

GOF 1421

Chapter 1421: Secrets of Speed

Fortunately, he had the Soul Searching Technique, which was so simple, effective, and fast.

When Han Fei continued to search his soul, he soon saw what was like in the so-called sage realm...

It was a boundless undersea jungle of pebbles and stones, a reef area full of sea anemones, a coral bush, an undersea jungle, a desert...

In short, that place was equivalent to a terrain mixed with multiple secret realms. And the so-called cultivation was actually not accurate...

There was a massive amount of conchs there.

Whether it was the coral sea, the undersea jungle, or the land of sand, there were conchs everywhere.

The sea demons could quickly improve their strength and soul by killing the conchs and swallowing a drop of blood produced from the conchs...

In the so-called sage realm, Han Fei saw millions of conchs.

There were more than a hundred kinds of conchs.

Because this place was too big, Han Fei didn't doubt it. This was a world of big conchs, and the number of big conchs was far more than what Yu Fa could see!

"Oh my god, are there conchs everywhere?"

Of course, there was no free lunch in the world. Those who got the real benefits would also encounter risks. After the essence blood of these big conchs was absorbed into the body, it didn't seem to be digested or absorbed immediately.

As a result, some of the Half-Mermaids who were hunting the big conchs began to fight each other.

The total number of those who died in combat or were swallowed by the big conchs was not small at all.

There was definitely a 30% casualty rate at least.

Theoretically speaking, this number was already very high. After all, you said it was a sage realm but people died after entering it? This was not a sage realm but a secret realm of death!

When 1 million people went in and came out, there were only 700,000 people left, and 300,000 had died!

However, the sea demons obviously didn't care about this.

After all, a million Demonization Realm sea demons had become seven hundred thousand ones in the Sea Demon Realm. This was a good deal! Even Han Fei was very envious. If this news was told to the million soldiers on the Scattered Stars Island, they would probably rush to explore this secret realm like crazy.

Of course, this was what he had sensed from Yu Fa's memory. As for the specific situation, he had to see it in person.

In Han Fei's view, although the benefits there were great, that place was too demonic. The ecological environment of a place full of conchs must have something wrong!

Did conchs not eat algae after swallowing spiritual energy? Or had spiritual energy replaced their food? Had most sea creatures forgotten the traditional hunting method?

These people were growing rapidly because they had absorbed the essence blood in the conchs.

But why was that? How could a creature's essence blood work even better than an ultra-quality spiritual fruit? Was there some special power in the essence blood?

Han Fei was speechless. If a drop of essence blood was so useful, it probably contained some power of the Great Dao.

But Han Fei wondered, How could a creature that could be killed by a Half-Merman in the Demonization Realm have the power of the Great Dao?

It seemed that there were some unknown secrets in it.

No matter what, this place could indeed be regarded as a sage realm. This was like a pie falling from the sky. Although the conchs were difficult to kill, the sea demons' cultivation speed was improved a lot!

Immediately, Han Fei gritted his teeth and said, "If such a place can't be used by the human race, I won't allow you sea race to use it!"

Han Fei had already made up his mind to explore the secret realm first. If he found that secret realm, he would take his men to destroy it first. Otherwise, if this went on, wouldn't the Ten Thousand Demon Valley be full of half-mermaids in the sea demon realm?

It could be imagined that if all the Half-Mermaids in the Ten Thousand Demon Valley reached the Sea Demon Realm, what about the Blood Sea Valley? How many Sea Demon Realms and Sea Spirits would be born from the three million ordinary sea demons in the Blood Sea Valley?

"Heh! Fortunately, I'm here. Otherwise, the Scattered Stars Island would be doomed..."

With a thought, Han Fei used the power of his soul to erase a part of Yu Fu's memory.

After a minute.

Yu Fa was woken up from his cultivation. He looked around and was relieved to see that nobody was around.

For some reason, Yu Fu felt that he seemed to be dreaming just now. He dreamed of the scene in the sage realm.

Yu Fa couldn't help shivering slightly. Although the sage realm was a place where he could grow up, it was still a huge abyss that kept swallowing the lives of Half-Mermaids.

There was no free lunch in this world. If you wanted to grow up, you had to pay a price. If you got something, someone would have to give something. Nothing was for free.

Yu Fa swore that he must become strong. Only by becoming strong could he survive in this chaotic world.

While Yu Fa was still silently making his oath, Han Fei had already quietly drifted out of the Ten Thousand Demon Valley. In less than three days, all the three places had been investigated.

At first, Han Fei just wanted to see what the hell the new crack was. However, he didn't expect to discover such a big secret.

Seeing that Han Fei was swimming out, the old turtle said, "Han Fei, you were using the Soul-Attracting Technique just now, weren't you?"

Han Fei said, "Of course. Without the Soul-Attracting Art, how would I know where these people went? Why did they suddenly grow up?"

The old turtle asked, "Have you found it?"

Han Fei said, "Yes, but I need to verify it."

...

Han Fei felt that he had to find a way to let Little Black and Little White continue to grow.

Now, he couldn't really hide from top powerhouses. Even peak Explorers like the Star Turtle could discover him as long as they paid attention.

Indeed, this pure darkness was very suitable for stealth. When Han Fei was 100,000 kilometers away from the Ten Thousand Demon Valley, no one discovered that their base camp had been visited by someone.

Taking out the Venerable Token, Han Fei sat on the sea. After a moment, he saw the void flash, and Jing'er appeared directly beside him, holding a cup of burning fiery liquor.

Han Fei was stunned. "Do you like drinking?"

Jing'er said, "I was bored waiting! So I went to the Scattered Stars Island and got some food and drink."

Han Fei: "..."

Han Fei thought to himself, Half-Kings are really capricious. She traveled five or six hundred thousand kilometers just to get something to eat? Interesting.

Jing'er asked, "How is it going? What did you find in the sea demons' camp?"

Han Fei shook his head. "What's certain is that there are no Half-Kings. There is one peak-level Venerable, but I don't know if there is only one.. By the way, Jing'er, how far is the perception range of your Venerable Token?"

Jing'er was puzzled. "This thing can show me the direction. If the Yin-Yang World is not much larger than the Water-Wood World, then no matter where you are, I can perceive your direction. Of course, the

further you are, the less accurate the perception will be. If you are more than a million kilometers away, I can only sense which region you are... As for where you are exactly, I can clearly sense it only when you're close to me."

Han Fei thought for a moment about the Yin-Yang World sea chart hanging in the Marshal's Mansion.

The sea chart only covered an area of about 3 million kilometers, and the area behind the Ten Thousand Demon Valley was only more than 1 million kilometers.

The map didn't mark places like the 36 towns and the level-three fishery.

However, the Scattered Stars Island and the Ten Thousand Demon Valley were like two armies confronting each other. They were separated by the middle line between the Scattered Stars Island and the Ten Thousand Demon Valley, and both parties occupied half of the sea.

Therefore, Han Fei could estimate that the 36 towns were right behind the Scattered Stars Island. However, this distance should be more than 2 million kilometers, or even more than 3 million kilometers.

It was only because of this that the sea chart in the Marshal's Mansion didn't mark the Thirty-Six Towns and the Thousand Star City. Besides, the Thirty-Six Towns were array islands, so they should also have a corresponding defense.

Similarly, Han Fei could also guess that the so-called sage realm must be behind the Ten Thousand Demon Valley, near the Wall of Death.

Han Fei said, "Jing'er, I'm going to a place that's about 4 million kilometers away. When the time comes, I need you to cross the void and come to me."

Han Fei decided that he'd better not use Jing'er's power if he could.

Jing'er was surprised. "So far away?"

The corner of Han Fei's mouth twitched. "Is this very far away for you?"

Jing'er shrugged. "Yes! It will take at least half an hour even for a Half-King to arrive as quickly as possible. If you want to go there quietly, it will take at least an hour or more, but if you have two hours, you won't be easily discovered."

Han Fei asked in surprise, "Why? Even Half-Kings are afraid of being discovered?"

Jing'er shook her head slightly. "You don't know this. When your speed reaches a certain limit, space will change, and the flow of time will change slightly. When you reach the level of a Half-King, your speed may cause a change in space and time. That's a dangerous domain. Under normal circumstances, only a King realm powerhouse dares to rush like this."

After Jing'er explained, the old turtle also said, "When your speed reaches a certain limit, the way you travel has changed. You're no longer just traveling in reality or the void. You can create your own channel in the void. Half-Kings haven't reached this level yet, so Jing'er didn't lie to you."

"Hiss!"

Han Fei couldn't help taking a breath, wondering if the speed that Jing'er and the old turtle mentioned was close to the speed of light.

Han Fei couldn't help but ask, "Jing'er, can your current speed catch up with the speed of light?"

When Jing'er heard that, she was stunned for a moment and then chuckled. "How is it possible? That's a domain that only kings can touch. I'm still far away from it! When I burst out, my peak speed might be one percent of light!"

Han Fei: "..."

Chapter 1422: Sea Demon Sage Realm

Han Fei felt that it was not bad to chit-chat with the old turtle and Jing'er. He didn't know that Jing'er's peak speed had reached 1% of light.

Han Fei really wanted to count with his fingers. He didn't know what to say. Jing'er's speed was five or six thousand kilometers per second! Was she really a human being?

Seeing that Han Fei was stunned, Jing'er couldn't help but say, "Hey, hey, hey! Don't equate the distance in the real world with the distance in the void. You should have experienced it yourself. The distance between reality and the void is completely different. Similarly, when you enter the Venerable realm in the future, or even the Half-King realm, you will understand it."

Han Fei thought to himself, Anyway, I can't understand it now. If my speed is really so fast, can I really travel through time? Maybe I can explain the mystery of the century.

However, Han Fei didn't dwell on it. This world was just so magical. In a sense, he was no longer a human.

Well, it wouldn't be outrageous to call him a god in the eyes of his former self.

He had the Immortal Golden Body, golden blood, and Yin-Yang Divine Eyes. If it weren't for the experience along the way, Han Fei would have thought that he was a legendary figure.

This was because Jing'er had said that if the distance was too far, even if she rushed over at her fastest speed, it would take more than half an hour. The sage realm had a Venerable-level great demon guarding it. If an advanced or peak-level Venerable appeared, no matter how conceited Han Fei was, he would probably be crushed by them.

Han Fei said, "You'd better go from the teleportation array with me!"

Jing'er was puzzled. "What teleportation array?"

Han Fei said, "On this reconnaissance mission, I set up a directional teleportation array, from which we can go to a magical secret realm near the Wall of Death."

Upon hearing this, Jing'er agreed. It was a good opportunity for her to see what the Yin-Yang World was like with Han Fei.

Han Fei extended his hand and pointed, and demonic energy rolled on his body. As a brilliant light bloomed, a hundred-meter-long array appeared in the air.

This array was exactly the same as the huge teleportation array that Han Fei had just seen.

The Venerables of the Ten Thousand Demon Valley couldn't have imagined that their teleportation array had been completely copied.

Looking at the teleportation array, Jing'er couldn't help but say, "It seems to be very far away indeed. This teleportation array consumes a lot of energy."

The Water-Wood World was a place with teleportation arrays everywhere. Jing'er was already used to all kinds of teleportation arrays. However, the teleportation array furthest in the Water-Wood World didn't pass 500,000 kilometers. Even the teleportation arrays passing 100,000 kilometers were pathetically few. This was because the longer the distance, the more spiritual energy this teleportation array needed. Under normal circumstances, it wasn't necessary.

Han Fei and Jing'er entered the teleportation array one after another.

Swish!

The moment Han Fei appeared, he saw heavy mist around him. Having no time to observe, Han Fei stomped and a defensive barrier appeared around him. Then he opened his mouth and activated the Swallowing Technique, immediately swallowing the demonic energy and energy that he had teleported over.

As for some fluctuations in space, Jing'er waved her hand and immediately vanished.

Jing'er said, "The disadvantage of the teleportation array is that there were spatial fluctuations here before we came. Someone has noticed this. Let's leave first."

Jing'er grabbed Han Fei and took a step forward, appearing thousands of kilometers away. Then, the mist covered them, and no one could find them again.

About twenty seconds after Han Fei and Jing'er left, a figure swept out of the void.

"Huh?"

The sea demon Venerable looked around and murmured, "Did I sense it wrong?"

...

Having avoided the sea demon Venerable's pursuit, Han Fei swam away with the black-mist body again, while Jing'er just watched the show and didn't intervene.

He took Jing'er with him just in case. Otherwise, with such a strong master by his side, what was the difference if he didn't use her?

After only half an hour, Han Fei, who was slowly moving on the bottom of the sea, found the huge crack. However, what surprised Han Fei was that the huge crack he found was actually on the seal on the Wall of Death.

“F*ck, is the so-called sage realm really inside the Wall of Death?”

Han Fei frowned slightly. From Yu Fa’s memory, probably because of the limitation of his strength, he couldn’t find the existence of the invisible seal on the Wall of Death.

After all, from the outside, this huge crack looked like a crack from the sky to the ground. As for why there was this crack and what was behind the crack, they might think about it, but they probably wouldn’t get an answer.

At this moment, Han Fei found another Venerable sitting next to the crack. This person had three big spears erected on his back, which looked like three black bones. They should be related to his original body.

The old turtle said, “An advanced Venerable. It seems that you’ve found the right place.”

Han Fei, however, didn’t feel happy because of this. He had found the place, which meant that many sea demons were still in the middle of a trial. It also meant that this place was continuously supplying Sea Demon Realm soldiers to the Ten Thousand Demon Valley.

Buzz!

The crack trembled, and Han Fei saw a Half-Merman walk out. Judging from his strength, he had just entered the Sea Demon Realm. When the Half-Merman saw the Venerable, he immediately said respectfully, “Master Mo.”

“OK! Go a thousand kilometers to the west. Wait there.”

“Yes, my lord.”

The Half-Merman immediately agreed, lowered his head, and went west.

Hearing this, Han Fei quietly tailed them and waited for a moment. Finally, a thousand kilometers away, he found a place blocked by an invisible seal, and the fog and storm couldn’t reach here.

At a glance, there were more than 800 sea demon-realm half-mermen and 16 half-mermen who had just entered the sea spirit realm.

In front of this group of people was a familiar face. Han Fei remembered from Yu Fa’s memory that this was the Yin Ge that had been suppressed under the Ten Thousand Demon Valley for more than 1,800 years.

Looking at it in person, the old turtle said, “He has just become an intermediate Venerable.”

Looking at the more than 800 sea demon-realm half-mermen who were consolidating their strength, Han Fei said coldly, “I want to go in.”

The old turtle couldn’t help but ask, “What can you do in there? Attack hundreds of thousands of them alone?”

Han Fei sneered. “Entering it doesn’t mean I have to kill the enemies. Only by entering it can I know what the secret is, and how the Scattered Stars Island should deal with it.”

Han Fei narrowed his eyes. He was still curious about what the hell those big conchs were. If their essence blood could allow ordinary sea demons to quickly improve their realm, it would be fine, but Blue Feather and other great demons at the Dao Seeking realm could also go in to improve their strength. Blue Feather had even become a Venerable, and Chixue Huan had transcended the tribulation. There must be something behind this.

Ignoring the hundreds of people on the Yin Ge's side, Han Fei returned to the crack again. As the saying went, eliminate the weeds at the root. To become a king didn't mean that he had to solve everything alone. Otherwise, wouldn't he be exhausted to death?

With the help of the night and the fog, Han Fei hid by the crack. If he went in rashly, it would cause a spatial vibration. The Venerable was not an idiot and would definitely find out that something was wrong. According to the number of sea demons, at least a few people would come out of the sage realm every day, right? Otherwise, the Scattered Stars Island wouldn't need to be afraid, and the Ten Thousand Demon Valley wouldn't have owned 50,000 sea demon-realm half-mermen in just a few years.

Sure enough, after Han Fei only stared for about two hours, the dark crack trembled, and three people came out in a row. Han Fei took the opportunity to brush past the three of them, and with his mist body, he slipped into the so-called sage realm.

Perhaps the Sea Demon Venerable was used to seeing people coming out, so he ignored these people and was focused on cultivating, so he didn't notice Han Fei.

Swish ~

The scene in front of him changed, and Han Fei felt more than ten times the gravity. Such a little gravity had almost no effect on him now.

The world in front of him was an undersea reef area. Most of the reefs were covered by algae and sea anemones. Han Fei saw a big green conch chewing on a broadleaf algae dozens of meters long.

However, what made him a little speechless was that this conch actually had three mouths. Han Fei was stunned. He had heard of Nine-Headed Snake, Nine-Tailed Fox, but not Three-Mouthed Conch. This creature really refreshed his worldview.

Han Fei was surprised. "Oh, it's eating! I thought these big conchs also depend on photosynthesis..."

Han Fei certainly wouldn't take a mere conch seriously. He stepped to the conch, and information popped up in his eyes.

Three-Layered Demonic Conch

Green conchs unique to the Conch Sea. It's contaminated with the corrosive blood of king-level creatures, causing its body to mutate and transform into a Demon Conch. This conch has three mouths, which are respectively for soul absorbing, blood sucking, and spirit swallowing. Its defense is extremely strong. Remember to kill it as quickly as possible in combat.

58

Rare

15,924 Points

Eating its corrosive blood is very easy for the body to mutate, causing the bloodline to awaken.

Corrosive Blood

Corrosive Blood can corrode the foundation and spiritual heritage. Don't eat it.

Han Fei's pupils were constricted when he saw the information. Contaminated by the corrosive blood of king-level creatures?

No wonder, no wonder these sea monsters could grow so quickly. It turned out that all of them had taken a King's contaminated blood, which helped them quickly improve their strength.

"Son of a b * tch..."

Han Fei cursed secretly, thinking that the king of the Sea Demon Royal City was really tough. He seemed to be willing to do anything to destroy the human race.

All of a sudden, Han Fei felt that there was a force trying to draw him away. Then he saw that the Three-Layered Demonic Conch with a green shell was sucking at him crazily with its three conch mouths.

Bang!

Han Fei slapped it and smashed it. Absorb my ass! Don't you know what level you are at? How dare you absorb me!

The old turtle couldn't help but ask, "Why are you angry at a conch?"

Han Fei said fiercely, "Because it is no longer a pure conch.."

Chapter 1423: Conch Sea

The big conch was smashed to pieces by Han Fei.

Han Fei reached out and a bubbling blood drop appeared in front of him.

Han Fei frowned. This drop of blood was dark green, very different from ordinary red blood. Not only did it have a sweet aroma, but there was also a pounding sound in the blood drop, like the sound of a heart beating.

When Han Fei picked up the drop of blood, the dark green blood tried to touch Han Fei's skin. However, knowing that it was corrosive blood, Han Fei certainly wouldn't let it.

Han Fei reached out and grabbed a mass of water, wrapping the drop of blood.

Han Fei asked, "Old Yuan, do you know what this is?"

The old turtle was lost for words. "Do you think I'm omnipotent? I'm not a god. This is just a drop of dark green essence blood. In this vast sea, there are at least 80,000 kinds of creatures with this color of blood. How can I guess? Huh? Wait..."

The old turtle had just finished complaining when he suddenly said, "Something is wrong. This drop of blood contains so much blood Qi! Such surging blood Qi is simply a great tonic for those little sea demons in the Demonization Realm. It's no wonder their strength has improved greatly."

Han Fei said leisurely, "So?"

The old turtle thought for a moment and said, "In order to achieve this effect, one has to have the blood of a Half-Venerable demon at least."

Han Fei said leisurely again, "However, the Ten Thousand Demon Valley has already created 50,000 sea demon Half-Mermen. Here, as far as I can perceive, there are more than a thousand Half-Mermen. And this big conch is even more than sea demons."

The old turtle was stunned. After a long time, he said, "Why don't you try hunting another conch?"

Han Fei issued an order in his heart, and a fishing hook appeared in his hand. He threw it casually, and the hook shot through the void like an arrow, instantly catching a big conch ten kilometers away.

Crack ~

The big conch didn't even know what was going on, but it felt that it was grabbed in an instant. Then, there was no 'then'.

The moment the big conch appeared, Han Fei had already smashed it into pieces.

Han Fei didn't know when it started, but when he looked at these creatures, he suddenly felt as if he were looking down at ants. He felt that as long as he issued an order in his heart, they would die.

However, Han Fei didn't take it seriously at all. Both he and the old turtle were attracted by a drop of identical dark green blood.

Seeing the drop of blood, Han Fei said, "It seems that every conch has such a drop of blood."

The old turtle paused and said, "Try catching one more? Catch a conch further away."

Swish! Swish! Swish!

Han Fei cast his hook three thousand kilometers away and caught a Sea Spirit Conch.

In just a moment, six drops of dark green blood essence had appeared in Han Fei's hand. Among them, the blood essence of the Sea Spirit Conch was much more intense than the other drops.

At this moment, the old turtle finally said leisurely, "You seem to be in serious trouble."

Han Fei said indifferently, "Judging from the blood drops, they should all be from the same person. And this sea demon secret realm is enough for hundreds of thousands or even millions of people to hunt and grow. This means that there may be millions of such blood spirits."

The old turtle nodded and said, "It's impossible for anyone below the level of a king to do that, unless it's an evil cultivator who specializes in this. Just like the blood pool you saw last time, and the evil cultivators in the Blood Sea Divine Wood City... These people are actually the same."

Han Fei narrowed his eyes. "Evil cultivators?"

The old turtle said, "I'm almost certain that all the big conchs here are used by a king to absorb power! Although these big conchs are still alive, they can't live long. With or without these sea demons, their lifespan is definitely less than a hundred years..."

Han Fei took a deep breath and said, "What if they're eaten?"

The old turtle chuckled. "This kind of blood is a vitality-snatching tool in the first place. Maybe it can stimulate one's potential and increase one's strength, but this is... at the cost of one's own potential and longevity. This kind of reckless digging and using one's own potential will inevitably lead to a crazy decrease in longevity. The faster one cultivates, the faster he will die."

"Huff!"

Han Fei suddenly said, "The king absorbs these sea demons' power through the conchs, but can he take back all these powers? With millions of sea demons supplying power to him, how can the king digest such a huge power?"

The old turtle said solemnly, "You underestimated kings. Queen Life can give birth to a drop of Life Spring Water in a few years at most. However, a drop of Life Spring Water can even extend the life of a Venerable for decades. If an Explorer takes it, it can at least increase his lifespan by a hundred years. That's the power of a king!"

"Hiss!"

Han Fei took a deep breath. F*ck, this explanation seems interesting. Assuming that this so-called sage realm was developed over many years, then it only took a little time to create such a secret realm for a king.

The old turtle continued, "As for how to take back this power, there are many other ways. For example, the technique that Yu Wendao gave you can ignore the distance of space by offering sacrifices. Also, if this evil technique is the power of the king's Great Dao in the first place... Then, he can easily take back these powers. The so-called seal is generally unable to seal the power of the Great Dao, unless one deliberately seals this power. However, if you can seal one or two, can you seal thousands or tens of thousands?"

The corners of Han Fei's mouth twitched as he said, "According to what you said, isn't this king-level creature a bit too powerful? Are all the kings in the world so strong?"

The old turtle said disdainfully, "What do you think? All those below the king realm are ants. Only after entering the king level can you know what real strength is... At least, in this desolate land, the king level is still extremely powerful."

Hearing the old turtle's words, Han Fei thought to himself, The old turtle seems to look down upon the king realm a little bit. But "all those below the king realm are ants" reminded him of the scene Luo Xiaobai experienced in the Ideal Palace.

Han Fei had already learned from the information that it was the corrosive blood of a king. He chatted with the old turtle because he wanted to figure out the purpose of the king.

At this moment, Han Fei had an idea. The Sea Demon Royal City probably wouldn't come for the time being. If it could, this king wouldn't have exploited his million sea demons!

If he could make it, he would have come early. With this evil cultivation technique, billions of humans would be doomed!

At this moment, all he needed to do was to consume some of his strength to create this sage realm. What was the purpose of him snatching these powers? Han Fei didn't know, but there were several possibilities.

Firstly, he wanted to come over, but he couldn't. Therefore, he needed a medium and needed to sacrifice some sea demons. While sacrificing sea demons, he could still increase his strength and maybe kill humans along the way.

The second was that he was at a critical moment of cultivation and needed strength to make a breakthrough.

Perhaps there was a third, a fourth...

However, no matter how many possibilities there were, Han Fei was only interested in whether he could come over or not. Once this kind of evil king came over, it would be a disaster for the human race!

...

While Han Fei and the old turtle were chatting and thinking, he suddenly discovered that something was wrong. Around him, there were at least seven Sea Demon Realms and two Sea Spirit Realms rushing in his direction.

Han Fei frowned slightly. What was the meaning of this? How could these little shrimps find him? If it wasn't because they found him, then it was because they sensed the corrosive blood.

After all, Han Fei was holding a small blob of corrosive blood in his hand. For these sea demons who were eager to improve their strength, it was definitely a treasure.

However, in Han Fei's perception, there were actually many sea demons around. Many sea demons didn't conceal the traces of fighting because there were too many Three-Layered Demonic Conchs here.

However, only nine sea demons were attracted here. Did the other sea demons not notice him?

Han Fei immediately discovered the problem. These nine sea demons were relatively the strongest group of the sea demons around. They were all sea demons who were about to make a breakthrough but didn't intend to go out of the sage realm.

About half an hour later, three Half-mermen in the junior Sea Demon Realm rushed over.

Han Fei was still in his black mist form and didn't use his real body.

When the three of them came over and saw a mass of blood essence floating in the sea, they were stunned.

Someone was surprised. "Why is there no one here?"

Someone suddenly said warily, "Could it be bait? Since this person can get such a large mass of essence blood, he can't just leave it here."

Hearing that, the three of them immediately became vigilant and even fused with their Companion Spirits.

After confirming that there was no danger here, the three of them came to Han Fei who had been waiting for a long time.

Swish! Swish! Swish!

Han Fei activated the Void Lines, and all three of them were hit. Instantly, all of them became living dead.

Han Fei controlled the souls of the three of them and suddenly felt a power, which attempted to enter his soul along the Void Lines.

Bang! Bang! Bang!

Han Fei frowned and controlled their internal organs to explode.

Recalling the Void Lines, Han Fei grabbed five drops of corrosive blood from the three of them.

"Humph! You want to contaminate me? In your dreams."

There were only two people in the second wave, one of which was a junior Sea Spirit and the other an intermediate Sea Demon.

This time, they didn't even see the few drops of corrosive blood that Han Fei controlled before they were killed on the spot.

Same as last time, the corrosive blood intended to contaminate Han Fei.

However, the result was obvious.

When Han Fei collected another small mass of corrosive blood in his hand, suddenly, he perceived that more than 100 sea demons were rushing towards him at the same time.

Han Fei frowned slightly. Could it be that because he had more corrosive blood in his hand that there were more sea demons sensing him?

Chapter 1424: Ambush

More and more sea demons were attracted by the Corrosive Blood in Han Fei's hand and came over one after another. If Han Fei was slightly weaker, he would have run away.

When these people rushed to where Han Fei was, their eyes were red and demonic energy was surging from their bodies. They were even ready to attack.

However, all they could see was a mass of corrosive blood.

Someone couldn't care less. How many conchs he had to kill to get such a mass of corrosive blood?

Immediately, someone reached for it.

BAM!

Someone had just rushed a hundred meters away from Han Fei and exploded, not even knowing how he died...

And Han Fei was still observing. He wanted to see how attractive the corrosive blood was to these sea demons.

As he expected, almost all the sea demons who came couldn't hold themselves back when they saw the mass of corrosive blood. They were desperately rushing to Han Fei like drug addicts.

Bang! Bang! Bang!

The brilliant fireworks had exploded dozens of times.

Han Fei didn't even move from beginning to end. He only set up a few killing arrays.

In less than half an hour, Han Fei had already killed more than a hundred sea demons.

Most of them were walking right into the trap.

However, there were three half-mermen in the Sea Spirit Realm who were stronger and thus had better self-restraint. Although the corrosive blood was very attractive to them, they still held back, thinking that such a large amount of corrosive blood couldn't have appeared here for no reason.

Of course, they couldn't leave even if they wanted to.

The Void Lines had already controlled them before they left.

In just half an hour, the corrosive blood in Han Fei's hand had increased several times.

What surprised Han Fei was that as more and more corrosive blood gathered, the power it could unleash was greater too! The surging blood stirred the seawater nearby, which was shivering now and then.

"Huh?"

Han Fei was suspicious. "Old Yuan, do you think this blood is intelligent? They are trying to break my seal."

The old turtle said, "I don't know if this blood is intelligent. However, the power of the Great Dao in this blood seems to be gathering. I can't tell if it's one drop or two drops, but once it's large enough, the power of blood Qi it can unleash will be very strong."

Han Fei asked, "What if the power of the Great Dao gathers too much?"

The old turtle pondered for a moment. "Don't worry. The king won't be able to come over. However, it's entirely possible for his projection to descend. This essence blood is only one kind of energy. Without the support of the original body, even if all the blood essence in this secret realm gathers, the king's projection will eventually disappear in battle after it appears."

Han Fei asked, "In other words, the king may arrive through the blood essence? Even if it's a projection, it's still a king's projection..."

"No!"

The old turtle retorted, "You can't say that. A king's projection doesn't necessarily have the strength of a king. Your world probably can't accommodate a king. Even if he can come over, can he leave this secret realm?"

Han Fei grinned. "That makes sense."

The Yin-Yang World was watched by the Heavenly Dao Dharma Eye. Ren Tianfei had warned him with a fish skin map when he was in the level-three fishery.

If a sea demon king could ignore the Heavenly Dao Dharma Eye, the Yin-Yang World would have long been destroyed. Why would he still wait?

"Huh?"

Han Fei's heart did a flip. He felt that in the distance, there was a force attracting him. And the blob of corrosive blood in his hand, like a magnetic iron, could feel the power. It was indeed an attraction power, which could be observed through the blood essence dynamics.

Releasing his perception, Han Fei found that there was nothing unusual eight thousand kilometers away... At most, some scattered half-mermen were hunting and fighting the big conchs.

He had to admit that the power limitation of this so-called Sea Demon Sacred Realm was too low. It wasn't like the kind of dangerous secret realm at all. His perception was completely unrestricted and could directly sweep more than 8,000 kilometers!

Buzz!

Han Fei flew away. These sea demons were too scattered. If he killed them one by one, it would waste his time, which couldn't solve the problem at all.

Even if he had the ability to kill these hundreds of thousands of people who had dispersed, what if the three million ordinary Inferior Man-Fish from the Blood Sea Valley came over? Would he come to kill them again?

Therefore, when the corrosive blood stirred, Han Fei's first thought was to find the source and kill him. A king-level creature was sealed in the Wall of Death. There must be some medium helping him interfere with the internal affairs of the Yin-Yang World, right?

After a while, Han Fei was more than ten thousand kilometers away.

At this moment, he was flying across a sea of sand.

The big conchs here were of different species. The big conchs here were called the Sand Gate Demonic Conchs, and their strength was generally at the peak-level of Sea Demon or even Sea Spirit. Therefore, there were fewer sea demons in this area.

Han Fei casually killed two of them and found that the corrosive blood was the same, except that it had more intense Blood Qi than the previous ones.

After another 6,000 kilometers, Han Fei passed a sea anemone tentacle area, a coral area, and a mud pool...

What was worth mentioning was that the conchs in the mud were called Snake Conchs. There was a big snake in the conch, and its shell was buried in the soil. This place looked like the Ten Thousand Snake Cave and was extremely creepy.

A world full of strange conchs?

Han Fei couldn't help but exclaim, "I didn't know that conchs could look like this!"

As he walked, Han Fei accumulated more and more corrosive blood. He killed one after another. Along the way, he killed as many as 200 strange conchs.

Han Fei felt that the blob of corrosive blood in his hand was already enough to upgrade an Explorer. Of course, that was on the premise that this Explorer dared to eat it.

After a while, Han Fei saw that in the pitch-black sea area, there were some conchs with transparent carapace floating in the water like jellyfish.

Suddenly, Han Fei perceived three figures.

"Huh? Qiannian Ying, Hailv Changfeng, and Hai Xinlan?"

Coincidentally, Han Fei knew all three of them. They were the remaining three of the Eight Wings of Blue Feather.

In the battle at the Sea of Pearls, Han Fei didn't see these people. He thought they had died long ago. Who knew that they would appear here?

At this moment, the three of them were sitting facing each other in a triangle.

In the middle of the three of them, there was a dark green large cocoon, on which Blood Qi were oscillating. The three of them seemed to be holding some sort of ritual.

Han Fei's expression changed slightly. Apart from Qiannian Ying who had long reached the Dao-Seeking realm, both Hailv Changfeng and Hai Xinlan had already broken through to the Dao Seeking realm. At this moment, it seemed that Qiannian Ying had reached the advanced Dao Seeking realm. Hailv Changfeng and Hai Xinlan were in the intermediate Dao Seeking realm.

The three of them had grown so fast! It could be seen that they had benefited a lot from the so-called sage realm.

Han Fei quickly approached.

With his strength, even if he was within a hundred meters of these three people, it was impossible for them to discover him. With this in mind, Han Fei forcibly sealed the aura of the corrosive blood in his hand and really came within a hundred meters of these three people.

Sweeping his perception over, Han Fei found that there seemed to be a figure in the big cocoon.

“Not good! These b * stards definitely aren’t doing something good.”

Han Fei’s first reaction was to kill these people and stop the weird ritual.

However, the old turtle suddenly shouted, “Not good! We’ve been tricked! Retreat!”

Han Fei: “???”

Han Fei was stunned. I’ve been hiding well all the way here. When was I tricked?

Of course, Han Fei chose to retreat without hesitation. Although the old turtle was almost a useless turtle now, its life level was still different.

Buzz—

In all directions, dark green walls rose. Even with Han Fei’s speed, he couldn’t be faster than these walls.

“Star Teleportation!”

The speed of this light array was like the six-gate array of the Hexagon Starfish, extremely fast. However, the Star Teleportation Technique was specifically used to break such an array. Han Fei didn’t panic.

Bang... Boom...

But when Han Fei was about to twist the space, the large mass of corrosive blood in his hand exploded with a bang. The terrifying power directly blew up the distorted space.

Han Fei was blown a thousand meters away and missed the chance to escape.

Buzz!

At that moment, Han Fei felt that ten thousand times the gravity had fallen on him, making his body sink and fall directly to the bottom of the sea.

“Kill!”

Qiannian Ying, Hailv Changfeng, and Hai Xinlan had already attacked.

“Wither ~”

“Sea King’s Soul Breaking Strike.”

“Water Path Twining Technique!”

The attacks of these three people instantly fell on Han Fei.

This shocked Han Fei! By logic, these three people couldn’t even see him, let alone attack him.

However, although it was unexpected, Qiannian Ying’s time law hadn’t reached the level of Great Dao yet, so it couldn’t shake him at all. The power of time was directly sucked up by the Time Ring.

Hailv Changfeng launched a terrifying attack at Han Fei’s soul with his single horn. Even under this 10,000-time gravity, Han Fei still stabbed back with the God Scaring Spike.

Crack!

With a bang, the sound of soul cracking sounded. Under the God Scaring Stab, how could Hailv Changfeng withstand it with the strength of an intermediate Dao Seeker?

Han Fei could easily kill Hailv Changfeng with a single blow now. He must be dreaming to kill Han Fei with a soul attack.

Hailv Changfeng's head exploded in an instant, scaring Qiannian Ying and Hai Xinlan away.

Qiannian Ying shouted, "Not good, this person's strength is beyond our imagination. My time technique is completely ineffective."

While retreating, Hai Xinlan put her hands together.

Han Fei felt that the surrounding seawater turned into seawater spears, darting at him frantically.

Clang, Clang, Clang, Clang...

While the two of them were shocked, Han Fei turned into a humanoid shadow and smiled. "Why? It took you so much effort to tie me up, but this is all you've got?"

Chapter 1425: Black Evil Conch King

Qiannian Ying and Hai Xinlan couldn't see Han Fei at all.

Even if Han Fei had turned into a human form, they could only feel the existence of a person not far away from them through the flow of seawater.

However, no matter how they observed with their naked eyes, they could perceive no one, even if the person was already standing in front of them.

Besides, from the attack just now, the two of them knew that this was not something they could handle at all.

The two of them simply ignored the remains of Hailv Changfeng and began to retreat as fast as they could. Fortunately, there was 10,000 times the gravity here! Otherwise, they wouldn't know how to run.

"Roar!"

Suddenly, there seemed to be a dragon roar.

The terrifying roar was none other than the Hundred Beast Soul Subduing Roar. Under this roar, the two of them were bleeding from their seven orifices. Their heads were dizzy and they fell to the bottom of the sea.

Before they realized what was going on, the Void Lines had already caught them.

The moment Han Fei controlled them, he suddenly felt a strong force trying to catch him through the Void Lines.

"Hmph!"

Han Fei immediately released the Void Lines.

“Ten Thousand Knives in One!”

Han Fei raised his hand, and the Infinity Water ignored gravity and swept past Qiannian Ying and Hai Xinlan in the blink of an eye.

“Pu! Pu! Pu! Pu!”

In the blink of an eye, the two of them were minced and dying. It would only take one breath for Han Fei to mince them.

However, something shocking happened!

After three explosions, Qiannian Ying, Hai Xinlan, and the dead Hailv Changfeng were blown to dust.

This was different from self-detonation!

The self-destruction of an advanced Dao Seeking powerhouse could be described as terrifying. Its power was no weaker than that of his Million Knife Art.

However, these three people were blown to pieces by an external force.

At this moment, in Han Fei’s eyes, the souls and flesh that the three people exploded into were swallowed by the dark green cocoon.

In the sea, a heavy voice suddenly echoed.

“Um! You’re not a sea demon, are you? I... smell human breath.”

“Hiss!”

Han Fei didn’t respond, but Snowmourne appeared in his hand. He struck out with all his strength and slashed at the big cocoon.

In front of the big cocoon, layers of invisible carapace appeared.

Ka ka ka ~

After breaking 32 invisible carapace barriers in a row, Han Fei’s attack was blocked.

“Huh?”

The big cocoon was puzzled and said in surprise, “A Human Venerable? No, you aren’t a Venerable. I will definitely know if a Venerable enters this realm. It seems that you are still an Explorer.”

Han Fei still didn’t respond, but said in his heart, Old Yuan, didn’t you say that the king couldn’t come over? What’s going on here?

The old turtle said leisurely, “Why are you panicking? If it could have come over, it would have done so long ago. What the hell is this thing? You should feel it out first.”

Han Fei finally said, “Oh? So you’re the king of the Sea Demon Royal City?”

The big cocoon was silent for two seconds. "Don't you panic at all? Do you think you can survive under my hands?"

Han Fei grinned. "It's not up to you whether or not I can survive. If your true self is here, I'll admit it. The problem is, is your true self here? Come out of this cocoon if you have the ability!"

It was not the first time Han Fei had faced a king.

When he was with Queen Life, he didn't have any embarrassment or fear. He had even challenged the White Armor Emperor and almost equaled them.

Now, he hadn't even seen this evil king, and the other party only sent three cannon fodder to attack him? They weren't even able to withstand a single slap of his.

The only thing he couldn't see clearly was the big cocoon in front of him!

Han Fei bet that it was at most a projection.

Han Fei was no longer the Hanging Fisher he was when Xia Xiaochan was taken away.

Now, with Han Fei's combat power, he dared to fight even Chun Huangdian's projection, not to mention the projection of this evil king who had been sealed in the Wall of Death for countless years...

The big cocoon began to tremble slightly after hearing Han Fei's words.

Bang! Bang! Bang!

Han Fei subconsciously pinched his fingers and activated the Heavenly Luck Technique.

It seemed that the big cocoon was indeed a threat to him.

In his heart, the old turtle shouted, "Why don't you try breaking this seal? The sea conchs within thousands of kilometers are all breaking. A massive amount of blood essence is gathering."

Unlike Han Fei, this evil king might be able to block Han Fei's perception with the seal set up by Qiannian Ying and the others.

However, he never thought that there would be an ancient turtle in Han Fei's body. Its soul realm was even higher than that of a king.

As soon as the big cocoon took a move, the old turtle had already noticed him.

Han Fei scanned the seal with his perception. If he guessed right, this evil king's technique was a bit similar to Master Hexagon's Six-Gate Array. His speed was extremely fast and his defense was extremely high! Han Fei thought, instead of spending time attacking it, he might as well try to kill this big cocoon!

Buzz!

In the sea, a white mist appeared out of nowhere. It was his white-mist body that Han Fei hid in Forge the Universe.

However, after the white-mist body appeared, Han Fei didn't choose to fuse with it. The white-mist body transformed into a human and waved his hand, and the Embroidery Needle appeared in his hand.

The black-mist body was holding Snowmourne, and the white-mist body was holding the Embroidery Needle. Seeing the two Sea Quelling Bizarre Treasures, the big cocoon trembled even harder.

“Two Sea Quelling Bizarre Treasures? It seems that you have an extraordinary status in the human race! You can unleash the combat power of a Venerable when you’re only an Explorer? If you’re not the current supreme commander of the Scattered Stars Island, then you must be from a top family in the Thousand Star City. People from the Chu Sect won’t come here! Cao Family... Are you from the Cao Family?”

“Guess my ass...”

Han Fei thought to himself, This king knows about the Thousand Star City! It seems that he has interacted with these families before.

In that case, Han Fei had an idea. He activated the absorption technique and swallowed all the surrounding energy.

“Beast King Technique.”

“The Draw.”

“Monkey King’s Three Thousand Sticks!”

“Ten Thousand Knives in One!”

In an instant, Han Fei launched an attack.

Hearing what the old turtle said, Han Fei didn’t believe it. It was just a projection, and it was a large cocoon created by three mere Dao Seekers. How strong could it be?

Han Fei stepped out, and the Law of Gravity descended, directly offsetting seventy to eighty percent of the gravity. The big cocoon was surprised again.

“Um! It’s indeed the Cao Family’s Swallowing Technique, but you actually tried to block my way with the power of law? Boy, are you looking for death?”

Crack... Boom...

Han Fei felt that the Law of Gravity around him was instantly crushed.

Han Fei’s muscles tightened as he activated the Dao Seed. “All laws forbidden in this space.”

Shua!

Han Fei felt that the gravity was instantly gone.

“How is that possible?”

The big cocoon trembled crazily, trying to perform another great technique...

However, Han Fei had already activated the Draw Technique, and the hundred-foot-long saber torrents that looked like tornadoes were also rushing at him frantically.

The invisible barrier rose again, and the shields were broken one after another.

In an instant, more than 50 layers were broken.

Han Fei could feel that the dark green color on the big cocoon was fading and becoming lighter!

Han Fei couldn't help sneering. "I've told you. You want to keep me here? Unless you come in person. Otherwise, who do you think you are?"

Bang! Bang! Bang!

The white-mist body waved his hands and the Monkey King's Three Thousand Sticks fell crazily.

In the hands of the black-mist body, two hammers appeared, and the Hundred War Divine Hammer blasted out.

Knock, knock, knock!

Clang! Clang! Clang!

Without using any techniques, Han Fei only used his physique, which was terrifyingly strong. In terms of strength alone, he could easily tear a junior Venerable apart.

The big cocoon was shattering one layer after another.

After only a few seconds, the invisible shield was broken through a hundred layers, and dozens of cracks appeared on the big cocoon.

The big cocoon stopped speaking. At this moment, corrosive blood was already gathering crazily from all directions.

Clang! Clang! Clang!

After a round of bashing with the Hundred War Divine Hammer, the dark green cocoon was already full of cracks, and its surface was already dim. The Monkey King's Three Thousand Sticks hadn't stopped yet, and Han Fei had hit 500-Layered Waves in the Furious Sea.

Crack!

Suddenly, Han Fei smashed a hole in the big cocoon. Through this hole, Han Fei saw a big black conch.

But this big conch was different from all the sea conches Han Fei had seen.

This big conch had a total of six layers, and on each layer, there were 24 sharp blades that looked like bone spurs, extremely shiny, like newly sharpened blades.

Information popped up in Han Fei's eyes.

Black Evil Conch King (Weak)

An ancient creature that has been sleeping for millions of years, tempered by the heavens and earth. Its defense is astonishing. Its blades can cut the hardest crystals. This conch has no real body and complete information can't be obtained.

Ancient Fierce Beast

???

???

It can significantly increase blood Qi and mutate the body.

None

Han Fei was relieved to see the information. It was indeed a projection. Although it was a projection in the intermediate Venerable realm, it was probably because the ritual hadn't been completed, or the people who held the ritual were too weak.

Anyway, even if this was only a projection, he was very strong. Han Fei felt that he might not be able to beat him.

Buzz!

Han Fei rushed to the edge of the seal and activated the Sacrificing Punch, intending to escape.

The Black Evil Conch King chuckled and said, "Well! You're right. My real body can't come over, but this sage realm was created by me. I can ban all creatures here, including spiritual energy and energy.. How can you escape?"

Chapter 1426: Fight the King

Rumble!

Although Han Fei's Sacrificing Punch, which was launched at such a high speed, failed to break the seal, it did dim it.

The seal was full of cracks.

But even in this state, Han Fei didn't combine his two bodies. After all, once he did it, if both his bodies were killed by the other party, who could he cry to?

Han Fei shouted, "Explode!"

The Infinity Water suddenly exploded.

The terrifying power swept the entire seal. The ground outside the seal was shaking, which stretched for thousands of kilometers, and the seabed had sunken dozens of meters.

Crack!

With a sound like glass shattering, the dark green seal was directly blown through by Han Fei.

"Huh?"

The Black Evil Conch King exclaimed in surprise, as if he didn't expect that his seal would be broken so easily. Although this seal wasn't set by him, it was made with his own power. How could it be broken so easily?

Besides, to the Black Evil Conch King's surprise, Han Fei didn't break his seal with some magical technique, but with pure strength!

What kind of physique could have such terrifying power?

The Black Evil Conch King thought that in terms of pure strength, the person in front of him was at least an advanced Venerable.

This was completely unreasonable!

On the path of cultivation, although there was still a gap in the same realm, how could there be anyone who could cross such a large realm?

The Black Evil Conch King was shocked and roared, "Do you walk the path of becoming a king with physique?"

At this moment, Han Fei had no time to answer the Black Evil Conch King. No matter what, this was a king. Even if it was just a projection, it had the strength of an intermediate Venerable.

Furthermore, this intermediate Venerable was different from other intermediate Venerables. His true body was a king!

This was like Han Fei lowering his realm to the Sea Spirit realm. Although he was in the Sea Spirit realm, he had seen the scenery of the Explorer realm and knew the abilities of the Explorer realm. This kind of knowledge was the biggest chasm between the enemy and him!

Even if Han Fei could try beating him, there was really no need to fight this battle. What was the point of fighting him to the death? He was risking his life, while the other party was using his projection. It wouldn't be worthwhile for him to fight him.

Just now, the Black Evil Conch King had said that this was a secret realm he created. It could be said that the million conches here were all his energy. Everything here could be used by the Black Evil Conch King.

When the old turtle said that the surrounding conchs had died in batches, and when Han Fei saw the blood of corrosion swarming over, he knew that it was all true.

Not only was his enemy strong, but he also had inexhaustible energy and demonic Qi.

If it were someone else, even if that person was an advanced Venerable, who was stronger than the projection of the Black Evil Conch King, it was impossible for him to escape from this world.

"Huff!"

Han Fei ran and tried to absorb the energy around him with the Swallowing Technique.

However, he certainly couldn't absorb it!

The projection of the Black Evil Conch King descended, and Han Fei's perception range dropped from 8,000 kilometers to a range that could only be controlled by vision.

Fortunately, Han Fei still knew where he came from and where he should run.

However, at this moment, the speed of the Black Evil Conch King was not slow at all. He was an intermediate Venerable, a king's projection. It would be outrageous if he was slower than him.

Of course, as he chased Han Fei, the Black Evil Conch King was dumbfounded himself. What the hell is this? Is the speed of a peak-level Explorer so fast? This person is so fast that he has entered the realm of real and fake. This is a speed domain that only a king can grasp. How did this mere Explorer do it?

The Black Evil Conch King said, "In my world, your Cao Family's absorbing technique is useless. Everything here was created by me. Offer your body to me, and I can spare your life."

Swish ~

The twin bodies immediately split up and fled in two directions.

The white-mist body cursed, "Who do you think you are? You're just a king who can't come out. How can you subdue me with a projection?"

In an instant, the twins had already separated. They ran blindly, not walking towards the exit.

"Avatar?"

The Black Evil Conch King sneered. "Um, so it's just a combat skill. In my sage realm, so what if you have thousands of clones? Do you think I can't use this technique?"

Buzz!

When Han Fei passed by some big conchs, these big conchs inexplicably died. Obviously, he felt that vitality, soul bodies, and corrosive blood, as well as some special power were fusing quickly, and a new Black Evil Conch King was born.

Han Fei bared his teeth. This is too f*cking outrageous! At this speed, wouldn't he be able to have as many clones as he wanted?

The old turtle said, "I think you can fight him. You have a lot of resources. If you fight a war of attrition, the space he created will collapse."

Han Fei still didn't stop. "I know. From the power he showed, I know. But those are all the resources I worked so hard to get. Why should I waste them here?"

What Han Fei really feared was not the strength of the Black Evil Conch King, but the ability of a king. Besides, in his opinion, this battle was not worth it. Therefore, if it was possible, Han Fei was not willing to fight.

But soon after the old turtle proposed, Han Fei saw another two dark green barriers blocking his way.

Not just that, in front of the two barriers, there were also two projections of the Black Evil Conch King.

"F*ck, seriously? Four projections?"

The old turtle explained, "They're not projections. He's extracting the power of those demonic conchs and creating clones with their power and the blood essence he hid in the conchs... Each clone needs a large amount of vitality, energy, demonic energy, and ownerless souls to support. Well, how should I put it? At least, you won't be able to escape for the time being."

Han Fei's face was black. Four Black Evil Conch Kings had appeared. They were determined to kill him!

However, how could Han Fei surrender? He had experienced thousands of hardships but ended up killed by a mere projection? How could he accept it?

"I hate projection. You kings always think that you're high and mighty and treat others like ants. You think a projection can decide the outcome of the battle? Today, I'm going to fight you, the so-called king."

"Roar!"

Han Fei attacked, and the white-mist body suddenly pulled out Snowmourne. For a moment, wherever it passed, it froze.

The white-mist body was extremely cold. With the help of Snowmourne, the ice power went further. As soon as the white-mist body brandished the Snowmourne, dazzling silver light shone.

However, the Black Evil Conch King rammed at Han Fei with its carapace. At the same time, the sword light poured out with 10,000 times the gravity.

Han Fei dove directly into an undersea stone pit.

And the other clone of the Black Evil Conch King had already arrived. Its six-layered conch shell spun at a high speed with a shadow of a thousand feet long, cutting off the seawater and pouncing at Han Fei.

"All laws forbidden in this space."

After Han Fei activated his Dao Seed, the thousand-meter-long rotating knife shadow of the Black Evil Conch King suddenly became more than 300 feet, shrinking dozens of times.

But even so, the terrifying knife light swept in front of Han Fei.

Han Fei had already thought it through. If he was defeated and his body was shattered, he would turn into mist. Then, his twin bodies would fuse and run away first.

However...

Clang... Crack!

Clank, Clank, Clank...

Two different sounds rang at the same time. On one side, the shell of the Black Evil Conch King that Han Fei hit was cracked by Snowmourne.

Immediately afterward, the power of ice directly froze him into a large ice block.

The King's clone was smashed to the bottom of the sea by Han Fei's sword. With a bang, ripples spread out, and an explosive force swept out for thousands of kilometers.

Within five hundred kilometers, all lives were crushed.

On the other side, Han Fei was cut by the Black Evil Conch King. The six rounds of extremely sharp knife wheels felt like they could cut seawater into pieces, but when they cut Han Fei, they stuck.

It seemed that Han Fei was cut into pieces. His flesh and blood were cut apart, but in the end, his body was not severed.

Bang!

Like a nuclear bomb, Han Fei was sent hundreds of kilometers away, his body tumbling at the bottom of the sea.

Han Fei thought to himself, It's too uncomfortable to roll like this! So, his white-mist body turned into a big rolling white ball and rammed at the frozen clone of the Black Evil Conch King at a terrifying speed.

The Black Evil Conch King was stunned. Even if his Dao had been broken, how could his pure rotation power be blocked by a peak-level Explorer?

The Black Evil Conch King was quite confused. "You've mastered an Indestructible Golden Body?"

Han Fei chuckled. "Well! I almost forgot about that. Fine, since you've found out, come and fight me another three thousand rounds."

Han Fei knocked the frozen Black Evil Conch King away, and the latter rammed at him with the conch shell.

With a bang, both of them were sent flying.

However, when the ice was broken, Han Fei saw that the shell of the Black Conch King was being repaired. In all directions, a large amount of dark green corrosive blood was gathering.

The Black Evil Conch King said in a dull and disdainful voice, "Human, I've never seen anyone as talented as you. But even so, what can you do in my world?"

"Damn you!"

The white-mist body shook, and two more heads grew on Han Fei's neck, followed by four more arms.

Bang! Bang! Bang!

Anyway, his mist body could transform at will. He grew three heads and six arms out, and the Invincible Fist was punched at the two king clones.

Terrifying energy burst out. Countless creatures were killed in the so-called sea demon sage realm in such a battle.

Han Fei shouted, "Come on, I'd like to see how many conchs you are going to sacrifice to maintain the consumption of your four clones!"

Chapter 1427: I Bet Your Bone Is Not Harder than Mine

Han Fei was furious. You won't let me go? Fine, then kill me!

If he guessed right, the law of gravity was the law of the Black Evil Conch King. Therefore, in a few seconds, Han Fei was at a disadvantage.

If it weren't for the fact that his Dao Seed could bewilder and break through this Great Dao, he probably would've been beaten to a pulp by this king...

This time, Han Fei didn't let his twin bodies run in two opposite directions. His black-mist body had been exposed. Faced with a king-level expert, even if the king's strength was weakened, it was impossible for him not to discover it.

In that case, he should be able to fight another battle by fusing the twin bodies!

After fusing them, his strength doubled. In addition to his understanding of spiritual energy disassembling, he could use all the secret techniques. None of the four projections could stop him.

The Black Evil Conch Kingg was speechless.

Was the Yin-Yang World really so powerful now? Were the strong masters of human beings already so strong?

Although the Black Evil Conch King didn't know the Twin God Technique, he knew that it was definitely an ultimate technique. Just from the fact that the two bodies were almost identical and both had the combat power of a Venerable, he knew that the two bodies were both the original body.

Also, the black shadow-body couldn't be seen with the naked eye and could only be detected through perception. If he wasn't careful, he would miss it. He didn't know how Han Fei could have such a strange ability.

Besides, he had just neglected one thing: this person didn't use spiritual energy at all, but demonic energy. The other party didn't only use demonic energy, but his demonic energy was also f*cking endless!

This sage realm was built by him, and this space followed his will. Therefore, the Black Evil Conch King said that it was impossible for Han Fei to escape this world...

Of course, all the big conches here were trained by the Black Evil Conch King. As long as he was willing, Han Fei couldn't absorb any energy or spiritual energy from here.

Once an Explorer or a Venerable lost their source of energy or spiritual energy, once their storage was exhausted, all that was left was physical strength.

Han Fei, on the other hand, was full of spiritual energy as if he had just taken a bomb. He even activated his secret technique and almost killed one of his clones.

Logically speaking, Han Fei couldn't support such violent outbursts at all.

However?

Han Fei's fist shot out like a shadow, the golden light was endless, dazzling, and swept across dozens of kilometers.

Each punch contained more than 2,000 waves of power.

Who the f*ck could resist him? With the Great Dao banned, even if he was a king, he wouldn't be able to defeat Han Fei as an intermediate Venerable!

As for the power of the Great Dao that Han Fei controlled: it was to seal the space?

The Black Evil Conch King didn't suspect much. Needless to say, this Great Dao was very powerful. To be able to grasp the power of this Great Dao at the Explorer level, this was why the Black Conch King had to kill Han Fei.

If Han Fei was allowed to grow, there would be a disaster in the future!

At this moment, the Black Evil Conch King seemed to understand that in the face of a body refiner like Han Fei, he couldn't be killed by sheer numbers!

Han Fei ran and bombarded the enemy with "ultra nuclear bombs" one after another. He didn't care if he could really hurt the Black Evil Conch King! Anyway, this energy needed to be consumed. So, wouldn't it be perfect to kill two birds with one stone by attacking the enemy while destroying the secret realm?

Almost every punch Han Fei made consumed a large amount of energy and corrosive blood of the Black Conch King. The Black Conch King was even weakening, and it was obvious. After all, the supply of corrosive blood wasn't very fast.

But as they bombarded each other, Han Fei's heart suddenly trembled, because he found that the figures of the Black Conch King were overlapping.

"F*ck... Are you finally fusing your projections?"

Han Fei looked solemn. If he guessed right, the two clones had begun to fuse.

Sure enough, after only one second, although the Black Evil Conch King consumed a lot of energy and corrosive blood, the two bodies combined into one.

On the other side, the other projections of Black Evil Conch King did the same.

Han Fei's face turned dark again.

At this time, the old turtle said, "This evil king is crazy. He locked down the area within 5,000 kilometers and detonated all the big conchs and sea demons in this area. In order to kill you, he wants to improve his realm."

"Seriously? I'm just an Explorer. Is it necessary?"

The old turtle said leisurely, "Do you think you're just an ordinary Explorer?"

Han Fei gritted his teeth. "But he doesn't have to consume so much power to hunt me, did he?"

When Han Fei came, he had a general understanding of this so-called sage realm creature.

Five thousand kilometers was a huge area, and there were more than ten thousand conchs and sea demons. However, the Black Evil Conch King had sacrificed them all at once and transformed them into his own power.

The old turtle said, "Now it's all about reserve. You have no choice but to fight. His strength is increasing frantically. I'm afraid he's already at the peak of the intermediate level. If this goes on, he'll break through to the advanced Venerable realm in a moment. Then, you won't be a match for him at all."

Han Fei gritted his teeth. "Old Yuan! Do kings only have so many means?"

The old turtle said leisurely, "That's not a lot! With my judgment, this person has probably just become a king not long ago. Anyway, it's definitely not long. His strength is not as strong as any of the three kings on the Water-Wood World's side. The reason why you find it difficult to fight is that this is his territory, a world specially created by him."

After a minute.

The strength of the Black Conch King had clearly increased a lot. Although he hadn't reached the advanced Venerable realm yet, it would be soon.

The Black Evil Conch King sneered. "Human, die!"

"Fuse."

Han Fei was waiting for this moment.

Seeing the magnificent black tide sweeping over, Han Fei thought of something and fused his twin bodies.

They were only ten thousand kilometers away, but in a flash, the two became one, and Han Fei's strength suddenly soared.

The Black Evil Conch King: "..."

The Black Evil Conch King was speechless. F*ck, what kind of divine technique is this? His two bodies fused from thousands of miles away? This person actually revealed his true self?

Han Fei thought to himself, Since I've pretended to be from the Cao Family, I'll just pretend to be Cao Qiu!

In Forge the Universe, Han Fei's two hundred thousand ultra-quality demonic stones that contained billions of points of demonic energy were dissipating.

Shua!

Just one second after Han Fei fused his twin bodies, the Black Evil Conch King chased over again.

The Black Evil Conch King was not in a hurry either. In front of Han Fei, two projections combined again.

This time, even without the old turtle saying anything, Han Fei knew that the Black Conch King could definitely be upgraded to an advanced Venerable.

The Black Evil Conch King: "You've given me a lot of surprises. Let me see how far you can run."

After only a few seconds, Han Fei saw that the road was blocked again. Han Fei stopped running, looked back, and shrugged. "Do you think that you can beat me because you are a king?"

With a swish, the Black Evil Conch King had already chased over and reached out to grab Han Fei. The terrifying power crushed the void wherever it passed.

In Han Fei's eyes, demonic energy surged, and two strange arrays appeared in his eyes.

Han Fei grabbed with his hand, and a ball of demonic energy dozens of times larger than his body appeared out of nowhere.

"Hey! Blow you up!"

Han Fei stepped back a hundred kilometers.

Rumble...

As soon as Han Fei took a step, the violent seawater was squeezed over by a terrifying explosion. Even with such a terrifying explosion, Han Fei only used five billion points of demonic energy, which only consumed ten thousand ultra-quality demonic stones.

The explosion this time was exactly the same as when Han Fei blew up the sea demon trading valley outside the Ice God Strait.

At that time, the power of the explosion directly crushed half of the city. Within a thousand miles, there was no life. Within 3,000 miles, there was nothing but wasteland. The shock wave produced by the explosion spread out for tens of thousands of miles.

The same explosion happened again.

The Black Evil Conch King didn't know what to say. F*ck, how much demonic energy did you detonate? I can tolerate the fact that human beings can use demonic energy, but why the f*ck did you take out billions of demonic energy so easily?!

After all, the Black Evil Conch King was just a projection.

Under such a terrifying explosion, he could protect himself, but he couldn't resist it. If he could, he would be crippled.

But even if he didn't block it, the shocking impact still knocked him hundreds of kilometers away.

Han Fei was stunned by the blast at such a close distance, but the seal behind him had been broken.

"Agility of Wind."

At this moment, Han Fei activated the Agility of Wind with the power of the explosion and accelerated his speed to the extreme, covering thousands of kilometers in the blink of an eye.

In Han Fei's left eye, an array popped up in an instant. The moment this array burst out, another array appeared in Han Fei's left eye.

Behind him, the Black Evil Conch King roared, "Did I let you go?"

However, Han Fei had already entered the teleportation array.

Han Fei had already calculated everything in his heart.

Han Fei could feel that during the teleportation, there was a misty glow. However, this didn't affect his running. After all, he had already grabbed the opportunity to escape.

Shua!

Han Fei suddenly appeared at the entrance of the sea demon sage realm. Ahead, huge cracks were still surfacing in midair.

The old turtle said, "At least, this crack wasn't created by this king. He doesn't have this ability. This must be because the seal on the Wall of Death was damaged and the big conch took advantage of it."

Han Fei charged at the crack.

However...

Shua!

A dark green seal suddenly appeared without any warning.

Buzz!

An array that had been engraved in Han Fei's right eye bloomed. To his surprise, the teleportation array appeared again the moment this seal appeared.

Shua!

As soon as Han Fei entered the teleportation array, the void behind him broke open, and the Black Evil Conch King had already caught up.

"I told you this is my world. How can you escape?"

Han Fei felt that a figure followed him into the array. It seemed that the Black Evil Conch King was right behind him.

Dong!

"Pu! ~"

Han Fei felt that his back was hit by a heavy hammer, and his flesh and blood exploded. In the misty light of the teleportation array, Han Fei grabbed another mass of demonic energy, which was probably billions of points of demonic energy again.

"Are you crazy?"

The Black Evil Conch King was speechless. Does this person want to drag me into the turbulent void with him?

Han Fei grinned. "I bet your bones are not as hard as mine.."

Chapter 1428: Chaotic Sea

Everyone said that his physique was extremely strong, but Han Fei also felt that his physique was extremely strong, so he was very confident in his Indestructible Golden Body. How many times had he suffered to obtain the Indestructible Golden Body? It shouldn't be too much for him to pass through the void turbulence, right?

After the Black Evil Conch King chased him into the teleportation array, Han Fei knew that he couldn't get out this time if he didn't try his best.

When he took out a tremendous amount of demonic energy from the teleportation array, even the old turtle exclaimed, "Han Fei, are you crazy?"

Han Fei shouted, "I can come in, so I can go out too. Conch King, if you can't keep me here this time, let's wait and see. Let's see if you can come out first, or I'll wipe out your Ten Thousand Demon Valley first."

Bang!

The demonic energy exploded, and the entire void was shattered. Han Fei took a step forward and spun in light.

"Pu! Pu! Pu! Pu!"

Chi la!

Clang! Clang! Clang!

Countless space cracks fell on Han Fei's body in an instant. Even though he was wrapped in the invincible golden light, Han Fei's body was cut into pieces in an instant. His body was covered in thousands of wounds.

As for the tearing from the void and the swallowing from the crack, even if Han Fei could only use the 64-Dimensional Fish Dragon Dance and Flash, he couldn't completely block them.

When the turbulent currents were trying to strangle him, Han Fei felt that the Demon Purification Pot hummed in his head and trembled slightly. However, the Demon Purification Pot didn't help him escape the sea of misery. Instead, it extended its small vines and grabbed some strange energy from the misty teleportation channel.

Han Fei had no time to think about what the Demon Purification Pot was doing. Because the teleportation array was messed up, he had to protect himself first.

Han Fei cast the Heaven Enlightenment Divine Technique on himself. He looked back, only to see that most of the shell of the Black Evil Conch King was broken in the middle of the glowing mist.

After all, it wasn't his true body but just a powerful projection. The attacking power of this turbulent space was much stronger than Han Fei's Million Knife Art. It could be said that every void crack could easily kill an Explorer. Han Fei's golden body was instantly covered in wounds, not to mention temporary projections of the Black Evil Conch King.

Without the energy supply, the Black Evil Conch King could only wait to die.

Ka ka ka ~

Bang!

When the Black Evil Conch King completely exploded, Han Fei activated the Star Teleportation Technique and flashed out of the turbulent space.

Originally, Han Fei just wanted to flash into a normal teleportation path. However, this void twisted, and Han Fei happened to enter a space crack that had just been opened.

“F*ck!”

The old turtle was lost for words. “Boy, the void cracks here are so dense. What the hell are you doing?!”

Shua!

Han Fei felt that the surrounding spatial turbulence instantly disappeared without a trace. His heart skipped a beat. He wasn’t afraid of being swept by the void rift. After all, as long as his golden body was still there, he had plenty of ways to recover. Just the spatial turbulence alone couldn’t kill him.

However, Han Fei didn’t expect that he would leave the teleportation channel. God knew where he had been teleported to.

There was nothing around him, which was a bit different from the kind of normal void. Han Fei waved his saber and tried to directly slash open the void. However, this slash didn’t cut open the passage. In this dark place, Han Fei felt a little dizzy. Where the hell am I?

In his dizziness, Han Fei seemed to see a weird chain appearing in the distant darkness.

The old turtle roared, “Bastard, take out your Venerable Token now!”

Han Fei felt that his head was swelling. Hearing what the old turtle said, he immediately took out the Venerable Token.

One second, two seconds, three seconds...

Han Fei felt that the world was spinning, and as it spun, he seemed to see a small silver ball of light flying past.

Almost subconsciously, Han Fei reached out and grabbed the small ball of light, only to find that it was a Semi-Divine harpoon.

Shua!

All of a sudden, space was torn apart, and a huge hand extended from the void.

Buzz!

Han Fei saw a flash in front of his eyes, and then he saw the puzzled face of Jing’er.

She asked in surprise, “Why did you go to the Chaotic Sea?”

“Ah! Where?”

Han Fei quickly came back to his senses and looked at Jing'er in confusion. "The Chaotic Sea?"

The old turtle once told him about the Chaotic Sea, saying that everyone actually had a sea. After they died, everyone would return to the Chaotic Sea.

For example, the Divine Weapons and treasures they refined wouldn't fall out of their bodies after they died, but would stay in places like the Chaotic Sea forever.

The old turtle roared, "Boy, don't mess around before you grasp the space Dao. Fortunately, you got lost halfway through the teleportation and were very close to Jing'er. Otherwise, Jing'er wouldn't have been able to find you."

Jing'er asked solemnly, "Han Fei, what happened to you inside? Why did you enter the Chaotic Sea? That's the king's domain. No one dares enter it before becoming a king. Even I dare not enter the Chaotic Sea completely. How did you enter it?"

Han Fei shrugged. "Well, I accidentally got sucked into the turbulent space."

Then, Han Fei raised his hand and looked at the Semi-Divine harpoon in his hand. He had only picked up this ragged harpoon after a trip to the Chaotic Sea?

Before Han Fei asked, the old turtle had said, "If you're close to someone in the real world, so are you in the Chaotic Sea. So, picking up someone's things just means that someone happened to die at this moment. His soul returned to the chaos, and the things inside were scattered, which you accidentally picked up."

Han Fei's heart did a flip. This was the same logic as the Soul Sea. If two people were close, their spiritual beasts were close in the soul sea too.

Unfortunately, Han Fei had no chance to enter the Soul Sea now. He had only seen spiritual beasts, but never a Companion Spirit. The only explanation was that the Companion Spirit might live in another mysterious sea.

"Huff!"

Han Fei took a long breath of relief. He was too careless this time. If it weren't for Jing'er, he might have entered a wrong void.

However, he was saved in the end. Han Fei was thinking, should this be counted as one of Jing'er's three help opportunities.

Without thinking further, Han Fei's face changed. "By the way, Jing'er, did anything unusual happen when I came out?"

Jing'er hurriedly said, "Of course there is. If it weren't for this commotion, I wouldn't have discovered that you actually ran into the Chaotic Sea."

"Huh?"

Han Fei asked in surprise, "What's that?"

Jing'er explained, "There was a terrifying explosion in the crack channel. The explosion caused a lot of cracks in space within a thousand kilometers. Two Venerables made a move at the same time to stabilize the space, but half of the Half-Mermen in the Sea Demon Realm were killed."

Han Fei raised his eyebrows. "Oh?"

Jing'er looked at Han Fei. "Was it you again?"

Han Fei said indifferently, "What do you mean by it was me again? The sea demon king and I fought for three thousand rounds in the secret realm. If there was no sound at all, how could it be?"

Jing'er: "..."

Jing'er was speechless.

The old turtle was even more disgusted. Fight a king for three thousand rounds? If you hadn't run fast enough, you would have been killed.

Han Fei said, "Did the Venerables discover us?"

Jing'er said helplessly, "You went to the Origin Sea, so they naturally couldn't find you. If it weren't for the sudden explosion at the entrance, which caused void cracks all over the sky, if you hadn't taken out my Venerable Token, and if I hadn't happened to be here, you would have probably lost yourself in the Origin Sea."

Han Fei was stunned for a long time. "Are the consequences of being lost in the Origin Sea serious?"

Jing'er said, "I don't know, but I know it's not easy for you to come out. The queen once said that it's a sea of silence, a place of death, a world after a cultivator dies."

Han Fei asked, "Old Yuan, what do you think?"

The old turtle said lazily, "It's not that exaggerated. The Origin Sea is not a space of death, but it's not a world that anyone can enter easily. In fact, if you're strong enough, you can go there to cultivate. But there must be an entrance and an exit. There is a legend that the Origin Sea contains the secret of longevity. Above the king realm, people often explore it, but few gain anything. At least, I have never seen the so-called longevity."

When Han Fei heard that Jing'er and the old turtle both said that it was a place where only the king realm could know about, he didn't ask too much.

Because he still had something more important to do.

He had to return to the Scattered Stars Island as quickly as possible. Although the Black Evil Conch King wouldn't be able to come anytime soon, other people could! For example, that Lord Qingliu, a Half-King who would come in a month.

Besides, the sage realm was the territory of the Black Evil Conch King. He could easily send a message to the Ten Thousand Demon Valley.

In any case, the king of the other party had already appeared. Even if the sage realm was created to take the lives of billions of sea demons, no one among the sea demons knew! They thought that the sea demon royal city was about to return, and the king was selfless.

At this moment, the millions of sea demons had become the loyal followers of the Black Evil Conch King. It was useless even if he tried to sow discord.

In this case, if the Scattered Stars Island wanted to win, they had to make the move first.

Han Fei narrowed his eyes with a murderous look. "Let's go back to the island.."

Chapter 1429: A Storm Is Coming

When he came, Han Fei used the directional teleportation array. Therefore, when he returned, he couldn't just fly back stupidly. After all, no matter how fast he flew, it couldn't compare to the teleportation array.

He had practiced arrays for many years and had been honing himself in the Age of Doom for many years. Han Fei could be considered a master of arrays. However, before that, he couldn't do this kind of directional teleportation array that spanned millions of kilometers at once. After all, his previous realm was too low.

With Han Fei's original methods, the teleportation distance of the teleportation array could be between 300,000 to 500,000 kilometers at most. This distance was already extremely far. This was the effect of Han Fei's two lives of experience.

Ordinary people, even Venerables, couldn't teleport so far away at once.

In fact, for Venerables who hadn't studied arrays, teleportation arrays were useless. It wouldn't take them long to travel this distance. The resources needed to engrave teleportation arrays were far more than what they needed to fly. However, teleportation arrays were more convenient than running.

While engraving teleportation arrays again and again, Han Fei was gradually growing.

Han Fei discovered that there seemed to be an additional line he wasn't familiar with in any long-distance teleportation array.

These lines were not difficult. However, if you wanted to learn them well, you had to understand their significance.

Han Fei closed his eyes and pondered for a moment. The contents of the Ocean Book and the Spirit Gathering Scripture quickly flashed through his mind.

Soon, Han Fei discovered that there were similar array patterns in the space array in the Spirit Gathering Scripture. And in the Ocean Book, there were even chapters specifically about teleportation arrays. Among them, there was a chapter that talked about the array patterns of complicated spaces.

"Oh! I can have a try."

Teleportation arrays were originally space teleportation arrays. By connecting one place to another, producing a special vibration frequency, they could create a short connection channel.

Making this kind of long-distance teleportation array was actually just looking for the vibration frequency of a place he was familiar with. When Han Fei came, he had left a mark on the spot. He had even left a mark in the Marshal's Mansion.

Han Fei used his finger as a pen and drew more than 50 arrays in a row. Among them, there were 10 Spirit Gathering Arrays to replenish spiritual energy.

But Han Fei found it not enough. He threw out a bunch of ultra-quality demonic stones and then drew a complicated remote teleportation array.

Jing'er said in surprise, "It's different from when we came. Did you create it yourself? Will we be directly teleported to the Origin Sea?"

Han Fei smiled. "Don't worry! I'm quite accomplished in arrays. I just wanted to confirm what I thought, so I created a new array."

Buzz!

When Han Fei and Jing'er walked through the teleportation array, they saw a lot of things. The strong wind had become calm.

Han Fei immediately looked at Jing'er. "Is it the Ten Thousand Demon Valley here?"

Jing'er looked at the void as if she had seen through layers of puzzles. Then, she looked at Han Fei with a weird look. "The deviation may be a bit large. This place is more than 200,000 kilometers away from the Ten Thousand Demon Valley."

Han Fei's face turned black, and he explained, "Sometimes... the deviation is a bit big. This is normal! After all, our teleportation distance is as long as 4 million kilometers."

Jing'er chuckled. "Got it. The arrays in our Water-Wood World were all drawn by Venerable Bat. In terms of arrays, Venerable Bat can be said to be the strongest in Water-Wood World, but the distance he can reach is only more than 2 million kilometers. It seems that you are not bad. However, you array masters are actually not very useful. The queen once said that once you become a king, the distance of a million kilometers can be covered in a flash. In terms of speed, it is much faster than arrays."

Han Fei's lips curled. "That's because... you haven't seen a king-level array master's array at all."

As he talked, Han Fei drew another teleportation array with his finger.

This time, Han Fei was accurately teleported to his mark but was about 230,000 kilometers away from just now, which made Jing'er laugh at him.

Han Fei said with a dark look, "Wait for me for a day."

After that, Han Fei quietly crept into the Ten Thousand Demon Valley again.

The old turtle said in surprise, "The Conch King has already known of your existence. Although you haven't revealed your identity, he's not stupid. You've already scouted the sage realm. I'm afraid he will immediately make preparations..."

Han Fei's eyes flickered. "If he has the ability, he can come over by himself! If he can't come over, then he can only transmit information through the sage realm or that crack. Hey, no matter where he passes the information, the Ten Thousand Demon Valley is now lacking in combat power!"

The old turtle hummed. "Are you stupid? Do you think 50,000 sea demons are too few? You've just asked so many people to return to their hometown, and now all the Hidden Fishers on the Scattered Stars Island can add up to 20,000?"

Han Fei sneered. "No, you can't judge the result of a battle solely by the number of people. Otherwise, what's the difference between you and an idiot?"

...

On the fifth day after Han Fei left the Scattered Stars Island.

Xue Shenqi came to Han Fei every day and stayed for a whole day, doing this every day.

The new and old commanders met every day, which made people wonder if there was something fishy going on. Even the guards of the mansion felt that the two commanders must be plotting something big.

Xue Shenqi was sitting in front of the extremely familiar table as usual, holding a pen and checking the various plans on the island.

At this moment, the information in his hand said that the Thirty-Six Towns were already in a great uproar. A massive number of people who learned the news all wanted to come to the Scattered Stars Island to take a look.

Among them, most of the visitors were teachers and students from the major academies in the 36 towns. Two days ago, it was said that in just one day, more than 500,000 people had applied to come to take a look.

Xue Shenqi scolded Meng Liang hard. 500,000 ordinary people coming to the Scattered Stars Island? Were they out of their minds?

Later, Xue Shenqi allowed a batch of them to come over, and the first batch would be 50,000 people. They would be organized into an independent army called the Backup Army.

Besides, Xue Shenqi also ordered that there were only two types of people who could come to the Scattered Stars Island. The first was teachers, village leaders, presidents of academies, and leaders of major groups.

The other was those who were capable of fighting. Although theoretically, the Backup Army couldn't be assigned to a regular army, these people couldn't be without discipline. Otherwise, if anything happened, they would simply die.

Today was the day when the first batch of Backup Army came to watch.

Xue Shenqi felt that he could take a look.

Hum...

Suddenly, Xue Shenqi's eyes narrowed, and he reached out to grab at the void.

However, at the critical moment, Xue Shenqi stopped because he knew who had come.

When the figure appeared, Xue Shenqi frowned. "Why the rush? Does anything big happen?"

The person who came was naturally Han Fei. Han Fei shouted in a low voice, "Mr. Xue, today, right now, at this moment, let the Star Turtle become a Venerable."

Xue Shenqi paused for a full ten seconds. He just looked at Han Fei quietly. Seeing that Han Fei's eyes were unusually firm, he frowned even harder. "Why?"

Han Fei:

"Blood Demon Valley, 3 million Inferior Man-Fish, three Venerables, with intermediate Venerables as the strongest, 38 Dao seekers, 280 Sea Spirits..."

"Ten Thousand Demon Valley, 100,000 Half-Mermen, six Venerables, one peak-level, two advanced, two intermediate, one junior. 623 Sea Spirits, 50,000 Sea Demon Realms..."

Han Fei added, "In addition, there are also an advanced Venerable and a junior Venerable who may return at any time. There are a total of 11 Venerables."

Xue Shenqi's pupils were suddenly constricted. "100,000 Half-Mermen and 50,000 Sea Demon Realms?"

Xue Shenqi was not stupid. He certainly wouldn't think that Han Fei was joking. He just looked at Han Fei quietly and waited for him to continue.

Han Fei said, "The sea demons have a sage realm that can exchange the sea demons' life and potential for strength growth. Millions of sea demons flock to it. Every day, sea demon realms increase by hundreds."

Xue Shenqi asked, "Are you sure?"

Han Fei said, "The Sea Demon Royal City is trying to return, but they won't be able to return for a while. The other party's king has just entered the Sea Establishment Realm and doesn't have the ability to return yet. However, at most a month from now, the other party will have a half-king descend. Therefore, we don't have three months left."

Xue Shenqi's cold face finally showed surprise. Then, he immediately looked at Han Fei solemnly. "Han Fei, you are now the supreme commander of the Scattered Stars Island. You have to be responsible for what you say. Is this news true?"

Han Fei knew what this meant. It meant that they had to start a war in advance, and there was no time for them to waste.

Han Fei nodded heavily. He had been in office for too short a time and needed Xue Shenqi's support. This time, he would initiate a war.

Xue Shenqi's mind was racing. "There are only 50,000 sea demon realms left in the Ten Thousand Demon Valley? Are they ready for a war?"

Han Fei said, "They're still waiting. I guess they probably won't start a war until the Half-King arrives, or they want to wait for 100,000 sea demon realms to be made. But now, I'm afraid the Ten Thousand Demon Valley is about to take action soon."

Xue Shenqi frowned. "Have you been exposed?"

Han Fei said, "In the sea demon sage realm, the king's projection descended, and the traces of my investigation were exposed. Although I killed him in the end, I'm afraid the news that they were investigated has already been sent back."

Xue Shenqi was shocked to hear the projection of a king. He thought to himself, Does the other party really have a king?

But when he heard that the king's projection had been killed by Han Fei?

Xue Shenqi couldn't have felt more shocked.

Now, he suspected that Han Fei was bragging.

However, he also knew that as the supreme commander of the Scattered Stars Island, Han Fei would not lie.

The king's projection was just a projection. No matter how powerful Han Fei was, it was impossible for him to kill a king. And there had never been a king in the Yin-Yang World. If there really was, the Scattered Stars Island would have long been gone.

As long as the king wasn't dead, Han Fei's traces would be exposed. How could the other party not be prepared?

"Hiss..."

Xue Shenqi couldn't help taking a breath. "How much time did you use to come back?"

"One day."

Xue Shenqi asked, "How are we going to fight?"

Han Fei smiled. "It's time for the Star Turtle to make a breakthrough. He's on our side, isn't he?"

Xue Shenqi nodded.. "He is as long as we can protect him."

Chapter 1430: The Tour Group of the Thirty-Six Towns

Wang Jie, He Mingtang, the old village leader, and Li Gang had the opportunity to come to a place like the Scattered Stars Island because of their relationship with Han Fei.

When they heard that the Scattered Stars Island was actually a battlefield of humans and sea demons, they were really frightened!

The old village leader had long known that the Unknown Place was not a good place to come, and even strong masters might die at any time here. However, he didn't expect that the Unknown Place was a man-eating place, a battlefield of humans and sea demons.

Wang Jie and He Mingtang only knew about the Unknown Place from the old village leader. They never dreamed that they would have a chance to come to the Unknown Place today...

When they arrived here from the teleportation array of the Wind Thunder Town, they gasped because... they saw a super big fish more than 300 meters long flying in the sky.

"Hiss!"

"A ferocious beast."

"Son of a b * tch, what a big fish."

While everybody exclaimed, Wang Jie and He Mingtang supported the old village leader on both sides, their hearts pounding hard.

Gulp!

Wang Jie remarked, "Is this the Unknown Place?"

He Mingtang also sighed. "So, Xiaoyu and the others came to this place?"

The old village leader took a few breaths. "Don't panic, don't panic... Don't look like you haven't seen the world. Remember, the commander is your student. Don't lose face."

Wang Jie said, "Yes, yes! The village leader is right."

The village leader said, "Now that we're here, we have to take a good look at this place and see what it's like. When we go back, we can tell the villagers about this place."

Li Gang was already dumbfounded. "So, Leader has been fighting here all this time?"

The first batch of people who came to visit were all people who had some influence in the 36 towns but weren't very strong.

Han Fei counted on these people to go back to tell people about the Scattered Stars Island. Therefore, there were no special people among them.

A Hidden Fisher spread his wings in the sky, stroked the Cloud Whale, and was about to feed it a big crab. "Xiaoyun, there are a lot of people this time. Be bigger so that you can carry more people."

"Hum..."

The Cloud Whale's body was growing at a visible speed. However, when the Cloud Whale reached 600 meters in length, it stopped growing. Maintaining its size required spiritual energy and energy.

Even so, it still caused cries of shock.

Someone exclaimed, "Whose spiritual beast is this? It's so big. I'm afraid it can swallow countless people in one bite, right?"

Someone scolded him jokingly, "Anyway, you and I are too small to fill its teeth slit."

A Hidden Fisher stood proudly in the air and shouted at the countless people, "Everyone, line up in order and wait for the Cloud Whale to pick you up. In order to avoid congestion, we'll send ten thousand people over at once..."

The village leader and the others were the first batch of people to arrive. At this moment, they were sitting in the front.

The village leader said, "Remember to be careful about what you say when you get there. Don't mention Han Fei's name randomly. He is now the supreme commander. His identity and status are already different."

The old village leader spoke in a low voice, but how could the powerhouses not hear him? At this moment, they looked at each other in bewilderment. This old man, a great fishing master, knew Marshal Han?

Wang Jie was intrigued to see that the old village leader didn't speak telepathically. He nodded quickly. "Yes, of course. I didn't expect that brat to have such great potential. Has he forgotten me?"

Li Gang knew that the village leader said that on purpose.

Everyone said that the Unknown Place was too dangerous, and so many people had come this time. Han Fei couldn't take care of them personally. He might not even know that they had come.

Therefore, the old village leader purposely said that so that those people would pay more attention to them and ensure their safety. Sure enough, as the saying went, old ginger was hotter than new!

Li Gang immediately mimicked him. "Leader, do you think our leader is still our leader now that he has become the supreme commander?"

The village leader tilted his head, frowned, glanced at Li Gang, and shouted in a low voice, "Shut up. I told you not to mention his name. Didn't you hear me?"

Li Gang quickly said, "Yes, yes, the village leader is right."

On the other side, He Mingtang looked solemn. "I wonder... how is Xiaoyu?"

The village leader said, "Don't worry. There is danger, but there must be opportunities too. Xiaoyu's growth experience is extraordinary. Didn't she ask someone to bring you a message a few days ago?"

...

Two hours later, most of the visitors from the 36 towns had arrived.

In the sky, the flying fishing boats were not new. However, many people deliberately walked in the air, attracting their attention.

Someone was stunned. "Why do I feel that... everyone can fly here?"

Someone swallowed. "This is the Unknown Place, the front line battlefield of human beings."

50,000 people was too many, so it was impossible for the Scattered Stars Island to arrange a large number of people to be tour guides for them. Since Meng Liang was assigned the task, he naturally took it over.

The inspection team of the island had sent a hundred elites, which meant that they were all Hidden Fishers, which could not only show the strength of the Unknown Place, but also make it convenient for them to lead the teams.

Swish... Swish... Swish...

A hundred Hidden Fishers spread their wings and rose to the sky. This scene stunned all the tourists.

Wang Jie asked, "Leader, we've never seen so many angels in our life, have we?"

Li Gang was a little excited. Ever since he knew Han Fei's current status, he couldn't sleep. The Black River Chamber of Commerce was wiped out in the first place, and the remaining hundred-odd members of the Fish Dragons were all in high spirits.

After the return of the strong masters from the Unknown Place, countless former members of the Fish Dragons asked to return.

However, Li Gang didn't agree and shouted, "Those who quit will never be allowed to return!"

Later, when a strong master from the Unknown Place asked to join the Fish Dragons, Li Gang was overjoyed. No matter what their purpose was, the Fish Dragons had already reached a higher level. Fortunately, he insisted! Otherwise, he wouldn't have had a chance to regret it.

On this big river, more than 50,000 people were gathered. It was quite a scene. On both sides of the river, many people stopped to watch.

A hundred Hidden Fishers stood in a formation in the sky.

Meng Liang stood at the forefront, his face cold. "A lot of strong masters from the Unknown Place returned a few days ago, which shocked everybody in the 36 towns."

Meng Liang shouted, "Everyone, you are all famous figures from the 36 towns. This is the Unknown Place that has been passed on in your stories. This is the battlefield of human beings and sea demons. Here, people die every day. And they are protecting the billions of human beings in the 36 towns..."

Someone suddenly said, "Senior, what is the Unknown Place like?"

Meng Liang frowned. "I didn't ask you to speak, so shut up. What's the Unknown Place like? I'll arrange for someone to lead you around and explain it to you. Listen more and see more. If you have any questions, ask your guide. You can travel the island for three days. In three days, leave the island."

As an explorer, Meng Liang was as arrogant as he should be. On the Scattered Stars Island and in the army, being nice was not a merit. The person who asked the question just now blushed and didn't dare to speak again.

Swish swish swish!

One Hidden Fisher after another flew close and shouted, "Five hundred people in a team, split up! Hurry up!"

Wang Jie and the others walked together and followed the crowd. Who knew which group they were assigned to? Each of the tour guides was a powerhouse.

However, Meng Liang was still dividing the crowd into teams and arranging guides when suddenly, a huge curtain appeared in the sky.

Han Fei craned his head out. "Attention, attention..."

"It's Leader."

"It's Han Fei."

Li Gang and Wang Jie shouted, only to be stopped by the village leader. "Shut up, he is doing something serious."

Meng Liang glanced at them and immediately looked at the sky again.

Han Fei said solemnly, "Attention, everyone, the Scattered Stars Island will immediately enter the highest state of combat. Everyone, return to your position."

Buzz!

Swish! Swish! Swish!

Swish swish swish!

For a moment, fishing boats filled the sky, and countless people in the city flew in the sky.

Those who were watching the fun immediately disappeared.

Someone flashed his wings and stepped on the void, turning into a stream of light in the sky and disappearing.

In front of the 50,000-strong tourists of the 36 towns, almost in the blink of an eye, people were shuttling in the sky, and no one could be seen at all except for all kinds of flashing lights.

Meng Liang's face changed drastically. F*ck, why did something have to happen at such a critical moment? The Trans-Island Inspectors were busy!

Meng Liang shouted, "Everyone, return to your position. Leave this to me."

Swish! Swish! Swish!

As soon as Meng Liang gave the order, the hundred Hidden Fishers disappeared with swishes, and the remaining fifty thousand people were in a panic.

Meng Liang roared, "Be quiet!"

In the sky, Han Fei said solemnly, "Attention, everyone. I have to tell you one thing today. There is a corpse of a king suppressed on the Scattered Stars Island. Now, the creature who suppresses the seal is about to enter the Venerable realm, and the corpse of the king is about to appear. When the time

comes, sea demons will definitely attack the island. In this battle, you should just guard the shores of the Scattered Stars Island well as usual. The strong masters will be stopped by me and the other Venerables.”

Han Fei continued, “The king’s corpse can produce countless amounts of Spirit Awakening Fluid, so humans have been able to live for thousands of years. This king’s corpse has made great contributions. Once it’s obtained by sea monsters, the consequences will be disastrous. It’s very likely that we humans will be in danger.”

At this moment, except for those who were hurriedly returning to the team, everyone looked up at the sky and listened to what Han Fei said in shock.

Han Fei didn’t dare to slack off and said firmly as before, “To be honest, I don’t want to tell you. However, in a corner that you can’t see, war smoke is rising. Now, I need you to bravely face the enemy together. If we win, we humans will enjoy peace for hundreds of years.. If we lose, we must fight to the last man...”
