

GOF 1591

Chapter 1591: I Want to Become A King, Come My Tribulation!

Han Fei's attitude towards the Immortal City was different from his attitude towards humans.

There might be a big secret behind the undead.

Han Fei felt that neither the Black Blood City nor the Immortal City could pose a threat to human beings. For example, as for the so-called five major professions of human beings, there might be harvesters. Perhaps it was these powerful harvesters who spread the five major professions.

So, did the Immortal City represent the interests of mankind?

Han Fei was not sure!

Therefore, before this battle, Han Fei didn't completely regard the undead as a human.

Han Fei always felt that only the living were human beings. The most important thing in battle was to ensure that the living survived. As for the undead? They were already dead anyway...

However, at this moment, Han Fei saw so many Undead Venerables die fearlessly.

They had no complaints. They were also sacrificing for their companions!

For a moment, Han Fei's mood was indescribable.

Twenty or thirty Undead Venerables had died. Besides, the number was still increasing. The cracks in the sky were completely chaotic, and no one knew how Venerables had died...

These people fought to the death without retreating. It could be said that if they didn't have faith in themselves, they would have long collapsed!

Han Fei stepped into the battlefield again.

No matter how many chances he had to win this battle, more than 30 Venerables had died for his plan. He couldn't let them die in vain!

Han Fei ran straight to a person. At this time, there was only one peak-level sea demon Venerable left. This person was Cao Xuan.

At this moment, Cao Xuan was horrified.

Should he go up alone?

Just now, he didn't go up because he didn't want to face Han Fei. He just wondered why Han Fei dared to participate in this chaotic battle alone.

As he expected!

Han Fei set up a scheme and killed seven peak-level Venerables.

Han Fei knew that this would be a relatively evenly matched battle.

The illusion of mountains and rivers appeared, and Han Fei shouted, "Fight!"

Swish! Swish! Swish!

Four intermediate Venerables and fifteen peak-level junior Venerables rushed out.

When they came out and saw the situation on the field, their hearts sank. 14 vs. 40? Also, the other party clearly had more high-end combat power than them.

Among the 19 of them, the strongest was only an intermediate Venerable. However, the other party had 9 advanced Venerables and so many intermediate Venerables.

The Immortal City only had an advantage in numbers in terms of junior Venerable.

Swish!

Among the nine peak-level Venerables who were fighting the Half-Kings, an injured Venerable stopped Cao Xuan and said to Han Fei, "I'll deal with him. You deal with the advanced Venerables. Otherwise, you won't have enough people!"

In fact, Han Fei had suffered a lot of losses in soldiers in the consecutive battles with the seven peak-level Venerables.

Han Fei felt that if he used all his strength, he could kill an advanced Venerable in ten seconds. However, now he had to face nine advanced Venerables. This was not a joke!

However, Han Fei knew that as long as he could take down these nine people, this battle would basically be over.

However, after the seven peak-level Venerables were killed by Han Fei, how could the Black Evil Conch King let the nine advanced Venerable-level sea demons besiege Han Fei again?

The Black Evil Conch King roared, "Changhai, go kill Han Fei."

As soon as the Black Evil Conch King said so, a sea demon Half-King who was besieged by the eight peak-level Venerables suddenly burst out thirteen green rays of lights and penetrated the three undead peak-level Venerables!

Of course, he just penetrated them but couldn't kill them. He just found a chance to quit the battle.

As soon as the Half-King left, the nine advanced-level sea demon Venerables replaced him and began to fight the peak-level Venerables of the Immortal City.

At this moment, with one less sea demon Half-King, other sea demon Venerables immediately joined the battle. The Immortal City and Black Blood City fell into a stalemate again.

It was said that Han Fei had killed Half-Kings. At this time, everyone placed their hope on Han Fei.

However, those who knew the actual situation knew that it was impossible for Han Fei to kill a Half-King now.

Especially since Han Fei was only in his white-mist body, it wouldn't even be easy for him to kill a peak-level Venerable, let alone a Half-King.

Buzz ~ Buzz ~

At this moment, the Agility of Wind and the Heavenly Void Divine Technique were activated at the same time.

The sea demon Half-King sneered. "How can you be faster than me?"

After all, as a Half-King, he had an advantage in the realm.

The two of them were no more than a hundred kilometers away from each other. They left the battlefield quickly, leaving two streaks in the sky.

In the next moment, in Han Fei's mind, he received a voice transmission from the golden boy. "This person, Jin Changhai is known for being able to control all kinds of metal in the world. Be careful."

As soon as the golden boy reminded him, Han Fei felt that the trace elements in his body seemed to be trying to break out of his flesh and blood.

Buzz!

"All laws forbidden in this space!"

Han Fei quickly shook off the opponent's power, turned around, and attacked, intending to use the same trick again to pull the Half-King into the grassland and let Zhao Xianlong solve him.

However, Jin Changhai didn't fight Han Fei head-on. Since he knew that Han Fei was good at hand-to-hand combat, it was unwise to fight him head-on.

Swish! Swish! Swish!

When Han Fei attacked, thirteen small balls suddenly flashed away.

Han Fei took a look and thought to himself, Not right! This ability to control metals... This is not a technique, but a unique instinct, so it couldn't be forbidden.

Boom Boom Boom ~

Thirteen earthshaking explosions blew up the endless void.

Han Fei was blown thousands of kilometers away like a ball.

When Jin Changhai caught up, he found that Han Fei's pupils had turned black and white.

"Huh?"

Having no choice, Han Fei could only combine the twin bodies and appear in his strongest state. This was the first time Han Fei appeared in this state in recent battles.

Swish! Swish!

Jin Changhai extended his hand and waved, and thirteen green lights returned. In an instant, they turned into thirteen spinning blades.

Han Fei didn't want to be outdone either. The Infinity Water turned into tens of thousands of black-and-white saber beams, which turned into countless small Supreme Yin-Yang Wheels and swept away.

"Supreme Yin-Yang Wheel?"

Seeing this scene, both the golden boy and the Black Evil Conch King confirmed Han Fei's identity.

Although Han Fei had made a vow with his Great Dao, the golden boy didn't completely trust Han Fei. After all, with Han Fei's strength, it was ridiculous for him to claim to be the master of Yin-Yang World.

Originally, the golden boy trusted Han Fei because of the information he got from the jade girl.

However, at this moment, the Supreme Yin-Yang Wheel completely convinced Golden Boy.

As for the Black Evil Conch King, he knew from ancient legends that there was a Yin-Yang Great Dao in the Yin-Yang World. The Supreme Yin-Yang Wheel was a typical attack means of the Yin-Yang Great Dao.

After such a blow, Jin Changhai couldn't do anything to Han Fei because Han Fei didn't use metal at all.

However, Jin Changhai took a deep breath, and his body color changed into shiny black metal.

Clang! Clang! Clang!

Countless Yin-Yang Wheels hit Jin Changhai but couldn't injure him at all.

Jin Changhai roared, and infinite metals were gathering in the vast sea.

In Han Fei's heart, the old turtle roared, "Not good. It's the essence of gold that can even penetrate armor. Even your Indestructible Golden Body might not be able to resist it."

Han Fei said, "Old Yuan, if the Supreme Yin-Yang Wheels have side effects, remember to pull me to the grassland."

The old turtle said, "You're already a Venerable now. You can completely bear the consequences of such an attack. Why don't you try it..."

"Heh ~"

Han Fei didn't dare to be negligent.

While he could still fight, he'd better kill this Half-King or delay him. The longer the battle dragged on, the better.

After all, while the Black Evil Conch King could suppress the Immortal City, it couldn't suppress the Life-and-Death Gorge.

At this moment, such a huge uproar in the Immortal City might have even been noticed by the Forest of Terror. Besides, he had already sent Hua Meng over to inform Old Sheep.

"Supreme Yin-Yang Wheel."

While his strength was still at its peak, Han Fei didn't want to waste any time. Otherwise, if he fought a Half-King for too long, his Great Dao would be shattered.

Then Han Fei would be left with no choice but to run.

Buzz!

The Yin-Yang symbol appeared and rotated in the void.

Sure enough, it was difficult to use this move before, but now Han Fei could completely control his current state.

However, when the Supreme Yin-Yang Wheel appeared, Han Fei discovered that something was wrong. In the entire void, the void cracks ten thousand kilometers away were collapsing, and a tremendous amount of energy was converging on him.

Han Fei was stunned. Was...the Supreme Yin-Yang Wheel so powerful now?

Jin Changhai was stunned.

Although Han Fei's methods were powerful, according to Li Santong, Han Fei's high-intensity combat state couldn't last long.

But now it seemed that Li Santong was f*cking teasing him.

The Yin-Yang symbol was getting bigger and bigger, and the power of the Great Dao on it was soaring!

Many Venerables and even many death auras were absorbed into Han Fei's Yin-Yang symbol.

Even the golden boy was shocked. What was going on?

Jin Changhai's first thought was to withdraw from this battle. Unfortunately, the Yin-Yang symbol ignored space and time and directly covered his head.

Jin Changhai realized that he underestimated Han Fei. At this moment, he felt the crisis of death.

Having no choice, Jin Changhai roared, "I want to become a king... Come my tribulation!"

Chapter 1592: The Legendary King's Tribulation

The king's tribulation was the ceiling for the cultivators in Yin-Yang World and the Water-Wood World, as well as in the cage.

In the entire cage, Han Fei estimated that there was no second king realm powerhouse except Zhao Xianglong, who was already a lunatic and was still sealed.

Therefore, whoever became a king would be the master of this cage.

The Half-Kings could basically trigger the king's tribulation.

However, it could only be triggered! Usually, before their lives were over, they wouldn't rashly transcend the tribulation.

After all, in the history of the cage, no one had ever successfully transcended the king's tribulation.

How many Half-Kings had died under the king's tribulation? It was not like they didn't know. Therefore, unless it was absolutely necessary, no Half-Kings would rashly try to transcend the king's tribulation.

But now, under Han Fei's pressure, Jin Changhai chose to transcend the King's Tribulation.

This was something that even Jin Changhai didn't expect. At this moment, Han Fei's Yin-Yang symbol made him feel an inexplicable and deep fear.

After all, Han Fei had indeed killed the Half-King projections of the Black Evil Conch King. Also, the Yin-Yang symbol was so weird that it spread out for thousands of kilometers.

Jin Changhai didn't think he could dodge it at all.

Therefore, Jin Changhai gritted his teeth and chose to transcend the King's Tribulation. He had no choice! Before, Jin Changhai never expected that he, a dignified Half-King, would die here today.

The Black Evil Conch King seemed to have decided his fate. However, he was unwilling to die. After all, he was a Half-King.

Therefore, he decided to bet.

Because he could control metals, he had to make a bet. He bet that even if he couldn't become a king, he would be able to survive this tribulation and become a fake king.

At that time, he could even compete for the throne with the Black Evil Conch King.

“Hoop ~”

There was no telling if it was because the energy in the cage was rather turbulent in the first place... Therefore, when Jin Changhai chose to transcend the king-level tribulation, Han Fei didn't have the time to run at all before he was enveloped by the clouds of lightning that quickly gathered and returned.

At this moment, the Golden Boy and the Black Evil Conch King shouted almost at the same time, “Everybody, retreat five thousand kilometers.”

In fact, when the surrounding energy gathered around abnormally and the clouds appeared in the sky, everybody tacitly gave up fighting. They should escape first.

As soon as Han Fei's Supreme Yin-Yang Wheel was pressed down, he felt his heart tremble. He seemed to be locked by an inexplicable power.

The old turtle roared, “Come on, Han Fei, can you enter the calabash world? You won't be able to survive the king's tribulation.”

“Damn it.”

Han Fei secretly cursed. He had always thought that the “Impasse” would be because of the Black Evil Conch King.

However, he never expected that the source of his “Impasse” was caused by the tribulation of a Half-King.

However, it was impossible to enter Forge the Universe in battle.

Besides, for some reason, although he was conscious, something was wrong with the Supreme Yin-Yang Wheel itself.

The Yin-Yang Wheel was constantly absorbing the inexplicable power in the void, including the power of the Desolation Gale, the death energy, and the life energy of the perished experts...

In short, today's Supreme Yin-Yang Wheel was beyond his control.

At this moment, Han Fei shouted, "Old Yuan, if I die, take my corpse to the Forbidden Island."

Han Fei was quite horrified.

After saying this to the old turtle, he vomited a mouthful of blood, wrapped it with the Infinity Water, and tried to send it out.

Venerables could regenerate with blood!

However, you had to condense your will into a wisp of flesh or soul in advance, so that you could be reborn from a drop of blood.

Boom! Boom!

The Essence of Gold shot through the Infinity Water.

The two caused a huge explosion, and the furious waves rose to the sky.

From the surface of the sea to the bottom of the sea, a hole thousands of meters deep had been blasted out. One could see the bottom of the sea from the surface through the hole.

Han Fei couldn't have felt worse. After all, the Infinity Water hadn't reached its peak state, which was due to the limit of his own strength. It seemed that he couldn't send his essence blood out.

"Buzz ~"

The sky was buzzing.

The Supreme Yin-Yang Diagram that Han Fei turned into had doubled in size and was still absorbing the strange energy in all directions.

Some of the energy was running into Han Fei's body, but most of it surrounded Han Fei and became part of the power of the Supreme Yin-Yang Diagram.

Han Fei could already see the electric arcs rolling between the clouds like dragons.

Having no choice, Han Fei sighed. "Old Yuan, why don't you tell me about the king's tribulation?"

Boom!

Originally, the king's tribulation wouldn't have fallen so quickly.

However, Han Fei was here.

Therefore, the first bolt of lightning struck down.

An electric arc seemed small but was actually dozens of meters wide. The lightning struck the Supreme Yin-Yang Wheel and blasted Han Fei into the sea.

Han Fei felt that his head was blank, as if an ordinary person had been hit by an Iron-Head Fish. He was so stunned that he didn't even feel the pain.

On the other side, Jin Changhai was no better than Han Fei...

This guy's body turned into shiny black metal.

This was the material for refining ultra-quality Divine weapons, but after being swallowed by Jin Changhai, his body could completely turn into black metal.

However, after the lightning strike, Jin Changhai's body was full of cracks.

"Is this the king's tribulation? I feel fine! I can still hold on."

The Supreme Yin-Yang Wheel shook and broke through the sea, but Han Fei was almost paralyzed.

The old turtle said, "You know nothing... Even if this person's Heavenly Tribulation only has 6 layers, you've only passed the first. There are still 5 more..."

Han Fei: "..."

At that moment, Han Fei felt as if ten thousand Iron-Headed Fish were galloping in his heart. Are you f*cking kidding me?

The first layer had almost killed me. If the sixth layer of the heavenly tribulation came down, wouldn't I be turned into ashes?

Buzz!

Surging energy rolled over quickly, trying to heal Han Fei.

However, Han Fei just wanted to turn into a human.

If he could turn into a human being, he might be able to hold on with his arrays.

However, the Supreme Yin-Yang Wheel didn't give Han Fei any chance to turn into a human.

God knew what was wrong with this technique. It actually took the initiative to absorb the strange power in the void.

After only a moment, Han Fei felt that many strange powers were absorbed into his body.

Crack ~

The sky seemed to be cracking.

The thick pillar of lightning pressed Han Fei back to the seabed, and the surrounding ground sank.

At that moment, the Black Evil Conch King saw that Jin Changhai's body was shattering.

He knew that Jin Changhai couldn't transcend the king's tribulation.

However, the Black Evil Conch King couldn't help but marvel at this guy. He resisted two devastating lightning strikes with his body alone?

Han Fei's state made the Black Conch King very unhappy, because the Supreme Yin-Yang Wheel that Han Fei turned into was still intact.

The Black Evil Conch King roared, "Kill! Don't watch the battle. Kill the enemy for me."

Being pressed to the bottom of the sea again, the power of the Supreme Yin-Yang Wheel seemed not enough to help Han Fei resist the terrifying lightning.

Han Fei was completely numb. He felt that he was spinning like a wheel...

On the other side, Jin Changhai, who had been shattered, was quickly reborn. He quickly took out his eight giant shields, and his body turned into the strange color of purple ore.

Crack ~

In the third lightning bolt, Han Fei saw a ferocious figure in the sky. The person tried to reach out to grab him. Then, Han Fei felt that he was grabbed, and there were continuous swishes.

Han Fei suddenly vomited a mouthful of blood, feeling that his internal organs were damaged and turned into meat paste.

At this moment, Han Fei finally felt something about his body.

However, Han Fei discovered that his flesh and blood were already blurred, and his golden blood couldn't be covered up no matter how hard he tried!

Yes, at this moment...

In the world, Han Fei's blood and flesh became blurry and he turned into a human-shaped pillar of blood. However, Han Fei's blood was not red but golden, a magical blood that was unworldly.

Under the stunned gaze of many Venerables, Han Fei reached out to touch his face, as if to wipe away the blood. However, when he wiped, a piece of flesh fell off, revealing golden bones.

"F*ck! Old Yuan, what's going on?"

The old turtle said, "Your flesh and blood are not as strong as your bones. You should know that. The lightning of the Heavenly Tribulation is tempering your body... As a result, your body was crushed under the pressure. However, don't panic... Although your flesh and blood are collapsing, your body is rapidly strengthening. Treat yourself quickly..."

"Heaven Enlightenment."

Han Fei cast the Heaven Enlightenment Divine Technique on himself.

The shattered flesh and blood around were quickly returning and fusing, forming Han Fei's body again.

However, the old turtle reminded him again, "You don't have the Yin-Yang Wheel now. You have to find a way to defend against the next Heavenly Tribulation."

Han Fei reached out and took out a large pile of fish skins from Forge the Universe. The fish skins scattered like snowflakes, and countless arrays sealed Han Fei one after another.

Long Xi and the other Venerables were shocked as they fought. Han Fei survived the king's tribulation?

Golden Boy's face also changed greatly. No matter how much he believed in Han Fei, could Han Fei resist the king's tribulation?

"Huff!"

Han Fei absorbed energy crazily, and his body was rapidly digesting the power of lightning and transforming his body.

But suddenly, he saw a golden piece of metal slip into his array. That piece of metal quickly regenerated. It was none other than Jin Changhai.

This person was reborn in Han Fei's territory.

Boom!

Unfortunately, in the next moment, the lightning in the sky changed from green to blue and white, and the power was greater than before.

Han Fei picked up the Embroidery Needle and whipped the golden piece of metal into the sky.

"Han Fei! Even if I die, I'll take you with me!"

Bang!

At that moment, Jin Changhai, who was knocked into the lightning, detonated himself. Also, he triggered the detonation of many trace elements in Han Fei's body.

In an instant, Han Fei's flesh and blood disappeared.

After the fourth lightning strike, everyone saw a golden skeleton lying on the bottom of the sea motionlessly.

Chapter 1593: Death in Battle

Boom!

In the sky, under the tribulation clouds, red cracks tore through the sky. The rain of blood continued, but it wasn't too big...

After the death of a Venerable, their essence, energy, and various powers dissipated between earth and sky.

This power turned into a rain of blood that fell without a trace.

Both the Golden Boy and the Black Evil Conch King looked at the sky, only to see a Great Dao crack in the sky. Obviously, the person who died first was Jin Changhai.

He wanted to use Han Fei's territory to be reborn? However, he was beaten out like a ball by Han Fei. However, the tribulation clouds in the sky didn't dissipate.

Crack! Crack!

The golden skeleton moved, and before it got up, a soul sound shook the world.

"Heaven Enlightenment."

Buzz!

A holy pillar of light descended from the sky, enveloping Han Fei. Specks of golden light quickly gathered towards Han Fei, which was Han Fei's flesh and blood.

In addition to the flesh and blood, a large amount of soul seeped into the skull between the eyebrows. Gradually, Han Fei's entire Indestructible Body was covered in a faint blue.

The faint blue seemed to be seeping into Han Fei's golden body ceaselessly.

Even a Half-King couldn't survive his fourth Heavenly Tribulation.

But an intermediate Venerable made it!

At this moment, Han Fei's life potential was rapidly transforming. His flesh and blood turned into a mass, trying to attach to Han Fei like liquid armor.

Everybody felt that their blood was freezing.

What about Han Fei's meridians?

What about his soul power?

He was already a skeleton. How could he still fight?

In fact, Han Fei didn't even know his own situation now. This seemed to be an instinctive reaction of his body.

Just now, Han Fei felt a crisis. Therefore, the power of his soul was frantically pouring into his bones, and the Indestructible Overlord Body was operating crazily.

At that moment, Han Fei realized that he could become a king with his physical body!

Of course, this was just Han Fei's wishful thinking.

After all, the power of the soul was magical.

If he went completely to the extreme, he knew that this path was definitely not right. However, now it seemed that only his golden bones could withstand this king's tribulation but his flesh and blood couldn't.

Therefore, while a lot of souls were absorbed into his bones, Han Fei continued to fuse a lot of souls into his flesh and blood.

All of this was Han Fei's choice in an instant.

The Heaven Enlightenment Divine Technique was still falling, and the soul power was blending into his bones and flesh. The arrays under Han Fei's feet never stopped.

Han Fei's body was shining with golden light, and a golden giant was rising from the ground. The Invincible Will slashed the sky and the scene was magnificent.

Boom!

Another ordinary lightning...

Since Jin Changhai had died, the lightning returned to its original color.

This heavenly tribulation wasn't aimed at Han Fei in the first place, but Jin Changhai dragged Han Fei to destruction...

Therefore, after Jin Changhai died, the power of the Heavenly Tribulation decreased.

However, no matter how the power of this heavenly tribulation decreased, it was still a king's tribulation, and its power still couldn't be underestimated.

In a single blow, the invincible will was shattered by the lightning, and Han Fei's flesh and blood exploded again.

Ka ka ka ~

Han Fei was blasted to the bottom of the sea again.

However, Han Fei heard the sound of bones cracking. It turned out that under the heavenly tribulation, the Indestructible Body wasn't omnipotent.

"Heaven Enlightenment!"

Another holy pillar of light descended, and his flesh and blood returned. Han Fei's soul was still spreading throughout his body. The golden bones that had just cracked were also healing under the power of the Heaven Enlightenment Divine Technique.

In the depths of Han Fei's sea of consciousness, the old turtle took a long breath. "The combination of the Heaven Enlightenment Divine Technique and the Indestructible Body is really perfect. If this were Han Fei's king's tribulation, he would have already transcended his king's tribulation."

When the last lightning struck, apart from the lightning, Han Fei saw a black fog. When the fog appeared, everything around seemed to vanish.

In the black mist, Han Fei saw a blurry figure. However, when he looked at that person, he seemed to be caught in a dark swamp.

It was as if he had been brought into a brand-new world. The world was shattering, mountains were collapsing, and a sea of fire was turning upside down...

When Han Fei came back to himself, he found that he was standing alone in the sky. No creatures could be seen.

At that moment, Han Fei felt that there seemed to be cold liquid flowing down his cheeks.

Han Fei felt ultimate sadness!

He was like the king of a world, but his world had no people.

Ka ka ka ~

Just as Han Fei sank into this ultimate sadness, he suddenly felt that his body was cracking. At some point, he had put on an armor, which was now broken.

The moment the armor shattered, tremendous energy rushed into Han Fei's body.

This was a very familiar power. Han Fei was shocked. "Chaotic Qi?"

The energy shock immediately woke Han Fei up.

The images in front of him dispersed, and an energy storm swept around him.

The old turtle shouted, "Wake up! Don't let the Sky Fiend corrode your mind. Hurry up and use the Heaven Enlightenment Divine Technique."

"Heaven Enlightenment!"

Han Fei felt his vitality slipping away.

When Han Fei came back to himself, he was horrified to find that his Indestructible Gold was full of cracks.

At this moment, the pillar of lightning was still there. Without hesitation, Han Fei let ten wisps of chaotic energy explode in his body.

"Roar!"

"I, Han Fei, am going to be the king someday. You think you can kill me with a regular heavenly tribulation? I'm gonna beat you..."

Boom Boom Boom ~

In an instant, Han Fei punched the sky crazily, and golden fist marks appeared one after another. In the blink of an eye, thousands of fist marks shot into the sky.

Although each fist mark was annihilated after being blasted out for less than a hundred meters, the lightning momentum eventually weakened.

Just when the lightning was about to dissipate, Han Fei laughed. "Son of a b * tch, I was almost killed..."

But suddenly, the old turtle shouted, "Watch out..."

Following the old turtle, Golden Boy shouted, "Watch out!"

However, it was too late.

A big conch suddenly crashed into this heavenly tribulation. Who else could it be but the Black Evil Conch King?

However, this was not the real body of the Black Evil Conch King, but a clone or a projection.

Han Fei knew very well that the Black Evil Conch King dared to come because he was extremely powerful. A random projection of his was a Half-King.

“F*ck...”

Han Fei’s Indestructible Body squatted slightly and punched out with both fists.

But before Han Fei attacked, the projection had cracked.

The void trembled, and a huge millstone descended. “Gravity mill. Han Fei, I’ve paid such a huge price to come here. How can I leave if you’re not dead?”

A huge millstone crushed Han Fei into it.

At that moment, golden light bloomed, and dazzling light radiated for thousands of kilometers.

The projection of the Black Conch King shattered, the millstone disappeared, and Han Fei’s Indestructible Body also disappeared.

As if to confirm Han Fei’s death, in the sky, although the lightning tribulation disappeared, the layers of black clouds became darker and darker, and the thick death energy was absorbed into the sky, forming a huge vortex, which looked like a scene of the doomsday.

“Marshal Han...”

“Han Fei...”

The golden boy was furious and turned into a black dragon.

Roar!

With a dragon roar, the Black Evil Conch King vomited blood.

At this moment, a crack appeared in the sky.

The Black Evil Conch King thought that he had killed Han Fei, so he laughed and shouted, “Everybody from the Black Blood City, retreat...”

“Woo, woo, woo!”

The conch horn was blowing.

The sea demons on the battlefield, including the Venerables and explorers, all stopped fighting.

On the seventh island, Netherworld tore apart the peak-level Venerable sea demons that had been fighting him for a long time. Seeing the sea demons receding like a tide, he called out to Qin Mo, “Let’s go! To the first island...”

Wen Zhu and the other 300,000 soldiers didn’t stop attacking.

Lu Yuntian’s voice echoed, “Chase the enemy and kill our way out.”

The retreat of the sea demons could only mean one thing: the Black Blood City had surrendered.

If Han Fei could come to the battlefield of the seventh island to take a look, he would find mountains of corpses and seas of blood.

The army of 300,000 sea demons was almost wiped out by the army of 300,000 explorers. 70% or 80% of the sea demons had been killed.

This kind of battle result was a huge victory that would have been far from achievable in normal circumstances.

After all, there was no reason to lose!

Boom!

But even at this moment, the Great Dao cracks in the sky were still appearing, and the frequency wasn't low.

...

Two hour passed.

To be honest, as early as the battle began, on the endless islands around the Immortal City, countless people stopped what they were doing and looked up at the sky.

Many people had never seen such a scene in their lives.

The death of two Venerables had already caused a great uproar.

When the message that Han Fei killed Venerables was sent back, many people began to celebrate by cooking sea creatures.

However, after only one day, seven Venerables died in a row. Many people thought that the Immortal City suffered a great loss.

But the result was that five sea demons died, and human beings won again. Therefore, there was an uproar in the rear, people began to celebrate, and Han Fei's name was remembered by many people.

However, after all, two Venerables from the Immortal City had died too. Therefore, while many people were cheering, there were also seniors teaching their juniors that their peaceful lives were exchanged for by the lives of countless people on the front line.

However, it had only been one day, and the battle at the front line had begun again?

This time, billions of humans felt that the world was crazy.

They had no idea what happened at the front line. All they knew was that sky cracks were appearing nonstop, and the sky was dyed red by the bloody rain.

On this day, in the rear of the Immortal City, countless humans below the Law Enforcer realm suddenly felt that they were going to make a breakthrough.

On this day, someone recorded the number of times the Great Dao cracks appeared in the sky, totaling... 128 times.

Chapter 1594: Impasse

One day passed.

The war between the Black Blood City, the Immortal City, and the Demon Beast Union had completely come to an end.

The place around the first island of the Immortal City had become a forbidden place. Only the Venerables could enter.

The islands here had been razed to the ground.

In the whole sea, turbulence surged, and the sword intent was indiscriminately attacking.

On the second day after the battle, Golden Boy and dozens of Venerables stood on the sea solemnly. They seemed to be mourning Han Fei who had died in this sea.

Golden Boy stood at the forefront. He couldn't imagine that Han Fei had even survived someone else's tribulation, only to be killed by the last attack of the Black Evil Conch King.

At first, he couldn't believe it.

However, after repelling the sea demons, he immediately returned to the Forbidden Island. He let out a sigh of relief when he saw that the big octopus was still sleeping peacefully in the big array in Death Valley...

He didn't know where Han Fei was now.

However, the golden boy could be sure that Han Fei wasn't dead but just couldn't be found now.

After a long silence, the golden boy said to the violent ocean in his childish voice, "You did win this battle. Although countless people have died, you've benefited the entire human race. 41 Venerables from the Black Blood City died yesterday. I believe this is just the beginning... I'll wait for you to come back."

Behind the golden boy, many people were puzzled by his words.

At that time, didn't many people watch Han Fei die? Who was the golden boy waiting for?

Before they could think further, the golden boy asked, "Where is Lu Yuntian?"

Lu Yuntian stepped out.

It wasn't until yesterday's battle ended that Long Xi and the others learned that Han Fei and Lu Yuntian were actually just putting on an act. As for Wang He, the traitor, he had been killed by Qin Mo after Han Fei took action.

Golden Boy said, "Lu Yuntian, in the future, you and Chen Xiang will lead the human explorers to expand our territory and hunt the sea creatures in the territory of the Black Blood City. From today on... the Immortal City is not afraid of battles."

Lu Yuntian bowed. "Yes, Master."

Immediately, Long Xi stepped forward. "Grand Venerable Golden Boy, are we going to continue the war even though Marshal Han's body hasn't been buried?"

Hua Meng also stepped forward. "Grand Venerable, we have to do something, right?"

The golden boy was silent for a moment. "Make a statue for Han Fei! The billions of human beings in the rear need some faith, don't they?"

Everybody was slightly confused. A statue? What did it mean?

In this place, only the golden boy knew the meaning of a statue. It was the symbol of a king.

In the Dragon-Subduing World, only Zhao Xianglong was qualified to have a statue. In the end, the people in the cage were all from the Yin-Yang World or Water-Wood World.

For now, the golden boy felt that most of the people in the cage were from the Yin-Yang World. After all, nobody in the Water-Wood World had fought for the human beings in the cage.

Qin Mo said, "Set up a statue? Do we need to announce Han Fei's name to the entire Immortal City?"

Although everyone felt that Han Fei had indeed made a great contribution this time.

However, this victory was not overwhelming.

The golden boy said that 41 Venerables from the Black Blood City died, but 32 Venerables from the Immortal City died.

Besides, in terms of qualification, seniority, or even affection, Golden Boy was more qualified to have a statue, but why would Han Fei have a statue?

However, the golden boy shook his head slightly. "Name: Ninth Heavenly Lord, Han Fei."

...

"Old Yuan, what the hell is this place?"

While Golden Boy and the others were thinking about setting up a statue for Han Fei...

In a vortex abyss, a golden skeleton cuddled into a ball and spinning holding a mass of flesh and blood that contained terrifying energy in his arms.

And the place he was spinning was in an endless abyss.

It was dark all around. There was no light or sound. Fortunately, Han Fei couldn't see now, or all he could see would've been pure darkness.

The old turtle said, "I don't know. I moved you away with the Great Teleportation Technique, but halfway through, we were sucked in by this black hole. There is no shortage of spiritual energy and energy here. There is pure darkness, death energy, and vitality... Hey! Are you really fine in your current state?"

Han Fei was lost for words. "Do I look fine? I've suffered a big loss this time."

Han Fei looked at his personal information sadly.

Although his brain became a mass of meat ,so did his eyes, Han Fei could still see his personal information.

Owner: Han Fei

Level: 86 (Intermediate peak-level Venerable)

Chaotic Qi: 58 wisps

Spiritual Power: 35,026 / 99,999 (Limit of Dao Heart)

Perception range: 10,000 kilometers

Strength: 8,999 Waves

First Spiritual Heritage: Unknown

Second Spiritual Heritage: Unknown

First spiritual beast: Twin Yin-Yang Spirit Swallowing Fish (Level 75)

Second spiritual beast: Emperor Sparrow (level 59)

Main Art: Sky Stealing Technique, level six of Void Fishing (Venerable Level, Divine Quality)

...

This was Han Fei's current state. Although he had survived someone else's king's tribulation, it only raised his realm to the peak of an intermediate Venerable.

Apart from the change in his realm, he had fused a lot of the power of his soul into his Indestructible Body, which caused his strength to soar again, but it seemed that he had reached a bottleneck.

As for the power of the soul, there was no need to talk about it.

In the past, when he was short of ten or twelve thousand points, he could still find a way to make up for it.

This time, however, he had lost two-thirds of his soul power.

In terms of size, how many Venerables would it take to replenish it?

Han Fei's experience told him that his soul power couldn't be replenished. No matter how long he was stuck at the peak of the intermediate Venerable level, it was impossible for him to make a breakthrough!

Of course, the top priority at this moment was not the soul... It was how to get out of this damn place.

Han Fei had tried to return to Forge the Universe, but it was useless. He couldn't leave this damn place now.

Han Fei cursed, "Was I sucked into the black hole?"

This black cave was spinning, and the force was definitely not small, but it couldn't be the kind of black hole he knew.

Otherwise, with such terrifying power, he would definitely have been torn to pieces.

Han Fei recalled, "Old Yuan, do you think this happened when I used the Supreme Yin-Yang Wheel?"

The old turtle said, "Yes! It's very strange when you use the Yin-Yang symbol. All the power around is gathering towards you. Have you ever experienced this before?"

Han Fei: "No! Otherwise, I wouldn't have said it was strange."

The old turtle said, "I think that the black hole that appeared in the sky at the end, which is where we are now, might have something to do with your Yin-Yang symbol. At that time, I wanted to take you away, but it forcibly sucked us in."

Hearing what the old turtle said, Han Fei said, "Interesting! Look at my... Supreme Yin-Yang Diagram."

After all, he had been in this black hole for a day.

Han Fei had already basically recovered from his injuries, and it would still take some time for him to fully recover...

Originally, Han Fei had lost a lot of vitality too, but he had replenished it by eating spiritual fruits. Now, he only needed soul power.

Buzz!

Although Han Fei's bones were separated from his flesh and blood, he had been holding his flesh and blood, which existed in another form.

The old turtle had explained that this was because the quality of his flesh and blood was lower than his bones.

The benefits of transcending the Heavenly Tribulation had significantly improved the toughness of Han Fei's flesh and blood. However, in order to transcend the tribulation, Han Fei had fused too much of his soul power into the Indestructible Body, and with the benefits from the Heavenly Tribulation, there was a gap between his bones and his flesh and blood.

He could either wait for his realm to rise, or his flesh and blood had been tempered to another level. Otherwise, he could only hold his flesh and blood like this for the time being.

However, it made no difference to use the Supreme Yin-Yang Wheel.

Buzz!

As soon as Han Fei activated the Supreme Yin-Yang Wheel, a tremendous amount of energy gathered. Han Fei spun faster and faster, and all kinds of strange energy rolled over.

Han Fei hurriedly said, "Old Yuan, let me tell you, the Supreme Yin-Yang Wheel is even more problematic here. I feel that my energy is about to explode."

The old turtle said, "I don't think you need to rush. Can't you keep practicing the Grand Desolate Body Art? The hardness of your flesh and blood is one level lower than your Indestructible Golden Body. This kind of imbalance is definitely not a good thing. Practicing this Grand Desolate Body Art can improve your flesh and blood."

Han Fei was lost for words. "But... now my flesh and blood are like a ball. Will I be cultivating my bones or my flesh and blood if I cultivate now?"

The old turtle asked, "Can you feel... the blood in your body flowing?"

Han Fei blurted out, "Yes!"

The old turtle said, "That's it, isn't it? You don't have ordinary meridians. Your heavenly meridians support your flesh and blood and make them operate on their own; your soul supports your bones. They're just temporarily separated."

Han Fei frowned. "Really?"

The old turtle said, "Anyway, there are all kinds of chaotic energy in this black hole. You can try cultivating!"

Han Fei's mouth clicked. "That's true. There seems to be no other way except this."

At that moment, the golden skeleton was sitting cross-legged with a mass of flesh and blood in its arms. Energy surged from all directions and enveloped Han Fei.

There was no concept of time here.

There seemed to be only energy here, complicated energy, endless energy.

As he practiced, the Grand Desolate Body Technique was activated, and Han Fei reconnected with his flesh and blood.

However, the moment the communication began, Han Fei exclaimed, "F*ck, Old Yuan, my Heaven Spirit Detoxifying Insect is gone..."

Chapter 1595: Upgrade the Time Chain

The Heaven Spirit Detoxifying Insect was gone!

Han Fei hadn't noticed it before.

It was not because of anything else, but because Han Fei had been holding his flesh and blood. His flesh and blood were separated from his bones, and he relied on the power of his soul to support his Indestructible Body, so Han Fei didn't find this problem.

The old turtle was also taken aback. "Why didn't I notice it?"

The old turtle examined it and said leisurely, "Not only is the Heaven Spirit Detoxifying Insect gone, but so is the demonic origin in your body."

“F*ck, can demonic origin be broken?”

The demonic origin that Han Fei was talking about was naturally the one that the Ice Spirit had stuffed into his body in the Snow God’s Temple. It was a demonic origin that could withstand the power of a Half-King. At this moment, it was gone along with the Heaven Spirit Detoxifying Insect.

The old turtle immediately said, “Something’s wrong. If these two things are gone, it’s impossible for me to not notice anything. Unless...”

Han Fei was lost for words. “Unless what?”

The old turtle said leisurely, “Unless the king’s tribulation you experienced completely injected these two things into your body. Try injecting demonic energy into this meatball?”

Han Fei: “What meatball? This is my body.”

Han Fei mumbled.

However, the soul fire in Han Fei’s eyes was flickering, and he was clearly a little surprised. He was in human form. Although he could resist demonic energy in this form, it was impossible for him to absorb demonic energy.

Therefore, Han Fei grabbed an ultra-quality demonic stone from Forge the Universe, only to see endless demonic energy flowing into his body.

Han Fei was shocked... Although he didn’t have the heart anymore...

Then, Han Fei quickly took out spiritual energy, but his body still ate it.

Han Fei: “Old Yuan, in your opinion, am I a human or a demon now?”

The old turtle said, “You may be... a human-demon.”

“Puff! Old Yuan, you’re forcing me to declare war on you... Heh! So what if I can directly absorb demonic energy? I’m still a real human. Hey, wait a minute... Then can I be immune to poison now?”

Han Fei grabbed a poisonous grass from Forge the Universe and stuffed it into his body.

Then, through his perception of his body, Han Fei discovered that the poisonous grass was quickly dismembered and completely dissipated in his flesh and blood.

“Hiss ~”

Han Fei asked, “Was my body fused with my demonic origin and the Heaven Spirit Detoxifying Insect?”

The Heaven Spirit Detoxifying Insect was dead.

However, Han Fei seemed to have become a human antidote and acquired the ability of the Heaven Spirit Detoxifying Insect.

The old turtle said, “Now, you should consider why your body can swallow the demonic origin and the Heaven Spirit Detoxifying Insect. If your body could have swallowed them earlier, it wouldn’t have waited until now.”

Han Fei was lost for words. "I have no clue."

There must be a reason for this, and it was necessary to investigate it.

Han Fei thought that he might have acquired some special abilities, but he didn't realize it yet!

Unfortunately, the fusion of the demonic origin and the Heaven Spirit Detoxifying Insect into his body didn't improve his body's strength much...

It could be said that Han Fei's body was relatively strong, but not as good as his bones. The incompatibility between the two was high, so Han Fei could only be in the skeleton state for the time being.

There was no sun or moon in the cave, only complete darkness.

At this moment, Han Fei could only judge the time in the cave through the time in Forge the Universe.

Han Fei stayed in Forge the Universe for three years. Under the nourishment of infinite energy, his cultivation of the Grand Desolate Body Technique was progressing fast.

However, the "Grand Desolate Body Technique" was only an intermediate peak-level Venerable-level technique after all. It was a transition to a stronger body technique. Because of the "Grand Desolate Body Technique", Han Fei's body accumulated terrifying energy. He didn't stop until his body cracked.

At this moment, Han Fei realized that his body would explode if he kept cultivating.

After the king's tribulation, Han Fei's body had reached the peak of the intermediate Venerable level. If he continued to cultivate, he would accumulate energy in his limited body. Now, it was obvious that he couldn't continue to accumulate energy.

This situation required Han Fei to make a breakthrough.

Only in this way could he consume the energy in his body. Unfortunately, Han Fei's soul was damaged too badly. Han Fei had to replenish his soul before he could continue to make a breakthrough.

Having no choice, Han Fei could only go to visualize...

However, after visualizing the God Scaring Painting in Forge the Universe for eight months, his soul power had only been restored by less than 1,000 points.

Therefore, Han Fei had to give up. How long would it take for him to replenish his damaged soul with this speed?

He couldn't temper his body, nor could he cultivate his soul...

Bracing himself, Han Fei could only continue to practice disassembling spiritual energy!

Fortunately, for some reason, Han Fei found that... his power of faith was constantly increasing, and it was more than twice as fast as before.

With so much power of faith, Han Fei naturally used it all to disassemble spiritual energy.

After all, it was impossible to use the power of faith to make a breakthrough. The power of the soul had limited his development. If he insisted on making a breakthrough, he would only die.

Another year passed in Forge the Universe.

Under the crazy push of the power of faith, Han Fei finally disassembled the spiritual energy to 81%.

At this moment, the power of faith was exhausted.

Having no choice, Han Fei tried hundreds of times to find a way out... However, it never worked out. This dark world seemed to have no way out in the first place!

Thinking about it, Han Fei returned to Forge the Universe and began to practice the Dragon Swallowing Technique...

It was not difficult to practice this technique.

This was a qualityless technique. Even if his level was lower, he could still practice it. And Han Fei had enough dragon bones to experiment with, so there shouldn't be any obstacles to learning it...

However, Han Fei discovered a problem at the beginning of the experiment...

It turned out that this Dragon Swallowing Technique could not only absorb the origin energy of the dragon race, but also intercept the dragon's luck, solidify the origin, and attract the dragon's power to temper the body!

The problem lay in body tempering!

This power continued to strengthen Han Fei's body, causing cracks to appear on Han Fei's meatball-like body.

At this moment, Han Fei knew that his wish to absorb the Chaos Qi had completely failed!

While he was thinking about it, the old turtle said, "In fact, when a strong master cultivates to the end, it's nothing more than strengthening the body, soul, and the Great Dao. Now that your body has reached the limit, it can't be further strengthened. You have to recover your soul power first... Or, there's another way that can barely help you make a breakthrough, but that method is not good."

Han Fei's eyes glittered. "What way?"

The old turtle said, "Breaking the soul limit means finding your own Dao heart. This is different from the Great Dao... The Dao heart determines the potential of your growth. In fact, even if your soul power is restored to its peak state, it's at most enough for you to break through to the advanced Venerable realm. But what about the future? The limit of your Dao heart will restrict the upper limit of your soul. In the end, it will restrict the upper limit of your physique. As long as your Dao heart doesn't break through, your strength will always stop in the advanced Venerable realm, even if you have the combat power of a Half-King..."

Han Fei was shocked. In the end, it was all because of his Dao heart!

The old turtle said leisurely, "Actually, I'm already very surprised that you can grow to this level. Because in my opinion, you shouldn't have grown so strong..."

Han Fei said crossly, "Why can't I become stronger?"

The old turtle said, "Because I can't see the persistence a cultivator should have from you. Some people just want to become stronger. In their hearts, there is no strongest, so their path of growth has no end... Some people know what kind of existence they want to become, and they treat that existence as a faith. At least, before they fulfill this faith, their growth won't be interrupted... The faith in everyone's heart is different, so is their persistence of their Dao heart. Some people do it to become stronger, and some do it for others. But in the end, they are all very firm... For a Heavenly Talent, the problem of the Dao heart is not a problem at all. What surprised me is that for you, it shouldn't be so difficult to comprehend a Dao heart..."

Han Fei rolled his eyes. That's easy for you to say. I know what you're talking about. But my goal is to kill Chun Huangdian! Isn't that a Dao heart? Chun Huangdian should be at least in the King Realm, right?

In the black hole, there was no feeling of time, and it was like a real cage...

Since Han Fei's Dao heart had reached a bottleneck, there was nothing he could do...

Han Fei nodded. Then let me find my Dao Heart!

But how could he find his Dao heart?

The old turtle's theory was very strange. He said... everyone had their own opportunities. Some people discovered their Dao hearts while squatting in the toilet, some discovered Dao hearts while eating, and some discovered Dao hearts while chatting...

Some people explored the world and searched for their Dao hearts for tens of thousands of years without gaining anything. Instead, they messed up their Dao hearts...

Hearing what the old turtle said, Han Fei felt that the Dao heart was too ridiculous! It felt a bit elusive... It seemed that he couldn't rush!

Therefore, in the following years, Han Fei wandered in Forge the Universe every day.

He established a large plantation and expanded Forge the Universe to a radius of 20 kilometers.

That was because he was so bored!

Han Fei built a house here, dug a fish pond, and specifically divided the areas to plant ingredients and store resources.

Having nothing to do, Han Fei went to fight the Nine-Tailed Mantis Shrimp and the others. After half a year of fighting, the Nine-Tailed Mantis Shrimp, Little Gold, and the others ran away as soon as they saw Han Fei.

Two years later.

On this day, Han Fei was rolling on the grass at the edge of Forge the Universe in boredom.

Forge the Universe had been expanded to thirty kilometers by the spiritual energy and energy in the black hole.

The Nine-Tailed Mantis Shrimp and the others were strengthened by three or five levels on average under the scourge of such energy and spiritual energy.

“Dad! I’m done...”

Little White and Little Black hadn’t changed much in the past two years, mainly because Little White had been forced to vomit Chaos Qi by Han Fei.

He already had 58 wisps of Chaos Qi, although he hadn’t absorbed them in the past few years.

However, it took him less than three years to gather 100 wisps of Chaos Qi now.

100 wisps...

Han Fei immediately got up from the grass.

Han Fei was now a skeleton without any sense of touch, sight, hearing, or taste... But at this moment, soul fire was beating in his eyes.

“My good girl, I’ve waited for this moment for a long time. I didn’t expect you to be one step faster than me...”

Receiving Little White’s wisp of Chaotic Qi, Han Fei was overjoyed.

He had been trapped in Forge the Universe for seven years. Another year here, a whole year would pass in the outside world. He had to buy himself more time.

Once the time chain was upgraded, one year outside would be equivalent to sixteen years in the Forge the Universe. He could slowly work out a solution!

In fact, Han Fei was very anxious. He had a lot of things to do. He had to go out and become the master of Yin-Yang World!

Immediately, Han Fei shouted, “Time Chain, level up.”

Chapter 1596: A Dragon Tail

When the old turtle saw that all the Chaotic Qi Han Fei had suddenly disappeared, he immediately exclaimed.

“What did you do? What did you exchange with that little calabash for so much Chaotic Qi?”

Han Fei said leisurely, “You’ll find out later.”

The old turtle was lost for words. “What a spendthrift! Do you know how hard it is to get Chaotic Qi in the Venerable realm? Do you think it can only increase your combat power?”

Han Fei said flatly, “Of course. Although it can nurture my body, it’s impossible for my body to improve any further. It’s best to use them now.”

The old turtle said, "Seriously... you know that the purpose of disassembling spiritual energy is to acquire the Chaotic Qi, but have you ever thought that... the Chaotic Qi that contains so much power of the Great Dao can actually broaden your Great Dao?"

"Huh?"

Han Fei was puzzled. "Broaden the Great Dao? Broaden what Great Dao?"

The old turtle was lost for words. "I didn't want to tell you now. The time you spent in the Venerable realm was too short. If you could use the slightest time to explore the use of the Chaotic Qi, you wouldn't consume it easily. It's exactly because you haven't been in the Venerable realm for long that I can't tell what your Great Dao is, but I can tell that you're cultivating multiple Great Daos at the same time. If that's the case, you'll need Chaotic Qi more..."

The soul fire in Han Fei's eyes flashed. "Wait! Old Yuan, tell me first what's the relationship between the Chaotic Qi and the Great Dao?"

Han Fei thought that the Great Dao was just a different technique that guided his future cultivation. His own Great Dao could change. Why would this ability be combined with the Chaotic Qi?

The old turtle said, "Have you forgotten what I told you... Everyone has an origin sea?"

"Yes."

The old turtle asked again, "If you want to create an Origin Sea after you become a king, what will you use to do that?"

Han Fei was stunned. "Chaotic Qi?"

The old turtle snorted. "Yes! The amount of chaos energy determines the size of the Origin Sea. And the size of the Origin Sea determines your strength in the king realm. In addition to the size of the Origin Sea, the Origin energy stored in the Origin Sea also determines your strength. Origin energy can also broaden and strengthen the quality of the Origin Sea. All of this is in conjunction. Although you don't have to worry about it until you become a king, I need to tell you that you'd better save as much Chaotic Qi as you can..."

Han Fei smacked his lips and suddenly said, "Old Yuan, how much chaos energy do you think the dragon in Forge the Universe is worth?"

The old turtle: "..."

Han Fei grinned. "The Chaotic Qi is taken from the world. I'm using it now just to better acquire it in the future. However, you didn't tell me something so important until now... That's too much."

The old turtle sneered. "Who knew that you wouldn't regard the chaos energy as the chaos energy? I don't need to tell you this at all. In fact, when you grow stronger and find a way to explore the full use of the Great Dao, you will know. You just don't have the time..."

Han Fei chuckled. "Time is precious..."

Although the old turtle had told him about the benefits of the Chaotic Qi, Han Fei didn't panic at all. Even if he had known it, he would still use it. After all, after the acceleration of time, everything would be obtained faster!

Sure enough, a moment later, Han Fei sat on the edge of Forge the Universe and saw blue lines circulating where the black mist enveloped.

The weird lines were obviously increasing.

This meant that the time chain upgrade was completed.

"Hiss!"

In the next moment, the old turtle said in shock, "Time here is more than ten times slower? Did you make a deal with the calabash? That's taboo. Once it's discovered, even if your parents come back, they won't be able to save you."

Han Fei curled his lips. "As long as you don't speak it out, who will know?"

The old turtle was stunned at this moment. He knew that this calabash was very powerful, but he didn't expect it to break the Time Forbidden Spell so easily. Damn it... If he had such a divine object, how could he have ended up like this?

The old turtle suppressed his agitation.

According to Forge the Universe's current time flow...

As long as Han Fei could hold back and stay here for a hundred years, his soul power could be restored. Then, he could make a breakthrough here!

At that time, there might be a way to leave!

Even if there was no way to leave, when Han Fei became an advanced Venerable, he would have enough energy and spiritual energy to continue cultivating!

Han Fei put on a smile. He was actually thinking the same as the old turtle.

No matter what, he had to find a way to return to his peak state first!

Only when he recovered to his peak state could his bones fuse with his flesh and blood again. Only then could he make a breakthrough and continuously strengthen his body in the advanced Venerable realm.

Han Fei watched Forge the Universe recover quietly, watching the blue halos swim wildly in the gray void.

The soul fire in Han Fei's eyes followed them all the way.

Perhaps because Han Fei was bored, he saw that the wisp of light he was staring at circled the entire Forge the Universe and went to the other side.

After a while, Han Fei saw a similar blue light appear and continue to twist along the same trajectory.

"Huh?"

Han Fei suddenly rose.

In Forge the Universe, there were many such lines in the gray space.

Han Fei suddenly felt that something was wrong!

Just like the rise and fall of the sun and the rotation of the sun and moon, everything was rotating. These blue lines seemed to be rotating around Forge the Universe.

“F*ck!”

Han Fei seemed to have discovered something.

With a thought, Han Fei appeared in the rotating dark space again.

Han Fei held the Vast Ocean Navigator in his hand, and the needle was spinning. Soul fire was dancing in Han Fei’s eyes.

The old turtle couldn’t help but ask, “What did you find? Haven’t you seen this navigator many times? I think maybe this space is special and it can’t find the way out.”

Han Fei shook his head. “No! Definitely not...”

Han Fei looked at the trajectory of the Vast Ocean Navigator. Every time he changed direction, the needle of the Vast Ocean Navigator would spin in the same direction.

It looked like an out-of-control compass.

However, what if it didn’t lose control? What if this road... was actually a spiral? Or was it a loop?

Swish ~

Han Fei activated the Agility of Wind, the Heavenly Void Divine Movement, and the power of the Great Dao. He was like a golden light, running in the darkness.

As the saying went, as long as you were fast enough, the whole world would be full of your afterimages.

At this moment, Han Fei’s speed could be said to have reached its peak. However, Han Fei ran for a long time but didn’t see the breath he left.

Maybe it had been too long, but Han Fei didn’t find anything unusual, so he changed his method.

“Twin Divine Technique.”

Han Fei didn’t give up but continued to try.

This time, he didn’t try for a long time, and the black mist and the white mist didn’t meet. Because the two were too far apart, he had to fuse the two of them.

The old turtle was about to ask, when Han Fei grabbed a puppet in the Half-Venerable realm and gave a wisp of his soul to it. Then, Han Fei and the puppet ran in the opposite direction.

This time, after almost two hours, Han Fei finally saw the figure of the puppet running wildly.

“Hahaha! I knew it! I knew it...”

The old turtle was stunned. "What do you know?"

Swish!

With a swish, Han Fei returned to Forge the Universe.

With a thought, the terrain of Forge the Universe began to quickly change. In a moment, it turned into a large Yin-Yang symbol, which was the Heaven and Earth Array.

Han Fei stood on a Tai Chi Eye and calculated in his heart. "As I expected, the space we are in has no border at all, because it is a two-dimensional world."

"What world?"

Han Fei said, "Well! You may not understand it, but it's a two-dimensional array formed in multiple dimensions... This is an array. The entire cage is an array. What we are in is the array eye... We need to find the array eye in the array eye."

Han Fei grabbed the Embroidery Needle and poked it at the Tai Chi Eye of the Yin-Yang symbol.

A strange idea popped up in Han Fei's mind. He could deduce the Yin-Yang symbol into the Eight Diagrams. In that case, he might be able to leave through the so-called Life Gate...

However, he knew nothing about it.

And this was clearly not the Eight Diagram. The Heaven and Earth Array in the Yin-Yang Immortal Palace was located at the Tai Chi Eye. If he guessed right, this was no exception

Thinking that through, Han Fei left Forge the Universe again.

According to the distance he had run, Han Fei calculated the distance at the center, which was about 1.3 million kilometers from the edge of the black space.

Seven days passed.

When Han Fei tried countless times and rushed to the center, he felt that a terrifying power was sucking his body and tearing his soul apart.

However, none of this stopped Han Fei.

Although it hurt, as long as he could get out, it didn't matter.

Finally, on the seventh day, Han Fei suddenly saw something floating in the void.

When Han Fei got closer, he found that it was a huge dragon tail.

Under the dragon's tail was a pure black invisible sheet.

This black color, just like his black-mist body, was almost invisible to the naked eye. Han Fei also noticed the abnormality here with his soul after seeing the dragon tail.

Han Fei couldn't help but say, "Old Yuan, I found it."

The old turtle was silent for a long time. "A dragon tail... Doesn't that mean..."

Han Fei said solemnly, "Under the grassland, deep in the desolate tomb."

Chapter 1597: The Real Secret of the Cage

The dragon tail that Han Fei saw was naturally the dragon tail that Zhao Xianglong buried.

Under Zhao Xianglong's deliberate arrangement, the dragon tail was sealed with a dragon soul, which withstood the ravages of endless time.

Therefore, if he guessed right, this should be a dangerous place. With the dragon souls here, with his current soul power, he might not be a match for the other party.

Han Fei said, "Old Yuan, if that dragon soul attacks, we'll have to count on you."

The old turtle said, "Didn't they say that the dragon had escaped? This can't be a complete dragon soul. Since it's not a complete dragon soul, it should be just a wisp of a dragon soul. It's not a big problem."

When Han Fei stood in front of the dragon tail that was more than 600 meters long, he couldn't help but wonder how much chaos energy he could absorb from such a huge tail.

What a pity for Zhao Xianglong.

If he could enter the Heaven and Earth Array and take the dragon tail back, the purple dragon array would definitely be broken.

But it was exactly because of this that Han Fei had a bad feeling. Even a king couldn't enter. It seemed that it wouldn't be easy to get out of the Heaven and Earth Array!

Han Fei felt that it was lucky that his mother taught him the Heaven and Earth Array. Otherwise, he wouldn't know how to get out...

However, Han Fei was also puzzled. How farsighted must his mother have been to surround the two Heavenly Palaces with the entire cage and create such a huge Heaven and Earth Array?

At this time, the old turtle also sighed. "If this is an array... Such a huge array, even if I were alive, I wouldn't be able to create it. Did your family learn the Heaven and Earth Array from here?"

"What the hell is this? This array must be my mother..."

The soul fire in Han Fei's eyes flickered. Not necessarily!

His mother said that Heaven and Earth Array are naturally produced between the heavens and earth. According to this logic, it's not certain... which the real Heaven and Earth Array is?

"Roar!"

At this moment, a dragon roar echoed from the dragon's tail. The power of the soul was even more extraordinary than Han Fei's Hundred Beast Soul Devouring.

"Roar!"

Han Fei was already prepared. Stepping on the Soul Controlling Array, he attacked the dragon tail with the Embroidery Needle.

The old turtle also pressed forward with the power of his soul.

Even so, Han Fei's Soul Controlling Array was shattered immediately.

Fortunately, Han Fei could attack the soul. Otherwise, his soul would've been damaged again.

However, this also proved that there weren't many souls sealed in this dragon tail.

Han Fei felt that it should be stronger than him, but not much stronger.

Han Fei's soul trembled. "B* stard, you're just a dead dragon. I'll skin you, drink your flesh, and slaughter your soul..."

However, Han Fei didn't get any response.

Han Fei didn't stop attacking. He kept attacking left and right...

Unfortunately, the dragon soul seemed to be sealed, so it could only roar at Han Fei and couldn't come out.

Han Fei was amused. F*ck, isn't this a target for me to hit?

After more than 50 stabs in a row, the dragon soul was knocked out.

"Huh!"

When Han Fei was a little weak, the old turtle said, "Something's wrong. This doesn't look like a dragon soul."

Han Fei was lost for words. "If it's not a dragon soul, could it be a snake soul? No matter how stupid Zhao Xianglong is, he can't be so stupid."

The old turtle said, "If it were a dragon soul, it wouldn't have attacked you just now. If I were him, I would've stabilized you first before launching a sneak attack. But this dragon soul only roared twice.. It seems to be a newborn..."

Boom –

A large amount of soul fire jumped out of Han Fei's eyes. "What did you say? A newborn? Then if I kill its consciousness, won't it become an ownerless soul?"

The old turtle said, "Even if it's still conscious, you still have the little calabash. In any case, you won't lose out."

While the old turtle was speaking, Han Fei had already cast the Void Lines over. Han Fei intended to test it out. If there was no problem, this ownerless soul would be his.

When Han Fei's Void Lines buckled, soul power immediately began to struggle. However, the force wasn't very strong.

Han Fei didn't read anything else from this soul.

At this moment, Han Fei was sure that this was indeed a newborn soul.

Perhaps because there were too few souls sealed here, the soul's owner couldn't withstand the suction force at the center of the natural array and died long ago.

As its soul power didn't disperse, over time, a brand-new soul that could resist this suction force was born.

At this moment, Han Fei didn't dare to blow up the newborn soul.

Three hours later, when Han Fei lost more than 3,000 points of soul power, he finally killed this new soul.

"Hahaha! There is always a way out."

The old turtle mumbled, "I think it's a coincidence. It just so happens that this is an array you're familiar with. Or rather, this array is related to you."

Han Fei shook his head. "Not necessarily. If it was so dangerous, Old Han would have told me something when I came here. There are always some things beyond their control. My mother never mentioned that there was a Heaven and Earth Array here."

In Forge the Universe, this was the most exciting day for Han Fei in eight years.

Not only did Han Fei discover the secret of this black hole, but he also found the dragon tail that was suppressed by Zhao Xianglong.

When Han Fei assimilated the enormous ownerless soul, he felt that he was floating.

This was a king-level dragon!

Some of its soul power escaped after it was killed, but the remaining soul power in the body alone amounted to nearly 30,000 points, although its soul was destroyed a bit in the battle with him.

Several days later, after Han Fei completely digested this unowned soul, he checked his personal information again. His soul power had reached 6,1646 points.

In general, excluding the part of his soul that he had consumed, at least now, he couldn't be considered weak in terms of soul power.

Han Fei said in shock, "Only with the soul sealed in this dragon tail, I'm already half recovered. Then can the soul sealed in the dragon head completely restore me?"

The old turtle said, "First of all, you have to find a way out. If this is under the grassland of the Forbidden Island, then the Forest of Terror is where the dragon head is. That's a place you've never been."

Han Fei smiled. "I have the Vast Ocean Navigator!"

Han Fei was not in a hurry to find a way out.

After all, he had been trapped here for seven years.

Han Fei didn't care about these days anymore. He might as well take advantage of these days to fuse these ownerless souls! This was the most important thing.

One month passed.

Swish!

Han Fei suddenly appeared in the black hole, where there was only darkness and a terrifying suction force.

Holding the Vast Ocean Navigator, Han Fei felt his heart stirred, and the needle on it was still spinning.

Putting away the Vast Ocean Navigator, Han Fei grabbed an array rod, which was the array of the Heaven and Earth Array in the Yin-Yang Immortal Palace.

With a thought, Han Fei tried controlling the array rod... However, there was no response.

"Heh! These two Heaven and Earth Arrays are indeed different."

Since he couldn't use the array pestle, he had to use his wisdom to break the array. Now that he had found the array eye, he only needed to think of a solution.

Han Fei punched out, and golden fist marks blasted in all directions.

Chi la!

After staying in the black array eye for a long time, Han Fei suddenly felt that the spinning power around him was getting bigger.

Also, a terrifying energy was surging, which far exceeded the power of the Desolation Gale.

In just a few minutes, the intensity had reached a level that his soul couldn't withstand.

Buzz buzz buzz!

Soul Controlling Array and Coiled Turtle Array appeared one after another.

Han Fei had never encountered such an abnormal suction force before he came here.

Immediately, Han Fei entered Forge the Universe.

Han Fei asked, "Old Yuan, did you feel it? The suction force just now."

The old turtle said, "No wonder that dragon soul became ownerless. It turns out that the danger here doesn't always exist."

Han Fei: "There must be something wrong with this abnormal phenomenon! This black hole is eating and swallowing all kinds of energy."

With that said, Han Fei sat down and quickly drew a Yin-Yang symbol on the ground in front of him.

Han Fei said. "The Forbidden Island is more than 10 million kilometers away from the terrifying Tai Chi Eye. It should be 16 million kilometers. There is infinite energy in this black hole. Where did this energy come from? Perhaps it was sucked in by this black hole. So, the other Tai Chi Eye should be also

absorbing energy. Therefore, the energy in the cage is swallowed by these two Tai Chi Eyes every day. Does the array eye swallow the power inside and outside the cage?"

The old turtle suddenly interrupted him, "That's not right. If the power of the entire cage is gathering here... and never escapes out, do you know how much energy it contains after tens of thousands of years? The cage would've collapsed long ago."

Soul fire was dancing in Han Fei's eyes. "So it eats energy from both inside and outside. What if this energy is used to maintain the operation of the Wall of Death? According to the conservation of energy, the array is swallowing and the cage is consuming... I was surprised before. Who could set up this array which is still so powerful even after tens of thousands of years? But if this array is naturally formed and can operate on its own, it's easy to understand!"

The old turtle was puzzled. "It should be absorbing energy from the outside world to provide the energy inside the cage, right?"

Han Fei shrugged. "Who knows? Maybe it eats energy from both inside and outside! Energy circulates, and the inherent energy can't support the cage. Therefore, this formed a closed loop. Because the Heaven and Earth Array absorbs energy, it needs to absorb it both from outside the cage and from inside. Since there is absorption, there is a way out."

Chapter 1598: Epiphany

Translator: Henryee Translations

Editor: Henryee Translations

At this moment, Han Fei, who was sitting cross-legged on the ground, was like a pedant analyzing the composition of the entire cage.

Han Fei had always thought that this cage was stud link-shaped.

In fact, it made sense, but it wasn't correct enough. It was more 8-shaped; or to be exact, more like a Tai-Chi diagram...

Indeed, when Han Fei learned that there were two such black holes in this cage, the true form of this cage was revealed.

This was a super-large Heaven and Earth Array!

However, it was not an ordinary Heaven and Earth Array. If the Tai-Chi diagram that it outlined was not 8-shaped, then there must still be an area outside the cage.

Although he didn't see the whole picture, he could tell its shape from the two black holes in the "Tai Chi Diagram".

Han Fei felt that this might be a Heaven and Earth Array formed naturally or by manpower.

The array could absorb energy from inside and outside the cage to maintain the seal on the cage.

Perhaps more energy would be absorbed from the outside world. This also explained why there were very few strong masters born in the Water-Wood World and Yin-Yang World

In fact, there was an obvious gap between the Yin-Yang World and the Water-Wood World.

After all, the number of experts in the Water-Wood World far exceeded that in the Yin-Yang World

Han Fei had always thought that the gap was caused by the Heavenly Dao Dharma Eye. However, the Heavenly Dao Dharma Eye only stopped people from becoming kings, right? It didn't seem to affect other cultivators much. Then why?

Han Fei thought that maybe the two black holes in the cage would absorb external forces to different degrees! As for the exact difference, he wouldn't know until he saw the other Tai Chi Eye.

In fact, these questions are easy to understand.

What puzzled Han Fei was why a Heaven and Earth Array was set up here? What was the purpose of trapping these people, sea demons, and beasts here?

Perhaps this was a way for human beings to stop the sea demons?

After all, in the Age of Doom, the sea demons invaded and caused a large number of terrestrial creatures to die. Perhaps it was his mother or a certain power that created this Heaven and Earth Array.

In the end, this array was equivalent to a barrier, equivalent to the Great Wall, to block the invasion of the sea demons. After all, there was the inheritance of the Grand Myriad Mountains here. It was definitely a project of the Age of Doom.

Any large array was actually easy to enter but difficult to leave.

According to Han Fei's understanding, it wasn't difficult to enter the Heaven and Earth Array, but it took him a lot of effort to enter this Heaven and Earth Array.

Tens of thousands of years ago, this Heaven and Earth Array must be easy to enter too, so many creatures were trapped here.

Why were many people trapped here? Perhaps it was because the Heaven and Earth Array was absorbing energy at all times to strengthen the cage. Those who entered were probably trying to improve their strength.

As a result, it accumulated more and more power, causing the cage to be firmly locked up. And those who came in at the beginning could no longer escape out.

But as an array master, Han Fei knew one thing:

"Can a large array absorb energy indefinitely? Absorbing energy for tens of thousands of years? Even if it's a real black hole, what will happen to it if it absorbs endless energy? I'm afraid it will erupt in the end! Perhaps, the singularity that caused the Big Bang is a super black hole..."

Why would a singularity cause the Big Bang? It's very likely that it swallowed too many things! When the energy of the singularity reached a critical point, the universe collapsed..."

Han Fei suddenly patted his head, making a clanging sound, and clicked his tongue. "I'm so f*cking smart! From this array, I thought of the Big Bang..."

"Hiss! I'm afraid that this cage has reached its limit."

Han Fei was shocked by this thought.

Therefore, the crack appeared not because the power of the seal was weakening, but because it had accumulated too much energy and was about to erupt.

"Hiss!"

"Not good!"

The old turtle was puzzled. "What's wrong?"

Han Fei suddenly understood why there were so many strong masters in the cage. There were hundreds of thousands of explorers in the cage. This was because the energy absorbed by the Heaven and Earth Array was supplied to them when it was supplied to the barrier of the cage, so as to relieve the pressure of excessive energy

However, the battle just now caused the deaths of countless Venerables and explorers...

Then, according to the conservation of energy, the power of these people after they died would either return to the world, be absorbed by others, or be absorbed by this black hole!

In this way, the magnificent energy would only accelerate the collapse of the cage if it was poured into the array eye!

Repeatedly asked by the old turtle, Han Fei communicated his thoughts to the old turtle.

The old turtle said leisurely, "If this cage collapses and the million-strong army of the Black Blood City runs out, I'm afraid your Yin-Yang World will be destroyed." Han Fei's face became ugly. "It's one possibility, and another is that the outbreak caused all the creatures in the cage to die. However, I don't think it has reached the point of outbreak yet! Otherwise, it would have exploded when the crack appeared. However, no matter what, we have to find a way to get out first."

As Han Fei believed, there must be a way out.

How could he get out? Han Fei had already got some clues.

The suction force in the array eye was extremely powerful. It seemed dangerous, but it should be the only way out.

The array was constantly absorbing the energy of the outside world.

However, the suction was intermittent, sometimes fierce and sometimes light The array must be wide open at the fiercest moments, and then he would have the best chance to escape...

The moment he figured this out, Han Fei left Forge the Universe.

Buzz!

As soon as Han Fei came out, he began to spin quickly.

“Supreme Yin-Yang Wheel.”

In fact, the way to break this array wasn't difficult.

After Han Fei figured it out, he knew how to break the array. He made the Supreme Yin-Yang Wheel spin rapidly, opposite to the rotation direction of the array eye. When they reached a balance, he would be relatively still... This method seemed simple, but Han Fei had explored it for many years.

It took Han Fei seven years to find the array eye. Even if he found the array eye, if he didn't know anything about arrays, he would probably be trapped inside forever.

Buzz!

The Supreme Yin-Yang Wheel revolved against the terrifying spinning force. Han Fei could feel that he was escaping and resisting the array...

Crack! Crack! Ten seconds later, when Han Fei saw a white light, he was excited. He finally found a way out!

But at this moment, Han Fei's body began to crack.

There was no other reason. It was just that his body carried too much energy. His body had absorbed so much energy that his body couldn't hold on anymore!

Han Fei immediately withdrew the Yin-Yang Wheel in the sky. Still spinning at a high speed, Han Fei took out his fishing pole and threw it at the white light.

The hook broke through the air as if it had caught something?

Swish!

Han Fei shuttled through the air like a golden light.

Bang!

Holding his meatball-like body, Han Fei crashed into a gale, crushing a lot of soil.

“Haha! I'm out!”

Han Fei was excited. Anyone would go crazy after being trapped in a dark place for seven years.

“Giggle!” However, a figure suddenly appeared. Giggling sounds came from his throat, waking Han Fei up.

When Han Fei looked back, he saw a shriveled old man looking at him leisurely.

“Yes, the Tai Chi Eye is below the grassland. Zhao Xianglong chose this place for a reason. He just didn't expect to be trapped. Now that I've come out, I naturally appear in the desolate tomb.”

Han Fei was quite sure that this was the deserted tomb.

When a gale blew past, Han Fei secretly cursed himself for being stupid.

Where did the strong wind come from? Wasn't it supposed to be soundless? He had never suspected it. When he entered the deserted tomb from the Water-Wood World, he should have realized that the deserted tomb wasn't simple.

However, when he came out of the Heaven and Earth Array, he found that everything had been implied, but he just didn't understand it.

Han Fei suddenly remembered that he was a skeleton at this moment. Zhao Xianglong might not recognize him, right?

Immediately, Han Fei said with the sound of his soul, Senior, it's me! I, Han Fei, a human, was fighting a sea demon but was defeated, so I teleported myself here to seek your protection..."

"Giggle. Dragon..."

Zhao Xianglong probably recognized Han Fei.

Therefore, he withdrew his murderous gaze. However, the first thing he asked after seeing Han Fei was still the dragon.

Han Fei certainly couldn't say that I stole the dragon tail that you buried...

However, after searching for the dragon several times, he didn't find anything? This didn't seem appropriate!

With a thought, a corpse of a Venerable appeared in front of Han Fei.

In fact, Han Fei had two more such corpses. However, in order to prevent the old guy from absorbing too much energy, he didn't take them all out...

Han Fei then took out a palm-sized cone-shaped scale and said, "Senior, I was incompetent. I was ambushed by a sea demon and a dragon and almost died. I only caught a Venerable and a scale in a hurry..."

Buzz!

Han Fei saw a flash and the dragon scale in his hand disappeared.

Zhao Xianglong roared angrily.

Then, Han Fei saw that the scale was crushed by Zhao Xianglong inch by inch.

Han Fei felt that his blood was freezing. He shouted crazily in his heart, "Don't be crazy. Don't be crazy until I'm gone."

Han Fei couldn't help but remind him, "Senior, would you like to grab some food? I've found a way to destroy the sea demons and hunt the azure dragon... In a hundred years, I'll definitely be able to save you out... Or even bring the azure dragon to you."

"Giggle"

Zhao Xianglong turned his head and looked at Han Fei. Instead of rushing to eat, he said in a hoarse voice, "Your... Soul... Is... Damaged.... Dao Heart... Not good enough. Let..Me... Help..."

Han Fei was about to ask, "How can you help..."

Suddenly, Han Fei saw a big hand pressing on his head.

Han Fei was shocked. I'm holding my brain in my hand. You're pressing on my skull!

However, in the next moment, Han Fei seemed to watch a movie in his soul.

At that moment, Han Fei seemed to see... how he looked when he first came to this world...

Tang Ge and he lived on the cliff of the Heavenly Water Village. The cave behind the cottage was their secret. They swore to become strong together!

Han Fei thought of He Xiaoyu. She said hopefully, "My dream is to become a great fishing master like the village leader."

Han Fei remembered that when he met Old Jiang, he learned Spirit Concentration Art, cultivated soul warrior techniques with Jiang Qin, went to the Thug Academy, and met Xia Xiaochan and the others...

Han Fei remembered the adventure of exploring the ocean, looking for treasures, and improving his strength...

During that period of time, besides adventuring, they ate. During dinner, Han Fei, Zhang Xuanyu, and Le Renkuang began to bicker.

From the level-two fishery to the level-three fishery, making enemies with the Sun Family and entering the Heavenly Desolate City... When he entered the Heavenly Desolate City, Han Fei saw for the first time the tragedy of the human race. Now, looking back, the people of the whole city had died fearlessly. How sad and resolute were they?

These images appeared in Han Fei's eyes one after another.

In the Unknown Place, Xia Xiaochan was taken away by Chun Huangdian, the Heavenly Silkworm shocked the world, and he was devastated.

At that time, he had vowed that he would slaughter his way into the merman race.

Then, his life took a turn. He entered reincarnation and got to know Ximen Linglan..

He seemed to have lived another life.

When he was a fool, all he thought about was how to protect Ximen Linglan... Later, when he awakened, he thought about fulfilling Ximen Linglan's dream and breaking the layout that the human race was ruled and oppressed by the big clans...

At that time, he had unified the city of justice, reformed, and innovated, serving the future of the human race wholeheartedly! At that time, his life was actually very simple.

His memory went to the time when he endured all kinds of hardship in order to save the Scattered Stars Island and wipe out the big clans. Han Fei couldn't tell if this was Ximen Linglan's wish or his.

Han Fei was immersed in the past and suddenly realized that he had done so many things over the years.

All this time, everyone had regarded him as a savior.

Perhaps Old Han had a greater purpose. However, few people were as sophisticated as Old Han.

The strongest masters in most people's eyes were kings.

Han Fei suddenly woke up. Do they want me to become a king? Or do I myself want to become a king?

Chapter 1599: I'm Back, I'm Leaving

Han Fei didn't expect that someone else could help him find his Dao heart.

How did Zhao Xianglong know that his Dao heart was not enough?

In the past, Han Fei had always been very vague about what his Dao heart was. He seemed to have a lot of hopes. Some hope was strong, while some seemed weak...

He had too many things to do!

Perhaps this was the reason why his Dao heart was messy and not strong enough?

For a moment, many people flashed in front of Han Fei...

Han Fei did feel that there were still many things for him to do after he became a king. Sweep the big clans, find Xia Xiaochan, beat Chun Huangdian up, rebuild the Heavenly Desolate City... And even unify the Thirty-Six Mystic Worlds as his mother hoped...

All of this, only finding Xia Xiaochan and beating Chun Huangdian up were the truest thoughts in his heart. Nothing else seemed to be his true thoughts!

Yes, even wiping out the big clans seemed to be Ximen Linglan's wish.

In fact, Han Fei had never been humiliated by the big clans... while Ximen Linglan was expelled from her family when she was young!

Therefore, Ximen Linglan hated the hypocritical and scheming big clans, but the foundation of Han Fei's Dao heart was indeed not this!

At this moment, Han Fei's soul was beating crazily.

In an instant, Han Fei recalled everything he had experienced in this life.. His happiest time was in the level-two fishery. At that time, although Wenren Yu was with them, she let them explore freely on the sea.

At that time, every day was full of surprises! Han Fei suddenly realized that his favorite things had always been exploration and treasure hunting. It was that simple! Just like back on Earth, when he was a captain, he went to the ocean... That kind of excitement and craziness was the deepest desire in his heart!

The old turtle watched this scene quietly in the depths of Han Fei's sea of consciousness. He didn't know what Han Fei saw, but the soul fire was beating so fast.

Zhao Xianglong was a lunatic. How could a lunatic find a Dao heart for a fool?

The old turtle could easily tell that no matter what Zhao Xianglong's Dao heart was in the past... What he used to be obsessed with... now, it was definitely slaying dragons!

Would he turn Han Fei into a dragon slayer? Suddenly, Han Fei said something that he had said countless times! "My journey is the Infinite Ocean."

Buzz!

At that moment, Han Fei came back to himself. The soul fire in his eyes flickered as if he had an epiphany.

Although Han Fei hadn't made a breakthrough yet...

However, the old turtle knew that Han Fei was different from before. He seemed to have found himself and found his Dao heart!

The old turtle mumbled, "So... he found it? This guy spent so much time before but still didn't know what he was obsessed with. But now he has found it just because of Zhao Xianglong's casual slap?"

The old turtle didn't know the standards and methods of becoming kings for the humans of the Thirty-Six Mystic Worlds...

Maybe, as he said, turtles could become strong just by sleeping. Maybe he became a king out of nowhere.

However, the other creatures were different.

Especially in a place like the Thirty-Six Mystic Worlds, it wasn't easy to become a king

Every king had their own personality and different beliefs. However, all of this was more or less related to their life experiences and insights.

At this moment.

Han Fei came back to himself and looked at his personal information.

Owner: Han Fei Level: 86 (Intermediate peak-level Venerable) Chaotic Qi: None Spiritual Power: 61,646 (Damaged)

Perception Range: 220,000 kilometers

Strength: 9,000 waves

First Spiritual Heritage: Unknown

Second Spiritual Heritage: Unknown First spiritual beast: Twin Yin-Yang Spirit Swallowing Fish (Level 75)

Second spiritual beast: Emperor Sparrow (level 59) Main Art: Sky Stealing Technique, level six of Void Fishing (Venerable Level, Divine Quality)

Han Fei almost laughed aloud when he saw the message. Unfortunately, he was only a skeleton now, so he just slightly clicked his mouth.

His strength had exceeded 9,000 waves. This meant that Han Fei had broken through the barrier of the intermediate Venerable realm, but his strength hadn't increased because he hadn't broken through yet.

The limit of his Dao heart on the Spiritual Power column had disappeared. What was left now was only the number of his soul power. This meant that his soul power had no upper limit. Since there was no barrier, once Han Fei's soul power recovered, he could break through to the intermediate Venerable realm!

Immediately, Han Fei cupped his fists and said, "Thank you for your guidance, Senior. I've found my own path... However, don't worry, Senior. The dragon is a great enemy of the human race. I'll do my best to take it down."

Although Zhao Xianglong was crazy, he was still a human.

Although his mind was in a mess, he could still sense human emotions. However... his chaotic brain might not be able to help him clearly judge good and bad...

However, at least, Han Fei's performance in all aspects was very good. He was very considerate, which made him very comfortable.

Zhao Xianglong said in a hoarse voice, "Keep Them... Alive... Wait... for Me... to Return..."

Han Fei: "I'll remember.."

Hearing their conversation, the old turtle just wanted to say that Zhao Xianglong was literally the stupidest king in the world.

As long as he wasn't crazy, he could tell that Han Fei was making things up.

Buzz! As soon as the deserted tomb was opened, Han Fei appeared on the grassland like the last time.

When Han Fei looked back, the deserted tomb was already far away, and he was at the edge of it, ready to go out at any time.

If he could get out, he certainly couldn't stay in this deserted tomb!

Although Zhao Xianglong helped him find his true path... what if Zhao Xianglong suddenly went crazy and slapped him to death? As a lunatic, what was impossible for him?

Stepping out of the grassland, Han Fei sensed the outside world.

Immediately, Han Fei felt much better.

Fortunately, he had come out! If he stayed in that dark space for decades, he would definitely be suffocated.

Leaving the grassland, Han Fei carried his own flesh and blood and soon arrived outside the Death Valley.

When Han Fei was about to reach the Death Valley, he found that Golden Boy was already standing outside the valley, and Jade Girl was also in the seal.

Han Fei didn't know what kind of seal was in the Death Valley. Why could the jade girl only stay in this seal? However, this didn't matter.

Golden Boy was surprised. "Sure enough, you're still alive." Han Fei patted his bones. "I ran into some trouble, but I've finally returned safely."

This kind of conversation was very strange. An undead who was full of death energy and a golden skeleton, like two monsters.

Golden Boy looked at Han Fei up and down. "What's your current status?"

Han Fei's current appearance was too strange. It was simply unheard of for a skeleton to carry his flesh and blood.

Han Fei grinned. "My golden body is too strong after the tribulation, so my flesh and blood can't be fused with it."

The corners of the golden boy's mouth twitched. This reason was really unique Golden Boy looked back, then turned back, and looked at Han Fei strangely. "I never thought that an intermediate Venerable could transcend the king's tribulation. Now I can believe unconditionally that you are the Ninth Heavenly Lord."

"Haha! Believe it or not... However, I have to go. I'm here today to pick up my contractual spiritual beast."

Looking at Little Fatty who was staring at him with widened eyes, Han Fei removed the defense arrays.

Little Fatty was probably stunned too. F*ck, after leaving for a year, he became a skeleton? And he was still alive? This year, Little Fatty didn't dare to step out of the array, fearing that Han Fei would die soon... If he went out and got killed, he wouldn't be able to revive him!

Although this idiot had become a skeleton, he was still his master. Little Fatty: "I slept for a year." With a thought, Han Fei recalled Little Fatty into Forge the Universe. "Your strength has fallen behind. You have to make up for it."

After collecting Little Fatty, Han Fei looked at Golden Boy and asked, "How was the final battle?"

The golden boy said, "In the battle that day, a total of 128 Venerables died in the cage. Among them, on the Immortal City battlefield, 41 Venerables from the Black Blood Royal City died, and 32 from the Immortal City, with a total of 73 Venerables died. 55 Venerables died in the Life-and-Death Gorge, but the Demon Beast Union had a fake king. Obviously, the Black Blood City didn't gain anything..."

Han Fei listened quietly.

Golden Boy said, "That day, except for the Venerables, the Seventh Island and the Sixth Island fought the easiest. After the battle, according to incomplete statistics, as many as 150,000 explorers from the Black Blood City died. Below the Explorer realm, more than 500,000 people from the Black Blood City

died, while the Immortal City only had half of the people die. As for the Explorer realm, more than 50,000 died...”

Hearing the golden boy’s description, Han Fei was horrified. Damn it, how much energy would return to the cage then?

Han Fei suddenly asked, “Did anything happen in the cage this year?” The golden boy took a deep look at Han Fei and said, “The environment in the cage is getting worse and worse, and there are more spatial cracks. Occasionally, spatial cracks will erupt with energy tides. It’s easy for cultivators under the explorer realm to be impacted.” Han Fei thought to himself, That’s right!

Too many people had died. The Heaven and Earth Array had tried so hard to deliver a huge amount of energy to feed so many Venerables and explorers..

However, in one day, these Venerables and explorers returned all the energy. It would be strange if nothing went wrong!

However, it was just energy tides. It seemed that there was no big problem yet.

As soon as Han Fei said so, the golden boy said, “In addition, cracks appeared in some parts of the cage, but we still can’t get out. However, the possibility of getting out has increased...”

Han Fei was shocked. Cracks? Son of ab*tch, not now! If the creatures in the cage went out, it would be an unprecedented shock to the Yin-Yang World and Water-Wood World.

That scene was unimaginable!

Han Fei’s heart sank. He had to make a breakthrough as soon as possible! He had to go to the Forest of Terror and swallow the ownerless soul in the dragon head to break through to the advanced Venerable realm. Han Fei grunted and said bluntly, “I’m leaving. I’ll come back when I should.”

After a moment of silence, the golden boy said, “Okay! However, I think you should go to the human gathering place behind the front line.”

“Huh?”

Chapter 1600: The Pleasures of Being A Statue

Han Fei wondered what the golden boy wanted to show him.

However, since he had come out, he didn’t mind a day or two. He might as well take a look..

At this time, the Immortal City should no longer have to worry about the attack of the Black Blood City.

55 Venerables died in the Life-and-Death Gorge. The Black Blood City didn’t have a fake king over there, so they must have a lot of casualties!

As for why... only 55 Venerables died in the Life-and-Death Gorge, it must be because the space there was too limited and there wasn't enough room for fighting.

However, even so, Han Fei felt that the number of Venerables in the Black Blood City should have dropped to less than 190.

In just a few years, nearly 100 Venerables had died in the once arrogant Black Blood City!

This speed of death was unacceptable to any force.

Now, in the cage, the Demon Beast Union should be the leading force.

If the Black Blood City dared to act rashly again, for example, if the Black Evil Conch King left the Black Blood City... the consequences would be unimaginable!

However, the number of 190 Venerables was not small at all. It was much better than the Immortal City that only had only 80 or so Venerables.

Therefore, Han Fei knew that the cage must have fallen into a temporary peace.

Furthermore, Han Fei also realized that it was probably inappropriate to cause more Venerables to die in the short term. Otherwise, if the cage erupted, all the creatures in the cage would die. Or if the cage broke, and a large number of creatures from the various races went out, the consequences would be unimaginable!

Between the Immortal City and the front line of human beings, there were countless islands.

Among them, the closer to the front line, the stronger the overall strength of the island was. The cultivators on the island were generally stronger

On the human islands, the first thing all the children knew after they were born was not to discriminate against the undead.

The adults would spread out how the undead protected people.

However, in the territory of the living, the undead rarely went over. Only when

there were inspections occasionally would the undead patrol the island with human experts.

Gale Island was an island occupied by living people spanning more than 2,000 kilometers. There were about three million people living here. Among them, only ten were Explorers. The rest were all below the Explorer realm.

Such islands were far away from the front line. The only thing they had to pay attention to was to prevent the sea demons from sneaking in. Therefore, on the islands, even in peacetime, there would be a Half-Venerable expert and multiple explorers guarding and supervising the islands

Buzz!

On this day, there was a wind resistance competition on the island.

The so-called wind resistance competition was related to the unique terrain of Gale Island

Because there was a concave strait on the island, a super hurricane was formed every year.

Cultivators from the nearby islands would send people to participate in the Wind Resistance Competition every year. According to the strength of the wind, in the Wind Resistance Strait, from the Hanging Fisher realm to the Law Enforcer realm, there were contestants of all realms, and they were good at different areas.

There were relatively safe areas on the island, which were often surrounded by low-level cultivators and many children. Basically, any place where people could stand was crowded.

Han Fei was also attracted by this special competition. He had planned to observe it, but then he saw a statue erected on the island.

Han Fei was dumbfounded when he saw the statue. Wasn't it him? Since when had his statue been erected on a human island?

This Gale Island was just a random island he passed by. Even so, he saw his statue, which meant that there should be his statues on other islands too.

However, wasn't the statue too intimidating?

Han Fei felt that this was not like him at all. He was such a gentle person.

Cough, cough

The statue was built according to his powerful and domineering image in the Immortal City. He was staring intimidatingly and stood proudly with his hands behind his back. Those who didn't know him would think he was a king!

However, when Han Fei saw the words carved under the statue, he was secretly shocked. The Ninth Heavenly Lord, Han Fei!

Tsk, tsk Golden Boy is sensible!

Han Fei had been wondering why he felt that his power of faith doubled when he was trapped

Han Fei knew it must be because of Golden Boy that his statue was here. Apart from the golden boy, who else knew about the Ninth Heavenly Lord?

Therefore, this must be the golden boy's idea.

At this moment, under his statue, a young man was kneeling in front of his statue and praying

While the Wind Resistance Competition was being watched by everybody, Wang Hai came to Han Fei's statue alone.

Wang Hai looked up at the statue for a long time and finally said, "People call you the God of War. I saw the battle last year. Too many Venerables died. They said that it was because of you. However, my parents didn't come back. I know it's not your fault. I just..blame myself. I hate that I can't enter the seven island battlefield and slaughter sea demons. I hate that I can't die in battle. Senior God of War, can't I become a powerhouse just by cultivating my body?"

Wang Hai looked at the statue for a long time, sighed, got up, and was about to leave

However, just as he was about to leave, he heard a voice in his head, "Don't you hate this God of War?"

Who?

Wang Hai looked back.

However, he suddenly saw a black-robed undead standing there.

Few people on the island could see the undead, and the undead generally didn't come to the island.

After all, the undead's body was full of death energy. If humans stayed too long with the undead, the death energy might invade their bodies and damage their foundation.

However, Wang Hai was secretly relieved to see that it was an undead.

Wang Hai cupped his hands. "Hi, Master Undead."

Han Fei could tell that the boy seemed to respect the undead very much, because the undead were all transformed from dead humans!

"Um!"

Han Fei nodded slightly.

Han Fei was wearing a black robe, so the child couldn't tell what he looked like.

Wang Hai shook his head. "No! Although my father and mother died in this war, I know that the death of a few people is for the continuation of mankind. People die eventually. I just hope that after they die, they can be reincarnated into undead like you.."

Han Fei couldn't help thinking, Are kids nowadays so mature?

Originally, Han Fei didn't want to come down. However, when Han Fei glanced at this youth, he found that this person's Qi and blood were rich, but his soul was weak. Obviously, he was born with an abnormality.

Anyway, he was here and the boy had been kneeling in front of his statue for so long. Although Han Fei knew that the boy was mostly talking to himself, he was still praying to him!

He was the so-called God of War, and his statue was here. He couldn't just sit by and do nothing, right?

Han Fei said, "Young man, I can tell you. If you only cultivate your body, you can also become a top expert."

In fact, Han Fei was certainly not talking nonsense. This was a sudden epiphany when Han Fei escaped from the Heaven and Earth Array.

However, Han Fei gave up this idea. Because if he only cultivated the body, the path he took would definitely be very unconventional.

Even so, Han Fei was still certain that there would be such a group of people in this world. They didn't have many resources or powerful techniques, so they could only cultivate the body or the soul. If they insisted on walking a path, of course they could become stronger.

Although Han Fei wouldn't take this path, it didn't prevent him from teaching others.

However, it was difficult to cultivate the body. As long as this child had enough perseverance, it was possible for him to become a powerhouse!

Sure enough, Wang Hai's eyes glittered. He looked at Han Fei in surprise and then smiled.

Clash

Suddenly, Wang Hai knelt on the ground. "Senior, please teach me."

Han Fei accepted it happily. In a good mood, he taught the child a few techniques.

Han Fei said, "Are you sure you are really going to take this road? I can tell you that this road is the road the God of War once walked on. It's very difficult. Do you still want to take it?"

Wang Hai suddenly raised his head and asked in shock, "Senior God of War's path

Wang Hai immediately said firmly, "I'm willing. Senior, please teach me. I'll do my best to kill the sea demons and protect the Immortal City."

Han Fei grinned. "Then you have to ask..if the God of War is willing"

"Huh?"

Wang Hai was stunned. "Well, how do I ask?"

"Just close your eyes and pray to him with all your heart."

Wang Hai was stunned for a moment and then nodded solemnly. Then, he knelt before Han Fei's statue and folded his hands.

Seeing this scene, Han Fei pointed casually, and a golden light entered between Wang Hai's eyebrows.

Wang Hai's body trembled, and his mind went blank

But then, great arts circulated in his mind.

He could clearly see the 108 Spirit-Absorbing War Bodies, 108 Desolate God Body, Grand Desolate Body..

Han Fei didn't teach him the Indestructible Body Art. After all, not everyone had so many fortuitous opportunities, treasures

If he really passed on the Indestructible Body Art to him, this boy might kill himself before long!

At this moment, Wang Hai's sleeves fluttered, and golden light circulated around him.

Han Fei didn't notice it at first, but then he saw a familiar tattoo on the boy's shoulder.

Bang!

Wang Hai's clothes burst.

The soul fire in Han Fei's eyes flickered, and he was puzzled. "Dragon pattern?"

The old turtle said, "It seems that he was born with this dragon pattern, but not completely"

Han Fei couldn't help but wonder, "Is it possible that someone from the ragon-Subduing World didn't die back then? So they had offspring here?"

While Han Fei was thinking, he sensed something unusual and turned around.

Come out!"

In the next moment, a Half-Venerable expert walked out. "Zhao Tong greets the Venerable. My lord, this is.

Han Fei put his hands behind his back, and his soul vibrated in the void.

"Although this guy's soul is weak, he's born with great strength. I've taught him

a great technique. It depends on his own luck whether he can succeed.

Zhao Tong was puzzled. Then why did you blow up his clothes? If you just want to teach him a technique, I won't come out.

Han Fei said again, "Zhao Tong, right? Send this boy to the Forbidden Island.

He can enter, but you can't.."

Zhao Tong: "??
