

GOF 1611

## **Chapter 1611: Earth Vein Spring Water**

Hearing what the old turtle said, Han Fei actually wanted to say that he still had a complete dragon corpse!

However, Han Fei, who had recognized the strength of dragon bodies, felt that he was too shortsighted about the deal he made with the Azure Dragon.

‘When he had time, he would bargain with the Azure Dragon. That way, it wouldn’t be counted as violating his oath!

Two years passed.

Han Fei had accumulated 709 wisps of Chaos Qi.

Although Han Fei wanted to stay for another two years so that he might be able to accumulate more than a thousand wisps of Chaotic Qi, he had used up all the spiritual spring and ultra-quality demonic stones in Forge the Universe.

The energy that filled Forge the Universe had been mostly consumed. At the same time, this energy was improving Han Fei’s physique.

Having run out of resources, Han Fei had to leave Forge the Universe.

It had been almost four months outside.

Buzz!

‘When Han Fei appeared in the outside world, he was surprised to find that the thousands of arrays he had set up had been destroyed. There wasn’t much energy left in the array eye.

“Huff!”

Han Fei opened his mouth, and a large amount of impure energy was absorbed into his body. Then, the energy circulated in his body, and in a moment, 90% of it was spat out by Han Fei again.

This was the unique ability of the Grand Desolate Body Technique. It could swallow demonic energy, savage murderous aura, and poison... and transform it into a power that nurtured the body. It was said that whoever mastered it would be immune to all poisons.

However, this energy was too impure. Even the Grand Desolate Body Art could only transform ten percent of the energy. If it were someone else, they would definitely become a monster too.

At this moment, what Han Fei needed was not just a little energy, but a lot of resources.

Although cultivating in this array eye could provide sufficient energy and spiritual energy, cultivation wasn’t just about accumulating energy in the body.

After strengthening his body, he still needed to go through actual combat.

However, before going out, Han Fei still needed to make some preparations.

‘What if there were still many demon plant Venerables waiting outside? What if there were multiple Half-Kings guarding outside? In that case, he would definitely be in trouble.

Therefore, after preparing some fish-skin array maps for himself, Han Fei took out the Nine Palace Luck Ruler and calculated his luck.

Han Fei was slightly relieved when the marker fell on the “Flat”.

A moment later, when Han Fei activated the Supreme Yin-Yang Wheel and was rolling outside, he seemed to trigger the array eye. Looking at the energy surging from all directions, Han Fei was speechless. “Not good! I triggered an energy tide...”

Different from the array eye under the Forbidden Island that was absorbing energy, this array eye was releasing energy, so they had to go the opposite way.

Han Fei’s Supreme Yin-Yang Wheel couldn’t directly spin him out, but gathered endless energy from all directions. Only when the array eye was filled with enough energy would an energy tide erupt and send him out.

Fortunately, Han Fei had the Grand Desolate Body Technique that could transform energy. Otherwise, he would inevitably mutate in the impure energy.

During this process, energy and spiritual energy were replenished at any time. The Supreme Yin-Yang Wheel spun for half an hour.

Han Fei felt that he might be crippled if he kept spinning!

At this moment, the energy surging in the eye of the array spurted out like a volcano.

Bang!

‘When Han Fei rushed out of the array eye with the energy tide, he was already prepared for battle. After all, it took him more than half an hour to get out.

To Han Fei’s surprise, there was no one here at all!

“Huh? Where are they?”

‘Wasn’t it said that the Holy Altar Fiend Cave was in turmoil and the energy tide was ceaseless, so some demon plant Venerables had already stayed here? But now, it was quiet and there wasn’t even a ghost. Did something happen?

Han Fei immediately took out the Vast Ocean Navigator. It turned several rounds and pointed in one direction.

“Oh? Where is the Blood King?”

Han Fei immediately activated the Twin Divine Technique and quickly rushed towards the place where the Blood King was.

Half a day later.

Han Fei didn't reach the place where the Blood King left. When he was more than a hundred thousand kilometers away, he found that many demon plants had withered and died.

After he traveled another 50,000 kilometers, some Demon Plant Venerables were fighting here.

Bam! Bam!

Rumble!

Crack ~

Huge creatures were fighting an even larger super giant.

'There were many roots, vines, and branches on the super giant creature, which were as thick as dragons.

When Han Fei saw this thing, he suddenly exclaimed, "Blood Sea Divine Wood Branch?"

Han Fei had seen this thing before.

Earlier, Yang Ruoyun took a piece of the Blood Sea Divine Wood and refined it into a treasure, killing several of her teammates.

'At this moment, the branch Han Fei saw was billions of times larger than the one Yang Ruoyun used.

The old turtle said, "This is from the outside world. It's the Blood Sea Divine Wood in the king realm. It's absorbing the power of the ground veins in the entire forest."

"Absorb the power of the ground veins? Is he trying to destroy the forest of horrors?"

The old turtle sighed. "I don't know! However, it's certain that this branch has the power of a king. Although it's only part of the root, it's still a king-level creature. This is not something ordinary Venerables or explorers can resist."

In the field, the seven-color light twisted, and the seven-color sponge roared, "No, his growth speed is too fast. He can continuously obtain energy from the ground veins, unless... cut off his absorption of energy."

Abig snake complained, "It's f\*cking useless. We destroyed the ground veins just now, but this b \* stard found a new place on his own... to absorb energy."

The sea bamboo man said, "This creature is at least at the level of a fake king. Is he the Blood King?"

Someone was lost for words. "How can the Blood King be capable of that? Besides, there's no need for the Blood King to swallow the Forest of Terror! If he really wanted to, why didn't he swallow it before?"

A weirdly-shaped giant fish with spines all over its body cursed, "Regardless of whether it has anything to do with him or not, this thing is from the outside world. It wants to swallow the power of the ground veins of our forest! With such terrifying power, its strength far exceeds all of us. The power this demon plant has has already exceeded the Blood King."

Zi Luo said, "The problem is, how can we deal with this thing now? It won't fight us. It will only fight back when we try to kill it. And these days, everyone has already tried many times... Under our combined efforts, it can still slowly swallow the ground veins... Unless we call all the Venerables on the front line back! Otherwise, how can we resist this demon plant?"

Most people looked solemn. Someone mumbled, "Are the demon plants outside so terrifying? I suspect that the Blood King has been killed."

Many people nodded. "Although the Blood King isn't weak, he's not good at fighting. It's impossible for him to survive such a creature."

Someone felt lucky. "Fortunately, I didn't go with him to the outside world a few months ago. Otherwise, we would have died."

While these people were discussing, Han Fei also said solemnly, "Old Yuan, this matter probably has something to do with the fake king of the Blood Sea Divine Wood City... Is he going to transcend the tribulation?"

The old turtle nodded. "Obviously. Although the Forest of Terror is not a good place... the power of the ground veins in this entire demon plant territory is huge. It's more than enough to help a person survive the king's tribulation."

Han Fei snorted coldly. "It seems that he failed to lure these demon plants out last time. Now, he took the initiative to get back at them. However, how can it be so easy for him to transcend the tribulation?"

Han Fei ignored the demonic plants that were fighting the Blood Sea Divine Wood. Instead, he followed the direction of the Vast Ocean Navigator to the Blood King clone.

It must be the Blood King's clone that caused this mess.

Han Fei didn't want the Blood Sea Divine Wood to break the cage now... With his current strength, he couldn't resist the chaos of the cage!

The Blood Sea Divine Wood drilled holes everywhere in the seabed.

Han Fei crept into one of the holes with his black mist body.

Han Fei crawled through the holes like dirty dust.

Two hours passed.

Han Fei easily reached the roots of the Blood Sea Divine Wood, the center of the explosion.

Then, Han Fei saw a young man whose lower body was roots standing among the roots. Under the young man's body, his roots drilled into a green liquid.

Seeing this scene, the old turtle immediately said, "Kill him. What he absorbed was the Earth Vein Spring Water, a treasure comparable to Life Spring Water."

"Hiss!"

Han Fei exclaimed, "What did you say? That thing is comparable to Life Spring Water? How many drops are there?"

The old turtle shook his head. "You can't measure it this way. One drop of it is certainly not as good as Life Spring Water. However, a hundred kilograms of Earth Vein Spring Water will be equivalent to a drop of Life Spring Water. This place will probably have tens of thousands of years of vitality."

Han Fei was shocked. If he stuffed it into the Thousand Mountain Ancient Realm, wouldn't he be able to revive it easily?

Although the Thousand Mountain Ancient Realm had always been in his hands.

Han Fei could at most throw some energy and spiritual energy into it. However, the death energy there was heavy and the vitality was weak. With Han Fei's ability, he could only slowly revive them.

However, if he had the Earth Vein Spring Water, the Thousand Mountain Ancient Realm would probably be revived immediately.

Immediately, Han Fei quietly approached.

He must kill this Blood King clone..

### **Chapter 1612: Sneak into the Blood Sea Divine Wood City (1)**

The Blood King was feeling very calm but extremely confident.

He had prepared for this day for more than 30,000 years.

The corners of his mouth curled up subconsciously.

Although someone caused trouble a few days ago and he failed to lure the demon plants over, it didn't matter. He couldn't wait anymore!

He had suspected that something was wrong with the cage a long time ago, which could be seen from the anomaly in the Holy Altar Devil Cave. Therefore, he had to take the opportunity to free himself.

As for the others, they were just his nutrition.

Swish!

Suddenly, the Blood King's soul trembled.

A spear light pierced through time and space without giving him any time to react.

The Blood King didn't even have a chance to be shocked. He didn't even have a chance to open his eyes before half of his body exploded because of this stab.

But he used the Death Replacement Art at the critical time. Otherwise, the power of the spear would have blown him up.

In the next moment, a sea demon that looked like a shrimp soldier stood above the spring. As the shrimp soldier extended his hand into the water, a large area of the spring disappeared.

The moment Han Fei appeared, the Blood Sea Divine Wood moved.

However, Han Fei didn't just do nothing. He also attacked. The Blade Inferno had been established, and anything that could turn into a blade had become a blade.

Seeing that his sneak attack failed to kill the Blood King, Han Fei certainly wouldn't stop. He threw out the Heavenly God Stab and activated the Hundred Beast Soul Devouring.

The Blood King had just come back to himself. He glanced at Han Fei and vomited blood, seriously injured.

The Blood King's clone was horrified. What kind of person was this? His attacks were too fast! Furthermore, every attack was a top killer move. Judging from his strength, this person was at least a Half King. However, there were only a few Half Kings in the Black Blood City who he had all seen, but he didn't know this person.

Shocked, the Blood King summoned thousands of vines and a tree spear was condensing in his hand.

However, halfway through, the Blood King discovered, to his shock, that his Great Dao had been sealed! This guy actually had such a heaven-defying technique?

In an instant, the Blood King pressed his hand against the Blood Sea Divine Wood. Countless roots appeared out of nowhere and protected him.

Han Fei sneered. The Blood Sea Divine Wood was a super tree after all. Even if it was a king-level tree, could its roots not be broken?

Buzz!

Han Fei turned into a large cloud of white mist.

In fact, in the white mist, there was still his black-mist body. A hole was bitten through the Blood Sea Divine Tree instantly.

The Blood King said indifferently, "You ruined my plan last time... Who are you?"

At the moment when the Blood King cried, most of his body was swallowed by Han Fei. At the last moment, Han Fei's soul sounded. "Guess... if I'm gonna tell you."

The Blood King: "..."

The Blood King clone was eaten by Han Fei.

In such a situation, he didn't have the ability to use the Death Replacement Art again.

When Han Fei got close, he discovered, to his shock, he had already had no chance to fight back after Han Fei used the Knock on the Heavenly Gate.

With Han Fei's current strength, who in the Half-King realm could resist his sneak attack? In fact, it wasn't that the Blood King wasn't powerful. Even if it was just a clone, how could a powerhouse who could open the cage be ordinary?

However, no matter how strong he was, he couldn't resist Han Fei's sneak attack.

Han Fei took a batch of Earth Vein Spring Water and weighed it. It was about 30,000 catties.

Han Fei felt that his blood was freezing. "Old Yuan, did I get... 30,000 years of vitality?"

The old turtle said leisurely, "Probably! Your luck is really..."

The old turtle was very depressed.

He didn't understand why Han Fei picked up such a treasure so casually.

God knew... how long had the Blood King clone been accumulating here?

He must've been accumulating spiritual energy since the Blood Sea Divine Wood grew here. It wasn't easy for him to steal so much of the spring from the ground veins of the Forest of Terror... Did he just give it all to Han Fei?

Han Fei certainly knew how important 30,000 years of vitality was!

Even if he could increase his lifespan by absorbing the power of vitality-type spiritual fruits, it would cost him sixty or seventy thousand vitality-type spiritual fruits, and others might even need tens of thousands of ones.

This was decided by their respective Great Daos. His Great Dao was the Great Dao of Heaven Enlightenment.

However, Han Fei was excited for a while and immediately said, "Old Yuan, don't tell me... this Earth Vein Spring can only replenish vitality... It must have other uses, right?"

In his own knife array, Han Fei asked while controlling the Million Knives to fight the Blood Sea Divine Wood.

The old turtle said, "Well, if there's another usage for the spring of earth veins, it's the luck of the earth veins. If you scatter them within a certain range of the earth and refine them... as time goes by, new earth veins will be formed. At that time, you can obtain endless power in this area. You won't be fighting alone, but relying on the earth veins."

At this point, Han Fei had already figured it out. He sighed. "Therefore, the Blood King has been setting it up since a long time ago. He could fight two kings alone probably because of the power of the ground veins under the Blood Sea Divine Wood City... So, he has already stolen the spring of ground veins in the Forest of Terror for a long time?"

The old turtle said, "I'm afraid so. Because the energy supply and replenishment in the cage are too fast, and the power of the earth veins in the Forest of Terror is recovering very quickly, it's difficult for others to find anything when he slowly steals."

Han Fei felt that his blood was freezing. This man was really cunning!

Han Fei felt that this person was comparable to Old Han or Tang Yan. The Blood King acted as a king on both sides, but in fact, he was not even a true king.

Buzz!

Bang! Bang! Bang!

Even though the Blood Sea Divine Wood only had some roots, they were all king-level roots. In just three or five seconds, Han Fei's Blade Inferno was minced by those vines.

However, at the last moment, Han Fei stomped and a teleportation array appeared.

Then, Han Fei disappeared without a trace.

At the moment Han Fei disappeared, in the Blood God Divine Wood City, a young man who was lying on a branch of the Blood Sea Divine Wood opened his eyes slightly.

He sat up slightly and looked into the depths of the Blood Sea Divine Wood City, grinning, "Interesting. The clone you left down there was killed. Although the Blood Sea Divine Wood can continue to steal the Earth Vein Spring Water, it won't fall into our hands. It's meaningless to keep stealing..."

Next to the young man was another young man who looked exactly the same as him.

The young man said with a solemn expression, "My clone is in the Half-King realm. Can he kill my clone wrapped in the Blood Sea Divine Wood? This person is at least in the Half-King realm. There are no more than three people in the entire forest who can do this."

The lazy young man chuckled. "Forget it! Anyway, I've taken a lot of Earth Vein Spring Water. Since the Blood Sea Divine Wood has penetrated the cage, let's see how many people we can catch."

The Blood King looked at the young man and frowned slightly. "Xue Fan, I haven't finished speaking, None of the three people I mentioned had a chance to attack. Remember what I told you a few months ago? Someone secretly betrayed me... Now that I think about it, it might not be someone from the Forest of Fear."

The young man named Xue Fan smiled disdainfully. "So what? Does he dare to come up? Now that everything is ready, the Earth Vein Spring Water is barely enough. I've swallowed a lot of souls, and you're back... Plus, the Blood Sea Divine Wood that I parasitized has corroded his mind. Now, I'm already the strongest in the world. As long as I survive the king tribulation, the White Shell Royal City and the Sea Cloud Divine Tree... Heh, they're all mine..."

In Forge the Universe, the old turtle was lost for words. Han Fei was truly cunning.

He pretended to escape from a teleportation array although he actually entered his calabash space. If it were a human being, they might wonder why Han Fei teleportation array was activated so fast.

However, the Blood Sea Divine Wood was a tree after all, so it didn't know much about human beings.

Besides, it was just a root that broke through the seal. It didn't mean that a lot of consciousness followed over. If his consciousness came too early and was killed, it would be a huge loss for the Blood Sea Divine Wood.

In Forge the Universe, Han Fei's first words were, "Old Yuan, I found that the Blood Sea Sacred Wood couldn't find me."

The old turtle said leisurely, "Don't jump to conclusions so quickly. Those roots clearly don't have much consciousness. Or maybe, his consciousness isn't paying attention to you at all."

Han Fei created a pit in Forge the Universe that was used to store the spring of the earth veins. The Nine-Tailed Mantis Shrimp and the others all rushed over.

Boom! Boom!

Han Fei kicked them away and said, "Let me warn you. If there is one drop of the spring water missing, I will skin you alive."

After teaching the Nine-Tailed Mantis Shrimp and the others a lesson, Han Fei took a day off.

Han Fei grabbed the Nine Palace Luck Ruler and got an "Ominous" divination result... Han Fei didn't take it seriously.

It meant that it would be slightly dangerous and couldn't trouble him.. He had to get out quickly and act according to the situation!

### **Chapter 1613: Sneak into the Blood Sea Divine Wood City (2)**

Han Fei didn't know the features of the demon plants in the king realm. For example, the Cloud Sea Divine Tree had a space like the Grand Void Illusionary Realm, allowing people living on it to enter the realm to cultivate.

Logically speaking, this Blood Sea Divine Wood should have its own characteristics too.

However, at least for now, Han Fei hadn't found anything special about it. It didn't even look like a king-level demonic plant.

Swish

Han Fei appeared outside again.

Han Fei had already made up his mind that once the Blood Sea Divine Wood discovered him, he would rush out immediately. Even if he couldn't break out, as long as he held on for a few seconds, he could create a teleportation array.

However, when Han Fei appeared in the outside world, the old turtle said in surprise, "This Blood Sea Divine Wood is shrinking. Its coverage is less than 30,000 kilometers."

"Huh?"

Han Fei asked in surprise, "It doesn't even want the spring water?"

The old turtle: "Didn't you snatch it?"

Han Fei raised his eyebrows. "He's a king-level demonic plant. If he really eats the spring water, how can I snatch it from him?"

The old turtle said, "You can't say that. Although this Blood Sea Divine Wood can directly absorb the ground veins, don't forget... it doesn't want these spring veins for its own cultivation. If this spring does enter the body of a king, it will immediately be refined."

Han Fei sneered. "So, I got it! Now, this guy is shrinking. Is he going to abandon this place? This is not a good thing."

If the Blood King gave up on obtaining the resources in the cage, it meant that the resources he could obtain were enough. He could already transcend the king's tribulation! Once the Blood King transcended the tribulation, who knew how strong he would be? Han Fei would definitely not allow that to happen...

A moment later, Han Fei came to the edge of the Blood Sea Divine Wood with his black-mist body.

Han Fei saw an acquaintance, the Sea Bamboo man, who didn't attack the Blood Sea Divine Wood. Every time the Blood Sea Divine Wood retreated a distance, he would follow up.

The old turtle said, "Except for the demon plant Venerables fighting outside, all the other Venerables should be here."

After a while, the roots seemed to be extracted and moved faster and faster. In less than three hours, they were ten thousand kilometers closer to the center.

After another three hours, when the Blood Sea Divine Wood's roots could only cover a radius of 100 meters, the openings in the void rifts were getting bigger and bigger.

At this moment, all the demon plant Venerables gathered.

Someone asked, "What's going on? Why isn't this thing expanding?"

Someone exclaimed, "The contraction is too fast! Has he... given up on our place?"

The Void Vine appeared and pointed at the void crack. "Look, I feel that the void is opening."

"Hiss!"

Everybody gasped. Did it mean that the cage was being opened?

The sea bamboo man said, "Don't take it lightly. These roots are extremely powerful. First, it expands the territory and absorbs the power of the ground veins. Now, it's tearing apart the void. What's its purpose?"

Zi Luo agreed. "That's right. The power of this demon plant has exceeded that of the so-called Half-King realm. Even if we attack with all our strength, we won't be able to defeat it. Even if the channel is open, it'll be a problem whether we can be safe after we get out."

A Half-King realm fish covered in stings and tree warts said, "The Blood King just left, and this thing came. Is there a relationship between the two?"

At this moment, the Blood Sea Divine Wood didn't take action, neither did the demon plant Venerables. Han Fei turned into dust and watched the battle.

Ka ka ka

The crack on the cage grew bigger and bigger until it was a thousand feet long. Suddenly, a human face appeared in the void opposite the crack.

Instantly, the Blood King's big face appeared in front of everyone. He said, "Oh, so you're all here."

Zi Luo and the others were also dumbfounded. The Blood King wasn't dead?

The sea bamboo man asked in surprise, "Lord Blood King, what level is this demon plant at?"

The Blood King said indifferently, "The True King realm."

"Huh?"

This time, all the demon plant Venerables who heard the Blood King's answer were dumbfounded. A true king? There was a true king in this world?

The Blood King said, "Let me make a long story short. The situation outside is dangerous. There are eight million kilometers in this sea area, and three kings are standing side by side. The three major powers are the Cloud Sea Divine Tree, the White Shell Royal City, and the Blood Sea Divine Wood City where I am now. We haven't completely left the cage, but are locked in a larger area... I couldn't leave in the end, but... I can become a king here."

As he spoke, the Blood King's face disappeared, replaced by a strange creature that looked like a sea urchin.

The big fish that was full of stings and tree warts said, "Million Poison Urchin? Are you still alive?"

The sea urchin said, "I'm still alive. I heard that you want to meet those people outside? I can only tell you that the environment here is much better than the cage. However, there are still battles here. There aren't many Venerables in the Blood Sea Divine Wood City. I usually fight outside. I'm only here to meet you."

The next moment, the Blood King's projection appeared. He said, "I don't care if you believe it or not... but I have to remind you that the Forest of Terror has been invaded by a super powerhouse who is at least in the Half-King realm and can hide himself... Do you think the divine tree is absorbing the ground veins? It's actually not. While hunting that person, the divine tree absorbed some of the power of the ground veins to open the cage. Unfortunately, that person escaped in the end."

The Void Vine suddenly said, "As I said, I felt that there was a problem with the void fluctuations several times, but I couldn't find the problem... You all know it! But no one came to ask about it."

The others perked up. Judging from the current situation, they could indeed go to the outside world. However, the outside world... was probably no better than a cage. After all, as plants, they didn't want to leave their homeland...

However, to the Venerables, the outside world had a fatal attraction: they could become kings outside!

When they fought the Blood Sea Divine Wood, they felt that this thing was too strong! They had so many people, but they couldn't defeat it. Even if one part of it was cut off, it could regenerate immediately...

No matter how much these people didn't believe in the Blood King... When the Million Poison Urchin appeared, they were tempted!

Perhaps there would be battles in the outside world, but it was better than the Forest of Terror. Besides, one couldn't become a king here.

The sea bamboo man said, "Lord Blood King, if we go there, what about the people on the periphery of the Forest of Terror?"

The Blood King said leisurely, "I've long said... perhaps in a hundred years, this cage will inevitably open. Even if it can't be opened by then, since I can open the passage now, I'll definitely be able to open it in the future. You all think... I researched cages all day long and didn't help you fight, so you don't have a good relationship with me. Therefore, you don't believe me. However, if I really want to trick you, I'm a fake king. Would I really be afraid of you?"

The Blood King was still fooling the Demon Plant Venerable. It seemed that it was going to work...

Han Fei's heart sank. This bastard actually retreated for the sake of advancement. If he caused trouble now, it would cause negative effects! After all, these Demon Plant Venerables didn't believe him now.

The old turtle said, "You can't expose him now. At this moment, several perceptions are sweeping the surrounding tens of thousands of kilometers. They are waiting for you to take action in secret... Once you take action, it will confirm your identity as an invader."

Han Fei's heart sank, and he continued to turn into dust, motionless.

A moment later, what Han Fei was worried about finally happened. At this moment, more than half of the demonic plants chose to believe in the Blood King. The big fish that was covered in tree warts chose to believe in the Blood King first.

Perhaps because of their high vigilance, Zi Luo and the sea bamboo man thought that they could wait another hundred years...

In fact, they also wanted the big fish to stay. After all, it was just a matter of a thousand years. They were all in the Half-King realm and had plenty of time to wait.

However, they couldn't convince them at this moment. It seemed that the Blood King had no reason to trick them!

For a moment, 36 Venerables followed the tree wart fish.

Taking advantage of the dust raised by their movement, Han Fei quietly attached himself to the Big Snake Vine.

The reason why he chose the Big Snake Vine was that it was only an advanced Venerable. He could easily kill it. Besides, it didn't have the ability to discover his existence.

The Blood King said, "Zi Luo, Sea Bamboo Man, I know you have concerns. Since you don't want to come, inform Qianlong and the others. Send someone to keep an eye on this place. After this time, when the time is right, I will open the cage again. Poisonous Dragon Urchin, as a Half-King, when you

come over, some void cracks will appear. You are not weak. You can help other people hold up the cracks and bring them over.”

“Million Poison Urchin, Poisonous Dragon Urchin?”

Han Fei’s heart stirred. Could it be that this big fish was actually a sea urchin? The Blood King’s purpose was to fool these people with Million Poison Urchin to make them believe... By saying this before leaving, the others would naturally be relieved and lower their guard. Not only that, but he also encouraged the Venerables on the border to go over...

Han Fei thought to himself, This Blood King is really cunning and patient. I killed his clone, but he still tricked 36 Demon Plant Venerables to follow him out of the cage.

Han Fei thought for a moment. According to the Nine Palace Luck Ruler, it was Ominous for him today.. Indeed, he wasn’t very lucky! However, he still had to follow them...

### **Chapter 1614: Blood King Slays the Venerables**

Han Fei dared to go to the Blood Sea Divine Wood City at this moment because he believed in the Nine Palace Luck Ruler.

He had experienced Ominous divination results before. When had it ever killed him?

Although Han Fei was also worried that the Blood Sea Divine Wood would discover him, it didn’t react when he dug into the roots of the Blood Sea Divine Wood and killed the Blood King’s clone.

In the Venerable realm, even plants could move fast.

These Venerables had previously suspected the Blood King because they suspected that the Venerables who had left but didn’t return with any news had died. Besides, without a Half-King leading the team, they didn’t have the courage to go over. After all, the outside world seemed dangerous!

Now, with a Half-King leading the way and seeing a Venerable who had gone out return... most people were willing to believe the Blood King.

After all, who was willing to be trapped in the cage?

Watching the Poisonous Dragon Urchin enter the void crack, the Sea Bamboo Man couldn’t help but glance at Zi Luo. “Little Zi, why don’t you go up there? It seems that the outside world is quite attractive...”

The corners of Zi Luo’s mouth curled up. “I’m still young. I can still live for a long time. Besides, I can cultivate a reincarnation body. There’s no rush... Just as the Blood King said, he can already tear the cage apart. Then I’m afraid it won’t last long. Huh? Why don’t you follow him?”

The bamboo branch on the Sea Bamboo man’s body trembled. “The Blood King is from the same era as me. I’ve seen him fight a few times in my life. The last time was when he fought a Half-King.”

Zi Luo shook her head. “I haven’t seen it. I heard that it happened more than thirty thousand years ago

The Sea Bamboo man nodded slightly. "I was there and watched that battle with my own eyes. At that time, the Blood King was still in the Half-King realm. When he fought the wolf beastman, he killed his enemy with one blow. That battle established his position as the strongest. After that, he accumulated thousands of years and wanted to become a king... However, as you know, although he failed, he didn't die."

Zi Luo nodded. "I know. From then on, he stopped participating in the battle and focused on studying the seal of the cage until he finally left..."

The sea bamboo man nodded slightly. "Yes, this person is very good at enduring. Once he decides to do something, he must have been 80% sure. I vaguely remember that during the tribulation, he was extremely conceited and passed eight lightning strikes in a row. Everyone thought that he would be the first in the cage to become a king. However, the last lightning... didn't come."

"Huh?"

Zi Luo asked in shock, "It didn't come?"

The sea bamboo man: "Few people know about this. But it's exactly because of this that many demonic plants understand that it's impossible to become a king in the cage. Therefore, when the Blood King was studying the cage, no one ever disturbed him..."

Zi Luo said in shock, "So now... Huh... Do you mean that he is going to become a king?"

The sea bamboo man said leisurely, "That's what I'm confused about. If there is a king in the outside world, would he really share the world with him? Besides, the appearance of the Million Poison Urchin was too abrupt and he didn't speak much. I think there must be something wrong about it."

On the other side.

Han Fei attached himself to the Big Snake Vine and the 36 Venerables passed through the void.

This void channel was actually not short. Tens of millions of void cracks swept across, and all Venerable unleashed their powers. The power of their Great Daos was almost fully unleashed, and they were almost burning their vitalities.

In the end, when their strength was almost exhausted, the crack on the opposite side finally opened.

Buzz!

36 Venerables instantly shot out of the crack at the same time.

"Haha, are we finally out? Have we finally left the cage?"

"Where is this?"

"No! This is not the outside world we saw. Why are there so many undying souls here?"

"Damn it. What the hell is this place? Why is there no spiritual energy and energy at all?"

"Not good! The Blood King tricked us! Go back..."

However, when they looked back, they found nothing.

The Poisonous Dragon Urchin immediately roared, "Blood King, what's the meaning of this? Although we don't know each other well, there's no need for you to set us up. Let's be honest."

"Heh! A bunch of idiots."

Red leaves fluttered in the void, and a handsome man stood proudly in the void with a mocking expression. "If you had come out with me immediately, I might have chosen a few subordinates. However, you have a deep grudge against me... I don't trust you. Why don't you all become my tribulation

nutritions?"

Swish! Swish! Swish!

Crack ~

The void shattered as a large number of Blood Sea Divine Wood extended out of the void and buckled at these people.

After the tearing of the endless void crack, everyone's strength plummeted at this moment. In an instant, five people were pierced.

The five Venerables intended to blow themselves up and revive themselves with blood rebirth.

But at that moment, the Blood King's lips curled. "Parasitic Technique."

Five masses of blood mist enshrouded the five of them, Immediately afterwards, their bodies exploded. However, it was just an explosion, not a self-destruction. None of them succeeded in self-destruction.

The Poisonous Dragon Urchin roared in horror, "No, it's those space cracks. There's something wrong with those space cracks. Did you cause them?"

The Blood King smiled. "Oh, you finally found it? It's too late. Parasitic abilities are just the most basic ability of our demon plants. However, the more basic the thing is, the less people want to study it... You don't know how to think at all and don't pursue the true essence behind simple things... Tsk, tsk,

but I do... So, let me show you what a real parasitic technique is... Let me show you how terrifying this path is..."

"Hahaha!"

The Blood King laughed aloud.

The temperature of the entire space began to rise rapidly. The sky began to burn, and red leaves flew all over the sky. Even the Poisonous Dragon Urchin, a dignified Half-King, blushed red.

The Blood King laughed crazily. "Let me show you that wherever there is temperature, there is a parasite. The temperature can breed everything..."

Han Fei wanted to leave the Big Snake Vine and let the dust scatter to the sea. However, like others, he was also possessed.

Han Fei felt that a strange vitality was erupting in his black-mist body, and a power was corrupting his power and soul!

Yes, corruption, or the parasitism that the Blood King mentioned.

However, maybe he wasn't targeting Han Fei, or maybe he underestimated Han Fei. The moment the power invaded the black mist, it was immediately swallowed by Little Black.

Little Black and Little White's characteristics were that they could swallow everything.

Therefore, the weird power was immediately swallowed by Han Fei the moment it penetrated the black mist.

"Huh?"

'When all the Venerables were possessed and their bodies collapsed uncontrollably, the Blood King suddenly looked at where the Big Snake Vine was.

Swish ~

Whip shadow lashed out, and the void collapsed.

Seeing that the Blood King was attacking him, the Big Snake Vine immediately drilled into the void. "Old b \* stard, just like I guessed, you're up to no good."

Bang!

Even advanced Venerables were shattered by the Blood King's whip.

Before the flesh and blood of Big Snake Vine entered the void, the roots chased over and pulled out a soul from the flesh.

The Blood King chuckled. "Everyone, now you can choose to surrender to me or die."

At the moment when the Blood King laughed, Poisonous Dragon Urchin burst out, and the tree warts on his body exploded.

The dark green liquid drilled through the void.

With a swish, wherever the venom flowed, the roots were melted. The Blood King's parasitic ability seemed to be broken.

The Blood King didn't pay attention to Poisonous Dragon Urchin. Instead, he said disdainfully, "It's nothing."

The Blood King looked at Poisonous Dragon Urchin, and his eyes flashed red.

With a bang, the head of Poisonous Dragon Urchin exploded. His flesh and blood were blurred, and a lot of red roots spurted out of his body.

Immediately afterward, a void whip returned with a wisp of soul.

Han Fei could even see the ferocious face and howling of Poisonous Dragon Urchin.

Under Han Fei's shocked gaze, the old turtle said, "These people aren't dead. Their souls are still there. However, they lost the ability to revive with blood. Otherwise, in such a short time, the sky would have cried..."

As the old turtle spoke, a soul voice echoed in the void. Poisonous Dragon Urchin roared, "Blood King, you can corrode souls. Don't you know that I can corrode souls too? Submit my body to the Million Poison Mystic Spell ~"

Bang!

At that moment, within a thousand kilometers, the void was full of holes, and a large area of poisonous mist seeped out.

'The Blood King snorted. "You're asking for it. Fool, can't I parasitize your poison?"

Immediately afterward, billions of roots descended in the poisonous mist.

As the roots withered, the poisonous mist was quickly dissipating. After only a minute, there were no poisons left.

Boom!

In the sky, the Great Dao rumbled, and a rain of blood poured down.

Clearly, the first person to die among these Venerables was the strongest one among these demon plant Venerables. A powerful Half-King was like a cripple in the hands of the Blood King.

At that moment, these demon plants realized how powerful the Blood King was!

Sure enough, they had no right to doubt a powerhouse who could become a fake king.

Immediately, someone shouted, "Blood King, I'm willing to surrender."

As soon as one of them surrendered, the others immediately rushed forward.

"King, I surrender."

"Lord Blood King, I'm always convinced by you..."

The Blood King's handsome face revealed an evil glint.

Only Han Fei saw it clearly. These people were stupid... He said you could surrender, but he didn't say he would let you go!

The souls of the people just now had been extracted by this guy. Why didn't you resist? Did you want to be possessed?

'As expected, the Blood King looked down at everyone. After pondering for three or five seconds, he suddenly grinned and said, "Oh! Then surrender your souls!"

Immediately, a peak-level Venerable roared, "Blood King, you scum! I'd rather die than surrender..."

"Hahaha..."

'The Blood King laughed like a lunatic and took a deep breath. "

ie? Do you think you can die without my permission?"

The Venerables: "..."

### **Chapter 1615: Whose Origin Sea**

Before, Han Fei didn't know that a fake king could be so powerful. Although Han Fei had never confronted a fake king, he had interacted with the golden boy and watched their battles.

Han Fei was dumbfounded by the Blood King's combat power. The Black Evil Conch King, the golden boy, and the guy from the Demon Beast Union were nothing in front of him.

However, Han Fei was very sure that this person, the Blood King who appeared here, wasn't a king.

The old turtle couldn't help but say, "This person is very talented and very strong, Not only is he good at parasitism, but he also seems to know a thing or two about space."

Han Fei thought to himself, This is the first fake king I've seen who can defeat 36 Venerables alone. He killed a Half-King in two blows!

The old turtle said, "You don't have to overestimate him. After all, he had planned early. These Venerables' combat power was all consumed on breaking through the cage. This person waited for his enemy to come and set up a trap in advance, so these people had no way out."

Because of the delay, half of the Venerables on the field were completely possessed. Those who could still resist were whipped by the void roots and couldn't resist for long.

Click, click, click ~

The Blood King extended his hand, and a golden black umbrella appeared in his hand.

The big umbrella opened with a swish, and there were actually three layers inside and outside the umbrella. Each layer had 33 ribs, totaling 99 ribs.

At the end of each rib hung a small bell.

At this moment, these small bells were all shining.

swish! Swish! Swish.

The big black umbrella began to spin, and the Venerable-level souls enslaved by the Blood King were sucked into the umbrella.

Whoosh!

The black umbrella closed, and the Blood King held the umbrella's handle. He looked at the world proudly with a smile.

The roots dragged the demon plant bodies whose souls were taken away into the void.

The Blood King smiled faintly. "Although I don't know who you are, you can easily sever my parasitic ability. I didn't expect you to come, but since you're here, I'm not an unreasonable person. I'll give you a choice. Hand over the Earth Vein Spring Water and I'll allow you to be the first general under me."

Han Fei felt like slapping this guy's face. What the hell? I'm the Ninth Heavenly Lord, a high-level existence who controls the Yin-Yang World. Become your subordinate? Are you out of your mind?

The old turtle reminded him, "Don't be stupid. He's waiting for you to get out. This is his little world. Don't fight him head-on."

Han Fei said, "Don't worry. I'm not an idiot."

The Blood King's perception swept across the world again and again.

However, with his ability, he couldn't examine every grain of sand in this world in such a short time. Therefore, after trying a dozen times but failing, the Blood King gave up.

He said, "I have to admit that your stealth ability is extraordinary. However, it doesn't matter! There is no energy or spiritual energy here. I won't leave any of the corpses of these demon plant Venerables to you. Since you don't want to come out, just stay in this world."

With that said, a large number of roots extended out of the void behind the Blood King and dragged him out.

Han Fei was relieved when the old turtle said that there was no threat.

However, Han Fei immediately went to Forge the Universe.

Forge the Universe.

"Shoot! Old Yuan, are demonic plants so powerful?"

The old turtle said leisurely, "What do you think? They are one of the rare races... that can live many times longer than the turtle race... In the Age of the Gods, there has never been a shortage of them. Very few of them can be the strongest, but they are definitely not weak. There are even some places where demonic plants become unparalleled existences. Even the kings of the heavens have to treat them well."

"Gulp ~"

Han Fei remembered the first lesson that the Water Immortal taught him, which was to never underestimate any demonic plant.

Han Fei sweated. He had never paid attention to this problem before. Even when he saw the Sea of Clouds Divine Tree with his own eyes, he felt that they were just unusually tall. In fact, they couldn't transform into humans, so they shouldn't be so powerful.

But now it seemed that he was completely wrong.

Han Fei: "The umbrella he used swallowed so many Venerable souls. It must be a powerful treasure."

The old turtle said, "Actually, I've seen such treasures."

“on?”

The old turtle said unhurriedly, “Although they’re different and have different effects, at least one of them is certain... Every umbrella-type treasure has extremely strong defense power. The strongest king I’ve ever seen is called the Umbrella King, With an umbrella, he can cross the sea. That umbrella has many functions. It can block souls, defense power, break the Great Dao of space, the Great Dao of time, the Great Dao of Gravity... I have no chance of winning against him.”

Han Fei:

Hearing the old turtle’s words, Han Fei was frustrated.

However, the umbrella did look extraordinary. Otherwise, how could it casually collect so many souls?

Han Fei snorted. “The Blood King is extremely arrogant. I’ve destroyed one of his clones. How dare he not take me seriously? Son of ab \* tch...”

Han Fei stayed in Forge the Universe for half a month, which was equivalent to a day in the outside world.

Han Fei’s purpose was to wait for the ruler to recover. However, he couldn’t just waste his time in Forge the Universe.

‘Therefore, Han Fei deduced the “Grand Desolate Body Technique’ that he had mastered.

However, the deduction results surprised Han Fei.

“Ancient Desolate War Body” (Venerable Level, Divine Quality)

Remarks: This is an ancient technique that was once popular in the primordial age. It can draw the murderous aura of the heavens and earth and absorb other people’s fighting intent, ruthless Qi, and murderous aura. It can grow in battle, make a breakthrough in battle, and be perfect in battle. If you practice this technique, you should have an invincible and fearless heart. This technique can nurture battle intent and help you make a breakthrough when your fighting intent is the strongest.

Disadvantage: The user will be crazy in battle.

Deduction Technique: Unknown

Deduction Cost: 10 wisps of Chaos Energy

This deduction cost a lot, much more than the “Grand Desolate Body Technique”.

Han Fei had finally deduced an ultimate technique since he got the 108 Spirit- Absorbing War Bodies.

Although Han Fei didn’t finish deducing this body refining technique, the structure of this body refining technique had changed. It had changed from a pure body refining technique to a battle technique.

Han Fei studied it for half a month and found that the most powerful part of this technique was to nurture battle intent.

If he could replenish his fighting will, his combat power would double, and he would fight harder and harder until he was exhausted and couldn't fight anymore.

But the problem was the battle intent.

'The most rustic way was to use time to nurture battle intent.

There was another seemingly smart method, which was to follow one's heart and nurture battle intent... This method was a bit mysterious. Han Fei pondered for a moment and continued to read.

To practice this technique, one needed to cultivate combat awareness, take the initiative to challenge, and attack.

Han Fei even saw the most ridiculous way: to be beaten. The more you were beaten, the faster your fighting intent would accumulate.

"Huh."

Han Fei took a breath. He understood every word, but he couldn't use the technique.

'When it was time, Han Fei measured it with the Nine Palace Luck Ruler. It was "Flat'. Han Fei left Forge the Universe with confidence.

No matter how reassured he was, Han Fei was still cautious. He said, "Old Yuan, do you feel any danger?"

The old turtle: "No, the Blood King seems to have left."

After the old turtle said that, Han Fei's perception immediately scanned the world.

"Hun —"

Han Fei was stunned. "Is this... the Grand Myriad Mountains?"

"Huh?"

The old turtle looked puzzled.

However, Han Fei quickly appeared on a mountain.

Han Fei stood on the top of the mountain and thought to himself, Sure enough, this is the Grand Myriad Mountains. The space in the Thousand Mountain Ancient Realm is only a part of it. And this part of the world is the area where the Beast King Valley used to be. Han Fei was too familiar with this

place. Back then, he pretended to be a beast, thinking about how to escape from the pursuit of Ape Six and the others and escape from the Beast King Valley... In terms of the Grand Myriad Mountains, this was the place Han Fei was most familiar with!

Han Fei immediately scanned around with his perception. There were more than 6,000 mountains here, but there were no creatures or plants.

Han Fei walked among the mountains, chilled. The seabed was full of various corpses and fossils, and the mountains were inlaid with a large number of withered demonic plants.

After searching for a long time, Han Fei didn't find any goods, and his eyes turned cold. Since the Thousand Mountain Ancient Realm had survived to this day, this place should be able to do it too! In the Thousand Mountain Ancient Realm, various demon plants were still contributing vitality to the Water Immortals!

Han Fei gnashed his teeth and said, "Great! What a great Blood King! I'm gonna kill you!"

Han Fei asked, "Old Yuan, what can I do to subdue this place?"

The old turtle said leisurely, "For the time being, I'm afraid you don't have the ability to subdue such a big place. Logically speaking, there are ways to turn an area into a small world. Either that a powerhouses put this world into his own Origin Sea, or that there is a huge storage space like the Sun-Moon

Star Shell. But... It's impossible to store such a big place even if it's a Star Shell. Therefore, it's either a Sky Swallowing Shell or a powerhouse's Origins Sea. I can only give these two methods..."

Han Fei said with a black face, "I mean, how do I subdue it?"

The old turtle chuckled. "If this world is in a Sky Swallowing Seashell, you just need to find the shell. But if the Blood King has a Sky Swallowing Seashell, he can sense you at any time... Therefore, this can't be in the Sky Swallowing Seashell.. Therefore, this is very likely the Origin Sea of a certain

powerhouse!"

### **Chapter 1616: I'm Waiting for You**

Han Fei was stunned at the old turtle's conjecture. He asked stupidly, "You mean... a king-level powerhouset put this world into his own Origin Sea?"

The old turtle said, "Maybe it was not a king, There are more than 6,000 mountains here. Even my Origin Sea can't contain them. Does Water-Wood World have an emperor realm expert? If it did, the Water-Wood World must have a lot of resources. The Blood King didn't have to waste so much effort to transcend the tribulation... He could've easily swept through the White Shell Royal City and the Sea Cloud Divine Tree."

Han Fei took a deep breath. "So, this space shouldn't be the Origin Sea of a certain expert?"

The old turtle said, "Not theoretically, but accidents happen occasionally. After all, this world is full of wonders. Just like your little calabash, it has infinite magical effects. Who can explain it?"

Han Fei said, "In any case, I have to find a way to get out. Just as the Blood King said, if I'm trapped here, how can I ruin his plan?"

Han Fei grabbed the Vast Ocean Navigator and swam among the mountains. In the end, Han Fei came to a mountain that he was familiar with.

"Huh? Here?"

Han Fei stood on this protruding mountain for a long time.

It was here that the Giant King sealed himself in a huge rock and taught him the Swallowing Technique to attract the Sun Essence Fire.

Later, he used it to cultivate the Indestructible Body. It was so hot that he felt like he was bathing in magma.

This place was not far from the war giants, not far from the mountain where Tianging was, and not far from the Beast King Valley.

Han Fei looked at the Vast Ocean Navigator in his hand, only to see that its needle was shaking.

With a thought, Han Fei reached out and drew his knife, tearing the void.

The next moment, Han Fei stepped into the void.

A white light source seemed to be waiting there.

Because the Nine Palace Luck Ruler's divination result was Flat, Han Fei thought this was just a loophole in space and entered it without hesitation.

As a result, Han Fei appeared in another dark world.

When Han Fei took a closer look, he saw that this place was only less than a thousand square meters, surrounded by red things, as if... He was trapped in a sealed wood space.

Before Han Fei could study this place, a voice said, "I've been waiting for you for a long time..."

"Who?"

Han Fei was shocked and felt that his blood was freezing, Wasn't it a "Flat"? Wasn't it a loophole in space? Why was he discovered the moment he came out?

The old turtle said in surprise, "My perception has been blocked. The person is very strong. He's probably a king-level expert."

"Peck!"

Han Fei immediately thought of the person in the Blood Sea Divine Wood City, which was the reincarnation of the Blood King that Han Fei and the old turtle guessed.

Therefore, in an instant, as if facing a great enemy, Han Fei pushed the power of his Great Dao to the extreme without hesitation. Once he couldn't beat it, he was prepared to stay in Forge the Universe.

However, in the darkness, a weird person with a human body, a sheep head, and a fox tail slowly walked out.

Han Fei was dumbfounded when he saw him.

"Divine Son?"

Han Fei couldn't be mistaken. This person had two horns on his head, and his hair, eyebrows, and beard were very long, but he looked extremely young.

On his shoulders, bone spurs protruded from his flesh, like two small wings in front of him. A pair of gray wings was folded behind his back, and his long tail was casually dragged on the ground.

This was exactly the same as the divine son he had seen.

Oh, no. Something was different.

Back then, the divine son had flesh and blood, but this divine son's body was a plant. This person he saw was transformed from a demon plant.

Han Fei immediately narrowed his eyes and said, "You're not the divine son. Who are you?"

The divine son said indifferently, "My path is severed. Therefore, I have no hope of becoming a king, But when the beast king transcended the tribulation and the Giant King and Tianging died on the spot, I burned my divine heritage and stopped the king... In the end, my divine heritage was exhausted. I

abandoned my divine heritage and reopened my path, walking on the demon plant path. After cultivating for sixty thousand years, I absorbed the essence of the world and finally became a king."

The divine son casually explained the whole story with a few words.

If Han Fei had only heard this description for the first time, he might have suspected him, However, this was the second time he heard it. The first time was when the Water Immortal told him.

Back then, the Water Immortal told him that the Divine Son stopped the king alone and went missing, Han Fei remembered these words clearly.

Han Fei narrowed his eyes. "Who am I?"

"Wang Han."

At this moment, Han Fei was in the black-mist form.

It was impossible for ordinary people to discover him, such as the Blood King. Even if the divine son became a king, how could he see through Han Fei?

Han Fei asked, "How did you know it was me?"

The divine son said, "Because the place you came from has the aura you left behind."

The corners of Han Fei's mouth twitched.

's been so long. Can it still exist?"

The divine son said, "Yes, once it has existed, it can never be erased. As long as it has existed, you can find it in time."

Han Fei narrowed his eyes and said, "Is your path related to time?"

"Yes and no. I've walked several Great Daos, and the Great Dao of Time is only one of them. However, this path is extremely difficult to follow. What I can do is to find a trace of historical residues from the gaps in history."

"Then do you know what happened after you transformed into a demon plant?"

The divine son shook his head. "When I woke up, it was already thousands of years later. As a tree, I used 20,000 years to cultivate consciousness, 30,000 years to restore my memories, 50,000 years to return to the peak of my strength, and 60,000 years to become a king."

"A tree?"

"Hiss ~"

Han Fei's eyelids twitched, and he said in shock, "Don't tell me you are Blood Sea Divine Wood? My little heart can't take this blow."

However, the divine son slightly nodded. "Congratulations, you guessed right."

Han Fei:

Han Fei was shocked. "What?! ... Then, if you are the Blood Sea Divine Wood, what about the Blood King? What about the infinite Millennium Snappers in the Blood Sea Divine Wood City and the dense forest of Big Red Trunk?"

The questions popped up in Han Fei's head one after another.

'What kind of joke was this? The divine son turned into the Blood Sea Divine Wood? How could he believe such a ridiculous thing?

The divine son said, "Don't be hasty. There's still a lot of time. I can slowly answer your questions."

The divine son waved his hand, and a table and wine cup appeared in front of him. In the cup, there was the Earth Vein Spring that Han Fei had just snatched, which seemed to be deliberately shown to Han Fei.

The divine son said, "First of all, ask the question you want to ask the most."

Han Fei was about to open his mouth, but then he stopped and asked, "Why can your Origin Sea accommodate such a huge area?"

The divine son smiled and said, "Because I have a divine nature. Even if I abandon my divine heritage, it doesn't mean I don't have anything."

The old turtle said in shock, "In that case, I have nothing to say. If he is really the son of a god, it doesn't seem difficult for him to have an Origin Sea to accommodate more than 6,000 mountains."

The divine son still smiled. "You're right and wrong. Being the son of a god... doesn't mean I'll definitely have such a big Origin Sea. My Origin Sea is big because I'm swallowing more and more energy and spiritual energy and my cultivation path deviated from its original direction. Just like the Sea Cloud

Divine Tree, his Origin energy is definitely not small either."

Han Fei's eyes widened, and the old turtle exclaimed, "He can hear me? His soul is comparable to that of an emperor."

The divine son shook his head again. "It's not that my soul is comparable to an emperor's, but you are too weak. Your soul is not complete. Even if your realm is high, it's still incomplete."

Han Fei rolled his eyes and said, "Okay, let's not talk about that. May I continue?"

“Um!”

The divine son drank a cup of Earth Vein Spring and waited for Han Fei’s question calmly.

Han Fei immediately asked, “Does the Blood King have a reincarnation body?”

“Yes.”

Han Fei asked, “Is that reincarnation going to transcend the tribulation?”

“Yes.”

Han Fei asked, “Are you helping him?”

“Yes.”

“why?”

The divine son looked at Han Fei seriously. “Because I was possessed by him.”

“Huh?”

Han Fei was stunned. What do you mean you were possessed by him? You’re a king, but you’re possessed by a Half-King? Are you kidding me?

The divine son knew that Han Fei was puzzled, so he said slowly, “The reincarnation of the Blood King is named Xue Fan. It appeared here thirty thousand years ago. I had already become a king, but the White Armored Emperor and Mu Wuhua hadn’t yet.”

When Xue Fan was sent in, he was already dying. I saw that his demonic heritage was extraordinary, so I took him in. His original body was the Big Red Trunk you saw. He was the strongest genius of this race. In only a thousand years, he had cultivated to the Half-King realm.

Until Xue Fan grew up to be a Half-King, his temperament was not bad and he had always been gentle.

‘When he was about to pass the king-level tribulation, however, the White Armor Emperor and Mu Wuhua had passed the king-level tribulation one after another. When it was his turn, the heavenly tribulation didn’t come. The spiritual energy and energy here were no longer enough to support him to become a king

Gradually, his heart began to twist. He intended to win himself a chance to become a king through other means.

Therefore, he chose to bear fruit... The fruit was called the Red Ball.

### **Chapter 1617: The Blood King Is About to Transcend the Tribulation**

As the Divine Son, who was now the Blood Sea Divine Wood, talked about what happened to him these years, Han Fei completely believed that the Blood Sea Divine Wood was the Divine Son.

In his heart, Han Fei even tried using the Vast Ocean Navigator. The Vast Ocean Navigator was indeed... pointing at this wooden sculpture-like divine son.

According to the Divine Son's description, the Blood King wasn't a bad person in the past.

However, he was too proud. His pride made it impossible for him to accept the fact that he couldn't become a king!

Therefore, he became brutal and began to scheme.

He believed that the energy in the world was completely enough for him to become a king. Besides absorbing enough natural energy, the White Armor Emperor and Queen Life must have also absorbed a lot of Chaotic Qi. Apart from the Chaotic Qi, the two of them had the same characteristics. They were both leaders of a race

Therefore, he, Xue Fan, wanted to become the leader of a race too.

Therefore, he created a race alone, which was the Millennium Snappers.

Even though these Millennium Snappers were transformed from other creatures... after the transformation, they became his clansmen.

Only when they believed in him would they be given more and become stronger.

Xue Fan knew that he couldn't afford to fail in this tribulation. Therefore, he chose to re-cultivate for the second time. Yes, this guy had completely abandoned his Half-King power and re-cultivated from scratch.

However, this re-cultivation wasn't a casual one.

He knew that there was a limit to what he could do in Water-Wood World, even if he had found all the resources for himself.

However, he was still worried!

At this point, he found that there was always a strong master around him that had become a king ahead of the White Armor Emperor and the Life King, which was Blood Sea Divine Wood

Therefore, Xue Fan began to scheme against the Blood Sea Divine Wood.

Han Fei could understand it: in the Grand Myriad Mountains, most people were simple-minded.

In addition to creating the red pills, Xue Fan only wanted to become stronger.

As for the Divine Son, he had always been proud and noble. Most of the time, he regarded himself as a god. How could a god think of interfering or killing humans?

After all, Xue Fan hadn't become a king yet!

Everyone below the king realm was an ant. This was not nonsense. If the divine son wanted to kill Xue Fan back then, it was impossible for Xue Fan to survive.

But it was precisely because of the divine son's attitude that Xue Fan had a chance.

He spread the branches and leaves with his own body and planted new seeds, claiming that he wanted to guard the Blood Sea Divine Wood and build a country here. Since then, Xue Fan had been secretly studying the way of parasitism.

It took him more than twenty thousand years to quietly change the temperature around the Blood Sea Divine Wood bit by bit. And what really made the Blood King's Parasitic Technique succeed was when the White Armor Emperor and Mu Wuhua joined forces to attack the Blood Sea Divine Wood City.

At that time, it wasn't Xue Fan but the divine son who was fighting the two of them. And when the divine son was fighting, Xue Fan took this chance to activate the parasitic technique that he had been preparing for 20,000 years!

According to the divine son, the attack on the Blood Sea Divine Wood City by the White Armor Emperor and Mu Wuhua might be caused by Xue Fan too. For that day, Xue Fan had waited 20,000 years.

'When the Divine Son finished telling him everything, Han Fei was shocked. This guy was definitely a tough guy! Xue Fan was really an inspirational evil demon. Not many people could compete with him in evilness.

This guy was completely heartless!

The divine son had helped him a lot, but in the end, he was possessed by him.

Han Fei took a deep breath. "So now... does he have your power?"

The divine son shook his head. "Yes and no. When he parasitized me, he wasn't a king after all. I retained part of my origin. If he doesn't become a king, he won't be able to find me. I did leave a few trump cards, but he has already broken two of them."

Han Fei's eyes widened. "He could even find your trump cards?"

The divine son said leisurely, "The moment he activated the Parasitic Technique, I was fighting the White Armor Emperor and Mu Wuhua. Between the two, I established a connection with Mu Wuhua. Later, I used the power of the ground veins to communicate with Mu Wuhua. However, Xue Fan was also a demon plant. He quickly discovered that something was wrong with the ground veins. Therefore, he planted a lot of Big Red Trunks. So far, hundreds of thousands of kilometers around me are under his control."

Han Fei asked, "What about your last resort?"

A trace of anger appeared in the eyes of the divine son. "That was my Origin Sea. Because I tried to send demonic plants to Mu Wuhua, Xue Fan tracked them down and infiltrated the Origin Sea, causing almost all the demonic plants and ordinary demonic beasts here to die. That time, I consumed a portion of my Origin Energy and seriously injured him. But because I couldn't use much power, that portion of my Origin Energy was also swallowed by him."

Han Fei listened to all of this as if he were listening to a heavenly book. The battle between a Half-King and a King for tens of thousands of years was really intriguing.

The divine son looked at Han Fei. "When I found that I couldn't stop him anymore, I stopped exposing myself and waited for you..."

"Oh? You knew I would appear?"

The divine son said, "When Mu Wuhua discussed countermeasures with me, she once mentioned a place called Yin-Yang World, where the islands are floating. You should know that not long after you left the Age of Doom... the secret of the Floating Stones was discovered. This made us realize the arrival of a new era. And you should have been born in that new era... Therefore, I'm waiting for you."

Although the divine son said it lightly, Han Fei felt that the divine son should be panicking. Because he came too late, he didn't come until Xue Fan was about to transcend the tribulation.

Besides, he came here by accident.

It could be imagined that with Xue Fan's personality, once he became a king, if he had enough strength, the first he would take down would be the Blood Sea Divine Wood, which was the divine son.

Only then could he consolidate his position.

It was easy to imagine how strong Xue Fan would be if he could swallow the power of a king.

The old turtle couldn't help but sigh. "This person is really evil. He has perseverance, boldness, strategy, and courage... If he succeeds, his achievements won't be low. If he becomes a king, the Water-Wood World and Yin-Yang World will be his sooner or later."

Han Fei remembered that the Blood Sea Divine Wood City never participated in the battles between the White Shell Royal City and the Water-Wood World. Only then did he understand that it wasn't that Xue Fan didn't want to fight, but that he wanted the greater world. As the saying went, the calm before the storm! Only those who survived to the end were the kings. This saying was really apt when used on Xue Fan.

Han Fei took a deep breath. "Then what should I do now?"

The divine son said, "You should have a small independent world of your own, right? Otherwise, you wouldn't be able to completely disappear from my Origin Sea. I can't even find where you are. Also, if you weren't in my Origin Sea, I might not have been able to find you."

Han Fei asked, "Will Xue Fan find me?"

The divine son shook his head. "Although he can parasitize me, he's not me after all. He can forcibly make some choices for me, but he can't sense my feelings. In short, he hasn't become a king yet, and the path of parasitism hasn't reached a higher level. Once he becomes a king, he might completely devour my soul and turn me into his avatar."

"Son of ab \* tch!"

Han Fei mumbled, thinking, Xue Fan's scheme was almost perfect.

Han Fei asked, "Then where are we now?"

“In my absolute domain. This is the only place that Xue Fan hasn’t discovered yet.”

Han Fei was relieved. “That’s good! What are you going to do?”

The divine son smiled. “What I can do now is very limited. However, I can forcibly take back control of my body in a short time. However, this won’t last long. And once I do this, my domain will be discovered...”

Han Fei narrowed his eyes and said, “Master Divine Son, where are his resources? Tell me where they are, and I’ll steal all his belongings.”

The divine son glanced at Han Fei and said leisurely, “Since the moment you ruined his plan in the cage down below a few months ago, all his resources have been carried with him. He didn’t put any of them outside...”

Han Fei:

“So cautious?”

Han Fei was lost for words.

However, he could understand it. A man who had planned for tens of thousands of years for the tribulation wouldn’t let his plan go to waste for such a trivial matter.

Han Fei asked, “When is he going to transcend the tribulation? Or how is he going to do it?”

In this so-called absolute domain, Han Fei chatted with the divine son for a long time.

In fact, what the divine sons could do was indeed limited, but he knew a lot of information.

From the beginning to the end, the divine son never mentioned the Water Immortal, nor did Han Fei. Although it was very likely that the divine son also knew that the Water Immortal was related to Mu Wuhua.

‘What Han Fei was worried about was that if things didn’t work out, he couldn’t let Xue Fan know these secrets through the divine son... So, why would he mention the Water Immortal?’

Half a day later.

When Han Fei quietly left the so-called absolute domain, he had already quietly appeared in the Blood Sea Divine Wood City.

However, what he saw was a prosperous scene.

Han Fei discovered that it turned out to be a country where human beings lived. No, to be precise, it was a country where the human beings transformed from Millennium Snappers lived.

More importantly, they were all women, not a single man. Their clothes... Han Fei couldn’t bear to look at them.

“F\*ck... See no evil! All pink skeletons, all skeletons...”

**Chapter 1618: Fish Dragon King and Yang Ruoyun**

The divine son was still alive. Although he had turned into a tree, this still made Han Fei very happy.

However, Han Fei wasn't quite sure about Xue Fan's tribulation.

Han Fei's first thought was that he'd better win the White Armor Emperor and Queen Life's support. As for how to contact the White Armor Emperor, it was none of his business. Anyway, he had to inform Queen Life.

Although they would definitely know when Xue Fan transcended the tribulation.

However, knowing it in advance and knowing it passively were two different things!

Secondly, the divine son told him that the big umbrella in Xue Fan's hand had more than 300 souls of Venerable-level powerhouses. That umbrella was used to resist heavenly tribulations. According to the divine son's estimation, that thing could withstand three heavenly tribulations.

Han Fei couldn't have felt worse. It was obvious that Xue Fan didn't just transcend six tribulations, but nine. However, it was incredible that a weapon could block three tribulations.

In fact, Han Fei was really impressed by Xue Fan's ruthlessness.

In the Blood Sea Divine Wood City, over the past tens of thousands of years, more than 300 Venerables had been secretly swallowed by Xue Fan. Those Venerables were all raised by that guy. In the end, they all became his leek!

Furthermore, Xue Fan had found various reasons to transfer these people away when he devoured them, it could be said that most of the people in the Blood Sea Divine Wood City believed in him and didn't doubt him at all.

It could be seen how insidious and cunning the Blood World was!

In fact, this was the first time Han Fei had seen an evil king. He was much stronger than the kind of king who only knew how to fight such as the White Armor Emperor.

Han Fei appeared at the core of the Blood Sea Divine Wood, which was in the middle of the seawater and the seabed. There were tall Big Red Trunks growing around, and many of them were entwined with the Blood Sea Divine Wood.

People living here were mostly explorers.

According to the divine son, Xue Fan had deliberately set such strict living standards. Venerables had their own residences, and explorers had their own.

Ye Long, a peak-level junior explorer, was about to become an intermediate explorer. Because of her extraordinary talent and outstanding combat ability, she became a heavenly talent among junior explorers.

Ye Long loved fighting and had been out for fighting a few times in the past few years.

Her methods were getting more and more extraordinary. After her talent as a Heavenly Talent was discovered, she participated in seven big hunts in a row, winning all the battles...

At this moment, Ye Long was on the way home.

Many people greeted her.

Someone grinned. "Master Ye Long, have you returned from cultivation?"

Ye Long replied casually, "Yes!"

Someone said, "Sister Long, when are you going to take me to the battlefield? I heard that only there we can grow quickly."

Ye Long's expression remained unchanged. "Soon."

Someone extended a slender hand and slid it across Ye Long's waist. With watery eyes, she said, "Long'er, come to my home tonight. I have some cultivation experience to discuss with you!"

Ye Long frowned slightly, a little unhappy, and snorted softly to express her annoyance.

She circumvented these people and quickly found a tree trunk. Then she opened the seal and got in.

"Huff!"

Ye Long's brows relaxed.

Although she had lived here for a long time, she still couldn't accept the lewd lesbian life in the Blood Sea Divine Wood City.

She couldn't remember... how many times she had been dragged to someone else's cave.

Just as Ye Long was about to focus on cultivation, a voice suddenly sounded in her mind. "Fish Dragon King, it seems that you are doing well in the Blood Sea Divine Wood City!"

Buzz!

The Fish Dragon King's body trembled, but in the end, he still stretched out and asked in a low voice, "How did you get in?"

Han Fei wasn't afraid that Xue Fan would find out. Although he already knew that all the Millennium Snappers were possessed by Xue Fan, so what?

Parasitizing them didn't mean that he could completely know all the senses and thoughts of the Millennium Snappers.

The more people there were, the messier the words and thoughts would be. In order not to affect the normal life and cultivation of the Millennium Snappers, the parasitic power wouldn't be activated.

Besides, the barrier of the old turtle's soul and the Nine Palace Luck Ruler ensured his safety.

Han Fei said leisurely, "It doesn't matter how I got in. What matters is that you have something to do now."

'The Fish Dragon King's face kept changing and he thought to himself, I still can't get rid of Han Fei!

In the past few years, she changed her appearance and became a Heavenly Talent again, once again admired by countless people.

However, as soon as Han Fei appeared, she felt that everything was unrealistic.

'The Fish Dragon King asked, "What is it?"

Han Fei said, "Help me send something out of the Blood Sea Divine Wood City. After this matter is done, your mission will be completed. I won't come to you again... You'll be free."

'The Fish Dragon King was shocked. "Really?"

Han Fei chuckled. "Why? Are you reluctant?"

'The Fish Dragon King took a deep breath and said, "You spent so much effort to send me here just to make me send something out of the Blood Sea Divine Wood City?"

ASun-Moon Shell floated in front of the Fish Dragon King, and Han Fei said leisurely, "It's my business how hard I tried to get you in. You can choose to do it or not, and you can even give the thing I gave you to Xue Fan when you go out. It's your choice..."

'The Fish Dragon King was puzzled. "Who is Xue Fan?"

After a brief stun, Han Fei chuckled. "You don't even know the king of the Blood Sea Divine Wood City? You're too weak."

The Fish Dragon King's heart also sank. He had never seen the king of the Blood Sea Divine Wood City... How did Han Fei know? Also, how did Han Fei sneak in without being seen?

Of course, the Fish Dragon King knew that it was impossible for him to be Han Fei's opponent. Han Fei had long stopped treating explorers as his opponents. Now, he even dared to scheme against a king? What else could he not do?

Although the Fish Dragon King still hated Han Fei, he didn't dare to disobey him.

She said, "Are you sure... you'll let me go after this?"

'A pearl appeared. When the Fish Dragon King saw the blood pearl, his heart stirred. It was his essence blood.

Han Fei threw it to him casually.

Han Fei said, "You're too weak for me. You're no longer qualified to be my chess piece. I'll return your freedom to you.."

Gulp!

'The Fish Dragon King swallowed and his eyes became firmer. "To whom?"

A moment later, the Fish Dragon King left home, went to a small tree, knocked on it casually, and then a cute little fish head stuck out.

“sister Long?”

“Ya’er, do you want to go to the front line battlefield?”

‘The Fish Dragon King’s usefulness was limited.

Han Fei put a puppet corpse in the Sun-Moon Shell.

However, Han Fei implanted a wisp of his soul in this corpse. As long as the Fish Dragon King sent it out silently, he would have a way to leave.

‘What Han Fei was really looking for was not the Fish Dragon King.

‘The Fish Dragon King could only be a courier.

On the other side, at the edge of a tree city a little distance away from the Blood Sea Divine Wood, there was a circle of tall Big Red Trunks, where tens of millions of Millennium Snappers were cultivating.

In this city, various items and resources were on sale.

Usually, this was a market that would only appear in civilized society. For different races, especially a strange race like the Millennium Snappers, it was quite a surprise that such a place appeared!

Here, there was a big shop named “Idle Cloud Pawnshop.”

Boom ~

A person was thrown out of the pawn shop, which was a Millennium Snapper at the peak of the Law Enforcer level.

‘Then, a woman came out of the pawnshop and said coldly, “The pawnshop has its rules. Anything pawned can’t be redeemed beyond the time limit.”

The Millennium Snapper trembled in fury. “You damn alien transformed from human! Don’t let me find a chance! Otherwise, I won’t let you go.”

“Humph ~”

After that person left, a woman behind the woman at the door of the pawn shop said, “Ruoyun, there are still too few people on our side! Even if you’re already an intermediate explorer, you can’t spend all your time on our territory!”

Yang Ruoyun said casually, ‘I understand. When I become a Venerable, no one will cause trouble for us again.”

A moment later, Yang Ruoyun returned to the pawnshop, ready to cultivate behind the pawnshop so that she could take care of the territory.

Suddenly, a voice entered her mind.

“Thave a deal. It may be the biggest deal since you opened this pawn shop or even since you turned into a demon. Are you interested?”

“Who?”

Yang Ruoyun suddenly opened her eyes and looked around. There were barriers everywhere. Who could transmit a message to her?

Han Fei said leisurely, "Why? Have you forgotten me?"

"It's you?"

As early as the battle on the island, she knew that Han Fei's strength had completely overwhelmed her. However, Han Fei had given her many benefits, but she was confused and didn't know what Han Fei's purpose was.

At this moment, Han Fei's appearance was even a relief to her.

Yang Ruoyun's reaction was calmer than the Fish Dragon King.

She had made deals with Han Fei more than once.

In the past, it was she who tricked him, but now, she had been led by the nose by Han Fei.

Yang Ruoyun asked casually, "Where are you?"

Han Fei said, "It doesn't matter where I am... Let me ask you, are you going to make this deal or not? If you do, you'll have to swear an oath to your Great Dao!"

Yang Ruoyun's pupils were constricted.. "What deal?"

### **Chapter 1619: To Transcend the Tribulation (1)**

Han Fei didn't have much time to prepare. He had used up all his chess pieces.

He could only build the rest himself.

Originally, Han Fei estimated that Xue Fan wouldn't act so quickly...

After all, Xue Fan had just killed so many Demon Plant Venerables. He shouldn't be transcending the tribulation immediately. At least, he should refine what he had got, right?

However, on the third day, while Han Fei was wandering in the Blood Sea Divine Wood City.. Suddenly, Venerables were everywhere.

On the way, he saw many Millennium Snappers rushing back outside the Blood Sea Divine Wood City.

Then, a Venerable's voice echoed in the world. "A grand Venerable in the Blood Sea Divine Wood City is going to transcend the King's Tribulation. From today on, no one is allowed to enter or leave. Stop what you're doing and go into seclusion. As soon as the Heavenly Tribulation comes, spiritual energy will gather. This is a rare opportunity..."

In the Blood Sea City, all the Millennium Snappers below the Venerable level were shocked.

"What? The king's tribulation? Which grand Venerable is going to become a king?"

"What? Our Blood Sea Divine Wood City is going to welcome a third king?"

“Hiss! Come on, let’s go back and cultivate. We can’t miss such a great opportunity. Maybe today will be our day of breakthrough.”

Even if someone became a Venerable, it was extremely rare, let alone became a king.

Most of the Millennium Snappers were like fish in cages, living in the territory of the Blood Sea Divine Wood City they could see all their lives.

These people were easy to fool, but Han Fei was not stupid. He said in shock, ‘Are you kidding me? This person didn’t even need to prepare to transcend the tribulation? Is he already making a breakthrough?’

The old turtle said, “There’s something even more unexpected... Do you know where he’s transcending the tribulation?”

Han Fei was puzzled. Where?”

The old turtle said, “Above the Blood Sea Divine Wood City, he doesn’t even avoid the Blood Sea Divine Wood. This means that he is confident that he has completely parasitized the Blood Sea Divine Wood. He treats this Blood Sea Divine Wood as his avatar. Heh... what an arrogant and conceited guy.”

Han Fei said, “Let’s go and take a look.”

Outside the Blood Sea Divine Wood City, the Fish Dragon King found that he couldn’t go back. The Blood Sea Divine Wood City was sealed as if something big had happened.

The Fish Dragon King didn’t dare to say anything. In this case, he would just stay outside... As long as he was away from this place, Han Fei could do whatever he wanted there... After this, he would go back and still be a Heavenly Talent!

Compared to the Fish Dragon King, Yang Ruoyun was the one who was scared.

She knew that Han Fei would cause trouble, but she didn’t expect him to do such a big thing!

Han Fei suddenly appeared and a Venerable was about to transcend the King’s Tribulation? Was Han Fei’s current ability enough to interfere with the King’s Tribulation?

While Yang Ruoyun’s subordinates were still exclaiming, Yang Ruoyun said, “Come on, finish what you’re doing and go back to cultivate.”

In the Water-Wood World, everyone knew that tribulations couldn’t be conducted on the Sea Cloud Divine Tree. However, Xue Fan was directly transcending tribulations in the sky.

The old turtle certainly wouldn’t lie to him. Why?

Han Fei said, “Old Yuan, since the Divine Son can meet me, it means that he’s still alive. If Xue Fan transcends the tribulation here, won’t he be courting death?”

But after a moment of silence, the old turtle said, “Not necessarily.”

Han Fei frowned. “Why?”

The old turtle said, "As far as ordinary people know, Half-Kings and Fake Kings are all Venerables. It's impossible for a Venerable to challenge a king. However, it's not absolute. For example, those with particularly strong bloodlines can also kill a king. This proves that the so-called king is only in the Sea Establishment realm. It doesn't mean that he's invincible against all people under the Sea Establishment realm. As for Xue Fan, he has been running the evil technique for tens of thousands of years. Although he hasn't completely replaced the Blood Sea Divine Wood, his Great Dao is special. His body is likely to be fused with the Blood Sea Divine Wood, and the heavenly tribulation might make a wrong judgment."

"Hiss ~"

Han Fei gasped. "Heavenly tribulation makes a wrong judgment? Do you mean that he can make the divine son... help him resist the heavenly tribulation? Isn't this a joke? The divine son has already become a king. Isn't it easy for a king to resist the heavenly tribulation of a Venerable?"

In a moment, the two had reached the top of the Blood Sea Divine Wood. During this period, Han Fei carefully avoided all contact with his surroundings.

Xue Fan walked the Great Dao of parasitism and wasn't weak at all.

Most of what Han Fei saw now was possessed by him. Everything here seemed to be controlled by Xue Fan...

When Han Fei came out of the sea and saw the sky, he saw raging waves within thousands of kilometers. Above the sky, thunder rumbled and the clouds rolled like dragons. It looked like doomsday!

Xue Fan stood in midair, looking down at the sky. Around him, a big black umbrella was spinning.

Han Fei's heart sank. "Is this guy really going to transcend the tribulation now?"

Han Fei was uneasy.

It was too fast. He didn't even have the time to make any moves before Xue Fan transcended the tribulation!

Or rather, Xue Fan had been preparing for tens of thousands of years?

Rumble!

About an hour later, the Heavenly Tribulation seemed to be ready. The lightning in the sky was getting more and more intense. Xue Fan smiled and glanced down, before he raised his head and roared, "Come my tribulation!"

"Seriously?"

Han Fei was lost for words. This son of a b\*tch was indeed about to transcend the king's tribulation. This was completely beyond Han Fei's expectations.

Kakaka~

Thunder seemed to be gathering in the sky.

Boom!

“Phew ~”

Xue Fan extended his hand to the sky, and billions of roots formed a cage, locking him inside.

Crack ~

The thick lightning directly enveloped Xue Fan.

At this moment, Han Fei realized that Xue Fan had really begun. He wondered if the Fish Dragon King had sent the message in time.

The first lightning bolt was the least powerful.

Han Fei could only see that the electric arcs drilled into Xue Fan’s body through the broken cage.

Xue Fan was wearing a blood-red battle suit.

At some point, a round ball wrapped in wood appeared under Xue Fan’s feet. His roots were stuck in the ball.

Xue Fan stretched out his hand to block the first bolt of lightning. His armor was not broken, he didn’t bleed, and his long hair fluttered.

The old turtle couldn’t help but say, “This person is too strong. I’m afraid this heavenly tribulation might not be able to kill him..”

Han Fei rolled his eyes. Just say that you think this guy can transcend the tribulation! I know that he is extraordinary, but now we have to think about how to destroy him...

A bolt of lightning struck down.

The second lightning struck, and Xue Fan was still safe.

Han Fei saw that cracks appeared between Xue Fan’s fingers. This meant that there was a limit to Xue Fan.

However, Xue Fan didn’t care. He didn’t even use the big black umbrella.

Faced with the third lightning bolt, Xue Fan raised his hand, and four vines extended from the void and whipped the sky. After doing this, Xue Fan opened his arms and embraced the lightning.

In the void, a loud roar sounded, and Xue Fan laughed proudly. “The heavenly tribulation tempered my body to strengthen my body. Thirty thousand years ago, the last tribulation didn’t come. Let’s see... whether you’re coming or not today? If you don’t come, I’ll forcibly become a king. What can you do?”

Boom!

The lightning struck down, but Xue Fan didn’t retreat at all. Electric arcs flashed on his body, and cracks appeared on his battle suit.

There was no telling if it was because he was too strong, but three consecutive lightning strikes failed to knock him back.

Seeing this scene, Han Fei couldn't help but exclaim, "Oh my god! How strong is this guy?"

The old turtle said, "Each heavenly tribulation is stronger than the last. In the Age of Gods, there were many peerless geniuses who could withstand lightning with their bodies. Let alone three, there were even some who could withstand six."

Han Fei asked, "Are you talking about me?"

The old turtle said, "You didn't make it! Your body was shattered by the third attack."

Han Fei was speechless.

He wanted to say that back then, he was only an intermediate Venerable and hadn't reached the peak yet.

However, Han Fei recalled that feeling. If he went up now, he would only be able to withstand three lightning strikes at most.

But then, Xue Fan's strength refreshed Han Fei's worldview.

The fourth lightning bolt shattered Xue Fan's battle suit.

The fifth lightning struck Xue Fan, who was hit to the top of the Blood Sea Divine Wood.

Xue Fan was supported by the Blood Sea Divine Wood. A large amount of Earth Vein Spring poured into his body, and his body quickly recovered.

Sure enough, this guy blocked another two lightning strikes with his body. And at this point, the roots under Xue Fan's feet and the big ball were still intact.

More importantly, according to the divine son, Xue Fan's big black umbrella that could withstand three lightning strikes hadn't been used yet!

'When Xue Fan passed five lightning strikes in a row, Han Fei couldn't sit still anymore. His white-mist body activated the Nine Palace Luck Ruler in Forge the Universe, but the marker stopped at "Impasse".

'An impasse again?!

Han Fei took a deep breath and threw three wisps of Chaos Qi into it, intending to change his luck.

However, after the three wisps of Chaotic Qi entered the ruler, they didn't even cause a ripple.

At this time, the sixth lightning struck, and Xue Fan's upper arm was blown to smithereens, and his body was cut in half.

Han Fei knew that he couldn't wait anymore!

Earth veins? This guy didn't need to rely on the earth veins to sustain him at all.

This meant that if Xue Fan could withstand another lightning bolt, with this big black umbrella, he could definitely transcend the king's tribulation.

How could Han Fei let that happen?

Immediately, all ten wisps of Chaotic Qi were stuffed into the Nine Palace Luck Ruler. At this moment, the Nine Palace Luck Ruler finally turned “Impasse” into “Unpredictable”.

Han Fei’s heart sank. Once it was “Unpredictable”, it could no longer be changed. It seemed that “Impasse” could only be changed into “Unpredictable”.

The old turtle watched the whole time as if he were thinking about something.

Seeing that Han Fei seemed to be going all out, the old turtle said, “Han Fei, why don’t you wait a little longer? I think it’s a little strange...”

## **Chapter 1620: To Transcend the Tribulation (2)**

“Wait for what? If I wait any longer, he will become a king...”

The next lightning bolt was about to appear. The void vibrated, and a green vine swept across the sky. On the other side, a giant shell appeared.

The giant shell opened its mouth, and the void collapsed as it charged into the tribulation.

The two kings came out at the same time, and the power of the heavens was unparalleled. It was as if the sea was collapsing, and furious waves rolled up thousands of meters. Vines and roots intertwined in the sky.

The two kings attacked at the same time.

The White Armor Emperor tried to interfere with Xue Fan’s tribulation.

As Queen Life attacked the Blood Sea Divine Wood branches that extended out of the void, she swept across thousands of kilometers and plunged into the ground veins of the Blood Sea Divine Wood City.

Han Fei was greatly relieved to see that. It seemed that the Fish Dragon King had done a good job. In the puppet that the Fish Dragon King sent out, Han Fei only told Queen Life the simplest operation:

“Join forces with the White Armor Emperor. Break the ground veins first before stopping the king’s tribulation.”

However, although the first thing Queen Life did was to destroy the ground veins, they came still a little slow. After all, Xue Fan had already started his tribulation when they came.

At this time, it was a war between the three kings. Han Fei didn’t intend to fight.

Han Fei thought that the result of the Nine Palace Luck Ruler’s divination appeared because he would take action.

However, if he didn’t do anything, he would just be a bystander. Han Fei regretted his 13 wisps of Chaos Qi now. The old turtle said, “Don’t celebrate too early. Your goal wasn’t completely achieved. They came too slowly. Even without your notice, the two of them should have arrived by now. It’s impossible for them, kings, not to sense someone transcending a king-level tribulation. They just didn’t expect that Xue Fan would transcend the tribulation right above the Blood Sea Divine Wood...”

Han Fei looked gloomy. His original plan was very clear: Xue Fan had been running the ground veins of the Blood Sea Divine Wood City for many years... Therefore, whether it was the message from the Fish Dragon King, the influence of Yang Ruoyun and other human transmigrators, or his wandering in the Blood Sea Divine Wood City for the past two days, it was all to destroy Xue Fan's advantages of the ground veins.

As soon as the ground veins were broken, the divine sons fought back, and the two kings arrived...

Han Fei couldn't figure out why Xue Fan could transcend the king's tribulation without the help of a king.

At this moment, in the sky, Xue Fan seemed to be crazy. He burst into fury and laughed crazily. "You two think you can deal with me? When I become a king, it will be the time for you to die... Patriarch Blood Sea, attack..."

While destroying the ground veins crazily, Mu Wuhua said, "Attack."

Buzz!

At that moment, Xue Fan asked the Blood Sea Divine Wood to take action.

And the White Armor Emperor thought that Mu Wuhua was asking him to attack, thinking: I am attacking!

Bang! Bang! Bang!

But in the next moment, at least a hundred ground veins erupted within a hundred thousand kilometers. Roots suddenly surged out and swept across the wood of the Big Red Trunk.

Xue Fan was transcending his tribulation, but he didn't expect that the Blood Sea Divine Wood would move at this moment.

However, although the Blood Sea Divine Wood was trying to destroy the tribulation, it didn't attack Xue Fan. Therefore, the White Armored Emperor thought that it was Queen Life who did something to the Blood Sea Divine Wood.

At this moment, the White Armored Emperor hesitated. Is Queen Life already so powerful? Has she already extended her hand to the Blood Sea Divine Wood City?

Boom!

As the seventh lightning struck down, Xue Fan's body and fingers both cracked and he roared, "Parasitic Technique!" At that moment, a blood-colored book appeared in Xue Fan's hand.

With a flip of the book, a hundred thousand souls appeared in the sky.

At this moment, Xue Fan finally used other means.

Furthermore, Xue Fan was too ruthless and actually released a hundred thousand souls at the same time. Those souls that could long exist had to be at least Law Enforcers!

One lightning bolt and a hundred thousand souls were instantly annihilated.

Xue Fan grabbed the branch of the Blood Sea Divine Wood and roared, "Is it useful to betray me at this moment?"

Xue Fan grinned ferociously. "I bet you won't dare to enter my tribulation."

After that, Xue Fan's body exploded, but it quickly revolved and gathered in an instant.

Han Fei's heart sank. F\*ck, why can't the two kings enter his tribulation and kill him?

The old turtle said, "They can't go in. The tribulation of a king is definitely not an ordinary tribulation. It's a test of the Great Dao to the person transcending the tribulation. If you force your way in, you'll be violating the rules of the Great Dao. How can the heavens tolerate you?"

Han Fei took a deep breath, looked at Xue Fan whose body was rapidly regenerating, and suddenly remembered that Ning Jing had once told him that the White Armor Emperor transcended the tribulation first, followed by Queen Life. If it could be destroyed, the White Armor Emperor would have destroyed Queen Life's tribulation long ago and wouldn't have let her become a king.

However, just because they couldn't enter the tribulation didn't mean they couldn't attack outside...

Queen Life used a wisp of green vine as a spear and shot it into the heavenly tribulation. As a poison barrier descended, Xue Fan's body was corroded. This was the first time Han Fei saw Mu Wuhua use poison.

So, Queen Life was actually a poison cultivator?

The White Armor Emperor almost never stopped attacking. All kinds of energy spears and shocking shells were sent into the tribulation.

But the power of the heavens was hard to break.

Although one could threaten the person who was transcending the tribulation, the tribulation would attack the external power first. Therefore, the White Armor Emperor's attack basically didn't affect Xue Fan.

"Parasitic Technique."

In the void, corroded roots extended out one after another.

In the blink of an eye, there were as many as ten million. Xue Fan said disdainfully, "Poison... I forgot to tell you that my Great Dao is not only parasitic... but also devouring..."

At that moment, the handsome Xue Fan turned into an ugly man covered in pus, but he didn't die.

The eighth lightning bolt fell, and Xue Fan threw out the blood-colored book in his hand. All the living souls in it shot out. There were as many as a million.

At that moment, no matter if it was Han Fei, Queen Life, or the White Armor Emperor, they were all horrified. How f\*cking brutal was this person? He sacrificed millions of lives just to help him survive this tribulation?

But Xue Fan didn't care. He looked at Queen Life and the White Armor Emperor indifferently and his eyes were full of disdain.

At this time, lightning fell from the sky, and millions of souls vanished. In the end, lightning fell on Xue Fan and was swallowed by him.

Although his body was mostly shattered, he took the lightning.

Han Fei thought to himself, Not good! That big black umbrella must be reserved for the last tribulation.

Han Fei remembered that the old turtle once told him that the Umbrella Emperor of his generation could block anything with an umbrella. This thing could probably not only block lightning tribulation, but also block heavenly demons.

Han Fei took a deep breath. Why did he think that a guy who had been preparing for tens of thousands of years must resist the heavenly tribulation with the power of the ground veins?

Han Fei even thought that Xue Fan should have known of his existence long ago. So, was he absorbing the ground veins to mislead him into thinking that he needed the Earth Vein Spring to consolidate the advantages?

If Xue Fan could even predict this, he could only admit defeat.

But at this moment, the eighth lightning tribulation had been transcended, and Han Fei couldn't wait anymore. The White Armor Emperor threw into the tribulation a green jade shell that contained an extremely high amount of energy.

Queen Life threw a fruit. Wherever the fruit passed, the void trembled.

Buzz!

At this moment, Han Fei couldn't just sit idle. He knew better than anyone that once Xue Fan successfully transcended the tribulation, not only would the Divine Son die, but Queen Life and the White Armored Emperor would also be no match for him.

The Water-Wood World would definitely be ruled by Xue Fan.

At that moment, his black-mist body rose into the sky.

Compared to others, this was just Han Fei's black-mist body. He didn't care if his black-mist body would be destroyed by lightning. Anyway, he was immortal, and he still had his white-mist body!

At the moment Han Fei took action, he forgot the "Impasse" that the Nine Palace Luck Ruler had calculated. Perhaps, because the "Impasse" had become "Unpredictable", he regained the confidence to launch a sneak attack.

At that moment, the White Armor Emperor and Queen Life both looked at Han Fei.

Xue Fan put on a smile and seemed to have a sigh of relief. He said, "Sure enough, that place didn't trap you. You still came."

Han Fei roared, "Don't even think about becoming a king!"

At that moment, Han Fei carried a hundred wisps of Chaotic Qi in his body, not for anything else but to ensure that the divine son could still be alive.

If the Chaotic Qi was gone, he could still get it. But if the Divine Son was gone, he would really be gone.

He wanted to see the scene when the Divine Son and the Water Immortal met again.

Crack!

Rumble!

Bang!

Ka ka ka

At that moment, the ninth lightning bolt fell from the sky, the void collapsed, the spiritual fruits exploded, and the Chaotic Qi exploded. In an instant, the sky was dark, and a terrifying scene appeared. In an instant, waves swept more than 50,000 kilometers away.

Even the Blood Sea Sacred Wood had been blown into bald at this moment.

Boom!

A Great Dao crack appeared, and a rain of blood fell. This was a symbol of the death of a Venerable. However, the rain was definitely not ordinary.

Therefore, the moment the blood rain appeared, everyone was sure that this guy had finally died.

The surging waves didn't stop for a long time, and the thick lightning was still rolling in the sky.

At this moment, except for Queen Life and the White Armored Emperor, no other creatures could survive the explosion.

Oh! There was another exception... That was Han Fei, who suddenly appeared from the void and revealed his true body.

At that moment, there was no time for his twin bodies to fuse, so the black mist body perished with Xue Fan.

Han Fei waved at Queen Life. "You're too late..."

However, in the next moment, black clouds pressed down from the sky, and lightning appeared again.

Han Fei felt that he was faced with a life-and-death crisis, so he subconsciously exerted the power of his Great Dao to its greatest extent. He stomped and the Coiled Turtle Array appeared.

Bang!

With a whip, Han Fei was sent flying three hundred kilometers.

At that moment, the heavenly tribulation descended again, enveloping Han Fei.

In the lightning tribulation, a contemptuous voice echoed, "So, you think you've won?"
