding back his excitement, Han Fei decided to check the Ten Thousand Demon Valley first.

As for whether to ask Ning Jing to take action or not, Ning Jing was 100,000 kilometers away anyway. After he finished reconnaissance, he would have a month to think about it.

...

After another half day, Han Fei finally came to the familiar Ten Thousand Demon Valley.

Although he hadn't stayed long in this place, he had explored it carefully back then.

As he saw, there were 100,000 residents in the core circle. How many people were there in total in the outer abyss? He didn't know.

After all, he didn't have the ability to investigate it back then.

"Huh!"

What surprised Han Fei was that the Sea Demon Colosseum, which was the most popular place for sea demons, was in a sealed state?

Also, for some reason, Han Fei found that the people in the Ten Thousand Demon Valley seemed to be much fewer. Were they all cultivating?

Han Fei didn't stay long. He passed the canyon channel, passed through the huge Half-Mermaid statue, and came to the circular core area.

Back then, Han Fei lived on the outermost layer of this circle, and Yu Ji lived next door. Now when he thought about it, he was a little naive back then, thinking that all the Heavenly Talents lived here...

After all, when he pretended to be Yu Fei, he was only a Hanging Fisher, not even a Hidden Fisher.

At this moment, Han Fei discovered that only the outermost level was occupied by creatures of the Demonization realm. And further in, the Half-Mermaids were getting stronger and stronger.

Passing the circle, above the innermost layer of the circular pillar, Han Fei sensed that there was a hall hidden in the darkness, like the control center of the entire Ten Thousand Demon Valley, suspended in the sky. Demonic energy was steaming there. He didn't know if it was gathering the demonic energy or releasing it.

The old turtle said, "Alright, although ordinary people can't discover your current body, that's only relative. If you happen to be discovered by a peak-level Venerable... even if Jing'er wants to save you, you might not be able to escape."

Han Fei stood still. "What did you feel?"

The old turtle said, "There is indeed a peak-level Venerable here, the one we saw last time in the Sea of Pearls. The Lobster Soldier we saw just now is reporting... Oh, I forgot to tell you that in addition to one peak-level Venerable, there are three advanced Venerables and as many as six intermediate Venerables. This strength is probably much stronger than that of your Scattered Stars Island. Your Scattered Stars Island doesn't have any advanced Venerables at the moment. And here, there are already four."

Han Fei's expression was also ugly. One peak-level Venerable, four advanced Venerables, and six or seven intermediate Venerables?

Han Fei asked, "What about junior ones?"

The old turtle said, "The junior ones don't seem to be here. I haven't seen any."

"Not here?"

Han Fei immediately sensed that something was wrong. There were even mid or high-level Venerables in the Ten Thousand Demon Valley. It was impossible that there weren't any junior Venerables. He had killed two of them! Could it be that the Ten Thousand Demon Valley happened to only have these two?

The old turtle said, "I haven't found any yet. However, there aren't many people in the Ten Thousand Demon Valley. As far as I can tell, there are less than 100,000 people..."

"Impossible."

Han Fei immediately shook his head. It was impossible that the number of people had decreased by at least hundreds of thousand in the past ten years.

Suddenly, Han Fei's face changed drastically. "The junior Venerables are not here, nor are a large number of Half-Mermen. There must be something wrong with them."

Suddenly, Han Fei thought of something and asked, "Old Yuan, what is the strength of the Half-Mermaids in the Ten Thousand Demon Valley?"

The old turtle said, "Well, you might not believe it, but there are probably less than 100,000 people in this place, and half of them are in the Sea Demon Realm."

"Huh?"

Han Fei's face suddenly changed. F*ck, something big must have happened.

It was impossible that the Ten Thousand Demon Valley only had 100,000 sea demons! And among these 100,000 sea demons, there were 50,000 sea demons? That was equivalent to 50,000 Hidden Fishers? This ratio was ridiculous!

Han Fei immediately shouted, "Not good! Old Yuan, something big has happened."

Chapter 1420: Soul Search

At this time, there were only 100,000 people left in the Ten Thousand Demon Valley.

Besides, half of these 100,000 people were sea demons!

Han Fei couldn't have felt worse.

This was definitely impossible in the Ten Thousand Demon Valley in the past. Just think about the White Shell Royal City! F*ck, how many years had the White Bei Royal City been tried before it managed to produce 100,000 Sea Spirits?

Gosh, how many years had it been since he left the Scattered Stars Island? 50,000 sea demon realms had appeared out of nowhere? Did they fall from the sky?

Han Fei thought to himself, The Ten Thousand Demon Valley certainly didn't have the ability to create so many sea demons in the Sea Demon Realm.

Either the Ten Thousand Demon Valley opened a king-level secret realm, which had infinite resources, or these people came from the cracks.

Han Fei panicked. "Old Yuan, where are the 50,000 sea demons?"

The old turtle asked, "What do you want?"

Han Fei said, "Don't worry. I'm not stupid enough to slaughter all the sea demons in the sea demons' camp. I need to catch someone to see where the people of the Ten Thousand Demon Valley are and how they've grown so fast."

In the end, the old turtle pointed in the direction of the cultivation canyon in the Ten Thousand Demon Valley.

Han Fei rushed over without hesitation. He had already passed the 72-floor Soul Realm. The cultivation canyon had no secrets to him.

After only fifteen minutes, Han Fei came to an ordinary demon realm outside the 72-floor Soul Realm. This demon realm was a place to cultivate the soul. Han Fei quietly crept in.

Generally speaking, even if the other party had a king, he wouldn't go to the cultivation secret realm to observe everyone. Han Fei just took a few random steps, and with a thought, the Void Lines caught a Half-Mermaid who was cultivating.

Han Fei's realm and strength were too far above this Half-Merman. Therefore, the moment this Half-Merman was controlled by Han Fei, he couldn't even open his eyes, but he had already lost control of his soul.

Deep in his heart, Han Fei could even feel the horror in his soul.

This time, Han Fei's Soul Searching Technique finally came in handy. Since Han Fei deduced the awesome Soul Searching Technique, he hadn't really searched a soul once.

This time, the Half-Merman was still in a state of cultivation. Han Fei scanned with his soul and felt that part of his consciousness had directly entered the sea demon's consciousness.

Swish swish swish!

Tens of thousands of pictures appeared in Han Fei's perception.

For example, this Half-Merman was named Yu Fa. For example, this Half-Merman was originally a Butterfly Fish. For example, from the moment this Half-Merman successfully evolved and entered the Ten Thousand Demon Valley, he was instilled with the belief that humans should be wiped out.

Han Fei ignored the trivial information.

Soon, Han Fei found a different battlefield in the depths of the Half-Mermaid's consciousness.

On a cultivation night a few years ago, Yu Fa was cultivating in the cultivation canyon as usual. At that time, he was only in the high-level of the Demonization Realm and wasn't very strong.

On that day, with a loud noise, there was a strong earthquake, which woke countless Half-Mermaids up from their cultivation. A terrifying pressure appeared out of nowhere, directly suppressing everyone.

All the Half-Mermen were trembling, fearing that a human powerhouse had sneaked up on them.

But immediately afterwards, a phantom stood proudly in the air.

The man was bathed in brilliance!

Under the holy light, the person said, "Our king has descended. In order to award the Ten Thousand Demon Valley that has been fighting against the human race and suffering heavy casualties, he specially set up a cultivation sage realm, allowing all creatures above the Demonization realm to enter this realm to cultivate."

Blue Feather immediately knelt in front of the holy light. "Thank you for the arrival of my king's divine body. I'll do my best to fight against the human race."

The man continued, "Well! Blue Feather, our king appreciates your contribution to the Sea Clan, so he asked me to inform you that you and the other powerhouses of the Ten Thousand Demon Valley can enter the sage realm to cultivate."

With that, the person waved his hand, and a mountain in the center of the Ten Thousand Demon Valley was shattered. Under the ground veins, a golden light shot to the sky, and a big golden fish rushed out, turning into a human figure in the blink of an eye.

Han Fei read Yu Fu's memories and saw this scene clearly.

As soon as the man appeared, he half knelt on the ground. "Yin Ge thanks the King for breaking the seal..."

In the sky, the voice said indifferently, "Yin Ge, your defeat 1800 years ago almost destroyed the foundation of the Ten Thousand Demon Valley for tens of thousands of years. Now, our king has come to earth. Seeing that you have already become a Venerable and have been guarding the Ten Thousand Demon Valley for more than a thousand years, he allows you to make up for your error. Don't disappoint our king."

The man raised his head and shouted, "I'll do anything for you, my king. If I fail again, I'll kill myself!"

Han Fei was stunned. 1800 years ago, this person almost caused the destruction of the Ten Thousand Demon Valley?

But wasn't it Tang Yan's era 1,800 years ago? A shocking battle indeed broke out, causing the Royal City to disappear...

Not only the sea demons stopped fighting, but the humans also suffered heavy losses.

Even Tang Yan had given up his position as the supreme commander of the Scattered Stars Island to find the Royal City.

...

That day's miraculous scene was roughly like this. Except for the guy wrapped in holy light, it seemed that from the beginning to the end, only one Venerable had jumped out.

In Han Fei's experience, this was undoubtedly an act. Obviously, the person and Blue Feather had agreed in advance.

Of course, Han Fei couldn't directly tell the strength of this person from Yu Fa's memories. However, from this person's words, he could get a few key information:

One was the sage realm. This must be a place with abundant resources that could quickly upgrade the Half-Mermaids.

The other was the new arrival of their king. What did it mean by "new arrival"? Did it mean that... In the past, there was no king in this Royal City? But now there was.

From this information, it could be deduced that this Sea Demon Royal City was not in the Yin-Yang World, nor was it related to the Water-Wood World. There was only one result: the Wall of Death, which was the Turbulent Sea!

This sea demon capital could only be in the Turbulent Sea.

Han Fei continued to search.

After that night, the Ten Thousand Demon Valley was in an uproar. In the following days, the Ten Thousand Demon Valley restricted the sea demons from going out. All exits were blocked. Seven days later, on the Ten Thousand Demon Valley's side, six super Venerables that no one had ever seen suddenly appeared. They carved an extremely huge array together, almost covering the entire sky above the Ten Thousand Demon Valley.

Han Fei could tell from Yu Fa's memory that it was clearly an extremely huge teleportation array, and it was a directional teleportation array. How could Han Fei, a master of arrays, not even recognize a directional teleportation array?

Furthermore, Han Fei even saw some relatively complicated things from this directional teleportation array. For example, this teleportation array was mixed with some Defensive Arrays and Soul Driving Arrays.

However, when Han Fei saw this, he had a bad feeling. The Sea Demon Venerable was not a fool. How could he have created such a huge teleportation array for nothing?

Sure enough, Blue Feather's voice resounded throughout the Ten Thousand Demon Valley. "Attention, everyone, you are all outstanding members of our Ten Thousand Demon Valley. Honor my king's order, and I will tell you shocking news. The Sea Demon Royal City is returning, and our king is returning. Before our king returns, he will bestow an unparalleled sage realm to you. In this realm, there are countless opportunities, and you'll have to reach the sea demon realm to leave the realm. Everyone, prepare to enter the realm..."

When seeing this scene, Han Fei had a question: if they couldn't leave until they reached the Sea Demon Realm, then why were there still 50,000 people in the Ten Thousand Demon Valley who hadn't reached the Sea Demon Realm?

However, on second thought, Han Fei realized that the incompetent Half-Mermaids who were responsible for shopping and refining or served as servants would probably be ordered to stay.

Or rather, some people missed the time.

This was because under normal circumstances, sea demons could leave the Ten Thousand Demon Valley and go out to hunt. Those who hunted outside were definitely not a small number.

Originally, they had gone out to hunt with all their might, but the other people were sitting at home and enjoying the benefits. After they came back, the teleportation array must have been closed. Otherwise, how much of a price would it have to pay to maintain such a large teleportation array? The time it could be opened must have been special.

At that moment, Han Fei saw countless Half-Mermaids rushing towards the array. It was really shocking!

Han Fei was calm. In fact, he had already expected it. He knew what the Ten Thousand Demon Valley was like. How could so many sea demon realms suddenly appear?

To put it bluntly, the path of cultivation was the same as the insect race's soldier explosion. Only with a large population could some extraordinary powerhouses be born.

There were even 50,000 sea demons in the Sea Demon Realm. Then there must be at least 500 sea spirits!

After all, this was equivalent to a welfare secret realm. It was normal for those whose strength had been suppressed to soar after obtaining a great opportunity.

Even if the number of Sea Spirits was less than one percent, there should be one in a thousand or one in ten thousand.

The population of the Ten Thousand Demon Valley was there. It would be strange if a million sea demons couldn't give birth to a hundred sea spirits.

Han Fei followed Yu Fa into the teleportation array and reached an unknown sea area. This place was covered by fog and strong wind... Huh?

Han Fei was shocked. Why was this place so familiar?

"The periphery of the Wall of Death?"

Han Fei had already been sure that this was outside the Wall of Death. In the Water-Wood World, when the three parties gathered at the periphery of the Wall of Death, he saw such a scene the moment the resource competition appeared.

At this place, a Venerable that Han Fei was familiar with appeared. It was the Venerable named Yin Ge, and there seemed to be other Venerables.

Yu Fa and the others were led to a place...

“Hiss ~”

Han Fei gasped hard. A crack?

Yes, in the world outside the Wall of Death, Han Fei saw a huge crack. A million sea demons were lined up and walking towards the crack.

“Son of a b * tch, did they go into the Wall of Death?”
